Preface

Sanskrit, like Latin, is not learned for conversation. It is learned to read, to hear how much of the world's vocabulary was assembled, and — above all — because it is a **taproot**: the classical ancestor of Hindi, Marathi, Punjabi, and Bengali, whose every "hello" and "thank you" is a worn-down form of a Sanskrit word you will meet here in its full shape. And Sanskrit is at the same time a *sister* of Latin, Greek, and English — so its roots reach west (to *thee*, to Greek *eu-*, to *come*, to *no*) as surely as they reach east. Learning it ties the two halves of that inheritance together.

Sanskrit is classically written in **Devanagari**, the script you may already know from Hindi. This book teaches the reading *inside* the word lessons, with attention to the features Sanskrit needs even from a Devanagari reader — the *visarga* (ḥ), the vocalic ṛ, the conjuncts, and the *sandhi* that fuses words at their seams. (A reader new to the script learns it here from scratch; one who knows it skims the notes.)

We use standard **IAST** transliteration (the dotted ṛ, ḥ, ś, and macrons) alongside the Devanagari, and trace roots back toward Proto-Indo-European where the trail is clear — every form supplied in full. When Sir William Jones told the Asiatic Society in 1786 that Sanskrit bore to Latin and Greek "a stronger affinity… than could possibly have been produced by accident," he launched the whole science of comparative linguistics; this book is, in miniature, a tour of the words he meant.

How to use this book

Every numbered section is one word, or one small phrase, and takes a few minutes — the length of a queue, an errand, or the walk to the bus. Read them in order the first time through: each section stands on the ones before it, and nothing is used before it has been taught. After that the book becomes reference, and you can open it anywhere.

Say the Sanskrit out loud wherever you can. The prompts under *Your*

turn are written to be spoken, and saying a word is most of what makes it stay. The questions under *Before you move on* carry their own answers in brackets: cover them, answer from memory, then look.

Nothing here is gated behind the alphabet. Each lesson introduces exactly the letters and sounds its own word needs, so you are reading real words from the first page rather than drilling a chart. The whole script is gathered in a reference at the back of the book — somewhere to look things up when you are curious, never a chapter to sit through first.

Chapter 1

Greetings

Modes: **voice** (5) **eyes** (1) **pen** (7) **Hands-free start:** the first of 13 lessons.

> ***By the end of this chapter:*** I can greet someone in Sanskrit, recognize the reply, and choose an appropriate response.
>
> *Complete SA-C01-practice, the canonical closing checkpoint, and demonstrate the chapter promise: greet someone in Sanskrit, recognize the reply, and choose an appropriate response.*

1.1 Namaste — "I bow to you"

The first Sanskrit word — and the original that Hindi, Marathi, Punjabi, and Bengali all wore down into their own greetings.

The letters in this word

Four even beats: *na* · *ma* · *s* · *te*. The *s* closes its own beat and leans straight into *te* with no vowel between them. Nothing here is strange to an English mouth — say it at conversational speed and it is yours.

The word, taken apart — its roots and family

namaste = *namas* ("a bow, obeisance") + *te* ("to you") — literally "**a bow to you**." This is the *source*: the word every Indo-Aryan *namaste* descends from. *Namas* is from the root √nam "to bend, bow" (PIE **nem-*). And *te* "to you" is a family heirloom — the same Indo-European pronoun behind Latin *tē*, Greek *se*, and archaic English

thee. Say *namas-te* and you speak a word Cicero and Chaucer would each half-recognise.

Why it's said this way

Palms pressed together (the gesture is *añjali*), a slight bow: hands and word say the same thing. *Namaste* greets the person before you as worthy of a bow — hello, and on parting, goodbye. It is the greeting Sanskrit gave to half of South Asia.

Writing — let your finger meet one shape

Here is the first printed shape of the greeting's written form: न. Follow that shape once with your finger while you say *namaste*.

Do not write it yet, and do not try to read it. The whole written word waits until its other shapes have been met one at a time. A script lesson later in this chapter gives this shape its own strokes; tracing a typeface here does not claim a handwriting stroke order.

Your turn

Say these aloud:

- its beats — na · ma · s · te
- the two parts (*namas* "a bow" + *te* "to you")
- the English cousin of *te* (**thee**)

Before you move on

What does *namaste* literally mean, and what English pronoun is *te* cousin to? ("A bow to you"; **thee**.)

1.2 Namaskāraḥ — the fuller form

Same bow, different grammar — and your first case-ending.

The letters in this word

na · mas · kā · raḥ. The *ā* is the long vowel, held about twice as long as a short *a*. The final -*ḥ* is a soft breath after the vowel, almost an echo of it: the word ends on a whispered *ha*, not a stop.

The word, taken apart — its roots and family

namaskāraḥ = *namas* ("a bow") + *kāra* ("the making, the doing," from the root √kṛ "to do/make"). So *namaskāra* is "the **making** of a bow" — an act, where *namaste* is an address. That root √kṛ "to do" is among Sanskrit's most productive (it gives *karma*, "a thing done"); it is PIE k^w*er*-. The final **visarga** -*aḥ* marks the masculine singular — your first case-ending.

Grammar Lens

Namaste and *namaskāra* share the same first half, *namas*; on the page that half is the same piece in both, नमस्. They end differently because they do different grammatical jobs — one takes a pronoun (*te* "to you"), the other builds a noun (-*kāra* "the making of"). Sanskrit words are transparently assembled from roots and endings; once you see the seams, long words stop being frightening.

Your turn

Say these aloud:

- its beats — na · mas · kā · raḥ
- how it differs in sense from *namaste* ("the making of a bow" vs. "a bow to you")
- what the final visarga -*aḥ* marks (masculine singular)

Before you move on

Namaskāra is built from which two parts, and what does its visarga ending tell you? (*Namas* "a bow" + *kāra* "the making of"; masculine singular.)

1.3 न — one character, met inside words you already say

A horizontal head-line (shirorekhā) runs across the top; letters hang beneath it like laundry on a line.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: न

न — *na*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *n*, it is **na**.

What it is made of:

- a clockwise left loop joined to a rightward shoulder
- a top-to-bottom right stem
- the top shirorekhā

You already say these words, and न is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *namaste* — hello (lit. "a bow to you")
- *namaskāraḥ* — hello (lit. "the making of a bow")

Pen lifts: 2. The pen comes up 2 times and no more.

Your turn

- *Look:* at this, and find न in it

न

- *Trace it:* न three times, saying *na* as you finish each one
- *Look:* back at any page of this chapter and find न once more

Before you move on

Which character is this — न? What sound does it carry? (***na***.) Name one word you already say that contains it.

1.4 न — copy it in three strokes, counting the lifts

Put the stroke order from the last lesson beside you. It stays visible for all of this one.

Writing — guided copy

How it is written — 3 strokes · 2 pen lifts · 3 movements

Stroke order after Opiaterein, 'Deva-न-order.gif', strokes 1–3, Wikimedia Commons, 11 May 2009
This order is attested, not standardised; the source records where it varies.

How न is written, stroke by stroke

Copy न once, following the three strokes in order: the loop and shoulder, the right stem top to bottom, then the **śirorekhā** across the top, left to right.

Count your pen lifts as you go. There should be **two** — after the shoulder and after the stem — and no more. If you lifted three or four times, you

drew a picture of the letter rather than the letter; do it once more and watch only the lifts.

The last stroke is the one that matters most and is the easiest to treat as decoration. The śirorekhā is drawn **last and left to right**, and in running Devanagari it joins up across a whole word — so it is not a lid on one letter, it is the line the word will eventually hang from.

Before you move on

How many pen lifts? (**Two.**) Which stroke came last? (**The śirorekhā**, left to right.)
One caution the source itself carries: this is one attested teaching order, not a national standard. Everyday handwriting joins and simplifies it, and a hand that has learned a different order is not wrong.

1.5 न — write it with the model covered

Look at न once and say *na*. Then cover it, and the stroke order with it.

Writing — delayed copy

How it is written — 3 strokes · 2 pen lifts · 3 movements

Stroke order after Opiaterein, 'Deva-न-order.gif', strokes 1–3, Wikimedia Commons, 11 May 2009
This order is attested, not standardised; the source records where it varies.

How न is written, stroke by stroke

With everything covered, wait ten seconds, then write न once from memory.

Ten seconds is long enough that your hand cannot be copying a shape it can still see, and short enough that a letter you met a minute ago is still there.

Only after the letter is finished, uncover the model and compare.

Before you move on

Check the **śirorekhā** first, and check its length rather than its presence.
A hand writing from memory usually remembers to put the bar there and draws it only as wide as the letter's own body. In running text the bar has to reach the full width of the letter, because the next letter's bar will meet it. A bar drawn short is the one mistake that looks completely correct on a single letter and falls apart the moment there are two.

1.6 न — the letter from the sound

Cover every न on the page. Nothing to copy, nothing to uncover, and no stroke order in front of you.

Writing — dictation

Say *na* aloud, or play it, and write the letter that carries it. Once.

A delayed copy asks your hand to remember a shape. Dictation asks it to turn a **sound** into a shape, which is what writing is actually for, and the two do not always arrive together.

Before you move on

Uncover the model, compare — and notice what you were asked to write.
Not *n*. **na**. One shape came out of your hand for two sounds, and nobody wrote the vowel. That is what an abugida is, and it is the reason the letters of this script cannot be counted the way an alphabet's can: न is not a letter plus a silent vowel, it is a syllable with a consonant you can change.

1.7 Dhanyavādaḥ — "thank you"

The full, un-worn Sanskrit shape of a "thank you" you already met to the east.

The letters in this word

dha · *nya* · *vā* · *daḥ*. The opening *dh* is one sound, not two — a *d* released with a puff of breath behind it. *nya* is likewise a single run. It closes on the same soft breathed *-ḥ* as *namaskāraḥ*.

The word, taken apart — its roots and family

dhanyavādaḥ = *dhanya* ("worthy, deserving," from *dhana* "wealth") + *vāda* ("a speaking, a statement," from the root √vad "to speak"). Literally "a saying of 'you are worthy.'" This is the **source** of the thanks you met to the east — Hindi *dhanyavād*, Marathi and Punjabi likewise, Bengali *dhônyobad* — here in its full Sanskrit shape, visarga and all. The whole spelling waits; for now, notice only its second half, *vāda*, written वाद.

Why it's said this way

Classical Sanskrit thanks are more often shown in deed and honorific than said with a set formula; *dhanyavāda* is the plain, dignified "thank you," and its survival across every modern northern language shows how durable a good word can be. Note you already knew all its pieces — only the ending (*-aḥ*) is new.

Your turn

Say these aloud:

- its beats — dha · nya · vā · daḥ
- its two roots (*dhanya* "worthy" + *vāda* "a saying")
- a modern descendant (Hindi *dhanyavād* / Bengali *dhônyobad*)

Before you move on

Dhanyavāda is built from which two parts, and what modern greeting descends from it? (*Dhanya* "worthy" + *vāda* "a saying"; Hindi *dhanyavād*, etc.)

1.8 स्वागतम् (svāgatam) — "welcome"

One word that is partly *cognate* with English "welcome", not only a translation of it.

The letters in this word

svā · ga · tam. It opens on *sv-* said as one push, carries the long *ā* in that first beat, and ends on a bare *m* with no vowel after it — the mouth simply closes.

The word, taken apart — its roots and family

svāgatam = *su* ("well, good") + *āgata* ("come," from *ā* "toward" + the root √gam "to go/come") — "**well come**," which is exactly what English *welcome* means too. Two Indo-European threads surface:

- *su-* "good" does the work of **Greek *eu-*** — the *eu* of *euphoria*, *eulogy*, *euphemism*; MW sets the two prefixes side by side.
- the root √gam "to go/come" is PIE $g^w em$- — the very root of English **come** (and of Latin *venīre*, hence *venue*, *convene*).

So *svāgatam* and *welcome* are not just parallel ideas but partly **cognate** ones.

Why it's said this way

Su + *āgata* fuses into *svāgata* by **sandhi** — Sanskrit's rule that *u* before a vowel becomes the glide *v*. You will see sandhi everywhere; it is why Sanskrit words seem to melt into one another. The neuter ending *-am* makes it "a welcome / it is welcomed."

Your turn

Say these aloud:

- read it — svā · ga · tam
- the two parts (*su* "well" + *āgata* "come")
- the Greek prefix MW sets beside *su-* (*eu-*, as in *euphoria*)
- the English cousin of the root √gam (**come**)

Before you move on

Svāgatam literally means what, and name two of its far-flung cousins. ("Well come" = welcome; Greek *eu-* (beside *su-*) and English *come* (cousin of √gam).)

1.9 द — one character, met inside words you already say

Before the new one, one you have already met: न. Say what it does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: द

द — *da*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *d*, it is **da**.

What it is made of:

- a short top-to-bottom stem
- an outer body joined to an inward curl and down-right tail
- the top shirorekhā

You already say this word, and द is one of the shapes inside it — the rest of its shapes are still ahead of you, so here the character stands on its own:

- *dhanyavādaḥ* — thank you

Writing: द

How it is written — 2 strokes · 1 pen lift · 3 movements

Stroke order after Opiaterein, 'Deva-द-order.gif', strokes 1–3, Wikimedia Commons, 8 May 2009
This order is attested, not standardised; the source records where it varies.

How द is written, stroke by stroke

- **1.** draw the short stem top-to-bottom
- **2.** without lifting, sweep left through the upper shoulder and around the outer body, curl inward and clockwise through the loop, then continue down-right through the tail
- **3.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows three movements; most native writers draw द in two strokes (95% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

Name one word you already say that contains it.

1.10 आम् (ām) — "yes"

You can greet, thank, and welcome. Now the smallest reply of all.

The letters in this word

ām — one beat. A long *ā*, then the lips close on *m* with no vowel after it. Say it and stop.

The word, taken apart — its roots and family

Ām is an old Sanskrit particle of assent (MW). It lives on in the daughter languages' everyday "yes", with an *h-* added in front: Hindi and Marathi *hāṃ* (CDIAL 1235).

Why it's said this way

Classical Sanskrit, like Latin, leans on more than a bare "yes": one answers by echoing the verb, or with *ām*, *evam* ("so it is"), or *bāḍham* ("certainly"). The blunt yes/no habit of English is not universal — these old languages preferred to *say what they meant*. *Ām* is the plain agreement, and the one to reach for first.

Your turn

Say these aloud:

- yes — *ām*
- two other ways to agree (*evam* "so it is", *bāḍham* "certainly")
- what Sanskrit prefers to a bare yes (echoing the verb)

Before you move on

How do you say yes, and what does Sanskrit often do instead of saying it? (*Ām*; echo the verb, or answer with *evam* or *bāḍham*.)

1.11 न (na) — "no, not"

You have *ām*. Here is its opposite — and it may be the oldest thing in this whole book.

The letters in this word

na — one short beat, the *a* closer to English *cup* than to *car*.

The word, taken apart — its roots and family

Na ("no, not") you have already met wearing other clothes: it is Proto-Indo-European **ne* "not," **the same negative** as the Latin *nōn* of the last track, as English **no**, **not**, **none**, as German *nein*, and as Hindi *nahīṃ*. Of every word in this book, *na* may reach furthest unchanged — one syllable spoken, in some form, from Iceland to India for five thousand years.

Your turn

Say these aloud:

- yes and no — *ām* / *na*
- the English cousins of *na* (no, not, none)
- the Latin cousin you already know (*nōn*)

Before you move on

What is the ancient root of *na*, and name three of its living cousins. (PIE **ne* "not"; English *no/not/none*, Latin *nōn*, German *nein*, Hindi *nahīṃ* — any three.)

1.12 Chapter 1 — Practice and Recall

No new words — just the five, and the roots that reach both east and west.

Your turn

Say these aloud:

- hello, "a bow to you" — *namaste*
- hello, "the making of a bow" — *namaskāraḥ*
- thank you, "a saying of 'you are worthy'" — *dhanyavādaḥ*
- welcome, "well come" — *svāgatam*
- yes and no — *ām* / *na*

How to answer: the taproot both ways

Sanskrit points east *and* west. Trace each:

Say these aloud:

- which Sanskrit word do Hindi/Marathi/Punjabi/Bengali's greetings come from? (*namas* / *namaste*)
- which Greek prefix is *su-* "good" the twin of? (*eu-*)
- which English verb is the root √gam cousin to? (*come*)
- which Latin word (last track) is *na* cousin to? (*nōn*)

What you've built: the roots you now carry

- *namas* "a bow" → every Indo-Aryan hello; root √nam "to bend"

- *te* “to you” → English **thee**, Latin *tē*
- *su-* “good” → Greek **eu-** (euphoria, eulogy)
- √gam “come” → English **come**, Latin *venīre*
- *na* “not” → English **no/not/none**, Latin *nōn*, German *nein*

Before you move on

In 1786 Sir William Jones said Sanskrit, Latin, and Greek shared “a stronger affinity than could have been produced by accident.” Name two words from this chapter that show it. (Any two: *te*↔*thee*/*tē*, *su-*↔*eu-*, √gam↔*come*, *na*↔*nōn*.)

1.13 ◌् — one character, met inside words you already say

Before the new one, the ones you have already met: न · द. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you’ll notice: ◌्

◌् — *no sound of its own — it takes one away.*

It is a **vowel-killer**. Every consonant in this script arrives with an *a* already inside it — that is what an abugida is. This mark takes the *a* back, leaving the bare consonant. It is how the script writes two consonants in a row.

Where it sits: a stroke below that removes the inherent ’a’ and forms a conjunct with the next consonant.

Worked through: न + ◌् = न् — *n*.

You already say these words, and ◌् is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *namaste* — hello (lit. “a bow to you”)
- *namaskāraḥ* — hello (lit. “the making of a bow”)

- *dhanyavādaḥ* — thank you
- *svāgatam* — welcome (lit. “well come”)

Chapter 2

Introducing Yourself

Modes: **voice** (9) **eyes** (1) **pen** (4) **Hands-free start:** the first 2 of 14 lessons.

> ***By the end of this chapter:*** I can introduce myself in Sanskrit, give my name, and understand the other person's name.
>
> *Complete SA-C02-practice, the canonical closing checkpoint, and demonstrate the chapter promise: introduce myself in Sanskrit, give my name, and understand the other person's name; then choose between bhavān and tvam, ask a respected stranger's name, recall the roots behind the exchange, and pick out* आ, भ, ि *and* ः.

2.1 नाम (nāma) — "name," a word half the world shares

The first word of the introduction — and an old cousin of the word half the world uses.

The letters in this word

nā · *ma*. A long first beat and a short second — the two vowels English keeps apart in *father* and *sofa*.

The word, taken apart — its roots and family

nāma ("name," neuter) is from the stem *nāman*, from Proto-Indo-European ***h₃nomn-**. This is not a *borrowing* from anywhere — it is inherited: the same root surfaces as English **name**, Latin *nōmen* (→ **noun**, **nominate**), Greek *onoma*, and, worn down,

as Hindi *nām*, Bengali *nām*, Punjabi *nāṁ*. Sanskrit *nāma* is the ancestor of the Indian forms and a cousin of the European ones: one root that flowed to both Europe and modern India.

Your turn

Say these aloud:

- "nāma"
- its cousins west and its children east — English *name*, Latin *nōmen*; Hindi *nām*

Before you move on

What PIE root is *nāma* from, and name two of its descendants. (**h₃nomn-*; any two of English *name*, Latin *nōmen*, Greek *onoma*, Hindi *nām*.)

2.2 मम (mama) — "my," a cousin of *me* and *my*

The word that makes the name yours — and it shares its root with English *my*.

The letters in this word

ma · *ma*. Two identical short beats, evenly stressed.

The word, taken apart — its roots and family

mama ("my, of me") is the genitive of *aham* ("I"), on the first-person root **ma-**, from Proto-Indo-European ***me-**. The same PIE stem runs through the whole first-person family: English **me**, **my**, **mine**, Latin *meus*, Greek *emou*, and Hindi *merā*. Sanskrit *mama* and English *my* are not merely similar — they are built on the same ancient stem, one kept close to its old form, the other worn smooth by five thousand years.

Your turn

Say these aloud:

- "mama"
- the m- family — *mama* / English *me*, *my* / Latin *meus* / Hindi *merā*

Before you move on

What is *mama* the genitive of, and its English cousins? (*Aham*, "I"; English **me**, **my**, **mine**.)

2.3 ः — one character, met inside words you already say

Before the new one, the ones you have already met: न · द · ् . Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ः

ः — *ḥ*.

It is a **visarga**: not a letter, but a soft breathed *ḥ* at the end of a syllable. It is the mark that ends a great many Sanskrit masculine nouns, so it is worth knowing on sight.

Where it sits: a pair of dots to the right of the syllable, marking a voiceless post-vocalic breath.

Worked through: न + ः = नः — *naḥ*.

You already say these words, and ः is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *namaskāraḥ* — hello (lit. "the making of a bow")
- *dhanyavādaḥ* — thank you

Writing: ः — follow the numbered strip

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ः yourself — slowly, and larger than it is printed. The short bar above the dots stays grey in the strip: it is not part of the sign the writers drew, but the end of a printed word's headline.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Which character is this — ः? What does it add to the end of a syllable? (**A soft breathed *ḥ*.**) Name one word you already say that contains it.

2.4 अस्ति (asti) — "is," a cousin of *is* and *est*

The little verb "is" — and here you meet it in a form whose root is shared by half the "to be" words on earth.

The letters in this word

as · *ti*. The *s* closes the first beat; *ti* follows cleanly after it.

The word, taken apart — its roots and family

asti ("is") is the third-person singular of the root *as-* ("to be"), from Proto-Indo-European ***h₁es-**. The same root gives the family's copula elsewhere: English **is**, German *ist*, Latin *est*, Greek *esti*. Hindi *hai* is often linked to *asti*, but CDIAL puts Old Hindi *āhaï* "is" under a different verb, *ākṣeti* "dwells" (CDIAL 1031). Unlike Tamil and Bengali, which drop "is" in the present, Sanskrit *keeps* an explicit copula, built on the very root Europe kept too.

Your turn

Say these aloud:

- "asti"
- the family — *asti* / English *is* / Latin *est* / Greek *esti*

Before you move on

What root is *asti* from, and its cousins across the family? (*As-* / PIE **$h_1$es-*; English *is*, Latin *est*.)

2.5 मम नाम ... अस्ति (mama nāma ... asti) — "my name is..."

Three atoms you now own, assembled — and note that Sanskrit, unlike Tamil or Bengali, actually *says* the "is."

The word, taken apart — its roots and family

mama (my) + *nāma* (name) + your name + *asti* (is) = **mama nāma ... asti**, "my name is..." *Mama nāma Aruṇaḥ asti.* → "My name is Arun."

Grammar Lens: Sanskrit keeps the "is"

Where Tamil says only *eṉ peyar Arun* and Bengali *āmār nām Arun* — both dropping the verb (the zero copula) — Sanskrit says *mama nāma ... asti*, with an explicit *asti* ("is"). This is the Indo-European way, the one Latin and English kept too (*my name is ...*). The verb comes **last**, as in the modern Indian languages that descend from it. (In casual use *asti* can be dropped, but the "full-dress" Sanskrit sentence keeps it.)

Your turn

Say these aloud:

- "mama nāma ... asti" with your name
- how this differs from Tamil/Bengali (Sanskrit keeps the "is")

Before you move on

Give your name in Sanskrit, and say what it keeps that Tamil and Bengali drop. (*Mama nāma ... asti*; the copula *asti*, "is.")

2.6 आ — one character, met inside words you already say

Before the new one, the ones you have already met: द · ् · ः. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: आ

आ — *ā*.

It is an **independent vowel**: the full-size letter a vowel wears when it opens a word and has no consonant to lean on. Inside a word the same vowel is written as a small sign instead.

What it is made of:

- the joined upper-and-lower left body of *a*
- a middle shoulder running into the inner stem
- an inner vertical stem
- a trailing vertical stem
- the top shirorekhā

You already say this word, and आ is one of the shapes inside it — the rest of its shapes are still ahead of you, so here the character stands on its own:

- *ām* / *na* — yes / no

Writing: आ

How आ is written, stroke by stroke

- **1.** curve around the upper bowl, then continue down and around the lower bowl without lifting
- **2.** lift and sweep the middle shoulder right

- **3.** without lifting, climb up the inner stem to the headline
- **4.** descend the inner stem top-to-bottom
- **5.** lift and draw the trailing stem top-to-bottom
- **6.** lift and draw the top shirorekhā left-to-right

Pen lifts: 3. The pen comes up 3 times and no more.

The source shows five movements; most native writers draw आ in four strokes (71% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts three times: the shoulder runs on up the inner stem and back down it.

2.7 भवान् (bhavān) — the respectful "you"

To ask someone's name you need a word for "you" — and for a first meeting, Sanskrit reaches for the polite one.

The letters in this word

bha · vān. The *bh* is one sound — a *b* released with breath behind it. The second beat carries a long *ā* and closes on *n*.

The word, taken apart — its roots and family

Bhavān ("you," respectful) is not really a second-person word at all: it is a third-person honorific — "your honour," from *bhavat* ("being, present," of the root √bhū "be") — and so it takes a *third-person* verb (*bhavān asti*, "your honour is"). For a first meeting, use *bhavān*.

Grammar Lens: politeness by grammatical person

Where Hindi and Punjabi make respect *plural* (*āp … haiṁ*), Sanskrit makes it *third-person*: to be polite you address someone as though speaking *about* them — "is your honour well?" rather than "are you well?" Different trick, same courtesy.

Your turn

Say these aloud:

- the respectful "you" — *bhavān*
- what it literally means (your honour)
- why it takes a third-person verb (it speaks *about* the person)

Before you move on

How does Sanskrit build respect into "you," and how does Hindi do it instead? (Sanskrit uses a third-person honorific, *bhavān* "your honour"; Hindi uses a plural, *āp*.)

2.8 त्वम् (tvam) — the familiar "you"

The other "you" — the one you use with friends, and a cousin of English *thou*.

The letters in this word

tvam — one beat. The *tv-* is a single push, *t* and *v* said together, and then the lips close on *m*.

The word, taken apart — its roots and family

Tvam (familiar "you") is from Proto-Indo-European **tū* — the direct ancestor of English archaic **thou**, Latin *tū*, French *tu*, and Hindi *tū*. Unlike *bhavān*, it takes an ordinary second-person verb. Its possessive is *tava* ("your"), which you will need in the very next question.

Your turn

Say these aloud:

- both words for you — *tvam* (familiar), *bhavān* (respectful)
- the English cousin of *tvam* (**thou**)
- which one you would use on a first meeting (*bhavān*)

Before you move on

What English word is *tvam* cousin to, and what is its possessive form? (Archaic **thou**; *tava* "your.")

2.9 किम् (kim) — "what," the source of the question-words

The question-word — and a cousin of a whole family of "wh-" words in the west.

The letters in this word

kim — one short beat, closing on *m* with no vowel after it.

The word, taken apart — its roots and family

kim ("what") is from the interrogative stem *ka-*, from Proto-Indo-European ***k^{w}o-** — the ancestor of the whole question-family: English **what**, **who**, **which**, Latin *quis* / *quid*, Greek

tis, and Hindi *kyā* / *kaun*. Sanskrit's own questions all grow from this *ka-*: *kim* (what), *kaḥ* (who), *kadā* (when), *kutra* (where), *katham* (how). Its PIE ancestor is the single seed from which both Europe's *qu-/wh-* words and India's *k-* words grew.

Your turn

Say these aloud:

- "kim"
- the ka- family — *kim, kaḥ, kadā, kutra, katham*
- its western cousins (English *what*, Latin *quis*)

Before you move on

What PIE root is *kim* from, and its cousins? (*$*k^w o$-; English *what*, Latin *quis*, Hindi *kyā*.)

2.10 भ — one character, met inside words you already say

Before the new one, the ones you have already met: ् · ः · आ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: भ

भ — *bha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *bh*, it is **bha**.

What it is made of:

- a clockwise upper loop joined to a descending trunk
- a clockwise lower bowl continuing through a rightward crossbar
- a top-to-bottom right stem

- the top shirorekhā

You already say this word, and भ is one of the shapes inside it — the rest of its shapes are still ahead of you, so here the character stands on its own:

- *bhavān / tvam* — you

Writing: भ

How भ is written, stroke by stroke

- **1.** start at the upper loop's lower inner tip, sweep left and clockwise around the upper loop, descend the joined trunk, curl clockwise around the lower bowl, and continue right through the crossbar without lifting
- **2.** without lifting, climb up the right stem to the headline
- **3.** descend the right stem top-to-bottom
- **4.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows three movements; most native writers draw भ in two strokes (72% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: JackPotte, 'Devanagari b^h भ.gif', strokes 1–3, Wikimedia Commons, 29 March 2009.

Your turn

- *Look:* at this, and find भ in it

  भ

- *Trace it:* भ three times, saying *bha* as you finish each one
- *Look:* back at any page of this chapter and find भ once more

Before you move on

Which character is this — भ? What sound does it carry? (***bha***.) Name one word you already say that contains it.

2.11 तव नाम किम्? (tava nāma kim?) — "what's your name?"

Turn the introduction around — ask, instead of tell.

The word, taken apart — its roots and family

tava ("your," the genitive of *tvam*) + *nāma* (name) + *kim* (what) → "**your name what?**" Here Sanskrit often *drops* the *asti*: *tava nāma kim?* stands complete, the question-word alone doing the work. *Tava* comes from the same inherited second-person stem as *tvam*, the stem behind Latin *tū* and English *thou*; *kim* is built on the old question stem *ka-* (MW).

Grammar Lens: the respectful version

Tava ("your") is the familiar form, matching *tvam*. To a respected stranger, use the honorific: *bhavataḥ nāma kim?* (*bhavataḥ*, "of your honour"). Note *mama* / *tava* / *bhavataḥ* — "my / your / your-honour's" — all built the same way, as genitives.

Your turn

Say these aloud:

- the familiar question — *tava nāma kim?*

- the respectful version — *bhavataḥ nāma kim?*
- answer it — *mama nāma … asti*

Before you move on

Ask "what's your name?" respectfully, and give the "my/your" pair. (*Bhavataḥ nāma kim?*; *mama* "my" / *tava* "your.")

2.12 आनन्दः (ānandaḥ) — "joy," and "a joy to meet you"

The warm close of an introduction — a word so full it names bliss itself.

The letters in this word

ā · *nan* · *daḥ*. Long *ā* to open, *nd* said together in the middle, and the soft breathed *-ḥ* to close.

The word, taken apart — its roots and family

To say "pleased to meet you," Sanskrit can say *bhavantaṁ dṛṣṭvā ānandaḥ* — "**seeing you, [there is] joy**." The key word *ānandaḥ* ("joy, bliss, delight") is from *ā-* ("fully") + the root *nand* ("to rejoice"). It is one of Sanskrit's most beloved words — the *ānanda* of *sat-cit-ānanda* ("being-consciousness-bliss"), and the name **Ānanda**, the Buddha's devoted disciple. So a simple greeting reaches for the word Indian thought uses for the deepest happiness.
The noun is built on the root √nand "to rejoice" with the prefix *ā-*, and it is already in the Rigveda (MW, CDIAL 1172).

Your turn

Say these aloud:

- "ānandaḥ"
- the full phrase — *bhavantaṁ dṛṣṭvā ānandaḥ*
- where else *ānanda* appears (bliss; the name Ānanda)

Before you move on

What does *ānandaḥ* mean, and what is it built from? ("Joy, bliss"; *ā-* "fully" + *nand* "to rejoice.")

2.13 ि — one character, met inside words you already say

Before the new one, the ones you have already met: ः · आ · भ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ि

ि — *i*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: a curl placed BEFORE (to the left of) the consonant, though pronounced after.

Worked through: न + ि = नि — *ni*.

You already say these words, and ि is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *asti* — is
- *mama nāma … asti* — my name is…
- *kim* — what
- *tava nāma kim?* — what's your name?

Writing: ि — copy what you see

Put your pen on ि and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this, and find ि in it

  ि

- *Trace it:* ि three times, saying *i* as you finish each one
- *Look:* back at any page of this chapter and find ि once more

Before you move on

Which character is this — ि? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *i* on; takes the built-in *a* off.**) Name one word you already say that contains it.

2.14 Chapter 2 — the whole exchange

No new words. Two people meet, and every word in the exchange is one you already have.

The exchange

Say these aloud:

- *mama nāma mīrā asti.* — "My name is Mira."
- *tava nāma kim?* — "What's your name?"
- *mama nāma aruṇaḥ asti.* — "My name is Arun."
- *bhavantaṁ dṛṣṭvā ānandaḥ.* — "Pleased to meet you."

How to answer: the atoms

Say these aloud:

- name, my, is, what (*nāma*, *mama*, *asti*, *kim*)
- where the verb sits in the sentence (last)
- whether Sanskrit drops the "is" (no — it keeps an explicit copula)

Your turn — the two "you"s and the roots

Say these aloud:

- both words for "you" (*bhavān*, respectful, "your honour"; *tvam*, familiar, cousin of **thou**)
- why *bhavān* takes a third-person verb (it speaks *about* the person)
- "what's your name?" to a respected stranger (*bhavataḥ nāma kim?*)
- the PIE roots of *nāma*, *asti* and *kim* (**$h_3$nomn-*; **$h_1$es-*; **k^wo-*)
- what *mama* is the genitive of (*aham*, "I")
- what *ānandaḥ* is built from (*ā-* "fully" + *nand* "to rejoice")

Script — the chapter's four shapes

भ · ि · आ · ः

- *Point to:* *ā*, then *bha*, then the *i*-sign, then *ḥ* — out of their printed order
- *Say it:* what each does (आ, *ā* opening a word; भ, *bha*, its *a* built in; ि, puts *i* on a consonant and takes its *a* off; ः, a soft breathed *ḥ* closing a syllable)

What you've built: every atom is a source

Every word in that exchange is inherited, not borrowed, and each is a *cousin* of words you know:

- *nāma*: English **name**, Latin *nōmen*
- *mama*: English **my**, **me**

- *asti*: English **is**, Latin *est*
- *kim*: English **what**, Latin *quid*

And Sanskrit keeps the copula that its Dravidian neighbours drop. Next chapter: *bhavān katham asti?* — "how are you?"

Before you move on

Give your name in Sanskrit, ask for someone else's, and name two English cousins of this chapter's vocabulary. (*Mama nāma … asti; tava nāma kim?*; any two of **name**, **my**, **is**, **what**.)

Chapter 3

How Are You?

Modes: 🚗 **voice** (6) 👁 **eyes** (1) ✓ **pen** (12) 🚗 **Hands-free start:** the first 2 of 19 lessons.

> ***By the end of this chapter:*** I can ask how someone is in Sanskrit, answer naturally, and return the question.
>
> *Complete SA-C03-practice, the canonical closing checkpoint, and demonstrate the chapter promise: ask how someone is in Sanskrit, answer naturally, and return the question; then recall where katham, aham, kuśalam and cintā come from, why aham can drop, and pick out म and ा.*

3.1 कथम् (katham) — "how," another of the ka-questions

You met *kim* ("what") in Chapter 2. Here is its sibling in the question-family.

The letters in this word

ka · tham. The *th* is one sound — a *t* with breath after it, never the *th* of English *thin.*

The word, taken apart — its roots and family

katham ("how, in what way") is from the interrogative stem *ka-*, PIE ***k^{w}o-** — the same root that gave *kim* and, in the west, English **wh-** and Latin *qu-*. It heads the same *ka-* question-family: *kim* (what), *kaḥ*

(who), *kadā* (when), *kutra* (where), *katham* (how). From *katham* comes the abstract noun *kathā* ("a telling, a story" — "the how of a thing"). Hindi's *kaise* looks like its descendant but comes from *kīdṛśa*, "of what kind" (CDIAL 3197).

Your turn

Say these aloud:

- "katham"
- the ka- question family — *kim, kaḥ, kadā, kutra, katham*

Before you move on

What root do Sanskrit's question-words share, and its western cousins? (The interrogative *ka-*, PIE $*k^w o$-; English *wh-*, Latin *qu-*.)

3.2 भवान् कथम् अस्ति? (bhavān katham asti?) — "how are you?"

Three words you own, assembled into the first thing you ask after hello.

The word, taken apart — its roots and family

bhavān katham asti? = *bhavān* (respectful "you") + *katham* ("how") + *asti* ("is") — literally "**your honour how is?**" Recall from Chapter 2 that *bhavān* ("your honour") takes a **third-person** verb — so it is *asti* ("is"), not "are." The familiar version uses *tvam* and the second-person verb: *tvaṁ katham asi?* (*asi*, "you are").

Grammar Lens: the copula, three persons

You now hold the "to be" verb across persons: *asmi* ("I am"), *asi* ("you are"), *asti* ("is") — the cousins, respectively, of English **am**, and of English *is* and Latin *est*. "How are you?" simply asks after a *state*, and Sanskrit, unlike Tamil, has always kept a verb for it.

Your turn

Say these aloud:

- the respectful question — *bhavān katham asti?*
- the familiar version — *tvaṁ katham asi?*
- the copula trio — *asmi* (am), *asi* (are), *asti* (is)

Before you move on

Why is it *asti* ("is") with *bhavān*, and what are the three copula forms? (*Bhavān* = "your honour," a 3rd-person subject; *asmi/asi/asti* — am / you are / is.)

3.3 ा — one character, met inside words you already say

Before the new one, the ones you have already met: आ · भ · ि. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ा

ा — *ā*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: a vertical bar to the right of the consonant.

Worked through: न + ा = ना — *nā*.

You already say these words, and ा is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *namaskāraḥ* — hello (lit. "the making of a bow")
- *dhanyavādaḥ* — thank you
- *svāgatam* — welcome (lit. "well come")
- *nāma* — name

Writing: ◌ा — follow the numbered strip

How ◌ा is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ◌ा yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at this, and find ◌ा in it

  ◌ा

- *Trace it:* ◌ा three times, saying *ā* as you finish each one
- *Look:* back at any page of this chapter and find ◌ा once more

Before you move on

Which character is this — ◌ा? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ā* on; takes the built-in *a* off.**) Name one word you already say that contains it.

3.4 अहम् (aham) — "I," a cousin of *ego* and *I*

To answer "how are you?" you first need "I" — and it is a cousin of both English *I* and the word *ego*.

The letters in this word

a · *ham*. Two short beats, closing on *m*.

The word, taken apart — its roots and family

aham ("I") is from Proto-Indo-European ***h$_1$eǵ(H)om** — the direct ancestor of Latin **ego** (whence English *ego*, *egotist*), Greek *egō*, and, worn all the way down, English **I** itself. So Sanskrit *aham*, Latin *ego*, and English *I* are one word across three continents of time. Its possessive is the *mama* ("my") from Chapter 2 — and, curiously, "I" (*aham*) and "my" (*mama*) come from *different* ancient roots (**eǵ-* and **me-*), a quirk Sanskrit shares with English (*I* vs. *my/me*).

Grammar Lens: "I" can be dropped

Sanskrit verbs carry the person in their ending — *asmi* already means "**I** am" — so *aham* is often left out. You still learn it first, because the answer to *katham asi?* begins with it.

Your turn

Say these aloud:

- "aham"
- the family — *aham* / Latin *ego* / English **I**
- the odd pair — "I" (*aham*, root **eǵ-*) and "my" (*mama*, root **me-*) differ, as in English *I* vs. *my*

Before you move on

What PIE root is *aham* from, and its cousins? (**h_1eǵ(H)om*; Latin *ego*, English **I**.)

3.5 कुशलम् (kuśalam) — "well-being"

The word that answers "how are you?" — and an old word whose origin is still not settled.

The letters in this word

ku · *śa* · *lam*. The *ś* is the *sh* of *ship*. Three short beats, closing on a bare *m*.

The word, taken apart — its roots and family

Kuśalam ("well-being, welfare, all-being-well") is native Sanskrit, and its origin is not settled: CDIAL 3365 calls the one modern derivation it cites "very doubtful". A popular explanation takes it from *kuśa* (the sacred grass) + a root of "cutting", "skilled at gathering the grass", hence "well"; but no dictionary we checked (MW, Apte, CDIAL) supports that story. Its senses run from "right, proper" to "skilful" and "healthy" (MW). Its adjective is *kuśalī* ("one who is well").

Your turn

Say these aloud:

- well-being — *kuśalam*
- its adjective (*kuśalī*, "one who is well")
- whether its origin is known (no; the *kuśa*-grass story is only a popular explanation)

Before you move on

What does *kuśalam* mean, and is its origin known? ("Well-being"; not settled, and the *kuśa*-grass story has no dictionary support.)

3.6 म — one character, met inside words you already say

Before the new one, the ones you have already met: भ · ि · ा. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: म

म — *ma*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *m*, it is **ma**.

What it is made of:

- a top-to-bottom left stem joined to a clockwise lower loop and rightward crossbar
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has म somewhere inside it:

- आम् / न *ām* / *na* — yes / no
- नाम *nāma* — name
- मम *mama* — my

Writing: म

How it is written — 2 strokes · 1 pen lift · 4 movements

Stroke order after JackPotte, 'Devanagari m 93 28.gif', strokes 1–3, Wikimedia Commons, 29 March 2009
This order is attested, not standardised; the source records where it varies.

How म is written, stroke by stroke

- **1.** descend the left stem, curl left and clockwise around the lower loop, and continue right through the crossbar without lifting
- **2.** without lifting, climb up the right stem to the headline
- **3.** descend the right stem top-to-bottom
- **4.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows three movements; most native writers draw म in two strokes (80% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: JackPotte, 'Devanagari m म.gif', strokes 1–3, Wikimedia Commons, 29 March 2009.

Your turn

- *Look:* at this, and find म in it

  आम् / न · नाम · मम

- *Trace it:* म three times, saying *ma* as you finish each one
- *Look:* back at any page of this chapter and find म once more

Before you move on

Which character is this — म? What sound does it carry? (***ma***.) Name one word you already say that contains it.

3.7 मम — one known letter becomes one known word

Say मम — "my." Point to its two equal parts: म + म. Nothing here is new vocabulary, and no new shape is hiding in the word.

Writing — guided copy

How मम *is written, letter by letter, then one headline, stroke by stroke*

Keep मम visible and follow the numbered strip: write the body of the first म, then the body of the second, and only then draw one **śirorekhā** left to right across both, so the word hangs from one line. Most native writers leave the headline for last; some draw it first.

Read what you wrote: मम, "my." Two copies of *ma* make *mama*; neither consonant needs a separate vowel sign because each carries its short *a*.

Before you move on

How many written syllables did the word need? (**Two:** म + म**.**)
What made the two letters look like one word? (**Their joined headline.**)

3.8 मम — hide the word, then write it

Look at मम for five seconds. Find the two copies of म and the headline that joins them. Then cover the word.

Writing — delayed copy

How मम is written, letter by letter, then one headline, stroke by stroke

Wait ten seconds. With the model still covered, write the word meaning "my." There is no tracing guide and no romanized answer to copy.

Only after the word is complete, uncover मम. Compare three things in order: two equal letter bodies, two right stems, and one joined headline. Repair only the first difference you find.

Before you move on

Read the repaired word once and give its meaning. (मम — **"my."**)

3.9 One heard word — write "my"

Cover every answer below this line. You will hear one familiar Sanskrit word. There is no visible Devanagari model and no romanized answer.

Writing — word dictation

Hear: the Sanskrit word meaning "my"

Write the word from sound and meaning alone. Stop after one attempt. Now uncover and compare: मम. If needed, repair one letter body, one stem, or the joined headline — only the first difference.

Before you move on

The hand has now moved from one dictated syllable, न, to a whole known word, मम. Say the word once as you read your answer.

3.10 अहं कुशली अस्मि (ahaṁ kuśalī asmi) — "I am well"

You have the question and you have the word. Now put the answer together.

The letters in this word

a · haṁ · ku · śa · lī · as · mi. The *ṁ* is a hum through the nose that colours the vowel before it rather than a full *m*; the *ī* in the fifth beat is long.

The word, taken apart — its roots and family

Ahaṁ kuśalī asmi — "**I am well**": *aham* ("I") + *kuśalī* ("well") + *asmi* ("am"). Or simply *kuśalam* ("[all is] well"). The exchange:

> — *bhavān katham asti?* ("How are you?") — *ahaṁ kuśalī asmi, dhanyavādaḥ.* ("I am well, thank you.")

Grammar Lens: *asmi* is the "I" form of "to be"

Asti was "is." *Asmi* is "am" — the same verb wearing its first-person ending *-mi*. That *-mi* is the mark of "I" all through the Sanskrit verb, and you will meet it again on every verb in the next chapter.

Your turn

Say these aloud:

- the question — *bhavān katham asti?*
- the full reply — *ahaṁ kuśalī asmi, dhanyavādaḥ*
- the ending that means "I" (*-mi*, as in *asmi*)

Before you move on

Give the reply to *bhavān katham asti?*, and say which ending marks "I." (*Ahaṁ kuśalī asmi*; the ending *-mi*.)

3.11 मम नाम — two known words, one visible phrase

Read मम नाम — “my name.” Both words and every shape are already familiar. Leave one ordinary word space between them.

Writing — guided phrase copy

How मम नाम *is written, word by word, each with its own headline, stroke by stroke*

Keep the phrase visible and follow the numbered strip, one word at a time.

1. Write मम: the body of each म, then one headline across the word.
2. Leave one word space.
3. Write नाम: न, the stem of ा, then म, and last one headline across the word.

The vowel sign changes *na* to *nā*; it does not begin a separate letter. Most native writers leave the headline for last; some draw it first. Read the finished phrase once: मम नाम, “my name.”

Before you move on

Which sign makes the long vowel in नाम? (ा, attached to न.) Where does the pen leave a visible gap? (**Between the two words.**)

3.12 मम नाम — hide the phrase, keep its two-word shape

Look at मम नाम for five seconds. Point to the word space and to ा. Then cover the model.

Writing — delayed phrase copy

How मम नाम *is written, word by word, each with its own headline, stroke by stroke*

Wait ten seconds. Write “my name” in Sanskrit with no visible answer and no romanization. Keep the two words apart, but join the headline within each word.

Only after the phrase is complete, uncover मम नाम. Compare meaning order, word space, letters, and vowel sign in that order. Repair only the first difference.

Before you move on

Read the phrase once. Which word came first? (मम, "my.")

3.13 Two heard words — write "my name"

Cover every answer below this line. You will hear a familiar two-word fragment. There is no visible Devanagari model and no romanized answer.

Writing — phrase dictation

Hear: the Sanskrit phrase meaning "my name"

Write the two words from sound and meaning alone. Stop after one attempt. Now uncover and compare: मम नाम. Check meaning order, the one word space, and the long-vowel sign in नाम. Repair only the first difference.

Before you move on

The runway now reaches a two-word phrase. It does not yet reach a full introduction: अस्ति, names, punctuation, and connected text remain later rungs, after their shapes are taught and recalled in order.

3.14 नमः — the known bow, now ending in a visible breath

Say the first half of *namaste*: *namas*, "a bow, a salutation." That meaning is already yours. Said by itself at a pause, its final *s* appears as the visarga: *namaḥ*. This is the same known word, not new vocabulary.

Writing — guided visarga copy

Keep नमः visible and copy it once.

1. Write न, then म, joining their headline into one word.
2. Put ः to the right of the final syllable. Its two dots do not join the headline.

3. Read the result aloud: *na-ma-ḥ* — "a bow, a salutation."

The page now shows all three things the ear hears: न + म + ः.

Before you move on

Which mark carries the final breath? (ः, the visarga.) Is *namaḥ* a new word here? (**No. It is the known *namas* from *namaste*, said at a pause.**)

3.15 नमः — hide the word, keep the final breath

Look at नमः for five seconds. Point to न, म, and the visarga ः. Say *namaḥ*, "a bow, a salutation." Then cover the model.

Writing — delayed visarga copy

Wait ten seconds. Write the known word with no visible answer and no romanization. Keep नम beneath one headline and place the two visarga dots to its right.

Only after the word is complete, uncover नमः. Compare the two letters, their order, and the final mark. Repair only the first difference.

Before you move on

Read what you wrote. Which known piece of *namaste* did you recover? (***Namas***, "a bow," in its pause form *namaḥ*.)

3.16 A heard bow — write the visarga from sound and meaning

Cover every answer below this line. You will hear the familiar word meaning "a bow, a salutation," the first half of *namaste*, now said by itself. There is no visible Devanagari model and no romanized answer.

Writing — visarga dictation

Hear: namaḥ — "a bow, a salutation"

Write the word from sound and meaning alone. Stop after one attempt. Now uncover and compare: नमः. Check न, म, and the final visarga in that order. Repair only the first difference.

Before you move on

The runway now carries a Sanskrit-specific mark from recognition to independent transcription. Which later debts remain? (**Vocalic ṛ, conjuncts, connected text, and independent recall across a longer passage.**)

3.17 न चिन्ता (na cintā) — "no worry"

When someone thanks you, this gentle reply says, simply, "don't give it a thought."

The letters in this word

na cin · tā. The *c* is the *ch* of *church*, never a *k*; the final *ā* is long.

The word, taken apart — its roots and family

Na cintā literally means "**[there is] no worry / no anxiety**" — used for "never mind / no trouble / you're welcome." Two atoms: *na* ("not"), the ancient negative from Chapter 1 — PIE ***ne**, behind English **no**, **not**, Latin *nōn*, and every Indo-Aryan "no." And *cintā* ("anxious thought"), from the root *cint* ("to think, ponder") — the same *cintā* borrowed into Hindi and Urdu (*cintā mat karo*, "don't worry"). So the reply pairs the family's oldest negative with a verb of thinking: "think nothing of it."

Your turn

Say these aloud:

- "na cintā"
- its two atoms (*na* "not" + *cintā* "worry")
- the exchange — *dhanyavādaḥ* / *na cintā*

Before you move on

What does *na cintā* literally say, and what is its negative *na* cousin to? ("No worry"; PIE **ne* — English *no/not*, Latin *nōn*.)

3.18 Chapter 3 — The how-are-you exchange

No new words. The whole responding cycle, from atoms you now own.

The exchange

Say these aloud:

- "How are you?" (respectful) — *bhavān katham asti?*
- "I am well, thank you." — *ahaṁ kuśalī asmi, dhanyavādaḥ.*
- "No worry / you're welcome." — *na cintā.*
- the familiar question — *tvaṁ katham asi?*

How to answer: the atoms

Say these aloud:

- the ka- question-word for "how" (*katham*)
- "I" and the copula trio (*aham*; *asmi/asi/asti*)

Your turn — where the words come from

Say these aloud:

- the stem *katham* shares with *kim*, and its western cousins (*ka-*, PIE **k^{w}o-*; English *wh-*, Latin *qu-*)
- the cousins of *aham* (Latin *ego*, English **I**)
- why *aham* is often left out, and the ending that marks "I" (*asmi* already means "I am"; *-mi*)
- whether the origin of *kuśalam* is known (not settled; the *kuśa*-grass story is only a popular explanation)
- what *cintā* is, and its root (anxious thought; *cint*, "to think")

Script — the chapter's two shapes

◌ा · म

- *Point to: ma*, then the *ā*-sign
- *Say it:* what each does, and a word with both (म, *ma*, its *a* built in; ◌ा, a bar to the right that puts *ā* on and takes the *a* off; *nāma*)

What you've built: the roots you now carry

- *katham* ← the interrogative *ka-* (PIE **k^{w}o-*) → English *how/what*, Latin *qu-*
- *aham* ← **h$_1$eǵ(H)om* → Latin **ego**, English **I**
- *asmi* ← **h$_1$es-* → English **am**; *asti* → *is*, *hai*
- *na* (in *na cintā*) ← **ne* → English *no/not*, Latin *nōn*

Before you move on

A respected stranger asks *bhavān katham asti?* — give a full reply, and answer their thanks. (*Ahaṁ kuśalī asmi, dhanyavādaḥ* — and to thanks, *na cintā*.)

3.19 ◌ु — one character, met inside words you already say

Before the new one, the ones you have already met: ◌ि · ◌ा · म. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ◌ु

◌ु — *u*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: a small hook below the consonant.

Worked through: न + ु = नु — *nu*.

You already say this word, and ु is one of the shapes inside it — the rest of its shapes are still ahead of you, so here the character stands on its own:

- *kuśalam* — well-being

Writing: ु — follow the numbered strip

How it is written — one unbroken stroke · 3 movements

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Devanagari recognizer, class 50 (u sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ु is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ु yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at this, and find ु in it

  ु

- *Trace it:* ु three times, saying *u* as you finish each one
- *Look:* back at any page of this chapter and find ु once more

Before you move on

Which character is this — ◌ु? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *u* on; takes the built-in *a* off.**) Name one word you already say that contains it.

Chapter 4

Farewells

Modes: **voice** (4) **eyes** (1) **pen** (2) **Hands-free start:** the first 2 of 7 lessons.

> ***By the end of this chapter:*** I can end a Sanskrit conversation politely and choose a farewell that fits the situation.
>
> *Complete SA-C04-practice, the canonical closing checkpoint, and demonstrate the chapter promise: end a Sanskrit conversation politely and choose a farewell that fits the situation; then unpack punar-darśanāya and śvaḥ, and pick out* र *and* प*.*

4.1 गच्छामि (gacchāmi) — "I go" (taking leave)

Sanskrit has no casual "bye." Like its daughters, it takes leave by saying "I go" — and the verb is a cousin of English *come*.

The letters in this word

gac · chā · mi. Both *c* sounds are the *ch* of *church*, and the doubling is real — hold it a moment longer than one *ch*.

The word, taken apart — its roots and family

gacchāmi ("I go") is from the root *gam* ("to go") — the very root you met in Chapter 1's *svāgatam* (= *su* + *āgata*, "well come," from *ā* + *gam*). That root is Proto-Indo-European ***g^{w}em-**, the ancestor of English **come** (and, via Latin *venīre*, of *venue*, *convene*). To leave politely one says *gacchāmi* ("I go") or, more gracefully, *āgacchāmi* ("I [shall] come [back]") — the same "promise of return" the modern

languages kept.

Your turn

Say these aloud:

- "gacchāmi" — I go
- the root and its Chapter-1 cousin (*gam*; *svāgatam*, "well come")
- the English cousin of *gam* (**come**)

Before you move on

How does Sanskrit take leave, and what root is *gacchāmi* from? (By saying "I go," *gacchāmi*; the root *gam*, PIE $*g^w em$-, cousin of English **come**.)

4.2 पुनः (punaḥ) — "again," the seed of "till we meet again"

One small word turns a leave-taking into a promise of return.

The letters in this word

pu · *naḥ*, closing on the soft breathed -*ḥ*. Before certain following sounds that breath turns into an *r*: *punar*-.

The word, taken apart — its roots and family

punaḥ ("again, back, once more") is a native Sanskrit adverb (its combining form is *punar*-, as in *punar-janma*, "rebirth" — "birth again"). It has no tidy single English cognate, but its work is one English shares: it turns a parting into "see you **again**." Add it to *darśana* ("seeing") and you get the graceful Sanskrit farewell of the next lesson.
Its deeper origin is not settled: MW gives no outside cousin for it. It lives on as Hindi *pun* "again" and as Gujarati and Marathi *paṇ* "but, also" (CDIAL 8273).

Your turn

Say these aloud:

- "punaḥ"
- its combining form and a word from it (*punar-*; *punarjanma*, "rebirth")

Before you move on

What does *punaḥ* mean, and what is its combining form? ("Again"; *punar-*, as in *punarjanma*, "rebirth.")

4.3 र — one character, met inside words you already say

Before the new one, the ones you have already met: ा · म · ु. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: र

र — *ra*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *r*, it is **ra**.

What it is made of:

- a top-to-bottom stem curling clockwise around the lower loop
- a diagonal tail
- the top shirorekhā

You already say this word, and र is one of the shapes inside it — the rest of its shapes are still ahead of you, so here the character stands on its own:

- *namaskāraḥ* — hello (lit. "the making of a bow")

Writing: र

How it is written — 2 strokes · 1 pen lift · 3 movements

Stroke order after Opiaterein, 'Deva-र-order.gif', strokes 1–3, Wikimedia Commons, 10 May 2009
This order is attested, not standardised; the source records where it varies.

How र is written, stroke by stroke

- **1.** start at the headline junction, descend the stem, and curl left and clockwise around the lower loop to the tail junction
- **2.** without lifting, draw the diagonal tail down-right
- **3.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows three movements; most native writers draw र in two strokes (96% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Opiaterein, 'Deva-र-order.gif', strokes 1–3, Wikimedia Commons, 10 May 2009.

Your turn

- *Look:* at this, and find र in it

  र

- *Trace it:* र three times, saying *ra* as you finish each one
- *Look:* back at any page of this chapter and find र once more

Before you move on

Which character is this — र? What sound does it carry? (***ra***.)
Name one word you already say that contains it.

4.4 पुनर्दर्शनाय (punar-darśanāya) — "until we meet again"

The graceful Sanskrit goodbye — "for the sake of seeing [you] again."

The letters in this word

pu · *nar* · *dar* · *śa* · *nā* · *ya*. Six even beats; *ś* is the *sh* of *ship*; the long *ā* falls in the fifth.

The word, taken apart — its roots and family

punardarśanāya = *punar* ("again") + *darśana* ("seeing, sight, vision") in the **dative** case (*-āya*, "for the sake of") — literally "**for seeing [you] again**," i.e. "until we meet again." The word *darśana* is deep: it is "seeing" in the sense of *beholding* — the *darśan* one takes of a deity or a revered person, and the name of the six *darśanas*, the schools of Indian philosophy ("ways of seeing"). So this farewell promises not just a meeting but a *beholding* to come.
Darśana is built on the root √dṛś "to see" (CDIAL 6208), and MW records the whole phrase *punar-darśanāya* as a farewell in classical drama.

Grammar Lens: the dative "for the sake of"

The ending *-āya* is the dative singular — "to / for." *Darśana* (a seeing) → *darśanāya* (for a seeing). You will meet the cases one at a time; this is your first, the "for-the-purpose-of" case.

Your turn

Say these aloud:

- "punar-darśanāya"
- its literal meaning ("for seeing [you] again")
- what *darśana* means beyond "seeing" (a beholding; the *darśan* of a deity)

Before you move on

What does *punar-darśanāya* literally mean, and what case gives the "for"? ("For seeing again"; the dative *-āya*.)

4.5 श्वः (śvaḥ) — "tomorrow"

A goodbye with a date on it — and a word that, unlike Hindi's *kal*, means only one day.

The letters in this word

śvaḥ — one beat: the *sh* of *ship* pushed straight into *v*, then the soft breathed *-ḥ*.

The word, taken apart — its roots and family

śvaḥ ("tomorrow") is already in the Rigveda (MW); its deeper origin is not settled, though EtymDB sets Latin *crās* "tomorrow" beside it. Where the modern Indian languages muddle "tomorrow" and "yesterday" into one word (Hindi *kal*, Bengali *kāl*, from *kalya* "dawn, tomorrow", itself built on *kāla* "time", CDIAL 3104), classical Sanskrit kept them **separate and precise**: *śvaḥ* is "tomorrow" and *hyaḥ* is "yesterday" — two distinct words. "See you tomorrow" is *śvaḥ punar-darśanam* ("tomorrow, a seeing-again") or *śvaḥ drakṣyāmi*

("tomorrow I shall see [you]").

Grammar Lens: Sanskrit's precision

That the daughters let a single *kal* (from *kalya*) cover both days is a small window into language change: the modern tongues traded precision for economy, letting tense carry the load. Sanskrit, the older layer, still keeps the two days apart.

Your turn

Say these aloud:

- "śvaḥ" (tomorrow) and "hyaḥ" (yesterday)
- "see you tomorrow" — *śvaḥ punar-darśanam*
- how this differs from Hindi/Bengali *kal* (Sanskrit keeps the two days distinct)

Before you move on

What does *śvaḥ* mean, and how does Sanskrit differ from Hindi here? ("Tomorrow"; Sanskrit keeps *śvaḥ* "tomorrow" and *hyaḥ* "yesterday" separate, where Hindi merges them into *kal*.)

4.6 प — one character, met inside words you already say

Before the new one, the ones you have already met: म · ु · र. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: प

प — *pa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *p*, it is **pa**.

What it is made of:

- a left stem curving around the lower bowl to its upper-right junction
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has प somewhere inside it:

- पुनः *punaḥ* — again

Writing: प

How प is written, stroke by stroke

- **1.** descend the left stem, then curve right around the lower bowl and rise to its upper-right junction
- **2.** without lifting, climb up the right stem to the headline
- **3.** descend the right stem top-to-bottom
- **4.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows three movements; most native writers draw प in two strokes (98% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

4.7 Chapter 4 — The farewells

No new words. Three ways to part, in the classical language behind many modern Indian goodbyes.

Your turn

Say these aloud:

- taking leave — *gacchāmi* ("I go")
- "until we meet again" — *punar-darśanāya*
- "see you tomorrow" — *śvaḥ punar-darśanam*

How to answer: the atoms

Say these aloud:

- the verb "to go" and its Ch-1 cousin (*gam*; *svāgatam*)
- "again" and its combining form (*punaḥ* / *punar-*)
- "tomorrow" vs. "yesterday" (Sanskrit keeps *śvaḥ* / *hyaḥ* distinct)

Your turn — inside the farewells

Say these aloud:

- what *punar-darśanāya* literally means, and the case that gives the "for" ("for seeing again"; the dative *-āya*)
- what *darśana* means beyond "seeing" (a beholding — the *darśan* of a deity; the six schools of philosophy)
- whether the origin of *śvaḥ* is settled, and the one Hindi word that covers both tomorrow and yesterday (not settled; *kal*)

Script — the chapter's two shapes

प · र

- *Point to: ra*, then *pa*
- *Say it:* the sound of each and a word you say with it (र, *ra*, in *namaskāraḥ*; प, *pa*, in *punaḥ*)

What you've built: the roots you now carry

- *gam* "to go" ← PIE $*g^w em$- → English **come**
- *punaḥ* / *punar*- "again" (→ *punarjanma*, "rebirth")
- *darśana* "a seeing / beholding" (the six *darśanas* of philosophy)
- *śvaḥ* "tomorrow," *hyaḥ* "yesterday" — kept separate, unlike Hindi *kal*

Before you move on

You're taking leave and expect to see someone tomorrow. Give the graceful goodbye, and specify tomorrow. (*Punar-darśanāya* — or *śvaḥ punar-darśanam.*)

Chapter 5

The First Verbs

Modes: **voice** (4) **eyes** (1) **pen** (6) **Hands-free start:** the first of 11 lessons.

> *Complete SA-C05-practice, the canonical closing checkpoint, and demonstrate the chapter promise: build short present-tense Sanskrit sentences with the chapter's first verbs; then name the roots vad, vas and kṛ, unpack saṁskṛta, hear sandhi, and pick out* य *and* ृ.

5.1 वदामि (vadāmi) — "I speak," and the Sanskrit verb

So far, "to be." Here is a verb that *acts* — and it reveals the most famous feature of the Sanskrit verb: it counts to **three**.

The letters in this word

va · dā · mi. The long *ā* in the middle beat is the ending doing its work — shorten it and the word stops meaning "I speak."

The word, taken apart — its roots and family

vadāmi ("I speak") is from the root *vad* ("to speak, to say") — the very root of *vāda* ("a saying") inside Chapter 1's *dhanyavādaḥ* ("thank you"). The present tense is stem + person- ending: *vad-ā-mi*, where *-mi* means "I" — the same *-mi* you can see in *asmi* ("I am").
The verb is built on √vad, which MW compares with Lithuanian

vadinti, “to call”.

Grammar Lens: singular, DUAL, and plural

Here is Sanskrit’s showpiece. Where English (and Hindi) count in two — singular and plural — Sanskrit counts in **three**, with a special **dual** for *exactly two*:

number	form	meaning
singular	*vadāmi*	I speak
dual	*vadāvaḥ*	**we two** speak
plural	*vadāmaḥ*	we (three or more) speak

A whole grammatical number just for pairs — for two eyes, two hands, a couple. Greek had it too, and lost it; English never kept it; Sanskrit polished it. It is one of the things that makes the language feel so exact.

Your turn

Say these aloud:

- “vadāmi” — I speak
- the root and its Chapter-1 cousin (*vad*; *dhanyavāda*, “thank you”)
- the three numbers — *vadāmi* (I) / *vadāvaḥ* (we two) / *vadāmaḥ* (we all)

Before you move on

What root is *vadāmi* from, and what third “number” does Sanskrit have that English lacks? (*Vad*, “to speak”; the **dual**, for exactly two — *vadāvaḥ*, “we two speak.”)

5.2 य — one character, met inside words you already say

Before the new one, the ones you have already met: ु · र · प. Say what each of them does.

> One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: य

य — *ya*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *y*, it is **ya**.

What it is made of:

- a clockwise inner curl
- a lower bowl rising to the right-stem junction
- a top-to-bottom right stem
- the top shirorekhā

You already say these words, and य is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *dhanyavādaḥ* — thank you
- *punardarśanāya* — until we meet again (lit. "for seeing again")

Writing: य

How य *is written, stroke by stroke*

- **1.** start beneath the headline, curve clockwise around the inner curl, and finish at the left waist

- **2.** without lifting, curve down and right around the lower bowl, and rise to the right-stem junction
- **3.** climb up the right stem to the headline
- **4.** descend the right stem top-to-bottom
- **5.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows four movements; most native writers draw य in two strokes (89% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Opiaterein, 'Deva-य-order.gif', strokes 1–4, Wikimedia Commons, 10 May 2009.

Your turn

- *Look:* at this, and find य in it

  य

- *Trace it:* य three times, saying *ya* as you finish each one
- *Look:* back at any page of this chapter and find य once more

Before you move on

Which character is this — य? What sound does it carry? (***ya***.) Name one word you already say that contains it.

5.3 अहं संस्कृतं वदामि (ahaṁ saṁskṛtaṁ vadāmi) — "I speak Sanskrit"

Your first full, moving sentence — and the language's name is itself a little lesson in how Sanskrit builds words.

The letters in this word

a · *haṁ* · *saṁs* · *kṛ* · *taṁ* · *va* · *dā* · *mi*. The *ṁ* is a hum through the nose that colours the vowel before it rather than a full *m*; *ṛ* is a short vowel made with the tongue curled, near the *ri* of *rich*.

The word, taken apart — its roots and family

ahaṁ saṁskṛtaṁ vadāmi = *aham* ("I") + *saṁskṛtam* (the object) + *vadāmi* ("speak") — "I Sanskrit speak," the verb last (as in every daughter language). The name *saṁskṛta* means "**put together, refined, perfected**" — from *sam-* ("together," cousin of English *same*) + *kṛta* ("made, done," from the root *kṛ* you met in *namaskāra*). So "Sanskrit" literally means "the perfected [language]," named in contrast to *prākṛta* ("natural, raw" — Prakrit, the everyday speech from which Hindi, Bengali, and the rest descend).

Grammar Lens: sandhi joins the words

Say it aloud and *aham* + *saṁskṛtam* runs together as *ahaṁ saṁskṛtam* — the *m* softening to the anusvāra before the next consonant. That is **sandhi**, the sound-joining you met in Chapter 1's *svāgatam*; it is why Sanskrit flows.

Your turn

Say these aloud:

- "ahaṁ saṁskṛtaṁ vadāmi"
- what *saṁskṛta* means (*sam* "together" + *kṛta* "made" = "perfected")
- its opposite, the source of the modern languages (*prākṛta*, "natural")

Before you move on

Say "I speak Sanskrit," and unpack the name. (*Ahaṁ saṁskṛtaṁ vadāmi*; *saṁskṛta* = *sam* "together" + *kṛta* "made" — "the perfected language.")

5.4 वसामि (vasāmi) — "I live, I dwell"

A second verb, so you can say where you live — and it hides the English word *was*.

Say "I speak Sanskrit" and let the words run together: *ahaṁ saṁskṛtam*. That joining is sandhi.

The letters in this word

va · *sā* · *mi*. One consonant apart from *vadāmi*, and the same long *ā* carrying the ending.

The word, taken apart — its roots and family

vasāmi ("I dwell, I live") is from the root *vas* ("to dwell, to stay, to abide"), from Proto-Indo-European ***wes-** ("to dwell, to be") — the ancestor of English **was** and **were** (the past of "to be" began as "to dwell/remain"). So Sanskrit's "I dwell" and English's "was" are, at the root, one word. From *vas* come *vāsa* ("a dwelling") and *nivāsa* ("a residence"). "I live in the city" is *ahaṁ nagare vasāmi*.

Grammar Lens: "in" is a case-ending

nagare ("in the city") = *nagara* ("city") in the **locative** case (*-e*, "in / at"). Sanskrit has no separate word for "in" — it is folded into the noun's ending, where Hindi puts a separate word after the noun (*meṃ*, "in"). This is your second case, after Chapter 4's dative.

Your turn

Say these aloud:

- "vasāmi" — I dwell
- "I live in the city" — *ahaṁ nagare vasāmi*
- the English cousin of the root *vas* (**was**)

Before you move on

What PIE root is *vasāmi* from, its English cousin, and how does Sanskrit say "in"? (**wes-* "to dwell"; English **was**; with a

case-ending, the locative -*e*.)

5.5 ृ — one character, met inside words you already say

How ृ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ृ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

- *Look:* at this, and find ृ in it

  ृ

- *Trace it:* ृ three times, saying *ṛ* as you finish each one
- *Look:* back at any page of this chapter and find ृ once more

Before you move on

Which character is this — ृ? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ṛ* on; takes the built-in *a* off.**) Name one word you already say that contains it.

5.6 ृ — the known vocalic-r sign, now copied with support

Point to ृ and say what it does. It puts the vowel *ṛ* on a consonant and replaces that consonant's built-in *a*. This is the same sign you traced in the previous lesson, not a new word or a new shape.

Writing — guided vocalic-r copy

How it is written — one unbroken stroke · 3 movements

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Devanagari recognizer, class 52 (ृ vocalic r sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ृ is written, stroke by stroke

Keep ृ visible and copy the mark once, slowly and larger than print. The dotted circle only shows where a consonant would stand; copy the small hook below it, not the dotted circle.

Compare your mark with ृ. Check that the hook sits below the place where a consonant would be. Read its sound aloud: *ṛ*.

Before you move on

What does ृ add, and what does it remove? (**It adds vocalic *ṛ* and removes the consonant's built-in *a*.**)

5.7 ृ — cover the model, keep the hook in mind

Look at ृ for five seconds. Say its sound and job: vocalic *ṛ*, replacing the consonant's built-in *a*. Then cover the model.

Writing — delayed vocalic-r copy

How it is written — one unbroken stroke · 3 movements

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Devanagari recognizer, class 52 (ृ vocalic r sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ृ is written, stroke by stroke

Wait ten seconds. With no visible answer and no romanization, write only the vowel mark from memory. Leave an empty place above it for the consonant that would carry it; do not draw the dotted teaching circle.

Only after the mark is complete, uncover ृ. Compare its size, position, and direction with your mark. Repair only the first difference.

Before you move on

Where does this dependent vowel sign sit? (**Below the consonant it changes.**)

5.8 A heard vowel sign — write vocalic r independently

Cover every answer below this line. You will hear the name and function of one known vowel sign. There is no visible Devanagari model and no romanized answer.

Writing — vocalic-r dictation

Hear: the dependent vowel sign vocalic r, which replaces a consonant's built-in *a*

Write the sign from sound and function alone. Stop after one attempt. Now uncover and compare: ृ. Check its below-consonant position and hook. Repair only the first difference. Credit requires the Devanagari mark; a Latin-letter transliteration does not count.

Before you move on

The vocalic-r sign has now moved from trace to independent transcription. Which later debts remain? (**Conjuncts, connected text, and independent recall across a longer passage.**)

5.9 करोमि (karomi) — "I do," from the root behind *karma* and *namaskāra*

The last verb of the chapter — from the single most productive root in Sanskrit, one you have met again and again.

Say "I speak Sanskrit." (*Ahaṁ saṁskṛtam vadāmi.*)

The letters in this word

ka · *ro* · *mi*. Three even beats, all short.

The word, taken apart — its roots and family

karomi ("I do, I make") is from the root *kṛ* ("to do, make"), from Proto-Indo-European ***k^{w}er-**. This is the root at the heart of this book:

- *namaskāraḥ* — "the **making** of a bow" (*namas* + *kāra*)
- *karma* — "a thing **done**," an action
- *saṁskṛta* — "**put together**, perfected" (this very language)

To say "**I work**," Sanskrit says *kāryaṁ karomi* — "I do work," where *kāryam* ("work, task") is *itself* from *kṛ* ("a thing-to-be-done"). So "I work" is, at root, "*kṛ*-thing I *kṛ*-do." Hindi's *kām karnā* and Bengali's *kāj karā* are its worn-down grandchildren.

Your turn

Say these aloud:

- "karomi" — I do
- "I work" — *kāryaṁ karomi*
- three words from the root *kṛ* (*namaskāra*, *karma*, *saṁskṛta*)

Before you move on

What root is *karomi* from, and name three words built on it. (*Kṛ*, "to do," PIE **k^{w}er-*; *namaskāra*, *karma*, *saṁskṛta* — among many.)

5.10 Chapter 5 — The first verbs

No new words. Three verbs, one engine — and Sanskrit's count-to-three.

Your turn

Say these aloud:

- "I speak Sanskrit" — *ahaṁ saṁskṛtaṁ vadāmi*

- "I live in the city" — *ahaṁ nagare vasāmi*
- "I work" — *ahaṁ kāryaṁ karomi*
- "we two speak" — *vadāvaḥ* (the dual!)

How to answer: the engine

Say these aloud:

- the ending that means "I" (*-mi*, as in *asmi*, *vadāmi*)
- Sanskrit's three numbers (singular / **dual** / plural)
- where the verb sits, and how "in" is shown (verb last; a case-ending, the locative *-e*)

Your turn — the roots under the verbs

Say these aloud:

- the root of *vadāmi* and its Chapter-1 cousin (*vad*, "to speak"; *dhanyavāda*)
- the root of *vasāmi* and its English cousin (*vas*, PIE **wes-*; **was**)
- the root of *karomi* and three words built on it (*kṛ*, PIE **k^{w}er-*; *namaskāra*, *karma*, *saṁskṛta*)
- what *saṁskṛta* means, and its opposite (*sam* "together" + *kṛta* "made", "perfected"; *prākṛta*, "natural")
- *aham* + *saṁskṛtam* run together, and the name for that joining (*ahaṁ saṁskṛtam*; sandhi)

Script — the chapter's two shapes

ृ · य

- *Point to: ya*, then the *ṛ*-sign
- *Say it:* what each does, and a word with each (य, *ya*, in *dhanyavādaḥ*; ृ, a hook below that puts *ṛ* on and takes the *a* off, in *saṁskṛtam*)

What you've built: the roots you now carry

- *vad* "to speak" (→ *dhanyavāda*)
- *vas* "to dwell" ← PIE **wes-* → English **was**
- *kṛ* "to do" ← **k^{w}er-* → the root of *namaskāra*, *karma*, *saṁskṛta*; *kāryam* "work"
- *saṁskṛta* = *sam* ("together," English *same*) + *kṛta* ("made") = "perfected"

Before you move on

In one breath, say your language, your city, and your work in Sanskrit — then say "we two speak." (*Ahaṁ saṁskṛtaṁ vadāmi. Ahaṁ nagare vasāmi. Ahaṁ kāryaṁ karomi. Vadāvaḥ.*)

5.11 अ — one character, met inside words you already say

Before the new one, the ones you have already met: प · य · ृ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: अ

अ — *a*.

It is an **independent vowel**: the full-size letter a vowel wears when it opens a word and has no consonant to lean on. Inside a word the same vowel is written as a small sign instead.

What it is made of:

- a joined upper-and-lower left body
- a middle shoulder running into the right stem
- a right vertical stem
- the top shirorekhā

You already say these words, and अ is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *asti* — is
- *mama nāma … asti* — my name is…
- *bhavān katham asti?* — how are you?
- *aham* — I

Writing: अ

How अ is written, stroke by stroke

- **1.** curve around the upper bowl, then continue down and around the lower bowl without lifting
- **2.** lift and sweep the middle shoulder right
- **3.** without lifting, climb up the right stem to the headline
- **4.** descend the right stem top-to-bottom
- **5.** lift and draw the top shirorekhā left-to-right

Pen lifts: 2. The pen comes up 2 times and no more.

The source shows four movements; most native writers draw अ in three strokes (74% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the shoulder and the headline.

Chapter 6

Numbers One to Five

Modes: **voice** (4) **eyes** (3) **pen** (1) **Hands-free start:** the first of 8 lessons.

> ***By the end of this chapter:*** I can say the Sanskrit numerals एक to पञ्च with their dual and gendered forms, and follow पञ्च outward into Punjab, pentagon, and the disputed history of punch.
>
> *Trace pañca out of Sanskrit: into Persian panj-āb, the five waters behind Punjab; into Greek pente in pentagon and pentathlon; and into punch, with the five-ingredients account labelled as common rather than settled. Then count one to five with the dual and the neuter forms the daughter languages inherit, say the cousins and the sound laws between them, and pick out* ञ*.*

6.1 एक, द्व, त्रि, चतुर्, पञ्च — one to five

This chapter does something the other Indic chapters can't do alone. Sanskrit preserves the **Old Indo-Aryan forms behind** the Hindi, Marathi, Bengali, Gujarati and Punjabi ones — and, at the same time, these forms are **cousins** of the English ones. Learn five and you get a foothold in both directions.

How many numbers does a Sanskrit verb count in? (Three: singular, dual for exactly two, and plural.)

You'll want to know: the five

stem	masculine	neuter
éka- (1)	एकः *ékaḥ*	एकम् *ékam*
dvá- (2)	*dváu*	*dvé*
tri- (3)	त्रयः *tráyaḥ*	*trī́ṇi*
catúr- (4)	चत्वारः *catvā́raḥ*	चत्वारि *catvā́ri*
पञ्च *páñca* (5)	—	—

Two notes first. A third, about the neuter forms, follows in the next lesson.

Sanskrit has a dual — a separate number for exactly two things — which is why "two" is *dváu* rather than a plural.

***Pañca* barely inflects** in the nominative and accusative. It is also the one you already half-know.

The word, taken apart — its roots and family

All five are inherited from Proto-Indo-European, which is why the next lesson can line them up with Latin *duo*, *trēs*, *quattuor*, *quīnque* (MW). *Eka* is the odd one: its root is the one behind English *one*, but with a different suffix.

What you've built: two directions

These five forms point in two directions. The next lesson lines them up with Latin and English and explains the sound laws. A final short lesson follows *pañca* into *Punjab*, *pentagon*, and the qualified history of *punch*.

Your turn

Say these aloud:

- "eka, dva, tri, catur, pañca"
- the exactly-two category — dual

Before you move on

Give one to five in Sanskrit. (*Eka, dva, tri, catur, pañca.*) Why does "two" look unusual? (Sanskrit has a **dual** — a form for exactly

two.) Which number barely inflects in this table? (*Pañca.*) Next: connect the Sanskrit forms west to Latin and English.

6.2 (एक द्व त्रि चतुर् पञ्च, continued) — numbers have gender

Before going on: count one to five again — एक द्व त्रि चतुर् पञ्च.

And the letter from the last lesson: say the sound of अ.

From the goodbyes: which English word is a cousin of *gam* "to go"? (*Come.*)

You'll want to know: numbers have gender

Sanskrit numbers have gender. Look back at the last column of the table in the last lesson. These same words, in Hindi, Marathi, Bengali, Gujarati, and Punjabi, mostly descend from the **neuter** forms — *trīṇi* and *catvāri*, not *tráyaḥ* and *catvāraḥ*. Keep that column in view; the daughter languages inherit from it.

Your turn

- *Say it:* what this lesson added to एक द्व त्रि चतुर् पञ्च, in one sentence

Before you move on

What did this lesson add to एक द्व त्रि चतुर् पञ्च? Say it once more, without looking.

6.3 The Sanskrit numbers are English cousins

Give the five stems: *eka, dva, tri, catur, pañca.*

What you've built: one family, not borrowing

Sanskrit	Latin	English
éka-	*ūnus*	**one**
dvá-	*duo*	**two**
tri-	*trēs*	**three**
catúr-	*quattuor*	**four**
páñca	*quīnque*	**five**

Sanskrit, Latin, and English inherited these from one family. Numbers resist replacement, so their relationship remains audible after millennia. The first row needs one caveat: *éka-* and *ūnus/one* use the same root with different suffixes, PIE **oy-ko-* versus **óynos*. They are relatives rather than the same complete word. The other four rows continue the same word.

Your turn

Say these aloud:

- *tri, trēs, three*
- regular inheritance or borrowing — inheritance

Before you move on

Are the Latin and Sanskrit forms borrowed from one another? (No: they are inherited cousins.) Next: the sound laws that pulled the cousins apart.

6.4 ञ — one character, met inside words you already say

Before the new one, the ones you have already met: य · ृ · अ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ञ

ञ — *ña*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ñ*, it is **ña**.

What it is made of:

- a clockwise open-left bowl
- a rightward shoulder rising to the headline
- a short descending lower stem
- the top shirorekhā

You already say these words, and ञ is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *eka dva tri catur pañca* — one to five — Old Indo-Aryan ancestors preserved in Sanskrit, and cousins of the English ones
- *eka · dva · tri · catur · pañca* — the Sanskrit, Latin, and English number family and the sound laws between them

Writing: ञ

How ञ is written, stroke by stroke

- **1.** start at the open upper-left tip and curve clockwise around the bowl to the open lower-left tip

- **2.** lift at the bowl's right junction, sweep right through the shoulder, then curve upward along the right side to the headline
- **3.** lift at the lower right-side junction and descend the short stem below the bowl
- **4.** lift and draw the top shirorekhā left-to-right

Pen lifts: 3. The pen comes up 3 times and no more.

Your turn

- *Look:* at this, and find ञ in it

  ञ

- *Trace it:* ञ three times, saying *ña* as you finish each one
- *Look:* back at any page of this chapter and find ञ once more

Before you move on

Which character is this — ञ? What sound does it carry? (***ña***.) Name one word you already say that contains it.

6.5 (एक · द्व · त्रि · चतुर् · पञ्च, continued) — The word, taken apart — rounded *k* goes three ways

Before going on: say एक · द्व · त्रि · चतुर् · पञ्च again, and what it means.

The word, taken apart — its roots and family

PIE $*k^w$ was a *k* with rounded lips. In $*k^w$*etwóres* "four," three branches treated it differently:

branch	outcome	example
Latin	kept *qu-*	***qu**attuor*
Indo-Iranian	merged it with *k*, then palatalised before front vowels	***c**atvāri*
Germanic	shifted it to *hw-*	***wh**at*, ***wh**o*

Sanskrit *c-* is therefore a regular result, not a random replacement. The same sequence helps explain *pañca*'s *ñc*.

The word, taken apart — its roots and family

The **f-** of *five* does not come from $*k^w$. It comes from initial $*p$, changed to *f* by **Grimm's law**, as in *pater* → *father* and *pēs* → *foot*. English *four* is irregular. By the sound rule it should begin *hw-* like *what*. Its *f-* is usually explained as analogy with neighbouring *five*. Counting words can reshape one another.

Your turn

Say these aloud:

- rounded *k* — *quattuor, catvāri, what*
- initial *p* → *f* — *pañca/five*

Before you move on

What are the three outcomes of $*k^w$? (Latin *qu-*, Indo-Iranian *c-* after merger and palatalisation, Germanic *hw-*.) Where does *five*'s initial *f* come from? (PIE *p* by Grimm's law.) What is the usual explanation for *four* also beginning with *f*? (Analogy with neighbouring *five*.)

6.6 *Pañca* hiding in familiar words

Say Sanskrit "five." (*Pañca*.) Give its English cousin. (*Five*.)

The word, taken apart — its roots and family

Punjab comes from Persian *panj-āb*, "five waters," for the land of five rivers spanning India and Pakistan. Persian *panj* is the Iranian cousin of Indic *pañca*: both descend from the same Indo-Iranian and PIE number root.
The place-name is Persian, not Sanskrit, but the family resemblance is real.

The word, taken apart — its roots and family

Greek ***pente*** is another descendant of the same root. It appears in **pentagon**, a five-sided figure, and **pentathlon**, a five-event contest.

Your turn

Say these aloud:

- *panj + āb* — five waters
- Greek *pente* — pentagon, pentathlon

Before you move on

What does *Punjab* mean? ("Five waters.") Is Persian *panj* borrowed from Sanskrit? (No: it is an Iranian cousin.) Which Greek form hides in *pentagon*? (*Pente*.) Next: the drink *punch*, and why its story comes with a caution.

6.7 (पञ्च, continued) — The word, taken apart — the qualified *punch* story

Before going on: say पञ्च again, and what it means.

The word, taken apart — its roots and family

The usual account derives **punch**, the drink, from Hindi *pāṁch* ← Sanskrit *pañca*, because the drink was said to contain five ingredients. That origin is not unanimous. A rival derives the word from **puncheon**, a type of cask. Keep the useful connection with a label: "the common five-ingredients account," not an unquestioned fact.

Your turn

Say these aloud:

- *punch* — common account, not certain
- the rival: *puncheon*, a cask

Your turn — the chapter's five, and what they carry

Say these aloud:

- one to five (*eka, dva, tri, catur, pañca*)
- why "two" is *dváu*, not a plural (a **dual**, for exactly two)
- the two forms of "three", and which one Hindi, Marathi and the rest mostly inherit (*tráyaḥ*, masculine; *trī́ṇi*, the **neuter**)
- the two directions these five point (back to the forms behind the modern Indic numbers; across to the English ones, as cousins)

Your turn — cousins and sound laws

Say these aloud:

- "three" in Sanskrit, Latin and English, and whether one borrowed it (*tri, trēs, three*; no — inherited cousins)
- why *éka* and **one** are relatives but not one whole word (same root, different suffixes)
- what rounded $*k^w$ became in Latin, Sanskrit and English (*qu-*, *c-*, *hw-*: *quattuor*, *catvāri*, **what**)
- where the *f-* of **five** comes from, and why **four** has one too (PIE **p*, by Grimm's law; analogy with *five*)

Your turn — Punjab and pentagon

Say these aloud:

- what **Punjab** means, and whether Persian *panj* is a loan from Sanskrit (*panj-āb*, "five waters"; no — an Iranian cousin)
- the Greek five, and two English words built on it (*pente*; **pentagon**, **pentathlon**)

Script — the shape inside *pañca*

अ · ञ

- *Point to: ña*, then *a*
- *Say it:* the sound ञ carries, and the number it sits inside (*ña*; *pañca*)

Before you move on

What caution belongs with the drink *punch*? (The five-ingredients derivation is common, but *puncheon* is a rival account.)

6.8 नमस्कारः — the ending you can hear, and four claims you were told once

Say the longer of the two greetings. Then say what its last breath — the soft *-ḥ* — is telling you about the word.

Sanskrit numbers have gender. Which forms of "three" and "four" do the modern languages mostly inherit? (The neuter ones, *trīṇi* and *catvāri*.)

Why it's said this way

Namaskāraḥ ends on a **visarga**, and a visarga on a noun like this one is not decoration: it marks the **masculine singular**. You have been hearing it since your first pair of greetings without being asked to notice it twice.
The numbers in front of you now make the point differently. *Pañca* has no visarga; *namaskāraḥ* does. One is a bare stem, the other is a word doing a job in a sentence. Sanskrit tells you which by the ending, not by the position.

Across the family

Four historical claims have gone past you, one at a time, each at the end of a chapter. Set against each other they stop being trivia and become one argument:

the claim	**what it rests on**
a judge in Calcutta announced in 1786 that Sanskrit, Greek and Latin came from a common source	he was comparing verbs and grammar, not lists of similar-sounding words
the words of the naming exchange are traceable to that same source	*nāma*, *mama*, *tvam*, *kim* all have cousins west of India
the wellbeing words have roots reaching east and west alike	the root is the unit that travels, not the finished word
the leave-taking words are built from roots you can already name	*punar-darśanāya* is *again* plus *for seeing*

Read the right-hand column downward. Every one of the four is an argument from **roots and endings**, which is the same evidence the numbers in this chapter rest on. That is why the claim about Sanskrit and Latin is a claim about grammar and not about vocabulary.

Before you move on

What kind of evidence did the 1786 announcement rest on — matching words, or matching grammar? (**Grammar.**) What does the visarga on *namaskāraḥ* mark? (**Masculine singular.**)

> ***By the end of this chapter:*** I can say that someone is, becomes, goes, comes, eats, sees and knows in Sanskrit; I can name each verb by its dhātu rather than by its present form, say which of the three gaṇa patterns builds its stem, and point at the English word that descends from the same root.
>
> *Say* जानाति*, name its root* ज्ञा *and the syllable* -ना- *its class plants inside the word, run back through the chapter's six verbs as root plus class plus ending, separate the one that is a prefixed form of another, and pair* गम्*,* अद्*,* पश्* and* भू *with come, eat, inspect and be.*

7.1 अस्ति and भवति — Sanskrit's two words for "is"

Six chapters of words. Now the machinery. A Sanskrit verb is never quoted the way an English one is, and this pair shows why.

Three roots you already use: *vad* "speak," *vas* "dwell," *kṛ* "do." Which one is behind English *was*? (*Vas.*)

You'll want to know: अस्ति and भवति

Sanskrit	sound	meaning
अस्ति	*asti*	he, she, or it **is**
भवति	*bhavati*	he, she, or it **becomes**

Both land in English as "is." *Asti* states that something simply **is** there. *Bhavati* says something **comes to be** — a state arriving rather than sitting still. Sanskrit never merged the two.

The letters in this word

अ is *a*, a short neutral vowel; ति is *ti*. Inside अस्ति the *s* and *t* stack into one joined shape, स्ति — Devanagari fuses a consonant cluster into a single letter. भवति needs no fusing: भ *bha*, व *va*, ति *ti*.

Grammar Lens: the dhātu and its gaṇa

Sanskrit files a verb under its *dhātu*, its **root** — the bare syllable a dictionary lists. *Asti* is filed under अस् (*as*), *bhavati* under *bhū*.
A root is not yet a word. To reach the present it joins one of ten *gaṇa* classes, and the class decides what happens between root and ending. Class 2 adds nothing: *as* + *ti* → *asti*. Class 1 strengthens the root and adds a vowel: *bhū* → *bhava* + *ti* → *bhavati*.
Root, then class, then ending. Every verb in this chapter is built that way.

The word, taken apart — its roots and family

अस् is PIE **es-*: English **is**, Latin *est*, German *ist*, barely worn.
bhū is PIE **bheu-*, "to grow, to come to be": English **be** and **been**, Latin *futūrus* behind **future**, Greek *phusis* behind **physics**.
Now the surprise. English "to be" is stitched from *both* — *am, is, are* from **es-*; *be, been, being* from **bheu-*. English fused two verbs into one ragged paradigm. Sanskrit left them side by side.

Your turn

Say these aloud:

- "asti" — it is
- "bhavati" — it becomes
- the two roots — *as*, *bhū*
- the English halves — "is" from one, "been" from the other

Before you move on

Which two roots stand behind *asti* and *bhavati*? (अस् *as* and *bhū*.) What does a *gaṇa* class do? (**Turns a root into a present stem** — nothing added for *as*, a vowel added for *bhū*.) Which English words descend from each? (*Is* from *as*; *be* and *been* from *bhū*.) Next: a root whose present stem you could never have guessed.

What it is made of:

- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has च somewhere inside it:

7.3 गच्छति (gacchati) — "goes," and why dictionaries file it elsewhere

Root, then class, then ending. Say the two roots from last time. (*As*, *bhū*.) Here the middle step stops being tidy.

Three roots you already use: *vad* "speak," *vas* "dwell," *kṛ* "do." Today's verb is built on another root, *gam*.

You'll want to know: गच्छति

Sanskrit	sound	meaning
गच्छति	*gacchati*	he, she, or it **goes**
गच्छामि	*gacchāmi*	**I** go

The second form is already yours: Chapter 4 used it to take leave. Same stem, different ending — -ति *-ti* for "he, she, it," -ामि *-āmi* for "I."

The letters in this word

ग is *ga*. ति is *ti*, already familiar. Between them sits च्छ, a doubled *ch* — one stacked shape for two *ch* sounds in a row, held slightly long: *gach-cha*. Let the middle of the word linger.

Grammar Lens: the stem that hides its root

The root here is गम् (*gam*), "to go." The present stem is गच्छ (*gaccha*). No rule you have met turns one into the other, and no amount of staring at *gaccha* recovers *gam*.
That is the whole reason Sanskrit hangs its grammar on the root rather than on any spoken form. *Gam* is where the dictionary keeps this verb, where its past and future are built from, and where its relatives — गति *gati* "motion," आगम *āgama* "arrival" — are visibly

cousins. Learn roots, not forms.

The word, taken apart — its roots and family

गम् is PIE **gwem-*. Its English descendant is **come** — the same root, turned around: what one language walks away with, another walks toward.
Latin took it as *venīre*, "to come," and English then borrowed it back in a crowd: **venue**, **convene**, **intervene**, **advent**, **adventure**.
Sanskrit *gacchati* and English *come* are the two ends of one very old word.

Your turn

Say these aloud:

- "gacchati" — it goes
- "gacchāmi" — I go
- the root, not the stem — *gam*
- the English cousin — *come*

Before you move on

What is the root of *gacchati*? (गम् *gam.*) Could you have predicted the stem from it? (**No** — which is why the root is what gets learned.) Which ending makes it "I go"? (**-ामि** *-āmi.*) Which English verb is the same root? (**Come**.) Next: the same stem, aimed the other way.

7.4 आगच्छति (āgacchati) — "comes," or "goes" reversed

Say "it goes." (*Gacchati.*) Now add one syllable in front and the direction reverses.

You'll want to know: आगच्छति

Sanskrit	sound	meaning
गच्छति	*gacchati*	it **goes**
आगच्छति	*āgacchati*	it **comes**

आ (*ā*) means "toward, hither." Stick it on the front and the motion turns back to face you. Sanskrit has no separate word for "come" at all: coming is going, aimed homeward.

The letters in this word

Everything after the first letter is last lesson's word, unchanged. The new piece is आ, the long *ā* — the same vowel as अ *a* but held roughly twice as long. Length alone carries meaning in Sanskrit, so give it its time: *aa-gach-cha-ti*.

Grammar Lens: the upasarga, Sanskrit's aiming device

आ is an *upasarga*, a preverb. Sanskrit has about twenty, and any of them may ride in front of a root to re-aim it:

prefix	sense	on गम्
आ *ā*	toward	*āgacchati*, comes
सम् *sam*	together	*saṁgacchati*, goes together
नि *ni*	down	*nigacchati*, goes down

A handful of roots plus a handful of prefixes covers an enormous amount of vocabulary. You have met the trick already without being told: *saṁskṛta* ("Sanskrit") is *sam* "together" on the root *kṛ* "make" — put-together, and so perfected.

The word, taken apart — its roots and family

Latin aims *venīre* "come" with the same kind of prefix: *ad-* "toward" gives **advent**, *con-* "with" gives **convene**, *inter-* "between" gives **intervene**. English does it natively too — *come* becomes **become**, **overcome**, **income**.
Sanskrit simply runs the system harder and more openly, with the seams left visible.
The root itself, √gam, is inherited: MW compares English **come**.

Your turn

Say these aloud:

- "gacchati … āgacchati" — goes, comes
- the prefix and its sense — *ā*, toward
- one more prefix on the same root — *sam*, together

Before you move on

How does Sanskrit say "comes"? (आगच्छति — *ā* "toward" on "goes.") What is such a prefix called? (An *upasarga*.) Which Sanskrit word you already knew is built the same way? (*saṁskṛta* — *sam* plus *kṛ*.) Next: a verb whose everyday form is not the one related to English.

7.5 क — one character, met inside words you already say

Before the new one, the ones you have already met: अ · ञ · च. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: क

क — *ka*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *k*, it is **ka**.

What it is made of:

- a counterclockwise left bowl
- a top-to-bottom central stem
- a right-hand arch
- the top shirorekhā

You already say these, and every one of them has क somewhere inside it:

- किम् *kim* — what

Writing: क

How क is written, stroke by stroke

- **1.** start at the bowl's upper-right junction and sweep left over the top, down around the left side, and back to the lower-right junction
- **2.** without lifting, climb up the central stem to the headline
- **3.** descend the central stem top-to-bottom
- **4.** climb back up the stem to the upper junction
- **5.** sweep the right-hand arch clockwise down to its open lower tip
- **6.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows four movements; most native writers draw क in two strokes (74% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

7.6 खादति (khādati) — "eats," and the cousin it is not

Name the three steps that build a Sanskrit present. (**Root, class, ending**.) This verb is the tidiest one yet — and hides a warning.

You'll want to know: खादति

Sanskrit	sound	meaning
खादति	*khādati*	he, she, or it **eats**
खाद्य	*khādya*	**edible**, food

The root is खाद् (*khād*), and it belongs to the same class 1 as *bhū*, so the build is plain: *khād* + *a* + *ti* → *khādati*. No stacked letters, no surprises, nothing hidden.

The letters in this word

खा is *khā*: a *k* with a puff of breath after it, then the long *ā* you met last lesson. Sanskrit treats that puff as a separate letter, not an accent — क *ka* and ख *kha* are two different letters that change meaning. द is *da*, ति is *ti*.

Grammar Lens: the everyday word and the related word

English **eat**, Latin *edere* (behind **edible**), and German *essen* all descend from PIE **ed-*. Sanskrit inherited it too, as the root अद् (*ad*), class 2 — endings straight onto the root, like *asti*: *ad* + *ti* → अत्ति (*atti*), "eats."
But *atti* is not the ordinary word. Classical Sanskrit eats with खाद्, a root with no clear European relative at all.
So the family word and the everyday word part company here.
Cognates tell you where a language came from; they do not promise to tell you what it says at dinner. Keep the two questions separate.

The word, taken apart — its roots and family

The pattern repeats across the family. English has native **eat** beside borrowed **consume** and **devour**; Sanskrit has inherited अद् beside ordinary खाद्.
A language keeps its old word somewhere — in a proverb, a compound, a sacred text — while daily speech moves on to another. *Khādya*, "edible," is the word you will actually meet on a menu.

Your turn

Say these aloud:

- "khādati" — it eats
- the root and its class build — *khād* … *a* … *ti*
- the cousin of English *eat* — *ad*, *atti*

Before you move on

What is the ordinary Sanskrit verb for eating? (खादति, *khādati*, root खाद्.) Which Sanskrit root is the actual cousin of English *eat*? (अद् *ad*, giving *atti*.) Which class does *ad* belong to, and how do you know? (**Class 2** — the ending goes straight onto the root, as in *asti*.) Next: a verb built out of two different roots.

7.7 पश्यति (paśyati) — "sees," a verb with two roots

So far one root has built each verb. Here two roots share the work, and you have already met the quieter one.

You'll want to know: पश्यति

Sanskrit	sound	meaning
पश्यति	*paśyati*	he, she, or it **sees**
दर्शन	*darśana*	a **beholding**, a viewing

The present tense comes from the root पश् (*paś*). Every other tense of this verb comes from a different root, दृश् (*dṛś*) — and *dṛś* is where दर्शन was built, the word inside Chapter 4's farewell पुनर्दर्शनाय, "until a seeing again."

Two roots, one verb, divided by tense. English does the same with *go* and *went*, which were never the same verb either.

The letters in this word

प is *pa*. Then श्य, a stack of two letters: श *śa*, a *sh* made with the tongue high and forward, plus य *ya*. Say them glued: *pash-ya-ti*. Sanskrit has three different *s* letters, and this is the one that leans toward *sh*.

The word, taken apart — its roots and family

पश् descends from PIE **spek-*, "to observe closely." The *s* and the *p* swapped places on the way into Indo-Iranian, which is why the Sanskrit form begins *paś-* rather than *spaś-*.
Latin kept it straight as *specere*, and English is full of the results: **spectacle**, **inspect**, **respect**, **species**, **suspect**, **spy**.
Greek swapped the letters too, in its own direction, giving *skop-*: **telescope**, **microscope**, **skeptic**, **bishop** (from *episkopos*, an overseer).

Your turn

Say these aloud:

- "paśyati" — it sees
- the two roots — *paś* for the present, *dṛś* for the rest
- the Chapter 4 word from the other root — *darśana*
- the English descendants — *inspect*, *species*, *telescope*

Before you move on

Which root gives the present *paśyati*? (पश् *paś*.) Which root supplies the rest of the verb? (दृश् *dṛś* — the one behind *darśana*.) What PIE root is *paś* from? (**Spek-*.) Name two English words from it. (**Inspect**, **species**, **telescope** — any two.) Next: the verb that means "know," and the class that plants a syllable in the middle.

7.8 ख — one character, met inside words you already say

Before the new one, the ones you have already met: ञ · च · क. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ख

ख — *kha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *kh*, it is **kha**.

What it is made of:

- a descending left stem curling around a small loop and continuing through the broad lower bowl
- an open clockwise upper-right loop
- a top-to-bottom right stem
- the top shirorekhā

You already say this word, and ख is one of the shapes inside it — the rest of its shapes are still ahead of you, so here the character stands on its own:

- *khādati* — he, she, or it eats — the everyday eat-verb, which is not the one English is related to

7.9 जानाति (jānāti) — "knows," and English *know* is the same word

Two ways a root has become a stem so far: nothing added, or a vowel added. Here is the third, and it is the boldest.

You'll want to know: जानाति

Sanskrit	sound	meaning
जानाति	*jānāti*	he, she, or it **knows**
ज्ञान	*jñāna*	**knowledge**

The root is ज्ञा (*jñā*). Its class, the ninth, does not add a vowel at the end — it plants a whole syllable **-ना-** (-*nā*-) between root and ending: *jā* + *nā* + *ti* → *jānāti*. The marker sits inside the word.

The letters in this word

जा is *jā*; ना *nā* and ति *ti* close it. The root's own spelling ज्ञ is a famous stacked letter, *j* over *ñ*, said *gya* across much of India today and *jña* in the classical description. Pick one and stay with it.

The word, taken apart — its roots and family

ज्ञा is PIE **gno*-. English **know** is that root undisguised, and so are **can** and **cunning**, which began as "know how."
Latin took it as *noscere*: **notice**, **notion**, **cognition**, **ignore** ("not-know"), **noble** ("well-known"). Greek took it as *gnōsis*: **diagnosis**, **prognosis**, **agnostic**.
One root, a whole shelf of English vocabulary, and Sanskrit ज्ञान *jñāna* sitting at the other end of it.

What you've built: six verbs, three ways to build a stem

Asti, *bhavati*, *gacchati*, *āgacchati*, *khādati*, *paśyati*, *jānāti*. Every one is a root plus a class plus an ending, and the class was the only thing that varied: nothing inserted (*as-ti*), a vowel appended (*bhava-ti*, *khāda-ti*), or a syllable planted inside (*jā-nā-ti*). Prefix one and you aim it: *ā-gacchati*.

Your turn

Say these aloud:

- "jānāti" — it knows
- the root and its planted syllable — *jñā* … *nā*
- the English twin — *know*

- three roots and their English kin — *gam*/come, *ad*/eat, *paś*/inspect

Before you move on

What is the root of *jānāti*, and what does its class insert? (ज्ञा *jñā*; the syllable **-ना-**.) Give the six verbs of this chapter. (*Asti*, *gacchati*, *āgacchati*, *khādati*, *paśyati*, *jānāti*.) Which two are one root plus a prefix? (*gacchati* and *āgacchati*.) Which Sanskrit root is English *know*? (ज्ञा.) And which English words carry *gam*, *ad*, *paś*, and *bhū*? (*Come*, *eat*, *inspect*, *be* — four roots you now own in two languages.)

Chapter 8

The Mind and the Palm Leaf

Modes: 🚗 **voice** (4) ✓ **pen** (2) 🚗 **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can say that someone thinks, understands, reads and writes in Sanskrit; I can name the class that plants -अय- inside a verb, build "understands" out of a prefix and a verb I already had, say what लिख् meant before it meant write, and tell a word worn down by speech (तद्भव) from one carried over whole (तत्सम).
>
> *Say* लिखति*, give the scratching sense its root carried first, run the chapter's four verbs back as root plus class plus ending — the planted* -अय- *of* चिन्तयति*, the* अव- *prefix and the waking* बुध् *behind understanding, the plain -a- of* पठति *and* लिखति *— sort Bengali lekhā and Hindi cintā into* तद्भव *and* तत्सम*, and name the two word-histories that needed a label rather than a claim.*

8.1 चिन्तयति (cintayati) — "thinks," and a root that never reached English

Say "no worries." (*Na cintā.*) Keep that *cintā*, "worry, thought," in mind.

Say "it knows." (*Jānāti*, root *jñā* — the root English *know* is made of.) Here is what you do *before* you know.

You'll want to know: चिन्तयति

Sanskrit	sound	meaning
चिन्तयति	*cintayati*	he, she, or it **thinks**
चिन्ता	*cintā*	a **thought**, a worry

The root is चिन्त् (*cint*), "to think, to turn over." Chapter 3 already handed you the noun: न चिन्ता (*na cintā*), "no worry," is this root saying "think nothing of it."

The letters in this word

चि is *ci*, said *chi* as in *chip*. Then न्त, न *na* stacked with त *ta* and said as one *nt*. य is *ya*, ति is *ti*: *chin-ta-ya-ti*.

Grammar Lens: the tenth class plants अय

Three ways a *gaṇa* class has turned a root into a present stem: add nothing (*as-ti*), add a vowel (*bhava-ti*), plant a syllable inside (*jā-nā-ti*). Here is the fourth.
The **tenth** class inserts **-अय-** (-*aya*-) between root and ending: *cint* + *aya* + *ti* → चिन्तयति. The marker is loud and always in the same position, so -*aya*- names its class on hearing.

The word, taken apart — its roots and family

चिन्त् goes back to PIE **kweyt*-, "to notice" — and its च *c*- is the rounded *k* from the numbers, which Indo-Iranian merged with plain *k* and then palatalised before a front vowel.
Where it went next is the surprise. Baltic and Slavic took "notice" to "count" and then to **read**: Russian *čitat* and Lithuanian *skaityti* both mean "to read." Sanskrit made the same root mean *think*.
And English? Nothing descends from **kweyt*-. The trail west runs out, and saying so beats inventing a cousin.

Your turn

Say these aloud:

- "cintayati" — it thinks
- the root and its planted syllable — *cint* … *aya*

- the Chapter 3 phrase built on the same root — *na cintā*

Before you move on

What does class 10 put between root and ending, and what is *cintayati*'s root? (**-अय-**; **चिन्त्**, the root of *na cintā*.) Why does the word begin with *c* and not *k*? (**A rounded PIE *k*, merged and then palatalised** — the numbers' rule.) Which verb of knowing came just before this one, and does *cint* have an English cousin? (*jānāti*; **no** — this root left English nothing.)

