Preface

This book teaches Russian one word at a time, and it teaches each word by taking it apart. It assumes no Russian and no Cyrillic. Every section takes one small expression, introduces only the letters, sounds, or grammar that expression needs, connects it to history you may already know, and ends by asking for it back.

Russian is a Slavic language, a cousin of English far enough back that the family resemblance survives in surprising places — *three* is *tri*, *sister* is *sestrá* — and it is worth knowing which resemblances are real and which are traps. This book flags both.

Stress matters enormously in Russian, and ordinary Cyrillic does not print it. So the romanization here marks the stressed vowel with an acute accent, and then gradually yields to the script as you come to read it.

This is a starter edition: thirteen chapters, complete in themselves, with more being written. Chapters 1 and 2 were written straight into LaTeX; chapters 3 to 13 are generated from the same lesson files the audio course reads, so the printed page and the spoken lesson cannot drift apart.

How to use this book

Every numbered section is one word, or one small phrase, and takes a few minutes — the length of a queue, an errand, or the walk to the bus. Read them in order the first time through: each section stands on the ones before it, and nothing is used before it has been taught. After that the book becomes reference, and you can open it anywhere.

Say the Russian out loud wherever you can. The prompts under *Your turn* are written to be spoken, and saying a word is most of what makes it stay. The questions under *Before you move on* carry their own answers in brackets: cover them, answer from memory, then look.

Nothing here is gated behind the alphabet. Each lesson introduces exactly the letters and sounds its own word needs, so you are reading real

words from the first page rather than drilling a chart.

Chapter 1

Greetings and courtesy

Modes: **voice** (1) **eyes** (6) **pen** (10) **Hands-free start:** the first 7 of 17 lessons.

> ***By the end of this chapter:*** I can greet someone in Russian, respond courteously, and close the exchange naturally.
>
> *Complete RU-C01-checkpoint, the chapter's closing checkpoint, and demonstrate the chapter promise: greet someone in Russian, respond courteously, and close the exchange naturally, then write its ten letters and two of its words from sound alone.*

1.1 Privét — "hi," the everyday hello

Your first Russian word and Cyrillic letters. Several shapes are **false friends** that look Latin but sound different; meet them head-on.

The letters in this word

(If you already read Cyrillic, skim this.) Russian is written **left to right**, like English. Six letters spell *privét*; meet three of them now:

- п = "p" — think Greek **pi** (Π), not Latin p.
- р = **"r"** — a rolled r. **FALSE FRIEND:** it looks like Latin *p* but says *r* (it's Greek **rho**).
- в = **"v"** — **FALSE FRIEND:** looks like Latin *B* but says *v*.

The other three, and the whole written word, arrive over this chapter. Say **privét** with the stress on the second syllable; Russian never writes its stress marks, so you learn the stress *with* the word.

Two false friends in one short word — р=r and в=v — are the two you'll trip on most. Fix them now and half of Cyrillic stops fooling you.

The word, taken apart — and its English cousins

Privét is built from *pri-* ("at, to, up against") + the old root *-vet* ("to speak, to counsel"). The picture is *a word brought to you* — a greeting handed over.
That root *-vet* is quietly everywhere in Russian, and it hides a word you already know in English:

- *sovét* = "a speaking-together" → **council, advice**. Borrowed into English as **Soviet** — the *Soviet* Union was literally the *Council* Union.
- *otvét* = "a speaking-back" → **an answer**.
- *obét* = "a vow."

So *privét* is a cousin of **Soviet** — the same "speak" root, one a friendly hello, the other the most famous Russian word in English.

The word, taken apart — and its English cousins

Russian *privét*, Spanish *hola*, French *salut*, German *hallo*, and English *hi* fill the casual slot. Russian draws the line sharply: use *privét* with friends and the next lesson's formal greeting with everyone else.

Why it's said this way

Privét is **informal** — warm, but only for people you'd address casually. To a stranger, an elder, a shopkeeper, or your boss, it can sound too familiar; there you reach for *zdrávstvuyte*. Russian draws the formal/informal line more strictly than English does, and greetings are where you first feel it.

Your turn

Say these aloud:

- p · r · i · v · ye · t → "privét," stress the *vyet*
- which letter looks like Latin B but says "v" (в), and which looks like Latin p but says "r" (р)
- "privét" to a friend

Before you move on

Which letter looks like Latin B, and which looks like Latin p? What does each really say? (в says v, р says r — the two false friends.) Is it formal or informal? (Informal — friends only.) And what famous English word shares its *-vet* "speak" root? (*Soviet*, from *sovét*, "a council.")

1.2 Zdrávstvuyte — "be healthy," the formal hello

You can say *privét* to a friend. Now the word for everyone else — longer, older, and worth the effort.

What to know first

- the *privét* lesson — this is its formal opposite, and it reuses в=v and р=r from there.

The letters in this word

(Skim if you read Cyrillic.) It's a long word, and you already know two of its letters, р and в. Meet three more now:

- з = "z" — looks like the digit **3**.
- с = **"s"** — **FALSE FRIEND:** looks like Latin *C* but says *s* (Greek **sigma**).
- у = **"oo"** (as in *boot*) — **FALSE FRIEND:** looks like Latin *y* but says *oo*.

Its other letters arrive with this chapter's next words; the whole written word waits until every one of them is yours.

A pronunciation mercy: the first *v* is **silent** here — natives say *"zdrás-tvuy-tye,"* dropping the *v* in *-vstv-*. Nobody articulates all those consonants.

zdrávstvuyte ("ZDRAST-vooy-tye")

The word, taken apart — and its English cousins

Zdrávstvuyte is a wish for **health**. Its core is *zdoróvye* ("health") / *zdoróv* ("healthy") — so the greeting literally means **"be healthy!"** You are, politely, wishing wellness on the person in front of you.

- *-te* on the end is the **plural/polite ending** — the same *-te* that makes a command respectful. Drop it and you get the informal singular *zdrávstvuy*.

An honest note on cousins: Russian *zdoróvye* ("health") is **not** related to English *health* — they come from different roots (English *health/whole/hale* is Germanic). The *idea* is the shared one: many languages greet by wishing **health** (Latin *salve* = "be well," the ancestor of Spanish *hola*'s cousin *salud*) or **peace** (Arabic *salām*, Hebrew *shalom*). Russian picked health.

Grammar Lens — Russian's formal *you* is plural

The *-te* ending here is your first taste of a rule that runs through Russian: **politeness = plural.** To address one person formally, Russian uses the *plural* "you" (*vy*) and plural verb endings — exactly like French *vous* or the *usted* idea in Spanish. So *zdrávstvuy-**te*** is "be healthy" said to a *vy* — one respected person, addressed as if plural.

Your turn

Say these aloud:

- "ZDRAST-vooy-tye" — let the first `в` go silent
- which two false friends appear here (`с` = s, `у` = oo)
- "zdrávstvuyte" to a stranger; "privét" to a friend

Before you move on

Say *zdrávstvuyte*. What does it literally wish? (Health — "be healthy.") Formal or informal, and how do you know? (Formal — the polite plural *-te*.) What do `с` and `у` each sound like? (s and oo

— two false friends.)

1.3 да (da) — "yes"

Two greetings so far, one casual and one formal. The next two words are the shortest in the chapter and the most used in the language.

The letters in this word

(Skim if you read Cyrillic.) Just two, both new and both heard in *zdrávstvuyte*: д (d, from Greek delta Δ) + а (a, as in *father*) — the one vowel that looks *and* sounds like Latin a.

да = **da** — short, clear, stressed. The easiest word in the language to read.

The word, taken apart — and its English cousins

да is an old Slavic да that has always meant "yes." But it moonlights: Russians sprinkle да through speech as a soft **"and / so / well..."** or a tag —

- *nu da* = "well, yeah."
- *«да?»* on the end of a sentence = "...right?" (like French *n'est-ce pas?*).

So the first word you can *say* is also one of the most common little glue-words in the language.

The word, taken apart — and its English cousins

Every language improvised its own "yes," and you can hear where each one came from:

- Russian да — an old Slavic affirmative.
- Spanish **sí** — Latin *sic*, "thus, so."
- French **oui** — Latin *hoc ille*, "that's it."

- German **ja** — old Germanic *ja*.
- Latin **ita** or **sic** — "thus, so."

Notice how many languages say "yes" with a word that means **"so / thus"** (*sí*, *sic*, *ita*). Russian's да is its own thing — but its side-job as a "so/and" word rhymes with that pattern.

Your turn

Say these aloud:

- "da"
- *nu da* — "well, yeah"
- which letter is д (d) and which is а (a)

Before you move on

Read it: да Two letters — name their sounds (d, a). Besides "yes," what else does да do in a sentence? (Works as a soft "and / well… / right?")

1.4 нет (nyet) — "no," literally "there-is-not"

Say *da*. One syllable, no trap in it. Its opposite has a trap.

What to know first

- *da* — its opposite, learned together as a pair.

The letters in this word

(Skim if you read Cyrillic.) Three letters: н · е · т.

- н = **"n"** — **FALSE FRIEND:** it looks exactly like Latin *H* but says *n*.
- е = "ye" (as in *yes*) — looks like Latin e, but carries a *y*-glide; it is the *ye* of *privét*.

- т = "t" — like Latin T.

  нет = **nyet** ("nyeht") — one syllable, stressed, with a soft *y* onset.

That н=n is the last of the big four false friends (н=n; the other three say *v*, *r* and *s*). Learn those four and Cyrillic stops disguising itself as Latin.

The word, taken apart — and its English cousins

нет is a **compression of a whole clause**. Vasmer traces it to older *ne je tu*, **"not is here."**

- не (*nye*) — the negator, **"not."**
- *je* — an old "is", the verb of English *is*.
- *tu* — "here", as in *tut*.

So Russian's "no" is "**not-is-here**", worn down to one syllable. (Its longer form *nyétu*, "there isn't any," still shows the seam.)
And that little не is one of the deepest words in the whole Indo-European family — the ancient negation ***ne**. You already own a dozen of its English children:

> не ↔ English **no, not, none, never, nay, neither** ↔ Latin **nōn** ↔ Sanskrit **na** ↔ French **non**.

When you say нет, you are pronouncing a cousin of *no* that has meant "not" for six thousand years.

The word, taken apart — and its English cousins

Unlike "yes" — where every language improvised — the world's "no" is astonishingly **one word**, stretched across the whole family. Russian нет carries не; English says **no** and **not**; Latin said *nōn*, French says *non*, Sanskrit said *na*. All of them are the same ancient **ne*, and нет is Russia's share of it.

Your turn

Say these aloud:

- "nyet"
- which letter looks like Latin H but says "n" (н)
- "*da…* нет" — yes, then no

Before you move on

Read it: нет What clause is it worn down from? (Older *ne je tu*, "not is here.") What does н sound like — and what does it *look* like? (Says n, looks like Latin H.) Name two English cousins of не. (no, not, never, none, nay…)

1.5 спасибо (spasíbo) — "God save you," now just "thanks"

You can greet someone. Now thank them — and this word has a whole sentence folded inside it.

What to know first

- *privét* — to contrast б (b) with the B-shaped letter you met there, which says *v*.

The letters in this word

(Skim if you read Cyrillic.) Six letters: с · п · а · с · и · б · о.

- с = "s" (the false friend), п = "p", а = "a" — all met already.
- и = "ee," like a backwards Latin N; о = "o".
- б = **"b"** — meet the partner that ends the confusion: б is *b*, while the very similar-looking letter in *privét* is *v*. One has an open belly (б = b); the other stacks two bowls and says *v*.

A sound note: the first о is *unstressed*, so it **reduces** toward "a" — natives say *"spa-SEE-ba."* Unstressed Russian о almost always softens to an *a*-ish sound. Stress lands on -си-.

спасибо = **spasíbo** ("spa-SEE-ba")

The word, taken apart — and its English cousins

спасибо is a **frozen prayer**. It is a worn-down contraction of *spasí Bog* — **"God save [you]"**:

- спаси — "save!", the command form of *spasti* ("to save, rescue").
- *Bog* — **"God."**

Over centuries *spasí Bog* fused and shed its final consonant into today's спасибо. You are, etymologically, blessing whoever helped you. Courtesy words are often fossilised blessings — Spanish **adiós** is *a Dios*, English **goodbye** is *God be with ye*. спасибо belongs to that family: a little "God save you," said so often the prayer wore invisible.

The word, taken apart — and its English cousins

- Russian спасибо — **"God save you."**
- Spanish **gracias** — Latin *gratia*, "grace."
- French **merci** — Latin *merces*, "reward, mercy."
- German **danke** — "think of, be mindful."
- English **thank you** — "think": I'll hold you in thought.

Every culture built "thanks" from a different metaphor — grace, reward, mindful thought — and Russian built it from a **blessing**.

Why it's said this way

Because it began as *spasí Bog*, older or very devout speakers sometimes still feel the "God" in it; a few religious communities prefer *blagodaryú* ("I give a blessing," a calque of Greek *eucharistō*). But in everyday modern Russian, спасибо is simply **the** word for thanks, its prayer long dissolved.

Your turn

Say these aloud:

- "spa-SEE-ba" — reduce that first о to an *a*

- which letter is b (б), and what the two-bowled letter of *privét* says (v)
- "спасибо" — and recall the hidden *spasí Bog*

Before you move on

Read it: спасибо What two words is it worn down from, and what do they mean? (*spasí Bog* — "God save [you]."") Which other courtesy words are fossilised blessings? (*adiós* = to God; *goodbye* = God be with ye.) Does б say b or v? (b.)

1.6 пожалуйста (pozhálusta) — "please," and also "you're welcome"

Say *spasíbo*. The word that answers it, and asks for things, is the longest you have met — and shorter than it looks when spoken.

What to know first

- *spasíbo* — this is its natural partner: *spasíbo* → пожалуйста is Russia's "thank you" → "you're welcome."

The letters in this word

(Skim if you read Cyrillic.) Everything here is familiar except one new letter: пожалуйста.

- ж = **"zh"** — the sound in *mea**s**ure*. It looks like a little beetle with wings; no Latin letter carries this sound.
- The rest you know: п(p) о(o) а(a) л(l) у(oo) й(y) с(s) т(t).

A big pronunciation mercy: nobody says all four middle syllables. The written пожалуйста is spoken **"pa-ZHAL-sta,"** swallowing the -уй- entirely, and the first о reduces to *a*.

пожалуйста = **pozhálusta**, said *"pa-ZHAL-sta"*

The word, taken apart — and its English cousins

пожалуйста is пожалуй + a softening tag -ста. пожалуй is either the command form of the old verb *zhálovat'*, "to grant, to bestow a favour", or a worn-down *pozhálu(yu)*, "I grant" (Vasmer gives both) — on the root жал-, often linked to *zhal'*, "a pity".
So under the politeness sits **"grant [me this], do me the kindness."** English **please** is the same idea worn down — short for *if it please you*. It also does a job English splits off: the **reply to thanks**. Where English needs a separate "you're welcome," Russian answers *spasíbo* with пожалуйста.

The word, taken apart — and its English cousins

- Russian пожалуйста — "grant [me] a favour."
- French **s'il vous plaît** — "if it pleases you."
- Spanish **por favor** — "for a favour."
- English **please** — "[if it] please [you]."
- German **bitte** — "I request," and also "you're welcome."

German *bitte* pulls the same double shift — one word for both "please" and "you're welcome."

Why it's said this way

Because it is really a request for a kindness, пожалуйста also softens commands: add it to an instruction and a bark becomes a request. And as the answer to *spasíbo*, it closes the ritual of thanks the way *"you're welcome"* does.

Your turn

Say these aloud:

- "pa-ZHAL-sta" — drop the middle -уй-
- the new sound ж (the *zh* in *measure*)
- the exchange — "spasíbo!" … "пожалуйста!"

Before you move on

Read it: пожалуйста What favour-root hides inside it? (*zhálovat'*, "to grant a favour" — linked to *zhal'*, "pity.") What two English phrases does this one word cover? ("please" **and** "you're welcome.") What sound does ж make? (*zh*, as in *measure*.)

1.7 Chapter 1 — putting it together

Six words, all of them now in your ear and your mouth. The writing lessons that follow put their letters in your hand; first, prove you can say every one.

Sounds you'll need

Four letters in these words look Latin and lie. You will write them next; for now, say each sound aloud:

- the letter shaped like a Latin B says **v** — as in *privét*.
- the letter shaped like a Latin P says **r** — as in *privét*.
- the letter shaped like a Latin C says **s** — as in *spasíbo*.
- the letter shaped like a Latin H says **n** — as in *nyet*.

And the two vowel traps: the letter shaped like a Latin y says "oo", and the one shaped like a Latin e says "ye."

Your turn — say them cold

Say each, then what it means:

- *privét* (hi)
- *zdrávstvuyte* (hello, formal)
- *spasíbo* (thank you)
- *da* (yes)
- *nyet* (no)
- *pozhálusta* (please / you're welcome)

The exchange

Run the whole ritual, formal then informal:

- Meet a stranger: *Zdrávstvuyte!*
- They thank you: *Spasíbo!* → you answer *Pozhálusta!*
- A friend waves: *Privét!*
- Answer a question: *Da!* … or *Nyet!*

What you've built — the thread through the chapter

Every word carried a hidden story:

- *privét* shares its *-vet* "speak" root with **Soviet** (*sovét*, a council).
- *zdrávstvuyte* wishes you **health**; *spasíbo* blesses you (*God save you*).
- *nyet* is the ancient ***ne** you already own in *no, not, never.*
- *pozhálusta* asks for a **favour** — and doubles as "you're welcome."

Before you move on

Without looking: which greeting is formal and which is informal? (*zdrávstvuyte / privét.*) Which word answers *spasíbo*? (*pozhálusta.*) Name the four false-friend letters and their real sounds. (The B-shape says v, the P-shape r, the C-shape s, the H-shape n.)

1.8 в and р — writing the two great false friends

You *read* these two in привет. Now you'll **write** them. в and р are the letters that fool every beginner — they wear Latin faces (*B* and *P*) but say *v* and *r*. Forming them by hand is the fastest way to stop your eye from lying to you.

Why it's said this way

Both came from **Greek**, not Latin, so the shape and the sound drifted apart:

- в is Greek **beta** — beta made the "v" sound in later Greek, and Cyrillic kept it. It looks like Latin *B*; it says **v**.
- р is Greek **rho** — always an "r." It looks like Latin *P*; it says a rolled **r**.

Writing — break it apart, then write it

How these letters are written, one after another, stroke by stroke: в, р

в ("v") — *a vertical, then two stacked bowls*:

1. **the vertical** — a straight downstroke, top to bottom.
2. **the upper bowl** — from the top of the vertical, bulge out right and back in.
3. **the lower bowl** — from the middle, a second belly out to the base.

Two bellies stacked on a spine — that's what tells в apart from Latin *B* (one belly) and from Russian б (which you'll meet next).

р ("r") — *a vertical that drops below the line, then a top loop*:

1. **the vertical** — a downstroke that sinks **below** the baseline (like the tail of Latin *p*).
2. **the loop** — a single closed bump at the **top**, on the right.

So р is drawn like a Latin lowercase *p*, tail and all — but it is an **r**.

Their capitals, В and Р, are the same shapes drawn to full height, with Р sitting on the line. They look even more like Latin *B* and *P*, and they still say *v* and *r*.

Your turn

- *Say it:* trace в — "vertical, upper bowl, lower bowl" — and say its sound, "v"
- *Say it:* trace р — "vertical below the line, top loop" — and say its sound, "r"
- *Write it:* привет slowly, pausing on the в and the р

Before you move on

Draw в from its three strokes — what sound? ("v"; a vertical + two stacked bowls.) Draw р — what sound, and which Greek letter? ("r"; Greek **rho**.) Which Latin letters do they *look* like, and why is that a trap? (*B* and *P* — they're Greek by descent, so the shapes stayed but the sounds didn't.) Next: the other two false friends, с and н.

1.9 с and н — the last two false friends

Two more letters that wear a Latin mask. с looks like Latin *C* but says **s**; н looks like Latin *H* but says **n**. You've already read them — с opens спасибо, н opens нет — now write them and the four-letter false-friend set (в р с н) is complete.

Writing — break it apart, then write it

How these letters are written, one after another, stroke by stroke: с, н

с ("s") — *a single open curve*:

1. **the curve** — one stroke: start top-right, sweep left and down like a *C*, open on the right.

That's the whole letter — a lone crescent. It **is** the shape of Latin *C*, but it comes from **Greek sigma** (the "s" sound). Think of it as the "s" hiding inside the English word *centre* said the soft way — *c* that sounds like *s*.

н ("n") — *two verticals joined by a middle bar* (a Latin *H* shape):

1. **the left vertical** — a downstroke.
2. **the cross bar** — a short horizontal joining the two uprights **in the middle** (not slanted like a Latin *N*).
3. **the right vertical** — a second downstroke, parallel to the first.

So н is drawn exactly like a capital *H* — two posts and a rung — but it is an **n**. (Russian's letter for the *H*-sound doesn't exist; the "h" of foreign words is usually spelled with г or х.)

The capital of с is С, the same crescent drawn to full height, and it still says *s*.

Script — the four false friends, together

letter	looks like	actually says, and from
в	Latin B	**v**, from Greek beta
р	Latin P	**r**, from Greek rho
с	Latin C	**s**, from Greek sigma
н	Latin H	**n**

Learn these four and the rest of Cyrillic stops ambushing you — most other letters either look foreign (so you can't be fooled) or behave.

Your turn

- *Say it:* trace с — "one open curve" — sound "s"
- *Say it:* trace н — "left post, middle rung, right post" — sound "n"
- *Write it:* спасибо (find the с) and нет (find the н)

Before you move on

Draw с — one stroke, what sound and which Latin look-alike? ("s"; looks like *C*.) Draw н — three strokes, what sound and look-alike? ("n"; looks like *H*.) Name all four false friends and their sounds. (в=v, р=r, с=s, н=n.) Next: two letters with **no** Latin disguise — б and д.

1.10 б and д — letters that hide nothing

A relief after the false friends: б ("b") and д ("d") look like **nothing in Latin**, so they can't trick you — you just have to learn to draw them. You've read both already: б sits in спасибо, д opens да.

Script — б ("b") — and how it differs from в

How these letters are written, one after another, stroke by stroke: б, д

б and в are cousins (both from Greek **beta**, which split into a "b" letter and a "v" letter). They share a **vertical spine**, so keep them apart by their tops:

- в (v) = spine + **two stacked bowls** (both bellies face right).
- б (b) = spine + **one lower belly** + a **flag/hat** curving off the **top**.

Break б apart — *a vertical, a lower belly, a top flag*:

1. **the vertical** — a downstroke.
2. **the belly** — one bowl bulging right from the **lower** half.
3. **the top flag** — a short stroke off the top, curving **right** (the "hat" that в doesn't have).

That top flag is the whole difference: б has a hat and one belly; в has no hat and two bellies.

Script — д ("d") — the delta on little feet

д comes from Greek **delta** (Δ), the triangle — and you can still feel the triangle in it. Break it apart — *a body, then two little feet*:

1. **the body** — a rounded/looped shape sitting on the baseline (think a small *delta* or a curled *g*-like body).
2. **the feet** — two little legs dropping **below** the baseline, one at each corner of the base.

Those two descending feet are д's signature — no Latin letter has them. Say "delta" as you draw it and the shape sticks.

Their capitals: Б keeps the belly but swaps the curling flag for a straight bar across the top; Д is the delta on its feet, drawn to full height.

Your turn

- *Say it:* trace б — "spine, lower belly, top flag" — sound "b" — then в for contrast ("two bellies, no hat")
- *Say it:* trace д — "body, two feet below the line" — sound "d", from delta
- *Write it:* спасибо (find the б) and да (the д)

Before you move on

What one stroke separates б from в? (The **top flag/hat** — б has it, and one belly; в has two bellies, no hat.) Draw д — what sound, from which Greek letter, and what's its signature? ("d"; from **delta**; the two little feet below the line.) You can now hand-write every letter in привет, спасибо, да, and нет.

1.11 п and и — filling in привет

You can already hand-write the в and the р of привет. Now take two more of its letters: п ("p") and и ("ee"). One is an honest Greek shape; the other is a **quiet false friend** — it looks like a Latin *N*.

Script — п ("p") — the Greek gate

How these letters are written, one after another, stroke by stroke: п, и

п is Greek **pi** (Π), the letter mathematicians write for 3.14…. It's an honest letter: it looks like a little gateway and says **"p."**

Break it apart — *two verticals joined by a top bar*:

1. **the left vertical** — a downstroke.
2. **the top bar** — a short horizontal across the top.
3. **the right vertical** — a second downstroke, parallel to the first.

A doorway shape: two posts and a lintel. (Don't confuse it with н — that one's bar sits in the **middle**, this one's sits on **top**.)

Script — и ("ee") — the backwards N

и says **"ee"** (as in *meet*) — a vowel. But watch out: it looks almost exactly like a **Latin N with the diagonal reversed**. That's the quiet trap — your eye reads "N," but it's a vowel.

Break it apart — *two verticals joined by a rising diagonal*:

1. **the left vertical** — a downstroke.
2. **the diagonal** — from the **bottom** of the left vertical **up** to the top of the right (rising left-to-right — the mirror of Latin *N*, whose diagonal **falls**).
3. **the right vertical** — a downstroke.

So the tell between и and Latin *N* is which way the diagonal leans: и rises, *N* falls. (Later you'll meet й — an и with a little breve on top, "ee-y.")

Their capitals, П and И, are the same shapes drawn to full height. So is Н, the capital of н, with its bar still in the middle.

Your turn

- *Say it:* trace п — "left post, top bar, right post" — sound "p"
- *Say it:* trace и — "left post, rising diagonal, right post" — sound "ee"
- *Write it:* the start of привет — п · р · и · … — three letters down

Before you move on

Draw п — what sound and which Greek letter? ("p"; Greek **pi** Π.) Draw и — what sound, and how do you tell it from Latin *N*? ("ee"; its diagonal **rises** left-to-right, where *N*'s falls.) Which letter has its bar on top, п or н? (п — top bar; н — middle bar.) Next: е and т, and you'll have all of привет.

1.12 е and т — the last two letters of привет

The finish line. е and т are two of Cyrillic's most **honest** letters — they look like their Latin twins *and* sound close to them. Learn these and you can hand-write the whole of привет from memory.

Script — е ("ye") — the honest vowel

е looks like a Latin **e** and sounds close to one — with a small twist: at the start of a syllable it carries a **y**-glide, "**ye**" (as in *yes*). So привет ends *…v-**ye**-t*. (Letters that add a *y*-onset like this are called *iotated* — е, ё, ю, я are the family; you'll meet the others in Chapter 2.)

Break it apart — *a curve, then a middle bar* (exactly like writing a Latin *e*):

1. **the curve** — start top-right, sweep left, curl down and round.
2. **the middle bar** — the short horizontal that closes the *e*.

No trap here: what you see is what you get.

Script — т ("t") — Greek tau, honest too

т is Greek **tau**, and it looks and sounds like Latin **T**: a crossbar on a stem. (In *handwriting* Russians often make lowercase т look like an *m* with a bar over it, but the printed citation form is the clean T-shape you see here.)

Break it apart — *a central downstroke, then a top bar*:

1. **the downstroke** — a vertical stem.
2. **the top bar** — a horizontal across the top, centred on the stem.

Writing — now write the whole word

How these letters are written, one after another, stroke by stroke: е, т

You now own every letter of привет:

п (p) · р (r) · и (ee) · в (v) · е (ye) · т (t) = *privét*

Two of them are false friends (р=r, в=v), one is a quiet one (и=ee), and three are honest (**п, е, т**). Write it slowly, naming each letter's sound.

Your turn

- *Say it:* trace е — "curve, middle bar" — sound "ye"
- *Say it:* trace т — "downstroke, top bar" — sound "t", Greek tau
- *Write it:* the full word — привет — start to finish, from memory

Before you move on

Draw е — what sound, and what does *iotated* mean? ("Ye"; it carries a *y*-onset.) Draw т — what sound and which Greek letter? ("t"; Greek **tau**.) Spell out the letters of привет with their sounds. (п-р-и-в-е-т = p-r-i-v-ye-t.) You can now hand-write your first Russian word end to end.

1.13 привет — watch one word move

Look at привет. Point from left to right and say the six sounds slowly: *p, r, ee, v, ye, t.* Every shape is already known.

Writing — observe and trace

Keep привет visible. Trace it once with a finger or a capped pen. Pause on р and say *r*; pause on в and say *v*. Stop after one careful trace.

Before you move on

Read привет once. Today was observation, not a memory test.

1.14 привет — one supported copy

Keep привет visible. Point to its two traps: р says *r* and в says *v*. You may look back after every letter.

Writing — guided copy

Copy привет once. Use three small chunks: при · ве · т. After each chunk, look back and compare only those letters. Then read the finished word.

Before you move on

Stop after one supported copy. Hiding the model belongs to the next lesson.

1.15 привет — look, hide, write, compare

Look at привет for five seconds. Touch the three chunks при · ве · т. Do not copy while the model is visible.

Writing — delayed copy

- cover привет
- wait five seconds
- write it once from memory
- uncover the model and compare one chunk at a time

Circle and repair one differing letter if needed. Repair is part of retrieval.

Before you move on

Read the repaired word once. Stop after one memory attempt.

1.16 One heard greeting — write what you know

Cover the answer lower on this page. You will hear one familiar informal greeting. No new Russian and no new Cyrillic shape is hiding here.

Writing — short dictation

Hear: privét — informal "hi"

Write the Russian word from sound alone. Do not use a visible model or romanization. Now uncover and compare: привет. Check р and в first, then the other four letters. Repair one place if needed.

Before you move on

This completes a tiny writing runway, not an exam simulation. Later work must grow from one word to messages, connected composition, and timed production.

1.17 Chapter 1 checkpoint — say it, know the letters, write it

Nothing new arrives here. This checks what the chapter built: the spoken exchange, ten letters, and two words from sound alone. First: which greeting goes to a friend, and which to a stranger? (Привет; *zdrávstvuyte.*)

The exchange — formal, then informal

With a stranger:

- *Zdrávstvuyte!* — and it comes back to you.
- Спасибо! (*Spasíbo!*) — *Pozhálusta!*

With a friend:

- Привет! (*Privét!*)
- Да! (*Da!*) or Нет. (*Nyet.*)

Only the greeting changes between the scenes. That one choice is the whole of the register so far.

Your turn

Say these aloud:

- the stranger's scene, both voices — *Zdrávstvuyte!* … Спасибо*!* … *Pozhálusta!*
- the friend's scene — Привет*!* — then yes, then no: Да*!* … Нет*.*

Script — ten letters, three kinds

- **False friends**: в р с н look like Latin *B, P, C, H* and say **v, r, s, n**.
- **A quiet false friend**: и looks like a reversed *N* and says **ee**.
- **New shapes**: б (a flag on top) says **b**; д (two feet below the line) says **d**.
- **Honest letters**: п е т say **p, ye, t**.

Read it: the ten letters aloud by their sounds — в р с н и б д п е т

Writing — from sound alone

Cover: the letter list above and the key below, so no model and no romanization stays in view

Hear: v, r, s, n, ee — b, d — p, ye, t
Write it: one Cyrillic letter for each sound, ten in all
Hear: privét — "hi" — and *nyet* — "no"
Write it: both words
Check: against the key — в р с н и, б д, п е т, привет, нет
The usual slip is the Latin hand taking over: *r* for р, *n* for н, *i* for и.
Write it: one repaired letter, then stop

Before you move on

Which word answers спасибо? (*Pozhálusta.*) Name the four false friends by their real sounds. (v, r, s, n.) Which letter wears a flag on top, and which stands on two feet? (б; д.) That is the chapter: a greeting for each kind of person, the courtesy after it, and ten letters on demand.

Chapter 2

Introducing yourself

Modes: **voice** (9) **eyes** (2) **Hands-free start:** the first 8 of 11 lessons.

> ***By the end of this chapter:*** I can give my name in Russian, ask for someone else's, and pick ты or вы to match how well I know them.
>
> *Run the whole introduction with a stranger — greet, ask* Как вас зовут*?, answer* Меня зовут*…, close with* Очень приятно *— then switch it for one friend by changing only the greeting and* вас → тебя*.*

2.1 я — "I"

The shortest word in the chapter: one letter, one sound, and a pedigree of about six thousand years.

You'll want to know first — я

я — *ya* — **I**

That is the whole word. A single letter, pronounced *ya*.

It is a **new letter** — the writing track has taught в, р, с, н, б, д, п, и, е and т, and hasn't reached я. *Read it:* я here

You'll draw it when the track gets there. And be careful with its shape. **я looks like a mirrored Latin R and has nothing to do with R.** (It descends from ę, the "little yus" — not from R at all.)

It is also the **last** letter of the alphabet, 33rd of 33, and Russian has a rebuke built on that: «*Ya — poslédnyaya búkva v alfavíte*», "я is the last letter of the alphabet." You say it to someone who talks about themselves too much. The letter's position is the joke — don't put yourself first.

The word, taken apart — and its English cousins

Pronouns are the **least borrowable** part of a language. Nouns come and go by the thousand — *sputnik*, *pizza*, *computer* — but nobody borrows a word for *I*. So я has simply been inherited, without interruption, for as long as there has been an Indo-European family: Russian я, Latin *ego*, German *ich*, English **I**, Greek *egṓ*.
All from PIE **eǵh₂(om)*. Russian's route ran through Proto-Slavic **azŭ*, which East Slavic reshaped — a *j-* was added at the front (**azŭ* → **yazŭ*) and the ending fell away — leaving the **one letter** you now say. It is the most extreme change in the family, and the reason я sounds nothing like *ego* while being the same word.
Latin *ego* is the one English borrowed back, whole and untranslated, for the part of the mind that says *I*.

Your turn

Say these aloud:

- "я" — *ya*
- the family — "я … *ego* … *ich* … **I**"
- the erosion — "**azŭ* … я"

Before you move on

Say "I". (я — one letter, said *ya*.) What must you not mistake it for? (A **Latin R** — the shape is a coincidence.) Why has it changed so little in meaning? (**Pronouns are the least borrowable words** a language has.) Name three relatives. (*Ego*, *ich*, *I* — and Greek *egṓ*.) What did Russian's come from? (Proto-Slavic **azŭ*, with a *j-* added at the front and the ending lost.) Next: the two words for "you."

2.2 ты, вы — the two words for "you"

Chapter 1 gave you two ways to say hello, split by formality. That split runs through the whole language — and here is the place it matters most: Russian has **two words for "you."**

The two words

> Ты — *ty* — you, one person you're familiar with. Вы — *vy* — you, formal, **or** more than one person.

Both turn on ы, which is the hardest vowel in Russian for an English speaker: not the *ee* of Ты's look-alike, but a tighter, further-back sound made with the tongue pulled towards the throat. Say English *ill*, then try to say it with your tongue drawn back. The writing track hasn't reached ы either.

The word, taken apart — and its English cousins

Pronouns are the **least borrowable** part of a language. Nouns come and go; *I* and *you* stay. So the first two line up almost too neatly:

- я (last lesson) — Latin *ego*, English **I**, German *ich*.
- Ты — Latin *tū*, English **thou**, German *du*.
- Вы — Latin *vōs*, with no English or German survivor to set beside it.

The first two lines are the same word four times over. **The third is only half a set**: Вы and *vōs* both continue PIE **wos*, but English *you* and German *ihr* come from the **other** stem in that paradigm, **yūs*. Cousins, not twins — worth marking rather than smoothing over. Ты and *tū* and *thou* are the same word, barely touched in four thousand years. *Thou* fell out of standard English through the 1600s (it survives in Quaker usage, northern dialect and liturgy), leaving *you* for everyone — which is why the Ты/Вы choice feels foreign to English speakers. English **had** it.

Your turn

Say these aloud:

- "я" — *ya*
- "Ты" and "Вы" — hear the difference
- the family — "Ты … *tū* … **thou**"

Before you move on

Say "I". (Я.) What are the two words for "you", and what splits them? (*Ty* informal, Вы formal — or plural.) Why is Ты familiar to an English speaker's ear? (It's the **same word as *thou***, which left standard English through the 1600s.) Next: why plural Вы became polite.

2.3 Why plural Вы became polite

Give the pair: Ты for one familiar person; Вы for more than one person — or for one person addressed respectfully.

Grammar Lens: one social job, several grammatical routes

Russian Вы is a plural used for **one person** as a mark of respect. French does the same job with second-person plural **vous**. Chapter 1's *zdrávstvuyte* already carried the matching polite-plural ending -те. Other languages reached respect differently:

- Russian Вы — the second-person plural.
- French **vous** — the second-person plural, the very same route.
- German **Sie** — the *third*-person plural, not the ordinary *ihr*.
- Spanish **usted** — a worn-down title, *vuestra merced*, "your grace."

Russian's polite Вы is generally treated as an eighteenth-century import from French and German social usage, not a pattern Russian invented alone.

Why it's said this way

Use Вы with a stranger, an older person, or in a formal relationship. Use Ты with a friend, child, or family member. When unsure with an adult, begin with Вы; too much respect is safer than unwanted familiarity.

Your turn

Say these aloud:

- one close friend — ты
- a new professor — вы
- Russian and French use which route — second-person plural
- Spanish *usted* came from what — "your grace"

Before you move on

Why can вы address one person? (A plural became respectful.) Which language shares that exact route? (French *vous*.) Which two take different routes? (German *Sie* uses third-person plural; Spanish *usted* came from a title.) Which Russian form is safest when you are unsure? (Вы.)

2.4 меня зовут... — "my name is..."

Many languages say "my name is" with a word for *my* and a word for *name*. Russian says something quite different.

The exchange

Menyá zovút Anna. — "My name is Anna."

меня — *menya* — **me**, the object form. зовут — *zovut* — **they call**. So: **"[they] call me Anna."**

There is **no word for "my"** and **no word for "name"** in the sentence. Russian reports what people call you, not what you possess.

Grammar Lens: the invisible "they"

Zovút is the **they** form of *zvat'*, "to call," inherited from Proto-Slavic **zův̆ati*, a cousin of Sanskrit *hávate*, "calls" (Vasmer). But there is no они ("they") anywhere — and there isn't meant to be. Russian uses a bare plural verb to mean "people in general," the way English says *"they say it'll rain"* without anyone in mind.
English does the same:

They call me Anna. — Who are *they*? Nobody. Everybody.

Grammar Lens: меня is not я

This is the important part, and this book's first taste of **case**.
You learned я for "I" last lesson. But here it is меня — because *I* is now the **object** of the calling, not the one doing it. Russian changes the **shape of the word** to mark that job:
я is *I*, the one acting; меня is *me*, the one acted on.
English does this with about six **pairs** — *I/me*, *he/him*, *she/her*, *we/us*, *they/them*, *who/whom*. Russian does it with **every noun and pronoun in the language**. That system is called **case**, and it is the main thing standing between you and Russian.
You do not need to learn it yet. You need to notice that меня is a **different shape of я**, and that the shape carries the meaning.

Your turn

Say these aloud:

- "Menyá zovút…" and your own name
- the literal — "**they call me** …"
- the pair — "я … меня"
- the English echo — "*they say it'll rain*"

Before you move on

Say "my name is Anna." (*Menyá zovút Anna.*) What does it literally mean? ("**They call me** Anna.") Which two words is it missing? (Any word for **my**, and any word for **name**.) Who are "they"? (**Nobody** — a bare plural verb meaning "people in general," like English *they say*.) Why меня and not я? (Because it's the **object** — Russian changes a word's **shape** for its job. That's **case**.) Next: asking someone else's name.

2.5 как вас зовут? — "what's your name?"

You can say your own name. Now ask for someone else's — and notice that Russian asks a different question from English.

The exchange

> *Kak vas zovút?* — formal, or to more than one person. *Kak tebyá zovút?* — informal, to one person you know.

Taken apart:
как — *kak* — **how**. вас or тебя — *vas* / *tebya* — **you**, in the object form. зовут — *zovut* — they call.
So: **"How do they call you?"**

Grammar Lens: the object forms again

Last lesson's *menyá* has partners, and they follow the same logic — the person being called is the **object**, so the word changes shape:

- я becomes *menyá* — me.
- *ty* becomes тебя — you, informal.
- *vy* becomes вас — you, formal or plural.

You now have a matched pair: *Kak vas zovút?* — *Menyá zovút…*

Your turn

Say these aloud:

- "Kak vas zovút?" — formal
- "Kak tebyá zovút?" — informal
- the whole exchange — "Kak vas zovút?" · "Menyá zovút…"

Before you move on

Ask a stranger's name. (*Kak vas zovút?*) And a friend's? (*Kak tebyá* зовут*?*) What does как mean, and why does it matter? (**How** — Russian asks *how they call you*, about an **action**, where English asks *what*, about a **possession**.) Give the three object forms. (*Menyá,* тебя*,* вас.) Next: compare how several languages frame the same question.

2.6 Why Russian asks *how*, not *what*

In *Kak vas zovút?*, which word means "how"? (*Kak.*)

Grammar Lens: one question, two ways to organize it

English asks **what** your name is, treating the name as a thing you have. Russian asks **how** people call you, treating naming as something people do.
English is the odd one out in this small comparison:

- Russian asks *Kak vas zovút?* — **how**.
- French asks *Comment vous appelez-vous ?* — **how**.
- Spanish asks *¿Cómo se llama?* — **how**.
- English asks ***What*** is your name? — **what**.

Three languages organize the question around an **action**; English organizes it around a **possession**. The answer is the same social fact, but the route to it differs.

Your turn

Say these aloud:

- the three action words — как, *comment*, *cómo*
- Russian literally asks — "how do they call you?"
- English asks about — a thing you have

Before you move on

Which three languages ask "how"? (Russian, French, Spanish.) Which asks "what"? (English.) What is the underlying contrast? (Naming as an action versus a name as a possession.)

2.7 очень приятно — "pleased to meet you"

The reply that closes an introduction — and the best etymology in the chapter.

The two words

Óchen priyátno. — "Pleased to meet you."

Literally: **"very pleasant."**

очень — *ochen* — very. приятно — *priyatno* — pleasant, agreeable.

There is no "to meet you" and no "I am." Russian states the **quality of the moment** and leaves the rest understood — the same economy as *menyá zovút*, which left out "my" and "name."

Both ч (*ch*) and я are letters the writing track hasn't reached. *Read it:* both letters

You'll draw them later.

The word, taken apart — and its English cousins

Приятно comes from Slavic ***prijati***, "to favour, to be well-disposed toward" — which gives Russian *priyátel'*, a friend.
That root goes back to PIE **preyH-*, "to love, to please." And it went into Germanic too:

- Russian приятно, pleasant, and *priyátel'*, a friend.
- English **friend** — literally "one who is loving," an old participle of a verb meaning *to love*.
- German *Freund*.

So приятно and *friend* are the same root, arriving from opposite ends of Europe.
Free almost certainly belongs to the family too. The usual account: the word first meant "belonging to the beloved household" — the members of a family as opposed to the slaves in it — and only later meant "not in bondage." *Free* and *friend* start in the same place.
Saying очень приятно is, at the root, calling the meeting **friendly**.

Your turn

Say these aloud:

- "Óchen priyátno"
- the whole exchange — "Kak vas zovút?" · "Menyá zovút…" · "Óchen priyátno"

- the family — "приятно … *priyátel'* … **friend**"

Before you move on

Say "pleased to meet you." (*Óchen priyátno.*) What does it literally mean? ("**Very pleasant**" — no "I am," no "to meet you.") What is приятно related to? (Slavic *prijati* "to favour" → *priyátel'* "friend" — and, from the same PIE root **preyH-*, English **friend** and German *Freund.*) And *free*? (Most likely the **same family** — originally "belonging to the beloved household," i.e. not a slave.) Next: putting the chapter together.

2.8 Chapter 2 practice — run the exchange

Give the three words the chapter opened with: *I*, familiar *you*, formal *you*. (*Ya*, *ty*, *vy.*) Everything below is built from those.

The exchange

Two strangers meet. Say both voices aloud, one after the other:

> *— Zdrávstvuyte! — Kak vas zovút? — Menyá zovút Anna. A vas? — Menyá zovút Iván. Óchen priyátno.*

Everything in it is formal, because *vy* is the safe opening with an adult you do not know.

Grammar Lens: what moves when the exchange goes informal

With one friend, exactly two pieces change:

- the greeting — *Zdrávstvuyte* becomes Привет;
- the object pronoun — вас becomes тебя.

So *Kak vas zovút?* becomes *Kak tebyá zovút?* The verb *zovút* does not move, and *menyá* in the answer does not move either — you are still the one being called, whoever is asking.

Grammar Lens: why the shapes change at all

Ya becomes *menyá* because the calling lands **on** you rather than coming **from** you; *ty* and *vy* become тебя and вас for the same reason. And *zovút* is a plural verb with nobody behind it — "**they** call me," where *they* is no one in particular. That is why the Russian question asks **how** people call you, not **what** your name is: naming is something people do, not something you own.

Your turn

Say these aloud:

- the full formal exchange, both voices
- the same exchange to one friend
- your own answer — "Menyá zovút…" and your name

Before you move on

Run the formal exchange from memory, then switch it for one friend. Which two pieces changed? (The greeting, and вас → тебя.) Which word never moved? (*Zovút.*) Which form do you choose for an adult you have just met, and why? (*Vy* — a plural used as respect, and the safer default.) Who is doing the calling in *menyá zovút*? (Nobody in particular — a bare plural verb.) And why is the question *kak* rather than *shto*? (Russian asks **how** people call you.)

2.9 Chapter 2 practice — the two person shapes

Russian changes a pronoun's shape when the action lands on that person. English still shows the same idea in *I* → *me*.

Grammar lens — cover and retrieve

Cover the right column, then give the acted-on form:

doing the action	action lands here	meaning
ya	*menyá*	I / me
ty	*tebyá*	you / you, informal
vy	*vas*	you / you, formal or plural

Russian has six cases, but none of that system is due yet. Learn these three pairs because the naming exchange needs them.

How to answer — each shape in the frame

- *Menyá zovút…* — people call **me…**
- *Kak tebyá zovút?* — how do people call **you**, one friend?
- *Kak vas zovút?* — how do people call **you**, formally?

The verb stays *zovút*; the person changes shape.

Your turn

Say these aloud:

- *ya* → *menyá*
- *ty* → *tebyá*
- *vy* → *vas*
- one verb, three object forms

Before you move on

Give the three pairs. Which shape answers "who receives the calling"? (The object form.) Do you need the six-case table yet? (No — only these earned pairs.)

2.10 Chapter 2 practice — what Russian leaves out

Russian often says less than the English translation. Name only the words that are genuinely absent; do not erase a verb that is really there.

Grammar lens — three phrases, three English expansions

- *Menyá zovút Anna* reads literally "they call me Anna"; English adds *my* and *name*.
- *Óchen priyátno* reads literally "very pleasant"; English adds *it is* and *to meet you*.
- *Kak vas zovút?* reads literally "how do they call you?"; English adds *what* and *your*.

Only the middle sentence has **no verb at all**. In present-tense descriptions, Russian normally drops the linking verb: *Óchen priyátno* needs no spoken "is."
The other two sentences do contain *zovút*, "they call." They lack "is" because they are not "X is Y" sentences in Russian; English simply translates them that way.
Russian also has a present-tense *yest'*. Chapter 1 already hid it inside нет = не + *yest'*, "not-is." The next chapter will reuse it. So the careful rule is not "Russian has no *is*"; it is "Russian usually omits the linking verb in a present-tense description."

Your turn

Say these aloud:

- the one verb-free phrase — *Óchen priyátno*
- the verb inside the naming pair — *zovút*
- the verb hidden inside нет — *yest'*

Before you move on

Which sentence demonstrates the zero copula? (*Óchen priyátno.*)
Why do the naming sentences not count? (They contain *zovút.*)
Does Russian lack a present form of "be" entirely? (No: *yest'* exists; the linking use is normally omitted here.)

2.11 с н б д — four letters, two kinds of trouble

The long polite greeting, from memory, and who you would say it to. Then say who you would not.

Script: two that lie, two that are only new

letter	the trouble
с	looks like a Latin *c*, says **s**
н	looks like a Latin *n*, says **n** — but the shape is not the one you expect
б	a genuinely new shape, says **b**
д	a genuinely new shape, says **d**

Two kinds of difficulty, needing different handling. с and н are false friends: your eye reads those shapes already, and reads them wrong, so the work is **unlearning**. б and д arrive with nothing attached, so the work is only **learning**. The second kind is easier, and mixing the two up is why the first kind keeps catching people out.

Grammar Lens: the verb that is not there

Russian leaves out the present tense of *to be*. Where English needs *am*, *is* or *are*, Russian sets the two halves of the sentence side by side and stops.
The person words are the other half of that. Subject and object forms differ, and with no verb to carry the person, **the pronoun is doing more work than its English counterpart** — which is why the shapes are worth drilling rather than recognising.

Your turn

- *Say it:* the polite greeting, then the courtesy exchange that follows it
- *Look:* at с and н, and say which Latin letter each one is pretending to be
- *Say it:* б and д, and note that neither is pretending anything
- *Say it:* a sentence with no verb in it, and say what English would have added

Before you move on

Which two of the four are false friends, and why is that harder? (`C` and `H` — you have to **unlearn** a reading, not only learn one.) What does Russian leave out of a present-tense sentence? (**The verb *to be*.**) And what does that put on the pronoun? (**More work** — it carries the person alone.)

Chapter 3

Six Verbs, and the One You Never Say

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say what I do in Russian with six everyday verbs — быть, жить, знать, говорить, видеть, идти — put each of them in the я form, negate one with не, and say a sentence like «Я — Анна» the way Russian does, by leaving the verb out entirely.
>
> *Say* иду *— «I am going», one trip, right now — against* хожу*, the habit, and the go / went split Russian shares with English; then say the chapter's other five verbs back without their pages: «*Я студент*» with* быть *left silent,* живу*,* не знаю*,* говорю *with its gamma, and* вижу *with its* д→ж *swap, naming each one's English kin or false friend.*

3.1 быть — "to be"

Chapter 2 ended on a Russian sentence with no verb in it at all. This lesson is the verb that wasn't there.

You'll want to know first — быть

> быть — *byt'* — **to be**

Four letters, and you have met all four already: б from спасибо, ы from ты, т from привет, and the soft sign ь from *óchen*. Nothing new to decode — which is rare, and worth enjoying.

The ь is not a sound; it softens the т in front of it. That ending -ть is how almost every Russian verb names itself, the way English puts *to* in front.

Grammar Lens: the tense Russian will not say

English: *I am a student.* Russian:

> *ya studént* — literally **"I student."**

There is no word between them. Not a short one, not a quiet one — **none**. Russian does not use быть in the present tense; you link two things by setting them side by side.
The verb was not lost. Push the sentence into the past and it walks back in: *ya byl studéntom* — "I was a student." The present is the one place it goes silent.
Chapter 1 already showed you the survivor: нет is не + есть, "not-is." *Yest'* means **there is**, never *am*.

The word, taken apart — and its English cousins

быть comes from Proto-Slavic **byti*, from PIE **b^{h}uH-*, "to grow, to become." Say *byt'* and then say **be** — that is the same root, barely worn.
Its cousins: English **be** and **been**, German *bin*, Latin *fuī* "I was" (which gave English **future**), Sanskrit *bhávati*.
Now the part worth keeping. English *be* is stitched from **three** different ancient roots — *be* from **b^{h}uH-*, *is* and *am* from **h$_1$es-*, *was* and *were* from **wes-*. Russian holds two of those apart and lets you watch: быть is the **b^{h}uH-* one, есть is the **h$_1$es-* one — the same root as English **is**.

Your turn

Say these aloud:

- "быть" — *byt'*, with a soft final t
- "Ya studént" — and feel the gap where English puts *am*
- the two roots Russian keeps apart — "быть … есть"
- the English pair — "**be** … **is**"

Before you move on

Say "to be." (Быть.) Now say "I am a student." (*Ya studént* — two words, and no verb.) Is the verb gone from the language? (No — *byl* returns in the past; only the present drops it.) Which English word is быть? (**Be** — same root, $*b^h uH$-.) And which English word is есть? (**Is**.) Next: *zhit'*, "to live."

3.2 жить — "to live"

Last lesson gave you a verb Russian refuses to say. This one you say constantly — and it is the first time you will put an ending on one.

You'll want to know first — жить

жить — *zhit'* — **to live**

Same -ть ending as *byt'*, and no new letters. The first one, ж, you met buried in *pozhálusta*: it is the *zh* of English *mea**s**ure* or *plea**s**ure* — a *sh* with the voice switched on. English never gives that sound a letter of its own; Russian gives it one.

So: *zhit'*, one syllable, soft *t* at the end.

Grammar Lens: the ending that means "I"

ya zhivú — **I live.**

Two things happened. A **-u** arrived on the end, and that *-u* is the whole signal for **I** — it is what *am*, *do* and *-s* are in English, packed into one letter. And a в surfaced in the middle that the infinitive never showed you: жи-ть becomes жив-*u*.

That is normal. A Russian verb's dictionary form and its working stem are allowed to differ, so you learn the pair, not the one.

Switch to *you*, and the ending switches: *ty zhivyósh* — "you live." The person lives in the ending; Russian can therefore drop the pronoun entirely and still be perfectly clear.

The word, taken apart — and its English cousins

жить goes back to PIE $*g^{w}eih_{3}$-, "to live," and the family is enormous: Latin *vīvere* gave English **vivid, survive, revive, vital**; Greek *bíos* gave **biology**, and Greek *zōé* gave **zoo** and **zodiac**.
But the cousin worth carrying is the plain English one: **quick**. It meant **alive**, not fast — the speed came later, from how the living move. It is still frozen in the phrase *the **quick** and the dead*, in *cut to the **quick*** (cut to the living flesh), and in **quicksilver**, the metal that behaves as if alive.
So жить is **quick** in its older sense: to be among the living.

Your turn

Say these aloud:

- "жить" — *zhit'*, with the *measure* sound in front
- "Ya zhivú" — and land on the **-u**
- the pair — "zhivú … zhivyósh"
- the old English meaning — "**quick** … alive"

Before you move on

Say "to live." (*Zhit'.*) Say "I live." (*Ya zhivú* — and the **-u** is doing the work.) What did English *quick* once mean? (**Alive** — as in *the quick and the dead.*) Name two Latin cousins. (*Vivid*, *survive* — from *vīvere.*) Next: *znat'*, "to know."

3.3 знать — "to know"

The most useful sentence a beginner owns is not *hello*. It is *I don't know* — and after this lesson you will have it.

You'll want to know first — знать

знать — *znat'* — **to know**

No new letters, and the same **-ть** that ended *byt'* and *zhit'*. Say the **з** and **н** together with no vowel between them — *zn-*, exactly as English does in the middle of *ma**gn**et* but never at the start of a word.

In the present it takes the ending you already own:

ya znáyu — **I know.**

That **-ю** is not a new ending. It is the same **-u** you put on *zhivú*, spelled so it carries a *y*-glide in front — the same glide **е** carries in **привет**. Russian writes the glide into the vowel instead of adding a letter for it.

Grammar Lens: не, the whole of "don't"

ya ne znáyu — **I don't know.**

You met **не** in Chapter 1, hidden inside **нет** — **не** + **есть**, "not-is." Here it stands on its own, and it is the entire machinery of English *don't*, *doesn't* and *didn't*: one small word, parked directly in front of the verb, never changing shape.
English needs a helper verb to negate — *I know* becomes *I **do** not know*, with a *do* that appears from nowhere. Russian adds nothing and borrows nothing. Put **не** in front, and you are done.

The word, taken apart — and its English cousins

знать is PIE **ǵneh₃-*, "to know," and so is English **know** — the silent *k* in *know* is the fossil of a sound Russian still pronounces in **зн-**.
Down the Latin branch: *nōscere* gave **notice, notion, note, ignore** (*not*-knowing), **recognize**, **incognito**, and — through *nōbilis*, "knowable, well-known" — **noble**. Down the Greek branch: *gignōskein* gave **diagnosis**, **prognosis**, **agnostic**. English **ken** and **cunning** come straight down the Germanic branch beside *know*.

Your turn

Say these aloud:

- "**знать**" — *znat'*, both consonants together
- "Ya znáyu" — the **-ю** is your *-u* wearing a glide
- "Ya ne znáyu" — and notice you added nothing else
- the family — "**know** … *notice* … *ignore* … *diagnosis*"

Before you move on

Say "to know." (*Znat'.*) Say "I don't know." (*Ya ne znáyu.*) What does Russian add to negate a verb, besides не? (**Nothing** — no helper verb at all.) Which English word is знать? (**Know** — and its silent *k* is the sound Russian kept.) Next: "to speak."

3.4 говорить — "to speak"

Your first new letter in three lessons, and an English word that looks like a relative and is not one.

You'll want to know first — говорить

говорить — *govorít'* — **to speak, to talk**

One letter here is **new**: г. It is Greek **gamma** (Γ) with the corner rounded off, and it says a hard **g**, as in *go* — never the *j* of *gem*.

Everything else you have met. And the two оs behave the way спасибо taught you: an о away from the stress slides towards *a*. The stress falls on the last syllable, so this is **ga-va-RIT'**. Russian spells the *o*; your mouth says *a*.

Grammar Lens: verbs come in two families

ya gavaryú — **I speak.**

The **I** ending is the same -ю you put on *znáyu*. Every Russian verb in the present ends the same way for *I*. Then switch to *you*, and the two families separate:

- *ty znáyesh* — you know
- *ty gavarísh* — you speak

An -е- against an -и-. That one vowel is the whole difference, and it is why you learn the *you* form alongside the dictionary form: it names the family, and the remaining endings follow from it.

Your turn

Say these aloud:

- the new letter — "г is gamma, and says *g* as in *go*"
- "говорить" — *ga-va-RIT'*, both *o*s leaning towards *a*
- "Ya gavaryú" — same -ю as *znáyu*
- the two families — "znáyesh … gavarísh"

Before you move on

What sound is г? (A hard **g**, from Greek gamma.) Say "I speak." (*Ya gavaryú.*) Which vowel separates the two verb families in the *you* form? (-е- in *znáyesh* against -и- in *gavarísh.*) Next: why говорить is not English *govern.*

3.5 (говорить, continued) — The word, taken apart — and a false friend

Before going on: say говорить again, and what it means.

The word, taken apart — and its English cousins

говорить is built on the old Slavic noun **govorŭ*, "a murmur, a din, the noise of many voices." Russian still keeps говор for the buzz of a crowd or a regional way of talking. Most etymologists read the root as **imitative** — the word sounds like what it names — which is honest but means there is no tidy English cousin to hand you. Where a root is uncertain, this book says so.

What there *is* to hand you is a trap. **Govern** is **not** related. That is Latin *gubernāre*, "to steer a ship," from Greek *kybernân* — the same word that gave English **cybernetics** and every **cyber-** since. A governor steers; a говор is a noise. Two roots that never met.

Your turn

- *Say it:* "говорить" — and "not *govern*"

Before you move on

Is говорить related to English *govern*? (**No** — *govern* is Greek *kybernân*, "to steer.") Next: "to see."

3.6 видеть — "to see"

One root, two meanings, and half of them ended up in English as words about **knowing** rather than about eyes.

You'll want to know first — видеть

видеть — *vídet'* — **to see**

No new letters. Two you should keep honest, though: в says *v*, not *b*, and и says *ee* — the pair that fooled you in привет.

Stress lands on the **first** syllable here — *VEE-dyet'* — the opposite of говорить. Russian never prints its stress, so it travels with the word.

The *you* form tells you the family, exactly as promised last lesson:

ty vídish — **you see**

An **-ish**, so видеть belongs with говорить, not with *znat'*.

Grammar Lens: the letter that swaps for "I"

Now the surprise:

ya vízhu — **I see.**

The д has become *zh* — the *measure* sound from *zhit'*. The ending is the ordinary **-u**; it is the consonant in front of it that shifted.
This happens in the **I** form and nowhere else in the present. *Ty vídish*, and everyone else, keep their д. So the pattern to carry is small and exact: *vízhu*, then *vídish* — and after that the verb behaves.
English does the same trick and has stopped noticing: *speak* against *speech*, *break* against *breach*, *bake* against *batch*. A consonant softening beside a front vowel, in both languages, for the same ancient reason.

The word, taken apart — and its English cousins

видеть is PIE **weid-*, and that root carried **two** senses at once: *to see*, and — because what you have seen is what you know — *to know*. The seeing branch, through Latin *vidēre*: **video, vision, visit, evident, provide, review, advise**. Through Greek *eîdos*: **idea** and **idol**.
The knowing branch came into English directly: **wit**, **wise**, **wisdom**, **witness** — someone who knows because they saw. Sanskrit took the same turn: the **Veda** is "what has been seen," meaning knowledge. Russian kept both halves as two verbs: видеть for the eyes, and the older ведать for knowing — the *ved-* of *Veda*, still alive in Russian.

Your turn

Say these aloud:

- "видеть" — *VEE-dyet'*, stress at the front
- the odd pair — "vízhu … vídish"
- which family it joins — "vídish, like gavarísh"
- the two branches — "*video* … **wit**"

Before you move on

Say "to see." (Видеть.) Say "I see." (*Ya vízhu* — the д swapped to *zh*.) Does that swap happen anywhere else in the present? (**No** — the *I* form only.) What second meaning did **weid-* carry? (**To know** — hence *wit*, *wise*, *Veda*.) Next: "to go."

3.7 идти — "to go"

English has one verb for going. Russian has two.

You'll want to know first — идти

идти — *idtí* — **to go** (on foot, and under way right now)

No new letters. The дт blurs into one sound — *it-TEE*, stress at the end.

ya idú — **I'm going.**

ty idyósh — **you're going.**

-u for *I*, **-yesh** for *you*: идти sits with *znat'*, not *govorít'*.

Grammar Lens: going now against going often

Russian keeps a **second** verb for the same activity:

Ya idú — I am on my way, **now**, in one direction.

ya khazhú — I go, **as a habit**, back and forth.

Not two tenses: two verbs. English draws the line with tense — *I'm going*, *I go* — and every Russian verb of motion comes in such a pair.

The word, taken apart — and its English cousins

идти is PIE $*h_1ei$-, "to go" — the root of Latin *īre*, which gave English **exit**, **transit** and **itinerary**.
Its past, *shol*, shares **no root** with it: a verb this common wears out and patches the hole with another verb. That is **suppletion**.
English did the same: *go* took **went** from *wend*. So идти → *shol* is *go* → *went* — the words we use most wear out fastest.

Your turn

Say these aloud:

- "идти" — *it-TEE*
- "Ya idú" — on my way this minute
- the contrast — "idú … khazhú"
- the two broken verbs — "идти … shol", "go … went"

Your turn — the chapter, said back

- "I am a student"? (*Ya studént* — *byt'*, cousin of **be**, stays silent.)
- "I live"? (*Ya zhivú.*) What did *quick* once mean? (**Alive**, like *zhit'*.)

- "I don't know"? (*Ya ne znáyu* — only не; *znat'* is **know**.)
- "I speak"? (*Ya gavaryú* — г is gamma, a hard *g*.) Kin to *govern*? (**No.**)
- "I see"? (*Ya vízhu* — д turns *zh*, *I* form only.) English kin? (**Wit.**)

Before you move on

Say "I'm on my way." (*Ya idú.*) And "I go there regularly"? (*Ya khazhú* — another verb, not a tense.) What is the past of идти? (*Shol* — another root, like *went.*) Name two English cousins of $*h_1ei$-. (*Exit*, *transit* — or *itinerary.*) That is six Russian verbs, and one of them you will spend your life not saying.

Chapter 4

Verbs of the Mind and the Page

Modes: **voice** (3) **eyes** (1) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say what I think, understand, read and write in Russian, name the finished partner each of those verbs travels with, and read the letter ш that has been hiding in words I already say.
>
> *Say all four verbs of the chapter in the I form —* я думаю*,* я понимаю*,* я читаю*,* я пишу *— then name each one's finished partner, put the stress on the end of* писать *where it belongs, and read the* ш *you have been decoding since* живёшь*.*

4.1 думать — "to think"

Six verbs behind you. This one opens the largest fact about Russian verbs.

You'll want to know first — думать

думать — *dúmat'* — **to think**

No new letters, and the -ть of *znat'*. Stress on the first syllable, and it never moves: **DOO-mat'**.

ya dúmayu — **I think.**

That -ю is the one you put on *znáyu*. And *ty dúmayesh* — an **-yesh**, so думать files with *znat'*, not говорить.

Three verbs of the head now: *ya znáyu* is a fact I hold, *ya vízhu* is what reaches my eyes, я думаю is what goes on behind them.

Grammar Lens: every Russian verb travels with a partner

Russian verbs come in **pairs**. One member is the **doing** — under way, repeated, unfinished. The other is the **deed done**, seen whole. Думать is the first kind; its partner подумать is not "to think" but "to have a thought, and be done with it."

You have met the instinct once. Идти was going *now, one way*, with a separate partner for going *as a habit* — one small family of motion verbs. This is a **different** distinction, applied to nearly **every verb in the language**.

So one job per verb: learn its partner's **name**. What a pair does to a sentence is a later lesson.

The word, taken apart — and its English cousins

дума is the Russian noun for **a thought** — and for a body that thinks: the State Дума is the lower house of the Russian parliament, this same word.

Its own origin carries a hedge. The standard account makes дума an early borrowing from **Gothic** *dōms*, "a judgement" — behind English **doom** (a judgement before it was a fate) and **deem**. If so, думать and *doom* are relatives **by contact**, not by descent; a minority prefer an inherited root.

Latin's *cogito, ergo sum* is built on the same idea, and its other pieces are yours: the **-o** of *cogito* is Latin **ego**, the pronoun Russian keeps as я; and *fuī*, "I was," is *byt*'s root, English **be**.

Your turn

Say these aloud:

- "думать" — *DOO-mat'*, stress on the front
- the three heads — "ya znáyu … ya vízhu … ya dúmayu"
- the pair — "думать … подумать", the doing and the done

Before you move on

Say "I think." (*Ya dúmayu.*) Which family does думать join, *znáyesh* or *gavarísh*? (*Znáyesh.*) What is подумать beside думать, and how many verbs have such a partner? (The **finished** member;

nearly **all**.) Which English word does the standard account attach дума to? (**Doom**, by borrowing.)

4.2 понимать — "to understand"

The most useful sentence a traveller owns is short, and after this lesson it is yours: *I don't understand.*

You'll want to know first — понимать

понимать — *ponimát'* — **to understand**

No new letters. Stress on the last syllable, and both оs lean towards *a* away from it: **pa-ni-MAT'**.

ya panimáyu — **I understand.**

The same -ю as *dúmayu*. And now the sentence worth more than the rest:

ya ne panimáyu — **I don't understand.**

Не does the whole job, exactly as in *ya ne znáyu*: one word in front of the verb, no helper borrowed from anywhere. Say those syllables to a Russian speaker and the conversation slows down for you.

Grammar Lens: the partner, and a warning about its shape

Dúmat' took *podúmat'*: a prefix on the front, nothing else disturbed. Do not expect that every time.
Понимать's partner is понять — same root, but the middle of the word has been squeezed out, -ним- against -ня-. Russian builds a pair by prefix, by a reshaped stem, or by both, and the shape is learned with the verb.
The job is unchanged: понимать, понять, said together, one entry.

The word, taken apart — and its English cousins

понимать is по- plus a root meaning simply **to take**: Indo-European *h_1*em*-, which came down the Latin branch as *emere*, "to take, and so to buy." English took the family whole — **exempt** (taken out),

redeem (bought back), **example** (taken as a specimen), **premium**, **prompt**, **assume**, **consume**.
So понимать literally says **take hold of**. English says the same and has stopped noticing: **comprehend** is Latin *com-prehendere*, "to seize together"; **grasp** is what a hand does; German **begreifen** is *greifen*, "to grip."
Set that beside the two pictures Russian already gave you. *Znat'* was *$*ǵneh_3$-*, English **know** — knowledge you simply *have*. Видеть was **weid-*, which meant *see* and *know* at once and gave English **wit** and **wise** — knowledge you *saw*. Now understanding as something you *caught*. And unlike *dúmat'*, which arrived by Gothic borrowing, this one is inherited straight down.

Your turn

Say these aloud:

- "понимать" — *pa-ni-MAT'*, both *o*s leaning to *a*
- "Ya panimáyu" then "Ya ne panimáyu" — one word added, nothing else
- the pair — "понимать … понять", the squeezed middle
- the picture — "take hold" … *comprehend, grasp*

Before you move on

Say "I don't understand." (*Ya ne panimáyu.*) Name понимать's partner and say how its shape differs from *podúmat'*. (Понять — the stem is reshaped, not just prefixed.) What does the root of понимать mean? (**To take** — as *comprehend* and *grasp* also do.) And which of your knowing-verbs is a borrowing rather than an inheritance? (*Dúmat'*, from Gothic.)

4.3 читать — "to read"

English says *I read* and *I am reading* and means two things. Russian cannot — and the reason is a verb it refuses to say.

You'll want to know first — читать

читать — *chitát'* — **to read**

No new letters: ч you have been reading since очень, and it says the *ch* of *cheese*. Stress on the last syllable, **chi-TAT'**.

ya chitáyu — **I read.**

The same -ю, and *ty chitáyesh* puts it with *znat'* and *dúmat'*. Two verbs, one ordinary sentence:

ya chitáyu i panimáyu — **I read and I understand.**

Grammar Lens: one present tense, two English sentences

Ya chitáyu is *I read* **and** *I am reading*. Russian has one present tense and it covers both.
There is a reason, and you hold it. English builds *I am reading* out of **be** plus *-ing*; Russian's *byt'* has no present tense to build with — the missing verb of Chapter 3, the one *Ya studént* does without. With no auxiliary, Russian never grew the machinery.
The work English does with *am reading* against *read* is carried instead by the **pair**. *Chitát'* is the ongoing member; прочитать is the finished one — to read a thing **through**, to the end.

The word, taken apart — and its English cousins

читать rests on an old Slavic root meaning **to count, to reckon, to heed**, and Russian keeps the family in plain sight: *chisló* is a *number*, честь is *honour*, почитать is *to hold in esteem*. Counting, respecting and reading are one act — careful attention, item by item. Outside Slavic the root surfaces in Sanskrit *cétati*, "he perceives."
And then the trail stops. There is **no secure English descendant**, and the two words that look promising are not it: **cheat** is a clipped *escheat*, from Latin *cadere*, "to fall," and **chit**, the little note, came into English from India. This book would rather hand you nothing than a cousin that is only a resemblance — the care it took with говорить, which is not *govern*.

Your turn

Say these aloud:

- "читать" — *chi-TAT'*, the *ch* of *cheese*
- "Ya chitáyu i panimáyu" — and hear it as both *read* and *am reading*
- the pair — "читать … прочитать", the doing and the read-through

Before you move on

Say "I read and I understand." (*Ya chitáyu i panimáyu.*) Give the two English sentences я читаю covers, and say why. (*I read* and *I am reading*; *byt'* has no present tense to build the second.) Name the finished partner. (Прочитать.) Which two Russian nouns share this root, and is читать related to English *cheat*? (*Chisló* and честь; and **no** — as говорить was not related to *govern.*)

4.4 писать — "to write"

A new letter, an English family you know on sight, and a stress mistake worth naming before you make it.

You'll want to know first — писать

писать — *pisát'* — **to write**

Stress on the **last** syllable, **pi-SAT'** — not a detail you may skip.

ya pishú — **I write**, and **I am writing**.

Two things moved: the с becomes *sh* in the present, and the stress that sat on the ending for *I* jumps back to the stem elsewhere — *pishú*, but *ty píshesh.* The pair runs as it did for *chitát'*: писать ongoing, написать finished.

Careful. Писать stressed at the end — *pisát'* — is **to write**. Писать stressed at the front — *písat'* — is a child's word for **to urinate**, whose *I* form is *písayu* beside *pishú.* The two differ only in where your voice lifts, and beginners land on the wrong one. Stress the **end** and say *pishú.*

The letters in this word

(Skim if you read Cyrillic.) All of писать is familiar; the new sound arrives in *pishú*.

- **"sh"**, the sound of *shoe*, has a letter of its own: three uprights on a bar, like a comb with the teeth up. You will write it in the letter chapters.

You have been hearing it without being told: *zhivyósh*, *znáyesh*, *gavarísh* and the past *shol* all carry it. And note the kind of letter it is: я lies to a Latin reader, looking like a mirrored *R* while being a vowel; the comb resembles nothing Latin at all.

The word, taken apart — and its English cousins

писать is Indo-European **peyk̑-*, "**to cut, to scratch, to mark**" — before ink there was a point and a surface. The root became, in Latin, *pingere*, "to paint", and English took the results: **paint**, **picture**, **pigment**. Russian's *pis'mó* (a letter) and *pisátel'* (a writer) sit on the verb.
That closes the chapter's thread: *dúmat'* came in from Gothic, *ponimát'* is a root meaning *take*, *chitát'* a root meaning *count* with no English descendant, and писать a root meaning *scratch* that handed English a wall of paint.

Your turn

Say these aloud:

- "писать" then "ya pishú" — stress on the end, and the *sh* arriving
- the four — "ya dúmayu, ya panimáyu, ya chitáyu, ya pishú"

Before you move on

Say "I write." (*Ya pishú.*) Where does the stress go, and what if it goes on the front? (On the **end**; *písat'* is a child's word for urinating.) What sound does the comb-shaped letter make? (**Sh** — *zhivyósh*, *znáyesh*, *gavarísh*, *shol.*) Say the chapter's four verbs in the *I* form, then their finished partners. (*Ya dúmayu, ya panimáyu, ya chitáyu, ya pishú*; *podúmat'*, понять, *prochitát'*, написать.) And

what did писать's root mean? (**To scratch** — hence *paint.*)

Chapter 5

Taking, Asking, Helping, Loving

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say I take, ask, help and love in Russian, put any verb I own after люблю as a bare infinitive, and tell a suppletive aspect pair like брать · взять from an ordinary one like спрашивать · спросить.
>
> *Say* я люблю *with its inserted* л*, then run every verb you own through it —* я люблю читать*,* писать*,* помогать*,* жить *— and close by naming the chapter's four partners and picking out* взять *as the one built from a different root.*

5.1 брать — "to take"

A short verb, an English cousin you carry every day, and a partner that shares not one letter with it.

You'll want to know first — брать

брать — *brat'* — **to take**

Five letters, all of them yours, and the familiar **-ть**.

ya berú — **I take.**

The stem grows a vowel: бр- in the infinitive, бер- once an ending arrives. Then *ty beryósh*, so this verb sits in the *znat'* family, and that **-u** is the plain form of the **-ю** you have been saying.

Three sentences, all ordinary Russian:

Ya chitáyu. Ya pishú. Ya berú.

Grammar Lens: a pair with nothing in common

The partners so far were recognisable: *chitát'* · *prochitát'* added a prefix, *ponimát'* · понять reshaped a middle. Now the hard case. Брать's finished partner is *vzyat'* — *ya vaz'mú*. Not a prefixed брать, not a squeezed one: a **different word entirely**, drafted in as half of the pair.

Grammarians call this **suppletion**, and you have met it once: идти takes *shol* for its past, from another root, exactly as English *go* takes **went**. Here the same trick builds an aspect pair instead of a past tense. There is a quiet reward in it. *Vzyat'* is *vz-* on the very root that built *ponimát'*, the ancient root meaning *take*. So брать's finished partner is family with the verb for *understand*, and брать is the outsider.

The word, taken apart — and its English cousins

брать is Indo-European $*b^h er$-, "**to carry, to bear**", one of the richest roots English owns: **bear**, **birth**, **burden**, **bier**; Latin *ferre* behind **transfer**, **refer**, **fertile**; Greek *phérein* behind **metaphor**, a carrying-across. Russian keeps the load too — *brémya* is a burden, and *berémennaya*, *pregnant*, is literally *carrying*.

Now the trap, because this track flags both kinds. The word for **brother**, брат, sits one soft sign from брать, and is **not related**: брат is $*b^h réh_2 ter$, English *brother*. And *byt'* is $*b^h uH$-, English *be*. Three roots that all begin $\mathbf{b^h}$ — a family accent, not a shared word.

Your turn

Say these aloud:

- "брать" then "ya berú" — hear the stem grow its vowel
- "Ya chitáyu. Ya pishú. Ya berú." — *ya chitáyu, ya pishú, ya berú*
- the odd pair — "брать … vzyat'", two words sharing nothing
- the other suppletion — "идти … shol", "go … went"
- "брать" then English "bear, birth, burden, transfer, metaphor"

Before you move on

Say "I take." (*Ya berú.*) Name брать's finished partner and say what is strange about it, then give the English pair that behaves the same way. (*Vzyat'*, a different root; *go* and **went**, as идти takes *shol.*) Which verb of yours is *vzyat'* related to? (*Ponimát'* — both on the old root for *take.*) And the word one soft sign away, meaning **brother**: related? (**No** — another root, like *byt'.*)

5.2 спрашивать — "to ask"

You have asked a question in Russian since Chapter 2 without owning the verb for asking. Here it is.

You'll want to know first — спрашивать

спрашивать — *spráshivat'* — **to ask (a question)**

Long on the page, easy in the mouth: the stress lands on спра- and stays, **SPRA-shi-vat'**. The ш in the middle is the letter *pishú* introduced.

ya spráshivayu — **I ask.**

The same -ю, and *ty spráshivayesh* puts it in the *znat'* family. Set it beside your other verb for opening your mouth: говорить is to speak, спрашивать is to speak with a question mark on the end. And one distinction English hides: Russian asks a **question** with спрашивать, but **for a thing** with просить.

Grammar Lens: an ordinary pair, after a very strange one

Брать took *vzyat'*, a partner from a different root. That was the worst case, not the norm. Спрашивать's partner is спросить — *ya sproshú, ty sprósish* — one root worn into two shapes, the ongoing member long, the finished short.

Why it's said this way

The moment you ask, Russian makes you choose. *Kak vas zovút?* takes вас for a stranger and тебя for a friend — a choice that sits inside *ty* and *vy*, the split English lost when **thou**, *ty*'s cousin, left ordinary use.

Other languages make the same move by other grammar: French **vous** and Russian *vy* are the plural doing polite duty, German **Sie** borrows the third person, Spanish **usted** grew out of a title.
And recall what that question literally asks: **how** they call you, not what your name is — an action where English reaches for a possession, as French and Spanish also do.

The word, taken apart — and its English cousins

Strip the prefix and спрашивать rests on the root of просить, "to request": Indo-European **preḱ-*, "**to ask**." In Latin it became *precārī*, "to pray", and English took the lot: **pray**, **prayer**, **precarious**, **deprecate**. German **fragen** is the Germanic outcome, so спрашивать and *fragen* are one inherited word.
English **ask** is not in this family; the cousin kept here is *pray*.

Your turn

Say these aloud:

- "спрашивать" then "я спрашиваю" — and hear the ш of *pishú*
- the two mouths — "я говорю … я спрашиваю"
- "Kak vas zovút" then "Kak tebyá zovút" — and choose which fits

Before you move on

Say "I ask." (*Ya spráshivayu.*) Name the partner and say how this pair differs from брать · *vzyat'*. (Спросить — one root in two shapes.) In *Kak vas zovút?*, what decides between вас and тебя? (Whether the person is *vy* or *ty* — and *ty* is English *thou.*) And give an English cousin of **preḱ-*. (*Pray*, *prayer*, *precarious.*)

5.3 помогать — "to help"

This verb is built out of the word for *being able*, and that word is English **may**. Helping, in Russian, is lending someone your can.

You'll want to know first — помогать

помогать — *pomogát'* — **to help**

The г is the letter говорить introduced: Greek gamma, a hard **g** as in *go*. Both оs lean towards *a* away from the stress, as говорить's do — **pa-ma-GAT'**.

ya pamagáyu — **I help.**

Same -ю, and *ty pamagáyesh* files it with *znat'*.

One honest limit: the person you help takes a case this book has not reached, so keep the sentence bare. *Ya pamagáyu* alone is ordinary Russian.

Grammar Lens: a partner that does not end in -ть

Every infinitive so far ended in -ть. The partner of помогать does not: it is *pomóch'*, ending in **-ch'**, and *ya pamagú, ty pamózhesh*.
A small handful of Russian verbs end that way, and they are built on old roots about power. The shape is a signpost, not an exception to memorise blind.
Three pairs cover the chapter so far: брать · **vzyat'**, **spráshivat'** · спросить, помогать · *pomóch'*.

The word, taken apart — and its English cousins

помогать is по- plus -могать, and under it sits *moch'*, "to be able" — *ya magú*, "I can."
That root is Indo-European $*mag^h$-, "**to be able, to have power**", and English holds several pieces of it:

- **may** and **might** — the ordinary modal, and the noun for strength in *with might and main*.
- **dismay** — to strip someone of their power to act.
- German **mögen** and **Macht**; and Greek *mēkhanḗ*, "a contrivance", which is English **machine** and **mechanic**.

Note what did **not** happen here. *Magú* and *may* still mean the same thing after five thousand years. That is not the usual outcome: *zhit'*'s root handed English **quick**, which once meant **alive** and now means *fast*. Some roots keep their sense, some drift out of recognition, and

spráshivat''s went from *ask* all the way to *pray*. Each one has to be checked rather than guessed.

Your turn

Say these aloud:

- "помогать" — *pa-ma-GAT'*, both *o*s leaning to *a*
- "Ya pamagáyu"
- the three pairs — "брать · vzyat', spráshivat' · спросить, помогать · pomóch'"
- "magú" then English "may, might" — one meaning, two languages

Before you move on

Say "I help." (*Ya pamagáyu.*) Which verb is hiding inside it, and what does it mean? (*Moch'* — to be able; *ya magú.*) Name the partner and say what is odd about its ending. (*Pomóch'*, in **-ch'** rather than -ть.) Give two English cousins of $*mag^h$-. (*May*, *might*, *dismay*, *machine.*) And which English word from your verbs no longer means what its root meant? (**Quick**, from *zhit'*'s root — it meant *alive.*)

5.4 любить — "to love, and to like"

The last verb of the chapter is English **love**, and it lets you say every verb you own in a real sentence.

You'll want to know first — любить

любить — *lyubít'* — **to love**, and **to like**

One verb for both: with a person, *love*; with an activity, closer to *like*.

ya lyublyú — **I love.**

And *ty lyúbish* — an **-ish**, so любить joins говорить and видеть, not *znat'*. The stress moves too: *lyublyú* on the ending, *lyúbish* on the stem.

Grammar Lens: the letter that appears out of nowhere

Lyubít' has no л after the б. *Lyublyú* does.
You have met this shape. Видеть swapped д for *zh* in *vízhu* and nowhere else. Here it happens by insertion: stems ending in б, п, в or the letters for *m* and *f* push an л in — but **only in the *I* form**.
So люблю, then *lyúbish*, любят, with no л at all. Learn the *I* form and the rest behaves.

Grammar Lens: now say everything at once

Lyubít' takes a bare infinitive, as English *like* does — the dictionary form goes straight in:

> *Ya lyublyú chitát'.* — I like reading. *Ya lyublyú pisát'.* — I like writing. *Ya lyublyú dúmat'.* — I like thinking. *Ya lyublyú pomogát'.* — I like helping. *Ya lyublyú zhit'.* — I love living.

The word, taken apart — and its English cousins

любить is Indo-European $*leub^h$-, and English **love** is the same word — no borrowing, no detour. The family is wider than it looks: **lief**; **believe** (*be-* plus the root — to hold a thing dear enough to trust); **leave** in *by your leave*; and Latin *libet*, "it pleases", behind **libido**.
Its partner полюбить deserves an honest line: not *to finish loving* but **to come to love**, the moment the feeling starts. A pair does not always mean *doing* against *done* — which is why they get a later chapter of their own.
And the root thread: бр- carries (*bear*), -прос- asks (*pray*), **mog-** is able (*might*), люб- holds dear (*love*) — with пис- from last chapter still scratching its mark (*picture*).

Your turn

Say these aloud:

- "любить" then "я люблю", then "ty lyúbish" without the л
- "Ya lyublyú chitát'. Ya lyublyú pisát'. Ya lyublyú pomogát'. Ya lyublyú zhit'."

- the four pairs — “брать · vzyat’, spráshivat’ · спросить, pomogát’ · pomóch’, любить · полюбить”

Before you move on

Say “I love”, then “I like reading.” (*Ya lyublyú*; *Ya lyublyú chitát’*.) Where is the л in *ty lyúbish*, and which earlier verb behaved this way? (Gone — the insert hits only the *I* form, as д → **zh** in *vízhu*.) Name the chapter’s four partners, and which is a different root from its verb. (*Vzyat’*, спросить, *pomóch’*, полюбить; *vzyat’*.) And give the English cousins of любить, брать, *spráshivat’*, *pomogát’* and писать. (**Love**, *bear*, *pray*, *might*, *picture*.)

Chapter 6

Water, Coffee, Tea, and Bread

Modes: **voice** (2) **eyes** (2) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name water, coffee, tea and bread with their genders in Russian, ask for any of them politely, and say which are native and which are loans.
>
> *The chapter closes on* хлеб*, the word that looks native but is a prehistoric Germanic loan: the reader produces all four words with their genders, extends* пожалуйста *into a real request pattern on* кофе *and* чай*, and sorts the set into native (*вода*), loan disguised by age (*хлеб*), and two visibly foreign words that arrived by opposite routes (*кофе *by sea,* чай *overland). It reaches back to Chapter 5's* любить*, closing the chapter's own final atoms which nothing had yet revisited.*

6.1 вода — "water," and how every Russian noun announces itself

Five chapters of verbs, and not one noun. Here is the first — and it comes with a rule that will save you for the rest of the book.

You'll want to know first — вода

вода — *vodá* — **water**

Stress on the last syllable, *vo-DÁ*; the unstressed first о drifts toward *a*, the same reduction you have been hearing since спасибо.

Grammar Lens: no "the," no "a" — and the ending tells you the gender

Two facts belong together, because each explains the other.
First: Russian has no articles at all. No word for *the*, no word for *a*. Вода by itself can mean "water," "the water," or "a water" — context carries the difference. Every Romance or Germanic language taught in this program has spent a whole lesson on articles. Russian never will, because it has none to teach.
Second: every Russian noun is one of three genders — masculine, feminine, or neuter — and, unlike Hindi's arbitrary assignment, Russian's *ending* usually tells you which:

ending	gender	this chapter's example
a consonant	masculine	*(next lesson)*
-а / -я	feminine	вод-а
-о / -е	neuter	*(ahead)*

Вода ends in -а, so it is **feminine** — regular, no exception, the easiest kind of noun this language has. Hold that confidence for exactly one lesson; the next word breaks the rule on purpose.

The word, taken apart — and its English cousins

вода is Indo-European **wódr*, one of the best-preserved roots in the whole family. English **water** is the same word, barely disguised; so is the combining form **hydro-** in *hydrogen* and *hydrate*, which English borrowed separately from the Greek branch of the same root.
Russian kept building on it at home, too: **vódka** is вод-а plus the affectionate diminutive **-ka** — literally **"little water."**

Your turn

Say these aloud:

- "вода" — *vo-DÁ*, stress on the end
- the three endings — "consonant, masculine; -а or -я, feminine; -о or -е, neuter"
- "water, hydro-, vódka" — one root, three words you already own

Before you move on

Say "water." (Вода.) What two words does Russian have for "the" and "a"? (**Neither exists.**) What ending makes вода feminine, and what are the other two endings for? (-а; a consonant for masculine, -о or -е for neuter.) Name two English words from the same root as вода. (**Water**, **hydro-** — and Russian's own **vódka**, "little water.")

6.2 кофе — "coffee," the noun that breaks the rule you just learned

Last lesson's rule said -о and -е endings are neuter. This word ends in -е and is not neuter at all — meet Russian's most argued-about noun.

You'll want to know first — кофе

кофе — *kófe* — **coffee**. **Masculine.**

Say that twice: **masculine**, ending in -е. By last lesson's rule it should be neuter, like every other -е noun ahead in this book. It never declines at all — кофе is **indeclinable**, the identical shape in every sentence, so there is no ending left to fix.

The letters in this word

(Skim if you read Cyrillic.) One new letter: ф.

- ф = **"f"** — Greek **phi** (Φ), a circle with a line through it. You have already met two other Greek-shaped letters, г (gamma) and the letter for *l* (lambda); ф joins them.

Everything else in кофе — к, о, е — you have read since Chapter 1.