8.2 े — one character, met inside words you already say

Before the new one, the ones you have already met: **च** · **क** · **ख**. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: े

े — *e*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: a stroke above the top bar.

Worked through: **न** + े = **ने** — *ne*.

You already say this word, and े is one of the shapes inside it — the rest of its shapes are still ahead of you, so here the character stands on its own:

- *namaste* — hello (lit. "a bow to you")

Writing: े — follow the numbered strip

8.3 अवगच्छति (avagacchati) — "understands," going down into it

Say "it goes," then "it comes." (*Gacchati*, *āgacchati* — one *upasarga* prefix apart.) And say "it thinks." (*Cintayati.*) One more prefix, and thinking turns into understanding.

You'll want to know: अवगच्छति

Sanskrit	sound	meaning
गच्छति	*gacchati*	it **goes**
अवगच्छति	*avagacchati*	it **understands**

अव (*ava*) means "down." Put it on "goes" and you get "goes down into" — and that is Sanskrit's ordinary verb for understanding. No new root, no new stem: one more preverb on a word you already own.

Sanskrit has a second verb for it too, बुध्यते (*budhyate*), "wakes, comes to realise." Its ending **-ते** *-te* belongs to Sanskrit's second set of endings, used when the action loops back on the doer — waking is something you do to yourself.

The letters in this word

Everything after two syllables is last chapter's word. The new opening is अ *a* plus व *va*: *a-va-gach-cha-ti.* In बुध्यते the middle is ध्य, a stack of ध *dha* and य *ya*, said glued: *bu-dhya-te.*

The word, taken apart — its roots and family

गम्, under *avagacchati*, is still PIE **gwem-*, the root of English **come** and Latin *venīre* behind **advent**.
बुध् is PIE **bheudh-*, "to be awake, to be aware." Its most famous derivative is बुद्ध (*buddha*), "the awakened one" — a title, not a name.

Greek made it *punthanomai*, "to learn by asking"; Russian *budit* still means "to wake."
English got it too, worn thin: **forbid** and **bode** (as in *foreboding*) descend from Old English *bēodan*, "to announce, to offer." Modern *bid* mixes that verb with a second, unrelated one — so keep to *forbid* and *bode* if you want the clean cousin.

Your turn

Say these aloud:

- "gacchati … avagacchati" — goes, understands
- the prefix and its sense — *ava*, down
- the other verb and its root — *budhyate*, *budh*
- what बुद्ध means — the awakened one

Before you move on

Build "understands" out of pieces you already had. (अव "down" + गच्छति "goes".) Name the three verbs that share that one stem. (*Gacchati*, *āgacchati*, *avagacchati*.) What does बुध् mean before it means "understand," and what title comes from it? (**To wake**; बुद्ध, the awakened one.) Which two English words are its clean cousins? (**Forbid** and **bode**.)

8.4 पठति (paṭhati) — "reads," and where the word went afterwards

Say "it thinks" and "it understands." (*Cintayati*, *avagacchati*.) This next verb is the plainest build in the chapter and the richest afterlife.

You'll want to know: पठति

Sanskrit	sound	meaning
पठति	*paṭhati*	he, she, or it **reads**
पाठ	*pāṭha*	a **lesson**, a recitation

The root is पठ् (*paṭh*), class 1 — root, vowel, ending, exactly like *bhavati*. Its first meaning is not "read" but **"recite aloud, rehearse, study"**: reading was a thing done with the mouth, and Sanskrit named it that way.

The letters in this word

प is *pa*. ठ is *ṭha*, a *t* made with the tongue curled back to the roof of the mouth *and* a puff of breath after it. ति is *ti*, tongue forward. Hear the two *t*-sounds apart: *pa-ṭha-ti*.

The word, taken apart — its roots and family

This is the verb four living languages still read with — Hindi and Urdu *paṛhnā*, Bengali *poṛa*, Marathi *paḍhṇe*. The change is regular: that curled-back ठ softens between vowels, and the old ending drops off. A word reshaped by centuries of ordinary speech is *tadbhava*, "become from that."

Now set चिन्ता beside it. It sits in Hindi, Marathi and Bengali **unchanged** — lifted back out of Sanskrit by scholars rather than inherited through speech. That kind is तत्सम (*tatsama*), "the same as that." Every claim about a Sanskrit word's descendants is one of those two, and they are not the same claim.

Grammar Lens: where पठति itself came from

The usual account runs back through *prath*, "to spread, to become widely known" — reciting as broadcasting — and behind that a root that also gives *pṛthivī*, "the earth, the wide one."

Some hold instead that *paṭhati* is a later, spoken form that scholars dressed up as Sanskrit. Keep the label on it, exactly as you did with *punch*: a common account, not a settled one.

Your turn

Say these aloud:

- "paṭhati" — it reads, it recites
- a worn-down grandchild — *paṛhnā*
- a word carried whole — *cintā*

Before you move on

What did *paṭhati* mean before "read," and which class builds it? (**Recite aloud**; **class 1**.) Name the two ways a Sanskrit word reaches a modern language. (*tadbhava*, worn down through speech; तत्सम, carried over whole.) Which is *paṛhnā*, which is *cintā*, and what label belongs on *paṭhati*'s own ancestry? (*Tadbhava*; *tatsama*; **a common account, not settled** — the caution you kept on *punch*.)

Name one word you already say that contains it.

8.6 लिखति (likhati) — "writes," and the scratch it started as

Say "it reads." (*Paṭhati.*) Name a language that still reads with that word. (Hindi *paṛhnā*, Bengali *poṛa*, Marathi *paḍhṇe* — any one.) Now the other half of literacy.

Say "thinks." (*Cintayati* — the root with *-aya-* added, the fourth way to build a present stem.)

You'll want to know: लिखति

Sanskrit	sound	meaning
लिखति	*likhati*	he, she, or it **writes**
—	*lekhanī*	a **pen**

The root is लिख् (*likh*), class 6. Class 6 adds the same *-a-* class 1 does but leaves the root untouched: *likh* + *a* + *ti*. Two classes, one vowel, and the difference is only whether the root gets strengthened first.

The letters in this word

लि is *li*. ख is *kha*, a *k* with a puff of breath after it — the letter that opens *khādati*. ति is *ti*: *li-kha-ti*.

The word, taken apart — its roots and family

लिख् does not mean "write" first. It means **to scratch, to scrape, to furrow**, and "write" second — because writing *was* scratching, into palm leaf and birch bark with a stylus. The older sense stays visible in रेखा (*rekhā*), "a line, a scratch," the same root wearing an *r*.
Outside Sanskrit the trail is thin but real: Greek *ereikō*, "to tear," and

Lithuanian *riekti*, "to slice." No everyday English word descends from it — that is two roots in this chapter that left English nothing. Eastward, a different story: Hindi and Urdu *likhnā*, Bengali *lekhā*, Marathi *lihiṇe* — worn down, *tadbhava*, with Marathi's *kh* softened to *h*.

What you've built: four verbs, four ways to build a stem

Cintayati, *avagacchati*, *paṭhati*, *likhati*. Thinking plants **-अय-**; understanding is "goes" with अव in front, or *budhyate*, waking; reading and writing take a plain *-a-*, class 1 and class 6.

Your turn

Say these aloud:

- "likhati" — it writes
- what the root meant first — to scratch
- the chapter's four — *cintayati, avagacchati, paṭhati, likhati*

Before you move on

What did लिख् mean before "write," and what are the chapter's four verbs? (**To scratch**; *cintayati, avagacchati, paṭhati, likhati.*) Which plants **-अय-**, and which is a prefix on a verb you already had? (*Cintayati*; *avagacchati.*) Which verb of understanding means "wakes," and what title comes from its root? (*budhyate*; *buddha.*) Is Bengali *lekhā* tatsama or tadbhava, and which two word-histories here needed a label rather than a claim? (**Tadbhava**; ***paṭhati***'s ancestry and ***likh***'s English kin — the *punch* caution, twice.)

Chapter 9

Taking, Asking, Helping, Loving

Modes: 🚗 **voice** (4) ✓ **pen** (2) 🚗 **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can say that someone takes, asks, helps and loves in Sanskrit; I can say संस्कृतं मम प्रियम्, build a verb by putting करोति behind a noun, and point at the English word — grab, pray, friend — that each of these four roots also produced.
>
> *Say* संस्कृतं मम प्रियम्, *give* स्निह् *its older sense of stickiness and label the disputed snow connection, follow* प्रिय *west into friend, free and Friday by the p-to-f change that also made pañca into five, run the chapter's four verbs back with grab, pray and comes beside them, and sort* प्रिय *against Hindi piyā as* तत्सम *against* तद्भव *— then place* पञ्च *beside* प्रिय *as the other word that travelled in both directions at once.*

9.1 गृह्णाति (gṛhṇāti) — "takes," and English *grab*

Say "it writes," and what its root meant first. (*Likhati*; **to scratch**.) Now say "it knows" and name the syllable its class plants inside the word. (*Jānāti*; **-ना-**.) That syllable is back.

You'll want to know: गृह्णाति

Sanskrit	sound	meaning
गृह्णाति	*gṛhṇāti*	he, she, or it **takes**, seizes
ग्रहण	*grahaṇa*	a **seizing**; an eclipse

The root is ग्रह् (*grah*), class 9 — *jānāti*'s class. It plants the same syllable, and the syllable comes out **-णा-** rather than **-ना-**: a curled-back *ṛ* earlier in the word pulls the following *n* back to match it. Sanskrit tidies its consonants after the fact.

The letters in this word

गृ is *gṛ*: the vowel *ṛ* is a vowel made of *r* itself, a short buzz between *ri* and *ru* — the same vowel inside *saṁskṛta*. Then ह्ना, *h* and curled-back *ṇ* fused with a long *ā*: *gṛh-ṇā-ti*.

The word, taken apart — its roots and family

ग्रह् is PIE **ghrebh-*, "to seize." The oldest Sanskrit still writes it गृभ्णाति (*gṛbhṇāti*), with the *bh* the reconstruction predicts. English kept the same root in **grab**, **grip** and **grasp**.
Say what that means carefully, though. Sanskrit built its verb with the class-9 syllable; English built its words with other endings entirely. They are the same root wearing different suffixes — **relatives, not the same word**, exactly the caution you put on *eka* beside *one*.
Inside Sanskrit the root spreads out: ग्रह (*graha*) is a **planet**, named as the *seizer* that takes hold of a life. Eastward it wore down to Marathi *gheṇe*, the ordinary verb for taking.

Your turn

Say these aloud:

- "gṛhṇāti" — it takes
- the root and its planted syllable — *grah* … *ṇā*
- the English kin — *grab*, *grip*, *grasp*
- the worn-down Marathi grandchild — *gheṇe*

Before you move on

Which class builds *gṛhṇāti*, and which earlier verb shares it? (**Class 9**; *jānāti*.) Why **-णा-** and not **-ना-**? (**The curled-back *ṛ* pulls the *n* back to match**.) Name three English words from the same root. (**Grab, grip, grasp**.) Are they the same word as *gṛhṇāti* or

relatives of it? (**Relatives** — same root, different suffixes, like *eka* and *one*.) Is Marathi *gheṇe* tatsama or tadbhava? (**Tadbhava**.)

9.2 त — one character, met inside words you already say

Before the new one, the ones you have already met: ख · े · व. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: त

त — *ta*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *t*, it is **ta**.

What it is made of:

- a right-to-left upper shoulder curving down to an open lower tip
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has त somewhere inside it:

- भवान् / त्वम् *bhavān / tvam* — you
- तव नाम किम्? *tava nāma kim?* — what's your name?
- न चिन्ता *na cintā* — no worry / it's nothing / you're welcome
- खादति *khādati* — he, she, or it eats — the everyday eat-verb, which is not the one English is related to

9.3 पृच्छति (pṛcchati) — "asks," and the prayer at the other end of it

Say "it takes" and its English kin. (*Gṛhṇāti*; **grab**.) Say "it goes." (*Gacchati.*) Listen to the middle of that one — it comes back here.

Four ways to build a present stem: add nothing, add a vowel, plant a syllable, or add *-aya-*. Which verb took *-aya-*? (*Cintayati.*)

You'll want to know: पृच्छति

Sanskrit	sound	meaning
पृच्छति	*pṛcchati*	he, she, or it **asks**
—	*praśna*	a **question**

The root is प्रछ् (*prach*), class 6 — *likhati*'s class, a plain *-a-* on an untouched root. The root's *r* turns into the vowel *ṛ*, and the ending fuses into the doubled च्छ you already met in *gacchati.*

The letters in this word

पृ is *pṛ*, the *r*-vowel again. च्छ is the stack of two *ch* sounds held slightly long, exactly as in *gacchati.* ति closes it: *pṛch-cha-ti.* Let the middle linger.

The word, taken apart — its roots and family

प्रछ् is PIE **prek-*, "to ask," and it is one of the best-travelled roots in the family.

Latin took it as *precārī*, "to ask, to entreat" — and from that English has **pray**, **prayer**, **deprecate**, and **precarious**, which meant "held only by asking, at someone else's pleasure."
Germanic took the same root and turned its initial *p* into *f* by **Grimm's law** — the very change that made *pañca* into **five**. That is why German asks with **fragen**. Persian asks with *porsidan* and Russian with *prosit*, both the same word again.
Eastward it wore down: Hindi and Urdu *pūchnā*, Marathi *pusṇe* — *tadbhava*, with the *r*-vowel flattened to *u*.

Your turn

Say these aloud:

- "pṛcchati" — it asks
- the root — *prach*
- the Latin descendant and its English children — *precārī*, *pray*
- the German cousin with *f* — *fragen*

Before you move on

Which class builds *pṛcchati*, and which verb shares its doubled middle? (**Class 6**; *gacchati*.) What did Latin *precārī* mean, and name two English words from it. (**To entreat**; **pray**, **precarious**.) Why does German say *fragen* with an *f*? (**Grimm's law turned initial *p* into *f*** — as in *pañca* and *five*.) And is Hindi *pūchnā* tatsama or tadbhava? (**Tadbhava**.)

9.4 साहाय्यं करोति (sāhāyyaṁ karoti) — "helps," or going along with

Say "it asks" and "it takes." (*Pṛcchati*, *gṛhṇāti*.) Helping is not built like either of them. It takes two words.

Listen for sandhi today: *sāhāyyam* + *karoti* runs together as *sāhāyyaṁ karoti*, the way *aham* did before *saṁskṛtam*.

You'll want to know: साहाय्यं करोति

Sanskrit	sound	meaning
साहाय्यम्	*sāhāyyam*	**help**, assistance
साहाय्यं करोति	*sāhāyyaṁ karoti*	he, she, or it **helps**

करोति (*karoti*) is "does, makes" — the root कृ (*kṛ*), class 8, yours since Chapter 5 as करोमि (*karomi*), "I do." Same stem, familiar swap of ending: -ति for "he, she, it," -मि for "I."

So Sanskrit has no verb "to help." It has a noun for help and puts "does" behind it — a machine you can run on almost any noun.

The letters in this word

सा *sā*, हा *hā*, then य्य, य *ya* stacked on itself and held double. The final म् *m* softens to a hum before the next word, so it is written -ं: *sāhāyyaṁ karoti*.

The word, taken apart — its roots and family

साहाय्य is built on सहाय (*sahāya*), "a companion" — सह (*saha*), "with," plus आय, from the root *i*, "to go." A helper is *one who goes along with you*. Sanskrit leaves such seams showing, the way संस्कृत is *sam* "together" on कृ.

Latin names a companion by the same picture: *comes* is *com-* "with" on *īre* "to go," the root behind **exit** and **transit**.

Bengali still helps with this very word, unchanged: *sāhājjo korā*, a *tatsama* carrying the whole Sanskrit noun plus its own "do." Hindi and Marathi instead say *madad karnā* and *madat karṇe* — same machine, but with an **Arabic** word that reached them through Persian. Not everything modern comes from Sanskrit.

Your turn

Say these aloud:

- "sāhāyyaṁ karoti" — it helps
- "karomi … karoti" — I do, it does
- the two pieces of *sahāya* — *saha* "with," *āya* "going"

Before you move on

How does Sanskrit say "helps"? (साहाय्यं करोति — a noun plus "does".) What are the two pieces inside *sahāya*, and which Latin word for a companion is built the same way? (सह **"with"** + आय **"going"**; ***comes***.) Which language still helps with this exact Sanskrit noun, and which two borrowed an Arabic one instead? (**Bengali**; **Hindi and Marathi**, with *madad*.)

9.5 ं — one character, met inside words you already say

Before the new one, the ones you have already met: े · व · त. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ं

ं — *ṃ (nasal).*

It is a **nasal mark**. It is not a letter and never stands alone: it sits on a syllable and sends its sound through the nose.

Where it sits: an anusvāra dot above the top bar, nasalizing the syllable.

Worked through: न + ं = नं — *naṃ*.

You already say these words, and ं is one of the shapes inside them — the rest of their shapes are still ahead of you, so here the character stands on its own:

- *ahaṁ saṁskṛtaṁ vadāmi* — I speak Sanskrit
- *sāhāyyaṁ karoti* — he, she, or it helps — a noun plus "does," and help named as going along with someone

Writing: ं — follow the numbered strip

How ं is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ं yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at this, and find ं in it

  ं

- *Trace it:* ं three times, saying *ṃ (nasal)* as you finish each one
- *Look:* back at any page of this chapter and find ं once more

Before you move on

Which character is this — ं? Where does it send the sound? (**Through the nose.**) Name one word you already say that contains it.

9.6 स्निह्यति and प्रियम् — loving, and the word inside *friend*

Say "it helps," "it asks," "it takes." (*Sāhāyyaṁ karoti*, *pṛcchati*, *gṛhṇāti*.) One feeling left, named after something physical.

You'll want to know: स्निह्यति and प्रियम्

Sanskrit	sound	meaning
स्निह्यति	*snihyati*	he, she, or it **feels affection**
मम प्रियम्	*mama priyam*	**dear to me**

स्निह् (*snih*) means, first, **to be sticky, oily, moist**, and only then "to feel fond of." The noun स्नेह (*sneha*) is still both: *oil* and *affection*.

For everyday liking Sanskrit reaches instead for प्रिय (*priya*), "dear." With मम (*mama*), yours since Chapter 2: संस्कृतं मम प्रियम्, "Sanskrit is dear to me."

The letters in this word

स्नि stacks स *sa* on न *na* over the vowel *i* — one push, *sni*, not *si-ni*. Then ह्य, *h* and *y* fused: *snih-ya-ti*.

The word, taken apart — its roots and family

प्रिय is PIE **priHos*, "dear, beloved." Germanic turned that *p* into *f* by Grimm's law — the third time you have watched it happen: **friend** is "the loving one," **free** meant "beloved of the household" before "not a slave," and **Friday** is the day of *Frigg*, whose name is the same word. Eastward it took both roads at once: प्रिय sits unchanged in Hindi, Marathi and Bengali, a *tatsama*; worn down it is Hindi पिया (*piyā*), "beloved," a *tadbhava*.

स्निह् is the opposite case. It may belong with the root behind **snow** —

snow being what sticks — but that is argued, so keep it labelled.

What you've built: four verbs, and a taproot

Gṛhṇāti, *pṛcchati*, *sāhāyyaṁ karoti*, *snihyati* — seizing, asking, going along with, sticking. Four physical pictures, each reaching west (*grab*, *pray*, *comes*, *friend*) and east into living speech.

Your turn

Say these aloud:

- "saṁskṛtaṁ mama priyam" — Sanskrit is dear to me
- स्नेह, twice over — oil, and affection
- *friend*, *free*, *Friday* — all from *priya*

Before you move on

Give this chapter's four, and what स्निह् meant before "love." (*Gṛhṇāti, pṛcchati, sāhāyyaṁ karoti, snihyati*; **sticky, oily**.) Three English words from प्रिय, and what turned its *p* into *f*? (**Friend, free, Friday**; **Grimm's law**, as in *fragen* and *five*.) Which English number's *f* is **not** that law? (***Four***, copying *five*.) Which earlier word travelled both ways as *priya* does, and is *piyā* tatsama or tadbhava? (पञ्च — east to *panj* and **Punjab**, "five waters," west to Greek *pente*; *piyā* is **tadbhava**.)

>
> *Say* अन्नम्*, name the root* अद् *it shares with* खादति*'s cousin* अत्ति*, and state the three grammatical genders Sanskrit sorts every noun into, tying the neuter* -म् *running through the chapter back to the neuter numeral forms of Chapter 6.*

10.1 पानीयम् (pānīyam) — "water," the thing to be drunk

Say "Sanskrit is dear to me." (*Saṁskṛtaṁ mama priyam.*) Every word so far has named an action. Now for the nouns you would actually reach for — starting with the one you would ask for first.

You'll want to know: पानीयम्

Sanskrit	sound	meaning
पानीयम्	*pānīyam*	**water**
—	*pibati*	he, she, or it **drinks**

पानीयम् is neuter, and its final **-म्** marks that — a whole family of everyday nouns ends this way, and it will keep coming back this chapter.

The letters in this word

पा is *pā*, the long-*ā* you have said since नाम. नी stacks न *na* under the long-*ī* sign ी. यम् closes it: *y*, the inherent *a*, then म् with its vowel stripped by the *halant* — *pā-nī-ya-m*.

The word, taken apart — its roots and family

पानीयम् is built on the root पा (*pā*), "to drink," plus **-अनीय** (*-anīya*), a suffix meaning "fit to be ~ed." Literally: **the thing that is to be drunk**.
The root is PIE **peh3-**, "to drink." Latin took it into *potare*, and from that English has **potion** and **poison** — a drink, and a drink gone wrong.
Eastward, पानीयम् wore down through Prakrit *pāṇīya* into the everyday water-word of the daughter languages: Hindi पानी (*pānī*), Gujarati *pāṇī*, and, in the Bangladesh register of Bengali, *pani* — every one तद्भव, worn down by ordinary speech, not carried over whole. Sanskrit's own oldest water-words, *jala* and *udaka*, took a different road entirely; this is not that word.

Your turn

Say these aloud:

- "pānīyam" — water
- the root and its suffix — *pā* "drink" plus *-anīya* "fit to be"
- the worn-down grandchildren — *pānī*, *pāṇī*, *pani*

Before you move on

What does पानीयम् literally mean, and from which two pieces? (**"The thing to be drunk"** — *pā* "drink" plus *-anīya* "fit to be".) Name two English words from the same PIE root. (**Potion, poison**.) Is Hindi *pānī* तत्सम or तद्भव? (तद्भव.) And how did you say "dear to me" last chapter? (*Priyam*.)

10.2 स — one character, met inside words you already say

Before the new one, the ones you have already met: व · त · ं. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: स

स — *sa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *s*, it is **sa**.

What it is made of:

- a descending left stem curling through the central hook and diagonal tail
- a left-to-right middle crossbar
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has स somewhere inside it:

- नमस्ते *namaste* — hello (lit. "a bow to you")
- नमस्कारः *namaskāraḥ* — hello (lit. "the making of a bow")
- अस्ति *asti* — is
- मम नाम ... अस्ति *mama nāma … asti* — my name is…

Writing: स

How स is written, stroke by stroke

- **4.** descend the right stem top-to-bottom
- **5.** lift and draw the top shirorekhā left-to-right

Pen lifts: 2. The pen comes up 2 times and no more.

10.3 क्षीरम् (kṣīram) — "milk," and the dessert it left behind

Say "water," and the root it is built on. (*Pānīyam*; पा, "to drink.") Not every drink-word in Sanskrit has so tidy an answer.

You'll want to know: क्षीरम्

Sanskrit	sound	meaning
क्षीरम्	*kṣīram*	**milk**
क्षीर	*kṣīra*	milk — the bare stem, still living inside Hindi *khīr*

Neuter again, marked by the same **-म्** as पानीयम्.

The letters in this word

क्ष is a new stacked pair: क *k* fused under ष, the hissed retroflex *s* — together they say *kṣa*, one push, not two. Then the long-*ī* sign ी, र *ra*, and the neuter म् you already know: *kṣī-ra-m*.

The word, taken apart — its roots and family

Where पानीयम्'s history is settled, क्षीरम्'s is not. One account traces it to an old Proto-Indo-European word for milk; another argues it was borrowed from a substrate language spoken where Indo-Iranian speakers first arrived in the region. Neither side has won.
What is clear is the family it sits in: Avestan **xšuuidi-** and Persian *šir* say roughly the same word, but as **relatives**, not children — all three

come down from one shared Proto-Indo-Iranian ancestor, the way *gṛhṇāti* and English *grab* are cousins rather than the same word wearing different clothes.
The word's liveliest descendant is not a drink. Hindi खीर (*khīr*) is a sweet rice pudding cooked in milk — worn down, तद्भव — and English borrowed that dessert whole, as **kheer**.

Your turn

Say these aloud:

- "kṣīram" — milk
- the two disputed accounts — an old root, or a borrowed one
- the dessert it became — *khīr*, borrowed into English as *kheer*

Before you move on

Is क्षीरम्'s own origin settled or disputed? (**Disputed** — inherited, or borrowed from a substrate.) Are Persian *šir* and Sanskrit *kṣīram* parent and child, or relatives? (**Relatives**, from one shared ancestor.) What English word for a dessert comes from Hindi *khīr*? (**Kheer**.) And what does *pānīyam* literally mean? (**"The thing to be drunk."**)

10.4 अन्नम् (annam) — "food," the eaten thing

Say "milk" and "water." (*Kṣīram*, *pānīyam*.) One more thing you would ask for, and this one carries a root you already own.

You'll want to know: अन्नम्

Sanskrit	sound	meaning
अन्नम्	*annam*	**food**, grain
खाद्यम् अन्नम्	*khādyam annam*	**edible food** — खादति's own adjective on it

Neuter, and **-म्** again — the third noun running.

The letters in this word

अ opens bare, no consonant to carry it. न्न doubles न *na* onto itself, held a beat longer than one *n* would be. म् closes it, the same stripped-vowel neuter ending: *an-na-m*.

The word, taken apart — its roots and family

Chapter 7 taught खादति, the everyday word for eating, and set beside it its untaken cousin: अद्, PIE **ed-**, the very root of English *eat*, which Sanskrit keeps alive as अत्ति.
अन्नम् is built on that same अद्, plus the old participle suffix **-न** — "eaten." The *d* and the *n* fuse into the doubled न्न you just sounded out. Food, named this way, is not a thing but an **event**: the thing that has been eaten.

Grammar Lens: three genders, one small system

Every noun in this chapter has ended in **-म्**, and that is not coincidence: Sanskrit sorts every noun into one of **three genders** — masculine, feminine, and neuter — the same system that put a gendered form on the numerals back in Chapter 6, where the daughter languages inherited specifically the **neuter** forms, *trīṇi* and *catvāri*. This book teaches only the plain nominative singular of each noun, never the full run of cases and numbers behind it — but the gender is worth carrying, because it is not optional, and it is not guessable from meaning alone.

Your turn

Say these aloud:

- "annam" — food
- the root and its participle — *ad* "eat" plus *-na* "eaten"
- the three genders — masculine, feminine, neuter

Before you move on

What does *annam* literally mean, and which root is it built on? (**"Eaten"**; अद्, the cousin of English *eat*.) Which everyday verb shares that root without being it? (*Khādati*.) Which gender have all

three nouns this chapter shared? (**Neuter**, marked by **-म्**.) And which gendered form did the numerals hand the daughter languages back in Chapter 6? (**The neuter one** — *trīṇi*, *catvāri*.) Name this chapter's three words. (*Pānīyam*, *kṣīram*, *annam* — the things you would ask for.)

10.5 ी — one character, met inside words you already say

Before the new one, the ones you have already met: त · ं · स. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ी

ी — *ī*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: a curl to the right with a tail over the top bar.

Worked through: न + ी = नी — *nī*.

You already say these, and every one of them has ी somewhere inside it:

- पानीयम् *pānīyam* — water — "the thing to be drunk," and the exact word your neighbors' पानी grew from

Writing: ी — follow the numbered strip

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Devanagari recognizer, class 49 (ii sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ी is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ी yourself — slowly, and larger than it is printed. The short bar on top stays grey in the strip: in a word it is part of the headline, which you draw last, once, across the whole word.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at this, and find ी in it

  पानीयम्

- *Trace it:* ी three times, saying *ī* as you finish each one
- *Look:* back at any page of this chapter and find ी once more

Before you move on

Which character is this — ी? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ī* on; takes the built-in *a* off.**) Name one word you already say that contains it.

10.6 स्त — two known consonants, now joined

Read अस्ति and say its meaning: *asti*, "is." Point to स, the virama ्, and त. Every sign and the word itself are already known; this lesson only makes their join visible.

Writing — observe and trace the conjunct

Watch the pieces close up: स + ् + त → स्त. The virama removes the *a* from स, so the consonants touch: *s* followed by *ta*.

Keep स्त visible. Trace the printed join once with a fingertip, then once with a pencil on tracing paper. Preserve the headline and the smaller first consonant; do not add an *a* between the two sounds.

Before you move on

What does the join inside अस्ति say? (**s + ta**, with no vowel after the first consonant.)

10.7 अस्ति — copy one known word with its joined middle

Read अस्ति aloud and say "is." This is not new vocabulary. Find its three parts: अ + स्त + ि. The short-*i* sign is written before the joined shape you read it after: स्ति, *sti*.

Writing — guided conjunct copy

Keep अस्ति visible and copy it once. Pause after अ, then copy the joined स्त, then place the short-*i* sign to make स्ति. Keep one continuous headline across the joined cluster.

Compare your word with अस्ति. Check the independent अ, the smaller first consonant in स्त, and the short-*i* sign. Read the finished word and say its meaning.

Before you move on

Which part of अस्ति is a conjunct? (स्त, *s* joined to *ta*.)

10.8 अस्ति — cover the model, keep the join

Look at अस्ति for five seconds. Say *asti*, "is," and point to the conjunct स्त. Then cover the whole word and every romanized answer.

Writing — delayed conjunct copy

Wait ten seconds. With no visible answer, write अस्ति from memory. Do not split स and त with a vowel: preserve the joined स्त in the middle.

Only after the word is complete, uncover अस्ति. Compare the independent vowel, the conjunct, and the short-*i* sign. Repair only the first difference, then read the word and give its meaning.

Before you move on

Why does स not say *sa* inside this word? (**Its vowel is removed so it can join त in स्त.**)

10.9 A heard word — write "is" with its conjunct

Cover every answer below this line. You will hear one old word and its old meaning. There is no visible Devanagari model and no romanized answer.

Writing — conjunct dictation

Hear: asti, "is"

Write the word from sound and meaning alone. Stop after one attempt. Now uncover and compare: अस्ति. Check अ, joined स्त, and the short-*i* sign.

Repair only the first difference. Credit requires the whole Devanagari word; a Latin-letter transliteration or separated consonants do not count.

Before you move on

This known word has now moved from observing a conjunct to independent transcription. Which writing-runway debts remain? (**Connected text and broader independent recall.**)

Chapter 11

The People You'd Introduce

Modes: 🚗 **voice** (1) 👁 **eyes** (4) ✓ **pen** (2) 🚗 **Hands-free start:** the first 2 of 7 lessons.

> ***By the end of this chapter:*** I can name a friend, a family, a brother and a sister in Sanskrit, and say which of those words travelled with English and which quietly did not.
>
> *Say* भगिनी*, name the share-word* भग *it is built on, name* स्वसृ *as the real but non-living PIE cousin of English sister, and run the chapter's four people back together with the roads each one travelled.*

11.1 मित्रम् (mitram) — "friend," and the god of the given word

Say "food," and its gender. (*Annam*; **neuter**.) The last three words named things you would ask for. This one names someone you would introduce.

Say "dear to me." (*Mama priyam.*) A friend is someone who is.

You'll want to know: मित्रम्

Sanskrit	sound	meaning
मित्रम्	*mitram*	**friend**
मित्रम् मम	*mitram mama*	**my friend**

The letters in this word

मि is *mi*, a short vowel sign under म. त्र stacks त *ta* under र *ra*, said as one push, *tra*. म् closes it, neuter again: *mi-tra-m*.

The word, taken apart — its roots and family

मित्रम् comes from Proto-Indo-Iranian ***mitras**, "that which causes binding" — a promise, a pact, a bond between two people. The same word names **Mithra**, the Avestan and Zoroastrian god of covenant and contract: a friendship, at the root, is a kind of oath.
It travelled east with almost no change at all: Hindi and Marathi मित्र, Gujarati *mitra*, all तत्सम, lifted straight out of Sanskrit rather than worn down the way पानीयम् became *pānī*.

Grammar Lens: a person, grammatically neuter

Here is the proof that gender is not about meaning. मित्रम् names a person, and Sanskrit still marks it **neuter** — the same **-म्** you have now seen on water, milk, and food. A noun's gender is a fact about the *word*, inherited with its shape, not a fact about who or what it points to.

Your turn

Say these aloud:

- "mitram" — friend
- the god it shares a name with — *Mithra*
- three languages that kept it whole — Hindi, Marathi, Gujarati

Before you move on

What does the root behind मित्रम् mean, and what god shares it? (**"To bind"**; **Mithra**, the covenant god.) Is मित्र in Hindi तत्सम or तद्भव? (तत्सम.) What gender is *mitram*, and why is that surprising? (**Neuter** — it names a person, but gender tracks the word's class, not the person.)

11.2 कुटुम्बम् (kuṭumbam) — "family," a word that made a round trip

Say "friend," and its gender. (*Mitram*; **neuter**.) One person's name, now the group everyone belongs to.

You'll want to know: कुटुम्बम्

Sanskrit	sound	meaning
कुटुम्बम्	*kuṭumbam*	**family**, household
मम कुटुम्बम्	*mama kuṭumbam*	**my family**

The letters in this word

कु is *ku*, a short-*u* sign under क. टु repeats it under the curled-back ट, the retroflex *t* you first met in संस्कृत's neighbours. म्ब stacks ब *ba* under a silent म्, and a final म् closes it: *ku-ṭu-mba-m*.

The word, taken apart — its roots and family

Every etymology so far in this chapter has run from Sanskrit outward. This one runs the other way first. कुटुम्बम् is a loanword **into** Sanskrit from a Dravidian language, compared to Tamil **kuṭimai**, "family, lineage, allegiance," itself built on **kuṭi**, "a hut, a settlement." A family, on this account, is literally *those who share one roof*.
From Sanskrit the finished word travelled onward as a formal, learned तत्सम — Hindi कुटुंब and Bengali *kuṭumbo* — and then made a full circle: Kannada, Telugu and Tamil today all hold this same Sanskrit-shaped form, borrowed back into languages that, on one account, lent Sanskrit the word in the first place.

Your turn

Say these aloud:

- "kuṭumbam" — family
- which family lent Sanskrit the word — Dravidian
- the languages that later borrowed it back — Kannada, Telugu, Tamil

Before you move on

Which direction did कुटुम्बम् travel first — into Sanskrit, or out of it? (**Into it** — a Dravidian loanword.) What Tamil word is it compared to, and what does it literally build on? (**kuṭimai**, "family, lineage," on **kuṭi**, "a hut.") Which languages later borrowed the Sanskrit-shaped form back? (**Kannada, Telugu, Tamil**.)

11.3 ह — one character, met inside words you already say

Before the new one, the ones you have already met: ं · स · ी. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ह

ह — *ha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *h*, it is **ha**.

What it is made of:

- a descending right stem joined to the leftward shoulder and clockwise hooked body
- a separate down-right outer curve and tail
- the top shirorekhā

You already say these, and every one of them has ह somewhere inside it:

- अहम् *aham* — I
- अहं संस्कृतं वदामि *ahaṁ saṁskṛtaṁ vadāmi* — I speak Sanskrit
- स्निह्यति · प्रियम् *snihyati · priyam* — he, she, or it loves, and what is dear — affection named as stickiness, and the word behind English friend

11.4 भ्राता (bhrātā) — "brother," the same word, worn two ways

Say "family" and "friend." (*Kuṭumbam*, *mitram.*) Now for the first person inside that family — and the plainest cousin in this book yet.

You'll want to know: भ्राता

Sanskrit	sound	meaning
भ्राता	*bhrātā*	**brother**
मम भ्राता	*mama bhrātā*	**my brother**

Masculine — the first noun this chapter has not ended in **-म्**.

The letters in this word

भ्रा stacks र *ra* under भ *bha*, one push, then the long-*ā*: *bhrā*. ता closes it, *ta* plus long-*ā* again: *bhrā-tā*.

The word, taken apart — its roots and family

भ्राता is PIE **bhrāter-**, and the descent is about as unbroken as this family gets: English **brother**, Latin **frāter**, Greek **phrātēr** are not relatives of भ्राता — they **are** भ्राता, six thousand years and three different roads later.

One of those roads runs straight through the daughter languages. भ्राता wore down through Prakrit *bhāi* into Bengali *bhāi* and Gujarati *bhāī*, both तद्भव — the same word again, just worn smooth by everyday speech rather than lifted whole like मित्र.
Grammatically, भ्राता is a fossil of its own: an old kinship word built on the stem भ्रातृ (*bhrātṛ*), whose nominative singular lengthens the final vowel to -आ instead of following the plain patterns you have seen so far.

Your turn

Say these aloud:

- "bhrātā" — brother
- its English, Latin, and Greek selves — brother, frāter, phrātēr
- its worn-down grandchildren — *bhāi*, *bhāi*

Before you move on

Is English *brother* a cousin of भ्राता, or the same word? (**The same word**, unbroken from PIE.) Which two daughter languages wore it down to *bhāi*? (**Bengali, Gujarati**.) What gender is भ्राता, unlike every noun before it this chapter? (**Masculine**.)

11.5 भगिनी (bhaginī) — "sister," one with a share

Say "brother," and name the English word it is not a cousin of but literally **is**. (*Bhrātā*; **brother**.) The matching word does not tell the same story.

You'll want to know: भगिनी

Sanskrit	sound	meaning
भगिनी	*bhaginī*	**sister**
मम भगिनी	*mama bhaginī*	**my sister**

Feminine — marked by the -*ī* you can hear at the end.

The letters in this word

भ is *bha*. गि is ग *ga* under a short-*i* sign. नी closes it, न under the long-*ī* sign — the same feminine ending you will meet again this book: *bha-gi-nī*.

The word, taken apart — its roots and family

Here the pattern breaks. भगिनी is built on भग (*bhaga*), "a share, good fortune," plus the feminine suffix *-inī*: literally, "one with a share."
Sanskrit's actual cousin of English **sister** is a different word, स्वसृ (*svasṛ*), from the same PIE root as *bhrātā*'s. It is real, attested in the old texts — but it did not become the everyday word. भगिनी did, and भगिनी is what wore down eastward: Bengali *bon* and Gujarati *bahen*, both तद्भव, both built on भग, not स्वसृ.
So the honest connection to draw for "sister" is not the one nearest to English. Brother and sister do not travel the same road here — one is the same word worn down; the other took a different word entirely and left the matching one behind.

What you've built: four people

Mitram, *kuṭumbam*, *bhrātā*, *bhaginī* — a friend, a family, a brother, a sister. One borrowed into Sanskrit and then borrowed back out; two travelled in lockstep with their English match; one quietly swapped words along the way.

Your turn

Say these aloud:

- "bhaginī" — sister
- what it is built on — *bhaga* "a share" plus *-inī*
- the word it is NOT built on — *svasṛ*, the real cousin of *sister*

Before you move on

What does भगिनी literally mean? (**"One with a share."**) What is the actual PIE cousin of English *sister*, and why is it not the word we learned? (स्वसृ — attested, but never the living word.) Which two daughter languages descend from भगिनी instead? (**Bengali,**

Gujarati.) Name this chapter's four people. (*Mitram, kuṭumbam, bhrātā, bhaginī.*)

11.6 ए — one character, met inside words you already say

Before the new one, the ones you have already met: स · ी · ह. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ए

ए — *e*.

It is an **independent vowel**: the full-size letter a vowel wears when it opens a word and has no consonant to lean on. Inside a word the same vowel is written as a small sign instead.

What it is made of:

- a long left stem joined to the descending tail
- a shorter right stem with an inward hook
- the top shirorekhā

You already say these, and every one of them has ए somewhere inside it:

- एक द्व त्रि चतुर् पञ्च *eka dva tri catur pañca* — one to five — Old Indo-Aryan ancestors preserved in Sanskrit, and cousins of the English ones
- एक · द्व · त्रि · चतुर् · पञ्च *eka · dva · tri · catur · pañca* — the Sanskrit, Latin, and English number family and the sound laws between them

Writing: ए

How ए is written, stroke by stroke

- **1.** descend the left stem, curve right through the lower shoulder, and sweep down through the tail without lifting
- **2.** lift and descend the shorter right stem into its inward hook
- **3.** lift and draw the top shirorekhā left-to-right

Pen lifts: 2. The pen comes up 2 times and no more.

Which character is this — ए? What sound does it carry? (***e***.) Name one word you already say that contains it.

11.7 तव नाम किम्? — and the reason you might not say it that way

Two words for **you**. Say the familiar one. Then say the one you would use on meeting a stranger, and say what is strange about it.

The exchange

Six turns, and the only thing that moves is how much respect is in the air.

- *Say it:* the familiar question — *tava nāma kim?*
- *Say it:* the same question to someone you have not met — *bhavataḥ nāma kim?*
- *Say it:* the answer, with your own name in it — *mama nāma … asti*
- *Say it:* agree that you understood — *ām*
- *Say it:* that meeting them is a joy — *ānandaḥ*

Why it's said this way

Bhavān is not a second-person word wearing a polite coat. It is a **third-person** word — *your honour* — and it drags the whole sentence with it: the verb turns third-person, and *tava* becomes *bhavataḥ*. That is worth holding beside the way you already know a language to do this:

	familiar	**respectful**
the word for you	*tvam*	*bhavān*
grammatical person	second	**third**
your, in the question	*tava*	*bhavataḥ*

Making respect out of the third person is a different device from

making it out of the plural. Both end in the same place — you avoid pointing straight at the person — and only one of them changes the verb.

Across the family

Four things the greetings carry that no translation of them carries:

- the greeting **is a bow** — the hands come together, and the word says so
- thanks is spoken rarely between intimates, because it puts distance in
- welcoming someone in is a duty owed to a guest, not a pleasantry
- **ām** agrees; it does not merely acknowledge that you heard

Each of these is about what the word *does* between two people. Say the wrong one at the wrong moment and the grammar stays perfect.

Before you move on

Which grammatical person does *bhavān* take? (**Third.**) Between close friends, is thanking a warm thing to do or a distancing one? (**Distancing.**)

Chapter 12

The Face, Part One

Modes: **voice** (1) **eyes** (3) **pen** (1) **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can name an eye, an ear and a mouth in Sanskrit, say why eyes take a dual number, and say which of the three words has a settled Western cousin and which do not.
>
> *Say* मुखम्*, report both scholarly accounts of its origin without choosing between them, and run* अक्षि*,* कर्णः *and* मुखम् *back together against their daughter-language descendants and the neuter gender most of them share.*

12.1 अक्षि (akṣi) — "eye," and the number Sanskrit built for it

Say "sister." (*Bhaginī.*) The people you would introduce are done. Now for the face you would check on someone with.

You'll want to know: अक्षि

Sanskrit	sound	meaning
अक्षि	*akṣi*	**eye**
—	*akṣiṇī*	**the two eyes**

Neuter, like most of this book's shortest nouns.

The letters in this word

अ opens bare. क्षि is the same क्ष conjunct you sounded out in क्षीरम्, now carrying a short-*i* instead of a long one: *a-kṣi*.

The word, taken apart — its roots and family

अक्षि is PIE **h3ekw-**, and the descent runs almost as clean as *bhrātā*'s: English **eye**, Latin **oculus** (→ *ocular*, *monocle*), Lithuanian **akìs** — one root, barely disguised anywhere. It carries straight into Hindi and Gujarati *āṅkh*, both inherited, not borrowed back the way मित्र was. And eyes are exactly the reason Sanskrit keeps a **dual number** at all — the exactly-two form Chapter 6 built around *dvau*, "two," rather than an ordinary count word. A single eye is अक्षि; the two you were born with are not a small plural, they are *akṣiṇī* — grammar built for a body that comes in pairs.

Your turn

Say these aloud:

- "akṣi" — eye
- its English and Latin selves — eye, oculus
- the dual form for two of them — *akṣiṇī*

Before you move on

Name two English words from the same root as अक्षि. (**Eye**, and, through Latin, **ocular** or **monocle**.) What is the dual form for "two eyes," and what grammatical number is that? (*akṣiṇī*; the **dual**, the same category as *dvau*.) And what did you learn just before this? (*Bhaginī*, sister.)

12.2 कर्णः (karṇaḥ) — "ear," a word without a settled parent

Say "eye," and its dual form for two of them. (*Akṣi*; **akṣiṇī**.) The next sense is one Sanskrit itself never traced to its source.

You'll want to know: कर्णः

Sanskrit	sound	meaning
कर्णः	*karṇaḥ*	**ear**
—	*karṇau*	**the two ears** — dual again

Masculine, unlike *akṣi*.

The letters in this word

कर् is *kar*, the *r* you have sounded since संस्कृत. ण is the curled-back retroflex *n*, familiar from *gṛhṇāti*. The final ः, a *visarga*, breathes the word out on an echo of its own vowel: *kar-ṇa-ḥ*, the same puff first heard closing नमस्ते.

The word, taken apart — its roots and family

Where *akṣi*'s ancestry runs clean back to PIE, कर्णः's does not run anywhere agreed. Proposed roots mean "a defect," "a point," "a handle," and "to hear" — and no single account has won out over the others.
What is certain is where it went. कर्णः wore down through Prakrit **kaṇṇa** into Gujarati *kān* — and changed gender on the way: masculine in Sanskrit, feminine in Gujarati. A word can cross a language boundary and lose the very grammar that first classified it.

Your turn

Say these aloud:

- "karṇaḥ" — ear
- the four disputed guesses — a defect, a point, a handle, to hear
- the daughter word and its new gender — *kān*, now feminine

Before you move on

Is कर्णः's root settled or disputed? (**Disputed** — four guesses, no winner.) What ending marks it masculine, and where did you meet that sound before? (-अः, a visarga, first heard on नमस्ते.) What gender does the Gujarati descendant *kān* take, and is that the same

as Sanskrit's? (**Feminine — it changed.**)

12.3 ठ — one character, met inside words you already say

Before the new one, the ones you have already met: ी · ह · ए. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ठ

ठ — *ṭha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṭh*, it is **ṭha**.

What it is made of:

- a short top-to-bottom central stem
- a counterclockwise closed round body
- the top shirorekhā

You already say these, and every one of them has ठ somewhere inside it:

- पठति *paṭhati* — he, she, or it reads — reading as reciting aloud, and the two ways a Sanskrit word survives into a modern language

Writing: ठ

How it is written — 2 strokes · 1 pen lift · 3 movements

12.4 मुखम् (mukham) — "mouth," a word two families both claim

Say "ear" and "eye." (*Karṇaḥ*, *akṣi*.) One more, and this one's ancestry is argued over by two whole language families, not just two scholars.

You'll want to know: मुखम्

Sanskrit	sound	meaning
मुखम्	*mukham*	**mouth**, face
सम्मुखम्	*sammukham*	**face to face** — सम् "together" plus मुखम्

Neuter, back to the family's usual ending.

The letters in this word

मु is म under a short-*u* sign. ख is the aspirated *kha* you met in खादति — a *k* with a puff of breath, distinct from plain क. म् closes it: *mu-kha-m*.

The word, taken apart — its roots and family

मुखम् is genuinely contested territory. One line of scholarship derives it from Dravidian; another argues for an Indo-European source, pointing to its presence in the Rigveda and in Iranian languages. Neither claim has settled the question, and this book takes no side either.
What is not contested is where it lives now. Bengali *mukh* keeps it whole, a तत्सम — while Gujarati holds a worn-down तद्भव doublet, **moḍhũ**, alongside its own formal **mukh**. That is the same shape this

book already showed with चिन्ता and पठति: one word, two roads into the same daughter language, once carried whole and once worn down by speech. मुखम् closes this chapter neuter, like every noun here but *bhrātā*.

Your turn

Say these aloud:

- "mukham" — mouth, face
- the two disputed families — Dravidian, or Indo-European
- its two Gujarati faces — *mukh*, and worn-down *moḍhũ*

Before you move on

Which two language families both claim मुखम्? (**Dravidian, and Indo-European** — unsettled.) Name मुखम्'s two Gujarati descendants and which is तत्सम, which तद्भव. (**mukh**, तत्सम; **moḍhũ**, तद्भव.) Name this chapter's three words for the face. (*Akṣi, karṇaḥ, mukham.*)

12.5 अस्मि · असि · अस्ति — and the words you are allowed to drop

Say that you are well. Then say it again with the word for **I** taken out, and notice that nothing was lost.

Grammar Lens: one verb, three shapes

One verb, and the person is in its ending rather than in front of it:

person	the verb	with a subject
I	अस्मि *asmi*	*ahaṁ kuśalī asmi*
you (familiar)	असि *asi*	*tvam kuśalī asi*
he, she, your honour	अस्ति *asti*	*bhavān kathaṁ asti?*

The third row is why the respectful word costs more than a swap. *Bhavān* is a third-person word, so it takes the third-person verb — the courtesy reaches the end of the sentence.

Why it's said this way

Two rules that look alike and are opposites:

- **The pronoun may go.** *Asmi* already says *I*. Putting *aham* in front of it adds emphasis, not information.
- **The copula usually stays.** *Mama nāma … asti* keeps its *asti* where many of India's modern languages would still need theirs and where Russian would drop it outright.

And one place where the second rule bends: in *tava nāma kim?* the *asti* goes, because the question-word is doing the work alone.
So the test is not *does Sanskrit like short sentences*. It is **what is already carried elsewhere in the sentence** — by a verb ending, or by a question word.

Your turn

Say these aloud:

- you are well, the short way — *kuśalī asmi*
- wave away a thank-you — *na cintā*
- tomorrow — *śvaḥ*

Śvaḥ is the pattern's limit case: one word, and it means the day after this one. No preposition, no counting, nothing to hang it on. Some meanings are lexical, and no amount of grammar predicts them.

Before you move on

Which is safer to drop in Sanskrit — the pronoun, or the verb *to be*? (**The pronoun.**) What licenses dropping *asti* in *tava nāma kim?* (**The question word carries it.**)

Chapter 13

The Face, Part Two

Modes: 🚗 **voice** (1) 👁 **eyes** (2) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 4 lessons.

> ***By the end of this chapter:*** I can name a nose and a heart in Sanskrit, say which daughter-language nose-word नासिका is a relative of rather than a parent of, and close the chapter's twelve nouns against the cousin words this book has already shown.
>
> *Say* हृदयम्, *name the PIE root it shares with heart, cor and kardia, place* हृदयम् *beside the same root's other independent inheritances, and run all twelve of this tranche's nouns back together by group and by gender.*

13.1 नासिका (nāsikā) — "nose," kin to two words but parent of neither

Say "mouth." (*Mukham.*) One more part of the face — and a chance to correct a connection this book has not yet made carefully enough.

You'll want to know: नासिका

Sanskrit	sound	meaning
नासिका	*nāsikā*	**nose**
मम नासिका	*mama nāsikā*	**my nose**

Feminine, marked by the same -आ you will hear again.

The letters in this word

ना is *nā*, न under the long-*ā* sign. सि is स under a short-*i*. का closes it, क under long-*ā* again: *nā-si-kā*.

The word, taken apart — its roots and family

नासिका is built on an older word, नासा (*nāsā*), "nose," plus the diminutive suffix *-ikā*. नासा itself, and the still-older root नस् (*nas*) behind it, go back to PIE **nehas-**, the unbroken root of English **nose** and Latin **nasus** (→ *nasal*).
Here is the correction worth making carefully: नासिका is *not* the ancestor of Bengali *nāk* or Gujarati *nāk*. Both of those wore straight down from नस् itself, through Prakrit **ṇakka**, by adding a completely different suffix. नासिका and नाक share a root, the way *grah* and English *grab* share one — **relatives, not parent and child**. Reaching for the nearest-looking Sanskrit word is not always reaching for the right ancestor.

Your turn

Say these aloud:

- "nāsikā" — nose
- the older word and root beneath it — *nāsā*, *nas*
- the word नासिका is NOT the parent of — *nāk*

Before you move on

What PIE root is नासिका's family from, and name two of its Western cousins. (**nehas-**; **nose**, **nasus**/*nasal*.) Is नासिका the ancestor of Bengali *nāk*, or its relative? (**Relative** — both descend from नस्, neither from the other.) What did you learn just before this? (*Mukham*, mouth.)

13.2 ध — one character, met inside words you already say

Before the new one, the ones you have already met: ह · ए · ठ. Say what each of them does.

> One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ध

ध — *dha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *dh*, it is **dha**.

What it is made of:

- an upper spiral ending in a rightward shoulder
- a lower bowl
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has ध somewhere inside it:

- धन्यवादः *dhanyavādaḥ* — thank you

Writing: ध

How ध *is written, stroke by stroke*

- **1.** start at the upper spiral's inner crossing, curl around the small opening, widen left and down around the outer loop, then sweep right through the shoulder
- **2.** without lifting, turn back left along the shoulder to the left waist
- **3.** sweep down and around the lower bowl to its right junction
- **4.** climb up the right stem to the headline

- **5.** descend the right stem top-to-bottom
- **6.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows four movements; most native writers draw ध in two strokes (81% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Opiaterein, 'Deva-ध-order.gif', strokes 1–4, Wikimedia Commons, 10 May 2009.

Your turn

- *Look:* at this, and find ध in it

  धन्यवादः

- *Trace it:* ध three times, saying *dha* as you finish each one
- *Look:* back at any page of this chapter and find ध once more

Before you move on

Which character is this — ध? What sound does it carry? (***dha***.) Name one word you already say that contains it.

13.3 हृदयम् (hṛdayam) — "heart," a root barely disguised anywhere

Say "nose," "eye," and "mouth." (*Nāsikā*, *akṣi*, *mukham*.) One last word, and it names what this whole chapter has been checking on.

You'll want to know: हृदयम्

Sanskrit	sound	meaning
हृदयम्	*hṛdayam*	**heart**
मम हृदयम्	*mama hṛdayam*	**my heart**

Neuter — the family this whole chapter keeps returning to.

The letters in this word

हृ is *hṛ*: ह *ha* carrying the vocalic *ṛ*, the same buzzing vowel you first sounded out in *gṛhṇāti*. द is *da*, य is *ya*, म् closes it neuter: *hṛ-da-ya-m*.

The word, taken apart — its roots and family

हृदयम् is PIE **kerd-**, and almost nothing about it has changed shape on the way anywhere: English **heart**, Latin **cor**, genitive **cordis** (→ *cordial*, *courage*, *accord*), Greek **kardia** (→ *cardiac*) — one root, four languages, all still recognisable. The same root anchors Italian **cuore**, Portuguese **coração**, and Russian *serdtse*, each an independent inheritance of the identical PIE ancestor rather than a loan from any of the others.
Eastward, Bengali *hridoy* keeps हृदयम् whole, a तत्सम; its worn-down twin *hiya* survives only in poetry and song, not everyday speech — the rarer pairing, where the carried-whole word is the common one and the worn-down word is the rare one.

What you've built: twelve words, three rooms

Three groups, twelve nouns: what you would ask for (*pānīyam*, *kṣīram*, *annam*), who you would introduce (*mitram*, *kuṭumbam*, *bhrātā*, *bhaginī*), and your own face (*akṣi*, *karṇaḥ*, *mukham*, *nāsikā*, *hṛdayam*). Almost every one of them ended in the neuter **-म्** you first named beside अन्नम् — and almost every one pointed at a word some other language in this project already teaches as its own.

Your turn

Say these aloud:

- "hṛdayam" — heart
- four cousins across four languages — heart, cor, kardia, cuore

- the Bengali twin kept whole, and the one kept only in poetry — hridoy, hiya

Before you move on

Name three languages, besides English, whose word for heart shares हृदयम्'s root. (Any three of **Latin, Greek, Italian, Portuguese, Russian**.) Which Bengali form of "heart" is everyday, and which survives only in poetry? (*hridoy*, everyday; *hiya*, poetry.) What gender has run through nearly this entire chapter's nouns? (**Neuter**.) And what was the very first word of this chapter? (*Pānīyam*, water.)

13.4 Five parts, and three different kinds of ancestry

Ear, nose, heart. Say all three before you read on.

Across the family

Five words, and they do not sort into one story. Sorted by how much anyone can actually claim about where they came from:

word	part	how secure the ancestry is
हृदयम् *hṛdayam*	heart	**the most secure** the book has shown
अक्षि *akṣi*	eye	unbroken, and visible in English *eye*
नासिका *nāsikā*	nose	kin to two modern words, **parent of neither**
मुखम् *mukham*	mouth, face	**two families claim it**, unsettled
कर्णः *karṇaḥ*	ear	**never settled**, even by Sanskrit itself

The list runs from a word whose descent is traceable step by step to a word nobody has been able to place at all. Both ends of it are ordinary vocabulary a learner has to know; the difference between them is entirely a matter of what the evidence supports.

Why it's said this way

Kin is not descent. *Nāsikā* has relatives in living languages and is the ancestor of none of them — they and it come from the same older word. A family tree is not a chain, and *cousin* is the commonest relation in it.

The endings sort the five a second way, cutting across the first. Three are neuter; *karṇaḥ* takes the masculine visarga; *nāsikā* ends in a long *-ā*, the shape most feminine nouns in this book take. Gender here is a property of the word and not of the thing — a heart is neuter, an ear is masculine, and no fact about bodies explains it.

Before you move on

Which of the five has the securest ancestry, and which has none anyone agrees on? (हृदयम्, English *heart*; कर्णः.) Is *nāsikā* the parent of its modern look-alikes, or their cousin? (**Cousin.**)

Chapter 14

Pointing, and Asking

Modes: 🚗 **voice** (7) ✓ **pen** (4) 🚗 **Hands-free start:** the first of 11 lessons.

> ***By the end of this chapter:*** I can point at something in Sanskrit and ask who or where it is — and I can say what the six words have in common.
>
> *Say the near word, the far word and the question word in a row, and name the part that changed.*

14.1 एतत् (etat) — this one — the thing near me

You can already name things. This is how you POINT at them.

You'll want to know: एतत्

एतत् — *etat* — this one — the thing near me.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner, the far one, comes in the next lesson, and it is this same word with the **e-** taken off. So the **e-** at the front is what brings the thing near — and the last lesson of this chapter shows the pattern it belongs to.

The word, taken apart — its roots and family

Etat is usually analysed as the pointing pronoun *tad* "that" with *e-* in front. It is inherited: MW compares Avestan *aēta* and Old Persian *aita*, both "this". Its masculine *eṣa* lives on as Hindi *yah*, "this"

(CDIAL 2530).

Your turn

Say these aloud:

- "एतत्" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *etat*? (this one — the thing near me.) What sound does it start with, and does that sound mean near, far, or a question? (**e-** — near.)

14.2 ट — one character, met inside words you already say

Before the new one, the ones you have already met: ए · ठ · ध. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ट

ट — *ṭa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṭ*, it is **ṭa**.

What it is made of:

- a descending central stem joined to a counterclockwise open round body
- the top shirorekhā

You already say this word, and ट is one of the shapes inside it — the rest of its shapes are still ahead of you, so here the character stands on its own:

- *kuṭumbam* — family, household — a word Sanskrit itself borrowed, before other languages borrowed it back

Writing: ट

ट

- *Trace it:* ट three times, saying *ṭa* as you finish each one

Before you move on

Which character is this — ट? What sound does it carry? (***ṭa***.)
Name one word you already say that contains it.

14.3 तत् (tat) — that one — the thing over there

You can already name things. This is how you POINT at them.

You'll want to know: तत्

तत् — *tat* — that one — the thing over there.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner is एतत् *etat*, which you have just met: the same word with an **e-** in front. Take the e- away and **t-** leads, and **t-** is far. The last lesson of this chapter shows the pattern it belongs to.

The word, taken apart — its roots and family

Tat (stem *tad*) is an inherited pointing pronoun. MW compares Greek *to* "the" and Gothic *thata*, the cousin of English **that** (CDIAL 5612).

Your turn

Say these aloud:

- "तत्" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *tat*? (that one — the thing over there.) What sound does it start with, and does that sound mean near, far, or a question? (**t-** — far.)

14.4 अत्र (atra) — here — where I am

You can already name things. This is how you POINT at them.

Say "it is" and "it becomes." (*Asti, bhavati.*) You will want *asti* with this lesson's word.

You'll want to know: अत्र

अत्र — *atra* — here — where I am.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner, the far one, comes shortly. The two of them differ by one sound at the front — **a-** for near — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

Atra is built from the pronoun base *a-* "this" with the place ending *-tra*, the ending you will meet again in *tatra* and *kutra* (MW, CDIAL 228).

Your turn

Say these aloud:

- "अत्र" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *atra*? (here — where I am.) What sound does it start with, and does that sound mean near, far, or a question? (**a-** — near.)

14.5 ल — one character, met inside words you already say

Before the new one, the ones you have already met: ठ · ध · ट. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ल

ल — *la*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *l*, it is **la**.

What it is made of:

- a clockwise open left loop
- an up-right diagonal arm
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has ल somewhere inside it:

- लिखति *likhati* — he, she, or it writes — a root that means "scratch," and the chapter's four verbs gathered up

Writing: ल

How ल is written, stroke by stroke

- **1.** start at the open lower-left tip, curve up and clockwise around the left loop, and finish at the inner junction
- **2.** without lifting, sweep the diagonal arm up-right to the right stem
- **3.** climb up the right stem to the headline
- **4.** descend the right stem top-to-bottom
- **5.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up once.

The source shows four movements; most native writers draw ल in two strokes (54% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the headline.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Opiaterein, 'Deva-ल-order.gif', strokes 1–4, Wikimedia Commons, 11 May 2009.

Before you move on

Which character is this — ल? What sound does it carry? (***la***.) Name one word you already say that contains it.

14.6 तत्र (tatra) — there — where I am not

You can already name things. This is how you POINT at them.

You'll want to know: तत्र

तत्र — *tatra* — there — where I am not.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner is अत्र *atra*, which you have just met. The two of them differ by one sound at the front — **t-** for far — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

Tatra is built from the far pronoun base *ta-*, the base of *tat*, with the place ending *-tra* (MW). CDIAL 5643 traces Marathi's word for "there" to it.

Your turn

Say these aloud:

- "तत्र" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *tatra*? (there — where I am not.) What sound does it start with, and does that sound mean near, far, or a question? (**t-** — far.)

14.7 कः (kaḥ) — who? — asking about a person

You can already name things. This is how you ASK about them.

You'll want to know: कः

कः — *kaḥ* — who? — asking about a person.

Say it with an asking voice. It points at no one: it asks your listener to name the person.

Its partner, the question word for place, comes in the next lesson, and it opens with the same **k-**. Sanskrit asks with **k-**, where the far words you

know, तत् *tat* and तत्र *tatra*, open with **t-**. It is the same old question sound that became the *qu-* of Latin *quis* and the *wh-* of English *who*.

Your turn

Say these aloud:

- "कः" three times, asking about a different person each time
- it once with a word you already know after it

Before you move on

What is *kaḥ*? (who? — asking about a person.) What sound does it start with, and does that sound mean near, far, or a question? (**k-** — ask.)

14.8 ो — one character, met inside words you already say

Before the new one, the ones you have already met: ध · ट · ल. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ो

ो — *o*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: the ā bar on the right plus a stroke above.

Worked through: न + ो = नो — *no*.

You already say these, and every one of them has ो somewhere inside it:

- करोमि *karomi* — I do, I make
- साहाय्यं करोति *sāhāyyaṁ karoti* — he, she, or it helps — a noun plus "does," and help named as going along with someone

Writing: ो — follow the numbered strip

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Devanagari recognizer, class 55 (ो, o sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ो is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ो yourself — slowly, and larger than it is printed. The short bar on top stays grey in the strip: in a word it is part of the headline, which you draw last, once, across the whole word.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at this, and find ो in it

  करोमि · साहाय्यं करोति

- *Trace it:* ो three times, saying *o* as you finish each one
- *Look:* back at any page of this chapter and find ो once more

Before you move on

Which character is this — ो? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *o* on; takes the built-in *a* off.**) Name one word you already say that contains it.

14.9 कुत्र (kutra) — where? — asking about a place

You can already name things. This is how you ASK about them.

You'll want to know: कुत्र

कुत्र — *kutra* — where? — asking about a place.

Say it with an asking voice. It points at no place: it asks your listener to point one out.

Its partner is कः *kaḥ*, which you have just met: both open with **k-**, the asking sound. Its other partners, अत्र *atra* and तत्र *tatra*, differ from it only at the front. That is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

Kutra is built from the question base *ku-*, a side form of *ka-*, with the place ending *-tra* of *atra* and *tatra* (MW).

Your turn

Say these aloud:

- "कुत्र" three times, asking about a different place each time
- it once with a word you already know after it

Before you move on

What is *kutra*? (where? — asking about a place.) What sound does it start with, and does that sound mean near, far, or a question? (**k-**

— ask.)

14.10 a- / t- / k- — six words, one machine

Say the six words from this chapter out loud, in order. Listen to how they begin.

Grammar lens: one slot changes

You did not learn six unrelated words. Five of them hang on **three beginnings**; the sixth, *etat*, is *tat* with an **e-** in front.

meaning	word
near	अत्र *atra*
far	तत्र *tatra*
question	कुत्र *kutra*

Sanskrit is where Hindi's k- comes from: अत्र, तत्र, कुत्र.
Change the front, and the meaning walks from **near** to **far** to **a question**. Nothing else in the word moves.
The thing-words share one of these beginnings, not both: तत् *tat* starts with the far **t-** of *tatra*, but एतत् *etat* does not start with *a-*. It is *tat* with an **e-** in front: "that one", brought near. This chapter did not teach you the matching question word for things — that one arrives later, and when it does you will already know what it has to start with. This is worth more than the six words are. When you meet a new word in this family later, you will not have to be taught all three of it — you will be taught one and work out the others.

Your turn

- *Say it:* the near word, then the far word, then the question word
- *Say it:* them again for place, not for things
- *Notice:* the part that did NOT change

Before you move on

For places, which beginning means near? (**a-**, *atra*) Far? (**t-**) And which one turns the word into a question? (**k-**)

14.11 थ — one character, met inside words you already say

Before the new one, the ones you have already met: ट · ल · ो. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

थ — *tha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *th*, it is **tha**.

What it is made of:

- the top shirorekhā

You already say these, and every one of them has थ somewhere inside it:

- भवान् कथम् अस्ति? *bhavān katham asti?* — how are you?

Chapter 15

Describing Things

Modes: 🚗 **voice** (7) ✓ **pen** (4) 🚗 **Hands-free start:** the first 2 of 11 lessons.

> ***By the end of this chapter:*** I can point at something in Sanskrit and ask who or where it is — and I can say what the six words have in common.
>
> *Say the near word, the far word and the question word in a row, and name the part that changed.*

15.1 महत् (mahat) — big

You can already name things. This is how you DESCRIBE them.

You'll want to know: महत्

महत् — *mahat* — big.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

Mahat began as a participle of the root √mah, "to be great" (MW). It is inherited: MW sets it beside Greek *megas*, Latin *magnus* and English *much*.

Your turn

Say these aloud:

- "महत्" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *mahat*? (**big**.) Where does it go — before the word it describes, or after? (**Before.**)

15.2 अल्प (alpa) — small

You can already name things. This is how you DESCRIBE them.

You'll want to know: अल्प

अल्प — *alpa* — small.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met महत् *mahat* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

Alpa is an old word, already in the Atharvaveda (MW), but its origin is not settled: MW gives no root for it. It lives on in a handful of modern words, such as Marathi *aprā*, "short" (CDIAL 722).

Your turn

Say these aloud:

- "अल्प" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *alpa*? (**small**.) Where does it go — before the word it describes, or after? (**Before.**)

15.3 ब — one character, met inside words you already say

Before the new one, the ones you have already met: ल · ो · थ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ब

ब — *ba*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *b*, it is **ba**.

What it is made of:

- a counterclockwise oval body
- a top-to-bottom right stem
- a down-right inner diagonal
- the top shirorekhā

You already say these, and every one of them has ब somewhere inside it:

- कुटुम्बम् *kuṭumbam* — family, household — a word Sanskrit itself borrowed, before other languages borrowed it back

Writing: ब

How ब is written, stroke by stroke

- **1.** start at the body's upper-right junction and circle counterclockwise around the oval to its lower-right junction
- **2.** without lifting, climb up the right stem to the headline
- **3.** descend the right stem top-to-bottom
- **4.** lift at the body's upper-left interior and draw the inner diagonal down-right
- **5.** lift and draw the top shirorekhā left-to-right

Pen lifts: 2. The pen comes up 2 times and no more.

The source shows four movements; most native writers draw ब in three strokes (71% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts only before the diagonal and the headline.

15.4 उत्तम (uttama) — good

You can already name things. This is how you DESCRIBE them.

You'll want to know: उत्तम

उत्तम — *uttama* — good.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met अल्प *alpa* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

Uttama is built from *ud* "up" with the superlative ending *-tama*: "uppermost", and so "best" (MW, CDIAL 1765).

Your turn

Say these aloud:

- "उत्तम" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *uttama*? (**good**.) Where does it go — before the word it describes, or after? (**Before.**)

15.5 नव (nava) — new

You can already name things. This is how you DESCRIBE them.

You'll want to know: नव

नव — *nava* — new.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met *uttama* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

Nava is inherited from Proto-Indo-European: MW compares Latin *novus* and Greek *neos*, and English **new** is the same word. It lives on as Hindi *nawā* and *naī* (CDIAL 6983).

Your turn

Say these aloud:

- "नव" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

15.6 उ — one character, met inside words you already say

Before the new one, the ones you have already met: ो · थ · ब. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: उ

उ — *u*.

It is an **independent vowel**: the full-size letter a vowel wears when it opens a word and has no consonant to lean on. Inside a word the same vowel is written as a small sign instead.

What it is made of:

- a joined upper bowl and lower loop
- the top shirorekhā

You already say these, and every one of them has उ somewhere inside it:

- उत्तम *uttama* — good

15.7 पुरातन (purātana) — old — of a thing, not of a person

You can already name things. This is how you DESCRIBE them.

You'll want to know: पुरातन

पुरातन — *purātana* — old — of a thing, not of a person.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met नव *nava* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

Purātana is built from the adverb *purā*, "before, of old", with the suffix *-tana* that turns a time word into an adjective (MW, CDIAL 8285).

Your turn

Say these aloud:

- "पुरातन" three times, picturing something different each time

What is *purātana*? (**old — of a thing, not of a person**.) Where does it go — before the word it describes, or after? (**Before.**)

15.8 मौन (mauna) — silence

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: मौन

मौन — *mauna* — "silence".

Say it: *mauna*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ौ, and writes it on its own.

The word, taken apart — its roots and family

Mauna is formed from *muni*, "sage": it first named the state of a sage, who often kept a vow of silence (MW).

Your turn

Say these aloud:

- *mauna*
- *mauna*, and what it means

Before you move on

What is "silence"? (मौन, *mauna.*)

15.9 before the noun, and it AGREES — five words, one rule

Say the five words from this chapter out loud, then say each one in front of a noun you already know.

Grammar lens: where an adjective goes

You did not learn five separate words. You learned **where an adjective goes**, and five words that go there.

meaning	word
big	महत् *mahat*
small	अल्प *alpa*
good	उत्तम *uttama*

Sanskrit agrees too, and in more ways than Hindi does — this is where Hindi's habit comes from.
This is worth more than the five words are. Every noun you already know — your name, the house, the water, the day — can now take any of them in front, and every adjective you meet from here goes in the same place.

Your turn

- *Say it:* each of the five in front of a noun you already know
- *Say it:* two of them with the same noun, one after the other
- *Notice:* whether the adjective changed shape when the noun did

Before you move on

15.10 ष — one character, met inside words you already say

Before the new one, the ones you have already met: थ · ब · उ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ष

ष — *ṣa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṣ*, it is **ṣa**.

What it is made of:

- a U-shaped body drawn from the left side around the lower bowl and up the right side
- a retraced top-to-bottom right stem
- a down-right inner diagonal
- the top shirorekhā

You already say these, and every one of them has ष somewhere inside it:

- क्षीरम् *kṣīram* — milk — an origin scholars still argue over, and the dessert word it left behind
- अक्षि *akṣi* — eye — unbroken from Sanskrit to English, and the reason eyes get their own grammatical number

Writing: ষ

How ষ is written, stroke by stroke

- **1.** descend the left side, curve counterclockwise around the lower bowl, and rise along the right side to the headline
- **2.** without lifting, draw the right stem top-to-bottom, retracing its upper body-side segment before continuing below the bowl
- **3.** lift at the upper-left interior and draw the inner diagonal down-right to the bowl junction
- **4.** lift and draw the top shirorekhā left-to-right

Pen lifts: 2. The pen comes up 2 times and no more.

Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ौ

ौ — *au.*

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: the ā bar plus a double stroke above.

Worked through: न + ौ = नौ — *nau.*

No word in this book has put ौ in front of you yet, and that is worth saying plainly rather than hiding: this one is here because it is built from two shapes you already know, and because the running text of later chapters uses it.

Writing: ौ — copy what you see

Put your pen on ौ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not

written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Chapter 16

Places — and the Two Noun Families

Modes: **voice** (5) **eyes** (1) **pen** (3) **Hands-free start:** the first 2 of 9 lessons.

> ***By the end of this chapter:*** I can name five places in Sanskrit, put a known adjective in front of any of them, and hear from a noun's ending whether it is neuter or masculine.
>
> *Complete SA-C16-noun-families: sort the chapter's five places into the -am and -aH families and say a known adjective before each; recall what village, road and forest carry; then pick out* ण *and* ग.

16.1 गृहम् (gṛham) — house, home

You can describe a thing now — big, small, new, old. This chapter gives you places to put those things.

Where does an adjective go? (In front of its noun.) Keep that ready for this lesson's word.

You'll want to know: गृहम्

गृहम् (*gṛham*) — "house, home."

The traditional derivation ties it to the root √ग्रह् (*grah*), "to seize, to hold." A house is *the thing that holds you* — the grasp you live inside. That is how Sanskrit's own grammarians heard the word, and it is worth hearing that way.

You can already stack an adjective in front of it: महत् गृहम्, "a big house"; नव गृहम्, "a new house." The adjective comes first, as you have already seen it do.

The word, taken apart — its roots and family

MW files *gṛha* under √gṛbh, the older form of that root, but it also compares Gothic *gards* "house" and Latin *hortus* "garden". On that second account the word is inherited, a cousin of English **yard**, and the root story is the grammarians' reading of it.

What you've built

This is your first **place**. Everything in this chapter is somewhere you can be, and every one of them takes the adjectives you already own.

Your turn

Say these aloud:

- *gṛham* — "house"
- "a big house" — *mahat gṛham*
- "a new house" — *nava gṛham*

Before you move on

What root is गृहम् traditionally tied to? (√ग्रह्, "to seize, to hold.") Where does the adjective go? (Before the noun.)

16.2 ग्रामः (grāmaḥ) — village

One house is a home. Many of them together are this.

Say "I live." (*Vasāmi.*) Where you live may be this lesson's word.

You'll want to know: ग्रामः

ग्रामः (*grāmaḥ*) — "village."

In the Rigveda it already means both the settlement and **"a collection, a troop"**, a gathering of people considered as one body (MW). One word

holds the people and the place together, which tells you how its first speakers saw a village: people and buildings as one thing.

Notice the ending. गृहम् ends in *-am*; ग्रामः ends in *-aḥ*. Sanskrit sorts its nouns into families, and that final syllable is the badge. You do not need the system yet — only the observation that the endings differ, and that the difference is not random.

The word, taken apart — its roots and family

Grāma is an old Rigvedic word for a troop or community (MW), and its deeper origin is not settled. It lives on as Gujarati *gām* and Sinhala *gama*, "village" (CDIAL 4368).

What you've built

Two places now, and your first glimpse of the noun families — the *-am* ending and the *-aḥ* ending, sitting side by side.

Your turn

Say these aloud:

- *grāmaḥ* — "village"
- "a big village" — *mahat grāmaḥ*
- the two endings back to back — *gṛham*, *grāmaḥ*

Before you move on

Besides "village", what else did ग्रामः mean in the Rigveda? (A collection, a troop.) Which two endings have you now seen? (*-am* and *-aḥ*.)

16.3 ण — one character, met inside words you already say

ण — *ṇa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṇ*, it is **ṇa**.

What it is made of:

- a joined left stem, clockwise lower bowl, and inner right stem
- a separate top-to-bottom outer right stem
- the top shirorekhā

You already say these, and every one of them has ण somewhere inside it:

16.4 मार्गः (mārgaḥ) — road, path

Two places, and no way between them. Here is the way.

Say "old" — of a thing, not a person. (*Purātana.*)

You'll want to know: मार्गः

मार्गः (*mārgaḥ*) — "road, path, way."

From the root √मृग् (*mṛg*), "to track, to hunt, to search out." A road is a **tracking** — the line left by someone who went looking. The same root gives मृगः (*mṛgaḥ*), "deer": the animal that gets tracked.

So the word does not name a built thing at all. It names the trace of a search, and only later the paved version of it. English keeps that metaphor alive when it speaks of a *line of enquiry.*

The word, taken apart — its roots and family

Mārga is formed from *mṛga*, "wild animal": first the track of an animal, then any road (MW). It lives on as Hindi and Gujarati *māg* (CDIAL 10071).

What you've built

मार्गः takes the same *-aḥ* ending as ग्रामः. That is the second word in its family, and the pattern is becoming visible rather than asserted.

Your turn

Say these aloud:

- *mārgaḥ* — "road"
- "the old road" — *purātana mārgaḥ*
- the related animal — *mṛgaḥ*, "deer"

Before you move on

What does √मृग् mean? (To track, to hunt.) What animal shares the root? (मृगः, the deer.) Which ending does मार्गः take? (*-aḥ*.)

16.5 वनम् (vanam) — forest, wood

Follow the road far enough out of the village and you reach this.

You'll want to know: वनम्

वनम् (*vanam*) — "forest, wood, wilderness."

In the older literature it carries a weight that "forest" does not quite catch: वनम् is where the settled world stops. To go to the वनम् is to leave the *grāmaḥ* behind, and a great deal of Sanskrit narrative turns on somebody doing exactly that.

Its ending is *-am*, so it belongs with *gṛham* — which gives the chapter a neat symmetry: the two *-am* words so far are the house you live inside and the wild you do not.

The word, taken apart — its roots and family

Vana is a Rigvedic word for a single tree or a wood (CDIAL 11258). MW files it under the root √van, "to like, win", but its origin is not settled. It lives on as Hindi *ban*, "forest".

What you've built

Four places, and the two endings now have two words each. That is a pattern you have observed, not one you have been handed.

Your turn

Say these aloud:

- *vanam* — "forest"
- "a big forest" — *mahat vanam*
- the two *-am* words together — *gṛham*, *vanam*

Before you move on

What does वनम् mean beyond "forest"? (Where the settled world stops.) Which other word shares its ending? (*gṛham*.)

16.6 ग — one character, met inside words you already say

Before the new one, the ones you have already met: ष · ौ · ण. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ग

ग — *ga*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *g*, it is **ga**.

What it is made of:

- a counterclockwise left loop joined to an ascending stem
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has ग somewhere inside it:

- स्वागतम् *svāgatam* — welcome (lit. “well come”)
- गृह्णाति *gṛhṇāti* — he, she, or it takes, seizes — the ninth class again, and the root English grabs with
- भगिनी *bhaginī* — sister — not built on English “sister”’s root at all, but on “one with a share”
- गृहम् *gṛham* — house, home

16.7 नगरम् (nagaram) — city

The last of the five places, and the biggest.

Say "in the city." (*Nagare* — the locative ending -*e*, "in, at.")

You'll want to know: नगरम्

नगरम् (*nagaram*) — "city, town."

Its origin is **genuinely unsettled**, and that is worth saying plainly rather than inventing a story. Sanskrit offers no agreed root for it. Some scholars have proposed that it came into the language from outside — one of a handful of everyday words that may record a borrowing from languages spoken in the subcontinent before Sanskrit arrived. Others resist that reading. The honest position is that nobody knows.

Whatever its history, it ends in -*am*, like गृहम् and वनम्.

The word, taken apart — its roots and family

DEDR 3568 sets *nagara* beside Tamil *nakar*, "house, town", and a Dravidian source is one proposal; MW doubts a split into *naga* + *-ra*. It lives on as Sinhala *nuvara*, "city" (CDIAL 6924).

What you've built

Five places: house, village, road, forest, city. Three take *-am* and two take *-aḥ*, and the next lesson says what that division actually is.

Your turn

Say these aloud:

- *nagaram* — "city"
- "a new city" — *nava nagaram*
- all three *-am* words — *gṛham*, *vanam*, *nagaram*

Before you move on

Why is नगरम् unusual among this chapter's words? (Its origin is unsettled; it may be a borrowing.) Which ending does it take? (*-am*.)

16.8 -अम् · -अः (-am · -aḥ) — the two noun endings, side by side

You have met five places and noticed their endings differ. This lesson names what you noticed.

You'll want to know: -अम् · -अः

Sanskrit sorts its nouns into **genders**, and the ending you have been hearing is the clue:

गृहम्, वनम्, नगरम् end in -अम् — these are **neuter**. ग्रामः, मार्गः end in -अः — these are **masculine**.

This is the same machinery the adjectives used without naming it: they change to match. महत् गृहम् and महान् ग्रामः are one adjective agreeing with two different families.

You do not need to produce that agreement yet. What you need is the ear for it — when you hear -अम् or -अः closing a word, you are hearing which family it belongs to, and Sanskrit will keep using that information for everything that follows.

What you've built

You can now hear a noun's family from its ending, which is the single most useful thing to know about a Sanskrit noun.

Your turn

Say these aloud:

- the three neuters — *gṛham*, *vanam*, *nagaram*
- the two masculines — *grāmaḥ*, *mārgaḥ*
- which family a new word ending in -*am* belongs to

Your turn — village, road, forest

Say these aloud:

- "village", and its oldest sense (*grāmaḥ*; "a collection, a troop" — people first)
- "road", and the root under it (*mārgaḥ*; *mṛg*, "to track", as in *mṛgaḥ*, "deer")
- "forest", and what it marks in the older literature (*vanam*; where the settled world stops)

Script — the chapter's two shapes

ग · ण

- *Point to:* *ṇa*, then *ga* — out of their printed order
- *Say it:* the sound each carries, and a word with each (ण, *ṇa*, in *karṇaḥ*, "ear"; ग, *ga*, in *gṛham*)

Before you move on

Which ending marks the neuter? (-अम्.) Which marks the masculine? (-अः.) What else in the sentence responds to a noun's family? (The adjective.)

16.9 ज — one character, met inside words you already say

Before the new one, the ones you have already met: ौ · ण · ग. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ज

ज — *ja*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *j*, it is **ja**.

What it is made of:

- an open left hook curling clockwise around the lower bowl and continuing through the middle bar
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has ज somewhere inside it:

- जानाति *jānāti* — he, she, or it knows — the root ज्ञा, the class that plants a syllable inside the verb, and the chapter's six roots gathered up

Time — Day, Night, and When Things Happen

> ***By the end of this chapter:*** I can name the parts of a day in Sanskrit, say today, yesterday and always, and place a time word in a sentence.
>
> *Complete SA-C17-time-words: name day, night, today, yesterday and always, say which three keep one shape, and place sadā on either side of the verb; then pick out* श *and* छ*.*

17.1 दिनम् (dinam) — day

You have places. Now you need times to put in them.

Nouns that end in *-am* — *gṛham, vanam, nagaram* — are neuter. Listen for the ending on this lesson's word.

You'll want to know: दिनम्

दिनम् (*dinam*) — "day."

It belongs to one of the oldest word-families in the language. The Indo-European root for the bright sky, **dyew-*, gave Sanskrit द्यौः (*dyauḥ*), the sky itself, and it is the same root standing behind Latin *diēs*, "day," and the god names *Iuppiter* and *Zeus*. A day, to the people who coined the word, was simply *the bright*.

Its ending is *-am*, so you already know its family without being told: neuter, like गृहम् and वनम्.

What you've built

Your first time word, and it arrived with its family badge already legible. That is what the ending work bought you.

Your turn

Say these aloud:

- *dinam* — "day"
- "a good day" — *uttama dinam*
- which family it belongs to, from the ending alone

Before you move on

What did the root behind दिनम् originally mean? (The bright sky.) Which family does it belong to, and how do you know? (Neuter — the *-am* ending.)

17.2 रात्रिः (rātriḥ) — night

The other half of the day.

You'll want to know: रात्रिः

रात्रिः (*rātriḥ*) — "night."

Where दिनम् is the bright, रात्रिः is its opposite, and the pair is one of the oldest ways any language divides the world. In the hymns it is a name as much as a noun: Rātrī is addressed directly, a presence rather than an absence of light.

The ending here is *-iḥ*, which is neither of the two you have met. Sanskrit has more than two families, and this is your first sight of a third. You do not need it yet — only the honest note that the system is bigger than the part you have seen.

The word, taken apart — its roots and family

Rātri is an old Rigvedic word whose origin is not settled: MW offers two guesses, the root √rā "give" ("the bestower") or √ram "rest". It lives on as Hindi *rāt*, "night" (CDIAL 10702).

What you've built

Day and night, and a quiet warning: the *-am* / *-aḥ* division you learned is real but not the whole map.

Your turn

Say these aloud:

- *rātriḥ* — "night"
- the pair together — *dinam*, *rātriḥ*
- which ending is new to you here

Before you move on

What is रात्रिः in the hymns, beyond a noun? (A presence addressed by name.) What does its ending tell you? (That there are more than two noun families.)

17.3 श — one character, met inside words you already say

Before the new one, the ones you have already met: ण · ग · ज. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: श

श — *śa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ś*, it is **śa**.

What it is made of:

- a joined upper loop, descending outer curve, lower loop, and diagonal tail
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has श somewhere inside it:

- कुशलम् *kuśalam* — well-being — and the reply "अहं कुशली अस्मि"
- पुनर्दर्शनाय *punardarśanāya* — until we meet again (lit. "for seeing again")
- श्वः *śvaḥ* — tomorrow — and "see you tomorrow"
- पश्यति *paśyati* — he, she, or it sees — a verb assembled from two different roots, one of which you already met

Which character is this — श? What sound does it carry? (***śa***.) Name one word you already say that contains it.

17.4 अद्य (adya) — today

Naming the day you are standing in.

You'll want to know: अद्य

अद्य (*adya*) — "today."

Take it apart and the older shape shows: *a-* ("this") plus the same *dy-* that sits inside द्यौः. **This day** — said so often that the two halves fused and stopped being separable for ordinary speakers.

This is how a great many everyday words are built, in Sanskrit and elsewhere. English *today* is *to* + *day*, and *tomorrow* is *to* + *morrow*: the same trick, a thousand years later, in a different family.

The word, taken apart — its roots and family

Adya is built from the pronoun base *a-* "this" and *dya*, a form of *dyu* "sky, day"; MW compares Latin *hodiē*, "today". It lives on as Hindi *āj* (CDIAL 242).

What you've built

A word you can now see through. When a short everyday word looks unanalysable, it is usually a fused phrase that got worn smooth.

Your turn

Say these aloud:

- *adya* — "today"
- the two pieces inside it — *a-* and *dy-*
- the English word built the same way (*today*)

Before you move on

What are the two pieces of अद्य? (*A-*, "this," and the *dy-* of "day.") What English word is built the same way? (*Today.*)

17.5 ह्यः (hyaḥ) — yesterday

The day behind you — and a word with relatives you already speak.

You'll want to know: ह्यः

ह्यः (*hyaḥ*) — "yesterday."

This one is a gift, because its cousins are everywhere. The same ancestral word gave Latin *heri*, which became Spanish *ayer* and French *hier*; and it gave Germanic *gester-*, which is the **yester-** still sitting inside English *yesterday*.

So ह्यः, *heri*, *ayer* and *yester-* are four survivals of one word for "the day before this one," spoken continuously for as long as any of these languages have existed. Very few words let you see that far back this clearly.

What you've built

A word that is genuinely easier to keep because of what it is related to. When a Sanskrit word has a visible European cousin, learn them as one thing.

Your turn

Say these aloud:

- *hyaḥ* — "yesterday"
- its Latin cousin — *heri*
- the English word that still carries it (*yester*day)

Before you move on

Which Latin word is ह्यः related to? (*Heri.*) What English word still carries the same root? (*Yester*day.) What does the family all mean? (The day before this one.)

17.6 छ — one character, met inside words you already say

Before the new one, the ones you have already met: ग · ज · श. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: छ

छ — *cha.*

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ch*, it is **cha**.

What it is made of:

- a continuous upper-left loop, lower bowl, outer-right rise, and inner loop
- a short upper stem

- the top shirorekhā

You already say these, and every one of them has छ somewhere inside it:

- गच्छामि *gacchāmi* — I go
- गच्छति *gacchati* — he, she, or it goes — the verb whose present stem you could never guess from its root
- आगच्छति *āgacchati* — he, she, or it comes — the same verb as "goes" with a prefix pointing it homeward
- अवगच्छति · बुध्यते *avagacchati* · *budhyate* — he, she, or it understands — "goes down into" a thing, or wakes up to it

17.7 सदा (sadā) — always

Today, yesterday — and the word for every day there is.

You'll want to know: सदा

सदा (*sadā*) — "always, ever."

It carries the sense of *sa-*, "together, whole, the same" — the element behind Sanskrit सम (*sama*), "same, equal," and behind English **same** itself. Always is the whole of time taken at once.

Where the other four words in this chapter point at one particular time, सदा refuses to. That is what makes it useful with the verbs you already have: सदा पठति, "he reads always."

The word, taken apart — its roots and family

Sadā is an old Rigvedic adverb (MW). MW connects it with the prefix *sa-* "with, together", but its exact formation is not settled.

What you've built

Five time words: two nouns, three that simply attach to a verb and say when.

Your turn

Say these aloud:

- *sadā* — "always"
- "he always reads" — *sadā paṭhati*
- the English word related to its first piece (*same*)

Before you move on

What does the *sa-* in सदा carry? (Together, whole, the same.)
Which English word shares it? (*Same.*)

17.8 कालशब्दाः (kāla-śabdāḥ) — where a time word stands

You have five time words. This is where they go.

You'll want to know: कालशब्दाः

Three of this chapter's words — अद्य, ह्यः, सदा — are not nouns at all. Listen for an *-am* or *-aḥ* or *-iḥ* on them and you will not find one. They attach to a sentence, say *when*, and keep the same shape wherever they land.

Sanskrit lets them stand almost anywhere. सदा पठति and पठति सदा both say "he always reads," and neither is more correct than the other. You have been given a lot of attention to endings, and this is the payoff: they are carrying the work that word order carries in English.

The two that *are* nouns, दिनम् and रात्रिः, behave like any other noun, and take adjectives in front of them the way गृहम् does.

What you've built

You can now say when something happens, and you have met the single most important fact about Sanskrit word order: it is loose because the endings are strict.

Your turn

Say these aloud:

- "he always reads," both ways round
- "a good day" — *uttama dinam*
- which three of the five never change

Your turn — night, today, yesterday

Say these aloud:

- "night", and the ending that was new in it (*rātriḥ*; *-iḥ*, a third family)
- "today", and the two pieces inside it (*adya*; *a-*, "this", + *dy-*, "day")
- "yesterday", its Latin cousin, and the English word that carries it (*hyaḥ*; *heri*; **yester**day)

Script — the chapter's two shapes

छ · श

- *Point to: śa*, then *cha* — out of their printed order
- *Say it:* the sound each carries, and a word with each (श, *śa*, in *kuśalam*; छ, *cha*, in *gacchāmi*)

Before you move on

Which three words never change their ending? (अद्य, ह्यः, सदा.) Why can Sanskrit move words around freely? (Because the endings carry the grammar, not the order.)

Chapter 18

Asking — Every Question Begins with K

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can ask when, why, how many and from where in Sanskrit, and I can see that every question word is built on one stem.
>
> *Complete SA-C18-k-words: ask when, why, how many and from where, line up all seven k- question words, and say what the k- became in Latin and English.*

18.1 कदा (kadā) — when?

You can say when. This chapter is for asking when.

Which three words from the last chapter never change their ending? (*Adya, hyaḥ, sadā* — they say *when* and keep one shape.)

You'll want to know: कदा

कदा (*kadā*) — "when?"

Set it beside the word you just learned and something jumps out:

सदा — always. कदा — when?

One letter apart, and the difference is the whole of this chapter. Sanskrit builds its question words on क् (*k-*), and it builds several of its answering words on स् (*s-*) or त् (*t-*). Ask with *k-*, answer with *t-*.

The word, taken apart — its roots and family

Kadā is built on the question stem *ka-* (MW). It is inherited: MW compares Avestan *kadha*, Latin *quandō* and Lithuanian *kada*, all "when".

What you've built

Your first *k-* word met deliberately. There are four more in this chapter, and by the end the pattern will be doing the remembering for you.

Your turn

Say these aloud:

- *kadā* — "when?"
- it against its answer — *kadā*, *sadā*
- "when does he read?" — *kadā paṭhati*

Before you move on

What single letter separates कदा from सदा? (*K-* against *s-*.) Which letter opens a Sanskrit question word? (*K-*.)

18.2 किमर्थम् (kimartham) — why?

The hardest question in any language, and Sanskrit builds it out of two words you can almost read.

You'll want to know: किमर्थम्

किमर्थम् (*kimartham*) — "why?"

It is transparently two pieces:

किम् ("what") + अर्थम् ("for the purpose of, for the sake of")

— literally **"for what purpose?"** A bare *kim* can also ask *why*; this fuller word asks what the aim was, and lets the shape of the question show.

अर्थ (*artha*) is worth keeping on its own. It means purpose, aim, meaning, and wealth all at once, and it is one of the four goals of life in the classical

scheme. A word for "why" built on it is asking, quite seriously, *what is this for?*

The word, taken apart — its roots and family

Kimartham is a compound of *kim* "what" and *artha* "aim, purpose", already in the Śatapatha Brāhmaṇa (MW, CDIAL 3165).

What you've built

A compound you can take apart on sight — and *k-* again at the front, exactly as promised.

Your turn

Say these aloud:

- *kimartham* — "why?"
- its two pieces — *kim* and *artham*
- what अर्थ means on its own (purpose, aim, meaning, wealth)

Before you move on

What are the two pieces of किमर्थम्? (*Kim*, "what," and *artham*, "for the purpose of.") What does अर्थ mean by itself? (Purpose, aim, meaning, wealth.)

18.3 कति (kati) — how many?

You can count to five. This asks how many there are.

You'll want to know: कति

कति (*kati*) — "how many?"

K- at the front again, and this time the relatives are visible outside Sanskrit too: Latin *quot*, "how many," is the same word, and it survives in English **quota** and **quotient** — both of them, at root, answers to *how many.*

Pair it with the numbers you already have and it is immediately useful: कति गृहाणि, "how many houses?"

What you've built

Three *k*- words now, and one of them has handed you two English words as a souvenir.

Your turn

Say these aloud:

- *kati* — "how many?"
- its Latin cousin — *quot*
- the two English words built on it (*quota*, *quotient*)

Before you move on

Which Latin word is कति related to? (*Quot.*) Which English words carry it? (*Quota*, *quotient.*)

18.4 कुतः (kutaḥ) — from where?

You can ask where something is. This asks where it came from.

Say "where?" (*Kutra.*) This lesson's word asks where *from*.

You'll want to know: कुतः

कुतः (*kutaḥ*) — "from where? whence?"

You already have कुत्र (*kutra*), "where?" Now compare the two endings: कुत्र — where, at what place. कुतः — from where, out of what place.

The *-tas* ending means "from," and Sanskrit uses it far beyond question words. English once had this distinction too and has mostly lost it: *where* against *whence*, *there* against *thence*. Sanskrit keeps them working.

The word, taken apart — its roots and family

Kutaḥ is built from the question base *ku-* with the ending *-tas*, "from" (MW, CDIAL 3271).

What you've built

Four *k*- words, and a distinction English has let go of. When a language keeps a difference yours has dropped, that is worth noticing rather than flattening.

Your turn

Say these aloud:

- *kutaḥ* — "from where?"
- it against *kutra*, "where?"
- the English pair that used to make the same distinction (*where*, *whence*)

Before you move on

What does the *-tas* ending add? ("From.") Which English word matches कुतः? (*Whence.*)

18.5 क-शब्दाः (ka-śabdāḥ) — every question begins with k-

Every question word you have met, gathered in one place, so you can see they are one word wearing different endings.

You'll want to know: क-शब्दाः

Line them up:

कः — who? · किम् — what? · कुत्र — where? · कुतः — from where? · कथम् — how? · कदा — when? · कति — how many?

Seven questions, one opening consonant. Sanskrit builds them all on a single interrogative stem **क-** and distinguishes them entirely by what follows.

The family reaches much further than Sanskrit. That *k*- is the ancestral $*k^w$-, which became Latin *qu*- — *quis*, *quid*, *quando*, *quot* — and, by a regular sound change, Germanic *hw*-, which English writes **wh-**: *who*, *what*, *where*, *when*, *how*.

So कः and *who*, किम् and *what*, कदा and *when* are not lookalikes. They are the same words, separated by five thousand years.

What you've built

You now hold every basic question in Sanskrit, and one fact that makes them nearly impossible to forget: if it opens with क्, it is asking you something.

Your turn

Say these aloud:

- all seven, in a row
- the English *wh-* word for each
- what the *k-* became in Latin (*qu-*)

Your turn — why and how many

Say these aloud:

- "why?", and its two pieces (*kimartham*; *kim*, "what", + *artham*, "for the purpose of")
- "how many houses?" (*kati gṛhāṇi*)
- the Latin cousin of *kati*, and two English words it gave (*quot*; **quota**, **quotient**)

Before you move on

What do all seven share? (An opening क्.) What did that consonant become in Latin, and in English? (*Qu-*, and *wh-*.) Are कः and *who* related? (Yes — the same word, five thousand years apart.)

Chapter 19

Counting On — Six to Ten, and What They Prove

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can count to ten in Sanskrit and explain why the numbers are evidence that Sanskrit, Latin and English are related.
>
> *Complete SA-C19-number-family: count to ten, give the English cousin of each number, keep navan apart from nava, and say why regular correspondences prove inheritance rather than borrowing.*

19.1 षट् (ṣaṭ) — six

You can count to five. The next five are where the family resemblance becomes impossible to miss.

Why do the numbers still sound alike across Sanskrit, Latin and English? (One family inherited them, and numbers resist replacement.) Listen for it in "six."

You'll want to know: षट्

षट् (*ṣaṭ*) — "six."

Say it beside its relatives: Latin *sex*, Greek *hex*, English *six*. The Sanskrit form looks least like the others on the page, because *ṣ* is a retroflex sound English has no letter for — but it is the same word.

This chapter is the clearest evidence a beginner can be shown that Sanskrit, Latin and English are relatives rather than neighbours. The numbers

are the proof, because numbers are borrowed less often than almost anything else.

What you've built

One number, and a claim you are about to see supported four more times.

Your turn

Say these aloud:

- *ṣaṭ* — "six"
- its Latin and English cousins — *sex*, *six*
- one to six, in order

Before you move on

What are the Latin and English cousins of षट्? (*Sex* and *six*.) Why are numbers good evidence of relatedness? (They are rarely borrowed.)

19.2 सप्त (sapta) — seven

The second of the five, and the resemblance is now visible without squinting.

You'll want to know: सप्त

सप्त (*sapta*) — "seven."

Latin *septem*. Greek *hepta*. English *seven*. Line them up and the shape is one shape: *s-p-t* under the vowels, with Greek turning the initial *s* into a rough breathing and English softening the *-pt-* to *-v-*.

The Sanskrit form is not the ancestor of the others — that is a common misunderstanding worth heading off. All four descend from a **shared parent nobody wrote down**. Sanskrit is simply an old, well-recorded cousin.

What you've built

Two numbers, and one correction that matters: Sanskrit is a cousin of Latin and English, not their ancestor.

Your turn

Say these aloud:

- *sapta* — "seven"
- *septem*, *hepta*, *seven* after it
- whether Sanskrit is the parent of English (it is not — a cousin)

Before you move on

Which consonants survive across all four forms? (*S*, *p*, *t*.) Is Sanskrit the ancestor of Latin and English? (No — a cousin; the parent was never written down.)

19.3 अष्ट (aṣṭa) — eight

Eight — and a word that still shows its seams.

You'll want to know: अष्ट

अष्ट (*aṣṭa*) — "eight."

Latin *octo*, Greek *okto*, English *eight* (whose silent *-gh-* is the ghost of a consonant that used to be pronounced).

There is an old and appealing observation about this one: the form behaves like a **dual** — the grammatical number Sanskrit uses for things that come in pairs. Eight would then be "two fours," counted on two hands with the thumbs left out. It is a hypothesis rather than a settled fact, and it is offered here as one, because a good story is not the same as evidence.

What you've built

Three numbers, and a reminder about how to hold an etymology that is attractive but unproven: enjoy it, label it.

Your turn

Say these aloud:

- *aṣṭa* — "eight"
- *octo*, *eight*
- whether the "two fours" story is fact or hypothesis

Before you move on

Which English word is अष्ट related to, and what is its silent *-gh-*? (*Eight* — the ghost of a pronounced consonant.) Is the "two fours" reading established? (No — a hypothesis.)

19.4 नवन् (navan) — nine

Nine — and a word you have met before meaning something else entirely.

You'll want to know: नवन्

नवन् (*navan*) — "nine." Latin *novem*, English *nine*.

Now the catch, and it is worth meeting deliberately rather than tripping over. You already learned नव (*nava*) meaning **"new."** They look nearly identical and they are **not** the same word:

नव (*nava*) — new. Latin *novus*, English *new*. नवन् (*navan*) — nine. Latin *novem*, English *nine*.

Two distinct ancient words that drifted into near-identical shapes. Latin kept them apart (*novus* against *novem*) and so did English (*new* against *nine*). Sanskrit did not, quite — and a reader who assumes one word here will misread sentences.

What you've built

A pair of look-alikes, separated on purpose. This is the most common way to get a word wrong: assuming that similar shape means shared origin.

Your turn

Say these aloud:

- *navan* — "nine"
- *nava* — "new"
- which Latin word goes with each (*novem*, *novus*)

Before you move on

What is the difference between नव and नवन्? (New, and nine.) Are they the same word? (No — two ancient words that drifted into similar shapes.)

19.5 दश (daśa) — ten

> The last of them, and the one hiding inside words you use every week.

You'll want to know: दश

दश (*daśa*) — "ten." Latin *decem*, Greek *deka*, English *ten*.

The Latin form is the one that pays. *Decem* gives English **decimal**, **decade**, **December** — which was the *tenth* month before the calendar was rearranged and left the name stranded two months out of place.

So दश, *decem* and *ten* are one word, and a fossil of the old counting survives in the name of the wrong month.

What you've built

You can count to ten in Sanskrit, and every one of the second five arrived attached to a word you already knew.

Your turn

Say these aloud:

- *daśa* — "ten"
- one to ten, straight through
- why December is misnamed

Before you move on

Which English words carry Latin *decem*? (*Decimal*, *decade*, *December*.) Why is December's name wrong? (It was the tenth month before the calendar changed.)

19.6 सङ्ख्याशब्दाः (saṅkhyā-śabdāḥ) — the numbers, and what they prove

Ten numbers is enough to see something no single word could have shown you.

Why is English *four* odd? (By the sound rule it should start *hw-*, like *what*; it took its *f-* from *five*.) And the rounded $*k^w$ gave Latin *qu-*, Sanskrit *c-*, English *wh-*.

You'll want to know: सङ्ख्याशब्दाः

Set the ten side by side with Latin and English and the correspondence is not occasional — it is regular:

एक one · द्व two · त्रि three · चतुर् four · पञ्च five · षट् six · सप्त seven · अष्ट eight · नवन् nine · दश ten

Where Sanskrit has *p*, Latin often has *p* and English often has *f*. Where Sanskrit has *d*, English often has *t*. Those are not impressions; they are **regular correspondences**, and their regularity is what turned the study of language into something testable in the nineteenth century.

That is what the numbers prove. Not that these languages borrowed from each other, but that they inherited from something older — and that the inheritance followed rules consistent enough to predict.

What you've built

You can count to ten, and you have seen the single piece of evidence that founded historical linguistics.

Your turn

Say these aloud:

- all ten, in order

- the English cousin of each
- what the regularity proves — inheritance, not borrowing

Your turn — seven, eight, nine

Say these aloud:

- "seven", and whether it is the parent of Latin *septem* (*sapta*; no — cousins from a shared parent nobody wrote down)
- "eight", and the old idea about its shape (*aṣṭa*; it behaves like a dual, "two fours" — a hypothesis, not a fact)
- "nine", and the word it must not be mistaken for (*navan*; *nava*, "new")

Before you move on

What makes the correspondences evidence rather than coincidence? (They are regular.) What do they show? (Common inheritance from an older language.)

Chapter 20

People — and the Four Noun Endings

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can name five kinds of person in Sanskrit and hear which of the four noun families each one belongs to.
>
> *Complete SA-C20-people: name man, woman, child, elder and folk, and say which family each ending marks.*

20.1 नरः (naraḥ) — man, person

Places, times, numbers — and nobody in them yet. This chapter supplies the people.

Ask "who?" and "what?" (*Kaḥ? Kim?*) Every question word you have met begins with *k-*.

You'll want to know: नरः

नरः (*naraḥ*) — "man, person, human being."

It is old enough to sit inside names you may already have heard: *Narasiṃha*, "man-lion," and *Nārāyaṇa*. Its Greek cousin is *anēr* (genitive *andros*), the element inside English **android** and the name **Andrew**.

Ending in *-aḥ*, so you already know its family: masculine, like ग्रामः and मार्गः.

The word, taken apart — its roots and family

Nara is built on the older stem *nṛ*, "man, hero", and it is inherited: MW compares Avestan *nar* and Greek *anēr*. It lives on as Hindi *nar*, "man" (CDIAL 6970).

What you've built

Your first person, and the ending told you what it was before the lesson did.