The word, taken apart — and its English cousins

кофе is a loanword, and a recent one beside вода's prehistoric root. It travelled **Arabic *qahwa*** → **Ottoman Turkish *kahve*** → **Dutch *koffie*,** and reached Russian during Peter the Great's westernizing reforms in the early 1700s — the same push that filled Russian with

borrowed Dutch and German trade and technical vocabulary.
Its first Russian form was кофий, ending like an ordinary masculine noun (compare *chai*, next lesson). Across the eighteenth and nineteenth centuries the final syllable wore down to today's кофе — but the **gender stuck**, long after the ending that explained it was gone. Dictionaries still mark it masculine; everyday speech increasingly treats it as neuter, exactly the way last lesson's rule would predict, and the argument between the two is still alive in Russian classrooms today. You already own the verb for how you feel about it:

> *ya lyublyú kófe* — **I love coffee.**

(Kófe is inanimate and masculine, so it takes exactly the same shape here as it does standing alone — nothing to adjust.)

Your turn

Say these aloud:

- "кофе" — masculine, indeclinable, never changes shape
- the new letter — "ф is phi, and says f"
- the route — "qahwa, kahve, koffie, кофе"
- "Ya lyublyú kófe."

Before you move on

Say "coffee," with its gender. (*Kófe* — **masculine**.) Why is that surprising, given last lesson's rule? (**It ends in -е**, which the rule predicts as neuter.) Name the three languages the word crossed before Russian, and the century it arrived. (**Arabic, Turkish, Dutch**; **the early 1700s**.) Say "I love coffee." (*Ya lyublyú kófe.*)

6.3 чай — "tea," which went overland while *kófe* went by sea

Same drink family, a completely different journey — and, finally, the sentence that actually orders one.

You'll want to know first — чай

чай — *chai* — **tea**. **Masculine.**

A consonant ending, so last lesson's rule holds without a fight this time: consonant-final nouns are masculine, and чай is the plain case. Every letter — ч, а, й — you have read since Chapter 2.

*(Careful on paper: romanized, this word looks like the English drink brand name **chai** and nothing else — pure coincidence of spelling, not a shared history. Its real cousins are below.)*

Grammar Lens: asking politely, at last

You have owned *pazhálusta* since Chapter 1 and had nothing new to attach it to. Now you do: name the thing, add the word.

> *Chai, pazhálusta.* — **Tea, please.** *Kófe, pazhálusta.* — **Coffee, please.**

Both words sit here exactly as they do alone — чай is already the shape a request needs, and *kófe* never changes shape at all. That is not an accident of this chapter: it is the simplest version of a pattern you will meet in its fuller, case-shifting form once this book reaches nouns that *do* change for a request. For now, name the thing, add *pazhálusta*, and you are understood.

The word, taken apart — and its English cousins

чай is Mandarin Chinese **chá**, and it reached Russia by the opposite road from *kófe*. Persian traders on the Silk Road bought it from northern China as *cha-ye khatai*, "tea of Cathay," and their Turkic-speaking customers misheard the trailing syllable as part of the word itself — giving **Turkish *çay*, Persian *chāy*,** and, at the end of the same overland chain, **Russian** чай.
Compare last lesson's *kófe*: **Arabic → Turkish → Dutch, by ship**, arriving in Peter the Great's Russia from the west. *Chai* came **overland, from the east**, along a caravan route that also carried it into Hindi (*chai*) and Arabic (*shai*). One plant; two words for it in English (**tea** took the same Chinese root by sea, through Dutch traders on the coast) — and Russian happens to have picked the **eastern** branch, while English picked the **southern coastal** one.

Your turn

Say these aloud:

- "чай" — one syllable, masculine
- "Chai, pazhálusta. Kófe, pazhálusta."
- the fork — "chá overland to chai; chá by sea to tea"

Before you move on

Say "tea," with its gender. (*Chai* — **masculine**.) Ask for it politely. (*Chai, pazhálusta.*) Which route did чай travel, and which did *kófe* travel? (*Chai*: overland, Chinese → Persian → Turkic → Russian. *Kófe*: by sea, Arabic → Turkish → Dutch → Russian.) Which English word took the same Chinese root as чай, but by the other route? (**Tea** — by sea, through Dutch.)

6.4 хлеб — "bread," the chapter's fourth word and its only immigrant besides *kófe*

One more request word, one more letter, and then the whole table — four things to ask for, and what each one's history actually is.

You'll want to know first — хлеб

хлеб — *khleb* — **bread**. **Masculine.**

Consonant-final, so the ending rule holds again. And the pattern from last lesson still works:

Khleb, pazhálusta. — **Bread, please.**

The letters in this word

(Skim if you read Cyrillic.) One new letter: х.

- х = a raspy **"kh,"** made where you'd clear your throat — not the hard *k* of *kófe*. It **looks like Latin *x*** and says nothing like it: a fourth false friend, alongside в, р, с, н from Chapter 1.

л, е, б you already have. Keep х apart from last lesson's letter for *f*: one is a throat rasp, the other a clean *f*.

The word, taken apart — and its English cousins

Here is the twist this chapter has been building to. хлеб looks and sounds completely native — nothing about it announces itself as foreign the way *kófe* or *chai* do. But it is a **borrowing**, and an ancient one: Proto-Slavic took it from **Proto-Germanic *hlaibaz**, the same root that gave English **loaf** and German **Laib**. It happened so far back in prehistory — long before *kófe*'s eighteenth century or *chai*'s Silk Road centuries — that the word has had well over a thousand years to stop feeling borrowed at all.
So the chapter's four words sort into a pattern worth naming outright:

word	**route**	**age**
вода	inherited straight from PIE	prehistoric, native
kófe	Arabic → Turkish → Dutch, **by sea**	18th century
chai	Chinese → Persian → Turkic, **overland**	centuries old
хлеб	Germanic *hlaibaz	prehistoric, but **borrowed**

Вода and хлеб both feel completely native — but only one of them actually is. Age can disguise a loanword as thoroughly as it can preserve an inheritance.

Your turn

Say these aloud:

- "хлеб" — the raspy х, masculine
- "Khleb, pazhálusta."
- all four requests — "Vodá, kófe, chai, khleb, pazhálusta" — one request word covering the whole table
- "Ya lyublyú khleb." — the same pattern that closed *kófe*'s lesson

Before you move on

Say "bread," with its gender, and ask for it politely. (*Khleb* — **masculine**; *Khleb, pazhálusta.*) What does х sound like, and which Latin letter does it impersonate? (A raspy **kh**; looks like **x**.) Which of this chapter's four words is native, which is borrowed but looks native, and which two are visibly foreign? (Вода native; хлеб borrowed from Germanic but disguised by age; *kófe* and *chai*, both visibly loans, by opposite routes.) Say "I love bread," recalling the verb Chapter 5 ended on. (*Ya lyublyú khleb* — люблю, with its inserted л.)

Chapter 7

Friend and Siblings

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name a friend, brother and sister in Russian, build a feminine person-noun with по-...-а, and say which pronoun, ты or вы, goes with each.
>
> *The chapter closes on* сестра*,* брат*'s securely cognate pair: the reader produces* друг*,* подруга*,* брат *and* сестра *with their genders, builds the* по-...-а *feminine pattern on* подруга*, and names all four as exactly who Chapter 2's* ты *was for. It reaches back to Chapter 5's* брать/брат *minimal pair and rescues three Chapter 2 atoms — the* ты/вы *comparison, the vy-politeness pragmatics, and the ty/thou etymology — that nothing had revisited since.*

7.1 друг — "friend," the word that explains why *ty* exists

A new chapter, and the first word in it names exactly who Chapter 2's informal *ty* was built for.

You'll want to know first — друг

друг — *drug* — **friend** (a man, or a friend generally)

Consonant-final, so masculine — the ending rule holding steady for the third time. Every letter is one you already read — none of them the throat-rasp х that *khleb* just taught you; that one waits for a later word.

(Romanized, this word is spelled exactly like the English ***drug*** *— pure accident of transliteration, no shared root at all. Say it* drook-*ish, not like the English word it happens to resemble on the page.)*

This is the noun Chapter 2's whole *ty/vy* choice was about. *Ty* is for a друг — someone close enough that formality would feel wrong. *Vy* is for the stranger, the elder, the shopkeeper: everyone друг does not cover.

The word, taken apart — and its English cousins

друг is Indo-European $*d^h rewg^h$-, "to accompany, to be loyal" — a companion-on-the-road sense, not far from друг's meaning today. Its clearest descendants sit outside everyday modern English: Gothic **gadrauhts**, "warrior" (literally one who accompanies), and Old English **dryhten**, "lord" — originally the leader a troop of *drauhts* followed, a word that survives only in old poetry now, not in ordinary speech.
Unlike *khleb*'s tidy modern cousin *loaf*, this is a root that mostly vanished from English rather than one that thrived in it — worth saying plainly rather than stretching for a connection that isn't really there.

Your turn

Say these aloud:

- "друг" — masculine, consonant ending
- the pair — "ty for a друг, vy for everyone else"
- the false friend on paper — "drug, spelled like the English word, unrelated to it"
- last chapter's letter — "х, the throat-rasp from khleb"

Before you move on

Say "friend." (Друг.) Which pronoun goes with a друг, and which is for everyone else? (*Ty* for a friend; *vy* otherwise.) What did друг's root originally mean? (**To accompany, to be loyal** — Gothic *gadrauhts*, "warrior"; English *dryhten*, now archaic.) Is друг related to the English word it looks like on the page? (**No** — pure spelling coincidence.) And what English word is *khleb*'s modern

cousin? (**Loaf.**)

7.2 подруга — "friend" (female), built on the word you just learned

Russian doesn't reach for a new word to make друг feminine — it builds one, in front of your eyes, out of pieces you already have.

You'll want to know first — подруга

подруга — *podrúga* — **friend** (a woman)

Ends in -а, so feminine — the rule holding for the second time in this chapter, this time on a longer word.

Grammar Lens: watch the word get built

Take друг apart and put it back together:

по- (a prefix here worn down to little independent meaning) + друг (friend) + -а (the feminine ending) → подруга

This is Russian's ordinary machinery for turning a masculine person-word feminine: keep the root, change the ending, sometimes add a light prefix along the way. It is the same instinct English uses in *host* → *host-ess* or *actor* → *actr-ess* — a suffix doing the work — except Russian reaches for this pattern constantly, on ordinary words, not just a formal handful.
Say the pair together and the family resemblance is obvious:

друг · подруга — *drug* · *podrúga*

Your turn

Say these aloud:

- "подруга" — feminine, stress on the second syllable

- the build — "по- plus друг plus -а"
- the pair — "друг, подруга"

Before you move on

Say "friend" for a woman. (Подруга.) What three pieces build it, and what does each contribute? (По- + друг + -а, the feminine ending.) What English pattern does the same job, on different words? (**-ess**, as in *host/hostess*.) And what does друг itself trace back to? (**PIE *d^hrewg^h*-, "to accompany, be loyal."**)

7.3 брат — "brother," the noun Chapter 5 already warned you about

Chapter 5 told you брат meant "brother" and was **not** related to the verb *brat'*, "to take" — a warning, in passing, about a word not yet properly taught. Here it is, properly taught.

You'll want to know first — брат

брат — *brat* — **brother**. **Masculine.**

Consonant-final, so the ending rule holds a fourth time. And here is the minimal pair Chapter 5 flagged: брат (brother) against *brat'* (to take, romanized *brat'*) — one soft sign, and nothing else, separates them. Say *brat* with a hard final *t* for "brother"; *brat'* with a soft one for "to take."

The word, taken apart — and its English cousins

брат is Indo-European *b^hréh$_2$tēr* — and this time the resemblance to English is not a trap but the real thing: **brother** is the same word, inherited, not borrowed. So is Latin **frāter** (→ **fraternal**, **fraternity**), and Sanskrit **bhrātar**. Few words in any language family are reconstructed with as much confidence as this one.
Recall Chapter 5's other two *b^h- words, because the three sit right next to each other and mean three different things: *brat'* (*b^her-, "to carry" → **bear**, **birth**), *byt'* (*b^huH-, "to be" → English **be**), and now брат (*b^hréh$_2$tēr, "brother"). Three roots, one shared opening sound, no shared meaning — a family accent, not a family.

Your turn

Say these aloud:

- "брат" — hard final t, brother
- the minimal pair — "брат, brat'" — one soft sign apart
- "brother, frāter, bhrātar" — the same word, three languages
- the chapter so far — *drug, podrúga, brat*

Before you move on

Say "brother." (Брат.) What one sound separates it from *brat'*, "to take"? (**A soft sign** — none in брат, one in *brat'*.) Is брат's resemblance to English **brother** real or a trap? (**Real** — inherited, like Latin *frāter* and Sanskrit *bhrātar*.) Name Chapter 5's two other $*b^h$- words, and what each one means. (*Byt'*, "to be"; *brat'*, "to take" — three different roots, one shared sound.)

7.4 сестра — "sister," and the chapter closes on four people

Брат (*brat*)'s partner, one more secure cognate, and the four people this chapter has introduced you to, gathered in one place.

You'll want to know first — сестра

сестра — *sestrá* — **sister**. **Feminine.**

Ends in -а, stress on the end: *ses-TRÁ*. Say брат and сестра together and you have both siblings, both genders' endings, in one breath.

The word, taken apart — and its English cousins

сестра is Indo-European $*swésōr$ — and, like брат, this is a straight inheritance, not a loan and not a false lead. English **sister** is the same word (by way of Old Norse, reinforcing an Old English form that had drifted further); Latin's version, **soror**, took a bumpier sound-change road to the same root. Brother and sister arrive as a matched pair in Russian exactly as they do in the deep history of the whole family.

Grammar Lens: who gets *ty*

Chapter 2 gave you *ty* for someone close and *vy* for everyone else — the same choice English used to make with **thou** and **you**, before *thou* died out and *you* took over both jobs. This chapter has now named exactly who sits on the *ty* side of that line: a *drug*, a *podrúga*, a брат, a сестра — the people close enough that formality would be strange. Everyone else still gets *vy*.

Your turn

Say these aloud:

- "сестра" — feminine, stress on the end
- the pair — "брат, сестра" — brother, sister
- the four people — *drug, podrúga, brat, sestrá*
- "sister, soror" — same root, one smooth, one bumpy

Before you move on

Say "sister," with its gender. (Сестра — **feminine**.) Is its resemblance to English **sister** real? (**Yes** — both from PIE **swésōr*.) Name all four people this chapter taught, and which pronoun goes with every one of them. (*Drug, podrúga, brat, sestrá* — all *ty*.) What pair of English words used to make the same close/distant choice Russian's *ty*/*vy* still makes? (**Thou** and **you**.)

Chapter 8

Family

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can name a family in Russian, and say what its own root shares with the English word home.
>
> *A one-lesson chapter that gathers Chapter 7's four people under* семья*, and reaches all the way back to Chapter 3's* жить *to rescue that lesson's stranded etymon — the two words share an idea, if not a root, and the chapter says so honestly.*

8.1 семья — "family," the word that gathers the chapter before it

One word to hold everyone Chapter 7 introduced — and a root that turns out to be hiding an English word you use every day.

You'll want to know first — семья

семья — *sem'yá* — **family**

The soft sign softens the м; stress lands on the final -я, so it rhymes with *drug* · *podrúga* · брат · сестра — this is the word that gathers all four of them.

(Note the ending: -ья *is a soft-consonant variant of* -я*, and still counts as the regular feminine ending from Chapter 6's rule.)*

The word, taken apart — and its English cousins

семья is Indo-European **ḱey-*, "to lie down, to settle" — the same root that, through the Baltic branch, gave Lithuanian **šeimà**, "family," and Ancient Greek **kōmē**, "village." That is already a wide family.
But it goes one branch further: through **Proto-Germanic *haimaz**, "home, village," the very same root became English **home** — and, in its diminutive form, **hamlet** — and it survives fossilized in every English place name ending in **-ham**: *Birmingham*, *Nottingham*, *Durham*. Settle somewhere, and Slavic calls the people you settled with your семья; the deep Germanic cousin of that same root calls the place itself your *home*.
Chapter 3 taught you *zhit'*, "to live" — a different root (PIE $*g^w eyh_3$-, the one behind English *quick* in its old sense of "alive"), but the same idea from a different angle: семья is who you settle with; *zhit'* is what you do once you're there.

Your turn

Say these aloud:

- "семья" — soft м, stress on -я
- the four it gathers — "drug, podrúga, brat, sestrá — moyá sem'yá" in idea, if not yet in Russian grammar
- the cousin — "*ḱey-* settle → семья, and → home, hamlet, -ham"
- "семья, zhit'" — who you settle with, and what you do there

Before you move on

Say "family." (Семья.) What English word is its distant Germanic cousin, and what three English place-name endings preserve the same root? (**Home** — and every **-ham** place name: *Birmingham*, *Nottingham*, *Durham*.) Which earlier verb shares the same idea, if not the same root, and what did that verb's own root originally mean? (*Zhit'*, "to live" — PIE for "quick, alive.") Name the four people семья gathers. (*Drug, podrúga, brat, sestrá.*)

Chapter 9

Eyes, Ears, Mouth, and Nose

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name the ear, nose, mouth and eye in Russian with their genders, and say which trace to a secure ancient root and which do not.
>
> *The chapter closes on* глаз*, the word that quietly evicted Russian's true inherited eye-word: the reader produces all four face words with their genders, names* ухо *and* нос *as secure PIE cognates, names* рот *as an honest dead end, and traces* глаз *back to slang for 'ball' while placing the real cousin of English eye,* око*, inside* очки*. It is the first realization of SPINE-CHECK-WELLBEING in this track, and it reaches back to Chapter 3's* видеть *and* говорить*, rescuing three atoms nothing had revisited.*

9.1 ухо — "ear," and Russian's third gender finally arrives

A new chapter, a new part of the body, and the last of Chapter 6's three genders — held back until now, on purpose.

You'll want to know first — ухо

ухо — *úkho* — **ear**. **Neuter.**

Stress on the first syllable: *Ú-kho*. Ends in -о, so — finally — Chapter 6's third row: **-о and -е mark the neuter**, and here is the first word in this book to actually wear it.

The word, taken apart — and its English cousins

yxo is Indo-European *h_2*ous-*, and the cousin web is about as tight as this book gets: English **ear** is the same word; so is Latin **auris** (→ **auricle**, **aural**), and Greek **ous** (→ **otitis**, an ear infection). Four languages, one unbroken thread from a single ancient root — no borrowing, no replacement, nothing lost along the way.
That makes yxo the plainest kind of cousin in this book: not a loanword like *kófe*, not a word that replaced an older one, just the same PIE root worn down four different ways in four different mouths.

Your turn

Say these aloud:

- "yxo" — stress on the front, neuter
- the third row — "-o and -e, neuter"
- "ear, auris, ous" — one root, three languages

Before you move on

Say "ear." (*Úkho.*) What gender is it, and which ending finally shows it? (**Neuter** — **-o**.) Name two other languages that share the same root word for "ear." (**English *ear*, Latin *auris*** — also Greek *ous*.) Is this word borrowed or inherited? (**Inherited**, straight from PIE, no detour.)

9.2 hoc — "nose," a second straight cousin in a row

One syllable, one gender back to consonant-final masculine, and another word that never left the family.

You'll want to know first — hoc

hoc — *nos* — **nose**. **Masculine.**

Consonant-final, back to the first row of Chapter 6's table. Every letter is one you have read since Chapter 1.

The word, taken apart — and its English cousins

HOC is Indo-European **nas-*, and it barely needs translating: English **nose** is the same word, and so is Latin **nasus** (→ **nasal**, **nasturtium**, the "nose-twisting" flower). Say *nos* next to *nose* and *nasus* and the family resemblance needs no explaining at all.
Two body-part words in a row, *úkho* and HOC, and both are the same kind of cousin: no loan, no replacement, just the same ancient root, worn down along three different paths to the same meaning.

Your turn

Say these aloud:

- "HOC" — one syllable, masculine
- "nose, nasus" — barely disguised
- the pair so far — "úkho, HOC"

Before you move on

Say "nose," with its gender. (Hoc — **masculine**.) Name its two closest cousins. (**English *nose*, Latin *nasus*.**) What English flower name comes from the Latin cousin? (***Nasturtium***.) Which earlier word in this chapter is the same kind of straight inheritance? (*Úkho*, "ear.")

9.3 POT — "mouth," where the cousin trail actually runs out

Two straight cousins in a row was good luck, not the rule. This one has no secure English relative at all — and it belongs to a verb you already own.

You'll want to know first — POT

POT — *rot* — **mouth**. **Masculine.**

Consonant-final, masculine again. *(On paper this romanizes exactly like the English word **rot** — another spelling coincidence, like Russian* drug *and English* drug*, with no shared history at all.)*

The word, taken apart — and its English cousins

Úkho and нос both handed you a clean English cousin. рот does not. Its Proto-Slavic ancestor ***rŭtŭ** originally meant "beak, snout" and is **probably** related to *ryt'*, "to dig, to burrow" — the picture of an animal's snout rooting through the ground, later widened to any mouth, including yours. There is **no secure link to English *mouth*** at all: English's word comes from an entirely separate Germanic root, ***munþaz**, with no shared ancestor here. Where Chapter 4's *chitát* had no English descendant, this word has no English *ancestor* in common — a different kind of dead end, and worth naming exactly that plainly rather than forcing a connection that isn't there.
What рот does have is a job you have been practising since Chapter 3: it is what makes *govorít'* possible. You met г as Greek gamma on *govorít'*'s very first line; here is the mouth that has been saying it ever since.

Your turn

Say these aloud:

- "рот" — one syllable, masculine
- the honest dead end — "no English cousin, only ryt', 'to dig'"
- "рот, govorít'" — the mouth, and what it has been doing since Chapter 3

Before you move on

Say "mouth," with its gender. (Рот — **masculine**.) Is it related to English *mouth*? (**No** — separate Germanic root, no shared ancestor.) What is its own best guess of an origin? (*Ryt'*, "to dig" — a snout rooting the ground.) Which Chapter 3 verb does the mouth make possible, and what letter did that verb first teach you? (*Govorít'*; the letter г, Greek gamma.)

9.4 глаз — "eye," the word for the eye that isn't the word for the eye

The last of four face words, and the strangest story in the chapter: Russian's everyday word for "eye" is not the word Indo-European gave it for "eye" at all.

You'll want to know first — глаз

глаз — *glaz* — **eye**. **Masculine.**

Consonant-final, masculine, closing the chapter's four with the same pattern that opened it in Chapter 6.

*(Tempting, on the page, to link this to English **glass** — the spellings even rhyme. Resist it: they trace to two different PIE roots and are not cousins. Its real story is stranger than that coincidence.)*

The word, taken apart — and its English cousins

Every other body word in this chapter kept its ancient Indo-European name. *Glaz* did not. *Glaz* began in Old Russian as ***glazŭ**, "a ball, a glass bead, a smooth round stone" — PIE **g(ʰ)el-*, "round." Starting around the sixteenth century it spread as slang for "eyeball," then simply "eye," and it **completely displaced** the true inherited word. That older word was *oko* (plural *ochi*) — PIE **h₃ók^{w}s*, the actual, secure cousin of English **eye** itself, the same root behind Latin **oculus** (→ **ocular**, **monocle**) and Greek **ophthalmós**. *Oko* still exists, but only in poetry and set phrases now. Its one everyday survivor is hiding in plain sight: *ochki*, "eyeglasses," is built directly on *ochi* — literally **"little eyes."** So the word that means *eye* in Russian today is a Slavic upstart; the word that is actually your cousin only shows up when you put spectacles on.

This is Chapter 3's *vídet'* completed at last: the organ that does the seeing turns out to have replaced its own name, while the verb for *seeing* stayed put the whole time.

Your turn

Say these aloud:

- "глаз" — masculine, and not related to English *glass*

- the evicted word — “oko, ochi — the real cousin of *eye*”
- where it hides — “ochki, ’little eyes’”
- the whole face — “úkho, нос, рот, глаз”

Before you move on

Say “eye,” with its gender. (*Glaz* — **masculine**.) What did глаз originally mean, and what word did it push out? (**“Round object, ball”**; it displaced *oko*.) Where does the true inherited eye-word survive today? (*Ochki*, “glasses” — literally “little eyes.”) Name all four face words this chapter taught, in order. (*Úkho*, нос, рот, глаз.) Which Chapter 3 verb does the eye make possible, and what sound-swap did that verb teach in its *I* form? (*Vídet’*; д → **zh**, as in *vízhu*.)

Chapter 10

Heart

Modes: 👁 **eyes** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can name the heart in Russian, pronounce its silent letter correctly, and name its cousins across three other languages.
>
> *A one-lesson chapter closing the tranche on* сердце*, the surest cognate in the book: the reader produces the word with its silent* д*, reads the new letter* ц*, names heart, cor and kardía as its cousins, and closes by naming* любить *as the verb the heart does — the last of Chapter 5's atoms to be rescued.*

10.1 сердце — "heart," the surest cousin in this book

One more letter, one silent consonant, and then the tightest Indo-European cognate set this book will show you.

You'll want to know first — сердце

сердце — *sérdtse* — **heart**. **Neuter.**

Ends in -це, a spelling variant of -о/-е forced by the letter before it — still Chapter 6's neuter row. Stress on the front: *SYÉRT-se*. And listen closely: the д is not pronounced at all. Four consonants in a row would be unsayable, so Russian drops the middle one in speech — write сердце, say *sérts-e*.

The letters in this word

(Skim if you read Cyrillic.) One new letter: ц.

- ц = **"ts,"** the sound at the end of English *cat**s***. No Latin look-alike to trip over — it simply hasn't been in your way until now.

с, е, р, д, е you already have.

The word, taken apart — and its English cousins

сердце is Indo-European **ḱerd-*, and few roots in this book have travelled so far with so little disguise. English **heart** is the same word. Latin **cor**, genitive **cordis**, gave English **cordial** ("heartfelt"), **courage** (from the heart), and — by a long and surprising road through "to learn by heart" — **record**. Greek **kardía** gave **cardiac** and **cardiology**. Say *sérdtse*, *heart*, *cor*, *kardía* in a row and the family resemblance needs no proof.
It is fitting that the book's most secure cousin is also the organ Chapter 5 gave a verb to: *lyubít'*, with its inserted *l*, is what the сердце does.

Your turn

Say these aloud:

- "сердце" — silent д, *SYÉRT-se*
- the new letter — "ц says ts, as in cats"
- "heart, cor, kardía" — one root, three more languages
- all five body words — "úkho, нос, рот, glaz, сердце"
- "Ya lyublyú" — the verb the heart does

Before you move on

Say "heart," with its gender, and pronounce it correctly. (Сердце — **neuter** — *sérts-e*, the д silent.) What sound does ц make? (**Ts**, as in *cats*.) Name three English words that share its root, beyond *heart* itself. (**Cordial, courage, record** — from Latin *cor/cordis*; or **cardiac**, from Greek *kardía*.) Which Chapter 5 verb is what the

heart does? (*Lyubít'*, "to love.")

Chapter 11

Parting Words

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can close a Russian conversation with the parting word that fits how long until I see the person again, and say good night.
>
> *The chapter closes on* спокойной ночи*, the last word of the day and the surest cognate in the chapter: the reader produces all six parting words in order, names* ночь *and* покой*'s English cousins, and hears the* до *+ genitive pattern that links five of the six. It is the first realization of SPINE-TAKE-LEAVE in this track, closing all six of the node's concepts, and it reaches back to Chapter 6 to rescue* ф*,* х*,* чай*,* хлеб *and the request pattern, nothing had revisited since.*

11.1 до свидания — "goodbye," built on a verb you already own

Plenty of meeting, greeting and naming so far, and not one word yet for closing the door behind you. That changes now — with a phrase built from a verb you already own.

You'll want to know first — до свидания

до свидания — *da svidániya* — **goodbye** (the ordinary, all-purpose parting word)

Two words, said fast as one: *da-svi-DA-ni-ya*. Every letter is one you already read.

Grammar Lens: до asks for the genitive

до means "until," and it always reshapes the word after it — the **genitive** case, Russian's way of marking "of" or "belonging to this event." Свидания is свидание wearing the shape до requires. You do not need the rule behind that shape yet — only that до always asks for one, and every parting word this chapter teaches will show it again.

The word, taken apart — and its English cousins

свидание means "a meeting, a seeing of one another" — a noun built on *videt'sya*, "to see each other," which is your own verb *vídet'*, "to see," wearing the reflexive ending and the prefix с-, "together." Taken apart, the whole phrase reads: **"until [we] see each other again."** That is not a Russian oddity. **French *au revoir*** and **German *auf Wiedersehen*** are built the same way, on their own "see" verbs — every one of them says goodbye by promising to see you again, rather than by naming an ending. Russian's *vídet'* is the same root you met wearing English clothes as **wit**, **wise** and **video**.

Your turn

Say these aloud:

- "до свидания" — *da-svi-DA-ni-ya*, all-purpose goodbye
- the verb inside it — "vídet', videt'sya, свидание — see, see each other, a seeing"
- the pattern — "до + genitive, every time"
- the three languages — "до свидания, au revoir, auf Wiedersehen — all 'until the re-seeing'"

Before you move on

Say "goodbye," the all-purpose way. (До свидания.) Which familiar verb is hiding inside it, and what does the whole phrase literally mean? (*Vídet'*, "to see" — literally "until [we] see each other again.") What case does до always ask for? (**The genitive.**) Name one other language that says goodbye the same way. (**French *au revoir*** or **German *auf Wiedersehen*.**) One last look back:

what word closed the previous lesson, and what English words share its root? (*Sérdtse*, "heart" — cousin of *heart*, Latin *cor/cordis*, Greek *kardía*.)

11.2 пока — "bye," the casual half of yesterday's word

Every formal word in this book has an informal twin somewhere. Here is до свидания's — and it turns out to share a root with a word you already own, from the other end of the book entirely.

You'll want to know first — пока

пока — *paká* — **bye** (casual — friends, family, anyone you'd use *ty* with)

Two syllables, stress on the second: *pa-KÁ*. Reach for до свидания with a stranger or someone older; reach for пока with exactly the people *drug* was about.

(Note: no genitive here at all — this word does not follow yesterday's до*-pattern. It is not built the same way, which is your first clue that it has a different history.)*

The word, taken apart — and its English cousins

пока is built from по- plus an old Slavic pronoun, *kyi*, "which, what kind" — the ancestor of the modern word какой, "which one." That pronoun descends from the same ancient Indo-European question-root, PIE ***k^{w}os**, "who," that gives Russian как ("how," the question word from *kak vas zovút?*) and, on the Germanic branch, the **entire English wh- family**: *who, what, when, where, why, which.* Пока is, at its root, a fossil of "however long" or "for the while that" — the same idea as English *while*, which shortens *for a while* into *bye for now.* But the word you are learning to say "bye" with is much younger than its root. Dictionaries record пока as a parting word only from the early 20th century — colloquial slang at first, likely modeled on English **"so long"** — centuries after *kyi* had already worn down into как and какой. The root is ancient; the goodbye is recent.

Your turn

Say these aloud:

- "пока" — *pa-KÁ*, casual bye
- the pair — "до свидания for a stranger, пока for a drug"
- the root — "как, пока — one ancient question-stem"
- the timeline — "the root is ancient; the goodbye is 20th century"

Before you move on

Say "bye," casually. (Пока.) Which earlier word shares its root, and what English word-family is its cousin? (*Kak*; English *who, what, when, where, why, which.*) Does пока follow yesterday's до + genitive pattern? (**No** — it is built differently.) How old is пока's use as a farewell? (**Only since the early 20th century.**) One more look back: which word closes on the sound *ts*, as in *cats*? (*Sérdtse.*)

11.3 до скорого — "see you soon," and a root that goes nowhere in English

Back to yesterday's до + genitive pattern — and to a word whose trail, unlike свидания's, simply stops before it reaches English.

You'll want to know first — до скорого

до скорого — *da skórava* — **see you soon**

Same shape as до свидания: до plus a genitive. The word underneath is *skóryy*, "quick" or "soon" — so this is literally **"until the soon [thing/meeting]."** Say it *da-SKÓ-ra-va*; that final -ого is spelled with a г but said like a в, a small spelling-versus-sound gap that shows up on this exact ending across the whole language, not just here.

The word, taken apart — and its English cousins

skóryy is native Slavic, from a Proto-Indo-European root reconstructed as ***sker-**, "to jump, to hurry" — the same root, on the Baltic branch, as Lithuanian *skėrỹs*, "locust" (a jumping insect, and a vivid enough image for "quick" that it needs no further gloss). Slavic languages keep a whole family on this root: Russian скоро ("soon"), Ukrainian скорий, Polish **skory**, Bulgarian скоро.
Unlike yesterday's до свидания, this root **does not reach English at all** — no confident cousin, on any branch. That is a different kind of honesty than пока's: пока had an ancient root but a young use as a farewell; *skóryy* has an ancient root and an ancient use, and simply never left a descendant in the language you already speak. *Chitát'* and рот taught you this shape of sentence already — some roots travel to England, and some do not, and a good etymology says so either way.

Your turn

Say these aloud:

- "до скорого" — *da-SKÓ-ra-va*, see you soon
- the shape — "до + genitive, like до свидания"
- the honest gap — "*sker*-, 'to hurry' — no English cousin at all"
- the г-as-в spelling — "-ого, said -ova"

Before you move on

Say "see you soon." (До скорого.) What word for "quick, soon" is it built from, in the genitive? (*Skóryy.*) Does it have a secure English cousin? (**No** — PIE **sker*-, "to hurry," with no confident descendant in English.) What grammatical pattern does it share with до свидания? (До **+ genitive.**) One more look back: which earlier word ends on the sound *ts*, as in *cats*? (*Sérdtse.*)

11.4 до завтра — "see you tomorrow," with the dawn hiding inside it

A precise version of "see you soon" — more definite than *da skórava*, warmer than *paká* — and, taken apart, a word for "to-

morrow" that turns out to be built directly on the word for "morning."

You'll want to know first — до завтра

до завтра — *da záftra* — **see you tomorrow**

Unlike the last two lessons, завтра does not change shape after до — it is an adverb, not a noun, so it has no genitive to show. Say it *da-ZÁF-tra*, with the в devoicing to an *f* sound in front of the voiceless т that follows it — the same kind of small sound-shift you already handle in *zdrávstvuyte*.

The word, taken apart — and its English cousins

завтра splits cleanly into за-, "beyond, after," and *utro*, "morning" — so "tomorrow" is literally **"after-the-morning."** And *utro* is not a dead end the way last lesson's *skóryy* was: it continues Proto-Indo-European ***h$_2$ews-**, "to shine, to dawn" — the very root behind English **east** (the direction dawn comes from), Latin **aurora** ("dawn," and the name of the Roman dawn-goddess), and Greek **ēōs** ("dawn," also a goddess's name). Say *utro*, *east*, *aurora*, *ēōs* in a row and you are tracing one ancient sunrise across four languages.
So *da skórava* and до завтра make a matched pair: one word this book could not connect to English at all, and the very next one buried inside a word you use to talk about breakfast — the kind of contrast that only shows up when you keep asking the question honestly, lesson after lesson.

Your turn

Say these aloud:

- "до завтра" — *da-ZÁF-tra*, see you tomorrow
- the split — "за- 'after' + utro 'morning'"
- the cousins — "utro, east, aurora, ēōs — one root, four languages"
- the contrast — "skórava had no cousin; завтра has three"

Before you move on

Say "see you tomorrow." (До завтра.) Split it into its two parts and give their meanings. (**Za-**, "after" + *utro*, "morning.") Name three English/Latin/Greek cousins of *utro*. (**East, aurora, ēōs.**) Does завтра take a genitive after до, the way *skórava* did? (**No** — it is an adverb, unchanged.) One quick look back: what is the word for "eye," and what did it originally mean as slang? (*Glaz* — "round stone.")

11.5 до встречи — "see you later," a meeting built from two prefixes

Vaguer than *da záftra*, warmer than *da skórava* — the fifth parting word, and the last one built on the до + genitive pattern.

You'll want to know first — до встречи

до встречи — *da fstréchi* — **see you later** (no specific time promised, unlike *záftra*)

До plus the genitive of встреча, "a meeting" — the fourth phrase in a row to follow that shape. Say it *da-FSTRÉ-chi*: four consonants in a row at the front (в-с-т-р-), which is genuinely a mouthful even for a native speaker, so slow down on the approach and let each one land.

The word, taken apart — and its English cousins

встреча takes apart by its pieces rather than by a single ancient root: в-, "into," plus с-, "with, together," on an old Slavic base (Vasmer compares Lithuanian *surėsti*, "to catch") meaning roughly "to come upon." Put together, it is close to what English *meet* does when it means "to come together" — but that closeness is a match of **idea**, not of **ancestry**: there is no secure shared root behind the two words, the same honest gap this chapter already met in *skórava*.
That makes two of this chapter's five words so far with **no** confirmed English cousin (*skórava*, встречи), against three that connect cleanly (свидания, *paká*'s root, *záftra*). A chapter of goodbyes turns out to be as good a place as any to see that ratio plainly: a good deal of what a language says every day traces back to something you already know,

and a good deal simply does not, and neither half is the "real" Russian.

Your turn

Say these aloud:

- "до встречи" — *da-FSTRÉ-chi*, see you later
- the pieces — "в- 'into' + с- 'with' + an old 'come upon' root"
- idea vs. ancestry — "close to *meet* in meaning, not in history"
- the running count — "two of the five with no English cousin so far"

Before you move on

Say "see you later." (До встречи.) Which two prefixes is встреча built from? (В-, "into," and с-, "with.") Is it a true cousin of English *meet*, or only a resemblance in meaning? (**Only in meaning** — no secure shared root.) How many of this chapter's words so far have no confirmed English cousin so far? (**Two**: *skórava* and встречи.)

11.6 спокойной ночи — "good night," the chapter's most secure cousin

The last of six ways to close a conversation — and, fittingly for the final word before sleep, the phrase with the deepest and most secure roots in the whole chapter.

You'll want to know first — спокойной ночи

спокойной ночи — *spakóynay nóchi* — **good night**

Unlike this chapter's five до-phrases, there is no до here at all: this is the genitive standing alone, after an unspoken wish — **"[I wish you] a calm night."** Say it *spa-KOY-nay NO-chi*. It closes the day the way *zdrávstvuyte* opens one, back at the very start of this book: a whole sentence's worth of meaning compressed into two words.

The word, taken apart — and its English cousins

noch', "night," is Proto-Indo-European ***nókʷts** — one of the most secure cognate sets that survives anywhere in the family, changed almost nothing on its way here: English **night**, Latin **nox / noctis** (→ *nocturnal*, *equinox*), Greek **nýx** (→ *nyctophobia*). Say *noch', night, nox, nyx* together and there is no gap left to explain.
Спокойной carries an equally solid, if less obvious, root. It is built on покой, "calm, rest, peace," from PIE ***kʷeih₁-**, "to rest, be quiet" — the same root, through Latin **quiēs**, as English **quiet**, **quiescent**, and **tranquil**; and, through a separate Germanic path (Gothic *hveila*, "a space of time"), the same root as English **while**. Rest, quiet, and "a while" all sit on one ancient idea of stillness — and Russian says good night by wishing you both the darkness and the calm in the same two words.
That makes the chapter's tally, word by word: свидания (cousin: *see*), пока's root (cousin: *who/what/why*), скорого (no cousin), *záftra* (cousin: *east*), встречи (no cousin), and ночи / спокойной (**several cousins each**). The book's last word before sleep turns out to be its best evidence yet that English and Russian are the same language, worn down two very different ways for four thousand years.

Your turn

Say these aloud:

- "спокойной ночи" — *spa-KOY-nay NO-chi*, good night
- "noch', night, nox, nyx" — one root, barely worn down
- "покой, quiet, tranquil, while" — one more
- all six parting words, in order — "da svidániya, paká, da skórava, da záftra, da fstréchi, spakóynay nóchi"

Before you move on

Say "good night." (Спокойной ночи.) Name three English cousins of *noch'*. (**Night, nox, nyx.**) Name two English cousins of покой. (**Quiet** and **tranquil** — or **while**.) Now reach all the way back to the water-coffee-tea-bread words: which of them carries the *f* sound,

and what does х sound like? (*Kófe*; a raspy **kh**, from *khleb.*) Ask for tea or bread politely, the pattern *chai, pazhálusta* already taught. (*Chai, pazhálusta. Khleb, pazhálusta.*)

Chapter 12

Mother and Father

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name my mother and father in Russian, in both the affectionate and the formal register, and say which one is a real cousin of the English word and which is not.
>
> *The chapter closes on* отец*, the surprise of the pair: the reader produces* мама*,* папа*,* мать *and* отец*, states the natural-gender exception* папа *tests, and names* мать *as a secure PIE cousin of mother while* отец *is not a cousin of father at all. It reaches back to Chapter 8's* семья *to complete the family it gathers, and rescues four atoms nothing had revisited since Chapters 2, 7 and 8.*

12.1 мама — "mom," a resemblance that isn't really a cousin

Say good night, say see-you-later, and now a new chapter — back to *sem'yá* to fill it in, one person at a time, starting with a word that looks like a cousin of English and, on close inspection, is not really one at all.

You'll want to know first — мама

мама — *máma* — **mom, mum** (the everyday, affectionate word)

Stress on the first syllable, *MÁ-ma*. Ends in -а, so the noun-gender ending rule holds: feminine, matching the person it names.

The word, taken apart — and its English cousins

Every etymology so far in this book has asked the same question: does this word share an **ancestor** with an English one? *Máma* is the first word where the honest answer requires a different question entirely. *Máma* is not descended from Proto-Indo-European, and it is not borrowed from anywhere. Babies across the world, whatever language surrounds them, babble the same easy sounds first — an open **a**, made with a wide-open mouth, paired with the simplest consonants a mouth can make by pressing the lips together: **m**, **b**, **p**. Parents everywhere hear that babble and adopt it, so *nearly every language on earth* ends up with something that sounds like *mama* for "mother" — Mandarin **māma**, French **maman**, Swahili **mama**, English **mama** — without any of them having borrowed the word or inherited it from a common source. It is not a family resemblance; it is a resemblance built from the shape of a human mouth, reinvented from scratch in every generation.

That is a genuinely different kind of "no" from рот's or *da skórava*'s — those had no cousin **because** no one has found one. *Máma* has no cousin **because the question does not apply**: it was never inherited in the first place.

Your turn

Say these aloud:

- "мама" — feminine, first-syllable stress
- the babble sounds — "open a, plus m, b, or p"
- the world tour — "māma, maman, mama, mama"
- the distinction — "not a family resemblance; the same invention, everywhere"

Before you move on

Say "mom." (*Máma.*) What gender, and why? (**Feminine** — ends in -а.) Why does мама resemble the word for "mother" in so many unrelated languages? (**Universal infant babbling** — the easiest sounds a baby's mouth makes, not shared ancestry.) Is this the same kind of "no cousin" as рот or *da skórava*? (**No** — those simply have

not been traced to one; мама was never inherited at all.)

12.2 папа — "dad," the word that breaks the ending rule on purpose

Máma's twin, built the same babbling way — but this one does something *kófe* only hinted at: it breaks the noun-gender ending rule outright, and tells you exactly when that is allowed to happen.

You'll want to know first — папа

папа — *pápa* — **dad, papa** (the everyday, affectionate word)

Stress on the first syllable, *PÁ-pa* — the same rhythm as *máma*, the *m* simply swapped for п. Same babbling story, same easy vowel, one consonant apart.

The word, taken apart — and its English cousins

папа is a nursery word, like Greek *páppa* and Latin *pāpa*, "father". Vasmer thinks Russian probably took it from French *papa*, as German did; the old noble папа, stressed on its last syllable, is surely French.

Grammar Lens: when biology beats the ending

Here is the rule you already know: -а/-я endings are feminine. Папа ends in -а — and папа is **masculine**.
This is not another *kófe*, a fossil accident that happens to break the pattern. It is a real, live rule of its own, and a small closed set of words follows it: any noun naming a **male person** is masculine, whatever letter it ends in, because Russian lets biology outrank spelling for people. You will meet the rule's other members later — дядя ("uncle") and *dédushka* ("grandpa") both end in -я/-а and are both masculine for exactly this reason. Папа is your first sighting of it.

Your turn

Say these aloud:

- “папа” — masculine, despite the -а
- the rule — “a male person is always masculine, whatever the ending”
- the pair — “máma, feminine; папа, masculine — same ending, opposite gender”

Before you move on

Say “dad.” (Папа.) What gender is it, and does that match its -а ending? (**Masculine** — it does **not** match; a male person overrides the ending.) Name the shared origin of *máma* and папа. (**Universal infant babbling** — the easiest mouth sounds, reinvented everywhere.) Name one other Russian word that will follow the same male-person rule later. (Дядя or *dédushka.*) And one last look further back: how do you say “good night”? (*Spakóynay nóchi.*)

12.3 мать — “mother,” the word мама only pretends to resemble

The formal word behind yesterday’s affectionate one — and, unlike мама, a word with a real, unbroken, six-thousand-year paper trail straight to the English word you already own.

You’ll want to know first — мать

мать — *mat’* — **mother** (formal register: forms, introductions, “my mother is a doctor”)

One syllable, softened by the ь at the end — the same soft sign you already read in *óchen* and семья. Feminine, matching мама, but reach for мать where English would reach for *mother* rather than *mom*: on a form, in an introduction, talking *about* her rather than *to* her.

The word, taken apart — and its English cousins

Where мама only **resembles** English *mama* by babbling coincidence, мать is the genuine article: Proto-Indo-European ***méh$_2$tēr**, one of the oldest reconstructed words in the entire family, and one whose meaning has not shifted at all in perhaps six thousand years. English

mother, Latin **māter** (→ *maternal*, *matrix*), Greek **mḗtēr** (→ *metropolis*, literally "mother city"), and Sanskrit **mātar** all continue the same word. Say мать*, mother, māter, mḗtēr, mātar* together and you are pronouncing one sentence's worth of unbroken history. Linguists suspect **méh$_2$tēr* itself grew out of the same infant babble as мама — the *m*-sound a baby makes first — but so long ago, and so thoroughly grammaticalized into "mother" across every daughter language, that it counts as real inheritance now, not live coincidence. *Máma* is that babble happening again, fresh, in front of you; мать is the fossil the same babble left five thousand years ago.

Your turn

Say these aloud:

- "мать" — one syllable, soft ть
- "мать, mother, māter, mḗtēr, mātar" — one word, five languages
- the register split — "мама to her; мать about her"
- the two kinds of "m" — "мама, live babble; мать, ancient fossil"

Before you move on

Say "mother," formally. (*Mat'*.) Name three language cousins beyond English *mother*. (**Latin *māter*, Greek *mḗtēr*, Sanskrit *mātar*.**) Is мать's connection to *mother* the same kind of thing as мама's? (**No** — мать is true inheritance; мама is fresh babble that merely resembles it.) When would you say мама instead of мать? (**To her, informally** — not on a form or in a formal introduction.)

12.4 отец — "father," an old word that is a stranger to its English namesake

Mat' just gave you the cleanest cousin in this book. Its partner is the opposite kind of surprise: an equally ancient word — and one with **no** relation at all to the English word it translates.

You'll want to know first — отец

отец — *atéts* — **father** (formal register, matching *mat'*)

Stress on the last syllable, *a-TÉTS*. Consonant-final, so — regular rule, no exception needed this time — masculine.

The word, taken apart — and its English cousins

Here is the twist *mat'* did not prepare you for. *Atéts* is genuinely old — it continues Proto-Indo-European ***átta**, itself a nursery address-word for "father," parallel to *máma*'s babble but grammaticalized into the formal word millennia ago. Its cousins are real: **Gothic *atta***, **Latin *atta*** (an affectionate, informal "papa," distinct from the formal *pater*), **Hittite *attaš***, **Ancient Greek *átta*.** But *none of those is English **father***. English *father* continues a **completely different** PIE root, ***ph$_2$tḗr**, the formal word matched to **méh$_2$tēr* "mother" — the very cousin set *mat'* just gave you. Slavic simply **lost** that word somewhere in its history and replaced it with the *atta*-family word instead. So the two halves of this book's family pair are not symmetric at all: *mat'* kept the ancient formal word and still matches *mother*; отец kept an ancient word too, just a *different* one, and the formal match with *father* never survived into Slavic at all. Introduce your own family the way you already learned to introduce yourself: *Menyá zovút…* for you; *Yevó zovút…* ("**his** name is…" — that same unnamed "they," and the same object-shaped pronoun его that вас/тебя already showed you a piece of) for your father, brother, or anyone else.

Your turn

Say these aloud:

- "отец" — *a-TÉTS*, masculine
- the real cousins — "atta, atta, attaš — Gothic, Latin, Hittite"
- the honest gap — "NOT father — that word is *ph$_2$tḗr*, lost from Slavic entirely"
- the naming pattern — "Menyá zovút… / Yevó zovút…"

Before you move on

Say "father," formally. (*Atéts.*) Is it related to English *father*? (**No** — *father* is **ph$_2$tḗr*, a different root Slavic lost; отец continues **átta* instead.) Name three real cousins of отец. (**Gothic *atta*, Latin *atta*, Hittite *attaš*.**) Now reach back to Chapters 2, 7 and 8: how would you say "his name is…", and what word gathers everyone this chapter just named? (*Yevó zovút…*; *sem'yá*, the word for *drug, podrúga,* брат, сестра — and now *máma,* папа, *mat',* отец too.)

Chapter 13

Milk, Cheese, Juice, and Soup

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name milk, cheese, juice and soup in Russian with their genders, ask for any of them politely, and say which are inherited and which are borrowed.
>
> *The chapter closes on* суп*, a French loan that mirrors* кофе*'s story from the opposite direction: the reader produces* молоко*,* сыр*,* сок *and* суп *with their genders, extends Chapter 6's request pattern to all four, and sorts the set into a hand-motion cousin, a taste cousin, an honest dead end, and a shared loanword. It reaches all the way back to Chapter 2 to rescue the naming-question comparison and* я*'s script warning, the last two atoms in the track that nothing had revisited.*

13.1 молоко — "milk," a cousin down to the hand motion

Mat' and *atéts* just closed the family — remember папа's odd masculine ending on the way past — and now a new chapter, back to the water-coffee-tea-bread drink shelf to add three more words, starting with one whose English cousin shares not just a sound, but the very gesture the word describes.

You'll want to know first — молоко

молоко — *malakó* — **milk**. **Neuter.**

Stress on the last syllable, and the two unstressed оs both reduce toward *a* — the *akanye* rule from your very first lessons, doing real work here: *ma-la-KÓ*, not *mo-lo-KO*. The -о ending gives the third gender, same row as *úkho* and *sérdtse*.

The word, taken apart — and its English cousins

молоко continues Proto-Indo-European ***h₂melǵ-**, "to rub, to stroke, to milk" — a root that names the *motion of the hand*, not the liquid itself, exactly the way English **milk** does too: English **milk**, German **Milch**, Latin **mulgeō** ("I milk," → the rare English *emulsion* relative), and Greek **amélgō** all continue the same word. Say молоко, *milk, Milch, mulgeō* together and every one of them still carries the memory of a hand closing around an udder.
One honest complication: some etymologists treat the Slavic word as a **borrowing** from early Germanic rather than an independent inheritance from the same PIE root — the same kind of hedge this book already gave *dúmat'* and its link to **doom**. Either way, молоко and *milk* share the same ultimate ancestor; the only open question is how directly.
Ask for it the way you already know:

Malakó, pazhálusta. — **Milk, please.**

Your turn

Say these aloud:

- "молоко" — *ma-la-KÓ*, neuter, both о's reduced
- "молоко, milk, Milch, mulgeō" — the hand's motion, four languages
- "Malakó, pazhálusta." — the request pattern, holding steady

Before you move on

Say "milk," with its gender. (*Malakó* — **neuter**.) What did its PIE root originally describe — the liquid, or something else? (**The hand motion of milking.**) Name two Germanic cousins. (**Milk, Milch.**) Ask for milk politely. (*Malakó, pazhálusta.*)

13.2 сыр — "cheese," which is really just an old word for "sour"

Bread's natural partner, finally on the table — and a word whose Russian double life gives away exactly how it got its name.

You'll want to know first — сыр

сыр — *syr* — **cheese**. **Masculine.**

One syllable, consonant-final — the regular rule again, no exception. Say it with the vowel ты already made you practise: drawn back in the throat, not the *ee* of и.

The word, taken apart — and its English cousins

сыр is, historically, the same word as сырой, "raw, damp, uncooked" — cheese named not for what it becomes, but for the state its milk was in on the way there. Both continue a Proto-Indo-European root for "sour, damp," and the family shows up right on English's own doorstep: **English *sour*** (Old English *sūr*, from the same Germanic branch), **Old Norse *súrr***, **Old High German *sûr***. Say сырой, *sour, súrr, sûr* and you are hearing one old idea of "gone tart" spread across the whole Germanic half of the family, with Russian's сыр sitting one short step away from all of it.
That gives you the chapter's drink-and-bread shelf a genuine internal logic: *malakó* was named for the *hand* that made it; сыр is named for the *taste* milk takes on before it becomes food at all.

Syr, pazhálusta. — **Cheese, please.**

Your turn

Say these aloud:

- "сыр" — masculine, the pulled-back ы
- the double life — "сыр and сырой, one root"
- "сырой, sour, súrr, sûr" — Slavic and Germanic, side by side
- *syr, pazhálusta; khleb, pazhálusta* — cheese and bread, the request pattern's pair

Before you move on

Say "cheese," with its gender. (Сыр — **masculine**.) What Russian adjective does сыр secretly share its root with, and what does it mean? (Сырой, "raw, damp.") Name its English cousin. (**Sour.**) Ask for it politely. (*Syr, pazhálusta.*)

13.3 сок — "juice," ancient and untranslatable into English cousins

The third drink on this chapter's shelf — and, like скорого and *fstréchi* before it, a root old enough to reconstruct and still without a single confirmed English relative.

You'll want to know first — сок

сок — *sok* — **juice**. **Masculine.**

One syllable, consonant-final, the regular rule holding for the third lesson running. Every letter you have owned for a long time now.

The word, taken apart — and its English cousins

сок reconstructs cleanly to Proto-Indo-European ***sok^{w}ós**, by way of Proto-Balto-Slavic ***sakás** — this is not a shaky guess the way рот's root was, but a solid reconstruction with real evidence behind it. What it does **not** have is a surviving cousin anywhere in English or the rest of Germanic: the trail is well documented all the way back, and then simply stops before it reaches the language you already speak.
That is worth holding next to *malakó* and *syr*, the two words either side of it on this shelf: three drinks, three different outcomes. *Malakó* connects to English down to the hand motion. *Syr* connects through a Germanic side door, by way of *sour*. Сок connects to nothing at all — and all three are equally real, equally ancient Russian.

Sok, pazhálusta. — **Juice, please.**

Your turn

Say these aloud:

- "сок" — masculine, one syllable
- the honest gap — "*sok^{w}ós, well attested, no English cousin"
- the three-way contrast — "malakó, syr, сок — hand motion, sourness, and nothing at all"
- "Sok, pazhálusta." — juice, please

Before you move on

Say "juice," with its gender. (Сок — **masculine**.) Does it have a confirmed English cousin? (**No** — a solid PIE root, but no surviving Germanic descendant.) Which of this chapter's three drink words connects to English through a hand motion, and which through a taste? (*Malakó* through milking; *syr* through *sour*.) Ask for juice politely. (*Sok, pazhálusta.*)

13.4 суп — "soup," the same French word English also borrowed

The last word on this chapter's table — and, like *kófe* before it, a loanword rather than an inheritance, which makes it the perfect word to close on.

You'll want to know first — суп

суп — *sup* — **soup**. **Masculine.**

One syllable, consonant-final, the regular rule holding one last time. Every letter is one you have owned for a long time now.

The word, taken apart — and its English cousins

суп is a straight loan from **French *soupe***, part of the flood of French vocabulary that entered Russian aristocratic life in the 1700s — the same century, and nearly the same social world, that gave *kófe* its own sea route into the language. Chase *soupe* back further and it comes from Late Latin **suppa**, "bread soaked in broth."
Here is what makes суп different from everything else on this shelf: **English *soup* took the identical French word**, by a separate

crossing, centuries apart from Russian's own borrowing. So суп and *soup* **are** related — but by two languages independently reaching for the same French word, not by shared Russian-English ancestry. It mirrors *kófe* and *coffee*, which took one Arabic word by two different European doors; here, two languages took the *same* French door, just at different times.
Ask for the whole shelf the way you already know:

> *Malakó, syr, sok i sup, pazhálusta.* — **Milk, cheese, juice and soup, please.**

Your turn

Say these aloud:

- "суп" — masculine, one syllable
- the loan — "French soupe, 1700s, same century as kófe"
- the mirror — "суп/soup: one French word, two borrowings; *kófe*/coffee: one Arabic word, two doors"
- the whole shelf — *malakó, syr, sok, sup, pazhálusta*

Before you move on

Say "soup," with its gender. (Суп — **masculine**.) When did it enter Russian, and from where? (**The 1700s**, from **French *soupe***.) Is суп related to English *soup* by inheritance or by borrowing? (**Borrowing** — two separate crossings of the same French word.) Now reach all the way back to the naming-question comparison: which languages ask "how do they call you" instead of "what is your name," and what must you never mistake this book's very first letter, я, for? (**Russian and French**, against English's *what*; **never a mirrored Latin R**.)

Chapter 14

Eleven Letters, Sorted Into Three Kinds

Modes: ✓ **pen** (11) 🚗 **Hands-free start:** none of the 11 lessons.

> ***By the end of this chapter:*** I can write eleven more Cyrillic letters from memory, sort any Cyrillic letter into true friend, false friend or new shape, and explain what the soft sign does even though it makes no sound of its own.
>
> *A letter that is a whole syllable and looks like a backwards R that it has nothing to do with — closing a chapter whose organising idea is that every Cyrillic letter sorts into one of three kinds.*

14.1 у — the letter that looks like Latin y and says 'oo'

You have met the false friends and the first new shapes. This chapter takes the eleven letters that block the most words you cannot yet read.

Script

How y *is written, stroke by stroke*

y У

The capital, У, is the same shape drawn to full height, sitting on the line.

It looks like a Latin **y**. It is not one. It says **oo**, the vowel of English *boot*.

This is the single most expensive letter to get wrong, because it is common: it blocks more words in this book than any other letter you have left. Every time an English eye reads it as *y*, a word comes apart.

The shape is close to Latin *y* — a small bowl on top, a tail below the line — but the tail is usually straighter and the bowl smaller.

Say it round and short, with the lips pushed forward. Not the *y* of *yes*. Not the *u* of *cup*. The *oo* of *boot*.

Your turn

- *Write it:* y
- *Sort:* true friend, false friend, or new shape?

Before you move on

What does **у** sound like? (**oo**, as in *boot*.) What does an English eye want it to be? (A **y** — and that is the trap.)

14.2 з — a letter shaped like the digit 3

Write the letter from the previous lesson, and say which of the three kinds it is.

Script

How з *is written, stroke by stroke*

з З

The capital, З, is the same shape drawn to full height.

z, the *z* of English *zoo*. And the shape is exactly what it looks like: **the digit 3**.

That is not a coincidence to memorise around — it is simply a convenient hook, and a rare piece of luck in this alphabet. Nothing in Latin looks like this, so nothing can mislead you.

Write it as you would write a 3, and read it as *z*.

Your turn

- *Write it:* `З`
- *Sort:* true friend, false friend, or new shape?

How к *is written, stroke by stroke*

к К

The capital, К, is the Latin *K*.

к, the *k* of English *skip*. It looks like a Latin **k** and it **is** one.

Cyrillic letters come in three kinds for an English reader, and it is worth having the three named:

- **true friends** — look Latin, sound Latin. This one, and the letters romanised *a*, *o*, *m*, *t*.
- **false friends** — look Latin, sound different. у you just met, and the ones you met earlier as *v*, *r*, *s* and *n*.
- **new shapes** — look like nothing Latin at all. з from a moment ago, and the two you learned as *b* and *d*.

There is no fourth kind. Sorting every new letter into one of those three is most of what learning this alphabet is.

How л is written, stroke by stroke

л Л

The capital, Л, is the same two legs drawn to full height.

l, the *l* of English *love*. A **new shape**: nothing in Latin looks like it.

Two legs meeting at a peak, with the left leg kicking out; the hand draws both without lifting the pen. Written quickly it leans, and in some fonts it is nearly a triangle with an open base.

Careful with one thing. In handwriting л and м are close relatives, and you are about to meet м. The difference is the top: л comes to a **point**, м has a **dip** in the middle.

How м *is written, stroke by stroke*

м М

m, the *m* of English *met* — a **true friend** in both cases.

You have met a capital beside most letters so far, and here is the rule behind them: **most Cyrillic capitals are simply the lowercase letter drawn large.** Latin makes you learn two shapes for *a*, *b*, *d*, *e*, *g*; Cyrillic mostly does not.

This letter is one of them, and so are the ones romanised *k*, *o*, *s* and *t*: same shape, two sizes. The capital of т is Т.

Not all of them — the letters for *b*, *e* and *a* do have distinct capitals (the capital of е is Е, the Latin *E*) — but the default is that a capital costs you nothing new, which is a genuine saving over the Latin alphabet and the opposite of what a beginner expects.

Your turn

14.6 ы — the vowel English has no name for

Write the letter from the previous lesson, and say which of the three kinds it is.

Script

How ы *is written, stroke by stroke*

ы Ы

The capital, Ы, exists, but no Russian word begins with this vowel, so you meet it only in words printed in capitals.

Now a letter with no English equivalent at all — not a shape problem, a **sound** problem.

ы is a vowel made with the tongue pulled **back and high**, roughly where you hold it for *oo*, but with the lips **unrounded** and spread as for *ee*. English has no such vowel and no letter for it. Books usually transliterate it *y*, which helps nobody.

The reliable way in: say *ee*. Hold it. Now, without moving your lips, pull your tongue back towards your throat. What comes out is close.

The shape is two pieces — a hard sign body and a vertical — and it is **never capitalised at the start of a word**, because no Russian word begins with it.

Your turn

How ж is written, stroke by stroke

ж Ж

The capital, Ж, is the same beetle drawn to full height.

zh, the sound in the middle of English *measure* or *vision*. A **new shape**, and the most recognisable one in Cyrillic: three lines radiating from a central spine, symmetrical, often called **the beetle**. The hand draws all of it without lifting the pen.

The sound is worth isolating. English has it — *measure*, *treasure*, *azure*, *genre* — but spells it with no letter of its own, and no ordinary English word opens with it. Russian gives it a letter and opens words with it freely.

Symmetrical, so there is no wrong way round. Draw the spine, then the four legs.

How ч is written, stroke by stroke

ч Ч

The capital, Ч, is the same shape drawn to full height.

ch, the *ch* of English *cheese*. A **new shape** — roughly a Latin *h* rotated, or a wine glass.

Notice what the alphabet is doing. English needs **two** letters, *c* and *h*, to write this sound, and that pair is ambiguous — compare *church*, *chorus*, *machine*. Cyrillic spends **one letter** on it and the letter means one thing.

This is a genuine advantage of the script and it is worth naming: Russian spelling is far more regular than English spelling. A letter usually says one thing.

Your turn

Script

ш Ш

The capital, Ш, is the same comb drawn to full height.

sh, the *sh* of English *shoe*. A **new shape**: three vertical teeth on a base, like a **comb**.

Same point as the last letter, and it is a pattern rather than a coincidence: English writes this with two letters, Russian with one.

Keep it apart from the beetle by counting: ж radiates from a centre, ш stands on a flat base with three uprights.

Your turn

- *Write it:* ш

14.10 ь — a letter that makes no sound of its own

Write the letter from the previous lesson, and say which of the three kinds it is.

Script

How ь *is written, stroke by stroke*

Now the idea this alphabet has and Latin does not.

ь

This is the **soft sign**, and **it is not a sound**. You cannot pronounce it. It has no name you say aloud in a word. What it does is change the letter **before** it: it **softens** that consonant, which means the tongue moves towards the roof of the mouth, as if a faint *y* were sliding in after it.

English does this by accident. Compare the *n* in *canyon* with the *n* in *can* — the first is softer, because a *y* follows. Russian treats that difference as **meaningful** and gives it a letter.

A letter that is a modifier rather than a sound is the one genuinely alien thing in this script for an English reader. Everything else is a shape to learn or a sound to hear; this is a different kind of object entirely.

It is also common — it blocks a great many words in this book — and it never begins a word, so you will only ever meet it after a consonant.

Your turn

- *Write it:* ь
- *Sort:* true friend, false friend, or new shape?

14.11 Я — one letter that is a whole syllable

Write the letter from the previous lesson, and say which of the three kinds it is.

Script

Я я

Last, and it carries two lessons at once.

It looks like a backwards Latin R. It is not an R and has nothing to do with one. That resemblance is the reason this letter appears on every parody of Russian ever printed in English, and it means nothing.

And it is not one sound but two. Я says **ya** — a whole syllable, a *y* glide plus an *a*, in a single letter. Cyrillic has several of these, and they are why a Russian word can look shorter than its pronunciation.

On its own, Я is also the Russian word for **I**. A single letter, a whole word — like English *a* and *I*, and for the same reason: the commonest words wear down to the shortest forms.

That is your eleventh piece. Sort each one into the three kinds as you go, and the rest of the alphabet is more of the same.

Your turn

- *Write it:* Я
- *Sort:* true friend, false friend, or new shape?

Before you move on

What does Я sound like? (**ya** — two sounds, one letter.) Is it related to Latin R? (**No** — the resemblance is meaningless.) And what word is it on its own? (**I**.)

How a *is written, stroke by stroke*

a A

The capital, A, is the Latin *A*.

A **true friend**, and about as true as they come. Same shape as Latin *a*, and when it is stressed it says the *a* of English *father* — clean, open, and with none of the drift English *a* has in *cat*, *cake* or *call*.

Nothing to learn about the shape. What is worth learning is how **often** you will see it, and there is a reason for that beyond the alphabet, which the next letter explains.

Write it as you write a Latin *a*. That is the whole instruction.

Your turn

- *Write it:* a — exactly the Latin letter
- *Say it:* **a** as in *father*, held open, not the *a* of *cat*

Before you move on

Which English *a* is it — the one in *cat*, or the one in *father*? (**Father**.)

15.2 о — the letter that is not always itself

Write а. Say it as in *father*.

Script

How о *is written, stroke by stroke*

о О

The capital, О, is the same ring drawn to full height.

Another **true friend** on the page: same shape as Latin *o*, and when it is **stressed** it says the *o* of English *more*, shortened and rounded.

Write it as you write a Latin *o*.

Why it's said this way

Now the part that matters, and it is worth more to you than the shape. **When `o` is NOT stressed, it is not pronounced o. It is pronounced a.**
Russian words carry exactly one stressed syllable, and every other vowel in the word relaxes towards the middle. For `o`, that relaxation lands on **a**. So a word written with two `o`'s, stressed on the second, comes out of a Russian mouth as *a-o* — not *o-o*.
This has a name — **akanye** — and you do not need the name. You need the habit:

> **written `o`, stressed** → say **o**
>
> **written `o`, unstressed** → say **a**

One refinement, so the rule does not mislead you later: right **before** the stress the sound is a full *a*. Further from the stress it relaxes further still, towards the *uh* of English *sofa*. Either way it is **not an o**, which is the part that matters.
It is the single commonest thing an English reader gets wrong when reading Russian aloud, because the letter is sitting right there on the page looking like an *o* and behaving like an *a*.
This is also why `a` is the most-heard vowel in the language while not being the most-written one: it gets reinforcements from every unstressed `o`.
And this is why stress is marked in this book's romanizations rather than on the Cyrillic. Russian text does not print stress marks — a native reader knows where the stress falls and needs no help. You do not know yet, so the romanization carries it, and the Cyrillic stays exactly as you would meet it in the world.

Your turn

- *Write it:* `o` — the Latin letter
- *Say it:* a stressed **o**, then an unstressed one — and let the second become **a**

Before you move on

Does the spelling change when the sound does? (**No** — the page keeps о.)

15.3 г — a corner, and a hard g

Write о. Then say what it becomes when it is not stressed.

Script

How г *is written, stroke by stroke*

г Г

The capital, Г, is the same corner drawn to full height.

A **new shape** — no Latin relative to mislead you. Two lines meeting at a square corner: a horizontal across the top, and a vertical dropping from its left end. The hand draws both without lifting the pen. Like a Latin **F** with the middle bar removed, or a rotated **L**.

It says **g**, hard, as in English *go* — **never** the soft *g* of *gem*. Russian spelling does not have that ambiguity, which is one fewer thing to carry than English asks of you.

It does have one twist, and you have already met it. In the ending -ого (and -его) this letter is written г and **said** в — which is why до скорого comes out *da-SKO-ra-va*. That ending is everywhere in Russian, so the exception is worth knowing on the day you learn the letter rather than being ambushed by it later. Everywhere else: hard g.

If it helps: this is the Greek **gamma**, squared off. Russian took its alphabet from Greek, and this is one of the letters where the descent is plain.

Your turn

- *Write it:* г — top horizontal, then the vertical down from its left end
- *Say it:* **g** as in *go*, never as in *gem*

Before you move on

Which Latin letter does it resemble with a bar removed? (**F**.)

15.4 х — an x that is not an x

Write г. A corner, and a hard g.

Script

How it is written — 2 strokes · 1 pen lift · 4 movements

Stroke order after RussianIrina, 'Learning Russian - Alphabet letters, handwriting', lowercase х demonstration, 08:42–08:49, YouTube, 5 February 2013
This order is attested, not standardised; the source records where it varies.

How ϫ *is written, stroke by stroke*

ϫ Ϫ

The capital, Ϫ, is the same cross drawn to full height.

A **false friend**, and a well-disguised one. Two crossing diagonals — an exact Latin **x** on the page — and it does not say *x*.

It says the sound at the end of Scottish *loch* and German *Bach*: a **breathy rasp** made at the back of the mouth, in the same place as *k* but without ever closing it. Start to say *k*, then leave the gap open and push air through.

Romanized in this book as **kh**, which is a warning label rather than a spelling: there is no *k* and no *h* in it, only the one rasping sound.

English has no letter for it, which is why English borrows it as *ch* in *loch* and *Bach* and then most speakers say a *k* anyway. You have the letter now, so you can do better than the borrowing.

Your turn

- *Write it:* ϫ — two crossing diagonals, like a Latin x
- *Say it:* **kh** — start a *k*, then leave it open and breathe through
- *Say it: loch*, the Scottish way, then just its ending

Before you move on

Is there a *k* sound in it? (**No** — the mouth never closes.)

15.5 ϕ — a circle on a stick

Write ϕ. Then make its sound without letting your mouth close.

Script

How ф is written, stroke by stroke

ф Ф

The capital, Ф, is the same shape drawn to full height.

A **new shape**: a vertical stroke with a closed loop threaded onto it, the loop sitting on both sides of the line. Draw the vertical first, then the loop across it.

It says **f**, exactly as in English *foot*. No trap at all.

This is Greek **phi**, and that ancestry shows in where you find it. Native Slavic words almost never contain ф — nearly every Russian word with this letter came in from Greek or later from Western Europe. When you meet it, the word is very often one you can half-guess, because it was borrowed from a language you know.

Your turn

- *Write it:* ф — the vertical, then the loop threaded across it
- *Say it:* **f** as in *foot*

Before you move on

Which Greek letter is it? (**Phi**.)

15.6 ц — one letter for two sounds

Write ш — three uprights standing on a base.

Script

How ц *is written, stroke by stroke*

ц Ц

The capital, Ц, is the same shape, tail and all, drawn to full height.

A **new shape**, and one you should compare to ш immediately, because they are close:

ш — three uprights on a base, **nothing below the line**

ц — two uprights on a base, and a **small tail dropping below** at the right

Two uprights instead of three, and a descender. That tail is doing real work: it is the only thing separating this letter from one you already know.

It says **ts**, the ending of English *cats* — but as a **single** sound at the **start** of a word too, which English never asks of you. Say *cats*, then say just its last two letters, then put a vowel after them.

One letter, one sound, even though English needs two letters to write it.

Your turn

- *Write it:* ф, then ш, then ц — and check which one has the tail
- *Say it: cats*, then **ts** alone, then **tsa**

Before you move on

Does English write this sound with one letter or two? (**Two** — *ts*.)

15.7 й — и in a hat

Write ц. Two uprights, base, tail.

Script

How й is written, stroke by stroke

й Й

The capital, Й, is the same letter drawn to full height, cap and all.

No new shape at all. This is и, which you have written since your very first letters, with a small curved cap sitting on top of it. The cap is called a *breve*, and you draw the letter exactly as before and then add it last.

The cap changes the job. и is a vowel, the *ee* of *see*. й is a **consonant**: the *y* of English *boy* or *yes*. Its formal name is "short и", which describes it well — the same sound, clipped so short it stops being a syllable of its own and leans on the vowel beside it.

That is why it turns up glued to other vowels at the ends of words, and why it never carries the stress: it cannot, because it is not a syllable.

Your turn

- *Write it:* и, then add the cap to make й
- *Say it:* **ee**, then clip it to the **y** of *boy*

Before you move on

Can this letter carry the stress of a word? (**No** — it is not a syllable.)

15.8 ю — a syllable in one letter, again

Write я, then у. One is a whole syllable; the other is the *oo* that looks like a Latin y.

Script

How ю *is written, stroke by stroke*

ю Ю

The capital, Ю, is the same shape drawn to full height.

A **new shape**, but a familiar idea. Two parts, joined: a **vertical stroke** on the left, and a **closed loop** to its right, tied to the vertical by a short horizontal at mid-height.

It says **yu** — the *you* of English, or the *u* of *use*. One letter, two sounds, exactly the deal you already accepted with я (*ya*).

That is the pattern worth taking away: Russian has a small set of letters that each write a **y-glide plus a vowel** in a single shape. You have met two of them now. They are the reason a Russian word can look shorter than its

pronunciation, and the reason counting letters is a poor guide to counting syllables.

Do not confuse its sound with у, the *oo* letter that looks like a Latin y. ю is that sound with a *y* welded to its front.

Your turn

- *Write it:* ю — the vertical, the loop, and the bar that ties them
- *Say it:* у (oo), then ю (yoo) — the glide is the only difference
- *Say it:* я, then ю — the same trick, two vowels
- *Write it:* й, then ю — a capped letter, then a syllable-letter

Before you move on

Is ю the same sound as у? (**No** — it is у with a *y* in front.)

15.9 Practice — eight more letters, sorted

> *Write it:* а and о Then say what happens to the second one when it is not the stressed vowel.

Script — the three kinds, one more time

You already have a way to sort any Cyrillic letter. Here are this chapter's eight, sorted:

True friends — the shape and the sound both match Latin:

а *a* · о *o*

False friend — the Latin shape, a different sound:

х *kh*, the rasp in *loch*

New shapes — no Latin relative to help or mislead:

г *g* · ф *f* · ц *ts* · ю *yu*

And one that fits none of the three, because it is not a new letter at all:

й — и wearing a cap

Two, one, four and one. The single false friend is the one to drill, because a false friend is the only kind that can be read confidently and wrongly: a new shape stops you dead, but х lets you read straight past it.

What you've built

Twenty-one letters before this chapter, and twenty-nine now. Russian has thirty-three.
Three of the eight cost you almost nothing. а and о were already yours from the Latin alphabet — the work in them was not the shape but **what unstressed о does to your ear** — and й is a letter you already write, wearing a cap.
That leaves **four genuinely new shapes** (г, ф, ц, ю) and **one false friend** (х) to drill. Five letters of real work out of eight.

Your turn

- *Write it:* а о г х ф ц й ю — all eight, in order, without looking above
- *Say it:* **kh**, the one that is not an x
- *Write it:* ш, then ц — and check which one has the tail
- *Say it:* и, then й — vowel, then consonant

Before you move on

How many of the thirty-three are now yours? (**Twenty-nine**.)

Chapter 16

And, Or, and Neither

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can join two words or two whole sentences with i, offer a choice with ili, refuse both halves at once with ni ... ni, and agree with somebody using tozhe.
>
> *The first two-clause sentence this book can make. Until this chapter the longest structure the track taught was a single clause, and i – the commonest word in Russian – had been printed twice as a conjunction without any lesson owning it. ni … ni is the first joining pattern in the book that stands in FRONT of both halves rather than between them, and it needs the negative said three times in one short sentence.*

16.1 и — the word you have already read

Two verbs from the chapter of first verbs, before the smallest word in the book arrives.

- *Recall:* знать, its English cousin *know*, and how не goes in front
- *Recall:* говорить, which is **not** a relative of *govern*, and the two verb families it belongs to
- *Recall:* the eight letters you sorted into true friends, false friends and new shapes

You'll want to know first — и

- и — *i* — **and**

One letter. One vowel. Nothing else. It is the commonest word in Russian, and you have been reading it since the verbs of the mind:

- Я читаю и понимаю. — *ya chitáyu i panimáyu* — I read **and** I understand.

That sentence was on the page long before anyone told you that the little и between the two verbs was a word at all. It is. It joins two things of the same kind: two nouns, two verbs, two whole thoughts.

The letter is one you can already write, and the word is the letter. Nothing new goes on the page here — only the fact that this shape has a meaning.

The word, taken apart — and its English cousins

и goes back to a Slavic particle built on the ancient **pointing stem** **i-*, the demonstrative that meant roughly *this one, that one.* A joining word that began as a pointing word is not strange: *and* is a way of saying *there is another one over here.*
That same old stem is the one hiding in его — which is why the smallest word in the language and one of its pronouns are relatives.

Your turn

- *Say it:* я читаю и понимаю — and hear и as a word this time
- *Say it:* any two verbs you own, with и between them
- *Build:* two foods, joined — молоко и сок

Before you move on

Say "and." (и.) Which letter is it, and had you written that letter before today? (и — yes, from the writing lessons.) What kind of old word is it built on? (**A pointing word.**) And one look back: say "I know," and then say you do not. (я знаю / я не знаю.)

16.2 и between two sentences — the book's first long sentence

Yesterday's word, and two verbs it is about to join.

- *Recall:* идти, the one-way verb whose past comes from another root entirely
- *Recall:* думать, the verb hiding inside the name of the Russian parliament, and the partner verb that finishes what it starts

Grammar lens — one word, any size of piece

You have joined two verbs with и. Now join two whole sentences with it. The word does not change:

- я иду и я думаю — *ya idú i ya dúmayu* — I am walking **and** I am thinking.

Each half stands on its own. Take the и away and you have two sentences that are still Russian. Put it back and you have one sentence with two halves, which is a thing this book has not been able to make until now.
Russian does not need a comma here, and does not want one: when и joins two halves that share a subject, nothing goes in front of it.

- я иду и думаю — *ya idú i dúmayu* — I walk and think.

Say the second я or leave it out; both are Russian. Leaving it out is what a Russian usually does, because the ending on the verb has already said who.

Your turn

- *Say it:* я иду и думаю
- *Build:* any two things you do, joined with и, dropping the second я
- *Build:* the same pair with the second я put back

Before you move on

Does и change when the pieces it joins get bigger? (**No** — one letter, always, and it is still the same old pointing word underneath.) Does a comma go in front of it when both halves share a subject? (**No**.) And one look back: which verb of motion means going one way, this once? (The verb is идти.)

16.3 или — "or," which is "and" with a doubt on the end

The two verbs that first stood on either side of и.

- *Recall:* понимать, which literally means to **take hold of** — the same picture English keeps in *comprehend*
- *Recall:* читать, and the fact that Russian has **no separate way** to say *I am reading*
- *Recall:* the whole first exchange — да, нет, and which greeting you give a stranger

You'll want to know first — или

- или — *íli* — **or**

Stress the first syllable: *Í-li*. It sits between the two things exactly where и sat, and it does the opposite job — not both, but one of the two.

- чай или кофе? — *chai íli kófe* — tea **or** coffee?
- я читаю или пишу — *ya chitáyu íli pishú* — I read **or** I write.

Offering somebody a choice is one of the first useful things you can do with a joining word, and this is the whole of it: two nouns, или, a rising voice.

The word, taken apart — and its English cousins

или is и with a small word welded on the end: ли, an old particle that carries doubt — the thing Russian puts in a sentence when the answer is not yet known.

So *and* plus *maybe* gives *or*. Once you see и at the front of или, the pair is impossible to confuse: the short one joins, the long one doubts. Vasmer takes it the same way: и plus ли.

Your turn

- *Say it:* чай или кофе*?* with the voice going up
- *Build:* the same two drinks joined with и instead — and hear the meaning turn over
- *Build:* two of your own verbs with или between them

Before you move on

Say "or." (It is или.) Which two pieces is it built from? (и plus ли.) Which of the two, и or или, offers a choice? (The long one, или.) And one look back: what does понимать literally do to a thing? (**Takes hold of it.**)

16.4 ни … ни … — refusing both halves at once

Two verbs, and the letter one of them brought with it.

- *Recall:* писать, whose root means to **scratch** — the same root behind *paint* and *picture* — and the letter ш it taught you
- *Recall:* брать, English *bear*, and the partner verb from a completely different root
- *Recall:* или, and the two pieces и and ли it is welded from

Grammar lens — the word that goes in front, twice

и and или both stand **between** the two things. This one stands **in front** of each of them, and there are two of it:

- ни чай, ни кофе — *ni chai, ni kófe* — **neither** tea **nor** coffee.

That shape is new. Every joining word so far has been a hinge in the middle; ни … ни … is a pair of flags planted before each half.

ни is the negator не with its vowel changed. Russian keeps them apart by job: не denies one thing, ни is the form that turns up when the denial has to be said twice.
And Russian says the denial a third time, on the verb. Where English is content with *I take neither*, Russian negates the verb as well:

- я не беру ни чай, ни сок — *ya ne berú ni chai, ni sok* — I take neither tea nor juice.

Three negatives in one short sentence, and every one of them is required. That is not sloppiness — it is the rule.

Your turn

- *Say it:* ни чай, ни кофе
- *Say it:* the whole refusal — я не беру ни чай, ни сок
- *Build:* two foods you own, refused together

Before you move on

Where does ни stand — between the halves or in front of them? (**In front of each half**.) How many times is the negative said in я не беру ни чай, ни сок? (**Three**.) And one look back: which verb means to write, and which letter arrived with it? (The verb is писать; the letter is ш.)

16.5 тоже — "me too," and "me neither"

Two verbs whose roots went a long way from home.

- *Recall:* спрашивать, on the root that gave Latin its word for **pray**
- *Recall:* помогать, built on a verb meaning **to be able** — English *may*, *might* and *main*

You'll want to know first — тоже

- тоже — *tózhe* — **also, too**

Stress the first syllable. It is not a joining word — it does not sit between two things — but it does the same social work as one: it puts a second person or a second fact alongside the first.

- я тоже — *ya tózhe* — **me too**.

Two syllables, and one of the most useful answers in the language. Somebody says what they do; you say я тоже and you have agreed, in full, without owning a single extra verb.

The word, taken apart — and its English cousins

тоже is two words fused: то (that) and же (a little word meaning *the very same*). *That same* — which is what *also* has always meant.
And because Russian negates by putting не in front of the verb, *me neither* comes out by putting не after тоже:

- я тоже не знаю — *ya tózhe ne znáyu* — I do **not** know **either**.

English swaps the whole word — *too* becomes *either*. Russian leaves тоже where it is and lets не do the work, which is one fewer word to learn. Both pieces are old Slavic words; Vasmer compares же with Greek *-ge*, a small word of emphasis.

Your turn

- *Say it:* я тоже
- *Say it:* я тоже не знаю
- *Build:* agree with any sentence you can already make, using тоже

Before you move on

Say "me too." (That is я тоже.) Which two words is тоже built from? (то and же.) How do you turn it into "me neither"? (**Put не in front of the verb** — the word тоже itself does not change.)
And one look back: which verb means to help, and what is buried inside it? (The verb is помогать, and the piece inside it means **to be able**.)

Chapter 17

But, Twice Over

Modes: 🚗 **voice** (3) 👁 **eyes** (1) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can contradict with no, set two facts side by side with a, count one, name the other one, divide a fact between two people with odin ... drugoy, and close a sentence with the three marks Russian writes only at the end.
>
> *English hides two different jobs under one word, but. Russian splits them: no denies the first half, a sets two facts beside each other, and an English speaker reaches for the wrong one until the whereas test is stated out loud. drugoy then pays back a root the book has been holding since the friends chapter – drug, the companion, is literally the other one. The chapter closes on the page itself: Russian, unlike Spanish, opens nothing and marks only the end.*

17.1 но — "but," said flatly

One word from the drinks chapter, one from the verbs, and the two newest words in the book.

- *Recall:* любить, English *love* itself, and the letter л that appears from nowhere in я люблю
- *Recall:* кофе, which sailed Arabic to Turkish to Dutch to Russia, and the letter ф it needed
- *Recall:* и, and its old pointing stem, and тоже with не after it

You'll want to know first — но

- но — *no* — **but**

Two letters, and it sits between the halves exactly where и sat. Where и adds, но takes back:

- я люблю чай, но не кофе — *ya lyublyú chai, no ne kófe* — I like tea, **but not** coffee.

Notice the comma. Russian puts one in front of но every time, and this is the first joining word in the book that has asked for one — и did not.

но contradicts. Whatever the first half led you to expect, the second half denies it, and nothing softer is meant.

The word, taken apart — and its English cousins

но goes back to Old Russian *nŭ*, a bare Slavic particle. Vasmer finds it probably related to an ancient word for "now": Lithuanian, Sanskrit and Gothic *nu*. So English **now** is a likely cousin. Vasmer also reports a less likely account, so the link is probable, not proven.
That is worth saying out loud rather than papering over: a language's oldest, smallest, most-used words are often the ones whose history is least secure, because they are too short to leave much evidence behind.

Your turn

- *Say it:* я люблю чай, но не кофе
- *Build:* the same sentence with и instead of но, and hear it stop contradicting
- *Build:* two things you do, the second one denied, with но не

Before you move on

Say "but." (That is но.) Does a comma go in front of it? (**Yes** — always.) Did и want one? (**No**.) Does но have an English cousin? (**Probably** — *now*, on Vasmer's preferred account.) And one look back: how do you say "me neither"? (я тоже не plus the verb.)

17.2 а — the other "but," and the one English does not have

Two words from the food chapter, and the two joiners you already own.

- *Recall:* чай, which came overland from Mandarin through Persian while English *tea* came by sea
- *Recall:* хлеб, borrowed from Germanic before Russian was Russian, and the letter х in it
- *Recall:* и joining two whole clauses, and но taking the second one back

You'll want to know first — а

- а — *a* — **and, but** — the *whereas* one

One letter again. Russian's two commonest joining words, и and а, are both single letters, and you learned to write both of them long before anyone said they were words.

- я люблю чай, а ты любишь кофе — *ya lyublyú chai, a ty lyúbish kófe* — I like tea, **and you** like coffee.

Nothing is denied there. Two facts are set side by side so that the difference between them can be seen. English has no separate word for this and reaches for *but*, or *and*, or *whereas*, depending on the sentence.

Like но, а takes a comma in front of it.

Grammar lens — which of the two to reach for

Ask one question: **is the second half denying the first, or standing beside it?**

- но — denying. *I like tea,* ***but not*** *coffee.*
- а — standing beside. *I like tea,* ***and you*** *like coffee.*

English hides both jobs under one word, so an English speaker will reach for но far too often. The test that works: if you could say *whereas*, use а.

Your turn

- *Say it:* я люблю чай, а ты любишь кофе
- *Say it:* я люблю чай, но не кофе — and hear the two sentences part company
- *Build:* one of each, about you and somebody else

Before you move on

Which word denies, and which sets two facts side by side? (но denies; а sets side by side.) Which English word can you swap in to test for а? (*Whereas.*) Which two joining words are single letters? (и and а.) And one look back: which drink came overland and which came by sea? (Tea came overland as чай; English *tea* came by sea.)

17.3 один — "one," and five English words that are the same word

The pair of friends, and two joining words.

- *Recall:* друг, on a root meaning **to accompany**, whose English descendants have all died out
- *Recall:* подруга, the same word with a prefix and the feminine -а
- *Recall:* или, built from и plus ли, and а the *whereas* word

You'll want to know first — один

- один — *adín* — **one**

Stress the second syllable, and the unstressed о at the front says *a*, which is the reduction rule the letters chapter left you with: *a-DÍN*, never *o-DIN*.

- один друг — *adín drug* — **one friend**.

It is the first number this book has given you, and it is here for a reason: it is half of a joining pattern that arrives in the next lesson.

The word, taken apart — and its English cousins

Strip the strengthening piece off the front of один and what is left goes back to PIE ***óynos**, "one." That single root gave English **five** separate everyday words:

- **one** — the number itself
- **an** and **a** — which are *one*, worn down to nothing
- **alone** — *all-one*
- **only** — *one-ly*

Latin took the same root and made **unus**, behind *unit*, *union* and *universe*. Russian kept it in один and, unlike English, never wore any of it down into an article — which is why Russian has no word for *a* at all.