Your turn

- *Say it:* *naraḥ* — "man"
- *Say it:* "a good man" — *uttama naraḥ*
- *Say it:* the English word built on its Greek cousin (*android*)
- *Recall:* say *kadā*
- *Read it:* षट्

Before you move on

Which family does नरः belong to, and how do you know? (Masculine — the *-aḥ*.) Which English words carry its Greek cousin? (*Android*, *Andrew*.)

20.2 नारी (nārī) — woman

And the ending you have not met yet.

You'll want to know: नारी

नारी (*nārī*) — "woman."

Look at it beside नरः and the relationship is visible: the same *nar-*, a different ending. Sanskrit builds a great many feminine nouns with a long *-ī*, and this is your first.

So the map has grown again: *-am* neuter, *-aḥ* masculine, *-iḥ* a third family, and now *-ī* feminine. Four endings, four families. You are not being

asked to produce them — only to hear them, because everything Sanskrit does with a noun starts here.

The word, taken apart — its roots and family

Nārī is built from the stem of *nara*, "man", with the feminine ending *-ī* (MW). It is already in the Rigveda and lives on as Hindi *nār*, "woman" (CDIAL 7078).

What you've built

A second person and a fourth ending. The system is bigger than two, exactly as the night lesson warned.

Your turn

- *Say it:* *nārī* — "woman"
- *Say it:* it against *naraḥ*, and name the shared piece
- *Say it:* the four endings you have now met
- *Recall:* read किमर्थम्, then say *sapta*

Before you move on

What do नरः and नारी share? (The stem *nar-*.) Which ending marks this feminine? (Long *-ī*.)

20.3 बालः (bālaḥ) — child, boy

The youngest person in the chapter.

You'll want to know: बालः

बालः (*bālaḥ*) — "child, boy, a young one."

It carries a sense wider than English "boy": *bāla* is anything in its early state, and the word is used of young animals and of the newly-risen sun as readily as of a child. The feminine बाला (*bālā*) is a girl.

Notice that the feminine here is *-ā*, not the *-ī* you just met. Sanskrit has more than one way to make a feminine, which is inconvenient and true.

The word, taken apart — its roots and family

Bāla "young" has several proposed etymologies and none is settled. CDIAL 9216 tentatively puts it in a set of words for a defect of body or mind, whose source may be Munda or Dravidian (CDIAL 9124). It lives on as Hindi *bāl* and *bālā*, "child".

What you've built

Three people, and an honest complication: the feminine endings are not a single rule.

Your turn

- *Say it:* *bālaḥ* — "child"
- *Say it:* the feminine — *bālā*
- *Say it:* the two different feminine endings you have now seen
- *Recall:* say *kati*
- *Read it:* अष्ट

Before you move on

What does बाल cover beyond "boy"? (Anything in its early state.) Which two feminine endings have you met? (*-ī* and *-ā*.)

20.4 वृद्धः (vṛddhaḥ) — an old person, an elder

The oldest person in the chapter — and a word that is careful in a way English is not.

You'll want to know: वृद्धः

वृद्धः (*vṛddhaḥ*) — "an old person, an elder, one who has grown."

You already have पुरातन (*purātana*), which was glossed "old — of a thing, not of a person." Here is the other half of that pair, and the distinction is the point.

पुरातन is old as in *ancient*: it has existed a long time. वृद्धः is old as in *grown*: from the root √वृध् (*vṛdh*), "to grow, increase." An elder is not a thing that has lasted; an elder is someone who has grown.

English flattens both into "old" and loses the compliment.

The word, taken apart — its roots and family

Vṛddha is the past participle of the root √vṛdh, "to grow, increase": "grown", and so "grown old" (MW, CDIAL 12073).

What you've built

Four people — and a pair of words that shows why a one-word gloss is sometimes a lie by omission.

Your turn

- *Say it: vṛddhaḥ* — "an elder"
- *Say it:* which of *purātana* and *vṛddha* you would use for a temple
- *Say it:* what √वृध् means (to grow)
- *Read it:* कुतः
- *Recall:* say *navan*

Before you move on

What root is वृद्धः built on? (√वृध्, "to grow.") Which word would you use of an old building? (*Purātana.*)

20.5 जनः (janaḥ) — people, folk

All of them at once.

You'll want to know: जनः

जनः (*janaḥ*) — "people, folk, a person, a race."

From the root √जन् (*jan*), "to be born, to beget" — the same root behind *janma*, "birth." Its Latin cousins are *gens* ("clan, people") and *genus*, and

through them and their Greek kin English has **genus**, **gene**, **generate**, **genesis** and **nation** (from *natio*, "a being born").

So जनः does not mean a crowd. It means *those who were born* — kinship rather than quantity.

The word, taken apart — its roots and family

Jana is built on the root √jan, "to be born, beget", which MW compares with Greek *gignomai* and Latin *gignō*. It lives on as Hindi *janā*, "a person" (CDIAL 5098).

What you've built

Five people: man, woman, child, elder, folk — and every one of them arrived with its ending legible and a European cousin attached.

Your turn

- *Say it: janaḥ* — "people"
- *Say it:* three English words from its Latin cousin
- *Say it:* all five people, in order
- *Recall:* say *daśa*

Your turn — man, woman, child

Say these aloud:

- "man", and the English word built on its Greek cousin (*naraḥ*; **android**)
- "woman", and the piece it shares with "man" (*nārī*; *nar-*)
- "child", and "girl" (*bālaḥ*; *bālā*)
- the family each ending marks (*naraḥ*, *bālaḥ*: *-aḥ*, masculine; *nārī*: *-ī*, feminine; *bālā*: *-ā*, a second feminine)

Before you move on

What does √जन् mean? (To be born.) Which English words share it? (*Gene*, *genesis*, *generate*, *nation*.)

Chapter 21

More Everyday Verbs

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say that someone drinks, laughs, stands and remembers in Sanskrit.
>
> *Complete SA-C21-remember and say all four verbs in order.*

21.1 नृत्यति (nṛtyati) — he, she or it dances

A short run of everyday verbs, one at a time.

You'll want to know: नृत्यति

नृत्यति (*nṛtyati*) — "he, she or it dances".

From √नृत् (*nṛt*), 'to dance'. It gives *nṛtya*, the danced half of the classical performing arts, as against *nāṭya*, the acted half — a distinction Sanskrit draws that English does not.

The word, taken apart — its roots and family

Nṛtyati is the present of the root √nṛt, "to dance", already in the Rigveda (MW). It lives on as Hindi *nācnā*, "to dance" (CDIAL 7583).

What you've built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

- *Say it: nṛtyati*
- *Say it:* it again, to someone standing in a doorway
- *Recall:* say *ṣaṭ*
- *Read it:* सप्त

Before you move on

What does नृत्यति mean? ("he, she or it dances".) Say it once more.

21.2 हसति (hasati) — he, she or it laughs

Before the new one: what did *nṛtyati* mean?

You'll want to know: हसति

हसति (*hasati*) — "he, she or it laughs".

From √हस् (*has*). It is the word inside *hāsya*, the comic mood in the classical theory of drama — one of the nine *rasas*, so laughter here is a category of art, not only a noise.

The word, taken apart — its roots and family

Hasati is the present of the root √has, "to laugh" (MW). It lives on as Hindi *hasnā*, "to laugh" (CDIAL 14021).

What you've built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

- *Say it: hasati*
- *Say it:* it again, to someone standing in a doorway
- *Say it:* it after *nṛtyati*, so the two sit together
- *Read it:* अष्ट

Before you move on

What does हसति mean? ("he, she or it laughs".) Say it once more.

21.3 तिष्ठति (tiṣṭhati) — he, she or it stands

Before the new one: what did *hasati* mean?

You'll want to know: तिष्ठति

तिष्ठति (*tiṣṭhati*) — "he, she or it stands".

From √स्था (*sthā*), 'to stand' — the same root as Latin *stare* and English **stand**, **stable**, **status**. The *ti-* at the front is reduplication: the root's first sound, doubled.

What you've built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

- *Say it: tiṣṭhati*
- *Say it:* it again, to someone standing in a doorway
- *Say it:* it after *hasati*, so the two sit together
- *Recall:* say *navan*

Before you move on

What does तिष्ठति mean? ("he, she or it stands".) Say it once more.

21.4 स्मरति (smarati) — he, she or it remembers

Before the new one: what did *tiṣṭhati* mean?

You'll want to know: स्मरति

स्मरति (*smarati*) — "he, she or it remembers".

From √स्मृ (*smṛ*), 'to remember'. It gives *smṛti*, 'that which is remembered' — the name for a whole class of texts, as against *śruti*, 'that which is heard'. A memory word doing bibliographic work.

The word, taken apart — its roots and family

Smarati is the present of the root √smṛ, "to remember" (MW, CDIAL 13863). MW compares Latin *memor*, "mindful", the source of English **memory**.

What you've built

One more everyday action. That closes the run: four everyday actions, each met on its own.

Your turn

- *Say it: smarati*
- *Say it:* it again, to someone standing in a doorway
- *Say it:* it after *tiṣṭhati*, so the two sit together
- *Read it:* दश

Before you move on

What does स्मरति mean? ("he, she or it remembers".) Say it once more.

Verbs of Mind and Motion

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 4 of 5 lessons.

> ***By the end of this chapter:*** I can say that someone hears, leads, plays and asks in Sanskrit, and name the root behind each.
>
> *Complete SA-C22-burn and say all four verbs in order.*

22.1 शृणोति (śṛṇoti) — he, she or it hears

A short run of everyday verbs, one at a time.

Say "remembers." (*Smarati.*) *Smṛti* is what is remembered; this lesson's verb gives *śruti*, what is heard.

You'll want to know: शृणोति

शृणोति (*śṛṇoti*) — "he, she or it hears".

From √**श्रु** (*śru*), 'to hear' — the same root as Latin *clueo* and Greek *kleos*, 'fame', which is what gets heard about you. It gives **श्रुति** (*śruti*), 'that which is heard': the Vedas, as against *smṛti*, 'that which is remembered'.

What you've built

One more everyday action. Three follow, and each reuses the ones before.

Your turn

- *Say it: śṛṇoti*
- *Say it:* it once more, slowly
- *Recall:* say *naraḥ*
- *Read it:* नारी

Before you move on

What does शृणोति mean? ("he, she or it hears".) Say it once more.

22.2 नयति (nayati) — he, she or it leads

Before the new one: what did *śṛṇoti* mean?

You'll want to know: नयति

नयति (*nayati*) — "he, she or it leads".

From √नी (*nī*), 'to lead'. It is inside *netṛ*, 'leader', and *naya*, 'polity' — the art of leading people, which Sanskrit treats as a subject with a name.

The word, taken apart — its roots and family

Nayati is the present of the root √nī, "to lead", already in the Rigveda (MW). It lives on as Bengali *neoyā*, "to take" (CDIAL 6966).

What you've built

One more everyday action. Three follow, and each reuses the ones before.

Your turn

- *Say it: nayati*
- *Say it:* it once more, slowly
- *Say it:* it after *śṛṇoti*, so the two sit together
- *Read it:* बालः

Before you move on

What does नयति mean? ("he, she or it leads".) Say it once more.

22.3 क्रीडति (krīḍati) — he, she or it plays

Before the new one: what did *nayati* mean?

Say "I do." (*Karomi.*) Playing is one more thing you do.

You'll want to know: क्रीडति

क्रीडति (*krīḍati*) — "he, she or it plays".

From √क्रीड् (*krīḍ*). The noun *krīḍā* covers a child's game, a sport, and divine play — *līlā*'s plainer cousin — so the word does not separate the trivial from the cosmic.

The word, taken apart — its roots and family

Krīḍati is the present of the root √krīḍ, "to play"; the Rigveda has it as *krīḷati* (MW, CDIAL 3592). The noun *krīḍā* is built from the same root.

What you've built

One more everyday action. Three follow, and each reuses the ones before.

Your turn

- *Say it: krīḍati*
- *Say it:* it once more, slowly
- *Say it:* it after *nayati*, so the two sit together
- *Recall:* say *vṛddhaḥ*

Before you move on

What does क्रीडति mean? ("he, she or it plays".) Say it once more.

22.4 दहति (dahati) — he, she or it burns

Before the new one: what did *krīḍati* mean?

You'll want to know: दहति

दहति (*dahati*) — "he, she or it burns".

From √दह् (*dah*), and its distant English cousin may be **day** — by way of a Germanic word for the burning warmth of the sky, not the daylight itself.

The word, taken apart — its roots and family

Dahati is the present of the root √dah, "to burn". It is inherited: MW compares Lithuanian *degu*, "I am hot", and Gothic *dags*, "day". It lives on as Hindi *dahnā*, "to burn" (CDIAL 6245).

What you've built

That closes the run: four more actions, each met on its own.

Your turn

- *Say it: dahati*
- *Say it:* it once more, slowly
- *Say it:* it after *krīḍati*, so the two sit together
- *Read it:* जनः

Before you move on

What does दहति mean? ("he, she or it burns".) Say it once more.

22.5 ड — one character, met inside words you already say

Before the new one, the ones you have already met: ज · श · छ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ड

ड — *ḍa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ḍ*, it is **ḍa**.

What it is made of:

- a descending stem joined to an upper-left loop and broad open lower bowl
- the top shirorekhā

You already say these, and every one of them has ड somewhere inside it:

- क्रीडति *krīḍati* — he, she or it plays

Chapter 23

The Four Oldest Kinship Words

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 4 of 5 lessons.

> ***By the end of this chapter:*** I can name a father, a mother, a son and a daughter in Sanskrit, and name a cousin of each outside India.
>
> *Complete SA-C23-daughter and say all four words in order.*

23.1 पिता (pitā) — father

Before the new one: what did *dahati* mean?

The numbers lined up with Latin and English regularly, not by chance. Listen for the same regularity in *pitā* and *father*.

You'll want to know: पिता

पिता (*pitā*) — "father".

The stem behind it is पितृ (*pitṛ-*), and its family reaches further than that of any word you have met: Latin *pater*, Greek *patēr*, Gothic *fadar*, Old Irish *athir*, English *father*. The people lesson laid out four noun endings; this is a fifth family, the *-ṛ* stems, and most of Sanskrit's kinship words live in it.

What you've built

The first of the four oldest words in the family. Three follow, and each reuses the ones before.

Your turn

- *Say it: pitā*
- *Say it:* it once more, slowly
- *Say it:* it beside *pater* and *father*, and hear the one word underneath
- *Recall:* say *nṛtyati*
- *Read it:* शृणोति

Before you move on

What does पिता mean? ("father".) Say it once more.

23.2 माता (mātā) — mother

Before the new one: what did *pitā* mean?

You'll want to know: माता

माता (*mātā*) — "mother".

The stem is मातृ (*mātṛ-*) — the same *-ṛ* family as पिता, and the same long reach: Latin *māter*, Greek *mētēr*, Old English *mōdor*, English *mother*, Russian *mat*. Put the father-word into the dual and Sanskrit gives you *pitarau*, 'the two parents', with the mother folded silently inside it.

What you've built

Two of the four, and one ending family carrying both.

Your turn

- *Say it: mātā*
- *Say it:* it once more, slowly
- *Say it:* it after *pitā*, and name the ending they share
- *Read it:* हसति
- *Recall:* say *nayati*

Before you move on

What does माता mean? ("mother".) Say it once more.

23.3 सूनुः (sūnuḥ) — son

Before the new one: what did *mātā* mean?

You'll want to know: सूनुः

सूनुः (*sūnuḥ*) — "son".

From √सू (*sū*), 'to bring forth, to give birth' — so the word means the one who was brought forth. Its cousins are Gothic *sunus*, Old English *sunu*, English *son*, Lithuanian *sūnus*, Russian *syn*. Sanskrit's other son-word, *putraḥ*, is far commoner in the texts, but its own origin is doubtful (MW); this quieter one is the word with the familiar cousins.

The word, taken apart — its roots and family

Sūnu is built on the root √sū, "to bring forth" (MW), and it is inherited: MW compares Gothic *sunus*, Lithuanian *sūnus* and English **son** (CDIAL 13569).

What you've built

Three of the four, and a root that names a person by what happened to them.

Your turn

- *Say it: sūnuḥ*
- *Say it:* it once more, slowly
- *Say it:* it beside *sunus* and *son*, and hear the one word underneath
- *Recall:* say *tiṣṭhati*
- *Read it:* क्रीडति

Before you move on

What does सूनुः mean? ("son".) Say it once more.

23.4 दुहिता (duhitā) — daughter

Before the new one: what did *sūnuḥ* mean?

You'll want to know: दुहिता

दुहिता (*duhitā*) — "daughter".

Back to the *-ṛ* family: the stem is दुहितृ (*duhitṛ-*), standing beside पिता and माता. Its cousins are English *daughter*, Greek *thugatēr*, Gothic *dauhtar*, Persian *duxtar*. Indian tradition, and MW after it, read it as 'the one who milks', from √दुह् (*duh*) — a tidy story about a daughter's work in the house. The cousins show the word is far older than Sanskrit, so the story is a reading, not a settled etymology. Keep the story, and keep the fact that it is one.

What you've built

That closes the run: father, mother, son, daughter — the four words the family kept longest.

Your turn

- *Say it: duhitā*
- *Say it:* it once more, slowly
- *Say it:* all four in order, and name the ending three of them share
- *Read it:* स्मरति
- *Recall:* say *dahati*

Before you move on

What does दुहिता mean? ("daughter".) Say it once more.

23.5 ◌ू — one character, met inside words you already say

Before the new one, the ones you have already met: श · छ · ड. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ◌ू

◌ू — *ū*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: a longer hook below the consonant.

Worked through: न + ◌ू = नू — *nū*.

You already say these, and every one of them has ◌ू somewhere inside it:

- सूनुः *sūnuḥ* — son

Writing: ◌ू — follow the numbered strip

How it is written — one unbroken stroke · 3 movements

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Devanagari recognizer, class 51 (◌ू uu sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ◌ू is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ◌ू yourself — slowly, and larger than it is printed.

The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at this, and find ु in it

  सूनुः

- *Trace it:* ु three times, saying *ū* as you finish each one
- *Look:* back at any page of this chapter and find ु once more

Before you move on

Which character is this — ु? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ū* on; takes the built-in *a* off.**) Name one word you already say that contains it.

Chapter 24

Things You Ask For

Modes: 🚗 **voice** (5) ✓ **pen** (2) 🚗 **Hands-free start:** the first 3 of 7 lessons.

> ***By the end of this chapter:*** I can name five everyday things I might ask someone for in Sanskrit, and say which noun family each one belongs to.
>
> *Complete SA-C24-lamp and demonstrate the chapter promise.*

24.1 जलम् (jalam) — water (the stuff, not the drink)

Before the new word: what did *duhitā* mean?

You'll want to know: जलम्

जलम् (*jalam*) — "water (the stuff, not the drink)".

You already have one water-word: पानीयम् (*pānīyam*), which names water by what you do with it — "the thing to be drunk". जलम् names the stuff. Rain is *jalam*; the river is full of *jalam*; nobody offers you a cup of it in that word.

Sanskrit keeps several words here — *jalam*, *pānīyam*, *udakam*, *āpaḥ* — and a poet chooses between them the way an English poet chooses between water, drink, and the waters. The ending puts जलम् in the neuter family you met with अन्नम् and गृहम्: -अम्.

The word, taken apart — its roots and family

Jala is an old word for water, but its origin is not settled: MW gives no root for it. It lives on as Hindi and Bengali *jal* (CDIAL 5155).

What you've built

Two words for water now, and a reason to prefer one over the other.

Your turn

- *Say it: jalam*
- *Say it:* it once more, slowly
- *Say it: pānīyam*, then *jalam*, and say which one you would ask for at a table
- *Recall:* say *śṛṇoti*
- *Read it:* पिता

Before you move on

What does जलम् mean? ("water (the stuff, not the drink)".) Say it once more.

24.2 ओदनः (odanaḥ) — cooked rice

Before the new word: what did *jalam* name, and what did *pānīyam* name?

You'll want to know: ओदनः

ओदनः (*odanaḥ*) — "cooked rice".

अन्नम् (*annam*) was food in general — "the eaten thing". ओदनः is narrower and warmer: the grain after it has met the water. Cooked rice, on a plate, now.

The traditional derivation takes it from a root meaning "to wet", which reads the word as *grain that has been moistened* — a description of cooking rather than of rice. Its ending -अः puts it in the masculine family beside मार्गः

and ग्रामः, so ओदनः and अन्नम् sit in different families while naming the same meal.

The word, taken apart — its roots and family

Odana is a Rigvedic word for grain cooked with milk (MW). MW traces it to the root √ud, "to wet", and CDIAL 2552 repeats that link with a question mark, so it is likely but not settled.

What you've built

A general word for food, and a particular thing on the plate.

Your turn

- *Say it: odanaḥ*
- *Say it:* it once more, slowly
- *Say it: annam*, then *odanaḥ*, and name the ending each one carries
- *Read it:* नयति
- *Recall:* say *mātā*

Before you move on

What does ओदनः mean? ("cooked rice".) Say it once more.

24.3 फलम् (phalam) — fruit (and the result of anything)

Before the new word: what did *odanaḥ* mean?

You'll want to know: फलम्

फलम् (*phalam*) — "fruit (and the result of anything)".

फलम् is the fruit on the tree. It is also, in the same breath and with no metaphor felt, the fruit of an action — the result, the reward, the yield. A Sanskrit sentence about the *phalam* of your work is not reaching for a poetic image; it has one word where English has two.

The root behind it means "to burst, to bear fruit", which is the fruit split open at the moment it is ripe. Neuter **-अम्**, like **जलम्** and **अन्नम्** before it.

The word, taken apart — its roots and family

Phala is Rigvedic. MW files it under the root √phal, "to burst, split", while CDIAL 9051 and DEDR 4004 compare Tamil words for ripening, so its origin is not settled. It lives on as Hindi *phal* (CDIAL 9051).

What you've built

A word that carries an orchard and a consequence at once.

Your turn

- *Say it: phalam*
- *Say it:* it once more, slowly
- *Say it: phalam*, and then *jalam* and *phalam* together, naming the ending they share
- *Recall:* say *krīḍati*
- *Read it:* **सूनुः**

Before you move on

What does **फलम्** mean? ("fruit (and the result of anything)".) Say it once more.

24.4 ओ — one character, met inside words you already say

Before the new one, the ones you have already met: **छ** · **ड** · **ू**. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ओ

ओ — *o*.

It is an **independent vowel**: the full-size letter a vowel wears when it opens a word and has no consonant to lean on. Inside a word the same vowel is written as a small sign instead.

What it is made of:

- the joined upper and lower bowls of अ
- a middle shoulder running into the inner stem
- the inner stem
- the trailing stem
- a separate upper arc
- the top shirorekhā

You already say these, and every one of them has ओ somewhere inside it:

- ओदनः *odanaḥ* — cooked rice

Writing: ओ

How ओ *is written, stroke by stroke*

- **1.** curve right around the upper bowl and continue down and around the lower bowl without lifting

- **2.** lift and sweep the middle shoulder right
- **3.** without lifting, climb up the inner stem to the headline
- **4.** descend the inner stem
- **5.** lift and descend the trailing stem
- **6.** lift at the trailing stem's headline junction and sweep the upper arc upward and left
- **7.** lift and draw the top shirorekhā left-to-right

Pen lifts: 4. The pen comes up 4 times and no more.

The source shows six movements; most native writers draw ओ in five strokes (60% of HP Labs India's native-writer samples). This path keeps every movement in order and direction, and lifts four times: the shoulder runs on up the inner stem and back down it.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Saurmandal, 'Devanagari ओ stroke order.svg', panels 1–6, Wikimedia Commons, 5 August 2023.

Your turn

- *Look:* at this, and find ओ in it

  ओदनः

- *Trace it:* ओ three times, saying *o* as you finish each one
- *Look:* back at any page of this chapter and find ओ once more

Before you move on

Which character is this — ओ? What sound does it carry? (***o***.) Name one word you already say that contains it.

24.5 वस्त्रम् (vastram) — cloth, a garment

Before the new word: what did *phalam* mean — both of its meanings?

You'll want to know: वस्त्रम्

वस्त्रम् (*vastram*) — "cloth, a garment".

You know वसामि (*vasāmi*), "I dwell", from the root *vas*. वस्त्रम् looks like it belongs to that root and does not. Sanskrit has two roots spelled *vas*: one for dwelling, one for wearing. वसामि belongs to the first, वस्त्रम् to the second, and no amount of staring at the letters will separate them — only the meanings do.

The wearing one travelled. Latin *vestis*, and through it English *vest*, *vestment*, *invest* — which originally meant to clothe someone in the robes of an office. Neuter -अम्.

What you've built

A word that warns you: same letters, different root.

Your turn

- *Say it: vastram*
- *Say it:* it once more, slowly
- *Say it: vasāmi*, then *vastram*, and say which root each one belongs to
- *Read it:* दहति
- *Recall:* say *duhitā*

Before you move on

What does वस्त्रम् mean? ("cloth, a garment".) Say it once more.

24.6 दीपः (dīpaḥ) — a lamp

Before the last word of this run: what did *vastram* mean, and what did *odanaḥ* mean?

You'll want to know: दीपः

दीपः (*dīpaḥ*) — "a lamp".

दीपः is a lamp — the small clay one with oil and a wick. Its root means "to blaze", so the word names the burning rather than the vessel.

Put दीप together with a word meaning "a row" and you get *dīpāvalī*, "a row of lamps" — the festival English writes as Diwali. Masculine -अः, like ओदनः.

The word, taken apart — its roots and family

Dīpa is built on the root √dīp, "to blaze, shine" (MW). It lives on as Hindi *diyā*, the small clay lamp of Diwali (CDIAL 6348).

What you've built

Five things you might ask for: water, rice, fruit, cloth, a lamp.

Your turn

Say these aloud:

- *dīpaḥ*
- it once more, slowly
- all five in order, and sort them into the two noun families

Before you move on

What does दीपः mean? ("a lamp".) Say it once more.

24.7 फ — one character, met inside words you already say

Before the new one, the ones you have already met: ड · ू · ओ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: फ

फ — *pha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ph*, it is **pha**.

What it is made of:

- a left stem joined through the lower bowl to a rising and retraced central stem
- a separate clockwise right arch
- the top shirorekhā

You already say these, and every one of them has फ somewhere inside it:

- फलम् *phalam* — fruit

Writing: फ

How it is written — 3 strokes · 2 pen lifts · 3 movements

Stroke order after JackPotte, 'Devanagari pʰ फ.gif', strokes 1–3, Wikimedia Commons, 29 March 2009

This order is attested, not standardised; the source records where it varies.

How फ is written, stroke by stroke

- **1.** descend the left stem, curve right around the lower bowl, rise along the central side to the headline, then retrace down the central stem without lifting
- **2.** lift at the central junction and sweep clockwise over and down through the open right arch

- **3.** lift and draw the top shirorekhā left-to-right

Pen lifts: 2. The pen comes up 2 times and no more.

Chapter 25

The Hand and the Foot

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five more parts of the body in Sanskrit, and name the sound law that ties three of them to their English cousins.
>
> *Complete SA-C25-hair and demonstrate the chapter promise.*

25.1 हस्तः (hastaḥ) — hand

Before the new word: what did *dīpaḥ* mean?

You'll want to know: हस्तः

हस्तः (*hastaḥ*) — "hand".

You have अक्षि, कर्णः, मुखम्, नासिका and हृदयम् (*akṣi, karṇaḥ, mukham, nāsikā, hṛdayam*). हस्तः adds the hand.

Its cousins run west rather than into Europe: Avestan *zasta*, Old Persian *dasta*, and modern Persian *dast*, all "hand". Latin went its own way with *manus*, which is unrelated to this word — a reminder that the family tree branches, and that two languages can both be cousins of Sanskrit without being cousins of each other in any given word.

What you've built

A sixth part of the body, and a cousin found next door rather than in Rome.

Your turn

- *Say it: hastaḥ*
- *Say it:* it once more, slowly
- *Say it: hastaḥ*, then *akṣi* and *hastaḥ* together
- *Recall:* say *pitā*
- *Read it:* जलम्

Before you move on

What does हस्तः mean? ("hand".) Say it once more.

25.2 पादः (pādaḥ) — foot

Before the new word: what did *hastaḥ* mean?

You'll want to know: पादः

पादः (*pādaḥ*) — "foot".

पादः is one of the most travelled words in this book. Latin *pēs*, in its other forms *pedem* — whence *pedal*, *pedestrian*, *biped*. Greek *pous*, *podos* — whence *podium*, *tripod*, *octopus*, the eight-foot.

And English *foot*, which looks unlike the rest until you apply the same sound law you met at पिता and *father*: an old *p* becomes *f* in the Germanic branch. *Pādaḥ* and *foot* are the same word, worn differently. Masculine -अः, like हस्तः.

What you've built

A word whose cousins you can now predict rather than be told.

Your turn

- *Say it: pādaḥ*
- *Say it:* it once more, slowly
- *Say it: pādaḥ*, then *pitā*, and name the sound law both share with their English cousins

- *Read it:* माता
- *Recall:* say *odanaḥ*

Before you move on

What does पादः mean? ("foot".) Say it once more.

25.3 शिरः (śiraḥ) — head

Before the new word: what did *pādaḥ* mean, and what did *hastaḥ* mean?

You'll want to know: शिरः

शिरः (*śiraḥ*) — "head".

शिरः is the head. The old family it belongs to gathered around a sense of "head, horn": Greek *kara*, "head", and Latin *cerebrum*, "brain", sit in it, and so — further out — does English *horn*.

Sanskrit has a second head-word, *mūrdhan*, for the top or the summit of a thing. शिरः is the ordinary one: the head you nod, the head you bow when you say नमस्ते.

What you've built

Three of five, and the bow you already knew has a body part in it now.

Your turn

- *Say it:* *śiraḥ*
- *Say it:* it once more, slowly
- *Say it:* *śiraḥ*, then say *namaste* and name what bends
- *Recall:* say *sūnuḥ*
- *Read it:* फलम्

Before you move on

What does शिरः mean? ("head".) Say it once more.

25.4 दन्तः (dantaḥ) — tooth

Before the new word: what did *śiraḥ* mean?

You'll want to know: दन्तः

दन्तः (*dantaḥ*) — "tooth".

दन्तः is a tooth, and its family is as secure as पादः. Latin *dens*, in its other forms *dentem* — whence *dentist*, *dental*, *trident*, the three-tooth. Greek *odous*, *odontos* — whence *mastodon*.

English *tooth* belongs here too, by the same Germanic shift that turned *p* into *f*: an old *d* becomes *t*. So दन्तः, *dens* and *tooth* are three worn copies of one word, and you have now seen the same machinery produce पिता/*father*, पादः/*foot* and दन्तः/*tooth*.

What you've built

A third demonstration of one sound law, on a word you can point at.

Your turn

- *Say it: dantaḥ*
- *Say it:* it once more, slowly
- *Say it: dantaḥ*, then *pādaḥ*, then *pitā* — three words, one shift
- *Read it:* दुहिता
- *Recall:* say *vastram*

Before you move on

What does दन्तः mean? ("tooth".) Say it once more.

25.5 केशः (keśaḥ) — hair (of the head)

Before the last word of this run: what did *dantaḥ* mean, and what did *śiraḥ* mean?

You'll want to know: केशः

केशः (*keśaḥ*) — "hair (of the head)".

केशः is the hair on the head — the hair that grows out of शिरः.

And here the trail stops. No secure cousin has been found for केशः outside India: scholars have proposed several and settled on none. That is worth meeting on purpose, because the last four lessons made travel look easy. Some words have a history we can reconstruct in detail; some have one we cannot reconstruct at all. कर्णः, the ear, was the same case. Masculine -अः.

The word, taken apart — its roots and family

Keśa is already in the Atharvaveda. The native grammarians derived it from the root √kliś (MW), but no secure cousin outside India is known, so its origin is not settled. It lives on as Hindi and Marathi *kes* (CDIAL 3471).

What you've built

Five more parts of the body: hand, foot, head, tooth, hair.

Your turn

- *Say it: keśaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, and name the one with no known cousins
- *Recall:* say *dīpaḥ*

Before you move on

What does केशः mean? ("hair (of the head)".) Say it once more.

Chapter 26

Naming Who Someone Is

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what someone's role is in Sanskrit — teacher, student, king, guest, physician — and name the everyday meaning hiding inside two of those words.
>
> *Complete SA-C26-physician and demonstrate the chapter promise.*

26.1 गुरुः (guruḥ) — a teacher, and the word for heavy

Before the new word: what did *keśaḥ* mean?

You'll want to know: गुरुः

गुरुः (*guruḥ*) — "a teacher, and the word for heavy".

गुरुः reached English on its own, so you already say it. What English lost on the way is the ordinary meaning: *guru* first of all means **heavy**. A heavy stone is *guru*; a teacher is *guru* because a teacher has weight.

The heavy-word travelled: Latin *gravis* — whence *grave*, *gravity*, *aggravate* — and Greek *barus*, whence *barometer*, the weight-measurer. So **गुरुः**, *gravity* and *barometer* all descend from one word for heaviness, and only Sanskrit made a person out of it.

What you've built

A word you already knew in English, returned to its first meaning.

Your turn

- *Say it: guruḥ*
- *Say it:* it once more, slowly
- *Say it: guruḥ*, and say both of its meanings
- *Recall:* say *jalam*
- *Read it:* हस्तः

Before you move on

What does गुरुः mean? ("a teacher, and the word for heavy".) Say it once more.

26.2 शिष्यः (śiṣyaḥ) — a student, a disciple

Before the new word: what did *guruḥ* mean, and what did it mean before that?

You'll want to know: शिष्यः

शिष्यः (*śiṣyaḥ*) — "a student, a disciple".

शिष्यः stands opposite गुरुः. It is built from a root meaning "to instruct", in a form that means *one who is to be taught* — not a person who studies, but a person who is owed teaching. The obligation points at the teacher.

English arrived at the same idea by another road: *disciple* is from Latin *discere*, "to learn". Two languages, two independent words, one relationship. Masculine -अः, like गुरुः.

What you've built

The pair: the one with weight, and the one who is owed teaching.

Your turn

- *Say it: śiṣyaḥ*
- *Say it:* it once more, slowly
- *Say it: guruḥ*, then *śiṣyaḥ*, and say which one is owed something

- *Read it:* ओदनः
- *Recall:* say *pādaḥ*

Before you move on

What does शिष्यः mean? ("a student, a disciple".) Say it once more.

26.3 राजा (rājā) — a king

Before the new word: what did *śiṣyaḥ* mean?

Say "people." (*Janaḥ*, from the root *jan* "to be born.") A king rules over them.

You'll want to know: राजा

राजा (*rājā*) — "a king".

राजा is a king, and its nominative ends in *-ā* like पिता and माता, but it belongs to another family: the stem is *rājan-*.

Its cousin in Rome is *rēx*, in its other forms *rēgem*: *regal*, *royal*, *regent*, *rex*. In Gaul, chieftains' names ended in *-rīx* — Vercingetorix. English borrowed *raj* and *maharaja* back from India in the nineteenth century, so the word has now entered English twice, three thousand years apart, by two different doors.

The word, taken apart — its roots and family

Rājan is built on the root √rāj, "to rule" (MW, CDIAL 10679). It is inherited: MW compares Latin *rēx*, Gothic *reiks* "ruler" and English *rich*, which first meant "powerful".

What you've built

One word, two arrivals in English, with millennia between them.

Your turn

- *Say it:* *rājā*
- *Say it:* it once more, slowly
- *Say it:* *rājā*, then *pitā*, and name the stem behind each (*rājan-*, *pitṛ-*)

- *Recall:* say *phalam*
- *Read it:* शिरः

Before you move on

What does राजा mean? ("a king".) Say it once more.

26.4 अतिथिः (atithiḥ) — a guest

Before the new word: what did *rājā* mean, and what did *guruḥ* mean?

Ask a guest "from where?" and "how?" (*Kutaḥ? Katham?*) — two more of the *k*- questions.

You'll want to know: अतिथिः

अतिथिः (*atithiḥ*) — "a guest".

अतिथिः is a guest. Tradition reads the word as *a-tithi*, "one without a date" — the visitor who arrives unannounced, on no appointed day, and must be fed anyway. MW also gives a root meaning "to wander", which would make it "the wanderer".

Keep the traditional reading; keep also the fact that it is a reading. Either way the famous line अतिथिदेवो भव — "be one to whom the guest is a god" — tells you how much weight the word carries.

The word, taken apart — its roots and family

MW gives both accounts of *atithi*: the root √at, "to wander", or *a-tithi*, "one who has no fixed day for coming". Which one is right is not settled.

What you've built

Four roles, and one of them arrives without warning.

Your turn

- *Say it: atithiḥ*
- *Say it:* it once more, slowly

- *Say it: atithiḥ*, and say what the traditional reading claims
- *Read it:* वस्त्रम्
- *Recall:* say *dantaḥ*

Before you move on

What does अतिथिः mean? ("a guest".) Say it once more.

26.5 वैद्यः (vaidyaḥ) — a physician

Before the last word of this run: what did *atithiḥ* mean, and what did *śiṣyaḥ* mean?

You'll want to know: वैद्यः

वैद्यः (*vaidyaḥ*) — "a physician".

वैद्यः is a physician — literally *one who has the knowledge*, built on *vidyā*, knowledge, from a root *vid*, "to know".

That root is one of the great travellers: Latin *vidēre*, "to see" — *video*, *evident*; Greek *idea*; English *wit*, *wise*, *wisdom*. And Sanskrit already gave you a second knowing-verb, जानाति, from a different root altogether. Sanskrit keeps two ways of knowing apart, and वैद्यः belongs to the one whose cousins elsewhere mean seeing — the doctor as the one who has looked.

What you've built

Five roles: teacher, student, king, guest, physician.

Your turn

- *Say it: vaidyaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, and name the two that make a pair
- *Recall:* say *dīpaḥ*
- *Read it:* केशः

Before you move on

What does वैद्यः mean? ("a physician".) Say it once more.

Chapter 27

Answering With More Than Yes

Modes: 🚗 **voice** (5) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can answer in Sanskrit with more than yes and no, and hear the be-verb sitting inside three of the answers.
>
> *Complete SA-C27-thus and demonstrate the chapter promise.*

27.1 अस्तु (astu) — so be it, all right

Before the new word: what did *vaidyaḥ* mean?

You'll want to know: अस्तु

अस्तु (*astu*) — "so be it, all right".

You have had आम् and न for yes and no since the first chapter, and they are blunt. अस्तु is the agreeable middle: *let it be so*, *all right*, *fine*.

It is not a new word so much as a new face on one you know. अस्ति (*asti*), "is", was the third person of the root *as*, "to be". अस्तु is the same verb in the commanding form: **let it be**. Sanskrit answers a request by ordering the world to comply.

The word, taken apart — its roots and family

Astu is the third-person command form of the root √as, "to be" (MW), the same root as *asti*. That root is inherited: MW compares Greek *esti* and Latin *est*.

What you've built

A reply softer than yes, built out of the be-verb you already had.

Your turn

- *Say it: astu*
- *Say it:* it once more, slowly
- *Say it: asti*, then *astu*, and say what changed between them
- *Recall:* say *hastaḥ*
- *Read it:* गुरुः

Before you move on

What does अस्तु mean? ("so be it, all right".) Say it once more.

27.2 ै — one character, met inside words you already say

Before the new one, the ones you have already met: ू · ओ · फ. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ै

ै — *ai*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

Where it sits: a double stroke above the top bar.

Worked through: न + ै = नै — *nai*.

You already say these, and every one of them has ै somewhere inside it:

- वैद्यः *vaidyaḥ* — a physician

Writing: ै — copy what you see

Put your pen on ै and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this, and find ै in it

  वैद्यः

- *Trace it:* ै three times, saying *ai* as you finish each one
- *Look:* back at any page of this chapter and find ै once more

Before you move on

Which character is this — ै? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ai* on; takes the built-in *a* off.**) Name one word you already say that contains it.

27.3 साधु (sādhu) — well done, good

> Before the new word: what did *astu* mean, and which verb was it built on?

You'll want to know: साधु

साधु (*sādhu*) — "well done, good".

साधु is what you call out when something has been done well — *good*, *well said*, the Sanskrit *bravo*. An audience says it aloud at a concert.

Its root means "to accomplish, to reach the goal", so the word praises a thing for having arrived where it was going. The same word, standing on its

own as a noun, names a holy man: *a sādhu* is someone who has accomplished. English borrowed that sense and left the everyday one behind, exactly as it did with गुरुः.

The word, taken apart — its roots and family

Sādhu is built on the root √sādh, "to go straight to a goal, succeed" (MW): first "straight, hitting the mark", then "good", and as a cry, "well done" (CDIAL 13337).

What you've built

A second borrowed word restored to its ordinary use.

Your turn

- *Say it: sādhu*
- *Say it:* it once more, slowly
- *Say it: sādhu*, then *guruḥ*, and say what English kept of each
- *Read it:* पादः
- *Recall:* say *śiṣyaḥ*

Before you move on

What does साधु mean? ("well done, good".) Say it once more.

27.4 अलम् (alam) — enough

Before the new word: what did *sādhu* mean?

You'll want to know: अलम्

अलम् (*alam*) — "enough".

अलम् is *enough*. Enough food, enough talking, enough of that. It is short, common, and does a lot of work for its size.

Set beside it a small word you have not been given yet and will hear constantly — *alam* can also mean *able*, *equal to the task*. So the same two syllables cover "that will do" and "that is up to it", which is roughly the

distance English travels between *enough* and *sufficient*. Its deeper history is not settled, so this one sits with केशः.

The word, taken apart — its roots and family

Alam is the later form of Vedic *aram*, "fittingly, enough" (MW). MW sets Greek *ara* beside *aram*, but its deeper origin is not settled.

What you've built

A one-word answer, and a second word with an unsettled history.

Your turn

- *Say it: alam*
- *Say it:* it once more, slowly
- *Say it: alam*, then *keśaḥ*, and name what those two have in common
- *Recall:* say *śiraḥ*
- *Read it:* राजा

Before you move on

What does अलम् mean? ("enough".) Say it once more.

27.5 सत्यम् (satyam) — true; the truth

Before the new word: what did *alam* mean, and what did *astu* mean?

You'll want to know: सत्यम्

सत्यम् (*satyam*) — "true; the truth".

सत्यम् answers a claim: *true*. As a noun it is *the truth*, and it is the word on the national emblem of India — *satyam eva jayate*, "truth alone conquers".

Look at what it is made of. *Sat-* is the being-form of that same root *as* you met in अस्ति and अस्तु: *what is*. Add an ending and truth is simply **the state of being what is**. English has a cousin, well hidden: *sooth*, as in *soothsayer* — a truth-sayer — and *forsooth*.

The word, taken apart — its roots and family

Satya is built on *sat*, "being, real", the present participle of the root √as "to be" (MW). It lives on as Hindi *saccā*, "true" (CDIAL 13112).

What you've built

A third word from the be-verb, and truth defined as what is.

Your turn

- *Say it: satyam*
- *Say it:* it once more, slowly
- *Say it: asti*, *astu*, *satyam* — three from one root, in that order
- *Read it:* दन्तः
- *Recall:* say *atithiḥ*

Before you move on

What does सत्यम् mean? ("true; the truth".) Say it once more.

27.6 एवम् (evam) — thus, so

Before the last word of this run: what did *satyam* mean, and what did *sādhu* mean?

You'll want to know: एवम्

एवम् (*evam*) — "thus, so".

एवम् means *thus*, *so*, *in this way*. On its own it answers a question: *just so*.

Its real value is that it combines. Put it in front of the first word of this run and you get एवम् अस्तु (*evam astu*) — "so be it", the whole formula, made of two words you now own separately. That is what a small vocabulary buys: not five answers, but the joins between them.

The word, taken apart — its roots and family

Evam is an old adverb, built on the pronoun base *e-* and probably connected with *eva*, "exactly so" (MW, CDIAL 2527).

What you've built

Five replies past yes and no: so be it, well done, enough, true, thus.

Your turn

- *Say it: evam*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *evam astu* as one phrase
- *Recall:* say *keśaḥ*
- *Read it:* वैद्यः

Before you move on

What does एवम् mean? ("thus, so".) Say it once more.

Taking Your Leave

Modes: 🚗 **voice** (5) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can take my leave in Sanskrit, wish someone a good journey, and take the old farewell apart into the two words that built it.

28.1 इदानीम् (idānīm) — now

Before the new word: what did *evam* mean?

Remember the time words that keep one shape wherever they land (*adya, hyaḥ, sadā*). Today's word is another of them.

You'll want to know: इदानीम्

इदानीम् (*idānīm*) — "now".

इदानीम् is *now*. It belongs with सदा, अद्य and ह्यः — always, today, yesterday — and it is the sharpest of them: not this day, this moment.

It is built on a near-pointing stem, *i*-, a neighbour of the *e*- you met with एतत्, "this one". The pointing system runs *a*- / *t*- / *k*-, and इदानीम् is the near end of it applied to time rather than to place: *this*-time. गच्छामि इदानीम् — "I am going now" — is a way to take your leave that reuses the verb you learned for exactly that purpose.

The word, taken apart — its roots and family

Idānīm is built on the near pronoun base *i-*, "this" (MW, CDIAL 1567), the base of *idam*, "this". It is already in the Rigveda.

What you've built

A time word built out of the pointing system, and a way to leave.

Your turn

- *Say it: idānīm*
- *Say it:* it once more, slowly
- *Say it: idānīm*, then *gacchāmi idānīm* as one phrase
- *Recall:* say *guruḥ*
- *Read it:* अस्तु

Before you move on

What does इदानीम् mean? ("now".) Say it once more.

28.2 परश्वः (paraśvaḥ) — the day after tomorrow

Before the new word: what did *idānīm* mean?

You'll want to know: परश्वः

परश्वः (*paraśvaḥ*) — "the day after tomorrow".

You have श्वः (*śvaḥ*), "tomorrow". परश्वः is *para* + *śvaḥ*: the further tomorrow, the day after it.

English needs four words for this and Sanskrit needs one, because *para* — "beyond, further" — can be bolted onto the front of a time word. So this is not really a new word to memorise; it is one you can assemble, which is the cheapest kind of vocabulary there is.

The word, taken apart — its roots and family

Paraśvas is a compound of *para*, "beyond, further", and *śvas*, "tomorrow" (MW). It lives on as Hindi *parsoṃ* and Bengali *parsu*, which mean both the day after tomorrow and the day before yesterday (CDIAL 7799j).

What you've built

A word you could have built yourself out of two you had.

Your turn

- *Say it: paraśvaḥ*
- *Say it:* it once more, slowly
- *Say it: śvaḥ*, then *paraśvaḥ*, and say what *para* contributes
- *Read it:* शिष्यः
- *Recall:* say *sādhu*

Before you move on

What does परश्वः mean? ("the day after tomorrow".) Say it once more.

28.3 इ — one character, met inside words you already say

Before the new one, the ones you have already met: ओ · फ · ै. Say what each of them does.

One character this time. One only — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: इ

इ — *i*.

It is an **independent vowel**: the full-size letter a vowel wears when it opens a word and has no consonant to lean on. Inside a word the same vowel is written as a small sign instead.

What it is made of:

- a descending upright joined to an upper bowl
- a lower bowl and diagonal tail in the same run
- the top shirorekhā

You already say these, and every one of them has इ somewhere inside it:

- इदानीम् *idānīm* — now

Writing: इ

How इ is written, stroke by stroke

- **1.** descend the upright from the headline, turn left around the upper bowl, sweep right through the waist and around the lower bowl, then finish down-right through the tail without lifting
- **2.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up 1 times and no more.

verified modern printed teaching form; everyday handwriting may simplify the curves

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Saurmandal, 'Devanagari इ stroke order.svg', panels 1–2, Wikimedia Commons, 5 August 2023.

Your turn

- *Look:* at this, and find इ in it

  इदानीम्

- *Trace it:* इ three times, saying *i* as you finish each one
- *Look:* back at any page of this chapter and find इ once more

Before you move on

Which character is this — इ? What sound does it carry? (***i***.) Name one word you already say that contains it.

28.4 यात्रा (yātrā) — a journey

Before the new word: what did *paraśvaḥ* mean, and what did *śvaḥ* mean?

You'll want to know: यात्रा

यात्रा (*yātrā*) — "a journey".

यात्रा is a journey — a going, and by long custom a going somewhere holy. Modern Indian languages kept it whole: a *yatra* is a pilgrimage.

It comes from a root *yā*, "to go", which is not the root behind गच्छति. Sanskrit keeps several going-verbs apart, and this one leans toward setting out and travelling rather than the plain act of moving. Feminine, ending in -आ, like माता and नारी.

The word, taken apart — its roots and family

Yātrā is built on the root √yā, "to go, travel", with the noun suffix *-trā* (MW, CDIAL 10456). Punjabi *jātrā*, "pilgrimage", may show it worn down, though CDIAL allows that it was borrowed back from Sanskrit.

What you've built

A second going-root, and a noun made from it.

Your turn

- *Say it: yātrā*
- *Say it:* it once more, slowly
- *Say it: gacchati*, then *yātrā*, and say which one sounds like setting out
- *Recall:* say *rājā*
- *Read it:* अलम्

Before you move on

What does यात्रा mean? ("a journey".) Say it once more.

28.5 शुभम् (śubham) — good, auspicious

Before the new word: what did *yātrā* mean?

You'll want to know: शुभम्

शुभम् (*śubham*) — "good, auspicious".

You have उत्तम (*uttama*) for good in the sense of best. शुभम् is good in the sense of *auspicious* — bright, lucky, well-omened. Its root means "to shine, to be beautiful", so the word praises a thing for looking well rather than for being best.

It is a wishing word, and it goes in front of what you wish for. शुभा यात्रा — a good journey. शुभा रात्रिः — a good night. Both halves are already yours.

The word, taken apart — its roots and family

Śubha is built on the root √śubh, "to shine, be beautiful" (MW, CDIAL 12532): first "bright", then "auspicious".

What you've built

A wish you can attach to a journey or to a night.

Your turn

- *Say it: śubham*
- *Say it:* it once more, slowly
- *Say it: śubhā yātrā*, then *śubhā rātriḥ*
- *Read it:* अतिथिः
- *Recall:* say *satyam*

Before you move on

What does शुभम् mean? ("good, auspicious".) Say it once more.

28.6 स्वस्ति (svasti) — well-being (may it go well)

Before the last word of this run: what did *śubham* mean, and what did *idānīm* mean?

You'll want to know: स्वस्ति

स्वस्ति (*svasti*) — "well-being (may it go well)".

स्वस्ति is the oldest farewell in this book, and you can take it apart with what you already have. *Su-* means "well" — it is the *su-* inside स्वागतम्, "well-come". *Asti* means "is". So स्वस्ति is, exactly, **it is well** — said as a wish over someone leaving.

Add the little ending *-ka* and you have *svastika*, "the mark of well-being", a good-luck sign that was drawn on doorways for thousands of years before the twentieth century took it and made it unusable in the West. The word is not the thing; but the word means what it means.

The word, taken apart — its roots and family

Svasti is a compound of *su*, "well", and *asti*, "is", from the root √as (CDIAL 13915). It is already in the Rigveda (MW).

What you've built

Five ways to leave: now, the day after tomorrow, a journey, a good wish, and well-being itself.

Your turn

- *Say it: svasti*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then take *svasti* apart into its two pieces
- *Recall:* say *vaidyaḥ*
- *Read it:* एवम्

Before you move on

What does स्वस्ति mean? ("well-being (may it go well)".) Say it once more.

Chapter 29

Courtesy Words

Modes: **voice** (5) **eyes** (1) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can be polite in Sanskrit — please, pardon, a bow, a favour — and say what is inside the thank-you I learned on the first day.
>
> *Complete SA-C29-fortunate and demonstrate the chapter promise.*

29.1 कृपया (kṛpayā) — please

Before the new word: what did *svasti* mean, and what were its two pieces?

You'll want to know: कृपया

कृपया (*kṛpayā*) — "please".

कृपया is *please*, and like most polite words in most languages it is not really a word for "please" at all. It is the noun *kṛpā*, "compassion, kindness", put into the case that means *by means of*. You are saying **by your kindness**.

English does the same thing and hides it just as well: *please* was once *if it please you*. Two languages, two buried sentences, one small polite noise.

The word, taken apart — its roots and family

Kṛpayā is the instrumental case of *kṛpā*, "pity, compassion" (MW), a noun MW files under the root √kṛp. Hindi has borrowed the whole word unchanged.

What you've built

A polite word with a whole clause folded inside it.

Your turn

- *Say it: kṛpayā*
- *Say it:* it once more, slowly
- *Say it: kṛpayā*, and say what it literally claims
- *Recall:* say *astu*
- *Read it:* इदानीम्

Before you move on

What does कृपया mean? ("please".) Say it once more.

29.2 क्षम्यताम् (kṣamyatām) — pardon me; let it be forgiven

Before the new word: what did *kṛpayā* literally claim?

You'll want to know: क्षम्यताम्

क्षम्यताम् (*kṣamyatām*) — "pardon me; let it be forgiven".

क्षम्यताम् is the apology. It is longer than *sorry* and it is doing more work: the root means "to be patient, to bear with, to forgive", and the form is a command addressed to nobody in particular. *Let it be forgiven.*

Notice that Sanskrit has now given you two of these impersonal commands, अस्तु, "let it be", and क्षम्यताम्, "let it be forgiven", and a wish in the same spirit, स्वस्ति, "may it be well". A polite language often prefers to leave the person out.

The word, taken apart — its roots and family

Kṣamyatām is the passive command form of the root √kṣam, "to be patient, bear with, forgive"; MW cites this very form. The noun *kṣamā*, "patience, forgiveness", is built on the same root (CDIAL 3659).

What you've built

An apology that never names who should do the forgiving.

Your turn

- *Say it: kṣamyatām*
- *Say it:* it once more, slowly
- *Say it: astu*, then *kṣamyatām*, and say what both leave out
- *Read it:* साधु
- *Recall:* say *paraśvaḥ*

Before you move on

What does क्षम्यताम् mean? ("pardon me; let it be forgiven".) Say it once more.

29.3 प्रणामः (praṇāmaḥ) — a bow, a respectful salutation

Before the new word: what did *kṣamyatām* mean?

You'll want to know: प्रणामः

प्रणामः (*praṇāmaḥ*) — "a bow, a respectful salutation".

प्रणामः is a bow — the act, named as a thing. It is *pra* + *nam*, "to bend forward".

And you have met that *nam* twice already without being told. नमस्ते is *namas* + *te*, "a bow to you". नमस्कारः is *namas* + *kāra*, "the making of a bow". Now प्रणामः: the same bending root, a third time, with a prefix. Three of the first words in this book turn out to be one gesture described three ways.

The word, taken apart — its roots and family

Praṇāma is built from the prefix *pra*, "forward", and the root √nam, "to bend, bow" (MW), the root inside *namas*.

What you've built

A root you had used twice, finally named.

Your turn

- *Say it: praṇāmaḥ*
- *Say it:* it once more, slowly
- *Say it: namaste*, *namaskāraḥ*, *praṇāmaḥ* — and name what all three share
- *Recall:* say *alam*
- *Read it:* यात्रा

Before you move on

What does प्रणामः mean? ("a bow, a respectful salutation".) Say it once more.

29.4 उपकारः (upakāraḥ) — a favour, a good turn

Before the new word: what did *praṇāmaḥ* mean, and which root was inside it?

Say "he helps." (*Sāhāyyaṁ karoti.*) A favour is help given.

You'll want to know: उपकारः

उपकारः (*upakāraḥ*) — "a favour, a good turn".

उपकारः is a favour — something done for someone. Take it apart: *upa*, "near, toward", plus *kāra*, "a doing", from the root behind करोमि, "I do".

So a favour is *a doing-toward*. And you have already seen *kāra* once, in नमस्कारः, "the making of a bow" — the same piece, in a word you have said since the first chapter. Prefixes and pieces are how Sanskrit builds, and by now you can watch it happen.

The word, taken apart — its roots and family

Upakāra is built from the prefix *upa*, "toward", and *kāra*, "a doing", from the root √kṛ (MW, CDIAL 2141).

What you've built

A second word built from the doing-root you already had.

Your turn

- *Say it: upakāraḥ*
- *Say it:* it once more, slowly
- *Say it: karomi*, then *namaskāraḥ*, then *upakāraḥ*
- *Read it:* सत्यम्
- *Recall:* say *śubham*

Before you move on

What does उपकारः mean? ("a favour, a good turn".) Say it once more.

29.5 धन्यः (dhanyaḥ) — fortunate, blessed

Before the last word of this run: what did *upakāraḥ* mean, and what did *kṛpayā* mean?

You'll want to know: धन्यः

धन्यः (*dhanyaḥ*) — "fortunate, blessed".

धन्यः means *fortunate*, *blessed*, *rich in what matters*. It is built on *dhana*, wealth.

And it closes a circle. The very first thank-you in this book was धन्यवादः — and that word is *dhanya* + *vāda*, **a saying of "you are fortunate"**. Sanskrit does not thank you by reporting your gift; it thanks you by calling you lucky. You said the word on the first day and could not see inside it. You can now.

The word, taken apart — its roots and family

Dhanya is built from *dhana*, "prize, wealth": first "bringing wealth, rich", then "fortunate" (MW).

What you've built

Five courtesies, and the first word of this book opened up.

Your turn

- *Say it: dhanyaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then take *dhanyavādaḥ* apart into its two pieces
- *Recall:* say *evam*
- *Read it:* स्वस्ति

Before you move on

What does धन्यः mean? ("fortunate, blessed".) Say it once more.

29.6 धन्यः — the ending you can see, and the argument underneath it

Three of this chapter's words end on the same soft breath — *praṇāmaḥ*, *upakāraḥ*, *dhanyaḥ*. Say what that breath marks. Then say which of the three names the bow you have been making since your first greeting.

Script: two marks, read inside words you already say

Cold, with nothing to help you but the shapes.

Read these aloud:

- वैद्यः — name the double stroke above the top bar, and say what it replaced
- इदानीम् — name its opening letter, and say why that vowel is full-size here

One of the two is a sign that cannot stand alone and **replaces** the *a* inside a consonant. The other is the full-size letter a vowel wears when it opens a word and has nothing to lean on. Same vowel sound, two jobs, two shapes.

Why it's said this way

Every claim this book has made about where a word came from has used the same move: **cut the word at its seam, and compare the pieces.**

the claim	the seam it cuts on
Sanskrit, Greek and Latin share a source	verb endings, not vocabulary lists
the naming words have cousins west of India	*nāma*, *mama*, *tvam*, *kim*
the wellbeing words reach east and west alike	the root travels; the finished word does not
leave-taking is built from parts you can name	*again* plus *for seeing*

Hṛdayam is the cleanest case the book owns, and *praṇāmaḥ* is this chapter's: *pra* plus the same *nam* that bows in the greeting. **A word you can take apart is a word you can trace.** A word you cannot take apart — like the ear — stays unplaced no matter how ordinary it is.

Before you move on

What does the visarga on *dhanyaḥ* mark? (**Masculine singular.**) Is thanking a close friend in Sanskrit warm, or distancing? (**Distancing.**) What kind of evidence did the 1786 claim rest on? (**Grammar.**)

Chapter 30

Welcoming a Guest

Modes: **voice** (5) **eyes** (1) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can name the five steps of a Sanskrit welcome, from the door to the hands that make the greeting.
>
> *Complete SA-C30-anjali and demonstrate the chapter promise.*

30.1 द्वारम् (dvāram) — a door, a gate

Before the new word: what did *dhanyaḥ* mean, and what was inside *dhanyavādaḥ*?

You'll want to know: द्वारम्

द्वारम् (*dvāram*) — "a door, a gate".

A guest is met at the द्वारम् — the door, the gate.

This is one of the securest cousins in the book. Latin *foris* and *forēs*, "door" — whence *forum*, the space outside the door, and *foreign*, what is out of doors. Greek *thura*. English *door*, German *Tür*, Russian *dver*. The word for the opening of a house survived every migration intact, which is what you would expect of a word every generation says every day. Indian place names keep it too: *Haridwar* is Hari's gate.

What you've built

A door, and a word that reached every branch of the family.

Your turn

- *Say it: dvāram*
- *Say it:* it once more, slowly
- *Say it: dvāram*, and name two of its cousins outside India
- *Recall:* say *idānīm*
- *Read it:* कृपया

Before you move on

What does द्वारम् mean? ("a door, a gate".) Say it once more.

30.2 आसनम् (āsanam) — a seat

Before the new word: what did *dvāram* mean?

You'll want to know: आसनम्

आसनम् (*āsanam*) — "a seat".

Having met the guest at the door, you offer an आसनम् — a seat. The root means "to sit", and the ending makes it the thing you sit on.

English borrowed the word without the furniture: an *āsana* in yoga is a posture, a way of being seated. Both senses live in the one Sanskrit word, and the ordinary one is the older. Neuter -अम्, like द्वारम् before it.

The word, taken apart — its roots and family

Āsana is built on the root √ās, "to sit", with the suffix *-ana* that names the act or its place (MW). MW compares Greek *hēmai*, "I sit". It lives on as Hindi *āsan* (CDIAL 1484).

What you've built

The second step of a welcome, and a third borrowed word restored.

Your turn

- *Say it: āsanam*

- *Say it:* it once more, slowly
- *Say it: dvāram*, then *āsanam*, in the order a guest meets them
- *Read it:* परश्वः
- *Recall:* say *kṣamyatām*

Before you move on

What does आसनम् mean? ("a seat".) Say it once more.

30.3 पुष्पम् (puṣpam) — a flower

Before the new word: what did *āsanam* mean, and what did *dvāram* mean?

You'll want to know: पुष्पम्

पुष्पम् (*puṣpam*) — "a flower".

पुष्पम् is a flower. It is usually filed under a root meaning "to thrive, to nourish"; if that holds, the word names the thriving rather than the petals.

You already have फलम्, the fruit, and now the flower that precedes it — and in Sanskrit the pair *puṣpa-phala* travels together as a set phrase, flower-and-fruit, the way English says *bricks and mortar*. Neuter -अम्, like फलम् itself.

The word, taken apart — its roots and family

Puṣpa is usually filed under the root √puṣ, "to thrive, nourish" (MW), but CDIAL 8303 marks that link with a question mark, so it is not settled.

What you've built

A flower to set beside the fruit you already had.

Your turn

- *Say it: puṣpam*
- *Say it:* it once more, slowly

- *Say it:* *puṣpam*, then *phalam*, and say them as one pair
- *Recall:* say *yātrā*
- *Read it:* प्रणामः

Before you move on

What does पुष्पम् mean? ("a flower".) Say it once more.

30.4 माला (mālā) — a garland

Before the new word: what did *puṣpam* mean?

You'll want to know: माला

माला (*mālā*) — "a garland".

Threaded, the flowers become a माला — a garland, put over the head of a guest of honour, and also the string of beads counted through in prayer. English borrowed the second sense as *mala*.

Its own history is unsettled: no agreed cousin outside India, like केशः and अलम् before it. Feminine, ending in -आ, like यात्रा and माता.

The word, taken apart — its roots and family

Mālā is often taken to be borrowed from Dravidian: CDIAL 10092 and DEDR 4827 compare Tamil *mālai*, "garland". It lives on as Hindi *māl*.

What you've built

A third word with no proven travels, and a garland made of the last one.

Your turn

- *Say it:* *mālā*
- *Say it:* it once more, slowly
- *Say it:* *puṣpam*, then *mālā*, and name what turns one into the other
- *Read it:* शुभम्
- *Recall:* say *upakāraḥ*

Before you move on

What does माला mean? ("a garland".) Say it once more.

30.5 अञ्जलिः (añjaliḥ) — the two hands cupped together

Before the last word of the chapter: what did *mālā* mean, and what did *dvāram* mean?

You'll want to know: अञ्जलिः

अञ्जलिः (*añjaliḥ*) — "the two hands cupped together".

अञ्जलिः is the two hands brought together, palms cupped — the gesture your hands make when you say नमस्ते.

The root means "to anoint, to smear". MW describes the hands as hollowed as if to receive food, and says that raised to the forehead they became a sign of supplication: the gesture of greeting grew out of the shape of asking. So the welcome closes where the book opened, on the first word you learned, with the hands finally named.

The word, taken apart — its roots and family

Añjali is built on the root √añj, "to anoint" (MW, CDIAL 171), which MW compares with Latin *unguō*, "I anoint", the source of English **ointment**.

What you've built

Five steps of a welcome — door, seat, flower, garland, and the hands themselves.

Your turn

- *Say it: añjaliḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say *namaste* and name the gesture that goes with it
- *Recall:* say *svasti*

- *Read it:* धन्यः

Before you move on

What does अञ्जलिः mean? ("the two hands cupped together".) Say it once more.

30.6 स्वागतम् — the door, the seat, and the promise at the end

The word you say to someone standing at your door. Then the one syllable that agrees to whatever they ask next.

The exchange

A whole visit, in the order it happens. The nouns around it — the door, the seat, the flower, the garland, the cupped hands — are this chapter's. Everything you say is older.

Say these aloud:

- welcome them in — *svāgatam*
- ask how they are, respectfully — *bhavān kathaṁ asti?*
- answer for yourself, with no pronoun — *kuśalī asmi*
- agree to something — *ām*
- say when — *śvaḥ*
- close it — *punar darśanāya*

Grammar Lens: three endings doing three jobs

what you said	what the ending did
asti	put the sentence in the **third** person, because *bhavān* is a third-person word
asmi	carried **I** by itself, so the pronoun could go
darśanāya	turned *seeing* into **a purpose to act for**

The last of those is the one with no English shape behind it. *Punar darśanāya* is not a sentence and has no verb: it is *again* plus *seeing* wearing an ending that means **for the sake of**. English needs a clause — *until we meet again* — where Sanskrit needs an ending.

Script: one letter, read cold

- *Read it:* इदानीम् — name the letter it opens on, and say why it is full-size rather than a small sign

Before you move on

What does the ending on *darśanāya* add? (**For the sake of** — purpose.) How many words does Sanskrit need for *tomorrow*? (**One** — *śvaḥ*.) Is welcoming a guest in a pleasantry or a duty? (**A duty.**)

Chapter 31

The Sky and Its Lights

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five things overhead in Sanskrit — sky, moon, star, wind and snow — and take apart the name of the mountain range built on the last of them.
>
> *Complete SA-C31-snow and demonstrate the chapter promise.*

31.1 आकाशः (ākāśaḥ) — the sky, open space

Before the new word: what did *añjaliḥ* mean?

You'll want to know: आकाशः

आकाशः (*ākāśaḥ*) — "the sky, open space".

आकाशः is the openness overhead. It is built on a piece meaning "to shine, to be visible", with आ in front — so the sky is named as the bright open place where things can be seen at all, rather than as a lid over the world.

This one stayed home. Hindi, Marathi, Bengali and Telugu all keep it as *ākāś* or *ākāśam*, and traders carried it east, where Malay and Indonesian say *angkasa* for the sky to this day. Ends in -अः, like दीपः and हस्तः.

The word, taken apart — its roots and family

Ākāśa is built from the prefix *ā-* and the root √kāś, "to shine, be visible" (MW, CDIAL 1008). It first meant open space, and later the sky.

What you've built

A new set of words, and the space that everything else in this chapter sits in.

Your turn

- *Say it:* *ākāśaḥ*
- *Say it:* it once more, slowly
- *Say it:* *añjaliḥ*, then *ākāśaḥ*
- *Recall:* say *kṛpayā*
- *Read it:* द्वारम्

Before you move on

What does आकाशः mean? ("the sky, open space".) Say it once more.

31.2 चन्द्रः (candraḥ) — the moon

Before the new word: what did *ākāśaḥ* mean?

You'll want to know: चन्द्रः

चन्द्रः (*candraḥ*) — "the moon".

Sanskrit names the moon by what it does: the root behind चन्द्रः means "to shine, to glitter". The moon is simply the shining one.

Latin kept that root in *candēre*, "to glow white", and English is full of its children — *candle*, *candid*, *incandescent*, and the *candidate*, who once wore a bleached white toga to be seen in a crowd. Sanskrit called the moon the glowing thing; Latin called a candle the same thing.

The word, taken apart — its roots and family

Candra first meant "shining" and is built on the root √cand, "to shine", which MW compares with Latin *candeō*, "I glow" (CDIAL 4661). It lives on as Hindi *cāṃd*, "moon".

What you've built

A second word overhead, and a candle lit from the same root.

Your turn

- *Say it: candraḥ*
- *Say it:* it once more, slowly
- *Say it: ākāśaḥ*, then *candraḥ*
- *Read it:* क्षम्यताम्
- *Recall:* say *āsanam*

Before you move on

What does चन्द्रः mean? ("the moon".) Say it once more.

31.3 तारा (tārā) — a star

Before the new word: what did *candraḥ* mean?

You'll want to know: तारा

तारा (*tārā*) — "a star".

तारा is a star, and it is among the most travelled words in the family. English *star*, German *Stern*, Latin *stella*, Greek *astēr* — behind *astronomy* and *asterisk* and *disaster*, "a bad star" — and Persian *setāre* are all the same word, from a shape like ***ster-**.

Sanskrit *tārā* is usually taken to have dropped the *s-* at the front and kept the rest (EtymDB); the Rigveda still has *str̥*, "star", with the *s-*, and MW and CDIAL 5798 compare it. Ends in **-आ**, like माला and यात्रा.

What you've built

A third light overhead, and a word that reached every branch of the family.

Your turn

- *Say it: tārā*
- *Say it:* it once more, slowly
- *Say it: tārā*, and one of its cousins outside India
- *Recall:* say *praṇāmaḥ*
- *Read it:* पुष्पम्

Before you move on

What does तारा mean? ("a star".) Say it once more.

31.4 वायुः (vāyuḥ) — wind, air

Before the new word: what did *tārā* mean?

You'll want to know: वायुः

वायुः (*vāyuḥ*) — "wind, air".

वायुः is the wind, and also the air it is made of. Its root means "to blow", so the word says what the thing does.

English *wind* grows from the same root, and so do German *Wind*, Gothic *winds* and Latin *ventus*, which gives *vent* and *ventilate*. Ends in *-uḥ*, the ending you had on गुरुः.

What you've built

A fourth thing overhead — the one you feel rather than the one you look for.

Your turn

- *Say it: vāyuḥ*
- *Say it:* it once more, slowly
- *Say it: candraḥ*, *tārā*, then *vāyuḥ*
- *Read it:* उपकारः
- *Recall:* say *mālā*

Before you move on

What does वायुः mean? ("wind, air".) Say it once more.

31.5 हिमम् (himam) — snow, frost

Before the last word of the chapter: what did *vāyuḥ* mean, and what did *ākāśaḥ* mean?

You'll want to know: हिमम्

हिमम् (*himam*) — "snow, frost".

हिमम् is snow, and cold generally: the word covers the frost on a field and the season it belongs to.

Its cousins name the season rather than the snow: Greek *kheimōn* and Latin *hiems*, both "winter", the second giving English *hibernate*. And the mountains carry it: *Himālaya* is हिमम् joined to *ālaya*, "a dwelling" — the abode of snow. Neuter -अम्, like वस्त्रम्.

What you've built

Five things overhead, and a mountain range whose name you can now take apart.

Your turn

- *Say it: himam*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say what *Himālaya* means
- *Recall:* say *dhanyaḥ*
- *Read it:* अञ्जलिः

Before you move on

What does हिमम् mean? ("snow, frost".) Say it once more.

Chapter 32

The Tree and What Grows

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a tree and four things that grow in Sanskrit, and name the two English words that are cousins of grass and of wood.
>
> *Complete SA-C32-wood and demonstrate the chapter promise.*

32.1 तरुः (taruḥ) — a tree

Before the new word: what did *himam* mean?

You'll want to know: तरुः

तरुः (*taruḥ*) — "a tree".

You have had वनम्, a forest, for a long while now. तरुः is one tree standing in it.

Sanskrit keeps several names for a tree — *vṛkṣa*, *druma*, and this one — and तरुः is the shortest and the easiest to say. It ends in *-uḥ*, like गुरुः and वायुः, so you already know how it behaves.

The word, taken apart — its roots and family

Taru is an epic word for a tree (CDIAL 5711). MW connects it with *dru* and *dāru*, "wood", the inherited family of English **tree**, but the exact link is not settled.

What you've built

One tree, picked out of a forest you already know.

Your turn

- *Say it: taruḥ*
- *Say it:* it once more, slowly
- *Say it: himam*, then *taruḥ*
- *Recall:* say *dvāram*
- *Read it:* आकाशः

Before you move on

What does तरुः mean? ("a tree".) Say it once more.

32.2 पत्रम् (patram) — a leaf

Before the new word: what did *taruḥ* mean?

You'll want to know: पत्रम्

पत्रम् (*patram*) — "a leaf".

पत्रम् is a leaf. It is also a wing, and also a written page — one word for all three, because the root under it means "to fly". A leaf is the flying thing on a branch; a page is a leaf of another kind.

Greek *pteron*, "wing", is its cousin, behind *helicopter* and *pterodactyl*; so is Latin *penna*, "feather", behind *pen* and *pinnate*; and so is English *feather* itself. Neuter -अम्, like वस्त्रम् and आसनम्.

What you've built

A leaf, a wing and a page, all carried by one word.

Your turn

- *Say it: patram*
- *Say it:* it once more, slowly

- *Say it: taruḥ*, then *patram*
- *Read it:* आसनम्
- *Recall:* say *candraḥ*

Before you move on

What does पत्रम् mean? ("a leaf".) Say it once more.

32.3 तृणम् (tṛṇam) — grass, a blade of grass

Before the new word: what did *patram* mean?

You'll want to know: तृणम्

तृणम् (*tṛṇam*) — "grass, a blade of grass".

तृणम् covers a single blade and a whole field of it. It is the low green stuff a तरुः stands in.

English *thorn* is the same word: Old English *thorn*, Gothic *thaurnus*, from a shape like ***trnus**, "a stiff thing that grows up out of the ground". Sanskrit kept the mild end of that meaning and Germanic kept the sharp end, which is a common way for one word to become two things.

The word, taken apart — its roots and family

Tṛṇa is inherited: MW compares Gothic *thaurnus*, "thorn", the cousin of English **thorn**. It lives on as Hindi *tinkā*, "a straw" (CDIAL 5906).

What you've built

A third growing thing, and the reason grass and a thorn are the same word.

Your turn

- *Say it: tṛṇam*
- *Say it:* it once more, slowly
- *Say it: patram*, then *tṛṇam*
- *Recall:* say *puṣpam*

- *Read it:* तारा

Before you move on

What does तृणम् mean? ("grass, a blade of grass".) Say it once more.

32.4 लता (latā) — a creeper, a climbing plant

Before the new word: what did *tṛṇam* mean?

You'll want to know: लता

लता (*latā*) — "a creeper, a climbing plant".

लता is anything that climbs rather than stands: a vine, a creeper, a trailing branch.

Sanskrit poetry pairs it with तरुः so often that the two almost arrive together — the creeper and the tree it climbs. Unlike most of this chapter it has no European cousin worth naming; it is homegrown, and it went on to become one of the commonest given names in India. Ends in -आ, like तारा.

The word, taken apart — its roots and family

Latā is a classical word for a creeper (MW). Its origin is not settled: CDIAL 10928 compares it only tentatively with a reconstructed **laṭṭa-*.

What you've built

A fourth growing thing, and a name half of India answers to.

Your turn

- *Say it: latā*
- *Say it:* it once more, slowly
- *Say it: taruḥ*, then *latā*, in the order they grow
- *Read it:* माला
- *Recall:* say *vāyuḥ*

Before you move on

What does लता mean? ("a creeper, a climbing plant".) Say it once more.

32.5 दारु (dāru) — wood, timber

Before the last word of the chapter: what did *latā* mean, and what did *taruḥ* mean?

You'll want to know: दारु

दारु (*dāru*) — "wood, timber".

दारु is the substance a तरुः is made of.

It is one of the securest cousins in this book. English *tree* is it, and so are Gothic *triu*, Greek *drus* "oak", Welsh *derwen* and Russian *derevo*; through a Celtic word for one who knows the oak comes *druid*. English *true* and *trust* belong to the same family, on the old idea that to be true is to be as firm as a tree. Ends in short *-u*, like साधु.

What you've built

Five growing things, and the tree standing inside the English word *true*.

Your turn

- *Say it: dāru*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then name the English word hiding in *dāru*
- *Recall:* say *añjaliḥ*
- *Read it:* हिमम्

Before you move on

What does दारु mean? ("wood, timber".) Say it once more.

Chapter 33

The River and the Road

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a river, a bridge, a mountain, a town and the sea in Sanskrit, and say which of them is a cousin of the Greek word behind *police*.
>
> *Complete SA-C33-sea and demonstrate the chapter promise.*

33.1 नदी (nadī) — a river

Before the new word: what did *dāru* mean?

You'll want to know: नदी

नदी (*nadī*) — "a river".

नदी says what a river does rather than what it is: the root behind it means "to roar, to sound". A river is the noisy one.

It ends in long -*ī*, like नारी and भगिनी, and it has outlasted almost everything around it — Hindi, Marathi, Bengali, Gujarati and Nepali all still say *nadī*, and every river name ending in -*nadi* on an Indian map carries it whole.

The word, taken apart — its roots and family

Nadī is built on the root √nad, "to roar, sound" (MW, CDIAL 6943): the river is named as the roaring one.

What you've built

A river, and a word that survived every one of its neighbours.

Your turn

- *Say it: nadī*
- *Say it:* it once more, slowly
- *Say it: dāru*, then *nadī*
- *Recall:* say *ākāśaḥ*
- *Read it:* तरुः

Before you move on

What does नदी mean? ("a river".) Say it once more.

33.2 सेतुः (setuḥ) — a bridge, a causeway

Before the new word: what did *nadī* mean?

You'll want to know: सेतुः

सेतुः (*setuḥ*) — "a bridge, a causeway".

सेतुः is literally "the binding", from a root meaning "to bind, to tie". A bridge is what ties two banks to each other, and Sanskrit names it for the tying rather than for the crossing.

The causeway between India and Lanka is the *Rāma-setu*, and that is this word, unchanged, on a modern map. Ends in *-uḥ*, like तरुः, वायुः and गुरुः.

The word, taken apart — its roots and family

Setu is built on the root √si, "to bind, tie" (MW, CDIAL 13585), which MW compares with German *Seil*, "rope". It first meant a bond, then a dam or a bridge.

What you've built

A bridge, and a word that means the tying rather than the crossing.

Your turn

- *Say it: setuḥ*
- *Say it:* it once more, slowly
- *Say it: nadī*, then *setuḥ*
- *Read it:* चन्द्रः
- *Recall:* say *patram*

Before you move on

What does सेतुः mean? ("a bridge, a causeway".) Say it once more.

33.3 पर्वतः (parvataḥ) — a mountain

Before the new word: what did *setuḥ* mean?

You'll want to know: पर्वतः

पर्वतः (*parvataḥ*) — "a mountain".

पर्वतः is built on *parvan*, "a knot, a joint" — the same word for the joints of a bamboo cane and for the sections of a long poem. A mountain is the knotted, jointed land, and a range of them is a knotted spine.

Hindi, Marathi and Nepali keep *parvat*. You met one range of them earlier, in the snow.

The word, taken apart — its roots and family

Parvata is formed from *parvan*, "knot, joint": first "knotty, rugged", then "mountain" (MW, CDIAL 7945).

What you've built

A mountain, named for the knots in it.

Your turn

- *Say it: parvataḥ*
- *Say it:* it once more, slowly

- *Say it: setuḥ*, then *parvataḥ*
- *Recall:* say *tārā*
- *Read it:* तृणम्

Before you move on

What does पर्वतः mean? ("a mountain".) Say it once more.

33.4 पुरम् (puram) — a town, a walled town

Before the new word: what did *parvataḥ* mean?

Say "city." (*Nagaram.*) This lesson has another word for a place where people live together.

You'll want to know: पुरम्

पुरम् (*puram*) — "a town, a walled town".

You already have नगरम् for a city. पुरम् is the older word, and it meant a stronghold first: a place with a wall around it.

Its Greek cousin is *polis*, behind *police*, *policy*, *politics* and every *-polis* on a map. Sanskrit's own -पुरम् is on the map just as thickly, worn down to *-pur*: *Jaipur*, *Nagpur*, *Kanpur*, and *Singapore*, which began as *Simhapura*, the lion town. Neuter -अम्.

The word, taken apart — its roots and family

Pura goes back to Vedic *pur*, "stronghold" (CDIAL 8278), and MW compares Greek *polis*, "city". It lives on in the *-pur* of North Indian place names.

What you've built

A town, and the reason *police* and *Nagpur* are relatives.

Your turn

- *Say it: puram*
- *Say it:* it once more, slowly

- *Say it: parvataḥ*, then *puram*
- *Read it:* वायुः
- *Recall:* say *latā*

Before you move on

What does पुरम् mean? ("a town, a walled town".) Say it once more.

33.5 समुद्रः (samudraḥ) — the sea

Before the last word of the chapter: what did *puram* mean, and what did *nadī* mean?

You'll want to know: समुद्रः

समुद्रः (*samudraḥ*) — "the sea".

समुद्रः is *sam*, "together", joined to *udra*, "water": the sea is the gathering of the waters, which is where a नदी ends up.

That *sam-* at the front is the one inside संस्कृतम्, "put together, made complete", the name of the language you have been saying since you first said you speak it. And *udra* has cousins everywhere: Greek *hudōr* behind *hydrant* and *hydrogen*, English *water*, Russian *voda*, and the *otter*, who is nothing more than the water animal.

What you've built

Five pieces of country, and the place a river finishes.

Your turn

- *Say it: samudraḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say where a *nadī* ends
- *Recall:* say *himam*
- *Read it:* दारु

Before you move on

What does समुद्रः mean? ("the sea".) Say it once more.

Chapter 34

More of the Body

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name an arm, a neck, a bone, blood and the body itself in Sanskrit, and name the Latin word for bone that is a cousin of one of them.
>
> *Complete SA-C34-body and demonstrate the chapter promise.*

34.1 बाहुः (bāhuḥ) — an arm

Before the new word: what did *samudraḥ* mean?

You'll want to know: बाहुः

बाहुः (*bāhuḥ*) — "an arm".

You already have हस्तः, the hand. बाहुः is the arm above it.

Its English cousin is *bough* — the arm of a tree, which is exactly the picture Sanskrit had. Greek *pēkhus*, "forearm", is the same word again, and it named the cubit that measured out temples and ships. Ends in *-uḥ*, like तरुः and सेतुः.

What you've built

A sixth part of the body, and the branch of a tree hiding inside it.

Your turn

- *Say it: bāhuḥ*

- *Say it:* it once more, slowly
- *Say it: samudraḥ*, then *bāhuḥ*
- *Recall:* say *taruḥ*
- *Read it:* नदी

Before you move on

What does बाहुः mean? ("an arm".) Say it once more.

34.2 ग्रीवा (grīvā) — the neck

Before the new word: what did *bāhuḥ* mean?

You'll want to know: ग्रीवा

ग्रीवा (*grīvā*) — "the neck".

ग्रीवा is the neck. Russian *griva*, a mane — the hair along a neck — is its cousin (EtymDB).

It is often traced to an old root for swallowing, the root of Latin *gula*, "throat" (behind *gullet*), and *vorāre*, "to devour" (behind *devour*, *voracious* and *carnivore*), but CDIAL 4387 marks that link as doubtful. Ends in -आ, like तारा and लता.

What you've built

A neck, and a throat full of English words.

Your turn

- *Say it: grīvā*
- *Say it:* it once more, slowly
- *Say it: bāhuḥ*, then *grīvā*
- *Read it:* पत्रम्
- *Recall:* say *setuḥ*

Before you move on

What does ग्रीवा mean? ("the neck".) Say it once more.

34.3 अस्थि (asthi) — a bone

Before the new word: what did *grīvā* mean?

You'll want to know: अस्थि

अस्थि (*asthi*) — "a bone".

अस्थि is short, neuter and very old — the same shape as *akṣi*, "eye", which you have already had.

Its cousins line up letter for letter: Latin *os*, *ossis*, behind *osseous* and *ossify*; Greek *osteon*, behind *osteopath*; Avestan *ast*; Hittite *hastai*. Hittite was written down three and a half thousand years ago, which makes this one of the oldest words you can still say out loud.

What you've built

A bone, and one of the oldest words anyone has written down.

Your turn

- *Say it: asthi*
- *Say it:* it once more, slowly
- *Say it: grīvā*, then *asthi*
- *Recall:* say *tṛṇam*
- *Read it:* पर्वतः

Before you move on

What does अस्थि mean? ("a bone".) Say it once more.

34.4 रक्तम् (raktam) — blood

Before the new word: what did *asthi* mean?

You'll want to know: रक्तम्

रक्तम् (*raktam*) — "blood".

रक्तम् began as a description rather than a name: it means "reddened, dyed", from a root *rañj*, "to colour". Sanskrit names blood by its colour and lets the colour word do the work.

The same root gives राग (*rāga*), which is a colour, a passion and a mode of music all at once — a thing that has been dyed a particular way. Neuter -अम्, like हिमम्.

The word, taken apart — its roots and family

Rakta is the past participle of the root √rañj, "to colour, dye": first "dyed", then "red", and so "blood" (MW, CDIAL 10539).

What you've built

Blood, named for its colour rather than for what it is.

Your turn

- *Say it: raktam*
- *Say it:* it once more, slowly
- *Say it: asthi*, then *raktam*
- *Read it:* लता
- *Recall:* say *puram*

Before you move on

What does रक्तम् mean? ("blood".) Say it once more.

34.5 देहः (dehaḥ) — the body

Before the last word of the chapter: what did *raktam* mean, and what did *bāhuḥ* mean?

You'll want to know: देहः

देहः (*dehaḥ*) — "the body".

देहः is the whole of it — the thing the other four belong to. Its root means "to knead, to shape, to plaster", so a body is a moulded thing, formed the way clay is formed.

English *dough* is the plain cousin. Latin *fingere*, "to shape", gives *figure*, *fiction* and *effigy*. And an old Iranian relative, a wall of kneaded clay, sits inside *paradise*: Avestan *pairi-daēza*, a walled enclosure.

What you've built

Ten parts of the body between this chapter and the earlier one, and a single word for all of them.

Your turn

- *Say it: dehaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say what *paradise* was built out of
- *Recall:* say *dāru*
- *Read it:* समुद्रः

Before you move on

What does देहः mean? ("the body".) Say it once more.

Chapter 35

In the House

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five things in a house in Sanskrit, and say which one of them came into the language from Persian.
>
> *Complete SA-C35-bed and demonstrate the chapter promise.*

35.1 दुग्धम् (dugdham) — milk

Before the new word: what did *dehaḥ* mean?

You'll want to know: दुग्धम्

दुग्धम् (*dugdham*) — "milk".

Sanskrit has two words for milk. You met *kṣīram* early on; **दुग्धम्** is the other one, and it is the one the modern languages kept.

It comes from *duh*, "to milk", so **दुग्धम्** is "the milked thing" — the action first, the drink second. Hindi and Gujarati say *dūdh*, Punjabi *duddh*, and you can hear the whole word still inside them. Neuter **-अम्**.

The word, taken apart — its roots and family

Dugdha is the past participle of the root √duh, "to milk": "the milked thing" (MW). It lives on as Hindi and Gujarati *dūdh* (CDIAL 6391).

What you've built

The second word for milk, and the one you would be handed today.

Your turn

- *Say it: dugdham*
- *Say it:* it once more, slowly
- *Say it: dehaḥ*, then *dugdham*
- *Recall:* say *nadī*
- *Read it:* बाहुः

Before you move on

What does दुग्धम् mean? ("milk".) Say it once more.

35.2 मधु (madhu) — honey

Before the new word: what did *dugdham* mean?

You'll want to know: मधु

मधु (*madhu*) — "honey".

मधु is honey, and sweetness in general.

Almost nothing in this book has cousins this far-flung. English *mead* is the same word; Greek *methu* is wine, and *amethyst* — *a-methustos*, "not drunk" — is the stone that was thought to keep you sober; Lithuanian *medus* and Old Irish *mid* are honey and mead again. Even Chinese *mì*, "honey", is widely thought to have been borrowed from an early Indo-European neighbour. Ends in short *-u*, like साधु and दारु.

What you've built

Honey, and a word that reached from Ireland to China.

Your turn

- *Say it: madhu*
- *Say it:* it once more, slowly
- *Say it: dugdham*, then *madhu*

- *Read it:* सेतुः
- *Recall:* say *grīvā*

Before you move on

What does मधु mean? ("honey".) Say it once more.

35.3 लवणम् (lavaṇam) — salt

Before the new word: what did *madhu* mean?

You'll want to know: लवणम्

लवणम् (*lavaṇam*) — "salt".

लवणम् is salt, and salty as a taste.

Here Sanskrit went its own way: Latin *sal* and English *salt* come from a different old word altogether, and लवणम् has no cousin among them. It stayed at home instead — *lavaṇa* still names the salty one among the six tastes of Indian cooking, while everyday Hindi took *namak* from Persian for the thing in the jar. Neuter -अम्.

What you've built

Salt, and a word with no known European relatives.

Your turn

- *Say it: lavaṇam*
- *Say it:* it once more, slowly
- *Say it: madhu*, then *lavaṇam*
- *Recall:* say *parvataḥ*
- *Read it:* अस्थि

Before you move on

What does लवणम् mean? ("salt".) Say it once more.

35.4 पुस्तकम् (pustakam) — a book

Before the new word: what did *lavaṇam* mean?

You'll want to know: पुस्तकम्

पुस्तकम् (*pustakam*) — "a book".

पुस्तकम् is a traveller. It came into Sanskrit from an Iranian word related to Persian *pōst*, "hide, skin" — what a book was written on before paper (CDIAL 8413) — and then India handed it back out again.

Hindi *pustak*, Bengali *pustak*, Kannada *pustaka*, Telugu *pustakam* and Tamil *puttakam* are all this word. Most of what you have learned here was inherited; this one was borrowed, and you can tell, because its relatives live outside the language rather than inside it.

What you've built

A book, and the one borrowed word in the chapter.

Your turn

- *Say it: pustakam*
- *Say it:* it once more, slowly
- *Say it: lavaṇam*, then *pustakam*
- *Read it:* पुरम्
- *Recall:* say *raktam*

Before you move on

What does पुस्तकम् mean? ("a book".) Say it once more.

35.5 शय्या (śayyā) — a bed

Before the last word of the chapter: what did *pustakam* mean, and what did *dugdham* mean?

You'll want to know: शय्या

शय्या (*śayyā*) — "a bed".

शय्या comes from *śī*, "to lie down", so a bed is simply the lying-down place.

Its usual cousins settle rather than sleep, and EtymDB groups them under one old root for lying down: Greek *keitai*, "he lies"; Latin *cīvis*, a citizen — one who lies down in a place instead of moving on — behind *city*, *civil* and *civilian*; and English *home*, and *hide*, once a measure of land a single family could settle. A bed and a city turn out to be one idea at two sizes. Ends in -आ, like लता.

What you've built

Five things in a house, and a bed with a city inside it.

Your turn

- *Say it:* *śayyā*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say which one came in from Persian
- *Recall:* say *samudraḥ*
- *Read it:* देहः

Before you move on

What does शय्या mean? ("a bed".) Say it once more.

Chapter 36

More Short Replies

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say also, all, likewise, slowly and rightly in Sanskrit, and use any of the five on its own as a reply.
>
> *Complete SA-C36-rightly and demonstrate the chapter promise.*

36.1 अपि (api) — also, too

Before the new word: what did *śayyā* mean?

You'll want to know: अपि

अपि (*api*) — "also, too".

अपि adds what you have just said to what came before. Put it after a word and you have piled that word on top: *dugdham api*, "milk as well".

Greek *epi-* is the same small word, and it fronts *epidemic*, *epilogue*, *epicentre* and *epitaph*. Latin *ob* is a cousin too. It is short, it never changes shape, and it does a great deal of work.

What you've built

A small word that adds one thing to another.

Your turn

- *Say it: api*
- *Say it:* it once more, slowly

- *Say it:* *śayyā*, then *dugdham api*
- *Recall:* say *bāhuḥ*
- *Read it:* दुग्धम्

Before you move on

What does अपि mean? ("also, too".) Say it once more.

36.2 सर्वम् (sarvam) — all, the whole of it

Before the new word: what did *api* mean?

You'll want to know: सर्वम्

सर्वम् (*sarvam*) — "all, the whole of it".

सर्वम् answers "how much?" with "all of it", and it can stand alone as that answer.

Its cousins lean on *whole* rather than on *every*: Greek *holos*, behind *holistic* and *catholic*; Latin *sollus*, "entire", and *salvus*, "safe and whole", behind *save*, *salvage* and *salute*. सर्वम्, *holistic* and *salvage* all start from one idea — nothing missing.

What you've built

A reply that says nothing has been left out.

Your turn

- *Say it:* *sarvam*
- *Say it:* it once more, slowly
- *Say it:* *api*, then *sarvam*
- *Read it:* ग्रीवा
- *Recall:* say *madhu*

Before you move on

What does सर्वम् mean? ("all, the whole of it".) Say it once more.

36.3 तथा (tathā) — so, in that way, likewise

Before the new word: what did *sarvam* mean?

You'll want to know: तथा

तथा (*tathā*) — "so, in that way, likewise".

कथम्, which you have had for a long time, asks "how?". तथा answers it: "that way".

The *t-* at the front is the one you met on तत् and तत्र, and it does the same job here — it points back at what has just been said. On its own, as a reply, तथा means "just so", and doubled it agrees warmly: *tathā tathā*.

The word, taken apart — its roots and family

Tathā is built from the pointing base *ta-*, the base of *tat*, with the manner ending *-thā*; it is the partner of *yathā*, "as" (MW, CDIAL 5646).

What you've built

The answer that matches a question you have had since early on.

Your turn

- *Say it: tathā*
- *Say it:* it once more, slowly
- *Say it: katham*, then *tathā*, as question and answer
- *Recall:* say *asthi*
- *Read it:* लवणम्

Before you move on

What does तथा mean? ("so, in that way, likewise".) Say it once more.

36.4 मन्दम् (mandam) — slowly, gently

Before the new word: what did *tathā* mean?

You'll want to know: मन्दम्

मन्दम् (*mandam*) — "slowly, gently".

मन्दम् asks for less speed. Doubled — *mandam mandam* — it means "slowly now, slowly", which is how it is most often said.

This is the word you want when somebody is talking faster than you can follow, and it goes well with कृपया: *kṛpayā mandam*, "slowly, please". Said kindly, it repairs a conversation instead of stopping it.

The word, taken apart — its roots and family

Mandam is the adverb of *manda*, "slow, dull" (MW). CDIAL 9754 groups *manda* with other words for slowness and bodily defects, so its deeper origin is not settled. It lives on as Hindi *mandā*, "slow, dull".

What you've built

The repair word for a conversation moving too fast.

Your turn

- *Say it: mandam*
- *Say it:* it once more, slowly
- *Say it: kṛpayā mandam*, said kindly
- *Read it:* रक्तम्
- *Recall:* say *pustakam*

Before you move on

What does मन्दम् mean? ("slowly, gently".) Say it once more.

36.5 सम्यक् (samyak) — rightly, properly, exactly so

Before the last word of the chapter: what did *mandam* mean, and what did *api* mean?

You'll want to know: सम्यक्

सम्यक् (*samyak*) — "rightly, properly, exactly so".

सम्यक् confirms that a thing has been done right.

It is *sam*, "together" — the *sam-* inside समुद्रः and संस्कृतम् — joined to a piece meaning "turned, directed": turned the right way, all of a piece. Beside साधु it is the cooler of the two. साधु praises the person; सम्यक् confirms the thing.

The word, taken apart — its roots and family

Samyak is a form of *samyañc*, "turned together, entire", built from *sam* "together" and the root √añc, "to bend, go" (MW, CDIAL 13245).

What you've built

Five short replies, and the difference between praising and confirming.

Your turn

- *Say it: samyak*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *sādhu* and *samyak* one after the other
- *Recall:* say *dehaḥ*
- *Read it:* शय्या

Before you move on

What does सम्यक् mean? ("rightly, properly, exactly so".) Say it once more.

Chapter 37

More Courtesy

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can wish someone peace, speak respectfully, call a host gracious, congratulate a friend and give a blessing in Sanskrit.
>
> *Complete SA-C37-blessing and demonstrate the chapter promise.*

37.1 शान्तिः (śāntiḥ) — peace, stillness

Before the new word: what did *samyak* mean?

You'll want to know: शान्तिः

शान्तिः (*śāntiḥ*) — "peace, stillness".

शान्तिः is peace of a particular kind: not the absence of war so much as the settling of something that had been disturbed. It comes from *śam*, "to grow calm, to come to rest".

A great many Sanskrit texts close on it, said three times over, once for each of the troubles a person can meet. You already have स्वस्ति for a wish of wellbeing; शान्तिः is the quieter one, and the one you would say last.

The word, taken apart — its roots and family

Śānti is built on the root √śam, "to grow calm, come to rest", with the noun suffix *-ti* (MW, CDIAL 12391).

What you've built

A word for peace, and the way Sanskrit texts stop.

Your turn

- *Say it: śāntiḥ*
- *Say it:* it once more, slowly
- *Say it: samyak*, then *śāntiḥ*
- *Recall:* say *dugdham*
- *Read it:* अपि

Before you move on

What does शान्तिः mean? ("peace, stillness".) Say it once more.

37.2 सादरम् (sādaram) — respectfully, with respect

Before the new word: what did *śāntiḥ* mean?

You'll want to know: सादरम्

सादरम् (*sādaram*) — "respectfully, with respect".

सादरम् is *sa-*, "with", joined to *ādara*, "regard, esteem" — so, "with regard".

It goes at the front of a request, where English would put its politeness at the end of a letter. Set beside कृपया it makes a request about as courteous as Sanskrit gets: *sādaram kṛpayā*.

The word, taken apart — its roots and family

Sādaram is built from *sa-*, "with", and *ādara*, "regard, respect", a noun MW derives from *ā* and the root √dṛ.

What you've built

A politeness that goes at the front rather than the end.

Your turn

- *Say it: sādaram*
- *Say it:* it once more, slowly
- *Say it: śāntiḥ*, then *sādaram kṛpayā*
- *Read it:* मधु
- *Recall:* say *sarvam*

Before you move on

What does सादरम् mean? ("respectfully, with respect".) Say it once more.

37.3 प्रसन्नः (prasannaḥ) — pleased, gracious, clear

Before the new word: what did *sādaram* mean?

You'll want to know: प्रसन्नः

प्रसन्नः (*prasannaḥ*) — "pleased, gracious, clear".

प्रसन्नः describes a face that has cleared. The one word covers still water, a settled mind and a kindly host, because it is *pra-*, "forth", with *sad*, "to settle": what was cloudy has dropped its silt.

To say that a guest left you प्रसन्नः is to say they left you at ease. The offering handed back from a temple, *prasāda*, comes from the same root — grace, given a physical form.

The word, taken apart — its roots and family

Prasanna is the past participle of *pra* + the root √sad, "to sit, settle" (MW, CDIAL 8823). That root is inherited: MW compares Latin *sedēre* and English *sit*.

What you've built

A word for water, a mind and a host, all at once.

Your turn

- *Say it: prasannaḥ*
- *Say it:* it once more, slowly
- *Say it: sādaram*, then *prasannaḥ*
- *Recall:* say *lavaṇam*
- *Read it:* तथा

Before you move on

What does प्रसन्नः mean? ("pleased, gracious, clear".) Say it once more.

37.4 अभिनन्दनम् (abhinandanam) — congratulation, a greeting of delight

Before the new word: what did *prasannaḥ* mean?

You'll want to know: अभिनन्दनम्

अभिनन्दनम् (*abhinandanam*) — "congratulation, a greeting of delight".

अभिनन्दनम् is what you offer when something has gone well for somebody else. It is *abhi*, "towards", with *nand*, "to rejoice" — gladness turned towards another person rather than kept.

That *nand* is the piece inside आनन्दः, the joy you met near the beginning of this book. The two words are the same delight, one held and one given away. Neuter -अम्.

The word, taken apart — its roots and family

Abhinandana is built from the prefix *abhi*, "toward", and the root √nand, "to rejoice" (MW), the root of *ānanda*.

What you've built

Joy from the beginning of this book, turned outwards towards somebody else.

Your turn

- *Say it: abhinandanam*
- *Say it:* it once more, slowly
- *Say it: ānandaḥ*, then *abhinandanam*
- *Read it:* पुस्तकम्
- *Recall:* say *mandam*

Before you move on

What does अभिनन्दनम् mean? ("congratulation, a greeting of delight".) Say it once more.

37.5 आशीर्वादः (āśīrvādaḥ) — a blessing

Before the last word of the chapter: what did *abhinandanam* mean, and what did *śāntiḥ* mean?

You'll want to know: आशीर्वादः

आशीर्वादः (*āśīrvādaḥ*) — "a blessing".

आशीर्वादः is a blessing spoken aloud: *āśis*, "a wish, a prayer", joined to *vāda*, "a speaking".

That second piece is the one inside धन्यवादः, the thanks you learned on your very first page — thanks is a speaking too. An elder gives आशीर्वादः; you answer with धन्यवादः; and the two are built the same way, out of a wish and a word for saying it.

The word, taken apart — its roots and family

Āśīrvāda is built from *āśis*, "a wish, prayer", and *vāda*, "a speaking", from the root √vad (MW).

What you've built

Five courtesies, and the piece shared by a blessing and a thanks.

Your turn

- *Say it:* *āśīrvādaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *āśīrvādaḥ* and *dhanyavādaḥ* together
- *Recall:* say *śayyā*
- *Read it:* सम्यक्

Before you move on

What does आशीर्वादः mean? ("a blessing".) Say it once more.

Chapter 38

Fire and Stone

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name fire, ash, a stone, sand and soil in Sanskrit.
>
> *Complete SA-C38-soil and demonstrate the chapter promise.*

38.1 अग्निः (agniḥ) — fire

Before the new word: what did *āśīrvādaḥ* mean?

You'll want to know: अग्निः

अग्निः (*agniḥ*) — "fire".

अग्निः is fire itself — the flame on a hearth, and the fire an offering is poured into.

You have had the doing-word for a while: दहति, "burns". अग्निः is the thing that does it.

Latin *ignis* is the very same word, and English carries it in *ignite* and *igneous*; Russian *ogon'* is another of its brothers. It went west almost unchanged, and in Sanskrit it stands as the first word of the oldest hymn there is.

What you've built

Fire, named as a thing rather than as an action.

Your turn

- *Say it: agniḥ*
- *Say it:* it once more, slowly
- *Say it: āśīrvādaḥ*, then *agniḥ*
- *Recall:* say *api*
- *Read it:* शान्तिः

Before you move on

What does अग्निः mean? ("fire".) Say it once more.

38.2 भस्म (bhasma) — ash

Before the new word: what did *agniḥ* mean?

You'll want to know: भस्म

भस्म (*bhasma*) — "ash".

भस्म is what अग्निः leaves behind — ash, and the grey line of it drawn across a forehead.

It stands on *bhas*, "to chew, to grind small", so ash is the ground-down thing: what is left when fire has finished eating.

Hindi and Marathi keep *bhasm* with the meaning untouched.

The word, taken apart — its roots and family

Bhasma is the combining form of *bhasman*, "ashes", built on the root √bhas, "to chew, devour" (MW): what the fire has consumed.

What you've built

Fire, and what fire leaves.

Your turn

- *Say it: bhasma*
- *Say it:* it once more, slowly

- *Say it: agniḥ*, then *bhasma*
- *Read it:* सर्वम्
- *Recall:* say *sādaram*

Before you move on

What does भस्म mean? ("ash".) Say it once more.

38.3 शिला (śilā) — a stone, a slab of rock

Before the new word: what did *bhasma* mean?

You'll want to know: शिला

शिला (*śilā*) — "a stone, a slab of rock".

शिला is a stone large enough to sit on: a slab, a flat rock, the piece a step is cut from.

Beside पर्वतः, which is the whole raised land, शिला is one piece of it you can put a hand on.

Its history outside India is unsettled — nobody has agreed a cousin for it, the way nobody has for केशः or माला. Feminine, ending in -आ.

The word, taken apart — its roots and family

Śilā is already in the Atharvaveda. MW tentatively connects it with a root √śi, but its origin is not settled. It lives on as Hindi *sil*, a flat stone (CDIAL 12459).

What you've built

One piece of the mountain, small enough to touch.

Your turn

- *Say it: śilā*
- *Say it:* it once more, slowly
- *Say it: bhasma*, then *śilā*

- *Recall:* say *tathā*
- *Read it:* प्रसन्नः

Before you move on

What does शिला mean? ("a stone, a slab of rock".) Say it once more.

38.4 सिकता (sikatā) — sand

Before the new word: what did *śilā* mean?

You'll want to know: सिकता

सिकता (*sikatā*) — "sand".

सिकता is sand — the grit of a bank, and the bank itself where it piles up.

It has long been tied to *sic*, "to pour, to sprinkle": sand is the stuff that pours.

Set it beside नदी and you have the two halves of a bank — the water, and what the water leaves at its edge.

The word, taken apart — its roots and family

MW links *sikatā* to the root √sic, "to pour", but CDIAL 13386 takes it as a collective form of *sika*, "sand", and points to Iranian cousins such as Old Persian *thikā*, "gravel". The root story is not settled.

What you've built

What a river puts down at its edge.

Your turn

- *Say it:* *sikatā*
- *Say it:* it once more, slowly
- *Say it:* *śilā*, then *sikatā*
- *Read it:* मन्दम्
- *Recall:* say *abhinandanam*

Before you move on

What does सिकता mean? ("sand".) Say it once more.

38.5 मृत्तिका (mṛttikā) — soil

Before the last word of the chapter: what did *śilā* mean, and what did *sikatā* mean?

You'll want to know: मृत्तिका

मृत्तिका (*mṛttikā*) — "soil".

मृत्तिका is soil — damp, workable, the stuff a potter digs and a wall is plastered with.

It stands on *mṛd*, "clay, soil", and EtymDB sets that word beside Old English *molde*, which survives as English *mould*, the loose earth of a garden bed.

Eastward it wore down into Hindi *miṭṭī*, still the ordinary word for the ground you dig.

The word, taken apart — its roots and family

Mṛttikā is built on *mṛd*, "clay, soil" (MW, CDIAL 10286), and it lives on as Hindi *miṭṭī* and Bengali *māṭi*.

What you've built

Five things underfoot and in the hearth: fire, ash, stone, sand, soil.

Your turn

- *Say it:* *mṛttikā*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *agniḥ* and *mṛttikā* together
- *Recall:* say *samyak*
- *Read it:* आशीर्वादः

Before you move on

What does मृत्तिका mean? ("soil".) Say it once more.

Chapter 39

Animals

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a cow, a bird, a fish, a dog and a snake in Sanskrit.
>
> *Complete SA-C39-snake and demonstrate the chapter promise.*

39.1 धेनुः (dhenuḥ) — a cow

Before the new word: what did *mṛttikā* mean?

You'll want to know: धेनुः

धेनुः (*dhenuḥ*) — "a cow".

धेनुः is a cow, and first of all a cow in milk.

It stands on *dhe*, "to suckle" — a root that reaches a long way west: MW compares Greek *thēlē*, "nipple", and Latin *fēlāre*, "to suck".

दुग्धम्, the milk you already ask for, comes from a different root altogether, the one that means to draw milk off. The animal is named for the giving, the drink for the taking.

What you've built

The animal behind the milk word.

Your turn

- *Say it: dhenuḥ*

- *Say it:* it once more, slowly
- *Say it: mṛttikā*, then *dhenuḥ*
- *Recall:* say *śāntiḥ*
- *Read it:* अग्निः

Before you move on

What does धेनुः mean? ("a cow".) Say it once more.

39.2 विहगः (vihagaḥ) — a bird

Before the new word: what did *dhenuḥ* mean?

You'll want to know: विहगः

विहगः (*vihagaḥ*) — "a bird".

विहगः is a bird, and the word says how it moves: *viha*, "the sky, the air", with *ga*, "going".

That going-piece is the one inside गच्छति, the first doing-word in this book. A विहगः is simply the sky-goer.

Viha is a rarer sky-word than आकाशः, but the picture is the same: the open air is where a bird goes.

The word, taken apart — its roots and family

MW explains *vihaga* as *viha*, "the sky", with *ga*, "going", a piece built on the root √gam: "sky-goer".

What you've built

A bird named for crossing the sky.

Your turn

- *Say it: vihagaḥ*
- *Say it:* it once more, slowly
- *Say it: dhenuḥ*, then *vihagaḥ*

- *Read it:* सादरम्
- *Recall:* say *bhasma*

Before you move on

What does विहगः mean? ("a bird".) Say it once more.

39.3 मत्स्यः (matsyaḥ) — a fish

Before the new word: what did *vihagaḥ* mean?

You'll want to know: मत्स्यः

मत्स्यः (*matsyaḥ*) — "a fish".

मत्स्यः is a fish, in a नदी or in a market basket.

It wore down eastward into *machh*, which is why the fish on a Hindi menu is *machhlī* and the Bengali one is *machh*.

Westward there is nothing to point at: no agreed European cousin has been found. A fish seems to be one of the things each family named for itself.

The word, taken apart — its roots and family

Matsya is already in the Rigveda, but no agreed European cousin is known, so its deeper origin is not settled. It lives on as Bengali *māch* and, with an added *-l-*, Hindi *machlī* (CDIAL 9758).

What you've built

A fish, and a word that travelled east but not west.

Your turn

- *Say it:* *matsyaḥ*
- *Say it:* it once more, slowly
- *Say it:* *vihagaḥ*, then *matsyaḥ*
- *Recall:* say *prasannaḥ*
- *Read it:* शिला

Before you move on

What does मत्स्यः mean? ("a fish".) Say it once more.

39.4 शुनकः (śunakaḥ) — a dog

Before the new word: what did *matsyaḥ* mean?

You'll want to know: शुनकः

शुनकः (*śunakaḥ*) — "a dog".

शुनकः is a dog — an affectionate little form of an older and much bigger word, *śvan*.

That *śvan* is one of the unbroken ones. Greek *kuōn* is behind *cynic*; Latin *canis* is behind *canine* and *kennel*; English *hound* and German *Hund* are the same word worn down the Germanic way.

The small ending on शुनकः is the difference between naming a species and naming the animal at your द्वारम्.

What you've built

A dog, in the small friendly form of a very old word.

Your turn

- *Say it: śunakaḥ*
- *Say it:* it once more, slowly
- *Say it: matsyaḥ*, then *śunakaḥ*
- *Read it:* अभिनन्दनम्
- *Recall:* say *sikatā*

Before you move on

What does शुनकः mean? ("a dog".) Say it once more.

39.5 सर्पः (sarpaḥ) — a snake

Before the last word of the chapter: what did *matsyaḥ* mean, and what did *śunakaḥ* mean?

You'll want to know: सर्पः

सर्पः (*sarpaḥ*) — "a snake".

सर्पः is a snake, named for what it does: *sṛp*, "to creep, to glide".

Latin has the same root, showing up as *serpere*, and *serpent* comes to English straight out of it. *Reptile* arrives by a parallel road from a Latin word meaning much the same thing.

A सर्पः belongs in the तृणम् rather than on the शिला, and that is where the old texts usually put it.

The word, taken apart — its roots and family

Sarpa is built on the root √sṛp, "to creep, glide" (MW, CDIAL 13271). It is inherited: MW compares Greek *herpō* and Latin *serpere*, "to creep".

What you've built

Five creatures: one in milk, one across the sky, one in the river, one at the door, one in the grass.

Your turn

- *Say it: sarpaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *dhenuḥ* and *sarpaḥ* together
- *Recall:* say *āśīrvādaḥ*
- *Read it:* मृत्तिका

Before you move on

What does सर्पः mean? ("a snake".) Say it once more.

Chapter 40

In the Kitchen

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name curd, sugar, fresh butter, a vegetable and a sweet in Sanskrit.
>
> *Complete SA-C40-sweet and demonstrate the chapter promise.*

40.1 दधि (dadhi) — curd

Before the new word: what did *sarpaḥ* mean?

You'll want to know: दधि

दधि (*dadhi*) — "curd".

दधि is curd — दुग्धम् set thick, the *dahī* of every kitchen in India.

The word is a doubled thing, *da-dh-i*. MW files it with the doubled form of *dhā*, "to set, to place", which would make curd the milk that has been set.

Hindi *dahī*, Marathi *dahī*, Gujarati *dahī* — the word barely moved.

The word, taken apart — its roots and family

EtymDB traces *dadhi* to a Proto-Indo-European word for milk, so the "set milk" reading is MW's, not the only one. It lives on as Hindi *dahī* (CDIAL 6146).

What you've built

Milk, set thick.

Your turn

- *Say it: dadhi*
- *Say it:* it once more, slowly
- *Say it: sarpaḥ*, then *dadhi*
- *Recall:* say *agniḥ*
- *Read it:* धेनुः

Before you move on

What does दधि mean? ("curd".) Say it once more.

40.2 शर्करा (śarkarā) — sugar

Before the new word: what did *dadhi* mean?

You'll want to know: शर्करा

शर्करा (*śarkarā*) — "sugar".

शर्करा is sugar, and before that it was grit and gravel — then the sweet grit that comes off boiled cane.

This one word is behind every sugar in Europe. It went into Arabic as *sukkar*, into Latin as *saccharum*, and from there into Italian *zucchero*, French *sucre*, German *Zucker* and English *sugar* and *saccharine*.

Feminine, ending in -आ, like माला and शिला.

The word, taken apart — its roots and family

Śarkarā first meant gravel or grit, in the Atharvaveda, and only later candied sugar (CDIAL 12337, 12338); CDIAL notes a proposal that the sugar sense came through a Mon-Khmer word. Borrowed through Persian into Arabic *sukkar*, it reached English as **sugar**.

What you've built

The Sanskrit word inside every European sugar.

Your turn

- *Say it: śarkarā*
- *Say it:* it once more, slowly
- *Say it: dadhi*, then *śarkarā*
- *Read it:* भस्म
- *Recall:* say *vihagaḥ*

Before you move on

What does शर्करा mean? ("sugar".) Say it once more.

40.3 नवनीतम् (navanītam) — fresh butter

Before the new word: what did *śarkarā* mean?

You'll want to know: नवनीतम्

नवनीतम् (*navanītam*) — "fresh butter".

नवनीतम् is butter fresh off the churn, and its first piece is already yours.

The first piece, *nava*, is "new" — the word you learned beside महत् and अल्प. The second, *nīta*, looks like "brought, led", from the *nī* inside नयति, but CDIAL lists a separate old *nīta* that already meant fresh butter, so the "newly brought" reading is a guess. Either way, this is the butter that comes fresh up out of the दधि.

It is the butter of the Kṛṣṇa stories, stolen by the handful, and Hindi *navnīt* is still a name people give a child.

The word, taken apart — its roots and family

Navanīta is a compound of *nava*, "new", and *nīta*, which CDIAL 7545 lists on its own as "fresh butter" (CDIAL 7003). It lives on as Marathi *loṇī*, "butter".

What you've built

Butter, named as the new thing that comes up out of the curd.

Your turn

- *Say it: navanītam*
- *Say it:* it once more, slowly
- *Say it: śarkarā*, then *navanītam*
- *Recall:* say *śilā*
- *Read it:* मत्स्यः

Before you move on

What does नवनीतम् mean? ("fresh butter".) Say it once more.

40.4 शाकम् (śākam) — a vegetable, a green

Before the new word: what did *navanītam* mean?

You'll want to know: शाकम्

शाकम् (*śākam*) — "a vegetable, a green".

शाकम् is a vegetable, and especially a leaf one — the cooked greens that a Hindi menu calls साग.

Where पत्रम् is the leaf on a लता, शाकम् is the leaf in a pot.

MW calls its derivation doubtful. The word stayed home, and it is doing the same work today it was doing three thousand years ago.

The word, taken apart — its roots and family

Śāka is of doubtful derivation, MW says. It lives on as Prakrit *sāga* (CDIAL 12370); Hindi and Punjabi *sāg* look like its descendants, though CDIAL does not list them.

What you've built

Leaves on the plant, and leaves in the pot.

Your turn

- *Say it: śākam*
- *Say it:* it once more, slowly
- *Say it: navanītam*, then *śākam*
- *Read it:* सिकता
- *Recall:* say *śunakaḥ*

Before you move on

What does शाकम् mean? ("a vegetable, a green".) Say it once more.

40.5 मोदकः (modakaḥ) — a sweet dumpling

Before the last word of the chapter: what did *navanītam* mean, and what did *śākam* mean?

You'll want to know: मोदकः

मोदकः (*modakaḥ*) — "a sweet dumpling".

मोदकः is a sweet — the round steamed dumpling put before a guest, and before a god.

It is usually tied to *mud*, "to be glad", so the name of the sweet is the name of the gladness it makes. आनन्दः, the joy you offered at a first meeting, reaches for the same idea by a different root.

Set one in front of an अतिथिः and the word does its own explaining.

The word, taken apart — its roots and family

Modaka first meant "gladdening" (MW), and CDIAL 10354 links it, with a question mark, to the root √mud, "to be glad".

What you've built

Five things from a kitchen: curd, sugar, butter, greens, a sweet.

Your turn

- *Say it: modakaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *dadhi* and *modakaḥ* together

What does मोदकः mean? ("a sweet dumpling".) Say it once more.

Chapter 41

Things People Make

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a wheel, a water-pot, a boat, a mirror and a parasol in Sanskrit.
>
> *Complete SA-C41-parasol and demonstrate the chapter promise.*

41.1 चक्रम् (cakram) — a wheel

Before the new word: what did *modakaḥ* mean?

You'll want to know: चक्रम्

चक्रम् (*cakram*) — "a wheel".

चक्रम् is a wheel, a disc, a circle of anything.

It is an old root for turning, ***k^{w}el-**, said twice — and the same doubling gives Greek *kuklos*, which English keeps in *cycle* and *cyclone*. English *wheel* is the same word by the Germanic road.

English later borrowed the Sanskrit itself, unworn, as *chakra*, so the word now sits in the language twice over.

What you've built

A wheel, and a root that turns in three languages at once.

Your turn

- *Say it: cakram*

- *Say it:* it once more, slowly
- *Say it:* *modakaḥ*, then *cakram*
- *Recall:* say *dhenuḥ*
- *Read it:* दधि

Before you move on

What does चक्रम् mean? ("a wheel".) Say it once more.

41.2 कलशः (kalaśaḥ) — a water-pot

Before the new word: what did *cakram* mean?

You'll want to know: कलशः

कलशः (*kalaśaḥ*) — "a water-pot".

कलशः is the round-bellied water-pot — the one set at a द्वारम् with leaves and a coconut on top, and any pot of that shape.

Fill it with पानीयम् and it is doing its everyday job; put it at a doorway and it is doing its other one.

Greek *kalux*, a husk or a cup, has been offered as a cousin (MW), though the link is not settled, and Latin *calix*, which English keeps in *chalice*, names the same swelling shape.

What you've built

The pot that holds water and welcomes people.

Your turn

- *Say it:* *kalaśaḥ*
- *Say it:* it once more, slowly
- *Say it:* *cakram*, then *kalaśaḥ*
- *Read it:* विहगः
- *Recall:* say *śarkarā*

Before you move on

What does कलशः mean? ("a water-pot".) Say it once more.

41.3 प्लवः (plavaḥ) — a boat, a raft

Before the new word: what did *kalaśaḥ* mean?

You'll want to know: प्लवः

प्लवः (*plavaḥ*) — "a boat, a raft".

प्लवः is a boat, and more exactly a float — a raft, a hull, anything that swims rather than sinks.

From *plu*, "to float, to swim", and the family is enormous: Greek *plein*, "to sail", Latin *pluere*, "to rain", English *flow*, *float* and *fleet*.

Where there is no सेतुः across the नदी, there is a प्लवः.

What you've built

What carries you over when there is no bridge.

Your turn

- *Say it: plavaḥ*
- *Say it:* it once more, slowly
- *Say it: kalaśaḥ*, then *plavaḥ*
- *Recall:* say *matsyaḥ*
- *Read it:* नवनीतम्

Before you move on

What does प्लवः mean? ("a boat, a raft".) Say it once more.

41.4 दर्पणः (darpaṇaḥ) — a mirror

Before the new word: what did *plavaḥ* mean?

You'll want to know: दर्पणः

दर्पणः (*darpaṇaḥ*) — "a mirror".

दर्पणः is a mirror — a disc of metal polished bright, centuries before glass could do the job.

It stands on *dṛp*, "to be proud", so the object is named for what people do in front of it rather than for what it is made of. That is a small joke, and an old one.

Hindi *darpaṇ* is the same word, unchanged.

The word, taken apart — its roots and family

MW explains *darpaṇa* as "causing vanity", built on *darpa*, "pride", from the root √dṛp; CDIAL 6201 marks the root with a question mark.

What you've built

A mirror, named for vanity rather than for glass.

Your turn

- *Say it: darpaṇaḥ*
- *Say it:* it once more, slowly
- *Say it: plavaḥ*, then *darpaṇaḥ*
- *Read it:* शुनकः
- *Recall:* say *śākam*

Before you move on

What does दर्पणः mean? ("a mirror".) Say it once more.

41.5 छत्रम् (chatram) — a parasol

Before the last word of the chapter: what did *plavaḥ* mean, and what did *darpaṇaḥ* mean?

You'll want to know: छत्रम्

छत्रम् (*chatram*) — "a parasol".

छत्रम् is a parasol: the shade held over a *rājā*, and the umbrella carried in the rain.

From *chad*, "to cover". The covering is the whole of it — what the छत्रम् covers you from, sun or water, the word does not say.

It went east as well as up in the world: Hindi *chātā*, the umbrella anyone carries, is this word worn smooth.

The word, taken apart — its roots and family

Chattra is built on the root √chad, "to cover" (MW, CDIAL 4972). It lives on as Hindi *chātā*, "umbrella".

What you've built

Five things made by hand: a wheel, a pot, a boat, a mirror, a parasol.

Your turn

- *Say it: chatram*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *cakram* and *chatram* together
- *Recall:* say *sarpaḥ*
- *Read it:* मोदकः

Before you move on

What does छत्रम् mean? ("a parasol".) Say it once more.

Chapter 42

Five More Replies

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say sometimes, suddenly, mostly, a little and much in Sanskrit, and use any of the five on its own as a reply.
>
> *Complete SA-C42-much and demonstrate the chapter promise.*

42.1 कदाचित् (kadācit) — sometimes

Before the new word: what did *chatram* mean?

You'll want to know: कदाचित्

कदाचित् (*kadācit*) — "sometimes".

कदाचित् answers "when?" with "now and then".

Both pieces are yours already: कदा, the *when* you ask questions with, and a small *cit* fastened on the end. कदाचित् is *when* gone vague — at some time or other, and no promise which.

It is also the polite way to leave a door open: not yes, not no, perhaps sometimes.

The word, taken apart — its roots and family

Kadācit is built from *kadā*, "when", and the particle *cit*, which turns a question word into an indefinite one (MW).

What you've built

A reply that answers *when* without saying when.

Your turn

- *Say it: kadācit*
- *Say it:* it once more, slowly
- *Say it: chatram*, then *kadācit*
- *Recall:* say *dadhi*
- *Read it:* चक्रम्

Before you move on

What does कदाचित् mean? ("sometimes".) Say it once more.

42.2 सहसा (sahasā) — suddenly

Before the new word: what did *kadācit* mean?

You'll want to know: सहसा

सहसा (*sahasā*) — "suddenly".

सहसा is "all at once, without warning".

Underneath it is *sahas*, "force, a sudden strength", put into the shape that means *by means of*: by force, and so at a rush. कृपया, the please you already say, is made the very same way out of *kṛpā*.

It carries a shade of judgement with it — a thing done सहसा is a thing done without thinking first.

The word, taken apart — its roots and family

Sahasā is the instrumental case of *sahas*, "force, might", built on the root √sah, "to prevail" (MW): "by force", and so "at a rush".

What you've built

One thing happening at a rush, and a mild opinion about it.

Your turn

- *Say it: sahasā*
- *Say it:* it once more, slowly
- *Say it: kadācit*, then *sahasā*
- *Read it:* शर्करा
- *Recall:* say *kalaśaḥ*

Before you move on

What does सहसा mean? ("suddenly".) Say it once more.

42.3 प्रायः (prāyaḥ) — mostly, for the most part

Before the new word: what did *sahasā* mean?

You'll want to know: प्रायः

प्रायः (*prāyaḥ*) — "mostly, for the most part".

प्रायः is "for the most part, in the main, usually".

Say it when something holds most of the time and you would rather not promise more than that. It is usually read as *pra-*, "forward", with *aya*, "a going": what runs out in front, what happens in the main.

Beside सर्वम्, which claims everything, प्रायः claims almost everything and keeps its hedge.

The word, taken apart — its roots and family

CDIAL 8951 explains *prāyaḥ* as an old comparative connected with *puru*, "much", which speakers later heard as *pra* + *aya*, "going forth" (MW).

What you've built

A reply that is honest about not being certain.

Your turn

- *Say it: prāyaḥ*
- *Say it:* it once more, slowly
- *Say it: sahasā*, then *prāyaḥ*
- *Recall:* say *navanītam*
- *Read it:* प्लवः

Before you move on

What does प्रायः mean? ("mostly, for the most part".) Say it once more.

42.4 किञ्चित् (kiñcit) — a little, somewhat

Before the new word: what did *prāyaḥ* mean?

You'll want to know: किञ्चित्

किञ्चित् (*kiñcit*) — "a little, somewhat".

किञ्चित् is "a bit, somewhat, a small amount".

It is किम्, the *what* you have been asking with since your first questions, wearing the same little *cit* that softened कदाचित्. *What* gone vague is *something* — and *something* said of a quantity is *a little*.

अल्पम् describes a small thing; किञ्चित् measures a small amount of it.

The word, taken apart — its roots and family

Kiñcit is built from *kim*, "what", and the particle *cit* (CDIAL 3144). It lives on as Hindi *kuch*, "some, something".

What you've built

A small helping of an answer.

Your turn

- *Say it: kiñcit*

- *Say it:* it once more, slowly
- *Say it:* *prāyaḥ*, then *kiñcit*
- *Read it:* शाकम्
- *Recall:* say *darpaṇaḥ*

Before you move on

What does किञ्चित् mean? ("a little, somewhat".) Say it once more.

42.5 बहु (bahu) — much, many

Before the last word of the chapter: what did *prāyaḥ* mean, and what did *kiñcit* mean?

You'll want to know: बहु

बहु (*bahu*) — "much, many".

बहु is "much" of one thing and "many" of several — the far end of the answer किञ्चित् starts.

Greek *pakhus*, "thick, stout", is its cousin, and thickness is the sense underneath: plenty as bulk rather than as a count.

Hindi *bahut*, "very, a lot", is बहु with an ending on it, and it is one of the commonest words anyone says today.

What you've built

Five replies about how much and how often: sometimes, suddenly, mostly, a little, much.

Your turn

- *Say it:* *bahu*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *kadācit* and *bahu* together
- *Recall:* say *modakaḥ*
- *Read it:* छत्रम्

Before you move on

What does बहु mean? ("much, many".) Say it once more.

Chapter 43

Good Manners

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name hospitality, good conduct, humility, trust and plain dealing in Sanskrit.
>
> *Complete SA-C43-honest and demonstrate the chapter promise.*

43.1 आतिथ्यम् (ātithyam) — hospitality

Before the new word: what did *bahu* mean?

You'll want to know: आतिथ्यम्

आतिथ्यम् (*ātithyam*) — "hospitality".

आतिथ्यम् is hospitality: not the guest, but everything owed to one.

The अतिथिः you already know is stretched into the treatment that guest receives, so the word names a duty rather than a person.

Classically it runs in an order, and you have the words for all of it: an आसनम् first, then पानीयम्, then अन्नम्. आतिथ्यम् is that whole sequence in one word.

The word, taken apart — its roots and family

Ātithya is built from *atithi*, "guest", by lengthening the first vowel and adding *-ya*, the usual way Sanskrit makes "what belongs to" a thing (MW).

What you've built

The guest word, turned into what is owed to the guest.

Your turn

- *Say it:* *ātithyam*
- *Say it:* it once more, slowly
- *Say it:* *bahu*, then *ātithyam*
- *Recall:* say *cakram*
- *Read it:* कदाचित्

Before you move on

What does आतिथ्यम् mean? ("hospitality".) Say it once more.

43.2 विनयः (vinayaḥ) — good conduct, training

Before the new word: what did *ātithyam* mean?

You'll want to know: विनयः

विनयः (*vinayaḥ*) — "good conduct, training".

विनयः is the bearing of someone well brought up — modest, disciplined, easy to be near.

Its pieces are *vi-*, "away, apart", and the leading doing-word नयति: to have विनयः is to have been led away from what was rough in you. Training and good manners are one word here, because the second is thought to come out of the first.

The Buddhist books of monastic training carry this word as their name.

The word, taken apart — its roots and family

Vinaya is built from the prefix *vi*, "away, apart", and the root √nī, "to lead": first "leading away", then "training, good breeding" (MW, CDIAL 11767).

What you've built

Manners understood as training rather than as polish.

Your turn

- *Say it: vinayaḥ*
- *Say it:* it once more, slowly
- *Say it: ātithyam*, then *vinayaḥ*
- *Read it:* कलशः
- *Recall:* say *sahasā*

Before you move on

What does विनयः mean? ("good conduct, training".) Say it once more.

43.3 नम्रता (namratā) — humility

Before the new word: what did *vinayaḥ* mean?

You'll want to know: नम्रता

नम्रता (*namratā*) — "humility".

नम्रता is humility — bendingness, the quality of one who bows.

It stands on *nam*, "to bow", which is the *nam* that opens नमस्ते on your first page and sits inside प्रणामः. Those two are single acts; नम्रता is the same bow turned into a settled habit.

Hindi *namratā* is the word people still use of someone who carries success lightly.

The word, taken apart — its roots and family

Namratā is built from *namra*, "bowing, bent", and the abstract ending *-tā*; *namra* itself is built on the root √nam, "to bend, bow" (MW, CDIAL 6964).

What you've built

The bow you already make, become a habit.

Your turn

- *Say it: namratā*
- *Say it:* it once more, slowly
- *Say it: vinayaḥ*, then *namratā*
- *Recall:* say *plavaḥ*
- *Read it:* प्रायः

Before you move on

What does नम्रता mean? ("humility".) Say it once more.

43.4 विश्वासः (viśvāsaḥ) — trust, confidence

Before the new word: what did *namratā* mean?

You'll want to know: विश्वासः

विश्वासः (*viśvāsaḥ*) — "trust, confidence".

विश्वासः is trust — and the picture inside it is breathing out.

It is *vi-* with *śvas*, "to breathe": to trust someone is to let the breath go, to stop holding it. English says much the same thing when it calls a friend a confidant, from Latin for *with faith*.

Hindi *viśvās* is unchanged, and *viśvāsghāt*, a betrayal, is the same word with the breaking of it attached.

What you've built

Trust, described as the moment you stop holding your breath.

Your turn

- *Say it: viśvāsaḥ*
- *Say it:* it once more, slowly

- *Say it: namratā*, then *viśvāsaḥ*
- *Read it:* दर्पणः
- *Recall:* say *kiñcit*

Before you move on

What does विश्वासः mean? ("trust, confidence".) Say it once more.

43.5 सरलः (saralaḥ) — straightforward, honest

Before the last word of the chapter: what did *namratā* mean, and what did *viśvāsaḥ* mean?

You'll want to know: सरलः

सरलः (*saralaḥ*) — "straightforward, honest".

सरलः is straight: of a मार्गः, of a piece of दारु, and of a person who says the thing plainly.

The pine is called *sarala* because it grows straight up, and the same word does duty for a road with no bends and for someone with no side to them.

English runs the metaphor the same way — *straight*, *upright*, *a straight answer* — which is worth noticing, because the two languages arrived at it separately.

The word, taken apart — its roots and family

MW glosses *sarala* "running on, straight", filing it under *sara*, "running", from the root √sṛ, "to run, flow". It lives on as Punjabi and Bengali *saral* (CDIAL 13252).

What you've built

Five words for how a person carries themselves: hospitality, conduct, humility, trust, plain dealing.

Your turn

- *Say it: saralaḥ*
- *Say it:* it once more, slowly

- *Say it:* all five in order, then *ātithyam* and *saralaḥ* together
- *Recall:* say *chatram*
- *Read it:* बहु

Before you move on

What does सरलः mean? ("straightforward, honest".) Say it once more.

Chapter 44

Colours

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say white, dark, yellow, green and blue in Sanskrit.
>
> *Complete SA-C44-blue and demonstrate the chapter promise.*

44.1 श्वेतः (śvetaḥ) — white

Before the new word: what did *saralaḥ* mean?

You'll want to know: श्वेतः

श्वेतः (*śvetaḥ*) — "white".

श्वेतः is white, and bright along with it.

English *white* is the same word by the Germanic road, and Russian *svet*, "light", is another of its brothers — brightness and whiteness were one idea for a long time.

हिमम् is श्वेतम्, and so is दधि.

The word, taken apart — its roots and family

Śveta is built on the root √śvit, "to be bright, white" (MW, CDIAL 12774). It is inherited: MW compares Gothic *hweits*, the cousin of English **white**.

What you've built

White, and the brightness that comes with it.

Your turn

- *Say it: śvetaḥ*
- *Say it:* it once more, slowly
- *Say it: saralaḥ*, then *śvetaḥ*
- *Recall:* say *kadācit*
- *Read it:* आतिथ्यम्

Before you move on

What does श्वेतः mean? ("white".) Say it once more.

44.2 श्यामः (śyāmaḥ) — dark, black

Before the new word: what did *śvetaḥ* mean?

You'll want to know: श्यामः

श्यामः (*śyāmaḥ*) — "dark, black".

श्यामः is dark — black, but also the blue-black of a rain cloud and the deep green of standing water.

It is the darkness of a thundercloud rather than of soot, which is why the god whose name means "the dark one" is also called *Śyām* with affection.

No European cousin has been agreed. The word stayed home, and *Śyām* and *Śyāmā* are ordinary names in India today.

The word, taken apart — its roots and family

Śyāma is already in the Atharvaveda. MW reports a traditional link with the root √śyai, and CDIAL 12664 compares *śyāva*, "dark brown", but its source is not settled.

What you've built

Dark, with a rain cloud in it rather than ash.

Your turn

- *Say it: śyāmaḥ*
- *Say it:* it once more, slowly
- *Say it: śvetaḥ*, then *śyāmaḥ*
- *Read it:* सहसा
- *Recall:* say *vinayaḥ*

Before you move on

What does श्यामः mean? ("dark, black".) Say it once more.

44.3 पीतः (pītaḥ) — yellow

Before the new word: what did *śyāmaḥ* mean?

You'll want to know: पीतः

पीतः (*pītaḥ*) — "yellow".

पीतः is yellow — turmeric, ripe grain, a marigold, the silk a bridegroom wears.

Its shape looks like a past participle, but which verb it would belong to is not settled. A पीतम् वस्त्रम् is a yellow cloth.

Hindi *pīlā* is the same word with an ending on it, and it is the yellow of every wall and every taxi.

The word, taken apart — its roots and family

MW suggests that *pīta* "yellow" may come from the root √pyai, "to swell, be fat", after the colour of butter and oil; that derivation is not settled, and CDIAL 8230 sends the reader to *pitta*, "bile", instead. Hindi *pīlā* comes from its longer form *pītala* (CDIAL 8233).

What you've built

Yellow, and a word whose history is still open.

Your turn

- *Say it: pītaḥ*
- *Say it:* it once more, slowly
- *Say it: śyāmaḥ*, then *pītaḥ*
- *Recall:* say *prāyaḥ*
- *Read it:* नम्रता

Before you move on

What does पीतः mean? ("yellow".) Say it once more.

44.4 हरितः (haritaḥ) — green

Before the new word: what did *pītaḥ* mean?

You'll want to know: हरितः

हरितः (*haritaḥ*) — "green".

हरितः is green — and before it settled it covered yellow-green and gold as well.

English *yellow* and *gold* are its cousins, from ***ǵhel-**, a root that runs across the whole band from green to yellow. One family, one word, two colours pulled apart by different daughters.

तृणम् is हरितम्, and so is a young पत्रम् on a तरुः.

The word, taken apart — its roots and family

Harita is built on *hari*, "yellowish, tawny" (MW). It is inherited: MW compares Latin *helvus*, "honey-yellow", and English **yellow**. It lives on as Hindi *harā*, "green" (CDIAL 13985).

What you've built

Green, from a root that could not decide between green and gold.

Your turn

- *Say it: haritaḥ*
- *Say it:* it once more, slowly
- *Say it: pītaḥ*, then *haritaḥ*
- *Read it:* किञ्चित्
- *Recall:* say *viśvāsaḥ*

Before you move on

What does हरितः mean? ("green".) Say it once more.

44.5 नीलः (nīlaḥ) — blue

Before the last word of the chapter: what did *pītaḥ* mean, and what did *haritaḥ* mean?

You'll want to know: नीलः

नीलः (*nīlaḥ*) — "blue".

नीलः is blue, and dark blue at that — the blue of the समुद्रः rather than of the आकाशः at noon.

The indigo plant is *nīlī*, and when Europe began buying that dye the word travelled with the cargo: Arabic *nīl*, Portuguese *anil*, and the *aniline* English still uses for the dyes that replaced it.

So a Sanskrit colour word is sitting inside a modern chemistry term, carried there by trade.

What you've built

Five colours: white, dark, yellow, green and blue.

Your turn

- *Say it: nīlaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *śvetaḥ* and *nīlaḥ* together

- *Recall:* say *bahu*
- *Read it:* सरलः

Before you move on

What does नीलः mean? ("blue".) Say it once more.

Chapter 45

Times of the Day

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name morning, noon, evening, a month and a year in Sanskrit.
>
> *Complete SA-C45-year and demonstrate the chapter promise.*

45.1 प्रातः (prātaḥ) — morning

Before the new word: what did *nīlaḥ* mean?

You'll want to know: प्रातः

प्रातः (*prātaḥ*) — "morning".

प्रातः is early morning: the stretch before the sun stands high, and the hour the first greeting of the day belongs to.

You have said *pra-* at the front of a word twice already, in प्रणामः and in प्रसन्नः, where it carries the sense "forward, out in front". प्रातः is the front end of the day.

Greek *prōi*, "early", is the same small piece put to the same work, and Latin *prae* is its cousin; English carries it as the *pre-* in front of a thousand words.

What you've built

The first part of the day, named.

Your turn

- *Say it: prātaḥ*
- *Say it:* it once more, slowly
- *Say it: nīlaḥ*, then *prātaḥ*
- *Recall:* say *ātithyam*
- *Read it:* श्वेतः

Before you move on

What does प्रातः mean? ("morning".) Say it once more.

45.2 मध्याह्नः (madhyāhnaḥ) — noon

Before the new word: what did *prātaḥ* mean?

You'll want to know: मध्याह्नः

मध्याह्नः (*madhyāhnaḥ*) — "noon".

मध्याह्नः is midday, the sun at the top of its climb.

It is two pieces joined: *madhya*, "middle", and *ahan*, a day. Sanskrit keeps more than one word for a day, and this is the other one, beside दिनम्. English *mid* is *madhya*'s own worn-down cousin.

So noon is the middle of the day said in one breath, which is what noon is in most languages once you take the word apart.

The word, taken apart — its roots and family

Madhyāhna is a compound of *madhya*, "middle", and *ahan*, "day" (MW, CDIAL 9818). *Madhya* is inherited: MW compares Latin *medius* and English **mid**.

What you've built

The top of the day, between its two ends.

Your turn

- *Say it: madhyāhnaḥ*
- *Say it:* it once more, slowly
- *Say it: prātaḥ*, then *madhyāhnaḥ*
- *Read it:* विनयः
- *Recall:* say *śyāmaḥ*

Before you move on

What does मध्याह्नः mean? ("noon".) Say it once more.

45.3 सायम् (sāyam) — evening

Before the new word: what did *madhyāhnaḥ* mean?

Say "night." (*Rātriḥ*.) This lesson's word is the time that comes before it.

You'll want to know: सायम्

सायम् (*sāyam*) — "evening".

सायम् is evening: the end of the working day, when a thing is set down rather than picked up.

Put it beside प्रातः and you hold the two ends of the daylight — the greeting at one end and the leave-taking at the other. *sāyaṁ prātaḥ*, "evening and morning", is one of the oldest paired phrases the language has.

It rests on a piece meaning "to finish, to let go", so evening is named as the slackening of the day rather than as its darkness.

The word, taken apart — its roots and family

Sāyam is the adverb of *sāya*, "close of day", which MW derives, probably, from the root √so, "to bring to an end" (CDIAL 13353).

What you've built

Both ends of the daylight, and the middle between them.

Your turn

- *Say it: sāyam*
- *Say it:* it once more, slowly
- *Say it: madhyāhnaḥ*, then *sāyam*
- *Recall:* say *namratā*
- *Read it:* पीतः

Before you move on

What does सायम् mean? ("evening".) Say it once more.

45.4 मासः (māsaḥ) — a month

Before the new word: what did *sāyam* mean?

You'll want to know: मासः

मासः (*māsaḥ*) — "a month".

मासः is a month, and it is the moon's own word.

You have चन्द्रः for the moon overhead. मासः is that same moon counted: the stretch from one to the next.

Latin *mēnsis*, Greek *mēn*, English *month* and *moon* are all one word travelled west, and this is among the securest cousins in the whole family. Ends in -अः.

What you've built

A stretch of time measured by the moon you already know.

Your turn

- *Say it: māsaḥ*
- *Say it:* it once more, slowly
- *Say it: sāyam*, then *māsaḥ*
- *Read it:* विश्वासः
- *Recall:* say *haritaḥ*

Before you move on

What does मासः mean? ("a month".) Say it once more.

45.5 संवत्सरः (saṁvatsaraḥ) — a year

Before the last word of the chapter: what did *sāyam* mean, and what did *māsaḥ* mean?

You'll want to know: संवत्सरः

संवत्सरः (*saṁvatsaraḥ*) — "a year".

संवत्सरः is a year: the whole round of months, come back to where it started.

The *sam-* in front is the piece meaning "together, complete" that also opens the name of the language itself. The *vatsara* behind it is kin to Latin *vetus*, "old", and to Greek *etos*, a year — a year being what leaves a thing one year older. English *veteran* sits on that same piece.

Beside मासः, the small round, संवत्सरः is the large one. Ends in -अः.

What you've built

Five stretches of time: morning, noon, evening, a month, a year.

Your turn

- *Say it: saṁvatsaraḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *prātaḥ* and *saṁvatsaraḥ* together
- *Recall:* say *saralaḥ*
- *Read it:* नीलः

Before you move on

What does संवत्सरः mean? ("a year".) Say it once more.

Chapter 46

Sun and Shade

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the sun, a ray, light, shade and heat in Sanskrit.
>
> *Complete SA-C46-heat and demonstrate the chapter promise.*

46.1 रविः (raviḥ) — the sun

Before the new word: what did *saṁvatsaraḥ* mean?

You'll want to know: रविः

रविः (*raviḥ*) — "the sun".

रविः is the sun: the disc itself, not the light it sends.

You have आकाशः for the open sky and चन्द्रः for the moon. रविः is the third thing overhead, and the one the other two are measured against.

Sanskrit keeps several sun-words, and this one has only one proposed cousin outside India, an Armenian word for the sun, so its history beyond the border is thin. Its life since then has not: Hindi still calls Sunday *ravivār*, so the word gets said once a week by people who have never studied it.

The word, taken apart — its roots and family

Ravi is a classical word for the sun (CDIAL 10646). The native grammarians derive it from the root √ru, "to roar" (MW). EtymDB compares an Armenian word for the sun, but its origin is not settled. It survives in *ravivāra*, "Sunday".

What you've built

The third thing overhead, beside the sky and the moon.

Your turn

- *Say it: raviḥ*
- *Say it:* it once more, slowly
- *Say it: saṁvatsaraḥ*, then *raviḥ*
- *Recall:* say *śvetaḥ*
- *Read it:* प्रातः

Before you move on

What does रविः mean? ("the sun".) Say it once more.

46.2 रश्मिः (raśmiḥ) — a ray

Before the new word: what did *raviḥ* mean?

You'll want to know: रश्मिः

रश्मिः (*raśmiḥ*) — "a ray".

रश्मिः is a ray: one line of light, reaching down from रविः.

The same word means a rein or a cord held in the hand, and the two senses share one picture — something long and thin, stretched from a holder to the thing it holds. A ray reaches out of the sun the way a rein reaches out of a fist.

That doubling is worth noticing, because it shows how Sanskrit builds: not two words for two things, but one shape lent to both.

The word, taken apart — its roots and family

Raśmi first meant a rope or a rein, already in the Rigveda, and then a ray of light (MW, CDIAL 10648). It lives on as Punjabi *rassī*, "rope", which Hindi borrowed.

What you've built

The sun, and the line of light it lets down.

Your turn

- *Say it: raśmiḥ*
- *Say it:* it once more, slowly
- *Say it: raviḥ*, then *raśmiḥ*
- *Read it:* श्यामः
- *Recall:* say *madhyāhnaḥ*

Before you move on

What does रश्मिः mean? ("a ray".) Say it once more.

46.3 प्रकाशः (prakāśaḥ) — light

Before the new word: what did *raśmiḥ* mean?

You'll want to know: प्रकाशः

प्रकाशः (*prakāśaḥ*) — "light".

प्रकाशः is light: brightness itself, and the state of a thing being visible at all.

You met a piece meaning "to shine, to be seen" once before, sitting inside आकाशः, the open sky. प्रकाशः is that very piece with *pra-*, "forward", in front of it — light as shining sent out.

So the sky and the light in it are built out of one word, parting only at the small piece each carries at the front. Ends in -अः.

The word, taken apart — its roots and family

Prakāśa is built from the prefix *pra*, "forth", and the root √kāś, "to shine, be visible" (MW, CDIAL 8437), the root inside *ākāśa*.

What you've built

Light, and the piece it shares with the sky.

Your turn

- *Say it: prakāśaḥ*
- *Say it:* it once more, slowly
- *Say it: raśmiḥ*, then *prakāśaḥ*
- *Recall:* say *pītaḥ*
- *Read it:* सायम्

Before you move on

What does प्रकाशः mean? ("light".) Say it once more.

46.4 छाया (chāyā) — shade, a shadow

Before the new word: what did *prakāśaḥ* mean?

You'll want to know: छाया

छाया (*chāyā*) — "shade, a shadow".

छाया is shade, and equally the shadow a thing throws.

You have छत्रम् for the parasol. छाया is what the parasol makes: the cool patch, not the object holding it up. One is the tool and the other is the result, and now you can name both.

Greek *skiā*, "shadow", is the same word, and so is Persian *sāya*. Feminine, ending in -आ.

What you've built

The thing the parasol makes, told apart from the parasol.

Your turn

- *Say it: chāyā*
- *Say it:* it once more, slowly
- *Say it: prakāśaḥ*, then *chāyā*
- *Read it:* हरितः

- *Recall:* say *māsaḥ*

Before you move on

What does छाया mean? ("shade, a shadow".) Say it once more.

46.5 तापः (tāpaḥ) — heat

Before the last word of the chapter: what did *prakāśaḥ* mean, and what did *chāyā* mean?

You'll want to know: तापः

तापः (*tāpaḥ*) — "heat".

तापः is heat: the warmth of the sun on a back, and by an easy stretch the heat of trouble.

It stands on *tap*, "to be hot, to burn" — the same root under *tapas*, the heat a person is said to build up by hard practice. Sanskrit treats effort and warmth as one thing.

Latin *tepēre*, "to be warm", is that root gone west, and English took *tepid* straight from it. Ends in -अः.

What you've built

Five things about light and warmth: the sun, a ray, light, shade, heat.

Your turn

- *Say it:* *tāpaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *raviḥ* and *tāpaḥ* together
- *Recall:* say *nīlaḥ*
- *Read it:* संवत्सरः

Before you move on

What does तापः mean? ("heat".) Say it once more.

Chapter 47

Parts of a House

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a wall, a window, a stair, a pillar and the floor in Sanskrit.
>
> *Complete SA-C47-floor and demonstrate the chapter promise.*

47.1 भित्तिः (bhittiḥ) — a wall

Before the new word: what did *tāpaḥ* mean?

You'll want to know: भित्तिः

भित्तिः (*bhittiḥ*) — "a wall".

भित्तिः is a wall: the built side of a room.

You know पुरम्, the town with a wall around it. भित्तिः is one such wall brought down to the size of a house — the thing itself rather than the place it encloses.

It stands on *bhid*, "to split, to break apart", which is exactly what a wall does to a space: inside on one hand, outside on the other. Latin *findere*, "to cleave", is the same root, behind English *fissure*, and English *bite* belongs to it as well.

What you've built

One wall, told apart from the walled town.

Your turn

- *Say it: bhittiḥ*
- *Say it:* it once more, slowly
- *Say it: tāpaḥ*, then *bhittiḥ*
- *Recall:* say *prātaḥ*
- *Read it:* रविः

Before you move on

What does भित्तिः mean? ("a wall".) Say it once more.

47.2 वातायनम् (vātāyanam) — a window

Before the new word: what did *bhittiḥ* mean?

You'll want to know: वातायनम्

वातायनम् (*vātāyanam*) — "a window".

वातायनम् is a window, and the word says plainly what a window is for.

It is *vāta*, wind, joined to *ayana*, a going: a window is the wind's way in. You already say वायुः for wind, and *vāta* is its near relative from the same root, "to blow".

Set it against भित्तिः and the pair makes sense of a room: the wall shuts, the window opens. Neuter, ending in -अम्.

The word, taken apart — its roots and family

Vātāyana is a compound of *vāta*, "wind", built on the root √vā "to blow", and *ayana*, "a going, a passage"; MW glosses it "wind-passage".

What you've built

The opening in the wall, named for what comes through it.

Your turn

- *Say it: vātāyanam*

- *Say it:* it once more, slowly
- *Say it: bhittiḥ*, then *vātāyanam*
- *Read it:* मध्याह्नः
- *Recall:* say *raśmiḥ*

Before you move on

What does वातायनम् mean? ("a window".) Say it once more.

47.3 सोपानम् (sopānam) — a stair

Before the new word: what did *vātāyanam* mean?

You'll want to know: सोपानम्

सोपानम् (*sopānam*) — "a stair".

सोपानम् is a stair, a flight of steps.

One way of taking it apart reads it as "the approach" — a small joining word in front, and behind it a word for coming near. If that is right, the word carries its purpose on its face, the way वातायनम् does.

It stayed home and stayed itself: Hindi and Marathi both keep *sopān* for a stair. Neuter, ending in -अम्.

The word, taken apart — its roots and family

MW suggests *sopāna* may be contracted from *sa* + *upāyana*, "approach", and CDIAL 13606 repeats this with a question mark, so it is not settled.

What you've built

The way up, added to the wall and the window.

Your turn

- *Say it: sopānam*
- *Say it:* it once more, slowly
- *Say it: vātāyanam*, then *sopānam*

- *Recall:* say *sāyam*
- *Read it:* प्रकाशः

Before you move on

What does सोपानम् mean? ("a stair".) Say it once more.

47.4 स्तम्भः (stambhaḥ) — a pillar

Before the new word: what did *sopānam* mean?

You'll want to know: स्तम्भः

स्तम्भः (*stambhaḥ*) — "a pillar".

स्तम्भः is a pillar, a post: the upright that carries a roof.

It rests on *stambh*, "to prop, to make firm". Where भित्तिः splits a space, स्तम्भः holds one open — a wall you can walk past.

English *stamp* and *stump* sit near it (MW), and the picture under all three is one thing: something planted hard and standing. Ends in -अः.

The word, taken apart — its roots and family

Stambha is built on the root √stambh, "to prop, make firm" (MW, CDIAL 13682). It lives on as Punjabi *thambh*, "pillar".

What you've built

What holds the roof up, beside what closes the room in.

Your turn

- *Say it: stambhaḥ*
- *Say it:* it once more, slowly
- *Say it: sopānam*, then *stambhaḥ*
- *Read it:* मासः
- *Recall:* say *chāyā*

Before you move on

What does स्तम्भः mean? ("a pillar".) Say it once more.

47.5 तलम् (talam) — the floor

Before the last word of the chapter: what did *sopānam* mean, and what did *stambhaḥ* mean?

You'll want to know: तलम्

तलम् (*talam*) — "the floor".

तलम् is the floor: the flat under a room, and the underside of anything at all.

The palm of a hand is a *tala*, and so is the sole of a foot. The word names a flat bottom rather than a room in particular, which is why it reaches from a building to a body without changing shape.

Latin *tellūs*, "the ground", is a cousin of it. Neuter, ending in -अम्.

What you've built

Five parts of a building: a wall, a window, a stair, a pillar, the floor.

Your turn

- *Say it: talam*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *bhittiḥ* and *talam* together
- *Recall:* say *saṁvatsaraḥ*
- *Read it:* तापः

Before you move on

What does तलम् mean? ("the floor".) Say it once more.

Chapter 48

More Animals

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a lion, a wolf, a goat, a monkey and a goose in Sanskrit.
>
> *Complete SA-C48-goose and demonstrate the chapter promise.*

48.1 सिंहः (siṁhaḥ) — a lion

Before the new word: what did *talam* mean?

You'll want to know: सिंहः

सिंहः (*siṁhaḥ*) — "a lion".

सिंहः is a lion.

You have been handed this word twice without being told it. *Siṁhapura*, the lion town, is what *Singapore* was worn down from; and *Narasiṁha*, the man-lion, sets it beside नरः, the man you can already say. Here is the word on its own at last.

Its own parentage is unsettled — no cousin outside the family has been agreed on. How far it travelled is not in doubt: the language and the people of Sri Lanka are called Sinhala after it. Ends in **-अः**.

The word, taken apart — its roots and family

MW takes *siṃha* as probably "the powerful one", from the root √sah, "to prevail", but no cousin outside India is agreed, so its origin is not settled (CDIAL 13384).

What you've built

A word you had already met twice, now yours to say.

Your turn

- *Say it: siṁhaḥ*
- *Say it:* it once more, slowly
- *Say it: talam*, then *siṁhaḥ*
- *Recall:* say *raviḥ*
- *Read it:* भित्तिः

Before you move on

What does सिंहः mean? ("a lion".) Say it once more.

48.2 वृकः (vṛkaḥ) — a wolf

Before the new word: what did *siṁhaḥ* mean?

You'll want to know: वृकः

वृकः (*vṛkaḥ*) — "a wolf".

वृकः is a wolf.

Where सिंहः stops at the border, this one runs the whole way: Latin *lupus*, Greek *lykos*, English *wolf*, Russian *volk*. One animal that kept one name from the Ganges to the Atlantic.

The Sanskrit word is used of a tearing thing more generally too, which fits the root sense of tearing. Ends in -अः.

What you've built

Two animals, one with cousins abroad and one without.

Your turn

- *Say it: vṛkaḥ*
- *Say it:* it once more, slowly

- *Say it: siṁhaḥ*, then *vṛkaḥ*
- *Read it:* रश्मिः
- *Recall:* say *vātāyanam*

Before you move on

What does वृकः mean? ("a wolf".) Say it once more.

48.3 छागः (chāgaḥ) — a goat

Before the new word: what did *vṛkaḥ* mean?

You'll want to know: छागः

छागः (*chāgaḥ*) — "a goat".

छागः is a goat.

Like सिंहः and unlike वृकः, it has no agreed cousin outside India: the goat words of Europe and this one do not line up. Two animals out of the same field, and only one of them carried its name across the family.

That is worth holding on to, because it is what makes वृकः remarkable rather than ordinary. Ends in -अः.

The word, taken apart — its roots and family

Chāga is already in the Rigveda. MW tentatively compares a Greek verb for limping, but no cousin is agreed, so its origin is not settled. The related *chagala*, "goat", has many modern descendants (CDIAL 4963).

What you've built

Three animals, and two different fates for a name.

Your turn

- *Say it: chāgaḥ*
- *Say it:* it once more, slowly
- *Say it: vṛkaḥ*, then *chāgaḥ*

- *Recall:* say *prakāśaḥ*
- *Read it:* सोपानम्

Before you move on

What does छागः mean? ("a goat".) Say it once more.

48.4 वानरः (vānaraḥ) — a monkey

Before the new word: what did *chāgaḥ* mean?

You'll want to know: वानरः

वानरः (*vānaraḥ*) — "a monkey".

वानरः is a monkey.

Two words you own seem to sit inside it: वनम्, the forest, and नरः, the man. Some have read वानरः as the forest-man, *vana* + *nara*; MW prefers an old word for forest, *vanar-*, so the forest is in it either way.

So the word costs you one new shape and pays back two old ones. Ends in -अः.

The word, taken apart — its roots and family

MW and CDIAL 11515 derive *vānara* from *vanar-*, an old word for forest: the forest animal. The reading *vana-nara*, "forest man", is one MW reports from others. It lives on as Hindi *bandar*.

What you've built

A word built out of two you had already.

Your turn

- *Say it:* *vānaraḥ*
- *Say it:* it once more, slowly
- *Say it:* *chāgaḥ*, then *vānaraḥ*
- *Read it:* छाया
- *Recall:* say *stambhaḥ*

Before you move on

What does वानरः mean? ("a monkey".) Say it once more.

48.5 हंसः (haṁsaḥ) — a goose

Before the last word of the chapter: what did *chāgaḥ* mean, and what did *vānaraḥ* mean?

You'll want to know: हंसः

हंसः (*haṁsaḥ*) — "a goose".

हंसः is a goose, and in poetry a swan.

Another secure cousin, as far-travelled as वृकः: Latin *ānser*, Greek *khēn*, German *Gans*, English *goose* and *gander*. The bird held on to its name as faithfully as the wolf did.

In Sanskrit poetry it is the bird that can take milk out of water, so the word came to carry a sense of a mind that sorts things — and दुग्धम् is already yours to put beside it. Ends in -अः.

What you've built

Five animals: a lion, a wolf, a goat, a monkey, a goose.

Your turn

- *Say it: haṁsaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *siṁhaḥ* and *haṁsaḥ* together
- *Recall:* say *tāpaḥ*
- *Read it:* तलम्

Before you move on

What does हंसः mean? ("a goose".) Say it once more.

Chapter 49

Five Small Answers

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say then, as, only, again and again and oh in Sanskrit, and use any of the five on its own as a reply.
>
> *Complete SA-C49-oh and demonstrate the chapter promise.*

49.1 तर्हि (tarhi) — then, in that case

Before the new word: what did *haṁsaḥ* mean?

You'll want to know: तर्हि

तर्हि (*tarhi*) — "then, in that case".

तर्हि — "then, in that case".

Said on its own it answers a condition. Somebody tells you how matters stand; तर्हि is your "then, all right".

It is built on the same *t*- that points for you in तत् and in तत्र. Those two point at a thing and at a place; तर्हि points at a moment — at that time, and so, therefore.

The word, taken apart — its roots and family

Tarhi is built on the pointing base *ta*-, the base of *tat* (MW, CDIAL 5730). It is the partner of *yarhi*, "when", in the same way that *tathā* partners *yathā*.

What you've built

A one-word answer to how things stand.

Your turn

- *Say it: tarhi*
- *Say it:* it once more, slowly
- *Say it: haṁsaḥ*, then *tarhi*
- *Recall:* say *bhittiḥ*
- *Read it:* सिंहः

Before you move on

What does तर्हि mean? ("then, in that case".) Say it once more.

49.2 यथा (yathā) — as, in the way that

Before the new word: what did *tarhi* mean?

You'll want to know: यथा

यथा (*yathā*) — "as, in the way that".

यथा — "as, in the way that".

You already say तथा, "so, in that way". यथा is its partner, and the two travel together: *yathā … tathā*, "as ... so". Holding one of the pair, you now hold both.

Said back to somebody on its own, it works as "just so, as you say" — an agreement rather than a description.

The word, taken apart — its roots and family

Yathā is built from the relative base *ya-*, "which", with the manner ending *-thā* that also ends *tathā* (MW, CDIAL 10407).

What you've built

The other half of a pair you already had half of.

Your turn

- *Say it: yathā*
- *Say it:* it once more, slowly
- *Say it: tarhi*, then *yathā*
- *Read it:* वातायनम्
- *Recall:* say *vṛkaḥ*

Before you move on

What does यथा mean? ("as, in the way that".) Say it once more.

49.3 केवलम् (kevalam) — only, merely

Before the new word: what did *yathā* mean?

You'll want to know: केवलम्

केवलम् (*kevalam*) — "only, merely".

केवलम् — "only, merely, nothing but".

Put it in front of what you are naming and it narrows the claim: केवलम् दुग्धम्, "only milk". It is the ordinary Sanskrit "only", not a poetic one.

It also stands alone. Asked how much of a thing there is, केवलम् on its own is a complete and slightly rueful answer.

The word, taken apart — its roots and family

Kevalam is the adverb of *kevala*, "exclusively one's own, alone", already in the Rigveda (MW). Its origin is unclear: MW gives no root for it. Gujarati *kevaḷ* keeps it (CDIAL 3470).

What you've built

A word that narrows whatever it stands in front of.

Your turn

- *Say it: kevalam*

- *Say it:* it once more, slowly
- *Say it:* *yathā*, then *kevalam*
- *Recall:* say *sopānam*
- *Read it:* छागः

Before you move on

What does केवलम् mean? ("only, merely".) Say it once more.

49.4 मुहुः (muhuḥ) — again and again

Before the new word: what did *kevalam* mean?

You'll want to know: मुहुः

मुहुः (*muhuḥ*) — "again and again".

मुहुः — "again and again, over and over".

You have पुनः for "again", meaning one more time. मुहुः is the stronger one: not once more but repeatedly, and doubled as *muhur muhuḥ* it is stronger still.

It belongs with *muhūrta*, a short measured stretch of time. The picture underneath is a thing happening moment after moment after moment.

The word, taken apart — its roots and family

Muhuḥ is the Vedic adverb *muhur*, "suddenly, in a moment", built on the root √muh, "to be dazed", under which MW files it. MW suggests it first meant "bewilderingly"; *muhūrta*, "a moment", stands next to it in that entry.

What you've built

A stronger "again" than the one you had.

Your turn

- *Say it:* *muhuḥ*
- *Say it:* it once more, slowly

- *Say it: kevalam*, then *muhuḥ*
- *Read it:* स्तम्भः
- *Recall:* say *vānaraḥ*

Before you move on

What does मुहुः mean? ("again and again".) Say it once more.

49.5 अहो (aho) — oh!

Before the last word of the chapter: what did *kevalam* mean, and what did *muhuḥ* mean?

You'll want to know: अहो

अहो (*aho*) — "oh!".

अहो — "oh!".

It is the sound of being struck by something: delight, surprise or dismay, with the tone deciding which. अहो on its own is a whole reply, and one of the few you can give without knowing what comes next.

It is an exclamation rather than a word with parts, which is why there is no history to trace under it. Sanskrit wrote its exclamations down, and this one is recorded by Pāṇini and all through the epics.

The word, taken apart — its roots and family

Aho is an exclamation of joy or painful surprise, recorded by the grammarian Pāṇini and in the epics (MW, CDIAL 996).

What you've built

Five more replies: then, as, only, again and again, and oh.

Your turn

- *Say it: aho*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *tarhi* and *aho* together

- *Recall:* say *talam*
- *Read it:* हंसः

Before you move on

What does अहो mean? ("oh!".) Say it once more.

Chapter 50

Sound and Song

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a sound, a question, the voice, a song and a verse in Sanskrit.
>
> *Complete SA-C50-verse and demonstrate the chapter promise.*

50.1 शब्दः (śabdaḥ) — a sound

Before the new word: what did *aho* mean?

You'll want to know: शब्दः

शब्दः (*śabdaḥ*) — "a sound".

शब्दः is a sound, and by an easy stretch a word said aloud.

This one has been handed to you three times without ever being named. *kāla-śabdāḥ* were the time ones; *ka-śabdāḥ* were the question ones; *saṅkhyā-śabdāḥ* were the number ones. The *-śabdāḥ* ending each of those three names is this very word, said of more than one thing at a time.

So you have been reading it since long before this page. Now the piece itself is yours. Ends in **-अः**.

The word, taken apart — its roots and family

Śabda is already in the Śatapatha Brāhmaṇa. MW suggests a link with the root √śap, and CDIAL 12298 marks the same root with a question mark, so its origin is not settled.

What you've built

The piece three earlier names were built out of.

Your turn

- *Say it: śabdaḥ*
- *Say it:* it once more, slowly
- *Say it: aho*, then *śabdaḥ*
- *Recall:* say *siṁhaḥ*
- *Read it:* तर्हि

Before you move on

What does शब्दः mean? ("a sound".) Say it once more.

50.2 प्रश्नः (praśnaḥ) — a question

Before the new word: what did *śabdaḥ* mean?

You'll want to know: प्रश्नः

प्रश्नः (*praśnaḥ*) — "a question".

प्रश्नः is a question: the thing asked, rather than the asking of it.

You already say पृच्छति, "asks". प्रश्नः stands on that same root, held still as a thing instead of running as an action — and the pair is worth saying together, because Sanskrit does this everywhere.

The root reaches a long way west: Latin *precārī*, "to beg", behind English *pray* and *precarious*, and German *fragen*, "to ask". Ends in -अः.

What you've built

The asking, and the thing asked, from one root.

Your turn

- *Say it: praśnaḥ*
- *Say it:* it once more, slowly

- *Say it: śabdaḥ*, then *praśnaḥ*
- *Read it:* वृकः
- *Recall:* say *yathā*

Before you move on

What does प्रश्नः mean? ("a question".) Say it once more.

50.3 वाणी (vāṇī) — the voice

Before the new word: what did *praśnaḥ* mean?

You'll want to know: वाणी

वाणी (*vāṇī*) — "the voice".

वाणी is the voice: speech as a thing heard, rather than speech as a thing meant.

It rests on a piece meaning "to sound". Beside शब्दः, which is any sound at all, वाणी is the sound a person makes on purpose.

Capitalised, *Vāṇī* is a name of the goddess of speech, so the word carries a good deal more weight in poetry than its plain sense suggests. Feminine, ending in *-ī*.

The word, taken apart — its roots and family

Vāṇī is already in the Rigveda (MW). CDIAL 11490 compares the grammarians' root *vaṇ*, "to sound", and possibly *varṇa*, but its source is not settled.

What you've built

A sound narrowed down to the human one.

Your turn

- *Say it: vāṇī*
- *Say it:* it once more, slowly
- *Say it: praśnaḥ*, then *vāṇī*

- *Recall:* say *chāgaḥ*
- *Read it:* केवलम्

Before you move on

What does वाणी mean? ("the voice".) Say it once more.

50.4 गीतम् (gītam) — a song

Before the new word: what did *vāṇī* mean?

You'll want to know: गीतम्

गीतम् (*gītam*) — "a song".

गीतम् is a song: the thing sung.

It stands on *gai*, "to sing". The *Bhagavad Gītā* is this same word wearing a feminine ending — "the song", and nothing more mysterious than that.

No secure western cousin has been agreed for it, but it kept its ground at home: Hindi and Punjabi *gīt* are still the everyday word for a song. Neuter, ending in -अम्.

The word, taken apart — its roots and family

Gīta is the past participle of the root √gai, "to sing": "what is sung" (MW, CDIAL 4167).

What you've built

What the voice does when it is not talking.

Your turn

- *Say it:* *gītam*
- *Say it:* it once more, slowly
- *Say it:* *vāṇī*, then *gītam*
- *Read it:* वानरः
- *Recall:* say *muhuḥ*

Before you move on

What does गीतम् mean? ("a song".) Say it once more.

50.5 श्लोकः (*ślokaḥ*) — a verse

Before the last word of the chapter: what did *vāṇī* mean, and what did *gītam* mean?

You'll want to know: श्लोकः

श्लोकः (*ślokaḥ*) — "a verse".

श्लोकः is a verse: two lines, balanced against each other.

Its older sense is "sound, and what is heard of a person" — fame, in other words. So a verse is named as a thing that carries a sound outward. Beside शब्दः, which is any sound, श्लोकः is a sound cut to a shape that can be remembered.

Nearly the whole of the long Sanskrit story-poems is in this one shape, which is how the word came to mean the shape as well as the fame. Ends in -अः.

The word, taken apart — its roots and family

Śloka first meant a sound, then what is heard of a person, and then a stanza; MW and CDIAL 12748 connect it with the root √śru, "to hear". The Rāmāyaṇa's story that it began as *śoka*, "grief", is one MW calls fanciful.

What you've built

Five things the ear takes in: a sound, a question, the voice, a song, a verse.

Your turn

- *Say it: ślokaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *śabdaḥ* and *ślokaḥ* together
- *Recall:* say *haṁsaḥ*

- *Read it:* अहो

Before you move on

What does श्लोकः mean? ("a verse".) Say it once more.

Chapter 51

More of the Family

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a husband, a wife, a grandfather, a grandmother and a mother's brother in Sanskrit.
>
> *Complete SA-C51-uncle and demonstrate the chapter promise.*

51.1 पतिः (patiḥ) — a husband

Before the new word: what did *ślokaḥ* mean?

You'll want to know: पतिः

पतिः (*patiḥ*) — "a husband".

पतिः is a husband, and more widely the master of a household.

It is one of the oldest words the family holds: Latin *potis*, "able, in command", behind English *possible* and *power*, and Greek *posis*, a husband. The *-pati* that ends a great many Indian names and titles is this word doing the same work.

Beside *kuṭumbam*, the household you can already name, पतिः is the one who answers for it. Ends in *-iḥ*.

What you've built

One end of a household, named.

Your turn

- *Say it: patiḥ*
- *Say it:* it once more, slowly
- *Say it: ślokaḥ*, then *patiḥ*
- *Recall:* say *tarhi*
- *Read it:* शब्दः

Before you move on

What does पतिः mean? ("a husband".) Say it once more.

51.2 पत्नी (patnī) — a wife

Before the new word: what did *patiḥ* mean?

You'll want to know: पत्नी

पत्नी (*patnī*) — "a wife".

पत्नी is a wife, the mistress of the household.

It is पतिः with a feminine ending laid on it, and the two have travelled together since before Sanskrit was Sanskrit: Greek *potnia*, "lady", is the very same formation made in the very same way.

So the second word costs almost nothing once the first is yours. Feminine, ending in *-ī*.

What you've built

The pair that a household is built on.

Your turn

- *Say it: patnī*
- *Say it:* it once more, slowly
- *Say it: patiḥ*, then *patnī*
- *Read it:* यथा

- *Recall:* say *praśnaḥ*

Before you move on

What does पत्नी mean? ("a wife".) Say it once more.

51.3 पितामहः (pitāmahaḥ) — a grandfather

Before the new word: what did *patnī* mean?

You'll want to know: पितामहः

पितामहः (*pitāmahaḥ*) — "a grandfather".

पितामहः is a grandfather — and, precisely, the father's father.

Both halves are already yours. पिता is the father, and महत् is big; the ending shifts a little in the joining, but the sense does not. A grandfather is the great father.

Sanskrit keeps the two sides of a family apart, so this word does not stretch to the mother's side. Ends in -अः.

The word, taken apart — its roots and family

Pitāmaha is built from *pitā*, "father", and *maha*, "great", a Vedic adjective beside *mahat* (MW): the great father. It is already in the Atharvaveda.

What you've built

A new word made of two old ones.

Your turn

- *Say it: pitāmahaḥ*
- *Say it:* it once more, slowly
- *Say it: patnī*, then *pitāmahaḥ*
- *Recall:* say *kevalam*
- *Read it:* वाणी

Before you move on

What does पितामहः mean? ("a grandfather".) Say it once more.

51.4 मातामही (mātāmahī) — a grandmother

Before the new word: what did *pitāmahaḥ* mean?

You'll want to know: मातामही

मातामही (*mātāmahī*) — "a grandmother".

मातामही is a grandmother — and, precisely, the mother's mother.

It is built exactly as पितामहः is, with माता standing in front instead of पिता. Having watched the joining once, you can read this one before it is explained.

The pair also shows the line Sanskrit draws down the middle of a family: one word for each side, and no word covering both. Feminine, ending in *-ī*.

The word, taken apart — its roots and family

Mātāmahī is built from *mātā*, "mother", and *mahī*, the feminine of *maha*, "great" (MW), exactly as *pitāmaha* is.

What you've built

The same joining, worked a second time.

Your turn

- *Say it:* *mātāmahī*
- *Say it:* it once more, slowly
- *Say it:* *pitāmahaḥ*, then *mātāmahī*
- *Read it:* मुहुः
- *Recall:* say *gītam*

Before you move on

What does मातामही mean? ("a grandmother".) Say it once more.

51.5 मातुलः (mātulaḥ) — a mother's brother

Before the last word of the chapter: what did *pitāmahaḥ* mean, and what did *mātāmahī* mean?

You'll want to know: मातुलः

मातुलः (*mātulaḥ*) — "a mother's brother".

मातुलः is a mother's brother.

Sanskrit has no single word covering both uncles, and this is the one for the mother's side, with माता standing plainly inside it. The line drawn by पितामहः and मातामही is drawn here too.

Latin drew it in the same place: *avunculus* was the mother's brother, and it is the word English wore down into *uncle*. Two languages, one distinction, one border apart. Ends in -अः.

The word, taken apart — its roots and family

Mātula is built from *mātṛ*, "mother" (MW, CDIAL 10009). It lives on as Marathi *māvḷā*, "mother's brother".

What you've built

Five more of a household: a husband, a wife, a grandfather, a grandmother, a mother's brother.

Your turn

- *Say it: mātulaḥ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *patiḥ* and *mātulaḥ* together
- *Recall:* say *aho*
- *Read it:* श्लोकः

Before you move on

What does मातुलः mean? ("a mother's brother".) Say it once more.

Chapter 52

Two Things Joined

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can join two Sanskrit nouns with and, offer a choice between them with or, set one clause against another with but, and deny both with a doubled na.
>
> *Complete SA-R52-joins and say all four joins in order, naming for each one where it stands in the sentence.*

52.1 च (ca) — and

> Two words back: what does *mātāmahī* mean, and who is a *mātulaḥ*? You can now name a great many things one at a time. You cannot yet name two.

You'll want to know: च

च (*ca*) — "and".

One syllable, and until this lesson the track had no way to put two things in one sentence. Everything you have learnt to name — a house, a river, a mother, a moon — you have named alone.

च does not stand between the two things. It stands after the second one.

> अन्नं पानीयं च — *annaṁ pānīyaṁ ca* — **food and water**

English puts *and* in the gap. Sanskrit puts च at the end and leaves the gap empty. Say the phrase again and notice that nothing sits between the

two nouns at all: they stand side by side, and च at the back is what tells you they were a pair.

च can never begin a sentence. A word that must lean on the word before it is called an **enclitic**, and this is Sanskrit's commonest one.

The word, taken apart — its roots and family

Ca is inherited: MW compares Latin *-que* and Greek *te*, which also stand after the word they join (CDIAL 4533).

What you've built

Two things in one sentence, for the first time.

Your turn

- *Recall:* say *mātulaḥ*
- *Read it:* मातामही, then say what it means
- *Hear: annaṁ pānīyaṁ ca*, said once slowly and once at speed
- *Say it: annaṁ pānīyaṁ ca*
- *Read it:* च, and say where in the phrase it stands

Before you move on

What does च mean, and where does it stand? ("And", and after the second thing.) Say "food and water" once more.

52.2 वा (vā) — or

Say "food and water", and then say where च stood in it. Then say *mātulaḥ*, from two chapters back, and who it names.

You'll want to know: वा

वा (*vā*) — "or".

Everything the last lesson said about च is true of वा, unchanged. It is an enclitic; it goes after the second item; it cannot open a sentence.

पानीयं क्षीरं वा — *pānīyaṁ kṣīraṁ vā* — **water or milk**

So the two words share one slot, and swapping them swaps the meaning of the whole phrase without moving anything else:

पानीयं क्षीरं च — water **and** milk

पानीयं क्षीरं वा — water **or** milk

That is worth pausing on. In English *and* and *or* are two different words in the same middle position. In Sanskrit they are two different words in the same **final** position, and the sentence around them does not shift at all.

The word, taken apart — its roots and family

Vā is inherited too: MW compares Latin *-ve*, "or", which is also an enclitic and never opens a sentence (CDIAL 11466).

What you've built

Both halves of the joining pair: च for both, वा for either.

Your turn

- *Say it: pānīyaṁ kṣīraṁ vā*
- *Say it:* the same two nouns with च instead, and say what changed
- *Read it:* पानीयं क्षीरं वा, then say what it means

Before you move on

Which of च and वा means "or"? Say "water or milk".

52.3 किन्तु (kintu) — but

Say "water or milk". Then say what किम् means on its own.

You'll want to know: किन्तु

किन्तु (*kintu*) — "but".

Look at it before you use it. It is किम् — the question word you have held since your first questions — welded to the small particle तु, "however". *What-however*. Sanskrit built its "but" out of a question and a shrug.

And here is the thing that matters for using it: **किन्तु is not an enclitic.** Unlike च and वा it does not lean backwards. It stands at the **front** of the clause it contradicts.

> बालः गच्छति किन्तु गुरुः न गच्छति
>
> *bālaḥ gacchati kintu guruḥ na gacchati*
>
> **the boy goes, but the teacher does not go**

Three joining words, two different habits. Say the rule to yourself once: च and वा go last, किन्तु goes first.

The word, taken apart — its roots and family

Kintu is built from *kim*, "what", and the particle *tu*, "but"; MW lists *kiṃ-tu* under *kim* as "but, however, nevertheless".

What you've built

Three joins: add, offer, contradict.

Your turn

- *Say it: bālaḥ gacchati kintu guruḥ na gacchati*
- *Read it:* किन्तु, and find the किम् inside it
- *Contrast:* वा at the end of its phrase, किन्तु at the front of its clause

Before you move on

What does किन्तु mean, and where does it stand? ("But", and first.) Say the boy-and-teacher sentence once more.

52.4 न ... न (na ... na) — neither ... nor

> Where does किन्तु stand in its clause? And what does न mean on its own?

Grammar Lens: the fourth join needs no new word

You have had न since the very first chapter. Said once it denies one thing. **Said twice, once before each item, it denies both.**

न अन्नं न पानीयम्

na annaṁ na pānīyam

neither food nor water

There is no new vocabulary here at all. The join is made out of repetition, which is why Sanskrit never needed a word like English *neither*.
Set the four joins of this chapter side by side and the pattern in their positions is the whole lesson:

join	meaning	where it stands
च	and	after the second item
वा	or	after the second item
किन्तु	but	first in its clause
न ... न	neither … nor	before each item

Three positions, four joins. Nothing else about the sentence moves.

What you've built

Every basic join: both, either, contrary, and neither.

Your turn

- *Say it: na annaṁ na pānīyam*
- *Say it: bālaḥ na khādati* — the boy does not eat — then double the न to deny both nouns
- *Read it:* न अन्नं न पानीयम्, then say what it means

Before you move on

How does Sanskrit say "neither … nor"? (न before each item.) Say "neither food nor water".

52.5 च · वा · किन्तु · न ... न — the four joins

Name the two joins that stand after the second item.

What you've built

Before this chapter every Sanskrit sentence you could build named exactly one thing. Four small words later you can name two, offer a choice between them, set one against the other, and refuse both. None of the four changed anything else in the sentence. That is the point worth carrying: Sanskrit joins by **placing a particle**, not by rearranging what is already there. When you meet the longer joins later — the ones that link whole clauses rather than nouns — they will behave the same way.

Your turn

- *Say it: annaṁ pānīyaṁ ca*, then *annaṁ pānīyaṁ vā*, and say what changed
- *Say it: pānīyaṁ kṣīraṁ vā*
- *Say it: na annaṁ na pānīyam*
- *Recall:* which of the four stands FIRST in its clause

Before you move on

Say all four joins in order, and for each one say where it stands.

Chapter 53

Which One, That One

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can open a clause with a य- word and answer it with the matching त- word, so that two Sanskrit clauses hold together as one sentence.
>
> *Complete SA-R53-correlative and say both correlative sentences, naming for each the axis it joins on.*

53.1 यः (yaḥ) — who, which

> Say the deixis system out loud: the **a-** word for near, the **t-** word for far, the **k-** word that asks. Then say "neither food nor water".

You'll want to know: यः

यः (*yaḥ*) — "who, which".

The deixis lesson taught you that Sanskrit points with three initial letters. अ- points near, त- points far, क- asks. The system was presented as three legs, and it has always had four.

य- is the fourth. It does not point and it does not ask. It **hands the question forward** — it opens a clause and says: hold on, I am about to tell you which one I mean.

> कः — *who?* — I am asking you
>
> यः — *who / the one who* — I am about to tell you

Nothing else about the word is new. Its -ः ending is the masculine ending you have read on नरः, बालः and मार्गः since the place words, and it agrees exactly as those do.

Say the four together, because from here on they behave as one family: अ- · त- · क- · य-.

The word, taken apart — its roots and family

Yaḥ is built on the relative base *ya-*, which is inherited: MW compares the Greek relative *hos*. It lives on as Hindi *jo*, "who, which" (CDIAL 10391).

What you've built

The missing fourth leg of a system you already half knew.

Your turn

- *Say it: kaḥ*, then *yaḥ*, and say which one asks
- *Say it:* the four openings — *a-*, *ta-*, *ka-*, *ya-*
- *Read it:* यः, and name the ending it shares with नरः

Before you move on

What does यः do that कः does not? (It hands the question forward instead of asking it.)

53.2 सः (saḥ) — he, that one

What does यः do? And what does तत् point at?

You'll want to know: सः

सः (*saḥ*) — "he, that one".

You have known तत् since the deixis lesson — the **t-** word that points at something over there. सः is the same pointing word for a **masculine** person or thing: *that man, he, that one.*

The odd part is the स-. Everywhere else in this family the far-pointer is त-: तत्, तत्र, and every other form of the word. Only the masculine and

feminine nominative singulars break out and begin with स- — सः and सा. It is one of the oldest irregularities in the language, and it is inherited rather than invented: Greek's article does exactly the same thing, with *ho* and *hē* beside a *t-* everywhere else.

So the rule to hold is small and strange: **the word is a t- word that starts with स- only when it is the subject.**

The word, taken apart — its roots and family

Saḥ is the inherited pointing pronoun whose other forms run on *ta-*: MW compares Avestan *hō* and the Greek article *ho*, which keep the same *s-* or *h-* in the same two forms.

What you've built

The pointer that will answer यः in the next lesson.

Your turn

- *Say it: saḥ*
- *Say it: yaḥ*, then *saḥ*, and say which one opens and which one answers
- *Read it:* तत् and सः, and say what the two have in common

Before you move on

What does सः mean, and which letter does it begin with only as a subject? ("He, that one", and स-.)

53.3 यः ... सः (yaḥ ... saḥ) — the correlative

Say यः, then सः. Which one opens, and which one answers?

Grammar Lens: two clauses, one hinge

Put the two words in one sentence, each opening its own clause, and you have Sanskrit's entire relative-clause system.

यः गच्छति सः पश्यति

yaḥ gacchati saḥ paśyati

the one who goes, sees

Read it literally and it is stranger and simpler than the English: *which one goes, that one sees.* The य- clause raises a candidate; the त- clause picks it up and says what happens to it.
This is not the English shape with the words translated. English hangs the relative clause off a noun — *the man who goes* — and the clause sits inside the main sentence. Sanskrit sets two whole clauses side by side and pins them together with the य-/त- pair. There is no noun for the clause to hang from and none is needed.
Three consequences, all of which you can check on the sentence above:

1. **The य- clause usually comes first.** English almost always puts the main clause first; Sanskrit almost always puts the relative one first.
2. **Both halves are complete sentences.** *yaḥ gacchati* would stand on its own as "he goes" if यः were सः.
3. **Nothing is subordinated by word order.** The pair of pronouns does all the work, so the halves can be swapped for emphasis without the grammar breaking.

From here, every "the one that…", "whoever…", and "what I said" you will meet in Sanskrit is this same hinge with different endings on it.

What you've built

A sentence with two clauses in it, for the first time in this track.

Your turn

- *Say it: yaḥ gacchati saḥ paśyati*
- *Say it:* it again, and name which half is the y- clause
- *Read it:* यः गच्छति सः पश्यति, then say what it means in English
- *Contrast:* English hangs the clause on a noun; Sanskrit pins two clauses with a pronoun pair

Before you move on

Which clause comes first in Sanskrit, the य- one or the त- one? (The य- one.) Say the sentence once more.

53.4 यत्र ... तत्र (yatra ... tatra) — where ... there

Say the correlative sentence from the last lesson. Then say अत्र and तत्र, and what each one means.

Grammar Lens: the hinge is not about people

यः ... सः joined two clauses through a *person*. Change the pair and the same hinge joins them through a *place*, with no other change at all.

यत्र ग्रामः तत्र मार्गः

yatra grāmaḥ tatra mārgaḥ

where there is a village, there is a road

तत्र is not new — you have had it since the deixis lesson. यत्र is तत्र with the य- opening swapped in, exactly as यः was सः with the same swap. That is the real lesson of this chapter, and it is worth saying plainly: **the correlative is a slot, not a word.** Any त- word you already know has a य- partner, and putting the pair in two clauses joins them:

य- clause opens	त- clause answers	joins by
यः	सः	person
यत्र	तत्र	place

You have met two of these. The pattern that generates them is one you can now recognise anywhere.

What you've built

The same two-clause hinge, on a second axis.

Your turn

- *Say it: yatra grāmaḥ tatra mārgaḥ*

- *Recall:* say तत्र
- *Read it:* यत्र, then say what the swap did
- *Read it:* यत्र ग्रामः तत्र मार्गः, then say what it means

Before you move on

How do you make a य- word from a त- word? (Swap the opening letter.) Say the village-and-road sentence once more.

53.5 य- · त- — the correlative, reviewed

Say यः and सः, and say which one opens its clause.

What you've built

The deixis lesson taught you three pointing letters and called it a system. It was three quarters of one. य- is the fourth, and adding it turns a set of question-and-answer words into a way of building sentences with two clauses in them.
The whole of it fits in one line: **a य- word raises a candidate, and the matching त- word picks it up.**
Everything else in this chapter was that line applied twice — once through a person, once through a place — plus one small irregularity worth keeping: the far-pointer is a त- word that wears स- when it is the subject.

Your turn

- *Say it: yaḥ gacchati saḥ paśyati*
- *Say it: yatra grāmaḥ tatra mārgaḥ*
- *Recall:* name the four openings of the pointing system, in order
- *Contrast:* कः asks, यः hands forward

Before you move on

Say both correlative sentences, and for each one name the axis it joins on — person or place.

Chapter 54

Thus It Was Said

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can close a quoted clause with इति and make a whole Sanskrit sentence the object of a verb of thinking or saying.
>
> *Complete SA-R54-iti and name the two joining mechanisms the track now has, saying which of them subordinates.*

54.1 इति (iti) — thus

Say both correlative sentences — the one who goes, and where the village is. Then say *cintayati* and what it means.

You'll want to know: इति

इति (*iti*) — "thus, so".

Sanskrit has no quotation marks. It has this word instead, and it does the job better than a pair of commas in the air: **इति stands after the quoted words and closes them.**

> **...** इति — *"…" — that is what was said*

Whatever comes before इति is quoted; whatever comes after it is the frame. Everything the frame needs to say — who said it, who thought it, who asked it — comes afterwards, so the reader hears the words first and learns whose they were second.

Two things follow from that, and both are worth knowing before you build a sentence with it:

1. **The quoted words are not changed.** English shifts tense and person when it reports — *he said he was going.* Sanskrit does not. It hands you the words as they were spoken and lets इति mark where they stop.

2. **इति is not a verb and never inflects.** It is the same three letters in every sentence you will ever meet it in.

You have probably met it already without knowing. इत्यादि (*ityādi*) — *"and so on"* — is इति plus आदि, "beginning": *thus, and the rest.* And the closing line of every chapter of a classical text begins इति — *thus ends….*

The word, taken apart — its roots and family

Iti is built on the pronoun base *i-*, "this" (MW, CDIAL 1562): "thus, in this way", pointing back at the words before it.

What you've built

The mark that closes a quotation, in a language with no quotation marks.

Your turn

- *Say it: iti*
- *Read it:* इति, and say which side of it the quoted words sit on
- *Recall:* what इत्यादि is made of

Before you move on

Where do the quoted words stand relative to इति? (Before it.) Say इति once more.

54.2 … इति चिन्तयति — a clause as the object

Say इति, and say which side of it the quoted words sit on.

Grammar Lens: what a thinking verb thinks

चिन्तयति has been in this book since the thinking verb arrived, with nothing to think. Every verb you have used takes a *noun* as its object — you see a house, you eat food. इति lets a verb take a **whole sentence** instead.

बालः गच्छति इति गुरुः चिन्तयति

bālaḥ gacchati iti guruḥ cintayati

the teacher thinks that the boy is going

Take it apart in the order Sanskrit gives it to you:

piece	meaning	job
बालः गच्छति	the boy goes	the clause being thought
इति	thus	the clause ends here
गुरुः चिन्तयति	the teacher thinks	the frame around it

The inner clause is a complete sentence and stays one. Nothing is bent to make it fit inside the outer one — no *that*, no change of ending, no reordering. इति does all the joining by standing between them.
Swap the outer verb and you have every reporting sentence at once: **...** इति वदति (says), **...** इति पृच्छति (asks), **...** इति जानाति (knows). The inner clause never changes.
Compare this with the chapter before. यः **...** सः joined two clauses by putting a pronoun in each. इति joins two clauses by putting one particle at the seam. Two joins, two mechanisms — and neither of them is a conjunction in the English sense.

What you've built

A sentence that reports another sentence.

Your turn

- *Say it: bālaḥ gacchati iti guruḥ cintayati*
- *Say it:* it again, and name where the inner clause stops
- *Read it:* बालः गच्छति इति गुरुः चिन्तयति, then say what it means

- *Contrast:* the correlative puts a pronoun in each clause; इति puts one particle at the seam

Before you move on

Does the inner clause change when it is reported? (No.) Say the teacher-and-boy sentence once more.

54.3 इति — reviewed

Say इति, and say what it does to the words in front of it.

What you've built

Two chapters, two ways of putting two clauses in one sentence, and they work differently on purpose.
The correlative marks **both** clauses — a य- word in one, a त- word in the other — and the clauses stay equals. इति marks **one** seam, and makes the clause in front of it into the object of the verb behind it.
That is the difference between *which one goes, that one sees* and *the teacher thinks that the boy goes.* In the first, neither clause is inside the other. In the second, the whole first clause is what the second one is about.

Your turn

- *Say it: bālaḥ gacchati iti guruḥ cintayati*
- *Say it: yaḥ gacchati saḥ paśyati*
- *Contrast:* which sentence puts one clause INSIDE the other

Before you move on

Name the two joining mechanisms you now have, and say which one subordinates.

Chapter 55

Having Gone, and In Order to Go

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can put two actions in one Sanskrit clause — one finished before the other with -त्वा, or one as the point of the other with -तुम्.
>
> *Complete SA-R55-non-finite and say both endings with one sentence apiece.*

55.1 गत्वा (gatvā) — having gone

Say the teacher-and-boy sentence from the last chapter, and say where the inner clause stops. Then say *gacchati* and what it means.

Grammar Lens: one action finished, the next beginning

Every verb you have used so far has been the main verb of its sentence. Sanskrit has a form that is deliberately **not** the main verb: it names an action that finished before the main one started, and it never changes its ending.
Add **-त्वा** to the root and you have it.

गम् → गत्वा — *having gone*

पठ् → पठित्वा — *having read*

Now chain two actions in one clause, with one subject:

बालः गृहं गत्वा पठति

bālaḥ gṛhaṁ gatvā paṭhati

the boy, having gone home, reads

Three things make this form worth its own lesson:

1. **It carries no person, no number and no tense.** *gatvā* is the same word whoever went and whenever. The main verb at the end of the sentence carries all of that for both actions.
2. **Both actions belong to the same subject.** The boy goes and the boy reads. If the subjects differed, this form could not be used.
3. **It orders the actions.** *gatvā paṭhati* can only mean going first and reading second. English needs a word — *after*, *then* — to fix the order. Sanskrit fixes it with the ending.

This form has no English counterpart at all. *Having gone* is the nearest, and it is stiff in a way गत्वा is not: in Sanskrit this is ordinary, everyday, and extremely common.

What you've built

Two actions in one clause, in the order they happened.

Your turn

- *Say it: gatvā*
- *Say it: bālaḥ gṛhaṁ gatvā paṭhati*
- *Say it: paṭhitvā*, and say which action it puts first
- *Read it:* गत्वा, and name the ending that makes it

Before you move on

What does the -त्वा ending do to a root? (Makes an action that finished before the main one.) Say the boy-goes-home-and-reads sentence.

55.2 गन्तुम् (gantum) — to go

Say गत्वा and what its ending does. Which of the two actions in *gṛhaṁ gatvā paṭhati* happened first?

Grammar Lens: the form that names the action itself

-त्वा put an action *before* another one. **-तुम्** does something different: it names the action without placing it in time at all.

गम् → गन्तुम् — *to go*

पठ् → पठितुम् — *to read*

Used on its own it says why:

बालः पठितुम् गच्छति

bālaḥ paṭhitum gacchati

the boy goes in order to read

Set the pair side by side and the division of labour is clean:

form	ending	what it does
गत्वा	-त्वा	an action finished before the main one
गन्तुम्	-तुम्	the action named, with no time of its own

Now the part that is worth stopping for. Latin has a form called the **supine**, used after verbs of motion to say why you went — and it ends in **-tum**: *īre dormītum*, "to go to sleep"; *spectātum venīre*, "to come to watch". That is the same ending, in the same job, inherited from the same ancestor. Not a borrowing and not a coincidence: Sanskrit **-तुम्** and Latin *-tum* are one suffix, split apart before either language existed.

What you've built

Both non-finite forms, and a reason to go somewhere.

Your turn

- *Say it: gantum*
- *Say it: bālaḥ paṭhitum gacchati*
- *Contrast: paṭhitvā gacchati* and *paṭhitum gacchati*, and say what each one means
- *Read it:* गन्तुम्, and name the Latin ending it matches

Before you move on

Which ending names the action itself, -त्वा or -तुम्? Say "the boy goes in order to read".

55.3 -त्वा · -तुम् — the two endings, reviewed

Say गत्वा and गन्तुम्, and say which one puts its action first.

What you've built

Both of these endings do the same large thing: they let a sentence hold **two actions with one finite verb**. Everything about person, number and tense is carried by the verb at the end; the extra action rides along uninflected.
That is why they matter more than their size suggests. Until this chapter a Sanskrit sentence in this book had exactly one action in it, unless two clauses were pinned together with a pronoun pair or with इति. From here a single clause can carry two.
Keep the contrast, because it is the only thing you have to choose between:

- -त्वा — the action **happened first**
- -तुम् — the action is **the point of the other one**

Your turn

- *Say it: bālaḥ gṛhaṁ gatvā paṭhati*
- *Say it: bālaḥ paṭhitum gacchati*

- *Contrast:* say which sentence has the reading happen first
- *Recall:* the Latin ending that matches **-तुम्**

Before you move on

Say both endings and, for each, one sentence that uses it.

Chapter 56

What Happened Yesterday

Modes: **voice** (2) **eyes** (1) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can put a Sanskrit verb into the past by prefixing the augment and shortening the ending, and finally say what happened yesterday.
>
> *Complete SA-R56-past and build the past of a verb nobody has shown you in the past.*

56.1 अगच्छत् (agacchat) — he went

Say ह्यः, and what it means. Then say *gacchati*. You have had the word for yesterday since the time words and no verb to put in it.

Grammar Lens: two changes, and the present becomes the past

This is the largest hole in the book so far, and it closes with two small changes to a verb you already say.

> गच्छति — *he goes*
>
> अगच्छत् — *he went*

Put अ- on the front. Cut the ending from -ति back to -त्. That is the whole operation.
The **अ-** on the front has a name — the **augment** — and it does one job: it says *this happened before now*. It carries no person and no

number. It is a single syllable meaning "past", glued to the front of the verb.
Now put it with the word you have been holding all that time:

> ह्यः बालः अगच्छत्
>
> *hyaḥ bālaḥ agacchat*
>
> **yesterday the boy went**

That sentence was impossible one page ago. Not difficult — **impossible**: the track had a word for yesterday and no verb form that could stand in it.
Here is the part that makes the augment worth remembering. **Greek does exactly the same thing.** Greek *lúei* is "he loosens"; *élue* is "he was loosening" — the same **e-** on the front, in the same job. Two branches of the family, two thousand miles and two alphabets apart, marking the past by prefixing one vowel. Neither borrowed it. Both inherited it.

What you've built

The past tense, and a use at last for ह्यः.

Your turn

- *Say it: gacchati*, then *agacchat*
- *Say it: hyaḥ bālaḥ agacchat*
- *Read it:* अगच्छत्, and point at the two things that changed
- *Recall:* the Greek prefix that does the same job

Before you move on

What two changes turn गच्छति into अगच्छत्? (अ- on the front, -ति cut to -त्.) Say "yesterday the boy went".

56.2 अपठत् · अखादत् — the same two changes, on any verb

Turn गच्छति into the past out loud, and name the two things you changed.

Grammar Lens: it is a rule, not a word

अगच्छत् was not a new word to memorise. It was गच्छति with a rule applied, and the rule applies to every verb of its class in the same way.

present	past	meaning
गच्छति	अगच्छत्	goes / went
पठति	अपठत्	reads / read
खादति	अखादत्	eats / ate

Read down the middle column and the shape is identical every time: अ- in front, -त् at the back, the stem untouched in between.

बालः अन्नम् अखादत्

bālaḥ annam akhādat

the boy ate the food

This is the first time in this book that learning one verb form has given you several. Up to now each verb arrived as its own word. From here, every first-class present you already hold has a past you can build without being told it.
A caution worth having, said once and not laboured: Sanskrit has more than one past tense, and the classical language uses others too. This one — the **imperfect** — is the one a beginner meets first, forms most easily, and reads most often in narrative.

What you've built

A past for every first-class verb you already say.

Your turn

- *Say it: paṭhati*, then *apaṭhat*
- *Say it: khādati*, then *akhādat*

- *Say it: bālaḥ annam akhādat*
- *Read it:* अपठत्, and say which verb it came from

Before you move on

Build the past of खादति without being told it. Say "the boy ate the food".

56.3 अ- ... -त् — the past, reviewed

Say ह्यः, then say "yesterday the boy went".

What you've built

Three time words have been sitting in this book waiting for a verb.

- ह्यः — yesterday, from the time words
- अद्य — today, from the time words
- श्वः — tomorrow, learnt with your first farewell

Until this chapter only one of the three could be used: अद्य, with the present. The other two named times the language could not talk about. अद्य and the present, ह्यः and the past — two of the three now work, and the third waits on a tense this book has not reached. That is worth naming plainly rather than glossing over. A track can teach a word and leave it unusable, and the only way to notice is to check what the learner can actually build with it.

Your turn

- *Say it: adya bālaḥ gacchati* — today the boy goes
- *Say it: hyaḥ bālaḥ agacchat* — yesterday the boy went
- *Contrast:* the two sentences, and name every difference between them
- *Recall:* build the past of पठति and of खादति

Before you move on

Say the two changes that make a past, and use them on a verb nobody has shown you in the past.

Chapter 57

Able, and Willing

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can say what somebody is able to do and what they want to do, by putting the -तुम् form in front of शक्नोति or इच्छति.
>
> *Complete SA-C57-icchati and say both frames — the boy can read, and the boy wants to read.*

57.1 शक्नोति (śaknoti) — is able

> Build the past of पठति. Then say गन्तुम् and what its ending does.

You'll want to know: शक्नोति

शक्नोति (*śaknoti*) — "is able, can".

Until now this book could say what somebody does and, since last chapter, what they did. It could not say what they **could** do.

शक्नोति takes the -तुम् form as its object — which is why it arrives two chapters after that ending and not before:

> बालः गन्तुं शक्नोति
>
> *bālaḥ gantuṁ śaknoti*
>
> **the boy can go**

Read the Sanskrit literally and it says *the boy is-able to-go.* English puts *can* in front of a bare verb; Sanskrit puts शक्नोति at the end after an infinitive. Same idea, opposite order, and the infinitive is the piece that makes it possible.

You already know a word from this root without knowing it: शक्ति (*śakti*), "power, capacity" — the same शक्, made into a noun. English borrowed that one whole.

(The म् of गन्तुम् is written ं here — *gantuṁ* — because a following consonant softens it. You have read that mark since the asking verb.)

The word, taken apart — its roots and family

Śaknoti is the present of the root √śak, "to be able", with the nasal syllable *-no-* (MW). It lives on as Hindi *saknā*, "to be able" (CDIAL 12252).

What you've built

Ability: what somebody is able to do, not merely what they do.

Your turn

- *Say it: śaknoti*
- *Say it: bālaḥ gantuṁ śaknoti*
- *Say it:* the same sentence with *paṭhitum* instead, and say what it now means
- *Read it:* शक्नोति, and name the noun English borrowed from its root

Before you move on

What form does शक्नोति take as its object? (The -तुम् form.) Say "the boy can go".

57.2 इच्छति (icchati) — wants

Say "the boy can go". Which of the two words in it is the -तुम् form?

You'll want to know: इच्छति

इच्छति (*icchati*) — "wants, wishes".

There is nothing new to learn about the frame. It is the frame you built one lesson ago, with a different verb at the end of it:

> बालः पठितुम् इच्छति
>
> *bālaḥ paṭhitum icchati*
>
> **the boy wants to read**

Compare the pair and the shape holds still while the meaning turns:

sentence	meaning
बालः पठितुम् शक्नोति	the boy **can** read
बालः पठितुम् इच्छति	the boy **wants to** read

That is what makes the **-तुम्** form worth the lesson it got two chapters back. It is not one construction; it is a socket, and ability and desire are the first two things to plug into it.

The root is इष्, "to seek" — and the noun it makes is one you may have met in English writing about India: इच्छा (*icchā*), "wish, desire".

The word, taken apart — its roots and family

Icchati is the present of the root √iṣ, "to seek, wish" (CDIAL 1556). It is inherited: MW compares Old English *āscian*, the ancestor of English **ask**, and Russian *iskat'*, "to seek".

What you've built

Desire, in the frame you already had.

Your turn

- *Say it: bālaḥ paṭhitum icchati*
- *Contrast:* the same sentence with *śaknoti*, and say what changed
- *Read it:* इच्छति, then say what it means

Before you move on

Say “the boy wants to read”, then say “the boy can read”.

Chapter 58

What Pleases Me

Modes: **voice** (2) **eyes** (1) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can say what I like in Sanskrit, putting myself in the dative and the thing I like in the nominative as the subject.
>
> *Complete SA-R58-likes and say all three frames, naming the subject of each.*

58.1 मह्यम् (mahyam) — to me, for me

Say अहम् and what it means. Then recall पुनर्दर्शनाय — what did its -आय ending do?

You'll want to know: मह्यम्

मह्यम् (*mahyam*) — "to me, for me".

You have used the dative case once already, without a pronoun in it. पुनर्दर्शनाय — *for seeing again*, your first farewell — was a noun in the dative, and the ending said "this is what it is **for**".

मह्यम् is that same case, on अहम्. *I* becomes *to me*.

> अहम् — I, the one doing
>
> मह्यम् — to me, the one it is done for

The word looks less like अहम् than you might expect, and that is not irregularity for its own sake: अहम् and मह्यम् come from two different ancient

stems that the language pressed into one pronoun. English does exactly the same — *I* and *me* share no letters either, for the same reason.

On its own मह्यम् is not much. In the next lesson it becomes the whole point, because Sanskrit's ordinary way of saying that you like something puts **you** in this case and the thing you like in the subject.

The word, taken apart — its roots and family

Mahyam is the dative of *aham*, built on the first-person base *ma-* (MW). It is inherited: MW compares Latin *mē*, "me", and *mihi*, "to me".

What you've built

The word for the person something is done to or for.

Your turn

- *Say it:* *aham*, then *mahyam*
- *Say it:* which of the two is the subject, and which is the one receiving
- *Recall:* the chapter-4 word whose ending was the same case
- *Read it:* मह्यम्, then say what it means

Before you move on

What does मह्यम् mean, and what case is it? ("To me", the dative.)

58.2 रोचते (rocate) — is pleasing to

Say मह्यम्, and say what case it is in.

Grammar Lens: the thing you like is the subject

Sanskrit has no verb that means "to like" with the liker as its subject. It says something else, and once you see the shape it is easy:

मह्यं फलं रोचते

mahyaṁ phalaṁ rocate

the fruit is pleasing to me — that is, **I like the fruit**

Look at what is doing what:

piece	case	job
मह्यम्	dative	the person who does the liking
फलम्	nominative	the thing liked — and the SUBJECT
रोचते	verb	agrees with the fruit, not with me

The verb agrees with the thing you like. If two things pleased you, the verb would be plural, and मह्यम् would not change at all. The liker is never the subject of this sentence.

If you have met Spanish, you have met this exact shape: *me gusta la fruta* — the fruit pleases me. Two unrelated branches of Indo-European settled on the same answer, which is a good sign that the English way round is the odd one.

And the root is worth a moment. रुच् means "to shine". *The fruit shines for me* is what the sentence originally said. The same root gives Latin *lūx*, "light", and *lūcēre*, "to shine" — and through Latin it gives English *lucid* and *translucent*. Liking something, in Sanskrit, is that thing lighting up for you.

What you've built

A way to say what you like, with the grammar the language actually uses.

Your turn

- *Say it: mahyaṁ phalaṁ rocate*
- *Say it:* which word the verb agrees with
- *Read it:* मह्यं फलं रोचते, then say what it means in ordinary English
- *Contrast:* English makes the liker the subject; Sanskrit makes the thing liked the subject

Before you move on

In मह्यं फलं रोचते, who is the subject? (The fruit.) Say "I like the fruit" in Sanskrit.

58.3 मह्यं ... रोचते — the liking frame, reviewed

Say "I like the fruit" in Sanskrit, and name the subject of the sentence you said.

What you've built

Three sentences about what a person is able to do, wants to do, and likes — and two of the three share a shape while the third breaks it deliberately.

- बालः पठितुम् शक्नोति — the boy **can** read
- बालः पठितुम् इच्छति — the boy **wants to** read
- मह्यं फलं रोचते — I **like** the fruit

The first two put the person in the nominative and an infinitive before the verb. The third puts the person in the **dative** and makes the liked thing the subject.
That is not an inconsistency to be smoothed over — it is the fact about Sanskrit worth carrying out of this chapter. Ability and desire belong to the person. Pleasing is something the **thing** does.

Your turn

- *Say it: bālaḥ paṭhitum śaknoti*
- *Say it: bālaḥ paṭhitum icchati*
- *Say it: mahyaṁ phalaṁ rocate*
- *Contrast:* name which of the three puts the person in the dative

Before you move on

Say all three sentences, and for each one name who or what the subject is.

Chapter 59

Where You Come From

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name a country, name India, say that somebody is Indian, and answer कुतः with the ablative.
>
> *Complete SA-C59-bharatat and answer* कुतः *out loud, then say that he comes from India.*

59.1 देशः (deśaḥ) — a country

Say कुतः and what it asks. Then say "I like the fruit". You have been able to ask *from where?* since the question words and had nothing to answer it with.

You'll want to know: देशः

देशः (*deśaḥ*) — "a country, a region".

The track has taught you a village, a city, a road and a forest. It has never taught you the largest of the containers, and it is the one a form asks for first.

The word is built on दिश् (*diś-*), "to point out, to show". A देशः began as whatever a pointing hand took in — a stretch of land indicated rather than measured.

That root travelled a long way west. Latin *dīcere*, "to say", and *index*, the pointing finger, grow from the same ancient root as दिश्. The finger you use to show somebody where you are from is the finger the word is named after.

What you've built

The first of three words for saying where you are from.

Your turn

- *Recall:* say *grāmaḥ*, then say कुतः and what it asks
- *Hear: deśaḥ*, said once slowly and once at speed
- *Say it: deśaḥ*
- *Read it:* देशः, then say what it means

Before you move on

What does देशः mean, and which root is it built on? ("A country", and दिश्, to point out.)

59.2 भारतम् (Bhāratam) — India

Say *deśaḥ* and what it means. Then say अस्ति.

You'll want to know: भारतम्

भारतम् (*Bhāratam*) — "India".

A country and the name of one:

भारतं देशः अस्ति — *Bhāratam deśaḥ asti* — **India is a country**

The name is older than any modern country. भरत (*Bharata*) is a figure the Sanskrit epics name, and भारत is the form built from it meaning "belonging to Bharata" — the land of his people. The great epic is called the महाभारतम्, and the महा- on the front of it is the महत् you learnt in the adjectives: *the great [story] of the Bharatas.*

English *India* took an entirely different road. It came through Greek and Persian from सिन्धु (*Sindhu*), the river — the same word that gives *Sindh* and, by a further turn, *Hindu.* So one country carries two names that began as two different things: a people and a river.

What you've built

A country, and the name of one.

Your turn

- *Say it: Bhāratam*
- *Say it: Bhārataṁ deśaḥ asti*
- *Read it:* देशः, then say what it means
- *Read it:* महाभारतम्, and find the महा- you already know inside it

Before you move on

What is भारतम्, and where does the name come from? (India, from भरत.) Say "India is a country".

59.3 भारतीयः (bhāratīyaḥ) — Indian

Say भारतम्. Then recall the adjective rule: where does an adjective stand, and what does it do to match its noun?

You'll want to know: भारतीयः

भारतीयः (*bhāratīyaḥ*) — "Indian".

A country name is a noun. Saying that a **person** belongs to it needs an adjective, and Sanskrit makes one with a suffix you can now watch working:

भारतम् → भारतीयः — *of Bhārata, Indian*

सः भारतीयः — *saḥ bhāratīyaḥ* — **he is Indian**

The piece that does the work is the *-īya* suffix, and you can see it in the word: the ी after भारत, then य, then the masculine -ः. It is a machine, not a one-off. Give it a place and it gives you the adjective for belonging to that place, and the ending then agrees with whoever you are describing exactly as महत् and नव do.

Notice what the sentence does **not** have. There is no अस्ति in it. Sanskrit can leave the *is* out when its only work is to link two things, and here it

does — *he, Indian.* You have seen that before in न चिन्ता; this is the same economy.

The word, taken apart — its roots and family

Bhāratīya is built from *bhārata* with the suffix *-īya*, "belonging to". MW records the word only as the name of a book, so its everyday sense, "Indian", is a modern use of an old pattern.

What you've built

A country, its name, and the word for somebody who belongs to it.

Your turn

- *Say it: bhāratīyaḥ*
- *Say it: saḥ bhāratīyaḥ*
- *Recall:* say भारतम्, then build the adjective from it out loud
- *Read it:* भारतीयः, and find the ी and the य that build it

Before you move on

What suffix turns a place into "belonging to that place"? (*-īya.*)
Say "he is Indian".

59.4 भारतात् (Bhāratāt) — from India

Say कुतः. Then say "he is Indian".

Grammar Lens: the ending that answers the question

कुतः has been in this book since the question words asking *from where?* and until now the book had no way to answer it. Naming the country was only half the fix. The other half is an ending.

कुतः? — *from where?*

भारतात्। — *from India.*

The **-आत्** is the **ablative** — the case whose one job is *away from.* Put it on a place and the place becomes a starting point:

word	ending	meaning
भारतम्	-अम्	India
भारतात्	-आत्	from India
देशात्	-आत्	from the country

And in a whole sentence, with the come-verb you already hold:

> सः भारतात् आगच्छति
>
> *saḥ Bhāratāt āgacchati*
>
> **he comes from India**

This is the pattern to keep, because it is how Sanskrit answers most questions of place: **the question word carries the sense, and the answer carries the case.** कुतः itself ends in **-तः**, which is the same *away-from* meaning frozen onto a question word — the question is built out of the answer's grammar.

What you've built

An answer to a question this book has been asking for forty chapters.

Your turn

- *Say it: kutaḥ?* — then answer it: *Bhāratāt*
- *Say it: saḥ Bhāratāt āgacchati*
- *Say it: deśāt*, and say what it means
- *Read it:* भारतात्, and name the ending that makes it "from"

Before you move on

Which ending means "from"? (**-आत्**.) Answer कुतः out loud.

Chapter 60

The Stick at the End

Modes: ✓ **pen** (1) 🚗 **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can read and write the daṇḍa that ends a Sanskrit sentence, and say what classical Sanskrit punctuates with instead of the marks English uses.
>
> *Complete SA-C60-danda and say what a single stroke marks and what a doubled one marks.*

60.1 । — the daṇḍa

> Answer कुतः out loud. You have been reading Sanskrit sentences for fifty-nine chapters. Nobody has told you how one ends.