Your turn

Say these aloud:

- один — *a-DÍN*, with the first vowel reduced
- один друг
- the English family — *one, an, a, alone, only* — all one root

Before you move on

Say "one." (That is один.) Which syllable is stressed, and what does the first vowel say? (**The second**; the first о says *a*.) Name three English words from the same root. (*One*, *an*, *alone* — or *a*, or *only*.) And one look back: what does друг's root mean? (**To accompany**.)

17.4 другой — "the other one," and it is your word for friend

The pair of siblings, and yesterday's number.

- *Recall:* брат, one of the most secure cognate sets in the whole family — *brother*, *frater*, *bhrātar*
- *Recall:* сестра, which completes the pair as securely as брат did
- *Recall:* один, and ни … ни … standing in front of both halves

You'll want to know first — другой

- другой — *drugóy* — **other, another**

Look at the front of it. It is друг, your word for *friend*, with an ending stitched on — and the meaning that came out is *the other one*.

That is not a coincidence and it is not a pun. In the oldest Slavic, a друг was a companion: the one who is not you, the second of a pair. Ask who *the other one* is, and the answer is the person beside you.

- другой брат — *drugóy brat* — the **other** brother.

The word, taken apart — and its English cousins

другой was first the same word as друг, "friend", says Vasmer: Proto-Slavic **drugŭ*, "companion", a cousin of Lithuanian *draũgas*, "companion".

Grammar lens — один … другой …

Put the two words at the front of two halves and you have the last of the joining patterns: the one that hands out a fact to each of two people.

- один брат любит чай, другой любит кофе — *adín brat lyúbit chai, drugóy lyúbit kófe* — **one** brother likes tea, **the other** likes coffee.

Like ни … ни …, this pattern stands in **front** of its halves rather than between them. Unlike ни … ни …, it denies nothing: it divides.

Your turn

- *Say it:* другой — and hear друг at the front of it

- *Say it:* один брат любит чай, другой любит кофе
- *Build:* the same split with two sisters, and two drinks of your own

Before you move on

Which word for a person is hiding inside другой? (It is друг.) Why does *companion* end up meaning *the other one*? (**Because the companion is the one who is not you**.) Which two joining patterns stand in front of their halves rather than between them? (ни **…** ни **…** and один **…** другой **…**.)

17.5 . ? ! — the three marks that close a Russian sentence

Two nouns from earlier, before the page itself is the lesson.

- *Recall:* семья, a cousin of English *home* through the root meaning **to settle**
- *Recall:* ухо, inherited straight from the root behind English *ear*
- *Recall:* тоже, and how не turns it into *me neither*
- *Recall:* four of the last eight letters — ф, ц, й, ю — and which of the eight was the false friend

Writing — the three closing marks

Russian uses the same three marks English does, in the same three shapes:

- **.** — точка — the full stop, and the Russian word for it means *a dot*
- **?** — the question mark
- **!** — the exclamation mark

A statement ends with the dot. Nothing else is needed and nothing goes at the front:

брат и сестра.

Draw the dot on the writing line, not floating above it. That is the whole of the stroke, and it is the mark you will make more often than any other.

Grammar lens — Russian closes, and never opens

Spanish opens a question with an upside-down mark and closes it with the ordinary one. Russian does **not**. One mark, at the end, and nothing at the beginning:

- чай или кофе? — one mark, at the end
- ухо! — the same rule for the exclamation

So a Russian question looks exactly like a Russian statement until you reach the last character. What tells a listener it is a question is the **voice**, not the page — which is why the reading and the saying have to be practised together.

Your turn

- *Write it:* брат и сестра and close it with a dot on the line
- *Write it:* чай или кофе and close it with one question mark, nothing at the front
- *Say it:* the same two words as a statement, then as a question, and hear the only difference

Before you move on

How many marks does a Russian question take, and where? (**One**, at the end.) What does точка mean as an ordinary word? (**A dot**.) What tells a listener a Russian sentence is a question? (**The voice**.) And one look back: which pattern hands one fact to each of two people? (один **...** другой **...**)

Chapter 18

One Word, and a Whole Sentence After It

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 4 of 5 lessons.

> ***By the end of this chapter:*** I can ask what, say I think that something is so, say what it is I do not know, and write the dash that stands where the missing verb to be would have been.
>
> *chto is the cheapest sentence-level word in the queue: one syllable that turns dumat and znat – both taught chapters ago and both stuck without an object – into verbs that carry a whole clause. It is also the word Russian spells with a ch and says with a sh in one job and not the other, and the word English splits into that and what while Russian does not. The chapter ends on the dash, which is the only mark in the language whose job is to stand in for a word the sentence never says.*

18.1 что — "what," spelled with a ч and said with a sh

Two parts of the face, and the mark that closes a question.

- *Recall:* нос, inherited straight from the root behind English *nose*
- *Recall:* рот, probably from a verb meaning **to dig** — a snout rooting the ground
- *Recall:* the one question mark at the **end**, and но, *but*, likely kin to *now*

You'll want to know first — что

- что — *shto* — **what**

Read it: the spelling, then the sound again, because they disagree

The word is written with ч, and it is said with a ш: *shto*, never *chto*.

That is not carelessness. It is one of a small handful of Russian words where the old spelling was kept after the pronunciation moved, and it is the commonest of them, so it is worth learning as a fact about this word rather than as a rule.

что? on its own is already a whole question, and it is the plainest way to ask somebody to say a word again. A single word, a rising voice, and one mark at the end.

The word, taken apart — and its English cousins

что goes back to PIE ***k^{w}id**, "what" — the same word as Latin **quid** and English **what** itself.
You have met this family before. The farewell пока was built on the ancient question-stem ***k^{w}o-**, the one behind как and the entire English *wh-* set. что is that family's plainest member, and the book collects the rest of it over the chapters that follow.

Your turn

Say these aloud:

- что — *shto*, with a ш sound and a ч on the page
- it as a one-word question, voice rising
- the three you own — как, пока, что — one ancient stem

Before you move on

Say "what." (It is что, said *shto*.) Which letter is on the page and which sound comes out? (ч on the page, ш in the mouth.) Which two words you already own belong to the same ancient family? (They are как and пока.) And one look back: which part of the face is a straight inheritance from the root behind *nose*? (That is нос.)

18.2 что as a hinge — one word carrying a whole sentence

Two more of the body, and the newest word in the book.

- *Recall:* глаз, which began as slang for a **ball** and pushed the true eye-word out of the language
- *Recall:* сердце, English *heart* barely disguised, and the letter ц inside it
- *Recall:* что said *shto*, and а, the *whereas* word
- *Recall:* the first letters you wrote — р с н б д е т — and the one that looks like an English R and is not one

Grammar lens — the same word, doing the other job

Put что between two clauses instead of at the front of a question, and it stops asking and starts carrying:

- я знаю, что ты понимаешь — *ya znáyu, shto ty panimáyesh* — I know **that** you understand.

Three things to notice, and the third is the one to hold on to.

- The **comma is compulsory**. Russian puts one in front of что every single time, with no exceptions of the kind English allows.
- The English *that* can be dropped — *I know you understand* is perfectly good English. The Russian что cannot. Leave it out and the sentence breaks.
- As a joining word it is said the way it is **spelled**: *chto*, not *shto*. Same letters, two jobs, two pronunciations.

English plays the same trick, twice: *what* and *that* both began as question words and one of them settled into this job.

Your turn

- *Say it:* я знаю, что ты понимаешь
- *Say it:* что twice — as the question *shto*, then as the hinge *chto*

- *Build:* я знаю, что plus any sentence you can already make

Before you move on

May the Russian что be dropped the way English drops *that*? (**No** — never.) What must always stand in front of it? (**A comma**.) Which of the two jobs is said *shto*? (**The question**.) And one look back: which eye-word did глаз push out of everyday Russian? (The word око, which survives inside очки, "little eyes.")

18.3 я думаю, что ... — saying that an opinion is yours

The two farewells, formal and casual, and the number from the last chapter.

- *Recall:* до свидания, literally **until the re-seeing**, with до taking the genitive after it
- *Recall:* пока, whose root is ancient and whose use as a goodbye is a hundred years old
- *Recall:* один, and the five English words its root became
- *Recall:* как вас зовут*?*, and the choice between ты and вы inside it

Grammar lens — the opinion frame

думать has been in this book since the verbs of the mind, and until this chapter it had nothing to think **about** — no object bigger than a single word could be attached to it. что fixes that in one move:

- я думаю, что **...** — *ya dúmayu, shto ...* — **I think that ...**

Whatever you can already say in Russian, you can now say you **think** it. That is a genuine step up rather than one more phrase: it turns every sentence you own into an opinion you have marked as your own, which is the difference between reporting a fact and taking a position.

- я думаю, что ты понимаешь — *ya dúmayu, shto ty panimáyesh* — I think that you understand.

The comma before что is compulsory here as everywhere.

Your turn

- *Say it:* я думаю, что ты понимаешь
- *Build:* take any sentence you own and put я думаю, что in front of it
- *Build:* the same sentence without the frame, and hear it turn back into a flat claim

Before you move on

Say "I think that you understand." (That is я думаю, что ты понимаешь.) What had думать been missing until now? (**Anything to think about that was bigger than one word**.) Does the comma stay? (**Yes** — always.) And one look back: what does до свидания literally say? (**Until the re-seeing**.)

18.4 я не знаю, что … — admitting it, in a whole sentence

Two more farewells, and the divider from the last chapter.

- *Recall:* до скорого, built on a word meaning **quick** with no English cousin at all
- *Recall:* до завтра, and завтра built on the root behind English *east* and *aurora*
- *Recall:* другой, and the split один … другой …

Grammar lens — the other frame, and the negative one

знать takes что exactly as думать does, and the negative is where it earns its place:

- я знаю, что ты понимаешь — I know **that** you understand.
- я не знаю, что ты говоришь — *ya ne znáyu, shto ty gavarísh* — I do not know **what** you are saying.

Go back over those two English translations. The Russian word is **the same word both times**, and English needs *that* in the first and *what*

in the second. Russian makes no such split, which is one distinction fewer for you to get wrong.
The second sentence is the useful one. Until now this book could say я не знаю and stop — a flat shrug. With что you can say what it is you do not know, which is what turns an admission into something the other person can act on.

Your turn

- *Say it:* я не знаю, что ты говоришь
- *Say it:* the same sentence without не, and hear it turn into a claim
- *Build:* я не знаю, что plus anything you own

Before you move on

Say "I do not know what you are saying." (That is я не знаю, что ты говоришь.) How many Russian words cover English's *that* and *what* here? (**One** — что does both.) Which two verbs now take a whole sentence after them? (думать and знать.) And one look back: which farewell is built on the word for *morning*? (That is до завтра.)

18.5 — the dash that stands where the verb would have been

The last two farewells, and the marks from the previous writing lesson.

- *Recall:* до встречи, built from **into** plus **with** on a root with no secure English cousin
- *Recall:* спокойной ночи, whose ночь is one of the most secure cognates in the family and whose покой is the root of English *quiet*
- *Recall:* the dot at the end, and the single question mark
- *Recall:* three letters from the middle of the alphabet — ж, ч, and the soft sign that makes no sound at all

Writing — one long stroke on the line

Russian's dash is тире, and it is a genuinely long mark — longer than an English hyphen, with a space on each side of it:

брат — друг

Draw it at the height of the small letters, not at the top and not on the baseline, and give it the length of about two letters.

The mark is a French loan, **tiret**, borrowed whole. What Russian does with it is not French at all.

Grammar lens — the mark for a verb that is not there

You learned early that Russian says *I am a student* with no verb in the middle: the present tense of быть is absent altogether. On the page, that absence gets a mark of its own.
Where the sentence would have needed **is**, and both halves are nouns, a Russian writer puts a dash:

сестра — подруга

A sister is a friend. There is no verb in that sentence and there never will be. The dash is doing its work — and it is the only punctuation mark in the language whose job is to stand in for a word.
Say it aloud and there is a small pause exactly where the dash sits. The mark is not decoration; it is written-down silence.

Your turn

- *Write it:* сестра — подруга, with a space on each side of the dash
- *Say it:* the same sentence, and put a small pause where the dash is
- *Write it:* one sentence of your own with two nouns and a dash between them

Before you move on

What word is the dash standing in for? (**The verb *to be***, which Russian does not say in the present.) How is it drawn? (**Long, on the level of the small letters, with a space each side**.) And one look back: which farewell means *calm* plus *night*? (That is

спокойной ночи.)

Chapter 19

Why, Because, When

Modes: 🚗 **voice** (3) 👁 **eyes** (1) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can ask why and when in one word each, give a reason with potomu chto, put two things at the same moment with kogda, and write the comma Russian requires at the seam of every subordinate clause.
>
> *The question family the book opened at poka closes here at five members – kak, kakoy, chto, pochemu, kogda – all one ancient stem, and two of them do double duty as joiners without changing a letter. potomu chto is pochemu with the question-stem swapped for the pointing-stem, so the answer is made out of the question. The chapter ends by stating the one Russian punctuation rule that has no exceptions, which is only sayable once the track owns the subordinators it applies to.*

19.1 почему — "why," which is really "after what"

The two nursery words, and the newest mark on the page.

- *Recall:* мама, which is not inherited from anywhere — every language builds it out of the first sounds a baby makes
- *Recall:* папа, and the rule that a word can wear a feminine ending and still be a man
- *Recall:* the dash standing where the missing verb would be

- *Recall:* я and ты, English *thou*, and why вы is the safer one

You'll want to know first — почему

- почему — *pachemú* — **why**

Three syllables, stress right at the end: *pa-che-MÚ*. It is the longest question word in this book and the easiest to take apart.

- почему? — on its own, it is a complete question.

One word, one rising voice, one mark at the end, and you have asked for a reason about anything the other person has said. That is worth having before you can give a reason yourself.

The word, taken apart — and its English cousins

почему is по ("after, along") plus a case-form of что.

- по + чему = почему — literally, *after what*

So the question family you opened in the last chapter has produced its third member: как, что, and now почему. All three are the same ancient stem wearing different endings, and there are more still to come. Vasmer traces что to Proto-Slavic **čĭ*, "what", with a pointing *to* on the end.
English does exactly the same trick and then forgets it did: *wherefore* is *for-what*, and *therefore* is *for-that*. Asking *why* by asking *after what* is not a Russian oddity — it is what most of Europe does.

Your turn

Say these aloud:

- почему — *pa-che-MÚ*, stress at the end
- it as a one-word question after anything you say
- the three of the family — как, что, почему

Before you move on

Say "why." (That is почему.) Which two pieces is it built from? (по plus a form of что.) What does it literally say? (**After what**.) And one look back: which word is built out of the first sounds a baby makes rather than inherited? (That is мама.)

19.2 потому что — the answer, made out of the question

The two formal parent-words, and yesterday's question.

- *Recall:* мать, straight from the root behind English *mother*
- *Recall:* отец, which is **not** the father-root at all but a nursery word for *daddy* that won
- *Recall:* почему, and тоже

You'll want to know first — потому что

- потому что — *patamú shto* — **because**

Set the two words side by side and the shape gives itself away:

- почему — *after* ***what*** — the question
- потому — *after* ***that*** — the answer

Russian answers *why* by taking the same word, swapping the question-stem for the pointing-stem, and adding что to hang the reason on. почему asks; по тому points at the reason; что carries the sentence that names it. Both stems are inherited from Proto-Slavic: **tŭ*, "that", the stem of то, and **čĭ-*, the stem of что, "what".

Grammar lens — where the halves go, and where the comma goes

The thing that happened comes first; the reason follows:

- я не читаю, потому что я не понимаю — *ya ne chitáyu, patamú shto ya ne panimáyu* — I am not reading, **because** I do

not understand.

The comma stands before потому, not between потому and что — the two words are one joining word and nothing may come between them.
и went bare; но and а each took a comma; this one takes a comma too. A shape is starting to show through those four, and the writing lesson at the end of this chapter is where it gets stated.

Your turn

- *Say it:* я не читаю, потому что я не понимаю
- *Say it:* почему? and then answer yourself with потому что
- *Build:* any sentence you own, a comma, потому что, and a reason

Before you move on

Say "because." (That is потому что.) What is the one-word difference between it and *why*? (**Question-stem** against **pointing-stem** — *after what* against *after that*.) Where does the comma go? (**Before** потому, never inside the pair.) And one look back: which formal parent-word is really a nursery word that won? (That is отец.)

19.3 когда — "when," and the family's fifth member

Two things from the fridge, and the newest joining word.

- *Recall:* молоко, on the root behind English *milk*
- *Recall:* сыр, built on a word meaning **sour** — cheese named after what happens to the milk
- *Recall:* потому что, and один
- *Recall:* меня зовут — the they-form with nobody in it, and the object shape of я

You'll want to know first — когда

- когда — *kagdá* — **when**

Two syllables, stress on the second. Read the spelling and say the sound carefully, because they disagree again: the unstressed о at the front says *a*, exactly as it does in один.

- когда? — a complete question all by itself.

You now have three one-word questions: что?, почему? and когда? — each of them a whole turn in a conversation, none of them needing a verb.

The word, taken apart — and its English cousins

когда is the same ancient question-stem as как, что and почему, this time with an old time-ending welded on.
That makes four. Look at the front of each one and the family resemblance is on the page:

- как and когда — both beginning with the same к
- что — the same stem, worn down further, which is why the letters no longer match
- почему — the stem again, wearing по in front

Learning one question word in Russian is nearly learning the set.
Vasmer reconstructs an older **koda* and sets it beside Lithuanian *kadà* and Sanskrit *kadā*, both "when".

Your turn

Say these aloud:

- когда — *kag-DÁ*, with the first vowel reduced
- the three one-word questions in a row — что? почему? когда?
- the four of the family — как, что, почему, когда

Before you move on

Say "when." (That is когда.) What does its first vowel say? (**A**, because it is unstressed.) How many members of the question family do you now own? (**Four**.) And one look back: what does the word behind сыр mean? (**Sour**.)

19.4 когда as a hinge — two things happening at once

The last two things on the food list.

- *Recall:* сок, a native word with no secure English cousin at all
- *Recall:* суп, borrowed from French, and recent enough that Russians still feel it as a loan
- *Recall:* другой, and the split один … другой …
- *Recall:* очень приятно, its root meaning **friend**, and the sentence with no verb in the middle

Grammar lens — the question word, joining

что asked a question and then hung a clause under a verb without changing a letter. когда does exactly the same:

- когда я читаю, я думаю — *kagdá ya chitáyu, ya dúmayu* — **when** I read, I think.

This time the joining word may go **first**. Russian is happy to lead with the *when*-half and follow with the main one — and when it does, the comma sits between the two halves rather than before the joining word. Turn the halves round and the comma travels with the seam:

- я думаю, когда я читаю — I think **when** I read.

Either order is correct and both mean the same thing. What never changes is that there is a comma at the seam.

Your turn

- *Say it:* когда я читаю, я думаю
- *Say it:* the same sentence with the halves the other way round
- *Build:* two things you do at the same time, joined with когда

Before you move on

May когда stand at the front of the whole sentence? (**Yes** — and then the comma goes at the seam between the halves.) Which other word you own asks a question and joins clauses without changing? (That is что — and both of them come off the same ancient question-stem.) And one look back: which food word is a French loan? (That is суп.)

19.5 , — the comma, and the rule with no exceptions

The marks you already draw, and two things they were drawn around.

- *Recall:* the dot on the line, the single question mark at the end, and the long dash with a space each side
- *Recall:* я не знаю, что … — and the pattern ни … ни …
- *Recall:* all eight of the last letters — а о г х ф ц й ю — and the one vowel among them that says something else when it is not stressed

Writing — the hooked-back stroke

The comma is запятая, and the name is a description of the stroke: it means roughly *the one hooked back*. Where точка is named for what it looks like — a dot — this one is named for what your hand does.

Start on the writing line, press, and pull the tail down and back to the left. It sits **below** the line, which is the whole difference from the dot.

,

Draw ten of them in a row and watch that every tail goes the same way.

Grammar lens — the rule that has no exceptions

English commas are a matter of taste and half of what people argue about is optional. Russian's central comma rule is not optional and has no exceptions:
A comma stands at the seam of every subordinate clause.
Everything that hangs one clause under another takes one — что, потому что, когда — every time, in every sentence, whether or not a reader would pause there.
The words that join two equal halves are the other case, and they split:

- и — no comma
- но and а — comma, always

So one mark, three rules, and only the first of them is absolute. It is worth learning as a single fact because it is the one piece of Russian punctuation an examiner can mark wrong without any argument about style.

Your turn

Write these out:

- ten commas in a row, every tail below the line
- я читаю и понимаю — and put no comma in it
- я не читаю, потому что я не понимаю — and put one in

Before you move on

Which of the joining words you own never takes a comma? (That is и.) Which take one always? (но, а, and everything that hangs a clause underneath — что, потому что, когда.) Where does the tail of the comma go? (**Below the line**.)

Chapter 20

The Verb That Takes Another Verb

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 4 of 5 lessons.

> ***By the end of this chapter:*** I can say what I want, put a bare infinitive after it with nothing in between, give the purpose of an action with chtoby, say what I can and cannot do, and state an obligation in a sentence with no subject at all.
>
> *Fourteen infinitives had been taught and not one of them had ever stood after another verb, because the track had no khochu, mogu or nado to put one after: the pattern was missing, not the words. moch had been worse off than missing – the pomogat lesson spelled out that the verb is po- plus moch and then never taught moch, so the reader had been reading it for fifteen chapters. nado closes the chapter on a sentence with no subject in it, which is the same freedom as the absent copula the track already teaches.*

20.1 хотеть — "to want," the verb the book has been missing

Reach back four chapters, and then further.

- *Recall:* и, the one-letter joiner, and its old pointing stem
- *Recall:* знать, English *know*, and the -у / -ю that marks the *I* form of almost every Russian verb
- *Recall:* the comma at the seam of every clause hung under another

- *Recall:* почему, which is по plus a form of что, and я думаю, что …

You'll want to know first — хотеть

- хотеть — *khatét* — **to want**
- я хочу — *ya khachú* — **I want**
- ты хочешь — *ty khóchesh* — **you want**

Listen to the *I* form. The т of the infinitive has turned into a ч — the same consonant swap you met in the first verbs — and the ending is the familiar -у.

- я хочу чай — *ya khachú chai* — I want tea.

This book has taught you to say what you do, what you know, what you understand and what you love. Until this line it could not say what you **want**, which is the first thing a traveller needs and the last thing this book supplied.

The word, taken apart — and its English cousins

хотеть is native Slavic and stops there. There is no secure Latin cousin, no Germanic one, no English one — the etymologists trace it inside the Slavic family and no further.
That is the third time this book has had to say so, after но and сок, and the pattern behind it is worth noticing: the words a language never borrows are the ones it needs every day.

Your turn

- *Say it:* хотеть, then я хочу, and hear the т turn into ч
- *Say it:* я хочу чай
- *Build:* name a drink or a food you own and say you want it

Before you move on

Say "I want tea." (That is я хочу чай.) Which letter changes between хотеть and хочу? (The т becomes ч.) Does this verb have

an English cousin? (**No** — it is native Slavic and traceable no further.) And one look back: which verb means *to know*, and what is its English cousin? (That is знать, and the cousin is *know*.)

20.2 я хочу читать — two verbs in a row, and no word between them

Yesterday's verb, and one from a long way back.

- *Recall:* хотеть, with no cousin outside Slavic, and я хочу
- *Recall:* говорить, which is **not** related to *govern*, and the two verb families Russian sorts its endings into
- *Recall:* и joining two whole clauses
- *Recall:* потому что, and the comma that stands in front of the pair
- *Recall:* быть and жить, the first two verbs, and the root behind жить that means **quick**

Grammar lens — the infinitive finally has somewhere to stand

This book has taught you fourteen verbs, and every one of them arrived in its **infinitive** — читать, писать, говорить, the dictionary form ending in -ть. Until now that form has had nothing to do except be the name of the verb.
Put it straight after a finite verb and it goes to work:

- я хочу читать — *ya khachú chitát* — I want **to read**.
- я хочу писать — *ya khachú pisát* — I want **to write**.

Count the words between the two verbs: **none**. English needs *to*; Russian needs nothing at all. The second verb stays in the form you learned it in.
That single fact turns every infinitive in this book into something you can say you want to do, which is fourteen new sentences from one pattern.

Your turn

- *Say it:* я хочу читать
- *Say it:* я хочу говорить
- *Build:* run through the verbs you own, each one after я хочу

Before you move on

What goes between the two verbs in я хочу читать? (**Nothing** — Russian has no word for English's *to*.) Which form does the second verb take? (**The infinitive**, exactly as the book taught it.) And one look back: is говорить related to English *govern*? (**No** — the resemblance is an accident.)

20.3 чтобы — "in order to," which is что wearing a wish

The very first word in the book, and one of the joiners.

- *Recall:* привет, the word you opened with
- *Recall:* понимать, whose root means **to take hold of**
- *Recall:* или, built from и plus ли, and the comma at every seam
- *Recall:* видеть, and когда on the same ancient question-stem as как
- *Recall:* видеть's cousin *wit*, the consonant that swaps in я вижу, and the г that is sometimes said as a в

Grammar lens — a purpose is a wish with что on the front

- чтобы — *shtóby* — **in order to, so that**

Two pieces, both nearly yours: что, and бы, the small particle Russian puts on anything that is wished for rather than done. A purpose, in Russian, is literally a *that*-clause said in the mood of a wish.
Put an infinitive after it and you have your reason for doing something:

- я читаю, чтобы понимать — *ya chitáyu, shtóby panimát* — I read **in order to** understand.

The comma before чтобы is compulsory, like every subordinator's. The verb after it is the infinitive, exactly as after хочу — so the pattern you learned in the last lesson is doing a second job here without changing.
Note the stress: чтобы is stressed on its **first** syllable, unlike что, which has only one.

Your turn

- *Say it:* я читаю, чтобы понимать
- *Say it:* чтобы with the stress on the front — *SHTÓ-by*
- *Build:* something you do, a comma, чтобы, and the reason you do it

Before you move on

Which two pieces make чтобы? (что plus бы.) What form of the verb follows it? (**The infinitive**.) Which syllable carries the stress? (**The first**.) And one look back: what was the very first word in this book? (That was привет.)

20.4 мочь — "can," and you have been reading it for fifteen chapters

Two verbs from the early chapters, and one pattern.

- *Recall:* идти, the one-way verb whose past comes from a different root
- *Recall:* помогать, and the fact that its second half was a verb meaning **to be able**
- *Recall:* ни … ни …, standing in front of both halves
- *Recall:* когда joining two clauses, with the comma at the seam

You'll want to know first — мочь

- мочь — *moch* — **to be able, can**

- я могу — *ya magú* — **I can**
- ты можешь — *ty mózhesh* — **you can**

You have seen this word already. When the book took помогать apart it said in so many words that the verb is по- plus мочь, "to be able" — and then moved on without ever giving мочь a lesson of its own. It is here now.

Like хотеть, it takes a bare infinitive after it:

- я могу читать — *ya magú chitát* — I can read.
- я не могу идти — *ya ne magú idtí* — I cannot go.

The word, taken apart — and its English cousins

мочь is PIE ***mag^{h}-**, "to be able, to have power" — and the English descendants are three of the plainest words in the language:

- **may** — permission, which began as ability
- **might** — both the verb and the noun meaning *strength*
- **main**, as in *with might and main*

So я могу and *I may* are, underneath, the same sentence. Russian kept the whole verb; English wore it down into a modal that no longer conjugates at all.

Your turn

- *Say it:* я могу читать
- *Say it:* я не могу идти
- *Build:* something you can do, then the same thing denied

Before you move on

Say "I can read." (That is я могу читать.) Which taught verb has this one inside it? (That is помогать — по- plus мочь.) Name two English words from the same root. (*May*, *might* — or *main*.) What form follows it? (**The infinitive**, with nothing in between.)

20.5 надо — a whole sentence with nobody in it

The verb of the mind, and the two newest words.

- *Recall:* думать, the verb inside the name of the Russian parliament, and its partner verb
- *Recall:* мочь, English *may* and *might*, and тоже with не after it

You'll want to know first — надо

- надо — *náda* — **it is necessary, one must**

Stress the first syllable; the о at the end is unstressed and says *a*, so the word comes out *NÁ-da*. It is worn down from Old Russian *nadobě*, a form of надоба, "need", built on доба, "a time, a season" (Vasmer).

Like хотеть and мочь, it is followed by a bare infinitive:

- надо читать — *náda chitát* — one must read.

Grammar lens — the sentence with no subject

Look at надо читать again and count the people in it. There are none.
There is no я, no ты, and no verb agreeing with anybody. English cannot do this: it has to invent a subject — *one* must read, *it* is necessary, *you* should read — because an English sentence is not allowed to go without one.
Russian is allowed. надо is an **impersonal** word: the obligation is stated and left hanging in the air, belonging to nobody in particular. This is the same freedom you met when the present tense of быть turned out to be missing altogether.
Naming the person who must do it needs a case this book has not opened yet, so for now the impersonal form is the whole of it.

Your turn

- *Say it:* надо читать — *NÁ-da*, first syllable
- *Say it:* надо думать
- *Build:* three things one must do, using verbs you own

Before you move on

How many people are named in надо читать? (**None** — it is impersonal.) What must English add that Russian does not? (**A subject** — *one*, *it*, or *you*.) Which other missing word does that remind you of? (**The present tense of быть**, which Russian also leaves out.) And one look back: which council is named after the verb *to think*? (**The Duma**.)

Chapter 21

Excuse Me, and Say It Again

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can apologise in both the light and the heavy way, open a request to a stranger, ask for a repeat, ask somebody to speak slowly, and ask for help.
>
> *The track could say ya ne ponimayu and ya ne znayu in full and had no word for sorry, no way to ask for a repeat and no way to open a request to a stranger: it could report a failure and do nothing about it. Five words close that. The chapter also names the -ite ending, which turns three words the reader would otherwise memorise separately into one set – and the last of the five, pomogite, is built entirely out of parts the reader already had.*

21.1 извините — the word the book has been missing since page one

The two courtesy words you have had since the first chapter, and a verb.

- *Recall:* понимать, on a root meaning **to take hold of**
- *Recall:* спасибо, and чтобы with an infinitive after it
- *Recall:* но, the contradicting *but*, probably kin to English *now*
- *Recall:* надо with nobody in the sentence, and хотеть, which has no cousin outside Slavic

You'll want to know first — извините

- извините — *izvinítye* — **excuse me, sorry**

Four syllables, stress on the third: *iz-vi-NÍ-tye*. It is the single most useful word left in this book, and it does two separate jobs:

- **an apology**, when you have got something wrong
- **an opening**, when you want to speak to somebody you do not know

The second is the one to notice. A Russian does not walk up to a stranger and start; they say извините first, every time. It is the equivalent of *excuse me* at the front of a question, and without it the question can sound abrupt in a way you did not intend.

The ending -ите is the polite one, the same вы that здравствуйте carries. Said to a friend it would be извини, without the те — but reach for the long one by default, exactly as you do with the greeting.

The word, taken apart — and its English cousins

извините is из- ("out of") plus вина ("guilt, fault"), with the polite ending on the end.
So the word literally asks the other person to take you **out of the blame** — which is a real picture, still visible in the Russian, and one English threw away when *excuse* stopped meaning anything at all on its own. вина is inherited; Vasmer relates it to Latvian *vaina*, "guilt".

Your turn

Say these aloud:

- извините — *iz-vi-NÍ-tye*, stress on the third
- извините, пожалуйста — the two courtesy words together
- it as an opening, before anything else you know how to ask

Before you move on

Say "excuse me." (That is извините.) Name its two jobs. (**An apology**, and **the opening of a request to a stranger**.) What does it literally ask for? (**To be taken out of the guilt**.) And one

look back: what does понимать literally do? (**Takes hold**.)

21.2 простите — the heavier apology

Yesterday's word, and a verb from long before it.

- *Recall:* читать, which sits with the words for **honour** and **number** on a root meaning *to count, to heed*
- *Recall:* that Russian has no separate *I am reading*
- *Recall:* извините, and хотеть
- *Recall:* а, the *whereas* word, and the test that tells it from но

You'll want to know first — простите

- простите — *prastítye* — **forgive me**

Same shape as yesterday's word, same polite -ите ending, and the informal прости sitting behind it in exactly the same way.

- извините asks to be **let off**
- простите asks to be **forgiven**

Both come out as *sorry* in English and they are not interchangeable in Russian.

Why it's said this way

What separates them is **weight**, not politeness — both words are polite.

- извините for the small thing: bumping somebody, interrupting, opening a request to a stranger. Nobody is really being blamed.
- простите for the real one: you have let somebody down and you are asking them to release you from it.

Use простите for a trodden foot and you sound as though you had wrecked their week.

This is the same pair-with-a-rule that здравствуйте and привет form for greetings — Russian keeps two options side by side. The difference here is that the choice is about the size of the offence rather than about who you are talking to.
The etymology carries the same weight: простите is built on простой, Proto-Slavic **prostŭ*, "simple, free": to forgive is to set someone free, and Czech *prostiti* still means "to free" (Vasmer).

Your turn

- *Say it:* простите — *pras-TÍ-tye*
- *Say it:* both words in turn, and say what each is for
- *Build:* pick the right one for stepping on a foot, and for missing a meeting

Before you move on

Which of the two is the heavier apology? (That is простите.) What separates the two? (**The size of the offence**, not politeness.) What does the root of простите mean? (**Simple, straight** — to forgive is to make straight.) And one look back: which greeting is the formal one? (That is здравствуйте.)

21.3 повторите — asking for it again

A verb from the hand chapter, and yesterday's apology.

- *Recall:* писать, on a root meaning **to scratch** — the same root as *paint* — and the letter ш
- *Recall:* a bare infinitive after я хочу, with nothing in between
- *Recall:* простите, the heavier of the two apologies
- *Recall:* один, whose root became English *one*, *an*, *a*, *alone* and *only*
- *Recall:* чтобы, the purpose word built from что plus бы

You'll want to know first — повторите

- повторите — *paftarítye* — **say it again, repeat it**

Until now the book could only report a failure. This word asks for a fix.

- извините, повторите, пожалуйста — *izvinítye, paftarítye, pazhálusta* — sorry, please say that again.

That is a complete repair turn.

Grammar lens — the -ите ending is an order

Three words in two lessons now end in -ите: извините, простите, повторите. That is worth naming.
-ите is Russian's polite **imperative** — the ending that turns a verb into an instruction addressed to вы. Drop the -те and you get the ты form: извини, прости, повтори.
So the two apologies were never nouns: they were commands all along.
The word itself is по- plus втор-, *second* — the same втор- in вторник, Tuesday, the second day. To repeat is to do a thing a second time. второй goes back to Proto-Slavic **vŭtorŭ*, whose deeper origin Vasmer calls uncertain.

Your turn

Say these aloud:

- повторите, пожалуйста
- the whole turn — извините, повторите, пожалуйста
- the three -ите words in a row, and hear the ending they share

Before you move on

Ask somebody to say it again, politely. (That is повторите, пожалуйста.) What does the ending -ите do? (**Turns a verb into a polite instruction** addressed to вы.) Which day of the week shares a piece with this word? (The day is вторник, Tuesday, the second day.) And one look back: which letter did писать teach you? (That is ш.)

21.4 медленно — asking for it slower

A verb from the hand chapter, and the divider from earlier.

- *Recall:* брать, English *bear*, whose partner verb comes from a completely different root
- *Recall:* другой, the split один … другой …, and повторите

You'll want to know first — медленно

- медленно — *myédlenna* — **slowly**

Stress the first syllable, and let the two unstressed о and е at the end soften: *MYÉD-len-na*. It is the adverb of the Russian word for "slow", Proto-Slavic **mŭdĭlĭnŭ*, with медлить, "to delay" (Vasmer).

Its shape is worth a moment. Russian makes an adverb by putting -о on the end of a describing word, and that is the whole rule — no ending to agree with anything, nothing to change. It is one of the most productive rules in the language.

Grammar lens — the second repair move

Take говорить, put the polite -ите on it, and add the adverb:

- говорите медленно, пожалуйста — *gavarítye myédlenna, pazhálusta* — please speak slowly.

That is a genuinely different move from повторите. Asking for a repeat gets you the same sentence at the same speed; asking for медленно changes what the other person is doing. A listener who owns both can steer a conversation instead of only reporting on it. The repair kit is now complete, and it is four words long: извините, повторите, говорите медленно, пожалуйста.

Your turn

Say these aloud:

- медленно — *MYÉD-len-na*
- говорите медленно, пожалуйста

- the whole kit in order — sorry, again, slower, please

Before you move on

Ask somebody to speak slowly. (That is говорите медленно, пожалуйста.) How does Russian make an adverb? (**By putting -о on the end**.) What does asking for медленно get you that a repeat does not? (**A change in what the speaker is doing**, not the same sentence again.) And one look back: which verb means *to take*? (That is брать.)

21.5 помогите — the request you already knew how to make

The asking verb, and yesterday's adverb.

- *Recall:* спрашивать, on the root that gave Latin its word for **pray**
- *Recall:* говорите медленно, and тоже
- *Recall:* the dot on the line, and the single question mark at the end

You'll want to know first — помогите

- помогите — *pamagítye* — **help me**

There is almost nothing new in this word, and that is the point of putting it here. You have had помогать since the verbs of the hand. You learned -ите two lessons ago. Put them together and you have the most important single word in any emergency, built entirely out of parts you owned already.

- извините, помогите, пожалуйста — *izvinítye, pamagítye, pazhálusta* — excuse me, please help.

Say it once out loud. A course that can greet, thank, apologise, ask for a repeat, ask for slower speech and ask for help has covered every move a beginner needs to survive a conversation that goes wrong — and every one of those moves arrived in this chapter or the two behind it.

The word, taken apart — and its English cousins

помогите is помогать, “to help”, with -ите: по- with the root of мочь, “to be able”, Proto-Slavic **mogti*, which Vasmer relates to Gothic *magan*, “to be able”.

Your turn

Say these aloud:

- помогите — *pa-ma-GÍ-tye*
- извините, помогите, пожалуйста
- the four -ите words together — excuse, forgive, repeat, help

Before you move on

Ask for help, politely and completely. (That is **извините, помогите, пожалуйста**.) What two things is помогите made of, and did you own both? (помогать and the polite -ите — yes, both.) And one look back: which verb sits inside помогать, and what are its English cousins? (The verb is мочь; the cousins are *may*, *might* and *main*.)

Chapter 22

The Words That Ask, and the Word That Points Back

Modes: **voice** (5) **eyes** (1) **Hands-free start:** the first of 6 lessons.

By the end of this chapter: I can ask who, which and how many, hang a whole clause onto a noun with kotoryy, and both ask and embed a yes-or-no question with li.

The question family the book opened at poka closes here at seven members, all one ancient stem: kto, chto, kakoy, kak, kogda, pochemu, skolko. Two of them supply their own answers by swapping the question-stem for the pointing-stem. kotoryy is the eighth relative of the same root and the one that does the most work – it is how a Russian noun gets described at any length. li ends the chapter by turning out to have been inside ili since the joining chapter.

22.1 кто — "who," the twin of что

The friend, the helping verb, and yesterday's request.

- *Recall:* помогать, and помогите with the polite -ите on it
- *Recall:* друг, on the root meaning **to accompany**
- *Recall:* надо, the sentence with nobody in it
- *Recall:* извините, which literally asks to be taken **out of the guilt**

You'll want to know first — кто

- кто — *kto* — **who**

Three letters, one syllable, and — unlike что — it is said **exactly as it is written**. No ш ambush here.

The two words are a matched pair, and Russian keeps the division sharper than English does:

- кто asks about **people**
- что asks about **things**
- кто**?** on its own is a complete question, exactly as что**?** is.

The word, taken apart — and its English cousins

кто is PIE ***k^{w}is**; что is PIE ***k^{w}id**. The same stem, twice, with two different endings — one for people and one for things — and the split is older than Russian, older than Latin, older than English.
Latin kept the same pair as **quis** and **quid**. English kept **who** and **what**. Russian kept кто and что. Three languages, one ancient distinction, none of them has ever let it go.
That is now six of the family: как, какой, что, почему, когда, кто.

Your turn

Say these aloud:

- кто and что in turn, and hear that only one of them lies about its spelling
- кто*?* as a whole question
- the six of the family in a row

Before you move on

Say "who." (That is кто.) Which of кто and что is said as it is spelled? (кто is; что is not.) Which asks about people? (кто.) Name the Latin pair that matches them. (*Quis* and *quid*.) And one look back: how do you ask for help? (That is помогите.)

22.2 какой — "which," and the word the book already told you about

The verb of the heart, and two recent words.

- *Recall:* любить, English *love* itself, and the л that appears from nowhere in я люблю
- *Recall:* простите, the heavier apology, and кто
- *Recall:* что hanging a whole clause under a verb, and the rule that tells извините from простите

You'll want to know first — какой

- какой — *kakóy* — **which, what kind of**

You have been told about this word once before, and by a farewell. When the book took пока apart it said that the old pronoun inside it became какой — so the word has been named in this book for six chapters without ever being taught. It is taught now.

Look at its ending and compare it with другой. The same -ой does the same job in both: it turns a stem into a word that stands in front of a noun.

- какой чай ты любишь? — *kakóy chai ty lyúbish* — **which** tea do you like?

Where что asks *what thing*, какой asks *which one of these* — and it is the natural partner of или when you are offering a choice out loud.

The word, taken apart — and its English cousins

какой ← Proto-Slavic **kakŭjĭ*, built on как, "how", on the old question stem of кто, "who"; Vasmer compares Lithuanian *kõks*, "what kind of".

Your turn

- *Say it:* какой — *ka-KÓY*, stress on the end
- *Say it:* какой чай ты любишь*?*
- *Build:* offer a choice with или, then ask the same thing with какой

Before you move on

Say "which." (That is какой.) Which farewell already told you about this word? (That was пока.) Which other word you own ends the same way and stands in front of a noun? (That is другой.) What is the difference between что and какой? (что asks *what thing*; какой asks *which one*.)

22.3 сколько — "how many," and the family assembled

The two siblings, and two recent words.

- *Recall:* брат and сестра, the securest cognate pair in the book
- *Recall:* медленно, and какой
- *Recall:* how a Russian noun's ending tells you its gender
- *Recall:* я думаю, что …, and повторите with its polite -ите

You'll want to know first — сколько

- сколько — *skólka* — **how many, how much**

Stress the first syllable; the final о is unstressed and says *a*. Vasmer traces it to Proto-Slavic **kolikŭ*, "how great", with an с- probably from *sŭ*, "about".

English splits this question in two and makes you choose: *how many* for things you can count, *how much* for things you cannot. Russian does not. One word covers both, and the noun after it changes shape instead — which is a case this book has not opened, so for now keep to the question on its own.

- сколько? — a complete question, like the rest of the family.

Its answer word is столько, "that many" — the same swap you saw when почему became потому: question-stem out, pointing-stem in.

Grammar lens — seven words, one stem

The whole set is now yours, and every member of it is the same ancient question-stem wearing a different ending:

- кто — who
- что — what
- какой — which
- как — how
- когда — when
- почему — why
- сколько — how many

Seven questions, one root. And two of them have pointing-word answers built by the same swap — потому for почему, столько for сколько — so the family supplies its own replies.

Your turn

Say these aloud:

- сколько — *SKÓL-ka*
- the seven of the family in order
- the two pairs — почему / потому, сколько / столько

Before you move on

How many English questions does сколько cover? (**Two** — *how many* and *how much*.) How many members does the question family have now? (**Seven**.) What single move turns two of them into their own answers? (**Swapping the question-stem for the pointing-stem**.) And one look back: which word means *sister*? (That is сестра.)

22.4 который — the word that hangs a sentence onto a noun

The drink with the long journey, and the newest pattern.

- *Recall:* кофе, which travelled Arabic to Turkish to Dutch, and the letter ф it needed
- *Recall:* я хочу with a bare infinitive after it, and сколько
- *Recall:* я не знаю, что …, and говорите медленно

You'll want to know first — который

- который — *katóryy* — **who, which, that**

Four syllables, stress on the second. It is the last member of the question family, and the one that does the most work, because it does not only ask — it **joins**.

It goes back to PIE ***k^{w}o-teros**: the question-stem you now know well, plus an ending that means *which of two*. Greek made **poteros** from it. English made **whether** — which is why *whether* still means *which of the two* underneath.

Grammar lens — a whole clause, stuck onto a noun

что hangs a clause under a **verb**. который hangs one onto a **noun**:

- друг, который читает — *drug, katóryy chitáyet* — the friend **who** reads.

Name a thing, put a comma, say который, and say a whole sentence about it. That is how a noun in Russian gets described at any length at all, and it is the last of the joining devices this book owes you. The comma is compulsory, as it is in front of every subordinator. English lets you drop *that* — *the book I read* — and Russian never does: который stays, and its comma stays with it.

Your turn

- *Say it:* друг, который читает
- *Build:* name any person you own and hang a sentence on them

- *Say it:* который and English *whether*, and hear the shared ending

Before you move on

What does который attach a clause to? (**A noun** — where что attaches one to a verb.) May it be dropped the way English drops *that*? (**No** — never, and neither may its comma.) Which English word is its cousin? (*Whether*.) And one look back: which drink came by sea through three languages? (That is кофе.)

22.5 ли — the small word that has been hiding inside или

The overland drink, and the word from yesterday.

- *Recall:* чай, carried west along the Silk Road while English *tea* came by sea
- *Recall:* который hanging a clause onto a noun, and или built from и plus ли
- *Recall:* the long dash standing where the missing verb would be, and помогите
- *Recall:* вода, English *water*, and the request pattern you have used since the first chapter

Grammar lens — the doubting particle, alone

- ли — *li* — **whether**

You met this word six chapters ago, welded to the end of и, and the book promised nothing about it then. Here it is on its own.
ли does two jobs, and they are the same job seen from two sides.
One: it makes a yes-or-no question, without changing the word order at all. Put the word you are asking about first and ли second:

- понимаешь ли ты? — *panimáyesh li ty* — **do you understand?**

Two: it embeds one. English has to swap words for this — *do you understand* becomes *whether you understand*. Russian does not swap anything; it uses the same ли:

- я не знаю, понимаешь ли ты — *ya ne znáyu, panimáyesh li ty* — I do not know **whether** you understand.

The comma is there for the same reason as everywhere else in this book: a clause is hanging under a verb.
So Russian's smallest joining word is also its question particle, and the doubt inside или turns out to have been the same doubt all along.

Your turn

Say these aloud:

- понимаешь ли ты*?*
- я не знаю*,* понимаешь ли ты
- или and then ли alone, and hear the piece that was always in there

Before you move on

Name the two jobs ли does. (**It makes a yes-or-no question**, and **it embeds one as *whether***.) Which word have you been carrying it inside since the joining chapter? (That is или.) Does Russian change the word order to embed a question? (**No** — the same ли does both.) And one look back: which drink came overland? (That is чай.)

22.6 One stem, a whole family of questions

The word for *which, what kind of* — the one this chapter finally taught after naming it two chapters earlier. Say it before reading on.

You'll want to know: they are all one stem with different endings

The question words are not a list to memorise separately. **Every one of them is the same ancient question-stem wearing a different ending**: кто who, что what, какой which, как how, and the rest of the set beside them.

Once the stem is visible, a word you have not met is half-readable on sight — which is what a family is for, and why the chapter taught them together rather than one per page.

Grammar Lens: который hangs a clause, ли hangs a doubt

Two of the family do more than ask:

- который — who, which, that. It takes a whole clause and hangs it on a noun, which is how a sentence stops being short.
- ли — whether. You met it six chapters earlier welded inside или, and the book left it alone until it could stand on its own.

ли is the one to hold. It marks a question you are not asking out loud — a doubt reported rather than posed — and English reaches for *whether* in the same place. Its relative который has the same cousin in English *whether*, which is a link worth keeping because it makes both words feel less arbitrary.

Your turn

Say these aloud:

- four members of the question family, and the stem they share
- a noun, then hang a clause on it with который
- a doubt with ли, and the word English would use
- where ли was hiding before this chapter

Before you move on

What do the question words share? (**One ancient stem**, different endings.) What does который do to a noun? (**Hangs a whole clause on it.**) What does ли mark? (**Whether** — a question not asked out loud.) And where had you already met ли? (**Inside или.**)

Chapter 23

One to Five, and an Answer to Skolko

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say, hear, read and write the Russian numbers one to five, answer skolko with each of them, and name the English cousin of each.
>
> *Five numbers, five Indo-European roots and five everyday English cousins – the first answers this book can give to a question it has been able to ask since the last chapter.*

23.1 два — two, and the question this book could already ask

Ask сколько — *how many.* Then say один and the root it goes back to.

You'll want to know first — one word

два — *dva* — **two**

Twenty-two chapters in, this book can ask сколько? and could not understand any answer to it. один is in the corpus, but it arrived as half of the один … другой pattern — *one … the other* — which is a joining word wearing a number's clothes. два is the first number this track teaches as a number.

The word, taken apart — and its English cousins

два continues Indo-European **dwóh₁*, "two." English **two**, Latin **duo**, Greek **dýo** and Sanskrit **dvá** are the same word, and Russian's form is among the least worn of them.
Say *dva* and *two* one after the other. That is not something to learn; it is something to recognise, and it will be true of nearly every number in this slice.

Your turn

- *Say it:* два — two
- *Connect:* два ← **dwóh₁* → English **two**, Latin **duo**
- *Run through:* один, два

Before you move on

Sources: Wiktionary: два; Omniglot, Numbers in Russian.

23.2 три — three

Say два and its English cousin.

You'll want to know first — one word

три — *tri* — **three**

Three letters, and every one of them is a Cyrillic shape this book taught long ago. *Read it:* т-р-и as you say it

The word, taken apart — and its English cousins

три continues Indo-European **tréyes*, "three." English **three**, Latin **trēs**, Greek **treîs** and Sanskrit **tri** are the same word.
This is the plainest of the whole set. Nothing has shifted: the *t*, the *r* and the vowel are all where they were, which is why три and **three** sound like each other and сто and **hundred**, later in this slice, will not.

Your turn

- *Say it:* три — three
- *Connect:* три ← **tréyes* → English **three**, Latin **trēs**
- *Run through:* один, два, три

Before you move on

Sources: Wiktionary: три; Omniglot, Numbers in Russian.

23.3 четыре — four, and one consonant's three fates

Say три and its Latin cousin, then два.

You'll want to know first — one word

четыре — *chetýre* — **four**

Three syllables, stressed on the second, and the vowel in that stressed syllable is ы — the sound this book warned has no English equivalent. Hold it there and the word falls into place.

The word, taken apart — and its English cousins

четыре continues Indo-European $*k^w$*etwóres*, "four."
The opening $*k^w$ is the interesting part, because the branches split three ways over it. Latin kept it whole: **quattuor**. English lost the lip-rounding and softened the *k* to *f*: **four**. Slavic pushed it forward to a **ch**, which is what you are saying.

Your turn

- *Say it:* четыре — four, stress on the ы
- *Connect:* четыре ← $*k^w$*etwóres* → Latin **quattuor**, English **four**
- *Run through:* два, три, четыре

Before you move on

Sources: Wiktionary: четыре; Omniglot, Numbers in Russian.

23.4 пять — five, and a cousin English kept whole

Say четыре and what three branches did with its first sound.

You'll want to know first — one word

пять — *pyat* — **five**

One syllable, ending in the soft sign that this book has been putting on the ends of words since its first chapters. It softens the т and is not a sound of its own.

The word, taken apart — and its English cousins

пять continues Indo-European *$pénk^we$, "five." Greek **pénte**, Latin **quīnque** and English **five** are the same word.
The Greek form is the one an English speaker already owns: **pentagon**, **pentathlon**, **Pentecost** — all of them carry *five* in a shape much closer to пять than English **five** is. The number was in the reader's vocabulary before the lesson was.

Your turn

- *Say it:* пять — five
- *Connect:* пять ← *$pénk^we$ → Greek **pénte**, English **five**
- *Run through:* один, два, три, четыре, пять — the whole first five

Before you move on

Sources: Wiktionary: пять; Omniglot, Numbers in Russian.

23.5 Payoff — one to five, and an answer to сколько

Ask сколько, say пять, then say what один goes back to.

Your turn

1. Hear each of the five named singly and out of order, and say what it is.
2. Count backwards from пять to один.
3. *Read it:* the five printed shuffled — **пять, один, четыре, три, два** — then say each
4. *Write it:* all five from dictation — no new Cyrillic letter appears in any of them
5. Hear **сколько?** and answer it with each of the five in turn.

Then say the English cousin of each: **one, two, three, four, five**. All five have one. That is not luck — Russian's numerals are among the least worn in the family, and this book's reader already owned most of them.

Chapter 24

Six to Ten, and the Pairs That Shaped Each Other

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can count aloud from one to ten in Russian and say why vosem ends like sem and devyat begins like desyat.
>
> *Five more numbers with no new letter, two pairs shaped by standing next to each other, and the whole run of ten scored shuffled rather than recited.*

24.1 шесть — six

Count one to five, then five to one.

You'll want to know first — one word

шесть — *shest* — **six**

One syllable, ending like пять in the soft sign.

The word, taken apart — and its English cousins

шесть continues Indo-European **swéḱs*, "six." English **six**, Latin **sex** and Greek **héx** are the same word.
Notice what survived: the *s*. Hold on to it, because the very last number in this slice is where that *s* turns into the fact that names half the Indo-European family.

Your turn

- *Say it:* шесть — six
- *Connect:* шесть ← **swéḱs* → English **six**, Latin **sex**
- *Run through:* четыре, пять, шесть

Before you move on

Sources: Wiktionary: шесть; Omniglot, Numbers in Russian.

24.2 семь — seven

Say шесть and its Latin cousin.

You'll want to know first — one word

семь — *sem* — **seven**

The word, taken apart — and its English cousins

семь continues Indo-European **septm*, "seven." Latin **septem**, English **seven**, Greek **heptá** and Sanskrit **saptá** are the same word. The *p* has gone and the *s* has stayed. That combination is worth marking, because the Iranian branch did the opposite: Persian's seven is **haft**, from the same word, with the *s* turned into an *h*. Two branches, one word, and each kept the piece the other lost.

Your turn

- *Say it:* семь — seven
- *Connect:* семь ← **septm* → Latin **septem**, English **seven**
- *Run through:* пять, шесть, семь

Before you move on

Sources: Wiktionary: семь; Omniglot, Numbers in Russian.

24.3 восемь — eight, and the seven inside it

Say семь, and which sound it lost that Latin kept.

You'll want to know first — one word

восемь — *vósem* — **eight**

Say семь and восемь one after the other. Seven is audible at the end of eight, and the unstressed о at the front reduces towards *a* — the reduction this book named long ago.

The word, taken apart — and its English cousins

восемь continues Indo-European **oḱtṓw*, "eight" — Latin **octō**, Greek **oktṓ**, English **eight**.
There is no *s* and no *m* anywhere in that history, so neither is inherited. They came from семь, standing next to it. Seven and eight are said together more often than almost any other pair of words in any language, and the pair pulls each other into shape: Persian's **hasht** borrowed its *h-* from **haft** for exactly the same reason, in a different family, with no contact between them.

Your turn

- *Say it:* восемь — eight
- *Connect:* восемь ← **oḱtṓw* → Latin **octō**, English **eight**
- *Run through:* шесть, семь, восемь

Before you move on

Sources: Wiktionary: восемь; Omniglot, Numbers in Russian.

24.4 девять — nine

Say восемь, and where its ending came from.

You'll want to know first — one word

девять — *dévyat* — **nine**

The word, taken apart — and its English cousins

девять continues Indo-European **h1newn*, "nine." Latin **novem**, English **nine** and Greek **ennéa** are the same word; the *n* at the front became a *d* in Slavic.
That change is not an accident either, and the next lesson is the reason: **ten** begins with a *d* in every branch, and **nine** stands directly in front of it.

Your turn

- *Say it:* девять — nine
- *Connect:* девять ← **h1newn* → Latin **novem**, English **nine**
- *Run through:* семь, восемь, девять

Before you move on

Sources: Wiktionary: девять; Omniglot, Numbers in Russian.

24.5 десять — ten, and the letter nine borrowed

Say девять and which sound changed at its front.

You'll want to know first — one word

десять — *désyat* — **ten**

Say девять and десять back to back. They differ in one consonant in the middle and nothing else, which makes them the pair this whole run is likeliest to confuse — so drill them together rather than in order.

The word, taken apart — and its English cousins

десять continues Indo-European **dekm*, "ten." Latin **decem** — and through it **decimal**, **December**, **decade** — English **ten** and Greek **déka** are the same word.
The *d* here is the original one. девять copied it: nine stands in front of ten in every count anybody has ever said aloud, and it took its neighbour's first consonant, exactly as восемь took its ending from семь two lessons ago. Two of the last four numbers in this chapter

were shaped by the number standing beside them, which is what counting aloud does to words.

Your turn

- *Say it:* десять — ten
- *Connect:* десять ← **dekm* → Latin **decem**, English **ten**
- *Pair:* девять and десять, one consonant apart

Before you move on

Sources: Wiktionary: десять; Omniglot, Numbers in Russian.

24.6 Payoff — one to ten

Count one to five, then ask сколько.

Your turn

1. Count aloud one to ten without a model, then ten to one.
2. Hear all ten named singly and out of order, and say each.
3. *Read it:* the ten printed shuffled, then say each
4. *Write it:* all ten from dictation — not one new Cyrillic letter appears in any of them; this whole slice adds no sign to the alphabet
5. Drill the two pairs that shaped each other: семь / восемь, where eight took seven's ending, and девять / десять, where nine took ten's *d*.
6. Answer сколько? ten times, once with each number.

Then say the English cousin of each. All ten have one.

Chapter 25

Twenty, a Hundred, and the Number That Named a Family

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can say twenty and a hundred, take twenty apart into its two pieces, name which side of the centum/satem split Russian is on, and say what a Russian number still does to the noun after it that I cannot yet produce.
>
> *The tens taken apart into numbers already known, the hundred that gives the satem branch its name, and an explicit account of the case government the numerals impose and the chapter that owes it.*

25.1 двадцать — twenty, and both halves still audible

Count one to ten, then say ten on its own.

You'll want to know first — one word, and a piece

двадцать — *dvádtsat* — **twenty**

Take it apart and both pieces are words you have: два at the front, and -дцать, which is десять worn down, at the back. Two tens.

That worn ending does the same job further up: тридцать is three tens, thirty. Russian's tens are not a new vocabulary; they are numbers you already know with десять ground down onto the end of them.

The word, taken apart — and its English cousins

двадцать ← Proto-Slavic **dŭva deseti*, "two tens", in the old form for a pair (Vasmer). десять, "ten", is a cousin of Latin *decem*, "ten".

Your turn

- *Say it:* двадцать — twenty
- *Split:* два + -дцать
- *Build:* три + -дцать → тридцать, thirty

Before you move on

Sources: Wiktionary: двадцать; Omniglot, Numbers in Russian.

25.2 сто — a hundred, and the number that named a family

Say двадцать and its two pieces.

You'll want to know first — one word

сто — *sto* — **a hundred**

Three letters, and the largest number this book teaches is the shortest word in it.

The word, taken apart — and its English cousins

сто continues Indo-European **kmtom*, "hundred." English **hundred**, Greek **hekatón** and Latin **centum** are the same word — and **centum** is where this stops being an etymology and becomes the name of a division.
Some branches kept that first **ḱ* as a *k* sound. Latin **centum**, Greek **hekatón**, Welsh **cant** — these are the **centum** languages, named after the Latin word for a hundred.
Others turned it into an *s* or an *sh*. Russian сто, Avestan **satəm**, Sanskrit **śatám**, Lithuanian **šimtas** — these are the **satem** languages, named after the Avestan word for the same number.

A word for a hundred is what the two halves of the Indo-European family are named after, and сто is on the satem side. It is the same *s* that survived in шесть and семь, doing the same work on a different consonant.

Your turn

- *Say it:* сто — a hundred
- *Connect:* сто ← **kmtom* → Latin **centum**, English **hundred**
- *Name:* **centum** and **satem**, and which side Russian is on
- *Run through:* десять, двадцать, сто

Before you move on

Sources: Wiktionary: сто; Omniglot, Numbers in Russian.

25.3 Payoff — twelve numbers, and what they still cannot do

Count one to ten, then ask сколько.

Grammar Lens: what a Russian number does to the noun after it

A number in Russian does not simply sit in front of a noun. It **governs** it: два, три and четыре take one form of the following noun and пять upward takes another, and neither is the dictionary form. This book cannot teach that yet, and saying so is more useful than skirting it. The forms it needs are the genitive singular and the genitive plural, and this track has taught the genitive in exactly one place — after до, in до свидания. Counting THINGS is therefore a genitive chapter rather than a numeral one.
What the twelve numbers are already good for: answering сколько? with a bare figure, giving an age, saying a price, reading a room number, and every place a number stands alone.

Your turn

1. Count aloud one to ten, then say двадцать and сто.
2. Hear twelve amounts named singly and out of order; say each.
3. *Read it:* the twelve amounts, printed and shuffled, then say each
4. *Write it:* all twelve from dictation
5. Split двадцать into its two pieces and build тридцать from три.
6. Say which side of the centum/satem split Russian is on, and name the number the split is named after.

Chapter 26

Which One: the Ordinals, Said and Written

Modes: 🚗 **voice** (5) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can say first, second and third, build the ordinal of any number I can count to, and read and write an ordinal as a figure with its ending hyphenated on.
>
> *Two forms outside the pattern, one adjective ending for everything above them, and the written 1-y whose letters after the hyphen are the agreement rather than decoration.*

26.1 первый — first

> Count one to ten, say двадцать and сто, say один and its root, and say what a number still does to the noun after it.

You'll want to know first — one word

> первый — *pérvyy* — **first**

Counting says *how many.* Ordering says *which one* — a floor number, a date, a queue, a chapter heading — and twelve numbers do not give you one of them.

The word, taken apart — and its English cousins

первый is not built from один. It goes back to Indo-European **per-*, "forward, in front," which is also behind English **fore**, **before** and

former — and behind **first** itself, which is *fore* with a superlative ending on it.
So Russian and English break in the same place and for the same reason: the word for *first* means *foremost* in both, and neither is built from the word for *one*. The series comes into line at *second*.

Your turn

- *Say it:* первый — first
- *Contrast:* один counts, первый orders
- *Connect:* первый ← **per-* → English **fore**, **first**

Before you move on

Sources: Wiktionary: первый; Omniglot, Numbers in Russian.

26.2 второй and третий — second, third, and the ending above them

Say первый and why it is not built from один. Then say три.

You'll want to know first — two words and an ending

второй — *vtoróy* — **second**

третий — *trétiy* — **third**

три is audible whole inside третий. And from four upward the pattern settles completely: the ordinal is **the plain number with an adjective ending on it** — четвёртый, fourth; пятый, fifth; десятый, tenth.

That is worth saying plainly, because it means the reader who has twelve cardinals has twelve ordinals as soon as they have one ending, with only первый and второй outside it.

Russian ordinals are adjectives, and that carries a debt as well as a rule: an adjective changes its ending to agree with what it describes, and this book has not taught an adjective yet. So the forms here are the ones a masculine noun takes, and agreeing them with anything else is an adjective chapter rather than a numeral one.

The word, taken apart — and its English cousins

третий ← Proto-Slavic **tretĭjĭ* — inherited, a cousin of Lithuanian *trẽčias*, Latin *tertius* and English *third* (Vasmer). второй is perhaps from **vĭtorŭ*, related to Sanskrit *vítaras*, "further"; others reconstruct **vŭtorŭ* and link it with Lithuanian *añtras*, "second, other" (Vasmer).

Your turn

- *Say it:* второй — second; третий — third
- *Hear:* три inside третий
- *Build:* четыре → четвёртый; десять → десятый

Before you move on

Sources: Wiktionary: второй; Omniglot, Numbers in Russian.

26.3 1-й — writing an ordinal as a figure

Say первый and второй, then build пятый from пять.

Script — the figure and its ending

1-й — *pérvyy* — first **2-е** — *vtoróye* — second

A Russian ordinal written as a figure carries the tail of its own ending after a hyphen. **1-й** is первый with everything but the last letter replaced by the figure; **2-е** is второе in the same way.

This is not decoration. Ordinals are adjectives, so the ending is the agreement — change what is being ordered and the letters after the hyphen change with it. That is why the figure alone will not do, and why an English reader who writes **1st** for all of them is losing information the Russian page is carrying.

The hyphen is the short dash this book taught among its punctuation, not the long dash that stands for a missing verb.

Your turn

- *Write it:* **1-й**, **2-е**, **3-й**
- *Read it:* each aloud as the full word
- *Say it:* why the letters after the hyphen are not always the same

Before you move on

Source: Omniglot, Numbers in Russian.

26.4 Payoff — which one, said and written

Count one to ten, say двадцать and сто, and name the side of the family Russian is on.

Your turn

1. Say первый, второй, третий in order, then out of order.
2. **Build**, do not recall: fourth, fifth, tenth, twentieth.
3. *Write it:* **1-й**, **2-е**, **3-й**, and read each aloud as a full word
4. Say which two of the series are not built from their numbers, and what English does in the same place.
5. Count one to ten, say двадцать and сто, and say what a number still does to the noun after it that this book has not taught.

Before you move on

Source: Omniglot, Numbers in Russian.

26.5 Close the numeral slice

Say the first three ordinals, count one to five, and ask сколько.

Your turn

Everything this slice added, with nothing in front of you.

1. Count aloud one to ten, then say двадцать and сто.
2. *Write it:* all twelve from dictation, shuffled
3. Say the first three ordinals and build three more. *Write it:* **1-й** and **2-е**
4. Say the English cousin of each of the ten cardinals. Every one has one.
5. Say the two pairs that shaped each other — семь / восемь, девять / десять — and which side of the centum/satem split сто puts Russian on.
6. Say the one thing these numbers still cannot do, and which chapter owes it.

Then say what the whole slice cost the hand: **no new Cyrillic letter at all.**

Before you move on

Source: Omniglot, Numbers in Russian.

26.6 ли — the question you are not asking

> Two letters, and it means *whether*. Say it, then say the longer word it was hiding inside for six chapters before it stood alone.

You'll want to know: two ways to make a sentence longer

Both were taught in one chapter and neither has been asked for since. They are the two ways a short Russian sentence grows:

который	hangs a whole clause on a **noun**
ли	hangs a **doubt** on a verb — *whether*, a question not asked aloud

The difference is what each attaches to. который reaches back to a thing and says more about it. ли reaches forward into a question and reports it instead of posing it.

Four chapters of numbers have passed since either appeared. Saying them now, with nothing on the page, is the first real evidence they were learned rather than met.

Your turn

Say these aloud:

- *whether*, in Russian, with the page covered
- the word it used to live inside
- a noun, then hang a clause on it
- report a question instead of asking it

Before you move on

What does ли attach to, and what does который attach to? (**A doubt on a verb**; **a clause on a noun**.) Which of the two lets you report a question rather than ask it? (ли.) And which word did ли spend six chapters inside? (или.)

Chapter 27

Reading — Six Words, Six Lines, and a First Passage

Modes: 👁 **eyes** (3) 🎧 **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can read Russian words off a board, read the lines I would say to a stranger, and hold a whole passage without translating it word by word.
>
> *The introduction the book has been saying since chapter 2, read in order for the first time, with no new word in it.*

27.1 (reading) — six words off a board

You have written every letter in every one of these. Not one word is new.

What is new is that nobody says them before you read them.

Read this

вода хлеб чай кофе суп сыр

Read down the list once. Do not spell each one out — look at the whole word and let it arrive.
Again, and notice which came at once and which you had to spell.
Both are fine. The difference is what practice removes.

What to know first

These six would be on a board over a counter, and they are the six you would want first.

Two of them are traps of exactly the kind this book warned you about. суп and сыр look like *cyn* and *cbip* to an eye trained on English, and they are *sup* and *syr*.

That is the whole reason to read a word cold rather than after hearing it. Heard first, you never test whether the letters actually reached you.

Your turn

- *Say it:* the six words down the list, once, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
Which two look most like English and are not? (суп and сыр.)

27.2 (reading) — three to open, three to rescue

The last lesson gave you six things on a board. These are six things you would say.

Nothing here is new. What is new is meeting them in writing.

Read this

привет спасибо пожалуйста извините медленно помогите

Read it: the six notices down once, without stopping
Read it: the six notices again, and notice the list turns over halfway
The first three open a conversation. The last three rescue one.

What to know first

пожалуйста is the longest word on the list and the one you will read most often. It is worth recognising by shape rather than by spelling it out, because it does two jobs: *please*, and *you're welcome*.

помогите and извините end the same way, and both are requests you make to somebody you have not met. That shared ending is the one piece of grammar visible on this page.

Six lines, and half of them exist for the moment something goes wrong.

Your turn

- *Say it:* the six lines, once, in order, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
Where does the list turn over? (**After пожалуйста** — three to open, three to rescue.)

27.3 (reading) — the first passage

Six words, then six lines. Now the whole thing at once.

Not one word in it is new.

Read this

Привет! Меня зовут Анна. Сестра и мама. Папа тоже. Я читаю. Я хочу читать. Вода, хлеб и чай. Кофе или чай? Я не знаю. Спасибо. До свидания.

Read it through once without stopping. Do not translate as you go. Again — and this time notice that two lines differ by one word, and that the one word changes when the reading happens.

What to know first

Я читаю is now. Я хочу читать is not yet. Russian marks that difference by changing the ending of the verb in the first and leaving it whole in the second, which is the opposite of what an English speaker expects.

Look at и and или as well. One letter apart on the page, and the difference between a list and a choice. Read quickly, that is the easiest mistake on this page to make.

This is the first whole passage the book has asked you to hold at once, and it works because every line was paid for.

Your turn

- *Say it:* the passage aloud, once, without stopping

Twice through:

Before you move on

How many words in that passage were new? (**None.**)
Which two words are one letter apart and mean different things? (и and или.)

Chapter 28

The Small Ya

Modes: 👁 **eyes** (2) ✓ **pen** (1) 🚗 **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can write the small ya, the word for I, as Russian writes it inside a sentence.
>
> *Complete the last lesson of chapter 28: I can write the small ya, the word for I, as Russian writes it inside a sentence.*

28.1 я (ya) — the word for I, written small

Before the new one: write й and ю once each, and name them.

Now say я (*ya*), "I". You have read it for a long time. This lesson takes one letter out of it and puts it in your hand.

Script you'll notice: я

я — small *ya*.

я (*ya*) is also a whole word: "I". You wrote the capital Я in the letter chapters, but Russian writes "I" with the **small** letter: inside a sentence it is never capitalised, unlike English "I". So this is the shape you will write most.

Writing: я

How я is written, stroke by stroke

- **1.** start here: climb the right stem from the baseline to the top
- **2.** without lifting, curve counterclockwise around the upper bowl
- **3.** without lifting, sweep left through the bowl's lower join
- **4.** without lifting, descend the diagonal leg to the lower-left tip — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested teaching order; hands and teachers vary. Source: RussianIrina, 'Learning Russian - Alphabet letters, handwriting', lowercase я demonstration, 12:13–12:21, YouTube, 5 February 2013.

Your turn

- *Look:* at я and point at я inside it
- *Trace it:* я three times, saying *ya* as you finish each one
- *Write it:* ю, then я, from memory
- *Read it:* я aloud once more

Before you move on

Which letter is this — я? (**ya**, *ya.*) Which word did it come from? (я, *ya*, "I".)

28.2 (one letter) — From the letter to the word — a first pass

Say я (*ya*), then write the letter it gave you.

Your turn

letter	name	the word it came from
я	*ya*	я *ya*

- *Write it:* each letter in the table from memory, then check it
- *Say it:* the word each one came from
- *Read it:* each word in the table aloud, and point at its letter

Before you move on

Which word did each letter come from? (я from я.)

28.3 (one letter) — From the word back to the letter — a second pass

Write я without looking, then say the word it came from.

Your turn

letter	name	the word it came from
я	*ya*	я *ya*

- *Say it:* each word in the table, then write the letter it gave you without looking
- *Write it:* each letter once more, slowly, larger than it is printed

Before you move on

Say each word in the table once more, and name the letter you took from it.

Chapter 29

Head, Hand, Leg, Belly, Tooth

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the head, a hand, a leg, the belly and a tooth.
>
> *Complete the last lesson of chapter 29: I can name the head, a hand, a leg, the belly and a tooth.*

29.1 голова (golová) — the head

Before the new one: say the Russian for first, then the Russian for second.

You'll want to know: голова

голова (*golová*) — "the head".

The word, taken apart — and its English cousins

голова ← Proto-Slavic **golva*, "head" — inherited, and a cousin of Lithuanian *galvà*, "head" (Vasmer). East Slavic says -оло- where Church Slavonic says -ла-, so the same word came back from church books as глава, "chapter; the head of something".

What you've built

One more word for this chapter.

Your turn

- *Say it: golová*
- *Say it: golová*, once more
- *Say it:* say *golová*
- *Recall:* say the Russian for first, then the Russian for second, then say *golová* again

Before you move on

What does голова mean? ("The head".) Say it once more.

29.2 рука (ruká) — a hand, an arm

Before the new one: say the Russian for second, then the Russian for the head.

You'll want to know: рука

рука (*ruká*) — "a hand, an arm". One word for both.

The word, taken apart — and its English cousins

рука ← Proto-Slavic **rǫka*, "hand" — inherited; the old nasal *ǫ* became Russian у. Vasmer pairs it with Lithuanian *rankà*, "hand", and links both with Lithuanian *riñkti*, "to gather": the hand as the gatherer.

What you've built

One more word for this chapter.

Your turn

- *Say it: ruká*
- *Say it: ruká*, once more
- *Say it:* say *ruká*

- *Recall:* say the Russian for second, then the Russian for the head, then say *ruká* again

Before you move on

What does рука mean? ("A hand, an arm".) Say it once more.

29.3 нога (nogá) — a leg, a foot

Before the new one: say the Russian for the head, then the Russian for a hand.

You'll want to know: нога

нога (*nogá*) — "a leg, a foot". One word for both, like рука.

The word, taken apart — and its English cousins

нога ← Proto-Slavic **noga* — inherited. Vasmer gives "claw" as the first sense and lists Lithuanian *nagà*, "hoof", Latin *unguis*, "nail", and Old High German *nagal*, "nail": English *nail* is a cousin, from PIE **$h_3$nog^{wh}-*, "nail, claw".

What you've built

One more word for this chapter.

Your turn

- *Say it: nogá*
- *Say it: nogá*, once more
- *Say it:* say *nogá*
- *Recall:* say the Russian for the head, then the Russian for a hand, then say *nogá* again

Before you move on

What does нога mean? ("A leg, a foot".) Say it once more.

29.4 живот (zhivót) — the belly

Before the new one: say the Russian for a hand, then the Russian for a leg.

You'll want to know: живот

живот (*zhivót*) — "the belly".

The word, taken apart — and its English cousins

живот ← Proto-Slavic **životŭ*, "life" — inherited, from the root of жить, "to live". Old Russian *životŭ* meant "life, property"; "belly" came later (Vasmer). Lithuanian *gyvatà*, "life", and Latin *vīta*, "life", are cousins (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: zhivót*
- *Say it: zhivót*, once more
- *Say it:* say *zhivót*
- *Recall:* say the Russian for a hand, then the Russian for a leg, then say *zhivót* again

Before you move on

What does живот mean? ("The belly".) Say it once more.

29.5 зуб (zub) — a tooth

Before the new one: say the Russian for a leg, then the Russian for the belly.

You'll want to know: зуб

зуб (*zub*) — "a tooth".

The word, taken apart — and its English cousins

зуб ← Proto-Slavic **zǫbŭ*, "tooth" — inherited. Vasmer sets it beside Sanskrit *jámbha-*, "tooth", Greek *gómphos*, "peg", and Old High German *kamb*, "comb", so English *comb* is a cousin, from PIE **ǵómb^{h}os*, "tooth, peg".

What you've built

One more word for this chapter.

Your turn

- *Say it: zub*
- *Say it: zub*, once more
- *Say it:* say *zub*
- *Recall:* say the Russian for a leg, then the Russian for the belly, then say *zub* again

Before you move on

What does зуб mean? ("A tooth".) Say it once more.

Chapter 30

Hair, Finger, Neck, Shoulder, Knee

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name hair, a finger, the neck, a shoulder and a knee.
>
> *Complete the last lesson of chapter 30: I can name hair, a finger, the neck, a shoulder and a knee.*

30.1 волосы (vólosy) — hair

Before the new one: say the Russian for the belly, then the Russian for a tooth.

You'll want to know: волосы

волосы (*vólosy*) — "hair". Plural, like English "locks".

The word, taken apart — and its English cousins

волосы is the plural of волос, "a hair", ← Proto-Slavic **volsŭ* — inherited. Vasmer compares Avestan *varəsa-*, "hair". Russian -оло- faces Church Slavonic -ла- again: the church form is власы, an old word for "hair".

What you've built

One more word for this chapter.

Your turn

- *Say it: vólosy*
- *Say it: vólosy*, once more
- *Say it:* say *vólosy*
- *Recall:* say the Russian for the belly, then the Russian for a tooth, then say *vólosy* again

Before you move on

What does волосы mean? ("Hair".) Say it once more.

30.2 палец (pálets) — a finger

Before the new one: say the Russian for a tooth, then the Russian for hair.

You'll want to know: палец

палец (*pálets*) — "a finger".

The word, taken apart — and its English cousins

палец ← Proto-Slavic **palĭcĭ* — inherited; older Russian texts use it for "thumb" (Sokolova, in Trubachev's note to Vasmer). It is usually tied to Latin *pollex*, "thumb", though Vasmer notes doubts about that link.

What you've built

One more word for this chapter.

Your turn

- *Say it: pálets*
- *Say it: pálets*, once more
- *Say it:* say *pálets*

- *Recall:* say the Russian for a tooth, then the Russian for hair, then say *pálets* again

Before you move on

What does палец mean? ("A finger".) Say it once more.

30.3 шея (shéya) — the neck

Before the new one: say the Russian for hair, then the Russian for a finger.

You'll want to know: шея

шея (*shéya*) — "the neck".

The word, taken apart — and its English cousins

шея ← Proto-Slavic **šĭja* — inherited. Vasmer thinks it probably first meant "collar", from the root of шить, "to sew"; the links proposed with Latin and Albanian words he calls unreliable.

What you've built

One more word for this chapter.

Your turn

- *Say it: shéya*
- *Say it: shéya*, once more
- *Say it:* say *shéya*
- *Recall:* say the Russian for hair, then the Russian for a finger, then say *shéya* again

Before you move on

What does шея mean? ("The neck".) Say it once more.

30.4 плечо (plechó) — a shoulder

Before the new one: say the Russian for a finger, then the Russian for the neck.

You'll want to know: плечо

плечо (*plechó*) — "a shoulder".

The word, taken apart — and its English cousins

плечо ← Proto-Slavic **pleťe* — inherited. Vasmer compares Latvian *plecs*, "shoulder", and words for "flat" such as Greek *plax*, "a level plain", but he also gives a second possible source, so the deeper origin is open.

What you've built

One more word for this chapter.

Your turn

- *Say it: plechó*
- *Say it: plechó*, once more
- *Say it:* say *plechó*
- *Recall:* say the Russian for a finger, then the Russian for the neck, then say *plechó* again

Before you move on

What does плечо mean? ("A shoulder".) Say it once more.

30.5 колено (koléno) — a knee

Before the new one: say the Russian for the neck, then the Russian for a shoulder.

You'll want to know: колено

колено (*koléno*) — "a knee".

The word, taken apart — and its English cousins

колено ← Proto-Slavic **koléno* — inherited, a cousin of Lithuanian *kelỹs*, "knee", and Greek *kōlon*, "limb" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: koléno*
- *Say it: koléno*, once more
- *Say it:* say *koléno*
- *Recall:* say the Russian for the neck, then the Russian for a shoulder, then say *koléno* again

Before you move on

What does колено mean? ("A knee".) Say it once more.

Chapter 31

Back, Tongue, Lip, Face, Blood

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the back, the tongue, a lip, the face and blood.
>
> *Complete the last lesson of chapter 31: I can name the back, the tongue, a lip, the face and blood.*

31.1 спина (spiná) — the back

Before the new one: say the Russian for a shoulder, then the Russian for a knee.

You'll want to know: спина

спина (*spiná*) — "the back".

The word, taken apart — and its English cousins

спина — origin disputed. One view takes it from Latin *spīna*, "thorn, backbone", through Old Polish *spina*, "backbone"; Vasmer also allows a native word, a cousin of the Latin one and of Latvian *spina*, "a switch". It is first recorded in the 1600s (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: spiná*
- *Say it: spiná*, once more
- *Say it:* say *spiná*
- *Recall:* say the Russian for a shoulder, then the Russian for a knee, then say *spiná* again

Before you move on

What does спина mean? ("The back".) Say it once more.

31.2 язык (yazýk) — the tongue; a language

Before the new one: say the Russian for a knee, then the Russian for the back.

You'll want to know: язык

язык (*yazýk*) — "the tongue; a language". Both meanings, as in English "tongue".

The word, taken apart — and its English cousins

язык ← Proto-Slavic **językŭ*, "tongue" — inherited, from the old Indo-European word for "tongue" that also gave Old Latin *dingua*, later *lingua*, and English *tongue* (Vasmer). The Slavic shape is irregular. "Language" grew from the organ, as in English *tongue*.

What you've built

One more word for this chapter.

Your turn

- *Say it: yazýk*
- *Say it: yazýk*, once more
- *Say it:* say *yazýk*

- *Recall:* say the Russian for a knee, then the Russian for the back, then say *yazýk* again

Before you move on

What does язык mean? ("The tongue; a language".) Say it once more.

31.3 губа (gubá) — a lip

Before the new one: say the Russian for the back, then the Russian for the tongue; a language.

You'll want to know: губа

губа (*gubá*) — "a lip".

The word, taken apart — and its English cousins

губа ← Proto-Slavic **gǫba* — inherited; Ukrainian губа and Polish *gęba* mean "mouth" (Vasmer). The deeper origin is unclear: Vasmer weighs Greek *gamphai*, "jaws", and a link with the губа that means "sponge", without deciding.

What you've built

One more word for this chapter.

Your turn

- *Say it: gubá*
- *Say it: gubá*, once more
- *Say it:* say *gubá*
- *Recall:* say the Russian for the back, then the Russian for the tongue; a language, then say *gubá* again

Before you move on

What does губа mean? ("A lip".) Say it once more.

31.4 лицо (litsó) — the face

Before the new one: say the Russian for the tongue; a language, then the Russian for a lip.

You'll want to know: лицо

лицо (*litsó*) — "the face".

The word, taken apart — and its English cousins

лицо ← Proto-Slavic **lice*, built on **likŭ*, "face", the word Russian keeps as лик, "a face on an icon" (Vasmer). Vasmer compares Old Irish *lecco*, "cheek".

What you've built

One more word for this chapter.

Your turn

- *Say it: litsó*
- *Say it: litsó*, once more
- *Say it:* say *litsó*
- *Recall:* say the Russian for the tongue; a language, then the Russian for a lip, then say *litsó* again

Before you move on

What does лицо mean? ("The face".) Say it once more.

31.5 кровь (krov) — blood

Before the new one: say the Russian for a lip, then the Russian for the face.

You'll want to know: кровь

кровь (*krov*) — "blood".

The word, taken apart — and its English cousins

кровь ← Proto-Slavic **kry*, with the stem **krŭv-* in its other forms — inherited. Vasmer lists Lithuanian *kraŭjas*, "blood", Latin *cruor*, "gore", Greek *kréas*, "meat", and Old Norse *hrár*, "raw", so English *raw* is a cousin, from PIE **kréwh$_2$-*, "raw flesh".

What you've built

One more word for this chapter.

Your turn

- *Say it: krov*
- *Say it: krov*, once more
- *Say it:* say *krov*
- *Recall:* say the Russian for a lip, then the Russian for the face, then say *krov* again

Before you move on

What does кровь mean? ("Blood".) Say it once more.

Chapter 32

Pain, Illness, Medicine, Doctor

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name pain, an illness, medicine, a doctor and a hospital.
>
> *Complete the last lesson of chapter 32: I can name pain, an illness, medicine, a doctor and a hospital.*

32.1 боль (bol) — pain

Before the new one: say the Russian for the face, then the Russian for blood.

You'll want to know: боль

боль (*bol*) — "pain".

The word, taken apart — and its English cousins

боль ← Proto-Slavic **bolĭ* — inherited, with the verb болеть, "to ache, to be ill". Vasmer sets it beside Gothic *balwjan*, "to torment", and Old English *bealu*, "evil", the *bale* of *baleful*, but notes that Berneker rejected the link.

What you've built

One more word for this chapter.

Your turn

- *Say it: bol*
- *Say it: bol*, once more
- *Say it:* say *bol*
- *Recall:* say the Russian for the face, then the Russian for blood, then say *bol* again

Before you move on

What does боль mean? ("Pain".) Say it once more.

32.2 болезнь (bolézn) — an illness

Before the new one: say the Russian for blood, then the Russian for pain.

You'll want to know: болезнь

болезнь (*bolézn*) — "an illness". Built on боль.

The word, taken apart — and its English cousins

болезнь — built from болеть, "to be ill", the verb of боль, "pain", with the old noun suffix -знь that also makes жизнь, "life".

What you've built

One more word for this chapter.

Your turn

- *Say it: bolézn*
- *Say it: bolézn*, once more
- *Say it:* say *bolézn*
- *Recall:* say the Russian for blood, then the Russian for pain, then say *bolézn* again

Before you move on

What does болезнь mean? ("An illness".) Say it once more.

32.3 лекарство (lekárstvo) — medicine

Before the new one: say the Russian for pain, then the Russian for an illness.

You'll want to know: лекарство

лекарство (*lekárstvo*) — "medicine".

The word, taken apart — and its English cousins

лекарство is лекарь, an old word for "doctor", with the noun suffix -ство. The root лек-, "cure", came into Slavic from Germanic; Vasmer calls the loan certain and compares Gothic *lēkeis*, "doctor". English *leech*, an old word for "physician", is from that Germanic word.

What you've built

One more word for this chapter.

Your turn

- *Say it: lekárstvo*
- *Say it: lekárstvo*, once more
- *Say it:* say *lekárstvo*
- *Recall:* say the Russian for pain, then the Russian for an illness, then say *lekárstvo* again

Before you move on

What does лекарство mean? ("Medicine".) Say it once more.

32.4 врач (vrach) — a doctor

Before the new one: say the Russian for an illness, then the Russian for medicine.

You'll want to know: врач

врач (*vrach*) — "a doctor".

The word, taken apart — and its English cousins

врач — a Church Slavonic word, Old Church Slavonic *vračĭ*; its -ра-, where East Slavic would say -оро-, marks it. Vasmer derives it from the root of врать, "to talk nonsense", and ворчать, "to grumble", so the first sense was "charmer, healer by spells"; Bulgarian врач still means "sorcerer".

What you've built

One more word for this chapter.

Your turn

- *Say it: vrach*
- *Say it: vrach*, once more
- *Say it:* say *vrach*
- *Recall:* say the Russian for an illness, then the Russian for medicine, then say *vrach* again

Before you move on

What does врач mean? ("A doctor".) Say it once more.

32.5 больница (bolnítsa) — a hospital

Before the new one: say the Russian for medicine, then the Russian for a doctor.

You'll want to know: больница

больница (*bolnítsa*) — "a hospital". Built on боль as well.

The word, taken apart — and its English cousins

больница is больной, "sick; a patient", with -ница, a suffix that names places: a place for the sick. The root is that of боль, "pain". Vasmer relates боль to Old English *bealu*, "harm".

What you've built

One more word for this chapter.

Your turn

- *Say it: bolnítsa*
- *Say it: bolnítsa*, once more
- *Say it:* say *bolnítsa*
- *Recall:* say the Russian for medicine, then the Russian for a doctor, then say *bolnítsa* again

Before you move on

What does больница mean? ("A hospital".) Say it once more.

Chapter 33

Fever, Cough, Rest, Hunger, Thirst

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a temperature, a cough, rest, hunger and thirst.
>
> *Complete the last lesson of chapter 33: I can name a temperature, a cough, rest, hunger and thirst.*

33.1 температура (temperatúra) — a temperature, a fever

Before the new one: say the Russian for a doctor, then the Russian for a hospital.

You'll want to know: температура

температура (*temperatúra*) — "a temperature, a fever".

The word, taken apart — and its English cousins

температура ← Latin *temperātūra*, "due measure, mixing", from *temperāre*, "to mix in proportion" — borrowed in modern times, probably through German *Temperatur*.

What you've built

One more word for this chapter.

Your turn

- *Say it: temperatúra*
- *Say it: temperatúra*, once more
- *Say it:* say *temperatúra*
- *Recall:* say the Russian for a doctor, then the Russian for a hospital, then say *temperatúra* again

Before you move on

What does температура mean? ("A temperature, a fever".) Say it once more.

33.2 кашель (káshel) — a cough

Before the new one: say the Russian for a hospital, then the Russian for a temperature.

You'll want to know: кашель

кашель (*káshel*) — "a cough".

The word, taken apart — and its English cousins

кашель ← Proto-Slavic **kašĭlĭ* — inherited, a cousin of Lithuanian *kosulỹs*, Sanskrit *kāsa-* and Old High German *huosto*, all "cough" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: káshel*
- *Say it: káshel*, once more
- *Say it:* say *káshel*

- *Recall:* say the Russian for a hospital, then the Russian for a temperature, then say *káshel* again

Before you move on

What does кашель mean? ("A cough".) Say it once more.

33.3 отдых (ótdykh) — rest

Before the new one: say the Russian for a temperature, then the Russian for a cough.

You'll want to know: отдых

отдых (*ótdykh*) — "rest".

The word, taken apart — and its English cousins

отдых is от-, "back, away", with дых, "breath", from the verb дышать, "to breathe": rest is getting your breath back. For the root, Vasmer compares Lithuanian *dūsėti*, "to pant".

What you've built

One more word for this chapter.

Your turn

- *Say it: ótdykh*
- *Say it: ótdykh*, once more
- *Say it:* say *ótdykh*
- *Recall:* say the Russian for a temperature, then the Russian for a cough, then say *ótdykh* again

Before you move on

What does отдых mean? ("Rest".) Say it once more.

33.4 голод (gólod) — hunger

Before the new one: say the Russian for a cough, then the Russian for rest.

You'll want to know: голод

голод (*gólod*) — "hunger".

The word, taken apart — and its English cousins

голод ← Proto-Slavic **goldŭ* — inherited. Vasmer links it with Church Slavonic *žĭlděti*, "to crave", and Sanskrit *gṛdhyati*, "is greedy". The Church Slavonic shape is глад, "famine", with -ла- for Russian -оло-.

What you've built

One more word for this chapter.

Your turn

- *Say it: gólod*
- *Say it: gólod*, once more
- *Say it:* say *gólod*
- *Recall:* say the Russian for a cough, then the Russian for rest, then say *gólod* again

Before you move on

What does голод mean? ("Hunger".) Say it once more.

33.5 жажда (zházhda) — thirst

Before the new one: say the Russian for rest, then the Russian for hunger.

You'll want to know: жажда

жажда (*zházhda*) — "thirst". вода answers it.

The word, taken apart — and its English cousins

жажда — taken from Church Slavonic, says Vasmer: -жд- is the Church Slavonic sound where East Slavic has -ж-, and Old Russian had the native жажа. Both go back to Proto-Slavic **žędja*.

What you've built

One more word for this chapter.

Your turn

- *Say it: zházhda*
- *Say it: zházhda*, once more
- *Say it:* say *zházhda*
- *Recall:* say the Russian for rest, then the Russian for hunger, then say *zházhda* again

Before you move on

What does жажда mean? ("Thirst".) Say it once more.

Chapter 34

Joy, Fear, Anger, Sadness, Tiredness

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name joy, fear, anger, sadness and tiredness.
>
> *Complete the last lesson of chapter 34: I can name joy, fear, anger, sadness and tiredness.*

34.1 радость (rádost) — joy

Before the new one: say the Russian for hunger, then the Russian for thirst.

You'll want to know: радость

радость (*rádost*) — "joy".

The word, taken apart — and its English cousins

радость is рад, "glad", with -ость, the suffix that makes nouns of quality. рад goes back to Proto-Slavic **radŭ*; Vasmer finds a link with Old English *rōt*, "cheerful", likely, but reports a rival account.

What you've built

One more word for this chapter.

Your turn

- *Say it: rádost*
- *Say it: rádost*, once more
- *Say it:* say *rádost*
- *Recall:* say the Russian for hunger, then the Russian for thirst, then say *rádost* again

Before you move on

What does радость mean? ("Joy".) Say it once more.

34.2 страх (strakh) — fear

Before the new one: say the Russian for thirst, then the Russian for joy.

You'll want to know: страх

страх (*strakh*) — "fear".

The word, taken apart — and its English cousins

страх ← Proto-Slavic **straxŭ* — inherited. Its deeper origin is not settled: one account Vasmer reports gives it a first sense of "numbness" and compares Lithuanian *stregti*, "to freeze stiff".

What you've built

One more word for this chapter.

Your turn

- *Say it: strakh*
- *Say it: strakh*, once more
- *Say it:* say *strakh*
- *Recall:* say the Russian for thirst, then the Russian for joy, then say *strakh* again

Before you move on

What does страх mean? ("Fear".) Say it once more.

34.3 гнев (gnev) — anger

Before the new one: say the Russian for joy, then the Russian for fear.

You'll want to know: гнев

гнев (*gnev*) — "anger".

The word, taken apart — and its English cousins

гнев ← Proto-Slavic **gněvŭ* — inherited. Vasmer thinks it probably belongs with гнить, "to rot", so the first sense would have been "rot, poison"; others start from a sense "to burn".

What you've built

One more word for this chapter.

Your turn

- *Say it: gnev*
- *Say it: gnev*, once more
- *Say it:* say *gnev*
- *Recall:* say the Russian for joy, then the Russian for fear, then say *gnev* again

Before you move on

What does гнев mean? ("Anger".) Say it once more.

34.4 грусть (grust) — sadness

Before the new one: say the Russian for fear, then the Russian for anger.

You'll want to know: грусть

грусть (*grust*) — "sadness".

The word, taken apart — and its English cousins

грусть goes with the verb грустить, "to be sad". Vasmer reports the usual link with груда, "a heap", and with Lithuanian *graudùs*, "brittle; sad, moving", from a root "to crush" (Lithuanian *grūsti*, "to pound"). Vasmer himself thinks a link with the verb "to gnaw" more likely: a sadness that gnaws.

What you've built

One more word for this chapter.

Your turn

- *Say it: grust*
- *Say it: grust*, once more
- *Say it:* say *grust*
- *Recall:* say the Russian for fear, then the Russian for anger, then say *grust* again

Before you move on

What does грусть mean? ("Sadness".) Say it once more.

34.5 усталость (ustálost) — tiredness

Before the new one: say the Russian for anger, then the Russian for sadness.

You'll want to know: усталость

усталость (*ustálost*) — "tiredness".

The word, taken apart — and its English cousins

усталость is устать, "to get tired", with -ость, the suffix for nouns of quality. устать is у- with стать, "to stand, to become" (Vasmer); Old Church Slavonic уставати meant "to cease": a tired person has come to a stop.

What you've built

One more word for this chapter.

Your turn

- *Say it: ustálost*
- *Say it: ustálost*, once more
- *Say it:* say *ustálost*
- *Recall:* say the Russian for anger, then the Russian for sadness, then say *ustálost* again

Before you move on

What does усталость mean? ("Tiredness".) Say it once more.

Chapter 35

Son, Daughter, Grandmother, Husband, Wife

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a son, a daughter, a grandmother, a husband and a wife.
>
> *Complete the last lesson of chapter 35: I can name a son, a daughter, a grandmother, a husband and a wife.*

35.1 сын (syn) — a son

Before the new one: say the Russian for sadness, then the Russian for tiredness.

You'll want to know: сын

сын (*syn*) — "a son".

The word, taken apart — and its English cousins

сын ← Proto-Slavic **synŭ* — inherited from PIE **suHnús*, "son". Vasmer lists Lithuanian *sūnùs*, Sanskrit *sūnú-* and Gothic *sunus*, so English *son* is a cousin, and he links the word with a Sanskrit verb "to give birth".

What you've built

One more word for this chapter.

Your turn

- *Say it: syn*
- *Say it: syn*, once more
- *Say it:* say *syn*
- *Recall:* say the Russian for sadness, then the Russian for tiredness, then say *syn* again

Before you move on

What does сын mean? ("A son".) Say it once more.

35.2 дочь (doch) — a daughter

Before the new one: say the Russian for tiredness, then the Russian for a son.

You'll want to know: дочь

дочь (*doch*) — "a daughter".

The word, taken apart — and its English cousins

дочь ← Proto-Slavic **dŭťi*, Old Russian дочи — inherited from PIE **d^{h}ugh$_2$tḗr*, "daughter". Vasmer lists Lithuanian *duktė*, Sanskrit *duhitā*, Greek *thygátēr* and Gothic *daúhtar*: English *daughter* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: doch*
- *Say it: doch*, once more
- *Say it:* say *doch*
- *Recall:* say the Russian for tiredness, then the Russian for a son, then say *doch* again

Before you move on

What does дочь mean? ("A daughter".) Say it once more.

35.3 бабушка (bábushka) — a grandmother

Before the new one: say the Russian for a son, then the Russian for a daughter.

You'll want to know: бабушка

бабушка (*bábushka*) — "a grandmother".

The word, taken apart — and its English cousins

бабушка is баба, "old woman, granny", with -ушка, a fond diminutive. баба is a nursery word, says Vasmer, and Lithuanian *bóba*, "old woman", is the same kind of word.

What you've built

One more word for this chapter.

Your turn

- *Say it: bábushka*
- *Say it: bábushka*, once more
- *Say it:* say *bábushka*
- *Recall:* say the Russian for a son, then the Russian for a daughter, then say *bábushka* again

Before you move on

What does бабушка mean? ("A grandmother".) Say it once more.

35.4 муж (muzh) — a husband

Before the new one: say the Russian for a daughter, then the Russian for a grandmother.

You'll want to know: муж

муж (*muzh*) — "a husband".

The word, taken apart — and its English cousins

муж ← Proto-Slavic **mǫžĭ*, "a man" — inherited. Vasmer calls it undoubtedly related to Sanskrit *mánu-*, "man", and Gothic *manna*, so English *man* is a cousin. "Husband" grew out of "man".

What you've built

One more word for this chapter.

Your turn

- *Say it: muzh*
- *Say it: muzh*, once more
- *Say it:* say *muzh*
- *Recall:* say the Russian for a daughter, then the Russian for a grandmother, then say *muzh* again

Before you move on

What does муж mean? ("A husband".) Say it once more.

35.5 жена (zhená) — a wife

Before the new one: say the Russian for a grandmother, then the Russian for a husband.

You'll want to know: жена

жена (*zhená*) — "a wife".

The word, taken apart — and its English cousins

жена ← Proto-Slavic **žena*, "woman, wife" — inherited from PIE **g^wénh$_2$*, "woman". Vasmer lists Greek *gynē*, Sanskrit *jani-* and Gothic *qinō*, "wife": English *queen* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: zhená*
- *Say it: zhená*, once more
- *Say it:* say *zhená*
- *Recall:* say the Russian for a grandmother, then the Russian for a husband, then say *zhená* again

Before you move on

What does жена mean? ("A wife".) Say it once more.

Chapter 36

Children, a Child, Aunt, Grandchildren

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name children, a child, an aunt, a grandson and a granddaughter.
>
> *Complete the last lesson of chapter 36: I can name children, a child, an aunt, a grandson and a granddaughter.*

36.1 дети (déti) — children

Before the new one: say the Russian for a husband, then the Russian for a wife.

You'll want to know: дети

дети (*déti*) — "children".

The word, taken apart — and its English cousins

дети is the plural of дитя, "a child", ← Proto-Slavic **dětę*, **děti* — inherited. Vasmer traces it to the PIE root **$d^h eh_1(i)$-*, "to suckle", the root of доить, "to milk": a child is one who is nursed.

What you've built

One more word for this chapter.

Your turn

- *Say it: déti*
- *Say it: déti*, once more
- *Say it:* say *déti*
- *Recall:* say the Russian for a husband, then the Russian for a wife, then say *déti* again

Before you move on

What does дети mean? ("Children".) Say it once more.

36.2 ребёнок (rebyónok) — a child

Before the new one: say the Russian for a wife, then the Russian for children.

You'll want to know: ребёнок

ребёнок (*rebyónok*) — "a child". One child; дети is the plural.

The word, taken apart — and its English cousins

ребёнок grew from Old Russian робя, "child", Proto-Slavic **orbę*, with a diminutive ending; роб- became реб- by an old vowel assimilation (Vasmer). The same root gave раб, "slave", and Vasmer lists Latin *orbus*, "bereaved", and Greek *orphanós*, "orphan", as cousins.

What you've built

One more word for this chapter.

Your turn

- *Say it: rebyónok*
- *Say it: rebyónok*, once more
- *Say it:* say *rebyónok*

- *Recall:* say the Russian for a wife, then the Russian for children, then say *rebyónok* again

Before you move on

What does ребёнок mean? ("A child".) Say it once more.

36.3 тётя (tyótya) — an aunt

Before the new one: say the Russian for children, then the Russian for a child.

You'll want to know: тётя

тётя (*tyótya*) — "an aunt".

The word, taken apart — and its English cousins

тётя is a nursery word, says Vasmer, like тятя, an old word for "dad". Lithuanian *tetà*, "aunt", and Greek *tétta*, "daddy", are formed the same way.

What you've built

One more word for this chapter.

Your turn

- *Say it: tyótya*
- *Say it: tyótya*, once more
- *Say it:* say *tyótya*
- *Recall:* say the Russian for children, then the Russian for a child, then say *tyótya* again

Before you move on

What does тётя mean? ("An aunt".) Say it once more.

36.4 внук (vnuk) — a grandson

Before the new one: say the Russian for a child, then the Russian for an aunt.

You'll want to know: внук

внук (*vnuk*) — "a grandson".

The word, taken apart — and its English cousins

внук ← Proto-Slavic **vŭnukŭ* — inherited. Vasmer thinks it may belong with an old nursery word for an elder, seen in Old High German *ano*, "ancestor", and Latin *anus*, "old woman"; he finds other proposals less likely.

What you've built

One more word for this chapter.

Your turn

- *Say it: vnuk*
- *Say it: vnuk*, once more
- *Say it:* say *vnuk*
- *Recall:* say the Russian for a child, then the Russian for an aunt, then say *vnuk* again

Before you move on

What does внук mean? ("A grandson".) Say it once more.

36.5 внучка (vnúchka) — a granddaughter

Before the new one: say the Russian for an aunt, then the Russian for a grandson.

You'll want to know: внучка

внучка (*vnúchka*) — "a granddaughter".

The word, taken apart — and its English cousins

внучка is внук, "grandson", with -ка, which makes the female word; к turns to ч before it, as in рука, "hand", and ручка, "a little hand; a pen". Vasmer traces внук to Proto-Slavic **vŭnukŭ* and tentatively links it with an old nursery word for an elder, kept in Latin *anus*, "old woman".

What you've built

One more word for this chapter.

Your turn

- *Say it: vnúchka*
- *Say it: vnúchka*, once more
- *Say it:* say *vnúchka*
- *Recall:* say the Russian for an aunt, then the Russian for a grandson, then say *vnúchka* again

Before you move on

What does внучка mean? ("A granddaughter".) Say it once more.

Chapter 37

Neighbour, Guest, Teacher, Pupil, Work

37.1 сосед (soséd) — a neighbour

> Before the new one: say the Russian for a grandson, then the Russian for a granddaughter.

You'll want to know: сосед

сосед (*soséd*) — "a neighbour".

The word, taken apart — and its English cousins

сосед ← Proto-Slavic **sǫsědŭ* — inherited: **sǫ-*, "together", with the root of сидеть, "to sit", so a neighbour is "one who sits beside you". Vasmer compares Sanskrit *saṃsád*, "assembly".

What you've built

One more word for this chapter.

Your turn

- *Say it: soséd*
- *Say it: soséd*, once more
- *Say it:* say *soséd*
- *Recall:* say the Russian for a grandson, then the Russian for a granddaughter, then say *soséd* again

Before you move on

What does сосед mean? ("A neighbour".) Say it once more.

37.2 гость (gost) — a guest

Before the new one: say the Russian for a granddaughter, then the Russian for a neighbour.

You'll want to know: гость

гость (*gost*) — "a guest".

The word, taken apart — and its English cousins

гость ← Proto-Slavic **gostĭ* — inherited. Vasmer relates it to Gothic *gasts* and Latin *hostis*, "stranger, enemy", and rejects a loan from Germanic: English *guest* is a cousin, from PIE **g^{h}óstis*. In Old Russian a гость was also a travelling merchant (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: gost*
- *Say it: gost*, once more
- *Say it:* say *gost*

- *Recall:* say the Russian for a granddaughter, then the Russian for a neighbour, then say *gost* again

Before you move on

37.3 учитель (uchítel) — a teacher

Before the new one: say the Russian for a neighbour, then the Russian for a guest.

You'll want to know: учитель

учитель (*uchítel*) — "a teacher".

The word, taken apart — and its English cousins

учитель is учить, "to teach", with -тель, "one who does it"; Old Church Slavonic already had it. The verb goes back to Proto-Slavic **učiti*, "to accustom" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: uchítel*
- *Say it: uchítel*, once more
- *Say it:* say *uchítel*
- *Recall:* say the Russian for a neighbour, then the Russian for a guest, then say *uchítel* again

Before you move on

What does учитель mean? ("A teacher".) Say it once more.

37.4 ученик (ucheník) — a pupil

Before the new one: say the Russian for a guest, then the Russian for a teacher.

You'll want to know: ученик

ученик (*ucheník*) — "a pupil".

The word, taken apart — and its English cousins

ученик is учить, "to teach, to learn", with -ник, a suffix for a person: the one who learns. The verb goes back to Proto-Slavic **učiti*, "to accustom" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: ucheník*
- *Say it: ucheník*, once more
- *Say it:* say *ucheník*
- *Recall:* say the Russian for a guest, then the Russian for a teacher, then say *ucheník* again

Before you move on

What does ученик mean? ("A pupil".) Say it once more.

37.5 работа (rabóta) — work, a job

Before the new one: say the Russian for a teacher, then the Russian for a pupil.

You'll want to know: работа

работа (*rabóta*) — "work, a job".

The word, taken apart — and its English cousins

работа ← Proto-Slavic **orbota*: Old Russian робота meant "work, slavery" (Vasmer). It is built on the root of раб, "slave", and Vasmer relates it to Gothic *arbaiþs*, "hardship", and German *Arbeit*, "work". Its ра- is the Church Slavonic shape; East Slavic dialects say робота.

What you've built

One more word for this chapter.

Your turn

- *Say it: rabóta*
- *Say it: rabóta*, once more
- *Say it:* say *rabóta*
- *Recall:* say the Russian for a teacher, then the Russian for a pupil, then say *rabóta* again

Before you move on

What does работа mean? ("Work, a job".) Say it once more.

Chapter 38

Work, Sing, Dance, Laugh, Cry

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say to work, to sing, to dance, to laugh and to cry.

38.1 работать (rabótat) — to work

Before the new one: say the Russian for a pupil, then the Russian for work.

You'll want to know: работать

работать (*rabótat*) — "to work". The verb of работа.

The word, taken apart — and its English cousins

работать is работа, "work", made into a verb with -ать. работа goes back to a Proto-Slavic word for "toil, slavery", built on the root of раб, "slave" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: rabótat*
- *Say it: rabótat*, once more
- *Say it:* say *rabótat*
- *Recall:* say the Russian for a pupil, then the Russian for work, then say *rabótat* again

Before you move on

What does работать mean? ("To work".) Say it once more.

38.2 петь (pet) — to sing

Before the new one: say the Russian for work, then the Russian for to work.

You'll want to know: петь

петь (*pet*) — "to sing".

The word, taken apart — and its English cousins

петь ← Proto-Slavic **pěti*, with **pojǫ*, "I sing" — inherited. The deeper origin is unclear: Vasmer finds the proposed links unreliable, and Trubachev, in a note to Vasmer, explains it from пить, "to drink", since пою means both "I sing" and "I give to drink".

What you've built

One more word for this chapter.

Your turn

- *Say it: pet*
- *Say it: pet*, once more
- *Say it:* say *pet*

- *Recall:* say the Russian for work, then the Russian for to work, then say *pet* again

Before you move on

What does танцевать mean? ("To dance".) Say it once more.

38.4 смеяться (smeyátsya) — to laugh

Before the new one: say the Russian for to sing, then the Russian for to dance.

You'll want to know: смеяться

смеяться (*smeyátsya*) — "to laugh".

The word, taken apart — and its English cousins

смеяться ← Proto-Slavic **smĭjati sę* — inherited; -ся is the old "oneself". Vasmer relates it to Latvian *smiêt*, "to laugh", Sanskrit *smáyate*, "smiles", Greek *meidiáō*, "I smile", and Middle English *smilen*, so English *smile* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: smeyátsya*
- *Say it: smeyátsya*, once more
- *Say it:* say *smeyátsya*
- *Recall:* say the Russian for to sing, then the Russian for to dance, then say *smeyátsya* again

Before you move on

What does смеяться mean? ("To laugh".) Say it once more.

38.5 плакать (plákat) — to cry

Before the new one: say the Russian for to dance, then the Russian for to laugh.

You'll want to know: плакать

плакать (*plákat*) — "to cry".

The word, taken apart — and its English cousins

плакать ← Proto-Slavic **plakati* — inherited. Vasmer gives the first Slavic sense as "to beat one's breast" in mourning, and relates it to Lithuanian *plàkti*, "to beat", Greek *plēssō*, "I strike", and Latin *plangō*, "I beat my breast, lament".

What you've built

One more word for this chapter.

Your turn

Before the new one: say the Russian for to cry, then the Russian for to wash.

You'll want to know: готовить

готовить (*gotóvit*) — "to cook, to prepare".

The word, taken apart — and its English cousins

готовить is готовый, "ready", made into a verb: "to make ready", and so "to cook". готовый goes back to Proto-Slavic **gotovŭ*; Vasmer relates it to Albanian *gatuanj*, "I cook", and rejects a loan from Gothic.

What you've built

One more word for this chapter.

Your turn

- *Say it: gotóvit*
- *Say it: gotóvit*, once more
- *Say it:* say *gotóvit*
- *Recall:* say the Russian for to cry, then the Russian for to wash, then say *gotóvit* again

закрывать (*zakryvát*) — "to close".

The word, taken apart — and its English cousins

закрывать is за-, "behind, over", with -крывать, from крыть, "to cover": to close is to cover something over. Vasmer relates крыть to Greek *krýptō*, "I hide".

What you've built

One more word for this chapter.

Your turn

- *Say it: zakryvát*
- *Say it: zakryvát*, once more
- *Say it:* say *zakryvát*
- *Recall:* say the Russian for to give, then the Russian for to open, then say *zakryvát* again

Before you move on

What does закрывать mean? ("To close".) Say it once more.

42.3 пить (pit) — to drink

Before the new one: say the Russian for to open, then the Russian for to close.

You'll want to know: пить

пить (*pit*) — "to drink". What you do with вода and чай.

The word, taken apart — and its English cousins

пить ← Proto-Slavic **piti* — inherited from PIE **peh₃(i)-*, "to drink". Vasmer lists Sanskrit *píbati*, "drinks", Greek *pínō*, "I drink", and Latin *bibō*, "I drink", from older **pibō*.

What you've built

One more word for this chapter.

Your turn

- *Say it: pit*
- *Say it: pit*, once more
- *Say it:* say *pit*
- *Recall:* say the Russian for to open, then the Russian for to close, then say *pit* again

Before you move on

What does пить mean? ("To drink".) Say it once more.

42.4 вопрос (voprós) — a question

Before the new one: say the Russian for to close, then the Russian for to drink.

You'll want to know: вопрос

вопрос (*voprós*) — "a question".

The word, taken apart — and its English cousins

вопрос is во-, "in, toward", with -прос, the root of просить, "to ask, to request". Vasmer relates просить to Lithuanian *prašýti*, "to ask", Latin *precor*, "I pray", and German *fragen*, "to ask", from PIE **preḱ-*, "to ask".

What you've built

One more word for this chapter.

Your turn

- *Say it: voprós*
- *Say it: voprós*, once more
- *Say it:* say *voprós*
- *Recall:* say the Russian for to close, then the Russian for to drink, then say *voprós* again

Before you move on

What does вопрос mean? ("A question".) Say it once more.

42.5 ответ (otvét) — an answer

Before the new one: say the Russian for to drink, then the Russian for a question.

You'll want to know: ответ

ответ (*otvét*) — "an answer". The noun behind отвечать.

The word, taken apart — and its English cousins

ответ is от-, "back", with вет, an old word: Old Russian *větŭ* meant "counsel, agreement" (Vasmer). An answer is a word given back. The

same root is in привет, “hi”, and совет, “advice”. Vasmer compares Old Prussian *waitiāt*, “to speak”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: otvét*
- *Say it: otvét*, once more
- *Say it:* say *otvét*
- *Recall:* say the Russian for to drink, then the Russian for a question, then say *otvét* again

Before you move on

What does ответ mean? (“An answer”.) Say it once more.

43.1 мясо (myáso) — meat

Before the new one: say the Russian for a question, then the Russian for an answer.

You'll want to know: мясо

мясо (*myáso*) — "meat".

The word, taken apart — and its English cousins

мясо ← Proto-Slavic **męso* — inherited; the old nasal *ę* became Russian я. Vasmer lists Old Prussian *mensā*, Sanskrit *māṃsá-* and Gothic *mimz*, all "meat".

What you've built

One more word for this chapter.

Your turn

- *Say it: myáso*
- *Say it: myáso*, once more
- *Say it:* say *myáso*
- *Recall:* say the Russian for a question, then the Russian for an answer, then say *myáso* again

Before you move on

What does мясо mean? ("Meat".) Say it once more.

43.2 рыба (rýba) — fish

Before the new one: say the Russian for an answer, then the Russian for meat.

You'll want to know: рыба

рыба (*rýba*) — "fish".

The word, taken apart — and its English cousins

рыба ← Proto-Slavic **ryba* — inherited, but its deeper origin is unclear. Vasmer thought it was probably a taboo stand-in for an older word, the cousin of Lithuanian *žuvìs*, "fish", which fishermen avoided because it sounded like звать, "to call". A comparison with Old High German *rûppa*, "caterpillar", is also reported.

What you've built

One more word for this chapter.

Your turn

- *Say it: rýba*
- *Say it: rýba*, once more
- *Say it:* say *rýba*

- *Recall:* say the Russian for an answer, then the Russian for meat, then say *rýba* again

Before you move on

What does рыба mean? ("Fish".) Say it once more.

43.3 яйцо (yaytsó) — an egg

Before the new one: say the Russian for meat, then the Russian for fish.

You'll want to know: яйцо

яйцо (*yaytsó*) — "an egg".

The word, taken apart — and its English cousins

яйцо ← Proto-Slavic **aje*, "egg", with a diminutive ending — inherited. Vasmer lists Old High German *ei*, Old Norse *egg*, Latin *ōvum* and Greek *ōión*: English *egg* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: yaytsó*
- *Say it: yaytsó*, once more
- *Say it:* say *yaytsó*
- *Recall:* say the Russian for meat, then the Russian for fish, then say *yaytsó* again

Before you move on

What does яйцо mean? ("An egg".) Say it once more.

43.4 масло (máslo) — butter; oil

Before the new one: say the Russian for fish, then the Russian for an egg.

You'll want to know: масло

масло (*máslo*) — "butter; oil".

The word, taken apart — and its English cousins

масло ← Proto-Slavic **maslo*, from **maz-slo*, "what you smear", on the root of мазать, "to smear" (Vasmer). So butter and oil share one word: both are spread.

What you've built

One more word for this chapter.

Your turn

- *Say it: máslo*
- *Say it: máslo*, once more
- *Say it:* say *máslo*
- *Recall:* say the Russian for fish, then the Russian for an egg, then say *máslo* again

Before you move on

What does масло mean? ("Butter; oil".) Say it once more.

43.5 соль (sol) — salt

Before the new one: say the Russian for an egg, then the Russian for butter; oil.

You'll want to know: соль

соль (*sol*) — "salt".

The word, taken apart — and its English cousins

соль ← Proto-Slavic **solĭ* — inherited. Vasmer lists Latvian *sāls*, Latin *sāl*, Greek *háls* and Gothic *salt*, all "salt": English *salt* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: sol*
- *Say it: sol*, once more
- *Say it:* say *sol*
- *Recall:* say the Russian for an egg, then the Russian for butter; oil, then say *sol* again

Before you move on

What does соль mean? ("Salt".) Say it once more.

Chapter 44

Fruit, Apple, Pear, Cherry, Berry

44.1 фрукты (frúkty) — fruit

Before the new one: say the Russian for butter; oil, then the Russian for salt.

You'll want to know: фрукты

фрукты (*frúkty*) — "fruit".

The word, taken apart — and its English cousins

фрукты came through Polish *frukt* from Latin *frūctus*, "fruit, enjoyment"; it is recorded from 1705, in Peter the Great's time (Vasmer). English *fruit* comes from the same Latin word.

What you've built

One more word for this chapter.

Your turn

- *Say it: frúkty*
- *Say it: frúkty*, once more
- *Say it:* say *frúkty*
- *Recall:* say the Russian for butter; oil, then the Russian for salt, then say *frúkty* again

Before you move on

What does фрукты mean? ("Fruit".) Say it once more.

44.2 яблоко (yábloko) — an apple

Before the new one: say the Russian for salt, then the Russian for fruit.

You'll want to know: яблоко

яблоко (*yábloko*) — "an apple".

The word, taken apart — and its English cousins

яблоко ← Proto-Slavic **ablŭko* — inherited. Vasmer lists Lithuanian *obuolỹs*, Old High German *apful* and Old Irish *aball*, all "apple": English *apple* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: yábloko*
- *Say it: yábloko*, once more
- *Say it:* say *yábloko*
- *Recall:* say the Russian for salt, then the Russian for fruit, then say *yábloko* again

Before you move on

What does яблоко mean? ("An apple".) Say it once more.

44.3 груша (grúsha) — a pear

Before the new one: say the Russian for fruit, then the Russian for an apple.

You'll want to know: груша

груша (*grúsha*) — "a pear".

The word, taken apart — and its English cousins

груша — probably a very old loan: the first sound wavers between г- and к- (Bulgarian круша), and Lithuanian *kriáušė*, "pear", has the same source (Vasmer). Vasmer reports a comparison with a Kurdish word, but the donor is unknown.

What you've built

One more word for this chapter.

Your turn

- *Say it: grúsha*
- *Say it: grúsha*, once more
- *Say it:* say *grúsha*
- *Recall:* say the Russian for fruit, then the Russian for an apple, then say *grúsha* again

Before you move on

What does груша mean? ("A pear".) Say it once more.

44.4 вишня (víshnya) — a cherry

Before the new one: say the Russian for an apple, then the Russian for a pear.

You'll want to know: вишня

вишня (*víshnya*) — "a cherry".

The word, taken apart — and its English cousins

вишня ← Proto-Slavic **višĭnja* — inherited. Vasmer relates it to Old High German *wîhsila*, "sour cherry", and through it to Latin *viscum*, "birdlime", because cherry gum and mistletoe berries were both used to snare birds.

What you've built

One more word for this chapter.

Your turn

- *Say it: víshnya*
- *Say it: víshnya*, once more
- *Say it:* say *víshnya*
- *Recall:* say the Russian for an apple, then the Russian for a pear, then say *víshnya* again

Before you move on

What does вишня mean? ("A cherry".) Say it once more.

44.5 ягода (yágoda) — a berry

Before the new one: say the Russian for a pear, then the Russian for a cherry.

You'll want to know: ягода

ягода (*yágoda*) — "a berry".

The word, taken apart — and its English cousins

ягода ← Proto-Slavic **agoda*, **aga* with an added *-oda* — inherited, a cousin of Lithuanian *úoga*, "berry" (Vasmer). Russian added *j-* at the front, as in яблоко, "apple".

What you've built

One more word for this chapter.

Your turn

- *Say it: yágoda*
- *Say it: yágoda*, once more
- *Say it:* say *yágoda*
- *Recall:* say the Russian for a pear, then the Russian for a cherry, then say *yágoda* again

Before you move on

What does ягода mean? ("A berry".) Say it once more.

Chapter 45

Potatoes, Tomato, Onion, Cucumber, Carrot

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

45.1 картошка (kartóshka) — potatoes

Before the new one: say the Russian for a cherry, then the Russian for a berry.

You'll want to know: картошка

картошка (*kartóshka*) — "potatoes".

The word, taken apart — and its English cousins

картошка is картофель, "potato", with the fond -ошка. картофель came from German *Kartoffel*, which comes from Italian *tartufolo*, "truffle": the tubers looked like truffles (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: kartóshka*
- *Say it: kartóshka*, once more
- *Say it:* say *kartóshka*
- *Recall:* say the Russian for a cherry, then the Russian for a berry, then say *kartóshka* again

Before you move on

What does картошка mean? ("Potatoes".) Say it once more.

45.2 помидор (pomidór) — a tomato

Before the new one: say the Russian for a berry, then the Russian for potatoes.

You'll want to know: помидор

помидор (*pomidór*) — "a tomato".

The word, taken apart — and its English cousins

помидор comes from Italian *pomi d'oro*, "golden apples", the plural of *pomo d'oro* (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: pomidór*
- *Say it: pomidór*, once more
- *Say it:* say *pomidór*
- *Recall:* say the Russian for a berry, then the Russian for potatoes, then say *pomidór* again

Before you move on

What does помидор mean? ("A tomato".) Say it once more.

45.3 лук (luk) — an onion

Before the new one: say the Russian for potatoes, then the Russian for a tomato.

You'll want to know: лук

лук (*luk*) — "an onion".

The word, taken apart — and its English cousins

лук, "onion", was borrowed from early Germanic **lauka-* (Vasmer): Old Norse *laukr*, Old English *lēac*, English *leek*. The лук that means "a bow" is a separate, native word.

What you've built

One more word for this chapter.

Your turn

- *Say it: luk*
- *Say it: luk*, once more
- *Say it:* say *luk*
- *Recall:* say the Russian for potatoes, then the Russian for a tomato, then say *luk* again

Before you move on

What does лук mean? ("An onion".) Say it once more.

45.4 огурец (oguréts) — a cucumber

Before the new one: say the Russian for a tomato, then the Russian for an onion.

You'll want to know: огурец

огурец (*oguréts*) — "a cucumber".

The word, taken apart — and its English cousins

огурец ← Byzantine Greek *ágouros*, "cucumber", from older Greek *áōros*, "unripe": cucumbers are eaten unripe, unlike melons (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: oguréts*
- *Say it: oguréts*, once more
- *Say it:* say *oguréts*
- *Recall:* say the Russian for a tomato, then the Russian for an onion, then say *oguréts* again

Before you move on

What does огурец mean? ("A cucumber".) Say it once more.

45.5 морковь (morkóv) — a carrot

Before the new one: say the Russian for an onion, then the Russian for a cucumber.

You'll want to know: морковь

морковь (*morkóv*) — "a carrot".

The word, taken apart — and its English cousins

морковь ← Proto-Slavic **mŭrky* — inherited. Vasmer relates it to Old High German *moraha*, "carrot", and holds that a loan from Germanic cannot be proved.

What you've built

One more word for this chapter.

Your turn

- *Say it: morkóv*
- *Say it: morkóv*, once more
- *Say it:* say *morkóv*
- *Recall:* say the Russian for an onion, then the Russian for a cucumber, then say *morkóv* again

Before you move on

What does морковь mean? ("A carrot".) Say it once more.

46.1 завтрак (závtrak) — breakfast

Before the new one: say the Russian for a cucumber, then the Russian for a carrot.

You'll want to know: завтрак

завтрак (*závtrak*) — "breakfast".

The word, taken apart — and its English cousins

завтрак — built on the root of завтра, "tomorrow", which is за, "after", with утро, "morning". Old Russian said *zautrokŭ*, "the morning meal" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: závtrak*
- *Say it: závtrak*, once more
- *Say it:* say *závtrak*
- *Recall:* say the Russian for a cucumber, then the Russian for a carrot, then say *závtrak* again

Before you move on

What does завтрак mean? ("Breakfast".) Say it once more.

46.2 обед (obéd) — lunch, the midday meal

Before the new one: say the Russian for a carrot, then the Russian for breakfast.

You'll want to know: обед

обед (*obéd*) — "lunch, the midday meal".

The word, taken apart — and its English cousins

обед ← Proto-Slavic **obědŭ* — об-, "around", with the root of еда, "food", and есть, "to eat" (Vasmer). That root is PIE **$h_1$ed-*, "to eat", so English *eat* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: obéd*
- *Say it: obéd*, once more
- *Say it:* say *obéd*
- *Recall:* say the Russian for a carrot, then the Russian for breakfast, then say *obéd* again

Before you move on

What does обед mean? ("Lunch, the midday meal".) Say it once more.

46.3 ужин (úzhin) — dinner, supper

Before the new one: say the Russian for breakfast, then the Russian for lunch.

You'll want to know: ужин

ужин (*úzhin*) — "dinner, supper".

The word, taken apart — and its English cousins

ужин — built on Proto-Slavic **jugŭ*, "south, noon", so it first meant "the midday meal" (Vasmer); Old Russian ужина was an afternoon meal. Latin *merīdiēs* is both "noon" and "south" in the same way.

What you've built

One more word for this chapter.

Your turn

- *Say it: úzhin*
- *Say it: úzhin*, once more
- *Say it:* say *úzhin*
- *Recall:* say the Russian for breakfast, then the Russian for lunch, then say *úzhin* again

Before you move on

What does ужин mean? ("Dinner, supper".) Say it once more.

46.4 каша (kásha) — porridge

Before the new one: say the Russian for lunch, then the Russian for dinner.

You'll want to know: каша

каша (*kásha*) — "porridge".

The word, taken apart — and its English cousins

каша ← Proto-Slavic **kaša* — inherited. Vasmer relates it to Lithuanian *kóšti*, "to strain, to filter"; Trubachev, in a note, explains it otherwise.

What you've built

One more word for this chapter.

Your turn

- *Say it: kásha*
- *Say it: kásha*, once more
- *Say it:* say *kásha*
- *Recall:* say the Russian for lunch, then the Russian for dinner, then say *kásha* again

Before you move on

What does каша mean? ("Porridge".) Say it once more.

46.5 пирог (piróg) — a pie

Before the new one: say the Russian for dinner, then the Russian for porridge.

You'll want to know: пирог

пирог (*piróg*) — "a pie".

The word, taken apart — and its English cousins

пирог — Vasmer builds it on пир, “a feast”, with the suffix -ог; others start from Old Russian пыро, “spelt”, reshaped to match пир. Either way it is a Slavic word.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: piróg*
- *Say it: piróg*, once more
- *Say it:* say *piróg*
- *Recall:* say the Russian for dinner, then the Russian for porridge, then say *piróg* again

Before you move on

What does пирог mean? (“A pie”.) Say it once more.

47.1 caxap (sákhar) — sugar

Before the new one: say the Russian for porridge, then the Russian for a pie.

You'll want to know: caxap

caxap (*sákhar*) — "sugar".

The word, taken apart — and its English cousins

caxap ← Greek *sákcharon*, from Pali *sakkharā*, Sanskrit *śarkarā*, "gravel, grit, sugar" (Vasmer). The same Sanskrit word, through Arabic, gave English *sugar*.

What you've built

One more word for this chapter.

Your turn

- *Say it: sákhar*
- *Say it: sákhar*, once more
- *Say it:* say *sákhar*
- *Recall:* say the Russian for porridge, then the Russian for a pie, then say *sákhar* again

Before you move on

What does сахар mean? ("Sugar".) Say it once more.

47.2 мёд (myod) — honey

Before the new one: say the Russian for a pie, then the Russian for sugar.

You'll want to know: мёд

мёд (*myod*) — "honey".

The word, taken apart — and its English cousins

мёд ← Proto-Slavic **medŭ*, "honey; mead" — inherited. Vasmer lists Lithuanian *medùs*, "honey", Sanskrit *mádhu*, "honey, mead", and Greek *méthy*, "wine": English *mead* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: myod*
- *Say it: myod*, once more
- *Say it:* say *myod*
- *Recall:* say the Russian for a pie, then the Russian for sugar, then say *myod* again

Before you move on

What does мёд mean? ("Honey".) Say it once more.

47.3 рис (ris) — rice

Before the new one: say the Russian for sugar, then the Russian for honey.

You'll want to know: рис

рис (*ris*) — "rice".

The word, taken apart — and its English cousins

рис probably came through Low German *rîs* or Dutch *rijs*, from Italian *riso*, from Latin *oryza* and Greek *óryza*, which came out of India (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: ris*
- *Say it: ris*, once more
- *Say it:* say *ris*
- *Recall:* say the Russian for sugar, then the Russian for honey, then say *ris* again

Before you move on

What does рис mean? ("Rice".) Say it once more.

47.4 гриб (grib) — a mushroom

Before the new one: say the Russian for honey, then the Russian for rice.

You'll want to know: гриб

гриб (*grib*) — "a mushroom".

The word, taken apart — and its English cousins

гриб ← Proto-Slavic **gribŭ* — inherited, but its origin is unclear. Vasmer reports a possible link with Lithuanian *griẽti*, "to skim cream", from a sense "slime", among other proposals.

What you've built

One more word for this chapter.

Your turn

- *Say it: grib*
- *Say it: grib*, once more
- *Say it:* say *grib*
- *Recall:* say the Russian for honey, then the Russian for rice, then say *grib* again

Before you move on

What does гриб mean? ("A mushroom".) Say it once more.

47.5 стакан (stakán) — a glass (for drinking)

Before the new one: say the Russian for rice, then the Russian for a mushroom.

You'll want to know: стакан

стакан (*stakán*) — "a glass (for drinking)".

The word, taken apart — and its English cousins

стакан — Old Russian *dostokanŭ*, recorded from the 1300s. It is usually taken from Turkic: Vasmer cites Chagatai *tostakan*, "a wooden bowl", and Kazakh *tustaghan*, "a cup, a ladle".

What you've built

One more word for this chapter.

Your turn

- *Say it: stakán*
- *Say it: stakán*, once more
- *Say it:* say *stakán*
- *Recall:* say the Russian for rice, then the Russian for a mushroom, then say *stakán* again

Before you move on

What does стакан mean? ("A glass (for drinking)".) Say it once more.

48.1 дом (dom) — a house, home

Before the new one: say the Russian for a mushroom, then the Russian for a glass.

You'll want to know: дом

дом (*dom*) — "a house, home".

The word, taken apart — and its English cousins

дом ← Proto-Slavic **domŭ* — inherited. Vasmer lists Sanskrit *dámas*, Greek *dómos* and Latin *domus*, all "house", from PIE **dem-*, "to build".

What you've built

One more word for this chapter.

Your turn

- *Say it: dom*
- *Say it: dom*, once more
- *Say it:* say *dom*
- *Recall:* say the Russian for a mushroom, then the Russian for a glass, then say *dom* again

Before you move on

What does дом mean? ("A house, home".) Say it once more.

48.2 комната (kómnata) — a room

Before the new one: say the Russian for a glass, then the Russian for a house.

You'll want to know: комната

комната (*kómnata*) — "a room".

The word, taken apart — and its English cousins

комната ← Latin *(camera) camīnāta*, "a room with a stove", from *camīnus*, "furnace". Vasmer takes the initial stress as a sign it came through Old High German *cheminātа*, but the older stress fell on -на-, which points to Polish, as Kiparsky argued; Jakobson, in Trubachev's note, derived it from Czech.

What you've built

One more word for this chapter.

Your turn

- *Say it: kómnata*
- *Say it: kómnata*, once more
- *Say it:* say *kómnata*

Before you move on

What does комната mean? ("A room".) Say it once more.

48.3 кухня (kúkhnya) — a kitchen

Before the new one: say the Russian for a house, then the Russian for a room.

You'll want to know: кухня

кухня (*kúkhnya*) — "a kitchen".

The word, taken apart — and its English cousins

кухня came, from 1717, through Polish *kuchnia* and Czech *kuchyně* from Old High German *kuchina*, from Latin *coquīna*, "kitchen"; before that Russians said поварня (Vasmer).

What you've built

One more word for this chapter.

Your turn

48.4 окно (oknó) — a window

Before the new one: say the Russian for a room, then the Russian for a kitchen.

You'll want to know: окно

окно (*oknó*) — "a window".

The word, taken apart — and its English cousins

окно ← Proto-Slavic **okŭno*, built on око, "eye" (Vasmer): a window is the eye of the house, as English *window* is Old Norse *vindauga*, "wind-eye".

What you've built

One more word for this chapter.

Your turn

- *Say it: oknó*
- *Say it: oknó*, once more
- *Say it:* say *oknó*
- *Recall:* say the Russian for a room, then the Russian for a kitchen, then say *oknó* again

Before you move on

What does окно mean? ("A window".) Say it once more.

48.5 дверь (dver) — a door

Before the new one: say the Russian for a kitchen, then the Russian for a window.

You'll want to know: дверь

дверь (*dver*) — "a door".

The word, taken apart — and its English cousins

дверь ← Proto-Slavic **dvĭrĭ* — inherited. Vasmer lists Lithuanian *dùrys*, Gothic *daúr*, Greek *thýra* and Latin *forēs*: English *door* is a cousin, from PIE **d^{h}wer-*, "door".

What you've built

One more word for this chapter.

Your turn

- *Say it: dver*
- *Say it: dver*, once more
- *Say it:* say *dver*
- *Recall:* say the Russian for a kitchen, then the Russian for a window, then say *dver* again

Before you move on

What does дверь mean? ("A door".) Say it once more.

49.1 стол (stol) — a table

Before the new one: say the Russian for a window, then the Russian for a door.

You'll want to know: стол

стол (*stol*) — "a table".

The word, taken apart — and its English cousins

стол ← Proto-Slavic **stolŭ* — inherited; Old Russian *stolŭ* also meant "throne, seat" (Vasmer). Vasmer compares Gothic *stōls*, "chair", and Lithuanian *stãlas*, "table", but also weighs the root of стелить, "to spread", so the deeper origin is open.

What you've built

One more word for this chapter.

Your turn

- *Say it: stol*
- *Say it: stol*, once more
- *Say it:* say *stol*
- *Recall:* say the Russian for a window, then the Russian for a door, then say *stol* again

Before you move on

What does стол mean? ("A table".) Say it once more.

49.2 стул (stul) — a chair

Before the new one: say the Russian for a door, then the Russian for a table.

You'll want to know: стул

стул (*stul*) — "a chair".

The word, taken apart — and its English cousins

стул — first recorded in 1578, perhaps borrowed from Old Norse *stóll* or Low German *stuhl*, "chair" (Vasmer). A High German loan would have begun шт-.

What you've built

One more word for this chapter.

Your turn

- *Say it: stul*
- *Say it: stul*, once more
- *Say it:* say *stul*
- *Recall:* say the Russian for a door, then the Russian for a table, then say *stul* again

Before you move on

What does стул mean? ("A chair".) Say it once more.

49.3 кровать (krovát) — a bed

Before the new one: say the Russian for a table, then the Russian for a chair.

You'll want to know: кровать

кровать (*krovát*) — "a bed".

The word, taken apart — and its English cousins

кровать ← Byzantine Greek *krabbátion*, from Greek *krábbatos*, "a pallet, a camp bed" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: krovát*
- *Say it: krovát*, once more
- *Say it:* say *krovát*
- *Recall:* say the Russian for a table, then the Russian for a chair, then say *krovát* again

Before you move on

What does кровать mean? ("A bed".) Say it once more.

49.4 лампа (lámpa) — a lamp

Before the new one: say the Russian for a chair, then the Russian for a bed.

You'll want to know: лампа

лампа (*lámpa*) — "a lamp".

The word, taken apart — and its English cousins

лампа came from German *Lampe* or French *lampe*, from Latin *lampada* and Greek *lampás*, "a torch"; the old form лямпа came through Polish (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: lámpa*
- *Say it: lámpa*, once more
- *Say it:* say *lámpa*
- *Recall:* say the Russian for a chair, then the Russian for a bed, then say *lámpa* again

Before you move on

What does лампа mean? ("A lamp".) Say it once more.

49.5 ключ (klyuch) — a key

Before the new one: say the Russian for a bed, then the Russian for a lamp.

You'll want to know: ключ

ключ (*klyuch*) — "a key".

The word, taken apart — and its English cousins

ключ ← Proto-Slavic **ključĭ* — inherited. Vasmer relates it to Greek *kleís*, "key", and Latin *clāvis*, "key", and *claudō*, "I shut". The ключ that means "a spring" may be the same word or another.

What you've built

One more word for this chapter.

Your turn

- *Say it: klyuch*
- *Say it: klyuch*, once more
- *Say it:* say *klyuch*
- *Recall:* say the Russian for a bed, then the Russian for a lamp, then say *klyuch* again

Before you move on

What does ключ mean? ("A key".) Say it once more.

Chapter 50

Wall, Roof, Garden, Bathroom, Clock

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a wall, a roof, a garden, the bathroom and a clock.
>
> *Complete the last lesson of chapter 50: I can name a wall, a roof, a garden, the bathroom and a clock.*

50.1 стена (stená) — a wall

Before the new one: say the Russian for a lamp, then the Russian for a key.

You'll want to know: стена

стена (*stená*) — "a wall".

The word, taken apart — and its English cousins

стена ← Proto-Slavic **stěna* — inherited. Vasmer relates it to Gothic *stains*, "stone", so English *stone* is a cousin, and he holds that a loan from Germanic cannot be proved.

What you've built

One more word for this chapter.

Your turn

- *Say it: stená*
- *Say it: stená*, once more
- *Say it:* say *stená*
- *Recall:* say the Russian for a lamp, then the Russian for a key, then say *stená* again

Before you move on

What does стена mean? ("A wall".) Say it once more.

50.2 крыша (krýsha) — a roof

Before the new one: say the Russian for a key, then the Russian for a wall.

You'll want to know: крыша

крыша (*krýsha*) — "a roof".

The word, taken apart — and its English cousins

крыша is built on крыть, "to cover", with an *-s-* that became ш (Vasmer): the roof is the cover. The same verb is in открывать, "to open", and закрывать, "to close".

What you've built

One more word for this chapter.

Your turn

- *Say it: krýsha*
- *Say it: krýsha*, once more
- *Say it:* say *krýsha*
- *Recall:* say the Russian for a key, then the Russian for a wall, then say *krýsha* again

Before you move on

What does крыша mean? ("A roof".) Say it once more.

50.3 сад (sad) — a garden

Before the new one: say the Russian for a wall, then the Russian for a roof.

You'll want to know: сад

сад (*sad*) — "a garden".

The word, taken apart — and its English cousins

сад ← Proto-Slavic **sadŭ*, "a planting" — inherited, from садить, "to plant", literally "to make sit", the partner of сидеть, "to sit" (Vasmer). Old Russian *sadŭ* also meant "a tree, a grove".

What you've built

One more word for this chapter.

Your turn

- *Say it: sad*
- *Say it: sad*, once more
- *Say it:* say *sad*
- *Recall:* say the Russian for a wall, then the Russian for a roof, then say *sad* again

Before you move on

What does сад mean? ("A garden".) Say it once more.

50.4 ванная (vánnaya) — the bathroom

Before the new one: say the Russian for a roof, then the Russian for a garden.

You'll want to know: ванная

ванная (*vánnaya*) — "the bathroom".

The word, taken apart — and its English cousins

ванная is short for ванная комната, "the bath room": an adjective from ванна, "a bathtub", standing alone. ванна came from German *Wanne* or French *vanne* (Vasmer); Trubachev adds that it is recorded by 1697.

What you've built

One more word for this chapter.

Your turn

- *Say it: vánnaya*
- *Say it: vánnaya*, once more
- *Say it:* say *vánnaya*
- *Recall:* say the Russian for a roof, then the Russian for a garden, then say *vánnaya* again

Before you move on

What does ванная mean? ("The bathroom".) Say it once more.

50.5 часы (chasý) — a clock, a watch

Before the new one: say the Russian for a garden, then the Russian for the bathroom.

You'll want to know: часы

часы (*chasý*) — "a clock, a watch". Always plural.

The word, taken apart — and its English cousins

часы is the plural of час, "an hour": a clock is "the hours". час ← Proto-Slavic **časŭ*, "time, a while", a cousin of Old Prussian *kīsman*,

"time", and Albanian *kohë*, "time, weather" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: chasý*
- *Say it: chasý*, once more
- *Say it:* say *chasý*
- *Recall:* say the Russian for a garden, then the Russian for the bathroom, then say *chasý* again

Before you move on

What does часы mean? ("A clock, a watch".) Say it once more.

Chapter 51

Cup, Plate, Spoon, Knife, Fork

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a cup, a plate, a spoon, a knife and a fork.
>
> *Complete the last lesson of chapter 51: I can name a cup, a plate, a spoon, a knife and a fork.*

51.1 чашка (cháshka) — a cup

Before the new one: say the Russian for the bathroom, then the Russian for a clock.

You'll want to know: чашка

чашка (*cháshka*) — "a cup". For чай or кофе.

The word, taken apart — and its English cousins

чашка is чаша, "a bowl, a goblet", with -ка, "little". чаша ← Proto-Slavic **čaša*, which Vasmer thinks is probably related to Old Prussian *kiosi*, "a goblet".

What you've built

One more word for this chapter.

Your turn

- *Say it: cháshka*
- *Say it: cháshka*, once more
- *Say it:* say *cháshka*
- *Recall:* say the Russian for the bathroom, then the Russian for a clock, then say *cháshka* again

Before you move on

What does чашка mean? ("A cup".) Say it once more.

51.2 тарелка (tarélka) — a plate

Before the new one: say the Russian for a clock, then the Russian for a cup.

You'll want to know: тарелка

тарелка (*tarélka*) — "a plate".

The word, taken apart — and its English cousins

тарелка — older тарель, recorded from 1509; Vasmer thinks it apparently came through Polish *talerz* and Czech *talíř* from Middle High German *talier*, from Italian *tagliere*, "a trencher", from *tagliare*, "to cut".

What you've built

One more word for this chapter.

Your turn

- *Say it: tarélka*
- *Say it: tarélka*, once more
- *Say it:* say *tarélka*

- *Recall:* say the Russian for a clock, then the Russian for a cup, then say *tarélka* again

Before you move on

What does тарелка mean? ("A plate".) Say it once more.

51.3 ложка (lózhka) — a spoon

Before the new one: say the Russian for a cup, then the Russian for a plate.

You'll want to know: ложка

ложка (*lózhka*) — "a spoon".

The word, taken apart — and its English cousins

ложка ← Old Russian *lŭžĭka*, beside *lŭžica*, from Proto-Slavic **lŭžĭka* — inherited. Vasmer thinks it is probably related to Albanian *lugë*, "spoon", and perhaps to a root "to break, to split", since Swedish *sked*, "spoon", goes with a verb "to split".

What you've built

One more word for this chapter.

Your turn

- *Say it: lózhka*
- *Say it: lózhka*, once more
- *Say it:* say *lózhka*
- *Recall:* say the Russian for a cup, then the Russian for a plate, then say *lózhka* again

Before you move on

What does ложка mean? ("A spoon".) Say it once more.

51.4 нож (nozh) — a knife

Before the new one: say the Russian for a plate, then the Russian for a spoon.

You'll want to know: нож

нож (*nozh*) — "a knife".

The word, taken apart — and its English cousins

нож ← Proto-Slavic **nožĭ* — inherited. Vasmer will not separate it from вонзить, "to thrust in", and заноза, "a splinter", and reports the usual link with Greek *nýssō*, "I prick": the knife as the thing that pierces.

What you've built

One more word for this chapter.

Your turn

- *Say it: nozh*
- *Say it: nozh*, once more
- *Say it:* say *nozh*
- *Recall:* say the Russian for a plate, then the Russian for a spoon, then say *nozh* again

Before you move on

What does нож mean? ("A knife".) Say it once more.

51.5 вилка (vílka) — a fork

Before the new one: say the Russian for a spoon, then the Russian for a knife.

You'll want to know: вилка

вилка (*vílka*) — "a fork".

The word, taken apart — and its English cousins

вилка is вилы, "a pitchfork", with -ка, "little": a little pitchfork. вилы ← Proto-Slavic **vidla*, first "something bent", from the root of вить, "to twist" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: vílka*
- *Say it: vílka*, once more
- *Say it:* say *vílka*
- *Recall:* say the Russian for a spoon, then the Russian for a knife, then say *vílka* again

Before you move on

What does вилка mean? ("A fork".) Say it once more.

Chapter 52

Book, Pen, Paper, Notebook, Pencil

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

52.1 книга (kníga) — a book

Before the new one: say the Russian for a knife, then the Russian for a fork.

You'll want to know: книга

книга (*kníga*) — "a book".

The word, taken apart — and its English cousins

книга ← Proto-Slavic **kŭniga*. Vasmer, following Räsänen, takes it as a loan through early Turkic, Danube Bulgar **küiniv*, ultimately from Chinese *k'üen*, "a scroll"; Hungarian *könyv*, "book", has the same source. He finds the older Assyrian account less likely.

What you've built

One more word for this chapter.

Your turn

- *Say it: kníga*
- *Say it: kníga*, once more
- *Say it:* say *kníga*
- *Recall:* say the Russian for a knife, then the Russian for a fork, then say *kníga* again

Before you move on

What does книга mean? ("A book".) Say it once more.

52.2 ручка (rúchka) — a pen

Before the new one: say the Russian for a fork, then the Russian for a book.

You'll want to know: ручка

ручка (*rúchka*) — "a pen". Literally "a little hand".

The word, taken apart — and its English cousins

ручка is рука, "hand", with -ка, "little"; к turns to ч before it. The word means "a little hand", then "a handle", then "a pen", the thing you hold. Vasmer relates рука to Lithuanian *rankà*, "hand", and a Lithuanian verb for gathering.

What you've built

One more word for this chapter.

Your turn

- *Say it: rúchka*
- *Say it: rúchka*, once more
- *Say it:* say *rúchka*

- *Recall:* say the Russian for a fork, then the Russian for a book, then say *rúchka* again

Before you move on

What does ручка mean? ("A pen".) Say it once more.

52.3 бумага (bumága) — paper

Before the new one: say the Russian for a book, then the Russian for a pen.

You'll want to know: бумага

бумага (*bumága*) — "paper".

The word, taken apart — and its English cousins

бумага — Vasmer thinks it is most probably from Italian: Korsch derived it from *bombagio*, "cotton", and most early paper in Russia was Italian. Greek *bómbyx*, "silk", cannot explain the Russian form, he says.

What you've built

One more word for this chapter.

Your turn

- *Say it: bumága*
- *Say it: bumága*, once more
- *Say it:* say *bumága*
- *Recall:* say the Russian for a book, then the Russian for a pen, then say *bumága* again

Before you move on

What does бумага mean? ("Paper".) Say it once more.

52.4 тетрадь (tetrád) — a notebook

Before the new one: say the Russian for a pen, then the Russian for paper.

You'll want to know: тетрадь

тетрадь (*tetrád*) — "a notebook".

The word, taken apart — and its English cousins

тетрадь ← Byzantine Greek *tetrádion*, from *tetrás*, "a group of four", a sheet folded into four leaves (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: tetrád*
- *Say it: tetrád*, once more
- *Say it:* say *tetrád*
- *Recall:* say the Russian for a pen, then the Russian for paper, then say *tetrád* again

Before you move on

What does тетрадь mean? ("A notebook".) Say it once more.

52.5 карандаш (karandásh) — a pencil

Before the new one: say the Russian for paper, then the Russian for a notebook.

You'll want to know: карандаш

карандаш (*karandásh*) — "a pencil".

The word, taken apart — and its English cousins

карандаш ← Turkic *karadaš*, “black stone”, as in Turkish *karataş*, “black slate” (Vasmer): *kara*, “black”, and *taş*, “stone”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: karandásh*
- *Say it: karandásh*, once more
- *Say it:* say *karandásh*
- *Recall:* say the Russian for paper, then the Russian for a notebook, then say *karandásh* again

Before you move on

What does карандаш mean? (“A pencil”.) Say it once more.

Chapter 53

Bag, Phone, Umbrella, Money, Gift

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a bag, a phone, an umbrella, money and a gift.

53.1 сумка (súmka) — a bag

Before the new one: say the Russian for a notebook, then the Russian for a pencil.

You'll want to know: сумка

сумка (*súmka*) — "a bag".

The word, taken apart — and its English cousins

сумка is сума, "a bag, a saddlebag", with -ка, "little". сума came through Polish *suma* from Old High German *soum*, "a pack load", from Late Latin *sauma*, Greek *ságma*, "a pack saddle" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: súmka*
- *Say it: súmka*, once more
- *Say it:* say *súmka*
- *Recall:* say the Russian for a notebook, then the Russian for a pencil, then say *súmka* again

Before you move on

What does сумка mean? ("A bag".) Say it once more.

53.2 телефон (telefón) — a phone

Before the new one: say the Russian for a pencil, then the Russian for a bag.

You'll want to know: телефон

телефон (*telefón*) — "a phone".

The word, taken apart — and its English cousins

телефон is an international coinage from Greek *tēle*, "far off", and *phōnē*, "voice, sound": a far voice.

What you've built

One more word for this chapter.

Your turn

- *Say it: telefón*
- *Say it: telefón*, once more
- *Say it:* say *telefón*
- *Recall:* say the Russian for a pencil, then the Russian for a bag, then say *telefón* again

Before you move on

What does телефон mean? ("A phone".) Say it once more.

53.3 зонт (zont) — an umbrella

Before the new one: say the Russian for a bag, then the Russian for a phone.

You'll want to know: зонт

зонт (*zont*) — "an umbrella".

The word, taken apart — and its English cousins

зонт is cut back from зонтик, from older зондек, a sailors' word from Dutch *zondek*, "an awning against the sun" (Vasmer). The -ик was heard as a diminutive, so зонт was made as the "full" form.

What you've built

One more word for this chapter.

Your turn

- *Say it: zont*
- *Say it: zont*, once more
- *Say it:* say *zont*
- *Recall:* say the Russian for a bag, then the Russian for a phone, then say *zont* again

Before you move on

What does зонт mean? ("An umbrella".) Say it once more.

53.4 деньги (déngi) — money

Before the new one: say the Russian for a phone, then the Russian for an umbrella.

You'll want to know: деньги

деньги (*déngi*) — "money". Always plural.

The word, taken apart — and its English cousins

деньги is the plural of деньга, a coin, recorded from 1361; Vasmer takes it from Turkic: Tatar and Chagatai *täŋkä*, "money, a silver coin", Kazakh *teŋgä*. A Persian origin for the Turkic word has been proposed.

What you've built

One more word for this chapter.

Your turn

- *Say it: déngi*
- *Say it: déngi*, once more
- *Say it:* say *déngi*

53.5 подарок (podárok) — a gift, a present

Before the new one: say the Russian for an umbrella, then the Russian for money.

You'll want to know: подарок

подарок (*podárok*) — "a gift, a present".

The word, taken apart — and its English cousins

подарок is built on дарить, "to give as a gift", from дар, "a gift", with по- and the noun ending -ок. Vasmer relates дар to Greek *dōron*, "gift".

What you've built

One more word for this chapter.

Your turn

- *Say it: podárok*
- *Say it: podárok*, once more
- *Say it:* say *podárok*
- *Recall:* say the Russian for an umbrella, then the Russian for money, then say *podárok* again

Before you move on

What does подарок mean? ("A gift, a present".) Say it once more.

Chapter 55

Tree, Flower, Leaf, Grass, Village

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a tree, a flower, a leaf, grass and a village.
>
> *Complete the last lesson of chapter 55: I can name a tree, a flower, a leaf, grass and a village.*

55.1 дерево (dérevo) — a tree

Before the new one: say the Russian for a ticket, then the Russian for a map.

You'll want to know: дерево

дерево (*dérevo*) — "a tree".

The word, taken apart — and its English cousins

дерево ← Proto-Slavic **dervo* — inherited. Vasmer lists Lithuanian *dervà*, "pine", Greek *dóry*, "wood, spear", *drŷs*, "oak", and Sanskrit *dāru*, "wood"; Trubachev adds Gothic *triu*, so English *tree* is a cousin, from PIE **dóru*, "tree, wood".

What you've built

One more word for this chapter.

Your turn

- *Say it: dérevo*
- *Say it: dérevo*, once more
- *Say it:* say *dérevo*
- *Recall:* say the Russian for a ticket, then the Russian for a map, then say *dérevo* again

Before you move on

What does дерево mean? ("A tree".) Say it once more.

55.2 цветок (tsvetók) — a flower

Before the new one: say the Russian for a map, then the Russian for a tree.

You'll want to know: цветок

цветок (*tsvetók*) — "a flower".

The word, taken apart — and its English cousins

цветок is цвет, "bloom; colour", with the diminutive -ок. цвет ← Proto-Slavic **květŭ*, "blossom", which Vasmer relates to Latvian *kvitêt*, "to shimmer".

What you've built

One more word for this chapter.

Your turn

- *Say it: tsvetók*
- *Say it: tsvetók*, once more
- *Say it:* say *tsvetók*
- *Recall:* say the Russian for a map, then the Russian for a tree, then say *tsvetók* again

Before you move on

What does цветок mean? ("A flower".) Say it once more.

55.3 лист (list) — a leaf; a sheet of paper

Before the new one: say the Russian for a tree, then the Russian for a flower.

You'll want to know: лист

лист (*list*) — "a leaf; a sheet of paper".

The word, taken apart — and its English cousins

лист ← Proto-Slavic **listŭ* — inherited, related to Lithuanian *laĩškas*, "leaf", and Latvian *laiska*, "a leaf of flax" (Vasmer). Paper took the same word, as in English *a leaf of a book*.

What you've built

One more word for this chapter.

Your turn

- *Say it: list*
- *Say it: list*, once more
- *Say it:* say *list*
- *Recall:* say the Russian for a tree, then the Russian for a flower, then say *list* again

Before you move on

What does лист mean? ("A leaf; a sheet of paper".) Say it once more.

55.4 трава (travá) — grass

Before the new one: say the Russian for a flower, then the Russian for a leaf; a sheet of paper.

You'll want to know: трава

трава (*travá*) — "grass".

The word, taken apart — and its English cousins

трава ← Proto-Slavic **trava* — inherited, from the root of Old Russian трути, "to use up, to consume" (Vasmer): grass as the fodder that is eaten. The same root is in травить, "to poison".

What you've built

One more word for this chapter.

Your turn

- *Say it: travá*
- *Say it: travá*, once more
- *Say it:* say *travá*
- *Recall:* say the Russian for a flower, then the Russian for a leaf; a sheet of paper, then say *travá* again

Before you move on

What does трава mean? ("Grass".) Say it once more.

55.5 деревня (derévnya) — a village

Before the new one: say the Russian for a leaf; a sheet of paper, then the Russian for grass.

You'll want to know: деревня

деревня (*derévnya*) — "a village".

The word, taken apart — and its English cousins

деревня first meant “a ploughed field”, then “a farmstead with its land”, then “a village” (Vasmer). It goes back to **dĭrvĭnja*, and Vasmer reports the usual link with Lithuanian *dirvà*, “a field”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: derévnya*
- *Say it: derévnya*, once more
- *Say it:* say *derévnya*
- *Recall:* say the Russian for a leaf; a sheet of paper, then the Russian for grass, then say *derévnya* again

Before you move on

What does деревня mean? (“A village”.) Say it once more.

Chapter 56

Mountain, Forest, River, Lake, Sea

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a mountain, a forest, a river, a lake and the sea.
>
> *Complete the last lesson of chapter 56: I can name a mountain, a forest, a river, a lake and the sea.*

56.1 гора (gorá) — a mountain

Before the new one: say the Russian for grass, then the Russian for a village.

You'll want to know: гора

гора (*gorá*) — "a mountain".

The word, taken apart — and its English cousins

гора ← Proto-Slavic **gora* — inherited, related to Sanskrit *girí-*, "mountain", Avestan *gairi-* and Lithuanian *girià*, "forest" (Vasmer). Bulgarian гора still means "forest".

What you've built

One more word for this chapter.

Your turn

- *Say it: gorá*
- *Say it: gorá*, once more
- *Say it:* say *gorá*
- *Recall:* say the Russian for grass, then the Russian for a village, then say *gorá* again

Before you move on

What does гора mean? ("A mountain".) Say it once more.

56.2 лес (les) — a forest

Before the new one: say the Russian for a village, then the Russian for a mountain.

You'll want to know: лес

лес (*les*) — "a forest".

The word, taken apart — and its English cousins

лес ← Proto-Slavic **lěsŭ* — inherited. Its deeper origin is not certain: Vasmer relates it to Old English *læs*, "pasture", and English dialect *leasow*, and finds a link with Lithuanian *laĩškas*, "leaf", doubtful, while Trubachev, in a note, thinks it the most likely.

What you've built

One more word for this chapter.

Your turn

- *Say it: les*
- *Say it: les*, once more
- *Say it:* say *les*

- *Recall:* say the Russian for a village, then the Russian for a mountain, then say *les* again

Before you move on

What does лес mean? ("A forest".) Say it once more.

56.3 река (reká) — a river

Before the new one: say the Russian for a mountain, then the Russian for a forest.

You'll want to know: река

река (*reká*) — "a river".

The word, taken apart — and its English cousins

река ← Proto-Slavic **rěka* — inherited, from a root "to flow". Vasmer lists Sanskrit *rīyate*, "begins to flow", Latin *rīvus*, "a stream", and Gaulish *Rēnos*, the Rhine.

What you've built

One more word for this chapter.

Your turn

- *Say it: reká*
- *Say it: reká*, once more
- *Say it:* say *reká*
- *Recall:* say the Russian for a mountain, then the Russian for a forest, then say *reká* again

Before you move on

What does река mean? ("A river".) Say it once more.

56.4 озеро (ózero) — a lake

Before the new one: say the Russian for a forest, then the Russian for a river.

You'll want to know: озеро

озеро (*ózero*) — "a lake".

The word, taken apart — and its English cousins

озеро ← Proto-Slavic **ezero* — inherited, a cousin of Lithuanian *ẽžeras* and Latvian *ezers*, "lake" (Vasmer). East Slavic turned the first *je-* into о-: compare Old Church Slavonic *jezero*.

What you've built

One more word for this chapter.

Your turn

- *Say it: ózero*
- *Say it: ózero*, once more
- *Say it:* say *ózero*
- *Recall:* say the Russian for a forest, then the Russian for a river, then say *ózero* again

Before you move on

What does озеро mean? ("A lake".) Say it once more.

56.5 море (móre) — the sea

Before the new one: say the Russian for a river, then the Russian for a lake.

You'll want to know: море

море (*móre*) — "the sea".

The word, taken apart — and its English cousins

мope ← Proto-Slavic **morje* — inherited. Vasmer lists Lithuanian *mãrios*, "lagoon", Gothic *marei*, Old Irish *muir* and Latin *mare*, all "sea": English *mere*, "a lake", is a cousin. He gives "marsh" as a possible older sense.

What you've built

One more word for this chapter.

Your turn

- *Say it: móre*
- *Say it: móre*, once more
- *Say it:* say *móre*
- *Recall:* say the Russian for a river, then the Russian for a lake, then say *móre* again

Before you move on

What does мope mean? ("The sea".) Say it once more.

Chapter 57

Stone, Sand, Shore, Island, Field

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a stone, sand, a shore, an island and a field.
>
> *Complete the last lesson of chapter 57: I can name a stone, sand, a shore, an island and a field.*

57.1 камень (kámen) — a stone

Before the new one: say the Russian for a lake, then the Russian for the sea.

You'll want to know: камень

камень (*kámen*) — "a stone".

The word, taken apart — and its English cousins

камень ← Proto-Slavic **kamy*, with the stem **kamen-* — inherited. Vasmer relates it to Old Norse *hamarr*, "hammer", so English *hammer* is a cousin, beside Lithuanian *akmuõ* and Greek *ákmōn*, "anvil", from a related form.

What you've built

One more word for this chapter.

Your turn

- *Say it: kámen*
- *Say it: kámen*, once more
- *Say it:* say *kámen*
- *Recall:* say the Russian for a lake, then the Russian for the sea, then say *kámen* again

Before you move on

What does камень mean? ("A stone".) Say it once more.

57.2 песок (pesók) — sand

Before the new one: say the Russian for the sea, then the Russian for a stone.

You'll want to know: песок

песок (*pesók*) — "sand".

The word, taken apart — and its English cousins

песок ← Proto-Slavic **pěsŭkŭ* — inherited, a cousin of Sanskrit *pāṃsú-*, "dust, sand", and Avestan *pąsnu-* (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: pesók*
- *Say it: pesók*, once more
- *Say it:* say *pesók*
- *Recall:* say the Russian for the sea, then the Russian for a stone, then say *pesók* again

Before you move on

What does песок mean? ("Sand".) Say it once more.

57.3 берег (béreg) — a shore, a bank

Before the new one: say the Russian for a stone, then the Russian for sand.

You'll want to know: берег

берег (*béreg*) — "a shore, a bank".

The word, taken apart — and its English cousins

берег ← Proto-Slavic **bergŭ*. Vasmer relates it to Old High German *berg*, "mountain", Avestan *barəzah-*, "height", and Sanskrit *bṛhant-*, "high": a bank is the raised edge. Inherited, that root should have given Slavic з, not г, so Berneker and others take the word from Germanic, and Kiparsky from another Indo-European language; Vasmer, judging by its tone and meaning, doubts a loan.

What you've built

One more word for this chapter.

Your turn

- *Say it: béreg*
- *Say it: béreg*, once more
- *Say it:* say *béreg*
- *Recall:* say the Russian for a stone, then the Russian for sand, then say *béreg* again

Before you move on

What does берег mean? ("A shore, a bank".) Say it once more.

57.4 остров (óstrov) — an island

Before the new one: say the Russian for sand, then the Russian for a shore.

You'll want to know: остров

остров (*óstrov*) — "an island".

The word, taken apart — and its English cousins

остров ← Proto-Slavic **ostrovŭ*, "what the current flows around": о-, "around", with the root of струя, "a stream" (Vasmer). The root is in Sanskrit *srávati*, "flows", and Greek *rhóos*, "a current".

What you've built

One more word for this chapter.

Your turn

- *Say it: óstrov*
- *Say it: óstrov*, once more
- *Say it:* say *óstrov*
- *Recall:* say the Russian for sand, then the Russian for a shore, then say *óstrov* again

Before you move on

What does остров mean? ("An island".) Say it once more.

57.5 поле (póle) — a field

Before the new one: say the Russian for a shore, then the Russian for an island.

You'll want to know: поле

поле (*póle*) — "a field".

The word, taken apart — and its English cousins

поле ← Proto-Slavic **polje* — inherited, related to Old Russian *polŭ*, "open, empty" (Vasmer): a field is open land. Vasmer compares Latin *palam*, "openly", and the *-falen* of *Westphalia*.

What you've built

One more word for this chapter.

Your turn

- *Say it: póle*
- *Say it: póle*, once more
- *Say it:* say *póle*
- *Recall:* say the Russian for a shore, then the Russian for an island, then say *póle* again

Before you move on

What does поле mean? ("A field".) Say it once more.

Chapter 58

Sky, Sun, Moon, Star, Cloud

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the sky, the sun, the moon, a star and a cloud.
>
> *Complete the last lesson of chapter 58: I can name the sky, the sun, the moon, a star and a cloud.*

58.1 небо (nébo) — the sky

Before the new one: say the Russian for an island, then the Russian for a field.

You'll want to know: небо

небо (*nébo*) — "the sky".

The word, taken apart — and its English cousins

небо — borrowed from Church Slavonic, says Vasmer; the native East Slavic form is нёбо, now "the palate". Both go back to Proto-Slavic **nebo*, a cousin of Sanskrit *nábhas*, "mist, sky", Greek *néphos*, "cloud", and Latin *nebula*, "mist".

What you've built

One more word for this chapter.

Your turn

- *Say it: nébo*
- *Say it: nébo*, once more
- *Say it:* say *nébo*
- *Recall:* say the Russian for an island, then the Russian for a field, then say *nébo* again

Before you move on

What does небо mean? ("The sky".) Say it once more.

58.2 солнце (sólntse) — the sun

Before the new one: say the Russian for a field, then the Russian for the sky.

You'll want to know: солнце

солнце (*sólntse*) — "the sun". The л is written and not said.

The word, taken apart — and its English cousins

солнце ← Proto-Slavic **sŭlnĭce*, a diminutive of **sŭlnĭ*, "sun", built like сердце, "heart" (Vasmer). Vasmer lists Lithuanian *sáulė*, "sun", and Sanskrit *svar*, "sun, light"; Latin *sōl* and English *sun* go back to the same PIE word.

What you've built

One more word for this chapter.

Your turn

- *Say it: sólntse*
- *Say it: sólntse*, once more
- *Say it:* say *sólntse*

- *Recall:* say the Russian for a field, then the Russian for the sky, then say *sólntse* again

Before you move on

What does солнце mean? ("The sun".) Say it once more.

58.3 луна (luná) — the moon

Before the new one: say the Russian for the sky, then the Russian for the sun.

You'll want to know: луна

луна (*luná*) — "the moon".

The word, taken apart — and its English cousins

луна ← Proto-Slavic **luna*, from **louksnā*, "the bright one" — inherited. Vasmer lists Latin *lūna*, Old Prussian *lauxnos*, "stars", and Greek *lýchnos*, "a lamp", all from a root "to shine", with луч, "a ray".

What you've built

One more word for this chapter.

Your turn

- *Say it: luná*
- *Say it: luná*, once more
- *Say it:* say *luná*
- *Recall:* say the Russian for the sky, then the Russian for the sun, then say *luná* again

Before you move on

What does луна mean? ("The moon".) Say it once more.

58.4 звезда (zvezdá) — a star

Before the new one: say the Russian for the sun, then the Russian for the moon.

You'll want to know: звезда

звезда (*zvezdá*) — "a star".

The word, taken apart — and its English cousins

звезда ← Proto-Slavic **gvězda* — inherited; г before *ě* became з. Vasmer relates it to Lithuanian *žvaigždė*, "star", and Latvian *zvaigzne*, from a root "to shine".

What you've built

One more word for this chapter.

Your turn

- *Say it: zvezdá*
- *Say it: zvezdá*, once more
- *Say it:* say *zvezdá*
- *Recall:* say the Russian for the sun, then the Russian for the moon, then say *zvezdá* again

Before you move on

What does звезда mean? ("A star".) Say it once more.

58.5 облако (óblako) — a cloud

Before the new one: say the Russian for the moon, then the Russian for a star.

You'll want to know: облако

облако (*óblako*) — "a cloud".

The word, taken apart — and its English cousins

облако — borrowed from Church Slavonic, says Vasmer; the native form was Old Russian *oboloků*. Both are **ob-volků*, "what is drawn over", from the root of волочь, "to drag", a cousin of Greek *hélkō*, "I drag".

What you've built

One more word for this chapter.

Your turn

- *Say it: óblako*
- *Say it: óblako*, once more
- *Say it:* say *óblako*
- *Recall:* say the Russian for the moon, then the Russian for a star, then say *óblako* again

Before you move on

What does облако mean? ("A cloud".) Say it once more.

Chapter 59

Rain, Snow, Wind, Weather, World

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name rain, snow, the wind and the weather, and the world.
>
> *Complete the last lesson of chapter 59: I can name rain, snow, the wind and the weather, and the world.*

59.1 дождь (dozhd) — rain

Before the new one: say the Russian for a star, then the Russian for a cloud.

You'll want to know: дождь

дождь (*dozhd*) — "rain".

The word, taken apart — and its English cousins

дождь ← Proto-Slavic **dǔždžĭ* — inherited. Vasmer thinks it probably goes with Norwegian *dusk-regn* and Swedish *regn-dusk*, "drizzle"; he also reports a view that starts from **dus-dius*, "bad weather", so the origin is debated.

What you've built

One more word for this chapter.

Your turn

- *Say it: dozhd*
- *Say it: dozhd*, once more
- *Say it:* say *dozhd*
- *Recall:* say the Russian for a star, then the Russian for a cloud, then say *dozhd* again

Before you move on

What does дождь mean? ("Rain".) Say it once more.

59.2 снег (sneg) — snow

Before the new one: say the Russian for a cloud, then the Russian for rain.

You'll want to know: снег

снег (*sneg*) — "snow".

The word, taken apart — and its English cousins

снег ← Proto-Slavic **sněgŭ* — inherited. Vasmer lists Lithuanian *sniẽgas*, Gothic *snaiws*, Greek *nípha* and Latin *nix*, all "snow": English *snow* is a cousin, from PIE **sneyg^{wh}-*, "to snow".

What you've built

One more word for this chapter.

Your turn

- *Say it: sneg*
- *Say it: sneg*, once more
- *Say it:* say *sneg*
- *Recall:* say the Russian for a cloud, then the Russian for rain, then say *sneg* again

Before you move on

What does снег mean? ("Snow".) Say it once more.

59.3 ветер (véter) — the wind

Before the new one: say the Russian for rain, then the Russian for snow.

You'll want to know: ветер

ветер (*véter*) — "the wind".

The word, taken apart — and its English cousins

ветер ← Proto-Slavic **vĕtrŭ* — inherited, from the root of веять, "to blow" (Vasmer). Vasmer lists Lithuanian *vėjas*, "wind", and Sanskrit *vāta-*, "wind"; English *wind* is probably a cousin, from the same PIE root **$h_2$weh$_1$-*, "to blow".

What you've built

One more word for this chapter.

Your turn

- *Say it: véter*
- *Say it: véter*, once more
- *Say it:* say *véter*
- *Recall:* say the Russian for rain, then the Russian for snow, then say *véter* again

Before you move on

What does ветер mean? ("The wind".) Say it once more.

59.4 погода (pogóda) — the weather

Before the new one: say the Russian for snow, then the Russian for the wind.

You'll want to know: погода

погода (*pogóda*) — "the weather".

The word, taken apart — and its English cousins

погода is по- with год, which in Old Russian meant "time, a fitting moment" (Vasmer); the same root is in годиться, "to be fit". Weather was first "fair, fitting time", as in непогода, "bad weather".

What you've built

One more word for this chapter.

Your turn

- *Say it: pogóda*
- *Say it: pogóda*, once more
- *Say it:* say *pogóda*
- *Recall:* say the Russian for snow, then the Russian for the wind, then say *pogóda* again

Before you move on

What does погода mean? ("The weather".) Say it once more.

59.5 мир (mir) — the world; peace

Before the new one: say the Russian for the wind, then the Russian for the weather.

You'll want to know: мир

мир (*mir*) — "the world; peace". Both meanings in one word.

The word, taken apart — and its English cousins

мир ← Proto-Slavic **mirŭ*, "peace" — inherited, related to Old Lithuanian *mieras*, "peace", and Latvian *miêrs* (Vasmer). The sense "village community" grew from "peaceful community", and from it "the world".

What you've built

One more word for this chapter.

Your turn

- *Say it: mir*
- *Say it: mir*, once more
- *Say it:* say *mir*
- *Recall:* say the Russian for the wind, then the Russian for the weather, then say *mir* again

Before you move on

What does мир mean? ("The world; peace".) Say it once more.

> *Complete the last lesson of chapter 60: I can name a dog, a cat, a horse, a cow and a pig.*

60.1 собака (sobáka) — a dog

Before the new one: say the Russian for the weather, then the Russian for the world; peace.

You'll want to know: собака

собака (*sobáka*) — "a dog".

The word, taken apart — and its English cousins

собака — origin disputed. Vasmer takes it from a Middle Iranian **sabāka-*, compare Median *spaka*, "dog", which Herodotus records, a cousin of Greek *kýōn*, "dog". Trubachev, in a note, finds an Iranian source unlikely and prefers Turkic *köbäk*, "dog".

What you've built

One more word for this chapter.

Your turn

- *Say it: sobáka*
- *Say it: sobáka*, once more
- *Say it:* say *sobáka*
- *Recall:* say the Russian for the weather, then the Russian for the world; peace, then say *sobáka* again

Before you move on

What does собака mean? ("A dog".) Say it once more.

60.2 кошка (kóshka) — a cat

Before the new one: say the Russian for the world; peace, then the Russian for a dog.

You'll want to know: кошка

кошка (*kóshka*) — "a cat".

The word, taken apart — and its English cousins

кошка — probably a fond form built on кот, "a tomcat", as the pet name Маша is built on Мария, "Mary" (Vasmer). Old Russian had *kotŭka*.

What you've built

One more word for this chapter.

Your turn

- *Say it: kóshka*
- *Say it: kóshka*, once more
- *Say it:* say *kóshka*
- *Recall:* say the Russian for the world; peace, then the Russian for a dog, then say *kóshka* again

Before you move on

What does кошка mean? ("A cat".) Say it once more.

60.3 лошадь (lóshad) — a horse

Before the new one: say the Russian for a dog, then the Russian for a cat.

You'll want to know: лошадь

лошадь (*lóshad*) — "a horse".

The word, taken apart — and its English cousins

лошадь — an old loan from Turkic, says Vasmer: compare Chuvash *laša*, "horse", and Turkish and Tatar *alaša*, "a horse, a gelding". It grew from лоша, with a suffix; the native word is конь, "a steed".

What you've built

One more word for this chapter.

Your turn

- *Say it: lóshad*
- *Say it: lóshad*, once more
- *Say it:* say *lóshad*
- *Recall:* say the Russian for a dog, then the Russian for a cat, then say *lóshad* again

Before you move on

What does лошадь mean? ("A horse".) Say it once more.

60.4 корова (koróva) — a cow

Before the new one: say the Russian for a cat, then the Russian for a horse.

You'll want to know: корова

корова (*koróva*) — "a cow". It gives молоко.

The word, taken apart — and its English cousins

корова ← Proto-Slavic **korva* — inherited, a cousin of Lithuanian *kárvė*, "cow", and, Vasmer says, of Greek *keraós*, "horned", and Latin *cervus*, "deer": the horned one. Church Slavonic has крава, "cow".

What you've built

One more word for this chapter.

Your turn

- *Say it: koróva*
- *Say it: koróva*, once more
- *Say it:* say *koróva*
- *Recall:* say the Russian for a cat, then the Russian for a horse, then say *koróva* again

Before you move on

What does корова mean? ("A cow".) Say it once more.

60.5 свинья (svinyá) — a pig

Before the new one: say the Russian for a horse, then the Russian for a cow.

You'll want to know: свинья

свинья (*svinyá*) — "a pig".

The word, taken apart — and its English cousins

свинья ← Proto-Slavic **svinĭja* — inherited, built on the PIE word **suH-*, "pig", that gave Latin *sūs* and English *sow*; English *swine* is a close cousin of the Slavic form. Vasmer thinks the root most likely

imitates a pig's grunt *su-*.

What you've built

One more word for this chapter.

Your turn

- *Say it: svinyá*
- *Say it: svinyá*, once more
- *Say it:* say *svinyá*
- *Recall:* say the Russian for a horse, then the Russian for a cow, then say *svinyá* again

Before you move on

What does свинья mean? ("A pig".) Say it once more.

Chapter 61

Bird, Mouse, Wolf, Bear, Fox

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a bird, a mouse, a wolf, a bear and a fox.
>
> *Complete the last lesson of chapter 61: I can name a bird, a mouse, a wolf, a bear and a fox.*

61.1 птица (ptítsa) — a bird

Before the new one: say the Russian for a cow, then the Russian for a pig.

You'll want to know: птица

птица (*ptítsa*) — "a bird".

The word, taken apart — and its English cousins

птица ← Proto-Slavic **pŭtica*, from **pŭta*, "bird" — inherited. Vasmer lists Latvian *putns*, "bird", Lithuanian *putýtis*, "little bird", and words for "child, young one": Latin *putus*, "boy", and Sanskrit *putrá-*, "son".

What you've built

One more word for this chapter.

Your turn

- *Say it: ptítsa*
- *Say it: ptítsa*, once more
- *Say it:* say *ptítsa*
- *Recall:* say the Russian for a cow, then the Russian for a pig, then say *ptítsa* again

Before you move on

What does птица mean? ("A bird".) Say it once more.

61.2 мышь (mysh) — a mouse

Before the new one: say the Russian for a pig, then the Russian for a bird.

You'll want to know: мышь

мышь (*mysh*) — "a mouse".

The word, taken apart — and its English cousins

мышь ← Proto-Slavic **myšĭ* — inherited from PIE **muHs*, "mouse". Vasmer lists Sanskrit *mūṣ-*, Greek *mŷs*, Latin *mūs* and Old High German *mûs*: English *mouse* is a cousin. Trubachev adds that it may first have meant "the grey one".

What you've built

One more word for this chapter.

Your turn

- *Say it: mysh*
- *Say it: mysh*, once more
- *Say it:* say *mysh*

- *Recall:* say the Russian for a pig, then the Russian for a bird, then say *mysh* again

Before you move on

What does мышь mean? ("A mouse".) Say it once more.