Script: the whole of Sanskrit punctuation

। — the **daṇḍa**, "the stick".

One vertical stroke, drawn from the headline down. It marks the end of a sentence, and it is very nearly the entire punctuation system of classical Sanskrit.

> सः भारतात् आगच्छति।
>
> यः गच्छति सः पश्यति।

Doubled — ॥ — it closes a verse, and the pair of strokes is what you see at the end of every line of a printed śloka.

What is worth noticing is everything the list does **not** contain. Classical Sanskrit has no comma, no colon, no brackets, no quotation marks, no question mark and no exclamation mark. Where English reaches for punctuation, Sanskrit reaches for a word: you met इति two chapters ago closing a quotation that no quotation mark was ever going to close, and किम् at the front of a sentence does the work of a question mark.

That is not a gap in the writing system. It is a different division of labour — the grammar carries what the marks carry in English, and one stick is enough for the rest.

Writing: ।

- **1.** draw a single vertical stroke top-to-bottom, the height of a letter, immediately after the last letter of the sentence

Pen lifts: 0. The stroke is one movement and there is nothing to add to it.

Your turn

- *Look:* at this, and find the mark that ends it

  यः गच्छति सः पश्यति।

- *Trace it:* । three times

Chapter 61

The Turning Season

Modes: 🚗 **voice** (1) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can name a season in Sanskrit and write the independent vowel ऋ that its name begins with.
>
> *Complete SA-S225-letter-vocalic-r and name the word you already say that begins with ऋ.*

61.1 ऋतुः (ṛtuḥ) — a season

> What does । mark? Then say दिनम् and मासः, and say which names the longer stretch.

You'll want to know: ऋतुः

ऋतुः (*ṛtuḥ*) — "a season".

You have a word for a day. This is the word for the largest division of the year below the year itself — and in India the count is traditionally **six** rather than four.

The word comes from the root ऋ, "to go, to move" — a season is a **turn that comes round**. That is worth holding, because the same root gives one of the most important words in the whole language: ऋतम् (*ṛtam*), the fixed order of things, the way the world turns as it should. A season is one turn of that order.

The far end of that family reaches Latin *artus*, "a joint", which EtymDB lists as a cousin of ऋतुः — a thing fitted in its proper place.

Look: at the first letter. ऋ is the independent vowel *ṛ* — and it is the first word in this book that begins with it. You have written its small form,

the ृ hanging under a consonant, in गृहम् and हृदयम्. This is the full-size letter it becomes when nothing carries it.

The next lesson draws it.

What you've built

A season, and a word that needs a letter you have never been shown whole.

Your turn

- *Hear:* *ṛtuḥ*, said once slowly and once at speed
- *Say it:* *ṛtuḥ*
- *Recall:* say *dinam*, then *māsaḥ*, and place *ṛtuḥ* between them by length
- *Look:* at ऋतुः and at गृहम्, and find the same vowel in two shapes

Before you move on

What does ऋतुः mean, and how many seasons does the Indian count traditionally have? ("A season", and six.)

61.2 ऋ — the independent vowel

Say ऋतुः and what it means. Then find the ृ under the ग in गृहम्.

Script: ऋ

ऋ — *ṛ*.

It is an **independent vowel**: the full-size letter this vowel wears when it opens a word and has no consonant to lean on. You have known its other half for a long time — inside a word the same vowel is the small ृ written under the consonant, which you have been reading in गृहम् and हृदयम् for a long while.

What it is made of:

- a short upper-left shoulder turning into a diagonal hook

- a separate rounded middle body continuing into the lower tail
- a top-to-bottom right stem
- the top shirorekhā

You already say these, and every one of them has ऋ somewhere inside it:

- ऋतुः *ṛtuḥ* — a season

Writing: ऋ

How ऋ is written, stroke by stroke

- **1.** start at the open upper-left tip, sweep right through the short shoulder, then turn down-left through the diagonal hook
- **2.** lift at the middle body's left edge, loop anticlockwise round its little ball, then run down to the right and swing the lower bowl left, round the bottom, and out to the right without lifting
- **3.** lift and draw the right stem top-to-bottom
- **4.** lift and draw the top shirorekhā left-to-right

Pen lifts: 3. The pen comes up 3 times and no more.

Your turn

- *Look:* at this, and find ऋ in it

  ऋतुः

- *Trace it:* ऋ three times, saying *ṛ* as you finish each one
- *Contrast:* the full ऋ at the front of ऋतुः and the small ृ under the ग of गृहम्

Before you move on

Which character is this — ऋ? What sound does it carry? (*ṛ*.) Name the word you already say that begins with it.

Chapter 62

The Ending That Counts

Modes: **voice** (4) **eyes** (2) **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can make a Sanskrit ordinal from a number by putting -ma on it, and I can name the one number between five and ten where that does not work.
>
> *Complete SA-R62-the-ending and run pañcamaḥ to daśamaḥ, then name the number the chapter walked past and why.*

62.1 पञ्चमः (pañcamaḥ) — fifth

A second kind of number word begins here, so the recalls come first, at the four growing distances this book measures.

- *Read it:* ऋ — **R1**, one lesson back
- *Recall:* say *bhāratīyaḥ* — **R2**, five lessons back
- *Recall:* close a quoted thought with *iti* — **R3**, twenty lessons back
- *Recall:* say *sahasā* — **R4**, eighty lessons back

You'll want to know: पञ्चमः

पञ्चमः (*pañcamaḥ*) — "fifth".

You have counted एक द्व त्रि चतुर् पञ्च since chapter six. Those words answer **how many**. This one answers **which one in the line**, and Sanskrit keeps a second set of words for that job.

An ordinal is an ordinary adjective, so it wears the endings you already know: पञ्चमः for a masculine thing, पञ्चमम् for a neuter one.

The word, taken apart — its roots and family

पञ्च + म.
The number is not worn down and not replaced. It stands there whole, and a single syllable goes on the end.
Macdonell's dictionary prints the word with the join marked — *pañca-má* — and it will print four more the same way before this chapter is out.
This lesson does not begin at *first*. It begins at *fifth* because **-म** is the ending that WORKS, and a rule has to be visible before anything can be seen departing from it. The words for *first*, *second* and *third* all depart from it, and they wait.
Pañca itself is inherited: MW compares Latin *quīnque* and English *five*, and the ordinal is as old as the Atharvaveda (CDIAL 7669).

What you've built

One ordinal, and the ending that will make the next four for free.

Your turn

Say these aloud:

- *pañca*, then *pañcamaḥ*
- which of the two answers *how many* — ***pañca***
- the ending that turned one into the other — ***-ma***

Before you move on

What is पञ्च plus **-म**? (पञ्चमः.) Why did this chapter not begin at *first*? (**Because the rule has to be seen before a departure from it can be read as one.**)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 149 (DSAL).

62.2 सप्तमः (saptamaḥ) — seventh

Four recalls, at four distances.

- *Recall:* say the ending that makes an ordinal — **R1**, one lesson back

- *Recall:* say *Bhāratāt* and name the ending that means "from" — **R2**, five lessons back
- *Recall:* say *iti* — **R3**, twenty-two lessons back
- *Recall:* say *prāyaḥ* — **R4**, eighty lessons back

You'll want to know: सप्तमः

सप्तमः (*saptamaḥ*) — "seventh".

Build it before you read it: you have सप्त, and you have **-म**.

सप्त + म. Nothing else changed.

The word, taken apart — its roots and family

Chapter nineteen showed you that सप्त, Latin *septem* and English *seven* are the same word travelling three roads. The ordinal carries the same news one step further.

Latin's seventh is **septimus**. Look at the two endings side by side: Sanskrit **-म**, Latin **-mus**. That is not a coincidence and it is not a borrowing — it is one inherited ordinal ending, worn slightly differently in two mouths.

English went the other way and used a different suffix for all of them, which is why English says *seven-th* where Latin says *septi-mus*. Both endings are old. Sanskrit kept both, and the rest of this chapter and the next is the story of which numbers got which.

What you've built

A second ordinal, made rather than learned, and the first sign that the ending is older than Sanskrit.

Your turn

Say these aloud:

- *sapta*, then *saptamaḥ*
- *pañcamaḥ*, then *saptamaḥ*
- the Latin word with the same ending — *septimus*

Before you move on

What is सप्त plus -म? (सप्तमः.) Which Latin word shows the same ending? (*Septimus.*)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 335 (DSAL).

62.3 अष्टमः (aṣṭamaḥ) — eighth

Four recalls, at four distances.

- *Recall:* say *saptamaḥ* — **R1**, one lesson back
- *Write it:* the ꣳ from memory, and say what it marks — **R2**, five lessons back
- *Recall:* say *gatvā* and name what the -त्वा does — **R3**, twenty lessons back
- *Recall:* say *kiñcit* — **R4**, eighty lessons back

You'll want to know: अष्टमः

अष्टमः (*aṣṭamaḥ*) — "eighth".
अष्ट + म. Third time, same move.

The word, taken apart — its roots and family

Eight is where the cousins stop agreeing. Latin's eighth is **octāvus** — not *octimus*, not *octus*, but a shape that matches nothing else in its own row. English says *eighth*, keeping its own **-th**.
Sanskrit does nothing unusual at all here. अष्ट takes -म exactly as सप्त did.
That is worth noticing for a reason beyond the word: it tells you that the -म ending is not merely common in Sanskrit but PRODUCTIVE — the ending a speaker reaches for by default, rather than one of several stored shapes. You will meet the one number in this range where that is not true, and it will stand out.
Aṣṭa is an inherited numeral: MW compares Latin *octō* and English *eight*, and the ordinal is already in the Rigveda (CDIAL 937).

What you've built

A third ordinal for free, and a reason to expect the fourth.

Your turn

Say these aloud:

- *aṣṭa*, then *aṣṭamaḥ*
- *pañcamaḥ saptamaḥ aṣṭamaḥ*
- which language broke step at eight — **Latin**

Before you move on

What is अष्ट plus -म? (अष्टमः.) Did Sanskrit do anything special at eight? (**No.**)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 33 (DSAL).

62.4 नवमः (navamaḥ) — ninth

Four recalls, at four distances.

- *Recall:* say *aṣṭamaḥ* — **R1**, one lesson back
- *Recall:* say *ṛtuḥ* — **R2**, five lessons back
- *Recall:* say *gantum* and name what the -तुम् does — **R3**, twenty lessons back
- *Recall:* say *bahu* — **R4**, eighty lessons back

You'll want to know: नवमः

नवमः (*navamaḥ*) — "ninth".

नव + म. Chapter nineteen taught the number as नवन्; the final न् drops before the ending and नव is what the ordinal is built on.

The word, taken apart — its roots and family

Now a warning, because two Sanskrit words meet here and look identical.

नव — *nava* — "**new**" (chapter fifteen)

नव — *nava* — "**nine**", the stem under नवन् (chapter nineteen)

They are not one word with two senses. They are two different words that happened to wear down to the same shape, and Sanskrit lives with the collision.
नवमः is built on the SECOND of them. It means *ninth*, never *newest*. Latin has the same pair and the same trouble — *novus* "new" beside *novem* "nine" — which is a good reason to believe the collision is inherited rather than invented in India.

What you've built

A fourth ordinal, and a pair of look-alikes told apart.

Your turn

Say these aloud:

- *navan*, then *navamaḥ*
- the other नव, the one that means *new*
- *saptamaḥ aṣṭamaḥ navamaḥ*

Before you move on

Which नव is नवमः built on? (**The one that means nine.**) What does the other one mean? (**New.**)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 137 (DSAL).

62.5 दशमः (daśamaḥ) — tenth

Four recalls, at four distances.

- *Recall:* say *navamaḥ* — **R1**, one lesson back
- *Recall:* read ऋ — **R2**, five lessons back
- *Recall:* say *patiḥ* — **R3**, forty lessons back
- *Recall:* say *ātithyam* — **R4**, eighty lessons back

You'll want to know: दशमः

दशमः (*daśamaḥ*) — "tenth".

दश + म, and Latin's tenth is **decimus** — the same ending again, in the same place.

The word, taken apart — its roots and family

Count what this chapter has done:

number	ordinal
पञ्च	पञ्चमः
सप्त	सप्तमः
अष्ट	अष्टमः
नवन्	नवमः
दश	दशमः

Five ordinals, one ending, nothing memorised.

Now look at the left-hand column and find what is missing. षट् is not there. You have counted with it since chapter nineteen and this chapter has walked straight past it.

That was on purpose, and it is not because *sixth* is rare. षट् is the one number between five and ten whose ordinal does NOT take -म, and the next chapter opens on it — because a hole is only interesting once the thing around it is solid.

MW compares *daśama* directly with Latin *decimus*: the two ordinals are inherited cousins, ending and all (CDIAL 6233).

What you've built

Five ordinals from one ending, and one number deliberately left out.

Your turn

Say these aloud:

- *daśa*, then *daśamaḥ*
- the run — *pañcamaḥ saptamaḥ aṣṭamaḥ navamaḥ daśamaḥ*
- the number this chapter skipped — ***ṣaṭ***

Before you move on

How many ordinals did this chapter build from one ending? (**Five**.)
Which number did it leave out, and why? (षट् — **because its ordinal does not take -म**.)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 117 (DSAL).

62.6 Five ordinals, one ending, and a hole at six

Four recalls, at four distances, before the run.

- *Recall:* say *daśamaḥ* — **R1**, one lesson back
- *Recall:* say *pañcamaḥ* — **R2**, five lessons back
- *Recall:* say *agacchat* and name the अ- at the front — **R3**, twenty lessons back
- *Recall:* say *vinayaḥ* — **R4**, eighty lessons back

Your turn

Say these aloud:

- the five in order — *pañcamaḥ saptamaḥ aṣṭamaḥ navamaḥ daśamaḥ*
- each number with its ordinal — *pañca pañcamaḥ*, *sapta saptamaḥ*, and on
- how many of the five you had to be told — **none of them**
- the number missing from the run, and what it is — ***ṣaṭ***, **six**

What you've built

Five ordinals for the price of one syllable, and one question left open. The question is worth stating exactly, because the next chapter answers it and then keeps going. It is not *"why is sixth irregular?"* — that phrasing assumes the ending you learned is the only one Sanskrit has. It is:

> **If -म is not what sixth uses, what does it use, and is it alone?**

It is not alone. There are two more endings in this system, and

between them they account for every ordinal below five as well as the one this chapter walked past.

Before you move on

What ending makes an ordinal out of a number? (**-म**.) Which number between five and ten does not use it? (**षट्**.)

Chapter 63

The Endings Before It

Modes: **voice** (5) **eyes** (1) **Hands-free start:** the first 5 of 6 lessons.

> ***By the end of this chapter:*** I can say all ten Sanskrit ordinals, sort them by which of three endings they take, and say why the word for first belongs to none of them.
>
> *Complete SA-R63-all-ten and run prathamaḥ to daśamaḥ, then group the ten by ending and name the one that belongs to no group.*

63.1 षष्ठः (ṣaṣṭhaḥ) — sixth

Four recalls, at four distances.

- *Recall:* say *daśamaḥ* — **R1**, two lessons back
- *Recall:* say *saptamaḥ* — **R2**, five lessons back
- *Recall:* say *apaṭhat* and name the two things that mark a past tense — **R3**, twenty lessons back
- *Recall:* say *namratā* — **R4**, eighty lessons back

You'll want to know: षष्ठः

षष्ठः (*ṣaṣṭhaḥ*) — "sixth".

The last chapter would have predicted षष्टमः. That word does not exist.

The word, taken apart — its roots and family

Macdonell prints the join, as he does for every one of these words. For *fifth* he prints *pañca-má*. For *sixth* he prints:

> **ṣaṣ-thá**

Not **-म**. **-थ**.
So *sixth* is not a broken **-म** word. It is a whole word made with a DIFFERENT ending — one you have not met, which is why the last chapter could not have taught it and did not try.
Two things follow, and the second is the useful one:

1. Sanskrit has at least two ordinal endings, not one.
2. **-थ** is the one the cousins kept. English still says *six-th*, *seven-th*, *ten-th*; Latin says *sextus* and *quartus*. Both endings were inherited — Latin has the other one too, in *septimus* and *decimus* — and each language divided its numbers between them differently.

So *sixth* is not a broken Sanskrit word. It is one of the numbers that stayed on the ending the whole family shares, while **-म** took the rest.

What you've built

The missing ordinal, and a second ending the family shares.

Your turn

Say these aloud:

- *ṣaṭ*, then *ṣaṣṭhaḥ*
- the ending it uses, and the ending it does not — ***-tha***, not ***-ma***
- the English word with the same ending — *sixth*

Before you move on

What ending does **षष्ठः** carry? (**-थ**.) Which of the two endings did English keep? (**-थ** — *six-th*.)

Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 324 (DSAL).

63.2 चतुर्थः (caturthaḥ) — fourth

Four recalls, at four distances.

- *Recall:* say *ṣaṣṭhaḥ* — **R1**, one lesson back
- *Recall:* say *aṣṭamaḥ* — **R2**, five lessons back
- *Recall:* say *yaḥ* and name the word it always calls for — **R3**, thirty-three lessons back
- *Recall:* say *viśvāsaḥ* — **R4**, eighty lessons back

You'll want to know: चतुर्थः

चतुर्थः (*caturthaḥ*) — "fourth".

Macdonell prints it **katur-thá**. That is the same **-थ** you met one lesson ago.

The word, taken apart — its roots and family

One lesson ago **षष्ठः** was a single odd word. Now it has company:

number	ordinal	ending
चतुर्	चतुर्थः	-थ
षट्	षष्ठः	-थ

Two words with the same ending are not an exception. They are a **set** — a small one, but a set, and it has its own territory: **-थ** sits at four and at six, and **-म** sits at five and at everything from seven up.

That arrangement is worth pausing on, because it is genuinely strange. The two endings are not divided by size, or by sound, or by anything a learner could guess. They are interleaved: four, then five, then six, and the ending changes at every step.

Latin does the same thing at the same numbers and draws the line in a different place — *quārtus*, *quīntus*, *sextus* all take the **-t-** ending, and only from *septimus* does Latin switch to **-m-**. The two languages sorted an inherited pair of endings into different piles.

What you've built

A second **-थ** word, which turns yesterday's exception into today's pattern.

Your turn

Say these aloud:

- *catur*, then *caturthaḥ*
- the two words that share **-थ** — *caturthaḥ*, *ṣaṣṭhaḥ*
- the number between them, and its ending — *pañcamaḥ*, ***-ma***

Before you move on

Which two numbers take **-थ**? (**Four and six**.) What sits between them? (**Five, with -म**.)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 91 (DSAL).

63.3 तृतीयः (tṛtīyaḥ) — third

Four recalls, at four distances.

- *Recall:* say *caturthaḥ* — **R1**, one lesson back
- *Recall:* say *navamaḥ* — **R2**, five lessons back
- *Recall:* say *śaknoti* — **R3**, twenty lessons back
- *Recall:* say *saralaḥ* — **R4**, eighty lessons back

You'll want to know: तृतीयः

तृतीयः (*tṛtīyaḥ*) — "third".

Neither **-म** nor **-थ**. This is a third ending, and the number under it has moved as well.

The word, taken apart — its roots and family

Macdonell prints it **tri-tīya**, and the printed form is तृतीयः. Two things happened:

1. The ending is **-तीय**, longer than the other two and unlike either.
2. The इ of त्रि became ऋ — the vowel you learned to read two chapters ago, here doing ordinary work inside an ordinary word.

That second point is why this lesson is worth its place even for a reader who only wanted the vocabulary. ऋ arrived in this book as the first letter of ऋतुः, a word where it simply is what it is. Here it is the RESULT of something: a vowel that shifted when an ending was put on. The letter has a job, not just a shape.
The English cousin kept the **-t-** ending instead: *thir-d*, from an older *thrid-*. Latin took the same road with *tertius*.
Tṛtīya is built on *tri*, "three", and is inherited: MW compares Latin *tertius* and Gothic *thridja*, the cousin of English **third** (CDIAL 5912).

What you've built

A third ending, and the vocalic ऋ caught doing grammar.

Your turn

Say these aloud:

- *tri*, then *tṛtīyaḥ*
- the three endings so far — ***-ma***, ***-tha***, ***-tīya***
- what happened to the vowel of *tri* — **it became *ṛ***

Before you move on

What ending does तृतीयः carry? (**-तीय**.) Which vowel replaced the इ of त्रि? (ऋ.)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 111 (DSAL).

63.4 द्वितीयः (dvitīyaḥ) — second

Four recalls, at four distances.

- *Recall:* say *tṛtīyaḥ* — **R1**, one lesson back

- *Recall:* say *daśamaḥ* — **R2**, five lessons back
- *Recall:* say *icchati* — **R3**, twenty lessons back
- *Recall:* say *śvetaḥ* — **R4**, eighty lessons back

You'll want to know: द्वितीयः

द्वितीयः (*dvitīyaḥ*) — "second".

द्वि + तीय. Macdonell prints it **dvi-tīya**.

Chapter six gave you the number as द्व (*dva*). द्वि- is the shape that same word takes when something is built on it. The ordinal uses that shape and adds nothing else.

The word, taken apart — its roots and family

So -तीय is not a one-off either:

number	ordinal
द्व (द्वि-)	द्वितीयः
त्रि	तृतीयः

Two and three take -तीय; four and six take -थ; five and seven upward take -म. Three endings, each with its own numbers, and no way to predict from the number which one it gets.

There is something else worth saying about this one in particular. Chapter six taught you that द्व is grammatically DUAL — Sanskrit's own third number, used for exactly two of anything. The ordinal shows no trace of that. द्वितीयः is an ordinary singular adjective describing one thing, the second one. Being *second* is not being *two*.

Sanskrit also uses द्वितीयः for "a companion" — the second person in a pair. Macdonell lists that sense right beside the numeral.

Dvitīya is built on *dvi*, the combining form of the inherited numeral *dva* (MW, CDIAL 6680).

What you've built

The third ending confirmed as a pair, and one ordinal left.

Your turn

Say these aloud:

- *dvi*, then *dvitīyaḥ*

- the two words that share **-तीय** — *dvitīyaḥ*, *tṛtīyaḥ*
- which of the two changed its vowel — ***tṛtīyaḥ***

Before you move on

Which numbers take **-तीय**? (**Two and three**.) Is **द्वितीयः** a dual word? (**No — an ordinary singular adjective**.)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 128 (DSAL).

63.5 प्रथमः (prathamaḥ) — first

Four recalls, at four distances.

- *Recall:* say *dvitīyaḥ* — **R1**, one lesson back
- *Recall:* say *pañcamaḥ* — **R2**, ten lessons back
- *Recall:* say *mahyam* — **R3**, twenty lessons back
- *Recall:* say *śyāmaḥ* — **R4**, eighty lessons back

You'll want to know: प्रथमः

प्रथमः (*prathamaḥ*) — "first".

Listen for *eka* in *prathamaḥ*. There is none — not a sound of it.

The word, taken apart — its roots and family

Macdonell prints this one with a note the other nine do not get:

> **pra-thamá** [= pra-tama, spv. *foremost*]

Take it in three pieces.
प्र (*pra*) is "forward, in front". **-तम** is the ending that makes a superlative — the *most* of something. And *spv.* is Macdonell's abbreviation for exactly that.
So **प्रथमः** is not *one-th.* It is **foremost** — the most forward thing — and it landed in the ordinal series because that is what being first amounts to, not because anyone built it out of a number.
English did the identical thing on its own road. *First* is the superlative of *fore*: *fore*, *former*, *first*. Two languages, no contact, the same idea: the word for *first* is not counted to, it is a claim about being ahead.

That is why this chapter saved it for last. Every other ordinal in these two chapters answered the question *what happens to the number?* This one answers a different question, and it could only be heard as different once the other nine had answered the first one.
MW gives the same account, *pra-tama*, the superlative of *pra* (CDIAL 8648), and CDIAL notes that many modern languages replaced the word with newer forms.

What you've built

All ten ordinals, and the knowledge that the tenth one you learned is not built like any of the others.

Your turn

Say these aloud:

- *prathamaḥ*, then *dvitīyaḥ*
- which number is inside *prathamaḥ* — **none**
- what it literally claims — **foremost**

Before you move on

Is एक anywhere inside प्रथमः? (**No.**) What does the word literally mean? (**Foremost** — प्र, "forward", with a superlative ending.)
Source: Macdonell, *A Practical Sanskrit Dictionary*, p. 178 (DSAL).

63.6 All ten, and the three endings that made them

Four recalls, at four distances, before the run.

- *Recall:* say *prathamaḥ* — **R1**, one lesson back
- *Recall:* say *ṣaṣṭhaḥ* — **R2**, five lessons back
- *Recall:* say *mahyaṁ rocate* — **R3**, twenty lessons back
- *Recall:* say *pītaḥ* — **R4**, eighty lessons back

Your turn

Say these aloud:

- all ten in order — *prathamaḥ dvitīyaḥ tṛtīyaḥ caturthaḥ pañcamaḥ ṣaṣṭhaḥ saptamaḥ aṣṭamaḥ navamaḥ daśamaḥ*
- the five that share **-म** — *pañcamaḥ saptamaḥ aṣṭamaḥ navamaḥ daśamaḥ*
- the two that share **-थ**, and the two that share **-तीय**
- the one that shares nothing — ***prathamaḥ***

What you've built

Ten ordinals, and they sort into four groups rather than one list. The evidence is not this book's; it is printed in the dictionary, because Macdonell marks the join inside every headword:

ordinal	Macdonell's join	ending
प्रथमः	*pra-thamá* [= pra-tama, spv.], p. 178	**none — a superlative**

अष्टमः	*aṣṭa-má*, p. 33	**-म**
नवमः	*nava-má*, p. 137	**-म**
दशमः	*daśa-má*, p. 117	**-म**

Read the right-hand column downward and the order these two chapters used stops looking odd. Chapter sixty-two taught the block of five that share one ending. Chapter sixty-three worked outward from the hole that block left, and every step was licensed by the one before it: षष्ठः was strange until चतुर्थः made it a pair; तृतीयः was a third oddity until द्वितीयः made it a pair; and प्रथमः could only be recognised as a word of a different KIND once nine words of the same kind had gone past. Numerical order would have taught all four groups in the first four lessons and named none of them.

Before you move on

How many endings make the ten ordinals? (**Three** — **-म**, **-थ**, **-तीय** — **and one word that uses none of them**.) Which ending has the most numbers? (**-म**, **with five**.)

Chapter 64

Reading — Words, Lines, and a First Passage

Modes: 👁 **eyes** (3) 🎧 **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can read a Sanskrit word cold by looking at its ending first, see that three shuffles of one sentence are still one sentence, and hold a whole passage about one village without translating it word by word.
>
> *Fourteen lines standing in one village, where* च *and* वा *follow what they join,* किन्तु *opens its line, and the whole thing closes on* शान्तिः.

64.1 (reading) — six words, and the end of each one

Every word below you have already met. Not one is new.

What is new is that nobody says them to you first.

Read this

ग्रामः मार्गः दीपः गृहम् वनम् पुस्तकम्

Read down the list once, without stopping.
Again — and this time read the last letter of each one first.

What to know first

The six sorted themselves into two families before you read one of them for meaning. Three close on **-अः**, three close on **-अम्**, and you were told in Chapter 16 what that difference is.

This is the habit Sanskrit asks for and English never does. An English word carries its job in WHERE IT STANDS. A Sanskrit word carries its job in HOW IT ENDS.

So a reader of Sanskrit reads the end of a word first. It is not a trick for beginners — it is what the writing system is built to be read with, and the next lesson shows what it buys you.

Notice too that each word is printed with space around it and its ending whole. Running Sanskrit does not keep them that separate; a first reader needs to see the joints while they are still learning where they are.

Your turn

- *Say it:* the six words down the list, once, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
Where does an English word carry its job, and where does a Sanskrit one? (**English in its position; Sanskrit in its ending.**)

64.2 (reading) — six lines, and only two of them say anything different

The last lesson gave you words. These put them somewhere.

Six lines — and six is more than the number of things they say.

Read this

ग्रामः अत्र अस्ति। अत्र ग्रामः अस्ति। अस्ति अत्र ग्रामः। वनम् तत्र अस्ति। तत्र वनम् अस्ति। अस्ति तत्र वनम्।

Read the six once, straight down.
Now read the first three again and say what changed.

What to know first

Nothing changed. The first three lines are one sentence written three ways, and the second three are another. **The village is here. The forest is there.** That is the whole content of the page.

Do the same thing in English and it breaks, or it turns into something else. *The village is here* and *here is the village* and *is here the village* are not one sentence three ways.

This is what the last lesson bought. Because ग्रामः announces its own job with its ending, it does not need a position to hold that job for it — so the position is free, and a writer can put the emphasis wherever it belongs.

The usual order still puts the verb last, and the passage in the next lesson mostly keeps it there. The freedom is real; it is not disorder.

Read the ending, not the seat. Everything else in Sanskrit follows from that one habit.

Your turn

- *Say it:* the six lines aloud, once, straight down

Twice through:

Before you move on

Why can the words be shuffled? (**The ending carries the job**, so the position does not have to.)
What does a Sanskrit reader look at first? (**The end of the word.**)

64.3 (reading) — the first passage

Six words, then six lines. Now fourteen of them together.

Still not one new word.

Read this

एतत् गृहम् अस्ति। महत् गृहम् अस्ति। अत्र दीपः अस्ति। अत्र पुष्पम् च माला च। तत्र मार्गः अस्ति। तत्र वनम् च नदी च। पर्वतः तत्र अस्ति। किन्तु अत्र पर्वतः न अस्ति। अद्य बालः क्रीडति। बालः पुष्पम् वा फलम् वा गृह्णाति। धेनुः तृणम् खादति। वृद्धः अत्र तिष्ठति। नरः वनम् पश्यति। शान्तिः अत्र अस्ति।

Read it: the passage once without stopping; do not translate as you go — let the lines arrive

Read it: the passage again, and watch where अत्र turns into तत्र

What to know first

The passage stands in one village. The first half of it looks around — अत्र for what is at hand, तत्र for what is past the road — and the second half watches what the village is doing.

Three joiners carry all of it. च adds, वा offers, and किन्तु turns the page against itself: there is a mountain over there, BUT there is none here.

Two of the three sit where English would never put them. पुष्पम् च माला च is *the-flower-and the-garland-and* — च and वा stand AFTER what they join, once for each thing, while किन्तु stands first, which is why that line opens differently from every other line on the page.

The passage closes on शान्तिः. That is not a flourish added for an ending — it is the word Sanskrit recitation has closed on for a very long time, said three times over, and a reader meeting it at the foot of a page is meeting it where it has always been.

Your turn

- *Say it:* the passage aloud, once, without stopping

Twice through:

Before you move on

Where do च and वा stand? (**After** the thing they join, once for each.)
Which joiner stands first in its line? (किन्तु.)

Chapter 65

The Last Letter You Read

Modes: 👁 **eyes** (2) ✓ **pen** (6) 🚗 **Hands-free start:** none of the 8 lessons.

> ***By the end of this chapter:*** I can write the letter nga, and find it in the word for number.
>
> *Complete the last lesson of chapter 65: I can write the letter nga, and find it in the word for number.*

65.1 ङ (ṅa) — the nasal before ख in सङ्ख्या

Before the new one: write इ and ऋ once each, and name them.

Now say सङ्ख्या (*saṅkhyā*), "number". You have read it for a long time. This lesson takes one letter out of it and puts it in your hand.

Script you'll notice: ङ

ङ — *ṅa*, the nasal made where *k* and *kh* are made.

It is inside सङ्ख्या (*saṅkhyā*), "number", from the chapter on numbers. Say *saṅkhyā*: the *ṅ* sits at the back of the mouth, ready for the *kh* after it. Sanskrit spells that nasal out as ङ; Hindi writes the same word संख्या, with a dot above instead.

Writing: ङ

Put your pen on ङ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start this letter or which way to travel**. It is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at सङ्ख्या and point at ङ inside it
- *Trace it:* ङ three times, saying *ṅ* as you finish each one
- *Write it:* ऋ, then ङ, from memory
- *Read it:* सङ्ख्या aloud once more

Before you move on

Which letter is this — ङ? (**ṅa**, *ṅ*.) Which word did it come from? (सङ्ख्या, *saṅkhyā*, "number".)

65.2 (one letter) — From the letter to the word — a first pass

Say सङ्ख्या (*saṅkhyā*), then write the letter it gave you.

Your turn

letter	name	the word it came from
ङ	*ṅa*	सङ्ख्या *saṅkhyā*

- *Write it:* each letter in the table from memory, then check it
- *Say it:* the word each one came from
- *Read it:* each word in the table aloud, and point at its letter

Before you move on

Which word did each letter come from? (ङ from सङ्ख्या.)

65.3 (one letter) — From the word back to the letter — a second pass

Write ङ without looking, then say the word it came from.

Your turn

letter	name	the word it came from
ङ	*ṅa*	सङ्ख्या *saṅkhyā*

- *Say it:* each word in the table, then write the letter it gave you without looking
- *Write it:* each letter once more, slowly, larger than it is printed

Before you move on

Say each word in the table once more, and name the letter you took from it.

65.4 नमस्ते। अहं संस्कृतं वदामि। — two known sentences, one tiny text

Read the whole text once: नमस्ते। अहं संस्कृतं वदामि। It says only two things you already know: "Hello. I speak Sanskrit." Every word, sign, conjunct, and danda has already been taught. There is no new vocabulary here.

Writing — guided copy of connected text

Keep the model visible. Copy नमस्ते। once. Leave one clear word space, then copy अहं संस्कृतं वदामि। Read each word as your hand reaches it.

Copy the complete two-sentence text once more on a fresh line:

नमस्ते। अहं संस्कृतं वदामि।

Check the two danda marks, the space after the first one, both anusvāra dots, the vocalic-ṛ sign in संस्कृतं, and the joined स्त inside नमस्ते. Credit requires the connected Devanagari text; romanization is not an answer.

Before you move on

How many sentences and how many danda marks did you write? (**Two and two.**)

65.5 Two sentences after the model closes

Read नमस्ते। अहं संस्कृतं वदामि। once. Say its two meanings: "Hello. I speak Sanskrit." Notice where each sentence ends.

Writing — delayed copy of the whole text

Cover the model now. Wait ten seconds without writing. Then write both sentences from memory, with a danda after each one. There is no visible answer and no romanization while you write.

Uncover and compare only after one complete attempt:

नमस्ते। अहं संस्कृतं वदामि।

Check in this order: two complete sentences; two danda marks; word spaces; both anusvāra dots; ृ; joined स्त. Repair only the first difference, then read the repaired text aloud. A Latin-letter version earns no Devanagari writing credit.

Before you move on

What support disappeared? (**The visible model; the meaning and the text stayed the same.**)

65.6 Meanings only — recall the complete Devanagari text

Put every Sanskrit model away. The prompt below gives meanings only. Nothing new is being composed or translated: these are the same two old sentences in the same order.

Writing — independent connected-text recall

Write in Devanagari:

1. "Hello." Literally, "a bow to you."
2. "I speak Sanskrit."

Put a danda after each sentence. Stop after one complete attempt; do not use a visible Devanagari model or a romanized cue.

Now uncover the answer: नमस्ते। अहं संस्कृतं वदामि। Award credit only if both known sentences are complete, ordered, separated, and closed with danda marks in Devanagari. Romanization earns no credit. If one feature differs, repair that feature and write the whole two-sentence text once more from memory.

Before you move on

The runway began with one traced न. What can you now produce without a model? (**A complete two-sentence Devanagari text from meaning alone.**)

65.7 Your first question from meaning

Close the earlier lessons. Recall **book**, **where?**, and **is** without writing any of them yet.

Writing: assemble one familiar question

From meaning alone, write **Where is the book?** There is no word bank, romanization, or copyable sentence. Choose the three familiar pieces, put them in a clear Sanskrit order, and add the question mark. This composition is untimed: finish before opening the answer key.

Your turn: repair one difference

Check the thing, place question, copula, word boundaries, and punctuation separately. Repair the first difference and write the whole question once more from meaning.

Before you move on

What made this composition rather than copying? (**You selected and ordered three known pieces from meaning, with no visible Sanskrit answer.**)
One controlled line proves this rung, not the later timed A1 writing task.

65.8 A short A1 writing checkpoint

This is a short independent attempt, not a model. You will write the answers, and this page will not show you any copyable Sanskrit answer.

Put away romanization, dictionaries, translators, and spell-checkers. Keep a blank page ready and set a **three-minute timer**. Write in Devanagari. Ordinary legible handwriting is enough; decorative calligraphy is not scored.

Writing — timed assessment production

One practical form — three minutes

Complete **all six fields in Devanagari** for a new neighbourhood activity group. Short answers are enough. Start the timer when you begin the first field; leave any unfinished field as evidence when it rings.

1. Your name
2. Where you live or stay
3. A language you speak
4. One everyday action or kind of work you do
5. One drink or food you like
6. One person in your family

When the three-minute timer rings, **stop**. Record the number of completed fields. An honest short attempt is more useful than a perfect untimed one.

Before you move on

Spend at most one minute looking at this first attempt. Note one field you completed clearly and one field to practise next; do not rewrite the timed answer. Keep the page as evidence.
This checkpoint is **not** the complete A1 writing paper. On another day, close this lesson and open the separate A1 mock 1 learner paper for the authentic form and named-reader message under one 20-minute assessment clock. That paper and its later rubric review are a separate assessment session, not work inside this four-minute lesson. The second mock is a separate repeat, not a model to copy.

Chapter 66

Not Well

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a fever, a cough, pain and illness, and wish someone health.
>
> *Complete the last lesson of chapter 66: I can name a fever, a cough, pain and illness, and wish someone health.*

66.1 ज्वरः (jvaraḥ) — a fever

Before the new one: say the Sanskrit for second, then the Sanskrit for first.

Before the new word: *Read it:* a short line aloud word by word, then again as one breath, the way you read your first passage

You'll want to know: ज्वरः

ज्वरः (*jvaraḥ*) — "a fever". मम ज्वरः अस्ति (*mama jvaraḥ asti*) — "I have a fever", literally "of me a fever is", with मम and अस्ति, which you know.

The word, taken apart — its roots and family

Jvara is built on the root √jvar, "to be feverish", which MW sets beside √jval, "to burn, blaze" (CDIAL 5303). It lives on as Hindi and Bengali *jar*, "fever".

What you've built

An illness, said with of-me and is.

Your turn

- *Say it: jvaraḥ*
- *Say it: jvaraḥ*, once more
- *Say it:* say *mama jvaraḥ asti*
- *Recall:* say the Sanskrit for second, then the Sanskrit for first, then say *jvaraḥ* again

Before you move on

What does ज्वरः mean? ("A fever".) Say it once more.

66.2 कासः (kāsaḥ) — a cough

Before the new one: say the Sanskrit for first, then the Sanskrit for a fever.

Read it: a three-word line aloud, then say it with the words in another order — Sanskrit lets them move

You'll want to know: कासः

कासः (*kāsaḥ*) — "a cough". मम कासः अस्ति — "I have a cough".

The word, taken apart — its roots and family

Kāsa is built on the root √kās, "to cough", and the noun is already in the Atharvaveda (MW, CDIAL 3138). It lives on as Hindi *khāṃsī*, "cough".

What you've built

The same frame, a new illness.

Your turn

- *Say it: kāsaḥ*
- *Say it: kāsaḥ*, once more
- *Say it:* say *mama kāsaḥ asti*
- *Recall:* say the Sanskrit for first, then the Sanskrit for a fever, then say *kāsaḥ* again

Before you move on

What does कासः mean? ("A cough".) Say it once more.

66.3 पीडा (pīḍā) — pain

Before the new one: say the Sanskrit for a fever, then the Sanskrit for a cough.

Read it: today's word aloud from the page, one letter-group at a time, before you hear it

You'll want to know: पीडा

पीडा (*pīḍā*) — "pain". शिरः + पीडा: शिरःपीडा, "a headache".

The word, taken apart — its roots and family

Pīḍā is built on the root √pīḍ, "to press, squeeze" (MW), so pain is named as pressure. It lives on as Hindi *pīṛ*, "pain" (CDIAL 8227).

What you've built

Pain, and where it is.

Your turn

- *Say it: pīḍā*
- *Say it: pīḍā*, once more
- *Say it:* say *mama śiraḥpīḍā asti*

- *Recall:* say the Sanskrit for a fever, then the Sanskrit for a cough, then say *pīḍā* again

Before you move on

What does पीडा mean? ("Pain".) Say it once more.

66.4 रोगः (rogaḥ) — an illness

Before the new one: say the Sanskrit for a cough, then the Sanskrit for pain.

You'll want to know: रोगः

रोगः (*rogaḥ*) — "an illness", the general word under ज्वरः and कासः.

The word, taken apart — its roots and family

Roga is built on the root √ruj, "to break"; MW glosses it "breaking up of strength" (CDIAL 10829). It is already in the Atharvaveda.

What you've built

The word over all the others.

Your turn

- *Say it: rogaḥ*
- *Say it: rogaḥ*, once more
- *Say it:* say *rogaḥ*
- *Recall:* say the Sanskrit for a cough, then the Sanskrit for pain, then say *rogaḥ* again

Before you move on

What does रोगः mean? ("An illness".) Say it once more.

66.5 आरोग्यम् (ārogyam) — health

Before the new one: say the Sanskrit for pain, then the Sanskrit for an illness.

You'll want to know: आरोग्यम्

आरोग्यम् (*ārogyam*) — "health": आ-, then रोग, "illness", with -य after it — the state of the body once the illness is gone.

The word, taken apart — its roots and family

Ārogya is built from *a-roga*, "free from disease": *a-* "not" with *roga* "disease", made into an abstract noun (MW, CDIAL 1330).

What you've built

What you wish someone who is ill.

Your turn

- *Say it: ārogyam*
- *Say it: ārogyam*, once more
- *Say it:* say *ārogyam astu*
- *Recall:* say the Sanskrit for pain, then the Sanskrit for an illness, then say *ārogyam* again

Before you move on

What does आरोग्यम् mean? ("Health".) Say it once more.

Chapter 67

Tired, Hungry, Thirsty

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say I am sleepy, hungry or thirsty, ask for rest, and say I am at ease.
>
> *Complete the last lesson of chapter 67: I can say I am sleepy, hungry or thirsty, ask for rest, and say I am at ease.*

67.1 निद्रा (nidrā) — sleep

Before the new one: say the Sanskrit for an illness, then the Sanskrit for health.

Read it: a few lines aloud as a passage, not as a list — let each line lead into the next

You'll want to know: निद्रा

निद्रा (*nidrā*) — "sleep". It comes at रात्रिः.

The word, taken apart — its roots and family

Nidrā is built from *ni*, "down", and the root √drā, "to sleep", which MW compares with Latin *dormiō*. It lives on as Hindi *nīd*, "sleep" (CDIAL 7200).

What you've built

What the night is for.

Your turn

- *Say it: nidrā*
- *Say it: nidrā*, once more
- *Say it:* say *nidrā*
- *Recall:* say the Sanskrit for an illness, then the Sanskrit for health, then say *nidrā* again

Before you move on

What does निद्रा mean? ("Sleep".) Say it once more.

67.2 क्षुधा (kṣudhā) — hunger

Before the new one: say the Sanskrit for health, then the Sanskrit for sleep.

You'll want to know: क्षुधा

क्षुधा (*kṣudhā*) — "hunger". मम क्षुधा अस्ति — "I am hungry".

The word, taken apart — its roots and family

Kṣudhā is the later form of Vedic *kṣudh*, "hunger", built on the root √kṣudh, "to be hungry" (MW, CDIAL 3716).

What you've built

The need that food answers.

Your turn

- *Say it: kṣudhā*
- *Say it: kṣudhā*, once more
- *Say it:* say *mama kṣudhā asti*
- *Recall:* say the Sanskrit for health, then the Sanskrit for sleep, then say *kṣudhā* again

Before you move on

What does क्षुधा mean? ("Hunger".) Say it once more.

67.3 पिपासा (pipāsā) — thirst

Before the new one: say the Sanskrit for sleep, then the Sanskrit for hunger.

You'll want to know: पिपासा

पिपासा (*pipāsā*) — "thirst". पानीयम् answers it.

The word, taken apart — its roots and family

Pipāsā is built on the desire form of the root √pā, "to drink": thirst is "wanting to drink" (MW, CDIAL 8199). It lives on as Hindi *pyās*, "thirst".

What you've built

The need that water answers.

Your turn

- *Say it: pipāsā*
- *Say it: pipāsā*, once more
- *Say it:* say *mama pipāsā asti*
- *Recall:* say the Sanskrit for sleep, then the Sanskrit for hunger, then say *pipāsā* again

Before you move on

What does पिपासा mean? ("Thirst".) Say it once more.

67.4 विश्रामः (viśrāmaḥ) — rest

Before the new one: say the Sanskrit for hunger, then the Sanskrit for thirst.

You'll want to know: विश्रामः

विश्रामः (*viśrāmaḥ*) — "rest", a pause from work or from a यात्रा.

The word, taken apart — its roots and family

Viśrāma is built from *vi* and the root √śram, "to toil, be weary": rest is the release from weariness (MW, CDIAL 11956).

What you've built

What a tired traveller wants.

Your turn

- *Say it: viśrāmaḥ*
- *Say it: viśrāmaḥ*, once more
- *Say it:* say *viśrāmaḥ*
- *Recall:* say the Sanskrit for hunger, then the Sanskrit for thirst, then say *viśrāmaḥ* again

Before you move on

What does विश्रामः mean? ("Rest".) Say it once more.

67.5 सुखम् (sukham) — ease, happiness

Before the new one: say the Sanskrit for thirst, then the Sanskrit for rest.

You'll want to know: सुखम्

सुखम् (*sukham*) — "ease", "happiness". सुखम् अस्ति — "all is well".

The word, taken apart — its roots and family

Sukha first described a chariot running easily. MW reports the old reading *su* + *kha*, "having a good axle-hole", and also suggests a Prakrit form of *su-stha*, "standing well"; the question is not settled (CDIAL 13451).

What you've built

How things are after rest.

Your turn

- *Say it: sukham*
- *Say it: sukham*, once more
- *Say it:* say *sukham asti*
- *Recall:* say the Sanskrit for thirst, then the Sanskrit for rest, then say *sukham* again

Before you move on

What does सुखम् mean? ("Ease, happiness".) Say it once more.

Chapter 68

How It Feels

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name sorrow, fear, anger, shyness and joy.
>
> *Complete the last lesson of chapter 68: I can name sorrow, fear, anger, shyness and joy.*

68.1 दुःखम् (duḥkham) — sorrow, pain

Before the new one: say the Sanskrit for rest, then the Sanskrit for ease.

You'll want to know: दुःखम्

दुःखम् (*duḥkham*) — "sorrow", the opposite of सुखम्. The two words share their ending.

The word, taken apart — its roots and family

CDIAL 6375 says *duḥkha* was formed after *sukha*, with *duḥ-* "bad" in place of *su-* "good"; MW also suggests a Prakrit form of *duḥ-stha*. It lives on as Hindi *dukh*.

What you've built

The other side of ease.

Your turn

- *Say it: duḥkham*
- *Say it: duḥkham*, once more
- *Say it:* say *duḥkham*
- *Recall:* say the Sanskrit for rest, then the Sanskrit for ease, then say *duḥkham* again

Before you move on

What does दुःखम् mean? ("Sorrow, pain".) Say it once more.

68.2 भयम् (bhayam) — fear

Before the new one: say the Sanskrit for ease, then the Sanskrit for sorrow.

You'll want to know: भयम्

भयम् (*bhayam*) — "fear". मम भयम् अस्ति — "I am afraid".

The word, taken apart — its roots and family

Bhaya is built on the root √bhī, "to fear" (MW, CDIAL 9390). It is inherited: MW compares Lithuanian *bijotis* and Slavic *bojati*, "to fear".

What you've built

What the dark brings.

Your turn

- *Say it: bhayam*
- *Say it: bhayam*, once more
- *Say it:* say *mama bhayam asti*
- *Recall:* say the Sanskrit for ease, then the Sanskrit for sorrow, then say *bhayam* again

Before you move on

What does भयम् mean? ("Fear".) Say it once more.

68.3 क्रोधः (krodhaḥ) — anger

Before the new one: say the Sanskrit for sorrow, then the Sanskrit for fear.

You'll want to know: क्रोधः

क्रोधः (*krodhaḥ*) — "anger".

The word, taken apart — its roots and family

Krodha is built on the root √krudh, "to be angry", and is already in the Atharvaveda (MW, CDIAL 3608).

What you've built

The hot feeling.

Your turn

- *Say it: krodhaḥ*
- *Say it: krodhaḥ*, once more
- *Say it:* say *krodhaḥ*
- *Recall:* say the Sanskrit for sorrow, then the Sanskrit for fear, then say *krodhaḥ* again

Before you move on

What does क्रोधः mean? ("Anger".) Say it once more.

68.4 लज्जा (lajjā) — shyness, shame

Before the new one: say the Sanskrit for fear, then the Sanskrit for anger.

You'll want to know: लज्जा

लज्जा (*lajjā*) — "shyness", the feeling that turns the face away.

The word, taken apart — its roots and family

Lajjā is built on the root √lajj, "to be ashamed, blush" (MW). It lives on as Hindi *lāj*, "shame" (CDIAL 10910).

What you've built

The quiet feeling.

Your turn

- *Say it: lajjā*
- *Say it: lajjā*, once more
- *Say it:* say *lajjā*
- *Recall:* say the Sanskrit for fear, then the Sanskrit for anger, then say *lajjā* again

Before you move on

What does लज्जा mean? ("Shyness, shame".) Say it once more.

68.5 हर्षः (harṣaḥ) — joy

Before the new one: say the Sanskrit for anger, then the Sanskrit for shyness.

You'll want to know: हर्षः

हर्षः (*harṣaḥ*) — "joy", bright and sudden, where आनन्दः is deep and lasting.

The word, taken apart — its roots and family

Harṣa is built on the root √hṛṣ, "to bristle, thrill": joy is the hair standing on end (MW, CDIAL 13999). MW compares Latin *horreō*, "I bristle", the source of English **horror**.

What you've built

The bright feeling.

Your turn

- *Say it: harṣaḥ*
- *Say it: harṣaḥ*, once more
- *Say it:* say *harṣaḥ*
- *Recall:* say the Sanskrit for anger, then the Sanskrit for shyness, then say *harṣaḥ* again

Before you move on

What does हर्षः mean? ("Joy".) Say it once more.

69.1 नेत्रम् (netram) — an eye

Before the new one: say the Sanskrit for shyness, then the Sanskrit for joy.

You'll want to know: नेत्रम्

नेत्रम् (*netram*) — "an eye", the word of poems, beside the everyday अक्षि.

The word, taken apart — its roots and family

Netra is traditionally read as "the guide", from the root √nī, "to lead" (MW), but CDIAL 7587 reports that this link has been doubted, so its origin is not settled.

What you've built

A second word for the eye.

Your turn

- *Say it: netram*
- *Say it: netram*, once more
- *Say it:* say *netram*
- *Recall:* say the Sanskrit for shyness, then the Sanskrit for joy, then say *netram* again

Before you move on

What does नेत्रम् mean? ("An eye".) Say it once more.

69.2 कण्ठः (kaṇṭhaḥ) — the throat

Before the new one: say the Sanskrit for joy, then the Sanskrit for an eye.

You'll want to know: कण्ठः

कण्ठः (*kaṇṭhaḥ*) — "the throat". With a कासः, it is the कण्ठः that hurts.

The word, taken apart — its roots and family

Kaṇṭha is already in the Śatapatha Brāhmaṇa. The native grammarians derive it from a root √kaṇ, "to sound" (MW), but its origin is not settled (CDIAL 2680).

What you've built

Where the voice comes from.

Your turn

- *Say it: kaṇṭhaḥ*
- *Say it: kaṇṭhaḥ*, once more
- *Say it:* say *kaṇṭhaḥ*
- *Recall:* say the Sanskrit for joy, then the Sanskrit for an eye, then say *kaṇṭhaḥ* again

69.3 उदरम् (udaram) — the belly

Before the new one: say the Sanskrit for an eye, then the Sanskrit for the throat.

You'll want to know: उदरम्

उदरम् (*udaram*) — "the belly", where क्षुधा is felt.

The word, taken apart — its roots and family

Udara is a Rigvedic word for the belly (CDIAL 1932). MW records two guesses, the roots √dṝ, "to burst", and √ṛ, "to go", so its origin is not settled.

What you've built

Where hunger lives.

Your turn

- *Say it: udaram*
- *Say it: udaram*, once more
- *Say it:* say *udaram*
- *Recall:* say the Sanskrit for an eye, then the Sanskrit for the throat, then say *udaram* again

Before you move on

What does उदरम् mean? ("The belly".) Say it once more.

69.4 ललाटम् (lalāṭam) — the forehead

Before the new one: say the Sanskrit for the throat, then the Sanskrit for the belly.

You'll want to know: ललाटम्

ललाटम् (*lalāṭam*) — "the forehead", above the अक्षि.

The word, taken apart — its roots and family

Lalāṭa is the later form of Vedic *rarāṭa* (MW, CDIAL 10970). Its own origin is not settled, though CDIAL takes the side form *niṭāla* as borrowed from Dravidian. It lives on as Hindi *lilāṛ*, "forehead".

What you've built

The top of the face.

Your turn

- *Say it: lalāṭam*
- *Say it: lalāṭam*, once more
- *Say it:* say *lalāṭam*
- *Recall:* say the Sanskrit for the throat, then the Sanskrit for the belly, then say *lalāṭam* again

Before you move on

What does ललाटम् mean? ("The forehead".) Say it once more.

69.5 जिह्वा (jihvā) — the tongue

Before the new one: say the Sanskrit for the belly, then the Sanskrit for the forehead.

You'll want to know: जिह्वा

जिह्वा (*jihvā*) — "the tongue", inside the मुखम्.

The word, taken apart — its roots and family

Jihvā is inherited: MW compares Latin *lingua* and Gothic *tuggō*, the cousin of English **tongue**. It lives on as Hindi *jībh* (CDIAL 5228).

What you've built

What tastes and speaks.

Your turn

- *Say it: jihvā*
- *Say it: jihvā*, once more

Chapter 75

Getting There

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a vehicle, a chariot, a boat and an aeroplane, and say someone goes in.
>
> *Complete the last lesson of chapter 75: I can name a vehicle, a chariot, a boat and an aeroplane, and say someone goes in.*

75.1 वाहनम् (vāhanam) — a vehicle

Before the new one: say the Sanskrit for a shop, then the Sanskrit for a market.

You'll want to know: वाहनम्

वाहनम् (*vāhanam*) — "a vehicle", anything that carries you on a यात्रा.

The word, taken apart — its roots and family

Vāhana is built on the root √vah, "to carry, convey" (MW, CDIAL 11610). It is inherited: MW compares Latin *vehere*, "to carry", and *vehiculum*, the source of English **vehicle**.

What you've built

The general word.

Your turn

- *Say it: vāhanam*
- *Say it: vāhanam*, once more
- *Say it:* say *vāhanam*
- *Recall:* say the Sanskrit for a shop, then the Sanskrit for a market, then say *vāhanam* again

Before you move on

What does वाहनम् mean? ("A vehicle".) Say it once more.

75.2 रथः (rathaḥ) — a chariot

Before the new one: say the Sanskrit for a market, then the Sanskrit for a vehicle.

You'll want to know: रथः

रथः (*rathaḥ*) — "a chariot", the vehicle of the old stories.

The word, taken apart — its roots and family

MW explains *ratha* as "the goer", from the root √ṛ, "to go", but EtymDB links it to Latin *rota* and Lithuanian *ratas*, "wheel", which makes the chariot first the wheeled thing. Either way it is inherited, and Rigvedic (CDIAL 10602).

What you've built

The vehicle of the epics.

Your turn

- *Say it: rathaḥ*
- *Say it: rathaḥ*, once more
- *Say it:* say *rathaḥ*

- *Recall:* say the Sanskrit for a market, then the Sanskrit for a vehicle, then say *rathaḥ* again

Before you move on

What does रथः mean? ("A chariot".) Say it once more.

75.3 नौका (naukā) — a boat

Before the new one: say the Sanskrit for a vehicle, then the Sanskrit for a chariot.

You'll want to know: नौका

नौका (*naukā*) — "a boat", the way across a नदी.

The word, taken apart — its roots and family

Naukā is built from *nau*, "ship", with the small-thing ending *-kā* (MW). It is inherited: MW compares Greek *naus* and Latin *nāvis*, the source of English **naval** and **navy**.

What you've built

The way over water.

Your turn

- *Say it:* *naukā*
- *Say it:* *naukā*, once more
- *Say it:* say *naukā*
- *Recall:* say the Sanskrit for a vehicle, then the Sanskrit for a chariot, then say *naukā* again

Before you move on

What does नौका mean? ("A boat".) Say it once more.

75.4 विमानम् (vimānam) — an aeroplane

Before the new one: say the Sanskrit for a chariot, then the Sanskrit for a boat.

You'll want to know: विमानम्

विमानम् (*vimānam*) — "an aeroplane". In the old stories it was a vehicle of the gods that crossed the आकाशः.

The word, taken apart — its roots and family

Vimāna is built from *vi* and the root √mā, "to measure": first "measuring out, traversing", then the self-moving aerial car of the gods (MW, CDIAL 11823). Its use for an aeroplane is modern.

What you've built

The vehicle of the sky.

Your turn

- *Say it: vimānam*
- *Say it: vimānam*, once more
- *Say it:* say *vimānam*
- *Recall:* say the Sanskrit for a chariot, then the Sanskrit for a boat, then say *vimānam* again

Before you move on

What does विमानम् mean? ("An aeroplane".) Say it once more.

75.5 प्रविशति (praviśati) — enters, goes in

Before the new one: say the Sanskrit for a boat, then the Sanskrit for an aeroplane.

You'll want to know: प्रविशति

प्रविशति (*praviśati*) — "(he, she) goes in". गृहं प्रविशति — "goes into the house".

The word, taken apart — its roots and family

Praviśati is built from *pra*, "forward", and the root √viś, "to enter, settle" (MW), the root of *upaviśati*. It lives on as Hindi *paisnā*, "to enter" (CDIAL 8803).

What you've built

The verb of every doorway.

Your turn

- *Say it: praviśati*
- *Say it: praviśati*, once more
- *Say it:* say *gṛhaṁ praviśati*
- *Recall:* say the Sanskrit for a boat, then the Sanskrit for an aeroplane, then say *praviśati* again

Before you move on

What does प्रविशति mean? ("Enters, goes in".) Say it once more.

Chapter 76

Rain, Cold and Heat

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name rain, the cold, the heat, spring and summer.
>
> *Complete the last lesson of chapter 76: I can name rain, the cold, the heat, spring and summer.*

76.1 वर्षा (varṣā) — rain

Before the new one: say the Sanskrit for an aeroplane, then the Sanskrit for he goes in.

You'll want to know: वर्षा

वर्षा (*varṣā*) — "rain", and in the plural the rainy season.

The word, taken apart — its roots and family

Varṣā is built on the root √vṛṣ, "to rain" (MW, CDIAL 11396). Its sister *varṣa*, "rain; a year", counted in rainy seasons, lives on as Hindi *baras*, "year" (CDIAL 11392).

What you've built

Water from the sky.

Your turn

- *Say it: varṣā*
- *Say it: varṣā*, once more
- *Say it:* say *varṣā*
- *Recall:* say the Sanskrit for an aeroplane, then the Sanskrit for he goes in, then say *varṣā* again

Before you move on

What does वर्षा mean? ("Rain".) Say it once more.

76.2 शीतम् (śītam) — cold

Before the new one: say the Sanskrit for he goes in, then the Sanskrit for rain.

You'll want to know: शीतम्

शीतम् (*śītam*) — "cold". शीतम् अस्ति — "it is cold".

The word, taken apart — its roots and family

Śīta is built on the root √śyai, "to congeal, freeze" (MW, CDIAL 12485), and is already in the Rigveda.

What you've built

The weather of the snow.

Your turn

- *Say it: śītam*
- *Say it: śītam*, once more
- *Say it:* say *śītam asti*
- *Recall:* say the Sanskrit for he goes in, then the Sanskrit for rain, then say *śītam* again

Before you move on

What does शीतम् mean? ("Cold".) Say it once more.

76.3 उष्णम् (uṣṇam) — heat

Before the new one: say the Sanskrit for rain, then the Sanskrit for the cold.

You'll want to know: उष्णम्

उष्णम् (*uṣṇam*) — "heat", "hot". उष्णम् अस्ति — "it is hot".

The word, taken apart — its roots and family

Uṣṇa is a Rigvedic word for "hot", which MW files under the root √uṣ, "to burn" (CDIAL 2389).

What you've built

The other side of cold.

Your turn

- *Say it: uṣṇam*
- *Say it: uṣṇam*, once more
- *Say it:* say *uṣṇam asti*
- *Recall:* say the Sanskrit for rain, then the Sanskrit for the cold, then say *uṣṇam* again

Before you move on

What does उष्णम् mean? ("Heat".) Say it once more.

76.4 वसन्तः (vasantaḥ) — spring

Before the new one: say the Sanskrit for the cold, then the Sanskrit for the heat.

You'll want to know: वसन्तः

वसन्तः (*vasantaḥ*) — "spring", the first ऋतुः of the year, when the पुष्पम् opens.

The word, taken apart — its roots and family

MW explains *vasanta* as "the brilliant season", from the root √vas, "to shine" (CDIAL 11439). It is inherited: MW compares Greek *ear* and Latin *vēr*, "spring", the source of English **vernal**.

What you've built

The flower season.

Your turn

- *Say it: vasantaḥ*
- *Say it: vasantaḥ*, once more
- *Say it:* say *vasantaḥ*
- *Recall:* say the Sanskrit for the cold, then the Sanskrit for the heat, then say *vasantaḥ* again

Before you move on

What does वसन्तः mean? ("Spring".) Say it once more.

76.5 ग्रीष्मः (grīṣmaḥ) — summer

Before the new one: say the Sanskrit for the heat, then the Sanskrit for spring.

You'll want to know: ग्रीष्मः

ग्रीष्मः (*grīṣmaḥ*) — "summer", the ऋतुः of उष्णम्.

The word, taken apart — its roots and family

Grīṣma is already in the Rigveda. The native grammarians derive it from the root √gras, "to devour" (MW). MW also compares an Irish word for fire, a comparison CDIAL 4391 does not take up, so its origin

is not settled.

What you've built

The hot season.

Your turn

- *Say it: grīṣmaḥ*
- *Say it: grīṣmaḥ*, once more
- *Say it:* say *grīṣmaḥ*
- *Recall:* say the Sanskrit for the heat, then the Sanskrit for spring, then say *grīṣmaḥ* again

Before you move on

What does ग्रीष्मः mean? ("Summer".) Say it once more.

Chapter 77

Rooms of the House

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can name a room, the kitchen, the bathroom, the roof and a key.
>
> *Complete the last lesson of chapter 77: I can name a room, the kitchen, the bathroom, the roof and a key.*

77.1 प्रकोष्ठः (prakoṣṭhaḥ) — a room

Before the new one: say the Sanskrit for spring, then the Sanskrit for summer.

You'll want to know: प्रकोष्ठः

प्रकोष्ठः (*prakoṣṭhaḥ*) — "a room" of a गृहम्.

The word, taken apart — its roots and family

Prakoṣṭha is built from *pra* and *koṣṭha*, "an enclosure, an inner part" (MW). MW records it as a court in a house and as a room by a palace gate, as well as "forearm" (CDIAL 8450); the plain sense "room" grew out of these.

What you've built

One part of the house.

Your turn

- *Say it: prakoṣṭhaḥ*
- *Say it: prakoṣṭhaḥ*, once more
- *Say it:* say *prakoṣṭhaḥ*
- *Recall:* say the Sanskrit for spring, then the Sanskrit for summer, then say *prakoṣṭhaḥ* again

Before you move on

What does प्रकोष्ठः mean? ("A room".) Say it once more.

77.2 पाकशाला (pākaśālā) — the kitchen

Before the new one: say the Sanskrit for summer, then the Sanskrit for a room.

You'll want to know: पाकशाला

पाकशाला (*pākaśālā*) — "the kitchen": पाक, "cooking", the noun of पचति, with शाला, "hall".

The word, taken apart — its roots and family

Pākaśālā is a compound of *pāka*, "cooking", from the root √pac, and *śālā*, "hall, house"; MW records it as "cooking-room". *Śālā* is inherited: MW compares German *Saal* and English **hall**.

What you've built

The cooking hall.

Your turn

- *Say it: pākaśālā*
- *Say it: pākaśālā*, once more
- *Say it:* ask *pākaśālā kutra?*

- *Recall:* say the Sanskrit for summer, then the Sanskrit for a room, then say *pākaśālā* again

Before you move on

What does पाकशाला mean? ("The kitchen".) Say it once more.

77.3 स्नानगृहम् (snānagṛham) — the bathroom

Before the new one: say the Sanskrit for a room, then the Sanskrit for the kitchen.

You'll want to know: स्नानगृहम्

स्नानगृहम् (*snānagṛham*) — "the bathroom": स्नान, "bathing", with गृहम्, "house", which you know.

The word, taken apart — its roots and family

Snānagṛha is built from *snāna*, "bathing", from the root √snā, and *gṛha*, "house". It is not a modern coinage: MW records it as "bathing-house, bath-room" in the Mahābhārata.

What you've built

The bathing house.

Your turn

- *Say it: snānagṛham*
- *Say it: snānagṛham*, once more
- *Say it:* ask *snānagṛham kutra?*
- *Recall:* say the Sanskrit for a room, then the Sanskrit for the kitchen, then say *snānagṛham* again

Before you move on

What does स्नानगृहम् mean? ("The bathroom".) Say it once more.

77.4 छदिः (chadiḥ) — the roof

Before the new one: say the Sanskrit for the kitchen, then the Sanskrit for the bathroom.

You'll want to know: छदिः

छदिः (*chadiḥ*) — "the roof", over every प्रकोष्ठः of the house.

The word, taken apart — its roots and family

Chadiḥ is built on the root √chad, "to cover" (MW): the roof is the covering, as the *chattra* is.

What you've built

Outside, but still home.

Your turn

- *Say it: chadiḥ*
- *Say it: chadiḥ*, once more
- *Say it:* say *prāṅgaṇam*
- *Recall:* say the Sanskrit for the kitchen, then the Sanskrit for the bathroom, then say *chadiḥ* again

Before you move on

What does छदिः mean? ("The roof".) Say it once more.

77.5 कुञ्चिका (kuñcikā) — a key

Before the new one: say the Sanskrit for the bathroom, then the Sanskrit for the roof.

You'll want to know: कुञ्चिका

कुञ्चिका (*kuñcikā*) — "a key". कुञ्चिका कुत्र? — "where is the key?"

The word, taken apart — its roots and family

MW files *kuñcikā* under the root √kuñc, "to bend, curve"; CDIAL 3225 sets it under √kuc, with a question mark. It lives on as Punjabi *kuñjī*, "key", which Hindi borrowed.

What you've built

The thing that is always lost.

Your turn

- *Say it: kuñcikā*
- *Say it: kuñcikā*, once more
- *Say it:* ask *kuñcikā kutra?*
- *Recall:* say the Sanskrit for the bathroom, then the Sanskrit for the roof, then say *kuñcikā* again

Before you move on

What does कुञ्चिका mean? ("A key".) Say it once more.

77.6 How are you, really? — a first pass

Name the roof, then ask where the key is.

Your turn

Say these aloud:

- you have a fever; you have a cough; you have a headache; name illness; wish someone health
- sleep; you are hungry; you are thirsty; rest; all is well
- sorrow, fear, anger, shyness, joy
- the eye, the throat, the belly, the forehead, the tongue
- a nail, the knee, the back, the shoulder, the lip

Before you move on

Fever? (ज्वरः.) Cough? (कासः.) Pain? (पीडा.) Illness? (रोगः.) Health? (आरोग्यम्.) Sleep, hunger, thirst, rest, ease? (निद्रा, क्षुधा, पिपासा, विश्रामः, सुखम्.) Sorrow, fear, anger, shyness, joy? (दुःखम्, भयम्, क्रोधः, लज्जा, हर्षः.) Eye, throat, belly, forehead, tongue? (नेत्रम्, कण्ठः, उदरम्, ललाटम्, जिह्वा.) Nail, knee, back, shoulder, lip? (नखः, जानु, पृष्ठम्, स्कन्धः, ओष्ठः.)

77.7 Doing and going — a second pass

Say the boy runs, then say he walks.

Your turn

Say these aloud:

- the guest sits down; he gets up; a leaf falls
- mother cooks rice; the child sleeps; she washes; he brings water; she gives it to me
- she sings a song; he tells; the child cries; mother is calling; he bows
- he buys fruit; money; ask the price; ask where the shop is; a market
- a vehicle, a chariot, a boat, an aeroplane; he goes into the house
- rain; it is cold; it is hot; spring; summer
- a room; ask where the kitchen and the bathroom are

Before you move on

Runs, walks, sits down, gets up, falls? (धावति, चलति, उपविशति, उत्तिष्ठति, पतति.) Cooks, sleeps, washes, brings, gives? (पचति, स्वपिति, प्रक्षालयति, आनयति, ददाति.) Sings, tells, cries, calls, bows? (गायति, कथयति, रोदिति, आह्वयति, नमति.) Buys? (क्रीणाति.) Money, price, shop, market? (धनम्, मूल्यम्, आपणः, विपणिः.) Vehicle, chariot, boat, aeroplane? (वाहनम्, रथः, नौका, विमानम्.) Goes in? (प्रविशति.) Rain, cold, heat, spring, summer? (वर्षा, शीतम्, उष्णम्, वसन्तः, ग्रीष्मः.) Room, kitchen, bathroom, roof, key? (प्रकोष्ठः, पाकशाला, स्नानगृहम्, छदिः,

कुञ्चिका.)

Chapter 78

Mango, Banana and Bread

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a mango, a banana, oil, flatbread and sweet rice pudding.
>
> *Complete the last lesson of chapter 78: I can name a mango, a banana, oil, flatbread and sweet rice pudding.*

78.1 आम्रम् (āmram) — a mango

Before the new one: say the Sanskrit for the roof, then the Sanskrit for a key.

You'll want to know: आम्रम्

आम्रम् (*āmram*) — "a mango", the फलम् of summer.

The word, taken apart — its roots and family

Āmra is already in the Śatapatha Brāhmaṇa, but its origin is unclear: MW gives no root for it. It lives on as Hindi *ām*, "mango" (CDIAL 1268).

What you've built

The summer fruit.

Your turn

- *Say it:* *āmram*
- *Say it:* *āmram*, once more
- *Say it:* say *āmram*
- *Recall:* say the Sanskrit for the roof, then the Sanskrit for a key, then say *āmram* again

Before you move on

What does आम्रम् mean? ("A mango".) Say it once more.

78.2 कदलीफलम् (kadalīphalam) — a banana

Before the new one: say the Sanskrit for a key, then the Sanskrit for a mango.

You'll want to know: कदलीफलम्

कदलीफलम् (*kadalīphalam*) — "a banana": कदली, "the banana plant", with फलम्, "fruit".

The word, taken apart — its roots and family

Kadalīphala is a compound of *kadalī*, "the banana plant", and *phala*, "fruit". CDIAL 2712 takes *kadalī* as borrowed from an Austroasiatic language; it lives on as Hindi *kelā*, "banana".

What you've built

Plant plus fruit.

Your turn

- *Say it:* *kadalīphalam*
- *Say it:* *kadalīphalam*, once more
- *Say it:* say *kadalīphalam*

- *Recall:* say the Sanskrit for a key, then the Sanskrit for a mango, then say *kadalīphalam* again

You'll want to know: तैलम्

तैलम् (*tailam*) — "oil", for cooking and for the दीपः.

The word, taken apart — its roots and family

Taila is built from *tila*, "sesame": oil was first sesame oil (MW, CDIAL 5958). It lives on as Hindi *tel*, "oil".

What you've built

What the lamp burns.

Your turn

- *Say it: tailam*
- *Say it: tailam*, once more
- *Say it:* say *tailam*
- *Recall:* say the Sanskrit for a mango, then the Sanskrit for a banana, then say *tailam* again

Before you move on

What does तैलम् mean? ("Oil".) Say it once more.

78.4 रोटिका (roṭikā) — flatbread

Before the new one: say the Sanskrit for a banana, then the Sanskrit for oil.

You'll want to know: रोटिका

रोटिका (*roṭikā*) — "flatbread", eaten with शाकम्.

The word, taken apart — its roots and family

Roṭikā is a late word, recorded in a medical text (MW). CDIAL 10837 sets it beside an unattested **roṭṭa*, "bread", the source of Hindi *roṭī*; where that word came from is not settled.

What you've built

The bread beside the rice.

Your turn

- *Say it: roṭikā*
- *Say it: roṭikā*, once more
- *Say it:* say *roṭikā*
- *Recall:* say the Sanskrit for a banana, then the Sanskrit for oil, then say *roṭikā* again

Before you move on

What does रोटिका mean? ("Flatbread".) Say it once more.

78.5 पायसम् (pāyasam) — sweet rice pudding

Before the new one: say the Sanskrit for oil, then the Sanskrit for flatbread.

You'll want to know: पायसम्

पायसम् (*pāyasam*) — rice cooked in क्षीरम् with शर्करा: the sweet of every festival.

The word, taken apart — its roots and family

Pāyasa is built from *payas*, "milk, juice": first "made with milk", then rice boiled in milk (MW, CDIAL 8099).

What you've built

The festival sweet.

Your turn

- *Say it: pāyasam*
- *Say it: pāyasam*, once more
- *Say it:* say *pāyasam*
- *Recall:* say the Sanskrit for oil, then the Sanskrit for flatbread, then say *pāyasam* again

Before you move on

What does पायसम् mean? ("Sweet rice pudding".) Say it once more.

Chapter 79

Elephant, Horse and Camel

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name an elephant, a horse, a camel, a mouse and a cat.

79.1 गजः (gajaḥ) — an elephant

Before the new one: say the Sanskrit for flatbread, then the Sanskrit for sweet rice pudding.

You'll want to know: गजः

गजः (*gajaḥ*) — "an elephant".

The word, taken apart — its roots and family

Gaja appears from the Ṣaḍviṃśa Brāhmaṇa onward (CDIAL 3956). Its origin is not settled: MW gives no root for it.

What you've built

The biggest animal on land.

Your turn

- *Say it: gajaḥ*
- *Say it: gajaḥ*, once more
- *Say it:* say *gajaḥ*
- *Recall:* say the Sanskrit for flatbread, then the Sanskrit for sweet rice pudding, then say *gajaḥ* again

Before you move on

What does गजः mean? ("An elephant".) Say it once more.

79.2 अश्वः (aśvaḥ) — a horse

Before the new one: say the Sanskrit for sweet rice pudding, then the Sanskrit for an elephant.

You'll want to know: अश्वः

अश्वः (*aśvaḥ*) — "a horse", the animal that pulls a रथः.

The word, taken apart — its roots and family

Aśva is inherited: MW compares Avestan *aspa*, Latin *equus* and Greek *hippos*, the source of English **equine** and **hippodrome** (CDIAL 920).

What you've built

What pulls the chariot.

Your turn

- *Say it: aśvaḥ*
- *Say it: aśvaḥ*, once more
- *Say it:* say *aśvaḥ*
- *Recall:* say the Sanskrit for sweet rice pudding, then the Sanskrit for an elephant, then say *aśvaḥ* again

Before you move on

What does अश्वः mean? ("A horse".) Say it once more.

79.3 उष्ट्रः (uṣṭraḥ) — a camel

Before the new one: say the Sanskrit for an elephant, then the Sanskrit for a horse.

You'll want to know: उष्ट्रः

उष्ट्रः (*uṣṭraḥ*) — "a camel", the animal of the desert.

The word, taken apart — its roots and family

Uṣṭra meant a buffalo in the Rigveda and a camel only from the epics on (MW, CDIAL 2387). It lives on as Hindi *ūṃṭ*, "camel".

What you've built

The animal that crosses the sand.

Your turn

- *Say it: uṣṭraḥ*
- *Say it: uṣṭraḥ*, once more
- *Say it:* say *uṣṭraḥ*
- *Recall:* say the Sanskrit for an elephant, then the Sanskrit for a horse, then say *uṣṭraḥ* again

Before you move on

What does उष्ट्रः mean? ("A camel".) Say it once more.

79.4 मूषकः (mūṣakaḥ) — a mouse

Before the new one: say the Sanskrit for a horse, then the Sanskrit for a camel.

You'll want to know: मूषकः

मूषकः (*mūṣakaḥ*) — "a mouse", the small animal of the गृहम्.

The word, taken apart — its roots and family

Mūṣaka means both "thief" and "mouse"; MW files it under the root √mūṣ, "to steal". It is inherited: MW compares Greek *mus*, Latin *mūs* and English **mouse**.

What you've built

The small one in the house.

Your turn

- *Say it: mūṣakaḥ*
- *Say it: mūṣakaḥ*, once more
- *Say it:* say *mūṣakaḥ*
- *Recall:* say the Sanskrit for a horse, then the Sanskrit for a camel, then say *mūṣakaḥ* again

Before you move on

What does मूषकः mean? ("A mouse".) Say it once more.

79.5 मार्जारः (mārjāraḥ) — a cat

Before the new one: say the Sanskrit for a camel, then the Sanskrit for a mouse.

You'll want to know: मार्जारः

मार्जारः (*mārjāraḥ*) — "a cat", the one that chases the मूषकः.

The word, taken apart — its roots and family

MW explains *mārjāra* as probably "the cleaner", from the root √mṛj, "to wipe, clean", after the cat's habit of washing itself (CDIAL 10082).

What you've built

The mouse-chaser.

Your turn

- *Say it:* *mārjāraḥ*
- *Say it:* *mārjāraḥ*, once more
- *Say it:* say *mārjāraḥ*
- *Recall:* say the Sanskrit for a camel, then the Sanskrit for a mouse, then say *mārjāraḥ* again

Before you move on

What does मार्जारः mean? ("A cat".) Say it once more.

Chapter 80

Crow, Parrot and Peacock

> ***By the end of this chapter:*** I can name a crow, a parrot, a peacock, a tortoise and a frog.
>
> *Complete the last lesson of chapter 80: I can name a crow, a parrot, a peacock, a tortoise and a frog.*

80.1 काकः (kākaḥ) — a crow

Before the new one: say the Sanskrit for a mouse, then the Sanskrit for a cat.

You'll want to know: काकः

काकः (*kākaḥ*) — "a crow", a black विहगः. Say it and hear its call.

The word, taken apart — its roots and family

Kāka is an imitation of the crow's call (MW, CDIAL 2993). It lives on as Hindi *kauā*, "crow".

What you've built

The bird that names itself.

Your turn

- *Say it: kākaḥ*
- *Say it: kākaḥ*, once more
- *Say it:* say *kākaḥ*
- *Recall:* say the Sanskrit for a mouse, then the Sanskrit for a cat, then say *kākaḥ* again

Before you move on

What does काकः mean? ("A crow".) Say it once more.

80.2 शुकः (śukaḥ) — a parrot

Before the new one: say the Sanskrit for a cat, then the Sanskrit for a crow.

You'll want to know: शुकः

शुकः (*śukaḥ*) — "a parrot", the हरितः bird that repeats words.

The word, taken apart — its roots and family

MW takes *śuka* as probably "the bright one", from the root √śuc, "to shine", after the parrot's green. It is Rigvedic, and lives on as Hindi *suwā*, "parrot" (CDIAL 12503).

What you've built

The green bird.

Your turn

- *Say it: śukaḥ*
- *Say it: śukaḥ*, once more
- *Say it:* say *śukaḥ*
- *Recall:* say the Sanskrit for a cat, then the Sanskrit for a crow, then say *śukaḥ* again

Before you move on

What does शुकः mean? ("A parrot".) Say it once more.

80.3 मयूरः (mayūraḥ) — a peacock

Before the new one: say the Sanskrit for a crow, then the Sanskrit for a parrot.

You'll want to know: मयूरः

मयूरः (*mayūraḥ*) — "a peacock", who dances when the वर्षा comes.

The word, taken apart — its roots and family

The origin of *mayūra* is disputed. CDIAL 9865 reports three proposals: a Dravidian source (compare Tamil *mayil*, DEDR 4642), an Austroasiatic one, and an old Indo-Iranian colour word. It lives on as Hindi *mor*, "peacock".

What you've built

The dancing bird.

Your turn

- *Say it: mayūraḥ*
- *Say it: mayūraḥ*, once more
- *Say it:* say *mayūraḥ*
- *Recall:* say the Sanskrit for a crow, then the Sanskrit for a parrot, then say *mayūraḥ* again

Before you move on

What does मयूरः mean? ("A peacock".) Say it once more.

80.4 कूर्मः (kūrmaḥ) — a tortoise

Before the new one: say the Sanskrit for a parrot, then the Sanskrit for a peacock.

You'll want to know: कूर्मः

कूर्मः (*kūrmaḥ*) — "a tortoise", slow, with its house on its पृष्ठम्.

The word, taken apart — its roots and family

Kūrma is an old word, already in the Vājasaneyi Saṃhitā (CDIAL 3414), but its origin is not settled: neither MW nor CDIAL gives it a root.

What you've built

The slow one.

Your turn

- *Say it: kūrmaḥ*
- *Say it: kūrmaḥ*, once more
- *Say it:* say *kūrmaḥ*
- *Recall:* say the Sanskrit for a parrot, then the Sanskrit for a peacock, then say *kūrmaḥ* again

Before you move on

What does कूर्मः mean? ("A tortoise".) Say it once more.

80.5 मण्डूकः (maṇḍūkaḥ) — a frog

Before the new one: say the Sanskrit for a peacock, then the Sanskrit for a tortoise.

You'll want to know: मण्डूकः

मण्डूकः (*maṇḍūkaḥ*) — "a frog", loudest in वर्षा.

The word, taken apart — its roots and family

Maṇḍūka is already in the Rigveda, but its origin is not settled. CDIAL 9746 notes that its modern forms are unusually irregular, bent by taboo and by imitation of the frog's sound.

What you've built

The rain singer.

Your turn

- *Say it: maṇḍūkaḥ*
- *Say it: maṇḍūkaḥ*, once more
- *Say it:* say *maṇḍūkaḥ*
- *Recall:* say the Sanskrit for a peacock, then the Sanskrit for a tortoise, then say *maṇḍūkaḥ* again

Before you move on

What does मण्डूकः mean? ("A frog".) Say it once more.

Chapter 81

Tree, Seed and Root

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a tree, a seed, a root, a garden and a forest.
>
> *Complete the last lesson of chapter 81: I can name a tree, a seed, a root, a garden and a forest.*

81.1 वृक्षः (vṛkṣaḥ) — a tree

Before the new one: say the Sanskrit for a tortoise, then the Sanskrit for a frog.

You'll want to know: वृक्षः

वृक्षः (*vṛkṣaḥ*) — "a tree", the everyday word beside तरुः.

The word, taken apart — its roots and family

Vṛkṣa is already in the Rigveda (CDIAL 12067). MW offers three guesses, a root √bṛh "to grow", another √bṛh "to root up", or √vraśc "to fell", so its origin is not settled.

What you've built

A second word for tree.

Your turn

- *Say it: vṛkṣaḥ*
- *Say it: vṛkṣaḥ*, once more
- *Say it:* say *vṛkṣaḥ*
- *Recall:* say the Sanskrit for a tortoise, then the Sanskrit for a frog, then say *vṛkṣaḥ* again

Before you move on

What does वृक्षः mean? ("A tree".) Say it once more.

81.2 बीजम् (bījam) — a seed

Before the new one: say the Sanskrit for a frog, then the Sanskrit for a tree.

You'll want to know: बीजम्

बीजम् (*bījam*) — "a seed", the start of every वृक्षः.

The word, taken apart — its roots and family

Bīja is already in the Rigveda, and MW calls it "of doubtful origin". It lives on as Gujarati *bī*, "seed" (CDIAL 9250).

What you've built

Where a tree begins.

Your turn

- *Say it: bījam*
- *Say it: bījam*, once more
- *Say it:* say *bījam*
- *Recall:* say the Sanskrit for a frog, then the Sanskrit for a tree, then say *bījam* again

Before you move on

What does बीजम् mean? ("A seed".) Say it once more.

81.3 मूलम् (mūlam) — a root

Before the new one: say the Sanskrit for a tree, then the Sanskrit for a seed.

You'll want to know: मूलम्

मूलम् (*mūlam*) — "a root", and also "the origin" of anything.

The word, taken apart — its roots and family

MW explains *mūla* as probably "firmly fixed", but CDIAL 10250 thinks its sound variation points to a non-Aryan, perhaps Dravidian, origin, so the question is not settled. Hindi *mūlī*, "radish", the root vegetable, comes from it.

What you've built

What holds the tree down.

Your turn

- *Say it: mūlam*
- *Say it: mūlam*, once more
- *Say it:* say *mūlam*
- *Recall:* say the Sanskrit for a tree, then the Sanskrit for a seed, then say *mūlam* again

Before you move on

What does मूलम् mean? ("A root".) Say it once more.

81.4 उद्यानम् (udyānam) — a garden

Before the new one: say the Sanskrit for a seed, then the Sanskrit for a root.

You'll want to know: उद्यानम्

उद्यानम् (*udyānam*) — "a garden", full of पुष्पम् and लता.

The word, taken apart — its roots and family

Udyāna is built from *ud*, "out", and the root √yā, "to go": first "going out", then the park one walks out to (MW, CDIAL 2052).

What you've built

The planted place.

Your turn

- *Say it: udyānam*
- *Say it: udyānam*, once more
- *Say it:* say *udyānam*
- *Recall:* say the Sanskrit for a seed, then the Sanskrit for a root, then say *udyānam* again

Before you move on

What does उद्यानम् mean? ("A garden".) Say it once more.

81.5 अरण्यम् (araṇyam) — a forest, the wild

Before the new one: say the Sanskrit for a root, then the Sanskrit for a garden.

You'll want to know: अरण्यम्

अरण्यम् (*araṇyam*) — "the wild forest", deeper than a वनम्.

The word, taken apart — its roots and family

Araṇya is built from *araṇa*, "foreign, distant": in the Rigveda it is a far-off land, later the wilderness (MW, CDIAL 600). It lives on as Hindi *ran*, "forest, wild land".

What you've built

The unplanted place.

Your turn

- *Say it: araṇyam*
- *Say it: araṇyam*, once more
- *Say it:* say *araṇyam*
- *Recall:* say the Sanskrit for a root, then the Sanskrit for a garden, then say *araṇyam* again

Before you move on

What does अरण्यम् mean? ("A forest, the wild".) Say it once more.

Chapter 82

Lake, Well and Shore

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a lake, a well, a pond, an island and a shore.
>
> *Complete the last lesson of chapter 82: I can name a lake, a well, a pond, an island and a shore.*

82.1 सरः (saraḥ) — a lake

Before the new one: say the Sanskrit for a garden, then the Sanskrit for a forest.

You'll want to know: सरः

सरः (*saraḥ*) — "a lake", still जलम् where the lotus grows.

The word, taken apart — its roots and family

Saras is built on the root √sṛ, "to flow, run": MW glosses it "anything flowing", and so a lake or a pool. It is already in the Rigveda.

What you've built

Still water.

Your turn

- *Say it: saraḥ*

- *Say it:* *saraḥ*, once more
- *Say it:* say *saraḥ*
- *Recall:* say the Sanskrit for a garden, then the Sanskrit for a forest, then say *saraḥ* again

Before you move on

What does सरः mean? ("A lake".) Say it once more.

82.2 कूपः (kūpaḥ) — a well

Before the new one: say the Sanskrit for a forest, then the Sanskrit for a lake.

You'll want to know: कूपः

कूपः (*kūpaḥ*) — "a well", water from under the ground.

The word, taken apart — its roots and family

Kūpa first meant a hole or hollow, in the Rigveda, and then a well (CDIAL 3400). MW tentatively splits it into *ku* + *ap*, "water", but that is a guess. It lives on as Hindi *kūā*, "well".

What you've built

Water from below.

Your turn

- *Say it:* *kūpaḥ*
- *Say it:* *kūpaḥ*, once more
- *Say it:* say *kūpaḥ*
- *Recall:* say the Sanskrit for a forest, then the Sanskrit for a lake, then say *kūpaḥ* again

Before you move on

What does कूपः mean? ("A well".) Say it once more.

82.3 तडागः (taḍāgaḥ) — a pond, a tank

Before the new one: say the Sanskrit for a lake, then the Sanskrit for a well.

You'll want to know: तडागः

तडागः (*taḍāgaḥ*) — "a pond", a village tank with steps.

The word, taken apart — its roots and family

Taḍāga appears in the ritual handbooks and the epics (CDIAL 5635), but its origin is unclear: MW gives no root. It lives on as Hindi *talāu*, "pond".

What you've built

The village water.

Your turn

- *Say it: taḍāgaḥ*
- *Say it: taḍāgaḥ*, once more
- *Say it:* say *taḍāgaḥ*
- *Recall:* say the Sanskrit for a lake, then the Sanskrit for a well, then say *taḍāgaḥ* again

Before you move on

What does तडागः mean? ("A pond, a tank".) Say it once more.

82.4 द्वीपः (dvīpaḥ) — an island

Before the new one: say the Sanskrit for a well, then the Sanskrit for a pond.

You'll want to know: द्वीपः

द्वीपः (*dvīpaḥ*) — "an island", land with water on both sides: द्वि, "two".

The word, taken apart — its roots and family

Dvīpa is built from *dvi*, "two", and *ap*, "water": land with water on both sides (MW, CDIAL 6691).

What you've built

Land in the water.

Your turn

- *Say it: dvīpaḥ*
- *Say it: dvīpaḥ*, once more
- *Say it:* say *dvīpaḥ*
- *Recall:* say the Sanskrit for a well, then the Sanskrit for a pond, then say *dvīpaḥ* again

Before you move on

What does द्वीपः mean? ("An island".) Say it once more.

82.5 तीरम् (tīram) — a shore, a bank

Before the new one: say the Sanskrit for a pond, then the Sanskrit for an island.

You'll want to know: तीरम्

तीरम् (*tīram*) — "a bank", "a shore", the edge of a नदी or the समुद्रः.

The word, taken apart — its roots and family

Tīra is built on the root √tṝ, "to cross over" (MW): the bank is where a crossing ends. It lives on as Hindi *tīr*, "bank" (CDIAL 5842).

What you've built

The water's edge.

Your turn

- *Say it: tīram*
- *Say it: tīram*, once more
- *Say it:* say *nadītīram*
- *Recall:* say the Sanskrit for a pond, then the Sanskrit for an island, then say *tīram* again

Before you move on

What does तीरम् mean? ("A shore, a bank".) Say it once more.

Chapter 83

At School

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a school, a student, a teacher, a lesson and an exam.
>
> *Complete the last lesson of chapter 83: I can name a school, a student, a teacher, a lesson and an exam.*

83.1 विद्यालयः (vidyālayaḥ) — a school

Before the new one: say the Sanskrit for an island, then the Sanskrit for a shore.

You'll want to know: विद्यालयः

विद्यालयः (*vidyālayaḥ*) — "a school": विद्या, "knowledge", with आलयः, "home". A school is a home of knowledge.

The word, taken apart — its roots and family

Vidyālaya is built from *vidyā*, "knowledge", from the root √vid, and *ālaya*, "a dwelling". MW records it as "seat of learning, a school" only from a nineteenth-century dictionary, so the everyday school sense is recent.

What you've built

Knowledge plus home.

Your turn

- *Say it: vidyālayaḥ*
- *Say it: vidyālayaḥ*, once more
- *Say it:* say *vidyālayaḥ*
- *Recall:* say the Sanskrit for an island, then the Sanskrit for a shore, then say *vidyālayaḥ* again

Before you move on

What does विद्यालयः mean? ("A school".) Say it once more.

83.2 छात्रः (chātraḥ) — a student

Before the new one: say the Sanskrit for a shore, then the Sanskrit for a school.

You'll want to know: छात्रः

छात्रः (*chātraḥ*) — "a student", the everyday word beside शिष्यः.

The word, taken apart — its roots and family

The grammarians explain *chātra* as built on *chatra*, "parasol": the pupil whose habit is to shield his teacher's faults (Apte). That is the traditional account; the origin is not settled.

What you've built

Who sits in a school.

Your turn

- *Say it: chātraḥ*
- *Say it: chātraḥ*, once more
- *Say it:* say *chātraḥ*
- *Recall:* say the Sanskrit for a shore, then the Sanskrit for a school, then say *chātraḥ* again

Before you move on

What does छात्रः mean? ("A student".) Say it once more.

83.3 अध्यापकः (adhyāpakaḥ) — a teacher

Before the new one: say the Sanskrit for a school, then the Sanskrit for a student.

You'll want to know: अध्यापकः

अध्यापकः (*adhyāpakaḥ*) — "a teacher", the school word beside गुरुः.

The word, taken apart — its roots and family

Adhyāpaka is built on the causative of *adhi* + the root √i, "to go over, study": "one who makes others study" (MW, CDIAL 278). Worn down, it became *jhā*, the name of a Maithili Brahman community.

What you've built

Who teaches the student.

Your turn

- *Say it: adhyāpakaḥ*
- *Say it: adhyāpakaḥ*, once more
- *Say it:* say *adhyāpakaḥ*
- *Recall:* say the Sanskrit for a school, then the Sanskrit for a student, then say *adhyāpakaḥ* again

Before you move on

What does अध्यापकः mean? ("A teacher".) Say it once more.

83.4 पाठः (pāṭhaḥ) — a lesson

Before the new one: say the Sanskrit for a student, then the Sanskrit for a teacher.

You'll want to know: पाठः

पाठः (*pāṭhaḥ*) — "a lesson", what is read: it is the noun of पठति.

The word, taken apart — its roots and family

Pāṭha is built on the root √paṭh, "to read or recite aloud" (MW, CDIAL 8035): a lesson is what is recited.

What you've built

Read, as a noun.

Your turn

- *Say it: pāṭhaḥ*
- *Say it: pāṭhaḥ*, once more
- *Say it:* say *pāṭhaḥ*
- *Recall:* say the Sanskrit for a student, then the Sanskrit for a teacher, then say *pāṭhaḥ* again

Before you move on

What does पाठः mean? ("A lesson".) Say it once more.

83.5 परीक्षा (parīkṣā) — an exam, a test

Before the new one: say the Sanskrit for a teacher, then the Sanskrit for a lesson.

You'll want to know: परीक्षा

परीक्षा (*parīkṣā*) — "an exam", "a test": looking all around a thing.

The word, taken apart — its roots and family

Parīkṣā is built from *pari*, "around", and the root √īkṣ, "to look": to examine is to look all around a thing (MW, CDIAL 7904).

What you've built

The end of the term.

Your turn

- *Say it: parīkṣā*
- *Say it: parīkṣā*, once more
- *Say it:* say *parīkṣā*
- *Recall:* say the Sanskrit for a teacher, then the Sanskrit for a lesson, then say *parīkṣā* again

Before you move on

What does परीक्षा mean? ("An exam, a test".) Say it once more.

Chapter 84

Temple, Hospital and Field

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a temple, a hospital and a field, a farmer and a merchant.
>
> *Complete the last lesson of chapter 84: I can name a temple, a hospital and a field, a farmer and a merchant.*

84.1 मन्दिरम् (mandiram) — a temple

Before the new one: say the Sanskrit for a lesson, then the Sanskrit for an exam.

You'll want to know: मन्दिरम्

मन्दिरम् (*mandiram*) — "a temple". **मन्दिरम् कुत्र?** — "where is the temple?"

The word, taken apart — its roots and family

Mandira first meant any place where one stays, a dwelling or a palace, and only then a temple. MW and CDIAL 9852 file it under the root √mand, "to tarry, stay".

What you've built

A place of worship.

Your turn

- *Say it: mandiram*
- *Say it: mandiram*, once more
- *Say it:* ask *mandiram kutra?*
- *Recall:* say the Sanskrit for a lesson, then the Sanskrit for an exam, then say *mandiram* again

Before you move on

What does मन्दिरम् mean? ("A temple".) Say it once more.

84.2 चिकित्सालयः (cikitsālayaḥ) — a hospital

Before the new one: say the Sanskrit for an exam, then the Sanskrit for a temple.

You'll want to know: चिकित्सालयः

चिकित्सालयः (*cikitsālayaḥ*) — "a hospital": चिकित्सा, "treatment", with the same आलयः, "home", as विद्यालयः.

The word, taken apart — its roots and family

Cikitsālaya is built from *cikitsā*, "medical treatment", a noun MW files under the root √cit, "to perceive, attend to", and *ālaya*, "a dwelling". MW does not list the compound: pairing them for a hospital is modern.

What you've built

Treatment plus home.

Your turn

- *Say it: cikitsālayaḥ*
- *Say it: cikitsālayaḥ*, once more
- *Say it:* ask *cikitsālayaḥ kutra?*

- *Recall:* say the Sanskrit for an exam, then the Sanskrit for a temple, then say *cikitsālayaḥ* again

Before you move on

What does चिकित्सालयः mean? ("A hospital".) Say it once more.

84.3 क्षेत्रम् (kṣetram) — a field

Before the new one: say the Sanskrit for a temple, then the Sanskrit for a hospital.

You'll want to know: क्षेत्रम्

क्षेत्रम् (*kṣetram*) — "a field" of a ग्रामः.

The word, taken apart — its roots and family

Kṣetra is built on the root √kṣi, "to dwell, possess": land held and lived on (MW). It is Rigvedic, and lives on as Hindi *khet*, "field" (CDIAL 3735).

What you've built

Where the rice grows.

Your turn

- *Say it: kṣetram*
- *Say it: kṣetram*, once more
- *Say it:* say *kṣetram*
- *Recall:* say the Sanskrit for a temple, then the Sanskrit for a hospital, then say *kṣetram* again

Before you move on

What does क्षेत्रम् mean? ("A field".) Say it once more.

84.4 कृषकः (kṛṣakaḥ) — a farmer

Before the new one: say the Sanskrit for a hospital, then the Sanskrit for a field.

You'll want to know: कृषकः

कृषकः (*kṛṣakaḥ*) — "a farmer", who works the क्षेत्रम्.

The word, taken apart — its roots and family

Kṛṣaka is built on the root √kṛṣ, "to draw, plough": the farmer is the ploughman (MW, CDIAL 3444). *Kṛṣi*, "farming", comes from the same root.

What you've built

Who works the field.

Your turn

- *Say it: kṛṣakaḥ*
- *Say it: kṛṣakaḥ*, once more
- *Say it:* say *kṛṣakaḥ*
- *Recall:* say the Sanskrit for a hospital, then the Sanskrit for a field, then say *kṛṣakaḥ* again

Before you move on

What does कृषकः mean? ("A farmer".) Say it once more.

84.5 वणिक् (vaṇik) — a merchant

Before the new one: say the Sanskrit for a field, then the Sanskrit for a farmer.

You'll want to know: वणिक्

वणिक् (*vaṇik*) — "a merchant", who keeps the आपणः.

The word, taken apart — its roots and family

Vaṇij is already in the Rigveda, but its origin is unclear: MW gives no root (CDIAL 11230). Its abstract *vaṇijyā*, "trade", lives on as Hindi *banij*.

What you've built

Who keeps the shop.

Your turn

- *Say it: vaṇik*
- *Say it: vaṇik*, once more
- *Say it:* say *vaṇik*
- *Recall:* say the Sanskrit for a field, then the Sanskrit for a farmer, then say *vaṇik* again

Before you move on

What does वणिक् mean? ("A merchant".) Say it once more.

Chapter 85

Days of the Week

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the week, and Monday to Thursday.
>
> *Complete the last lesson of chapter 85: I can name the week, and Monday to Thursday.*

85.1 सप्ताहः (saptāhaḥ) — a week

Before the new one: say the Sanskrit for a farmer, then the Sanskrit for a merchant.

You'll want to know: सप्ताहः

सप्ताहः (*saptāhaḥ*) — "a week": सप्त, "seven", with अह, "day".

The word, taken apart — its roots and family

Saptāha is built from *sapta*, "seven", and *aha*, "day" (MW, CDIAL 13161). In the Brāhmaṇas it names a seven-day rite; the plain sense "week" is later.

What you've built

Seven plus day.

Your turn

- *Say it: saptāhaḥ*
- *Say it: saptāhaḥ*, once more
- *Say it:* say *saptāhaḥ*
- *Recall:* say the Sanskrit for a farmer, then the Sanskrit for a merchant, then say *saptāhaḥ* again

Before you move on

What does सप्ताहः mean? ("A week".) Say it once more.

85.2 सोमवासरः (somavāsaraḥ) — Monday

Before the new one: say the Sanskrit for a merchant, then the Sanskrit for a week.

You'll want to know: सोमवासरः

सोमवासरः (*somavāsaraḥ*) — "Monday": सोम, "the moon", with वासरः, "day".

The word, taken apart — its roots and family

Somavāsara is built from *soma*, the pressed drink and the moon, and *vāsara*, "day", a word MW derives from the root √vas, "to shine". MW records the compound as "Monday".

What you've built

The moon's day.

Your turn

- *Say it: somavāsaraḥ*
- *Say it: somavāsaraḥ*, once more
- *Say it:* say *somavāsaraḥ*
- *Recall:* say the Sanskrit for a merchant, then the Sanskrit for a week, then say *somavāsaraḥ* again

Before you move on

What does सोमवासरः mean? ("Monday".) Say it once more.

85.3 मंगलवासरः (maṅgalavāsaraḥ) — Tuesday

Before the new one: say the Sanskrit for a week, then the Sanskrit for Monday.

You'll want to know: मंगलवासरः

मंगलवासरः (*maṅgalavāsaraḥ*) — "Tuesday", the day of मंगल, Mars.

The word, taken apart — its roots and family

Maṅgalavāsara is built from *maṅgala*, "welfare, auspiciousness", the name given to the planet Mars, and *vāsara*, "day" (MW).

What you've built

Mars's day.

Your turn

- *Say it: maṅgalavāsaraḥ*
- *Say it: maṅgalavāsaraḥ*, once more
- *Say it:* say *maṅgalavāsaraḥ*
- *Recall:* say the Sanskrit for a week, then the Sanskrit for Monday, then say *maṅgalavāsaraḥ* again

Before you move on

What does मंगलवासरः mean? ("Tuesday".) Say it once more.

85.4 बुधवासरः (budhavāsaraḥ) — Wednesday

Before the new one: say the Sanskrit for Monday, then the Sanskrit for Tuesday.

You'll want to know: बुधवासरः

बुधवासरः (*budhavāsaraḥ*) — "Wednesday", the day of बुध, Mercury.

The word, taken apart — its roots and family

Budhavāsara is built from *budha*, "awake, wise", from the root √budh, "to wake", the name given to Mercury, and *vāsara*, "day" (MW). MW records the day as *budhavāra*, with *vāra*, "turn", in place of *vāsara*.

What you've built

Mercury's day.

Your turn

- *Say it: budhavāsaraḥ*
- *Say it: budhavāsaraḥ*, once more
- *Say it:* say *budhavāsaraḥ*
- *Recall:* say the Sanskrit for Monday, then the Sanskrit for Tuesday, then say *budhavāsaraḥ* again

Before you move on

What does बुधवासरः mean? ("Wednesday".) Say it once more.

85.5 गुरुवासरः (guruvāsaraḥ) — Thursday

Before the new one: say the Sanskrit for Tuesday, then the Sanskrit for Wednesday.

You'll want to know: गुरुवासरः

गुरुवासरः (*guruvāsaraḥ*) — "Thursday", the day of Jupiter, called गुरुः, "the teacher" — a word you know.

The word, taken apart — its roots and family

Guruvāsara is built from *guru*, "heavy, the teacher", the name given to Jupiter, and *vāsara*, "day" (MW). MW records the day as *guruvāra*,

with *vāra*, “turn”, in place of *vāsara*.

What you’ve built

The teacher’s day.

Your turn

- *Say it: guruvāsaraḥ*
- *Say it: guruvāsaraḥ*, once more
- *Say it:* say *guruvāsaraḥ*
- *Recall:* say the Sanskrit for Tuesday, then the Sanskrit for Wednesday, then say *guruvāsaraḥ* again

Before you move on

What does गुरुवासरः mean? (“Thursday”.) Say it once more.

Chapter 86

Friday to Sunday, and the Time

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name Friday, Saturday and Sunday, and talk about time and a moment.
>
> *Complete the last lesson of chapter 86: I can name Friday, Saturday and Sunday, and talk about time and a moment.*

86.1 शुक्रवासरः (śukravāsaraḥ) — Friday

Before the new one: say the Sanskrit for Wednesday, then the Sanskrit for Thursday.

You'll want to know: शुक्रवासरः

शुक्रवासरः (*śukravāsaraḥ*) — "Friday", the day of शुक्र, Venus.

The word, taken apart — its roots and family

Śukravāsara is built from *śukra*, "bright", from the root √śuc, "to shine", the name given to Venus, and *vāsara*, "day"; MW records the compound from inscriptions.

What you've built

Venus's day.

Your turn

- *Say it: śukravāsaraḥ*
- *Say it: śukravāsaraḥ*, once more
- *Say it:* say *śukravāsaraḥ*
- *Recall:* say the Sanskrit for Wednesday, then the Sanskrit for Thursday, then say *śukravāsaraḥ* again

Before you move on

What does शुक्रवासरः mean? ("Friday".) Say it once more.

86.2 शनिवासरः (śanivāsaraḥ) — Saturday

Before the new one: say the Sanskrit for Thursday, then the Sanskrit for Friday.

You'll want to know: शनिवासरः

शनिवासरः (*śanivāsaraḥ*) — "Saturday", the day of शनि, Saturn.

The word, taken apart — its roots and family

Śanivāsara is built from *śani*, probably "the slow-moving one", the name given to Saturn, and *vāsara*, "day" (MW).

What you've built

Saturn's day.

Your turn

- *Say it: śanivāsaraḥ*
- *Say it: śanivāsaraḥ*, once more
- *Say it:* say *śanivāsaraḥ*
- *Recall:* say the Sanskrit for Thursday, then the Sanskrit for Friday, then say *śanivāsaraḥ* again

Before you move on

What does शनिवासरः mean? ("Saturday".) Say it once more.

86.3 रविवासरः (ravivāsaraḥ) — Sunday

Before the new one: say the Sanskrit for Friday, then the Sanskrit for Saturday.