61.3 волк (volk) — a wolf

Before the new one: say the Russian for a bird, then the Russian for a mouse.

You'll want to know: волк

волк (*volk*) — "a wolf".

The word, taken apart — and its English cousins

волк ← Proto-Slavic **vĭlkŭ* — inherited from PIE **wḷk^{w}os*, "wolf". Vasmer lists Lithuanian *vilkas*, Sanskrit *vṛkas*, Gothic *wulfs* and Greek *lýkos*: English *wolf* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: volk*
- *Say it: volk*, once more
- *Say it:* say *volk*
- *Recall:* say the Russian for a bird, then the Russian for a mouse, then say *volk* again

Before you move on

What does волк mean? ("A wolf".) Say it once more.

61.4 медведь (medvéd) — a bear

Before the new one: say the Russian for a mouse, then the Russian for a wolf.

You'll want to know: медведь

медведь (*medvéd*) — "a bear". Literally "honey-knower": the one who knows where the мёд is.

The word, taken apart — and its English cousins

медведь ← Proto-Slavic **medvědĭ*, "honey-eater", from мёд, "honey", and the root of есть, "to eat" (Vasmer). It is a taboo name: hunters avoided the old word for "bear", the one kept in Latin *ursus* and Greek *árktos*.

What you've built

One more word for this chapter.

Your turn

- *Say it: medvéd*
- *Say it: medvéd*, once more
- *Say it:* say *medvéd*
- *Recall:* say the Russian for a mouse, then the Russian for a wolf, then say *medvéd* again

Before you move on

What does медведь mean? ("A bear".) Say it once more.

61.5 лиса (lisá) — a fox

Before the new one: say the Russian for a wolf, then the Russian for a bear.

You'll want to know: лиса

лиса (*lisá*) — "a fox".

The word, taken apart — and its English cousins

лиса goes with лис, "a fox", Old Church Slavonic лиса. Vasmer calls the origin unclear: tracing it to the family of Latin *vulpēs* and Lithuanian *lãpė*, "fox", is guesswork, he says, and other links are doubtful.

What you've built

One more word for this chapter.

Your turn

- *Say it: lisá*
- *Say it: lisá*, once more
- *Say it:* say *lisá*
- *Recall:* say the Russian for a wolf, then the Russian for a bear, then say *lisá* again

Before you move on

What does лиса mean? ("A fox".) Say it once more.

Chapter 62

Hare, Snake, Hen, Duck, Goat

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a hare, a snake, a hen, a duck and a goat.
>
> *Complete the last lesson of chapter 62: I can name a hare, a snake, a hen, a duck and a goat.*

62.1 заяц (záyats) — a hare

Before the new one: say the Russian for a bear, then the Russian for a fox.

You'll want to know: заяц

заяц (*záyats*) — "a hare".

The word, taken apart — and its English cousins

заяц ← Proto-Slavic **zajęcĭ* — inherited. With a first sense "leaper", it has been compared with Sanskrit *háyas*, "horse", and *jíhīte*, "leaps up", and Lithuanian *žaĩsti*, "to frolic", but Vasmer cites doubts.

What you've built

One more word for this chapter.

Your turn

- *Say it: záyats*
- *Say it: záyats*, once more
- *Say it:* say *záyats*
- *Recall:* say the Russian for a bear, then the Russian for a fox, then say *záyats* again

Before you move on

What does заяц mean? ("A hare".) Say it once more.

62.2 змея (zmeyá) — a snake

Before the new one: say the Russian for a fox, then the Russian for a hare.

You'll want to know: змея

змея (*zmeyá*) — "a snake".

The word, taken apart — and its English cousins

змея — a taboo name, "the earthly one, the one that crawls on the ground", from the root of земля, "earth" (Vasmer). Albanian makes "caterpillar" from its word for "earth" in the same way.

What you've built

One more word for this chapter.

Your turn

- *Say it: zmeyá*
- *Say it: zmeyá*, once more
- *Say it:* say *zmeyá*
- *Recall:* say the Russian for a fox, then the Russian for a hare, then say *zmeyá* again

Before you move on

What does змея mean? ("A snake".) Say it once more.

62.3 курица (kúritsa) — a hen

Before the new one: say the Russian for a hare, then the Russian for a snake.

You'll want to know: курица

курица (*kúritsa*) — "a hen". It lays the яйцо.

The word, taken apart — and its English cousins

курица is built on кура, "a hen", and the old кур, "a cock". Vasmer relates кур to Latvian *kaurêt*, "to roar", and Sanskrit *kāuti*, "cries out": the cock as the crier.

What you've built

One more word for this chapter.

Your turn

- *Say it: kúritsa*
- *Say it: kúritsa*, once more
- *Say it:* say *kúritsa*
- *Recall:* say the Russian for a hare, then the Russian for a snake, then say *kúritsa* again

Before you move on

What does курица mean? ("A hen".) Say it once more.

62.4 утка (útka) — a duck

Before the new one: say the Russian for a snake, then the Russian for a hen.

You'll want to know: утка

утка (*útka*) — "a duck".

The word, taken apart — and its English cousins

утка is old утица, from Proto-Slavic **ǫty*, "duck" — inherited. Vasmer lists Lithuanian *ántis*, Latin *anas*, Old High German *anut* and Greek *nêssa*, all "duck". The утка that means a false news story copies French *canard*, Vasmer notes.

What you've built

One more word for this chapter.

Your turn

- *Say it: útka*
- *Say it: útka*, once more
- *Say it:* say *útka*
- *Recall:* say the Russian for a snake, then the Russian for a hen, then say *útka* again

Before you move on

What does утка mean? ("A duck".) Say it once more.

62.5 коза (kozá) — a goat

Before the new one: say the Russian for a hen, then the Russian for a duck.

You'll want to know: коза

коза (*kozá*) — "a goat".

The word, taken apart — and its English cousins

коза ← Proto-Slavic **koza* — inherited. Vasmer relates it to Albanian *kedh*, "kid", and Old English *hæcen*, "kid", and to Gothic *hakuls*, "a

cloak", since goatskin made cloaks.

What you've built

One more word for this chapter.

Your turn

- *Say it: kozá*
- *Say it: kozá*, once more
- *Say it:* say *kozá*
- *Recall:* say the Russian for a hen, then the Russian for a duck, then say *kozá* again

Before you move on

What does коза mean? ("A goat".) Say it once more.

Chapter 63

White, Black, Red, Blue, Green

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say white, black, red, blue and green.
>
> *Complete the last lesson of chapter 63: I can say white, black, red, blue and green.*

63.1 белый (bélyy) — white

Before the new one: say the Russian for a duck, then the Russian for a goat.

You'll want to know: белый

белый (*bélyy*) — "white".

The word, taken apart — and its English cousins

белый ← Proto-Slavic **bělŭ* — inherited. Vasmer relates it to Lithuanian *bãlas*, "white", Latvian *bãls*, "pale", Greek *phalós*, "white", and Sanskrit *bhāti*, "shines", from PIE **b^{h}el-*, "to shine".

What you've built

One more word for this chapter.

Your turn

- *Say it: bélyy*
- *Say it: bélyy*, once more
- *Say it:* say *bélyy*
- *Recall:* say the Russian for a duck, then the Russian for a goat, then say *bélyy* again

Before you move on

What does белый mean? ("White".) Say it once more.

63.2 чёрный (chyórnyy) — black

Before the new one: say the Russian for a goat, then the Russian for white.

You'll want to know: чёрный

чёрный (*chyórnyy*) — "black".

The word, taken apart — and its English cousins

чёрный ← Proto-Slavic **čĭrnŭ*, from **čĭrxnŭ* — inherited. Vasmer relates it to Old Prussian *kirsnan*, "black", and Sanskrit *kṛṣṇá-*, "black", the name of Krishna.

What you've built

One more word for this chapter.

Your turn

- *Say it: chyórnyy*
- *Say it: chyórnyy*, once more
- *Say it:* say *chyórnyy*
- *Recall:* say the Russian for a goat, then the Russian for white, then say *chyórnyy* again

Before you move on

What does чёрный mean? ("Black".) Say it once more.

63.3 красный (krásnyy) — red

Before the new one: say the Russian for white, then the Russian for black.

You'll want to know: красный

красный (*krásnyy*) — "red".

The word, taken apart — and its English cousins

красный is built on краса, "beauty", and first meant "beautiful", as in прекрасный, "lovely"; the name of Moscow's Red Square first meant "the beautiful square". Vasmer thinks краса is probably related to Old Norse *hrósa*, "to boast".

What you've built

One more word for this chapter.

Your turn

- *Say it: krásnyy*
- *Say it: krásnyy*, once more
- *Say it:* say *krásnyy*
- *Recall:* say the Russian for white, then the Russian for black, then say *krásnyy* again

Before you move on

What does красный mean? ("Red".) Say it once more.

63.4 синий (síniy) — blue (dark blue)

Before the new one: say the Russian for black, then the Russian for red.

You'll want to know: синий

синий (*síniy*) — "blue (dark blue)".

The word, taken apart — and its English cousins

синий ← Proto-Slavic **siní* — inherited. Vasmer relates it to сиять, "to shine", or to сивый, "grey", and to Sanskrit *śyāmá-*, "dark", and Lithuanian *šývas*, "light-coloured".

What you've built

One more word for this chapter.

Your turn

- *Say it: síniy*
- *Say it: síniy*, once more
- *Say it:* say *síniy*
- *Recall:* say the Russian for black, then the Russian for red, then say *síniy* again

Before you move on

What does синий mean? ("Blue (dark blue)".) Say it once more.

63.5 зелёный (zelyónyy) — green

Before the new one: say the Russian for red, then the Russian for blue.

You'll want to know: зелёный

зелёный (*zelyónyy*) — "green".

The word, taken apart — and its English cousins

зелёный ← Proto-Slavic **zelenŭ* — inherited. Vasmer relates it to Lithuanian *žãlias*, "green", and *žélti*, "to grow over", and further to золото, "gold", and Sanskrit *hári-*, "yellow". German *gelb*, "yellow", comes from the same PIE root, **ǵʰelh₃-*, "to be green, yellow".

What you've built

One more word for this chapter.

Your turn

- *Say it: zelyónyy*
- *Say it: zelyónyy*, once more
- *Say it:* say *zelyónyy*
- *Recall:* say the Russian for red, then the Russian for blue, then say *zelyónyy* again

Before you move on

What does зелёный mean? ("Green".) Say it once more.

Chapter 64

Yellow, Beautiful, Good, Bad, New

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say yellow, beautiful, good, bad and new.
>
> *Complete the last lesson of chapter 64: I can say yellow, beautiful, good, bad and new.*

64.1 жёлтый (zhyóltyy) — yellow

Before the new one: say the Russian for blue, then the Russian for green.

You'll want to know: жёлтый

жёлтый (*zhyóltyy*) — "yellow".

The word, taken apart — and its English cousins

жёлтый ← Proto-Slavic **žĭltŭ* — inherited. Vasmer relates it to Lithuanian *geltas*, "yellow", Greek *cholḗ*, "bile", and Latin *fel*, "bile": bile was named for its colour. желчь, "bile", is its Russian twin.

What you've built

One more word for this chapter.

Your turn

- *Say it: zhyóltyy*
- *Say it: zhyóltyy*, once more
- *Say it:* say *zhyóltyy*
- *Recall:* say the Russian for blue, then the Russian for green, then say *zhyóltyy* again

Before you move on

What does жёлтый mean? ("Yellow".) Say it once more.

64.2 красивый (krasívyy) — beautiful

Before the new one: say the Russian for green, then the Russian for yellow.

You'll want to know: красивый

красивый (*krasívyy*) — "beautiful".

The word, taken apart — and its English cousins

красивый is краса, "beauty", with -ивый, "full of" (Vasmer); красный, "red", once "beautiful", comes from the same word.

What you've built

One more word for this chapter.

Your turn

- *Say it: krasívyy*
- *Say it: krasívyy*, once more
- *Say it:* say *krasívyy*
- *Recall:* say the Russian for green, then the Russian for yellow, then say *krasívyy* again

Before you move on

What does красивый mean? ("Beautiful".) Say it once more.

64.3 хороший (khoróshiy) — good

Before the new one: say the Russian for yellow, then the Russian for beautiful.

You'll want to know: хороший

хороший (*khoróshiy*) — "good".

The word, taken apart — and its English cousins

хороший — recorded from the 1200s. Vasmer thinks it most likely a short form of хоробрый, "brave"; a link with хоронить, "to guard", he finds less likely, one with the sun god Khors he rejects, and a loan from Ossetian *xorz*, "good", which Abaev later supported, he doubts.

What you've built

One more word for this chapter.

Your turn

- *Say it: khoróshiy*
- *Say it: khoróshiy*, once more
- *Say it:* say *khoróshiy*
- *Recall:* say the Russian for yellow, then the Russian for beautiful, then say *khoróshiy* again

Before you move on

What does хороший mean? ("Good".) Say it once more.

64.4 плохой (plokhóy) — bad

Before the new one: say the Russian for beautiful, then the Russian for good.

You'll want to know: плохой

плохой (*plokhóy*) — "bad". The opposite of хороший.

The word, taken apart — and its English cousins

плохой ← Old Russian *ploxŭ*, "bad"; Ukrainian плохий means "meek, quiet", and Polish *płochy*, "timid". Vasmer links it with переполох, "a fright", while others relate it to плоский, "flat", so the origin is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: plokhóy*
- *Say it: plokhóy*, once more
- *Say it:* say *plokhóy*
- *Recall:* say the Russian for beautiful, then the Russian for good, then say *plokhóy* again

Before you move on

What does плохой mean? ("Bad".) Say it once more.

64.5 новый (nóvyy) — new

Before the new one: say the Russian for good, then the Russian for bad.

You'll want to know: новый

новый (*nóvyy*) — "new".

The word, taken apart — and its English cousins

новый ← Proto-Slavic **novŭ* — inherited from PIE **néwos*, "new". Vasmer lists Sanskrit *náva-*, Greek *néos*, Latin *novus* and Gothic *niujis*: English *new* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: nóvyy*
- *Say it: nóvyy*, once more
- *Say it:* say *nóvyy*
- *Recall:* say the Russian for good, then the Russian for bad, then say *nóvyy* again

Before you move on

What does новый mean? ("New".) Say it once more.

Chapter 65

Big, Small, Old, Long, Short

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say big, small, old, long and short.

65.1 большой (bolshóy) — big

Before the new one: say the Russian for bad, then the Russian for new.

You'll want to know: большой

большой (*bolshóy*) — "big".

The word, taken apart — and its English cousins

большой is built on the comparative больший, "greater", Proto-Slavic **bolějĭ* — inherited. Vasmer relates it to Sanskrit *bálīyān*, "stronger", and *bálam*, "strength", and Greek *beltíōn*, "better".

What you've built

One more word for this chapter.

Your turn

- *Say it: bolshóy*
- *Say it: bolshóy*, once more
- *Say it:* say *bolshóy*
- *Recall:* say the Russian for bad, then the Russian for new, then say *bolshóy* again

Before you move on

What does большой mean? ("Big".) Say it once more.

65.2 маленький (málenkiy) — small

Before the new one: say the Russian for new, then the Russian for big.

You'll want to know: маленький

маленький (*málenkiy*) — "small".

The word, taken apart — and its English cousins

маленький is малый, "small", with the fond -енький. малый ← Proto-Slavic **malŭ*, related, Vasmer says, to Gothic *smals*, "small", and Greek *mêlon*, "sheep, small cattle": English *small* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: málenkiy*
- *Say it: málenkiy*, once more
- *Say it:* say *málenkiy*

What does маленький mean? ("Small".) Say it once more.

65.3 старый (stáryy) — old

Before the new one: say the Russian for big, then the Russian for small.

You'll want to know: старый

старый (*stáryy*) — "old". The opposite of новый.

The word, taken apart — and its English cousins

старый ← Proto-Slavic **starŭ* — inherited. Vasmer relates it to Lithuanian *stóras*, "thick, stout", and Old Norse *stórr*, "big, strong": old was first "grown, strong".

What you've built

One more word for this chapter.

Your turn

- *Say it: stáryy*

Before you move on

What does старый mean? ("Old".) Say it once more.

65.4 длинный (dlínnyy) — long

Before the new one: say the Russian for small, then the Russian for old.

You'll want to know: длинный

длинный (*dlínnyy*) — "long".

The word, taken apart — and its English cousins

длинный is длина, "length", with the adjective ending -ный, on the root of долгий, "long (in time)". Vasmer relates долгий to Lithuanian *ìlgas*, Sanskrit *dīrghá-* and Greek *dolichós*, all "long", from PIE *$*dl̥h_1g^h$ós*.

What you've built

One more word for this chapter.

Your turn

- *Say it: dlínnyy*
- *Say it: dlínnyy*, once more
- *Say it:* say *dlínnyy*
- *Recall:* say the Russian for small, then the Russian for old, then say *dlínnyy* again

Before you move on

What does длинный mean? ("Long".) Say it once more.

65.5 короткий (korótkiy) — short

Before the new one: say the Russian for old, then the Russian for long.

You'll want to know: короткий

короткий (*korótkiy*) — "short".

The word, taken apart — and its English cousins

короткий ← Proto-Slavic **kortŭkŭ* — inherited; Church Slavonic has краткий, "brief". Vasmer relates it to Lithuanian *kartùs*, "bitter", and

Sanskrit *kaṭu-*, “sharp”, and perhaps to Latin *curtus*, “cut short”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: korótkiy*

Before the new one: say the Russian for long, then the Russian for short.

You'll want to know: горячий

горячий (*goryáchiy*) — "hot".

The word, taken apart — and its English cousins

горячий is built on гореть, "to burn", which Vasmer relates to Lithuanian *garėti*, "to flare up", Sanskrit *háras*, "heat", and Greek *thérmos*, "warm", from PIE $*g^{wh}er$-, "hot".

What you've built

One more word for this chapter.

Your turn

- *Say it: goryáchiy*
- *Say it: goryáchiy*, once more
- *Say it:* say *goryáchiy*
- *Recall:* say the Russian for long, then the Russian for short, then say *goryáchiy* again

Before you move on

What does горячий mean? ("Hot".) Say it once more.

66.2 холодный (kholódnyy) — cold

Before the new one: say the Russian for short, then the Russian for hot.

You'll want to know: холодный

холодный (*kholódnyy*) — "cold".

The word, taken apart — and its English cousins

холодный is холод, "cold", with -ный. холод ← Proto-Slavic **xoldŭ*; Vasmer thinks it is probably a variant of the root of Gothic *kalds*, "cold", and Latin *gelidus*, "icy", so English *cold* would be a cousin. Church Slavonic has хлад, "coolness".

What you've built

One more word for this chapter.

Your turn

- *Say it: kholódnyy*
- *Say it: kholódnyy*, once more
- *Say it:* say *kholódnyy*

- *Recall:* say the Russian for short, then the Russian for hot, then say *kholódnyy* again

Before you move on

66.3 тёплый (tyóplyy) — warm

Before the new one: say the Russian for hot, then the Russian for cold.

You'll want to know: тёплый

тёплый (*tyóplyy*) — "warm".

The word, taken apart — and its English cousins

тёплый ← Proto-Slavic **teplŭ* — inherited. Vasmer relates it to Sanskrit *tápati*, "heats", and Persian *tāftan*, "to burn"; Latin *tepidus*, "lukewarm", comes from the same PIE root **tep-*, "to be warm".

What you've built

One more word for this chapter.

Your turn

- *Say it: tyóplyy*
- *Say it: tyóplyy*, once more
- *Say it:* say *tyóplyy*
- *Recall:* say the Russian for hot, then the Russian for cold, then say *tyóplyy* again

Before the new one: say the Russian for cold, then the Russian for warm.

You'll want to know: быстрый

быстрый (*býstryy*) — "fast".

The word, taken apart — and its English cousins

быстрый ← Proto-Slavic **bystrŭ* — inherited; Serbo-Croatian бистар means "clear". Vasmer compares Old Norse *bysja*, "to gush out", and Norwegian *buse*, "to rush forward", but other links are proposed.

What you've built

One more word for this chapter.

Your turn

- *Say it: býstryy*
- *Say it: býstryy*, once more
- *Say it:* say *býstryy*
- *Recall:* say the Russian for cold, then the Russian for warm, then say *býstryy* again

Before you move on

What does быстрый mean? ("Fast".) Say it once more.

66.5 медленный (médlennyy) — slow

Before the new one: say the Russian for warm, then the Russian for fast.

You'll want to know: медленный

медленный (*médlennyy*) — "slow". The adjective beside медленно, slowly.

The word, taken apart — and its English cousins

медленный ← Old Russian *mĭdĭlĭnŭ*, Proto-Slavic **mŭdĭlĭnŭ* — inherited, with медлить, "to delay". Vasmer connects it with the Slavic verb **muditi*, "to linger".

What you've built

One more word for this chapter.

Your turn

- *Say it: médlennyy*
- *Say it: médlennyy*, once more
- *Say it:* say *médlennyy*
- *Recall:* say the Russian for warm, then the Russian for fast, then say *médlennyy* again

Before you move on

What does медленный mean? ("Slow".) Say it once more.

67.1 лёгкий (lyókhkiy) — light; easy

Before the new one: say the Russian for fast, then the Russian for slow.

You'll want to know: лёгкий

лёгкий (*lyókhkiy*) — "light; easy".

The word, taken apart — and its English cousins

лёгкий ← Proto-Slavic **lĭgŭkŭ* — inherited. Vasmer relates it to Latin *levis*, "light", Sanskrit *laghú-*, "light, quick", and Greek *elachýs*, "small", from PIE **$h_1$léng^{wh}us*, "light in weight"; English *light* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: lyókhkiy*
- *Say it: lyókhkiy*, once more
- *Say it:* say *lyókhkiy*
- *Recall:* say the Russian for fast, then the Russian for slow, then say *lyókhkiy* again

67.2 трудный (trúdnyy) — hard, difficult

Before the new one: say the Russian for slow, then the Russian for light; easy.

You'll want to know: трудный

трудный (*trúdnyy*) — "hard, difficult".

The word, taken apart — and its English cousins

трудный is труд, "labour, toil", with -ный. труд ← Proto-Slavic **trudŭ*; Vasmer relates it to Lithuanian *triūsas*, "work, bother", and Gothic *usþriutan*, "to trouble".

What you've built

One more word for this chapter.

Your turn

- *Say it: trúdnyy*
- *Say it: trúdnyy*, once more
- *Say it:* say *trúdnyy*

67.3 дорогой (dorogóy) — expensive; dear

Before the new one: say the Russian for light; easy, then the Russian for hard.

You'll want to know: дорогой

дорогой (*dorogóy*) — "expensive; dear".

The word, taken apart — and its English cousins

дорогой ← Proto-Slavic **dorgŭ* — inherited; Church Slavonic has драгой, "dear", as in драгоценный, "precious". Vasmer thinks it is probably related to Latvian *dārgs*, "dear, expensive". "Dear" and "expensive" share the word, as in English.

What you've built

One more word for this chapter.

Your turn

- *Say it: dorogóy*
- *Say it: dorogóy*, once more
- *Say it:* say *dorogóy*
- *Recall:* say the Russian for light; easy, then the Russian for hard, then say *dorogóy* again

Before you move on

What does дорогой mean? ("Expensive; dear".) Say it once more.

67.4 дешёвый (deshyóvyy) — cheap

Before the new one: say the Russian for hard, then the Russian for expensive; dear.

You'll want to know: дешёвый

дешёвый (*deshyóvyy*) — "cheap".

The word, taken apart — and its English cousins

дешёвый ← Old Russian *dešev̆ŭ*; Vasmer thinks it most likely comes from десить, "to find, to come upon": cheap is what is easily come by. He rejects a Turkic source.

What you've built

One more word for this chapter.

Your turn

- *Say it: deshyóvyy*
- *Say it: deshyóvyy*, once more
- *Say it:* say *deshyóvyy*
- *Recall:* say the Russian for hard, then the Russian for expensive; dear, then say *deshyóvyy* again

Before you move on

What does дешёвый mean? ("Cheap".) Say it once more.

67.5 плохо (plókho) — badly

Before the new one: say the Russian for expensive; dear, then the Russian for cheap.

You'll want to know: плохо

плохо (*plókho*) — "badly". The adverb of плохой.

The word, taken apart — and its English cousins

плохо is плохой, “bad”, made into an adverb with -о. плохой is Old Russian *ploxŭ*; its origin is not settled (Vasmer).

What you’ve built

One more word for this chapter.

Your turn

- *Say it: plókho*
- *Say it: plókho*, once more
- *Say it:* say *plókho*
- *Recall:* say the Russian for expensive; dear, then the Russian for cheap, then say *plókho* again

Before you move on

What does плохо mean? (“Badly”.) Say it once more.

68.1 день (den) — a day

Before the new one: say the Russian for cheap, then the Russian for badly.

You'll want to know: день

день (*den*) — "a day".

The word, taken apart — and its English cousins

день ← Proto-Slavic **dĭnĭ* — inherited. Vasmer lists Sanskrit *dínam*, Lithuanian *dienà* and Latin *diēs*, all "day", from the PIE root **dyew-*, "to shine".

What you've built

One more word for this chapter.

Your turn

- *Say it: den*
- *Say it: den*, once more
- *Say it:* say *den*

68.2 неделя (nedélya) — a week

Before the new one: say the Russian for badly, then the Russian for a day.

You'll want to know: неделя

неделя (*nedélya*) — "a week".

The word, taken apart — and its English cousins

неделя is не, "not", with дело, "work": first "the day of no work", Sunday, and then the week that runs from it (Vasmer). Vasmer thinks it most likely copies Latin *fēria*, "holiday".

What you've built

One more word for this chapter.

Your turn

- *Say it: nedélya*
- *Say it: nedélya*, once more
- *Say it:* say *nedélya*

Before the new one: say the Russian for a day, then the Russian for a week.

You'll want to know: месяц

месяц (*mésyats*) — "a month".

The word, taken apart — and its English cousins

месяц ← Proto-Slavic **měsęcĭ*, "moon; month" — inherited. Vasmer lists Sanskrit *mās-*, Greek *mḗn* and Latin *mēnsis*, "month", and Lithuanian *mėnuo*, "moon": English *moon* and *month* are cousins. A month is one round of the moon.

What you've built

One more word for this chapter.

Your turn

- *Say it: mésyats*
- *Say it: mésyats*, once more
- *Say it:* say *mésyats*
- *Recall:* say the Russian for a day, then the Russian for a week, then say *mésyats* again

Before you move on

What does месяц mean? ("A month".) Say it once more.

68.4 год (god) — a year

Before the new one: say the Russian for a week, then the Russian for a month.

You'll want to know: год

год (*god*) — "a year".

The word, taken apart — and its English cousins

год ← Proto-Slavic **godŭ*, "a fitting time, a season" — inherited; Old Russian *godŭ* meant "time, term" (Vasmer). Vasmer relates it to Latvian *gadīgs*, "capable", and Old High German *gigat*, "fitting"; the same root is in годиться, "to be fit".

What you've built

One more word for this chapter.

Your turn

- *Say it: god*
- *Say it: god*, once more
- *Say it:* say *god*
- *Recall:* say the Russian for a week, then the Russian for a month, then say *god* again

Before you move on

68.5 вечер (vécher) — the evening

Before the new one: say the Russian for a month, then the Russian for a year.

You'll want to know: вечер

вечер (*vécher*) — "the evening".

The word, taken apart — and its English cousins

вечер ← Proto-Slavic **večerŭ* — inherited, a cousin of Lithuanian *vãkaras*, "evening" (Vasmer). Vasmer thinks Greek *hespéra* and Latin *vespera*, "evening", probably belong here too, with a changed first sound.

What you've built

One more word for this chapter.

Your turn

- *Say it: vécher*
- *Say it: vécher*, once more
- *Say it:* say *vécher*
- *Recall:* say the Russian for a month, then the Russian for a year, then say *vécher* again

69.1 сегодня (sevódnya) — today

Before the new one: say the Russian for a year, then the Russian for the evening.

You'll want to know: сегодня

сегодня (*sevódnya*) — "today". The г is said as *v*.

The word, taken apart — and its English cousins

сегодня is old сего дьне, "of this day": a form of сей, "this", with день, "day" (Vasmer). The г is said в, as in его.

What you've built

One more word for this chapter.

Your turn

- *Say it: sevódnya*
- *Say it: sevódnya*, once more
- *Say it:* say *sevódnya*

69.4 минута (minúta) — a minute

Before the new one: say the Russian for yesterday, then the Russian for an hour.

You'll want to know: минута

минута (*minúta*) — "a minute".

The word, taken apart — and its English cousins

минута — first минюта, in the 1600s; it came through German *Minute* or French *minute* from Latin *(pars) minūta prīma*, "the first small part" of an hour, as секунда, "a second", is the second (Vasmer).

What you've built

One more word for this chapter.

Your turn

Before you move on

What does минута mean? ("A minute".) Say it once more.

69.5 время (vrémya) — time

Before the new one: say the Russian for an hour, then the Russian for a minute.

You'll want to know: время

время (*vrémya*) — "time".

The word, taken apart — and its English cousins

время — taken from Church Slavonic, says Vasmer, in place of East Slavic веремя: -ре- against -ере- marks it. Vasmer relates it to вертеть, "to turn", and Sanskrit *vártman*, "a wheel track": time as

what turns.

What you've built

One more word for this chapter.

Your turn

- *Say it: vrémya*
- *Say it: vrémya*, once more
- *Say it:* say *vrémya*

- *Say it: dalekó*, once more
- *Say it:* say *dalekó*
- *Recall:* say the Russian for here, then the Russian for there, then say *dalekó* again

Before you move on

What does далеко mean? ("Far".) Say it once more.

72.4 близко (blízko) — near, close by

Before the new one: say the Russian for there, then the Russian for far.

You'll want to know: близко

близко (*blízko*) — "near, close by".

The word, taken apart — and its English cousins

близко is близкий, "close", made into an adverb, from близ, "near", Proto-Slavic **blizŭ*. Vasmer relates it to Latvian *blaîzît*, "to press", and Latin *flīgere*, "to strike", but also cites a Lithuanian alternative, so the deeper origin is open.

What you've built

One more word for this chapter.

Your turn

- *Say it: blízko*
- *Say it: blízko*, once more
- *Say it:* say *blízko*
- *Recall:* say the Russian for there, then the Russian for far, then say *blízko* again

Before you move on

What does близко mean? ("Near, close by".) Say it once more.

72.5 наверху (naverkhú) — up above, upstairs

Before the new one: say the Russian for far, then the Russian for near.

You'll want to know: наверху

наверху (*naverkhú*) — "up above, upstairs".

The word, taken apart — and its English cousins

наверху is на, "on", with верху, a form of верх, "the top": "on top".
верх ← Proto-Slavic **vĭrxŭ*, a cousin of Lithuanian *viršùs*, "top"

(Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: naverkhú*
- *Say it: naverkhú*, once more
- *Say it:* say *naverkhú*
- *Recall:* say the Russian for far, then the Russian for near, then say *naverkhú* again

Before you move on

What does наверху mean? ("Up above, upstairs".) Say it once more.

Chapter 73

Below, Left, Right, A Lot, A Little

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say below, on the left, on the right, a lot and a little.
>
> *Complete the last lesson of chapter 73: I can say below, on the left, on the right, a lot and a little.*

73.1 внизу (vnizú) — below, downstairs

Before the new one: say the Russian for near, then the Russian for up above.

You'll want to know: внизу

внизу (*vnizú*) — "below, downstairs".

The word, taken apart — and its English cousins

внизу is в, "in", with низу, a form of низ, "the bottom". Vasmer explains низ as an extension of the PIE **ni*, "down", in Sanskrit *ni-*, "down", and Old High German *nidar*, "down": English *nether* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: vnizú*
- *Say it: vnizú*, once more
- *Say it:* say *vnizú*
- *Recall:* say the Russian for near, then the Russian for up above, then say *vnizú* again

Before you move on

What does внизу mean? ("Below, downstairs".) Say it once more.

73.2 слева (sléva) — on the left

Before the new one: say the Russian for up above, then the Russian for below.

You'll want to know: слева

слева (*sléva*) — "on the left".

The word, taken apart — and its English cousins

слева is с, "from", with лева, a form of левый, "left": "from the left". левый ← Proto-Slavic **lěvŭ*, related to Latin *laevus* and Greek *laiós*, both "left" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: sléva*
- *Say it: sléva*, once more
- *Say it:* say *sléva*
- *Recall:* say the Russian for up above, then the Russian for below, then say *sléva* again

Before you move on

What does слева mean? ("On the left".) Say it once more.

73.3 справа (správa) — on the right

Before the new one: say the Russian for below, then the Russian for on the left.

You'll want to know: справа

справа (*správa*) — "on the right".

The word, taken apart — and its English cousins

справа is с, "from", with права, a form of правый, "right", first "straight, righteous". Vasmer derives правый, probably, from **prō-vos*, "forward", related to Latin *probus*, "upright, good".

What you've built

One more word for this chapter.

Your turn

- *Say it: správa*
- *Say it: správa*, once more
- *Say it:* say *správa*
- *Recall:* say the Russian for below, then the Russian for on the left, then say *správa* again

Before you move on

What does справа mean? ("On the right".) Say it once more.

73.4 много (mnógo) — a lot, many

Before the new one: say the Russian for on the left, then the Russian for on the right.

You'll want to know: много

много (*mnógo*) — "a lot, many".

The word, taken apart — and its English cousins

много ← Proto-Slavic **mŭnogŭ*, "much, many" — inherited. Vasmer relates it to Gothic *manags*, "many", and Old Irish *menicc*, "frequent", and finds no grounds for a Germanic loan: English *many* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: mnógo*
- *Say it: mnógo*, once more
- *Say it:* say *mnógo*
- *Recall:* say the Russian for on the left, then the Russian for on the right, then say *mnógo* again

Before you move on

What does много mean? ("A lot, many".) Say it once more.

73.5 мало (málo) — a little, few

Before the new one: say the Russian for on the right, then the Russian for a lot.

You'll want to know: мало

мало (*málo*) — "a little, few".

The word, taken apart — and its English cousins

мало is малый, "small", made into an adverb with -о. малый is a cousin, Vasmer says, of Gothic *smals*, "small", and so of English *small*.

What you've built

One more word for this chapter.

Your turn

- *Say it: málo*
- *Say it: málo*, once more
- *Say it:* say *málo*
- *Recall:* say the Russian for on the right, then the Russian for a lot, then say *málo* again

Before you move on

What does мало mean? ("A little, few".) Say it once more.

Chapter 74

Always, Sometimes, Never, Now, Later

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say always, sometimes, never, now and later.
>
> *Complete the last lesson of chapter 74: I can say always, sometimes, never, now and later.*

74.1 всегда (vsegdá) — always

Before the new one: say the Russian for a lot, then the Russian for a little.

You'll want to know: всегда

всегда (*vsegdá*) — "always".

The word, taken apart — and its English cousins

всегда is весь, "all", with -гда, the time ending of когда, "when", and тогда, "then". Lithuanian *visadà*, "always", matches the forms without г in other Slavic languages, such as Czech *vezdy*; Vasmer ties -гда itself to Lithuanian *kadà*, "when".

What you've built

One more word for this chapter.

Your turn

- *Say it: vsegdá*
- *Say it: vsegdá*, once more
- *Say it:* say *vsegdá*
- *Recall:* say the Russian for a lot, then the Russian for a little, then say *vsegdá* again

Before you move on

What does всегда mean? ("Always".) Say it once more.

74.2 иногда (inogdá) — sometimes

Before the new one: say the Russian for a little, then the Russian for always.

You'll want to know: иногда

иногда (*inogdá*) — "sometimes".

The word, taken apart — and its English cousins

иногда is иной, "other", with the time ending -гда of когда, "when" (Vasmer); Old Russian иногда meant "once, at another time".

What you've built

One more word for this chapter.

Your turn

- *Say it: inogdá*
- *Say it: inogdá*, once more
- *Say it:* say *inogdá*
- *Recall:* say the Russian for a little, then the Russian for always, then say *inogdá* again

Before you move on

What does иногда mean? ("Sometimes".) Say it once more.

74.3 никогда (nikogdá) — never

Before the new one: say the Russian for always, then the Russian for sometimes.

You'll want to know: никогда

никогда (*nikogdá*) — "never". Built on когда, when.

The word, taken apart — and its English cousins

никогда is ни, "not even", with когда, "when": "at no time". Its к- is the old question stem of кто, "who". Vasmer sets ни beside Latin *nī* and Gothic *nei*, "not".

What you've built

One more word for this chapter.

Your turn

- *Say it: nikogdá*
- *Say it: nikogdá*, once more
- *Say it:* say *nikogdá*
- *Recall:* say the Russian for always, then the Russian for sometimes, then say *nikogdá* again

Before you move on

What does никогда mean? ("Never".) Say it once more.

74.4 сейчас (seychás) — now, right now

Before the new one: say the Russian for sometimes, then the Russian for never.

You'll want to know: сейчас

сейчас (*seychás*) — "now, right now".

The word, taken apart — and its English cousins

сейчас is сей, an old word for "this", with час, "hour": "this hour". Vasmer traces сей to an Indo-European pointing word kept in Lithuanian *šìs*, "this", and час to Proto-Slavic **časŭ*.

What you've built

One more word for this chapter.

Your turn

- *Say it: seychás*
- *Say it: seychás*, once more
- *Say it:* say *seychás*
- *Recall:* say the Russian for sometimes, then the Russian for never, then say *seychás* again

Before you move on

What does сейчас mean? ("Now, right now".) Say it once more.

74.5 потом (potóm) — later, then

Before the new one: say the Russian for never, then the Russian for now.

You'll want to know: потом

потом (*potóm*) — "later, then".

The word, taken apart — and its English cousins

потом is по, "after", with том, a form of тот, "that": "after that". Vasmer traces тот to Proto-Slavic **tŭ*, kin to Lithuanian *tàs*, "that".

What you've built

One more word for this chapter.

Your turn

- *Say it: potóm*
- *Say it: potóm*, once more
- *Say it:* say *potóm*
- *Recall:* say the Russian for never, then the Russian for now, then say *potóm* again

Before you move on

What does потом mean? ("Later, then".) Say it once more.

Chapter 75

Already, Quickly, Eleven, Twelve, Zero

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say already and quickly, and count eleven, twelve and zero.
>
> *Complete the last lesson of chapter 75: I can say already and quickly, and count eleven, twelve and zero.*

75.1 уже (uzhé) — already

Before the new one: say the Russian for now, then the Russian for later.

You'll want to know: уже

уже (*uzhé*) — "already".

The word, taken apart — and its English cousins

уже — Vasmer finds two old words fused in it: Proto-Slavic **ju*, "already", a cousin of Lithuanian *jaũ* and Gothic *ju*, "already", and a particle **u*; -же adds weight.

What you've built

One more word for this chapter.

Your turn

- *Say it: uzhé*
- *Say it: uzhé*, once more
- *Say it:* say *uzhé*
- *Recall:* say the Russian for now, then the Russian for later, then say *uzhé* again

Before you move on

What does уже mean? ("Already".) Say it once more.

75.2 быстро (býstro) — quickly

Before the new one: say the Russian for later, then the Russian for already.

You'll want to know: быстро

быстро (*býstro*) — "quickly". The adverb of быстрый.

The word, taken apart — and its English cousins

быстро is быстрый, "fast", made into an adverb with -о. быстрый is an old Slavic word whose deeper origin is not settled (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: býstro*
- *Say it: býstro*, once more
- *Say it:* say *býstro*
- *Recall:* say the Russian for later, then the Russian for already, then say *býstro* again

Before you move on

What does быстро mean? ("Quickly".) Say it once more.

75.3 одиннадцать (odínnadtsat) — eleven

Before the new one: say the Russian for already, then the Russian for quickly.

You'll want to know: одиннадцать

одиннадцать (*odínnadtsat*) — "eleven". "One on ten": один + на + десять.

The word, taken apart — and its English cousins

одиннадцать is один на десять, "one on ten", worn down: Old Russian одинадесять, from Proto-Slavic **jedinŭ na desęte* (Trubachev, in Vasmer). All the teens are built this way.

What you've built

One more word for this chapter.

Your turn

- *Say it: odínnadtsat*
- *Say it: odínnadtsat*, once more
- *Say it:* say *odínnadtsat*
- *Recall:* say the Russian for already, then the Russian for quickly, then say *odínnadtsat* again

Before you move on

What does одиннадцать mean? ("Eleven".) Say it once more.

75.4 двенадцать (dvenádtsat) — twelve

Before the new one: say the Russian for quickly, then the Russian for eleven.

You'll want to know: двенадцать

двенадцать (*dvenádtsat*) — "twelve".

The word, taken apart — and its English cousins

двенадцать is две на десять, "two on ten", worn down from Old Russian *dŭvěnadesęte* (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: dvenádtsat*
- *Say it: dvenádtsat*, once more
- *Say it:* say *dvenádtsat*
- *Recall:* say the Russian for quickly, then the Russian for eleven, then say *dvenádtsat* again

Before you move on

What does двенадцать mean? ("Twelve".) Say it once more.

75.5 ноль (nol) — zero

Before the new one: say the Russian for eleven, then the Russian for twelve.

You'll want to know: ноль

ноль (*nol*) — "zero".

The word, taken apart — and its English cousins

ноль, also нуль, probably came through German *Null* from Italian *nulla*, "nothing", from Latin *nūllus*, "none" (Vasmer). The о may reflect the short German *u*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nol*
- *Say it: nol*, once more
- *Say it:* say *nol*
- *Recall:* say the Russian for eleven, then the Russian for twelve, then say *nol* again

Before you move on

What does ноль mean? ("Zero".) Say it once more.

Chapter 76

Forty, Fifty, Ninety, a Thousand, a Country

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can count forty, fifty, ninety and a thousand, and name a country.
>
> *Complete the last lesson of chapter 76: I can count forty, fifty, ninety and a thousand, and name a country.*

76.1 сорок (sórok) — forty

Before the new one: say the Russian for twelve, then the Russian for zero.

You'll want to know: сорок

сорок (*sórok*) — "forty". The odd one out: not built from четыре.

The word, taken apart — and its English cousins

сорок — origin disputed. Old Russian *sorokŭ* was also "a bundle of forty sable pelts". Vasmer finds difficulties with Greek *(te)ssarákonta*, "forty", and probably links it with сорочка, "shirt", after Old Norse *serkr*, "a shirt; a bundle of furs"; Trubachev thinks a Turkic source, like Turkish *kırk*, "forty", possible.

What you've built

One more word for this chapter.

Your turn

- *Say it: sórok*
- *Say it: sórok*, once more
- *Say it:* say *sórok*
- *Recall:* say the Russian for twelve, then the Russian for zero, then say *sórok* again

Before you move on

What does сорок mean? ("Forty".) Say it once more.

76.2 пятьдесят (pyatdesyát) — fifty

Before the new one: say the Russian for zero, then the Russian for forty.

You'll want to know: пятьдесят

пятьдесят (*pyatdesyát*) — "fifty". пять + десять.

The word, taken apart — and its English cousins

пятьдесят is пять, "five", with десят, an old form of десять, "ten": five tens. Both are inherited: Proto-Slavic **pętĭ*, kin to Greek *pénte*, and **desętĭ* (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: pyatdesyát*
- *Say it: pyatdesyát*, once more

- *Say it:* say *pyatdesyát*
- *Recall:* say the Russian for zero, then the Russian for forty, then say *pyatdesyát* again

Before you move on

What does пятьдесят mean? (“Fifty”.) Say it once more.

76.3 девяносто (devyanósto) — ninety

Before the new one: say the Russian for forty, then the Russian for fifty.

You’ll want to know: девяносто

девяносто (*devyanósto*) — “ninety”.

The word, taken apart — and its English cousins

девяносто is found only in East Slavic, from 1398 on; other Slavic languages say “nine tens”. Vasmer thinks it probably continues an old Indo-European “ninth ten”, like Latin *nōnāgintā*, “ninety”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: devyanósto*
- *Say it: devyanósto*, once more
- *Say it:* say *devyanósto*
- *Recall:* say the Russian for forty, then the Russian for fifty, then say *devyanósto* again

Before you move on

What does девяносто mean? (“Ninety”.) Say it once more.

76.4 тысяча (týsyacha) — a thousand

Before the new one: say the Russian for fifty, then the Russian for ninety.

You'll want to know: тысяча

тысяча (*týsyacha*) — "a thousand".

The word, taken apart — and its English cousins

тысяча ← Proto-Slavic **tysęti* — inherited, a cousin of Lithuanian *tūkstantis* and Gothic *þūsundi*, "thousand" (Vasmer): English *thousand* is a cousin. One proposal Vasmer reports reads it as "a swollen hundred".

What you've built

One more word for this chapter.

Your turn

- *Say it: týsyacha*
- *Say it: týsyacha*, once more
- *Say it:* say *týsyacha*
- *Recall:* say the Russian for fifty, then the Russian for ninety, then say *týsyacha* again

Before you move on

What does тысяча mean? ("A thousand".) Say it once more.

76.5 страна (straná) — a country

Before the new one: say the Russian for ninety, then the Russian for a thousand.

You'll want to know: страна

страна (*straná*) — "a country".

The word, taken apart — and its English cousins

страна — taken from Church Slavonic, says Vasmer, in place of native сторона, "side": -ра- against -оро-. A country was first a side, a region.

What you've built

One more word for this chapter.

Your turn

- *Say it: straná*
- *Say it: straná*, once more
- *Say it:* say *straná*
- *Recall:* say the Russian for ninety, then the Russian for a thousand, then say *straná* again

Before you move on

What does страна mean? ("A country".) Say it once more.

Chapter 77

City, Street, Shop, Market, School

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

77.1 город (górod) — a city, a town

Before the new one: say the Russian for a thousand, then the Russian for a country.

You'll want to know: город

город (*górod*) — "a city, a town".

The word, taken apart — and its English cousins

город ← Proto-Slavic **gordŭ*, "an enclosure, a fort" — inherited. Vasmer lists Lithuanian *gardas*, "a fold", Gothic *gards*, "house", and Sanskrit *gṛhá-*, "house": English *yard* is a cousin. Church Slavonic has град, "city", as in Петроград, "Peter's city".

What you've built

One more word for this chapter.

Your turn

- *Say it: górod*
- *Say it: górod*, once more
- *Say it:* say *górod*
- *Recall:* say the Russian for a thousand, then the Russian for a country, then say *górod* again

Before you move on

What does город mean? ("A city, a town".) Say it once more.

77.2 улица (úlitsa) — a street

Before the new one: say the Russian for a country, then the Russian for a city.

You'll want to know: улица

улица (*úlitsa*) — "a street".

The word, taken apart — and its English cousins

улица ← Proto-Slavic **ulica*, built on **ula*, "a hollow, a channel" — inherited. Vasmer relates it to улей, "beehive", and Greek *aulós*, "pipe", *aulōn*, "glen": a street as a passage between houses.

What you've built

One more word for this chapter.

Your turn

- *Say it: úlitsa*
- *Say it: úlitsa*, once more
- *Say it:* say *úlitsa*
- *Recall:* say the Russian for a country, then the Russian for a city, then say *úlitsa* again

Before you move on

What does улица mean? ("A street".) Say it once more.

77.3 магазин (magazín) — a shop

Before the new one: say the Russian for a city, then the Russian for a street.

You'll want to know: магазин

магазин (*magazín*) — "a shop".

The word, taken apart — and its English cousins

магазин — first in Peter the Great's time; it came through German *Magasin* from French *magasin*, "a storehouse" (Vasmer). The French word goes back, through Italian, to Arabic *makhāzin*, "storehouses".

What you've built

One more word for this chapter.

Your turn

- *Say it: magazín*
- *Say it: magazín*, once more
- *Say it:* say *magazín*
- *Recall:* say the Russian for a city, then the Russian for a street, then say *magazín* again

Before you move on

What does магазин mean? ("A shop".) Say it once more.

77.4 рынок (rýnok) — a market

Before the new one: say the Russian for a street, then the Russian for a shop.

You'll want to know: рынок

рынок (*rýnok*) — "a market".

The word, taken apart — and its English cousins

рынок came through Polish *rynek* and Czech *rynk*, "town square", from Middle High German *rinc*, "a ring, a square" (Vasmer): the market sat in the ring of the square. German *Ring* is the same word.

What you've built

One more word for this chapter.

Your turn

- *Say it: rýnok*
- *Say it: rýnok*, once more
- *Say it:* say *rýnok*
- *Recall:* say the Russian for a street, then the Russian for a shop, then say *rýnok* again

Before you move on

What does рынок mean? ("A market".) Say it once more.

77.5 школа (shkóla) — a school

Before the new one: say the Russian for a shop, then the Russian for a market.

You'll want to know: школа

школа (*shkóla*) — "a school". Where the учитель and the ученик meet.

The word, taken apart — and its English cousins

школа — recorded from 1388; it came through Polish *szkoła* from Latin *schola*, from Greek *scholḗ*, "leisure", then "lecture, school" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: shkóla*
- *Say it: shkóla*, once more
- *Say it:* say *shkóla*
- *Recall:* say the Russian for a shop, then the Russian for a market, then say *shkóla* again

Before you move on

What does школа mean? ("A school".) Say it once more.

Chapter 78

Bank, Station, Museum, Theatre, Restaurant

78.1 банк (bank) — a bank

Before the new one: say the Russian for a market, then the Russian for a school.

You'll want to know: банк

банк (*bank*) — "a bank".

The word, taken apart — and its English cousins

банк — recorded from 1707; it came through German *Bank* from Italian *banco*, "a money-changer's table", then "a bank" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: bank*

What does банк mean? ("A bank".) Say it once more.

78.2 вокзал (vokzál) — a railway station

Before the new one: say the Russian for a school, then the Russian for a bank.

You'll want to know: вокзал

вокзал (*vokzál*) — "a railway station". From Vauxhall, in London.

The word, taken apart — and its English cousins

вокзал — first фоксал, in 1777, a pleasure hall; Vasmer takes it from English *Vauxhall*, a London pleasure garden. The station at Pavlovsk had such a hall with concerts, and the name passed to stations. Trubachev's note gives another account of the English name.

What you've built

One more word for this chapter.

Your turn

- *Say it: vokzál*

78.3 музей (muzéy) — a museum

Before the new one: say the Russian for a bank, then the Russian for a railway station.

You'll want to know: музей

музей (*muzéy*) — "a museum".

The word, taken apart — and its English cousins

музей came from Polish *muzeum* or German *Museum*, from Latin *mūsēum*, Greek *mouseîon*, "a place of the Muses, a school with a library" (Vasmer).

What you've built

One more word for this chapter.

Your turn

78.4 театр (teátr) — a theatre

Before the new one: say the Russian for a railway station, then the Russian for a museum.

You'll want to know: театр

театр (*teátr*) — "a theatre".

The word, taken apart — and its English cousins

театр — from Peter the Great's time; it came through French *théâtre* from Latin *theātrum*, Greek *théatron*, "a place for seeing", or straight from the Greek (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: teátr*

79.1 автобус (avtóbus) — a bus

Before the new one: say the Russian for a theatre, then the Russian for a restaurant.

You'll want to know: автобус

автобус (*avtóbus*) — "a bus".

The word, taken apart — and its English cousins

автобус is an international word of the early 1900s: авто-, from Greek *autós*, "self", as in *automobile*, with бус, cut from Latin *omnibus*, "for everyone".

What you've built

One more word for this chapter.

Your turn

- *Say it: avtóbus*
- *Say it: avtóbus*, once more
- *Say it:* say *avtóbus*
- *Recall:* say the Russian for a theatre, then the Russian for a restaurant, then say *avtóbus* again

Before you move on

What does автобус mean? ("A bus".) Say it once more.

79.2 поезд (póyezd) — a train

Before the new one: say the Russian for a restaurant, then the Russian for a bus.

You'll want to know: поезд

поезд (*póyezd*) — "a train".

The word, taken apart — and its English cousins

поезд is по- with езд, from ездить, "to ride, to travel", and езда, "a ride" (Vasmer). It first meant "a journey", then "a procession of carriages", then a train.

What you've built

One more word for this chapter.

Your turn

- *Say it: póyezd*
- *Say it: póyezd*, once more
- *Say it:* say *póyezd*
- *Recall:* say the Russian for a restaurant, then the Russian for a bus, then say *póyezd* again

79.3 самолёт (samolyót) — an aeroplane

Before the new one: say the Russian for a bus, then the Russian for a train.

You'll want to know: самолёт

самолёт (*samolyót*) — "an aeroplane". "Self-flier".

The word, taken apart — and its English cousins

самолёт is сам, "self", with -лёт, "flight", from летать, "to fly": "a self-flier". The fairy-tale flying carpet is the ковёр-самолёт, "carpet-plane".

What you've built

One more word for this chapter.

Your turn

- *Say it: samolyót*
- *Say it: samolyót*, once more

Before you move on

What does машина mean? ("A car".) Say it once more.

79.5 мост (most) — a bridge

Before the new one: say the Russian for an aeroplane, then the Russian for a car.

You'll want to know: мост

мост (*most*) — "a bridge".

The word, taken apart — and its English cousins

мост ← Proto-Slavic **mostŭ*, "bridge; a plank floor" — inherited. Vasmer finds a Germanic source unreliable but compares Old High German *mast*, "a pole", so the deeper origin is open.

What you've built

One more word for this chapter.

Your turn

- *Say it: most*
- *Say it: most*, once more

Before you move on

What does церковь mean? ("A church".) Say it once more.

80.4 парк (park) — a park

Before the new one: say the Russian for a pharmacy, then the Russian for a church.

You'll want to know: парк

парк (*park*) — "a park".

The word, taken apart — and its English cousins

парк came through German *Park* or English *park* from French *parc*, Medieval Latin *parricus*, "an enclosure, a pen" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: park*
- *Say it: park*, once more
- *Say it:* say *park*

Before you move on

What does парк mean? ("A park".) Say it once more.

80.5 такси (taksí) — a taxi

Before the new one: say the Russian for a church, then the Russian for a park.

You'll want to know: такси

такси (*taksí*) — "a taxi".

The word, taken apart — and its English cousins

такси comes from French *taxi*, short for *taximètre*, "a fare meter": *taxe*, "a charge", with *mètre*, "measure".

What you've built

One more word for this chapter.

Your turn

- *Say it: taksí*
- *Say it: taksí*, once more
- *Say it:* say *taksí*
- *Recall:* say the Russian for a church, then the Russian for a park, then say *taksí* again

Chapter 81

The Letter Yo

Modes: 👁 **eyes** (2) ✓ **pen** (1) 🚗 **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can write yo, the letter with two dots, and find it in words I already say.
>
> *Complete the last lesson of chapter 81: I can write yo, the letter with two dots, and find it in words I already say.*

81.1 ё (yo) — the yo inside ребёнок

Before the new one: write я and ю once each, and name them.

Now say ребёнок (*rebyónok*), "a child". You have read it for a long time. This lesson takes one letter out of it and puts it in your hand.

Script you'll notice: ё

ё — *yo.*

It is inside ребёнок (*rebyónok*), "a child", and in мёд, чёрный and тёплый. It is е with **two dots** above it, and the syllable that carries it takes the stress. Many printed texts leave the dots off; this book keeps them, so you can see how the word is said.

Writing: ё

Stroke order after RussianIrina, 'Learning Russian - Alphabet letters, handwriting', lowercase ё demonstration, 02:51–02:56, YouTube, 5 February 2013
This order is attested, not standardised; the source records where it varies.

How ё is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ё yourself — slowly, and larger than it is printed.

> The strip shows **where to start this letter and which way to travel**, in one attested order, and names its source beneath it. Teachers vary, so treat it as a sound way in, not the only one.

Your turn

- *Look:* at ребёнок and point at ё inside it
- *Trace it:* ё three times, saying *yo* as you finish each one
- *Write it:* ю, then ё, from memory
- *Read it:* ребёнок aloud once more

Before you move on

Which letter is this — ё? (**yo**, *yo*.) Which word did it come from? (ребёнок, *rebyónok*, "a child".)

81.2 (one letter) — From the letter to the word — a first pass

Say ребёнок (*rebyónok*), then write the letter it gave you.

Your turn

letter	name	the word it came from
ё	*yo*	ребёнок *rebyónok*

- *Write it:* each letter in the table from memory, then check it
- *Say it:* the word each one came from
- *Read it:* each word in the table aloud, and point at its letter

Before you move on

Which word did each letter come from? (ё from ребёнок.)

81.3 (one letter) — From the word back to the letter — a second pass

Write ё without looking, then say the word it came from.

Your turn

letter	name	the word it came from
ё	*yo*	ребёнок *rebyónok*

- *Say it:* each word in the table, then write the letter it gave you without looking
- *Write it:* each letter once more, slowly, larger than it is printed

Before you move on

Say each word in the table once more, and name the letter you took from it.

Chapter 82

This, This, That, That, Such

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

Before the new one: say the Russian for this, then the Russian for that.

You'll want to know: та

та (*ta*) — "that (feminine)".

The word, taken apart — and its English cousins

та is the feminine of тот, Proto-Slavic **ta*, a cousin of Lithuanian *tà*, "that" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: ta*
- *Say it: ta*, once more
- *Say it:* say *ta*
- *Recall:* say the Russian for this, then the Russian for that, then say *ta* again

Before you move on

What does та mean? ("That (feminine)".) Say it once more.

82.5 такой (takóy) — such, like this

Before the new one: say the Russian for that, then the Russian for that.

You'll want to know: такой

такой (*takóy*) — "such, like this".

The word, taken apart — and its English cousins

такой is так, "so, thus", with an adjective ending, Proto-Slavic **takŭjĭ*; Vasmer compares Lithuanian *tóks*, "such". It is built as какой, "which", is.

What you've built

One more word for this chapter.

Your turn

- *Say it: takóy*
- *Say it: takóy*, once more
- *Say it:* say *takóy*
- *Recall:* say the Russian for that, then the Russian for that, then say *takóy* again

Before you move on

What does такой mean? ("Such, like this".) Say it once more.

83.1 полдень (pólden) — midday

Before the new one: say the Russian for that, then the Russian for such.

You'll want to know: полдень

полдень (*pólden*) — "midday".

The word, taken apart — and its English cousins

полдень is пол-, "half", with день, "day": the middle of the day. Vasmer relates день to Lithuanian *dienà*, "day", and thinks пол- probably kin to Albanian *palë*, "side".

What you've built

One more word for this chapter.

Your turn

- *Say it: pólden*
- *Say it: pólden*, once more
- *Say it:* say *pólden*

83.5 утром (útrom) — in the morning

Before the new one: say the Russian for early, then the Russian for late.

You'll want to know: утром

утром (*útrom*) — "in the morning".

The word, taken apart — and its English cousins

утром is утро, "morning", in the form that says "by, during": "in the morning". утро ← Proto-Slavic **jutro*; Vasmer calls its origin difficult, with links to уже, "already", or to Latin *iugum*, "yoke", as "the time

of yoking".

What you've built

One more word for this chapter.

Your turn

- *Say it: útrom*
- *Say it: útrom*, once more
- *Say it:* say *útrom*
- *Recall:* say the Russian for early, then the Russian for late, then say *útrom* again

Before you move on

What does утром mean? ("In the morning".) Say it once more.

запад is за-, "behind", with пад, from падать, "to fall": first "sunset", like Latin *occidēns*, "the falling (sun)" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: západ*
- *Say it: západ*, once more
- *Say it:* say *západ*
- *Recall:* say the Russian for the south, then the Russian for the east, then say *západ* again

Before you move on

What does запад mean? ("The west".) Say it once more.

91.2 метро (metró) — the underground

Before the new one: say the Russian for the east, then the Russian for the west.

You'll want to know: метро

метро (*metró*) — "the underground".

The word, taken apart — and its English cousins

метро comes from French *métro*, cut short from *métropolitain*, "of the capital" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: metró*
- *Say it: metró*, once more
- *Say it:* say *metró*

You'll want to know: трамвай

трамвай (*tramváy*) — "a tram".

The word, taken apart — and its English cousins

трамвай came through French *tramway* or straight from English *tramway*: *tram*, "a beam, a rail", with *way* (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: tramváy*
- *Say it: tramváy*, once more
- *Say it:* say *tramváy*
- *Recall:* say the Russian for the west, then the Russian for the underground, then say *tramváy* again

Before you move on

What does трамвай mean? ("A tram".) Say it once more.

91.4 корабль (korábl') — a ship

Before the new one: say the Russian for the underground, then the Russian for a tram.

You'll want to know: корабль

корабль (*korábl'*) — "a ship".

The word, taken apart — and its English cousins

корабль — an old loan from Greek *karábion*, *kárabos*, "a boat", first "a crab"; Vasmer dates it early because it has б, not в. Spanish *carabela*, "caravel", has the same source.

What you've built

One more word for this chapter.

Your turn

- *Say it: korábl'*
- *Say it: korábl'*, once more
- *Say it:* say *korábl'*
- *Recall:* say the Russian for the underground, then the Russian for a tram, then say *korábl'* again

Before you move on

What does корабль mean? ("A ship".) Say it once more.

91.5 лодка (lódka) — a boat

Before the new one: say the Russian for a tram, then the Russian for a ship.

You'll want to know: лодка

лодка (*lódka*) — "a boat".

The word, taken apart — and its English cousins

лодка is old *lodŭka*, a diminutive of лодья, now ладья, "a boat", from Proto-Slavic **oldĭji* — inherited. Vasmer relates it to Lithuanian *aldijà*, "canoe", and Swedish *ålla*, "a trough".

What you've built

One more word for this chapter.

Your turn

- *Say it: lódka*
- *Say it: lódka*, once more
- *Say it:* say *lódka*
- *Recall:* say the Russian for a tram, then the Russian for a ship, then say *lódka* again

Before you move on

What does лодка mean? ("A boat".) Say it once more.

Chapter 92

Bicycle, Suitcase, Journey, Holidays, Rug

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a bicycle, a suitcase, a journey, holidays and a rug.

92.1 велосипед (velosipéd) — a bicycle

Before the new one: say the Russian for a ship, then the Russian for a boat.

You'll want to know: велосипед

велосипед (*velosipéd*) — "a bicycle".

The word, taken apart — and its English cousins

велосипед comes from French *vélocipède*, from Latin *vēlōx*, "swift", and *pēs*, *pedis*, "foot" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: velosipéd*
- *Say it: velosipéd*, once more
- *Say it:* say *velosipéd*
- *Recall:* say the Russian for a ship, then the Russian for a boat, then say *velosipéd* again

Before you move on

What does велосипед mean? ("A bicycle".) Say it once more.

92.2 чемодан (chemodán) — a suitcase

Before the new one: say the Russian for a boat, then the Russian for a bicycle.

You'll want to know: чемодан

чемодан (*chemodán*) — "a suitcase".

The word, taken apart — and its English cousins

чемодан came through Tatar *čamadan* from Persian *jāma-dān*, "a place for clothes": *jāma*, "garment", with *dān*, "holder" (Vasmer). An English traveller noted it in 1618.

What you've built

One more word for this chapter.

Your turn

- *Say it: chemodán*
- *Say it: chemodán*, once more
- *Say it:* say *chemodán*
- *Recall:* say the Russian for a boat, then the Russian for a bicycle, then say *chemodán* again

Before you move on

What does чемодан mean? ("A suitcase".) Say it once more.

92.3 путешествие (puteshéstviye) — a journey

Before the new one: say the Russian for a bicycle, then the Russian for a suitcase.

You'll want to know: путешествие

путешествие (*puteshéstviye*) — "a journey".

The word, taken apart — and its English cousins

путешествие is путь, "way, road", with шествие, "a procession", from шествовать, "to march". путь ← Proto-Slavic **pǫtĭ*, a cousin of Sanskrit *pánthās*, "path", and Latin *pōns*, "bridge" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: puteshéstviye*
- *Say it: puteshéstviye*, once more
- *Say it:* say *puteshéstviye*

92.4 отпуск (ótpusk) — holidays, leave

Before the new one: say the Russian for a suitcase, then the Russian for a journey.

You'll want to know: отпуск

отпуск (*ótpusk*) — "holidays, leave".

The word, taken apart — and its English cousins

отпуск is от, "away", with пуск, from пустить, "to let go", Proto-Slavic **pustiti* (Vasmer): leave is being let go for a while.

What you've built

One more word for this chapter.

Your turn

- *Say it: ótpusk*
- *Say it: ótpusk*, once more
- *Say it:* say *ótpusk*
- *Recall:* say the Russian for a suitcase, then the Russian for a journey, then say *ótpusk* again

Before you move on

What does отпуск mean? ("Holidays, leave".) Say it once more.

92.5 ковёр (kovyór) — a rug, a carpet

Before the new one: say the Russian for a journey, then the Russian for holidays.

You'll want to know: ковёр

ковёр (*kovyór*) — "a rug, a carpet".

The word, taken apart — and its English cousins

ковёр ← Old Russian *kovĭrŭ*; its sounds are unusual, so it is probably a loan. Vasmer suggests, as possible, Danube or Volga Bulgar **kavər*, compare Turkic *kiviz*, "felt blanket", and Mongolian *kebis*, "carpet".

What you've built

One more word for this chapter.

Your turn

- *Say it: kovyór*
- *Say it: kovyór*, once more
- *Say it:* say *kovyór*
- *Recall:* say the Russian for a journey, then the Russian for holidays, then say *kovyór* again

Before you move on

What does ковёр mean? ("A rug, a carpet".) Say it once more.

Chapter 93

The Letters Shcha and E

Modes: 👁 **eyes** (2) ✓ **pen** (2) 🚗 **Hands-free start:** none of the 4 lessons.

> ***By the end of this chapter:*** I can write shcha and e, and find them in words I already say.
>
> *Complete the last lesson of chapter 93: I can write shcha and e, and find them in words I already say.*

93.1 э (e) — the e that opens этот

Before the new one: write я and ё once each, and name them.

Now say этот (*étot*), "this". You have read it for a long time. This lesson takes one letter out of it and puts it in your hand.

Script you'll notice: э

э — *e*.

It opens этот (*étot*), "this", and эта. It looks like a с turned to face the other way, with a short bar across the middle. It is the plain *e* sound, with no *y* in front of it, which is why it is mostly found at the start of a word.

Writing: э

How э is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write э yourself — slowly, and larger than it is printed.

> The strip shows **where to start this letter and which way to travel**, in one attested order, and names its source beneath it. Teachers vary, so treat it as a sound way in, not the only one.

Your turn

- *Look:* at этот and point at э inside it
- *Trace it:* э three times, saying *e* as you finish each one
- *Write it:* ё, then э, from memory
- *Read it:* этот aloud once more

Before you move on

Which letter is this — э? (**e**, *e*.) Which word did it come from? (этот, *étot*, "this".)

93.2 щ (shcha) — the shch inside площадь

Before the new one: write ё and э once each, and name them.

Now say площадь (*plóshchad*), “a square”. You have read it for a long time. This lesson takes one letter out of it and puts it in your hand.

Script you’ll notice: щ

щ — *shch*.

It is inside площадь (*plóshchad*), “a square”. It is ш with a small tail at the bottom right, and it sounds like a long, soft *sh*.

Writing: щ

How щ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write щ yourself — slowly, and larger than it is printed.

The strip shows **where to start this letter and which way to travel**, in one attested order, and names its source beneath it. Teachers vary, so treat it as a sound way in, not the only one.

Your turn

- *Look:* at площадь and point at щ inside it
- *Trace it:* щ three times, saying *shch* as you finish each one
- *Write it:* э, then щ, from memory
- *Read it:* площадь aloud once more

Before you move on

Which letter is this — щ? (**shcha**, *shch.*) Which word did it come from? (площадь, *plóshchad*, "a square".)

93.3 (two letters) — From the letter to the word — a first pass

Say этот (*étot*), then write the letter it gave you.

Your turn

letter	name	the word it came from
э	*e*	этот *étot*
щ	*shcha*	площадь *plóshchad*

- *Write it:* each letter in the table from memory, then check it
- *Say it:* the word each one came from
- *Read it:* each word in the table aloud, and point at its letter

Before you move on

Which word did each letter come from? (э from этот; щ from площадь.)

93.4 (two letters) — From the word back to the letter — a second pass

Write щ without looking, then say the word it came from.

Your turn

letter	name	the word it came from
э	*e*	этот *étot*
щ	*shcha*	площадь *plóshchad*

- *Say it:* each word in the table, then write the letter it gave you without looking
- *Write it:* each letter once more, slowly, larger than it is printed

Before you move on

Say each word in the table once more, and name the letter you took from it.

Chapter 94

Television, Computer, Fridge, Cooker, Shower

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a television, a computer, a fridge, a cooker and a shower.
>
> *Complete the last lesson of chapter 94: I can say a television, a computer, a fridge, a cooker and a shower.*

94.1 телевизор (televízor) — a television

Before the new one: say the Russian for holidays, leave, then the Russian for a rug, a carpet.

You'll want to know: телевизор

телевизор (*televízor*) — "a television".

The word, taken apart — and its English cousins

телевизор is an international coinage: Greek *tēle*, "far", with -визор, from Latin *vīsor*, "one who sees", from *vidēre*, "to see": a far-seer.

What you've built

One more word for this chapter.

Your turn

- *Say it: televízor*
- *Say it: televízor*, once more
- *Say it:* say *televízor*
- *Recall:* say the Russian for holidays, leave, then the Russian for a rug, a carpet, then say *televízor* again

Before you move on

What does телевизор mean? ("A television".) Say it once more.

94.2 компьютер (kompyúter) — a computer

Before the new one: say the Russian for a rug, a carpet, then the Russian for a television.

You'll want to know: компьютер

компьютер (*kompyúter*) — "a computer".

The word, taken apart — and its English cousins

компьютер comes from English *computer*, from Latin *computāre*, "to reckon".

What you've built

One more word for this chapter.

Your turn

- *Say it: kompyúter*
- *Say it: kompyúter*, once more
- *Say it:* say *kompyúter*
- *Recall:* say the Russian for a rug, a carpet, then the Russian for a television, then say *kompyúter* again

Before you move on

What does компьютер mean? ("A computer".) Say it once more.

94.3 холодильник (kholodílnik) — a fridge

Before the new one: say the Russian for a television, then the Russian for a computer.

You'll want to know: холодильник

холодильник (*kholodílnik*) — "a fridge".

The word, taken apart — and its English cousins

холодильник is холодить, "to chill", from холод, "cold", with -льник, a suffix for a tool: "a chiller".

What you've built

One more word for this chapter.

Your turn

- *Say it: kholodílnik*
- *Say it: kholodílnik*, once more
- *Say it:* say *kholodílnik*
- *Recall:* say the Russian for a television, then the Russian for a computer, then say *kholodílnik* again

Before you move on

What does холодильник mean? ("A fridge".) Say it once more.

94.4 плита (plitá) — a cooker

Before the new one: say the Russian for a computer, then the Russian for a fridge.

You'll want to know: плита

плита (*plitá*) — "a cooker".

The word, taken apart — and its English cousins

плита — Old Russian плита, "a stone slab, a brick". Vasmer thinks it most likely a cousin of Greek *plínthos*, "brick"; the common view takes it as a loan from that Greek word. A плита is the slab you cook on.

What you've built

One more word for this chapter.

Your turn

- *Say it: plitá*
- *Say it: plitá*, once more
- *Say it:* say *plitá*
- *Recall:* say the Russian for a computer, then the Russian for a fridge, then say *plitá* again

Before you move on

What does плита mean? ("A cooker".) Say it once more.

94.5 душ (dush) — a shower

Before the new one: say the Russian for a fridge, then the Russian for a cooker.

You'll want to know: душ

душ (*dush*) — "a shower".

The word, taken apart — and its English cousins

душ comes from French *douche*, from Italian *doccia*, "a pipe, a spout" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: dush*
- *Say it: dush*, once more
- *Say it:* say *dush*
- *Recall:* say the Russian for a fridge, then the Russian for a cooker, then say *dush* again

Before you move on

What does душ mean? ("A shower".) Say it once more.

Chapter 95

Bathtub, Shelf, Curtain, Pillow, Blanket

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a bathtub, a shelf, a curtain, a pillow and a blanket.

95.1 ванна (vánna) — a bathtub

Before the new one: say the Russian for a cooker, then the Russian for a shower.

You'll want to know: ванна

ванна (*vánna*) — "a bathtub".

The word, taken apart — and its English cousins

ванна comes from German *Wanne*, "a tub", or French *vanne* (Vasmer); Trubachev notes it by 1697.

What you've built

One more word for this chapter.

Your turn

- *Say it: vánna*
- *Say it: vánna*, once more
- *Say it:* say *vánna*
- *Recall:* say the Russian for a cooker, then the Russian for a shower, then say *vánna* again

Before you move on

What does ванна mean? ("A bathtub".) Say it once more.

95.2 полка (pólka) — a shelf

Before the new one: say the Russian for a shower, then the Russian for a bathtub.

You'll want to know: полка

полка (*pólka*) — "a shelf".

The word, taken apart — and its English cousins

полка comes from полица, "a shelf", built on пол, "floor, board" (Vasmer), which Vasmer relates to Sanskrit *phálakam*, "a board, a plank".

What you've built

One more word for this chapter.

Your turn

- *Say it: pólka*
- *Say it: pólka*, once more
- *Say it:* say *pólka*
- *Recall:* say the Russian for a shower, then the Russian for a bathtub, then say *pólka* again

Before you move on

What does полка mean? ("A shelf".) Say it once more.

95.3 занавеска (zanavéska) — a curtain

Before the new one: say the Russian for a bathtub, then the Russian for a shelf.

You'll want to know: занавеска

занавеска (*zanavéska*) — "a curtain".

The word, taken apart — and its English cousins

занавеска is занавес, "a curtain", with -ка, "little". занавес is за-, "across", with навес, "what is hung", from вешать, "to hang".

What you've built

One more word for this chapter.

What does занавеска mean? ("A curtain".) Say it once more.

95.4 подушка (podúshka) — a pillow

Before the new one: say the Russian for a shelf, then the Russian for a curtain.

You'll want to know: подушка

подушка (*podúshka*) — "a pillow".

The word, taken apart — and its English cousins

подушка ← Proto-Slavic **podušĭka*. Vasmer reports the usual link with дух, "breath": a pillow as "a thing blown up". Machek's reading, под ухо, "under the ear", has been rejected by others.

What you've built

One more word for this chapter.

Your turn

- *Say it: podúshka*
- *Say it: podúshka*, once more
- *Say it:* say *podúshka*
- *Recall:* say the Russian for a shelf, then the Russian for a curtain, then say *podúshka* again

Before you move on

What does подушка mean? ("A pillow".) Say it once more.

95.5 одеяло (odeyálo) — a blanket

Before the new one: say the Russian for a curtain, then the Russian for a pillow.

You'll want to know: одеяло

одеяло (*odeyálo*) — "a blanket".

The word, taken apart — and its English cousins

одеяло comes from Old Russian одеяти, "to cover, to clothe", the repeated-action form of одеть, "to dress" (Vasmer): a blanket is what covers you.

What you've built

One more word for this chapter.

Your turn

- *Say it: odeyálo*
- *Say it: odeyálo*, once more
- *Say it:* say *odeyálo*
- *Recall:* say the Russian for a curtain, then the Russian for a pillow, then say *odeyálo* again

Before you move on

What does одеяло mean? ("A blanket".) Say it once more.

Chapter 96

Towel, Soap, Toothbrush, Comb, Rubbish

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a towel, soap, a toothbrush, a comb and rubbish.

96.1 полотенце (poloténtse) — a towel

Before the new one: say the Russian for a pillow, then the Russian for a blanket.

You'll want to know: полотенце

полотенце (*poloténtse*) — "a towel".

The word, taken apart — and its English cousins

полотенце is полотно, "linen cloth", with the diminutive -енце. полотно ← Proto-Slavic **poltĭno*, which Vasmer relates to Sanskrit *paṭa-*, "cloth".

What you've built

One more word for this chapter.

Your turn

- *Say it: polоténtse*
- *Say it: polоténtse*, once more
- *Say it:* say *polоténtse*
- *Recall:* say the Russian for a pillow, then the Russian for a blanket, then say *polоténtse* again

Before you move on

What does полотенце mean? ("A towel".) Say it once more.

96.2 мыло (mýlo) — soap

Before the new one: say the Russian for a blanket, then the Russian for a towel.

You'll want to know: мыло

мыло (*mýlo*) — "soap".

The word, taken apart — and its English cousins

мыло ← Proto-Slavic **mydlo*, built on мыть, "to wash" (Vasmer): the thing you wash with.

What you've built

One more word for this chapter.

Your turn

- *Say it: mýlo*
- *Say it: mýlo*, once more
- *Say it:* say *mýlo*
- *Recall:* say the Russian for a blanket, then the Russian for a towel, then say *mýlo* again

Before you move on

What does расчёска mean? ("A comb".) Say it once more.

96.5 мусор (músor) — rubbish

Before the new one: say the Russian for a toothbrush, then the Russian for a comb.

You'll want to know: мусор

мусор (*músor*) — "rubbish".

The word, taken apart — and its English cousins

мусор — Vasmer derives it from **mouds-* and compares Greek *mýsos*, "defilement"; Trubachev, in a note, ties it instead to dialect бусор, "junk".

What you've built

One more word for this chapter.

Your turn

- *Say it: músor*
- *Say it: músor*, once more
- *Say it:* say *músor*
- *Recall:* say the Russian for a toothbrush, then the Russian for a comb, then say *músor* again

97.3 диван (diván) — a sofa

Before the new one: say the Russian for a broom, then the Russian for a washing machine.

You'll want to know: диван

диван (*diván*) — "a sofa".

The word, taken apart — and its English cousins

диван — Vasmer thinks it more likely came from the West, French *divan*, "a couch", than straight from its Turkish and Persian source *divan*, "a council, a council chamber" with its cushioned benches.

What you've built

One more word for this chapter.

Your turn

- *Say it: diván*
- *Say it: diván*, once more
- *Say it:* say *diván*

Beef, Vegetables, Strawberries, Melon, Garlic

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say beef, vegetables, strawberries, a melon and garlic.
>
> *Complete the last lesson of chapter 104: I can say beef, vegetables, strawberries, a melon and garlic.*

104.1 говядина (govyádina) — beef

Before the new one: say the Russian for trousers, then the Russian for a dress.

You'll want to know: говядина

говядина (*govyádina*) — "beef".

The word, taken apart — and its English cousins

говядина is built on old говядо, "cattle", with -ина, a suffix for meat. Vasmer relates говядо to Sanskrit *gáuḥ*, "cow", Greek *boûs* and Latin *bōs*, "ox", and Old High German *chuo*, "cow": English *cow* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: govyádina*
- *Say it: govyádina*, once more
- *Say it:* say *govyádina*
- *Recall:* say the Russian for trousers, then the Russian for a dress, then say *govyádina* again

Before you move on

What does говядина mean? ("Beef".) Say it once more.

104.2 овощи (óvoshchi) — vegetables

Before the new one: say the Russian for a dress, then the Russian for beef.

You'll want to know: овощи

овощи (*óvoshchi*) — "vegetables".

The word, taken apart — and its English cousins

овощи is the plural of овощ, "a vegetable, a fruit". Vasmer rejects the common view that it comes from Old High German *obaz*, "fruit", and suggests, with a "perhaps", a Slavic **voksti-* from a root "to grow", as in Gothic *wahsjan*, "to grow".

What you've built

One more word for this chapter.

Your turn

- *Say it: óvoshchi*
- *Say it: óvoshchi*, once more
- *Say it:* say *óvoshchi*

- *Recall:* say the Russian for a dress, then the Russian for beef, then say *óvoshchi* again

Before you move on

What does овощи mean? ("Vegetables".) Say it once more.

104.3 клубника (klubníka) — strawberries

Before the new one: say the Russian for beef, then the Russian for vegetables.

You'll want to know: клубника

клубника (*klubníka*) — "strawberries".

The word, taken apart — and its English cousins

клубника is built on клуб, "a ball, a clump" (Vasmer), the root of клубок, "a ball of thread": a name for the round garden strawberry.

What you've built

One more word for this chapter.

Your turn

- *Say it: klubníka*
- *Say it: klubníka*, once more
- *Say it:* say *klubníka*
- *Recall:* say the Russian for beef, then the Russian for vegetables, then say *klubníka* again

Before you move on

What does клубника mean? ("Strawberries".) Say it once more.

104.4 дыня (dýnya) — a melon

Before the new one: say the Russian for vegetables, then the Russian for strawberries.

You'll want to know: дыня

дыня (*dýnya*) — "a melon".

The word, taken apart — and its English cousins

дыня — "a difficult word", says Vasmer. It is usually read as "a swollen fruit", from дуть, "to blow"; Knutsson derived it from Latin *cydōnea*, "quinces", through **kŭdynja*.

What you've built

One more word for this chapter.

Your turn

- *Say it: dýnya*
- *Say it: dýnya*, once more
- *Say it:* say *dýnya*
- *Recall:* say the Russian for vegetables, then the Russian for strawberries, then say *dýnya* again

Before you move on

What does дыня mean? ("A melon".) Say it once more.

104.5 чеснок (chesnók) — garlic

Before the new one: say the Russian for strawberries, then the Russian for a melon.

You'll want to know: чеснок

чеснок (*chesnók*) — "garlic".

The word, taken apart — and its English cousins

чеснок ← Proto-Slavic **česnŭ*, with -ок — inherited. Vasmer reports the link with чесать, "to comb, to split": a garlic head splits into cloves, as Old High German *chlobolouh*, "garlic", goes with *klieben*, "to split".

What you've built

One more word for this chapter.

Your turn

- *Say it: chesnók*
- *Say it: chesnók*, once more
- *Say it:* say *chesnók*

Chapter 116

Desert, Volcano, Cave, Waterfall, Donkey

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a desert, a volcano, a cave, a waterfall and a donkey.
>
> *Complete the last lesson of chapter 116: I can say a desert, a volcano, a cave, a waterfall and a donkey.*

116.1 пустыня (pustýnya) — a desert

Before the new one: say the Russian for a rock, a cliff, then the Russian for a wave.

You'll want to know: пустыня

пустыня (*pustýnya*) — "a desert".

The word, taken apart — and its English cousins

пустыня is built on пустой, "empty", Proto-Slavic **pustŭ* (Vasmer): a desert is the empty land.

What you've built

One more word for this chapter.

Your turn

- *Say it: pustýnya*
- *Say it: pustýnya*, once more
- *Say it:* say *pustýnya*
- *Recall:* say the Russian for a rock, a cliff, then the Russian for a wave, then say *pustýnya* again

Before you move on

What does пустыня mean? ("A desert".) Say it once more.

116.2 вулкан (vulkán) — a volcano

Before the new one: say the Russian for a wave, then the Russian for a desert.

You'll want to know: вулкан

вулкан (*vulkán*) — "a volcano".

The word, taken apart — and its English cousins

вулкан comes, through western European languages, from Latin *Vulcānus*, the god of fire and the forge.

What you've built

One more word for this chapter.

Your turn

- *Say it: vulkán*
- *Say it: vulkán*, once more
- *Say it:* say *vulkán*
- *Recall:* say the Russian for a wave, then the Russian for a desert, then say *vulkán* again

Before you move on

What does вулкан mean? ("A volcano".) Say it once more.

116.3 пещера (peshchéra) — a cave

Before the new one: say the Russian for a desert, then the Russian for a volcano.

You'll want to know: пещера

пещера (*peshchéra*) — "a cave".

The word, taken apart — and its English cousins

пещера — Church Slavonic, says Vasmer, beside the East Slavic печора; he notes the link with печь, "a stove, an oven". The -щ- against -ч- marks the church form.

What you've built

One more word for this chapter.

Your turn

- *Say it: peshchéra*
- *Say it: peshchéra*, once more
- *Say it:* say *peshchéra*
- *Recall:* say the Russian for a desert, then the Russian for a volcano, then say *peshchéra* again

Before you move on

What does пещера mean? ("A cave".) Say it once more.

116.4 водопад (vodopád) — a waterfall

Before the new one: say the Russian for a volcano, then the Russian for a cave.

You'll want to know: водопад

водопад (*vodopád*) — "a waterfall".

The word, taken apart — and its English cousins

водопад is вода, "water", with -о- and пад, from падать, "to fall": falling water.

What you've built

One more word for this chapter.

Your turn

- *Say it: vodopád*
- *Say it: vodopád*, once more
- *Say it:* say *vodopád*
- *Recall:* say the Russian for a volcano, then the Russian for a cave, then say *vodopád* again

Before you move on

What does водопад mean? ("A waterfall".) Say it once more.

116.5 осёл (osyól) — a donkey

Before the new one: say the Russian for a cave, then the Russian for a waterfall.

You'll want to know: осёл

осёл (*osyól*) — "a donkey".

The word, taken apart — and its English cousins

осёл ← Old Russian *osĭlŭ*, borrowed from Gothic *asilus*, from Latin *asinus*, "ass", and fitted to Slavic words in *-ĭlŭ* such as козёл, "billy goat" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: osyól*
- *Say it: osyól*, once more
- *Say it:* say *osyól*
- *Recall:* say the Russian for a cave, then the Russian for a waterfall, then say *osyól* again

Before you move on

What does осёл mean? ("A donkey".) Say it once more.

Chapter 117

Rabbit, Tiger, Butterfly, Frog, Tortoise

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a rabbit, a tiger, a butterfly, a frog and a tortoise.
>
> *Complete the last lesson of chapter 117: I can say a rabbit, a tiger, a butterfly, a frog and a tortoise.*

117.1 кролик (królik) — a rabbit

Before the new one: say the Russian for a waterfall, then the Russian for a donkey.

You'll want to know: кролик

кролик (*królik*) — "a rabbit".

The word, taken apart — and its English cousins

кролик comes from Polish *królik*, "little king", which copies a German dialect *Künigl*, Middle High German *küniklîn*, from Latin *cunīculus*, "rabbit", heard as "little king" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: królik*
- *Say it: królik*, once more
- *Say it:* say *królik*
- *Recall:* say the Russian for a waterfall, then the Russian for a donkey, then say *królik* again

Before you move on

What does кролик mean? ("A rabbit".) Say it once more.

117.2 тигр (tigr) — a tiger

Before the new one: say the Russian for a donkey, then the Russian for a rabbit.

You'll want to know: тигр

тигр (*tigr*) — "a tiger".

The word, taken apart — and its English cousins

тигр — Old Church Slavonic already had *tigrŭ*, from Greek *tígris*, which Vasmer traces to Avestan *tighri-*, "an arrow"; the modern word came again through French *tigre* or German *Tiger*, Latin *tigris*.

What you've built

One more word for this chapter.

Your turn

- *Say it: tigr*
- *Say it: tigr*, once more
- *Say it:* say *tigr*
- *Recall:* say the Russian for a donkey, then the Russian for a rabbit, then say *tigr* again

Before you move on

What does тигр mean? ("A tiger".) Say it once more.

117.3 бабочка (bábochka) — a butterfly

Before the new one: say the Russian for a rabbit, then the Russian for a tiger.

You'll want to know: бабочка

бабочка (*bábochka*) — "a butterfly".

The word, taken apart — and its English cousins

бабочка is a diminutive of бабка, "granny" (Vasmer), from the belief that the soul of a dead person lives on as a butterfly; Greek *psychḗ* is both "soul" and "butterfly".

What you've built

One more word for this chapter.

Your turn

- *Say it: bábochka*
- *Say it: bábochka*, once more
- *Say it:* say *bábochka*
- *Recall:* say the Russian for a rabbit, then the Russian for a tiger, then say *bábochka* again

Before you move on

What does бабочка mean? ("A butterfly".) Say it once more.

117.4 лягушка (lyagúshka) — a frog

Before the new one: say the Russian for a tiger, then the Russian for a butterfly.

You'll want to know: лягушка

лягушка (*lyagúshka*) — "a frog".

The word, taken apart — and its English cousins

лягушка comes from ляга, "a thigh", and лягать, "to kick" (Vasmer): the frog as the kicker.

What you've built

One more word for this chapter.

Your turn

- *Say it: lyagúshka*
- *Say it: lyagúshka*, once more
- *Say it:* say *lyagúshka*
- *Recall:* say the Russian for a tiger, then the Russian for a butterfly, then say *lyagúshka* again

Before you move on

What does лягушка mean? ("A frog".) Say it once more.

117.5 черепаха (cherepákha) — a tortoise, a turtle

Before the new one: say the Russian for a butterfly, then the Russian for a frog.

You'll want to know: черепаха

черепаха (*cherepákha*) — "a tortoise, a turtle".

The word, taken apart — and its English cousins

черепаха is built on череп, "a skull, a shell" (Vasmer), and replaced an older Slavic **žely*, "tortoise", for taboo reasons, after Zelenin.

What you've built

One more word for this chapter.