You'll want to know: रविवासरः

रविवासरः (*ravivāsaraḥ*) — "Sunday", the day of रविः, the sun, a word you know.

The word, taken apart — its roots and family

Ravivāsara is built from *ravi*, "the sun", and *vāsara*, "day"; MW records the compound as another name for Sunday.

What you've built

The sun's day.

Your turn

- *Say it: ravivāsaraḥ*
- *Say it: ravivāsaraḥ*, once more
- *Say it:* say *ravivāsaraḥ*
- *Recall:* say the Sanskrit for Friday, then the Sanskrit for Saturday, then say *ravivāsaraḥ* again

Before you move on

What does रविवासरः mean? ("Sunday".) Say it once more.

86.4 समयः (samayaḥ) — time

Before the new one: say the Sanskrit for Saturday, then the Sanskrit for Sunday.

You'll want to know: समयः

समयः (*samayaḥ*) — "time". कः समयः? — "what is the time?"

The word, taken apart — its roots and family

Samaya is built from *sam*, "together", and the root √i, "to go": first a coming together, then an agreement, an appointed time, and time itself (MW, CDIAL 13185).

What you've built

The question on every street.

Your turn

- *Say it: samayaḥ*
- *Say it: samayaḥ*, once more
- *Say it:* ask *kaḥ samayaḥ?*
- *Recall:* say the Sanskrit for Saturday, then the Sanskrit for Sunday, then say *samayaḥ* again

Before you move on

What does समयः mean? ("Time".) Say it once more.

86.5 क्षणः (kṣaṇaḥ) — a moment

Before the new one: say the Sanskrit for Sunday, then the Sanskrit for time.

You'll want to know: क्षणः

क्षणः (*kṣaṇaḥ*) — "a moment". एकः क्षणः — "one moment", said with a raised hand.

The word, taken apart — its roots and family

CDIAL 3642 connects *kṣaṇa*, "the twinkling of an eye", with *akṣi*, "eye": a moment is as long as a blink. It lives on as Hindi *khan*,

"moment".

What you've built

The polite way to ask for a pause.

Your turn

- *Say it: kṣaṇaḥ*
- *Say it: kṣaṇaḥ*, once more
- *Say it:* say *ekaḥ kṣaṇaḥ*
- *Recall:* say the Sanskrit for Sunday, then the Sanskrit for time, then say *kṣaṇaḥ* again

Before you move on

What does क्षणः mean? ("A moment".) Say it once more.

Chapter 87

Eleven to a Thousand

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can count eleven and twelve, and name twenty, a hundred and a thousand.
>
> *Complete the last lesson of chapter 87: I can count eleven and twelve, and name twenty, a hundred and a thousand.*

87.1 एकादश (ekādaśa) — eleven

Before the new one: say the Sanskrit for time, then the Sanskrit for a moment.

Say six to ten again — *ṣaṭ, sapta, aṣṭa, nava, daśa* — and hear their English partners: six, seven, eight, nine, ten.

You'll want to know: एकादश

एकादश (*ekādaśa*) — "eleven": एक, "one", with दश, "ten". One and ten.

The word, taken apart — its roots and family

Ekādaśa is built from *eka*, "one", and *daśa*, "ten", both inherited numerals (MW). It lives on as Hindi *igārah*, "eleven" (CDIAL 2485).

What you've built

One plus ten.

Your turn

- *Say it: ekādaśa*
- *Say it: ekādaśa*, once more
- *Say it:* say *ekādaśa*
- *Recall:* say the Sanskrit for time, then the Sanskrit for a moment, then say *ekādaśa* again

Before you move on

What does एकादश mean? ("Eleven".) Say it once more.

87.2 द्वादश (dvādaśa) — twelve

Before the new one: say the Sanskrit for a moment, then the Sanskrit for eleven.

You'll want to know: द्वादश

द्वादश (*dvādaśa*) — "twelve": द्वा-, "two", with दश. The twelve months of a संवत्सरः.

The word, taken apart — its roots and family

Dvādaśa is built from *dvā*, the old form of "two", and *daśa*, "ten" (MW). It lives on as Hindi *bārah*, "twelve" (CDIAL 6658).

What you've built

Two plus ten.

Your turn

- *Say it: dvādaśa*
- *Say it: dvādaśa*, once more
- *Say it:* say *dvādaśa*
- *Recall:* say the Sanskrit for a moment, then the Sanskrit for eleven, then say *dvādaśa* again

Before you move on

What does द्वादश mean? ("Twelve".) Say it once more.

87.3 विंशतिः (viṃśatiḥ) — twenty

Before the new one: say the Sanskrit for eleven, then the Sanskrit for twelve.

You'll want to know: विंशतिः

विंशतिः (*viṃśatiḥ*) — "twenty", a new word, not built from दश.

The word, taken apart — its roots and family

MW takes *viṃśati* as probably "two decades", and it is inherited: MW compares Latin *vīgintī* and Greek *eikosi*. It lives on as Hindi *bīs*, "twenty" (CDIAL 11616).

What you've built

A fresh word for two tens.

Your turn

- *Say it: viṃśatiḥ*
- *Say it: viṃśatiḥ*, once more
- *Say it:* say *viṃśatiḥ*
- *Recall:* say the Sanskrit for eleven, then the Sanskrit for twelve, then say *viṃśatiḥ* again

Before you move on

What does विंशतिः mean? ("Twenty".) Say it once more.

87.4 शतम् (śatam) — a hundred

Before the new one: say the Sanskrit for twelve, then the Sanskrit for twenty.

You'll want to know: शतम्

शतम् (*śatam*) — "a hundred". The English word *hundred* is its distant cousin.

The word, taken apart — its roots and family

Śata is inherited: MW compares Latin *centum*, Greek *hekaton* and the *hund-* of English **hundred**. It lives on as Hindi *sau*, "hundred" (CDIAL 12278).

What you've built

Ten tens.

Your turn

- *Say it: śatam*
- *Say it: śatam*, once more
- *Say it:* say *śatam*
- *Recall:* say the Sanskrit for twelve, then the Sanskrit for twenty, then say *śatam* again

Before you move on

What does शतम् mean? ("A hundred".) Say it once more.

87.5 सहस्रम् (sahasram) — a thousand

Before the new one: say the Sanskrit for twenty, then the Sanskrit for a hundred.

You'll want to know: सहस्रम्

सहस्रम् (*sahasram*) — "a thousand", ten शतम्.

The word, taken apart — its roots and family

MW suggests *sahasra* is *sa-* "one" with *hasra*, the cousin of Greek *khilioi*, "thousand", and compares Persian *hazār* (CDIAL 13307). The Persian word is a sister of the Sanskrit one, not borrowed from it.

What you've built

Ten hundreds.

Your turn

- *Say it: sahasram*
- *Say it: sahasram*, once more
- *Say it:* say *sahasram*
- *Recall:* say the Sanskrit for twenty, then the Sanskrit for a hundred, then say *sahasram* again

Before you move on

What does सहस्रम् mean? ("A thousand".) Say it once more.

Chapter 88

Girls, Boys and Friends

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 4 of 5 lessons.

> ***By the end of this chapter:*** I can name a girl, a young man, a woman's friend, a son and a daughter.
>
> *Complete the last lesson of chapter 88: I can name a girl, a young man, a woman's friend, a son and a daughter.*

88.1 बालिका (bālikā) — a girl

Before the new one: say the Sanskrit for a hundred, then the Sanskrit for a thousand.

You'll want to know: बालिका

बालिका (*bālikā*) — "a girl". बालः is "a boy"; -इका makes the girl.

The word, taken apart — its roots and family

Bālikā is built from *bāla*, "young, a child", with the feminine ending -*ikā*; the origin of *bāla* itself is not settled (CDIAL 9216).

What you've built

The boy word, made feminine.

Your turn

- *Say it: bālikā*
- *Say it: bālikā*, once more
- *Say it:* say *bālikā*
- *Recall:* say the Sanskrit for a hundred, then the Sanskrit for a thousand, then say *bālikā* again

Before you move on

What does बालिका mean? ("A girl".) Say it once more.

88.2 युवकः (yuvakaḥ) — a young man

Before the new one: say the Sanskrit for a thousand, then the Sanskrit for a girl.

You'll want to know: युवकः

युवकः (*yuvakaḥ*) — "a young man", between a बालः and a वृद्धः.

The word, taken apart — its roots and family

Yuvaka is built from *yuvan*, "young". It is inherited: MW compares Latin *juvenis*, Gothic *juggs* and English **young** (CDIAL 10508).

What you've built

Between boy and old man.

Your turn

- *Say it: yuvakaḥ*
- *Say it: yuvakaḥ*, once more
- *Say it:* say *yuvakaḥ*
- *Recall:* say the Sanskrit for a thousand, then the Sanskrit for a girl, then say *yuvakaḥ* again

Before you move on

What does युवकः mean? ("A young man".) Say it once more.

88.3 सखी (sakhī) — a (female) friend

Before the new one: say the Sanskrit for a girl, then the Sanskrit for a young man.

You'll want to know: सखी

सखी (*sakhī*) — "a friend", said of a woman or a girl; मित्रम् is any friend.

The word, taken apart — its roots and family

Sakhī is the feminine of *sakhi*, "companion", which MW files under the root √sac, "to follow, accompany", and compares Latin *socius*, "companion". It lives on as Hindi *sahelī*, "a woman's friend" (CDIAL 13074).

What you've built

A friend, in the feminine.

Your turn

- *Say it: sakhī*
- *Say it: sakhī*, once more
- *Say it:* say *mama sakhī*
- *Recall:* say the Sanskrit for a girl, then the Sanskrit for a young man, then say *sakhī* again

Before you move on

What does सखी mean? ("A (female) friend".) Say it once more.

88.4 पुत्रः (putraḥ) — a son

Before the new one: say the Sanskrit for a young man, then the Sanskrit for a woman's friend.

You'll want to know: पुत्रः

पुत्रः (*putraḥ*) — "a son", the everyday word beside सूनुः.

The word, taken apart — its roots and family

MW calls the etymology of *putra* doubtful: perhaps the root √puṣ, "to nourish"; the old story of *put* + *tra*, "saving from the hell Put", is a traditional reading. MW compares Avestan *puthra*, so the word is shared with Iranian. It lives on as Hindi *pūt* (CDIAL 8265).

What you've built

A second word for son.

Your turn

- *Say it: putraḥ*
- *Say it: putraḥ*, once more
- *Say it:* say *mama putraḥ*
- *Recall:* say the Sanskrit for a young man, then the Sanskrit for a woman's friend, then say *putraḥ* again

Before you move on

What does पुत्रः mean? ("A son".) Say it once more.

88.5 पुत्री (putrī) — a daughter

Before the new one: say the Sanskrit for a woman's friend, then the Sanskrit for a son.

You'll want to know: पुत्री

पुत्री (*putrī*) — "a daughter", पुत्रः ending in a long ी: the everyday word beside दुहिता.

The word, taken apart — its roots and family

Putrī is the feminine of *putra*, "son", built with the ending -*ī* (MW, CDIAL 8271); see the lesson on *putra* for its doubtful origin.

What you've built

Son, made feminine.

Your turn

- *Say it: putrī*
- *Say it: putrī*, once more
- *Say it:* say *mama putrī*
- *Recall:* say the Sanskrit for a woman's friend, then the Sanskrit for a son, then say *putrī* again

Before you move on

What does पुत्री mean? ("A daughter".) Say it once more.

Chapter 89

Beautiful, Far and Near

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say something is beautiful, far, near, hard or sweet.
>
> *Complete the last lesson of chapter 89: I can say something is beautiful, far, near, hard or sweet.*

89.1 सुन्दरः (sundaraḥ) — beautiful

Before the new one: say the Sanskrit for a son, then the Sanskrit for a daughter.

You'll want to know: सुन्दरः

सुन्दरः (*sundaraḥ*) — "beautiful". सुन्दरः मयूरः — "a beautiful peacock".

The word, taken apart — its roots and family

The origin of *sundara* is not settled. MW suggests *su-nara*, and CDIAL 13474 asks whether it is a Middle Indo-Aryan form of Rigvedic *sūnara*, "excellent", with an inserted *d*.

What you've built

Before the noun, and it agrees.

Your turn

- *Say it: sundaraḥ*
- *Say it: sundaraḥ*, once more
- *Say it:* say *sundaraḥ mayūraḥ*
- *Recall:* say the Sanskrit for a son, then the Sanskrit for a daughter, then say *sundaraḥ* again

Before you move on

What does सुन्दरः mean? ("Beautiful".) Say it once more.

89.2 दूरम् (dūram) — far

Before the new one: say the Sanskrit for a daughter, then the Sanskrit for beautiful.

You'll want to know: दूरम्

दूरम् (*dūram*) — "far". विद्यालयः दूरम् — "the school is far".

The word, taken apart — its roots and family

Dūra is a Rigvedic word for "distant", which MW derives, probably, from a root √du, "to go" (CDIAL 6495). It lives on as Hindi *dūr*, "far".

What you've built

How far away it is.

Your turn

- *Say it: dūram*
- *Say it: dūram*, once more
- *Say it:* say *dūram*
- *Recall:* say the Sanskrit for a daughter, then the Sanskrit for beautiful, then say *dūram* again

Before you move on

What does दूरम् mean? ("Far".) Say it once more.

89.3 समीपम् (samīpam) — near

Before the new one: say the Sanskrit for beautiful, then the Sanskrit for far.

You'll want to know: समीपम्

समीपम् (*samīpam*) — "near", the opposite of दूरम्.

The word, taken apart — its roots and family

MW takes *samīpa* as probably *sam* + *ap*, "water", formed like *dvīpa*, "island", and CDIAL 13226 agrees that its *-īpa* was taken from such words.

What you've built

The other side of far.

Your turn

- *Say it: samīpam*
- *Say it: samīpam*, once more
- *Say it:* say *samīpam*
- *Recall:* say the Sanskrit for beautiful, then the Sanskrit for far, then say *samīpam* again

Before you move on

What does समीपम् mean? ("Near".) Say it once more.

89.4 कठिनः (kaṭhinaḥ) — hard, difficult

Before the new one: say the Sanskrit for far, then the Sanskrit for near.

You'll want to know: कठिनः

कठिनः (*kaṭhinaḥ*) — "hard", both to touch and to do. कठिनः पाठः — "a hard lesson".

The word, taken apart — its roots and family

Kaṭhina may be borrowed from Dravidian: CDIAL 2650 reports that Mayrhofer groups it with Tamil *kaṭṭu*, "hardness", and similar words as a loan.

What you've built

What a hard lesson is.

Your turn

- *Say it: kaṭhinaḥ*
- *Say it: kaṭhinaḥ*, once more
- *Say it:* say *kaṭhinaḥ pāṭhaḥ*
- *Recall:* say the Sanskrit for far, then the Sanskrit for near, then say *kaṭhinaḥ* again

Before you move on

What does कठिनः mean? ("Hard, difficult".) Say it once more.

89.5 मधुरः (madhuraḥ) — sweet

Before the new one: say the Sanskrit for near, then the Sanskrit for hard.

You'll want to know: मधुरः

मधुरः (*madhuraḥ*) — "sweet", from मधु, "honey". मधुरम् आम्रम् — "a sweet mango".

The word, taken apart — its roots and family

Madhura is built from *madhu*, "honey, sweet" (MW, CDIAL 9793), the inherited word whose English cousin is **mead**.

What you've built

Honey, as a describing word.

Your turn

- *Say it: madhuraḥ*
- *Say it: madhuraḥ*, once more
- *Say it:* say *madhuram āmram*
- *Recall:* say the Sanskrit for near, then the Sanskrit for hard, then say *madhuraḥ* again

Before you move on

What does मधुरः mean? ("Sweet".) Say it once more.

89.6 Fruit, animals and the land — a first pass

Say "a hard lesson", then "a sweet mango".

Your turn

Say these aloud:

- a mango, a banana, oil, flatbread, sweet rice pudding
- an elephant, a horse, a camel, a mouse, a cat
- a crow, a parrot, a peacock, a tortoise, a frog
- a tree, a seed, a root, a garden, a forest
- a lake, a well, a pond, an island, a river bank
- a school, a student, a teacher, a lesson, an exam

Before you move on

Mango, banana, oil, bread, pudding? (आम्रम्, कदलीफलम्, तैलम्, रोटिका, पायसम्.) Elephant, horse, camel, mouse, cat? (गजः, अश्वः, उष्ट्रः, मूषकः, मार्जारः.) Crow, parrot, peacock, tortoise, frog? (काकः, शुकः, मयूरः, कूर्मः, मण्डूकः.) Tree, seed, root, garden, forest? (वृक्षः, बीजम्, मूलम्, उद्यानम्, अरण्यम्.) Lake, well, pond, island, shore? (सरः, कूपः, तडागः, द्वीपः, तीरम्.) School, student, teacher, lesson, exam? (विद्यालयः, छात्रः, अध्यापकः, पाठः, परीक्षा.)

89.7 Places, days and people — a second pass

Ask where the temple is, then where the hospital is.

Your turn

Say these aloud:

- a field, a farmer, a merchant
- a week; Monday, Tuesday, Wednesday, Thursday
- Friday, Saturday, Sunday; ask the time; one moment
- eleven, twelve, twenty, a hundred, a thousand
- a girl, a young man, my friend (a woman's), my son, my daughter
- a beautiful peacock; far; near; a hard lesson; a sweet mango

Before you move on

Temple, hospital, field, farmer, merchant? (मन्दिरम्, चिकित्सालयः, क्षेत्रम्, कृषकः, वणिक्.) Week? (सप्ताहः.) Monday to Sunday? (सोमवासरः, मंगलवासरः, बुधवासरः, गुरुवासरः, शुक्रवासरः, शनिवासरः, रविवासरः.) Time, moment? (समयः, क्षणः.) Eleven, twelve, twenty, hundred, thousand? (एकादश, द्वादश, विंशतिः, शतम्, सहस्रम्.) Girl, young man, friend, son, daughter? (बालिका, युवकः, सखी, पुत्रः, पुत्री.) Beautiful, far, near, hard, sweet? (सुन्दरः, दूरम्, समीपम्, कठिनः, मधुरः.)

Chapter 90

Day, Early evening, Afternoon, Midnight, Dawn

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a day, early evening, afternoon, midnight and dawn.
>
> *Complete the last lesson of chapter 90: I can say a day, early evening, afternoon, midnight and dawn.*

90.1 अहः (ahaḥ) — a day, daytime

Before the new one: say the Sanskrit for hard, difficult, then the Sanskrit for sweet.

You'll want to know: अहः

अहः — *ahaḥ* — "a day, daytime".

The word, taken apart — its roots and family

Ahaḥ is a form of *ahar*, "day", which is already in the Rigveda (MW, CDIAL 993). MW gives it no root, and its origin is not settled. It is the *-aha* of *saptāha*, "week".

What you've built

One more word for this chapter.

Your turn

- *Say it: ahaḥ*
- *Say it: ahaḥ*, once more
- *Say it:* say *ahaḥ*
- *Recall:* say the Sanskrit for hard, difficult, then the Sanskrit for sweet, then say *ahaḥ* again

Before you move on

What does अहः mean? ("A day, daytime".) Say it once more.

90.2 प्रदोषः (pradoṣaḥ) — early evening

Before the new one: say the Sanskrit for sweet, then the Sanskrit for a day.

You'll want to know: प्रदोषः

प्रदोषः — *pradoṣaḥ* — "early evening".

The word, taken apart — its roots and family

Pradoṣa is built from *pra* and *doṣā*, "darkness, night", a Rigvedic word (MW): the first part of the night.

What you've built

One more word for this chapter.

Your turn

- *Say it: pradoṣaḥ*
- *Say it: pradoṣaḥ*, once more
- *Say it:* say *pradoṣaḥ*
- *Recall:* say the Sanskrit for sweet, then the Sanskrit for a day, then say *pradoṣaḥ* again

Before you move on

What does प्रदोषः mean? ("Early evening".) Say it once more.

90.3 अपराह्णः (aparāhṇaḥ) — afternoon

Before the new one: say the Sanskrit for a day, then the Sanskrit for early evening.

You'll want to know: अपराह्णः

अपराह्णः — *aparāhṇaḥ* — "afternoon".

The word, taken apart — its roots and family

Aparāhṇa is built from *apara*, "later, hinder", and *ahna*, a form of *ahar*, "day" (MW). *Apara* is inherited: MW compares Gothic *afar*, "after".

What you've built

One more word for this chapter.

Your turn

- *Say it: aparāhṇaḥ*
- *Say it: aparāhṇaḥ*, once more
- *Say it:* say *aparāhṇaḥ*
- *Recall:* say the Sanskrit for a day, then the Sanskrit for early evening, then say *aparāhṇaḥ* again

Before you move on

What does अपराह्णः mean? ("Afternoon".) Say it once more.

90.4 मध्यरात्रिः (madhyarātriḥ) — midnight

Before the new one: say the Sanskrit for early evening, then the Sanskrit for afternoon.

You'll want to know: मध्यरात्रिः

मध्यरात्रिः — *madhyarātriḥ* — "midnight".

The word, taken apart — its roots and family

Madhyarātri is built from *madhya*, "middle", and *rātri*, "night" (MW). *Madhya* is inherited: MW compares Latin *medius* and English **mid**, as in *midnight*.

What you've built

One more word for this chapter.

Your turn

- *Say it: madhyarātriḥ*
- *Say it: madhyarātriḥ*, once more
- *Say it:* say *madhyarātriḥ*
- *Recall:* say the Sanskrit for early evening, then the Sanskrit for afternoon, then say *madhyarātriḥ* again

Before you move on

What does मध्यरात्रिः mean? ("Midnight".) Say it once more.

90.5 उषः (uṣaḥ) — dawn

Before the new one: say the Sanskrit for afternoon, then the Sanskrit for midnight.

You'll want to know: उषः

उषः — *uṣaḥ* — "dawn".

The word, taken apart — its roots and family

Uṣas is inherited from Proto-Indo-European: MW compares Greek *ēōs* and Latin *aurōra*, "dawn", and EtymDB links them to one ancestor. In the Rigveda the dawn is a goddess.

What you've built

One more word for this chapter.

Your turn

- *Say it: uṣaḥ*
- *Say it: uṣaḥ*, once more
- *Say it:* say *uṣaḥ*
- *Recall:* say the Sanskrit for afternoon, then the Sanskrit for midnight, then say *uṣaḥ* again

Before you move on

What does उषः mean? ("Dawn".) Say it once more.

Chapter 91

Morning, Twilight, Early winter, Late winter, Autumn

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say morning, twilight, early winter, late winter and autumn.
>
> *Complete the last lesson of chapter 91: I can say morning, twilight, early winter, late winter and autumn.*

91.1 प्रभातम् (prabhātam) — morning, daybreak

Before the new one: say the Sanskrit for midnight, then the Sanskrit for dawn.

You'll want to know: प्रभातम्

प्रभातम् — *prabhātam* — "morning, daybreak".

The word, taken apart — its roots and family

Prabhāta is the past participle of *pra* + the root √bhā, "to shine": "shone forth", and so daybreak (MW, CDIAL 8707).

What you've built

One more word for this chapter.

Your turn

- *Say it: prabhātam*
- *Say it: prabhātam*, once more
- *Say it:* say *prabhātam*
- *Recall:* say the Sanskrit for midnight, then the Sanskrit for dawn, then say *prabhātam* again

Before you move on

What does प्रभातम् mean? ("Morning, daybreak".) Say it once more.

91.2 सन्ध्या (sandhyā) — twilight

Before the new one: say the Sanskrit for dawn, then the Sanskrit for morning.

You'll want to know: सन्ध्या

सन्ध्या — *sandhyā* — "twilight".

The word, taken apart — its roots and family

CDIAL 12918 explains *sandhyā* as first a form of *saṃdhi*, "junction": the joining of day and night. It lives on as Hindi *sāṃjh*, "evening".

What you've built

One more word for this chapter.

Your turn

- *Say it: sandhyā*
- *Say it: sandhyā*, once more
- *Say it:* say *sandhyā*
- *Recall:* say the Sanskrit for dawn, then the Sanskrit for morning, then say *sandhyā* again

Before you move on

What does सन्ध्या mean? ("Twilight".) Say it once more.

91.3 हेमन्तः (hemantaḥ) — early winter

Before the new one: say the Sanskrit for morning, then the Sanskrit for twilight.

You'll want to know: हेमन्तः

हेमन्तः — *hemantaḥ* — "early winter".

The word, taken apart — its roots and family

Hemanta is a Rigvedic word built on *heman*, "in winter", which MW files beside *hima*, "cold, snow" (CDIAL 14164).

What you've built

One more word for this chapter.

Your turn

- *Say it: hemantaḥ*
- *Say it: hemantaḥ*, once more
- *Say it:* say *hemantaḥ*
- *Recall:* say the Sanskrit for morning, then the Sanskrit for twilight, then say *hemantaḥ* again

Before you move on

What does हेमन्तः mean? ("Early winter".) Say it once more.

91.4 शिशिरः (śiśiraḥ) — late winter

Before the new one: say the Sanskrit for twilight, then the Sanskrit for early winter.

You'll want to know: शिशिरः

शिशिरः — *śiśiraḥ* — "late winter".

The word, taken apart — its roots and family

Śiśira is probably connected with the root √śyai and with *śīta*, "cold" (MW, CDIAL 12475). It lives on as Hindi *sisir*, "cold, dew".

What you've built

One more word for this chapter.

Your turn

- *Say it: śiśiraḥ*
- *Say it: śiśiraḥ*, once more
- *Say it:* say *śiśiraḥ*
- *Recall:* say the Sanskrit for twilight, then the Sanskrit for early winter, then say *śiśiraḥ* again

Before you move on

What does शिशिरः mean? ("Late winter".) Say it once more.

91.5 शरद् (śarad) — autumn

Before the new one: say the Sanskrit for early winter, then the Sanskrit for late winter.

You'll want to know: शरद्

शरद् — *śarad* — "autumn".

The word, taken apart — its roots and family

MW explains *śarad* as probably "the time of ripening", from the root √śrā or √śṛ; it is already in the Rigveda (CDIAL 12329).

What you've built

One more word for this chapter.

Your turn

- *Say it: śarad*
- *Say it: śarad*, once more
- *Say it:* say *śarad*
- *Recall:* say the Sanskrit for early winter, then the Sanskrit for late winter, then say *śarad* again

Before you move on

What does शरद् mean? ("Autumn".) Say it once more.

Chapter 92

Moment, Before, After, Now, Always

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a moment, before, after, now and always.
>
> *Complete the last lesson of chapter 92: I can say a moment, before, after, now and always.*

92.1 निमेषः (nimeṣaḥ) — a moment, a blink

Before the new one: say the Sanskrit for late winter, then the Sanskrit for autumn.

You'll want to know: निमेषः

निमेषः — *nimeṣaḥ* — "a moment, a blink".

The word, taken apart — its roots and family

Nimeṣa is built from *ni*, "down", and the root √miṣ, "to open the eyes": shutting the eye, a wink, and so a moment (MW, CDIAL 7243).

What you've built

One more word for this chapter.

Your turn

- *Say it: nimeṣaḥ*
- *Say it: nimeṣaḥ*, once more
- *Say it:* say *nimeṣaḥ*
- *Recall:* say the Sanskrit for late winter, then the Sanskrit for autumn, then say *nimeṣaḥ* again

Before you move on

What does निमेषः mean? ("A moment, a blink".) Say it once more.

92.2 पूर्वम् (pūrvam) — before, earlier

Before the new one: say the Sanskrit for autumn, then the Sanskrit for a moment.

You'll want to know: पूर्वम्

पूर्वम् — *pūrvam* — "before, earlier".

The word, taken apart — its roots and family

Pūrvam is the adverb of *pūrva*, "fore, earlier, eastern", which MW connects with *purā*, "before", and the prefix *pra* (CDIAL 8343).

What you've built

One more word for this chapter.

Your turn

- *Say it: pūrvam*
- *Say it: pūrvam*, once more
- *Say it:* say *pūrvam*
- *Recall:* say the Sanskrit for autumn, then the Sanskrit for a moment, then say *pūrvam* again

Before you move on

What does पूर्वम् mean? ("Before, earlier".) Say it once more.

92.3 पश्चात् (paścāt) — after, later

Before the new one: say the Sanskrit for a moment, then the Sanskrit for before.

You'll want to know: पश्चात्

पश्चात् — *paścāt* — "after, later".

The word, taken apart — its roots and family

Paścāt is the ablative of *paśca*, "behind": "from behind", and so "afterwards" (CDIAL 7999). It is inherited: MW compares Latin *post*, "after".

What you've built

One more word for this chapter.

Your turn

- *Say it: paścāt*
- *Say it: paścāt*, once more
- *Say it:* say *paścāt*
- *Recall:* say the Sanskrit for a moment, then the Sanskrit for before, then say *paścāt* again

Before you move on

What does पश्चात् mean? ("After, later".) Say it once more.

92.4 अधुना (adhunā) — now

Before the new one: say the Sanskrit for before, then the Sanskrit for after.

You'll want to know: अधुना

अधुना — *adhunā* — "now".

The word, taken apart — its roots and family

Adhunā is a Śatapatha Brāhmaṇa word; CDIAL 268 reports Mayrhofer's view that it is an old instrumental of *adhvan*, "way". It lives on as Punjabi *huṇ*, "now".

What you've built

One more word for this chapter.

Your turn

- *Say it: adhunā*
- *Say it: adhunā*, once more
- *Say it:* say *adhunā*
- *Recall:* say the Sanskrit for before, then the Sanskrit for after, then say *adhunā* again

Before you move on

What does अधुना mean? ("Now".) Say it once more.

92.5 सर्वदा (sarvadā) — always

Before the new one: say the Sanskrit for after, then the Sanskrit for now.

Say "always." (*Sadā.*) This lesson's word says it another way.

You'll want to know: सर्वदा

सर्वदा — *sarvadā* — "always".

The word, taken apart — its roots and family

Sarvadā is built from *sarva*, "all", with the time ending *-dā* that also ends *kadā* and *sadā* (MW): at all times.

What you've built

One more word for this chapter.

Your turn

- *Say it: sarvadā*
- *Say it: sarvadā*, once more
- *Say it:* say *sarvadā*
- *Recall:* say the Sanskrit for after, then the Sanskrit for now, then say *sarvadā* again

Before you move on

What does सर्वदा mean? ("Always".) Say it once more.

Chapter 93

Ever, Delay, Left, Right, Inside

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say ever, a delay, left, right and inside.
>
> *Complete the last lesson of chapter 93: I can say ever, a delay, left, right and inside.*

93.1 कदापि (kadāpi) — ever

Before the new one: say the Sanskrit for now, then the Sanskrit for always.

You'll want to know: कदापि

कदापि — *kadāpi* — "ever".

The word, taken apart — its roots and family

kadāpi is built from *kadā* "when", which MW derives from the question stem *ka-*, and the particle *api* "even, also": "at any time at all". After *na* it turns into "never".

What you've built

One more word for this chapter.

Your turn

- *Say it: kadāpi*
- *Say it: kadāpi*, once more
- *Say it:* say *kadāpi*
- *Recall:* say the Sanskrit for now, then the Sanskrit for always, then say *kadāpi* again

Before you move on

What does कदापि mean? ("Ever".) Say it once more.

93.2 विलम्बः (vilambaḥ) — a delay

Before the new one: say the Sanskrit for always, then the Sanskrit for ever.

You'll want to know: विलम्बः

विलम्बः — *vilambaḥ* — "a delay".

The word, taken apart — its roots and family

vilamba comes from the verb *vi-√lamb*, the root √lamb "hang" with *vi-* "apart, away": to hang back, linger, delay (MW). It lives on as Punjabi *vilamb*, *bilamb* "delay" (CDIAL 11890).

What you've built

One more word for this chapter.

Your turn

- *Say it: vilambaḥ*
- *Say it: vilambaḥ*, once more
- *Say it:* say *vilambaḥ*
- *Recall:* say the Sanskrit for always, then the Sanskrit for ever, then say *vilambaḥ* again

Before you move on

What does विलम्बः mean? ("A delay".) Say it once more.

93.3 वामः (vāmaḥ) — left

Before the new one: say the Sanskrit for ever, then the Sanskrit for a delay.

You'll want to know: वामः

वामः — *vāmaḥ* — "left".

The word, taken apart — its roots and family

MW thinks *vāma* "left" was perhaps once the same word as *vāma* "lovely, pleasant", from the root √van "love, desire", which would make "the lovely side" a polite name for the left; CDIAL keeps the two apart (11533, 11534), so the link is not settled. *vāma* lives on as Hindi *bāyāṁ* "left" (CDIAL 11533).

What you've built

One more word for this chapter.

Your turn

- *Say it: vāmaḥ*
- *Say it: vāmaḥ*, once more
- *Say it:* say *vāmaḥ*
- *Recall:* say the Sanskrit for ever, then the Sanskrit for a delay, then say *vāmaḥ* again

Before you move on

What does वामः mean? ("Left".) Say it once more.

93.4 दक्षिणः (dakṣiṇaḥ) — right; south

Before the new one: say the Sanskrit for a delay, then the Sanskrit for left.

You'll want to know: दक्षिणः

दक्षिणः — *dakṣiṇaḥ* — "right; south".

The word, taken apart — its roots and family

dakṣiṇa is inherited from an Indo-European word for "right" that also gave Latin *dexter* (English *dexterous*) and Greek *dexios* (EtymDB). It means "south" because someone facing east has the south on the right hand (MW). It lives on as Hindi *dakkhin* "the south" (CDIAL 6119).

What you've built

One more word for this chapter.

Your turn

- *Say it: dakṣiṇaḥ*
- *Say it: dakṣiṇaḥ*, once more
- *Say it:* say *dakṣiṇaḥ*
- *Recall:* say the Sanskrit for a delay, then the Sanskrit for left, then say *dakṣiṇaḥ* again

Before you move on

What does दक्षिणः mean? ("Right; south".) Say it once more.

93.5 अन्तः (antaḥ) — inside

Before the new one: say the Sanskrit for left, then the Sanskrit for right; south.

You'll want to know: अन्तः

अन्तः — *antaḥ* — "inside".

The word, taken apart — its roots and family

antaḥ is *antar* "within, between", with the final *r* said as *ḥ* at the end of a phrase (MW). MW sets it beside Latin *inter* "between", the *inter-* of English *international*, so it is inherited from Indo-European. It lives on as Marathi *āt* "inside" (CDIAL 356).

What you've built

One more word for this chapter.

Your turn

- *Say it: antaḥ*
- *Say it: antaḥ*, once more
- *Say it:* say *antaḥ*
- *Recall:* say the Sanskrit for left, then the Sanskrit for right; south, then say *antaḥ* again

Before you move on

What does अन्तः mean? ("Inside".) Say it once more.

Chapter 94

Outside, Above, Below, In front, Behind

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say outside, above, below, in front and behind.
>
> *Complete the last lesson of chapter 94: I can say outside, above, below, in front and behind.*

94.1 बहिः (bahiḥ) — outside

Before the new one: say the Sanskrit for right; south, then the Sanskrit for inside.

You'll want to know: बहिः

बहिः — *bahiḥ* — "outside".

The word, taken apart — its roots and family

bahiḥ is *bahis* "out, outside", with the final *s* said as *ḥ* at the end of a phrase (MW). MW gives no source for it, and its origin is not settled. Pali and Prakrit kept it as *bahi* (CDIAL 9186).

What you've built

One more word for this chapter.

Your turn

- *Say it: bahiḥ*
- *Say it: bahiḥ*, once more
- *Say it:* say *bahiḥ*
- *Recall:* say the Sanskrit for right; south, then the Sanskrit for inside, then say *bahiḥ* again

Before you move on

What does बहिः mean? ("Outside".) Say it once more.

94.2 उपरि (upari) — above

Before the new one: say the Sanskrit for inside, then the Sanskrit for outside.

You'll want to know: उपरि

उपरि — *upari* — "above".

The word, taken apart — its roots and family

upari is built on *upa* "near, up to" (CDIAL 2218), and MW sets it beside Greek *hyper*, Latin *super* and English *over*: one inherited Indo-European word. Marathi *var* "on" comes from it (CDIAL 2218).

What you've built

One more word for this chapter.

Your turn

- *Say it: upari*
- *Say it: upari*, once more
- *Say it:* say *upari*
- *Recall:* say the Sanskrit for inside, then the Sanskrit for outside, then say *upari* again

Before you move on

What does उपरि mean? ("Above".) Say it once more.

94.3 अधः (adhaḥ) — below

Before the new one: say the Sanskrit for outside, then the Sanskrit for above.

You'll want to know: अधः

अधः — *adhaḥ* — "below".

The word, taken apart — its roots and family

adhaḥ is *adhas* "below, down", with the final *s* said as *ḥ* at the end of a phrase (MW). MW compares Latin *infra* "below", the *infra-* of English *infrared*, so it is inherited from Indo-European. Pali kept it as *adho* (CDIAL 246).

What you've built

One more word for this chapter.

Your turn

- *Say it: adhaḥ*
- *Say it: adhaḥ*, once more
- *Say it:* say *adhaḥ*
- *Recall:* say the Sanskrit for outside, then the Sanskrit for above, then say *adhaḥ* again

Before you move on

What does अधः mean? ("Below".) Say it once more.

94.4 अग्रे (agre) — in front

Before the new one: say the Sanskrit for above, then the Sanskrit for below.

You'll want to know: अग्रे

अग्रे — *agre* — "in front".

The word, taken apart — its roots and family

agre is the locative, "at the front", of *agra* "front, tip, top" (MW). MW refers *agra* to the root √aṅg, following the grammarians. The word lives on as Hindi *āge* "ahead, before" (CDIAL 68).

What you've built

One more word for this chapter.

Your turn

- *Say it: agre*
- *Say it: agre*, once more
- *Say it:* say *agre*
- *Recall:* say the Sanskrit for above, then the Sanskrit for below, then say *agre* again

Before you move on

What does अग्रे mean? ("In front".) Say it once more.

94.5 पृष्ठतः (pṛṣṭhataḥ) — behind

Before the new one: say the Sanskrit for below, then the Sanskrit for in front.

You'll want to know: पृष्ठतः

पृष्ठतः — *pṛṣṭhataḥ* — "behind".

The word, taken apart — its roots and family

pṛṣṭhataḥ is built from *pṛṣṭha* "back" and the ending *-tas* "from, on the side of": "from the back" (MW). MW takes *pṛṣṭha* as probably *pra-stha* "standing out", the back being the part of an animal that stands out. *pṛṣṭha* lives on as Kumaoni *pūṭh* "back" (CDIAL 8371).

What you've built

One more word for this chapter.

Your turn

- *Say it: pṛṣṭhataḥ*
- *Say it: pṛṣṭhataḥ*, once more
- *Say it:* say *pṛṣṭhataḥ*
- *Recall:* say the Sanskrit for below, then the Sanskrit for in front, then say *pṛṣṭhataḥ* again

Before you move on

What does पृष्ठतः mean? ("Behind".) Say it once more.

Chapter 95

In the middle, Beside, Everywhere, Elsewhere, Street

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say in the middle, beside, everywhere, elsewhere and a street.
>
> *Complete the last lesson of chapter 95: I can say in the middle, beside, everywhere, elsewhere and a street.*

95.1 मध्ये (madhye) — in the middle

Before the new one: say the Sanskrit for in front, then the Sanskrit for behind.

You'll want to know: मध्ये

मध्ये — *madhye* — "in the middle".

The word, taken apart — its roots and family

madhye is the locative, "in the middle", of *madhya* "middle" (MW). MW sets *madhya* beside Latin *medius*, Greek *mesos* and English *mid*: one inherited Indo-European word. This very locative wore down into Hindi *meṁ* "in" (CDIAL 9804).

What you've built

One more word for this chapter.

Your turn

- *Say it: madhye*
- *Say it: madhye*, once more
- *Say it:* say *madhye*
- *Recall:* say the Sanskrit for in front, then the Sanskrit for behind, then say *madhye* again

Before you move on

What does मध्ये mean? ("In the middle".) Say it once more.

95.2 पार्श्वे (pārśve) — beside

Before the new one: say the Sanskrit for behind, then the Sanskrit for in the middle.

You'll want to know: पार्श्वे

पार्श्वे — *pārśve* — "beside".

The word, taken apart — its roots and family

pārśve is the locative, "at the side", of *pārśva* "side, flank", which MW derives from *parśu* "rib": the side is the region of the ribs. *pārśva* lives on as Hindi *pās* "near" (CDIAL 8118).

What you've built

One more word for this chapter.

Your turn

- *Say it: pārśve*
- *Say it: pārśve*, once more
- *Say it:* say *pārśve*
- *Recall:* say the Sanskrit for behind, then the Sanskrit for in the middle, then say *pārśve* again

Before you move on

What does पार्श्वे mean? ("Beside".) Say it once more.

95.3 सर्वत्र (sarvatra) — everywhere

Before the new one: say the Sanskrit for in the middle, then the Sanskrit for beside.

You'll want to know: सर्वत्र

सर्वत्र — *sarvatra* — "everywhere".

The word, taken apart — its roots and family

sarvatra is built from *sarva* "all" and the place ending *-tra* "in, at" (MW). MW compares *sarva* with Greek *holos* "whole" and Latin *salvus* "safe". Pali wore *sarvatra* down to *sabbattha* (CDIAL 13278), and *sarva* itself became Hindi *sab* "all" (CDIAL 13276).

What you've built

One more word for this chapter.

Your turn

- *Say it: sarvatra*
- *Say it: sarvatra*, once more
- *Say it:* say *sarvatra*
- *Recall:* say the Sanskrit for in the middle, then the Sanskrit for beside, then say *sarvatra* again

Before you move on

What does सर्वत्र mean? ("Everywhere".) Say it once more.

95.4 अन्यत्र (anyatra) — elsewhere

Before the new one: say the Sanskrit for beside, then the Sanskrit for everywhere.

You'll want to know: अन्यत्र

अन्यत्र — *anyatra* — "elsewhere".

The word, taken apart — its roots and family

anyatra is built from *anya* "other" and the place ending *-tra* "in, at" (MW). MW sets *anya* beside Latin *alius* (English *alias*) and Greek *allos*, so it is inherited from Indo-European. It lives on as Hindi *anat* "elsewhere" (CDIAL 401).

What you've built

One more word for this chapter.

Your turn

- *Say it: anyatra*
- *Say it: anyatra*, once more
- *Say it:* say *anyatra*
- *Recall:* say the Sanskrit for beside, then the Sanskrit for everywhere, then say *anyatra* again

Before you move on

What does अन्यत्र mean? ("Elsewhere".) Say it once more.

95.5 वीथी (vīthī) — a street

Before the new one: say the Sanskrit for everywhere, then the Sanskrit for elsewhere.

You'll want to know: वीथी

वीथी — *vīthī* — "a street".

The word, taken apart — its roots and family

MW suggests *vīthī* "a row, a street" comes from the root √vī "go, approach", but marks it "perhaps", so the source is uncertain. It lives on as Punjabi *vīhī* "street" (CDIAL 12050).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *vīthī*
- *Say it:* *vīthī*, once more
- *Say it:* say *vīthī*
- *Recall:* say the Sanskrit for everywhere, then the Sanskrit for elsewhere, then say *vīthī* again

Before you move on

What does वीथी mean? ("A street".) Say it once more.

Chapter 96

Main road, Crossroads, Corner, Library, University

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a main road, a crossroads, a corner, a library and a university.
>
> *Complete the last lesson of chapter 96: I can say a main road, a crossroads, a corner, a library and a university.*

96.1 राजमार्गः (rājamārgaḥ) — a main road

Before the new one: say the Sanskrit for elsewhere, then the Sanskrit for a street.

You'll want to know: राजमार्गः

राजमार्गः — *rājamārgaḥ* — "a main road".

The word, taken apart — its roots and family

rājamārga is a compound of *rājan* "king" and *mārga* "road": "the king's highway", a main street wide enough for horses and elephants (MW). *mārga* comes from *mṛga* "deer, game" (MW), and one of its senses is the track of a wild animal.

What you've built

One more word for this chapter.

Your turn

- *Say it: rājamārgaḥ*
- *Say it: rājamārgaḥ*, once more
- *Say it:* say *rājamārgaḥ*
- *Recall:* say the Sanskrit for elsewhere, then the Sanskrit for a street, then say *rājamārgaḥ* again

Before you move on

What does राजमार्गः mean? ("A main road".) Say it once more.

96.2 चतुष्पथः (catuṣpathaḥ) — a crossroads

Before the new one: say the Sanskrit for a street, then the Sanskrit for a main road.

You'll want to know: चतुष्पथः

चतुष्पथः — *catuṣpathaḥ* — "a crossroads".

The word, taken apart — its roots and family

catuṣpatha is a compound of *catur* "four" and *patha* "road": "where four roads meet", already in the Brāhmaṇas (MW). *catur* is the inherited number behind Latin *quattuor* (MW) and English *four*. Hindi *caupath* "crossroads" comes from the same pair (CDIAL 4642).

What you've built

One more word for this chapter.

Your turn

- *Say it: catuṣpathaḥ*
- *Say it: catuṣpathaḥ*, once more
- *Say it:* say *catuṣpathaḥ*

- *Recall:* say the Sanskrit for a street, then the Sanskrit for a main road, then say *catuṣpathaḥ* again

Before you move on

What does चतुष्पथः mean? ("A crossroads".) Say it once more.

96.3 कोणः (koṇaḥ) — a corner

Before the new one: say the Sanskrit for a main road, then the Sanskrit for a crossroads.

You'll want to know: कोणः

कोणः — *koṇaḥ* — "a corner".

The word, taken apart — its roots and family

koṇa "corner" is often taken to be borrowed from Dravidian: CDIAL 3504 follows Burrow in deriving it from a Dravidian word, and DEDR 2209 sets it beside a Dravidian family of words for corners. It lives on as Hindi *konā* "corner" (CDIAL 3504).

What you've built

One more word for this chapter.

Your turn

- *Say it: koṇaḥ*
- *Say it: koṇaḥ*, once more
- *Say it:* say *koṇaḥ*
- *Recall:* say the Sanskrit for a main road, then the Sanskrit for a crossroads, then say *koṇaḥ* again

Before you move on

What does कोणः mean? ("A corner".) Say it once more.

96.4 पुस्तकालयः (pustakālayaḥ) — a library

Before the new one: say the Sanskrit for a crossroads, then the Sanskrit for a corner.

You'll want to know: पुस्तकालयः

पुस्तकालयः — *pustakālayaḥ* — "a library".

The word, taken apart — its roots and family

pustakālaya is a compound of *pustaka* "book" and *ālaya* "dwelling, house" (MW); the pairing for a library is modern. *pustaka* was borrowed from Iranian: CDIAL 8413 compares Sogdian *pwstk* "book" and Persian *pōst* "skin".

What you've built

One more word for this chapter.

Your turn

- *Say it: pustakālayaḥ*
- *Say it: pustakālayaḥ*, once more
- *Say it:* say *pustakālayaḥ*
- *Recall:* say the Sanskrit for a crossroads, then the Sanskrit for a corner, then say *pustakālayaḥ* again

Before you move on

What does पुस्तकालयः mean? ("A library".) Say it once more.

96.5 विश्वविद्यालयः (viśvavidyālayaḥ) — a university

Before the new one: say the Sanskrit for a corner, then the Sanskrit for a library.

You'll want to know: विश्वविद्यालयः

विश्वविद्यालयः — *viśvavidyālayaḥ* — "a university".

The word, taken apart — its roots and family

viśvavidyālaya is a compound of *viśva* "all, whole" and *vidyālaya* "seat of learning" (MW), itself *vidyā* "knowledge" + *ālaya* "dwelling"; using it for a university is modern. *vidyā* comes from the root √vid "know", which MW sets beside Latin *videre* "see" (English *video*) and English *wot* "know".

What you've built

One more word for this chapter.

Your turn

- *Say it: viśvavidyālayaḥ*
- *Say it: viśvavidyālayaḥ*, once more
- *Say it:* say *viśvavidyālayaḥ*
- *Recall:* say the Sanskrit for a corner, then the Sanskrit for a library, then say *viśvavidyālayaḥ* again

Before you move on

What does विश्वविद्यालयः mean? ("A university".) Say it once more.

Chapter 97

Office, Restaurant, Station, Reason, Because

97.1 कार्यालयः (kāryālayaḥ) — an office

Before the new one: say the Sanskrit for a library, then the Sanskrit for a university.

You'll want to know: कार्यालयः

कार्यालयः — *kāryālayaḥ* — "an office".

The word, taken apart — its roots and family

kāryālaya is built from *kārya* "work, business to be done", formed from the root √kṛ "do" (MW), and *ālaya* "dwelling, house". The pairing for an office is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: kāryālayaḥ*
- *Say it: kāryālayaḥ*, once more
- *Say it:* say *kāryālayaḥ*
- *Recall:* say the Sanskrit for a library, then the Sanskrit for a university, then say *kāryālayaḥ* again

Before you move on

What does कार्यालयः mean? ("An office".) Say it once more.

97.2 भोजनालयः (bhojanālayaḥ) — a restaurant

Before the new one: say the Sanskrit for a university, then the Sanskrit for an office.

You'll want to know: भोजनालयः

भोजनालयः — *bhojanālayaḥ* — "a restaurant".

The word, taken apart — its roots and family

bhojanālaya is built from *bhojana* "a meal, food", from the root √bhuj "enjoy, eat" (MW), and *ālaya* "dwelling, house". The pairing for a restaurant is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: bhojanālayaḥ*
- *Say it: bhojanālayaḥ*, once more
- *Say it:* say *bhojanālayaḥ*
- *Recall:* say the Sanskrit for a university, then the Sanskrit for an office, then say *bhojanālayaḥ* again

Before you move on

What does भोजनालयः mean? ("A restaurant".) Say it once more.

97.3 स्थानकम् (sthānakam) — a station

Before the new one: say the Sanskrit for an office, then the Sanskrit for a restaurant.

You'll want to know: स्थानकम्

स्थानकम् — *sthānakam* — "a station".

The word, taken apart — its roots and family

sthānaka is *sthāna* "place, standing" with the suffix *-ka*; MW already has it as "a place, a spot", and "station" for trains is a modern use. *sthāna* comes from the root √sthā "stand", which MW sets beside Latin *stare* and English *stand*.

What you've built

One more word for this chapter.

Your turn

- *Say it: sthānakam*
- *Say it: sthānakam*, once more
- *Say it:* say *sthānakam*
- *Recall:* say the Sanskrit for an office, then the Sanskrit for a restaurant, then say *sthānakam* again

Before you move on

What does स्थानकम् mean? ("A station".) Say it once more.

97.4 कारणम् (kāraṇam) — a reason

Before the new one: say the Sanskrit for a restaurant, then the Sanskrit for a station.

You'll want to know: कारणम्

कारणम् — *kāraṇam* — "a reason".

The word, taken apart — its roots and family

kāraṇa "cause, reason" comes from the root √kṛ "do, make" (CDIAL 3057): a cause is what brings a thing about. Hindi, Gujarati and Punjabi *kāraṇ* keep it almost unchanged (CDIAL 3057).

What you've built

One more word for this chapter.

Your turn

- *Say it: kāraṇam*
- *Say it: kāraṇam*, once more
- *Say it:* say *kāraṇam*
- *Recall:* say the Sanskrit for a restaurant, then the Sanskrit for a station, then say *kāraṇam* again

Before you move on

What does कारणम् mean? ("A reason".) Say it once more.

97.5 यतः (yataḥ) — because, since

Before the new one: say the Sanskrit for a station, then the Sanskrit for a reason.

You'll want to know: यतः

यतः — *yataḥ* — "because, since".

The word, taken apart — its roots and family

yataḥ is built from the relative stem *ya-* "which" and the ending *-tas* "from": "from which", so "since, because" (MW). MW compares the relative *ya-* with Greek *hos* "who". Pali kept the word as *yato* (CDIAL 10401).

What you've built

One more word for this chapter.

Your turn

- *Say it: yataḥ*
- *Say it: yataḥ*, once more
- *Say it:* say *yataḥ*
- *Recall:* say the Sanskrit for a station, then the Sanskrit for a reason, then say *yataḥ* again

Before you move on

What does यतः mean? ("Because, since".) Say it once more.

Chapter 98

Therefore, So, Cause, For that reason, Because

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say therefore, so, a cause, for that reason and because.
>
> *Complete the last lesson of chapter 98: I can say therefore, so, a cause, for that reason and because.*

98.1 अतः (ataḥ) — therefore

Before the new one: say the Sanskrit for a reason, then the Sanskrit for because.

You'll want to know: अतः

अतः — *ataḥ* — "therefore".

The word, taken apart — its roots and family

ataḥ is built from the pronoun base *a-* "this" and the ending *-tas* "from": "from this", hence "therefore" (MW). It is the same *-tas* that you met in *yataḥ*.

What you've built

One more word for this chapter.

Your turn

- *Say it: ataḥ*
- *Say it: ataḥ*, once more
- *Say it:* say *ataḥ*
- *Recall:* say the Sanskrit for a reason, then the Sanskrit for because, then say *ataḥ* again

Before you move on

What does अतः mean? ("Therefore".) Say it once more.

98.2 तस्मात् (tasmāt) — so, from that

Before the new one: say the Sanskrit for because, then the Sanskrit for therefore.

You'll want to know: तस्मात्

तस्मात् — *tasmāt* — "so, from that".

The word, taken apart — its roots and family

tasmāt is the ablative, "from that", of the pronoun *tad* "that" (MW), so "on that account, therefore". The pronoun is inherited from PIE **tód* (EtymDB), the same word as English *that*.

What you've built

One more word for this chapter.

Your turn

- *Say it: tasmāt*
- *Say it: tasmāt*, once more
- *Say it:* say *tasmāt*
- *Recall:* say the Sanskrit for because, then the Sanskrit for therefore, then say *tasmāt* again

Before you move on

What does तस्मात् mean? ("So, from that".) Say it once more.

98.3 हेतुः (hetuḥ) — a cause

Before the new one: say the Sanskrit for therefore, then the Sanskrit for so.

You'll want to know: हेतुः

हेतुः — *hetuḥ* — "a cause".

The word, taken apart — its roots and family

hetu comes from the root √hi "urge on, set in motion" (CDIAL 14160): MW's first gloss is "impulse", the push that makes a thing happen, and from that "motive, cause, reason". Pali kept it unchanged as *hetu* (CDIAL 14160).

What you've built

One more word for this chapter.

Your turn

- *Say it: hetuḥ*
- *Say it: hetuḥ*, once more
- *Say it:* say *hetuḥ*
- *Recall:* say the Sanskrit for therefore, then the Sanskrit for so, then say *hetuḥ* again

Before you move on

What does हेतुः mean? ("A cause".) Say it once more.

98.4 तदर्थम् (tadartham) — for that reason

Before the new one: say the Sanskrit for so, then the Sanskrit for a cause.

You'll want to know: तदर्थम्

तदर्थम् — *tadartham* — "for that reason".

The word, taken apart — its roots and family

tadartham is a compound of *tad* "that" and *artha* "aim, purpose, sake", used in the accusative as an adverb: "for that end, on that account" (MW). The pronoun *tad* is inherited from PIE **tód* (EtymDB), the same word as English *that*.

What you've built

One more word for this chapter.

Your turn

- *Say it: tadartham*
- *Say it: tadartham*, once more
- *Say it:* say *tadartham*
- *Recall:* say the Sanskrit for so, then the Sanskrit for a cause, then say *tadartham* again

Before you move on

What does तदर्थम् mean? ("For that reason".) Say it once more.

98.5 यस्मात् (yasmāt) — because

Before the new one: say the Sanskrit for a cause, then the Sanskrit for for that reason.

You'll want to know: यस्मात्

यस्मात् — *yasmāt* — "because".

The word, taken apart — its roots and family

yasmāt is the ablative, "from which", of the relative pronoun *ya-* "which" (MW), so "for which reason, because". It answers *tasmāt* "therefore", and MW compares the relative *ya-* with Greek *hos* "who".

What you've built

One more word for this chapter.

Your turn

- *Say it: yasmāt*
- *Say it: yasmāt*, once more
- *Say it:* say *yasmāt*
- *Recall:* say the Sanskrit for a cause, then the Sanskrit for for that reason, then say *yasmāt* again

Before you move on

What does यस्मात् mean? ("Because".) Say it once more.

Chapter 99

Bed, Pillow, Blanket, Curtain, Lock

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a bed, a pillow, a blanket, a curtain and a lock.
>
> *Complete the last lesson of chapter 99: I can say a bed, a pillow, a blanket, a curtain and a lock.*

99.1 मञ्चः (mañcaḥ) — a bed, a platform

Before the new one: say the Sanskrit for for that reason, then the Sanskrit for because.

You'll want to know: मञ्चः

मञ्चः — *mañcaḥ* — "a bed, a platform".

The word, taken apart — its roots and family

mañca "a stage, a platform, a bed" is of unclear origin: CDIAL 9715 suggests a root √mac with a query mark, and MW equates √mac with a twin √mañc that it calls probably artificial. It lives on as Punjabi *mañjā* "bed, cot" and Hindi *māñcā* "platform" (CDIAL 9715).

What you've built

One more word for this chapter.

Your turn

- *Say it: mañcaḥ*
- *Say it: mañcaḥ*, once more
- *Say it:* say *mañcaḥ*
- *Recall:* say the Sanskrit for for that reason, then the Sanskrit for because, then say *mañcaḥ* again

Before you move on

What does मञ्चः mean? ("A bed, a platform".) Say it once more.

99.2 उपधानम् (upadhānam) — a pillow

Before the new one: say the Sanskrit for because, then the Sanskrit for a bed.

You'll want to know: उपधानम्

उपधानम् — *upadhānam* — "a pillow".

The word, taken apart — its roots and family

upadhāna comes from *upa-√dhā* "place upon": "that on which one rests", a pillow, already in the Atharvaveda (MW). The root √dhā "put, place" is one MW sets beside Greek *tithēmi* and English *do*.

What you've built

One more word for this chapter.

Your turn

- *Say it: upadhānam*
- *Say it: upadhānam*, once more
- *Say it:* say *upadhānam*
- *Recall:* say the Sanskrit for because, then the Sanskrit for a bed, then say *upadhānam* again

Before you move on

What does उपधानम् mean? ("A pillow".) Say it once more.

99.3 कम्बलः (kambalaḥ) — a blanket

Before the new one: say the Sanskrit for a bed, then the Sanskrit for a pillow.

You'll want to know: कम्बलः

कम्बलः — *kambalaḥ* — "a blanket".

The word, taken apart — its roots and family

kambala "a woollen blanket" is already in the Atharvaveda (MW), but its source is uncertain: CDIAL 2771, after EWA, allows that it may be borrowed from Austroasiatic. Hindi *kambal* "blanket" comes from it (CDIAL 2771).

What you've built

One more word for this chapter.

Your turn

- *Say it: kambalaḥ*
- *Say it: kambalaḥ*, once more
- *Say it:* say *kambalaḥ*
- *Recall:* say the Sanskrit for a bed, then the Sanskrit for a pillow, then say *kambalaḥ* again

Before you move on

What does कम्बलः mean? ("A blanket".) Say it once more.

99.4 यवनिका (yavanikā) — a curtain

Before the new one: say the Sanskrit for a pillow, then the Sanskrit for a blanket.

You'll want to know: यवनिका

यवनिका — *yavanikā* — "a curtain".

The word, taken apart — its roots and family

MW lists *yavanikā* "a screen of cloth, a curtain" under *yavana* "Ionian, Greek", beside *yavanikā* "a Greek woman", which suggests "the Greek cloth". MW also records a form *javanikā*, so the link with the Greeks is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: yavanikā*
- *Say it: yavanikā*, once more
- *Say it:* say *yavanikā*
- *Recall:* say the Sanskrit for a pillow, then the Sanskrit for a blanket, then say *yavanikā* again

Before you move on

What does यवनिका mean? ("A curtain".) Say it once more.

99.5 तालकम् (tālakam) — a lock

Before the new one: say the Sanskrit for a blanket, then the Sanskrit for a curtain.

You'll want to know: तालकम्

तालकम् — *tālakam* — "a lock".

The word, taken apart — its roots and family

tālaka "a lock, a bolt" is known only from the old word lists (MW). CDIAL 5749 and DEDR 3179 compare it with a Dravidian family of words for a door bar or bolt, so it is perhaps borrowed from Dravidian. It lives on as Hindi *tālā* "lock" (CDIAL 5749).

What you've built

One more word for this chapter.

Your turn

- *Say it: tālakam*
- *Say it: tālakam*, once more
- *Say it:* say *tālakam*
- *Recall:* say the Sanskrit for a blanket, then the Sanskrit for a curtain, then say *tālakam* again

Before you move on

What does तालकम् mean? ("A lock".) Say it once more.

99.6 Time and places — a first pass

Say the words for a curtain and a lock.

Your turn

Say these aloud:

- a day, early evening, afternoon, midnight, dawn
- morning, twilight, early winter, late winter, autumn
- a moment, before, after, now, always

- ever, a delay, left, right; south, inside
- outside, above, below, in front, behind

Before you move on

A day? (अहः, *ahaḥ.*) Early evening? (प्रदोषः, *pradoṣaḥ.*) Afternoon? (अपराह्णः, *aparāhṇaḥ.*) Midnight? (मध्यरात्रिः, *madhyarātriḥ.*) Dawn? (उषः, *uṣaḥ.*) Morning? (प्रभातम्, *prabhātam.*) Twilight? (सन्ध्या, *sandhyā.*) Early winter? (हेमन्तः, *hemantaḥ.*) Late winter? (शिशिरः, *śiśiraḥ.*) Autumn? (शरद्, *śarad.*) A moment? (निमेषः, *nimeṣaḥ.*) Before? (पूर्वम्, *pūrvam.*) After? (पश्चात्, *paścāt.*) Now? (अधुना, *adhunā.*) Always? (सर्वदा, *sarvadā.*) Ever? (कदापि, *kadāpi.*) A delay? (विलम्बः, *vilambaḥ.*) Left? (वामः, *vāmaḥ.*) Right; south? (दक्षिणः, *dakṣiṇaḥ.*) Inside? (अन्तः, *antaḥ.*) Outside? (बहिः, *bahiḥ.*) Above? (उपरि, *upari.*) Below? (अधः, *adhaḥ.*) In front? (अग्रे, *agre.*) Behind? (पृष्ठतः, *pṛṣṭhataḥ.*)

99.7 Places, why and the house — a second pass

Say the words for in the middle and beside.

Your turn

Say these aloud:

- in the middle, beside, everywhere, elsewhere, a street
- a main road, a crossroads, a corner, a library, a university
- an office, a restaurant, a station, a reason, because
- therefore, so, a cause, for that reason, because
- a bed, a pillow, a blanket, a curtain, a lock

Before you move on

In the middle? (मध्ये, *madhye.*) Beside? (पार्श्वे, *pārśve.*) Everywhere? (सर्वत्र, *sarvatra.*) Elsewhere? (अन्यत्र, *anyatra.*) A street? (वीथी, *vīthī.*) A main road? (राजमार्गः, *rājamārgaḥ.*) A crossroads? (चतुष्पथः,

catuṣpathaḥ.) A corner? (कोणः, *koṇaḥ.*) A library? (पुस्तकालयः, *pustakālayaḥ.*) A university? (विश्वविद्यालयः, *viśvavidyālayaḥ.*) An office? (कार्यालयः, *kāryālayaḥ.*) A restaurant? (भोजनालयः, *bhojanālayaḥ.*) A station? (स्थानकम्, *sthānakam.*) A reason? (कारणम्, *kāraṇam.*) Because? (यतः, *yataḥ.*) Therefore? (अतः, *ataḥ.*) So? (तस्मात्, *tasmāt.*) A cause? (हेतुः, *hetuḥ.*) For that reason? (तदर्थम्, *tadartham.*) Because? (यस्मात्, *yasmāt.*) A bed? (मञ्चः, *mañcaḥ.*) A pillow? (उपधानम्, *upadhānam.*) A blanket? (कम्बलः, *kambalaḥ.*) A curtain? (यवनिका, *yavanikā.*) A lock? (तालकम्, *tālakam.*)

Chapter 100

Nail, Hammer, Scissors, Needle, Thread

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a nail, a hammer, scissors, a needle and thread.
>
> *Complete the last lesson of chapter 100: I can say a nail, a hammer, scissors, a needle and thread.*

100.1 कीलः (kīlaḥ) — a nail (to hammer)

Before the new one: say the Sanskrit for a curtain, then the Sanskrit for a lock.

You'll want to know: कीलः

कीलः — *kīlaḥ* — "a nail (to hammer)".

The word, taken apart — its roots and family

kīla "a stake, a peg, a pin" has no settled origin: CDIAL 3202 notes an Indo-European account (EWA) but also a proposal of non-Aryan origin, since forms with *kh-* stand beside it. It lives on as Hindi *kīl* "nail" (CDIAL 3202).

What you've built

One more word for this chapter.

Your turn

- *Say it: kīlaḥ*
- *Say it: kīlaḥ*, once more
- *Say it:* say *kīlaḥ*
- *Recall:* say the Sanskrit for a curtain, then the Sanskrit for a lock, then say *kīlaḥ* again

Before you move on

What does कीलः mean? ("A nail (to hammer)".) Say it once more.

100.2 मुद्गरः (mudgaraḥ) — a hammer

Before the new one: say the Sanskrit for a lock, then the Sanskrit for a nail.

You'll want to know: मुद्गरः

मुद्गरः — *mudgaraḥ* — "a hammer".

The word, taken apart — its roots and family

MW takes *mudgara* "a hammer, a mallet" as probably formed from *mudga* "mung bean", but gives no further account, so its source is uncertain. It lives on as Marathi and Gujarati *mogar* "mallet" (CDIAL 10199).

What you've built

One more word for this chapter.

Your turn

- *Say it: mudgaraḥ*
- *Say it: mudgaraḥ*, once more
- *Say it:* say *mudgaraḥ*

- *Recall:* say the Sanskrit for a lock, then the Sanskrit for a nail, then say *mudgaraḥ* again

Before you move on

What does मुद्गरः mean? ("A hammer".) Say it once more.

100.3 कर्तरी (kartarī) — scissors

Before the new one: say the Sanskrit for a nail, then the Sanskrit for a hammer.

You'll want to know: कर्तरी

कर्तरी — *kartarī* — "scissors".

The word, taken apart — its roots and family

kartarī "scissors" comes from the root √kṛt "cut" (CDIAL 2858), which MW compares with Latin *curtus* "cut short", the source of English *curt*. It lives on as Hindi and Punjabi *katarnī* "scissors" (CDIAL 2858).

What you've built

One more word for this chapter.

Your turn

- *Say it: kartarī*
- *Say it: kartarī*, once more
- *Say it:* say *kartarī*
- *Recall:* say the Sanskrit for a nail, then the Sanskrit for a hammer, then say *kartarī* again

Before you move on

What does कर्तरी mean? ("Scissors".) Say it once more.

100.4 सूचिः (sūciḥ) — a needle

Before the new one: say the Sanskrit for a hammer, then the Sanskrit for scissors.

You'll want to know: सूचिः

सूचिः — *sūciḥ* — "a needle".

The word, taken apart — its roots and family

MW connects *sūci* "needle" with *sūtra* "thread" and the root √siv "sew", though CDIAL 13551 notes that some forms point to an older *śūci-*, so the link is not settled. It lives on as Hindi *sūī* and Bengali *sui* "needle" (CDIAL 13551).

What you've built

One more word for this chapter.

Your turn

- *Say it: sūciḥ*
- *Say it: sūciḥ*, once more
- *Say it:* say *sūciḥ*
- *Recall:* say the Sanskrit for a hammer, then the Sanskrit for scissors, then say *sūciḥ* again

Before you move on

What does सूचिः mean? ("A needle".) Say it once more.

100.5 सूत्रम् (sūtram) — thread

Before the new one: say the Sanskrit for scissors, then the Sanskrit for a needle.

You'll want to know: सूत्रम्

सूत्रम् — *sūtram* — "thread".

The word, taken apart — its roots and family

sūtra "thread" comes from the root √siv "sew" (MW), an Indo-European root (EtymDB) that also gave English *sew* and Latin *suere*. It lives on as Hindi *sūt* "thread" (CDIAL 13561), and a *sūtra* of rules is a "thread" of short lines.

What you've built

One more word for this chapter.

Your turn

- *Say it: sūtram*
- *Say it: sūtram*, once more
- *Say it:* say *sūtram*
- *Recall:* say the Sanskrit for scissors, then the Sanskrit for a needle, then say *sūtram* again

Before you move on

What does सूत्रम् mean? ("Thread".) Say it once more.

Chapter 101

Comb, Soap, Towel, Glasses, Bag

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a comb, soap, a towel, glasses and a bag.
>
> *Complete the last lesson of chapter 101: I can say a comb, soap, a towel, glasses and a bag.*

101.1 कंकतिका (kaṅkatikā) — a comb

Before the new one: say the Sanskrit for a needle, then the Sanskrit for thread.

You'll want to know: कंकतिका

कंकतिका — *kaṅkatikā* — "a comb".

The word, taken apart — its roots and family

kaṅkatikā is *kaṅkata* "comb", already in the Atharvaveda (MW), with the small-thing suffix *-ikā*. CDIAL 2598 calls *kaṅkata* of doubtful Indo-European origin, and it lives on as Hindi *kaṅghī* "comb" (CDIAL 2598).

What you've built

One more word for this chapter.

Your turn

- *Say it: kaṅkatikā*
- *Say it: kaṅkatikā*, once more
- *Say it:* say *kaṅkatikā*
- *Recall:* say the Sanskrit for a needle, then the Sanskrit for thread, then say *kaṅkatikā* again

Before you move on

What does कंकतिका mean? ("A comb".) Say it once more.

101.2 फेनकम् (phenakam) — soap

Before the new one: say the Sanskrit for thread, then the Sanskrit for a comb.

You'll want to know: फेनकम्

फेनकम् — *phenakam* — "soap".

The word, taken apart — its roots and family

phenaka is built on *phena* "foam" with the suffix *-ka*: "the foaming thing". MW sets *phena* beside English *foam*, an inherited Indo-European word; using *phenaka* for soap is modern, since MW gives it other senses.

What you've built

One more word for this chapter.

Your turn

- *Say it: phenakam*
- *Say it: phenakam*, once more
- *Say it:* say *phenakam*

- *Recall:* say the Sanskrit for thread, then the Sanskrit for a comb, then say *phenakam* again

Before you move on

What does फेनकम् mean? ("Soap".) Say it once more.

101.3 प्रोञ्छनम् (proñchanam) — a towel

Before the new one: say the Sanskrit for a comb, then the Sanskrit for soap.

You'll want to know: प्रोञ्छनम्

प्रोञ्छनम् — *proñchanam* — "a towel".

The word, taken apart — its roots and family

proñchana "wiping" is formed from *proñchati* "wipes off", which MW splits as *pra* + √uñch. CDIAL 9011 finds that link doubtful and suggests the verb is a Sanskritized Prakrit word, perhaps from Dravidian; Hindi *pochnā* "to wipe" comes from it. Using *proñchana* for a towel is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: proñchanam*
- *Say it: proñchanam*, once more
- *Say it:* say *proñchanam*
- *Recall:* say the Sanskrit for a comb, then the Sanskrit for soap, then say *proñchanam* again

Before you move on

What does प्रोञ्छनम् mean? ("A towel".) Say it once more.

101.4 उपनेत्रम् (upanetram) — glasses, spectacles

Before the new one: say the Sanskrit for soap, then the Sanskrit for a towel.

You'll want to know: उपनेत्रम्

उपनेत्रम् — *upanetram* — "glasses, spectacles".

The word, taken apart — its roots and family

upanetra is built from *upa* "near, additional" and *netra* "eye"; MW explains *netra* as "the guiding organ", from the root √nī "lead". The pairing for spectacles is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: upanetram*
- *Say it: upanetram*, once more
- *Say it:* say *upanetram*
- *Recall:* say the Sanskrit for soap, then the Sanskrit for a towel, then say *upanetram* again

Before you move on

What does उपनेत्रम् mean? ("Glasses, spectacles".) Say it once more.

101.5 स्यूतः (syūtaḥ) — a bag

Before the new one: say the Sanskrit for a towel, then the Sanskrit for glasses.

You'll want to know: स्यूतः

स्यूतः — *syūtaḥ* — "a bag".

The word, taken apart — its roots and family

syūta is the past participle of √siv "sew": "something sewn", and MW records it as "a sack, a coarse canvas bag". The root is inherited from Indo-European (EtymDB) and is the same root as English *sew*.

What you've built

One more word for this chapter.

Your turn

- *Say it: syūtaḥ*
- *Say it: syūtaḥ*, once more
- *Say it:* say *syūtaḥ*
- *Recall:* say the Sanskrit for a towel, then the Sanskrit for glasses, then say *syūtaḥ* again

Before you move on

What does स्यूतः mean? ("A bag".) Say it once more.

>
> *Complete the last lesson of chapter 102: I can say a plate, a cup, a spoon, a stove and a candle.*

102.1 स्थाली (sthālī) — a plate, a pot

Before the new one: say the Sanskrit for glasses, then the Sanskrit for a bag.

You'll want to know: स्थाली

स्थाली — *sthālī* — "a plate, a pot".

The word, taken apart — its roots and family

sthālī "an earthen dish, a cooking pot" is already in the Atharvaveda, and MW gives no derivation for it, so its origin is uncertain. It lives on as Hindi *thālī* and Marathi *thāḷī*, the plate a whole meal is served on (CDIAL 13766).

What you've built

One more word for this chapter.

Your turn

- *Say it: sthālī*
- *Say it: sthālī*, once more
- *Say it:* say *sthālī*
- *Recall:* say the Sanskrit for glasses, then the Sanskrit for a bag, then say *sthālī* again

Before you move on

What does स्थाली mean? ("A plate, a pot".) Say it once more.

102.2 चषकः (caṣakaḥ) — a cup

Before the new one: say the Sanskrit for a bag, then the Sanskrit for a plate.

You'll want to know: चषकः

चषकः — *caṣakaḥ* — "a cup".

The word, taken apart — its roots and family

caṣaka "a cup, a wine-glass" belongs to classical poetry (MW). CDIAL 4726a, after EWA, takes it as borrowed from Iranian, while EtymDB links it with a root √caṣ "eat", so its origin is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: caṣakaḥ*
- *Say it: caṣakaḥ*, once more
- *Say it:* say *caṣakaḥ*
- *Recall:* say the Sanskrit for a bag, then the Sanskrit for a plate, then say *caṣakaḥ* again

Before you move on

What does चषकः mean? ("A cup".) Say it once more.

102.3 चमसः (camasaḥ) — a spoon

Before the new one: say the Sanskrit for a plate, then the Sanskrit for a cup.

You'll want to know: चमसः

चमसः — *camasaḥ* — "a spoon".

The word, taken apart — its roots and family

camasa comes from the root √cam "sip, drink" (MW). In the Rigveda it is the wooden cup or ladle the Soma was drunk from; "spoon" is its everyday sense today.

What you've built

One more word for this chapter.

Your turn

- *Say it: camasaḥ*
- *Say it: camasaḥ*, once more
- *Say it:* say *camasaḥ*
- *Recall:* say the Sanskrit for a plate, then the Sanskrit for a cup, then say *camasaḥ* again

Before you move on

What does चमसः mean? ("A spoon".) Say it once more.

102.4 चुल्ली (cullī) — a stove

Before the new one: say the Sanskrit for a cup, then the Sanskrit for a spoon.

You'll want to know: चुल्ली

चुल्ली — *cullī* — "a stove".

The word, taken apart — its roots and family

cullī "a fireplace, a hearth" is often taken to be borrowed from Dravidian: CDIAL 4879 says so after EWA, and DEDR 2709 sets it beside Dravidian words for a furnace or kiln. It lives on as Hindi *cūlhā* "stove" (CDIAL 4879).

What you've built

One more word for this chapter.

Your turn

- *Say it: cullī*
- *Say it: cullī*, once more
- *Say it:* say *cullī*
- *Recall:* say the Sanskrit for a cup, then the Sanskrit for a spoon, then say *cullī* again

Before you move on

What does चुल्ली mean? ("A stove".) Say it once more.

102.5 वर्तिका (vartikā) — a candle, a wick

Before the new one: say the Sanskrit for a spoon, then the Sanskrit for a stove.

You'll want to know: वर्तिका

वर्तिका — *vartikā* — "a candle, a wick".

The word, taken apart — its roots and family

vartikā is *varti* "wick" with the suffix *-kā*, from the root √vṛt "turn, roll" (CDIAL 11359): a wick is a rolled strip. It lives on as Hindi *battī*

"wick, lamp" (CDIAL 11359); using it for a candle is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: vartikā*
- *Say it: vartikā*, once more
- *Say it:* say *vartikā*
- *Recall:* say the Sanskrit for a spoon, then the Sanskrit for a stove, then say *vartikā* again

Before you move on

What does वर्तिका mean? ("A candle, a wick".) Say it once more.

Chapter 103

Ball, Toy, Ring, Bangle, Shawl

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a ball, a toy, a ring, a bangle and a shawl.
>
> *Complete the last lesson of chapter 103: I can say a ball, a toy, a ring, a bangle and a shawl.*

103.1 कन्दुकः (kandukaḥ) — a ball

Before the new one: say the Sanskrit for a stove, then the Sanskrit for a candle.

You'll want to know: कन्दुकः

कन्दुकः — *kandukaḥ* — "a ball".

The word, taken apart — its roots and family

kanduka "a ball to play with" is often taken to be borrowed from Dravidian: CDIAL 2727 and 4248, after Burrow and Mayrhofer, put it and its twin *genduka* down to a Dravidian source. The twin lives on as Hindi *gẽd* "ball" (CDIAL 4248).

What you've built

One more word for this chapter.

Your turn

- *Say it: kandukaḥ*
- *Say it: kandukaḥ*, once more
- *Say it:* say *kandukaḥ*
- *Recall:* say the Sanskrit for a stove, then the Sanskrit for a candle, then say *kandukaḥ* again

Before you move on

What does कन्दुकः mean? ("A ball".) Say it once more.

103.2 क्रीडनकम् (krīḍanakam) — a toy

Before the new one: say the Sanskrit for a candle, then the Sanskrit for a ball.

You'll want to know: क्रीडनकम्

क्रीडनकम् — *krīḍanakam* — "a toy".

The word, taken apart — its roots and family

krīḍanaka is built from *krīḍana* "playing" (CDIAL 3593), from the root √krīḍ "play, sport", with the suffix *-ka*: "a plaything" (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: krīḍanakam*
- *Say it: krīḍanakam*, once more
- *Say it:* say *krīḍanakam*
- *Recall:* say the Sanskrit for a candle, then the Sanskrit for a ball, then say *krīḍanakam* again

Before you move on

What does क्रीडनकम् mean? ("A toy".) Say it once more.

103.3 अंगुलीयकम् (aṅgulīyakam) — a ring

Before the new one: say the Sanskrit for a ball, then the Sanskrit for a toy.

You'll want to know: अंगुलीयकम्

अंगुलीयकम् — *aṅgulīyakam* — "a ring".

The word, taken apart — its roots and family

aṅgulīyaka is *aṅgulīya* "finger-ring" (CDIAL 136) with the suffix *-ka*, and *aṅgulīya* is built from *aṅguli* "finger" with the suffix *-īya* "belonging to": "the thing that belongs on a finger", a ring (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: aṅgulīyakam*
- *Say it: aṅgulīyakam*, once more
- *Say it:* say *aṅgulīyakam*
- *Recall:* say the Sanskrit for a ball, then the Sanskrit for a toy, then say *aṅgulīyakam* again

Before you move on

What does अंगुलीयकम् mean? ("A ring".) Say it once more.

103.4 कंकणम् (kaṅkaṇam) — a bangle

Before the new one: say the Sanskrit for a toy, then the Sanskrit for a ring.

You'll want to know: कंकणम्

कंकणम् — *kaṅkaṇam* — "a bangle".

The word, taken apart — its roots and family

kaṅkaṇa "a bracelet" is found from the Mahābhārata on (MW); MW cites only a grammarians' root √kai for it, so its origin is uncertain. It lives on as Punjabi *kaṅgaṇ* and Hindi *kaknā* "bracelet" (CDIAL 2597).

What you've built

One more word for this chapter.

Your turn

- *Say it: kaṅkaṇam*
- *Say it: kaṅkaṇam*, once more
- *Say it:* say *kaṅkaṇam*
- *Recall:* say the Sanskrit for a toy, then the Sanskrit for a ring, then say *kaṅkaṇam* again

Before you move on

What does कंकणम् mean? ("A bangle".) Say it once more.

103.5 उत्तरीयम् (uttarīyam) — a shawl, an upper garment

Before the new one: say the Sanskrit for a ring, then the Sanskrit for a bangle.

You'll want to know: उत्तरीयम्

उत्तरीयम् — *uttarīyam* — "a shawl, an upper garment".

The word, taken apart — its roots and family

uttarīya is built from *uttara* "upper, higher" with the suffix -*īya* "belonging to": the garment that belongs on the upper body (MW; CDIAL 1781). Marathi kept it as *uttarī* "scarf" (CDIAL 1781).

What you've built

One more word for this chapter.

Your turn

- *Say it: uttarīyam*
- *Say it: uttarīyam*, once more
- *Say it:* say *uttarīyam*
- *Recall:* say the Sanskrit for a ring, then the Sanskrit for a bangle, then say *uttarīyam* again

Before you move on

What does उत्तरीयम् mean? ("A shawl, an upper garment".) Say it once more.

Chapter 104

Sari, Shoe, Turban, Shirt, Telephone

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a sari, a shoe, a turban, a shirt and a telephone.
>
> *Complete the last lesson of chapter 104: I can say a sari, a shoe, a turban, a shirt and a telephone.*

104.1 शाटिका (śāṭikā) — a sari

Before the new one: say the Sanskrit for a bangle, then the Sanskrit for a shawl.

You'll want to know: शाटिका

शाटिका — *śāṭikā* — "a sari".

The word, taken apart — its roots and family

śāṭikā is *śāṭī* "a strip of cloth, a garment" (MW) with the suffix *-kā*; MW takes *śāṭa* from a root √śaṭ with a query, so the deeper source is uncertain. *śāṭī* wore down into Hindi *sāṛī* (CDIAL 12381), the source of English *sari* (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: śāṭikā*
- *Say it: śāṭikā*, once more
- *Say it:* say *śāṭikā*
- *Recall:* say the Sanskrit for a bangle, then the Sanskrit for a shawl, then say *śāṭikā* again

Before you move on

What does शाटिका mean? ("A sari".) Say it once more.

104.2 पादत्राणम् (pādatrāṇam) — a shoe

Before the new one: say the Sanskrit for a shawl, then the Sanskrit for a sari.

You'll want to know: पादत्राणम्

पादत्राणम् — *pādatrāṇam* — "a shoe".

The word, taken apart — its roots and family

pādatrāṇa is built from *pāda* "foot" and *trāṇa* "protection" (MW): "foot-guard". The pair is old, already in Suśruta (CDIAL 8060), and *pāda* is the inherited word for "foot" that MW sets beside Latin *pes* and English *foot*.

What you've built

One more word for this chapter.

Your turn

- *Say it: pādatrāṇam*
- *Say it: pādatrāṇam*, once more
- *Say it:* say *pādatrāṇam*

- *Recall:* say the Sanskrit for a shawl, then the Sanskrit for a sari, then say *pādatrāṇam* again

Before you move on

What does पादत्राणम् mean? ("A shoe".) Say it once more.

104.3 उष्णीषम् (uṣṇīṣam) — a turban

Before the new one: say the Sanskrit for a sari, then the Sanskrit for a shoe.

You'll want to know: उष्णीषम्

उष्णीषम् — *uṣṇīṣam* — "a turban".

The word, taken apart — its roots and family

uṣṇīṣa "anything wound round the head, a turban" is old, already in the Atharvaveda. The grammarians quoted by MW read it as *uṣṇa* "heat" and *īṣ* "ward off", "what keeps off the heat", but that is a learned guess, and its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *uṣṇīṣam*
- *Say it:* *uṣṇīṣam*, once more
- *Say it:* say *uṣṇīṣam*
- *Recall:* say the Sanskrit for a sari, then the Sanskrit for a shoe, then say *uṣṇīṣam* again

Before you move on

What does उष्णीषम् mean? ("A turban".) Say it once more.

104.4 कञ्चुकः (kañcukaḥ) — a shirt, a blouse

Before the new one: say the Sanskrit for a shoe, then the Sanskrit for a turban.

You'll want to know: कञ्चुकः

कञ्चुकः — *kañcukaḥ* — "a shirt, a blouse".

The word, taken apart — its roots and family

kañcuka "a close-fitting jacket, a bodice; a snake's slough" is possibly borrowed from Munda: CDIAL 2626 gives that view after Kuiper and EWA, while MW suggests a root √kañc with a query. The origin is uncertain; Pali kept it as *kañcuka* (CDIAL 2626).

What you've built

One more word for this chapter.

Your turn

- *Say it: kañcukaḥ*
- *Say it: kañcukaḥ*, once more
- *Say it:* say *kañcukaḥ*
- *Recall:* say the Sanskrit for a shoe, then the Sanskrit for a turban, then say *kañcukaḥ* again

Before you move on

What does कञ्चुकः mean? ("A shirt, a blouse".) Say it once more.

104.5 दूरभाषः (dūrabhāṣaḥ) — a telephone

Before the new one: say the Sanskrit for a turban, then the Sanskrit for a shirt.

You'll want to know: दूरभाषः

दूरभाषः — *dūrabhāṣaḥ* — "a telephone".

The word, taken apart — its roots and family

dūrabhāṣa is built from *dūra* "far" and *bhāṣa* "speech", from the root √bhāṣ "speak" (MW): "far-speech". It is a modern coinage, made the way English *telephone* was made from Greek *tele* "far" + *phōnē* "voice".

What you've built

One more word for this chapter.

Your turn

- *Say it: dūrabhāṣaḥ*
- *Say it: dūrabhāṣaḥ*, once more
- *Say it:* say *dūrabhāṣaḥ*
- *Recall:* say the Sanskrit for a turban, then the Sanskrit for a shirt, then say *dūrabhāṣaḥ* again

Before you move on

What does दूरभाषः mean? ("A telephone".) Say it once more.

Chapter 105

Television, Computer, Machine, Fan, Box

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a television, a computer, a machine, a fan and a box.
>
> *Complete the last lesson of chapter 105: I can say a television, a computer, a machine, a fan and a box.*

105.1 दूरदर्शनम् (dūradarśanam) — a television

Before the new one: say the Sanskrit for a shirt, then the Sanskrit for a telephone.

You'll want to know: दूरदर्शनम्

दूरदर्शनम् — *dūradarśanam* — "a television".

The word, taken apart — its roots and family

dūradarśana is built from *dūra* "far" and *darśana* "seeing", from the root √dṛś "see" (MW): "far-seeing". It is a modern coinage, made the way English *television* was made from Greek *tele* "far" + Latin *visio* "seeing".

What you've built

One more word for this chapter.

Your turn

- *Say it: dūradarśanam*
- *Say it: dūradarśanam*, once more
- *Say it:* say *dūradarśanam*
- *Recall:* say the Sanskrit for a shirt, then the Sanskrit for a telephone, then say *dūradarśanam* again

Before you move on

What does दूरदर्शनम् mean? ("A television".) Say it once more.

105.2 संगणकम् (saṅgaṇakam) — a computer

Before the new one: say the Sanskrit for a telephone, then the Sanskrit for a television.

You'll want to know: संगणकम्

संगणकम् — *saṅgaṇakam* — "a computer".

The word, taken apart — its roots and family

saṅgaṇaka is built from *sam* "together" and the root √gaṇ "count, reckon" (MW), with the agent suffix *-aka*: "the one that reckons it all up". It is a modern coinage for the computer, made the way English made *computer* from *compute*.

What you've built

One more word for this chapter.

Your turn

- *Say it: saṅgaṇakam*
- *Say it: saṅgaṇakam*, once more
- *Say it:* say *saṅgaṇakam*

- *Recall:* say the Sanskrit for a telephone, then the Sanskrit for a television, then say *saṅgaṇakam* again

Before you move on

What does संगणकम् mean? ("A computer".) Say it once more.

105.3 यन्त्रम् (yantram) — a machine

Before the new one: say the Sanskrit for a television, then the Sanskrit for a computer.

You'll want to know: यन्त्रम्

यन्त्रम् — *yantram* — "a machine".

The word, taken apart — its roots and family

yantra comes from the root √yam "hold, restrain" with the tool suffix *-tra* (CDIAL 10412): in the Rigveda it is a controlling device, a prop or a fetter, and later any contrivance or machine (MW). Punjabi *jandrā* "padlock" comes from it (CDIAL 10412).

What you've built

One more word for this chapter.

Your turn

- *Say it: yantram*
- *Say it: yantram*, once more
- *Say it:* say *yantram*
- *Recall:* say the Sanskrit for a television, then the Sanskrit for a computer, then say *yantram* again

Before you move on

What does यन्त्रम् mean? ("A machine".) Say it once more.

105.4 व्यजनम् (vyajanam) — a fan

Before the new one: say the Sanskrit for a computer, then the Sanskrit for a machine.

You'll want to know: व्यजनम्

व्यजनम् — *vyajanam* — "a fan".

The word, taken apart — its roots and family

vyajana "a fan" comes from the root √vīj, also written *vyaj*, "to fan, to cool by fanning" (MW; CDIAL 12043). Its twin *vījana* lives on as Hindi *bījnā* "fan" (CDIAL 12043).

What you've built

One more word for this chapter.

Your turn

- *Say it: vyajanam*
- *Say it: vyajanam*, once more
- *Say it:* say *vyajanam*
- *Recall:* say the Sanskrit for a computer, then the Sanskrit for a machine, then say *vyajanam* again

Before you move on

What does व्यजनम् mean? ("A fan".) Say it once more.

105.5 पेटिका (peṭikā) — a box

Before the new one: say the Sanskrit for a machine, then the Sanskrit for a fan.

You'll want to know: पेटिका

पेटिका — *peṭikā* — "a box".

The word, taken apart — its roots and family

peṭikā is *peṭaka* "a little basket, a box" with the feminine suffix *-ikā*, and MW takes *peṭaka* from *piṭaka* "basket". CDIAL 8164 calls the family non-Aryan, and DEDR 4388 sets it beside Dravidian words for a box; Marathi *peṭī* "box" belongs to it (CDIAL 8164).

What you've built

One more word for this chapter.

Your turn

- *Say it: peṭikā*
- *Say it: peṭikā*, once more
- *Say it:* say *peṭikā*
- *Recall:* say the Sanskrit for a machine, then the Sanskrit for a fan, then say *peṭikā* again

Before you move on

What does पेटिका mean? ("A box".) Say it once more.

Chapter 106

Rope, Wheat, Rice, Mung beans, Dal

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a rope, wheat, rice, mung beans and dal.
>
> *Complete the last lesson of chapter 106: I can say a rope, wheat, rice, mung beans and dal.*

106.1 रज्जुः (rajjuḥ) — a rope

> Before the new one: say the Sanskrit for a fan, then the Sanskrit for a box.

You'll want to know: रज्जुः

रज्जुः — *rajjuḥ* — "a rope".

The word, taken apart — its roots and family

rajju "rope" is inherited from PIE **résgus* (EtymDB), and MW compares Lithuanian *rezgù* "I plait"; Latin *restis* "rope" is a cousin. It lives on as Hindi *lej* "rope" (CDIAL 10582).

What you've built

One more word for this chapter.

Your turn

- *Say it: rajjuḥ*
- *Say it: rajjuḥ*, once more
- *Say it:* say *rajjuḥ*
- *Recall:* say the Sanskrit for a fan, then the Sanskrit for a box, then say *rajjuḥ* again

Before you move on

What does रज्जुः mean? ("A rope".) Say it once more.

106.2 गोधूमः (godhūmaḥ) — wheat

Before the new one: say the Sanskrit for a box, then the Sanskrit for a rope.

You'll want to know: गोधूमः

गोधूमः — *godhūmaḥ* — "wheat".

The word, taken apart — its roots and family

MW reads *godhūma* "wheat" as *go* "earth, cow" + *dhūma* "smoke", "earth-smoke", but the word has no sure origin. It is old, in the Vājasaneyi Saṃhitā, and lives on as Hindi *gehūṁ* and Gujarati *ghaũ* "wheat" (CDIAL 4287).

What you've built

One more word for this chapter.

Your turn

- *Say it: godhūmaḥ*
- *Say it: godhūmaḥ*, once more
- *Say it:* say *godhūmaḥ*

- *Recall:* say the Sanskrit for a box, then the Sanskrit for a rope, then say *godhūmaḥ* again

Before you move on

What does गोधूमः mean? ("Wheat".) Say it once more.

106.3 तण्डुलः (taṇḍulaḥ) — rice (uncooked)

Before the new one: say the Sanskrit for a rope, then the Sanskrit for wheat.

You'll want to know: तण्डुलः

तण्डुलः — *taṇḍulaḥ* — "rice (uncooked)".

The word, taken apart — its roots and family

taṇḍula "grain after threshing, rice" is old, in the Atharvaveda (MW), and its origin is uncertain: CDIAL 5637 thinks it perhaps non-Aryan, after Bloch from Dravidian or, less probably, after Chatterji from Austroasiatic. Pali kept it as *taṇḍula* (CDIAL 5637).

What you've built

One more word for this chapter.

Your turn

- *Say it: taṇḍulaḥ*
- *Say it: taṇḍulaḥ*, once more
- *Say it:* say *taṇḍulaḥ*
- *Recall:* say the Sanskrit for a rope, then the Sanskrit for wheat, then say *taṇḍulaḥ* again

Before you move on

What does तण्डुलः mean? ("Rice (uncooked)".) Say it once more.

106.4 मुद्गः (mudgaḥ) — mung beans

Before the new one: say the Sanskrit for wheat, then the Sanskrit for rice.

You'll want to know: मुद्गः

मुद्गः — *mudgaḥ* — "mung beans".

The word, taken apart — its roots and family

mudga "the mung bean" is old, in the Vājasaneyi Saṃhitā; the grammarians quoted by MW derive it from √mud "be glad", a learned guess, so its origin is uncertain. It lives on as Hindi *mūg* and Gujarati *mag* (CDIAL 10198).

What you've built

One more word for this chapter.

Your turn

- *Say it: mudgaḥ*
- *Say it: mudgaḥ*, once more
- *Say it:* say *mudgaḥ*
- *Recall:* say the Sanskrit for wheat, then the Sanskrit for rice, then say *mudgaḥ* again

Before you move on

What does मुद्गः mean? ("Mung beans".) Say it once more.

106.5 सूपः (sūpaḥ) — dal, soup

Before the new one: say the Sanskrit for rice, then the Sanskrit for mung beans.

You'll want to know: सूपः

सूपः — *sūpaḥ* — "dal, soup".

The word, taken apart — its roots and family

MW calls *sūpa* "sauce, soup, broth" of doubtful derivation; the grammarians tie it to √su "distil", so its origin is uncertain. Pali kept it as *sūpa* "broth, curry" (CDIAL 13571).

What you've built

One more word for this chapter.

Your turn

- *Say it: sūpaḥ*
- *Say it: sūpaḥ*, once more
- *Say it:* say *sūpaḥ*
- *Recall:* say the Sanskrit for rice, then the Sanskrit for mung beans, then say *sūpaḥ* again

Before you move on

What does सूपः mean? ("Dal, soup".) Say it once more.

Chapter 107

Jaggery, Pepper, Turmeric, Ginger, Garlic

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say jaggery, pepper, turmeric, ginger and garlic.
>
> *Complete the last lesson of chapter 107: I can say jaggery, pepper, turmeric, ginger and garlic.*

107.1 गुडः (guḍaḥ) — jaggery

Before the new one: say the Sanskrit for mung beans, then the Sanskrit for dal.

You'll want to know: गुडः

गुडः — *guḍaḥ* — "jaggery".

The word, taken apart — its roots and family

guḍa "boiled sugarcane juice, molasses" may be the same word as *guḍa* "a ball, a lump"; CDIAL 4182 raises that link as a question, so it is not settled. It lives on as Hindi *guṛ* and Marathi *gūḷ* "jaggery" (CDIAL 4182).

What you've built

One more word for this chapter.

Your turn

- *Say it: guḍaḥ*
- *Say it: guḍaḥ*, once more
- *Say it:* say *guḍaḥ*

Before you move on

What does गुडः mean? ("Jaggery".) Say it once more.

107.2 मरीचम् (marīcam) — pepper

Before the new one: say the Sanskrit for dal, then the Sanskrit for jaggery.

You'll want to know: मरीचम्

मरीचम् — *marīcam* — "pepper".

The word, taken apart — its roots and family

marīca "black pepper" is taken to be borrowed from Austroasiatic (CDIAL 9875, after EWA). It lives on as Hindi *mirc* (CDIAL 9875).

What you've built

One more word for this chapter.

Your turn

- *Say it: marīcam*
- *Say it: marīcam*, once more
- *Say it:* say *marīcam*
- *Recall:* say the Sanskrit for dal, then the Sanskrit for jaggery, then say *marīcam* again

Before you move on

What does मरीचम् mean? ("Pepper".) Say it once more.

107.3 हरिद्रा (haridrā) — turmeric

Before the new one: say the Sanskrit for jaggery, then the Sanskrit for pepper.

You'll want to know: हरिद्रा

हरिद्रा — *haridrā* — "turmeric".

The word, taken apart — its roots and family

haridrā "turmeric" is built on *hari* "yellow, tawny", which MW sets beside English *yellow* and Latin *helvus*; how the *-drā* part is formed is unclear. It lives on as Hindi *haldī* "turmeric" (CDIAL 13992).

What you've built

One more word for this chapter.

Your turn

- *Say it: haridrā*
- *Say it: haridrā*, once more
- *Say it:* say *haridrā*
- *Recall:* say the Sanskrit for jaggery, then the Sanskrit for pepper, then say *haridrā* again

Before you move on

What does हरिद्रा mean? ("Turmeric".) Say it once more.

107.4 आर्द्रकम् (ārdrakam) — ginger

Before the new one: say the Sanskrit for pepper, then the Sanskrit for turmeric.

You'll want to know: आर्द्रकम्

आर्द्रकम् — *ārdrakam* — "ginger".

The word, taken apart — its roots and family

ārdraka is built on *ārdra* "wet, moist" with the suffix *-ka*: "the moist one", ginger in its undried state (MW). It lives on as Hindi and Bengali *ādā* "ginger" (CDIAL 1341).

What you've built

One more word for this chapter.

Your turn

- *Say it: ārdrakam*
- *Say it: ārdrakam*, once more
- *Say it:* say *ārdrakam*
- *Recall:* say the Sanskrit for pepper, then the Sanskrit for turmeric, then say *ārdrakam* again

Before you move on

What does आर्द्रकम् mean? ("Ginger".) Say it once more.

107.5 लशुनम् (laśunam) — garlic

Before the new one: say the Sanskrit for turmeric, then the Sanskrit for ginger.

You'll want to know: लशुनम्

लशुनम् — *laśunam* — "garlic".

The word, taken apart — its roots and family

laśuna "garlic" appears from the law books of Gautama on, also spelt *lasuna* and *rasuna* (MW). MW gives no derivation beyond the grammarians, so its origin is uncertain. It lives on as Hindi *lahsun*

"garlic" (CDIAL 10990).

What you've built

One more word for this chapter.

Your turn

- *Say it: laśunam*
- *Say it: laśunam*, once more
- *Say it:* say *laśunam*
- *Recall:* say the Sanskrit for turmeric, then the Sanskrit for ginger, then say *laśunam* again

Before you move on

What does लशुनम् mean? ("Garlic".) Say it once more.

Chapter 108

Onion, Potato, Aubergine, Pumpkin, Coconut

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say an onion, a potato, an aubergine, a pumpkin and a coconut.
>
> *Complete the last lesson of chapter 108: I can say an onion, a potato, an aubergine, a pumpkin and a coconut.*

108.1 पलाण्डुः (palāṇḍuḥ) — an onion

Before the new one: say the Sanskrit for ginger, then the Sanskrit for garlic.

You'll want to know: पलाण्डुः

पलाण्डुः — *palāṇḍuḥ* — "an onion".

The word, taken apart — its roots and family

palāṇḍu "an onion" appears from the law book of Manu on (MW). MW gives no derivation beyond the grammarians, so its origin is uncertain. Pali kept it as *palaṇḍuka* (CDIAL 7954).

What you've built

One more word for this chapter.

Your turn

- *Say it: palāṇḍuḥ*
- *Say it: palāṇḍuḥ*, once more
- *Say it:* say *palāṇḍuḥ*
- *Recall:* say the Sanskrit for ginger, then the Sanskrit for garlic, then say *palāṇḍuḥ* again

Before you move on

What does पलाण्डुः mean? ("An onion".) Say it once more.

108.2 आलुकम् (ālukam) — a potato

Before the new one: say the Sanskrit for garlic, then the Sanskrit for an onion.

You'll want to know: आलुकम्

आलुकम् — *ālukam* — "a potato".

The word, taken apart — its roots and family

āluka is *ālu* with the suffix *-ka*, an old word-list name for an edible root, the elephant-foot yam (CDIAL 1388). The potato reached India from the Americas only in modern times, and the languages moved the old name onto it: Hindi *ālū* "potato" (CDIAL 1388). MW gives no source for *ālu*, so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: ālukam*
- *Say it: ālukam*, once more
- *Say it:* say *ālukam*

- *Recall:* say the Sanskrit for garlic, then the Sanskrit for an onion, then say *ālukam* again

Before you move on

What does आलुकम् mean? ("A potato".) Say it once more.

108.3 वृन्ताकम् (vṛntākam) — an aubergine

Before the new one: say the Sanskrit for an onion, then the Sanskrit for a potato.

You'll want to know: वृन्ताकम्

वृन्ताकम् — *vṛntākam* — "an aubergine".

The word, taken apart — its roots and family

vṛntāka "the aubergine" is one of several Sanskrit names for the plant gathered in CDIAL 9369. CDIAL 11503 thinks the names probably share one origin and, after LM, gives it as Dravidian, while DEDR 5301 lists *vṛntāka* beside Dravidian words for the brinjal. Its sister form *vātiṅgaṇa* travelled west as Persian *bādingān* and lives on as Hindi *baigan* (CDIAL 11503).

What you've built

One more word for this chapter.

Your turn

- *Say it: vṛntākam*
- *Say it: vṛntākam*, once more
- *Say it:* say *vṛntākam*
- *Recall:* say the Sanskrit for an onion, then the Sanskrit for a potato, then say *vṛntākam* again

Before you move on

What does वृन्ताकम् mean? ("An aubergine".) Say it once more.

108.4 कूष्माण्डम् (kūṣmāṇḍam) — a pumpkin

Before the new one: say the Sanskrit for a potato, then the Sanskrit for an aubergine.

You'll want to know: कूष्माण्डम्

कूष्माण्डम् — *kūṣmāṇḍam* — "a pumpkin".

The word, taken apart — its roots and family

kūṣmāṇḍa, also *kuṣmāṇḍa* (MW), is a pumpkin-gourd. CDIAL 3374 explains it as a Sanskritized form of a Prakrit word of non-Aryan origin. That Prakrit word lives on as Hindi *kohṛā* and Bengali *kumṛā* "pumpkin" (CDIAL 3374).

What you've built

One more word for this chapter.

Your turn

- *Say it: kūṣmāṇḍam*
- *Say it: kūṣmāṇḍam*, once more
- *Say it:* say *kūṣmāṇḍam*
- *Recall:* say the Sanskrit for a potato, then the Sanskrit for an aubergine, then say *kūṣmāṇḍam* again

Before you move on

What does कूष्माण्डम् mean? ("A pumpkin".) Say it once more.

108.5 नारिकेलम् (nārikelam) — a coconut

Before the new one: say the Sanskrit for an aubergine, then the Sanskrit for a pumpkin.

You'll want to know: नारिकेलम्

नारिकेलम् — *nārikelam* — "a coconut".

The word, taken apart — its roots and family

nārikela "coconut" is borrowed from Dravidian: CDIAL 7075, after Bloch, takes it from a Dravidian compound, comparing Tamil *nāri* "fibre". It lives on as Hindi *nāriyal* and Marathi *nāreḷ* "coconut" (CDIAL 7075).

What you've built

One more word for this chapter.

Your turn

- *Say it: nārikelam*
- *Say it: nārikelam*, once more
- *Say it:* say *nārikelam*
- *Recall:* say the Sanskrit for an aubergine, then the Sanskrit for a pumpkin, then say *nārikelam* again

Before you move on

What does नारिकेलम् mean? ("A coconut".) Say it once more.

Chapter 109

Pomegranate, Grapes, Jackfruit, Lemon, Cake

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a pomegranate, grapes, a jackfruit, a lemon and a cake.
>
> *Complete the last lesson of chapter 109: I can say a pomegranate, grapes, a jackfruit, a lemon and a cake.*

109.1 दाडिमम् (dāḍimam) — a pomegranate

Before the new one: say the Sanskrit for a pumpkin, then the Sanskrit for a coconut.

You'll want to know: दाडिमम्

दाडिमम् — *dāḍimam* — "a pomegranate".

The word, taken apart — its roots and family

dāḍima "the pomegranate" appears from the Mahābhārata on (MW), and neither MW nor CDIAL gives a derivation, so its origin is uncertain. It lives on as Hindi *dāṛim* and Bengali *dālim* (CDIAL 6254).

What you've built

One more word for this chapter.

Your turn

- *Say it: dāḍimam*
- *Say it: dāḍimam*, once more
- *Say it:* say *dāḍimam*
- *Recall:* say the Sanskrit for a pumpkin, then the Sanskrit for a coconut, then say *dāḍimam* again

Before you move on

What does दाडिमम् mean? ("A pomegranate".) Say it once more.

109.2 द्राक्षा (drākṣā) — grapes

Before the new one: say the Sanskrit for a coconut, then the Sanskrit for a pomegranate.

You'll want to know: द्राक्षा

द्राक्षा — *drākṣā* — "grapes".

The word, taken apart — its roots and family

EtymDB sets *drākṣā* "vine, grape" beside Latin *frāgum* "strawberry" and an Albanian word for the same fruit, but MW and CDIAL give no such link, so it is uncertain. It lives on as Hindi and Punjabi *dākh* "grape, raisin" (CDIAL 6628).

What you've built

One more word for this chapter.

Your turn

- *Say it: drākṣā*
- *Say it: drākṣā*, once more
- *Say it:* say *drākṣā*

- *Recall:* say the Sanskrit for a coconut, then the Sanskrit for a pomegranate, then say *drākṣā* again

Before you move on

What does द्राक्षा mean? ("Grapes".) Say it once more.