Your turn

- *Say it: cherepákha*
- *Say it: cherepákha*, once more
- *Say it:* say *cherepákha*
- *Recall:* say the Russian for a butterfly, then the Russian for a frog, then say *cherepákha* again

Before you move on

What does черепаха mean? ("A tortoise, a turtle".) Say it once more.

Chapter 118

Squirrel, Owl, Whale, Dolphin, Elbow

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a squirrel, an owl, a whale, a dolphin and an elbow.
>
> *Complete the last lesson of chapter 118: I can say a squirrel, an owl, a whale, a dolphin and an elbow.*

118.1 белка (bélka) — a squirrel

Before the new one: say the Russian for a frog, then the Russian for a tortoise.

You'll want to know: белка

белка (*bélka*) — "a squirrel".

The word, taken apart — and its English cousins

белка comes from белый, "white": Old Russian chronicles speak of бела веверица, "a white squirrel", fur paid as tribute; Vasmer calls the link proven.

What you've built

One more word for this chapter.

Your turn

- *Say it: bélka*
- *Say it: bélka*, once more
- *Say it:* say *bélka*
- *Recall:* say the Russian for a frog, then the Russian for a tortoise, then say *bélka* again

Before you move on

What does белка mean? ("A squirrel".) Say it once more.

118.2 сова (sová) — an owl

Before the new one: say the Russian for a tortoise, then the Russian for a squirrel.

You'll want to know: сова

сова (*sová*) — "an owl".

The word, taken apart — and its English cousins

сова ← Proto-Slavic **sova* — inherited. Vasmer relates it to Welsh *cuan*, "night owl", Old High German *hûwo*, "owl", and Lithuanian *šaũkti*, "to cry out": the owl as the hooter.

What you've built

One more word for this chapter.

Your turn

- *Say it: sová*
- *Say it: sová*, once more
- *Say it:* say *sová*
- *Recall:* say the Russian for a tortoise, then the Russian for a squirrel, then say *sová* again

Before you move on

What does сова mean? ("An owl".) Say it once more.

118.3 кит (kit) — a whale

Before the new one: say the Russian for a squirrel, then the Russian for an owl.

You'll want to know: кит

кит (*kit*) — "a whale".

The word, taken apart — and its English cousins

кит ← Old Church Slavonic *kitŭ*, from Greek *kêtos*, "a sea monster, a whale" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: kit*
- *Say it: kit*, once more
- *Say it:* say *kit*
- *Recall:* say the Russian for a squirrel, then the Russian for an owl, then say *kit* again

Before you move on

What does кит mean? ("A whale".) Say it once more.

118.4 дельфин (delfín) — a dolphin

Before the new one: say the Russian for an owl, then the Russian for a whale.

You'll want to know: дельфин

дельфин (*delfín*) — "a dolphin".

The word, taken apart — and its English cousins

дельфин comes from German *Delphin* (Vasmer), from Latin *delphīnus*, Greek *delphís*.

What you've built

One more word for this chapter.

Your turn

- *Say it: delfín*
- *Say it: delfín*, once more
- *Say it:* say *delfín*
- *Recall:* say the Russian for an owl, then the Russian for a whale, then say *delfín* again

Before you move on

What does дельфин mean? ("A dolphin".) Say it once more.

118.5 локоть (lókot) — an elbow

Before the new one: say the Russian for a whale, then the Russian for a dolphin.

You'll want to know: локоть

локоть (*lókot*) — "an elbow".

The word, taken apart — and its English cousins

локоть ← Proto-Slavic **olkŭtĭ* — inherited; East Slavic *ol-* became ло-. Vasmer relates it to Lithuanian *alkūnė* and Old Prussian *alkunis*, "elbow".

What you've built

One more word for this chapter.

Your turn

- *Say it: lókot*
- *Say it: lókot*, once more
- *Say it:* say *lókot*
- *Recall:* say the Russian for a whale, then the Russian for a dolphin, then say *lókot* again

Before you move on

What does локоть mean? ("An elbow".) Say it once more.

Chapter 119

Ankle, Wrist, Cheek, Lips, Chest

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say an ankle, a wrist, a cheek, lips and the chest.
>
> *Complete the last lesson of chapter 119: I can say an ankle, a wrist, a cheek, lips and the chest.*

119.1 лодыжка (lodýzhka) — an ankle

Before the new one: say the Russian for a dolphin, then the Russian for an elbow.

You'll want to know: лодыжка

лодыжка (*lodýzhka*) — "an ankle".

The word, taken apart — and its English cousins

лодыжка is built on лодыга, "an ankle bone; a hollow stalk", with -ка. Vasmer calls лодыга unclear and finds the proposed sources, a Polish loan, Latin *lactūca*, "lettuce", or German, unconvincing.

What you've built

One more word for this chapter.

Your turn

- *Say it: lodýzhka*
- *Say it: lodýzhka*, once more
- *Say it:* say *lodýzhka*
- *Recall:* say the Russian for a dolphin, then the Russian for an elbow, then say *lodýzhka* again

Before you move on

What does лодыжка mean? ("An ankle".) Say it once more.

119.2 запястье (zapyástye) — a wrist

Before the new one: say the Russian for an elbow, then the Russian for an ankle.

You'll want to know: запястье

запястье (*zapyástye*) — "a wrist".

The word, taken apart — and its English cousins

запястье is за-, "beyond", with пясть, "the palm, the metacarpus": the part beyond the hand. Vasmer relates пясть to Old High German *fûst*, "fist", so English *fist* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: zapyástye*
- *Say it: zapyástye*, once more
- *Say it:* say *zapyástye*
- *Recall:* say the Russian for an elbow, then the Russian for an ankle, then say *zapyástye* again

Before you move on

What does запястье mean? ("A wrist".) Say it once more.

119.3 щека (shcheká) — a cheek

Before the new one: say the Russian for an ankle, then the Russian for a wrist.

You'll want to know: щека

щека (*shcheká*) — "a cheek".

The word, taken apart — and its English cousins

щека ← Proto-Slavic **ščeka* — inherited. It is thought to be related to Old Norse *skegg*, "beard", and *skagi*, "a cape" (Vasmer); dialects use it for a steep river bank.

What you've built

One more word for this chapter.

Your turn

- *Say it: shcheká*
- *Say it: shcheká*, once more
- *Say it:* say *shcheká*
- *Recall:* say the Russian for an ankle, then the Russian for a wrist, then say *shcheká* again

Before you move on

What does щека mean? ("A cheek".) Say it once more.

119.4 губы (gúby) — lips

Before the new one: say the Russian for a wrist, then the Russian for a cheek.

You'll want to know: губы

губы (*gúby*) — "lips".

The word, taken apart — and its English cousins

губы is the plural of губа, "lip", Proto-Slavic **gǫba*. Its deeper origin is unclear: Vasmer weighs Greek *gamphaí*, "jaws", and the губа that means "sponge".

What you've built

One more word for this chapter.

Your turn

- *Say it: gúby*
- *Say it: gúby*, once more
- *Say it:* say *gúby*
- *Recall:* say the Russian for a wrist, then the Russian for a cheek, then say *gúby* again

Before you move on

What does губы mean? ("Lips".) Say it once more.

119.5 грудь (grud) — the chest

Before the new one: say the Russian for a cheek, then the Russian for lips.

You'll want to know: грудь

грудь (*grud*) — "the chest".

The word, taken apart — and its English cousins

грудь ← Proto-Slavic **grǫdĭ* — inherited. Vasmer compares Latin *grandis*, "great", and Greek *brénthos*, "pride"; Trubachev, in a note, reports that Vaillant links it instead with гряда, "a beam, a bed", so

the origin is open.

What you've built

One more word for this chapter.

Your turn

- *Say it: grud*
- *Say it: grud*, once more
- *Say it:* say *grud*
- *Recall:* say the Russian for a cheek, then the Russian for lips, then say *grud* again

Before you move on

What does грудь mean? ("The chest".) Say it once more.

Chapter 120

Lion, Monkey, Elephant, Bee, Ant

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a lion, a monkey, an elephant, a bee and an ant.
>
> *Complete the last lesson of chapter 120: I can say a lion, a monkey, an elephant, a bee and an ant.*

120.1 лев (lev) — a lion

Before the new one: say the Russian for lips, then the Russian for the chest.

You'll want to know: лев

лев (*lev*) — "a lion".

The word, taken apart — and its English cousins

лев ← Old High German *lëwo*, from Latin *leō*, Greek *léōn* (Vasmer). Vasmer thinks it came through books, since a spoken loan would have given лёв, and that the word's ultimate source is probably Semitic.

What you've built

One more word for this chapter.

Your turn

- *Say it: lev*
- *Say it: lev*, once more
- *Say it:* say *lev*
- *Recall:* say the Russian for lips, then the Russian for the chest, then say *lev* again

Before you move on

What does лев mean? ("A lion".) Say it once more.

120.2 обезьяна (obezyána) — a monkey

Before the new one: say the Russian for the chest, then the Russian for a lion.

You'll want to know: обезьяна

обезьяна (*obezyána*) — "a monkey".

The word, taken apart — and its English cousins

обезьяна — Old Russian обезьяна, recorded by Afanasy Nikitin; it comes from Turkish and Persian *abuzine*, "monkey", reshaped, it is thought, to look like Russian words with о- and без-, an account Vasmer finds not fully satisfying.

What you've built

One more word for this chapter.

Your turn

- *Say it: obezyána*
- *Say it: obezyána*, once more
- *Say it:* say *obezyána*

- *Recall:* say the Russian for the chest, then the Russian for a lion, then say *obezyána* again

Before you move on

What does обезьяна mean? ("A monkey".) Say it once more.

120.3 слон (slon) — an elephant

Before the new one: say the Russian for a lion, then the Russian for a monkey.

You'll want to know: слон

слон (*slon*) — "an elephant".

The word, taken apart — and its English cousins

слон — origin disputed. It is usually read as a bookish coinage from прислониться, "to lean", after the old *Physiologus*, which says the elephant sleeps leaning on a tree; Vasmer thinks that link is folk etymology and finds a loan from Turkic *arslan*, "lion", acceptable in its sounds.

What you've built

One more word for this chapter.

Your turn

- *Say it: slon*
- *Say it: slon*, once more
- *Say it:* say *slon*
- *Recall:* say the Russian for a lion, then the Russian for a monkey, then say *slon* again

Before you move on

What does слон mean? ("An elephant".) Say it once more.

120.4 пчела (pchelá) — a bee

Before the new one: say the Russian for a monkey, then the Russian for an elephant.

You'll want to know: пчела

пчела (*pchelá*) — "a bee".

The word, taken apart — and its English cousins

пчела ← Proto-Slavic **bičela* — inherited; б turned to п before ч. Vasmer relates it to Irish *bech*, Lithuanian *bìtė* and Old High German *bîa*, all "bee": English *bee* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: pchelá*
- *Say it: pchelá*, once more
- *Say it:* say *pchelá*
- *Recall:* say the Russian for a monkey, then the Russian for an elephant, then say *pchelá* again

Before you move on

What does пчела mean? ("A bee".) Say it once more.

120.5 муравей (muravéy) — an ant

Before the new one: say the Russian for an elephant, then the Russian for a bee.

You'll want to know: муравей

муравей (*muravéy*) — "an ant".

The word, taken apart — and its English cousins

муравей ← Proto-Slavic **morvějĭ* — inherited. Vasmer lists Irish *moirb*, Avestan *maoiri-* and Old Norse *maurr*, all "ant"; Latin *formīca*, "ant", is related too.

What you've built

One more word for this chapter.

Your turn

- *Say it: muravéy*
- *Say it: muravéy*, once more
- *Say it:* say *muravéy*
- *Recall:* say the Russian for an elephant, then the Russian for a bee, then say *muravéy* again

Before you move on

What does муравей mean? ("An ant".) Say it once more.

Chapter 121

Shark, Nail, Skin, Stomach, Throat

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a shark, a nail, skin, a stomach and a throat.

121.1 акула (akúla) — a shark

Before the new one: say the Russian for a bee, then the Russian for an ant.

You'll want to know: акула

акула (*akúla*) — "a shark".

The word, taken apart — and its English cousins

акула comes from Old Norse *hákall*, "shark", with an -а added to match рыба, "fish" (Vasmer); Itkonen took it through Sami *akkli*.

What you've built

One more word for this chapter.

Your turn

- *Say it: akúla*
- *Say it: akúla*, once more
- *Say it:* say *akúla*
- *Recall:* say the Russian for a bee, then the Russian for an ant, then say *akúla* again

Before you move on

What does акула mean? ("A shark".) Say it once more.

121.2 ноготь (nógot) — a nail

Before the new one: say the Russian for an ant, then the Russian for a shark.

You'll want to know: ноготь

ноготь (*nógot*) — "a nail".

The word, taken apart — and its English cousins

ноготь ← Proto-Slavic **nogŭtĭ*, a diminutive built on нога, "leg", first "claw" (Vasmer); Lithuanian *nagùtis*, "nail, claw", is a cousin, and so is English *nail*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nógot*
- *Say it: nógot*, once more
- *Say it:* say *nógot*
- *Recall:* say the Russian for an ant, then the Russian for a shark, then say *nógot* again

Before you move on

What does ноготь mean? ("A nail".) Say it once more.

121.3 кожа (kózha) — skin

Before the new one: say the Russian for a shark, then the Russian for a nail.

You'll want to know: кожа

кожа (*kózha*) — "skin".

The word, taken apart — and its English cousins

кожа comes from коза, "goat", Proto-Slavic **kozja*, "goat's (hide)" (Vasmer), as Greek *ōa*, "sheepskin", comes from *óis*, "sheep".

What you've built

One more word for this chapter.

Your turn

- *Say it: kózha*
- *Say it: kózha*, once more
- *Say it:* say *kózha*
- *Recall:* say the Russian for a shark, then the Russian for a nail, then say *kózha* again

Before you move on

What does кожа mean? ("Skin".) Say it once more.

121.4 желудок (zhelúdok) — a stomach

Before the new one: say the Russian for a nail, then the Russian for skin.

You'll want to know: желудок

желудок (*zhelúdok*) — "a stomach".

The word, taken apart — and its English cousins

желудок — Old Russian also желудь, "stomach". Brückner and Mladenov linked it with жёлудь, "acorn", but others reject this because the accents differ, Vasmer reports; Lithuanian *skílándis*, "a stuffed pig's stomach", is built the same way.

What you've built

One more word for this chapter.

Your turn

- *Say it: zhelúdok*
- *Say it: zhelúdok*, once more
- *Say it:* say *zhelúdok*
- *Recall:* say the Russian for a nail, then the Russian for skin, then say *zhelúdok* again

Before you move on

What does желудок mean? ("A stomach".) Say it once more.

121.5 горло (górlo) — a throat

Before the new one: say the Russian for skin, then the Russian for a stomach.

You'll want to know: горло

горло (*górlo*) — "a throat".

The word, taken apart — and its English cousins

горло ← Proto-Slavic **gŭrdlo* — inherited. Vasmer relates it to Lithuanian *gurklỹs*, "crop, throat", Old Prussian *gurcle*, "throat", and

to жрать, “to devour”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: górlo*
- *Say it: górlo*, once more
- *Say it:* say *górlo*
- *Recall:* say the Russian for skin, then the Russian for a stomach, then say *górlo* again

Before you move on

What does горло mean? (“A throat”.) Say it once more.

Chapter 122

Chin, Rainbow, Lightning, Thunder, Planet

122.1 подбородок (podboródok) — a chin

Before the new one: say the Russian for a stomach, then the Russian for a throat.

You'll want to know: подбородок

подбородок (*podboródok*) — "a chin".

The word, taken apart — and its English cousins

подбородок is под, "under", with борода, "beard", and -ок: the part under the beard. Vasmer relates борода to Lithuanian *barzdà*, Latin *barba* and Old High German *bart*: English *beard* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: podboródok*
- *Say it: podboródok*, once more
- *Say it:* say *podboródok*
- *Recall:* say the Russian for a stomach, then the Russian for a throat, then say *podboródok* again

Before you move on

What does подбородок mean? ("A chin".) Say it once more.

122.2 радуга (ráduga) — a rainbow

Before the new one: say the Russian for a throat, then the Russian for a chin.

You'll want to know: радуга

радуга (*ráduga*) — "a rainbow".

The word, taken apart — and its English cousins

радуга — Vasmer finds most likely a derivation **radǫga* from рад, "glad", since dialects also call the rainbow весёлка, "the merry one". The form райдуга, with рай, "paradise", he takes as folk etymology.

What you've built

One more word for this chapter.

Your turn

- *Say it: ráduga*
- *Say it: ráduga*, once more
- *Say it:* say *ráduga*
- *Recall:* say the Russian for a throat, then the Russian for a chin, then say *ráduga* again

Before you move on

What does радуга mean? ("A rainbow".) Say it once more.

122.3 молния (mólniya) — lightning

Before the new one: say the Russian for a chin, then the Russian for a rainbow.

You'll want to know: молния

молния (*mólniya*) — "lightning".

The word, taken apart — and its English cousins

молния ← Proto-Slavic **mŭlnĭji* — inherited. Vasmer relates it to Old Prussian *mealde*, "lightning", Welsh *mellt*, "lightning", and Old Norse *Mjǫllnir*, the name of Thor's hammer.

What you've built

One more word for this chapter.

Your turn

- *Say it: mólniya*
- *Say it: mólniya*, once more
- *Say it:* say *mólniya*

122.4 гром (grom) — thunder

Before the new one: say the Russian for a rainbow, then the Russian for lightning.

You'll want to know: гром

гром (*grom*) — "thunder".

The word, taken apart — and its English cousins

гром ← Proto-Slavic **gromŭ* — inherited, with греметь, "to rumble" (Vasmer). Vasmer relates it to Old Prussian *grumins*, "thunder", Lithuanian *gruménti*, "to rumble", and Greek *chrómos*, "a crash".

What you've built

One more word for this chapter.

Your turn

- *Say it: grom*
- *Say it: grom*, once more
- *Say it:* say *grom*
- *Recall:* say the Russian for a rainbow, then the Russian for lightning, then say *grom* again

Before you move on

What does гром mean? ("Thunder".) Say it once more.

122.5 планета (planéta) — a planet

Before the new one: say the Russian for lightning, then the Russian for thunder.

You'll want to know: планета

планета (*planéta*) — "a planet".

The word, taken apart — and its English cousins

планета came through Polish *planeta* from Latin *planēta*, Greek *planḗtēs*, "a wanderer": a planet is a wandering star (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: planéta*
- *Say it: planéta*, once more
- *Say it:* say *planéta*
- *Recall:* say the Russian for lightning, then the Russian for thunder, then say *planéta* again

Before you move on

What does планета mean? ("A planet".) Say it once more.

123.2 бутылка (butýlka) — a bottle

Before the new one: say the Russian for a planet, then the Russian for space.

You'll want to know: бутылка

бутылка (*butýlka*) — "a bottle".

The word, taken apart — and its English cousins

бутылка — from 1694; it came through Ukrainian and Polish *butelka* or straight from French *bouteille*, Medieval Latin *buticula*, from *buttis*, "a cask" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: butýlka*
- *Say it: butýlka*, once more
- *Say it:* say *butýlka*
- *Recall:* say the Russian for a planet, then the Russian for space, then say *butýlka* again

Before you move on

What does бутылка mean? ("A bottle".) Say it once more.

123.3 зеркало (zérkalo) — a mirror

Before the new one: say the Russian for space, then the Russian for a bottle.

You'll want to know: зеркало

зеркало (*zérkalo*) — "a mirror".

The word, taken apart — and its English cousins

зеркало is built on the root of зреть, "to look", and зоркий, "sharp-sighted"; Vasmer thinks it probably copies Latin *speculum*, "mirror", from *specere*, "to look". Church Slavonic has зерцало, "mirror".

What you've built

One more word for this chapter.

Your turn

- *Say it: zérkalo*
- *Say it: zérkalo*, once more
- *Say it:* say *zérkalo*

Before you move on

What does лестница mean? ("Stairs".) Say it once more.

123.5 розовый (rózovyy) — pink

Before the new one: say the Russian for a mirror, then the Russian for stairs.

You'll want to know: розовый

розовый (*rózovyy*) — "pink".

The word, taken apart — and its English cousins

розовый is built on роза, “a rose”, perhaps through Ukrainian рожевий and Polish *różowy*, “pink” (Vasmer). роза goes back to Latin *rosa*.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: rózovyy*
- *Say it: rózovyy*, once more
- *Say it:* say *rózovyy*
- *Recall:* say the Russian for a mirror, then the Russian for stairs, then say *rózovyy* again

Before the new one: say the Russian for stairs, then the Russian for pink.

You'll want to know: фиолетовый

фиолетовый (*fiolétovyy*) — "purple".

The word, taken apart — and its English cousins

фиолетовый — its ф- shows it came through German *violett* from French *violet*, from *violette*, Latin *viola*, "the violet" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: fiolétovyy*
- *Say it: fiolétovyy*, once more
- *Say it:* say *fiolétovyy*
- *Recall:* say the Russian for stairs, then the Russian for pink, then say *fiolétovyy* again

Before you move on

What does фиолетовый mean? ("Purple".) Say it once more.

124.2 коричневый (koríchnevyy) — brown

Before the new one: say the Russian for pink, then the Russian for purple.

You'll want to know: коричневый

коричневый (*koríchnevyy*) — "brown".

The word, taken apart — and its English cousins

коричневый is "cinnamon-coloured", from корица, "cinnamon", a diminutive of кора, "bark" (Vasmer): cinnamon is a bark.

What you've built

One more word for this chapter.

Your turn

- *Say it: koríchnevyy*
- *Say it: koríchnevyy*, once more

124.5 занятый (zányatyy) — busy

Before the new one: say the Russian for grey, then the Russian for orange.

You'll want to know: занятый

занятый (*zányatyy*) — "busy".

The word, taken apart — and its English cousins

занятый is "taken up": за- with -нятый, from -нять, the old Slavic verb **jęti*, "to take", as in взять, "to take", and понимать, "to understand" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: zányatyy*
- *Say it: zányatyy*, once more
- *Say it:* say *zányatyy*
- *Recall:* say the Russian for grey, then the Russian for orange, then say *zányatyy* again

Before you move on

гулять (*gulyát*) — "to go for a walk".

The word, taken apart — and its English cousins

гулять — "a difficult word", says Vasmer. Berneker and Brückner tied it to гул, "a hum", Potebnya and Sobolevsky to a first sense "to drink"; each is disputed, and Trubachev's note traces the sense from "to play ball".

What you've built

One more word for this chapter.

Your turn

- *Say it: gulyát*
- *Say it: gulyát*, once more
- *Say it:* say *gulyát*

- *Recall:* say the Russian for to repair, then the Russian for to tell, then say *gulyát* again

Before you move on

What does гулять mean? ("To go for a walk".) Say it once more.

134.3 убирать (ubirát) — to tidy up

Before the new one: say the Russian for to tell, then the Russian for to go for a walk.

You'll want to know: убирать

убирать (*ubirát*) — "to tidy up".

The word, taken apart — and its English cousins

убирать is у-, "away", with -бирать, from брать, "to take": to take things away, to clear up.

What you've built

One more word for this chapter.

Your turn

- *Say it: ubirát*
- *Say it: ubirát*, once more
- *Say it:* say *ubirát*
- *Recall:* say the Russian for to tell, then the Russian for to go for a walk, then say *ubirát* again

134.4 находить (nakhodít) — to find

Before the new one: say the Russian for to go for a walk, then the Russian for to tidy up.

You'll want to know: находить

находить (*nakhodít*) — "to find".

The word, taken apart — and its English cousins

находить is на-, "onto", with ходить, "to walk": to find is to come upon a thing. Vasmer ties ход to the Indo-European root **sed-*, "to sit", its х grown from an *s* after prefixes.

What you've built

One more word for this chapter.

Your turn

- *Say it: nakhodít*
- *Say it: nakhodít*, once more
- *Say it:* say *nakhodít*

Before you move on

What does находить mean? ("To find".) Say it once more.

134.5 искать (iskát) — to look for

Before the new one: say the Russian for to tidy up, then the Russian for to find.

You'll want to know: искать

искать (*iskát*) — "to look for".

The word, taken apart — and its English cousins

искать ← Proto-Slavic **iskati* — inherited. Vasmer relates it to Lithuanian *ieškóti*, "to seek", Sanskrit *iccháti*, "seeks, wishes", and Old English *āscian*, so English *ask* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: iskát*
- *Say it: iskát*, once more
- *Say it:* say *iskát*
- *Recall:* say the Russian for to tidy up, then the Russian for to find, then say *iskát* again

135.1 терять (teryát) — to lose

Before the new one: say the Russian for to find, then the Russian for to look for.

You'll want to know: терять

терять (*teryát*) — "to lose".

The word, taken apart — and its English cousins

терять — Old Russian терять meant "to destroy, to ruin". Vasmer finds its link with the South Slavic verbs for "to chase" uncertain and puts the East Slavic word with тереть, "to rub, to wear away".

What you've built

One more word for this chapter.

Your turn

- *Say it: teryát*
- *Say it: teryát*, once more
- *Say it:* say *teryát*

- *Recall:* say the Russian for to lose, then the Russian for to win, then say *smotrét* again

Before you move on

What does смотреть mean? ("To look, to watch".) Say it once more.

135.4 рисовать (risovát) — to draw

Before the new one: say the Russian for to win, then the Russian for to look.

You'll want to know: рисовать

рисовать (*risovát*) — "to draw".

The word, taken apart — and its English cousins

рисовать came through Polish *rysować* from Middle High German *rîzen*, Old High German *rîzzan*, "to scratch, to draw", a cousin of English *write* (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: risovát*
- *Say it: risovát*, once more
- *Say it:* say *risovát*
- *Recall:* say the Russian for to win, then the Russian for to look, then say *risovát* again

Before you move on

What does рисовать mean? ("To draw".) Say it once more.

135.5 путешествовать (puteshéstvovat) — to travel

Before the new one: say the Russian for to look, then the Russian for to draw.

You'll want to know: путешествовать

путешествовать (*puteshéstvovat*) — "to travel".

The word, taken apart — and its English cousins

путешествовать is the verb of путешествие, "a journey": путь, "way", with шествовать, "to march, to proceed". Путь ← Proto-Slavic **pǫtĭ*, kin to Sanskrit *pánthās*, "path" (Vasmer); шествие is borrowed from Church Slavonic.

What you've built

One more word for this chapter.

Your turn

- *Say it: puteshéstvovat*
- *Say it: puteshéstvovat*, once more
- *Say it:* say *puteshéstvovat*
- *Recall:* say the Russian for to look, then the Russian for to draw, then say *puteshéstvovat* again

Before you move on

What does путешествовать mean? ("To travel".) Say it once more.

Nobody, Nothing, Nowhere, To Nowhere, What For

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that there is nobody and nothing, and ask what something is for.
>
> *Complete the last lesson of chapter 136: I can say that there is nobody and nothing, and ask what something is for.*

136.1 никто (niktó) — nobody

Before the new one: say the Russian for to draw, then the Russian for to travel.

You'll want to know: никто

никто (*niktó*) — "nobody". Russian still puts не before the verb: Никто не знает. — *niktó ne znáyet* — "Nobody knows." Two negatives make one "no".

The word, taken apart — and its English cousins

никто is ни, "not even", with кто, "who" (Vasmer): "not anyone". Vasmer compares Lithuanian *niẽkas*, "nobody, nothing".

What you've built

One more word for this chapter.

Your turn

- *Say it: niktó*
- *Say it: niktó*, once more
- *Say it:* say *niktó*

Before you move on

What does нигде mean? ("Nowhere".) Say it once more.

136.4 никуда (nikudá) — (to) nowhere

Before the new one: say the Russian for nothing, then the Russian for nowhere.

You'll want to know: никуда

никуда (*nikudá*) — "(to) nowhere". It is куда with ни-, so it answers "where to?": Я никуда не иду. — *ya nikudá ne idú* — "I'm not going anywhere."

The word, taken apart — and its English cousins

никуда is ни, "not even", with куда, "where to": "to no place". Vasmer compares куда with Latin *quandō*, "when".

What you've built

One more word for this chapter.

Your turn

- *Say it: nikudá*
- *Say it: nikudá*, once more
- *Say it:* say *nikudá*
- *Recall:* say the Russian for nothing, then the Russian for nowhere, then say *nikudá* again

Before you move on

What does никуда mean? ("(to) nowhere".) Say it once more.

136.5 зачем (zachém) — what for

Before the new one: say the Russian for nowhere, then the Russian for (to) nowhere.

You'll want to know: зачем

зачем (*zachém*) — "what for". It asks about the purpose; почему asks about the cause. Зачем? — "What for?"

The word, taken apart — and its English cousins

зачем is за, "for, after", with чем, a form of что, "what": "for what". Vasmer traces что to Proto-Slavic **čь*, "what", with a pointing *to* on the end.

What you've built

One more word for this chapter.

Your turn

Chapter 137

Recently, for a Long Time, Before, Last, To Happen

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what happened, and when: recently, last week, a long time ago.
>
> *Complete the last lesson of chapter 137: I can say what happened, and when: recently, last week, a long time ago.*

137.1 недавно (nedávno) — recently

Before the new one: say the Russian for (to) nowhere, then the Russian for what for.

You'll want to know: недавно

недавно (*nedávno*) — "recently". Russian's past usually ends in -л, with -ла for a woman: Недавно я читал книгу. — *nedávno ya chitál knígu* — "Recently I read a book." A woman says читала.

The word, taken apart — and its English cousins

недавно is не, "not", with давно, "long ago": not long ago. давно goes with old даве, "earlier". Vasmer relates даве to Latin *dūdum*, "a while ago", and Greek *dēn*, "long".

What you've built

One more word for this chapter.

Your turn

- *Say it: nedávno*
- *Say it: nedávno*, once more
- *Say it:* say *nedávno*
- *Recall:* say the Russian for (to) nowhere, then the Russian for what for, then say *nedávno* again

Before you move on

What does недавно mean? ("Recently".) Say it once more.

137.2 давно (davnó) — long ago; for a long time

Before the new one: say the Russian for what for, then the Russian for recently.

You'll want to know: давно

давно (*davnó*) — "long ago; for a long time". With the present it means "for a long time": Я давно здесь живу. — *ya davnó zdes zhivú* — "I have lived here for a long time."

The word, taken apart — and its English cousins

давно comes from давний, "of long ago", which goes with давеча, "a while ago" (Vasmer). Vasmer relates that root to Greek *dēn*, "for a long time", and Latin *dūdum*, "a while ago".

What you've built

One more word for this chapter.

Your turn

- *Say it: davnó*
- *Say it: davnó*, once more

137.3 раньше (ránshe) — before, earlier

Before the new one: say the Russian for recently, then the Russian for long ago; for a long time.

You'll want to know: раньше

раньше (*ránshe*) — "before, earlier". Раньше здесь был парк. — *ránshe zdes byl park* — "There used to be a park here." был is the past of быть.

The word, taken apart — and its English cousins

раньше is the comparing form of рано, "early": "earlier, before". рано is an old Slavic word that Vasmer calls hard to explain.

What you've built

One more word for this chapter.

Your turn

- *Say it: ránshe*
- *Say it: ránshe*, once more
- *Say it:* say *ránshe*

- *Recall:* say the Russian for recently, then the Russian for long ago; for a long time, then say *ránshe* again

137.4 прошлый (próshlyy) — last, past

Before the new one: say the Russian for long ago; for a long time, then the Russian for before.

You'll want to know: прошлый

прошлый (*próshlyy*) — "last, past". It agrees with its noun: на прошлой неделе — *na próshloy nedéle* — "last week"; в прошлом году — "last year".

The word, taken apart — and its English cousins

прошлый is built on прошёл, "passed", the past tense of пройти, "to go past". Its -шёл is not from идти, "to go": Vasmer puts шёл with ходить, "to walk". What is past has gone by.

What you've built

One more word for this chapter.

Your turn

- *Say it: próshlyy*
- *Say it: próshlyy*, once more
- *Say it:* say *próshlyy*

137.5 случиться (sluchítsya) — to happen

Before the new one: say the Russian for before, then the Russian for last.

You'll want to know: случиться

случиться (*sluchítsya*) — "to happen". Что случилось? — *shto sluchílos* — "What happened?" случилось is its past with "it".

The word, taken apart — and its English cousins

случиться — Old Church Slavonic лучити ся, "to come about". Vasmer links it with лучить, "to hit upon", and keeps it apart from German *Glück*, "luck".

What you've built

One more word for this chapter.

Your turn

- *Say it: sluchítsya*
- *Say it: sluchítsya*, once more
- *Say it:* say *sluchítsya*
- *Recall:* say the Russian for before, then the Russian for last, then say *sluchítsya* again

Before you move on

What does случиться mean? ("To happen".) Say it once more.

What does через mean? ("In (a week), after".) Say it once more.

138.3 план (plan) — a plan

Before the new one: say the Russian for future, then the Russian for in.

You'll want to know: план

план (*plan*) — "a plan". Какой план? — *kakóy plan* — "What's the plan?" English *plan* is the same word.

The word, taken apart — and its English cousins

план — recorded from 1704; it perhaps came through Polish *plan* or German *Plan* from French *plan*, which Vasmer traces to Latin *planta*, "the sole of the foot, an outline".

What you've built

One more word for this chapter.

Your turn

- *Say it: plan*

What does планировать mean? ("To plan".) Say it once more.

138.5 надеяться (nadéyatsya) — to hope

Before the new one: say the Russian for a plan, then the Russian for to plan.

You'll want to know: надеяться

надеяться (*nadéyatsya*) — "to hope". Я надеюсь, что **...** — *ya nadéyus, shto* — "I hope that ..." Like подниматься, it keeps its -ся, written -сь after a vowel: надеюсь.

The word, taken apart — and its English cousins

надеяться goes with надежда, "hope", which Vasmer calls Church Slavonic, beside the folk надёжа: на, "on", with the root of деть, "to put", so "to place one's trust on".

What you've built

One more word for this chapter.

Your turn

139.4 выход (výkhod) — an exit

Before the new one: say the Russian for an advert, then the Russian for an entrance.

You'll want to know: выход

выход (*výkhod*) — "an exit".

Read it: the sign

The sign says ВЫХОД: the way out. It is вы-, "out", with the same ход as вход.

The word, taken apart — and its English cousins

выход is вы-, "out", with ход, "a going": the way out. Vasmer ties ход to the Indo-European root **sed-*, "to sit", its х grown from an *s* after prefixes.

What you've built

One more word for this chapter.

Your turn

- *Say it: výkhod*
- *Say it: výkhod*, once more
- *Say it:* say *výkhod*
- *Recall:* say the Russian for an advert, then the Russian for an entrance, then say *výkhod* again

Before you move on

What does выход mean? ("An exit".) Say it once more.

139.5 чек (chek) — a receipt

Before the new one: say the Russian for an entrance, then the Russian for an exit.

You'll want to know: чек

чек (*chek*) — "a receipt". Ask for it when you pay: Чек, пожалуйста. — *chek, pozhálusta* — "The receipt, please."

The word, taken apart — and its English cousins

чек came through English *check*, "cheque". Vasmer traced the English word, through Arabic, to Persian *čäk*, "a document"; English dictionaries take *cheque* from *check*, "a control", from the chess word *check*, Persian *shāh*, "king".

What you've built

One more word for this chapter.

Your turn

- *Say it: chek*
- *Say it: chek*, once more

You'll want to know: бросать

бросать (*brosát*) — "to throw".

The word, taken apart — and its English cousins

бросать ← Proto-Slavic **brŭsati* — inherited. Vasmer reports a comparison with Baltic and Slavic words for "to scrape", while Kopečný thought it might imitate a sound, so its origin is unsettled.

What you've built

One more word for this chapter.

Your turn

- *Say it: brosát*
- *Say it: brosát*, once more
- *Say it:* say *brosát*
- *Recall:* say the Russian for to carry; to wear, then the Russian for to hold, then say *brosát* again

Before you move on

What does бросать mean? ("To throw".) Say it once more.

142.4 ловить (lovít) — to catch

Before the new one: say the Russian for to hold, then the Russian for to throw.

You'll want to know: ловить

ловить (*lovít*) — "to catch".

The word, taken apart — and its English cousins

ловить comes from лов, "a catch, a hunt" (Vasmer), which Vasmer relates to Lithuanian *lavùs*, "agile", Greek *leía*, "booty", and Gothic *laun*, "reward".

What you've built

One more word for this chapter.

Your turn

Chapter 158

Alive, Dead, Hungry, Well-fed, Familiar

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say alive, dead, hungry, well-fed and familiar.
>
> *Complete the last lesson of chapter 158: I can say alive, dead, hungry, well-fed and familiar.*

158.1 живой (zhivóy) — alive, lively

Before the new one: say the Russian for tasty, then the Russian for comfortable, convenient.

You'll want to know: живой

живой (*zhivóy*) — "alive, lively".

The word, taken apart — and its English cousins

живой ← Proto-Slavic **živŭ* — inherited. Vasmer lists Lithuanian *gývas*, Sanskrit *jīvá-*, Latin *vīvus* and Gothic *qius*, all "alive": English *quick*, in its old sense "alive", is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: zhivóy*
- *Say it: zhivóy*, once more
- *Say it:* say *zhivóy*
- *Recall:* say the Russian for tasty, then the Russian for comfortable, convenient, then say *zhivóy* again

What does живой mean? ("Alive, lively".) Say it once more.

158.2 мёртвый (myórtvyy) — dead

Before the new one: say the Russian for comfortable, convenient, then the Russian for alive.

You'll want to know: мёртвый

мёртвый (*myórtvyy*) — "dead".

The word, taken apart — and its English cousins

мёртвый ← Proto-Slavic **mĭrtvŭ* — inherited from PIE **mṛtós*, "dead", reshaped after живой, "alive", as Latin *mortuus* was (Vasmer). Vasmer lists Sanskrit *mṛtá-*, "dead", and Greek *brotós*, "mortal".

What you've built

One more word for this chapter.

Your turn

- *Say it: myórtvyy*
- *Say it: myórtvyy*, once more
- *Say it:* say *myórtvyy*

- *Recall:* say the Russian for comfortable, convenient, then the Russian for alive, then say *myórtvyy* again

Before you move on

What does голодный mean? ("Hungry".) Say it once more.

158.4 сытый (sýtyy) — well-fed, full up

Before the new one: say the Russian for dead, then the Russian for hungry.

You'll want to know: сытый

сытый (*sýtyy*) — "well-fed, full up".

The word, taken apart — and its English cousins

сытый ← Proto-Slavic **sytŭ* — inherited. Vasmer finds the comparison with Lithuanian *sotùs*, "full", Gothic *saþs*, "sated", and Latin *satis*, "enough", suggests itself.

What you've built

One more word for this chapter.

Your turn

- *Say it: sýtyy*
- *Say it: sýtyy*, once more
- *Say it:* say *sýtyy*
- *Recall:* say the Russian for dead, then the Russian for hungry, then say *sýtyy* again

158.5 знакомый (znakómyy) — familiar; an acquaintance

Before the new one: say the Russian for hungry, then the Russian for well-fed.

You'll want to know: знакомый

знакомый (*znakómyy*) — "familiar; an acquaintance".

The word, taken apart — and its English cousins

знакомый is built on знак, "a sign, a mark", from знать, "to know": a person you know. знать is a cousin of English *know* and Latin *(g)nōscere*, "to get to know".

What you've built

One more word for this chapter.

Your turn

- *Say it: znakómyy*
- *Say it: znakómyy*, once more
- *Say it:* say *znakómyy*
- *Recall:* say the Russian for hungry, then the Russian for well-fed, then say *znakómyy* again

159.2 предмет (predmét) — an object; a school subject

Before the new one: say the Russian for familiar; an acquaintance, then the Russian for a thing.

You'll want to know: предмет

предмет (*predmét*) — "an object; a school subject".

The word, taken apart — and its English cousins

предмет is пред-, "before", with -мет, "thrown", from метать, "to throw": it copies, through Polish *przedmiot*, Latin *obiectum*, "something thrown before" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: predmét*
- *Say it: predmét*, once more

Before you move on

What does мебель mean? ("Furniture".) Say it once more.

159.4 кресло (kréslo) — an armchair

Before the new one: say the Russian for an object; a school subject, then the Russian for furniture.

You'll want to know: кресло

кресло (*kréslo*) — "an armchair".

The word, taken apart — and its English cousins

кресло ← Proto-Slavic **krěslo* — inherited, a cousin of Lithuanian *krėslas* and Latvian *krēsls*, "chair" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: kréslo*
- *Say it: kréslo*, once more
- *Say it:* say *kréslo*
- *Recall:* say the Russian for an object; a school subject, then the Russian for furniture, then say *kréslo* again

Before you move on

What does кресло mean? ("An armchair".) Say it once more.

159.5 комод (komód) — a chest of drawers

Before the new one: say the Russian for furniture, then the Russian for an armchair.

You'll want to know: комод

комод (*komód*) — "a chest of drawers".

The word, taken apart — and its English cousins

комод comes from French *commode*, “a chest of drawers”, from *commode*, “convenient”, perhaps through German *Kommode* (Vasmer).

What you’ve built

One more word for this chapter.

Your turn

- *Say it: komód*
- *Say it: komód*, once more
- *Say it:* say *komód*
- *Recall:* say the Russian for furniture, then the Russian for an armchair, then say *komód* again

Before you move on

What does комод mean? (“A chest of drawers”.) Say it once more.

160.1 бокал (bokál) — a wine glass

Before the new one: say the Russian for an armchair, then the Russian for a chest of drawers.

You'll want to know: бокал

бокал (*bokál*) — "a wine glass".

The word, taken apart — and its English cousins

бокал comes from French *bocal* or Italian *boccale*, "a goblet"; the rarer покал, under Peter the Great, came from German *Pokal* (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: bokál*
- *Say it: bokál*, once more
- *Say it:* say *bokál*
- *Recall:* say the Russian for an armchair, then the Russian for a chest of drawers, then say *bokál* again

Before you move on

What does бокал mean? ("A wine glass".) Say it once more.

160.2 пакет (pakét) — a bag (plastic or paper)

Before the new one: say the Russian for a chest of drawers, then the Russian for a wine glass.

You'll want to know: пакет

пакет (*pakét*) — "a bag (plastic or paper)".

The word, taken apart — and its English cousins

пакет — older покет, from 1700; it probably came through German *Paket* from French *paquet*, "a bundle" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: pakét*
- *Say it: pakét*, once more
- *Say it:* say *pakét*

160.3 коробка (koróbka) — a box

Before the new one: say the Russian for a wine glass, then the Russian for a bag.

You'll want to know: коробка

коробка (*koróbka*) — "a box".

The word, taken apart — and its English cousins

коробка is короб, "a box of bark", with -ка. Vasmer thinks короб is perhaps related to Latin *corbis*, "a basket", and Lithuanian *karbas*, "a basket"; Miklosich, Berneker and others take it instead as a loan through Old High German *korb* from Latin *corbis*.

What you've built

One more word for this chapter.

Your turn

- *Say it: koróbka*
- *Say it: koróbka*, once more
- *Say it:* say *koróbka*

164.2 вино (vinó) — wine

Before the new one: say the Russian for a pancake, then the Russian for beer.

You'll want to know: вино

вино (*vinó*) — "wine".

The word, taken apart — and its English cousins

вино is usually taken as an ancient Mediterranean word, as in Latin *vīnum*, Greek *oînos* and Gothic *wein*. Vasmer thinks Slavic more likely borrowed it than inherited it, from Latin or from Germanic. English *wine* comes from the Latin word.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *vinó*
- *Say it:* *vinó*, once more

Before the new one: say the Russian for sharp; spicy, then the Russian for useful.

You'll want to know: вредный

вредный (*vrédnyy*) — "harmful".

The word, taken apart — and its English cousins

вредный is вред, "harm", with -ный. вред is Church Slavonic, Vasmer says, beside the native веред, "a boil, a sore".

What you've built

One more word for this chapter.

Your turn

- *Say it: vrédnyy*
- *Say it: vrédnyy*, once more
- *Say it:* say *vrédnyy*
- *Recall:* say the Russian for sharp; spicy, then the Russian for useful, then say *vrédnyy* again

188.3 нужный (núzhnyy) — necessary

Before the new one: say the Russian for useful, then the Russian for harmful.

You'll want to know: нужный

нужный (*núzhnyy*) — "necessary".

The word, taken apart — and its English cousins

нужный is built on нужда, "need", with -ный. Vasmer relates the root to нудить, "to force", and Sanskrit *nudáti*, "pushes away".

What you've built

One more word for this chapter.

Your turn

- *Say it: núzhnyy*
- *Say it: núzhnyy*, once more
- *Say it:* say *núzhnyy*

Before the new one: say the Russian for harmful, then the Russian for necessary.

You'll want to know: возможный

возможный (*vozmózhnyy*) — "possible".

The word, taken apart — and its English cousins

возможный is воз- with мож-, from мочь, "to be able", могу, "I can": "what can be".

What you've built

One more word for this chapter.

Your turn

- *Say it: vozmózhnyy*
- *Say it: vozmózhnyy*, once more
- *Say it:* say *vozmózhnyy*
- *Recall:* say the Russian for harmful, then the Russian for necessary, then say *vozmózhnyy* again

Before you move on

What does возможный mean? ("Possible".) Say it once more.

188.5 сложный (slózhnyy) — complicated

Before the new one: say the Russian for necessary, then the Russian for possible.

You'll want to know: сложный

сложный (*slózhnyy*) — "complicated".

The word, taken apart — and its English cousins

сложный is с-, "together", with лож-, from ложить, "to lay": complicated is "put together from parts".

What you've built

One more word for this chapter.

Your turn

- *Say it: slózhnyy*
- *Say it: slózhnyy*, once more
- *Say it:* say *slózhnyy*
- *Recall:* say the Russian for necessary, then the Russian for possible, then say *slózhnyy* again

189.1 чужой (chuzhóy) — someone else's; unfamiliar

Before the new one: say the Russian for possible, then the Russian for complicated.

You'll want to know: чужой

чужой (*chuzhóy*) — "someone else's; unfamiliar".

The word, taken apart — and its English cousins

чужой ← Proto-Slavic **tjudjĭ*, Old Church Slavonic штуждь. It is usually explained as built on a loan from Gothic *þiuda*, "a people": "belonging to another people" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: chuzhóy*
- *Say it: chuzhóy*, once more
- *Say it:* say *chuzhóy*
- *Recall:* say the Russian for possible, then the Russian for complicated, then say *chuzhóy* again

Before you move on

What does чужой mean? ("Someone else's; unfamiliar".) Say it once more.

189.2 родной (rodnóy) — native; dear

Before the new one: say the Russian for complicated, then the Russian for someone else's; unfamiliar.

You'll want to know: родной

родной (*rodnóy*) — "native; dear".

The word, taken apart — and its English cousins

родной is built on род, "kin, family", with -ной: "of one's own kin". Vasmer relates род to Latvian *rads*, "a relative".

What you've built

One more word for this chapter.

Your turn

- *Say it: rodnóy*
- *Say it: rodnóy*, once more
- *Say it:* say *rodnóy*
- *Recall:* say the Russian for complicated, then the Russian for someone else's; unfamiliar, then say *rodnóy* again

Before you move on

What does родной mean? ("Native; dear".) Say it once more.

189.3 местный (méstnyy) — local

Before the new one: say the Russian for someone else's; unfamiliar, then the Russian for native; dear.

You'll want to know: местный

местный (*méstnyy*) — "local".

The word, taken apart — and its English cousins

местный is место, "a place", with -ный: "of the place". Vasmer relates место to Lithuanian *mìsti*, "to feed oneself", despite a mismatch in accent.

What you've built

One more word for this chapter.

Your turn

- *Say it: méstnyy*
- *Say it: méstnyy*, once more
- *Say it:* say *méstnyy*
- *Recall:* say the Russian for someone else's; unfamiliar, then the Russian for native; dear, then say *méstnyy* again

Before you move on

189.4 иностранный (inostránnyy) — foreign

Before the new one: say the Russian for native; dear, then the Russian for local.

You'll want to know: иностранный

иностранный (*inostránnyy*) — "foreign".

The word, taken apart — and its English cousins

иностранный is иной, "other", with страна, "a country", the Church Slavonic shape of сторона, "side": "of another land". Vasmer confirms страна as borrowed from Church Slavonic, and relates иной to Latin *ūnus*, "one".

What you've built

One more word for this chapter.

Your turn

- *Say it: inostránnyy*
- *Say it: inostránnyy*, once more
- *Say it:* say *inostránnyy*
- *Recall:* say the Russian for native; dear, then the Russian for local, then say *inostránnyy* again

Before you move on

What does иностранный mean? ("Foreign".) Say it once more.

189.5 русский (rússkiy) — Russian

Before the new one: say the Russian for local, then the Russian for foreign.

You'll want to know: русский

русский (*rússkiy*) — "Russian".

The word, taken apart — and its English cousins

русский comes from Русь, the old name of the land and its people (Vasmer). Vasmer traces Русь to Old Norse *Róþsmenn*, "rowers,

seafarers", the name of the Scandinavian newcomers, which reached the Slavs through the Finns, who still call Sweden *Ruotsi*; Trubachev's note cites critics of that account, so it is still debated.

What you've built

One more word for this chapter.

Your turn

- *Say it: rússkiy*
- *Say it: rússkiy*, once more
- *Say it:* say *rússkiy*
- *Recall:* say the Russian for local, then the Russian for foreign, then say *rússkiy* again

Before the new one: say the Russian for Russian, then the Russian for a heavy curtain.

You'll want to know: раковина

раковина (*rákovina*) — "a sink".

The word, taken apart — and its English cousins

раковина ← Old Russian раковина, "mother-of-pearl", built on **raky*, "a case, a shell", which Vasmer traces through Germanic **arkō*, Gothic *arka*, to Latin *arca*, "a box". Jakobson tied it instead to рак, "a crayfish".

What you've built

One more word for this chapter.

Your turn

- *Say it: rákovina*
- *Say it: rákovina*, once more
- *Say it:* say *rákovina*

Before you move on

What does туалет mean? ("A toilet".) Say it once more.

190.5 шампунь (shampún) — shampoo

Before the new one: say the Russian for a tap, then the Russian for a toilet.

You'll want to know: шампунь

шампунь (*shampún*) — "shampoo".

The word, taken apart — and its English cousins

шампунь comes from English *shampoo*, from Hindi *chāmpo*, "press, knead!", first a massage in the bath.

What you've built

One more word for this chapter.

Your turn

- *Say it: shampún*
- *Say it: shampún*, once more
- *Say it:* say *shampún*

Before the new one: say the Russian for shampoo, then the Russian for a radiator; a battery.

You'll want to know: розетка

розетка (*rozétka*) — "a socket".

The word, taken apart — and its English cousins

розетка came through German *Rosette* or straight from French *rosette*, "a little rose", from *rose*, "a rose" (Vasmer): an electric socket was a round rose-shaped fitting.

What you've built

One more word for this chapter.

Your turn

- *Say it: rozétka*
- *Say it: rozétka*, once more
- *Say it:* say *rozétka*

- *Recall:* say the Russian for shampoo, then the Russian for a radiator; a battery, then say *rozétka* again

Before you move on

What does розетка mean? ("A socket".) Say it once more.

191.3 провод (próvod) — a wire, a cable

Before the new one: say the Russian for a radiator; a battery, then the Russian for a socket.

You'll want to know: провод

провод (*próvod*) — "a wire, a cable".

The word, taken apart — and its English cousins

провод is про-, "through", with вод, from водить, "to lead": a wire leads current through.

What you've built

One more word for this chapter.

Your turn

- *Say it: próvod*
- *Say it: próvod*, once more
- *Say it:* say *próvod*
- *Recall:* say the Russian for a radiator; a battery, then the Russian for a socket, then say *próvod* again

What does газета mean? ("A newspaper".) Say it once more.

192.2 журнал (zhurnál) — a magazine

Before the new one: say the Russian for a laptop, then the Russian for a newspaper.

You'll want to know: журнал

журнал (*zhurnál*) — "a magazine".

The word, taken apart — and its English cousins

журнал — from 1720, written юрнал by Peter the Great; it comes from French *journal*, from Medieval Latin *diurnālis*, "daily" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: zhurnál*
- *Say it: zhurnál*, once more
- *Say it:* say *zhurnál*

Before you move on

What does журнал mean? ("A magazine".) Say it once more.

192.3 словарь (slovár) — a dictionary

Before the new one: say the Russian for a newspaper, then the Russian for a magazine.

You'll want to know: словарь

словарь (*slovár*) — "a dictionary".

The word, taken apart — and its English cousins

словарь is слово, "a word", with -арь, a suffix for a thing or keeper: a book of words. Слово ← Proto-Slavic **slovo* — inherited; Vasmer relates it to Sanskrit *śrávas*, "fame".

What you've built

One more word for this chapter.

Your turn

- *Say it: slovár*
- *Say it: slovár*, once more
- *Say it:* say *slovár*
- *Recall:* say the Russian for a newspaper, then the Russian for a magazine, then say *slovár* again

Before you move on

What does словарь mean? ("A dictionary".) Say it once more.

192.4 линейка (linéyka) — a ruler

Before the new one: say the Russian for a magazine, then the Russian for a dictionary.

You'll want to know: линейка

линейка (*linéyka*) — "a ruler".

The word, taken apart — and its English cousins

линейка comes from линея, an older form of линия, "a line" (Vasmer), with -йка; линия came through Polish *linia* or German *Linie* from Latin *līnea*, "a linen thread", from *līnum*, "flax".

What you've built

One more word for this chapter.

Your turn

- *Say it: linéyka*
- *Say it: linéyka*, once more
- *Say it:* say *linéyka*
- *Recall:* say the Russian for a magazine, then the Russian for a dictionary, then say *linéyka* again

Before you move on

What does линейка mean? ("A ruler".) Say it once more.

192.5 папка (pápka) — a folder

Before the new one: say the Russian for a dictionary, then the Russian for a ruler.

You'll want to know: папка

папка (*pápka*) — "a folder".

The word, taken apart — and its English cousins

папка comes from German *Pappe*, "pasteboard", named for the paste that once glued its layers, from *Pappe*, "mush" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: pápka*
- *Say it: pápka*, once more
- *Say it:* say *pápka*
- *Recall:* say the Russian for a dictionary, then the Russian for a ruler, then say *pápka* again

Before you move on

What does папка mean? ("A folder".) Say it once more.

Chapter 193

Brimmed hat, Belt, Pocket, Button, Earrings

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

193.1 шляпа (shlyápa) — a brimmed hat

Before the new one: say the Russian for a ruler, then the Russian for a folder.

You'll want to know: шляпа

шляпа (*shlyápa*) — "a brimmed hat".

The word, taken apart — and its English cousins

шляпа — recorded from 1589; it comes from Bavarian *Schlappe*, "a cap", Middle High German *slappe*, "a soft, drooping hat" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: shlyápa*
- *Say it: shlyápa*, once more
- *Say it:* say *shlyápa*
- *Recall:* say the Russian for a ruler, then the Russian for a folder, then say *shlyápa* again

Before you move on

What does шляпа mean? ("A brimmed hat".) Say it once more.

193.2 ремень (remén) — a belt

Before the new one: say the Russian for a folder, then the Russian for a brimmed hat.

You'll want to know: ремень

ремень (*remén*) — "a belt".

The word, taken apart — and its English cousins

ремень ← Proto-Slavic **remy*, **remene* — inherited. Vasmer holds that a loan from Old High German *riumo*, "a strap", is impossible on the evidence of Old Church Slavonic and old word-building.

What you've built

One more word for this chapter.

Your turn

- *Say it: remén*
- *Say it: remén*, once more
- *Say it:* say *remén*
- *Recall:* say the Russian for a folder, then the Russian for a brimmed hat, then say *remén* again

Before you move on

What does ремень mean? ("A belt".) Say it once more.

193.3 карман (karmán) — a pocket

Before the new one: say the Russian for a brimmed hat, then the Russian for a belt.

You'll want to know: карман

карман (*karmán*) — "a pocket".

The word, taken apart — and its English cousins

карман — Old Russian already had the name *Kormanŭ*. Turkic *karman*, "a pocket, a purse", was once taken as the source; Radloff saw it as a loan from Russian, and Räsänen again argued for a Turkic origin (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: karmán*
- *Say it: karmán*, once more
- *Say it:* say *karmán*
- *Recall:* say the Russian for a brimmed hat, then the Russian for a belt, then say *karmán* again

Before you move on

What does карман mean? ("A pocket".) Say it once more.

193.4 пуговица (púgovitsa) — a button

Before the new one: say the Russian for a belt, then the Russian for a pocket.

You'll want to know: пуговица

пуговица (*púgovitsa*) — "a button".

The word, taken apart — and its English cousins

пуговица ← Old Russian *pugŭvĭ*, пугы, "a button", with -ица. It is usually compared with Latvian *puoga*, "a button", and Sanskrit *puñja-*, "a lump" (Vasmer), though Persson separated the Sanskrit.

What you've built

One more word for this chapter.

Your turn

- *Say it: púgovitsa*
- *Say it: púgovitsa*, once more
- *Say it:* say *púgovitsa*
- *Recall:* say the Russian for a belt, then the Russian for a pocket, then say *púgovitsa* again

What does пуговица mean? ("A button".) Say it once more.

193.5 серьги (sérgi) — earrings

Before the new one: say the Russian for a pocket, then the Russian for a button.

You'll want to know: серьги

серьги (*sérgi*) — "earrings".

The word, taken apart — and its English cousins

серьги is the plural of серьга, “an earring”. One view reshapes Old Russian усерязь, “an earring”, but Vasmer finds the г hard to explain and prefers a loan from an Old Chuvash word for “a ring”; Räsänen, in Trubachev’s note, derives it from Chagatai and other Turkic *isirga*, “ear pendants”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: sérgi*
- *Say it: sérgi*, once more
- *Say it:* say *sérgi*
- *Recall:* say the Russian for a pocket, then the Russian for a button, then say *sérgi* again

194.1 пельмени (pelméni) — dumplings

Before the new one: say the Russian for a button, then the Russian for earrings.

You'll want to know: пельмени

пельмени (*pelméni*) — "dumplings".

The word, taken apart — and its English cousins

пельмени comes from Komi and Udmurt *peľńań*, from *peľ*, "ear", with *ńań*, "bread", for their shape (Vasmer, after Kalima).

What you've built

One more word for this chapter.

Your turn

- *Say it: pelméni*
- *Say it: pelméni*, once more
- *Say it:* say *pelméni*
- *Recall:* say the Russian for a button, then the Russian for earrings, then say *pelméni* again

Before you move on

What does пельмени mean? ("Dumplings".) Say it once more.

194.2 салат (salát) — a salad

Before the new one: say the Russian for earrings, then the Russian for dumplings.

You'll want to know: салат

салат (*salát*) — "a salad".

The word, taken apart — and its English cousins

салат came through French *salade* from Italian *salata*, "something salted" (Vasmer), from Latin *sāl*, "salt".

What you've built

One more word for this chapter.

Your turn

- *Say it: salát*
- *Say it: salát*, once more
- *Say it:* say *salát*
- *Recall:* say the Russian for earrings, then the Russian for dumplings, then say *salát* again

Before you move on

What does салат mean? ("A salad".) Say it once more.

194.3 капуста (kapústa) — cabbage

Before the new one: say the Russian for dumplings, then the Russian for a salad.

You'll want to know: капуста

капуста (*kapústa*) — "cabbage".

The word, taken apart — and its English cousins

капуста — recorded from 1193; Vasmer thinks it probably blends Medieval Latin *composita*, Italian *composta*, "a mixture, pickled greens", with Old High German *chapuz*, "cabbage", from Latin *caputium*, "a cabbage head", from *caput*, "head".

What you've built

One more word for this chapter.

Your turn

- *Say it: kapústa*
- *Say it: kapústa*, once more
- *Say it:* say *kapústa*
- *Recall:* say the Russian for dumplings, then the Russian for a salad, then say *kapústa* again

Before you move on

What does капуста mean? ("Cabbage".) Say it once more.

194.4 свёкла (svyókla) — beetroot

Before the new one: say the Russian for a salad, then the Russian for cabbage.

You'll want to know: свёкла

свёкла (*svyókla*) — "beetroot".

The word, taken apart — and its English cousins

свёкла — Old Russian *seuklŭ*, from 1073 — comes from Greek *seûklon*, *seûtlon*, "beet" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: svyókla*
- *Say it: svyókla*, once more
- *Say it:* say *svyókla*
- *Recall:* say the Russian for a salad, then the Russian for cabbage, then say *svyókla* again

Before you move on

What does свёкла mean? ("Beetroot".) Say it once more.

194.5 горох (gorókh) — peas

Before the new one: say the Russian for cabbage, then the Russian for beetroot.

You'll want to know: горох

горох (*gorókh*) — "peas".

The word, taken apart — and its English cousins

горох ← Proto-Slavic **gorxŭ* — inherited. Vasmer thinks it probably related to Lithuanian *garšvà*, a weed, and Sanskrit *gharṣati*, "rubs". Bulgarian has грах, "peas", with -ра- for Russian -оро-.

What you've built

One more word for this chapter.

Your turn

- *Say it: gorókh*
- *Say it: gorókh*, once more
- *Say it:* say *gorókh*
- *Recall:* say the Russian for cabbage, then the Russian for beetroot, then say *gorókh* again

Before you move on

What does горох mean? ("Peas".) Say it once more.

Chapter 195

195.1 природа (priróda) — nature

Before the new one: say the Russian for beetroot, then the Russian for peas.

You'll want to know: природа

природа (*priróda*) — "nature".

The word, taken apart — and its English cousins

природа is при- with род, "birth, kin": what one is born with, then nature itself. It copies Greek *phýsis* and Latin *nātūra*, both "birth, nature".

What you've built

One more word for this chapter.

Your turn

- *Say it: priróda*
- *Say it: priróda*, once more
- *Say it:* say *priróda*
- *Recall:* say the Russian for beetroot, then the Russian for peas, then say *priróda* again

Before you move on

What does природа mean? ("Nature".) Say it once more.

195.2 ветка (vétka) — a branch

Before the new one: say the Russian for peas, then the Russian for nature.

You'll want to know: ветка

ветка (*vétka*) — "a branch".

The word, taken apart — and its English cousins

ветка comes from ветвь, "a bough", which Vasmer puts with вить, "to twist", and relates to Lithuanian *vytìs*, "a willow switch", and Latin *vītis*, "a vine".

What you've built

One more word for this chapter.

Your turn

- *Say it: vétka*
- *Say it: vétka*, once more
- *Say it:* say *vétka*
- *Recall:* say the Russian for peas, then the Russian for nature, then say *vétka* again

Before you move on

What does ветка mean? ("A branch".) Say it once more.

195.3 корень (kóren) — a root

Before the new one: say the Russian for nature, then the Russian for a branch.

You'll want to know: корень

корень (*kóren*) — "a root".

The word, taken apart — and its English cousins

корень ← Proto-Slavic **korenĭ* — inherited, a cousin of Lithuanian *kẽras*, "a bush, a root", and Latvian *cers*, "a bush" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: kóren*
- *Say it: kóren*, once more
- *Say it:* say *kóren*
- *Recall:* say the Russian for nature, then the Russian for a branch, then say *kóren* again

Before you move on

What does корень mean? ("A root".) Say it once more.

195.4 роза (róza) — a rose

Before the new one: say the Russian for a branch, then the Russian for a root.

You'll want to know: роза

роза (*róza*) — "a rose".

The word, taken apart — and its English cousins

роза came through German *Rose* from Latin *rosa*, "a rose" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: róza*
- *Say it: róza*, once more
- *Say it:* say *róza*
- *Recall:* say the Russian for a branch, then the Russian for a root, then say *róza* again

Before you move on

What does роза mean? ("A rose".) Say it once more.

195.5 дуб (dub) — an oak

Before the new one: say the Russian for a root, then the Russian for a rose.

You'll want to know: дуб

дуб (*dub*) — "an oak".

The word, taken apart — and its English cousins

дуб ← Proto-Slavic **dǫbŭ* — inherited. Vasmer apparently starts from **dombros*, from the root of Greek *démō*, "I build", and Old Norse *timbr*: English *timber* would be a cousin; the account is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: dub*
- *Say it: dub*, once more
- *Say it:* say *dub*
- *Recall:* say the Russian for a root, then the Russian for a rose, then say *dub* again

Before you move on

What does дуб mean? ("An oak".) Say it once more.

196.1 крыса (krýsa) — a rat

Before the new one: say the Russian for a rose, then the Russian for an oak.

You'll want to know: крыса

крыса (*krýsa*) — "a rat".

The word, taken apart — and its English cousins

крыса — Vasmer finds none of the existing explanations reliable: a reshaping of the root of грызть, "to gnaw", links with крот, "mole", or кровь, "blood", and others.

What you've built

One more word for this chapter.

Your turn

- *Say it: krýsa*
- *Say it: krýsa*, once more
- *Say it:* say *krýsa*
- *Recall:* say the Russian for a rose, then the Russian for an oak, then say *krýsa* again

Before you move on

What does крыса mean? ("A rat".) Say it once more.

196.2 паук (paúk) — a spider

Before the new one: say the Russian for an oak, then the Russian for a rat.

You'll want to know: паук

паук (*paúk*) — "a spider".

The word, taken apart — and its English cousins

паук is па- with **ǫkŭ*, "a hook", for the spider's bent legs (Vasmer). Vasmer relates the root to Greek *ónkos*, "a hook", and Latin *uncus*, "hooked".

What you've built

One more word for this chapter.

Your turn

- *Say it: paúk*
- *Say it: paúk*, once more
- *Say it:* say *paúk*
- *Recall:* say the Russian for an oak, then the Russian for a rat, then say *paúk* again

Before you move on

What does паук mean? ("A spider".) Say it once more.

196.3 комар (komár) — a mosquito

Before the new one: say the Russian for a rat, then the Russian for a spider.

You'll want to know: комар

комар (*komár*) — "a mosquito".

The word, taken apart — and its English cousins

комар ← Proto-Slavic **komarŭ* — inherited. Vasmer relates it to Lithuanian *kamãnė*, "a bumblebee", and Old Prussian *camus*, "bumblebee", and probably Middle High German *hummen*, "to hum".

What you've built

One more word for this chapter.

Your turn

- *Say it: komár*
- *Say it: komár*, once more
- *Say it:* say *komár*
- *Recall:* say the Russian for a rat, then the Russian for a spider, then say *komár* again

Before you move on

What does комар mean? ("A mosquito".) Say it once more.

196.4 муха (múkha) — a fly

Before the new one: say the Russian for a spider, then the Russian for a mosquito.

You'll want to know: муха

муха (*múkha*) — "a fly".

The word, taken apart — and its English cousins

муха ← Proto-Slavic **muxa* — inherited, with мошка, "a midge" (Vasmer). Latin *musca*, "fly", and Greek *muîa*, "fly", go back to the same PIE word.

What you've built

One more word for this chapter.

Your turn

- *Say it: múkha*
- *Say it: múkha*, once more
- *Say it:* say *múkha*
- *Recall:* say the Russian for a spider, then the Russian for a mosquito, then say *múkha* again

Before you move on

What does муха mean? ("A fly".) Say it once more.

196.5 жук (zhuk) — a beetle

Before the new one: say the Russian for a mosquito, then the Russian for a fly.

You'll want to know: жук

жук (*zhuk*) — "a beetle".

The word, taken apart — and its English cousins

жук is built on a sound-imitating stem, the one in жужжать, "to buzz" (Vasmer): the beetle as the buzzer.

What you've built

One more word for this chapter.

Your turn

- *Say it: zhuk*
- *Say it: zhuk*, once more
- *Say it:* say *zhuk*
- *Recall:* say the Russian for a mosquito, then the Russian for a fly, then say *zhuk* again

Before you move on

What does жук mean? ("A beetle".) Say it once more.

Before the new one: say the Russian for a beetle, then the Russian for a hobby.

You'll want to know: выставка

выставка (*výstavka*) — "an exhibition".

The word, taken apart — and its English cousins

выставка comes from выставить, "to put out on show", вы-, "out", with ставить, "to set", from стать, "to stand".

What you've built

One more word for this chapter.

Your turn

- *Say it: výstavka*
- *Say it: výstavka*, once more
- *Say it:* say *výstavka*
- *Recall:* say the Russian for a beetle, then the Russian for a hobby, then say *výstavka* again

Before you move on

What does выставка mean? ("An exhibition".) Say it once more.

197.3 спектакль (spektákl) — a play, a show

Before the new one: say the Russian for a hobby, then the Russian for an exhibition.

You'll want to know: спектакль

спектакль (*spektákl*) — "a play, a show".

The word, taken apart — and its English cousins

спектакль comes from French *spectacle*, from Latin *spectāculum*, "a show", perhaps through German *Spektakel* (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: spektákl*
- *Say it: spektákl*, once more
- *Say it:* say *spektákl*
- *Recall:* say the Russian for a hobby, then the Russian for an exhibition, then say *spektákl* again

200.1 секрет (sekrét) — a secret

Before the new one: say the Russian for a tourist, then the Russian for a text.

You'll want to know: секрет

секрет (*sekrét*) — "a secret".

The word, taken apart — and its English cousins

секрет — from Peter the Great's time; it perhaps came through Polish *sekret*, or from French *secret*, from Latin *sēcrētus*, "set apart, hidden" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: sekrét*
- *Say it: sekrét*, once more
- *Say it:* say *sekrét*
- *Recall:* say the Russian for a tourist, then the Russian for a text, then say *sekrét* again

Before you move on

What does секрет mean? ("A secret".) Say it once more.

200.2 шутка (shútka) — a joke

Before the new one: say the Russian for a text, then the Russian for a secret.

You'll want to know: шутка

шутка (*shútka*) — "a joke".

The word, taken apart — and its English cousins

шутка comes from шутить, "to joke", and шут, "a jester", recorded from 1076. Vasmer reports a suggested link with Lithuanian *siaũsti*, "to rage, to frolic", and doubts a loan from German *Schaute*, "a fool".

What you've built

One more word for this chapter.

Your turn

- *Say it: shútka*
- *Say it: shútka*, once more
- *Say it:* say *shútka*
- *Recall:* say the Russian for a text, then the Russian for a secret, then say *shútka* again

Before you move on

What does шутка mean? ("A joke".) Say it once more.

200.3 смех (smekh) — laughter

Before the new one: say the Russian for a secret, then the Russian for a joke.

You'll want to know: смех

смех (*smekh*) — "laughter".

The word, taken apart — and its English cousins

смех ← Proto-Slavic **směxŭ*, with смеяться, "to laugh" — inherited (Vasmer). Vasmer relates the root to Sanskrit *smáyate*, "smiles", and Middle English *smilen*, "to smile".

What you've built

One more word for this chapter.

Your turn

- *Say it: smekh*
- *Say it: smekh*, once more
- *Say it:* say *smekh*
- *Recall:* say the Russian for a secret, then the Russian for a joke, then say *smekh* again

200.4 слёзы (slyózy) — tears

Before the new one: say the Russian for a joke, then the Russian for laughter.

You'll want to know: слёзы

слёзы (*slyózy*) — "tears".

The word, taken apart — and its English cousins

слёзы is the plural of слеза, "a tear", Proto-Slavic **slĭza* — inherited. Vasmer thinks it more likely belongs with слизь, "slime", and Middle Low German *slîk*, "slime".

What you've built

One more word for this chapter.

Your turn

- *Say it: slyózy*
- *Say it: slyózy*, once more
- *Say it:* say *slyózy*

Before you move on

What does слёзы mean? ("Tears".) Say it once more.

200.5 улыбка (ulýbka) — a smile

Before the new one: say the Russian for laughter, then the Russian for tears.

You'll want to know: улыбка

улыбка (*ulýbka*) — "a smile".

The word, taken apart — and its English cousins

улыбка goes with улыбаться, "to smile", from dialect лыбить, "to smile". Vasmer calls лыбить unclear and finds the proposed links, with луб, "bast", or Latin *labō*, "I totter", unconvincing.

What you've built

One more word for this chapter.

Your turn

- *Say it: ulýbka*
- *Say it: ulýbka*, once more
- *Say it:* say *ulýbka*
- *Recall:* say the Russian for laughter, then the Russian for tears, then say *ulýbka* again

Before the new one: say the Russian for an orange, then the Russian for a lemon.

You'll want to know: банан

банан (*banán*) — "a banana".

The word, taken apart — and its English cousins

банан probably came from French *banane*, from a word of Kikongo, a language of the Congo (Vasmer); German *Banane* would have given a feminine noun.

What you've built

One more word for this chapter.

Your turn

- *Say it: banán*
- *Say it: banán*, once more
- *Say it:* say *banán*
- *Recall:* say the Russian for an orange, then the Russian for a lemon, then say *banán* again

223.5 виноград (vinográd) — grapes

Before the new one: say the Russian for a lemon, then the Russian for a banana.

You'll want to know: виноград

виноград (*vinográd*) — "grapes".

The word, taken apart — and its English cousins

виноград — taken from Church Slavonic, says Vasmer, where it meant "a vine, a vineyard": вино, "wine", with град, "an enclosure". Some see a model in Gothic *weinagards*, "vineyard".

What you've built

One more word for this chapter.

Your turn

- *Say it: vinográd*

What does свинина mean? ("Pork".) Say it once more.

249.4 баранина (baránina) — lamb (meat)

Before the new one: say the Russian for cottage cheese, then the Russian for pork.

You'll want to know: баранина

баранина (*baránina*) — "lamb (meat)".

The word, taken apart — and its English cousins

баранина is баран, "a ram", with -ина, a suffix for meat. Vasmer reports the view that баран is an ancient Alpine word, compared with Albanian *berr*, "sheep"; Trubachev, in a note, explains it otherwise.

What you've built

One more word for this chapter.

Your turn

- *Say it: baránina*
- *Say it: baránina*, once more
- *Say it:* say *baránina*
- *Recall:* say the Russian for cottage cheese, then the Russian for pork, then say *baránina* again

Before you move on

What does баранина mean? ("Lamb (meat)".) Say it once more.

249.5 ветчина (vetchiná) — ham

Before the new one: say the Russian for pork, then the Russian for lamb.

You'll want to know: ветчина

ветчина (*vetchiná*) — "ham".

The word, taken apart — and its English cousins

ветчина — Vasmer thinks it very likely comes from ветхий, "old", built like свежина, "fresh meat": ham is meat kept a long time. A link with Polish *wędzić*, "to smoke", he finds less convincing.

What you've built

One more word for this chapter.

Your turn

- *Say it: vetchiná*
- *Say it: vetchiná*, once more
- *Say it:* say *vetchiná*
- *Recall:* say the Russian for pork, then the Russian for lamb, then say *vetchiná* again

Before you move on

What does ветчина mean? ("Ham".) Say it once more.

249.6 Words from chapters 241-244 — a first pass

> Before the new one: say the Russian for lamb (meat), then the Russian for ham.

You'll want to know: арбуз

арбуз (*arbúz*) — "a watermelon".

The word, taken apart — and its English cousins

арбуз — recorded in the Domostroy; it came through Kipchak *xarbuz* and Turkish *karpuz* from Persian *xarbuza*, "a melon", literally "donkey melon" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: arbúz*

Before the new one: say the Russian for ham, then the Russian for a watermelon.

You'll want to know: слива

слива (*slíva*) — "a plum".

The word, taken apart — and its English cousins

слива ← Proto-Slavic **sliva* — inherited; it first named a colour (Vasmer). Vasmer relates it to Latin *līvidus*, "bluish", and Old High German *slêha*, "sloe": English *sloe* is a cousin.

What you've built

One more word for this chapter.

Your turn

- *Say it: slíva*
- *Say it: slíva*, once more
- *Say it:* say *slíva*
- *Recall:* say the Russian for ham, then the Russian for a watermelon, then say *slíva* again

Before the new one: say the Russian for a plum, then the Russian for pasta.

You'll want to know: торт

торт (*tort*) — "a cake".

The word, taken apart — and its English cousins

торт apparently came through German *Torte* from Italian *torta*, from Latin *tortus*, "twisted", that is, a round piece of pastry (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: tort*
- *Say it: tort*, once more
- *Say it:* say *tort*
- *Recall:* say the Russian for a plum, then the Russian for pasta, then say *tort* again

Before you move on

What does торт mean? ("A cake".) Say it once more.

250.5 конфета (konféta) — a sweet

Before the new one: say the Russian for pasta, then the Russian for a cake.

You'll want to know: конфета

конфета (*konféta*) — "a sweet".

The word, taken apart — and its English cousins

конфета — first конфекты, under Peter the Great, through German *Konfekt*; the form without -к- came through Italian *confetto*, from Latin *cōnfectum*, "something prepared" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: konféta*
- *Say it: konféta*, once more
- *Say it:* say *konféta*
- *Recall:* say the Russian for pasta, then the Russian for a cake, then say *konféta* again

Before you move on

What does конфета mean? ("A sweet".) Say it once more.

Chapter 251

Bull, Cockerel, Goose, Pigeon, Sparrow

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a bull, a cockerel, a goose, a pigeon and a sparrow.

Before the new one: say the Russian for a bull, then the Russian for a cockerel.

You'll want to know: гусь

гусь (*gus*) — "a goose".

The word, taken apart — and its English cousins

гусь ← Proto-Slavic **gǫsĭ*. If it were inherited from the Indo-European word for "goose", Slavic would have з-, as Lithuanian *žąsìs*, Latin *ānser* and German *Gans* lead one to expect; Vasmer thinks it likeliest that a native **zǫsĭ* was reshaped after Germanic *gans*; others take the whole word from Germanic.

What you've built

One more word for this chapter.

Your turn

- *Say it: gus*
- *Say it: gus*, once more
- *Say it:* say *gus*
- *Recall:* say the Russian for a bull, then the Russian for a cockerel, then say *gus* again

Before you move on

What does гусь mean? ("A goose".) Say it once more.

251.4 голубь (gólub) — a pigeon

Before the new one: say the Russian for a cockerel, then the Russian for a goose.

You'll want to know: голубь

голубь (*gólub*) — "a pigeon".

The word, taken apart — and its English cousins

голубь ← Proto-Slavic **golǫbĭ* — inherited, first probably named for a colour. Vasmer thinks it probably related to Lithuanian *gulbė*, "swan", and жёлтый, "yellow".

What you've built

One more word for this chapter.

Your turn

- *Say it: gólub*
- *Say it: gólub*, once more
- *Say it:* say *gólub*

сообщение (*soobshchéniye*) — "a message".

The word, taken apart — and its English cousins

сообщение comes from сообщить, "to share, to report", from общий, "common", Proto-Slavic **obĭtjĭ*, "what is around" (Vasmer): to make something common. общий itself is the Church Slavonic form, with щ; the native Old Russian form was обчий (Vasmer).

What you've built

What does сообщение mean? ("A message".) Say it once more.

255.5 разговор (razgovór) — a conversation

Before the new one: say the Russian for a number; a hotel room, then the Russian for a message.

You'll want to know: разговор

разговор (*razgovór*) — "a conversation".

The word, taken apart — and its English cousins

разговор is раз-, "about, back and forth", with говор, "talk". Говор is inherited; Vasmer relates it to Latvian *gaura*, "chatter".

256.1 профессор (proféssor) — a professor

Before the new one: say the Russian for a message, then the Russian for a conversation.

You'll want to know: профессор

профессор (*proféssor*) — "a professor".

The word, taken apart — and its English cousins

профессор — from 1720; it came through German *Professor* from Latin *professor*, "a public teacher", from *profitērī*, "to declare openly" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: proféssor*

256.2 журналист (zhurnalíst) — a journalist

Before the new one: say the Russian for a conversation, then the Russian for a professor.

You'll want to know: журналист

журналист (*zhurnalíst*) — "a journalist".

The word, taken apart — and its English cousins

журналист is журнал, "a journal", with -ист. журнал comes from French *journal*, Medieval Latin *diurnālis*, "daily" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: zhurnalíst*
- *Say it: zhurnalíst*, once more

256.3 художник (khudózhnik) — an artist, a painter

Before the new one: say the Russian for a professor, then the Russian for a journalist.

You'll want to know: художник

художник (*khudózhnik*) — "an artist, a painter".

The word, taken apart — and its English cousins

художник comes from Old Russian *xudogŭ*, "skilled", from **xǫdogŭ*, borrowed from a Gothic **handags*, "handy", from *handus*, "hand" (Vasmer). English *hand* is a cousin of the Gothic word.

What you've built

One more word for this chapter.

256.4 музыкант (muzykánt) — a musician

Before the new one: say the Russian for a journalist, then the Russian for an artist.

You'll want to know: музыкант

музыкант (*muzykánt*) — "a musician".

The word, taken apart — and its English cousins

музыкант — from Peter the Great's time; it comes from German *Musikant*, from Latin *mūsicus*, "a musician" (Vasmer).

What you've built

One more word for this chapter.

Your turn

- *Say it: muzykánt*
- *Say it: muzykánt*, once more

257.1 компания (kompániya) — a company

Before the new one: say the Russian for a musician, then the Russian for an actor.

You'll want to know: компания

компания (*kompániya*) — "a company".

The word, taken apart — and its English cousins

компания — first, in 1634, "a trading company"; it came through Polish *kompania* (Vasmer), from Italian *compagnia*, from Latin *com-*, "with", and *pānis*, "bread": people who share bread.

What you've built

One more word for this chapter.

257.2 фирма (fírma) — a firm

Before the new one: say the Russian for an actor, then the Russian for a company.

You'll want to know: фирма

фирма (*fírma*) — "a firm".

The word, taken apart — and its English cousins

фирма came through German *Firma* or straight from Italian *firma*, "a signature" (Vasmer), from *firmare*, "to confirm".

What you've built

One more word for this chapter.

Your turn

- *Say it: fírma*

257.3 проект (proyékt) — a project

Before the new one: say the Russian for a company, then the Russian for a firm.

You'll want to know: проект

проект (*proyékt*) — "a project".

The word, taken apart — and its English cousins

проект — from Peter the Great's time; it probably came through German *Projekt* from Latin *prōiectum*, "something thrown forward" (Vasmer).

What you've built

One more word for this chapter.

257.4 задача (zadácha) — a task; a problem (to solve)

Before the new one: say the Russian for a firm, then the Russian for a project.

You'll want to know: задача

задача (*zadácha*) — "a task; a problem (to solve)".

The word, taken apart — and its English cousins

задача comes from задать, "to set, to assign", за- with дать, "to give": a task is what you are given.

What you've built

One more word for this chapter.

Your turn

257.5 опыт (ópyt) — experience; an experiment

Before the new one: say the Russian for a project, then the Russian for a task; a problem.

You'll want to know: опыт

опыт (*ópyt*) — "experience; an experiment".

The word, taken apart — and its English cousins

опыт comes from пытать, "to test, to try" (Vasmer); Trubachev's note cites a first sense "a trial threshing". Vasmer compares Latin *putāre*, "to reckon, to prune".

What you've built

One more word for this chapter.

Your turn

Chapter 258

Writing — My Own Line

Modes: ✓ **pen** (1) **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can write one line about myself by hand from a closed supply of known words, with nothing to copy, and check л, м, т and я before anything else.
>
> *Complete RU-W258-own-line: я, a verb with its I-ending and the rest, chosen rather than copied, with the handwritten shapes checked first.*

258.1 Your own line — the first writing with no model

Everything you have written so far had something to reach for — a letter to trace, a word to copy, a word you heard.

This does not. You choose the words, from a supply that is closed: only what this book has taught you.

Writing — controlled composition

Write **one line** about yourself, by hand, on paper. Start with я, then a verb you own with its *I*-ending, then the rest. End on a dot.

Copying hid one thing from you: the model always had the right shapes in it. Now your hand chooses them, and three are worth checking on purpose.

л and м — л comes to a **point**, м has a **dip**.

т — if your hand writes it like an *m*, give it the bar over the top. The bar is a habit, not a rule, but it keeps the shape apart from ш in a run of humps.

я — it faces the other way from Latin *R*. A hand that knows English will try to turn it round.

Write the line. Then read it back and check those three letters **before** you check anything else.

Before you move on

What tells л from м by hand? (The top — a **point** or a **dip**.)
And what did you choose here that the earlier lessons chose for you? (**The words**, and so **the shapes**.)

Chapter 259

Writing — With A Clock

Modes: ✓ **pen** (1) 🚗 **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can write lines I own to a named reader inside a three-minute practice clock, and say why, under this book's 66%-everywhere target, the weakest TORFL subtest decides.
>
> *Complete RU-W259-with-a-clock: ten minutes on the book's clock, stop on time, then check the handwritten shapes before counting anything.*

259.1 The same writing, with a clock

You wrote your own line with as long as you liked.

A task you can only do untimed is not yet a task you can do.

Writing — timed production

What the target publishes. Russian's A1 exam is the state test TORFL at its Elementary Level, ТЭУ. The Pushkin Institute describes it as **five separate subtests** — Lexis and Grammar, Reading, Writing, Listening and Speaking — taking about three and a half hours in all.

What this book does **not** quote is the writing paper's own minutes or length. It has not yet transcribed the current paper into `task-shapes/a1.json`, so check the provider's current materials before the exam you book.

So the clock here is this book's, not the exam's, and it is short. Set a **three-minute timer**. Write by hand to one reader you name: who you are, what you do, what you like. Lines you own, a dot at the end of each.

When the three-minute timer rings, **stop**, even mid-word.

Before you move on

Spend at most one minute checking, and do not rewrite the timed lines. Hurry shows in the hand first: check л against м, and the bar over т, before you check anything else.

Now the rule worth carrying out of this lesson, because it changes how you study rather than how you write today.

TORFL scores each subtest **on its own**, and this book's target is **66 percent in every one of the five**. Some TORFL materials describe a narrower allowance for one subtest; this book does not plan around it.

So the paper that decides your result is **the one you are worst at**, and there are five of them, not four. Strong reading cannot carry weak writing.

Chapter 260

Writing — Four Lines And The Comma You Cannot Hear

Modes: ✓ **pen** (1) 🚗 **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can write four connected lines to a named reader, joining with и, но or а and giving a reason with потому что, with a comma in front of every joiner that takes one.
>
> *Complete RU-W260-four-lines: four lines to one reader using* и, но *or* а, *and* потому что, *then check the comma in front of each joiner.*

260.1 Four lines, and the comma you cannot hear

The last lesson asked for writing **finished on time**. This one asks for writing that **holds together**.

Pick one person who will read it.

What to know first

Connected writing is not **longer** writing. Four short lines can be connected; one long line can fail to be. What makes it connected is that a sentence stops standing on its own.

You hold four joiners. и adds. но denies. а stands one thing beside another. потому что gives the reason.

And here is the Russian thing to notice. Said aloud, a join is just a word. Written down, three of these four carry a **mark**: a comma before но, before а, and before потому что — before потому; at this level, never inside the pair.

и between two halves about the same person takes none.

So the ear never hears the comma, and the examiner always sees it. It is the one piece of this lesson a reader can mark wrong without any argument.

Writing — connected composition

Write **four lines** by hand to the person you picked.

At least one must use и, joining two things the same person does. At least one must use но or а. At least one must use потому что — both words, spelled out.

Use only words you already write. This lesson adds no vocabulary; the whole exercise is the joining.

Before you move on

Cover your first line and read the second alone. Does it still make sense without the first? If it does, you wrote a **list** — which is where you were one lesson ago.
Then find every joiner and look just in front of it. A comma before но, а and потому; none before an и that joins two things one person does. Each comma's tail below the line.

Chapter 261

The Past, Seen Two Ways

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say what happened and what was going on in the past, choosing between читал and прочитал, and join two events with когда and пока.
>
> *Complete RU-C261-review: a past evening told aloud, one scene with* пока *and one finished event with* когда*, each verb in the right aspect.*

261.1 читал, читала, читали — the past, and who did it

Say "recently" and "yesterday". (*Nedávno. Vcherá.*) The first came with one past sentence: *Nedávno ya chitál knígu.* This lesson takes that -л apart.

Grammar Lens: -ть becomes -л

Drop the infinitive's -ть and put -л in its place: читать, читал; работать, работал. The past has no endings for *I* or *you*. It changes for **who** did it: -л for a man, -ла for a woman, -ло for a neuter noun.

> Вчера я читал. — *vcherá ya chitál* — Yesterday I read; a man says it. Вчера я читала. — *vcherá ya chitála* — the same, from a woman. Мама работала, а папа читал. — *máma rabótala, a pápa chitál* — Mum was working and Dad was reading.

Папа ends in -а and still takes -л: a father is a man.

Grammar Lens: -ли for more than one

For more than one, gender drops away: -ли. Мы гуляли в парке. — *my gulyáli v párke* — We went for a walk in the park. The polite вы takes -ли even for one person: Вы читали? — *vy chitáli?*

Grammar Lens: был, была, было, были

Быть is silent in the present, but its past follows the same pattern: был (*byl*), была (*bylá*), было (*býlo*), были (*býli*). The stress moves to the end for a woman.

> Я была в музее. — *ya bylá v muzéye* — I was at the museum.

The word, taken apart — and its English cousins

By the usual historical account, the -л form was once a describing word, "having read", said beside a present form of быть: Old Russian *čitalŭ jesmĭ*. The helping verb wore away and the describing word stayed, so the past still agrees like an adjective. Быть goes back to Proto-Indo-European $*b^huH$-, "to become" (EtymDB 2.1); English *be* comes from the same root.

Your turn

- *Say it: Vcherá ya chitál*, then *Vcherá ya chitála*
- *Say it: Máma rabótala, a pápa chitál.*
- *Say it: My gulyáli v párke.*
- *Say it: byl, bylá, býlo, býli*
- *Answer: Gde ty byl vcherá? Ya byl* or *Ya bylá*, and a place

Before you move on

What replaces -ть in the past? (-л.) What does a woman add? (-а: читала.) More than one person, or polite вы? (-ли.) "She was at the museum"? (Она была в музее.)

261.2 читал or прочитал — the reading, and the book read through

Name the partners you met with the first verbs: читать, прочитать; писать, написать. One is the doing, the other the deed done. In the present only the doing is used. In the past both are, and the choice decides the story.

Grammar Lens: the doing, or the deed done

Вчера я читал книгу. — *vcherá ya chitál knígu* — Yesterday I was reading a book. Вчера я прочитал книгу. — *vcherá ya prochitál knígu* — Yesterday I read the book, to the end.

The **imperfective** shows the reading going on, and says nothing about the last page. The **perfective** sees the deed whole: finished, with a result. The book is read.

Grammar Lens: a habit, and a bare fact

The imperfective has two more jobs. A **habit**: Я часто читал газету. — *ya chásto chitál gazétu* — I often read the paper. And the **bare fact** that something happened at all:

— Ты читал эту книгу? — Да, читал. — *ty chitál étu knígu? da, chitál* — Have you read this book? Yes, I have.

Why it's said this way

Мы посмотрели фильм. — *my posmotréli film* — We watched the film, all of it. Я писал сообщение, но не написал. — *ya pisál soobshchéniye, no ne napisál* — I was writing a message, but did not get it written.

The word, taken apart — and its English cousins

Russian grammar calls aspect вид, "a look, a view", which EtymDB 2.1 takes through Proto-Slavic **vidŭ* to PIE **weyd-*, "to see, to know": the root of видеть and of English *wit*. Two aspects, two views of one deed: from inside, while it goes on, or from outside, whole. The prefix про- means "through": прочитать, to read through.

Your turn

- *Say it: Vcherá ya chitál knígu.* The reading went on
- *Say it: Vcherá ya prochitál knígu.* The book is finished
- *Say it: Ya chásto chitál gazétu.* A habit
- *Answer: Ty chitál étu knígu? Da, chitál* or *Net, ne chitál*
- *Say it: My posmotréli film.*

Before you move on

"I finished the book": which verb? (Прочитал.) "I often read the paper"? (Читал, a habit.) What does Russian call aspect? (Вид, a view.)

261.3 когда and пока — the scene, and what cut into it

Say "yesterday I was reading a book", then "yesterday I read the book to the end". (*Vcherá ya chitál knígu. Vcherá ya prochitál knígu.*)

And the hinge from the present: *kogdá ya chitáyu, ya dúmayu.* In the past, the aspect on each side tells how the halves fit.

Grammar Lens: one going on, one cutting in

> Когда я читал, позвонил брат. — *kogdá ya chitál, pozvoníl brat* — When I was reading, my brother rang.

The reading is imperfective: it was going on. Позвонил, the perfective of звонить, is one call that cut into it.
Put a perfective on **both** sides and the events come one after the other:

> Когда я прочитал книгу, я позвонил брату. — *kogdá ya prochitál knígu, ya pozvoníl brátu* — When I had finished the book, I rang my brother.

First the book was finished, then the call. Брату is брат with -у: a man you ring takes that ending, and Mum would be маме.

Grammar Lens: пока, for two things at once

The goodbye пока has a second job: "while, for as long as". Inside a story it usually takes the imperfective, and it lays two scenes side by side:

> Пока я читал, брат спал. — *poká ya chitál, brat spal* — While I was reading, my brother was asleep.

Neither half is finished; both went on through the same hour. Когда я читал, брат спал says it too; пока stresses the stretch of time, and its other half may be one deed inside it: Пока я читал, позвонил брат.

The word, taken apart — and its English cousins

пока is по- with an old pronoun meaning "which, what kind", the ancestor of какой, on the question-root PIE *$k^w o$- of как and of English *who* and *when*. By the usual account "for as long as" is its old sense, and the goodbye, "for now", grew out of it in the twentieth century. Когда comes off the same root.

Your turn

Say these aloud:

- *Kogdá ya chitál, pozvoníl brat.* One call cut in
- *Kogdá ya prochitál knígu, ya pozvoníl brátu.* One after the other
- *Poká ya chitál, brat spal.* Two at once
- a woman's version: *Poká ya chitála, brat spal.*
- one of your own: *Poká ya …, …*, two things that went on together

Before you move on

Which word puts two scenes side by side? (Пока.) "When I was reading, my brother rang": which verb is perfective? (Позвонил, the call that cut in.) Perfective on both sides of когда: at once, or one after the other? (**One after the other.**)

261.4 Review — what went on, and what got done

Say "I was at the museum", as a man, then as a woman. (*Ya byl v muzéye. Ya bylá v muzéye.*) Then "we were at the museum". (*My býli v muzéye.*)

What you've built

Three lessons, and Russian can now look back. The past swaps the infinitive's -ть for -л, agreeing with who did it. Nearly every verb in it shows one of two views: the **imperfective** for what went on, again and again or at all; the **perfective** for one deed done, with a result. Пока lays two scenes side by side; когда with a perfective marks the moment that cut in, or the next step.
One evening, told both ways:

> Пока мама ужинала, папа смотрел фильм. — *poká máma úzhinala, pápa smotrél film* — While Mum was having dinner, Dad was watching a film. Когда мама поужинала, она позвонила бабушке. — *kogdá máma poúzhinala, oná pozvoníla bábushke* — When Mum had finished her dinner, she rang Grandma.

The first pair went on together. The second pair came one after the other, each one finished: поужинала is the perfective of ужинать, made with по-.

Your turn

- *Say it: Poká máma úzhinala, pápa smotrél film.*
- *Say it: Kogdá ya chitál, pozvoníl brat.*
- *Say it: Kogdá my posmotréli film, my pozvoníli máme.*
- *Answer: Ty chitál étu knígu? Da, chitál.*
- *Say it:* your own evening: one thing that went on, with *poká*, and one that got done

Before you move on

"She was reading"? (Она читала.) "We watched the film to the end"? (Мы посмотрели фильм.) Two scenes at once: which word? (Пока.)

Chapter 262

Then, and At Last: A Story Told in Order

Modes: **voice** (3) **eyes** (1) **Hands-free start:** the first 2 of 4 lessons.

> ***By the end of this chapter:*** I can tell a short story in order with сначала, потом, затем and наконец, retell it with рассказать, and read a connected story in the past.
>
> *Complete RU-C262-review: a day retold in four steps,* сначала*,* потом*,* затем*,* наконец*, with the scene in the imperfective and the events in the perfective.*

262.1 сначала, потом, затем, наконец — the steps of a story

Say "at first", "later, then" and "at last". (*Snachála. Potóm. Nakonéts.*) Three step words you have had for a while. Now they get a story to carry.

You'll want to know: затем

затем — *zatém* — "after that, then". It means much the same as потом, and sounds a little more careful: it is common in writing, in instructions and in a story told with some care. Between them, a story need not say потом twice in a row.

Grammar Lens: one finished step, then the next

> Сначала я позавтракал, потом прочитал газету. — *snachála ya pozávtrakal, potóm prochitál gazétu* — First I had breakfast, then I read the paper. Затем я позвонил маме. Наконец я пошёл на работу. — *zatém ya pozvoníl máme. nakonéts ya poshól na rabótu* — After that I rang Mum. At last I set off for work.

Every verb is perfective, so every step is done before the next one starts. Позавтракал is завтракать with по-. Пошёл, "set off", is the past of пойти, the perfective partner of идти.

Why it's said this way

> Обычно я сначала завтракал, потом читал газету. — *obýchno ya snachála závtrakal, potóm chitál gazétu* — Usually I had breakfast first, then read the paper.

Imperfective verbs and обычно: not one morning, but every morning.

The word, taken apart — and its English cousins

затем is за, "behind, after", with тем, a form of тот, "that": "after that". EtymDB 2.1 has no entry for it, so this is the plain reading of its parts. Тот sits on the Proto-Indo-European pointing stem **to-*, the same one behind English *that* and *the*.

Your turn

Say these aloud:

- *zatém*, stress on the end
- *Snachála ya pozávtrakal, potóm prochitál gazétu.*
- *Zatém ya pozvoníl máme. Nakonéts ya poshól na rabótu.*
- the same four steps as a woman: *pozávtrakala*, *prochitála*, *pozvoníla*, *poshlá*
- your own morning in three steps, *snachála*, *potóm*, *nakonéts*

Before you move on

Another word for потом, a little more careful? (Затем.) One morning, step by step: which aspect? (**Perfective.**) Every morning, as a habit? (**Imperfective**, often with обычно.)

262.2 рассказать (rasskazát) — to tell a story, once and to the end

Say "to tell (a story)". (*Rasskázyvat.*) Then three steps of a morning, with *snachála*, *potóm* and *zatém*.

You'll want to know: рассказать

рассказать — *rasskazát* — "to tell", once, the whole story. It is the perfective partner of рассказывать.

> Бабушка часто рассказывала сказки. — *bábushka chásto rasskázyvala skázki* — Grandma often told fairy tales. Вчера бабушка рассказала новую сказку. — *vcherá bábushka rasskazála nóvuyu skázku* — Yesterday Grandma told a new fairy tale.

The habit takes the imperfective; the one tale, told to its end, the perfective. To ask for a story: Расскажи! — *rasskazhí!* — Tell me! To a stranger, or to more than one: Расскажите! — *rasskazhítye!*

Grammar Lens: scene, steps, end

A told story has three parts, and aspect marks each one.
The **scene**, in the imperfective: Это было в субботу. Шёл дождь. — *éto býlo v subbótu. shol dozhd* — It was on a Saturday. It was raining. Russian rain "goes": идёт дождь, and in the past шёл дождь.
The **steps**, in the perfective and in order, with сначала, потом, затем. Then the **end**, with наконец.

The word, taken apart — and its English cousins

рассказать is рас-, “out, apart”, with сказать, “to say”. By the usual account сказать is built on an older казать, “to show”, which EtymDB 2.1 traces to Proto-Slavic **kazati*; so telling is showing in words. EtymDB lists рассказать itself without taking it apart.

Your turn

Say these aloud:

- *rasskazát*, then the past: *rasskazál*, *rasskazála*
- *Vcherá bábushka rasskazála nóvuyu skázku.*
- *Rasskazhí!*, then to a stranger: *Rasskazhítye!*
- a scene: *Éto býlo v subbótu. Shol dozhd.*
- three steps after it: *snachála …, potóm …, nakonéts …*

Before you move on

“Grandma told a fairy tale”, once? (Бабушка рассказала сказку.) Every evening? (Рассказывала.) Which aspect sets the scene? (**The imperfective.**) And the steps? (**The perfective.**)

262.3 (reading) — a rainy Saturday, told in order

The book’s first passage was a few lines in the present. This one is a story, and it happened last summer and last Saturday.

Every word in it has come up before, apart from one name: Москва, Moscow, here в Москве, “in Moscow”. Three verbs appear in a new shape, and they are explained after the passage.

Read this

Это было в субботу. Шёл дождь. Я сидел в кафе, пил кофе и читал газету. Когда я прочитал газету, пришла подруга Анна. Сначала мы пили чай и говорили. Потом Анна рассказала историю.

Летом она была в Москве и жила в гостинице в центре. Утром она часто гуляла в парке. Но в понедельник, пока она гуляла, она потеряла паспорт! Сначала она плакала. Потом она позвонила в гостиницу. Затем она вернулась в парк. Наконец она нашла паспорт. Он был в сумке!

Мы смеялись. Вечером мы ужинали в ресторане, и Анна рассказала ещё одну историю.

Read it once without stopping. Do not translate as you go. Then read it again and listen for the step words.

Why it's said this way

The scene is imperfective: сидел, пил, читал, шёл дождь. The steps are perfective, in order: прочитал, пришла, рассказала, потеряла, позвонила, вернулась, нашла.
Three of them are new shapes of verbs you own. Пришла is the perfective partner of приходить, "she came". Вернулась is the partner of возвращаться, "she went back". Нашла is the partner of находить, "she found".
Часто гуляла is a habit, every morning. Пока она гуляла is one walk going on; потеряла is the moment it went wrong. Плакала and смеялись are imperfective: crying and laughing that went on for a while, with no finish to report.

Your turn

- *Say it:* the passage aloud, once, without stopping

Before you move on

How many step words keep Anna's day in order? (**Four:** сначала, потом, затем, наконец.)
Пока она гуляла, она потеряла паспорт: which verb was going on? (Гуляла.) Which one happened once? (Потеряла.)

262.4 Review — a day, retold in order

Say the four step words in order. (*Snachála, potóm, zatém, nakonéts.*)

What you've built

Three lessons, and a whole story fits in your mouth. A scene in the imperfective: было, шёл дождь, сидел. Steps in the perfective, one finished before the next, with сначала, потом, затем and наконец. And рассказать for telling it once, to the end.
Anna's day, in four steps:

> Сначала она плакала. Потом она позвонила в гостиницу. Затем она вернулась в парк. Наконец она нашла паспорт.

The crying went on, so it is imperfective. The call, the walk back and the finding were each done once.

The exchange

— Расскажи, что было в субботу! — *rasskazhí, shto býlo v subbótu!* — Tell me what happened on Saturday! — Мы были в кафе. Сначала мы пили чай, потом … — *my býli v kafé. snachála my píli chay, potóm …*

Your turn

- *Say it:* Anna's four steps, from memory
- *Say it: Rasskazhí, shto býlo v subbótu!*
- *Answer:* your own Saturday: one scene, then three steps with *snachála*, *potóm*, *nakonéts*
- *Say it: Kogdá ya chitál, pozvoníla Ánna.* One going on, one cutting in

Before you move on

The step word between потом and наконец? (Затем.) "Tell me!"? (Расскажи*!*) The scene, or the steps: which takes the

perfective? (**The steps.**)

Chapter 263

What I Think, and So

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can give my opinion with я думаю, что, по-моему and мне кажется, что, and draw a result with поэтому and так что.
>
> *Complete RU-C263-review: an opinion said three ways and one reason turned round,* потому что *into* поэтому *and* так что.

263.1 по-моему and мне кажется — an opinion, three ways

Say "I think that you understand". (*Ya dúmayu, shto ty ponimáyesh.*) Then the word for "an opinion". (*Mnéniye.*)

A story told with рассказать says what happened. Giving reasons starts one step earlier, with what you think of it.

Grammar Lens: three frames

Я думаю, что **...** is the plain frame, here with что and its comma. По-моему, **...** — *po-móyemu* — "in my view". It takes no что; a comma follows it, and then the opinion:

> По-моему, это хороший фильм. — *po-móyemu, éto khoróshiy film* — In my view, it's a good film.

Grammar Lens: мне кажется, что ...

Мне кажется, что ... — *mne kázhetsya, shto* — "it seems to me that". It is softer than я думаю: less sure, and politer when you disagree.

> Мне кажется, что фильм скучный. — *mne kázhetsya, shto film skúchnyy* — It seems to me the film is boring.

Мне is "to me", a form of я. The person something seems to is not the subject here: the opinion is.

The exchange

> — По-моему, это хороший фильм. А ты как думаешь?
> — Я тоже так думаю.

A ty kak dúmayesh? — "And what do you think?" *Ya tózhe tak dúmayu* — "I think so too." To disagree gently, the second voice says instead: А мне кажется, что он скучный. Он, "he", stands for фильм, a masculine noun.

The word, taken apart — and its English cousins

по-моему is по, "by, after", with моему, a form of мой, "my", which EtymDB 2.1 traces to Proto-Slavic **mojĭ*: "after my fashion". кажется is казаться, "to show oneself, to seem", the -ся form of an older казать, "to show". So мне кажется says "it shows itself to me".

Your turn

- *Say it: Po-móyemu, éto khoróshiy film.*
- *Say it: Mne kázhetsya, shto film skúchnyy.*
- *Say it:* one opinion of yours three ways: *ya dúmayu, shto*; *po-móyemu*; *mne kázhetsya, shto*
- *Answer: A ty kak dúmayesh?*

Before you move on

"In my view": which frame needs no что? (По-моему.) The softer one, for "it seems to me"? (Мне кажется, что …) "I think so too"? (Я тоже так думаю.)

263.2 поэтому and так что — the reason, turned round

Say "because" and "since". (*Potomú shto. Tak kak.*) Then an opinion with *po-móyemu*. An opinion needs a reason, and a reason has a direction.

Grammar Lens: back to the cause, forward to the result

One rainy day, said two ways:

> Мы не гуляли, потому что шёл дождь. — *my ne gulyáli, potomú shto shol dozhd* — We didn't go for a walk, because it was raining. Шёл дождь, поэтому мы не гуляли. — *shol dozhd, poétomu my ne gulyáli* — It was raining, so we didn't go for a walk.

Потому что stands in front of the cause. Поэтому stands in front of the result. The facts are the same; the order flips, and the comma moves with the seam. Поэтому can also open a new sentence: Шёл дождь. Поэтому мы не гуляли.

You'll want to know: так что

так что — *tak shto* — "so, so then". It also points to the result, and it sounds more like talk:

> Шёл дождь, так что мы сидели в кафе. — *shol dozhd, tak shto my sidéli v kafé* — It was raining, so we sat in a café.

It usually sits inside one sentence, after a comma.

The word, taken apart — and its English cousins

так, "in that way, so", goes back to Old East Slavic *tako* (EtymDB 2.1), on the pointing stem **to-* that also gives тот, "that". So так что is "that way, so that". Поэтому is по, "by", with этому, a form of этот: "for this".

Your turn

Say these aloud:

- *My ne gulyáli, potomú shto shol dozhd.*
- turned round: *Shol dozhd, poétomu my ne gulyáli.*
- *Shol dozhd, tak shto my sidéli v kafé.*
- a reason of your own, first with *potomú shto*, then turned round with *poétomu*

Before you move on

Which word stands in front of the cause? (Потому что.) And in front of the result? (Поэтому, or так что.) Which of the two opens a new sentence more easily? (Поэтому.)

263.3 Review — what I think, and so

Say "in my view, it's a good film". (*Po-móyemu, éto khoróshiy film.*) Then softer: "it seems to me the film is boring". (*Mne kázhetsya, shto film skúchnyy.*)

What you've built

Two lessons, and an opinion now comes with its reason. Three frames: я думаю, что, по-моему, мне кажется, что. And two directions: потому что before the cause, поэтому or так что before the result. All of it in two sentences:

> По-моему, музей интересный, потому что он старый. — *po-móyemu, muzéy interésnyy, potomú shto on stáryy* — In my view the museum is interesting, because

it's old. Музей старый, поэтому, мне кажется, он интересный. — the same reason, pointed forward, and said more softly.

Your turn

- *Say it: Po-móyemu, muzéy interésnyy, potomú shto on stárыy.*
- *Say it: Shol dozhd, tak shto my sidéli v kafé.*
- *Answer: A ty kak dúmayesh?* about a film you know, with *mne kázhetsya, shto*
- *Say it:* a short Saturday story: a scene, then *snachála*, *zatém*, and a result with *poétomu*

Before you move on

"So", in front of a result, two ways? (Поэтому, так что.) "In my view", with no что? (По-моему.)

Chapter 264

Advice, and Why

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can give advice with тебе стоит, ты должен and лучше, and explain why with причина в том, что and поэтому.
>
> *Complete RU-C264-review: a friend's problem answered with advice at three strengths, then an explanation with* потому что *and* поэтому*.*

264.1 тебе стоит, лучше, ты должен — advice at three strengths

Say "to cost" and "to rest". (*Stóit. Otdykhát.*) Then "it seems to me". (*Mne kázhetsya.*) Мне was "to me"; the same shape for "you" is тебе, *tebé*.

Grammar Lens: тебе стоит, it is worth your while

> **Тебе стоит отдохнуть.** — *tebé stóit otdokhnút* — You should rest.

Стоит, "it costs", here means "it is worth it": rest would pay you back. The infinitive follows, and the person advised takes the "to you" form: тебе, or polite вам. Отдохнуть is the perfective partner of отдыхать: one rest, taken.

Grammar Lens: лучше, it is better

> — Уже поздно, а метро далеко. — Тебе лучше взять такси. — *uzhé pózdno, a metró dalekó. tebé lúchshe vzyat taksí* — It's late already and the metro is far. You'd better take a taxi.

Лучше — *lúchshe* — "better": one choice against another. Взять is the perfective partner of брать, the pair with two different roots.

Grammar Lens: ты должен, you must

> Ты должен позвонить маме. — *ty dólzhen pozvonít máme* — You must ring Mum.

Должен is a duty, and it agrees like the past: должен to a man, должна (*dolzhná*) to a woman, должны (*dolzhný*) to more than one or to вы. It can sound strong between friends; стоит and лучше are gentler.

The word, taken apart — and its English cousins

должен comes from the Russian noun for "a debt, a duty", which EtymDB 2.1 traces to Proto-Slavic **dŭlgŭ*. A duty is a debt: Я должен тебе сто рублей still means "I owe you a hundred roubles".

Your turn

Say these aloud:

- *Tebé stóit otdokhnút.*
- *Tebé lúchshe vzyat taksí.*
- *Ty dólzhen pozvonít máme*, then to a woman: *Ty dolzhná pozvonít máme.*
- a reason and advice: *Uzhé pózdno, poétomu tebé lúchshe vzyat taksí.*

Before you move on

The gentlest advice: "it's worth your while"? (Тебе стоит …) "You'd better"? (Тебе лучше …) The strongest, to a woman? (Ты должна …) And what form of the verb follows all three? (**The infinitive.**)

264.2 причина в том, что … — giving the reason at length

Say "you must ring Mum". (*Ty dólzhen pozvonít máme.*) Then "a reason". (*Prichína.*) Advice asks for a reason back.

Grammar Lens: причина в том, что …

> — Почему ты не позвонил? — Причина в том, что я потерял телефон. — *pochemú ty ne pozvoníl? prichína v tom, shto ya poteryál telefón* — Why didn't you ring? The reason is that I lost my phone.

Word for word, "the reason is in that, that …": в том points ahead, and что brings in the explanation, with its comma. It is weightier than потому что.

Grammar Lens: an explanation in three steps

What happened, then поэтому, then what followed:

> Я потерял телефон, поэтому не мог позвонить. — *ya poteryál telefón, poétomu ne mog pozvonít* — I lost my phone, so I couldn't ring.

Мог is the past of мочь, one of the few whose form for a man has no л: мог, but могла, могли.

Why it's said this way

> Учитель говорил быстро, и я не понимал правило. Потом он повторил медленно, и я понял. — *uchítel govoríl býstro, i ya ne ponimál právilo. potóm on povtoríl*

> *médlenno, i ya pónyal* — The teacher was talking fast and I didn't understand the rule. Then he said it again slowly, and I understood.

A process with no result, then two deeds done: повторил, from the partner of повторять, and понял, from понять, stressed on the front: *pónyal*.

The word, taken apart — and its English cousins

причина is при- with чин, by the usual account "order, rank". EtymDB 2.1 lists причина itself without a parent, and takes чин through Old East Slavic *činŭ* to Proto-Slavic **činŭ*. A reason, on this reading, is what set things in motion.

Your turn

- *Say it: Prichína v tom, shto ya poteryál telefón.*
- *Say it: Ya poteryál telefón, poétomu ne mog pozvonít.*
- *Answer: Pochemú ty ne pozvoníl?* Begin with *prichína v tom, shto*

Before you move on

"The reason is that …"? (Причина в том, что …) "The teacher said it again, and I understood": which aspect? (**Perfective:** повторил, понял.)

264.3 Review — advice, and the reason for it

> Three pieces of advice: "you should rest", "you'd better take a taxi", "you must ring Mum". (*Tebé stóit otdokhnút. Tebé lúchshe vzyat taksí. Ty dólzhen pozvonít máme.*)

What you've built

Two lessons, and Russian can now advise and explain. Advice at three strengths, each with an infinitive: тебе стоит, лучше, ты должен. And причина в том, что …, with the explanation built from what happened and поэтому.

The exchange

> — Я не понимаю правило. — По-моему, тебе стоит спросить учителя. Он поможет.

Ya ne ponimáyu právilo — "I don't understand the rule." *Po-móyemu, tebé stóit sprosít uchítelya. On pomózhet* — "I think you should ask the teacher. He'll help." Спросить is the perfective partner of спрашивать.

Your turn

- *Say it: Po-móyemu, tebé stóit sprosít uchítelya.*
- *Say it: Mne kázhetsya, shto tebé lúchshe otdokhnút.*
- *Answer: Pochemú ty ne pozvoníl?* Begin with *prichína v tom, shto*, then *poétomu*
- *Say it:* advice to a friend who is tired, at all three strengths

Before you move on

"You must", to a woman? (Ты должна.) "The reason is that …"? (Причина в том, что …) And the gentlest advice? (Тебе стоит …)

Chapter 265

Asking the Way

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can ask the way with Извините, как пройти к ...?, and follow an answer with прямо, направо, налево and поверните.
>
> *Complete RU-C265-review: ask the way to two places in town and give one set of directions back.*

265.1 как пройти к ... (kak proytí k ...) — asking the way

Say "excuse me", "where" and "the station". (*Izvinítye. Gde. Vokzál.*) Then "I must": a man and a woman. (*Ya dólzhen. Ya dolzhná.*)

Asking где вокзал works. Russians also ask for the way itself.

You'll want to know: как пройти

> Извините, как пройти к вокзалу? — *izvinítye, kak proytí k vokzálu?* — Excuse me, how do I get to the station?

Пройти is the perfective of a going-verb: to get somewhere on foot, through the streets, and arrive. It stays in the infinitive, with no "I" in the question: literally "how to get through to the station".

Grammar Lens: к and the "to" form

к — *k* — "towards, to". The place after it takes the same "to" form as маме and брату:

> к вокзалу, к музею — *k vokzálu, k muzéyu* — a masculine noun ending in a consonant takes -у, and one in -й takes -ю. к остановке — *k ostanóvke* — most nouns in -а take -е. к площади — *k plóshchadi* — площадь, in -ь, takes -и. к метро — *k metró* — метро stays as it is.

The exchange

> — Извините, как пройти к музею? Это далеко? — Нет, это близко. Музей рядом.

Éto dalekó? — "Is it far?" *Nyet, éto blízko. Muzéy ryádom* — "No, it's near. The museum is close by."

The word, taken apart — and its English cousins

пройти is про-, "through", with идти, "to go", which EtymDB 2.1 traces through Old East Slavic *iti* and Proto-Slavic **jĭti* to Proto-Indo-European **$h_1$éyti*, "to go", the root of Latin *īre*. к goes back to Proto-Slavic **kŭ*, which EtymDB links to a Proto-Indo-European **kom*, "next to, with".

Your turn

- *Say it: Izvinítye, kak proytí k vokzálu? Éto dalekó?*
- *Say it:* the same to the museum, the stop and the square: *k muzéyu*, *k ostanóvke*, *k plóshchadi*
- *Answer: Kak proytí k metró? Éto blízko* or *Éto dalekó*

Before you move on

"How do I get to the station?" (Как пройти к вокзалу?) What does к do to остановка? (К остановке.) And to метро? (**Nothing:** к метро.)

265.2 идите прямо, поверните направо — following the answer

Ask the way to the museum. (*Izvinítye, kak proytí k muzéyu?*) Then say "straight on", "to the right", "to the left". (*Pryámo. Naprávo. Nalévo.*)

Grammar Lens: идите and поверните

The answer comes as instructions, with the same -ите as извините and повторите:

> Идите прямо. — *idítye pryámo* — Go straight on.
> Поверните направо. — *povernítye naprávo* — Turn right.

Идите is идти as an instruction. Поверните comes from повернуть, the perfective partner of поворачивать: one turn, at one corner. To a friend, the -ите drops to иди, поверни.

Grammar Lens: as far as, and at

Two small words carry a route. до is "as far as", and the noun after it changes as in до свидания: светофор, до светофора. на is "at" a crossroads: перекрёсток, на перекрёстке.

> Идите прямо до светофора, потом поверните налево. — *idítye pryámo do svetofóra, potóm povernítye nalévo* — Go straight on to the lights, then turn left. На перекрёстке поверните направо. — *na perekryóstke povernítye naprávo* — At the crossroads, turn right.

The exchange

> — Как пройти к музею? — Идите прямо, потом направо. Музей справа.

Muzéy správa: "the museum is on the right". Справа is where a thing stands; направо is where you go.

The word, taken apart — and its English cousins

направо is на, "onto", with the root of правый, "right": onto the right hand. EtymDB 2.1 traces правый to Proto-Slavic **pravŭ*, "right, correct", so the right hand and being right share one root. поверните is on the root of вертеть, "to turn", which EtymDB takes back through Proto-Slavic **vĭrtěti* to Proto-Indo-European **wert-*: the root of Latin *vertere* and English *-ward*.

Your turn

- *Say it: Idítye pryámo do svetofóra, potóm povernítye nalévo.*
- *Say it: Na perekryóstke povernítye naprávo.*
- *Say it:* the same to a friend: *Idí pryámo, potóm poverní naprávo.*
- *Answer: Kak proytí k metró?* Give two steps, and end with *správa* or *sléva*

Before you move on

"Turn left", politely? (Поверните налево.) "As far as the lights"? (До светофора.) Where you go, or where it stands: направо or справа? (Направо is where you go.)

265.3 Review — asking the way, and giving it

Ask the way to the park, then to the theatre. (*Kak proytí k párku? Kak proytí k teátru?*)

What you've built

Two lessons, and a stranger's street is no longer a wall. The question: Извините, как пройти к ...?, with the place in its "to" form. The answer: идите прямо, поверните направо or налево, до something, на a corner.

The exchange

— Извините, как пройти к театру? — Это далеко. Вам лучше взять такси.

Vam lúchshe vzyat taksí — "You'd better take a taxi." Advice from the last chapter, now with the polite вам.

Your turn

- *Say it: Izvinítye, kak proytí k párku?*
- *Say it: Idítye pryámo do perekryóstka, potóm povernítye naprávo.*
- *Say it: Éto dalekó. Vam lúchshe vzyat taksí.*
- *Answer:* a stranger asks *Kak proytí k vokzálu?* Give the way from where you live, in two or three steps

Before you move on

"To the park"? (К парку.) "Go straight on"? (Идите прямо.) And to a friend? (Иди прямо.)

Chapter 266

A Ticket, and a Missed Train

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can buy a ticket, туда и обратно, at the station, follow an announcement, and report a problem: я опоздал на поезд, я потерял билет.
>
> *Complete RU-C266-review: buy a return ticket at the till, follow an announcement, then report a missed train and a lost ticket.*

266.1 билет туда и обратно (bilét tudá i obrátno) — a return ticket

Say "a ticket", "a train" and "the till". (*Bilét. Póyezd. Kássa.*) Then ask the way to the till. (*Kak proytí k kásse?*)

You'll want to know: туда и обратно

туда и обратно — *tudá i obrátno* — "there and back". At the till it is a return ticket:

> — Один билет до Москвы, пожалуйста. — Туда и обратно? — *odín bilét do Moskvý, pozhálusta. tudá i obrátno?* — One ticket to Moscow, please. Return? — Да, туда и обратно. — *da, tudá i obrátno* — Yes, a return.

A single is в одну сторону — *v odnú stóronu* — "in one direction".

Grammar Lens: до a place, на a train

A ticket goes до the place, as far as it, and the place changes as it did after до in the street: светофор, до светофора; Москва, до Москвы.
A ticket is на the train or the bus, and поезд and автобус keep their plain form: билет на поезд, билет на автобус — *bilét na póyezd, bilét na avtóbus.* After два, билет adds -а: два билета.

The exchange

— Сколько стоит билет? — Тысяча рублей.

Skólko stóit bilét? — "How much is the ticket?" *Týsyacha rubléy* — "A thousand roubles." After тысяча, рубль takes the counting form рублей.

The word, taken apart — and its English cousins

обратно is the adverb of обратный, "reverse, return". EtymDB 2.1 has no entry for обратный, but takes the verb обратить back to Proto-Slavic **ob(v)ortiti.* By the usual account that is об-, "around", with a root of turning, kin to вертеть, "to turn", from Proto-Indo-European **wert-*: a ticket that turns round. туда is "to that place", on the same pointing stem as тот.

Your turn

- *Say it: Odín bilét do Moskvý, pozhálusta.*
- *Say it: Tudá i obrátno.* Then a single: *V odnú stóronu.*
- *Say it: Dva biléta na póyezd.*
- *Answer: Skólko stóit bilét? Týsyacha rubléy.*

Before you move on

"A return ticket"? (Билет туда и обратно.) "A ticket to Moscow"? (Билет до Москвы.) "A ticket for the train"? (Билет на поезд.)

266.2 я опоздал на поезд (ya opozdál na póyezd) — I've missed the train

Say "to be late" and "to lose". (*Opázdyvat. Teryát.*) Then "a return ticket for the train". (*Bilét na póyezd tudá i obrátno.*)

You'll want to know: я опоздал на поезд

Я опоздал на поезд. — *ya opozdál na póyezd* — I've missed the train. A woman says Я опоздала на поезд.

Russian says "I was late **for** the train", with на, as on a ticket. Опоздать is the perfective partner of опаздывать: one lateness, and the train is gone.

Grammar Lens: a problem is a result

English often reports a problem with "I have": I've lost, it has gone. Russian uses the perfective past, because the result is still true now:

> К сожалению, я потерял билет. — *k sozhaléniyu, ya poteryál bilét* — Unfortunately I've lost my ticket. Поезд уже ушёл. — *póyezd uzhé ushól* — The train has already left.

Потерял is the partner of терять; ушёл, of уходить.

The exchange

> — Извините, у меня проблема. Я опоздал на поезд. — Ничего. Есть поезд через час.

U menyá probléma — "I have a problem", literally "at me, a problem". *Nichevó. Yest póyezd chérez chas* — "Never mind. There's a train in an hour." Есть, "there is", is the present of быть that Russian does say aloud. When it is serious: Помогите, пожалуйста!

The word, taken apart — and its English cousins

опоздать is о- with the root of поздно, "late". EtymDB 2.1 lists опоздать without a parent, and takes поздний, "late", back to Proto-Slavic **pozdĭnŭ*. The usual account relates that root to Latin

post, "after"; EtymDB itself does not draw the link.

Your turn

Say these aloud:

- *Ya opozdál na póyezd*, then a woman: *Ya opozdála na póyezd.*
- *K sozhaléniyu, ya poteryál bilét.*
- *Izvinítye, u menyá probléma. Póyezd uzhé ushól.*
- a problem of your own at a station, with one perfective verb

Before you move on

"I've missed the train"? (Я опоздал на поезд.) "I've lost my ticket": which aspect? (**Perfective**, потерял: it is still lost.) "I have a problem"? (У меня проблема.)

266.3 объявление (obyavléniye) — an announcement; a notice

Say "I've missed the train". (*Ya opozdál na póyezd.*) Then ask for a return ticket to Moscow. (*Bilét do Moskvý, tudá i obrátno.*) At a station, a voice from above often tells you first that something has gone wrong.

You'll want to know: объявление

объявление — *obyavléniye* — "an announcement". At the station it is the voice over the platform:

> На вокзале объявление: поезд до Москвы опаздывает. — *na vokzále obyavléniye: póyezd do Moskvý opázdyvayet* — An announcement at the station: the train to Moscow is running late.

Say it in five beats, *ob-yav-lé-ni-ye*, with the weight on **-lé-**. The *b* stops before the *y*: *ob-yav*, and not *o-byav*. Russian marks that break with a letter of its own, and the next lesson puts it in your hand.

The exchange

— Что в объявлении? — Поезд до Москвы опаздывает.
— Ничего. Есть поезд через час.

Shto v obyavlénii? — "What's in the announcement?" After в, the word ends in -нии: *v obyavlénii.* The noun is neuter. A notice on a door is an объявление too: *na dverí obyavléniye*, "there's a notice on the door".

The word, taken apart — and its English cousins

объявление is the noun of the verb объявить, "to announce", made with the ending -ение that turns an action into a thing. Объявить is об- with явить, "to show, to make appear", the verb behind явный, "plain, obvious". EtymDB 2.1 does not list объявление or объявить, but it takes явить through Old East Slavic *javiti* back to Proto-Slavic **aviti*, often written **javiti*, "to make visible". EtymDB stops there, and gives no older parent. An announcement shows everyone the same thing at once.

Your turn

- *Say it: Obyavléniye.* Then slowly, in beats: *ob-yav-lé-ni-ye.*
- *Say it: Na vokzále obyavléniye: póyezd do Moskvý opázdyvayet.*
- *Answer: Shto v obyavlénii?* The train is late: *Póyezd opázdyvayet.*
- *Say it:* the announcement came too late for you: *Ya opozdál na póyezd.*

Before you move on

"An announcement"? (Объявление.) "In the announcement"? (В объявлении.) Where does the weight fall? (On **-lé-**: *obyavléniye.*)

266.4 ъ (tvyórdyy znak) — the hard sign inside объявление

Before the new one: write щ and ь once each, and name them.

> Now say объявление (*obyavléniye*), “an announcement”. You met it a moment ago, at the station. This lesson takes one letter out of it and puts it in your hand.

Script you’ll notice: ъ

ъ — the **hard sign**, *tvyórdyy znak*.

It is inside объявление (*obyavléniye*), right after об-. It looks like ь with a short flag at the top left, and like ь it has no sound of its own. It keeps the б apart from the *y* that я carries: *ob-yav-lé-ni-ye*, with a small break after the *b*, and not *o-byav-*.

It turns up mostly where a prefix ending in a consonant meets е, ё, ю or я: подъезд (*podyézd*), the entrance to a block of flats, is под- with -езд; съесть (*syest*), “to eat up”, is с- with есть, “to eat”.

Both signs put a *y* before the next vowel. ь also softens the consonant, and sits inside a word: семья (*semyá*), “a family”. ъ asks for a hard one, and sits after a prefix. Before the spelling reform of 1918 it also closed every word ending in a hard consonant: домъ for дом.

Writing: ъ

How ъ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ъ yourself — slowly, and larger than it is printed.

> The strip shows **where to start this letter and which way to travel**, in one attested order, and names its source beneath it. Teachers vary, so treat it as a sound way in, not the only one.

Your turn

- *Look:* at объявление and point at ъ inside it
- *Trace it:* ъ three times, saying *tvyórdyy znak* as you finish each one
- *Write it:* ь, then ъ, from memory
- *Read it:* объявление, then подъезд, aloud, with the small break after the prefix

Before you move on

Which letter is this — ъ? (The **hard sign**, *tvyórdyy znak*; it has no sound of its own.) Which word did it come from? (объявление, *obyavléniye*, "an announcement".) "A family": ь or ъ? (ь, inside the word: семья.)

266.5 Review — a ticket, and a train that left without you

Ask for one return ticket to Moscow. (*Odín bilét do Moskvý, tudá i obrátno, pozhálusta.*)

What you've built

Three lessons and a letter, and the station can be handled out loud. A ticket goes до a place and на a train; a return is туда и обратно. An объявление, *obyavléniye*, tells the whole station at once, and the hard sign, *tvyórdyy znak*, keeps its *ob-* and *-yav-* apart. And when it goes wrong, the perfective past says what happened and is still true: я опоздал на поезд, я потерял билет.

The exchange

— Извините, я опоздала на поезд. Как пройти к кассе?
— Идите прямо, потом налево.

The whole trip so far in two lines: a problem in the perfective, a question about the way, and an answer in two steps.

Your turn

- *Say it: Izvinítye, ya opozdála na póyezd. Kak proytí k kásse?*
- *Say it: Dva biléta na póyezd, tudá i obrátno.*
- *Answer: Shto v obyavlénii na vokzále?* The train is late: *Póyezd opázdyvayet.*
- *Say it: K sozhaléniyu, ya poteryál bilét.*
- *Answer: Pochemú ty opozdál?* Explain what happened, then what followed, with *poétomu*
- *Answer:* the cashier asks *Tudá i obrátno?* Answer for a single: *Nyet, v odnú stóronu.*

Before you move on

"She's missed the train"? (Она опоздала на поезд.) "Two tickets for the bus"? (Два билета на автобус.) "An announcement"? (Объявление.) In *obyavléniye*, what keeps *ob-* and *-yav-* apart? (The **hard sign**, *tvyórdyy znak*, which makes no sound of its own.)

Chapter 267

Glad, Tired, Hopeful

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can say how I felt with я был рад, я устал and мне было скучно, and what I hope for and dream of with я надеюсь, что and я мечтаю.
>
> *Complete RU-C267-review: how a trip felt, in the past, and one hope and one dream for the next one.*

267.1 я был рад, я устал, мне было скучно — how it felt

Say "joy", "happy" and "sad". (*Rádost. Schastlívyy. Grústnyy.*) Then "I've missed the train". (*Ya opozdál na póyezd.*) A trip has problems, and it has feelings.

Grammar Lens: рад, glad

рад — *rad* — "glad". It is a short adjective: it does not stand before a noun, only after the person, and it agrees: рад for a man, рада (*ráda*) for a woman, рады (*rády*) for more than one.

> Я рад, что ты позвонил. — *ya rad, shto ty pozvoníl* — I'm glad you rang. Я была рада, что ты позвонил. — *ya bylá ráda, shto ty pozvoníl* — I was glad you rang.

In the present there is no verb; in the past, был agrees with it.

Grammar Lens: я устал, I'm tired

Я устал. — *ya ustál* — I'm tired. A woman: Я устала.

This is the perfective past of устать, the partner of уставать: "I have got tired". The result is the state you are in now, so a past form says "I am tired" today. Усталый is the adjective for a tired face or a tired voice.

Grammar Lens: мне было скучно

How a thing felt goes on the "to me" form, with an -о word and было:

> На концерте мне было скучно. — *na kontsérte mne býlo skúchno* — I was bored at the concert. Мне было интересно и весело. — *mne býlo interésno i véselo* — It was interesting, and I had fun.

Скучно is said *skúshno*: the ч is said as ш in this word.

The word, taken apart — and its English cousins

рад goes back to Proto-Slavic **radŭ*, "glad" (EtymDB 2.1). Радость, "joy", is the same root with a noun ending: the gladness itself.

Your turn

- *Say it: Ya rad, shto ty pozvoníl*, then a woman, in the past: *Ya bylá ráda, shto ty pozvoníl.*
- *Say it: Ya ustál*, then *Ya ustála.*
- *Say it: Na kontsérte mne býlo skúchno.*
- *Answer: Tebé býlo interésno?* Answer with *mne býlo* and one *-o* word

Before you move on

"She was glad"? (Она была рада.) "I'm tired", in the past form? (Я устал, or я устала.) "I was bored"? (Мне было скучно.)

267.2 мечтать (mechtát) — to dream of, to long to

Say "I was glad" and "I had fun". (*Ya byl rad. Mne býlo véselo.*) Then "to hope". (*Nadéyatsya.*) A trip told in the past leaves something for the future: a hope, a dream.

You'll want to know: мечтать

мечтать — *mechtát* — "to dream of, to long to". It takes an infinitive, as хотеть does:

> Я мечтаю путешествовать. — *ya mechtáyu puteshéstvovat* — I dream of travelling.

Or о and a thing, with the thing's ending changed:

> Я мечтаю о море. — *ya mechtáyu o móre* — I dream of the sea.

This is a waking dream, a wish. A dream at night is сон, the word you have for sleep.

Grammar Lens: я надеюсь, что ...

A dream may never come; a hope is about what may well happen. Я надеюсь, что ... takes a whole clause, and a hope about tomorrow puts it in the future:

> Я надеюсь, что погода будет хорошая. — *ya nadéyus, shto pogóda búdet khoróshaya* — I hope the weather will be good.

Будет, "will be", is the future of быть: the буду inside будущий. Short and spoken: Надеюсь! — "I hope so!"

The word, taken apart — and its English cousins

мечтать is inherited from Proto-Slavic **mĭčĭtati*, and the noun мечта, "a dream, a wish", from **mĭčĭta*, "dream" (EtymDB 2.1). EtymDB derives that noun from a Proto-Slavic verb **mikati* and gives it no meaning; by the usual account it is the verb of blinking and

flickering, so a dream was first a flicker before the eyes.

Your turn

- *Say it: Ya mechtáyu puteshéstvovat.*
- *Say it: Ya mechtáyu o móre.*
- *Say it: Ya nadéyus, shto pogóda búdet khoróshaya.*
- *Answer: O chyom ty mechtáyesh?* "What do you dream of?" Answer with an infinitive or with *o*

Before you move on

"I dream of travelling"? (Я мечтаю путешествовать.) A dream at night? (Сон.) "I hope the weather will be good"? (Я надеюсь, что погода будет хорошая.)

267.3 Review — how it felt, and what comes next

Say "I'm glad", as a man and as a woman. (*Ya rad. Ya ráda.*) Then "I'm tired". (*Ya ustál. Ya ustála.*)

What you've built

Two lessons, and an experience now has a feeling and a future. Рад, рада, рады, with был in the past. Я устал, a past form for a state now. Мне было with an -о word for how a thing felt. And two ways forward: я надеюсь, что … будет, and я мечтаю with an infinitive or о.
A day at a museum, in three lines:

> В музее мне было интересно. Вечером я устала, но я была рада. Я мечтаю вернуться туда.

Вернуться, the partner of возвращаться, came with Anna's passport: "I dream of going back there".

Your turn

- *Say it: V muzéye mne býlo interésno.*
- *Say it: Ya opozdál na póyezd, no mne né bylo grústno.*
- *Say it:* a late train as good news: *Na vokzále býlo obyavléniye, i ya byl rad: póyezd opázdyval.*
- *Say it: Ya nadéyus, shto pogóda búdet khoróshaya.*
- *Answer: Kak býlo na kontsérte?* "How was the concert?" Answer with *mne býlo* and one feeling

Before you move on

"It was interesting for me"? (Мне было интересно.) "I dream of the sea"? (Я мечтаю о море.) A hope about tomorrow: which verb form? (Будет, the future.) And the silent sign after *ob-* in *obyavléniye*? (The **hard sign**, *tvyórdyy znak.*)

Chapter 268

Better Than, and Years Ago

Modes: 🚕 **voice** (3) 🚕 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can compare two things with -ее, больше, лучше and чем, and say how long and how long ago with уже ... года and ... назад.
>
> *Complete RU-C268-review: compare two ways to travel, then say how long you have done something and when you did it.*

268.1 быстрее, чем; лучше, хуже — comparing two things

Say "fast", "expensive" and "cheap". (*Býstryy. Dorogóy. Deshyóvyy.*) Then "you'd better take a taxi". (*Tebé lúchshe vzyat taksí.*) That лучше was already a comparison: "better".

Grammar Lens: -ее, and чем

Most adjectives compare by swapping their ending for -ее: быстрый, быстрее (*bystréye*); тёплый, теплее (*tepléye*); интересный, интереснее (*interésneye*). The form does not change for gender or number.
"Than" is чем, with a comma in front:

> Поезд быстрее, чем автобус. — *póyezd bystréye, chem avtóbus* — The train is faster than the bus.

In a short adjective the stress usually moves onto -ее: *bystréye*. In a longer one it usually stays where it was: *interésneye*.

Grammar Lens: the ones that change shape

A few common ones are learned whole: большой, больше (*bólshe*), bigger, more; маленький, меньше (*ménshe*), smaller, less; хороший, лучше (*lúchshe*), better; плохой, хуже (*khúzhe*), worse; дорогой, дороже (*dorózhe*); дешёвый, дешевле (*deshévle*).

> Самолёт быстрее, но поезд дешевле. — *samolyót bystréye, no póyezd deshévle* — The plane is faster, but the train is cheaper. По-моему, поезд лучше. — *po-móyemu, póyezd lúchshe* — In my view the train is better.

The word, taken apart — and its English cousins

чем is a form of что, the "by what" form, on the question-root PIE *$k^w o$- behind что, кто and English *what*. EtymDB 2.1 lists чем without taking it apart, so the link to что is the plain reading of the forms.

Your turn

- *Say it: Póyezd bystréye, chem avtóbus.*
- *Say it: Samolyót bystréye, no póyezd deshévle.*
- *Say it: bólshe, ménshe, lúchshe, khúzhe*
- *Answer: Shto lúchshe: póyezd íli samolyót?* "Which is better?" Give one reason with *potomú shto*

Before you move on

"Warmer"? (Теплее.) "Than"? (Чем, with a comma.) "Worse"? (Хуже.) "Cheaper"? (Дешевле.)

268.2 уже два года; два года назад — how long, and how long ago

Say "already", "back" and "a year". (*Uzhé. Nazád. God.*) Then "more" and "less". (*Bólshe. Ménshe.*) Comparing things leads to comparing times: how long, and how long ago.

Grammar Lens: how long, in the present

> Я уже два года учу русский. — *ya uzhé dva góda uchú rússkiy* — I've been learning Russian for two years.

English says "I have been learning". Russian keeps the present, because the learning is still going on; уже, "already", marks how far it has come. In the same way: Я давно живу здесь. — *ya davnó zhivú zdes* — I've lived here for a long time.

Grammar Lens: how long ago, in the past

Назад, "back", follows a stretch of time to mean "ago":

> Два года назад я был в Москве. — *dva góda nazád ya byl v Moskvé* — Two years ago I was in Moscow. Час назад позвонила мама. — *chas nazád pozvoníla máma* — Mum rang an hour ago.

Grammar Lens: год, года, лет

After a number, the word for a year changes: один год; два, три, четыре года; from пять to двадцать, лет. Ask someone's age with it: Сколько тебе лет? — *skólko tebé let?* And answer: Мне двадцать лет. — *mne dvádtsat let* — I'm twenty.

The word, taken apart — and its English cousins

лет is the counting form of лето, "summer". EtymDB 2.1 traces лето to Proto-Slavic **lěto*, which already meant "year", so a long count of years is a count of summers. год goes back through Old East Slavic *godŭ*, "time, year", to Proto-Slavic **godŭ*, "the suitable time" (EtymDB).

Your turn

- *Say it: Ya uzhé dva góda uchú rússkiy.*
- *Say it: Dva góda nazád ya byl v Moskvé.*
- *Say it: odín god, dva góda, pyat let*
- *Answer: Skólko tebé let? Mne …*, then *Skólko let ty uchísh rússkiy?*

Before you move on

"I've been learning Russian for two years": which tense? (**The present**, with уже.) "Two years ago"? (Два года назад.) "Five years"? (Пять лет.)

268.3 Review — better than, and years ago

Say "the train is faster than the bus". (*Póyezd bystréye, chem avtóbus.*)

What you've built

Two lessons, and an experience can be measured. -ее and чем for most comparisons, and six to learn whole: больше, меньше, лучше, хуже, дороже, дешевле. The present with уже for what is still going on, the past with назад for when it happened, and год, года, лет to count.
A trip, measured:

> Два года назад я был в Москве. Поезд был дешевле, чем самолёт, и мне было интересно. Я уже два года мечтаю вернуться.

Your turn

- *Say it: Dva góda nazád ya byl v Moskvé.*
- *Say it: Póyezd byl deshévle, chem samolyót.*
- *Say it: Ya uzhé dva góda mechtáyu vernútsya.*
- *Answer: Shto lúchshe, po-tvóyemu: móre íli góry? Po-tvóyemu* is "in your view". Answer with *po-móyemu* and one comparison

Before you move on

"More expensive"? (Дороже.) "An hour ago"? (Час назад.) "Twenty years"? (Двадцать лет.)

Chapter 269

If, and It Depends

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say what will happen if something happens, with если and the future in both halves, and answer a question with это зависит от ...
>
> *Complete RU-C269-review: a weekend plan with* если *and the future, a whether-question with* ли*, and an answer that depends.*

269.1 если — if, and the if that is a question

Say "if". (*Yésli.*) Then say "I've been learning Russian for two years". (*Ya uzhé dva góda uchú rússkiy.*) The word for "if" has waited since the joining words of the A2 chapters. Now it joins.

Grammar Lens: a condition and a comma

Если works like когда: it hangs one half on the other, and the comma sits at the seam, whichever half comes first.

> Если хочешь, мы можем пойти в кино. — *yésli khóchesh, my mózhem poytí v kinó* — If you like, we can go to the cinema. Мы можем пойти в кино, если хочешь. — the same, turned round. Если ты устал, отдохни. — *yésli ty ustál, otdokhní* — If you're tired, have a rest.

Пойти is "to go, to set off", the partner of идти; отдохни is отдохнуть to a friend.

Grammar Lens: "if" that means "whether"

English "if" has a second job: "I don't know if the museum is open". That "if" is a question, "whether", and Russian answers it with ли, not если:

> Я не знаю, работает ли музей. — *ya ne znáyu, rabótayet li muzéy* — I don't know if the museum is open.

The verb comes first, then ли: "is-it-working, the museum". A museum that is open, in Russian, "works".

The word, taken apart — and its English cousins

если was once есть ли, "is it?": есть, "is", with the asking word ли. EtymDB 2.1 records it as a compound of есть and ли, though it glosses that есть as "to eat", the other word with the same spelling; "is", the form of быть, is the one that fits. A condition began as a question.

Your turn

Say these aloud:

- *Yésli khóchesh, my mózhem poytí v kinó.*
- the same, turned round: *My mózhem poytí v kinó, yésli khóchesh.*
- *Yésli ty ustál, otdokhní.*
- *Ya ne znáyu, rabótayet li muzéy.*

Before you move on

Where does the comma go with если? (**At the seam**, either order.) "I don't know if he understands": если or ли? (Ли*:* Я не знаю, понимает ли он.)

269.2 если будет дождь — the future on both sides of if

Say "if you like, we can go to the cinema". (*Yésli khóchesh, my mózhem poytí v kinó.*) Then "I hope the weather will be good". (*Ya nadéyus, shto pogóda búdet khoróshaya.*) That будет is the key to this lesson.

Grammar Lens: the future on both sides

> Если в субботу будет дождь, мы пойдём в музей. — *yésli v subbótu búdet dozhd, my poydyóm v muzéy* — If it rains on Saturday, we'll go to the museum.

English puts the "if" half in the present: "if it rains". When the condition lies ahead, Russian usually puts it in the future as well: "if there will be rain".

> Если будет время, я позвоню. — *yésli búdet vrémya, ya pozvonyú* — If I have time, I'll ring.

Grammar Lens: a perfective points forward

Позвоню, пойдём: these look like present forms, and they are future. A perfective verb has no present, because a deed seen whole cannot be under way now; its present-looking forms point to one deed to come.

> Если я прочитаю книгу, я расскажу тебе. — *yésli ya prochitáyu knígu, ya rasskazhú tebé* — If I finish the book, I'll tell you.

The imperfective builds its future with буду and the infinitive, as met beside будущий: Я буду читать — I will be reading.

The word, taken apart — and its English cousins

будет is the future of быть, which EtymDB 2.1 takes back to Proto-Indo-European $*b^huH$-, "to become". The future of "to be" keeps a root that meant becoming: what will be is what becomes.

Your turn

Say these aloud:

- *Yésli v subbótu búdet dozhd, my poydyóm v muzéy.*
- *Yésli búdet vrémya, ya pozvonyú.*
- *Yésli ya prochitáyu knígu, ya rasskazhú tebé.*
- a plan for the weekend of your own, with *yésli búdet* and one perfective

Before you move on

"If it rains": present or future in Russian? (**Future:** если будет дождь.) Is позвоню now or later? (**Later**: a perfective, one call to come.)

269.3 это зависит от ... (éto zavísit ot ...) — it depends

Say "if it rains on Saturday, we'll go to the museum". (*Yésli v subbótu búdet dozhd, my poydyóm v muzéy.*) Then "the weather". (*Pogóda.*) Sometimes the honest answer to a question is a condition.

You'll want to know: это зависит от ...

— Ты пойдёшь в парк? — Не знаю. Это зависит от погоды. — *ty poydyósh v park? ne znáyu. éto zavísit ot pogódy* — Are you going to the park? I don't know. It depends on the weather.

Зависит is "it depends", from зависеть. In quick conversation it can shrink to Зависит. — "It depends."

Grammar Lens: от and the "of" form

от — *ot* — "from, on". What a thing depends on takes the same form as after до: погода, от погоды; цена, от цены.

Это зависит от цены. — *éto zavísit ot tsený* — It depends on the price. Это зависит от времени. — *éto zavísit ot vrémeni* — It depends on the time. Время has its own shape here: времени. Это зависит от тебя. — *éto zavísit ot tebyá* — It's up to you.

The word, taken apart — and its English cousins

зависеть is за- with висеть, "to hang", which EtymDB 2.1 traces through Old East Slavic *viseti* to Proto-Slavic **viseti*. To depend is to hang on something. English draws the same picture: *depend* is Latin *dēpendēre*, "to hang down from" (Lewis & Short).

Your turn

- *Say it: Éto zavísit ot pogódy.*
- *Say it: Éto zavísit ot tsený*, then *ot vrémeni*
- *Answer: Ty poydyósh v park? Ne znáyu. Éto zavísit ot …*
- *Say it: Mne kázhetsya, shto éto zavísit ot tebyá.*

Before you move on

"It depends on the weather"? (Это зависит от погоды.) "It's up to you"? (Это зависит от тебя.) What verb is inside зависеть? (**One meaning "to hang".**)

269.4 Review — if, and it depends

Say "if you like, we can go to the cinema". (*Yésli khóchesh, my mózhem poytí v kinó.*) Then "I don't know if the museum is open". (*Ya ne znáyu, rabótayet li muzéy.*)

What you've built

Three lessons, and Russian can now look ahead on a condition. Если with a comma at the seam. The future on both sides when the condition lies ahead, with будет and a perfective's forward-pointing forms. Ли when "if" means "whether". And это зависит от with the

"of" form.

The exchange

> — Ты пойдёшь в музей в субботу? — Это зависит от погоды. Если будет дождь, пойду.

Poydú, "I'll go": the perfective, one visit to come. The answer depends, and then says on what.

Your turn

- *Say it: Éto zavísit ot pogódy. Yésli búdet dozhd, poydú.*
- *Say it: Yésli búdet vrémya, ya pozvonyú.*
- *Say it: Póyezd deshévle, chem samolyót, no samolyót bystréye.*
- *Answer: Ty poydyósh v park?* Make it depend on something, then add one *yésli*
- *Say it: Dva góda nazád ya byl v Moskvé, i ya uzhé dva góda uchú rússkiy.*

Before you move on

"If there's time", for tomorrow? (Если будет время.) "Whether": если or ли? (Ли.) "It depends on the price"? (Это зависит от цены.)

Chapter 270

Would, and a Letter About a Trip

Modes: 🚗 **voice** (3) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 4 lessons.

> ***By the end of this chapter:*** I can say what I would like with я бы хотел, what would happen with если бы, and write six connected lines about a trip that end on a condition.
>
> *Complete RU-W270-pismo: six lines to one reader about a trip, the scene in the imperfective, the events in order in the perfective, a feeling, and a last line with* бы*.*

270.1 я бы хотел — would, and the polite request

Say "I want a coffee". (*Ya khochú kófe.*) Then "if I have time, I'll ring". (*Yésli búdet vrémya, ya pozvonyú.*) That was a real plan. Now a softer world: what would be.

Grammar Lens: бы and the -л form

бы — *by* — is a small word that makes "would". It goes with the past form of the verb, the -л form, and here that form says nothing about the past:

> **Я бы хотел кофе.** — *ya by khotél kófe* — I'd like a coffee. **Я бы хотела чай.** — *ya by khotéla chay* — I'd like tea; a woman says it. **Я бы пошёл в кино.** — *ya by poshól v kinó* — I'd go to the cinema.

Бы can also follow the verb: Я хотел бы кофе. It agrees with nothing; the -л form does the agreeing.

Grammar Lens: the polite request

Я хочу is direct; я бы хотел is the polite way to ask for a thing. For asking someone to do something, Russian says "could you not …":

> Вы не могли бы говорить медленно? — *vy ne moglí by govorít médlenno?* — Could you speak slowly? With повторить: Вы не могли бы повторить?

Могли is the -ли form of мочь, for polite вы; повторить is the partner of повторять. The не makes it gentler, not negative.

The word, taken apart — and its English cousins

бы is, by the usual account, a worn-down old form of быть, left over from a past tense Russian no longer has; EtymDB 2.1 lists бы without a parent. It is the same бы that sits inside чтобы, "in order to", a wish fastened to что.

Your turn

- *Say it: Ya by khotél kófe*, then a woman: *Ya by khotéla kófe.*
- *Say it: Ya khotél by chay.* The *by* after the verb
- *Say it: Vy ne moglí by govorít médlenno?*
- *Answer:* at a café the waiter asks *Shto vy khotítye?* Answer politely with *ya by khotél* or *ya by khotéla*

Before you move on

"I'd like a coffee", a woman? (Я бы хотела кофе.) Which verb form goes with бы? (**The -л form**, but it is not past.)

270.2 если бы — the condition that is not so

Say "I'd like a coffee". (*Ya by khotél kófe.*) Then the real plan: "if I have time, I'll ring". (*Yésli búdet vrémya, ya pozvonyú.*)

Grammar Lens: у меня было, I had

You have said у меня проблема, "at me, a problem". "I have time" is built the same way: у меня есть время. In the past, the thing you had is the subject, and было agrees with it: время is neuter, so у меня было время — *u menyá býlo vrémya* — I had time.

Grammar Lens: бы on both sides

> Если бы у меня было время, я бы позвонил. — *yésli by u menyá býlo vrémya, ya by pozvoníl* — If I had time, I would ring. Если бы я знал, я бы помог. — *yésli by ya znal, ya by pomóg* — If I had known, I would have helped.

Бы stands on both sides, each time with the past form: знал, позвонил, and помог, one of the few without an л. Russian marks no time here: the first can mean "if I had time now" or "if I had had time then", and the story around it decides. Помог, "helped", is the past of помочь, the partner of помогать.

Why it's said this way

> Если будет время, я позвоню. — It may well happen: a plan. Если бы было время, я бы позвонил. — It is not so: a wish, or a regret.

Your turn

Say these aloud:

- *U menyá býlo vrémya.*
- *Yésli by u menyá býlo vrémya, ya by pozvoníl.*
- *Yésli by ya znal, ya by pomóg*, then a woman: *Yésli by ya znála, ya by pomoglá.*
- one wish of your own: *Yésli by u menyá býlo vrémya, ya by …*

Before you move on

"I had time"? (У меня было время.) A plan or a wish: если бы было время? (**A wish**: it is not so.) How many times does бы appear? (**Twice**, once on each side.)

270.3 Review — what will be, and what would be

Ask politely for a tea, as a woman. (*Ya by khotéla chay.*) Then ask someone to speak slowly. (*Vy ne moglí by govorít médlenno?*)

What you've built

Two lessons, and Russian can now say what is not so. Бы with the -л form, whatever the time. Я бы хотел to ask for a thing, вы не могли бы to ask for a favour. And two kinds of если: the future for a plan, бы on both sides for a wish.
The same dream, two ways:

> Если у меня будут деньги, я буду путешествовать. — a plan. Если бы у меня были деньги, я бы путешествовал. — a wish.

Деньги, "money", is plural, so будут and были. Путешествовать is imperfective, so its future is буду and the infinitive.

Your turn

- *Say it: Yésli by u menyá býli déngi, ya by puteshéstvoval.*
- *Say it: Yésli by ya znála, ya by pomoglá.*
- *Answer: Ty búdesh puteshéstvovat létom? Éto zavísit ot déneg*, with *déneg*, the "of" form of *déngi*; then one line with *yésli*
- *Say it: Ya mechtáyu o móre. Yésli by u menyá býlo vrémya, ya by puteshéstvoval.*

Before you move on

A plan, or a wish: если бы у меня были деньги? (**A wish.**) "Could you …?", politely? (Вы не могли бы *…?*) "I had time"? (У меня было время.)

270.4 Six lines about a trip

The four-line writing step held together with и, но, а and потому что. This time there are six, and they tell a story, as Anna's rainy Saturday did.

Pick one person who will read it: друг, подруга, someone in your family.

What to know first

A told trip is more than a list of events. It has a **scene**, in the imperfective: было, шёл дождь, мы жили в гостинице. It has **steps** in order, each one finished, in the perfective. It has a **feeling**. And a good one ends by looking forward, or wishing.

A past verb agrees with who did it: -л, -ла, -ли. A few, such as мог, drop the л only in the form for a man: мог, but могла, могли. A verb after бы takes the same forms.

Writing — connected composition

On paper, write **six lines** to your reader about a trip, real or invented, one line for each of these:

1. the scene: when, with назад (год назад), and what it was like, in the imperfective;
2. the first step, with сначала, in the perfective;
3. the next step, with потом or затем, and a reason, with потому что, поэтому or так что; a problem works well here: я опоздал на поезд;
4. something that cut in, with когда or пока, and how it ended, with наконец;

5. how you felt, with я был рад, что …, я устал or мне было …, or what you thought, with по-моему and a comparison: лучше, чем …;

6. one line forward, with если бы у меня было время, я бы …, or я бы хотел …, or a hope: я надеюсь, что …, я мечтаю ….

Use only words you already write. The exercise is the joining, and the aspect of each verb.

Before you move on

Now go through your lines and find every verb. In line one, is it imperfective, a scene? In lines two, three and four, is each step perfective, one deed done? That is the slip to check first.
Then the endings: -л for a man, -ла for a woman, -ли for more than one, after бы as well.
Last, the commas: one before что, потому что and чем, one before поэтому or так что when they join inside a sentence, and one at the seam after a когда, пока or если half. If line six uses если бы, does бы stand on both sides of the comma?

Chapter 271

Suddenly and at once

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something happened suddenly, in a flash, at once, without delay and in an instant.
>
> *Complete the last lesson of chapter 271: I can say that something happened suddenly, in a flash, at once, without delay and in an instant.*

271.1 внезапно (vnezápno) — suddenly, unexpectedly

Before the new one: say the Russian for a task, then the Russian for experience.

You'll want to know: внезапно

внезапно (*vnezápno*) — "suddenly, unexpectedly".

> Внезапно в комнате стало темно.
>
> *Vnezápno v kómnate stálo temnó.*
>
> Suddenly it went dark in the room.

The adverb of внезапный (*vnezápnyy*) "sudden". A little more bookish than вдруг, and common in stories.

The word, taken apart — and its English cousins

внезапно is the adverb of внезапный "sudden", built with the old prefix вне-. The origin of the stem -запн- is not settled, and EtymDB lists no parent.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vnezápno*
- *Say it: vnezápno*, once more
- *Say it:* a sentence of your own with *vnezápno*
- *Recall:* say the Russian for a task, then the Russian for experience, then say *vnezápno* again

Before you move on

What does внезапно mean? ("Suddenly, unexpectedly".) Say it once more.

271.2 мгновенно (mgnovénno) — instantly, in a flash

Before the new one: say the Russian for experience, then the Russian for suddenly.

You'll want to know: мгновенно

мгновенно (*mgnovénno*) — "instantly, in a flash".

Он мгновенно понял, что случилось.

On mgnovénno pónyal, shto sluchílos.

He instantly understood what had happened.

The adverb of мгновенный (*mgnovénnyy*) "instant". Мгновенно is faster still than быстро.

The word, taken apart — and its English cousins

мгновенно is built on мгновение "an instant", which is inherited through Old East Slavic *mĭgnovenije* from Proto-Slavic *mĭgnovenĭje*, built on *mĭgnǫti* "to blink" (EtymDB): as quick as a blink.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: mgnovénno*
- *Say it: mgnovénno*, once more
- *Say it:* a sentence of your own with *mgnovénno*
- *Recall:* say the Russian for experience, then the Russian for suddenly, then say *mgnovénno* again

Before you move on

What does мгновенно mean? ("Instantly, in a flash".) Say it once more.

271.3 тотчас (totchás) — at once, immediately

Before the new one: say the Russian for suddenly, then the Russian for instantly.

You'll want to know: тотчас

тотчас (*totchás*) — "at once, immediately".

Врач тотчас пришёл.

Vrach totchás prishyól.

The doctor came at once.

Stressed on the end, *totchás* (*tótchas* is also heard). Bookish and a little old-fashioned; in speech Russians say сразу. Often strengthened: тотчас же.

The word, taken apart — and its English cousins

тотчас joins тот "that" and час "hour", which is inherited from Proto-Slavic *časŭ* "time" (EtymDB): that very hour.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: totchás*
- *Say it: totchás*, once more
- *Say it:* a sentence of your own with *totchás*
- *Recall:* say the Russian for suddenly, then the Russian for instantly, then say *totchás* again

Before you move on

What does тотчас mean? ("At once, immediately".) Say it once more.

271.4 немедленно (nemédlenno) — immediately, without delay

Before the new one: say the Russian for instantly, then the Russian for at once.

You'll want to know: немедленно

немедленно (*nemédlenno*) — "immediately, without delay".

Он немедленно позвонил домой.

On nemédlenno pozvoníl domóy.

He phoned home immediately.

Literally "not slowly". Firmer than сразу; common in orders and official notices.

The word, taken apart — and its English cousins

немедленно is built on не "not" and медленно "slowly" (EtymDB lists медленно as its source), the adverb of медленный "slow": without lingering.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: nemédlenno*
- *Say it: nemédlenno*, once more
- *Say it:* a sentence of your own with *nemédlenno*
- *Recall:* say the Russian for instantly, then the Russian for at once, then say *nemédlenno* again

Before you move on

What does немедленно mean? ("Immediately, without delay".) Say it once more.

271.5 мгновение (mgnovéniye) — an instant, a moment

Before the new one: say the Russian for at once, then the Russian for immediately.

You'll want to know: мгновение

мгновение (*mgnovéniye*) — "an instant, a moment".

На одно мгновение все замолчали.

Na odnó mgnovéniye vse zamolcháli.

For an instant everyone fell silent.

A neuter noun. В одно мгновение — in an instant; в последнее мгновение — at the last moment.

The word, taken apart — and its English cousins

мгновение is inherited through Old East Slavic *mĭgnovenije* from Proto-Slavic *mĭgnovenĭje*, built on *mĭgnǫti* "to blink", a cousin of мигать "to blink" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: mgnovéniye*
- *Say it: mgnovéniye*, once more
- *Say it:* a sentence of your own with *mgnovéniye*
- *Recall:* say the Russian for at once, then the Russian for immediately, then say *mgnovéniye* again

Before you move on

What does мгновение mean? ("An instant, a moment".) Say it once more.

Chapter 272

Beforehand and soon after

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say when something happened: in advance, on the eve, before, soon after and some time later.
>
> *Complete the last lesson of chapter 272: I can say when something happened: in advance, on the eve, before, soon after and some time later.*

272.1 заранее (zaráneye) — in advance, beforehand

Before the new one: say the Russian for immediately, then the Russian for an instant.

You'll want to know: заранее

заранее (*zaráneye*) — "in advance, beforehand".

> Мы купили билеты заранее.
>
> *My kupíli bíléty zaráneye.*
>
> We bought the tickets in advance.

Заранее спасибо — thanks in advance.

The word, taken apart — and its English cousins

заранее is built on за- and ранний "early", the adjective of рано, which is inherited from Proto-Slavic *ranŭ* "early" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: zaráneye*
- *Say it: zaráneye*, once more
- *Say it:* a sentence of your own with *zaráneye*
- *Recall:* say the Russian for immediately, then the Russian for an instant, then say *zaráneye* again

Before you move on

What does заранее mean? ("In advance, beforehand".) Say it once more.

272.2 накануне (nakanúne) — the day before, on the eve

Before the new one: say the Russian for an instant, then the Russian for in advance.

You'll want to know: накануне

накануне (*nakanúne*) — "the day before, on the eve".

Накануне свадьбы она не спала.

Nakanúne svádby oná ne spalá.

On the eve of the wedding she did not sleep.

With the genitive: накануне праздника — on the eve of the holiday. Alone it means "the day before".

The word, taken apart — and its English cousins

накануне is built on на "on" and канун "the eve of a feast", which is usually traced to Greek *kanōn* "a rule", the name of a church service sung on the eve; EtymDB lists no parent.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: nakanúne*
- *Say it: nakanúne*, once more
- *Say it:* a sentence of your own with *nakanúne*

Before you move on

What does накануне mean? ("The day before, on the eve".) Say it once more.

272.3 прежде (prézhde) — before, formerly

Before the new one: say the Russian for in advance, then the Russian for the day before.

You'll want to know: прежде

прежде (*prézhde*) — "before, formerly".

Прежде здесь был маленький парк.

Prézhde zdes byl málenkiy park.

Formerly there was a small park here.

Прежде чем + infinitive — before doing: прежде чем уйти. Прежде всего — first of all.

The word, taken apart — and its English cousins

прежде is a Church Slavonic word, *prěžde* "before" (EtymDB), with the -ре- of the church language; the native Russian shape of the same root is перед "in front of".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: prézhde*
- *Say it: prézhde*, once more
- *Say it:* a sentence of your own with *prézhde*

Before you move on

What does прежде mean? ("Before, formerly".) Say it once more.

272.4 вскоре (vskóre) — soon after, shortly

Before the new one: say the Russian for the day before, then the Russian for before.

You'll want to know: вскоре

вскоре (*vskóre*) — "soon after, shortly".

Вскоре пошёл снег.

Vskóre poshyól sneg.

Soon after, it began to snow.

It looks back from a point in the story: soon after that. Вскоре после обеда — shortly after lunch.

The word, taken apart — and its English cousins

вскоре is built on в and скоро "quickly", from скорый "fast", which is inherited through Old East Slavic *skorŭ* from Proto-Slavic *skorŭ* "fast" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vskóre*
- *Say it: vskóre*, once more
- *Say it:* a sentence of your own with *vskóre*
- *Recall:* say the Russian for the day before, then the Russian for before, then say *vskóre* again

Before you move on

What does вскоре mean? ("Soon after, shortly".) Say it once more.

272.5 спустя (spustyá) — later, after (a stretch of time)

Before the new one: say the Russian for before, then the Russian for soon after.

You'll want to know: спустя

спустя (*spustyá*) — "later, after (a stretch of time)".

> Спустя два года они снова встретились.
>
> *Spustyá dva góda oní snóva vstrétilis.*
>
> Two years later they met again.

With the accusative of time, before or after it: спустя неделю or неделю спустя — a week later.

The word, taken apart — and its English cousins

спустя is an old adverbial participle of спустить "to let down", built on пустить "to let go", inherited from Proto-Slavic *pustiti* (EtymDB): time let go by.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

273.1 происходить (proiskhodít) — to happen, to take place

Before the new one: say the Russian for soon after, then the Russian for later.

You'll want to know: происходить

происходить (*proiskhodít*) — "to happen, to take place".

> Это происходит каждую зиму.
>
> *Éto proiskhódit kázhduyu zímu.*
>
> This happens every winter.

Imperfective; the perfective is произойти (*proizoytí*), past произошёл (*proizoshyól*): что произошло*?* — what happened?

The word, taken apart — and its English cousins

происходить is built on про-, из- and ходить "to go", which is inherited from Proto-Slavic *xoditi* (EtymDB): to come out, to come about.

What you've built

One more word for telling, explaining and describing at B1.

273.3 длиться (dlítsya) — to last

Before the new one: say the Russian for to happen, then the Russian for to go on.

You'll want to know: длиться

длиться (*dlítsya*) — "to last".

Фильм длился два часа.

Film dlílsya dva chasá.

The film lasted two hours.

Imperfective; perfective продлиться (*prodlítsya*). The time is in the accusative: урок длится час.

The word, taken apart — and its English cousins

длиться is built on длина "length", from the same Slavic root as долгий "long", Proto-Slavic *dĭlgŭ* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dlítsya*

273.4 прекращаться (prekrashchátsya) — to stop, to cease

Before the new one: say the Russian for to go on, then the Russian for to last.

You'll want to know: прекращаться

прекращаться (*prekrashchátsya*) — "to stop, to cease".

Музыка не прекращалась всю ночь.

Múzyka ne prekrashchálas vsyu noch.

The music did not stop all night.

Imperfective; perfective прекратиться (*prekratítsya*). Without -ся, прекращать stops something else.

The word, taken apart — and its English cousins

прекращаться is built on пре- and кратить "to shorten", from краткий "short", usually explained as the Church Slavonic shape of native короткий, Proto-Slavic *kortŭkŭ* (EtymDB): to cut short.

What you've built

One more word for telling, explaining and describing at B1.

273.5 наступать (nastupát) — to come, to set in (of a time); to step on

Before the new one: say the Russian for to last, then the Russian for to stop.

You'll want to know: наступать

наступать (*nastupát*) — "to come, to set in (of a time); to step on".

Наступает вечер.

Nastupáyet vécher.

Evening is coming on.

Imperfective; perfective наступить (*nastupít*): наступила зима — winter came. Also наступить на ногу — to step on a foot.

The word, taken apart — and its English cousins

наступать is built on на- and ступать "to step", the root of ступень "a step", inherited from Proto-Slavic *stǫpenĭ* (EtymDB): to step onto.

What you've built

One more word for telling, explaining and describing at B1.

Chapter 274

Little by little

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say how events unfolded: gradually, at the same time, at first, later on and at the very end.
>
> *Complete the last lesson of chapter 274: I can say how events unfolded: gradually, at the same time, at first, later on and at the very end.*

274.1 постепенно (postépenno) — gradually, little by little

Before the new one: say the Russian for to stop, then the Russian for to come.

You'll want to know: постепенно

постепенно (*postépenno*) — "gradually, little by little".

> Постепенно все поняли правила игры.
>
> *Postépenno vse pónyali právila igrý.*
>
> Gradually everyone understood the rules of the game.

The adverb of постепенный (*postépennyy*) "gradual".

The word, taken apart — and its English cousins

постепенно is built on по and степень "a degree, a step", inherited from Proto-Slavic *stepeně* (EtymDB): step by step.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

274.2 одновременно (odnovreménno) — at the same time, simultaneously

Before the new one: say the Russian for to come, then the Russian for gradually.

You'll want to know: одновременно

одновременно (*odnovreménno*) — "at the same time, simultaneously".

Они пришли одновременно.

Oní prishlí odnovreménno.

They arrived at the same time.

Одновременно с + instrumental means "at the same time as": одновременно с нами.

The word, taken apart — and its English cousins

одновременно joins один "one", inherited from Proto-Slavic *edinŭ* (EtymDB), and время "time", usually taken as a Church Slavonic shape beside Old Russian веремя; EtymDB lists время with no parent.

275.4 повторяться (povtoryátsya) — to happen again, to recur

Before the new one: say the Russian for to put off, then the Russian for to be delayed.

You'll want to know: повторяться

повторяться (*povtoryátsya*) — "to happen again, to recur".

Такая история больше не повторится.

Takáya istóriya bólshe ne povtorítsya.

A story like this will not happen again.

Imperfective; perfective повториться (*povtorítsya*). Повторять is to repeat something; with -ся the event itself comes back.

The word, taken apart — and its English cousins

повторяться is built on по- and второй "second", which is inherited from Proto-Slavic *vŭtorŭ* "second" (EtymDB): to happen a second time.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

News and headlines

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about the news: a piece of news, a bulletin, a headline, an article and a sensation.
>
> *Complete the last lesson of chapter 279: I can talk about the news: a piece of news, a bulletin, a headline, an article and a sensation.*

279.1 известие (izvéstiye) — a piece of news, a report

Before the new one: say the Russian for to recall, then the Russian for to memorize.

You'll want to know: известие

известие (*izvéstiye*) — "a piece of news, a report".

> Мы получили известие о его приезде.
>
> *My poluchíli izvéstiye o yevó priyézde.*
>
> We received news of his arrival.

More formal than новость. Neuter; plural известия.

The word, taken apart — and its English cousins

известие is built on весть "news, tidings", from the old Slavic root of ведать "to know", which goes back to PIE *weyd-* "to see, to know" (EtymDB lists известие "news" with no parent).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: izvéstiye*
- *Say it: izvéstiye*, once more
- *Say it:* a sentence of your own with *izvéstiye*
- *Recall:* say the Russian for to recall, then the Russian for to memorize, then say *izvéstiye* again

Before you move on

What does известие mean? ("A piece of news, a report".) Say it once more.

279.2 выпуск (výpusk) — a bulletin, an issue, an edition

Before the new one: say the Russian for to memorize, then the Russian for a piece of news.

You'll want to know: выпуск

выпуск (*výpusk*) — "a bulletin, an issue, an edition".

В вечернем выпуске новостей говорили о погоде.

V vechérnem výpuske novostéy govoríli o pogóde.

In the evening news bulletin they talked about the weather.

Выпуск новостей — a news bulletin; also an issue of a magazine.

The word, taken apart — and its English cousins

выпуск is built on выпускать "to let out, to issue", from пускать "to let go", inherited from Proto-Slavic *pustiti* (EtymDB): what is let out to the public.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: výpusk*
- *Say it: výpusk*, once more
- *Say it:* a sentence of your own with *výpusk*

You'll want to know: статья

статья (*statyá*) — "an article".

Он написал статью о нашей школе.

On napisál statyú o náshey shkóle.

He wrote an article about our school.

Genitive статьи. Also an article of a law: статья закона.

The word, taken apart — and its English cousins

статья is usually traced to the root of стать "to stand, to become", inherited from Proto-Slavic *stati* (EtymDB), with an old sense "a part in its place"; EtymDB lists no parent for статья itself.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: statyá*
- *Say it: statyá*, once more
- *Say it:* a sentence of your own with *statyá*

Before the new one: say the Russian for questioning, then the Russian for a statement.

You'll want to know: суд

суд (*sud*) — "a court; a trial".

> Суд будет в понедельник.
>
> *Sud búdet v ponedélnik.*
>
> The trial will be on Monday.

В суде — in court; подать в суд — to sue.

The word, taken apart — and its English cousins

суд is inherited through Old East Slavic *sudŭ* from Proto-Slavic *sǫdŭ*, which EtymDB builds from PIE *som-* "together" and $d^h eh_1$- "to put":

a putting together.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sud*
- *Say it: sud*, once more
- *Say it:* a sentence of your own with *sud*
- *Recall:* say the Russian for questioning, then the Russian for a statement, then say *sud* again

Before the new one: say the Russian for to chill, then the Russian for to melt.

You'll want to know: переворачивать

переворачивать (*perevoráchivat*) — "to turn over, to flip".

Он переворачивает блины.

On perevoráchivayet bliný.

He flips the pancakes.

Imperfective; perfective перевернуть (*perevernút*).

The word, taken apart — and its English cousins

переворачивать is the imperfective partner of перевернуть "to turn over"; its stem -ворач- belongs with воротить "to turn back", Proto-Slavic *vortiti*, and -вернуть with вертеть "to turn", Proto-Slavic *vĭrtěti*, PIE *wert-* (EtymDB); the two are usually seen as grades of one root.

What you've built

>
> *Complete the last lesson of chapter 336: I can say what I added, laid out and took out, and describe food as boiled or fried.*

336.1 добавлять (dobavlyát) — to add

Before the new one: say the Russian for to melt, then the Russian for to turn over.

You'll want to know: добавлять

добавлять (*dobavlyát*) — "to add".

> В суп я добавил немного соли.
>
> *V sup ya dobávil nemnógo sóli.*
>
> I added a little salt to the soup.

Imperfective; perfective добавить (*dobávit*), добавлю. It takes the accusative, or the genitive for "some": добавить сахару.

The word, taken apart — and its English cousins

добавлять is built on до- and an old verb бавить "to make, to keep busy", as in забава "amusement"; the link is usually traced, and EtymDB lists no parent.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dobavlyát*
- *Say it: dobavlyát*, once more
- *Say it:* a sentence of your own with *dobavlyát*

Before you move on

What does добавлять mean? ("To add".) Say it once more.

336.2 выкладывать (vykládyvat) — to lay out, to put out

Before the new one: say the Russian for to turn over, then the Russian for to add.

You'll want to know: выкладывать

выкладывать (*vykládyvat*) — "to lay out, to put out".

Она выложила печенье на тарелку.

Oná výlozhila pechénye na tarélku.

She put the biscuits out on a plate.

Imperfective; perfective выложить (*výlozhit*). In speech also "to tell everything": выложить всё (*výlozhit vsyo*).

The word, taken apart — and its English cousins

выкладывать is built on вы- "out" and the stem клад- of класть "to put", an inherited Slavic verb; EtymDB lists no parent.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vykládyvat*
- *Say it: vykládyvat*, once more
- *Say it:* a sentence of your own with *vykládyvat*
- *Recall:* say the Russian for to turn over, then the Russian for to add, then say *vykládyvat* again

Before you move on

What does выкладывать mean? ("To lay out, to put out".) Say it once more.

336.3 варёный (varyónyy) — boiled

Before the new one: say the Russian for to add, then the Russian for to lay out.

You'll want to know: варёный

варёный (*varyónyy*) — "boiled".

На завтрак он съел варёное яйцо.

Na závtrak on syel varyónoye yaytsó.

He had a boiled egg for breakfast.

Варёная колбаса (*Varyónaya kolbasá*) — a soft boiled sausage.

The word, taken apart — and its English cousins

варёный is the old participle of варить "to boil", inherited from Proto-Slavic *variti* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: varyónyy*

336.4 жареный (zhárenyy) — fried, roast

Before the new one: say the Russian for to lay out, then the Russian for boiled.

You'll want to know: жареный

жареный (*zhárenyy*) — "fried, roast".

На ужин была жареная рыба.

Na úzhin bylá zhárenaya rýba.

There was fried fish for dinner.

One н, as a plain adjective; жаренный на масле takes two.

The word, taken apart — and its English cousins

жареный is the old participle of жарить "to fry", from жар "heat", the same Slavic root as гореть "to burn"; EtymDB lists no parent.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: zhárenyy*
- *Say it: zhárenyy*, once more
- *Say it:* a sentence of your own with *zhárenyy*
- *Recall:* say the Russian for to lay out, then the Russian for boiled, then say *zhárenyy* again

Before you move on

What does жареный mean? ("Fried, roast".) Say it once more.

336.5 вынимать (vynimát) — to take out

Before the new one: say the Russian for boiled, then the Russian for fried.

You'll want to know: вынимать

вынимать (*vynimát*) — "to take out".

Мама вынула пирог из духовки.

Máma výnula piróg iz dukhóvki.

Mum took the pie out of the oven.

Imperfective; perfective вынуть (*výnut*), выну.

The word, taken apart — and its English cousins

вынимать is built on вы- "out" and the old Slavic root -ним-, -ять "to take", seen in взять and понимать; EtymDB traces this root to PIE h_1*em-*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vynimát*
- *Say it: vynimát*, once more
- *Say it:* a sentence of your own with *vynimát*
- *Recall:* say the Russian for boiled, then the Russian for fried, then say *vynimát* again

Before you move on

What does вынимать mean? ("To take out".) Say it once more.

336.6 Step by step, once more

Say the Russian for to cool down and to defrost.

Your turn

Say these aloud:

- to cool down, to defrost, to chill, to melt, to turn over
- to add, to lay out, boiled, fried, to take out

Before you move on

To cool down? (остывать.) To defrost? (размораживать.) To chill? (охлаждать.) To melt? (растапливать.) To turn over? (переворачивать.) To add? (добавлять.) To lay out?

(выкладывать.) Boiled? (варёный.) Fried? (жареный.) To take out? (вынимать.)

336.7 Serving up — once more

Say the Russian for to add and to lay out.

Your turn

>
> *Complete the last lesson of chapter 337: I can give my point of view and my position, say how I see things, state something publicly and say what is considered true.*

337.1 точка зрения (tóchka zréniya) — a point of view

Before the new one: say the Russian for a task, then the Russian for experience.

You'll want to know: точка зрения

точка зрения (*tóchka zréniya*) — "a point of view".

> С моей точки зрения, это хорошая идея.
>
> *S moyéy tóchki zréniya, éto khoróshaya idéya.*
>
> From my point of view, it is a good idea.

Feminine, after точка: genitive точки зрения. С моей точки зрения — from my point of view.