109.3 पनसम् (panasam) — a jackfruit

Before the new one: say the Sanskrit for a pomegranate, then the Sanskrit for grapes.

You'll want to know: पनसम्

पनसम् — *panasam* — "a jackfruit".

The word, taken apart — its roots and family

panasa "the jackfruit tree and its fruit" is probably borrowed from Dravidian: CDIAL 7781 says so after EWA, and DEDR 3988 sets it beside a Dravidian family of jackfruit names. It lives on as Hindi *panas* and Marathi *phaṇas* (CDIAL 7781).

What you've built

One more word for this chapter.

Your turn

- *Say it: panasam*
- *Say it: panasam*, once more
- *Say it:* say *panasam*
- *Recall:* say the Sanskrit for a pomegranate, then the Sanskrit for grapes, then say *panasam* again

Before you move on

What does पनसम् mean? ("A jackfruit".) Say it once more.

109.4 निम्बुकम् (nimbukam) — a lemon

Before the new one: say the Sanskrit for grapes, then the Sanskrit for a jackfruit.

You'll want to know: निम्बुकम्

निम्बुकम् — *nimbukam* — "a lemon".

The word, taken apart — its roots and family

nimbūka, beside *nimbū*, is "the lime" in the old word lists (MW), and CDIAL 7247, after EWA, takes it as borrowed from Austroasiatic. It lives on as Hindi *nimbū* "lime, lemon" (CDIAL 7247).

What you've built

One more word for this chapter.

Your turn

- *Say it: nimbukam*
- *Say it: nimbukam*, once more
- *Say it:* say *nimbukam*
- *Recall:* say the Sanskrit for grapes, then the Sanskrit for a jackfruit, then say *nimbukam* again

Before you move on

What does निम्बुकम् mean? ("A lemon".) Say it once more.

109.5 अपूपः (apūpaḥ) — a cake

Before the new one: say the Sanskrit for a jackfruit, then the Sanskrit for a lemon.

You'll want to know: अपूपः

अपूपः — *apūpaḥ* — "a cake".

The word, taken apart — its roots and family

apūpa "a cake of flour" is old, in the Rigveda (MW), but its origin is uncertain: CDIAL 491 reports Charpentier's view that it was borrowed from Dravidian, comparing Tamil *appam*. It lives on as Hindi *pūā*, a sweet fried cake (CDIAL 491).

What you've built

One more word for this chapter.

Your turn

- *Say it: apūpaḥ*
- *Say it: apūpaḥ*, once more
- *Say it:* say *apūpaḥ*
- *Recall:* say the Sanskrit for a jackfruit, then the Sanskrit for a lemon, then say *apūpaḥ* again

Before you move on

What does अपूपः mean? ("A cake".) Say it once more.

109.6 Tools and things you use — a first pass

Say the words for a lemon and a cake.

Your turn

Say these aloud:

- a nail, a hammer, scissors, a needle, thread
- a comb, soap, a towel, glasses, a bag
- a plate, a cup, a spoon, a stove, a candle
- a ball, a toy, a ring, a bangle, a shawl
- a sari, a shoe, a turban, a shirt, a telephone

Before you move on

A nail? (कीलः, *kīlaḥ.*) A hammer? (मुद्गरः, *mudgaraḥ.*) Scissors? (कर्तरी, *kartarī.*) A needle? (सूचिः, *sūciḥ.*) Thread? (सूत्रम्, *sūtram.*) A comb? (कंकतिका, *kaṅkatikā.*) Soap? (फेनकम्, *phenakam.*) A towel? (प्रोञ्छनम्, *proñchanam.*) Glasses? (उपनेत्रम्, *upanetram.*) A bag? (स्यूतः, *syūtaḥ.*) A plate? (स्थाली, *sthālī.*) A cup? (चषकः, *caṣakaḥ.*) A spoon? (चमसः, *camasaḥ.*) A stove? (चुल्ली, *cullī.*) A candle? (वर्तिका, *vartikā.*) A ball? (कन्दुकः, *kandukaḥ.*) A toy? (क्रीडनकम्, *krīḍanakam.*) A ring? (अंगुलीयकम्, *aṅgulīyakam.*) A bangle? (कंकणम्, *kaṅkaṇam.*) A shawl? (उत्तरीयम्, *uttarīyam.*) A sari? (शाटिका, *śāṭikā.*) A shoe? (पादत्राणम्, *pādatrāṇam.*) A turban? (उष्णीषम्, *uṣṇīṣam.*) A shirt? (कञ्चुकः, *kañcukaḥ.*) A telephone? (दूरभाषः, *dūrabhāṣaḥ.*)

109.7 Machines, the house and food — a second pass

Say the words for a television and a computer.

Your turn

Say these aloud:

- a television, a computer, a machine, a fan, a box
- a rope, wheat, rice, mung beans, dal
- jaggery, pepper, turmeric, ginger, garlic
- an onion, a potato, an aubergine, a pumpkin, a coconut
- a pomegranate, grapes, a jackfruit, a lemon, a cake

Before you move on

A television? (दूरदर्शनम्, *dūradarśanam.*) A computer? (संगणकम्, *saṅgaṇakam.*) A machine? (यन्त्रम्, *yantram.*) A fan? (व्यजनम्, *vyajanam.*) A box? (पेटिका, *peṭikā.*) A rope? (रज्जुः, *rajjuḥ.*) Wheat? (गोधूमः, *godhūmaḥ.*) Rice? (तण्डुलः, *taṇḍulaḥ.*) Mung beans? (मुद्गः, *mudgaḥ.*) Dal? (सूपः, *sūpaḥ.*) Jaggery? (गुडः, *guḍaḥ.*) Pepper?

(मरीचम्, *marīcam.*) Turmeric? (हरिद्रा, *haridrā.*) Ginger? (आर्द्रकम्, *ārdrakam.*) Garlic? (लशुनम्, *laśunam.*) An onion? (पलाण्डुः, *palāṇḍuḥ.*) A potato? (आलुकम्, *ālukam.*) An aubergine? (वृन्ताकम्, *vṛntākam.*) A pumpkin? (कूष्माण्डम्, *kūṣmāṇḍam.*) A coconut? (नारिकेलम्, *nārikelam.*) A pomegranate? (दाडिमम्, *dāḍimam.*) Grapes? (द्राक्षा, *drākṣā.*) A jackfruit? (पनसम्, *panasam.*) A lemon? (निम्बुकम्, *nimbukam.*) A cake? (अपूपः, *apūpaḥ.*)

Chapter 110

Mountain, Waterfall, Wave, Lightning, Thunder

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a mountain, a waterfall, a wave, lightning and thunder.
>
> *Complete the last lesson of chapter 110: I can say a mountain, a waterfall, a wave, lightning and thunder.*

110.1 गिरिः (giriḥ) — a mountain, a hill

Before the new one: say the Sanskrit for a lemon, then the Sanskrit for a cake.

You'll want to know: गिरिः

गिरिः — *giriḥ* — "a mountain, a hill".

The word, taken apart — its roots and family

giri "a mountain, a hill" is inherited from Indo-European (EtymDB). MW sets it beside Avestan *gairi* "mountain", and Old Church Slavonic *gora* "mountain", still the Russian word, is a cousin (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: giriḥ*
- *Say it: giriḥ*, once more
- *Say it:* say *giriḥ*
- *Recall:* say the Sanskrit for a lemon, then the Sanskrit for a cake, then say *giriḥ* again

Before you move on

What does गिरिः mean? ("A mountain, a hill".) Say it once more.

110.2 प्रपातः (prapātaḥ) — a waterfall

Before the new one: say the Sanskrit for a cake, then the Sanskrit for a mountain.

You'll want to know: प्रपातः

प्रपातः — *prapātaḥ* — "a waterfall".

The word, taken apart — its roots and family

prapāta comes from *pra-√pat* "fly forth, fall down", the root √pat "fall, fly" with *pra* "forth" (MW): "a fall, a precipice" (CDIAL 8682), and so a waterfall.

What you've built

One more word for this chapter.

Your turn

- *Say it: prapātaḥ*
- *Say it: prapātaḥ*, once more
- *Say it:* say *prapātaḥ*
- *Recall:* say the Sanskrit for a cake, then the Sanskrit for a mountain, then say *prapātaḥ* again

Before you move on

What does प्रपातः mean? ("A waterfall".) Say it once more.

110.3 तरंगः (taraṅgaḥ) — a wave

Before the new one: say the Sanskrit for a mountain, then the Sanskrit for a waterfall.

You'll want to know: तरंगः

तरंगः — *taraṅgaḥ* — "a wave".

The word, taken apart — its roots and family

taraṅga is built from *taram* "across", from the root √tṝ "cross", and *-ga* "going": MW explains it as "the across-goer", a wave. Punjabi kept it as *taraṅg* "wave" (CDIAL 5699).

What you've built

One more word for this chapter.

Your turn

- *Say it: taraṅgaḥ*
- *Say it: taraṅgaḥ*, once more
- *Say it:* say *taraṅgaḥ*
- *Recall:* say the Sanskrit for a mountain, then the Sanskrit for a waterfall, then say *taraṅgaḥ* again

Before you move on

What does तरंगः mean? ("A wave".) Say it once more.

110.4 विद्युत् (vidyut) — lightning

Before the new one: say the Sanskrit for a waterfall, then the Sanskrit for a wave.

You'll want to know: विद्युत्

विद्युत् — *vidyut* — "lightning".

The word, taken apart — its roots and family

vidyut comes from *vi-√dyut* "flash forth", the root √dyut "shine" with *vi-* "out, apart" (MW): "the flashing one", lightning (CDIAL 11742). It lives on as Marathi and Gujarati *vīj* "lightning" (CDIAL 11742).

What you've built

One more word for this chapter.

Your turn

- *Say it: vidyut*
- *Say it: vidyut*, once more
- *Say it:* say *vidyut*
- *Recall:* say the Sanskrit for a waterfall, then the Sanskrit for a wave, then say *vidyut* again

Before you move on

What does विद्युत् mean? ("Lightning".) Say it once more.

110.5 गर्जनम् (garjanam) — thunder

Before the new one: say the Sanskrit for a wave, then the Sanskrit for lightning.

You'll want to know: गर्जनम्

गर्जनम् — *garjanam* — "thunder".

The word, taken apart — its roots and family

garjana "roaring, thundering" comes from the root √garj "roar, growl" (CDIAL 4047), which MW compares with Latin *garrire* "chatter", the source of English *garrulous*. It lives on as Hindi *gājan* "thunder"

(CDIAL 4047).

What you've built

One more word for this chapter.

Your turn

- *Say it: garjanam*
- *Say it: garjanam*, once more
- *Say it:* say *garjanam*
- *Recall:* say the Sanskrit for a wave, then the Sanskrit for lightning, then say *garjanam* again

Before you move on

What does गर्जनम् mean? ("Thunder".) Say it once more.

Chapter 111

Storm, Mist, Branch, Leaf, Flower

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a storm, mist, a branch, a leaf and a flower.
>
> *Complete the last lesson of chapter 111: I can say a storm, mist, a branch, a leaf and a flower.*

111.1 वात्या (vātyā) — a storm

Before the new one: say the Sanskrit for lightning, then the Sanskrit for thunder.

You'll want to know: वात्या

वात्या — *vātyā* — "a storm".

The word, taken apart — its roots and family

vātyā "a strong wind, a gale" is built on *vāta* "wind" (CDIAL 11505), from the root √vā "blow". MW sets √vā beside Latin *ventus* and English *wind*: an inherited Indo-European root.

What you've built

One more word for this chapter.

Your turn

- *Say it: vātyā*
- *Say it: vātyā*, once more
- *Say it:* say *vātyā*
- *Recall:* say the Sanskrit for lightning, then the Sanskrit for thunder, then say *vātyā* again

Before you move on

What does वात्या mean? ("A storm".) Say it once more.

111.2 नीहारः (nīhāraḥ) — mist, fog

Before the new one: say the Sanskrit for thunder, then the Sanskrit for a storm.

You'll want to know: नीहारः

नीहारः — *nīhāraḥ* — "mist, fog".

The word, taken apart — its roots and family

nīhāra "mist, fog, hoar-frost" is old, in the Rigveda. MW splits it as *nī-* "down" + *hāra*, pointing to the verb *ni-√hṛ*, but does not explain the sense, so its formation is uncertain. Hindi kept it as *nīhār* "fog, mist" (CDIAL 7574).

What you've built

One more word for this chapter.

Your turn

- *Say it: nīhāraḥ*
- *Say it: nīhāraḥ*, once more
- *Say it:* say *nīhāraḥ*

- *Recall:* say the Sanskrit for thunder, then the Sanskrit for a storm, then say *nīhāraḥ* again

Before you move on

What does नीहारः mean? ("Mist, fog".) Say it once more.

111.3 शाखा (śākhā) — a branch

Before the new one: say the Sanskrit for a storm, then the Sanskrit for mist.

You'll want to know: शाखा

शाखा — *śākhā* — "a branch".

The word, taken apart — its roots and family

śākhā "a branch" is inherited from Indo-European (EtymDB). Its cousins include Lithuanian *šakà* "branch" and Persian *shākh* "branch, horn" (EtymDB), and Pali kept it as *sākhā* (CDIAL 12376).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *śākhā*
- *Say it:* *śākhā*, once more
- *Say it:* say *śākhā*
- *Recall:* say the Sanskrit for a storm, then the Sanskrit for mist, then say *śākhā* again

Before you move on

What does शाखा mean? ("A branch".) Say it once more.

111.4 पर्णम् (parṇam) — a leaf

Before the new one: say the Sanskrit for mist, then the Sanskrit for a branch.

You'll want to know: पर्णम्

पर्णम् — *parṇam* — "a leaf".

The word, taken apart — its roots and family

parṇa first meant "a feather, a wing", and then "a leaf", the plumage of a tree (MW). It is inherited from Indo-European, and English *fern* is a cousin (EtymDB). It lives on as Hindi *pān* "leaf, betel leaf" (CDIAL 7918).

What you've built

One more word for this chapter.

Your turn

- *Say it: parṇam*
- *Say it: parṇam*, once more
- *Say it:* say *parṇam*
- *Recall:* say the Sanskrit for mist, then the Sanskrit for a branch, then say *parṇam* again

Before you move on

What does पर्णम् mean? ("A leaf".) Say it once more.

111.5 कुसुमम् (kusumam) — a flower

Before the new one: say the Sanskrit for a branch, then the Sanskrit for a leaf.

You'll want to know: कुसुमम्

कुसुमम् — *kusumam* — "a flower".

The word, taken apart — its roots and family

kusuma "a flower" appears from Manu on; MW cites only a grammarians' root √kus for it, so its origin is uncertain. Pali kept it unchanged as *kusuma* (CDIAL 3377).

What you've built

One more word for this chapter.

Your turn

- *Say it: kusumam*
- *Say it: kusumam*, once more
- *Say it:* say *kusumam*
- *Recall:* say the Sanskrit for a branch, then the Sanskrit for a leaf, then say *kusumam* again

Before you move on

What does कुसुमम् mean? ("A flower".) Say it once more.

Chapter 112

Lotus, Star, Sun, Bear, Jackal

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a lotus, a star, the sun, a bear and a jackal.
>
> *Complete the last lesson of chapter 112: I can say a lotus, a star, the sun, a bear and a jackal.*

112.1 पद्मम् (padmam) — a lotus

Before the new one: say the Sanskrit for a leaf, then the Sanskrit for a flower.

You'll want to know: पद्मम्

पद्मम् — *padmam* — "a lotus".

The word, taken apart — its roots and family

MW links *padma* "a lotus" to *pad* with a query mark, so its origin is uncertain. It lives on in Kashmiri *pam-pōś* "lotus" (CDIAL 7769).

What you've built

One more word for this chapter.

Your turn

- *Say it: padmam*
- *Say it: padmam*, once more
- *Say it:* say *padmam*
- *Recall:* say the Sanskrit for a leaf, then the Sanskrit for a flower, then say *padmam* again

Before you move on

What does पद्मम् mean? ("A lotus".) Say it once more.

112.2 नक्षत्रम् (nakṣatram) — a star

Before the new one: say the Sanskrit for a flower, then the Sanskrit for a lotus.

You'll want to know: नक्षत्रम्

नक्षत्रम् — *nakṣatram* — "a star".

The word, taken apart — its roots and family

nakṣatra "a star", and later a lunar mansion, is old, in the Rigveda; MW thinks it probably comes from the root √nakṣ "approach, reach". It lives on as Hindi *nakhat* "star, constellation" (CDIAL 6913).

What you've built

One more word for this chapter.

Your turn

- *Say it: nakṣatram*
- *Say it: nakṣatram*, once more
- *Say it:* say *nakṣatram*
- *Recall:* say the Sanskrit for a flower, then the Sanskrit for a lotus, then say *nakṣatram* again

Before you move on

What does नक्षत्रम् mean? ("A star".) Say it once more.

112.3 सूर्यः (sūryaḥ) — the sun

Before the new one: say the Sanskrit for a lotus, then the Sanskrit for a star.

You'll want to know: सूर्यः

सूर्यः — *sūryaḥ* — "the sun".

The word, taken apart — its roots and family

sūrya "the sun" is inherited from Indo-European (EtymDB): MW sets its base *svar* "sun, light" beside Latin *sol* and Greek *hēlios*, the source of English *solar* and *helium*. Hindi *sūraj* "sun" comes from it (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: sūryaḥ*
- *Say it: sūryaḥ*, once more
- *Say it:* say *sūryaḥ*
- *Recall:* say the Sanskrit for a lotus, then the Sanskrit for a star, then say *sūryaḥ* again

Before you move on

What does सूर्यः mean? ("The sun".) Say it once more.

112.4 भल्लूकः (bhallūkaḥ) — a bear

Before the new one: say the Sanskrit for a star, then the Sanskrit for the sun.

You'll want to know: भल्लूकः

भल्लूकः — *bhallūkaḥ* — "a bear".

The word, taken apart — its roots and family

bhallūka "a bear" has a disputed origin: CDIAL 9415 reports EWA's view that it may be Indo-European with an expressive *-ll-*, and Przyluski's that it is Austroasiatic. It lives on as Hindi *bhālū* "bear" (CDIAL 9415).

What you've built

One more word for this chapter.

Your turn

- *Say it: bhallūkaḥ*
- *Say it: bhallūkaḥ*, once more
- *Say it:* say *bhallūkaḥ*
- *Recall:* say the Sanskrit for a star, then the Sanskrit for the sun, then say *bhallūkaḥ* again

Before you move on

What does भल्लूकः mean? ("A bear".) Say it once more.

112.5 शृगालः (śṛgālaḥ) — a jackal

Before the new one: say the Sanskrit for the sun, then the Sanskrit for a bear.

You'll want to know: शृगालः

शृगालः — *śṛgālaḥ* — "a jackal".

The word, taken apart — its roots and family

MW calls *śṛgāla* "a jackal" (also written *sṛgāla*) of doubtful derivation, so its origin is uncertain; it is old, in the Śatapatha Brāhmaṇa. It lives on as Hindi *siyār* and Bengali *siyāl* "jackal" (CDIAL 12578).

What you've built

One more word for this chapter.

Your turn

- *Say it: śṛgālaḥ*
- *Say it: śṛgālaḥ*, once more
- *Say it:* say *śṛgālaḥ*
- *Recall:* say the Sanskrit for the sun, then the Sanskrit for a bear, then say *śṛgālaḥ* again

Before you move on

What does शृगालः mean? ("A jackal".) Say it once more.

Chapter 113

Rabbit, Donkey, Boar, Bull, Buffalo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a rabbit, a donkey, a boar, a bull and a buffalo.
>
> *Complete the last lesson of chapter 113: I can say a rabbit, a donkey, a boar, a bull and a buffalo.*

113.1 शशकः (śaśakaḥ) — a rabbit

Before the new one: say the Sanskrit for a bear, then the Sanskrit for a jackal.

You'll want to know: शशकः

शशकः — *śaśakaḥ* — "a rabbit".

The word, taken apart — its roots and family

śaśaka is *śaśa* "hare" with the suffix *-ka* (CDIAL 12357). *śaśa* is inherited from Indo-European: MW records the view that it is the same word as German *Hase* and English *hare*, and EtymDB agrees. It lives on as Marathi *sasā* "hare" (CDIAL 12357).

What you've built

One more word for this chapter.

Your turn

- *Say it: śaśakaḥ*
- *Say it: śaśakaḥ*, once more
- *Say it:* say *śaśakaḥ*
- *Recall:* say the Sanskrit for a bear, then the Sanskrit for a jackal, then say *śaśakaḥ* again

Before you move on

What does शशकः mean? ("A rabbit".) Say it once more.

113.2 गर्दभः (gardabhaḥ) — a donkey

Before the new one: say the Sanskrit for a jackal, then the Sanskrit for a rabbit.

You'll want to know: गर्दभः

गर्दभः — *gardabhaḥ* — "a donkey".

The word, taken apart — its roots and family

gardabha comes from the root √gard "shout, make a noise" (CDIAL 4054): MW explains it as "the crier, the brayer", with a query mark. It lives on as Hindi *gadahā* and Marathi *gāḍhav* "donkey" (CDIAL 4054).

What you've built

One more word for this chapter.

Your turn

- *Say it: gardabhaḥ*
- *Say it: gardabhaḥ*, once more
- *Say it:* say *gardabhaḥ*
- *Recall:* say the Sanskrit for a jackal, then the Sanskrit for a rabbit, then say *gardabhaḥ* again

Before you move on

What does गर्दभः mean? ("A donkey".) Say it once more.

113.3 वराहः (varāhaḥ) — a boar

Before the new one: say the Sanskrit for a rabbit, then the Sanskrit for a donkey.

You'll want to know: वराहः

वराहः — *varāhaḥ* — "a boar".

The word, taken apart — its roots and family

MW calls the derivation of *varāha* "a boar" doubtful, but EtymDB traces it to an Indo-Iranian word for the boar, inherited also by Avestan *varāza* and Persian *gorāz* "boar".

What you've built

One more word for this chapter.

Your turn

- *Say it: varāhaḥ*
- *Say it: varāhaḥ*, once more
- *Say it:* say *varāhaḥ*
- *Recall:* say the Sanskrit for a rabbit, then the Sanskrit for a donkey, then say *varāhaḥ* again

Before you move on

What does वराहः mean? ("A boar".) Say it once more.

113.4 वृषभः (vṛṣabhaḥ) — a bull

Before the new one: say the Sanskrit for a donkey, then the Sanskrit for a boar.

You'll want to know: वृषभः

वृषभः — *vṛṣabhaḥ* — "a bull".

The word, taken apart — its roots and family

vṛṣabha is built on *vṛṣan* "male, mighty" (CDIAL 12085): in the Rigveda it first means "manly, mighty", then "the bull", and then "the chief, the best" (MW). Pali wore it down to *vasabha* "bull" (CDIAL 12085).

What you've built

One more word for this chapter.

Your turn

- *Say it: vṛṣabhaḥ*
- *Say it: vṛṣabhaḥ*, once more
- *Say it:* say *vṛṣabhaḥ*
- *Recall:* say the Sanskrit for a donkey, then the Sanskrit for a boar, then say *vṛṣabhaḥ* again

Before you move on

What does वृषभः mean? ("A bull".) Say it once more.

113.5 महिषः (mahiṣaḥ) — a buffalo

Before the new one: say the Sanskrit for a boar, then the Sanskrit for a bull.

You'll want to know: महिषः

महिषः — *mahiṣaḥ* — "a buffalo".

The word, taken apart — its roots and family

mahiṣa first meant "great, mighty", from the root of *mah-* "great", which MW compares with Latin *magnus* and English *much*. CDIAL

9964 explains "buffalo" from *mahiṣo mṛgāṇām*, "the great one of the beasts". It lives on as Hindi *bhaĩs* and Marathi *mhais* "buffalo" (CDIAL 9964).

What you've built

One more word for this chapter.

Your turn

- *Say it: mahiṣaḥ*
- *Say it: mahiṣaḥ*, once more
- *Say it:* say *mahiṣaḥ*
- *Recall:* say the Sanskrit for a boar, then the Sanskrit for a bull, then say *mahiṣaḥ* again

Before you move on

What does महिषः mean? ("A buffalo".) Say it once more.

Chapter 114

Sheep, Pigeon, Owl, Heron, Bee

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a sheep, a pigeon, an owl, a heron and a bee.
>
> *Complete the last lesson of chapter 114: I can say a sheep, a pigeon, an owl, a heron and a bee.*

114.1 मेषः (meṣaḥ) — a sheep

Before the new one: say the Sanskrit for a bull, then the Sanskrit for a buffalo.

You'll want to know: मेषः

मेषः — *meṣaḥ* — "a sheep".

The word, taken apart — its roots and family

meṣa "a ram, a sheep" is inherited from Indo-European (EtymDB): Avestan *maēša* and Persian *mīš* "ewe" are cousins. In astronomy it names Aries, the first sign of the zodiac (MW). Hindi kept it as *mes* "ram" (CDIAL 10334).

What you've built

One more word for this chapter.

Your turn

- *Say it: meṣaḥ*
- *Say it: meṣaḥ*, once more
- *Say it:* say *meṣaḥ*
- *Recall:* say the Sanskrit for a bull, then the Sanskrit for a buffalo, then say *meṣaḥ* again

Before you move on

What does मेषः mean? ("A sheep".) Say it once more.

114.2 कपोतः (kapotaḥ) — a pigeon

Before the new one: say the Sanskrit for a buffalo, then the Sanskrit for a sheep.

You'll want to know: कपोतः

कपोतः — *kapotaḥ* — "a pigeon".

The word, taken apart — its roots and family

kapota "a dove, a pigeon" is old, in the Rigveda, and is inherited from Indo-Iranian (EtymDB). Its cousin is Persian *kabūtar* "pigeon", which Hindi and Urdu took from Persian, so the Hindi pigeon is a Persian cousin of this Sanskrit word.

What you've built

One more word for this chapter.

Your turn

- *Say it: kapotaḥ*
- *Say it: kapotaḥ*, once more
- *Say it:* say *kapotaḥ*

- *Recall:* say the Sanskrit for a buffalo, then the Sanskrit for a sheep, then say *kapotaḥ* again

Before you move on

What does कपोतः mean? ("A pigeon".) Say it once more.

114.3 उलूकः (ulūkaḥ) — an owl

Before the new one: say the Sanskrit for a sheep, then the Sanskrit for a pigeon.

You'll want to know: उलूकः

उलूकः — *ulūkaḥ* — "an owl".

The word, taken apart — its roots and family

ulūka "an owl" is old, in the Rigveda; MW cites only a grammarians' root √val for it, so its origin is uncertain. It lives on as Hindi *ullū* "owl", and Punjabi and Gujarati *ullū* also means "fool" (CDIAL 2359).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ulūkaḥ*
- *Say it:* *ulūkaḥ*, once more
- *Say it:* say *ulūkaḥ*
- *Recall:* say the Sanskrit for a sheep, then the Sanskrit for a pigeon, then say *ulūkaḥ* again

Before you move on

What does उलूकः mean? ("An owl".) Say it once more.

114.4 बकः (bakaḥ) — a heron

Before the new one: say the Sanskrit for a pigeon, then the Sanskrit for an owl.

You'll want to know: बकः

बकः — *bakaḥ* — "a heron".

The word, taken apart — its roots and family

baka "a heron, a crane" is probably imitative in origin, as CDIAL 9115 explains after EWA, which is why its *k* survives into the modern forms. It lives on as Hindi *bagulā* and Bengali *bak* (CDIAL 9115).

What you've built

One more word for this chapter.

Your turn

- *Say it: bakaḥ*
- *Say it: bakaḥ*, once more
- *Say it:* say *bakaḥ*
- *Recall:* say the Sanskrit for a pigeon, then the Sanskrit for an owl, then say *bakaḥ* again

Before you move on

What does बकः mean? ("A heron".) Say it once more.

114.5 भ्रमरः (bhramaraḥ) — a bee

Before the new one: say the Sanskrit for an owl, then the Sanskrit for a heron.

You'll want to know: भ्रमरः

भ्रमरः — *bhramaraḥ* — "a bee".

The word, taken apart — its roots and family

bhramara "a large black bee" is filed by MW under the root √bhram "wander, whirl", which MW compares with Greek *bremō* and Latin *fremere* "roar, hum" (EtymDB gives an Indo-European root "make noise"). It lives on as Hindi *bhaũrā* "black bee" (CDIAL 9651).

What you've built

One more word for this chapter.

Your turn

- *Say it: bhramaraḥ*
- *Say it: bhramaraḥ*, once more
- *Say it:* say *bhramaraḥ*
- *Recall:* say the Sanskrit for an owl, then the Sanskrit for a heron, then say *bhramaraḥ* again

Before you move on

What does भ्रमरः mean? ("A bee".) Say it once more.

Chapter 115

Fly, Mosquito, Ant, Butterfly, Rooster

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a fly, a mosquito, an ant, a butterfly and a rooster.
>
> *Complete the last lesson of chapter 115: I can say a fly, a mosquito, an ant, a butterfly and a rooster.*

115.1 मक्षिका (makṣikā) — a fly

Before the new one: say the Sanskrit for a heron, then the Sanskrit for a bee.

You'll want to know: मक्षिका

मक्षिका — *makṣikā* — "a fly".

The word, taken apart — its roots and family

makṣikā "a fly, a bee" is built on the Rigvedic *makṣ* "fly" with the suffix *-ikā* (MW). It lives on as Hindi *makkhī* "fly" (CDIAL 9696).

What you've built

One more word for this chapter.

Your turn

- *Say it: makṣikā*
- *Say it: makṣikā*, once more
- *Say it:* say *makṣikā*
- *Recall:* say the Sanskrit for a heron, then the Sanskrit for a bee, then say *makṣikā* again

Before you move on

What does मक्षिका mean? ("A fly".) Say it once more.

115.2 मशकः (maśakaḥ) — a mosquito

Before the new one: say the Sanskrit for a bee, then the Sanskrit for a fly.

You'll want to know: मशकः

मशकः — *maśakaḥ* — "a mosquito".

The word, taken apart — its roots and family

maśaka "a mosquito, a gnat" is old, in the Atharvaveda, and is inherited from Indo-European (EtymDB). It lives on as Hindi *masā* and Bengali *maśā* "mosquito" (CDIAL 9917).

What you've built

One more word for this chapter.

Your turn

- *Say it: maśakaḥ*
- *Say it: maśakaḥ*, once more
- *Say it:* say *maśakaḥ*
- *Recall:* say the Sanskrit for a bee, then the Sanskrit for a fly, then say *maśakaḥ* again

Before you move on

What does मशकः mean? ("A mosquito".) Say it once more.

115.3 पिपीलिका (pipīlikā) — an ant

Before the new one: say the Sanskrit for a fly, then the Sanskrit for a mosquito.

You'll want to know: पिपीलिका

पिपीलिका — *pipīlikā* — "an ant".

The word, taken apart — its roots and family

pipīlikā "the small red ant" is old, in the Atharvaveda, and is built on *pipīla* "ant". CDIAL 8201, after EWA, takes the word to be of unknown non-Aryan origin. It lives on as Hindi *pipṛī* "small red ant" (CDIAL 8201).

What you've built

One more word for this chapter.

Your turn

- *Say it: pipīlikā*
- *Say it: pipīlikā*, once more
- *Say it:* say *pipīlikā*
- *Recall:* say the Sanskrit for a fly, then the Sanskrit for a mosquito, then say *pipīlikā* again

Before you move on

What does पिपीलिका mean? ("An ant".) Say it once more.

115.4 चित्रपतंगः (citrapataṅgaḥ) — a butterfly

Before the new one: say the Sanskrit for a mosquito, then the Sanskrit for an ant.

You'll want to know: चित्रपतंगः

चित्रपतंगः — *citrapataṅgaḥ* — "a butterfly".

The word, taken apart — its roots and family

citrapataṅga is built from *citra* "bright, many-coloured" and *pataṅga* "a flying insect, a butterfly or moth", from the root √pat "fly" (MW): "the many-coloured flier". MW does not list the pair, so it is a later coinage.

What you've built

One more word for this chapter.

Your turn

- *Say it: citrapataṅgaḥ*
- *Say it: citrapataṅgaḥ*, once more
- *Say it:* say *citrapataṅgaḥ*
- *Recall:* say the Sanskrit for a mosquito, then the Sanskrit for an ant, then say *citrapataṅgaḥ* again

Before you move on

What does चित्रपतंगः mean? ("A butterfly".) Say it once more.

115.5 कुक्कुटः (kukkuṭaḥ) — a rooster

Before the new one: say the Sanskrit for an ant, then the Sanskrit for a butterfly.

You'll want to know: कुक्कुटः

कुक्कुटः — *kukkuṭaḥ* — "a rooster".

The word, taken apart — its roots and family

kukkuṭa “a cock” is imitative: MW records *kukkuṭ* as a word that copies the cock’s cry, and CDIAL 3208 calls it onomatopoeic. It lives on as Punjabi *kukkaṛ* “cock” (CDIAL 3208).

What you’ve built

One more word for this chapter.

Your turn

- *Say it: kukkuṭaḥ*
- *Say it: kukkuṭaḥ*, once more
- *Say it:* say *kukkuṭaḥ*
- *Recall:* say the Sanskrit for an ant, then the Sanskrit for a butterfly, then say *kukkuṭaḥ* again

Before you move on

What does कुक्कुटः mean? (“A rooster”.) Say it once more.

Chapter 116

Crane, Cheek, Chin, Elbow, Wrist

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a crane, a cheek, the chin, an elbow and a wrist.
>
> *Complete the last lesson of chapter 116: I can say a crane, a cheek, the chin, an elbow and a wrist.*

116.1 सारसः (sārasaḥ) — a crane

Before the new one: say the Sanskrit for a butterfly, then the Sanskrit for a rooster.

You'll want to know: सारसः

सारसः — *sārasaḥ* — "a crane".

The word, taken apart — its roots and family

sārasa is built from *saras* "a lake, a pond" (CDIAL 13359): first "belonging to a lake", then the Indian crane (MW). Hindi and Marathi kept it as *sāras* "crane" (CDIAL 13359).

What you've built

One more word for this chapter.

Your turn

- *Say it: sārasaḥ*
- *Say it: sārasaḥ*, once more
- *Say it:* say *sārasaḥ*
- *Recall:* say the Sanskrit for a butterfly, then the Sanskrit for a rooster, then say *sārasaḥ* again

Before you move on

What does सारसः mean? ("A crane".) Say it once more.

116.2 कपोलः (kapolaḥ) — a cheek

Before the new one: say the Sanskrit for a rooster, then the Sanskrit for a crane.

You'll want to know: कपोलः

कपोलः — *kapolaḥ* — "a cheek".

The word, taken apart — its roots and family

kapola "the cheek" is probably borrowed from Austroasiatic, or possibly from Dravidian, as CDIAL 2755 reports after EWA; DEDR 1337 sets it, with a query mark, beside a Dravidian word for the cheek. Pali kept it as *kapola* (CDIAL 2755).

What you've built

One more word for this chapter.

Your turn

- *Say it: kapolaḥ*
- *Say it: kapolaḥ*, once more
- *Say it:* say *kapolaḥ*

- *Recall:* say the Sanskrit for a rooster, then the Sanskrit for a crane, then say *kapolaḥ* again

Before you move on

What does कपोलः mean? ("A cheek".) Say it once more.

116.3 चिबुकम् (cibukam) — the chin

Before the new one: say the Sanskrit for a crane, then the Sanskrit for a cheek.

You'll want to know: चिबुकम्

चिबुकम् — *cibukam* — "the chin".

The word, taken apart — its roots and family

cibuka "the chin" is taken to be borrowed from Munda (CDIAL 4820, after Kuiper and EWA); the Rigveda already has a form *chubuka*. Pali kept it as *cubuka* (CDIAL 4820).

What you've built

One more word for this chapter.

Your turn

- *Say it: cibukam*
- *Say it: cibukam*, once more
- *Say it:* say *cibukam*
- *Recall:* say the Sanskrit for a crane, then the Sanskrit for a cheek, then say *cibukam* again

Before you move on

What does चिबुकम् mean? ("The chin".) Say it once more.

116.4 कूर्परः (kūrparaḥ) — an elbow

Before the new one: say the Sanskrit for a cheek, then the Sanskrit for the chin.

You'll want to know: कूर्परः

कूर्परः — *kūrparaḥ* — "an elbow".

The word, taken apart — its roots and family

kūrpara "the elbow" appears in the medical writer Suśruta, and neither MW nor CDIAL gives a derivation, so its origin is uncertain. It lives on as Marathi *kopar* "elbow" (CDIAL 3413).

What you've built

One more word for this chapter.

Your turn

- *Say it: kūrparaḥ*
- *Say it: kūrparaḥ*, once more
- *Say it:* say *kūrparaḥ*
- *Recall:* say the Sanskrit for a cheek, then the Sanskrit for the chin, then say *kūrparaḥ* again

Before you move on

What does कूर्परः mean? ("An elbow".) Say it once more.

116.5 मणिबन्धः (maṇibandhaḥ) — a wrist

Before the new one: say the Sanskrit for the chin, then the Sanskrit for an elbow.

You'll want to know: मणिबन्धः

मणिबन्धः — *maṇibandhaḥ* — "a wrist".

The word, taken apart — its roots and family

maṇibandha is built from *maṇi* "jewel, bead" and *bandha* "tying": the wrist is where jewels are tied on (MW). DEDR 4673 points out that the Dravidian word for the wrist, Kannada *maṇikaṭṭu*, is built the same way, and takes *bandha* as a translation of its *kaṭṭu* "tie".

What you've built

One more word for this chapter.

Your turn

- *Say it: maṇibandhaḥ*
- *Say it: maṇibandhaḥ*, once more
- *Say it:* say *maṇibandhaḥ*
- *Recall:* say the Sanskrit for the chin, then the Sanskrit for an elbow, then say *maṇibandhaḥ* again

Before you move on

What does मणिबन्धः mean? ("A wrist".) Say it once more.

Chapter 117

Thumb, Chest, Waist, Eyebrow, Skin

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a thumb, the chest, the waist, an eyebrow and the skin.
>
> *Complete the last lesson of chapter 117: I can say a thumb, the chest, the waist, an eyebrow and the skin.*

117.1 अंगुष्ठः (aṅguṣṭhaḥ) — a thumb

Before the new one: say the Sanskrit for an elbow, then the Sanskrit for a wrist.

You'll want to know: अंगुष्ठः

अंगुष्ठः — *aṅguṣṭhaḥ* — "a thumb".

The word, taken apart — its roots and family

aṅguṣṭha "the thumb" is built on *aṅgu-*, the same base as *aṅguli* "finger" (CDIAL 137). It lives on as Hindi and Punjabi *aṅgūṭhā* "thumb" (CDIAL 137).

What you've built

One more word for this chapter.

Your turn

- *Say it: aṅguṣṭhaḥ*
- *Say it: aṅguṣṭhaḥ*, once more
- *Say it:* say *aṅguṣṭhaḥ*
- *Recall:* say the Sanskrit for an elbow, then the Sanskrit for a wrist, then say *aṅguṣṭhaḥ* again

Before you move on

What does अंगुष्ठः mean? ("A thumb".) Say it once more.

117.2 वक्षः (vakṣaḥ) — the chest

Before the new one: say the Sanskrit for a wrist, then the Sanskrit for a thumb.

You'll want to know: वक्षः

वक्षः — *vakṣaḥ* — "the chest".

The word, taken apart — its roots and family

vakṣaḥ is *vakṣas* "breast, chest", already in the Rigveda, with the final *s* said as *ḥ* at the end of a phrase (MW). MW lists it under √vakṣ "grow, increase" without deriving it, so its source is uncertain; Kashmiri kept it as *wach* "chest" (CDIAL 11188).

What you've built

One more word for this chapter.

Your turn

- *Say it: vakṣaḥ*
- *Say it: vakṣaḥ*, once more
- *Say it:* say *vakṣaḥ*

- *Recall:* say the Sanskrit for a wrist, then the Sanskrit for a thumb, then say *vakṣaḥ* again

Before you move on

What does वक्षः mean? ("The chest".) Say it once more.

117.3 कटिः (kaṭiḥ) — the waist

Before the new one: say the Sanskrit for a thumb, then the Sanskrit for the chest.

You'll want to know: कटिः

कटिः — *kaṭiḥ* — "the waist".

The word, taken apart — its roots and family

kaṭi "the hip, the waist" has a disputed origin: CDIAL 2639 notes an Indo-European proposal but thinks it rather borrowed from Dravidian, comparing Kannada *kaḍe* "side". It lives on as Marathi *kaḍ* "side, waist" (CDIAL 2639).

What you've built

One more word for this chapter.

Your turn

- *Say it: kaṭiḥ*
- *Say it: kaṭiḥ*, once more
- *Say it:* say *kaṭiḥ*
- *Recall:* say the Sanskrit for a thumb, then the Sanskrit for the chest, then say *kaṭiḥ* again

Before you move on

What does कटिः mean? ("The waist".) Say it once more.

117.4 भ्रूः (bhrūḥ) — an eyebrow

Before the new one: say the Sanskrit for the chest, then the Sanskrit for the waist.

You'll want to know: भ्रूः

भ्रूः — *bhrūḥ* — "an eyebrow".

The word, taken apart — its roots and family

bhrū "an eyebrow" is inherited from Indo-European (EtymDB): MW sets it beside Greek *ophrys* and English *brow*. It lives on as Hindi *bhaumh* "eyebrow" (CDIAL 9688).

What you've built

One more word for this chapter.

Your turn

- *Say it: bhrūḥ*
- *Say it: bhrūḥ*, once more
- *Say it:* say *bhrūḥ*
- *Recall:* say the Sanskrit for the chest, then the Sanskrit for the waist, then say *bhrūḥ* again

Before you move on

What does भ्रूः mean? ("An eyebrow".) Say it once more.

117.5 त्वक् (tvak) — the skin

Before the new one: say the Sanskrit for the waist, then the Sanskrit for an eyebrow.

You'll want to know: त्वक्

त्वक् — *tvak* — "the skin".

The word, taken apart — its roots and family

tvak is *tvac* "skin, hide", already in the Rigveda, with the final *c* said as *k* at the end of a word (MW). MW sets it beside a root √tvac "cover" known only from the grammarians, so its origin is uncertain; Pali kept it as *taco* (CDIAL 6087).

What you've built

One more word for this chapter.

Your turn

- *Say it: tvak*
- *Say it: tvak*, once more
- *Say it:* say *tvak*
- *Recall:* say the Sanskrit for the waist, then the Sanskrit for an eyebrow, then say *tvak* again

Before you move on

What does त्वक् mean? ("The skin".) Say it once more.

Chapter 118

Ankle, Finger, Room, Chair, Board

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say an ankle, a finger, a room, a chair and a board.
>
> *Complete the last lesson of chapter 118: I can say an ankle, a finger, a room, a chair and a board.*

118.1 गुल्फः (gulphaḥ) — an ankle

Before the new one: say the Sanskrit for an eyebrow, then the Sanskrit for the skin.

You'll want to know: गुल्फः

गुल्फः — *gulphaḥ* — "an ankle".

The word, taken apart — its roots and family

gulpha "the ankle", also *kulpha* in the Rigveda, is perhaps borrowed from Dravidian: CDIAL 4216, after Burrow, takes the wavering *k-* and *g-* as a sign of that and compares a Dravidian word for "hoof". It lives on as Marathi *gophā* "ankle" (CDIAL 4216).

What you've built

One more word for this chapter.

Your turn

- *Say it: gulphaḥ*
- *Say it: gulphaḥ*, once more
- *Say it:* say *gulphaḥ*
- *Recall:* say the Sanskrit for an eyebrow, then the Sanskrit for the skin, then say *gulphaḥ* again

Before you move on

What does गुल्फः mean? ("An ankle".) Say it once more.

118.2 अंगुलिः (aṅguliḥ) — a finger

Before the new one: say the Sanskrit for the skin, then the Sanskrit for an ankle.

You'll want to know: अंगुलिः

अंगुलिः — *aṅguliḥ* — "a finger".

The word, taken apart — its roots and family

aṅguli "a finger, a toe" is built on the base *aṅgu-*, the same base as *aṅguṣṭha* "thumb" (CDIAL 135, 137). It lives on as Hindi *uṅglī* "finger" (CDIAL 135).

What you've built

One more word for this chapter.

Your turn

- *Say it: aṅguliḥ*
- *Say it: aṅguliḥ*, once more
- *Say it:* say *aṅguliḥ*
- *Recall:* say the Sanskrit for the skin, then the Sanskrit for an ankle, then say *aṅguliḥ* again

Before you move on

What does अंगुलिः mean? ("A finger".) Say it once more.

118.3 कक्षः (kakṣaḥ) — a room

Before the new one: say the Sanskrit for an ankle, then the Sanskrit for a finger.

You'll want to know: कक्षः

कक्षः — *kakṣaḥ* — "a room".

The word, taken apart — its roots and family

kakṣa first meant "a hiding place" and "the armpit", which MW calls the most concealed part of the body; its feminine *kakṣā* also names a walled enclosure or a private room. MW compares Latin *coxa* "hip", and EtymDB counts it as inherited from Indo-European.

What you've built

One more word for this chapter.

Your turn

- *Say it: kakṣaḥ*
- *Say it: kakṣaḥ*, once more
- *Say it:* say *kakṣaḥ*
- *Recall:* say the Sanskrit for an ankle, then the Sanskrit for a finger, then say *kakṣaḥ* again

Before you move on

What does कक्षः mean? ("A room".) Say it once more.

118.4 आसन्दी (āsandī) — a chair

Before the new one: say the Sanskrit for a finger, then the Sanskrit for a room.

You'll want to know: आसन्दी

आसन्दी — *āsandī* — "a chair".

The word, taken apart — its roots and family

āsandī "a chair, a stool" is old, in the Atharvaveda, and comes from *ā* "on" + the root √sad "sit" (CDIAL 1485). MW sets √sad beside Latin *sedere* and English *sit*: an inherited Indo-European root.

What you've built

One more word for this chapter.

Your turn

- *Say it: āsandī*
- *Say it: āsandī*, once more
- *Say it:* say *āsandī*
- *Recall:* say the Sanskrit for a finger, then the Sanskrit for a room, then say *āsandī* again

Before you move on

What does आसन्दी mean? ("A chair".) Say it once more.

118.5 फलकम् (phalakam) — a board, a plank

Before the new one: say the Sanskrit for a room, then the Sanskrit for a chair.

You'll want to know: फलकम्

फलकम् — *phalakam* — "a board, a plank".

The word, taken apart — its roots and family

phalaka "a board, a plank, a bench" is found from the Brāhmaṇas on (MW). CDIAL 9053 refers it to the root √phal "burst, split", the root MW files it under, and MW compares √phal with English *split*. Nepali kept it as *phalek* "board, plank" (CDIAL 9053).

What you've built

One more word for this chapter.

Your turn

- *Say it: phalakam*
- *Say it: phalakam*, once more
- *Say it:* say *phalakam*
- *Recall:* say the Sanskrit for a room, then the Sanskrit for a chair, then say *phalakam* again

Before you move on

What does फलकम् mean? ("A board, a plank".) Say it once more.

Chapter 119

Ladle, Frying pan, Vessel, Bottle, Small umbrella

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a ladle, a frying pan, a vessel, a bottle and a small umbrella.
>
> *Complete the last lesson of chapter 119: I can say a ladle, a frying pan, a vessel, a bottle and a small umbrella.*

119.1 दर्वी (darvī) — a ladle

Before the new one: say the Sanskrit for a chair, then the Sanskrit for a board.

You'll want to know: दर्वी

दर्वी — *darvī* — "a ladle".

The word, taken apart — its roots and family

darvī "a ladle" is old, in the Rigveda: MW explains it as "the wooden one", and CDIAL 6206 refers it to *dru* "tree, wood". MW sets that word beside Greek *drys* "oak" and English *tree*.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *darvī*
- *Say it:* *darvī*, once more
- *Say it:* say *darvī*
- *Recall:* say the Sanskrit for a chair, then the Sanskrit for a board, then say *darvī* again

Before you move on

What does दर्वी mean? ("A ladle".) Say it once more.

119.2 कटाहः (kaṭāhaḥ) — a frying pan

Before the new one: say the Sanskrit for a board, then the Sanskrit for a ladle.

You'll want to know: कटाहः

कटाहः — *kaṭāhaḥ* — "a frying pan".

The word, taken apart — its roots and family

kaṭāha "a frying pan, a cauldron with handles" appears from the Mahābhārata on, and neither MW nor CDIAL gives a derivation, so its origin is uncertain. It lives on as Hindi *kaṛāhī* "frying pan" (CDIAL 2638).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *kaṭāhaḥ*
- *Say it:* *kaṭāhaḥ*, once more
- *Say it:* say *kaṭāhaḥ*

- *Recall:* say the Sanskrit for a board, then the Sanskrit for a ladle, then say *kaṭāhaḥ* again

Before you move on

What does कटाहः mean? ("A frying pan".) Say it once more.

119.3 पात्रम् (pātram) — a vessel

Before the new one: say the Sanskrit for a ladle, then the Sanskrit for a frying pan.

You'll want to know: पात्रम्

पात्रम् — *pātram* — "a vessel".

The word, taken apart — its roots and family

pātra comes from the root √pā "drink" with the tool suffix *-tra* (CDIAL 8055): "the thing to drink from". It is inherited from Indo-European, a cousin of Latin *pōculum* "cup" (EtymDB), and lives on as Punjabi *pātar* "vessel" (CDIAL 8055).

What you've built

One more word for this chapter.

Your turn

- *Say it: pātram*
- *Say it: pātram*, once more
- *Say it:* say *pātram*
- *Recall:* say the Sanskrit for a ladle, then the Sanskrit for a frying pan, then say *pātram* again

Before you move on

What does पात्रम् mean? ("A vessel".) Say it once more.

119.4 कूपी (kūpī) — a bottle, a flask

Before the new one: say the Sanskrit for a frying pan, then the Sanskrit for a vessel.

You'll want to know: कूपी

कूपी — *kūpī* — "a bottle, a flask".

The word, taken apart — its roots and family

kūpī is a feminine of *kūpa* "a hole, a hollow, a well" (MW), and its sense "flask, bottle" comes from a late dictionary. MW compares Greek *kypē* "hollow"; *kūpa* itself lives on as Gujarati *kuvo* "small well" (CDIAL 3400).

What you've built

One more word for this chapter.

Your turn

- *Say it: kūpī*
- *Say it: kūpī*, once more
- *Say it:* say *kūpī*
- *Recall:* say the Sanskrit for a frying pan, then the Sanskrit for a vessel, then say *kūpī* again

Before you move on

What does कूपी mean? ("A bottle, a flask".) Say it once more.

119.5 छत्रिका (chatrikā) — a small umbrella

Before the new one: say the Sanskrit for a vessel, then the Sanskrit for a bottle.

You'll want to know: छत्रिका

छत्रिका — *chatrikā* — "a small umbrella".

The word, taken apart — its roots and family

chatrikā is *chattra* "a parasol" with the small-thing suffix *-ikā*, and *chattra* comes from the root √chad "cover" (CDIAL 4972). It lives on as Hindi *chātā* and Punjabi *chatrī* "umbrella" (CDIAL 4972).

What you've built

One more word for this chapter.

Your turn

- *Say it: chatrikā*
- *Say it: chatrikā*, once more
- *Say it:* say *chatrikā*
- *Recall:* say the Sanskrit for a vessel, then the Sanskrit for a bottle, then say *chatrikā* again

Before you move on

What does छत्रिका mean? ("A small umbrella".) Say it once more.

119.6 Nature and animals — a first pass

Say the words for a bottle and a small umbrella.

Your turn

Say these aloud:

- a mountain, a waterfall, a wave, lightning, thunder
- a storm, mist, a branch, a leaf, a flower
- a lotus, a star, the sun, a bear, a jackal
- a rabbit, a donkey, a boar, a bull, a buffalo

- a sheep, a pigeon, an owl, a heron, a bee

Before you move on

A mountain? (गिरिः, *giriḥ.*) A waterfall? (प्रपातः, *prapātaḥ.*) A wave? (तरंगः, *taraṅgaḥ.*) Lightning? (विद्युत्, *vidyut.*) Thunder? (गर्जनम्, *garjanam.*) A storm? (वात्या, *vātyā.*) Mist? (नीहारः, *nīhāraḥ.*) A branch? (शाखा, *śākhā.*) A leaf? (पर्णम्, *parṇam.*) A flower? (कुसुमम्, *kusumam.*) A lotus? (पद्मम्, *padmam.*) A star? (नक्षत्रम्, *nakṣatram.*) The sun? (सूर्यः, *sūryaḥ.*) A bear? (भल्लूकः, *bhallūkaḥ.*) A jackal? (शृगालः, *śṛgālaḥ.*) A rabbit? (शशकः, *śaśakaḥ.*) A donkey? (गर्दभः, *gardabhaḥ.*) A boar? (वराहः, *varāhaḥ.*) A bull? (वृषभः, *vṛṣabhaḥ.*) A buffalo? (महिषः, *mahiṣaḥ.*) A sheep? (मेषः, *meṣaḥ.*) A pigeon? (कपोतः, *kapotaḥ.*) An owl? (उलूकः, *ulūkaḥ.*) A heron? (बकः, *bakaḥ.*) A bee? (भ्रमरः, *bhramaraḥ.*)

119.7 Animals, the body and the kitchen — a second pass

Say the words for a fly and a mosquito.

Your turn

Say these aloud:

- a fly, a mosquito, an ant, a butterfly, a rooster
- a crane, a cheek, the chin, an elbow, a wrist
- a thumb, the chest, the waist, an eyebrow, the skin
- an ankle, a finger, a room, a chair, a board
- a ladle, a frying pan, a vessel, a bottle, a small umbrella

Before you move on

A fly? (मक्षिका, *makṣikā.*) A mosquito? (मशकः, *maśakaḥ.*) An ant? (पिपीलिका, *pipīlikā.*) A butterfly? (चित्रपतंगः, *citrapataṅgaḥ.*) A rooster? (कुक्कुटः, *kukkuṭaḥ.*) A crane? (सारसः, *sārasaḥ.*) A cheek? (कपोलः, *kapolaḥ.*) The chin? (चिबुकम्, *cibukam.*) An elbow? (कूर्परः,

kūrparaḥ.) A wrist? (मणिबन्धः, *maṇibandhaḥ.*) A thumb? (अंगुष्ठः, *aṅguṣṭhaḥ.*) The chest? (वक्षः, *vakṣaḥ.*) The waist? (कटिः, *kaṭiḥ.*) An eyebrow? (भ्रूः, *bhrūḥ.*) The skin? (त्वक्, *tvak.*) An ankle? (गुल्फः, *gulphaḥ.*) A finger? (अंगुलिः, *aṅguliḥ.*) A room? (कक्षः, *kakṣaḥ.*) A chair? (आसन्दी, *āsandī.*) A board? (फलकम्, *phalakam.*) A ladle? (दर्वी, *darvī.*) A frying pan? (कटाहः, *kaṭāhaḥ.*) A vessel? (पात्रम्, *pātram.*) A bottle? (कूपी, *kūpī.*) A small umbrella? (छत्रिका, *chatrikā.*)

Chapter 120

Coin, Post office, Letter, Book, Picture

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a coin, a post office, a letter, a book and a picture.
>
> *Complete the last lesson of chapter 120: I can say a coin, a post office, a letter, a book and a picture.*

120.1 मुद्रा (mudrā) — a coin, a seal

Before the new one: say the Sanskrit for a bottle, a flask, then the Sanskrit for a small umbrella.

You'll want to know: मुद्रा

मुद्रा — *mudrā* — "a coin, a seal".

The word, taken apart — its roots and family

mudrā "a seal, a signet-ring", and later a coin, is probably borrowed from Iranian (CDIAL 10203, after EWA). It lives on as Punjabi *mundī* "ring" (CDIAL 10203).

What you've built

One more word for this chapter.

Your turn

- *Say it: mudrā*
- *Say it: mudrā*, once more
- *Say it:* say *mudrā*
- *Recall:* say the Sanskrit for a bottle, a flask, then the Sanskrit for a small umbrella, then say *mudrā* again

Before you move on

What does मुद्रा mean? ("A coin, a seal".) Say it once more.

120.2 पत्रालयः (patrālayaḥ) — a post office

Before the new one: say the Sanskrit for a small umbrella, then the Sanskrit for a coin.

You'll want to know: पत्रालयः

पत्रालयः — *patrālayaḥ* — "a post office".

The word, taken apart — its roots and family

patrālaya is built from *patra* "a leaf, a letter" (MW) and *ālaya* "dwelling, house": "the house of letters". The pairing for a post office is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: patrālayaḥ*
- *Say it: patrālayaḥ*, once more
- *Say it:* say *patrālayaḥ*
- *Recall:* say the Sanskrit for a small umbrella, then the Sanskrit for a coin, then say *patrālayaḥ* again

Before you move on

What does पत्रालयः mean? ("A post office".) Say it once more.

120.3 लेखः (lekhaḥ) — a letter, an article

Before the new one: say the Sanskrit for a coin, then the Sanskrit for a post office.

You'll want to know: लेखः

लेखः — *lekhaḥ* — "a letter, an article".

The word, taken apart — its roots and family

lekha "a line, a stroke", then "a writing, a letter", comes from the root √likh "scratch, write" (CDIAL 11101): writing began as scratching. MW compares √likh with Greek *ereikō* "tear".

What you've built

One more word for this chapter.

Your turn

- *Say it: lekhaḥ*
- *Say it: lekhaḥ*, once more
- *Say it:* say *lekhaḥ*
- *Recall:* say the Sanskrit for a coin, then the Sanskrit for a post office, then say *lekhaḥ* again

Before you move on

What does लेखः mean? ("A letter, an article".) Say it once more.

120.4 ग्रन्थः (granthaḥ) — a book, a text

Before the new one: say the Sanskrit for a post office, then the Sanskrit for a letter.

You'll want to know: ग्रन्थः

ग्रन्थः — *granthaḥ* — "a book, a text".

The word, taken apart — its roots and family

grantha comes from the root √granth "tie, string together" (CDIAL 4350): it first meant "a knot", and later "a book", a composition strung together. Sinhala kept it as *gata* "book" (CDIAL 4350).

What you've built

One more word for this chapter.

Your turn

- *Say it: granthaḥ*
- *Say it: granthaḥ*, once more
- *Say it:* say *granthaḥ*
- *Recall:* say the Sanskrit for a post office, then the Sanskrit for a letter, then say *granthaḥ* again

Before you move on

What does ग्रन्थः mean? ("A book, a text".) Say it once more.

120.5 चित्रम् (citram) — a picture

Before the new one: say the Sanskrit for a letter, then the Sanskrit for a book.

You'll want to know: चित्रम्

चित्रम् — *citram* — "a picture".

The word, taken apart — its roots and family

citra comes from the root √cit "perceive, appear" (CDIAL 4803): it first meant "conspicuous, bright, many-coloured", and as a noun "a picture" (MW). Pali kept it as *citta* "picture" (CDIAL 4803).

What you've built

One more word for this chapter.

Your turn

- *Say it: citram*
- *Say it: citram*, once more
- *Say it:* say *citram*
- *Recall:* say the Sanskrit for a letter, then the Sanskrit for a book, then say *citram* again

Before you move on

What does चित्रम् mean? ("A picture".) Say it once more.

Chapter 121

Musical instrument, Veena, Cloth, Jewel, Gold

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a musical instrument, a veena, a cloth, a jewel and gold.
>
> *Complete the last lesson of chapter 121: I can say a musical instrument, a veena, a cloth, a jewel and gold.*

121.1 वाद्यम् (vādyam) — a musical instrument

Before the new one: say the Sanskrit for a book, then the Sanskrit for a picture.

You'll want to know: वाद्यम्

वाद्यम् — *vādyam* — "a musical instrument".

The word, taken apart — its roots and family

vādya comes from the root √vad "speak, sound": first "to be said", then "to be played", and so "a musical instrument" (CDIAL 11511). It lives on as Hindi *bājā* "musical instrument" (CDIAL 11511).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *vādyam*
- *Say it:* *vādyam*, once more
- *Say it:* say *vādyam*
- *Recall:* say the Sanskrit for a book, then the Sanskrit for a picture, then say *vādyam* again

Before you move on

What does वाद्यम् mean? ("A musical instrument".) Say it once more.

121.2 वीणा (vīṇā) — a veena

Before the new one: say the Sanskrit for a picture, then the Sanskrit for a musical instrument.

You'll want to know: वीणा

वीणा — *vīṇā* — "a veena".

The word, taken apart — its roots and family

MW calls *vīṇā* "the Indian lute" of doubtful derivation; EtymDB traces it to an Indo-Iranian word that Middle Persian also kept, so its source is not settled. It lives on as Hindi *bīn* "lute" (CDIAL 12048).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *vīṇā*
- *Say it:* *vīṇā*, once more
- *Say it:* say *vīṇā*
- *Recall:* say the Sanskrit for a picture, then the Sanskrit for a musical instrument, then say *vīṇā* again

Before you move on

What does वीणा mean? ("A veena".) Say it once more.

121.3 पट्टः (paṭṭaḥ) — a cloth, a strip

Before the new one: say the Sanskrit for a musical instrument, then the Sanskrit for a veena.

You'll want to know: पट्टः

पट्टः — *paṭṭaḥ* — "a cloth, a strip".

The word, taken apart — its roots and family

paṭṭa "cloth, woven silk, a strip or bandage" is probably from a non-Aryan source, says CDIAL 7700, which rejects a link with *pattra* "leaf". It lives on as Hindi *paṭṭī* "strip of cloth" (CDIAL 7700).

What you've built

One more word for this chapter.

Your turn

- *Say it: paṭṭaḥ*
- *Say it: paṭṭaḥ*, once more
- *Say it:* say *paṭṭaḥ*
- *Recall:* say the Sanskrit for a musical instrument, then the Sanskrit for a veena, then say *paṭṭaḥ* again

Before you move on

What does पट्टः mean? ("A cloth, a strip".) Say it once more.

121.4 रत्नम् (ratnam) — a jewel

Before the new one: say the Sanskrit for a veena, then the Sanskrit for a cloth.

You'll want to know: रत्नम्

रत्नम् — *ratnam* — "a jewel".

The word, taken apart — its roots and family

ratna first meant "a gift, wealth" in the Rigveda and later "a jewel" (MW). MW derives it from the root √rā "give", while CDIAL 10600 refers it to √raṇ "rejoice", so its root is not settled. Pali kept it as *ratana* "jewel" (CDIAL 10600).

What you've built

One more word for this chapter.

Your turn

- *Say it: ratnam*
- *Say it: ratnam*, once more
- *Say it:* say *ratnam*
- *Recall:* say the Sanskrit for a veena, then the Sanskrit for a cloth, then say *ratnam* again

Before you move on

What does रत्नम् mean? ("A jewel".) Say it once more.

121.5 सुवर्णम् (suvarṇam) — gold

Before the new one: say the Sanskrit for a cloth, then the Sanskrit for a jewel.

You'll want to know: सुवर्णम्

सुवर्णम् — *suvarṇam* — "gold".

The word, taken apart — its roots and family

suvarṇa is built from *su* "good" and *varṇa* "colour" (CDIAL 13519): "of a good, bright colour", and so "gold". It wore down into Hindi,

Punjabi and Bengali *sonā* “gold” (CDIAL 13519).

What you’ve built

One more word for this chapter.

Your turn

- *Say it: suvarṇam*
- *Say it: suvarṇam*, once more
- *Say it:* say *suvarṇam*
- *Recall:* say the Sanskrit for a cloth, then the Sanskrit for a jewel, then say *suvarṇam* again

Before you move on

What does सुवर्णम् mean? (“Gold”.) Say it once more.

Chapter 122

Silver, Glass, Cart, Pot, Cot

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say silver, glass, a cart, a pot and a cot.
>
> *Complete the last lesson of chapter 122: I can say silver, glass, a cart, a pot and a cot.*

122.1 रजतम् (rajatam) — silver

Before the new one: say the Sanskrit for a jewel, then the Sanskrit for gold.

You'll want to know: रजतम्

रजतम् — *rajatam* — "silver".

The word, taken apart — its roots and family

rajata first meant "whitish, silvery" in the Rigveda and then "silver" (MW). It is inherited from Indo-European, the same word as Latin *argentum* "silver" (EtymDB), whose symbol *Ag* is still on the periodic table. Pali kept it as *rajata* (CDIAL 10576).

What you've built

One more word for this chapter.

Your turn

- *Say it: rajatam*
- *Say it: rajatam*, once more
- *Say it:* say *rajatam*
- *Recall:* say the Sanskrit for a jewel, then the Sanskrit for gold, then say *rajatam* again

Before you move on

What does रजतम् mean? ("Silver".) Say it once more.

122.2 काचः (kācaḥ) — glass

Before the new one: say the Sanskrit for gold, then the Sanskrit for silver.

You'll want to know: काचः

काचः — *kācaḥ* — "glass".

The word, taken apart — its roots and family

kāca "glass" goes back to the Śatapatha Brāhmaṇa, where it means glass beads; MW cites only a grammarians' root √kac for it, so its origin is uncertain. It lives on as Hindi and Gujarati *kāc* "glass" (CDIAL 3007).

What you've built

One more word for this chapter.

Your turn

- *Say it: kācaḥ*
- *Say it: kācaḥ*, once more
- *Say it:* say *kācaḥ*

- *Recall:* say the Sanskrit for gold, then the Sanskrit for silver, then say *kācaḥ* again

Before you move on

What does काचः mean? ("Glass".) Say it once more.

122.3 शकटम् (śakaṭam) — a cart

Before the new one: say the Sanskrit for silver, then the Sanskrit for glass.

You'll want to know: शकटम्

शकटम् — *śakaṭam* — "a cart".

The word, taken apart — its roots and family

śakaṭa "a cart, a waggon" appears from the Śrauta Sūtras on, and MW calls it of doubtful derivation; CDIAL 12236 suggests the root √śak with a query mark, so its origin is uncertain. It lives on as Hindi and Punjabi *chakṛā* "bullock-cart" (CDIAL 12236).

What you've built

One more word for this chapter.

Your turn

- *Say it: śakaṭam*
- *Say it: śakaṭam*, once more
- *Say it:* say *śakaṭam*
- *Recall:* say the Sanskrit for silver, then the Sanskrit for glass, then say *śakaṭam* again

Before you move on

What does शकटम् mean? ("A cart".) Say it once more.

122.4 भाण्डम् (bhāṇḍam) — a pot

Before the new one: say the Sanskrit for glass, then the Sanskrit for a cart.

You'll want to know: भाण्डम्

भाण्डम् — *bhāṇḍam* — "a pot".

The word, taken apart — its roots and family

bhāṇḍa "a pot, any vessel; goods, wares" has an uncertain origin: MW queries a root √bhaṇḍ, and DEDR (appendix 50) notes Burrow's Indo-European proposal. It lives on as Punjabi *bhāṁḍā* "cooking pot" (CDIAL 9440).

What you've built

One more word for this chapter.

Your turn

- *Say it: bhāṇḍam*
- *Say it: bhāṇḍam*, once more
- *Say it:* say *bhāṇḍam*
- *Recall:* say the Sanskrit for glass, then the Sanskrit for a cart, then say *bhāṇḍam* again

Before you move on

What does भाण्डम् mean? ("A pot".) Say it once more.

122.5 खट्वा (khaṭvā) — a cot

Before the new one: say the Sanskrit for a cart, then the Sanskrit for a pot.

You'll want to know: खट्वा

खट्वा — *khaṭvā* — "a cot".

The word, taken apart — its roots and family

khaṭvā "a bedstead, a cot" appears from the Kauśika Sūtra on, and neither MW nor CDIAL gives a derivation, so its origin is uncertain. It lives on as Hindi *khāṭ* "bedstead" and *khaṭolā* "cot" (CDIAL 3781).

What you've built

One more word for this chapter.

Your turn

- *Say it: khaṭvā*
- *Say it: khaṭvā*, once more
- *Say it:* say *khaṭvā*
- *Recall:* say the Sanskrit for a cart, then the Sanskrit for a pot, then say *khaṭvā* again

Before you move on

What does खट्वा mean? ("A cot".) Say it once more.

Chapter 123

Seat, Bicycle, Vehicle, Ship, Train

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a seat, a bicycle, a vehicle, a ship and a train.
>
> *Complete the last lesson of chapter 123: I can say a seat, a bicycle, a vehicle, a ship and a train.*

123.1 पीठम् (pīṭham) — a seat, a stool

Before the new one: say the Sanskrit for a pot, then the Sanskrit for a cot.

You'll want to know: पीठम्

पीठम् — *pīṭham* — "a seat, a stool".

The word, taken apart — its roots and family

pīṭha "a stool, a seat" has an uncertain origin: MW wonders whether it is a worn form of *pi-sad* "sit upon", while CDIAL 8222 thinks the variety of its forms points to a non-Aryan source. It lives on as Hindi *pīṛhā* "low stool" (CDIAL 8222).

What you've built

One more word for this chapter.

Your turn

- *Say it: pīṭham*
- *Say it: pīṭham*, once more
- *Say it:* say *pīṭham*
- *Recall:* say the Sanskrit for a pot, then the Sanskrit for a cot, then say *pīṭham* again

Before you move on

What does पीठम् mean? ("A seat, a stool".) Say it once more.

123.2 द्विचक्रिका (dvicakrikā) — a bicycle

Before the new one: say the Sanskrit for a cot, then the Sanskrit for a seat.

You'll want to know: द्विचक्रिका

द्विचक्रिका — *dvicakrikā* — "a bicycle".

The word, taken apart — its roots and family

dvicakrikā is built from *dvi* "two" and *cakra* "wheel" with the suffix *-ikā*: "the little two-wheeler". It is a modern coinage, made the way English *bicycle* was made from Latin *bi-* "two" and Greek *kyklos* "wheel"; *cakra* lives on as Marathi *cāk* "wheel" (CDIAL 4538).

What you've built

One more word for this chapter.

Your turn

- *Say it: dvicakrikā*
- *Say it: dvicakrikā*, once more
- *Say it:* say *dvicakrikā*

- *Recall:* say the Sanskrit for a cot, then the Sanskrit for a seat, then say *dvicakrikā* again

Before you move on

What does द्विचक्रिका mean? ("A bicycle".) Say it once more.

123.3 यानम् (yānam) — a vehicle

Before the new one: say the Sanskrit for a seat, then the Sanskrit for a bicycle.

You'll want to know: यानम्

यानम् — *yānam* — "a vehicle".

The word, taken apart — its roots and family

yāna comes from the root √yā "go" (CDIAL 10459): first "a journey, going", then "a vehicle of any kind", as in *mahāyāna* "the great vehicle" (MW). The root is inherited from Indo-European (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *yānam*
- *Say it:* *yānam*, once more
- *Say it:* say *yānam*
- *Recall:* say the Sanskrit for a seat, then the Sanskrit for a bicycle, then say *yānam* again

Before you move on

What does यानम् mean? ("A vehicle".) Say it once more.

123.4 नौयानम् (nauyānam) — a ship

Before the new one: say the Sanskrit for a bicycle, then the Sanskrit for a vehicle.

You'll want to know: नौयानम्

नौयानम् — *nauyānam* — "a ship".

The word, taken apart — its roots and family

nauyāna is built from *nau* "ship, boat" and *yāna* "going, vehicle", from the root √yā "go"; MW already records it as "a ship". MW sets *nau* beside Greek *naus* and Latin *navis*, the source of English *navy* and *naval*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nauyānam*
- *Say it: nauyānam*, once more
- *Say it:* say *nauyānam*
- *Recall:* say the Sanskrit for a bicycle, then the Sanskrit for a vehicle, then say *nauyānam* again

Before you move on

What does नौयानम् mean? ("A ship".) Say it once more.

123.5 धूमयानम् (dhūmayānam) — a train

Before the new one: say the Sanskrit for a vehicle, then the Sanskrit for a ship.

You'll want to know: धूमयानम्

धूमयानम् — *dhūmayānam* — "a train".

The word, taken apart — its roots and family

dhūmayāna is built from *dhūma* "smoke" and *yāna* "vehicle": "the smoke-carriage", a modern coinage from the days of the steam engine. MW sets *dhūma* beside Latin *fumus* "smoke", the source of English *fume*, and it lives on as Hindi *dhuāṁ* "smoke" (CDIAL 6849).

What you've built

One more word for this chapter.

Your turn

- *Say it: dhūmayānam*
- *Say it: dhūmayānam*, once more
- *Say it:* say *dhūmayānam*
- *Recall:* say the Sanskrit for a vehicle, then the Sanskrit for a ship, then say *dhūmayānam* again

Before you move on

What does धूमयानम् mean? ("A train".) Say it once more.

Chapter 124

Cloth, Lake, Riverbank, Cuckoo, Sparrow

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a cloth, a lake, a riverbank, a cuckoo and a sparrow.
>
> *Complete the last lesson of chapter 124: I can say a cloth, a lake, a riverbank, a cuckoo and a sparrow.*

124.1 पटः (paṭaḥ) — a cloth

Before the new one: say the Sanskrit for a ship, then the Sanskrit for a train.

You'll want to know: पटः

पटः — *paṭaḥ* — "a cloth".

The word, taken apart — its roots and family

paṭa "woven cloth, a garment" is probably borrowed from Austroasiatic: CDIAL 7692 follows Przyluski in grouping it with *karpāsa* "cotton", and thinks a Dravidian source less likely. Pali kept it as *paṭa* "cloth" (CDIAL 7692).

What you've built

One more word for this chapter.

Your turn

- *Say it: paṭaḥ*
- *Say it: paṭaḥ*, once more
- *Say it:* say *paṭaḥ*
- *Recall:* say the Sanskrit for a ship, then the Sanskrit for a train, then say *paṭaḥ* again

Before you move on

What does पटः mean? ("A cloth".) Say it once more.

124.2 सरोवरः (sarovaraḥ) — a lake

Before the new one: say the Sanskrit for a train, then the Sanskrit for a cloth.

You'll want to know: सरोवरः

सरोवरः — *sarovaraḥ* — "a lake".

The word, taken apart — its roots and family

sarovara is built from *saras* "a lake, a pool", from the root √sṛ "flow" (CDIAL 13254), and *vara* "choice, best": "the finest of pools", a lake deep enough for the lotus (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: sarovaraḥ*
- *Say it: sarovaraḥ*, once more
- *Say it:* say *sarovaraḥ*
- *Recall:* say the Sanskrit for a train, then the Sanskrit for a cloth, then say *sarovaraḥ* again

Before you move on

What does सरोवरः mean? ("A lake".) Say it once more.

124.3 नदीतीरम् (nadītīram) — a riverbank

Before the new one: say the Sanskrit for a cloth, then the Sanskrit for a lake.

You'll want to know: नदीतीरम्

नदीतीरम् — *nadītīram* — "a riverbank".

The word, taken apart — its roots and family

nadītīra is built from *nadī* "river", which MW lists under the root √nad "roar, sound", and *tīra* "shore, bank" (CDIAL 5842): "the bank of a river" (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: nadītīram*
- *Say it: nadītīram*, once more
- *Say it:* say *nadītīram*
- *Recall:* say the Sanskrit for a cloth, then the Sanskrit for a lake, then say *nadītīram* again

Before you move on

What does नदीतीरम् mean? ("A riverbank".) Say it once more.

124.4 कोकिलः (kokilaḥ) — a cuckoo

Before the new one: say the Sanskrit for a lake, then the Sanskrit for a riverbank.

You'll want to know: कोकिलः

कोकिलः — *kokilaḥ* — "a cuckoo".

The word, taken apart — its roots and family

kokila "the Indian cuckoo, the koel" is imitative of the bird's call (MW), as Greek *kokkyx* and English *cuckoo* are (EtymDB). It lives on as Hindi *koyal* (CDIAL 3483).

What you've built

One more word for this chapter.

Your turn

- *Say it: kokilaḥ*
- *Say it: kokilaḥ*, once more
- *Say it:* say *kokilaḥ*
- *Recall:* say the Sanskrit for a lake, then the Sanskrit for a riverbank, then say *kokilaḥ* again

Before you move on

What does कोकिलः mean? ("A cuckoo".) Say it once more.

124.5 चाटकः (cāṭakaḥ) — a sparrow

Before the new one: say the Sanskrit for a riverbank, then the Sanskrit for a cuckoo.

You'll want to know: चाटकः

चाटकः — *cāṭakaḥ* — "a sparrow".

The word, taken apart — its roots and family

MW and Apte record the sparrow as *caṭaka*, with a short *a*, and CDIAL 4571 calls it imitative of the bird's call, with similar words in Dravidian and Munda. It lives on as Hindi *ciṛā* "sparrow" and *ciṛiyā*

"bird" (CDIAL 4571).

What you've built

One more word for this chapter.

Your turn

- *Say it: cāṭakaḥ*
- *Say it: cāṭakaḥ*, once more
- *Say it:* say *cāṭakaḥ*
- *Recall:* say the Sanskrit for a riverbank, then the Sanskrit for a cuckoo, then say *cāṭakaḥ* again

Before you move on

What does चाटकः mean? ("A sparrow".) Say it once more.

Chapter 125

Mongoose, Short, Soft, Clean, Dirty

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a mongoose, short, soft, clean and dirty.
>
> *Complete the last lesson of chapter 125: I can say a mongoose, short, soft, clean and dirty.*

125.1 नकुलः (nakulaḥ) — a mongoose

Before the new one: say the Sanskrit for a cuckoo, then the Sanskrit for a sparrow.

You'll want to know: नकुलः

नकुलः — *nakulaḥ* — "a mongoose".

The word, taken apart — its roots and family

nakula "a mongoose" is old, in the Atharvaveda. Pāṇini's grammar splits it as *na* + *kula*, but MW thinks that probably wrong, so its origin is uncertain. It lives on as Hindi *neul* and *naulā* "mongoose" (CDIAL 6908).

What you've built

One more word for this chapter.

Your turn

- *Say it: nakulaḥ*
- *Say it: nakulaḥ*, once more
- *Say it:* say *nakulaḥ*
- *Recall:* say the Sanskrit for a cuckoo, then the Sanskrit for a sparrow, then say *nakulaḥ* again

Before you move on

What does नकुलः mean? ("A mongoose".) Say it once more.

125.2 ह्रस्वः (hrasvaḥ) — short

Before the new one: say the Sanskrit for a sparrow, then the Sanskrit for a mongoose.

You'll want to know: ह्रस्वः

ह्रस्वः — *hrasvaḥ* — "short".

The word, taken apart — its roots and family

hrasva "short, small" is inherited from Indo-Iranian (EtymDB), and MW sets it beside the root √hras "become short, lessen". In grammar it also names a short vowel (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: hrasvaḥ*
- *Say it: hrasvaḥ*, once more
- *Say it:* say *hrasvaḥ*
- *Recall:* say the Sanskrit for a sparrow, then the Sanskrit for a mongoose, then say *hrasvaḥ* again

Before you move on

What does ह्रस्वः mean? ("Short".) Say it once more.

125.3 मृदुः (mṛduḥ) — soft

Before the new one: say the Sanskrit for a mongoose, then the Sanskrit for short.

You'll want to know: मृदुः

मृदुः — *mṛduḥ* — "soft".

The word, taken apart — its roots and family

mṛdu "soft, tender, mild" is inherited from Indo-European (EtymDB): English *mild* and Latin *mollis* "soft" are its cousins. CDIAL 10292 sets it under the root √mṛd "press, crush".

What you've built

One more word for this chapter.

Your turn

- *Say it: mṛduḥ*
- *Say it: mṛduḥ*, once more
- *Say it:* say *mṛduḥ*
- *Recall:* say the Sanskrit for a mongoose, then the Sanskrit for short, then say *mṛduḥ* again

Before you move on

What does मृदुः mean? ("Soft".) Say it once more.

125.4 शुद्धः (śuddhaḥ) — clean, pure

Before the new one: say the Sanskrit for short, then the Sanskrit for soft.

You'll want to know: शुद्धः

शुद्धः — *śuddhaḥ* — "clean, pure".

The word, taken apart — its roots and family

śuddha is the past participle of the root √śudh "purify, become pure" (MW; CDIAL 12520): "cleansed", so "clean, pure". It lives on as Hindi *sūdhā* "clean, pure, true" (CDIAL 12520).

What you've built

One more word for this chapter.

Your turn

- *Say it: śuddhaḥ*
- *Say it: śuddhaḥ*, once more
- *Say it:* say *śuddhaḥ*
- *Recall:* say the Sanskrit for short, then the Sanskrit for soft, then say *śuddhaḥ* again

Before you move on

What does शुद्धः mean? ("Clean, pure".) Say it once more.

125.5 मलिनः (malinaḥ) — dirty

Before the new one: say the Sanskrit for soft, then the Sanskrit for clean.

You'll want to know: मलिनः

मलिनः — *malinaḥ* — "dirty".

The word, taken apart — its roots and family

malina "dirty, dark" is built on *mala* "dirt, filth" (MW), formed like the colour words in *-na* (CDIAL 9905). MW compares *mala* with Greek *melas* "black", as in *melancholy*; Marathi kept it as *maḷīṇ*

"dirty" (CDIAL 9905).

What you've built

One more word for this chapter.

Your turn

- *Say it: malinaḥ*
- *Say it: malinaḥ*, once more
- *Say it:* say *malinaḥ*
- *Recall:* say the Sanskrit for soft, then the Sanskrit for clean, then say *malinaḥ* again

Before you move on

What does मलिनः mean? ("Dirty".) Say it once more.

Chapter 126

Wide, Narrow, Deep, Wet, Dry

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say wide, narrow, deep, wet and dry.
>
> *Complete the last lesson of chapter 126: I can say wide, narrow, deep, wet and dry.*

126.1 विस्तृतः (vistṛtaḥ) — wide

Before the new one: say the Sanskrit for clean, then the Sanskrit for dirty.

You'll want to know: विस्तृतः

विस्तृतः — *vistṛtaḥ* — "wide".

The word, taken apart — its roots and family

vistṛta is the past participle of *vi-√stṛ* "spread out", the root √stṛ "strew, spread" with *vi-* "apart" (CDIAL 12011): "spread out, wide" (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: vistṛtaḥ*
- *Say it: vistṛtaḥ*, once more
- *Say it:* say *vistṛtaḥ*
- *Recall:* say the Sanskrit for clean, then the Sanskrit for dirty, then say *vistṛtaḥ* again

Before you move on

What does विस्तृतः mean? ("Wide".) Say it once more.

126.2 संकीर्णः (saṅkīrṇaḥ) — narrow

Before the new one: say the Sanskrit for dirty, then the Sanskrit for wide.

You'll want to know: संकीर्णः

संकीर्णः — *saṅkīrṇaḥ* — "narrow".

The word, taken apart — its roots and family

saṅkīrṇa comes from *sam-√kṝ*, the root √kṝ "pour out, scatter" with *sam* "together" (MW). As a past participle it means "poured together, crowded", and from that "narrow, cramped".

What you've built

One more word for this chapter.

Your turn

- *Say it: saṅkīrṇaḥ*
- *Say it: saṅkīrṇaḥ*, once more
- *Say it:* say *saṅkīrṇaḥ*
- *Recall:* say the Sanskrit for dirty, then the Sanskrit for wide, then say *saṅkīrṇaḥ* again

Before you move on

What does संकीर्णः mean? ("Narrow".) Say it once more.

126.3 गभीरः (gabhīraḥ) — deep

Before the new one: say the Sanskrit for wide, then the Sanskrit for narrow.

You'll want to know: गभीरः

गभीरः — *gabhīraḥ* — "deep".

The word, taken apart — its roots and family

gabhīra "deep" is old, in the Rigveda, and is inherited from Indo-European (EtymDB); Persian *žarf* "deep" is a cousin. It lives on as Hindi *gahrā* "deep" (CDIAL 4024).

What you've built

One more word for this chapter.

Your turn

- *Say it: gabhīraḥ*
- *Say it: gabhīraḥ*, once more
- *Say it:* say *gabhīraḥ*

Before you move on

What does गभीरः mean? ("Deep".) Say it once more.

126.4 आर्द्रः (ārdraḥ) — wet

Before the new one: say the Sanskrit for narrow, then the Sanskrit for deep.

You'll want to know: आर्द्रः

आर्द्रः — *ārdraḥ* — "wet".

The word, taken apart — its roots and family

ārdra "wet, moist, fresh" is old, in the Rigveda; MW cites only a grammarians' root √ard for it, so its origin is uncertain. It lives on as Hindi *ālā* "damp" (CDIAL 1340), and *ārdraka* "ginger" is built on it.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ārdraḥ*
- *Say it:* *ārdraḥ*, once more
- *Say it:* say *ārdraḥ*
- *Recall:* say the Sanskrit for narrow, then the Sanskrit for deep, then say *ārdraḥ* again

Before you move on

What does आर्द्रः mean? ("Wet".) Say it once more.

126.5 शुष्कः (śuṣkaḥ) — dry

Before the new one: say the Sanskrit for deep, then the Sanskrit for wet.

You'll want to know: शुष्कः

शुष्कः — *śuṣkaḥ* — "dry".

The word, taken apart — its roots and family

śuṣka comes from the root √śuṣ "become dry" (CDIAL 12548), which MW sets beside Latin *siccus* "dry", and EtymDB counts as inherited from Indo-European. It lives on as Hindi *sūkhā* "dry" (CDIAL 12548).

What you've built

One more word for this chapter.

Your turn

- *Say it: śuṣkaḥ*
- *Say it: śuṣkaḥ*, once more

127.1 दरिद्रः (daridraḥ) — poor

Before the new one: say the Sanskrit for wet, then the Sanskrit for dry.

You'll want to know: दरिद्रः

दरिद्रः — *daridraḥ* — "poor".

The word, taken apart — its roots and family

daridra comes from the intensive of the root √drā "run" (MW; CDIAL 6195): in the Vedas it means "roving, strolling", and later "poor, needy". Punjabi kept it as *dariddar* "poverty" (CDIAL 6195).

What you've built

One more word for this chapter.

Your turn

- *Say it: daridraḥ*
- *Say it: daridraḥ*, once more
- *Say it:* say *daridraḥ*

Before you move on

What does दरिद्रः mean? ("Poor".) Say it once more.

127.2 धनिकः (dhanikaḥ) — rich

Before the new one: say the Sanskrit for dry, then the Sanskrit for poor.

You'll want to know: धनिकः

धनिकः — *dhanikaḥ* — "rich".

The word, taken apart — its roots and family

dhanika is built from *dhana* "wealth" with the suffix *-ika* "having": "a rich man" (MW). In the Rigveda *dhana* means the prize of a contest, and then property and wealth (CDIAL 6717); Hindi *dhan* "wealth" is the same word.

What you've built

One more word for this chapter.

Your turn

- *Say it: dhanikaḥ*
- *Say it: dhanikaḥ*, once more
- *Say it:* say *dhanikaḥ*

What does तरुणः mean? ("Young".) Say it once more.

127.4 प्रसिद्धः (prasiddhaḥ) — famous

Before the new one: say the Sanskrit for rich, then the Sanskrit for young.

You'll want to know: प्रसिद्धः

प्रसिद्धः — *prasiddhaḥ* — "famous".

The word, taken apart — its roots and family

prasiddha is the past participle of *pra-√sidh* "be accomplished, be made clear", the root √sidh "succeed" with *pra* "forth" (MW; CDIAL 8842): "brought about", then "well known, famous".

What you've built

One more word for this chapter.

Your turn

- *Say it: prasiddhaḥ*
- *Say it: prasiddhaḥ*, once more
- *Say it:* say *prasiddhaḥ*
- *Recall:* say the Sanskrit for rich, then the Sanskrit for young, then say *prasiddhaḥ* again

Before you move on

What does प्रसिद्धः mean? ("Famous".) Say it once more.

127.5 सुरक्षितः (surakṣitaḥ) — safe

Before the new one: say the Sanskrit for young, then the Sanskrit for famous.

You'll want to know: सुरक्षितः

सुरक्षितः — *surakṣitaḥ* — "safe".

The word, taken apart — its roots and family

surakṣita is built from *su* "well" and *rakṣita* "protected", from the root √rakṣ "protect, guard" (CDIAL 13499): "well protected", so "safe" (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: surakṣitaḥ*
- *Say it: surakṣitaḥ*, once more
- *Say it:* say *surakṣitaḥ*

128.1 भयंकरः (bhayaṅkaraḥ) — terrible

Before the new one: say the Sanskrit for famous, then the Sanskrit for safe.

You'll want to know: भयंकरः

भयंकरः — *bhayaṅkaraḥ* — "terrible".

The word, taken apart — its roots and family

bhayaṅkara is built from *bhaya* "fear", from the root √bhī "be afraid" (MW), and *-kara* "making", from √kṛ "do, make", with an *ṃ* between them: "fear-making", so "terrible" (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: bhayaṅkaraḥ*
- *Say it: bhayaṅkaraḥ*, once more
- *Say it:* say *bhayaṅkaraḥ*
- *Recall:* say the Sanskrit for famous, then the Sanskrit for safe, then say *bhayaṅkaraḥ* again

Before you move on

What does भयंकरः mean? ("Terrible".) Say it once more.

128.2 मिथ्या (mithyā) — false

Before the new one: say the Sanskrit for safe, then the Sanskrit for terrible.

You'll want to know: मिथ्या

मिथ्या — *mithyā* — "false".

The word, taken apart — its roots and family

mithyā is an old adverb, "invertedly, wrongly", and later "falsely": MW contracts it from *mithūyā*, and CDIAL 10130 sets it under the root √mith "alternate, clash". It lives on as Bengali *michā* "untrue" (CDIAL 10130).

What you've built

One more word for this chapter.

Your turn

- *Say it: mithyā*

128.3 कटुः (kaṭuḥ) — pungent

Before the new one: say the Sanskrit for terrible, then the Sanskrit for false.

You'll want to know: कटुः

कटुः — *kaṭuḥ* — "pungent".

The word, taken apart — its roots and family

kaṭu "pungent, sharp, bitter" is old, in the Rigveda; MW tentatively links it with √kṛt "cut", but its origin is uncertain, and DEDR 1135 compares a Dravidian word. It lives on as Marathi *kaḍū* and Hindi *kaṛuā* "bitter, pungent" (CDIAL 2641).

What you've built

One more word for this chapter.

Your turn

- *Say it: kaṭuḥ*
- *Say it: kaṭuḥ*, once more
- *Say it:* say *kaṭuḥ*
- *Recall:* say the Sanskrit for terrible, then the Sanskrit for false, then say *kaṭuḥ* again

Before you move on

What does कटुः mean? ("Pungent".) Say it once more.

128.4 अम्लः (amlaḥ) — sour

Before the new one: say the Sanskrit for false, then the Sanskrit for pungent.

You'll want to know: अम्लः

अम्लः — *amlaḥ* — "sour".

The word, taken apart — its roots and family

amla "sour, acid" appears from Manu on, and MW gives no derivation for it, so its origin is uncertain. It lives on as Bengali *āmbal* "sour" and Pali *ambila* (CDIAL 579).

What you've built

One more word for this chapter.

Your turn

- *Say it: amlaḥ*
- *Say it: amlaḥ*, once more
- *Say it:* say *amlaḥ*
- *Recall:* say the Sanskrit for false, then the Sanskrit for pungent, then say *amlaḥ* again

Before you move on

What does अम्लः mean? ("Sour".) Say it once more.

128.5 तिक्तः (tiktaḥ) — bitter

Before the new one: say the Sanskrit for pungent, then the Sanskrit for sour.

You'll want to know: तिक्तः

तिक्तः — *tiktaḥ* — "bitter".

The word, taken apart — its roots and family

tikta "bitter, pungent" comes from the root √tij "be sharp" (CDIAL 5806): bitterness as a sharp taste. MW compares √tij with Greek *stizō* "prick" and Latin *distinguo*, and it lives on as Bengali *titā* "bitter" (CDIAL 5806).

What you've built

One more word for this chapter.

Your turn

- *Say it: tiktaḥ*
- *Say it: tiktaḥ*, once more
- *Say it:* say *tiktaḥ*
- *Recall:* say the Sanskrit for pungent, then the Sanskrit for sour, then say *tiktaḥ* again

Before you move on

What does तिक्तः mean? ("Bitter".) Say it once more.

Chapter 129

Cool, New, Ancient, Brave, Clever

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say cool, new, ancient, brave and clever.
>
> *Complete the last lesson of chapter 129: I can say cool, new, ancient, brave and clever.*

129.1 शीतलः (śītalaḥ) — cool

Before the new one: say the Sanskrit for sour, then the Sanskrit for bitter.

You'll want to know: शीतलः

शीतलः — *śītalaḥ* — "cool".

The word, taken apart — its roots and family

śītala is built on *śīta* "cold" (CDIAL 12487), which MW derives from the root √śyai "congeal, freeze", with the suffix *-la*: "cool, cooling". It lives on as Marathi *śiḷā* "cold, stale" (CDIAL 12487).

What you've built

One more word for this chapter.

Your turn

- *Say it: śītalaḥ*
- *Say it: śītalaḥ*, once more
- *Say it:* say *śītalaḥ*
- *Recall:* say the Sanskrit for sour, then the Sanskrit for bitter, then say *śītalaḥ* again

Before you move on

What does शीतलः mean? ("Cool".) Say it once more.

129.2 नवीनः (navīnaḥ) — new

Before the new one: say the Sanskrit for bitter, then the Sanskrit for cool.

You'll want to know: नवीनः

नवीनः — *navīnaḥ* — "new".

The word, taken apart — its roots and family

navīna is built on *nava* "new" with the suffix -*īna* (CDIAL 7023). MW sets *nava* beside Greek *neos*, Latin *novus* and English *new*: one inherited Indo-European word.

What you've built

One more word for this chapter.

Your turn

- *Say it: navīnaḥ*
- *Say it: navīnaḥ*, once more
- *Say it:* say *navīnaḥ*
- *Recall:* say the Sanskrit for bitter, then the Sanskrit for cool, then say *navīnaḥ* again

Before you move on

What does नवीनः mean? ("New".) Say it once more.

129.3 प्राचीनः (prācīnaḥ) — ancient

Before the new one: say the Sanskrit for cool, then the Sanskrit for new.

You'll want to know: प्राचीनः

प्राचीनः — *prācīnaḥ* — "ancient".

The word, taken apart — its roots and family

prācīna is built on *prāñc* "turned forward, facing east" (CDIAL 8920): in the Rigveda it means "eastern", and later "former, ancient" (MW), since what lies in front lies before in time.

What you've built

One more word for this chapter.

Your turn

- *Say it: prācīnaḥ*
- *Say it: prācīnaḥ*, once more
- *Say it:* say *prācīnaḥ*
- *Recall:* say the Sanskrit for cool, then the Sanskrit for new, then say *prācīnaḥ* again

Before you move on

What does प्राचीनः mean? ("Ancient".) Say it once more.

129.4 वीरः (vīraḥ) — brave

Before the new one: say the Sanskrit for new, then the Sanskrit for ancient.

You'll want to know: वीरः

वीरः — *vīraḥ* — "brave".

The word, taken apart — its roots and family

vīra "a man, a hero" is inherited from Indo-European: Latin *vir* "man", the source of English *virile*, is the same word (EtymDB). It lives on as Punjabi *vīr* "hero" and *vīrā* "brother" (CDIAL 12056).

What you've built

One more word for this chapter.

Your turn

- *Say it: vīraḥ*
- *Say it: vīraḥ*, once more
- *Say it:* say *vīraḥ*
- *Recall:* say the Sanskrit for new, then the Sanskrit for ancient, then say *vīraḥ* again

Before you move on

What does वीरः mean? ("Brave".) Say it once more.

129.5 चतुरः (caturaḥ) — clever

Before the new one: say the Sanskrit for ancient, then the Sanskrit for brave.

You'll want to know: चतुरः

चतुरः — *caturaḥ* — "clever".

The word, taken apart — its roots and family

catura first meant "swift, quick" and then "dexterous, clever" (MW). MW cites only a grammarians' root √cat, and CDIAL 4594 compares *caṭula* "fickle", so its origin is uncertain. Pali kept it as *catura* "clever"

(CDIAL 4594).

What you've built

One more word for this chapter.

Your turn

- *Say it: caturaḥ*
- *Say it: caturaḥ*, once more
- *Say it:* say *caturaḥ*
- *Recall:* say the Sanskrit for ancient, then the Sanskrit for brave, then say *caturaḥ* again

Before you move on

What does चतुरः mean? ("Clever".) Say it once more.

129.6 Things of value and getting around — a first pass

Say the words for brave and clever.

Your turn

Say these aloud:

- a coin, a post office, a letter, a book, a picture
- a musical instrument, a veena, a cloth, a jewel, gold
- silver, glass, a cart, a pot, a cot
- a seat, a bicycle, a vehicle, a ship, a train
- a cloth, a lake, a riverbank, a cuckoo, a sparrow

Before you move on

A coin? (मुद्रा, *mudrā.*) A post office? (पत्रालयः, *patrālayaḥ.*) A letter? (लेखः, *lekhaḥ.*) A book? (ग्रन्थः, *granthaḥ.*) A picture? (चित्रम्, *citram.*) A musical instrument? (वाद्यम्, *vādyam.*) A veena? (वीणा, *vīṇā.*) A cloth? (पट्टः, *paṭṭaḥ.*) A jewel? (रत्नम्, *ratnam.*) Gold? (सुवर्णम्, *suvarṇam.*) Silver? (रजतम्, *rajatam.*) Glass? (काचः, *kācaḥ.*) A cart? (शकटम्, *śakaṭam.*) A pot? (भाण्डम्, *bhāṇḍam.*) A cot? (खट्वा, *khaṭvā.*) A seat? (पीठम्, *pīṭham.*) A bicycle? (द्विचक्रिका, *dvicakrikā.*) A vehicle? (यानम्, *yānam.*) A ship? (नौयानम्, *nauyānam.*) A train? (धूमयानम्, *dhūmayānam.*) A cloth? (पटः, *paṭaḥ.*) A lake? (सरोवरः, *sarovaraḥ.*) A riverbank? (नदीतीरम्, *nadītīram.*) A cuckoo? (कोकिलः, *kokilaḥ.*) A sparrow? (चाटकः, *cāṭakaḥ.*)

129.7 Describing words — a second pass

Say the words for a mongoose and short.

Your turn

Say these aloud:

- a mongoose, short, soft, clean, dirty
- wide, narrow, deep, wet, dry
- poor, rich, young, famous, safe
- terrible, false, pungent, sour, bitter
- cool, new, ancient, brave, clever

Before you move on

A mongoose? (नकुलः, *nakulaḥ.*) Short? (ह्रस्वः, *hrasvaḥ.*) Soft? (मृदुः, *mṛduḥ.*) Clean? (शुद्धः, *śuddhaḥ.*) Dirty? (मलिनः, *malinaḥ.*) Wide? (विस्तृतः, *vistṛtaḥ.*) Narrow? (संकीर्णः, *saṅkīrṇaḥ.*) Deep? (गभीरः, *gabhīraḥ.*) Wet? (आर्द्रः, *ārdraḥ.*) Dry? (शुष्कः, *śuṣkaḥ.*) Poor? (दरिद्रः, *daridraḥ.*) Rich? (धनिकः, *dhanikaḥ.*) Young? (तरुणः, *taruṇaḥ.*) Famous? (प्रसिद्धः, *prasiddhaḥ.*) Safe? (सुरक्षितः, *surakṣitaḥ.*) Terrible? (भयंकरः, *bhayaṅkaraḥ.*) False? (मिथ्या, *mithyā.*) Pungent? (कटुः,

kaṭuḥ.) Sour? (अम्लः, *amlaḥ.*) Bitter? (तिक्तः, *tiktaḥ.*) Cool? (शीतलः, *śītalaḥ.*) New? (नवीनः, *navīnaḥ.*) Ancient? (प्राचीनः, *prācīnaḥ.*) Brave? (वीरः, *vīraḥ.*) Clever? (चतुरः, *caturaḥ.*)

Chapter 130

Foolish, Lazy, Strong, Weak, Clear

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say foolish, lazy, strong, weak and clear.
>
> *Complete the last lesson of chapter 130: I can say foolish, lazy, strong, weak and clear.*

130.1 मूर्खः (mūrkhaḥ) — foolish

Before the new one: say the Sanskrit for brave, then the Sanskrit for clever.

You'll want to know: मूर्खः

मूर्खः — *mūrkhaḥ* — "foolish".

The word, taken apart — its roots and family

mūrkha "stupid, foolish" is old, in the Taittirīya Saṃhitā. MW files it under the root √mūrch "thicken, congeal, faint" without deriving it from there, so its source is uncertain. Hindi uses it unchanged as *mūrkh* (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: mūrkhaḥ*
- *Say it: mūrkhaḥ*, once more
- *Say it:* say *mūrkhaḥ*
- *Recall:* say the Sanskrit for brave, then the Sanskrit for clever, then say *mūrkhaḥ* again

Before you move on

What does मूर्खः mean? ("Foolish".) Say it once more.

130.2 अलसः (alasaḥ) — lazy

Before the new one: say the Sanskrit for clever, then the Sanskrit for foolish.

You'll want to know: अलसः

अलसः — *alasaḥ* — "lazy".

The word, taken apart — its roots and family

alasa "inactive, lazy" has a disputed origin: MW divides it as *a-* "not" + *lasa* "lively", CDIAL 708 reports EWA's view that it is an *l*-form of *arasa* "sapless", and DEDR 236 takes it from Dravidian. Pali kept it as *alasa* "lazy" (CDIAL 708).

What you've built

One more word for this chapter.

Your turn

- *Say it: alasaḥ*
- *Say it: alasaḥ*, once more
- *Say it:* say *alasaḥ*

- *Recall:* say the Sanskrit for clever, then the Sanskrit for foolish, then say *alasaḥ* again

Before you move on

What does अलसः mean? ("Lazy".) Say it once more.

130.3 सबलः (sabalaḥ) — strong

Before the new one: say the Sanskrit for foolish, then the Sanskrit for lazy.

You'll want to know: सबलः

सबलः — *sabalaḥ* — "strong".

The word, taken apart — its roots and family

sabala is built from *sa* "with" and *bala* "strength, force": "having strength", so "powerful, strong", already in the Rigveda (MW).

What you've built

One more word for this chapter.

Your turn

- *Say it: sabalaḥ*
- *Say it: sabalaḥ*, once more
- *Say it:* say *sabalaḥ*
- *Recall:* say the Sanskrit for foolish, then the Sanskrit for lazy, then say *sabalaḥ* again

Before you move on

What does सबलः mean? ("Strong".) Say it once more.

130.4 दुर्बलः (durbalaḥ) — weak

Before the new one: say the Sanskrit for lazy, then the Sanskrit for strong.

You'll want to know: दुर्बलः

दुर्बलः — *durbalaḥ* — "weak".

The word, taken apart — its roots and family

durbala is built from *dus-* "bad, ill" and *bala* "strength" (CDIAL 6438): "of little strength". It lives on as Hindi *dublā* "thin, weak" (CDIAL 6438).

What you've built

One more word for this chapter.

Your turn

- *Say it: durbalaḥ*
- *Say it: durbalaḥ*, once more
- *Say it:* say *durbalaḥ*
- *Recall:* say the Sanskrit for lazy, then the Sanskrit for strong, then say *durbalaḥ* again

Before you move on

What does दुर्बलः mean? ("Weak".) Say it once more.

130.5 स्वच्छः (svacchaḥ) — clear, clean

Before the new one: say the Sanskrit for strong, then the Sanskrit for weak.

You'll want to know: स्वच्छः

स्वच्छः — *svacchaḥ* — "clear, clean".

The word, taken apart — its roots and family

svaccha is built from *su* "very, well" and *accha* "clear, transparent" (MW): "very clear, crystalline", and so "clean".

What you've built

One more word for this chapter.

Your turn

- *Say it: svacchaḥ*
- *Say it: svacchaḥ*, once more
- *Say it:* say *svacchaḥ*
- *Recall:* say the Sanskrit for strong, then the Sanskrit for weak, then say *svacchaḥ* again

Before you move on

What does स्वच्छः mean? ("Clear, clean".) Say it once more.

Chapter 131

Black, Grey, Pink, Clear, Thick

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say black, grey, pink, clear and thick.
>
> *Complete the last lesson of chapter 131: I can say black, grey, pink, clear and thick.*

131.1 कृष्णः (kṛṣṇaḥ) — black, dark

Before the new one: say the Sanskrit for weak, then the Sanskrit for clear.

You'll want to know: कृष्णः

कृष्णः — *kṛṣṇaḥ* — "black, dark".

The word, taken apart — its roots and family

kṛṣṇa "black, dark" is old, in the Rigveda, and is inherited from Indo-European; Old Prussian *kirsnan* "black" is a cousin (EtymDB). As a name it is Krishna, "the dark one", whom Hindi calls *kānh* (CDIAL 3451).

What you've built

One more word for this chapter.

Your turn

- *Say it: kṛṣṇaḥ*
- *Say it: kṛṣṇaḥ*, once more
- *Say it:* say *kṛṣṇaḥ*
- *Recall:* say the Sanskrit for weak, then the Sanskrit for clear, then say *kṛṣṇaḥ* again

Before you move on

What does कृष्णः mean? ("Black, dark".) Say it once more.

131.2 धूसरः (dhūsaraḥ) — grey

Before the new one: say the Sanskrit for clear, then the Sanskrit for black.

You'll want to know: धूसरः

धूसरः — *dhūsaraḥ* — "grey".

The word, taken apart — its roots and family

dhūsara "dust-coloured, grey" is linked by CDIAL 6870 with words for dust, while MW suggests the root √dhvaṃs "fall to dust"; its exact formation is uncertain. Hindi and Marathi kept it as *dhūsar* "grey" (CDIAL 6870).

What you've built

One more word for this chapter.

Your turn

- *Say it: dhūsaraḥ*
- *Say it: dhūsaraḥ*, once more
- *Say it:* say *dhūsaraḥ*

- *Recall:* say the Sanskrit for clear, then the Sanskrit for black, then say *dhūsaraḥ* again

Before you move on

What does धूसरः mean? ("Grey".) Say it once more.

131.3 पाटलः (pāṭalaḥ) — pink

Before the new one: say the Sanskrit for black, then the Sanskrit for grey.

You'll want to know: पाटलः

पाटलः — *pāṭalaḥ* — "pink".