The word, taken apart — and its English cousins

точка is usually traced to the verb ткнуть "to poke, to jab": a dot is the mark a jab leaves (EtymDB lists Lithuanian *taškas* "a dot" beside it). зрение "sight" is built on the old verb зреть "to look", so a point of view is literally the point you look from.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: tóchka zréniya*
- *Say it: tóchka zréniya*, once more
- *Say it:* a sentence of your own with *tóchka zréniya*
- *Recall:* say the Russian for a task, then the Russian for experience, then say *tóchka zréniya* again

Before you move on

What does точка зрения mean? ("A point of view".) Say it once more.

337.2 позиция (pozítsiya) — a position, a stance

Before the new one: say the Russian for experience, then the Russian for a point of view.

You'll want to know: позиция

позиция (*pozítsiya*) — "a position, a stance".

Моя позиция проста: надо больше читать.

Moyá pozítsiya prostá: nádo bólshe chitát.

My position is simple: we need to read more.

Feminine. Занимать позицию — to take a position. It is also a place in a list or a team: первая позиция.

The word, taken apart — and its English cousins

позиция is usually traced, through western European languages, to Latin *positiō* "a placing, a position" (Lewis & Short), which is built on *pōnere* "to put, to place". A stance is where you have placed yourself.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: pozítsiya*
- *Say it: pozítsiya*, once more
- *Say it:* a sentence of your own with *pozítsiya*
- *Recall:* say the Russian for experience, then the Russian for a point of view, then say *pozítsiya* again

Before you move on

What does позиция mean? ("A position, a stance".) Say it once more.

337.3 взгляд (vzglyad) — a view, an opinion; a look

Before the new one: say the Russian for a point of view, then the Russian for a position.

You'll want to know: взгляд

взгляд (*vzglyad*) — "a view, an opinion; a look".

У нас разные взгляды на жизнь.

U nas ráznyye vzglyády na zhizn.

We have different views on life.

Masculine. На мой взгляд — in my view. It is also a glance: быстрый взгляд.

The word, taken apart — and its English cousins

взгляд is inherited from Proto-Slavic **vŭzględŭ* (EtymDB), built from the prefix **vŭz-* "up" and **gląděti* "to look", the verb that survives in глядеть. A view began as a look upwards.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vzglyad*
- *Say it: vzglyad*, once more
- *Say it:* a sentence of your own with *vzglyad*
- *Recall:* say the Russian for a point of view, then the Russian for a position, then say *vzglyad* again

Before you move on

What does взгляд mean? ("A view, an opinion; a look".) Say it once more.

337.4 заявлять (zayavlyát) — to declare, to state publicly

Before the new one: say the Russian for a position, then the Russian for a view.

You'll want to know: заявлять

заявлять (*zayavlyát*) — "to declare, to state publicly".

Директор заявляет, что завод не закроют.

Diréktor zayavlyáyet, chto zavód ne zakróyut.

The director states that the factory will not be closed.

Imperfective; perfective заявить (заявлю, заявишь). Formal: officials and newspapers заявляют, while among friends people говорят.

The word, taken apart — and its English cousins

заявлять is built from за- and являть "to show, to reveal", the verb behind явный "obvious". Явить comes through Old East Slavic *javiti* from Proto-Slavic **aviti* "to make visible" (EtymDB): to declare is to make a thing plain.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: zayavlyát*
- *Say it: zayavlyát*, once more
- *Say it:* a sentence of your own with *zayavlyát*
- *Recall:* say the Russian for a position, then the Russian for a view, then say *zayavlyát* again

Before you move on

What does заявлять mean? ("To declare, to state publicly".) Say it once more.

337.5 считаться (schitátsya) — to be considered, to be regarded as

Before the new one: say the Russian for a view, then the Russian for to declare.

You'll want to know: считаться

считаться (*schitátsya*) — "to be considered, to be regarded as".

Этот район считается самым тихим в городе.

Étot rayón schitáyetsya sámym tíkhim v górode.

This district is considered the quietest in the city.

An imperfective verb. It takes the instrumental: считается лучшим. Считаться с + instrumental — to take into account.

The word, taken apart — and its English cousins

считаться is the reflexive of считать, built from с- and читать. Читать shares its root with число "number", from Proto-Slavic **čislo*, built on **čisti* (EtymDB): to be considered is to be counted as something.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: schitátsya*
- *Say it: schitátsya*, once more
- *Say it:* a sentence of your own with *schitátsya*
- *Recall:* say the Russian for a view, then the Russian for to declare, then say *schitátsya* again

Before you move on

What does считаться mean? ("To be considered, to be regarded as".) Say it once more.

Chapter 338

Arguments and evidence

>
> *Complete the last lesson of chapter 338: I can give an argument and a reason, prove a point with evidence and say whether it is convincing.*

338.1 аргумент (argumént) — an argument (a reason)

Before the new one: say the Russian for to declare, then the Russian for to be considered.

You'll want to know: аргумент

аргумент (*argumént*) — "an argument (a reason)".

> Это сильный аргумент.
>
> *Éto sílnyy argumént.*
>
> That is a strong argument.

Masculine. A reason in a debate, not a quarrel: a quarrel is спор or ссора.

The word, taken apart — and its English cousins

аргумент is usually traced, through German and Polish, to Latin *argūmentum* "proof, evidence" (Lewis & Short), built on *arguere* "to make clear, to prove".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: argumént*
- *Say it: argumént*, once more
- *Say it:* a sentence of your own with *argumént*
- *Recall:* say the Russian for to declare, then the Russian for to be considered, then say *argumént* again

Before you move on

What does аргумент mean? ("An argument (a reason)".) Say it once more.

338.2 довод (dóvod) — a point made, a reason given

Before the new one: say the Russian for to be considered, then the Russian for an argument.

You'll want to know: довод

довод (*dóvod*) — "a point made, a reason given".

Его доводы меня не убедили.

Yegó dóvody menyá ne ubedíli.

His points did not convince me.

Masculine. More bookish than аргумент: привести довод — to put forward a point.

The word, taken apart — and its English cousins

довод is built from до- "up to" and вод-, the root of водить "to lead", the iterative partner of вести, from Proto-Slavic **voditi* "to lead, to conduct" (EtymDB). A point made leads the listener up to a conclusion.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dóvod*
- *Say it: dóvod*, once more
- *Say it:* a sentence of your own with *dóvod*
- *Recall:* say the Russian for to be considered, then the Russian for an argument, then say *dóvod* again

Before you move on

What does довод mean? ("A point made, a reason given".) Say it once more.

338.3 доказывать (dokázyvat) — to prove

Before the new one: say the Russian for an argument, then the Russian for a point made.

You'll want to know: доказывать

доказывать (*dokázyvat*) — "to prove".

Он долго доказывал, что прав.

On dólgo dokázyval, chto prav.

He spent a long time proving that he was right.

Imperfective, with the perfective доказать (докажу, докажешь). Доказывать, что… — to prove that…

The word, taken apart — and its English cousins

доказывать is built from до- and казать "to show", the verb inside показывать and сказать. Казать is inherited from Proto-Slavic **kazati* (EtymDB): to prove is to show a thing through to the end.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dokázyvat*
- *Say it: dokázyvat*, once more
- *Say it:* a sentence of your own with *dokázyvat*

Before you move on

What does доказывать mean? ("To prove".) Say it once more.

338.4 доказательство (dokazátelstvo) — proof, evidence

Before the new one: say the Russian for a point made, then the Russian for to prove.

You'll want to know: доказательство

доказательство (*dokazátelstvo*) — "proof, evidence".

У полиции нет доказательств.

U polítsii net dokazátelstv.

The police have no evidence.

Neuter. The plural доказательства means pieces of evidence.

The word, taken apart — and its English cousins

доказательство is built on доказать "to prove" with the abstract suffix -тельство; the root is казать "to show", from Proto-Slavic **kazati* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

Before you move on

What does доказательство mean? ("Proof, evidence".) Say it once more.

338.5 убедительный (ubedítelnyy) — convincing

Before the new one: say the Russian for to prove, then the Russian for proof.

You'll want to know: убедительный

убедительный (*ubedítelnyy*) — "convincing".

Его ответ был не очень убедительным.

Yegó otvét byl ne óchen ubedítelnym.

His answer was not very convincing.

From убедить, to convince. Убедительная просьба — an urgent request, a fixed formula on notices.

The word, taken apart — and its English cousins

убедительный is built on убедить "to convince". The root is that of беда "trouble", inherited from Proto-Slavic **běda*, which EtymDB sets beside Greek *peíthō* "I persuade" (EtymDB). To convince someone was first to press them hard.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ubedítelnyy*
- *Say it: ubedítelnyy*, once more

339.1 убеждать (ubezhdát) — to convince, to persuade

> Before the new one: say the Russian for proof, then the Russian for convincing.

You'll want to know: убеждать

убеждать (*ubezhdát*) — "to convince, to persuade".

> Я убеждал друга поехать с нами, но он не захотел.
>
> *Ya ubezhdál drúga poyékhat s námi, no on ne zakhotél.*
>
> I tried to persuade my friend to come with us, but he did not want to.

Imperfective; perfective убедить, which has no form for я in the future. Убеждать кого-то + infinitive, or в + prepositional.

The word, taken apart — and its English cousins

убеждать is the imperfective of убедить, on the root of беда "trouble", Proto-Slavic **běda* (EtymDB). The жд is the Church Slavonic way of softening д; native Russian softens it to ж, as in вожу beside водить.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ubezhdát*
- *Say it: ubezhdát*, once more

339.2 переубеждать (pereubezhdát) — to change someone's mind

Before the new one: say the Russian for convincing, then the Russian for to convince.

You'll want to know: переубеждать

переубеждать (*pereubezhdát*) — "to change someone's mind".

Маму невозможно переубедить.

Mámu nevozmózhno pereubedít.

It is impossible to change Mum's mind.

Imperfective; perfective переубедить. Пере- adds the sense of over again: to convince someone the other way.

The word, taken apart — and its English cousins

переубеждать is built from пере- "over, again" and убеждать "to convince", whose root is that of беда, Proto-Slavic **běda* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: pereubezhdát*

339.3 убеждение (ubezhdéniye) — a conviction, a firm belief

Before the new one: say the Russian for to convince, then the Russian for to change someone's mind.

You'll want to know: убеждение

убеждение (*ubezhdéniye*) — "a conviction, a firm belief".

Он не ест мясо по убеждению.

On ne yest myáso po ubezhdéniyu.

He does not eat meat out of conviction.

Neuter. По убеждению — out of conviction. The plural убеждения means one's beliefs.

The word, taken apart — and its English cousins

убеждение is built on убедить "to convince" with the noun suffix -ение, keeping the Church Slavonic жд. The root is that of беда, Proto-Slavic **běda* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Before you move on

What does убеждение mean? ("A conviction, a firm belief".) Say it once more.

339.4 уверенность (uvérennost) — confidence, certainty

Before the new one: say the Russian for to change someone's mind, then the Russian for a conviction.

You'll want to know: уверенность

уверенность (*uvérennost*) — "confidence, certainty".

Мне не хватает уверенности в себе.

Mne ne khvatáyet uvérennosti v sebé.

I lack self-confidence.

Feminine. Уверенность в себе — self-confidence. From уверенный, sure.

The word, taken apart — and its English cousins

уверенность is built on уверенный "sure", from уверить "to assure", and so on вера "faith", inherited from Proto-Slavic **věra*; EtymDB names Latin *vērus* "true" as a cousin (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

340.1 соглашаться (soglashátsya) — to agree

Before the new one: say the Russian for confidence, then the Russian for to doubt.

You'll want to know: соглашаться

соглашаться (*soglashátsya*) — "to agree".

> Я не всегда соглашаюсь с отцом.
>
> *Ya ne vsegdá soglasháyus s ottsóm.*
>
> I do not always agree with my father.

Imperfective; perfective согласиться. Соглашаться с + instrumental (with a person or a view), на + accusative (to accept an offer).

The word, taken apart — and its English cousins

соглашаться is built on глас "voice", the Church Slavonic form of native голос; both come from Proto-Slavic **golsŭ* "voice" (EtymDB). The -ла- is the Church Slavonic shape where Russian has -оло-: to agree is to speak with one voice.

Fair and unfair

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say whether something is fair or unfair, speak about justice, call an idea reasonable and speak of the truth.
>
> *Complete the last lesson of chapter 345: I can say whether something is fair or unfair, speak about justice, call an idea reasonable and speak of the truth.*

345.1 справедливый (spravedlívyy) — fair, even-handed

Before the new one: say the Russian for to reason, then the Russian for obvious.

You'll want to know: справедливый

справедливый (*spravedlívyy*) — "fair, even-handed".

> Наш учитель строгий, но справедливый.
>
> *Nash uchítel strógiy, no spravedlívyy.*
>
> Our teacher is strict but fair.

Справедливо — fairly, or it is fair.

The word, taken apart — and its English cousins

справедливый is usually traced to the root of правда "truth" and право "right", Proto-Slavic **pravŭ* "right, correct" (EtymDB), through a Church Slavonic formation.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: spravedlívyy*
- *Say it: spravedlívyy*, once more
- *Say it:* a sentence of your own with *spravedlívyy*
- *Recall:* say the Russian for to reason, then the Russian for obvious, then say *spravedlívyy* again

Before you move on

What does справедливый mean? ("Fair, even-handed".) Say it once more.

345.2 несправедливый (nespravedlívyy) — unfair

Before the new one: say the Russian for obvious, then the Russian for fair.

You'll want to know: несправедливый

несправедливый (*nespravedlívyy*) — "unfair".

Это несправедливо: он работал больше всех.

Éto nespravedlívo: on rabótal bólshe vsekh.

That is unfair: he worked more than anyone.

Short form несправедлив. Несправедливо — it is unfair.

The word, taken apart — and its English cousins

несправедливый is не- "not" in front of справедливый "fair", which is usually traced to the root of право, Proto-Slavic **pravŭ* "right, correct" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: nespravedlívyy*
- *Say it: nespravedlívyy*, once more

What does несправедливый mean? ("Unfair".) Say it once more.

345.3 справедливость (spravedlívost) — fairness, justice

Before the new one: say the Russian for fair, then the Russian for unfair.

You'll want to know: справедливость

справедливость (*spravedlívost*) — "fairness, justice".

Люди хотят справедливости.

Lyúdi khotyát spravedlívosti.

People want justice.

Feminine. After хотеть in this sense it takes the genitive.

The word, taken apart — and its English cousins

справедливость is built on справедливый "fair" with the abstract suffix -ость; the root is that of право, Proto-Slavic **pravŭ* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: spravedlívost*
- *Say it: spravedlívost*, once more

345.4 разумный (razúmnyy) — reasonable, sensible

Before the new one: say the Russian for unfair, then the Russian for fairness.

You'll want to know: разумный

разумный (*razúmnyy*) — "reasonable, sensible".

Это разумное решение.

Éto razúmnoye reshéniye.

That is a sensible decision.

Short form разумен. В разумных пределах — within reason.

The word, taken apart — and its English cousins

разумный is built on разум "reason", which Russian borrowed from Church Slavonic; it comes from Proto-Slavic **orzumŭ*, built on **umŭ* "mind", the word that gives ум (EtymDB). The ра- at the start is the Church Slavonic shape where Russian also has роз-.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: razúmnyy*
- *Say it: razúmnyy*, once more
- *Say it:* a sentence of your own with *razúmnyy*
- *Recall:* say the Russian for unfair, then the Russian for fairness, then say *razúmnyy* again

Before you move on

What does разумный mean? ("Reasonable, sensible".) Say it once more.

345.5 истина (ístina) — the truth (in a deep sense)

Before the new one: say the Russian for fairness, then the Russian for reasonable.

You'll want to know: истина

истина (*ístina*) — "the truth (in a deep sense)".

Он думает, что знает истину.

On dúmayet, chto znáyet ístinu.

He thinks he knows the truth.

Feminine. More solemn than правда: a truth in philosophy or science.

The word, taken apart — and its English cousins

истина is built on the old adjective истый "true, genuine"; EtymDB sets Latvian *īstens* "real, true" beside it as a cousin (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ístina*
- *Say it: ístina*, once more
- *Say it:* a sentence of your own with *ístina*
- *Recall:* say the Russian for fairness, then the Russian for reasonable, then say *ístina* again

Before you move on

What does истина mean? ("The truth (in a deep sense)".) Say it once more.

Chapter 346

Pros and cons

>
> *Complete the last lesson of chapter 346: I can weigh an advantage against a drawback, say what use or harm something does, and assess it.*

346.1 преимущество (preimúshchestvo) — an advantage

Before the new one: say the Russian for reasonable, then the Russian for the truth.

You'll want to know: преимущество

преимущество (*preimúshchestvo*) — "an advantage".

> У этой квартиры есть одно преимущество: она рядом с метро.
>
> *U étoy kvartíry yest odnó preimúshchestvo: oná ryádom s metró.*
>
> This flat has one advantage: it is next to the metro.

Neuter. Преимущество перед + instrumental — an advantage over.

The word, taken apart — and its English cousins

преимущество is built from пре- "over, beyond" and имущий, the Church Slavonic participle of иметь "to have", from Proto-Slavic **jĭměti* (EtymDB): what you have over the others. The щ is the Church Slavonic shape where Russian has ч.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

346.2 недостаток (nedostátok) — a drawback, a shortcoming; a lack

Before the new one: say the Russian for the truth, then the Russian for an advantage.

You'll want to know: недостаток

недостаток (*nedostátok*) — "a drawback, a shortcoming; a lack".

Его главный недостаток — лень.

Yegó glávnyy nedostátok — len.

His main shortcoming is laziness.

Masculine; genitive недостатка, with the о dropped. Недостаток денег — a lack of money.

The word, taken apart — and its English cousins

недостаток is не- "not" in front of достаток "sufficiency", from достать "to reach, to be enough", built on стать, the partner of стоять, Proto-Slavic **stojati* "to stand" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: nedostátok*
- *Say it: nedostátok*, once more

- *Recall:* say the Russian for the truth, then the Russian for an advantage, then say *nedostátok* again

Before you move on

What does недостаток mean? ("A drawback, a shortcoming; a lack".) Say it once more.

346.3 польза (pólza) — benefit, use

Before the new one: say the Russian for an advantage, then the Russian for a drawback.

You'll want to know: польза

польза (*pólza*) — "benefit, use".

От этого лекарства нет никакой пользы.

Ot étogo lekárstva net nikakóy pólzy.

This medicine does no good at all.

Feminine. В пользу + genitive — in favour of. Полезный (useful) is built on it.

The word, taken apart — and its English cousins

польза was borrowed from Church Slavonic польза, from Proto-Slavic **polĭdza*, built from **po* "by, after" and **lĭga* "possibility", the root that also gives нельзя (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: pólza*
- *Say it: pólza*, once more
- *Say it:* a sentence of your own with *pólza*

You'll want to know: вред

вред (*vred*) — "harm".

Курение приносит вред здоровью.

Kuréniye prinósit vred zdoróvyu.

Smoking does harm to your health.

Masculine. Без вреда для + genitive. Вредный (harmful) is built on it.

The word, taken apart — and its English cousins

вред was borrowed from Church Slavonic *vrědŭ*, from Proto-Slavic **verdŭ* (EtymDB). The -ре- is the Church Slavonic shape; the native Russian development of the same word survives in dialect вередъ "a boil".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vred*
- *Say it: vred*, once more
- *Say it:* a sentence of your own with *vred*

346.5 оценивать (otsénivat) — to assess, to evaluate

Before the new one: say the Russian for benefit, then the Russian for harm.

You'll want to know: оценивать

оценивать (*otsénivat*) — "to assess, to evaluate".

Учитель оценивает работу каждого ученика.

Uchítel otsénivayet rabótu kázhdogo ucheniká.

The teacher assesses each pupil's work.

Imperfective; perfective оценить. Built on цена, price: to put a price on.

The word, taken apart — and its English cousins

оценивать is built from о- and цена "price", inherited from Proto-Slavic **cěna*; to assess a thing is to put a price on it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: otsénivat*
- *Say it: otsénivat*, once more

349.4 влияние (vliyániye) — influence

Before the new one: say the Russian for to lead to, then the Russian for to influence.

You'll want to know: влияние

влияние (*vliyániye*) — "influence".

Родители имеют большое влияние на детей.

Rodíteli iméyut bolshóye vliyániye na detéy.

Parents have a great influence on their children.

Neuter. Под влиянием + genitive — under the influence of.

The word, taken apart — and its English cousins

влияние is built on влиять with the noun suffix -ние; the verb comes from Church Slavonic *vŭlĭjati* "to pour in" (EtymDB), on the root of лить "to pour".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vliyániye*

воздействие (*vozdéystviye*) — "an impact, an effect".

Это лекарство оказывает сильное воздействие.

Éto lekárstvo okázyvayet sílnoye vozdéystviye.

This medicine has a strong effect.

Neuter. Оказывать воздействие на + accusative — to have an effect on. Bookish.

The word, taken apart — and its English cousins

воздействие is built from воз- and действие "action", from действовать "to act"; the root is usually traced to the old verb деять "to do".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vozdéystviye*
- *Say it: vozdéystviye*, once more

> *Complete the last lesson of chapter 350: I can speak about consequences and results, say that something tells on something else, and describe an effect.*

350.1 последствие (poslédstviye) — a consequence

Before the new one: say the Russian for influence, then the Russian for an impact.

You'll want to know: последствие

последствие (*poslédstviye*) — "a consequence".

> Это решение будет иметь серьёзные последствия.
>
> *Éto reshéniye búdet imét seryóznyye poslédstviya.*
>
> This decision will have serious consequences.

Neuter; mostly plural, последствия, and usually unpleasant.

The word, taken apart — and its English cousins

последствие is built from после "after" and след "a track, a trail, a mark" (EtymDB), with the suffix -ствие: what comes after, in the wake of an event.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: poslédstviye*
- *Say it: poslédstviye*, once more
- *Say it:* a sentence of your own with *poslédstviye*
- *Recall:* say the Russian for influence, then the Russian for an impact, then say *poslédstviye* again

Before you move on

What does последствие mean? ("A consequence".) Say it once more.

350.2 следствие (slédstviye) — a result, an outcome; an investigation

Before the new one: say the Russian for an impact, then the Russian for a consequence.

You'll want to know: следствие

следствие (*slédstviye*) — "a result, an outcome; an investigation".

Его болезнь — следствие стресса.

Yegó bolézn — slédstviye stréssa.

His illness is the result of stress.

Neuter, stressed on the first syllable. In law, следствие is a criminal investigation.

The word, taken apart — and its English cousins

следствие is built on след "a track, a trail, a mark" (EtymDB) with the suffix -ствие, a Church Slavonic pattern: a result follows its cause like a track.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: slédstviye*
- *Say it: slédstviye*, once more
- *Say it:* a sentence of your own with *slédstviye*
- *Recall:* say the Russian for an impact, then the Russian for a consequence, then say *slédstviye* again

Before you move on

What does следствие mean? ("A result, an outcome; an investigation".) Say it once more.

350.3 отражаться (otrazhátsya) — to affect, to tell on; to be reflected

Before the new one: say the Russian for a consequence, then the Russian for a result.

You'll want to know: отражаться

отражаться (*otrazhátsya*) — "to affect, to tell on; to be reflected".

Усталость отражается на работе.

Ustálost otrazháyetsya na rabóte.

Tiredness tells on your work.

Imperfective; perfective отразиться. Отражаться на + prepositional — to affect. Literally to be reflected: в воде отражается луна.

The word, taken apart — and its English cousins

отражаться is built from от- "back" and the root of разить "to strike" (EtymDB): light that strikes a surface and comes back is reflected, and so is a cause that comes back in its effects.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: otrazhátsya*
- *Say it: otrazhátsya*, once more
- *Say it:* a sentence of your own with *otrazhátsya*
- *Recall:* say the Russian for a consequence, then the Russian for a result, then say *otrazhátsya* again

Before you move on

What does отражаться mean? ("To affect, to tell on; to be reflected".) Say it once more.

350.4 эффект (effékt) — an effect

Before the new one: say the Russian for a result, then the Russian for to affect.

You'll want to know: эффект

эффект (*effékt*) — "an effect".

Новое лекарство дало хороший эффект.

Nóvoye lekárstvo dálo khoróshiy effékt.

The new medicine had a good effect.

Masculine. Произвести эффект — to make an impression.

The word, taken apart — and its English cousins

эффект comes from Latin *effectus* "an effect" (EtymDB), from *efficere* "to bring about", built from *ex* "out" and *facere* "to do, to make" (EtymDB; Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: effékt*
- *Say it: effékt*, once more
- *Say it:* a sentence of your own with *effékt*
- *Recall:* say the Russian for a result, then the Russian for to affect, then say *effékt* again

Before you move on

What does эффект mean? ("An effect".) Say it once more.

350.5 в результате (v rezultáte) — as a result

Before the new one: say the Russian for to affect, then the Russian for an effect.

You'll want to know: в результате

в результате (*v rezultáte*) — "as a result".

> В результате мы опоздали на поезд.
>
> *V rezultáte my opozdáli na póyezd.*
>
> As a result, we missed the train.

With a noun it takes the genitive: в результате аварии. On its own it opens a sentence.

The word, taken apart — and its English cousins

в результате is в "in" with the prepositional of результат "a result", which is usually traced, through western languages, to Medieval Latin *resultatum*, built on *resultāre* "to spring back" (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: v rezultáte*
- *Say it: v rezultáte*, once more
- *Say it:* a sentence of your own with *v rezultáte*
- *Recall:* say the Russian for to affect, then the Russian for an effect, then say *v rezultáte* again

Before you move on

What does в результате mean? ("As a result".) Say it once more.

Chapter 351

Since and thanks to

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can give a reason with since, after all, thanks to, owing to and therefore, and know what each one takes.
>
> *Complete the last lesson of chapter 351: I can give a reason with since, after all, thanks to, owing to and therefore, and know what each one takes.*

351.1 поскольку (poskólku) — since, as (giving a reason)

Before the new one: say the Russian for an effect, then the Russian for as a result.

You'll want to know: поскольку

поскольку (*poskólku*) — "since, as (giving a reason)".

> Поскольку шёл дождь, мы остались дома.
>
> *Poskólku shyol dozhd, my ostális dóma.*
>
> Since it was raining, we stayed at home.

It takes an ordinary clause in the indicative, like так как, and sounds a little more formal. It can open the sentence.

The word, taken apart — and its English cousins

поскольку is built from по and сколько "how much", from Proto-Slavic **koliko* "how much" (EtymDB): first "in so far as", then "since".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: poskólku*
- *Say it: poskólku*, once more
- *Say it:* a sentence of your own with *poskólku*
- *Recall:* say the Russian for an effect, then the Russian for as a result, then say *poskólku* again

Before you move on

What does поскольку mean? ("Since, as (giving a reason)".) Say it once more.

351.2 ведь (ved) — after all, you know

Before the new one: say the Russian for as a result, then the Russian for since.

You'll want to know: ведь

ведь (*ved*) — "after all, you know".

Он не придёт: он ведь болен.

On ne pridyót: on ved bólen.

He will not come: he is ill, after all.

It gives a reason the listener already knows. It is unstressed and sits near the front of the clause.

The word, taken apart — and its English cousins

ведь comes from Old East Slavic *vědě* "I know" (EtymDB), a form of the old verb ведать "to know"; EtymDB names English *wit* as a cousin. Ведь still appeals to what both speakers know.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ved*
- *Say it: ved*, once more
- *Say it:* a sentence of your own with *ved*
- *Recall:* say the Russian for as a result, then the Russian for since, then say *ved* again

Before you move on

What does ведь mean? ("After all, you know".) Say it once more.

351.3 благодаря (blagodaryá) — thanks to

Before the new one: say the Russian for since, then the Russian for after all.

You'll want to know: благодаря

благодаря (*blagodaryá*) — "thanks to".

> Благодаря тебе я сдал экзамен.
>
> *Blagodaryá tebé ya sdal ekzámen.*
>
> Thanks to you I passed the exam.

It takes the dative and names a good cause: благодаря помощи. For a bad cause Russian says из-за + genitive.

The word, taken apart — and its English cousins

благодаря is the gerund of благодарить "to thank", taken from Church Slavonic *blagodariti* (EtymDB), a compound of благо "good" and дар "gift". The -ла- is the Church Slavonic shape.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: blagodaryá*
- *Say it: blagodaryá*, once more
- *Say it:* a sentence of your own with *blagodaryá*

Before you move on

What does благодаря mean? ("Thanks to".) Say it once more.

351.4 вследствие (vslédstviye) — owing to, in consequence of

Before the new one: say the Russian for after all, then the Russian for thanks to.

You'll want to know: вследствие

вследствие (*vslédstviye*) — "owing to, in consequence of".

Поезд опаздывает вследствие снегопада.

Póyezd opázdyvayet vslédstviye snegopáda.

The train is late owing to the snowfall.

It takes the genitive. Formal, written style: notices and the news.

The word, taken apart — and its English cousins

вследствие is fused from в "in" and следствие "a result", built on след "a track, a trail" (EtymDB): in the wake of something.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vslédstviye*
- *Say it: vslédstviye*, once more
- *Say it:* a sentence of your own with *vslédstviye*
- *Recall:* say the Russian for after all, then the Russian for thanks to, then say *vslédstviye* again

Before you move on

What does вследствие mean? ("Owing to, in consequence of".) Say it once more.

351.5 следовательно (slédovatelno) — therefore, consequently

Before the new one: say the Russian for thanks to, then the Russian for owing to.

You'll want to know: следовательно

следовательно (*slédovatelno*) — "therefore, consequently".

Он не звонил, следовательно, всё в порядке.

On ne zvoníl, slédovatelno, vsyo v poryádke.

He has not called, so everything is all right.

A formal link between a premise and a conclusion, set off by commas. In conversation people say значит.

The word, taken apart — and its English cousins

следовательно is built on следовать "to follow", from след "a track, a trail" (EtymDB): what follows from what came before.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: slédovatelno*
- *Say it: slédovatelno*, once more
- *Say it:* a sentence of your own with *slédovatelno*
- *Recall:* say the Russian for thanks to, then the Russian for owing to, then say *slédovatelno* again

Before you move on

What does следовательно mean? ("Therefore, consequently".) Say it once more.

Chapter 352

Whose fault is it?

> *Complete the last lesson of chapter 352: I can say whose fault something is, who is to blame and who is responsible, and talk about an excuse.*

352.1 вина (viná) — guilt, fault, blame

Before the new one: say the Russian for owing to, then the Russian for therefore.

You'll want to know: вина

вина (*viná*) — "guilt, fault, blame".

> Это не твоя вина.
>
> *Éto ne tvoyá viná.*
>
> It is not your fault.

Feminine, stressed on the end. По моей вине — through my fault. Not to be confused with вино, wine.

The word, taken apart — and its English cousins

вина is usually traced to Proto-Slavic **vina* "guilt, cause"; it is the root of извиняться "to apologise", which asks to be taken out of guilt.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: viná*
- *Say it: viná*, once more
- *Say it:* a sentence of your own with *viná*

352.2 виноватый (vinovátyy) — guilty, to blame

Before the new one: say the Russian for therefore, then the Russian for guilt.

You'll want to know: виноватый

виноватый (*vinovátyy*) — "guilty, to blame".

Никто не виноват, так получилось.

Niktó ne vinovát, tak poluchílos.

Nobody is to blame; that is how it turned out.

The short form виноват is the usual one: я виноват — it is my fault. Виноват*!* is also a quick apology.

The word, taken apart — and its English cousins

виноватый is built on вина "guilt" with the suffix -оватый; вина is usually traced to Proto-Slavic **vina*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vinovátyy*
- *Say it: vinovátyy*, once more
- *Say it:* a sentence of your own with *vinovátyy*

352.3 винить (vinít) — to blame

Before the new one: say the Russian for guilt, then the Russian for guilty.

You'll want to know: винить

винить (*vinít*) — "to blame".

Она винит себя в этой аварии.

Oná vinít sebyá v étoy avárii.

She blames herself for this accident.

Imperfective. Винить кого в чём: the fault goes after в + prepositional.

The word, taken apart — and its English cousins

винить is the verb made from вина "guilt", which is usually traced to Proto-Slavic **vina*: to put the guilt on someone.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vinít*

You'll want to know: оправдание

оправдание (*opravdániye*) — "an excuse, a justification".

Для такого поведения нет оправдания.

Dlya takógo povedéniya net opravdániya.

There is no excuse for such behaviour.

Neuter. In court it means an acquittal.

The word, taken apart — and its English cousins

оправдание is built on оправдать "to justify", from правда "truth", inherited from Proto-Slavic **pravĭda*, built on **pravŭ* "right, correct" (EtymDB). To justify is to show that someone was in the right.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

>
> *Complete the last lesson of chapter 370: I can set a condition: on condition that, in case of, otherwise and even if, and know what each one takes.*

370.1 условие (uslóviye) — a condition

Before the new one: say the Russian for to recycle, then the Russian for to look after.

You'll want to know: условие

условие (*uslóviye*) — "a condition".

> У меня одно условие: мы вернёмся до десяти.
>
> *U menyá odnó uslóviye: my vernyómsya do desyatí.*
>
> I have one condition: we come back before ten.

Neuter. The plural условия also means terms or circumstances: условия работы.

The word, taken apart — and its English cousins

условие is built on the old verb условиться "to agree on terms", from у- and слово "word", inherited from Proto-Slavic **slovo* (EtymDB). A condition is something settled in words.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

370.5 даже если (dázhe yésli) — even if

Before the new one: say the Russian for in case of, then the Russian for otherwise.

You'll want to know: даже если

даже если (*dázhe yésli*) — "even if".

Я приду, даже если будет дождь.

Ya pridú, dázhe yésli búdet dozhd.

I will come even if it rains.

Like если, it takes an ordinary clause in any tense: даже если он позвонит. With бы it turns hypothetical: даже если бы он позвонил.

The word, taken apart — and its English cousins

даже если is built from даже "even", made of да and the particle же, and если "if", which is usually explained as есть "is" with the particle ли.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

> *Complete the last lesson of chapter 373: I can talk about taking a risk, being wary of something, avoiding it, saying that something threatens us, and preventing it.*

373.1 рисковать (riskovát) — to take a risk, to risk

Before the new one: say the Russian for a chance, then the Russian for a risk.

You'll want to know: рисковать

рисковать (*riskovát*) — "to take a risk, to risk".

> Я не хочу рисковать своими деньгами.
>
> *Ya ne khochú riskovát svoími dengámi.*
>
> I do not want to risk my money.

Imperfective; the present is рискую, рискуешь; perfective рискнуть. Рисковать + instrumental — to risk something.

The word, taken apart — and its English cousins

рисковать "to risk" (EtymDB) is built on риск, which is usually traced, through French *risque*, to Italian *risco*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: riskovát*
- *Say it: riskovát*, once more
- *Say it:* a sentence of your own with *riskovát*
- *Recall:* say the Russian for a chance, then the Russian for a risk, then say *riskovát* again

Before you move on

What does рисковать mean? ("To take a risk, to risk".) Say it once more.

373.2 опасаться (opasátsya) — to fear, to be wary of

Before the new one: say the Russian for a risk, then the Russian for to take a risk.

You'll want to know: опасаться

опасаться (*opasátsya*) — "to fear, to be wary of".

Врачи опасаются новой эпидемии.

Vrachí opasáyutsya nóvoy epidémii.

Doctors fear a new epidemic.

Imperfective only. It takes the genitive: опасаться дождя. More formal than бояться.

The word, taken apart — and its English cousins

опасаться is usually traced to о- and пасти "to guard, to watch over", inherited from Proto-Slavic **pasti* (EtymDB): to be wary is to keep watch. Опасный "dangerous" is built on it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: opasátsya*
- *Say it: opasátsya*, once more
- *Say it:* a sentence of your own with *opasátsya*

373.3 избегать (izbegát) — to avoid

Before the new one: say the Russian for to take a risk, then the Russian for to fear.

You'll want to know: избегать

избегать (*izbegát*) — "to avoid".

Он избегает трудных разговоров.

On izbegáyet trúdnykh razgovórov.

He avoids difficult conversations.

Imperfective; perfective избежать, conjugated like бежать. It takes the genitive: избегать ошибок.

The word, taken apart — and its English cousins

избегать is built from из- "out of" and бегать "to run", from Proto-Slavic **běžati*: to run out of a thing's way.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: izbegát*
- *Say it: izbegát*, once more
- *Say it:* a sentence of your own with *izbegát*

Before you move on

What does избегать mean? ("To avoid".) Say it once more.

373.4 угрожать (ugrozhát) — to threaten

Before the new one: say the Russian for to fear, then the Russian for to avoid.

You'll want to know: угрожать

угрожать (*ugrozhát*) — "to threaten".

Сильный ветер угрожает старым деревьям.

Sílnyy véter ugrozháyet stárym derévyam.

The strong wind threatens the old trees.

Imperfective. Угрожать кому чем: the person threatened goes in the dative. The noun is угроза, a threat.

The word, taken apart — and its English cousins

угрожать is built from у- and гроза "a thunderstorm", which in older Russian also meant terror and threat; з softens to ж in the verb.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ugrozhát*
- *Say it: ugrozhát*, once more
- *Say it:* a sentence of your own with *ugrozhát*

Before you move on

What does угрожать mean? ("To threaten".) Say it once more.

373.5 предотвращать (predotvrashchát) — to prevent

Before the new one: say the Russian for to avoid, then the Russian for to threaten.

You'll want to know: предотвращать

предотвращать (*predotvrashchát*) — "to prevent".

Эти правила предотвращают аварии.

Éti právila predotvrashcháyut avárii.

These rules prevent accidents.

Imperfective; the perfective is предотвратить, with предотвращу, предотвратишь. Formal.

The word, taken apart — and its English cousins

предотвращать is built from пред- "before", от- "away" and вращать "to turn", the Church Slavonic twin of native ворочать: to turn a danger away in advance. The -ра- and the щ are both Church Slavonic shapes.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: predotvrashchát*
- *Say it: predotvrashchát*, once more
- *Say it:* a sentence of your own with *predotvrashchát*
- *Recall:* say the Russian for to avoid, then the Russian for to threaten, then say *predotvrashchát* again

Before you move on

What does предотвращать mean? ("To prevent".) Say it once more.

374.1 рассчитывать (rasschítyvat) — to count on, to rely on; to calculate

Before the new one: say the Russian for to threaten, then the Russian for to prevent.

You'll want to know: рассчитывать

рассчитывать (*rasschítyvat*) — "to count on, to rely on; to calculate".

> Мы рассчитываем на твою помощь.
>
> *My rasschítyvayem na tvoyú pómoshch.*
>
> We are counting on your help.

Imperfective; perfective рассчитать (to calculate). Рассчитывать на + accusative — to count on.

The word, taken apart — and its English cousins

рассчитывать is built from рас- and считать "to count", on the root of число "number", Proto-Slavic **čislo* (EtymDB). To count on someone was first to reckon them in.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rasschítyvat*
- *Say it: rasschítyvat*, once more

374.2 ожидать (ozhidát) — to expect, to await

Before the new one: say the Russian for to prevent, then the Russian for to count on.

You'll want to know: ожидать

ожидать (*ozhidát*) — "to expect, to await".

Мы не ожидали такого результата.

My ne ozhidáli takógo rezultáta.

We did not expect such a result.

Imperfective. It takes the genitive or the accusative: ожидать ответа. More formal than ждать.

The word, taken apart — and its English cousins

ожидать is built from о- and -жидать, the long shape of the root of ждать "to wait" (as -бирать stands beside брать); ждать is inherited from Proto-Slavic **žĭdati* "to wait, to await" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ozhidát*
- *Say it: ozhidát*, once more
- *Say it:* a sentence of your own with *ozhidát*
- *Recall:* say the Russian for to prevent, then the Russian for to count on, then say *ozhidát* again

Before you move on

What does ожидать mean? ("To expect, to await".) Say it once more.

374.3 ожидание (ozhidániye) — an expectation; waiting

Before the new one: say the Russian for to count on, then the Russian for to expect.

You'll want to know: ожидание

ожидание (*ozhidániye*) — "an expectation; waiting".

Результат превзошёл все ожидания.

Rezultát prevzoshyól vse ozhidániya.

The result exceeded all expectations.

Neuter. Зал ожидания — a waiting room.

The word, taken apart — and its English cousins

ожидание is built on ожидать "to expect" with the noun suffix -ание; the root is that of ждать "to wait".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ozhidániye*
- *Say it: ozhidániye*, once more
- *Say it:* a sentence of your own with *ozhidániye*
- *Recall:* say the Russian for to count on, then the Russian for to expect, then say *ozhidániye* again

Before you move on

What does ожидание mean? ("An expectation; waiting".) Say it once more.

374.4 удаваться (udavátsya) — to succeed, to manage (impersonal)

Before the new one: say the Russian for to expect, then the Russian for an expectation.

You'll want to know: удаваться

удаваться (*udavátsya*) — "to succeed, to manage (impersonal)".

Мне не удаётся выспаться.

Mne ne udayótsya výspatsya.

I cannot manage to get enough sleep.

Imperfective; present удаётся; perfective удаться (удастся). Impersonal, with the dative: мне удалось — I managed.

The word, taken apart — and its English cousins

удаваться is built from у- and давать "to give", the ongoing partner of дать: when a thing succeeds, it gives itself to you.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: udavátsya*
- *Say it: udavátsya*, once more

Before you move on

What does удаваться mean? ("To succeed, to manage (impersonal)".) Say it once more.

374.5 получаться (poluchátsya) — to work out, to turn out

Before the new one: say the Russian for an expectation, then the Russian for to succeed.

You'll want to know: получаться

получаться (*poluchátsya*) — "to work out, to turn out".

У меня не получается это упражнение.

U menyá ne polucháyetsya éto uprazhnéniye.

I cannot get this exercise right.

Imperfective; perfective получиться. У меня получается — I am getting it right. Получилось*!* — it worked!

The word, taken apart — and its English cousins

получаться is the reflexive of получать, from по- and лучать, from лучить "to come upon", Proto-Slavic **lučiti*, tentatively "to find, to reach" (EtymDB): what you come upon in the end.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: poluchátsya*
- *Say it: poluchátsya*, once more
- *Say it:* a sentence of your own with *poluchátsya*

>
> *Complete the last lesson of chapter 375: I can say that I will do something without fail, that something is necessary or is enough, and that I can guarantee it.*

375.1 гарантировать (garantírovat) — to guarantee

Before the new one: say the Russian for to succeed, then the Russian for to work out.

You'll want to know: гарантировать

гарантировать (*garantírovat*) — "to guarantee".

> Я не могу гарантировать, что всё получится.
>
> *Ya ne mogú garantírovat, chto vsyo polúchitsya.*
>
> I cannot guarantee that everything will work out.

The same form serves as both imperfective and perfective; present гарантирую, гарантируешь.

The word, taken apart — and its English cousins

гарантировать is usually traced, through German, to French *garantir* "to guarantee" (EtymDB), built on *garant* "a guarantor"; EtymDB sets *garant* beside Old High German *werento* "a guarantor" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: garantírovat*

Before you move on

What does обязательно mean? ("Definitely, without fail".) Say it once more.

375.3 необходимый (neobkhodímyy) — necessary, essential

Before the new one: say the Russian for to guarantee, then the Russian for definitely.

You'll want to know: необходимый

необходимый (*neobkhodímyy*) — "necessary, essential".

У нас есть всё необходимое.

U nas yest vsyo neobkhodímoye.

We have everything we need.

Необходимо + infinitive — it is necessary to. More formal than нужный.

The word, taken apart — and its English cousins

необходимый is built from не- "not" and обходить "to go round", from ходить "to go", Proto-Slavic **xoditi*: what cannot be got round.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

Before you move on

What does необходимый mean? ("Necessary, essential".) Say it once more.

375.4 необходимость (neobkhodímost) — necessity, need

Before the new one: say the Russian for definitely, then the Russian for necessary.

You'll want to know: необходимость

необходимость (*neobkhodímost*) — "necessity, need".

В этом нет необходимости.

V étom net neobkhodímosti.

There is no need for that.

Feminine. В случае необходимости — if need be.

The word, taken apart — and its English cousins

необходимость is built on необходимый "necessary" with the abstract suffix -ость; the root is ходить "to go".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: neobkhodímost*
- *Say it: neobkhodímost*, once more
- *Say it:* a sentence of your own with *neobkhodímost*
- *Recall:* say the Russian for definitely, then the Russian for necessary, then say *neobkhodímost* again

Before you move on

What does необходимость mean? ("Necessity, need".) Say it once more.

375.5 достаточно (dostátochno) — enough; fairly

Before the new one: say the Russian for necessary, then the Russian for necessity.

You'll want to know: достаточно

достаточно (*dostátochno*) — "enough; fairly".

У нас достаточно времени.

U nas dostátochno vrémeni.

We have enough time.

With the genitive, enough: достаточно денег. Before an adjective, fairly: достаточно трудно.

The word, taken apart — and its English cousins

достаточно is built on достаток "sufficiency", from достать "to reach, to be enough", on стать, the partner of стоять, Proto-Slavic **stojati* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dostátochno*
- *Say it: dostátochno*, once more

376.1 исключение (isklyuchéniye) — an exception

Before the new one: say the Russian for necessity, then the Russian for enough.

You'll want to know: исключение

исключение (*isklyuchéniye*) — "an exception".

> Все пришли, за исключением одного студента.
>
> *Vse prishlí, za isklyuchéniyem odnogó studénta.*
>
> Everyone came except for one student.

Neuter. За исключением + genitive — except for. Без исключения — without exception.

The word, taken apart — and its English cousins

исключение is built on исключить "to exclude", from из- "out" and ключ "a key", inherited from Proto-Slavic **ključĭ*: to lock someone out.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: isklyuchéniye*
- *Say it: isklyuchéniye*, once more
- *Say it:* a sentence of your own with *isklyuchéniye*
- *Recall:* say the Russian for necessity, then the Russian for enough, then say *isklyuchéniye* again

Before you move on

What does исключение mean? ("An exception".) Say it once more.

376.2 лишь бы (lish by) — as long as, if only

Before the new one: say the Russian for enough, then the Russian for an exception.

You'll want to know: лишь бы

лишь бы (*lish by*) — "as long as, if only".

> Я согласен на любую работу, лишь бы только она была интересной.
>
> *Ya soglásen na lyubúyu rabótu, lish by tólko oná bylá interésnoy.*
>
> I will take any job, as long as it is interesting.

Лишь бы + past tense or infinitive names the one thing that matters: лишь бы успеть.

The word, taken apart — and its English cousins

лишь бы is built from лишь "only", which is usually related to лишний "extra, too many", and бы, the particle of the conditional.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: lish by*

376.3 разве что (rázve chto) — except perhaps, unless maybe

Before the new one: say the Russian for an exception, then the Russian for as long as.

You'll want to know: разве что

разве что (*rázve chto*) — "except perhaps, unless maybe".

> Я ничего не хочу, разве что чаю.
>
> *Ya nichegó ne khochú, rázve chto cháyu.*
>
> I do not want anything, except perhaps some tea.

It names a small exception: никто не знает, разве что мама.

The word, taken apart — and its English cousins

разве что is built from the particle разве and что "what". The origin of разве is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

376.4 хотя бы (khotyá by) — at least

Before the new one: say the Russian for as long as, then the Russian for except perhaps.

You'll want to know: хотя бы

хотя бы (*khotyá by*) — "at least".

Он мог бы хотя бы позвонить.

On mog by khotyá by pozvonít.

He could at least have called.

It sets a minimum: хотя бы немного — at least a little. Not the same as хотя, although.

The word, taken apart — and its English cousins

хотя бы is built from хотя, the old gerund of хотеть "to want", and бы, the particle of the conditional: wanting it to be so, at the very least.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

376.5 на всякий случай (na vsyákiy slúchay) — in case, to be on the safe side

Before the new one: say the Russian for except perhaps, then the Russian for at least.

You'll want to know: на всякий случай

на всякий случай (*na vsyákiy slúchay*) — "in case, to be on the safe side".

Я возьму зонтик на всякий случай.

Ya vozmú zóntik na vsyákiy slúchay.

I will take an umbrella, to be on the safe side.

A fixed phrase; всякий means any.

The word, taken apart — and its English cousins

на всякий случай is "for any case": всякий "any" and случай "a case", inherited from Proto-Slavic **sŭlučajĭ* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

Apps

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about apps: installing them, updating them, deleting them and uploading files.
>
> *Complete the last lesson of chapter 401: I can talk about apps: installing them, updating them, deleting them and uploading files.*

401.1 приложение (prilozhéniye) — an app; an attachment; a supplement

Before the new one: say the Russian for to break into, then the Russian for a virus.

You'll want to know: приложение

приложение (*prilozhéniye*) — "an app; an attachment; a supplement".

> Я скачал новое приложение.
>
> *Ya skachál nóvoye prilozhéniye.*
>
> I downloaded a new app.

Neuter. An app on a phone, an attachment to a letter, or a supplement to a magazine.

The word, taken apart — and its English cousins

приложение is built on приложить "to put to, to attach", from при- "to" and ложить "to lay": something laid alongside. An app is the newest sense.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: prilozhéniye*
- *Say it: prilozhéniye*, once more
- *Say it:* a sentence of your own with *prilozhéniye*
- *Recall:* say the Russian for to break into, then the Russian for a virus, then say *prilozhéniye* again

Before you move on

What does приложение mean? ("An app; an attachment; a supplement".) Say it once more.

401.2 устанавливать (ustanávlivat) — to install; to establish

Before the new one: say the Russian for a virus, then the Russian for an app.

You'll want to know: устанавливать

устанавливать (*ustanávlivat*) — "to install; to establish".

Он устанавливает программу на компьютер.

On ustanávlivayet prográmmu na kompyúter.

He is installing a program on the computer.

Imperfective; perfective установить (установлю, установишь). It also means to set up or establish: установить рекорд.

The word, taken apart — and its English cousins

устанавливать is built from у- and ставить "to put, to stand up", on the root of стоять, Proto-Slavic **stojati* (EtymDB): to set a thing firmly in place.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ustanávlivat*
- *Say it: ustanávlivat*, once more
- *Say it:* a sentence of your own with *ustanávlivat*
- *Recall:* say the Russian for a virus, then the Russian for an app, then say *ustanávlivat* again

Before you move on

What does устанавливать mean? ("To install; to establish".) Say it once more.

401.3 обновлять (obnovlyát) — to update, to renew

Before the new one: say the Russian for an app, then the Russian for to install.

You'll want to know: обновлять

обновлять (*obnovlyát*) — "to update, to renew".

> Телефон сам обновляет приложения.
>
> *Telefón sam obnovlyáyet prilozhéniya.*
>
> The phone updates its apps by itself.

Imperfective; the perfective is обновить (обновлю, обновишь). Обновление — an update.

The word, taken apart — and its English cousins

обновлять is built from об- and новый "new", inherited from Proto-Slavic **novŭ*: to make a thing new again.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: obnovlyát*
- *Say it: obnovlyát*, once more
- *Say it:* a sentence of your own with *obnovlyát*
- *Recall:* say the Russian for an app, then the Russian for to install, then say *obnovlyát* again

Before you move on

What does обновлять mean? ("To update, to renew".) Say it once more.

401.4 удалять (udalyát) — to delete, to remove

Before the new one: say the Russian for to install, then the Russian for to update.

You'll want to know: удалять

удалять (*udalyát*) — "to delete, to remove".

Я удаляю старые фотографии.

Ya udalyáyu stáryye fotográfii.

I am deleting old photos.

Imperfective; perfective удалить. It also means to take out a tooth, or to send a player off.

The word, taken apart — and its English cousins

удалять is built from у- and the root of даль "distance" and далёкий "far": to move a thing far away.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: udalyát*
- *Say it: udalyát*, once more
- *Say it:* a sentence of your own with *udalyát*
- *Recall:* say the Russian for to install, then the Russian for to update, then say *udalyát* again

Before you move on

What does удалять mean? ("To delete, to remove".) Say it once more.

401.5 загружать (zagruzhát) — to load, to upload; to keep busy

Before the new one: say the Russian for to update, then the Russian for to delete.

You'll want to know: загружать

загружать (*zagruzhát*) — "to load, to upload; to keep busy".

Страница долго загружается.

Stranítsa dólgo zagruzháyetsya.

The page takes a long time to load.

Imperfective; perfective загрузить. Of work: меня загрузили работой — they have loaded me with work.

The word, taken apart — and its English cousins

загружать is built from за- and груз "a load", the root of грузовик "a lorry": to put a load in.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: zagruzhát*
- *Say it: zagruzhát*, once more
- *Say it:* a sentence of your own with *zagruzhát*
- *Recall:* say the Russian for to update, then the Russian for to delete, then say *zagruzhát* again

Before you move on

What does загружать mean? ("To load, to upload; to keep busy".) Say it once more.

Chapter 402

Staying connected

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can connect a device, charge my phone, message a friend and forward a letter.
>
> *Complete the last lesson of chapter 402: I can connect a device, charge my phone, message a friend and forward a letter.*

402.1 подключать (podklyuchát) — to connect, to plug in

> Before the new one: say the Russian for to delete, then the Russian for to load.

You'll want to know: подключать

подключать (*podklyuchát*) — "to connect, to plug in".

> Мы подключаем интернет в новой квартире.
>
> *My podklyucháyem internét v nóvoy kvartíre.*
>
> We are getting the internet connected in the new flat.

Imperfective; perfective подключить. Подключаться к + dative — to connect to.

The word, taken apart — and its English cousins

подключать is built from под- and ключ "a key", inherited from Proto-Slavic **ključĭ*: to lock one thing into another.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: podklyuchát*
- *Say it: podklyuchát*, once more
- *Say it:* a sentence of your own with *podklyuchát*
- *Recall:* say the Russian for to delete, then the Russian for to load, then say *podklyuchát* again

Before you move on

What does подключать mean? ("To connect, to plug in".) Say it once more.

402.2 заряжать (zaryazhát) — to charge (a battery)

Before the new one: say the Russian for to load, then the Russian for to connect.

You'll want to know: заряжать

заряжать (*zaryazhát*) — "to charge (a battery)".

> Я заряжаю телефон каждую ночь.
>
> *Ya zaryazháyu telefón kázhduyu noch.*
>
> I charge my phone every night.

Imperfective; perfective зарядить. Зарядка is a charger, and also morning exercises.

The word, taken apart — and its English cousins

заряжать is built from за- and the root of ряд "a row, an order", as in снаряжать "to equip": first to load a gun, now to charge a battery.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: zaryazhát*
- *Say it: zaryazhát*, once more
- *Say it:* a sentence of your own with *zaryazhát*
- *Recall:* say the Russian for to load, then the Russian for to connect, then say *zaryazhát* again

Before you move on

402.3 переписываться (perepísyvatsya) — to correspond, to message each other

Before the new one: say the Russian for to connect, then the Russian for to charge.

You'll want to know: переписываться

переписываться (*perepísyvatsya*) — "to correspond, to message each other".

Мы переписываемся с другом уже пять лет.

My perepísyvayemsya s drúgom uzhé pyat let.

My friend and I have been corresponding for five years.

Imperfective; perfective переписаться. Переписываться с + instrumental. Without -ся, переписывать means to copy out.

The word, taken apart — and its English cousins

переписываться is built from пере- "across, back and forth" and писать "to write", inherited from Proto-Slavic **pisati* "to write; to paint", from PIE **peyk̑-* "to paint, to colour" (EtymDB): letters going back and forth.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: perepísyvatsya*
- *Say it: perepísyvatsya*, once more
- *Say it:* a sentence of your own with *perepísyvatsya*
- *Recall:* say the Russian for to connect, then the Russian for to charge, then say *perepísyvatsya* again

Before you move on

What does переписываться mean? ("To correspond, to message each other".) Say it once more.

402.4 пересылать (peresylát) — to forward, to send on

Before the new one: say the Russian for to charge, then the Russian for to correspond.

You'll want to know: пересылать

пересылать (*peresylát*) — "to forward, to send on".

Я пересылаю тебе его письмо.

Ya peresyláyu tebé yegó pismó.

I am forwarding his letter to you.

Imperfective; perfective переслать (перешлю, перешлёшь).

The word, taken apart — and its English cousins

пересылать is built from пере- "across, on" and слать "to send", the root of посылка: to send a thing on.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: peresylát*
- *Say it: peresylát*, once more
- *Say it:* a sentence of your own with *peresylát*
- *Recall:* say the Russian for to charge, then the Russian for to correspond, then say *peresylát* again

Before you move on

What does пересылать mean? ("To forward, to send on".) Say it once more.

402.5 устройство (ustróystvo) — a device; the structure, the set-up

Before the new one: say the Russian for to correspond, then the Russian for to forward.

You'll want to know: устройство

устройство (*ustróystvo*) — "a device; the structure, the set-up".

Это устройство работает без интернета.

Éto ustróystvo rabótayet bez internéta.

This device works without the internet.

Neuter. Мобильное устройство — a mobile device. Also the way a thing is arranged: устройство общества.

The word, taken apart — and its English cousins

устройство is built on устроить "to arrange, to set up", from строить "to build", on the old Slavic root **stroji* "order, arrangement".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ustróystvo*
- *Say it: ustróystvo*, once more
- *Say it:* a sentence of your own with *ustróystvo*
- *Recall:* say the Russian for to correspond, then the Russian for to forward, then say *ustróystvo* again

Chapter 403

Behind the wheel

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about driving: the steering wheel, the brake, braking, speeding up and sounding the horn.
>
> *Complete the last lesson of chapter 403: I can talk about driving: the steering wheel, the brake, braking, speeding up and sounding the horn.*

403.1 руль (rul) — a steering wheel; a handlebar

Before the new one: say the Russian for a task, then the Russian for experience.

You'll want to know: руль

руль (*rul*) — "a steering wheel; a handlebar".

> Папа держал руль обеими руками.
>
> *Pápa derzhál rul obéimi rukámi.*
>
> Dad held the steering wheel with both hands.

Masculine; the stress moves to the ending: руля (*rulyá*), за рулём (*za rulyóm*) — at the wheel, driving.

The word, taken apart — and its English cousins

руль was borrowed from Dutch *roer* 'a rudder' (EtymDB): the word for steering a ship came to mean steering a car or a bicycle.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rul*
- *Say it: rul*, once more
- *Say it:* a sentence of your own with *rul*
- *Recall:* say the Russian for a task, then the Russian for experience, then say *rul* again

You'll want to know: тормоз

тормоз (*tórmoz*) — "a brake".

У этой старой машины плохие тормоза.

U étoy stároy mashíny plokhíye tormozá.

This old car has bad brakes.

Plural тормоза. Нажать на тормоз — to put on the brake.

The word, taken apart — and its English cousins

тормоз goes back to Greek *tórmos* 'a socket into which a peg fits' (EtymDB). How the word reached Russian is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: tórmoz*
- *Say it: tórmoz*, once more
- *Say it:* a sentence of your own with *tórmoz*
- *Recall:* say the Russian for experience, then the Russian for a steering wheel, then say *tórmoz* again

Before you move on

What does тормоз mean? ("A brake".) Say it once more.

403.3 тормозить (tormozít) — to brake; to slow down

Before the new one: say the Russian for a steering wheel, then the Russian for a brake.

You'll want to know: тормозить

тормозить (*tormozít*) — "to brake; to slow down".

Перед школой водитель всегда тормозит.

Péred shkóloy vodítel vsegdá tormozít.

In front of the school the driver always brakes.

Imperfective; the perfective is затормозить. Present торможу, тормозишь: з becomes ж in the first person.

The word, taken apart — and its English cousins

тормозить is built on тормоз 'a brake' with the verb ending -ить. Тормоз goes back to Greek *tórmos* 'a socket for a peg' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: tormozít*
- *Say it: tormozít*, once more
- *Say it:* a sentence of your own with *tormozít*
- *Recall:* say the Russian for a steering wheel, then the Russian for a brake, then say *tormozít* again

Before you move on

What does тормозить mean? ("To brake; to slow down".) Say it once more.

403.4 разгоняться (razgonyátsya) — to speed up, to gather speed

Before the new one: say the Russian for a brake, then the Russian for to brake.

You'll want to know: разгоняться

разгоняться (*razgonyátsya*) — "to speed up, to gather speed".

На шоссе машина быстро разгоняется.

Na shossé mashína býstro razgonyáyetsya.

On the motorway the car quickly speeds up.

Imperfective; perfective разогнаться (разгонюсь, разгонишься).

The word, taken apart — and its English cousins

разгоняться is built from раз-, гонять 'to drive, to chase' and -ся. Гонять is inherited from Proto-Slavic *ganjati*, which EtymDB traces to the PIE root $g^{wh}en$- 'to strike, to drive'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: razgonyátsya*
- *Say it: razgonyátsya*, once more
- *Say it:* a sentence of your own with *razgonyátsya*
- *Recall:* say the Russian for a brake, then the Russian for to brake, then say *razgonyátsya* again

Before you move on

What does разгоняться mean? ("To speed up, to gather speed".) Say it once more.

403.5 сигналить (signálit) — to sound the horn, to honk; to signal

Before the new one: say the Russian for to brake, then the Russian for to speed up.

You'll want to know: сигналить

сигналить (*signálit*) — "to sound the horn, to honk; to signal".

Возле дома водитель такси долго сигналил.

Vózle dóma vodítel taksí dólgo signálil.

Outside the house the taxi driver kept sounding his horn.

Imperfective; perfective просигналить. Built on сигнал — a signal.

The word, taken apart — and its English cousins

сигналить is built on сигнал 'a signal'. Сигнал is usually traced to French *signal*, which EtymDB derives from Latin *signālis*, from *signum* 'a sign'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: signálit*
- *Say it: signálit*, once more
- *Say it:* a sentence of your own with *signálit*
- *Recall:* say the Russian for to brake, then the Russian for to speed up, then say *signálit* again

Before you move on

What does сигналить mean? ("To sound the horn, to honk; to signal".) Say it once more.

Chapter 404

Under the bonnet

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about what is under the bonnet: the engine, the battery, starting the car and an engine that stalls.
>
> *Complete the last lesson of chapter 404: I can talk about what is under the bonnet: the engine, the battery, starting the car and an engine that stalls.*

404.1 капот (kapót) — a bonnet (of a car); a hood

Before the new one: say the Russian for to speed up, then the Russian for to sound the horn.

You'll want to know: капот

капот (*kapót*) — "a bonnet (of a car); a hood".

> Водитель вышел и открыл капот.
>
> *Vodítel výshel i otkrýl kapót.*
>
> The driver got out and opened the bonnet.

Masculine. In American English, the hood.

The word, taken apart — and its English cousins

капот was borrowed from French *capote*, a hooded cloak (EtymDB): the engine wears a hood. EtymDB traces *capote* back to Latin *caput* 'head'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: kapót*
- *Say it: kapót*, once more
- *Say it:* a sentence of your own with *kapót*
- *Recall:* say the Russian for to speed up, then the Russian for to sound the horn, then say *kapót* again

Before you move on

What does капот mean? ("A bonnet (of a car); a hood".) Say it once more.

404.2 двигатель (dvígatel) — an engine, a motor

Before the new one: say the Russian for to sound the horn, then the Russian for a bonnet.

You'll want to know: двигатель

двигатель (*dvígatel*) — "an engine, a motor".

У новой машины тихий двигатель.

U nóvoy mashíny tíkhiy dvígatel.

The new car has a quiet engine.

Masculine, though it ends in -ь: мой двигатель.

The word, taken apart — and its English cousins

двигатель is built on двигать 'to move' with the ending -тель, 'the thing that does it'. Двигать is inherited from Proto-Slavic *dvigati* 'to lift, to move' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dvígatel*
- *Say it: dvígatel*, once more
- *Say it:* a sentence of your own with *dvígatel*
- *Recall:* say the Russian for to sound the horn, then the Russian for a bonnet, then say *dvígatel* again

Before you move on

What does двигатель mean? ("An engine, a motor".) Say it once more.

404.3 аккумулятор (akkumulyátor) — a car battery; a rechargeable battery

Before the new one: say the Russian for a bonnet, then the Russian for an engine.

You'll want to know: аккумулятор

аккумулятор (*akkumulyátor*) — "a car battery; a rechargeable battery".

Ночью был сильный холод, и аккумулятор сел.

Nóchyu byl sílnyy khólod, i akkumulyátor sel.

It was very cold in the night, and the battery went flat.

Аккумулятор сел — the battery is flat. Small batteries for a remote are батарейки.

The word, taken apart — and its English cousins

аккумулятор is usually traced to Latin *accumulātor* 'one who heaps up', from *accumulāre* 'to pile up' (EtymDB lists the Latin words): a battery stores up charge. EtymDB does not list the Russian word, and the route into Russian, probably through German, is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: akkumulyátor*
- *Say it: akkumulyátor*, once more
- *Say it:* a sentence of your own with *akkumulyátor*
- *Recall:* say the Russian for a bonnet, then the Russian for an engine, then say *akkumulyátor* again

Before you move on

What does аккумулятор mean? ("A car battery; a rechargeable battery".) Say it once more.

404.4 заводить (zavodít) — to start (an engine); to wind up (a clock)

Before the new one: say the Russian for an engine, then the Russian for a car battery.

You'll want to know: заводить

заводить (*zavodít*) — "to start (an engine); to wind up (a clock)".

Каждое утро сосед заводит машину в семь часов.

Kázhdoye útro soséd zavódit mashínu v sem chasóv.

Every morning the neighbour starts his car at seven.

Imperfective; the perfective is завести (заведу, заведёшь). Present завожу, заводишь. Машина не заводится — the car will not start.

The word, taken apart — and its English cousins

заводить is built from за- and водить 'to lead'. Водить is inherited from Proto-Slavic *voditi* 'to lead' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: zavodít*
- *Say it: zavodít*, once more
- *Say it:* a sentence of your own with *zavodít*
- *Recall:* say the Russian for an engine, then the Russian for a car battery, then say *zavodít* again

Before you move on

What does заводить mean? ("To start (an engine); to wind up (a clock)".) Say it once more.

404.5 глохнуть (glókhnut) — to stall (of an engine); to go deaf

Before the new one: say the Russian for a car battery, then the Russian for to start.

You'll want to know: глохнуть

глохнуть (*glókhnut*) — "to stall (of an engine); to go deaf".

Старый мотор часто глохнет на светофоре.

Stáryy motór chásto glókhnet na svetofóre.

The old engine often stalls at the traffic lights.

Imperfective; perfective заглохнуть. Past глох, глохла: the -ну- drops out.

The word, taken apart — and its English cousins

глохнуть is inherited from Proto-Slavic *glŭxnǫti* (EtymDB), the verb that goes with глухой 'deaf': an engine that stalls goes silent.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: glókhnut*
- *Say it: glókhnut*, once more
- *Say it:* a sentence of your own with *glókhnut*
- *Recall:* say the Russian for a car battery, then the Russian for to start, then say *glókhnut* again

Before you move on

What does глохнуть mean? ("To stall (of an engine); to go deaf".) Say it once more.

Chapter 405

A flat tyre

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

>
> *Complete the last lesson of chapter 405: I can deal with a flat tyre: the tyre, the puncture, the pump, pumping it up and wheels that spin.*

405.1 шина (shína) — a tyre

Before the new one: say the Russian for to start, then the Russian for to stall.

You'll want to know: шина

шина (*shína*) — "a tyre".

> Передняя шина совсем старая.
>
> *Perédnyaya shína sovsém stáraya.*
>
> The front tyre is quite old.

Feminine. In everyday speech people also say колесо — a wheel.

The word, taken apart — and its English cousins

шина was borrowed from German *Schiene* 'a rail, a strip' (EtymDB), from Old High German *skina*; the word probably named the iron band

round a cartwheel before the rubber tyre.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: shína*
- *Say it: shína*, once more
- *Say it:* a sentence of your own with *shína*
- *Recall:* say the Russian for to start, then the Russian for to stall, then say *shína* again

405.2 прокол (prokól) — a puncture

Before the new one: say the Russian for to stall, then the Russian for a tyre.

You'll want to know: прокол

прокол (*prokól*) — "a puncture".

Из-за прокола мы час стояли у дороги.

Iz-za prokóla my chas stoyáli u dorógi.

Because of the puncture we stood by the road for an hour.

Masculine. У меня прокол — I have a puncture.

The word, taken apart — and its English cousins

прокол is built on проколоть 'to pierce through', from про- 'through' and колоть 'to prick, to split'. EtymDB does not list

прокол; its parts are ordinary Russian.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: prokól*
- *Say it: prokól*, once more
- *Say it:* a sentence of your own with *prokól*
- *Recall:* say the Russian for to stall, then the Russian for a tyre, then say *prokól* again

Before you move on

What does прокол mean? ("A puncture".) Say it once more.

405.3 насос (nasós) — a pump

Before the new one: say the Russian for a tyre, then the Russian for a puncture.

You'll want to know: насос

> Хорошо, что у нас был с собой насос.
>
> *Khoroshó, chto u nas byl s sobóy nasós.*
>
> It was a good thing we had a pump with us.

Masculine. Велосипедный насос — a bicycle pump.

The word, taken apart — and its English cousins

насос is built from на- and the root of сосать 'to suck': a pump sucks up air or water. EtymDB lists the word without a source.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: nasós*
- *Say it: nasós*, once more

405.4 накачивать (nakáchivat) — to pump up, to inflate

Before the new one: say the Russian for a puncture, then the Russian for a pump.

You'll want to know: накачивать

накачивать (*nakáchivat*) — "to pump up, to inflate".

> Каждую неделю он накачивает шины на велосипеде.
>
> *Kázhduyu nedélyu on nakáchivayet shíny na velosipéde.*
>
> Every week he pumps up the tyres on his bicycle.

Imperfective; perfective накачать.

The word, taken apart — and its English cousins

накачивать is built from на- and качать 'to swing, to pump'. EtymDB lists качать without a source, so its deeper origin is left open here.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: nakáchivat*
- *Say it: nakáchivat*, once more
- *Say it:* a sentence of your own with *nakáchivat*

405.5 буксовать (buksovát) — to spin (of wheels), to get stuck

Before the new one: say the Russian for a pump, then the Russian for to pump up.

You'll want to know: буксовать

буксовать (*buksovát*) — "to spin (of wheels), to get stuck".

> В снегу колёса долго буксовали.
>
> *V snegú kolyósa dólgo buksováli.*
>
> In the snow the wheels spun for a long time.

Imperfective; perfective забуксовать. Present буксует. Also figurative: проект буксует — the project is stuck.

The word, taken apart — and its English cousins

The origin of буксовать is not settled. It is often linked with буксир 'a tug, a towrope', a sailors' word usually traced to Dutch; EtymDB does not list буксовать.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: buksovát*
- *Say it: buksovát*, once more
- *Say it:* a sentence of your own with *buksovát*

> *Complete the last lesson of chapter 406: I can name parts of a car: the boot, the bumper, the headlights, the seats and the wipers.*

406.1 багажник (bagázhnik) — a boot (of a car); a roof rack

Before the new one: say the Russian for to pump up, then the Russian for to spin.

You'll want to know: багажник

багажник (*bagázhnik*) — "a boot (of a car); a roof rack".

> Чемоданы лежат в багажнике.
>
> *Chemodány lezhát v bagázhnike.*
>
> The suitcases are in the boot.

Built on багаж — luggage. In American English, the trunk.

The word, taken apart — and its English cousins

багажник is built on багаж 'luggage' with the ending -ник, the place for it. Багаж was borrowed from French *bagage* 'baggage, luggage' (EtymDB); EtymDB does not list багажник itself.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: bagázhnik*
- *Say it: bagázhnik*, once more
- *Say it:* a sentence of your own with *bagázhnik*

406.2 бампер (bámper) — a bumper

Before the new one: say the Russian for to spin, then the Russian for a boot.

You'll want to know: бампер

бампер (*bámper*) — "a bumper".

После аварии бампер пришлось поменять.

Pósle avárii bámper prishlós pomenyát.

After the accident the bumper had to be replaced.

Masculine; the stress is on the first syllable.

The word, taken apart — and its English cousins

бампер was borrowed from English *bumper* (EtymDB), the bar that takes the bump.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: bámper*
- *Say it: bámper*, once more
- *Say it:* a sentence of your own with *bámper*
- *Recall:* say the Russian for to spin, then the Russian for a boot, then say *bámper* again

Before you move on

406.3 фара (fára) — a headlight

Before the new one: say the Russian for a boot, then the Russian for a bumper.

You'll want to know: фара

фара (*fára*) — "a headlight".

Вечером водитель включил фары.

Vécherom vodítel vklyuchíl fáry.

In the evening the driver switched on the headlights.

Usually plural: фары.

The word, taken apart — and its English cousins

фара was borrowed from French *phare* 'a lighthouse; a headlight' (EtymDB). *Phare* goes back to Latin *pharus* 'a lighthouse', from Greek *pháros* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: fára*
- *Say it: fára*, once more

сиденье (*sidénye*) — "a seat (in a car or a bus)".

Дети сидят на заднем сиденье.

Déti sidyát na zádnem sidénye.

The children are sitting on the back seat.

Neuter. Also spelled сидение.

The word, taken apart — and its English cousins

сиденье is built on сидеть 'to sit', which is inherited from Proto-Slavic *sěděti* 'to sit' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sidénye*
- *Say it: sidénye*, once more
- *Say it:* a sentence of your own with *sidénye*
- *Recall:* say the Russian for a bumper, then the Russian for a headlight, then say *sidénye* again

Before you move on

What does сиденье mean? ("A seat (in a car or a bus)".) Say it once more.

406.5 дворник (dvórnik) — a windscreen wiper; a caretaker, a street sweeper

Before the new one: say the Russian for a headlight, then the Russian for a seat.

You'll want to know: дворник

дворник (*dvórnik*) — "a windscreen wiper; a caretaker, a street sweeper".

> Шёл дождь, и дворники работали всю дорогу.
>
> *Shyol dozhd, i dvórniki rabótali vsyu dorógu.*
>
> It was raining, and the wipers worked all the way.

The first meaning is a person who sweeps a yard; the wipers sweep the glass.

The word, taken apart — and its English cousins

дворник is built on двор 'a yard' (EtymDB), which is inherited from Proto-Slavic *dvorŭ* 'a court'. EtymDB glosses дворник as the one who keeps the yard and the pavement; the wiper that sweeps the glass took the name later.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dvórnik*
- *Say it: dvórnik*, once more
- *Say it:* a sentence of your own with *dvórnik*
- *Recall:* say the Russian for a headlight, then the Russian for a seat, then say *dvórnik* again

Before you move on

What does дворник mean? ("A windscreen wiper; a caretaker, a street sweeper".) Say it once more.

>
> *Complete the last lesson of chapter 419: I can check in for a flight: check-in, checking in, the flight, hand luggage and the boarding pass.*

419.1 регистрация (registrátsiya) — check-in; registration

Before the new one: say the Russian for to go past, then the Russian for to see off.

You'll want to know: регистрация

регистрация (*registrátsiya*) — "check-in; registration".

> Регистрация начинается в шесть утра.
>
> *Registrátsiya nachináyetsya v shest utrá.*
>
> Check-in opens at six in the morning.

Feminine. Стойка регистрации — the check-in desk.

The word, taken apart — and its English cousins

регистрация is a learned word built on регистр 'a register', usually traced to Medieval Latin *registrum* 'a list'. EtymDB lists the Russian word without a source, so the line is hedged.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: registrátsiya*

> Летом мы отдыхали на турбазе у озера.
>
> *Létom my otdykháli na turbáze u ózera.*
>
> In summer we stayed at a holiday camp by the lake.

Feminine; short for туристическая база: simple cabins in the countryside.

The word, taken apart — and its English cousins

турбаза is a short form of туристическая база 'a tourist base', from турист 'a tourist' and база 'a base'. EtymDB lists база and турист without a source; турист is usually traced through French *touriste* and *tour* to Latin *tornāre* 'to turn on a lathe' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: turbáza*

You'll want to know: бронь

бронь (*bron*) — "a booking, a reservation".

У нас есть бронь на два номера.

U nas yest bron na dva nómera.

We have a booking for two rooms.

Feminine; colloquial for бронирование. Its cousin броня means armour.

The word, taken apart — and its English cousins

бронь goes with броня 'armour', which EtymDB traces through Old East Slavic *brŭnja* to Proto-Slavic *brŭnja* and on to Gothic *brunjō* 'a breastplate': a booking shields a place for you.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: bron*
- *Say it: bron*, once more
- *Say it:* a sentence of your own with *bron*

> *Complete the last lesson of chapter 434: I can make a complaint: the complaint, complaining, a formal claim, being dissatisfied and things that are out of order.*

434.1 жалоба (zháloba) — a complaint

Before the new one: say the Russian for a safe, then the Russian for a fault.

You'll want to know: жалоба

жалоба (*zháloba*) — "a complaint".

> Туристы подали жалобу на шум.
>
> *Turísty podáli zhálobu na shum.*
>
> The tourists made a complaint about the noise.

Feminine. Takes на + accusative: жалоба на соседей.

The word, taken apart — and its English cousins

жалоба goes with жалеть 'to pity' and жаль 'a pity': to complain is to call for pity. EtymDB lists жалоба with the sense 'complaint' but without a source.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: zháloba*
- *Say it: zháloba*, once more
- *Say it:* a sentence of your own with *zháloba*

посольство (*posólstvo*) — "an embassy".

> Мы пошли в посольство за визой.
>
> *My poshlí v posólstvo za vízoy.*
>
> We went to the embassy for a visa.

Neuter. Built on посол — an ambassador.

The word, taken apart — and its English cousins

посольство is built on посол 'an envoy, an ambassador' with -ство. Посол goes with посылать 'to send': one who is sent. EtymDB lists посольство without a deeper source.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: posólstvo*
- *Say it: posólstvo*, once more

470.1 стыд (styd) — shame

Before the new one: say the Russian for envy, then the Russian for to envy.

You'll want to know: стыд

стыд (*styd*) — "shame".

> От стыда он не мог сказать ни слова.
>
> *Ot stydá on ne mog skazát ni slóva.*
>
> He couldn't say a word for shame.

Masculine; genitive стыда. Мне стыдно — I feel ashamed.

The word, taken apart — and its English cousins

стыд is inherited from Proto-Slavic *stydъ* (EtymDB); it is usually linked to the root of стыть 'to grow cold'.

What you've built

You'll want to know: краснеть

краснеть (*krasnét*) — "to blush".

Она краснеет, когда говорит с ним.

Oná krasnéyet, kogdá govorít s nim.

She blushes when she talks to him.

Imperfective; present краснею, краснеешь. Perfective покраснеть. Also to turn red.

The word, taken apart — and its English cousins

краснеть is built on красный 'red', whose older sense 'beautiful' lives on in красивый; EtymDB lists the verb without a source, and the root is usually traced to Proto-Slavic *krasa* 'beauty'.

What you've built

One more word for telling, explaining and describing at B1.

обижаться (*obizhátsya*) — "to take offence".

Она часто обижается на мои шутки.

Oná chásto obizháyetsya na moí shútki.

She often takes offence at my jokes.

Imperfective; the perfective is обидеться (обижусь, обидишься). Обижаться на кого — to be offended with someone.

The word, taken apart — and its English cousins

обижаться is the reflexive of обижать, the imperfective partner of обидеть; all three share the root of обида 'offence', from Proto-Slavic

obvida (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: obizhátsya*
- *Say it: obizhátsya*, once more

> *Complete the last lesson of chapter 494: I can talk about marriage, infidelity and breaking up.*

494.1 супруг (suprúg) — a spouse, a husband

Before the new one: say the Russian for tenderness, then the Russian for affectionate.

You'll want to know: супруг

супруг (*suprúg*) — "a spouse, a husband".

> На приём она пришла с супругом.
>
> *Na priyóm oná prishlá s suprúgom.*
>
> She came to the reception with her husband.

Formal. The wife is супруга; the plural супруги means a married couple.

The word, taken apart — and its English cousins

супруг is inherited from Proto-Slavic *sǫprǫgъ* (EtymDB), built on *sǫ-* 'together' and a root usually glossed 'to harness', so spouses are a pair in one harness.

What you've built

One more word for telling, explaining and describing at B1.

Chapter 534

Mornings at Home

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can describe getting ready in the morning.
>
> *Complete the last lesson of chapter 534: I can describe getting ready in the morning.*

534.1 будить (budít) — to wake (someone)

Before the new one: say the Russian for to burn out, then the Russian for insulating tape.

You'll want to know: будить

будить (*budít*) — "to wake (someone)".

> Каждое утро мама будит меня в семь.
>
> *Kázhdoye útro máma búdit menyá v sem.*
>
> Every morning Mum wakes me at seven.

Imperfective; present бужу, будишь (д becomes ж). Perfective разбудить.

The word, taken apart — and its English cousins

будить is inherited from Proto-Slavic *buditi* 'to awaken', which EtymDB traces to PIE $b^h ewd^h$- *'to awaken'.*

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: budít*
- *Say it: budít*, once more
- *Say it:* a sentence of your own with *budít*
- *Recall:* say the Russian for to burn out, then the Russian for insulating tape, then say *budít* again

Before you move on

What does будить mean? ("To wake (someone)".) Say it once more.

534.2 высыпаться (vysypátsya) — to get enough sleep

Before the new one: say the Russian for insulating tape, then the Russian for to wake.

You'll want to know: высыпаться

высыпаться (*vysypátsya*) — "to get enough sleep".

В выходные я наконец высыпаюсь.

V vykhodnýye ya nakonéts vysypáyus.

At the weekend I finally get enough sleep.

Imperfective; perfective выспаться (высплюсь), with the stress on вы-.

The word, taken apart — and its English cousins

высыпаться is built on вы- and the root of спать 'to sleep', with -ся; EtymDB has no entry.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vysypátsya*
- *Say it: vysypátsya*, once more
- *Say it:* a sentence of your own with *vysypátsya*
- *Recall:* say the Russian for insulating tape, then the Russian for to wake, then say *vysypátsya* again

Before you move on

What does высыпаться mean? ("To get enough sleep".) Say it once more.

534.3 причёсываться (prichyósyvatsya) — to do one's hair

Before the new one: say the Russian for to wake, then the Russian for to get enough sleep.

You'll want to know: причёсываться

причёсываться (*prichyósyvatsya*) — "to do one's hair".

Сестра долго причёсывается перед зеркалом.

Sestrá dólgo prichyósyvayetsya péred zérkalom.

My sister spends a long time doing her hair in front of the mirror.

Imperfective; perfective причесаться (причешусь).

The word, taken apart — and its English cousins

причёсываться is built on при- and чесать 'to comb', which is inherited from Proto-Slavic *česati* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: prichyósyvatsya*
- *Say it: prichyósyvatsya*, once more
- *Say it:* a sentence of your own with *prichyósyvatsya*

Before you move on

What does причёсываться mean? ("To do one's hair".) Say it once more.

534.4 краситься (krásitsya) — to put on make-up

Before the new one: say the Russian for to get enough sleep, then the Russian for to do one's hair.

You'll want to know: краситься

краситься (*krásitsya*) — "to put on make-up".

Она не красится, когда сидит дома.

Oná ne krásitsya, kogdá sidít dóma.

She doesn't wear make-up when she's at home.

Imperfective; perfective накраситься. Also to dye one's hair. The reflexive of красить — to paint.

The word, taken apart — and its English cousins

краситься is the reflexive of красить 'to paint', built on краска 'paint', from the root of краса 'beauty'; EtymDB has no entry for the reflexive.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: krásitsya*
- *Say it: krásitsya*, once more
- *Say it:* a sentence of your own with *krásitsya*

Before you move on

What does краситься mean? ("To put on make-up".) Say it once more.

534.5 халат (khalát) — a dressing gown; a white coat

Before the new one: say the Russian for to do one's hair, then the Russian for to put on make-up.

You'll want to know: халат

халат (*khalát*) — "a dressing gown; a white coat".

Утром папа пьёт кофе в халате.

Útrom pápa pyot kófe v khaláte.

In the morning Dad drinks his coffee in his dressing gown.

Masculine. Also a doctor's or a cook's white coat.

The word, taken apart — and its English cousins

EtymDB lists халат, glossed 'dressing gown; robe', without a source; it is usually traced through a Turkic language to Arabic *xil^{c}a* 'a robe of honour'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: khalát*
- *Say it: khalát*, once more
- *Say it:* a sentence of your own with *khalát*

Before you move on

What does халат mean? ("A dressing gown; a white coat".) Say it once more.

534.6 Leisure, the arts and home — a review

Say the Russian for a screw and pliers.

Your turn

Say these aloud:

- a screw, pliers, to unscrew, to burn out, insulating tape
- to wake, to get enough sleep, to do one's hair, to put on make-up, a dressing gown

Before you move on

A screw? (шуруп.) Pliers? (плоскогубцы.) To unscrew? (откручивать.) To burn out? (перегорать.) Insulating tape? (изолента.) To wake? (будить.) To get enough sleep? (высыпаться.) To do one's hair? (причёсываться.) To put on make-up? (краситься.) A dressing gown? (халат.)

534.7 Mornings at Home — once more

Say the Russian for to wake and to get enough sleep.

Your turn

- *Say it:* to wake, to get enough sleep, to do one's hair, to put on make-up, a dressing gown

Before you move on

To wake? (будить.) To get enough sleep? (высыпаться.) To do one's hair? (причёсываться.) To put on make-up? (краситься.) A dressing gown? (халат.)

Pronunciation & Cyrillic Reference

A **reference**, not a chapter — a place to look things up. You are *not* meant to read this before the lessons: the lessons teach reading through real words, introducing each letter as a word needs it. This page gathers the system in one spot. Full letter-by-letter decomposition (components + stroke order) lives in the machine-readable Cyrillic script reference.

The one thing that trips everyone: false friends

Cyrillic descends, like the Latin and Greek alphabets, from the Greek alphabet — so some letters are shared, but others look identical to Latin letters and say something completely different. These four cause 90% of beginner misreadings:

- **Cyrillic:** в
  looks like Latin...: B
  actually says: v
  mnemonic: Greek *beta* drifted to a "v" sound
- **Cyrillic:** р
  looks like Latin...: P
  actually says: r
  mnemonic: Greek *rho*
- **Cyrillic:** с
  looks like Latin...: C
  actually says: s
  mnemonic: Greek *sigma* (a "c" that hisses)
- **Cyrillic:** н
  looks like Latin...: H
  actually says: n
  mnemonic: Greek *eta* / Latin N with a level bar

Two vowels also mislead: у looks like Latin *y* but says **"oo"**; х looks like Latin *x* but says a raspy **"kh."**

The letters, grouped by how they behave

- **Same look, same sound**: а (a), е (ye), к (k), м (m), о (o), т (t).
- **False friends** (look Latin, sound different): в (v), р (r), с (s), н (n), у (oo), х (kh).
- **Greek-shaped**: г (g, gamma Γ), д (d, delta Δ), л (l, lambda Λ), п (p, pi Π), ф (f, phi Φ).
- **Sounds English writes with two letters**: ж (zh, as in *measure*), ч (ch), ш (sh), щ (shch), ц (ts), ю (yu), я (ya), ё (yo).
- **The vowel English hasn't got**: ы (`yery-vowel`) — not the *ee* of и, but a tighter sound made with the tongue **drawn back**. Say English *ill*, then say it again with your tongue pulled towards your throat. It is the single hardest Russian vowel for an English speaker, and it carries real meaning: ты (*you*) and вы (*you*, formal) both turn on it.
- **The two signs** — ъ (hard sign) and ь (soft sign) — spell *no sound of their own*; they only tell you how to pronounce the consonant before them (ь softens it).

Two rules that make you sound native

- **Stress is unmarked and it matters.** Russian never prints its stress accent, but stress governs the vowels — so you learn each word *with* its stress. (This reference marks it with an acute, *privét*, but real text won't.)
- **Unstressed о → "a" (akanye).** An о not under stress reduces toward an *a*-ish sound: спасибо is said *"spa-SEE-ba,"* хорошо as *"kha-ra-SHO."*

Sound ids used in the lessons

The lessons' `sounds:` frontmatter points here: `cyrillic-false-friends` (the table above), `stress-unmarked` and `o-reduction` (the two rules), `e-ye` (е carries a *y*-glide), `zh-sound` (ж), `b-vs-v` (б vs в), `silent-v` (the dropped в in здравствуйте), `syllable-drop` (spoken contractions like *pa-ZHAL-sta*), `a-clear` / `a-father` (the pure *a*).

Russian in the Slavic family

Slavic is a branch of **Indo-European**, so Russian is a distant cousin of English, Latin, and Sanskrit — which is why its deepest words (нет ← **ne*, есть "is" ← the same root as English *is*) line up with words you already own. Cyrillic itself was built in the 9th century from Greek letters (plus a few invented for Slavic sounds Greek lacked) to write Old Church Slavonic — which is why so many letters are Greek in disguise.

A note on sources

Etymologies are traced against standard comparative sources for Slavic and Indo-European, and every English cousin claimed here is one the evidence actually supports. Where a resemblance is only a resemblance, the text says so rather than quietly banking it.