The word, taken apart — its roots and family

pāṭala "pale red, pink" also names the trumpet-flower tree (MW). Neither MW nor CDIAL 8033 gives a derivation, so its origin is uncertain; DEDR 4075 compares Dravidian names for that tree.

What you've built

One more word for this chapter.

Your turn

- *Say it: pāṭalaḥ*
- *Say it: pāṭalaḥ*, once more
- *Say it:* say *pāṭalaḥ*
- *Recall:* say the Sanskrit for black, then the Sanskrit for grey, then say *pāṭalaḥ* again

Before you move on

What does पाटलः mean? ("Pink".) Say it once more.

131.4 स्पष्टः (spaṣṭaḥ) — clear

Before the new one: say the Sanskrit for grey, then the Sanskrit for pink.

You'll want to know: स्पष्टः

स्पष्टः — *spaṣṭaḥ* — "clear".

The word, taken apart — its roots and family

spaṣṭa "clearly perceived, distinct" belongs to the root √spaś "see, spy" (MW), inherited from Indo-European (EtymDB). MW sets √spaś beside Greek *skeptomai*, Latin *specio* and English *spy*.

What you've built

One more word for this chapter.

Your turn

- *Say it: spaṣṭaḥ*
- *Say it: spaṣṭaḥ*, once more
- *Say it:* say *spaṣṭaḥ*
- *Recall:* say the Sanskrit for grey, then the Sanskrit for pink, then say *spaṣṭaḥ* again

Before you move on

What does स्पष्टः mean? ("Clear".) Say it once more.

131.5 स्थूलः (sthūlaḥ) — thick, fat

Before the new one: say the Sanskrit for pink, then the Sanskrit for clear.

You'll want to know: स्थूलः

स्थूलः — *sthūlaḥ* — "thick, fat".

The word, taken apart — its roots and family

sthūla "large, thick, stout" comes, according to MW, from √sthū, a form of √sthā "stand": "solid, firm-standing". It is old, in the Atharvaveda, and lives on as Punjabi *ṭhullhā* "fat, coarse" (CDIAL 13776).

What you've built

One more word for this chapter.

Your turn

- *Say it: sthūlaḥ*
- *Say it: sthūlaḥ*, once more
- *Say it:* say *sthūlaḥ*
- *Recall:* say the Sanskrit for pink, then the Sanskrit for clear, then say *sthūlaḥ* again

Before you move on

What does स्थूलः mean? ("Thick, fat".) Say it once more.

Chapter 132

Thin, Crooked, Straight, Full, Empty

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

132.1 कृशः (kṛśaḥ) — thin

Before the new one: say the Sanskrit for clear, then the Sanskrit for thick.

You'll want to know: कृशः

कृशः — *kṛśaḥ* — "thin".

The word, taken apart — its roots and family

kṛśa "lean, thin, emaciated" is old, in the Rigveda, and is inherited from Indo-European (EtymDB). Pali wore it down to *kisa* "lean" (CDIAL 3441).

What you've built

One more word for this chapter.

Your turn

- *Say it: kṛśaḥ*
- *Say it: kṛśaḥ*, once more
- *Say it:* say *kṛśaḥ*
- *Recall:* say the Sanskrit for clear, then the Sanskrit for thick, then say *kṛśaḥ* again

Before you move on

What does कृशः mean? ("Thin".) Say it once more.

132.2 वक्रः (vakraḥ) — crooked

Before the new one: say the Sanskrit for thick, then the Sanskrit for thin.

You'll want to know: वक्रः

वक्रः — *vakraḥ* — "crooked".

The word, taken apart — its roots and family

vakra "crooked, curved, bent" is old, in the Atharvaveda, and CDIAL 11185 sets it under the root √vañc "go crookedly", noting that similar words may be non-Aryan. Pali kept it as *vakka* "crooked" (CDIAL 11185).

What you've built

One more word for this chapter.

Your turn

- *Say it: vakraḥ*
- *Say it: vakraḥ*, once more
- *Say it:* say *vakraḥ*

- *Recall:* say the Sanskrit for thick, then the Sanskrit for thin, then say *vakraḥ* again

Before you move on

What does वक्रः mean? ("Crooked".) Say it once more.

132.3 ऋजुः (ṛjuḥ) — straight

Before the new one: say the Sanskrit for thin, then the Sanskrit for crooked.

You'll want to know: ऋजुः

ऋजुः — *ṛjuḥ* — "straight".

The word, taken apart — its roots and family

ṛju "straight, upright, honest" is old, in the Rigveda, and is inherited from Indo-European: Latin *rēctus* and English *right* are its cousins (EtymDB). Marathi kept it as *ujū* "straight, honest" (CDIAL 2448).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ṛjuḥ*
- *Say it:* *ṛjuḥ*, once more
- *Say it:* say *ṛjuḥ*

What does ऋजुः mean? ("Straight".) Say it once more.

132.4 पूर्णः (pūrṇaḥ) — full

Before the new one: say the Sanskrit for crooked, then the Sanskrit for straight.

You'll want to know: पूर्णः

पूर्णः — *pūrṇaḥ* — "full".

The word, taken apart — its roots and family

pūrṇa is the past participle of the root √pṝ "fill" (CDIAL 8339): "filled, full". It is inherited from Indo-European, and Latin *plēnus* (English *plenty*) and Persian *pur* "full" are cousins (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: pūrṇaḥ*
- *Say it: pūrṇaḥ*, once more
- *Say it:* say *pūrṇaḥ*

Before you move on

What does पूर्णः mean? ("Full".) Say it once more.

132.5 रिक्तः (riktaḥ) — empty

Before the new one: say the Sanskrit for straight, then the Sanskrit for full.

You'll want to know: रिक्तः

रिक्तः — *riktaḥ* — "empty".

The word, taken apart — its roots and family

rikta is the past participle of the root √ric "leave, empty" (CDIAL 10729): "left, emptied". The root is inherited from Indo-European, kin to Latin *linquere* "leave" (EtymDB), and *rikta* lives on as Hindi *rītā* "empty" (CDIAL 10729).

What you've built

One more word for this chapter.

Your turn

- *Say it: riktaḥ*
- *Say it: riktaḥ*, once more

> *Complete the last lesson of chapter 133: I can say low, high, flies, swims and jumps.*

133.1 नीचः (nīcaḥ) — low

Before the new one: say the Sanskrit for full, then the Sanskrit for empty.

You'll want to know: नीचः

नीचः — *nīcaḥ* — "low".

The word, taken apart — its roots and family

nīca is built from *ni* "down" and the root √añc "bend, turn" (MW; CDIAL 7540): "turned downward", so "low". It lives on as Hindi and Punjabi *nīcā* "low" (CDIAL 7540).

What you've built

One more word for this chapter.

Your turn

- *Say it: nīcaḥ*
- *Say it: nīcaḥ*, once more
- *Say it:* say *nīcaḥ*

Before you move on

What does नीचः mean? ("Low".) Say it once more.

133.2 उन्नतः (unnataḥ) — high, tall

Before the new one: say the Sanskrit for empty, then the Sanskrit for low.

You'll want to know: उन्नतः

उन्नतः — *unnataḥ* — "high, tall".

The word, taken apart — its roots and family

unnata is the past participle of *ud-√nam* "bend upward, rise", the root √nam "bend, bow" with *ud* "up" (MW; CDIAL 2099): "raised, high, tall". It is the same root as *namas* in *namaste*, the greeting you already know.

What you've built

One more word for this chapter.

Your turn

- *Say it: unnataḥ*
- *Say it: unnataḥ*, once more
- *Say it:* say *unnataḥ*

Before you move on

What does उन्नतः mean? ("High, tall".) Say it once more.

133.3 उड्डयते (uḍḍayate) — flies

Before the new one: say the Sanskrit for low, then the Sanskrit for high.

You'll want to know: उड्डयते

उड्डयते — *uḍḍayate* — "flies".

The word, taken apart — its roots and family

uḍḍayate comes from *ud-√ḍī* "fly up, soar", the root √ḍī "fly" with *ud* "up" (MW; CDIAL 1697). It lives on as Hindi *uṛnā* and Marathi *uḍṇe* "to fly" (CDIAL 1697).

What you've built

One more word for this chapter.

Your turn

- *Say it: uḍḍayate*

Chapter 139

The Future, Tomorrow, Coming, Will Be, Will Go

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what will happen, and when: tomorrow, next week, next year.
>
> *Complete the last lesson of chapter 139: I can say what will happen, and when: tomorrow, next week, next year.*

139.1 भविष्यत् (bhaviṣyat) — the future

Before the new one: say the Sanskrit for wanders, then the Sanskrit for grows.

You'll want to know: भविष्यत्

भविष्यत् — *bhaviṣyat* — "the future". Sanskrit puts the future inside the verb, with **-ष्य-** before the ending: पठति — "reads" — becomes पठिष्यति — "will read".

The word, taken apart — its roots and family

bhaviṣyat is the future participle of the root √bhū "be, become": "about to be", and as a noun "the future" (MW). MW sets √bhū beside Latin *fuit* "was" and English *be*: an inherited Indo-European root.

What you've built

One more word for this chapter.

Your turn

- *Say it: bhaviṣyat*
- *Say it: bhaviṣyat*, once more
- *Say it:* say *bhaviṣyat*
- *Recall:* say the Sanskrit for wanders, then the Sanskrit for grows, then say *bhaviṣyat* again

Before you move on

What does भविष्यत् mean? ("The future".) Say it once more.

139.2 श्वः (śvaḥ) — tomorrow

Before the new one: say the Sanskrit for grows, then the Sanskrit for the future.

You'll want to know: श्वः

श्वः — *śvaḥ* — "tomorrow". The time word stands first and the future follows: श्वः सः पठिष्यति। — "Tomorrow he will read." You already have परश्वः, the day after it.

The word, taken apart — its roots and family

śvaḥ is *śvas* "tomorrow", already in the Rigveda, with the final *s* said as *ḥ* at the end of a phrase (MW). Pali kept it as *sve* "tomorrow" (CDIAL 12760); the Hindi *kal* comes from a different word.

What you've built

One more word for this chapter.

Your turn

- *Say it: śvaḥ*
- *Say it: śvaḥ*, once more
- *Say it:* say *śvaḥ*
- *Recall:* say the Sanskrit for grows, then the Sanskrit for the future, then say *śvaḥ* again

Before you move on

What does श्वः mean? ("Tomorrow".) Say it once more.

139.3 आगामी (āgāmī) — coming, next

Before the new one: say the Sanskrit for the future, then the Sanskrit for tomorrow.

You'll want to know: आगामी

आगामी — *āgāmī* — "coming, next". It stands before the time word and takes its ending: आगामिनि सप्ताहे — "next week"; आगामिनि संवत्सरे — "next year".

The word, taken apart — its roots and family

āgāmī is the nominative of *āgāmin* "coming, approaching", built from *ā-√gam* "come", the root √gam "go" with *ā* "toward" (MW; CDIAL 1048). From "coming" it means "next, future".

What you've built

One more word for this chapter.

Your turn

- *Say it: āgāmī*
- *Say it: āgāmī*, once more
- *Say it:* say *āgāmī*

- *Recall:* say the Sanskrit for the future, then the Sanskrit for tomorrow, then say *āgāmī* again

Before you move on

What does आगामी mean? ("Coming, next".) Say it once more.

139.4 भविष्यति (bhaviṣyati) — will be

Before the new one: say the Sanskrit for tomorrow, then the Sanskrit for coming.

You'll want to know: भविष्यति

भविष्यति — *bhaviṣyati* — "will be". The future of भवति, "is, becomes": श्वः रविवासरः भविष्यति। — "Tomorrow will be Sunday."

The word, taken apart — its roots and family

bhaviṣyati is built from the root √bhū "be, become" with the future marker *-iṣya-* (MW). MW sets √bhū beside Latin *fuit* "was" and English *be*: an inherited Indo-European root.

What you've built

One more word for this chapter.

Your turn

- *Say it: bhaviṣyati*
- *Say it: bhaviṣyati*, once more

- *Recall:* say the Sanskrit for tomorrow, then the Sanskrit for coming, then say *bhaviṣyati* again

Before you move on

What does भविष्यति mean? ("Will be".) Say it once more.

139.5 गमिष्यति (gamiṣyati) — will go

Before the new one: say the Sanskrit for coming, then the Sanskrit for will be.

You'll want to know: गमिष्यति

गमिष्यति — *gamiṣyati* — "will go". You met अगच्छत्, "he went"; this is the same verb looking forward: परश्वः सः आपणं गमिष्यति। — "The day after tomorrow he will go to the shop."

The word, taken apart — its roots and family

gamiṣyati is built from the root √gam "go" with the future marker *-iṣya-* (MW). MW sets √gam beside Greek *bainō* and English *come*: an inherited Indo-European root.

What you've built

One more word for this chapter.

Your turn

- *Say it: gamiṣyati*
- *Say it: gamiṣyati*, once more
- *Say it:* say *gamiṣyati*
- *Recall:* say the Sanskrit for coming, then the Sanskrit for will be, then say *gamiṣyati* again

Before you move on

What does गमिष्यति mean? ("Will go".) Say it once more.

Chapter 140

A Notice, a Timetable, an Advert, a Bill, a Receipt

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read a notice, a timetable, an advert, a bill and a receipt, and act on what they say.
>
> *Complete the last lesson of chapter 140: I can read a notice, a timetable, an advert, a bill and a receipt, and act on what they say.*

140.1 सूचना (sūcanā) — a notice

Before the new one: say the Sanskrit for will be, then the Sanskrit for will go.

You'll want to know: सूचना

सूचना — *sūcanā* — "a notice".

Read it: the notice on the shop door

The notice on the shop door says अद्य विश्रामः। — "today, rest". The shop is closed today, so come back श्वः.

The word, taken apart — its roots and family

sūcanā comes from the verb √sūc "point out, indicate" (MW), which MW takes as formed from *sūci* "needle, point": to notify is to point something out.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *sūcanā*
- *Say it:* *sūcanā*, once more
- *Say it:* say *sūcanā*

140.3 विज्ञापनम् (vijñāpanam) — an advert

Before the new one: say the Sanskrit for a notice, then the Sanskrit for a timetable.

You'll want to know: विज्ञापनम्

विज्ञापनम् — *vijñāpanam* — "an advert".

Read it: the advert

The advert says प्रकोष्ठः रिक्तः। मूल्यम् — मासे सहस्रम्। A room is empty, at a thousand a month.

The word, taken apart — its roots and family

vijñāpana comes from the causative of *vi-√jñā* "discern, know": "making known, information" (MW). The root √jñā "know" is the cousin of English *know* (EtymDB); using the word for an advertisement is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: vijñāpanam*
- *Say it: vijñāpanam*, once more

- *Say it:* say *vijñāpanam*

140.4 देयकम् (deyakam) — a bill (to pay)

Before the new one: say the Sanskrit for a timetable, then the Sanskrit for an advert.

You'll want to know: देयकम्

देयकम् — *deyakam* — "a bill (to pay)".

Read it: the bill at the restaurant

The bill at the restaurant says भोजनालयः — देयकम् — शतम्। A hundred to pay before you go.

The word, taken apart — its roots and family

deyaka is built from *deya* "to be given, due", the gerundive of the root √dā "give" (MW), with the suffix *-ka*: "the thing to be paid". Using it for a bill is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *deyakam*
- *Say it:* *deyakam*, once more
- *Say it:* say *deyakam*
- *Recall:* say the Sanskrit for a timetable, then the Sanskrit for an advert, then say *deyakam* again

Before you move on

Before the new one: say the Sanskrit for cries out, then the Sanskrit for roars.

You'll want to know: कूजति

कूजति — *kūjati* — "coos, warbles".

The word, taken apart — its roots and family

kūjati comes from the root √kūj "make an inarticulate sound, coo, warble" (MW), used of birds such as the pigeon and the cuckoo. MW gives no outside cousins for it, so its source is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: kūjati*
- *Say it: kūjati*, once more
- *Say it:* say *kūjati*
- *Recall:* say the Sanskrit for cries out, then the Sanskrit for roars, then say *kūjati* again

148.4 धीवरः (dhīvaraḥ) — a fisherman

Before the new one: say the Sanskrit for a cook, then the Sanskrit for a gardener.

You'll want to know: धीवरः

धीवरः — *dhīvaraḥ* — "a fisherman".

The word, taken apart — its roots and family

dhīvara "a fisherman" appears from the Mahābhārata on, also as the name of a caste (CDIAL 6819). Neither MW nor CDIAL gives a derivation, so its origin is uncertain. It lives on as Hindi *dhīmar* and Punjabi *jhīwar* "fisherman" (CDIAL 6819).

What you've built

One more word for this chapter.

Your turn

- *Say it: dhīvaraḥ*

Before the new one: say the Sanskrit for a remedy, then the Sanskrit for a wound.

You'll want to know: शोथः

शोथः — *śothaḥ* — "a swelling".

The word, taken apart — its roots and family

śotha "a swelling, a tumour, dropsy" comes from the root √śū, also √śvi, "swell" (MW). It is a word of the medical writer Suśruta.

What you've built

One more word for this chapter.

Your turn

- *Say it: śothaḥ*
- *Say it: śothaḥ*, once more
- *Say it:* say *śothaḥ*
- *Recall:* say the Sanskrit for a remedy, then the Sanskrit for a wound, then say *śothaḥ* again

Before you move on

What does शोथः mean? ("A swelling".) Say it once more.

150.4 वमनम् (vamanam) — vomiting

Before the new one: say the Sanskrit for a wound, then the Sanskrit for a swelling.

You'll want to know: वमनम्

वमनम् — *vamanam* — "vomiting".

The word, taken apart — its roots and family

vamana comes from the root √vam "vomit" (CDIAL 11295). MW sets √vam beside Greek *emeō* and Latin *vomere*, the source of English *vomit*: one inherited Indo-European root.

What you've built

One more word for this chapter.

Your turn

- *Say it: vamanam*
- *Say it: vamanam*, once more
- *Say it:* say *vamanam*
- *Recall:* say the Sanskrit for a wound, then the Sanskrit for a swelling, then say *vamanam* again

151.1 उत्साहः (utsāhaḥ) — enthusiasm

Before the new one: say the Sanskrit for vomiting, then the Sanskrit for a stomach ache.

You'll want to know: उत्साहः

उत्साहः — *utsāhaḥ* — "enthusiasm".

The word, taken apart — its roots and family

utsāha comes from *ud-√sah* "be equal to, be able", the root √sah "bear, prevail" with *ud* "up" (MW; CDIAL 1882): first "power, firmness", then "energy, zeal".

What you've built

One more word for this chapter.

Your turn

- *Say it: utsāhaḥ*
- *Say it: utsāhaḥ*, once more
- *Say it:* say *utsāhaḥ*
- *Recall:* say the Sanskrit for vomiting, then the Sanskrit for a stomach ache, then say *utsāhaḥ* again

151.4 मत्सरः (matsaraḥ) — jealousy

Before the new one: say the Sanskrit for courage, then the Sanskrit for laziness.

You'll want to know: मत्सरः

मत्सरः — *matsaraḥ* — "jealousy".

The word, taken apart — its roots and family

matsara probably comes from the root √mad "be drunk, exult" (MW; CDIAL 9756): in the Rigveda it means "exhilarating", and later "envious, jealous". A second *matsara*, "mosquito", gave Hindi *macchar*; CDIAL 9757 thinks it possibly the same word, named for its hum.

What you've built

One more word for this chapter.

Your turn

- *Say it: matsaraḥ*
- *Say it: matsaraḥ*, once more
- *Say it:* say *matsaraḥ*
- *Recall:* say the Sanskrit for courage, then the Sanskrit for laziness, then say *matsaraḥ* again

Before you move on

152.1 कालः (kālaḥ) — a period, time

Before the new one: say the Sanskrit for jealousy, then the Sanskrit for pride.

You'll want to know: कालः

कालः — *kālaḥ* — "a period, time".

The word, taken apart — its roots and family

kāla "time" is old, in the Atharvaveda, and MW derives it from the root √kal "calculate, count". CDIAL 3084 keeps it apart from *kāla* "black" (CDIAL 3083), and it lives on as Hindi *kāl* "time, fate" (CDIAL 3084).

What you've built

One more word for this chapter.

Your turn

- *Say it: kālaḥ*

यद्यपि — *yadyapi* — "although".

The word, taken apart — its roots and family

yadyapi is built from *yadi* "if" and *api* "even, also", with *i* turning to *y* before the vowel (MW): "even if", so "although". It pairs with *tathāpi* "even so".

What you've built

One more word for this chapter.

Your turn

- *Say it: yadyapi*
- *Say it: yadyapi*, once more
- *Say it:* say *yadyapi*
- *Recall:* say the Sanskrit for provided that, then the Sanskrit for even so, then say *yadyapi* again

Before you move on

What does यद्यपि mean? ("Although".) Say it once more.

154.5 अथवा (athavā) — or else, or

Before the new one: say the Sanskrit for even so, then the Sanskrit for although.

You'll want to know: अथवा

अथवा — *athavā* — "or else, or".

The word, taken apart — its roots and family

athavā is built from *atha* "then, now" and *vā* "or" (CDIAL 231): "or else, or rather". MW compares *vā* with Latin *-ve* "or", which also follows the word it joins.

What you've built

One more word for this chapter.

Your turn

- *Say it: athavā*
- *Say it: athavā*, once more
- *Say it:* say *athavā*
- *Recall:* say the Sanskrit for even so, then the Sanskrit for although, then say *athavā* again

Before you move on

What does अथवा mean? ("Or else, or".) Say it once more.

Chapter 155

Fresh, Worn out, Hot, Chilly, Harsh

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say fresh, worn out, hot, chilly and harsh.

> *Complete the last lesson of chapter 155: I can say fresh, worn out, hot, chilly and harsh.*

155.1 नूतनः (nūtanaḥ) — fresh, new

> Before the new one: say the Sanskrit for although, then the Sanskrit for or else.

You'll want to know: नूतनः

नूतनः — *nūtanaḥ* — "fresh, new".

The word, taken apart — its roots and family

nūtana is built from *nū*, *nu* "now" (MW; CDIAL 7575): "belonging to now", so "new, fresh". MW sets *nu* beside Greek *nyn*, Latin *nunc* and English *now*. Pali kept it as *nūtana* "recent, new" (CDIAL 7575).

What you've built

One more word for this chapter.

Your turn

- *Say it: nūtanaḥ*
- *Say it: nūtanaḥ*, once more
- *Say it:* say *nūtanaḥ*
- *Recall:* say the Sanskrit for although, then the Sanskrit for or else, then say *nūtanaḥ* again

Before you move on

What does नूतनः mean? ("Fresh, new".) Say it once more.

155.2 जीर्णः (jīrṇaḥ) — worn out, old

Before the new one: say the Sanskrit for or else, then the Sanskrit for fresh.

You'll want to know: जीर्णः

जीर्णः — *jīrṇaḥ* — "worn out, old".

The word, taken apart — its roots and family

jīrṇa is the past participle of the root √jīṛ "grow old, decay, be digested" (CDIAL 5237): "worn out, old", and also "digested". The root is inherited from Indo-European (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: jīrṇaḥ*
- *Say it: jīrṇaḥ*, once more
- *Say it:* say *jīrṇaḥ*
- *Recall:* say the Sanskrit for or else, then the Sanskrit for fresh, then say *jīrṇaḥ* again

Before you move on

What does जीर्णः mean? ("Worn out, old".) Say it once more.

155.3 उष्णः (uṣṇaḥ) — hot

Before the new one: say the Sanskrit for fresh, then the Sanskrit for worn out.

You'll want to know: उष्णः

उष्णः — *uṣṇaḥ* — "hot".

The word, taken apart — its roots and family

uṣṇa "hot, warm" comes from the root √uṣ "burn" (MW; CDIAL 2389), already in the Rigveda. It is inherited from Indo-European, and Latin *ussī* "I burned" is a cousin (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: uṣṇaḥ*
- *Say it: uṣṇaḥ*, once more
- *Say it:* say *uṣṇaḥ*
- *Recall:* say the Sanskrit for fresh, then the Sanskrit for worn out, then say *uṣṇaḥ* again

Before you move on

What does उष्णः mean? ("Hot".) Say it once more.

155.4 शीतः (śītaḥ) — chilly, cold

Before the new one: say the Sanskrit for worn out, then the Sanskrit for hot.

You'll want to know: शीतः

शीतः — *śītaḥ* — "chilly, cold".

The word, taken apart — its roots and family

śīta "cold, chilly" comes from the root √śyai "congeal, freeze" (MW; CDIAL 12485), already in the Rigveda. *śītala* "cool" is built on it.

What you've built

One more word for this chapter.

Your turn

- *Say it: śītaḥ*
- *Say it: śītaḥ*, once more
- *Say it:* say *śītaḥ*
- *Recall:* say the Sanskrit for worn out, then the Sanskrit for hot, then say *śītaḥ* again

Before you move on

What does शीतः mean? ("Chilly, cold".) Say it once more.

155.5 कठोरः (kaṭhoraḥ) — harsh, rough

Before the new one: say the Sanskrit for hot, then the Sanskrit for chilly.

You'll want to know: कठोरः

कठोरः — *kaṭhoraḥ* — "harsh, rough".

The word, taken apart — its roots and family

kaṭhora "hard, stiff, harsh" belongs with *kaṭhina* "hard" (CDIAL 2651), and CDIAL 2650, after EWA, groups both as perhaps borrowed from Dravidian, comparing Tamil *kaṭṭu* "hardness".

What you've built

One more word for this chapter.

Your turn

- *Say it: kaṭhoraḥ*
- *Say it: kaṭhoraḥ*, once more
- *Say it:* say *kaṭhoraḥ*
- *Recall:* say the Sanskrit for hot, then the Sanskrit for chilly, then say *kaṭhoraḥ* again

Before you move on

What does कठोरः mean? ("Harsh, rough".) Say it once more.

Chapter 156

Dear, Unpleasant, Calm, Fierce, Cruel

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say dear, unpleasant, calm, fierce and cruel.
>
> *Complete the last lesson of chapter 156: I can say dear, unpleasant, calm, fierce and cruel.*

156.1 प्रियः (priyaḥ) — dear, beloved

Before the new one: say the Sanskrit for chilly, then the Sanskrit for harsh.

You'll want to know: प्रियः

प्रियः — *priyaḥ* — "dear, beloved".

The word, taken apart — its roots and family

priya "dear, beloved" comes from the root √prī "please, love" (CDIAL 8974), inherited from Indo-European: Gothic *frijōnds* and Old English *frēond*, the ancestor of *friend*, are its cousins (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: priyaḥ*
- *Say it: priyaḥ*, once more
- *Say it:* say *priyaḥ*
- *Recall:* say the Sanskrit for chilly, then the Sanskrit for harsh, then say *priyaḥ* again

Before you move on

What does प्रियः mean? ("Dear, beloved".) Say it once more.

156.2 अप्रियः (apriyaḥ) — unpleasant

Before the new one: say the Sanskrit for harsh, then the Sanskrit for dear.

You'll want to know: अप्रियः

अप्रियः — *apriyaḥ* — "unpleasant".

The word, taken apart — its roots and family

apriya is built from *a-* "not" and *priya* "dear, liked" (MW; CDIAL 501a): "disliked, disagreeable". The *a-* is the same Indo-European negative as the *un-* of English *unpleasant*.

What you've built

One more word for this chapter.

Your turn

- *Say it: apriyaḥ*
- *Say it: apriyaḥ*, once more
- *Say it:* say *apriyaḥ*
- *Recall:* say the Sanskrit for harsh, then the Sanskrit for dear, then say *apriyaḥ* again

Before you move on

What does अप्रियः mean? ("Unpleasant".) Say it once more.

156.3 शान्तः (śāntaḥ) — calm, quiet

Before the new one: say the Sanskrit for dear, then the Sanskrit for unpleasant.

You'll want to know: शान्तः

शान्तः — *śāntaḥ* — "calm, quiet".

The word, taken apart — its roots and family

śānta is the past participle of the root √śam "become quiet, be calm" (MW; CDIAL 12390): "appeased, calm". *śānti* "peace" comes from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: śāntaḥ*
- *Say it: śāntaḥ*, once more
- *Say it:* say *śāntaḥ*
- *Recall:* say the Sanskrit for dear, then the Sanskrit for unpleasant, then say *śāntaḥ* again

Before you move on

What does शान्तः mean? ("Calm, quiet".) Say it once more.

156.4 चण्डः (caṇḍaḥ) — fierce

Before the new one: say the Sanskrit for unpleasant, then the Sanskrit for calm.

You'll want to know: चण्डः

चण्डः — *caṇḍaḥ* — "fierce".

The word, taken apart — its roots and family

caṇḍa "fierce, violent, passionate" is perhaps from *candra* "glowing, bright", glowing with passion, as MW and CDIAL 4584 both suggest, but neither is sure, so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: caṇḍaḥ*
- *Say it: caṇḍaḥ*, once more
- *Say it:* say *caṇḍaḥ*
- *Recall:* say the Sanskrit for unpleasant, then the Sanskrit for calm, then say *caṇḍaḥ* again

Before you move on

What does चण्डः mean? ("Fierce".) Say it once more.

156.5 क्रूरः (krūraḥ) — cruel

Before the new one: say the Sanskrit for calm, then the Sanskrit for fierce.

You'll want to know: क्रूरः

क्रूरः — *krūraḥ* — "cruel".

The word, taken apart — its roots and family

krūra "bloody, cruel" is built on *kravis* "raw flesh" (MW; CDIAL 3602): first "wounded, sore", then "cruel". MW sets *kravis* beside Greek *kreas* "flesh" and Latin *cruor* "blood", the family of English *cruel* and *crude*.

What you've built

One more word for this chapter.

Your turn

- *Say it: krūraḥ*
- *Say it: krūraḥ*, once more
- *Say it:* say *krūraḥ*
- *Recall:* say the Sanskrit for calm, then the Sanskrit for fierce, then say *krūraḥ* again

Before you move on

What does क्रूरः mean? ("Cruel".) Say it once more.

Chapter 157

Angry, Afraid, Startled, Tired, Hungry

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say angry, afraid, startled, tired and hungry.
>
> *Complete the last lesson of chapter 157: I can say angry, afraid, startled, tired and hungry.*

157.1 कुपितः (kupitaḥ) — angry

Before the new one: say the Sanskrit for fierce, then the Sanskrit for cruel.

You'll want to know: कुपितः

कुपितः — *kupitaḥ* — "angry".

The word, taken apart — its roots and family

kupita is the past participle of the root √kup "be agitated, be angry" (MW): "provoked, angry". MW compares √kup with Latin *cupio* "desire", but the link is old and not secure.

What you've built

One more word for this chapter.

Your turn

- *Say it: kupitaḥ*
- *Say it: kupitaḥ*, once more
- *Say it:* say *kupitaḥ*
- *Recall:* say the Sanskrit for fierce, then the Sanskrit for cruel, then say *kupitaḥ* again

Before you move on

What does कुपितः mean? ("Angry".) Say it once more.

157.2 भीतः (bhītaḥ) — afraid

Before the new one: say the Sanskrit for cruel, then the Sanskrit for angry.

You'll want to know: भीतः

भीतः — *bhītaḥ* — "afraid".

The word, taken apart — its roots and family

bhīta is the past participle of the root √bhī "fear" (CDIAL 9511): "frightened, afraid". *bibheti* "is afraid" and *bhaya* "fear" come from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: bhītaḥ*
- *Say it: bhītaḥ*, once more
- *Say it:* say *bhītaḥ*
- *Recall:* say the Sanskrit for cruel, then the Sanskrit for angry, then say *bhītaḥ* again

Before you move on

What does भीतः mean? ("Afraid".) Say it once more.

157.3 चकितः (cakitaḥ) — startled, surprised

Before the new one: say the Sanskrit for angry, then the Sanskrit for afraid.

You'll want to know: चकितः

चकितः — *cakitaḥ* — "startled, surprised".

The word, taken apart — its roots and family

cakita "trembling, timid, startled" is filed by MW under the root √cak, which the grammarians gloss in unrelated ways, so its origin is uncertain. It is a word of classical poetry, in the *Meghadūta* and the *Raghuvaṃśa*.

What you've built

One more word for this chapter.

Your turn

- *Say it: cakitaḥ*
- *Say it: cakitaḥ*, once more
- *Say it:* say *cakitaḥ*
- *Recall:* say the Sanskrit for angry, then the Sanskrit for afraid, then say *cakitaḥ* again

Before you move on

What does चकितः mean? ("Startled, surprised".) Say it once more.

157.4 श्रान्तः (śrāntaḥ) — tired

Before the new one: say the Sanskrit for afraid, then the Sanskrit for startled.

You'll want to know: श्रान्तः

श्रान्तः — *śrāntaḥ* — "tired".

The word, taken apart — its roots and family

śrānta is the past participle of the root √śram "toil, grow tired" (CDIAL 12692): "wearied, tired", already in the Rigveda. *śrāmyati* "gets tired" is the present of the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: śrāntaḥ*
- *Say it: śrāntaḥ*, once more
- *Say it:* say *śrāntaḥ*
- *Recall:* say the Sanskrit for afraid, then the Sanskrit for startled, then say *śrāntaḥ* again

Before you move on

What does श्रान्तः mean? ("Tired".) Say it once more.

157.5 क्षुधितः (kṣudhitaḥ) — hungry

Before the new one: say the Sanskrit for startled, then the Sanskrit for tired.

You'll want to know: क्षुधितः

क्षुधितः — *kṣudhitaḥ* — "hungry".

The word, taken apart — its roots and family

kṣudhita is built from the root √kṣudh "be hungry" and its noun *kṣudh* "hunger" (MW): "hungered, hungry", a form Pāṇini's grammar discusses. *kṣudhā* "hunger" belongs to the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: kṣudhitaḥ*
- *Say it: kṣudhitaḥ*, once more
- *Say it:* say *kṣudhitaḥ*
- *Recall:* say the Sanskrit for startled, then the Sanskrit for tired, then say *kṣudhitaḥ* again

Before you move on

What does क्षुधितः mean? ("Hungry".) Say it once more.

Chapter 158

Pen, Ink, Slate, Small lamp, Door panel

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a pen, ink, a slate, a small lamp and a door panel.
>
> *Complete the last lesson of chapter 158: I can say a pen, ink, a slate, a small lamp and a door panel.*

158.1 लेखनी (lekhanī) — a pen

Before the new one: say the Sanskrit for tired, then the Sanskrit for hungry.

You'll want to know: लेखनी

लेखनी — *lekhanī* — "a pen".

The word, taken apart — its roots and family

lekhanī is built from the root √likh "scratch, write" with the instrument suffix -*anī*: "the writing tool", a reed-pen or brush (MW). *lekha* "a writing, a letter" comes from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: lekhanī*
- *Say it: lekhanī*, once more
- *Say it:* say *lekhanī*
- *Recall:* say the Sanskrit for tired, then the Sanskrit for hungry, then say *lekhanī* again

Before you move on

What does लेखनी mean? ("A pen".) Say it once more.

158.2 मसी (masī) — ink

Before the new one: say the Sanskrit for hungry, then the Sanskrit for a pen.

You'll want to know: मसी

मसी — *masī* — "ink".

The word, taken apart — its roots and family

masī, which MW writes *maṣī*, means "black powder, lampblack, ink". CDIAL 9920 takes it as borrowed from Dravidian, comparing Tamil *mai* "ink, lampblack" (DEDR 5101).

What you've built

One more word for this chapter.

Your turn

- *Say it: masī*
- *Say it: masī*, once more
- *Say it:* say *masī*
- *Recall:* say the Sanskrit for hungry, then the Sanskrit for a pen, then say *masī* again

Before you move on

What does मसी mean? ("Ink".) Say it once more.

158.3 पट्टिका (paṭṭikā) — a slate, a tablet

Before the new one: say the Sanskrit for a pen, then the Sanskrit for ink.

You'll want to know: पट्टिका

पट्टिका — *paṭṭikā* — "a slate, a tablet".

The word, taken apart — its roots and family

paṭṭikā is the feminine small form of *paṭṭa* "a slab, a tablet for writing on" (MW; CDIAL 7699). CDIAL calls the derivation of *paṭṭa* from *pattra* "leaf" very doubtful, so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: paṭṭikā*
- *Say it: paṭṭikā*, once more
- *Say it:* say *paṭṭikā*
- *Recall:* say the Sanskrit for a pen, then the Sanskrit for ink, then say *paṭṭikā* again

Before you move on

What does पट्टिका mean? ("A slate, a tablet".) Say it once more.

158.4 दीपिका (dīpikā) — a small lamp

Before the new one: say the Sanskrit for ink, then the Sanskrit for a slate.

You'll want to know: दीपिका

दीपिका — *dīpikā* — "a small lamp".

The word, taken apart — its roots and family

dīpikā is *dīpa* "a lamp", from the root √dīp "blaze, shine" (MW), with the small-thing suffix *-ikā*: "a little lamp". *dīpa* lives on as Hindi *dīyā* "lamp" (CDIAL 6348).

What you've built

One more word for this chapter.

Your turn

- *Say it: dīpikā*
- *Say it: dīpikā*, once more
- *Say it:* say *dīpikā*
- *Recall:* say the Sanskrit for ink, then the Sanskrit for a slate, then say *dīpikā* again

Before you move on

What does दीपिका mean? ("A small lamp".) Say it once more.

158.5 कपाटम् (kapāṭam) — a door panel, a shutter

Before the new one: say the Sanskrit for a slate, then the Sanskrit for a small lamp.

You'll want to know: कपाटम्

कपाटम् — *kapāṭam* — "a door panel, a shutter".

The word, taken apart — its roots and family

kapāṭa, also *kavāṭa*, "the leaf or panel of a door" is perhaps borrowed from Dravidian, as CDIAL 2963 reports after EWA. It lives on as Marathi *kavāḍ* "door" and Punjabi *kavāṛ* (CDIAL 2963).

What you've built

One more word for this chapter.

Your turn

- *Say it: kapāṭam*
- *Say it: kapāṭam*, once more
- *Say it:* say *kapāṭam*
- *Recall:* say the Sanskrit for a slate, then the Sanskrit for a small lamp, then say *kapāṭam* again

Before you move on

What does कपाटम् mean? ("A door panel, a shutter".) Say it once more.

158.6 Words from chapters 150-153 — a first pass

Say the words for a small lamp and a door panel.

Your turn

Say these aloud:

- a remedy, a wound, a swelling, vomiting, a stomach ache
- enthusiasm, courage, laziness, jealousy, pride
- a period, a turn, a lunar day, a calendar date, a century
- from here, from there, on both sides, all around, on all sides

Before you move on

A remedy? (भेषजम्, *bheṣajam.*) A wound? (व्रणः, *vraṇaḥ.*) A swelling? (शोथः, *śothaḥ.*) Vomiting? (वमनम्, *vamanam.*) A stomach ache? (उदरपीडा, *udarapīḍā.*) Enthusiasm? (उत्साहः, *utsāhaḥ.*) Courage? (धैर्यम्, *dhairyam.*) Laziness? (आलस्यम्, *ālasyam.*) Jealousy?

Chapter 159

Cumin, Mustard, Asafoetida, Sesame, Chickpea

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say cumin, mustard, asafoetida, sesame and a chickpea.
>
> *Complete the last lesson of chapter 159: I can say cumin, mustard, asafoetida, sesame and a chickpea.*

159.1 जीरकम् (jīrakam) — cumin

Before the new one: say the Sanskrit for a small lamp, then the Sanskrit for a door panel, a shutter.

You'll want to know: जीरकम्

जीरकम् — *jīrakam* — "cumin".

The word, taken apart — its roots and family

jīraka "cumin seed" is a word of the medical writer Suśruta, and neither MW nor CDIAL 5234 gives a derivation, so its origin is uncertain. It lives on as Hindi and Bengali *jīrā* and Gujarati *jīrũ* "cumin" (CDIAL 5234).

What you've built

One more word for this chapter.

Your turn

- *Say it: jīrakam*
- *Say it: jīrakam*, once more
- *Say it:* say *jīrakam*
- *Recall:* say the Sanskrit for a small lamp, then the Sanskrit for a door panel, a shutter, then say *jīrakam* again

Before you move on

What does जीरकम् mean? ("Cumin".) Say it once more.

159.2 सर्षपः (sarṣapaḥ) — mustard

Before the new one: say the Sanskrit for a door panel, a shutter, then the Sanskrit for cumin.

You'll want to know: सर्षपः

सर्षपः — *sarṣapaḥ* — "mustard".

The word, taken apart — its roots and family

sarṣapa "mustard, mustard seed" goes back to the Ṣaḍviṃśa Brāhmaṇa (CDIAL 13281). Its origin is uncertain: DEDR 921, citing Burrow and Mayrhofer, discusses a possible link with Dravidian words for mustard.

What you've built

One more word for this chapter.

Your turn

- *Say it: sarṣapaḥ*
- *Say it: sarṣapaḥ*, once more
- *Say it:* say *sarṣapaḥ*
- *Recall:* say the Sanskrit for a door panel, a shutter, then the Sanskrit for cumin, then say *sarṣapaḥ* again

Before you move on

What does सर्षपः mean? ("Mustard".) Say it once more.

159.3 हिंगु (hiṅgu) — asafoetida

Before the new one: say the Sanskrit for cumin, then the Sanskrit for mustard.

You'll want to know: हिंगु

हिंगु — *hiṅgu* — "asafoetida".

The word, taken apart — its roots and family

hiṅgu "asafoetida" appears from the Mahābhārata on. EtymDB lists it as borrowed from Iranian, but neither MW nor CDIAL 14079 gives a derivation, so its origin is not settled. It lives on as Punjabi *hiṅg* and Hindi *hīṅg* (CDIAL 14079).

What you've built

One more word for this chapter.

Your turn

- *Say it: hiṅgu*
- *Say it: hiṅgu*, once more
- *Say it:* say *hiṅgu*
- *Recall:* say the Sanskrit for cumin, then the Sanskrit for mustard, then say *hiṅgu* again

Before you move on

What does हिंगु mean? ("Asafoetida".) Say it once more.

159.4 तिलः (tilaḥ) — sesame

Before the new one: say the Sanskrit for mustard, then the Sanskrit for asafoetida.

You'll want to know: तिलः

तिलः — *tilaḥ* — "sesame".

The word, taken apart — its roots and family

tila "sesame" is old, in the Atharvaveda, and is probably borrowed from Munda: CDIAL 5827 follows Kuiper and thinks a Dravidian source less likely. It lives on as Hindi and Punjabi *til* (CDIAL 5827).

What you've built

One more word for this chapter.

Your turn

- *Say it: tilaḥ*
- *Say it: tilaḥ*, once more
- *Say it:* say *tilaḥ*
- *Recall:* say the Sanskrit for mustard, then the Sanskrit for asafoetida, then say *tilaḥ* again

Before you move on

What does तिलः mean? ("Sesame".) Say it once more.

159.5 चणकः (caṇakaḥ) — a chickpea

Before the new one: say the Sanskrit for asafoetida, then the Sanskrit for sesame.

You'll want to know: चणकः

चणकः — *caṇakaḥ* — "a chickpea".

The word, taken apart — its roots and family

caṇaka is *caṇa* "the chickpea" with the suffix *-ka* (CDIAL 4579). Neither MW nor CDIAL gives a derivation for *caṇa*, so its origin is uncertain. It lives on as Hindi and Punjabi *canā*, *caṇā* (CDIAL 4579).

What you've built

One more word for this chapter.

Your turn

- *Say it: caṇakaḥ*
- *Say it: caṇakaḥ*, once more
- *Say it:* say *caṇakaḥ*
- *Recall:* say the Sanskrit for asafoetida, then the Sanskrit for sesame, then say *caṇakaḥ* again

Before you move on

What does चणकः mean? ("A chickpea".) Say it once more.

Chapter 160

Meal, Curry, Food, Eating, Small pitcher

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a meal, a curry, food, eating and a small pitcher.
>
> *Complete the last lesson of chapter 160: I can say a meal, a curry, food, eating and a small pitcher.*

160.1 भोजनम् (bhojanam) — a meal, food

Before the new one: say the Sanskrit for sesame, then the Sanskrit for a chickpea.

You'll want to know: भोजनम्

भोजनम् — *bhojanam* — "a meal, food".

The word, taken apart — its roots and family

bhojana comes from the root √bhuj "enjoy, eat" (CDIAL 9630): "eating", and so "a meal, food", already in the Rigveda. MW compares √bhuj with Latin *fungor* "perform, enjoy".

What you've built

One more word for this chapter.

Your turn

- *Say it: bhojanam*
- *Say it: bhojanam*, once more
- *Say it:* say *bhojanam*
- *Recall:* say the Sanskrit for sesame, then the Sanskrit for a chickpea, then say *bhojanam* again

Before you move on

What does भोजनम् mean? ("A meal, food".) Say it once more.

160.2 व्यञ्जनम् (vyañjanam) — a curry, a side dish

Before the new one: say the Sanskrit for a chickpea, then the Sanskrit for a meal.

You'll want to know: व्यञ्जनम्

व्यञ्जनम् — *vyañjanam* — "a curry, a side dish".

The word, taken apart — its roots and family

vyañjana comes from *vi-√añj* "anoint, adorn, make appear", the root √añj "anoint" (CDIAL 12160): "decoration, sign", and in grammar "a consonant". MW also gives "seasoning, sauce, condiment", the sense behind a curry or side dish.

What you've built

One more word for this chapter.

Your turn

- *Say it: vyañjanam*
- *Say it: vyañjanam*, once more
- *Say it:* say *vyañjanam*

- *Recall:* say the Sanskrit for a chickpea, then the Sanskrit for a meal, then say *vyañjanam* again

Before you move on

What does व्यञ्जनम् mean? ("A curry, a side dish".) Say it once more.

160.3 आहारः (āhāraḥ) — food, diet

Before the new one: say the Sanskrit for a meal, then the Sanskrit for a curry.

You'll want to know: आहारः

आहारः — *āhāraḥ* — "food, diet".

The word, taken apart — its roots and family

āhāra comes from *ā-√hṛ* "bring near, fetch", the root √hṛ "carry" with *ā* "toward" (CDIAL 1544): first "fetching", then "taking food", and so "food, diet".

What you've built

One more word for this chapter.

Your turn

- *Say it: āhāraḥ*
- *Say it: āhāraḥ*, once more
- *Say it:* say *āhāraḥ*
- *Recall:* say the Sanskrit for a meal, then the Sanskrit for a curry, then say *āhāraḥ* again

Before you move on

What does आहारः mean? ("Food, diet".) Say it once more.

160.4 अशनम् (aśanam) — eating, a meal

Before the new one: say the Sanskrit for a curry, then the Sanskrit for food.

You'll want to know: अशनम्

अशनम् — *aśanam* — "eating, a meal".

The word, taken apart — its roots and family

aśana comes from the root √aś "eat, consume" (MW's second √aś; CDIAL 909): "eating, food", already in the Śatapatha Brāhmaṇa. It is not the same word as *āsana* "seat", from √ās "sit".

What you've built

One more word for this chapter.

Your turn

- *Say it: aśanam*
- *Say it: aśanam*, once more
- *Say it:* say *aśanam*
- *Recall:* say the Sanskrit for a curry, then the Sanskrit for food, then say *aśanam* again

Before you move on

What does अशनम् mean? ("Eating, a meal".) Say it once more.

160.5 कलशी (kalaśī) — a small pitcher

Before the new one: say the Sanskrit for food, then the Sanskrit for eating.

You'll want to know: कलशी

कलशी — *kalaśī* — "a small pitcher".

The word, taken apart — its roots and family

kalaśī is the feminine of *kalaśa* "a water-pot, a jar", already in the Rigveda (CDIAL 2920). MW compares Latin *calix* "cup", and *kalaśa* lives on as Hindi *kalsā* and *kalsī* "small pot" (CDIAL 2920).

What you've built

One more word for this chapter.

Your turn

- *Say it: kalaśī*
- *Say it: kalaśī*, once more
- *Say it:* say *kalaśī*
- *Recall:* say the Sanskrit for food, then the Sanskrit for eating, then say *kalaśī* again

Before you move on

What does कलशी mean? ("A small pitcher".) Say it once more.

Chapter 161

Conch, Flute, Mridanga drum, Anklet, Earring

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a conch, a flute, a mridanga drum, an anklet and an earring.
>
> *Complete the last lesson of chapter 161: I can say a conch, a flute, a mridanga drum, an anklet and an earring.*

161.1 शंखः (śaṅkhaḥ) — a conch

Before the new one: say the Sanskrit for eating, then the Sanskrit for a small pitcher.

You'll want to know: शंखः

शंखः — *śaṅkhaḥ* — "a conch".

The word, taken apart — its roots and family

śaṅkha "a conch-shell" is old, in the Atharvaveda, and is inherited from Indo-European: MW sets it beside Greek *konchē* and Latin *concha* "shell", and EtymDB agrees. It lives on as Hindi *saṅkh* "conch" (CDIAL 12263).

What you've built

One more word for this chapter.

Your turn

- *Say it: śaṅkhaḥ*
- *Say it: śaṅkhaḥ*, once more
- *Say it:* say *śaṅkhaḥ*
- *Recall:* say the Sanskrit for eating, then the Sanskrit for a small pitcher, then say *śaṅkhaḥ* again

Before you move on

What does शंखः mean? ("A conch".) Say it once more.

161.2 वेणुः (veṇuḥ) — a flute

Before the new one: say the Sanskrit for a small pitcher, then the Sanskrit for a conch.

You'll want to know: वेणुः

वेणुः — *veṇuḥ* — "a flute".

The word, taken apart — its roots and family

veṇu first meant "a bamboo, a reed" in the Rigveda and later "a flute" (MW). MW thinks it probably comes from the root √ve "weave", but CDIAL 12096 finds its connections unclear, so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: veṇuḥ*
- *Say it: veṇuḥ*, once more
- *Say it:* say *veṇuḥ*
- *Recall:* say the Sanskrit for a small pitcher, then the Sanskrit for a conch, then say *veṇuḥ* again

Before you move on

What does वेणुः mean? ("A flute".) Say it once more.

161.3 मृदंगः (mṛdaṅgaḥ) — a mridanga drum

Before the new one: say the Sanskrit for a conch, then the Sanskrit for a flute.

You'll want to know: मृदंगः

मृदंगः — *mṛdaṅgaḥ* — "a mridanga drum".

The word, taken apart — its roots and family

MW explains *mṛdaṅga* "a drum" as probably *mṛdam* + *-ga*, "going about while being beaten", from the root √mṛd "press, beat". CDIAL 10289 compares *mardala*, another drum, so the formation is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: mṛdaṅgaḥ*
- *Say it: mṛdaṅgaḥ*, once more
- *Say it:* say *mṛdaṅgaḥ*
- *Recall:* say the Sanskrit for a conch, then the Sanskrit for a flute, then say *mṛdaṅgaḥ* again

Before you move on

What does मृदंगः mean? ("A mridanga drum".) Say it once more.

161.4 नूपुरम् (nūpuram) — an anklet

Before the new one: say the Sanskrit for a flute, then the Sanskrit for a mridanga drum.

You'll want to know: नूपुरम्

नूपुरम् — *nūpuram* — "an anklet".

The word, taken apart — its roots and family

nūpura "an anklet" has an uncertain origin: CDIAL 7577 reports both a Middle Indic form reshaped after *keyūra* "armlet" and Kuiper's non-Aryan account, comparing Santali *lipur*. It lives on as Hindi and Punjabi *neur* "anklet" (CDIAL 7577).

What you've built

One more word for this chapter.

Your turn

- *Say it: nūpuram*
- *Say it: nūpuram*, once more
- *Say it:* say *nūpuram*
- *Recall:* say the Sanskrit for a flute, then the Sanskrit for a mridanga drum, then say *nūpuram* again

Before you move on

What does नूपुरम् mean? ("An anklet".) Say it once more.

161.5 कुण्डलम् (kuṇḍalam) — an earring

Before the new one: say the Sanskrit for a mridanga drum, then the Sanskrit for an anklet.

You'll want to know: कुण्डलम्

कुण्डलम् — *kuṇḍalam* — "an earring".

The word, taken apart — its roots and family

kuṇḍala "a ring, an earring" is taken to be borrowed from Dravidian, after Burrow (CDIAL 3268; EWA). It lives on as Punjabi *kuṇḍal* "coil,

earring" (CDIAL 3268).

What you've built

One more word for this chapter.

Your turn

- *Say it: kuṇḍalam*
- *Say it: kuṇḍalam*, once more
- *Say it:* say *kuṇḍalam*
- *Recall:* say the Sanskrit for a mridanga drum, then the Sanskrit for an anklet, then say *kuṇḍalam* again

Before you move on

What does कुण्डलम् mean? ("An earring".) Say it once more.

Chapter 162

Wages, Debt, Profit, Loss, Trade

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say wages, a debt, profit, loss and trade.
>
> *Complete the last lesson of chapter 162: I can say wages, a debt, profit, loss and trade.*

162.1 वेतनम् (vetanam) — wages, salary

Before the new one: say the Sanskrit for an anklet, then the Sanskrit for an earring.

You'll want to know: वेतनम्

वेतनम् — *vetanam* — "wages, salary".

The word, taken apart — its roots and family

vetana "wages, hire, salary" appears from Manu on. The grammarians derive it from √vī, while MW thinks it rather belongs with √vṛt "turn" and *vartana* "livelihood", so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: vetanam*
- *Say it: vetanam*, once more
- *Say it:* say *vetanam*
- *Recall:* say the Sanskrit for an anklet, then the Sanskrit for an earring, then say *vetanam* again

Before you move on

What does वेतनम् mean? ("Wages, salary".) Say it once more.

162.2 ऋणम् (ṛṇam) — a debt

Before the new one: say the Sanskrit for an earring, then the Sanskrit for wages.

You'll want to know: ऋणम्

ऋणम् — *ṛṇam* — "a debt".

The word, taken apart — its roots and family

ṛṇa "a debt" is old, in the Rigveda, and is inherited from Indo-Iranian, with an Avestan cousin (EtymDB); MW compares Latin *reus* "liable". It lives on as Hindi and Punjabi *rin* "debt" (CDIAL 2451).

What you've built

One more word for this chapter.

Your turn

- *Say it: ṛṇam*
- *Say it: ṛṇam*, once more

162.3 लाभः (lābhaḥ) — profit, gain

Before the new one: say the Sanskrit for wages, then the Sanskrit for a debt.

You'll want to know: लाभः

लाभः — *lābhaḥ* — "profit, gain".

The word, taken apart — its roots and family

lābha comes from the root √labh "take, obtain" (CDIAL 11018): "finding, getting", and so "profit". MW compares √labh with Greek *lambanō* "take", and *labhate* "gets" is its present.

What you've built

One more word for this chapter.

Your turn

- *Say it: lābhaḥ*
- *Say it: lābhaḥ*, once more
- *Say it:* say *lābhaḥ*
- *Recall:* say the Sanskrit for wages, then the Sanskrit for a debt, then say *lābhaḥ* again

Before you move on

What does लाभः mean? ("Profit, gain".) Say it once more.

162.4 हानिः (hāniḥ) — loss

Before the new one: say the Sanskrit for a debt, then the Sanskrit for profit.

You'll want to know: हानिः

हानिः — *hāniḥ* — "loss".

The word, taken apart — its roots and family

hāni "abandonment, decrease, loss" is filed by MW under the root √hā "leave, abandon", noting that some derive it from √han "strike", so the root is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: hāniḥ*
- *Say it: hāniḥ*, once more
- *Say it:* say *hāniḥ*
- *Recall:* say the Sanskrit for a debt, then the Sanskrit for profit, then say *hāniḥ* again

Before you move on

What does हानिः mean? ("Loss".) Say it once more.

162.5 व्यापारः (vyāpāraḥ) — trade, business

Before the new one: say the Sanskrit for profit, then the Sanskrit for loss.

You'll want to know: व्यापारः

व्यापारः — *vyāpāraḥ* — "trade, business".

The word, taken apart — its roots and family

vyāpāra comes from *vi-ā-√pṛ* "be busy, be occupied", the root √pṛ with *vi* and *ā* (MW; CDIAL 12205): "occupation, business", and so "trade". It lives on as Marathi *vāvar* "business, activity" (CDIAL 12205).

What you've built

One more word for this chapter.

Your turn

- *Say it: vyāpāraḥ*
- *Say it: vyāpāraḥ*, once more

163.1 क्रीडा (krīḍā) — sport, play

Before the new one: say the Sanskrit for loss, then the Sanskrit for trade.

You'll want to know: क्रीडा

क्रीडा — *krīḍā* — "sport, play".

The word, taken apart — its roots and family

krīḍā comes from the root √krīḍ "play, sport, frolic" (MW), already in the Rigveda. *krīḍanaka* "a toy" comes from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: krīḍā*

163.3 उत्सवः (utsavaḥ) — a festival

Before the new one: say the Sanskrit for sport, then the Sanskrit for gambling.

You'll want to know: उत्सवः

उत्सवः — *utsavaḥ* — "a festival".

The word, taken apart — its roots and family

utsava comes from *ud-√sū* "set going, stir up", the root √sū "impel" with *ud* "up" (MW; CDIAL 1876): in the Rigveda it means "an enterprise, a beginning", and later "a festival".

What you've built

One more word for this chapter.

Your turn

- *Say it: utsavaḥ*
- *Say it: utsavaḥ*, once more
- *Say it:* say *utsavaḥ*

Before you move on

What does धूमः mean? ("Smoke".) Say it once more.

165.3 ज्वाला (jvālā) — a flame

Before the new one: say the Sanskrit for dust, then the Sanskrit for smoke.

You'll want to know: ज्वाला

ज्वाला — *jvālā* — "a flame".

The word, taken apart — its roots and family

jvālā comes from the root √jval "blaze, glow, burn brightly" (MW): "a flame, a blaze". *jvalati* "burns" is the verb of the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: jvālā*
- *Say it: jvālā*, once more
- *Say it:* say *jvālā*
- *Recall:* say the Sanskrit for dust, then the Sanskrit for smoke, then say *jvālā* again

Before you move on

What does ज्वाला mean? ("A flame".) Say it once more.

165.4 अंगारः (aṅgāraḥ) — a live coal

Before the new one: say the Sanskrit for smoke, then the Sanskrit for a flame.

You'll want to know: अंगारः

अंगारः — *aṅgāraḥ* — "a live coal".

The word, taken apart — its roots and family

aṅgāra "charcoal, a live coal" is old, in the Rigveda, and is inherited from Indo-European: MW sets it beside Lithuanian *anglis* and Russian *ugol'* "coal", and EtymDB agrees. It lives on as Hindi *aṅgār*, *aṅgārā* "glowing charcoal" (CDIAL 125).

What you've built

One more word for this chapter.

Your turn

- *Say it: aṅgāraḥ*
- *Say it: aṅgāraḥ*, once more
- *Say it:* say *aṅgāraḥ*
- *Recall:* say the Sanskrit for smoke, then the Sanskrit for a flame, then say *aṅgāraḥ* again

Before you move on

What does अंगारः mean? ("A live coal".) Say it once more.

165.5 लौहम् (lauham) — iron

Before the new one: say the Sanskrit for a flame, then the Sanskrit for a live coal.

You'll want to know: लौहम्

लौहम् — *lauham* — "iron".

The word, taken apart — its roots and family

lauha is built from *loha* "red; copper; iron" with the first vowel strengthened (CDIAL 11172a): "made of metal", and so "iron". MW connects *loha* with a lost root meaning "be red", and CDIAL 11158 does too; *loha* lives on as Hindi *lohā* "iron".

What you've built

One more word for this chapter.

Your turn

- *Say it: lauham*
- *Say it: lauham*, once more
- *Say it:* say *lauham*
- *Recall:* say the Sanskrit for a flame, then the Sanskrit for a live coal, then say *lauham* again

Before you move on

What does लौहम् mean? ("Iron".) Say it once more.

Chapter 166

Sacred fig tree, Neem tree, Mango tree, Banyan tree, Palm tree

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a sacred fig tree, a neem tree, a mango tree, a banyan tree and a palm tree.
>
> *Complete the last lesson of chapter 166: I can say a sacred fig tree, a neem tree, a mango tree, a banyan tree and a palm tree.*

166.1 अश्वत्थः (aśvatthaḥ) — a sacred fig tree

Before the new one: say the Sanskrit for a live coal, then the Sanskrit for iron.

You'll want to know: अश्वत्थः

अश्वत्थः — *aśvatthaḥ* — "a sacred fig tree".

The word, taken apart — its roots and family

aśvattha "the sacred fig tree" has a disputed origin: MW reads it as *aśva* "horse" + *-stha* "standing", "the tree horses stand under", but CDIAL 922 reports Mayrhofer's view that it is non-Aryan and unconnected with *aśva*. It is old, in the Atharvaveda.

What you've built

One more word for this chapter.

Your turn

- *Say it: aśvatthaḥ*
- *Say it: aśvatthaḥ*, once more
- *Say it:* say *aśvatthaḥ*
- *Recall:* say the Sanskrit for a live coal, then the Sanskrit for iron, then say *aśvatthaḥ* again

Before you move on

What does अश्वत्थः mean? ("A sacred fig tree".) Say it once more.

166.2 निम्बः (nimbaḥ) — a neem tree

Before the new one: say the Sanskrit for iron, then the Sanskrit for a sacred fig tree.

You'll want to know: निम्बः

निम्बः — *nimbaḥ* — "a neem tree".

The word, taken apart — its roots and family

nimba "the neem tree" appears in the ritual manuals, and neither MW nor CDIAL 7245 gives a derivation, so its origin is uncertain. It lives on as Hindi *nīm* and Punjabi *nimb* (CDIAL 7245).

What you've built

One more word for this chapter.

Your turn

- *Say it: nimbaḥ*
- *Say it: nimbaḥ*, once more
- *Say it:* say *nimbaḥ*
- *Recall:* say the Sanskrit for iron, then the Sanskrit for a sacred fig tree, then say *nimbaḥ* again

Before you move on

What does निम्बः mean? ("A neem tree".) Say it once more.

166.3 आम्रवृक्षः (āmravṛkṣaḥ) — a mango tree

Before the new one: say the Sanskrit for a sacred fig tree, then the Sanskrit for a neem tree.

You'll want to know: आम्रवृक्षः

आम्रवृक्षः — *āmravṛkṣaḥ* — "a mango tree".

The word, taken apart — its roots and family

āmravṛkṣa is built from *āmra* "mango" and *vṛkṣa* "tree" (MW). Neither MW nor CDIAL gives a derivation for *āmra*, so its origin is uncertain; it lives on as Hindi *ām* "mango" (CDIAL 1268).

What you've built

One more word for this chapter.

Your turn

- *Say it: āmravṛkṣaḥ*
- *Say it: āmravṛkṣaḥ*, once more
- *Say it:* say *āmravṛkṣaḥ*
- *Recall:* say the Sanskrit for a sacred fig tree, then the Sanskrit for a neem tree, then say *āmravṛkṣaḥ* again

Before you move on

What does आम्रवृक्षः mean? ("A mango tree".) Say it once more.

166.4 वटः (vaṭaḥ) — a banyan tree

Before the new one: say the Sanskrit for a neem tree, then the Sanskrit for a mango tree.

You'll want to know: वटः

वटः — *vaṭaḥ* — "a banyan tree".

The word, taken apart — its roots and family

vaṭa "the banyan" appears from the Mahābhārata on. MW thinks it perhaps a Prakrit form of *vṛta* "surrounded, covered", but marks that as a guess, so its origin is uncertain. It lives on as Hindi *baṛ* "banyan" (CDIAL 11211).

What you've built

One more word for this chapter.

Your turn

- *Say it: vaṭaḥ*
- *Say it: vaṭaḥ*, once more
- *Say it:* say *vaṭaḥ*
- *Recall:* say the Sanskrit for a neem tree, then the Sanskrit for a mango tree, then say *vaṭaḥ* again

Before you move on

What does वटः mean? ("A banyan tree".) Say it once more.

166.5 तालः (tālaḥ) — a palm tree

Before the new one: say the Sanskrit for a mango tree, then the Sanskrit for a banyan tree.

You'll want to know: तालः

तालः — *tālaḥ* — "a palm tree".

The word, taken apart — its roots and family

tāla "the palmyra, the fan-palm" appears from Manu on (CDIAL 5750). DEDR 3180 sets it beside Dravidian words for the palm, noting

that some of those may be borrowed from Indo-Aryan, so the direction is not settled. Punjabi kept it as *tāṛ* "fan-palm" (CDIAL 5750).

What you've built

One more word for this chapter.

Your turn

- *Say it: tālaḥ*
- *Say it: tālaḥ*, once more
- *Say it:* say *tālaḥ*
- *Recall:* say the Sanskrit for a mango tree, then the Sanskrit for a banyan tree, then say *tālaḥ* again

Before you move on

What does तालः mean? ("A palm tree".) Say it once more.

Chapter 167

Turtle, She-buffalo, Calf, She-goat, Mare

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a turtle, a she-buffalo, a calf, a she-goat and a mare.
>
> *Complete the last lesson of chapter 167: I can say a turtle, a she-buffalo, a calf, a she-goat and a mare.*

167.1 कच्छपः (kacchapaḥ) — a turtle

Before the new one: say the Sanskrit for a banyan tree, then the Sanskrit for a palm tree.

You'll want to know: कच्छपः

कच्छपः — *kacchapaḥ* — "a turtle".

The word, taken apart — its roots and family

MW reads *kacchapa* "a turtle" as *kaccha* "marsh" + *-pa* "keeping": "the one that keeps to the marsh". CDIAL 2619 thinks that a popular reshaping of the older *kaśyapa*, so its origin is disputed. It lives on as Hindi *kachuā* and Gujarati *kācbo* (CDIAL 2619).

What you've built

One more word for this chapter.

Your turn

- *Say it: kacchapaḥ*
- *Say it: kacchapaḥ*, once more
- *Say it:* say *kacchapaḥ*
- *Recall:* say the Sanskrit for a banyan tree, then the Sanskrit for a palm tree, then say *kacchapaḥ* again

Before you move on

What does कच्छपः mean? ("A turtle".) Say it once more.

167.2 महिषी (mahiṣī) — a she-buffalo

Before the new one: say the Sanskrit for a palm tree, then the Sanskrit for a turtle.

You'll want to know: महिषी

महिषी — *mahiṣī* — "a she-buffalo".

The word, taken apart — its roots and family

mahiṣī is the feminine of *mahiṣa* "great, mighty; buffalo" (CDIAL 9964): "the buffalo cow". In the Rigveda the same word also means "the king's chief wife", "the great one" (CDIAL 9972). It lives on as Hindi *bhaĩs* "buffalo" (CDIAL 9964).

What you've built

One more word for this chapter.

Your turn

- *Say it: mahiṣī*
- *Say it: mahiṣī*, once more
- *Say it:* say *mahiṣī*

- *Recall:* say the Sanskrit for a palm tree, then the Sanskrit for a turtle, then say *mahiṣī* again

Before you move on

What does महिषी mean? ("A she-buffalo".) Say it once more.

167.3 वत्सः (vatsaḥ) — a calf

Before the new one: say the Sanskrit for a turtle, then the Sanskrit for a she-buffalo.

You'll want to know: वत्सः

वत्सः — *vatsaḥ* — "a calf".

The word, taken apart — its roots and family

vatsa "a calf, a child" probably first meant "a yearling" (MW; CDIAL 11239). It is inherited from Indo-European, cousin of Greek *etos* "year" and Latin *vetus* "old", the source of English *veteran* (EtymDB). It lives on as Hindi *bachiyā* "calf" (CDIAL 11239).

What you've built

One more word for this chapter.

Your turn

- *Say it: vatsaḥ*
- *Say it: vatsaḥ*, once more
- *Say it:* say *vatsaḥ*
- *Recall:* say the Sanskrit for a turtle, then the Sanskrit for a she-buffalo, then say *vatsaḥ* again

Before you move on

What does वत्सः mean? ("A calf".) Say it once more.

167.4 अजा (ajā) — a she-goat

Before the new one: say the Sanskrit for a she-buffalo, then the Sanskrit for a calf.

You'll want to know: अजा

अजा — *ajā* — "a she-goat".

The word, taken apart — its roots and family

ajā is the feminine of *aja* "a goat" (MW). MW sets *aja* beside Greek *aix* "goat" and Lithuanian *ožys* "he-goat": an inherited Indo-European word.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ajā*
- *Say it:* *ajā*, once more
- *Say it:* say *ajā*
- *Recall:* say the Sanskrit for a she-buffalo, then the Sanskrit for a calf, then say *ajā* again

Before you move on

What does अजा mean? ("A she-goat".) Say it once more.

167.5 अश्वा (aśvā) — a mare

Before the new one: say the Sanskrit for a calf, then the Sanskrit for a she-goat.

You'll want to know: अश्वा

अश्वा — *aśvā* — "a mare".

The word, taken apart — its roots and family

aśvā is the feminine of *aśva* "horse". It is inherited from Indo-European: MW sets *aśva* beside Latin *equus* and Greek *hippos*, and EtymDB pairs *aśvā* with Latin *equa* "mare".

What you've built

One more word for this chapter.

Your turn

- *Say it: aśvā*
- *Say it: aśvā*, once more
- *Say it:* say *aśvā*
- *Recall:* say the Sanskrit for a calf, then the Sanskrit for a she-goat, then say *aśvā* again

Before you move on

What does अश्वा mean? ("A mare".) Say it once more.

167.6 Words from chapters 159-162 — a first pass

Say the words for a she-goat and a mare.

Your turn

Say these aloud:

Chapter 168

Class, Chapter, Syllable, Colour, Word

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a class, a chapter, a syllable, a colour and a word.
>
> *Complete the last lesson of chapter 168: I can say a class, a chapter, a syllable, a colour and a word.*

168.1 कक्षा (kakṣā) — a class, a classroom

Before the new one: say the Sanskrit for a she-goat, then the Sanskrit for a mare.

You'll want to know: कक्षा

कक्षा — *kakṣā* — "a class, a classroom".

The word, taken apart — its roots and family

kakṣā is built on *kakṣa* "hiding place, armpit", as its feminine; MW gives it as "a walled enclosure, a private room". Using it for a school class and its room is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: kakṣā*
- *Say it: kakṣā*, once more
- *Say it:* say *kakṣā*
- *Recall:* say the Sanskrit for a she-goat, then the Sanskrit for a mare, then say *kakṣā* again

Before you move on

What does कक्षा mean? ("A class, a classroom".) Say it once more.

168.2 अध्यायः (adhyāyaḥ) — a chapter

Before the new one: say the Sanskrit for a mare, then the Sanskrit for a class.

You'll want to know: अध्यायः

अध्यायः — *adhyāyaḥ* — "a chapter".

The word, taken apart — its roots and family

adhyāya comes from *adhi-√i* "go over, study", the root √i "go" with *adhi* "over" (MW; CDIAL 279): "reading", and then "a lesson, a chapter".

What you've built

One more word for this chapter.

Your turn

- *Say it: adhyāyaḥ*
- *Say it: adhyāyaḥ*, once more
- *Say it:* say *adhyāyaḥ*
- *Recall:* say the Sanskrit for a mare, then the Sanskrit for a class, then say *adhyāyaḥ* again

Before you move on

What does अध्यायः mean? ("A chapter".) Say it once more.

168.3 अक्षरम् (akṣaram) — a syllable, a letter

Before the new one: say the Sanskrit for a class, then the Sanskrit for a chapter.

You'll want to know: अक्षरम्

अक्षरम् — *akṣaram* — "a syllable, a letter".

The word, taken apart — its roots and family

akṣara is built from *a-* "not" and *kṣara* "perishing, melting away" (MW; CDIAL 38): "imperishable", and so "a syllable, a letter". It lives on as Hindi *ākhar* "letter" (CDIAL 38).

What you've built

One more word for this chapter.

Your turn

- *Say it: akṣaram*
- *Say it: akṣaram*, once more
- *Say it:* say *akṣaram*
- *Recall:* say the Sanskrit for a class, then the Sanskrit for a chapter, then say *akṣaram* again

Before you move on

What does अक्षरम् mean? ("A syllable, a letter".) Say it once more.

168.4 वर्णः (varṇaḥ) — a colour, a letter

Before the new one: say the Sanskrit for a chapter, then the Sanskrit for a syllable.

You'll want to know: वर्णः

वर्णः — *varṇaḥ* — "a colour, a letter".

The word, taken apart — its roots and family

varṇa probably comes from the root √vṛ "cover" (MW): "a covering", then "colour, appearance, class" (CDIAL 11338), and as a sound or written syllable "a letter" (CDIAL 11339).

What you've built

One more word for this chapter.

Your turn

- *Say it: varṇaḥ*
- *Say it: varṇaḥ*, once more
- *Say it:* say *varṇaḥ*
- *Recall:* say the Sanskrit for a chapter, then the Sanskrit for a syllable, then say *varṇaḥ* again

Before you move on

What does वर्णः mean? ("A colour, a letter".) Say it once more.

168.5 पदम् (padam) — a word

Before the new one: say the Sanskrit for a syllable, then the Sanskrit for a colour.

You'll want to know: पदम्

पदम् — *padam* — "a word".

The word, taken apart — its roots and family

pada first meant "a step, a footstep, a track" (CDIAL 7747), built on *pad* "foot", and then a step of speech, "a word". It is inherited from Indo-European, cousin of Greek *pedon* "ground" (EtymDB).

What you've built

One more word for this chapter.

Your turn

- *Say it: padam*
- *Say it: padam*, once more
- *Say it:* say *padam*
- *Recall:* say the Sanskrit for a syllable, then the Sanskrit for a colour, then say *padam* again

Before you move on

What does पदम् mean? ("A word".) Say it once more.

Chapter 169

Result, Mark, Row, Dictionary, Writing

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a result, a mark, a row, a dictionary and writing.
>
> *Complete the last lesson of chapter 169: I can say a result, a mark, a row, a dictionary and writing.*

169.1 परिणामः (pariṇāmaḥ) — a result

Before the new one: say the Sanskrit for a colour, then the Sanskrit for a word.

You'll want to know: परिणामः

परिणामः — *pariṇāmaḥ* — "a result".

The word, taken apart — its roots and family

pariṇāma comes from *pari-√nam* "bend round, change, ripen", the root √nam "bend" with *pari* "around" (MW): "change, transformation, ripening", and so "the outcome, the result". It is the root √nam of *namaste*.

What you've built

One more word for this chapter.

Your turn

- *Say it: pariṇāmaḥ*
- *Say it: pariṇāmaḥ*, once more
- *Say it:* say *pariṇāmaḥ*
- *Recall:* say the Sanskrit for a colour, then the Sanskrit for a word, then say *pariṇāmaḥ* again

Before you move on

What does परिणामः mean? ("A result".) Say it once more.

169.2 अंकः (aṅkaḥ) — a mark, a number

Before the new one: say the Sanskrit for a word, then the Sanskrit for a result.

You'll want to know: अंकः

अंकः — *aṅkaḥ* — "a mark, a number".

The word, taken apart — its roots and family

aṅka comes from the root √añc "bend, curve" (CDIAL 100): first "a hook" in the Rigveda, then "a curved line, a mark", and so "a numeral". MW compares Greek *ankōn* "elbow, bend" and Latin *uncus* "hook", and it lives on as Hindi *āṁk* "mark" and Punjabi *aṅg* "figure" (CDIAL 100).

What you've built

One more word for this chapter.

Your turn

- *Say it: aṅkaḥ*
- *Say it: aṅkaḥ*, once more
- *Say it:* say *aṅkaḥ*

- *Recall:* say the Sanskrit for a word, then the Sanskrit for a result, then say *aṅkaḥ* again

Before you move on

What does अंकः mean? ("A mark, a number".) Say it once more.

169.3 श्रेणी (śreṇī) — a row, a grade

Before the new one: say the Sanskrit for a result, then the Sanskrit for a mark.

You'll want to know: श्रेणी

श्रेणी — *śreṇī* — "a row, a grade".

The word, taken apart — its roots and family

śreṇī, also *śreṇi*, "a line, a row, a series" is old, in the Rigveda. The grammarians derive it from the root √śri "lean on, attach" (MW), and CDIAL 12718 suggests the same with a query, so its origin is not settled. "Grade" is its school use today.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *śreṇī*
- *Say it:* *śreṇī*, once more
- *Say it:* say *śreṇī*
- *Recall:* say the Sanskrit for a result, then the Sanskrit for a mark, then say *śreṇī* again

Before you move on

What does श्रेणी mean? ("A row, a grade".) Say it once more.

169.4 शब्दकोशः (śabdakośaḥ) — a dictionary

Before the new one: say the Sanskrit for a mark, then the Sanskrit for a row.

You'll want to know: शब्दकोशः

शब्दकोशः — *śabdakośaḥ* — "a dictionary".

The word, taken apart — its roots and family

śabdakośa is built from *śabda* "sound, word" and *kośa* "a vessel, a store, a treasury" (MW): "the word-store". MW already records it as the name of a dictionary, and *kośa* "treasury" is the usual Sanskrit word for a lexicon.

What you've built

One more word for this chapter.

Your turn

- *Say it: śabdakośaḥ*
- *Say it: śabdakośaḥ*, once more
- *Say it:* say *śabdakośaḥ*
- *Recall:* say the Sanskrit for a mark, then the Sanskrit for a row, then say *śabdakośaḥ* again

Before you move on

What does शब्दकोशः mean? ("A dictionary".) Say it once more.

169.5 लेखनम् (lekhanam) — writing

Before the new one: say the Sanskrit for a row, then the Sanskrit for a dictionary.

You'll want to know: लेखनम्

लेखनम् — *lekhanam* — "writing".

The word, taken apart — its roots and family

lekhana comes from the root √likh "scratch, write" (CDIAL 11103): first "scraping" in the medical books, then "writing". *lekha* "a letter" and *lekhanī* "a pen" come from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: lekhanam*
- *Say it: lekhanam*, once more
- *Say it:* say *lekhanam*
- *Recall:* say the Sanskrit for a row, then the Sanskrit for a dictionary, then say *lekhanam* again

Before you move on

What does लेखनम् mean? ("Writing".) Say it once more.

Chapter 170

Work, Action, Occupation, Livelihood, Service

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say work, an action, an occupation, a livelihood and service.

170.1 कार्यम् (kāryam) — work, a task

Before the new one: say the Sanskrit for a dictionary, then the Sanskrit for writing.

You'll want to know: कार्यम्

कार्यम् — *kāryam* — "work, a task".

The word, taken apart — its roots and family

kārya is the gerundive of the root √kṛ "do, make" (CDIAL 3078): "to be done", and so "a task, work, business" (MW). It lives on as Hindi and Bengali *kāj* "work" (CDIAL 3078).

What you've built

One more word for this chapter.

Your turn

- *Say it: kāryam*
- *Say it: kāryam*, once more
- *Say it:* say *kāryam*
- *Recall:* say the Sanskrit for a dictionary, then the Sanskrit for writing, then say *kāryam* again

Before you move on

What does कार्यम् mean? ("Work, a task".) Say it once more.

170.2 कर्म (karma) — an action, work

Before the new one: say the Sanskrit for writing, then the Sanskrit for work.

You'll want to know: कर्म

कर्म — *karma* — "an action, work".

The word, taken apart — its roots and family

karma is the nominative of *karman* "act, action, work", from the root √kṛ "do, make" (MW; CDIAL 2892). It wore down into Hindi *kām* "work" (CDIAL 2892), and it is the *karma* that English has borrowed.

What you've built

One more word for this chapter.

Your turn

- *Say it: karma*
- *Say it: karma*, once more
- *Say it:* say *karma*
- *Recall:* say the Sanskrit for writing, then the Sanskrit for work, then say *karma* again

What does वहति mean? ("Carries, flows".) Say it once more.

175.4 सहते (sahate) — endures, bears

Before the new one: say the Sanskrit for supports, then the Sanskrit for carries.

You'll want to know: सहते

सहते — *sahate* — "endures, bears".

The word, taken apart — its roots and family

sahate is the present of the root √sah. In the Rigveda it means "conquers, prevails", and later "bears, endures" (MW; CDIAL 13304). It lives on as Hindi *sahnā*, "to bear" (CDIAL 13304).

What you've built

One more word for this chapter.

Your turn

- *Say it: sahate*
- *Say it: sahate*, once more
- *Say it:* say *sahate*
- *Recall:* say the Sanskrit for supports, then the Sanskrit for carries, then say *sahate* again

Before you move on

What does सहते mean? ("Endures, bears".) Say it once more.

175.5 यतते (yatate) — tries, strives

Before the new one: say the Sanskrit for carries, then the Sanskrit for endures.

You'll want to know: यतते

यतते — *yatate* — "tries, strives".

The word, taken apart — its roots and family

yatate is built on the root √yat, "to strive after, endeavour" (MW). MW suggests the root is probably related to √yam, with a first sense "to stretch", but gives that link only as a probability.

What you've built

One more word for this chapter.

Your turn

- *Say it: yatate*
- *Say it: yatate*, once more
- *Say it:* say *yatate*
- *Recall:* say the Sanskrit for carries, then the Sanskrit for endures, then say *yatate* again

Before you move on

What does यतते mean? ("Tries, strives".) Say it once more.

Chapter 176

Changes, Reports, Invites, Cleans, Fills

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say changes, reports, invites, cleans and fills.
>
> *Complete the last lesson of chapter 176: I can say changes, reports, invites, cleans and fills.*

176.1 परिवर्तयति (parivartayati) — changes

Before the new one: say the Sanskrit for endures, then the Sanskrit for tries.

You'll want to know: परिवर्तयति

परिवर्तयति — *parivartayati* — "changes".

The word, taken apart — its roots and family

parivartayati is built on *pari* "around" and the root √vṛt, "to turn" (MW), with the causative ending -*aya*-: it means "makes something turn round", and so "changes". MW compares √vṛt with Latin *vertere*, "to turn".

What you've built

One more word for this chapter.

Your turn

- *Say it: parivartayati*
- *Say it: parivartayati*, once more
- *Say it:* say *parivartayati*
- *Recall:* say the Sanskrit for endures, then the Sanskrit for tries, then say *parivartayati* again

Before you move on

What does परिवर्तयति mean? ("Changes".) Say it once more.

176.2 निवेदयति (nivedayati) — reports, submits

Before the new one: say the Sanskrit for tries, then the Sanskrit for changes.

You'll want to know: निवेदयति

निवेदयति — *nivedayati* — "reports, submits".

The word, taken apart — its roots and family

nivedayati is the causative of *ni-* with the root √vid, "to know" (MW): it means "makes known", and so "reports, presents". The root is inherited from Indo-European; MW compares Latin *vidēre*, "to see".

What you've built

One more word for this chapter.

Your turn

- *Say it: nivedayati*
- *Say it: nivedayati*, once more
- *Say it:* say *nivedayati*
- *Recall:* say the Sanskrit for tries, then the Sanskrit for changes, then say *nivedayati* again

Before you move on

What does निवेदयति mean? ("Reports, submits".) Say it once more.

176.3 आमन्त्रयति (āmantrayati) — invites

Before the new one: say the Sanskrit for changes, then the Sanskrit for reports.

You'll want to know: आमन्त्रयति

आमन्त्रयति — *āmantrayati* — "invites".

The word, taken apart — its roots and family

āmantrayati is *ā-* "towards" with *mantrayate*, "speaks, takes counsel", which MW calls a verb made from the noun *mantra*, built on the root √man "to think". CDIAL 1242 records "summons" for it in the Taittirīya Brāhmaṇa and "invites" in the Mahābhārata; it lives on as Gujarati *āmãtravũ*, "invites".

What you've built

One more word for this chapter.

Your turn

- *Say it: āmantrayati*
- *Say it: āmantrayati*, once more
- *Say it:* say *āmantrayati*
- *Recall:* say the Sanskrit for changes, then the Sanskrit for reports, then say *āmantrayati* again

Before you move on

What does आमन्त्रयति mean? ("Invites".) Say it once more.

176.4 शोधयति (śodhayati) — cleans, corrects

Before the new one: say the Sanskrit for reports, then the Sanskrit for invites.

You'll want to know: शोधयति

शोधयति — *śodhayati* — "cleans, corrects".

The word, taken apart — its roots and family

śodhayati is the causative of the root √śudh, "to be purified, become pure" (MW). So it comes from "makes pure", which covers both cleaning a thing and correcting a text.

What you've built

One more word for this chapter.

Your turn

- *Say it: śodhayati*
- *Say it: śodhayati*, once more
- *Say it:* say *śodhayati*
- *Recall:* say the Sanskrit for reports, then the Sanskrit for invites, then say *śodhayati* again

Before you move on

What does शोधयति mean? ("Cleans, corrects".) Say it once more.

176.5 पूरयति (pūrayati) — fills

Before the new one: say the Sanskrit for invites, then the Sanskrit for cleans.

You'll want to know: पूरयति

पूरयति — *pūrayati* — "fills".

The word, taken apart — its roots and family

pūrayati is built on the root √pṝ, "to fill" (MW), and is listed in CDIAL 8335. The root is inherited from Indo-European: MW compares Latin *plēnus* and English *full*. CDIAL gives Punjabi *pūrnā*, "to fill", as one of its descendants.

What you've built

One more word for this chapter.

Your turn

- *Say it: pūrayati*
- *Say it: pūrayati*, once more
- *Say it:* say *pūrayati*
- *Recall:* say the Sanskrit for invites, then the Sanskrit for cleans, then say *pūrayati* again

Before you move on

What does पूरयति mean? ("Fills".) Say it once more.

Chapter 177

Conceals, Distributes, Collects, Trusts, Is ashamed

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say conceals, distributes, collects, trusts and is ashamed.
>
> *Complete the last lesson of chapter 177: I can say conceals, distributes, collects, trusts and is ashamed.*

177.1 प्रच्छादयति (pracchādayati) — conceals, covers

Before the new one: say the Sanskrit for cleans, then the Sanskrit for fills.

You'll want to know: प्रच्छादयति

प्रच्छादयति — *pracchādayati* — "conceals, covers".

The word, taken apart — its roots and family

pracchādayati is *pra-* with *chādayati*, "covers, veils", built on the root √chad, "to cover" (MW). The simple verb lives on as Hindi *chānā*, "to thatch, spread over" (CDIAL 5018).

What you've built

One more word for this chapter.

Your turn

- *Say it: pracchādayati*
- *Say it: pracchādayati*, once more
- *Say it:* say *pracchādayati*
- *Recall:* say the Sanskrit for cleans, then the Sanskrit for fills, then say *pracchādayati* again

Before you move on

What does प्रच्छादयति mean? ("Conceals, covers".) Say it once more.

177.2 वितरति (vitarati) — distributes, hands out

Before the new one: say the Sanskrit for fills, then the Sanskrit for conceals.

You'll want to know: वितरति

वितरति — *vitarati* — "distributes, hands out".

The word, taken apart — its roots and family

vitarati is built on *vi-* "apart" and the root √tṝ, "to cross over" (MW). In the Rigveda it means "traverses"; in the Mahābhārata it already means "gives" (CDIAL 11719), the sense of handing out that you are learning here.

What you've built

One more word for this chapter.

Your turn

- *Say it: vitarati*
- *Say it: vitarati*, once more
- *Say it:* say *vitarati*

- *Recall:* say the Sanskrit for fills, then the Sanskrit for conceals, then say *vitarati* again

Before you move on

What does वितरति mean? ("Distributes, hands out".) Say it once more.

177.3 संगृह्णाति (saṅgṛhṇāti) — collects

Before the new one: say the Sanskrit for conceals, then the Sanskrit for distributes.

You'll want to know: संगृह्णाति

संगृह्णाति — *saṅgṛhṇāti* — "collects".

The word, taken apart — its roots and family

saṅgṛhṇāti is built on *sam* "together" and the root √grah, "to seize" (MW), the root of *gṛhṇāti*, "takes", which you have already met. To seize things together is to collect them.

What you've built

One more word for this chapter.

Your turn

- *Say it: saṅgṛhṇāti*
- *Say it: saṅgṛhṇāti*, once more
- *Say it:* say *saṅgṛhṇāti*
- *Recall:* say the Sanskrit for conceals, then the Sanskrit for distributes, then say *saṅgṛhṇāti* again

Before you move on

What does संगृह्णाति mean? ("Collects".) Say it once more.

177.4 विश्वसिति (viśvasiti) — trusts

Before the new one: say the Sanskrit for distributes, then the Sanskrit for collects.

You'll want to know: विश्वसिति

विश्वसिति — *viśvasiti* — "trusts".

The word, taken apart — its roots and family

viśvasiti is built on *vi-* and the root √śvas, "to breathe" (MW). MW's first gloss is "to draw breath freely, be free from fear", and from there "to trust". Its noun *viśvāsa*, "trust", went into Hindi as *viśvās*.

What you've built

One more word for this chapter.

Your turn

- *Say it: viśvasiti*
- *Say it: viśvasiti*, once more
- *Say it:* say *viśvasiti*
- *Recall:* say the Sanskrit for distributes, then the Sanskrit for collects, then say *viśvasiti* again

Before you move on

What does विश्वसिति mean? ("Trusts".) Say it once more.

177.5 लज्जते (lajjate) — is ashamed, is shy

Before the new one: say the Sanskrit for collects, then the Sanskrit for trusts.

You'll want to know: लज्जते

लज्जते — *lajjate* — "is ashamed, is shy".

The word, taken apart — its roots and family

lajjate is the present of the root √lajj, "to be ashamed, blush" (MW). MW gives the root no older source, so its origin is uncertain. It lives on as Hindi *lājnā*, "to blush, be ashamed" (CDIAL 10909).

What you've built

One more word for this chapter.

Your turn

- *Say it: lajjate*
- *Say it: lajjate*, once more
- *Say it:* say *lajjate*
- *Recall:* say the Sanskrit for collects, then the Sanskrit for trusts, then say *lajjate* again

Before you move on

What does लज्जते mean? ("Is ashamed, is shy".) Say it once more.

178.1 मातुलानी (mātulānī) — a mother's brother's wife

Before the new one: say the Sanskrit for trusts, then the Sanskrit for is ashamed.

You'll want to know: मातुलानी

मातुलानी — *mātulānī* — "a mother's brother's wife".

The word, taken apart — its roots and family

mātulānī is the feminine of *mātula*, "mother's brother", which MW files under *mātṛ*, "mother". The ending -*ānī* makes "the uncle's wife" (CDIAL 10012), and Marathi keeps it as *māvḷaṇ*.

What you've built

One more word for this chapter.

Your turn

- *Say it: mātulānī*
- *Say it: mātulānī*, once more
- *Say it:* say *mātulānī*
- *Recall:* say the Sanskrit for trusts, then the Sanskrit for is ashamed, then say *mātulānī* again

Before you move on

What does मातुलानी mean? ("A mother's brother's wife".) Say it once more.

178.2 श्वशुरः (śvaśuraḥ) — a father-in-law

Before the new one: say the Sanskrit for is ashamed, then the Sanskrit for a mother's brother's wife.

You'll want to know: श्वशुरः

श्वशुरः — *śvaśuraḥ* — "a father-in-law".

The word, taken apart — its roots and family

śvaśura is an inherited Indo-European kin word: MW compares Latin *socer* and Greek *hekyros*, both "father-in-law". It lives on as Hindi *sasur* (CDIAL 12753).

What you've built

One more word for this chapter.

Your turn

- *Say it: śvaśuraḥ*

You'll want to know: श्वश्रूः

श्वश्रूः — *śvaśrūḥ* — "a mother-in-law".

The word, taken apart — its roots and family

śvaśrū is the feminine partner of *śvaśura*, "father-in-law" (MW). It is inherited too: MW compares Latin *socrus* and German *Schwieger-*, both "mother-in-law". It lives on as Hindi *sās* (CDIAL 12759).

What you've built

One more word for this chapter.

Your turn

- *Say it: śvaśrūḥ*
- *Say it: śvaśrūḥ*, once more
- *Say it:* say *śvaśrūḥ*

Before you move on

What does श्वश्रूः mean? ("A mother-in-law".) Say it once more.

178.4 जामाता (jāmātā) — a son-in-law

Before the new one: say the Sanskrit for a father-in-law, then the Sanskrit for a mother-in-law.

You'll want to know: जामाता

जामाता — *jāmātā* — "a son-in-law".

The word, taken apart — its roots and family

jāmātā is the nominative of the stem *jāmātṛ*. MW explains it as *jā-* "offspring" with *-mātṛ*, a "maker of new offspring", and offers that only as an explanation. It lives on as Hindi *jamāī* and *jawāī* (CDIAL 5198).

What you've built

One more word for this chapter.

Your turn

- *Say it: jāmātā*
- *Say it: jāmātā*, once more

178.5 स्नुषा (snuṣā) — a daughter-in-law

Before the new one: say the Sanskrit for a mother-in-law, then the Sanskrit for a son-in-law.

You'll want to know: स्नुषा

स्नुषा — *snuṣā* — "a daughter-in-law".

The word, taken apart — its roots and family

snuṣā is an inherited Indo-European kin word: MW compares Latin *nurus* and Greek *nyos*, both "daughter-in-law". It lives on as Marathi *sūn* and Punjabi *nũh* (CDIAL 13801).

What you've built

One more word for this chapter.

Your turn

- *Say it: snuṣā*
- *Say it: snuṣā*, once more
- *Say it:* say *snuṣā*
- *Recall:* say the Sanskrit for a mother-in-law, then the Sanskrit for a son-in-law, then say *snuṣā* again

Before you move on

What does स्नुषा mean? ("A daughter-in-law".) Say it once more.

179.1 सैनिकः (sainikaḥ) — a soldier

Before the new one: say the Sanskrit for a son-in-law, then the Sanskrit for a daughter-in-law.

You'll want to know: सैनिकः

सैनिकः — *sainikaḥ* — "a soldier".

The word, taken apart — its roots and family

sainika is built on *senā*, "army", with the suffix *-ika*, "belonging to" (MW): "one who belongs to the army". *Senā* is the old word for "army", and it lives on as Hindi *sen*, "army" (CDIAL 13587).

What you've built

One more word for this chapter.

Your turn

- *Say it: sainikaḥ*
- *Say it: sainikaḥ*, once more

179.3 न्यायाधीशः (nyāyādhīśaḥ) — a judge

Before the new one: say the Sanskrit for a soldier, then the Sanskrit for a guard.

You'll want to know: न्यायाधीशः

न्यायाधीशः — *nyāyādhīśaḥ* — "a judge".

The word, taken apart — its roots and family

nyāyādhīśa is a compound of *nyāya*, "rule, justice, judicial sentence", and *adhīśa*, "lord, master" (MW). MW does not list the compound, so using it for a court judge is a modern pairing. *Nyāya* is built on *ni-* and the root √i, "to go" (CDIAL 7614).

What you've built

One more word for this chapter.

Your turn

- *Say it: nyāyādhīśaḥ*
- *Say it: nyāyādhīśaḥ*, once more

179.5 लेखकः (lekhakaḥ) — a writer

Before the new one: say the Sanskrit for a judge, then the Sanskrit for a lawyer.

You'll want to know: लेखकः

लेखकः — *lekhakaḥ* — "a writer".

The word, taken apart — its roots and family

lekhaka is built on the root √likh, "to scratch, write", which you have already met in *likhati*, with the agent suffix -*aka* (MW). It means "scribe" (CDIAL 11102), and Hindi took it over unchanged as *lekhak*.

What you've built

One more word for this chapter.

Your turn

- *Say it: lekhakaḥ*
- *Say it: lekhakaḥ*, once more
- *Say it:* say *lekhakaḥ*
- *Recall:* say the Sanskrit for a judge, then the Sanskrit for a lawyer, then say *lekhakaḥ* again

180.1 व्याधः (vyādhaḥ) — a hunter

Before the new one: say the Sanskrit for a lawyer, then the Sanskrit for a writer.

You'll want to know: व्याधः

व्याधः — *vyādhaḥ* — "a hunter".

The word, taken apart — its roots and family

vyādha is built on the root √vyadh, "to pierce, wound" (MW). MW glosses it "one who pierces or wounds", and so a hunter who lives by killing deer (CDIAL 12199).

What you've built

One more word for this chapter.

Your turn

- *Say it: vyādhaḥ*
- *Say it: vyādhaḥ*, once more

180.2 चौरः (cauraḥ) — a thief

Before the new one: say the Sanskrit for a writer, then the Sanskrit for a hunter.

You'll want to know: चौरः

चौरः — *cauraḥ* — "a thief".

The word, taken apart — its roots and family

caura is a variant of *cora*, "thief", and MW links both to the root √cur, "to steal". CDIAL 4931 lists the two forms together, and the word lives on as Hindi *cor*.

What you've built

One more word for this chapter.

Your turn

- *Say it: cauraḥ*
- *Say it: cauraḥ*, once more
- *Say it:* say *cauraḥ*

180.3 याचकः (yācakaḥ) — a beggar

Before the new one: say the Sanskrit for a hunter, then the Sanskrit for a thief.

You'll want to know: याचकः

याचकः — *yācakaḥ* — "a beggar".

The word, taken apart — its roots and family

yācaka is built on the root √yāc, "to ask, beg, entreat", with the agent suffix -*aka* (MW): "one who asks". The verb itself is old; CDIAL 10447 finds *yācate* already in the Rigveda.

What you've built

One more word for this chapter.

Your turn

- *Say it: yācakaḥ*
- *Say it: yācakaḥ*, once more

180.4 पण्डितः (paṇḍitaḥ) — a scholar

Before the new one: say the Sanskrit for a thief, then the Sanskrit for a beggar.

You'll want to know: पण्डितः

पण्डितः — *paṇḍitaḥ* — "a scholar".

The word, taken apart — its roots and family

paṇḍita is of uncertain origin: CDIAL 7718 says it has no certain etymology. MW files it beside *paṇḍā*, "wisdom", and notes the view that it stands for *spandita*. CDIAL lists Hindi *paṇḍā*, "temple priest", among its descendants, and English took the word as *pundit*.

What you've built

One more word for this chapter.

Your turn

- *Say it: paṇḍitaḥ*
- *Say it: paṇḍitaḥ*, once more
- *Say it:* say *paṇḍitaḥ*

180.5 विद्वान् (vidvān) — a learned person

Before the new one: say the Sanskrit for a beggar, then the Sanskrit for a scholar.

You'll want to know: विद्वान्

विद्वान् — *vidvān* — "a learned person".

The word, taken apart — its roots and family

vidvān is the nominative of *vidvas*, "one who knows", the old perfect participle of the root √vid, "to know" (MW). The root is inherited

from Indo-European; MW compares Latin *vidēre*, “to see”.

What you’ve built

One more word for this chapter.

Your turn

181.1 दन्तपीडा (dantapīḍā) — a toothache

Before the new one: say the Sanskrit for a scholar, then the Sanskrit for a learned person.

You'll want to know: दन्तपीडा

दन्तपीडा — *dantapīḍā* — "a toothache".

The word, taken apart — its roots and family

dantapīḍā is a compound of *danta*, "tooth", and *pīḍā*, "pain", built on the root √pīḍ, "to press, squeeze" (MW). *Danta* is the source of the Hindi word for tooth (CDIAL 6152), and *pīḍā* lives on as Hindi *pīṛ*, "pain" (CDIAL 8227).

What you've built

One more word for this chapter.

Your turn

- *Say it: dantapīḍā*
- *Say it: dantapīḍā*, once more
- *Say it:* say *dantapīḍā*
- *Recall:* say the Sanskrit for a scholar, then the Sanskrit for a learned person, then say *dantapīḍā* again

Before you move on

What does दन्तपीडा mean? ("A toothache".) Say it once more.

181.2 प्रतिश्यायः (pratiśyāyaḥ) — a head cold

Before the new one: say the Sanskrit for a learned person, then the Sanskrit for a toothache.

You'll want to know: प्रतिश्यायः

प्रतिश्यायः — *pratiśyāyaḥ* — "a head cold".

The word, taken apart — its roots and family

pratiśyāya is built on *prati-* and the root √śyai, "to congeal, freeze" (MW). MW glosses it, and its twin *pratiśyā*, as "a cold, catarrh".

What you've built

One more word for this chapter.

Your turn

- *Say it: pratiśyāyaḥ*
- *Say it: pratiśyāyaḥ*, once more
- *Say it:* say *pratiśyāyaḥ*
- *Recall:* say the Sanskrit for a learned person, then the Sanskrit for a toothache, then say *pratiśyāyaḥ* again

Before you move on

What does प्रतिश्यायः mean? ("A head cold".) Say it once more.

181.3 श्वासः (śvāsaḥ) — breath

Before the new one: say the Sanskrit for a toothache, then the Sanskrit for a head cold.

You'll want to know: श्वासः

श्वासः — *śvāsaḥ* — "breath".

The word, taken apart — its roots and family

śvāsa is built on the root √śvas, "to breathe, hiss, pant" (MW), the root inside *viśvasiti*, "trusts". It lives on as Hindi *sās*, "breath" (CDIAL 12769).

What you've built

One more word for this chapter.

Your turn

- *Say it: śvāsaḥ*
- *Say it: śvāsaḥ*, once more
- *Say it:* say *śvāsaḥ*
- *Recall:* say the Sanskrit for a toothache, then the Sanskrit for a head cold, then say *śvāsaḥ* again

Before you move on

What does श्वासः mean? ("Breath".) Say it once more.

181.4 नाडी (nāḍī) — the pulse

Before the new one: say the Sanskrit for a head cold, then the Sanskrit for breath.

You'll want to know: नाडी

नाडी — *nāḍī* — "the pulse".

The word, taken apart — its roots and family

nāḍī first meant a tubular stalk, then any tube or vessel of the body, and MW also gives "the pulse". CDIAL 7047 derives it from *naḍa*, "reed". It is a different word from *nadī*, "river".

What you've built

One more word for this chapter.

Your turn

- *Say it: nāḍī*
- *Say it: nāḍī*, once more
- *Say it:* say *nāḍī*
- *Recall:* say the Sanskrit for a head cold, then the Sanskrit for breath, then say *nāḍī* again

Before you move on

What does नाडी mean? ("The pulse".) Say it once more.

181.5 स्वास्थ्यम् (svāsthyam) — fitness, health

Before the new one: say the Sanskrit for breath, then the Sanskrit for the pulse.

You'll want to know: स्वास्थ्यम्

स्वास्थ्यम् — *svāsthyam* — "fitness, health".

The word, taken apart — its roots and family

svāsthya comes from *svastha*, "well, healthy", a compound of *sva* "self" and *stha* "standing" (MW): to be healthy is to be in your own natural state. The *-ya* ending turns the adjective into the noun "health".

What you've built

One more word for this chapter.

Your turn

- *Say it: svāsthyam*
- *Say it: svāsthyam*, once more
- *Say it:* say *svāsthyam*
- *Recall:* say the Sanskrit for breath, then the Sanskrit for the pulse, then say *svāsthyam* again

Before you move on

What does स्वास्थ्यम् mean? ("Fitness, health".) Say it once more.

181.6 Words from chapters 173-176 — a first pass

181.7 Words from chapters 177-181 — a second pass

Say the words for conceals and distributes.

Your turn

Say these aloud:

- conceals, distributes, collects, trusts, is ashamed
- a mother's brother's wife, a father-in-law, a mother-in-law, a son-in-law, a daughter-in-law
- a soldier, a guard, a judge, a lawyer, a writer
- a hunter, a thief, a beggar, a scholar, a learned person
- a toothache, a head cold, breath, the pulse, fitness

Before you move on

Conceals? (प्रच्छादयति, *pracchādayati.*) Distributes? (वितरति, *vitarati.*) Collects? (संगृह्णाति, *saṅgṛhṇāti.*) Trusts? (विश्वसिति, *viśvasiti.*) Is ashamed? (लज्जते, *lajjate.*) A mother's brother's wife? (मातुलानी, *mātulānī.*) A father-in-law? (श्वशुरः, *śvaśuraḥ.*) A mother-in-law? (श्वश्रूः, *śvaśrūḥ.*) A son-in-law? (जामाता, *jāmātā.*) A daughter-in-law? (स्नुषा, *snuṣā.*) A soldier? (सैनिकः, *sainikaḥ.*) A guard? (रक्षकः, *rakṣakaḥ.*) A judge? (न्यायाधीशः, *nyāyādhīśaḥ.*) A lawyer? (विद्वान्, *vidvān.*) A toothache? (दन्तपीडा, *dantapīḍā.*) A head cold? (प्रतिश्यायः, *pratiśyāyaḥ.*) Breath? (श्वासः, *śvāsaḥ.*) The pulse? (नाडी, *nāḍī.*) Fitness? (स्वास्थ्यम्, *svāsthyam.*)

Chapter 182

Wonder, Grief, Contentment, Gratitude, Memory

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say wonder, grief, contentment, gratitude and memory.
>
> *Complete the last lesson of chapter 182: I can say wonder, grief, contentment, gratitude and memory.*

182.1 विस्मयः (vismayaḥ) — wonder, surprise

Before the new one: say the Sanskrit for the pulse, then the Sanskrit for fitness, health.

You'll want to know: विस्मयः

विस्मयः — *vismayaḥ* — "wonder, surprise".

The word, taken apart — its roots and family

vismaya is built on *vi-* and the root √smi, "to smile" (MW), so wonder starts as a smile of surprise (CDIAL 12019). The root is inherited from Indo-European: MW compares English *smile* and Latin *mīrus*, "wonderful".

What you've built

One more word for this chapter.

Your turn

- *Say it: vismayaḥ*
- *Say it: vismayaḥ*, once more
- *Say it:* say *vismayaḥ*
- *Recall:* say the Sanskrit for the pulse, then the Sanskrit for fitness, health, then say *vismayaḥ* again

Before you move on

What does विस्मयः mean? ("Wonder, surprise".) Say it once more.

182.2 शोकः (śokaḥ) — grief

Before the new one: say the Sanskrit for fitness, health, then the Sanskrit for wonder.

You'll want to know: शोकः

शोकः — *śokaḥ* — "grief".

The word, taken apart — its roots and family

śoka is built on the root √śuc, "to burn, glow" (MW). In the Rigveda it means "heat" as well as "pain", and later "grief" (CDIAL 12619): sorrow as something that burns.

What you've built

One more word for this chapter.

Your turn

- *Say it: śokaḥ*
- *Say it: śokaḥ*, once more
- *Say it:* say *śokaḥ*
- *Recall:* say the Sanskrit for fitness, health, then the Sanskrit for wonder, then say *śokaḥ* again

Before you move on

What does शोकः mean? ("Grief".) Say it once more.

182.3 सन्तोषः (santoṣaḥ) — contentment

Before the new one: say the Sanskrit for wonder, then the Sanskrit for grief.

You'll want to know: सन्तोषः

सन्तोषः — *santoṣaḥ* — "contentment".

The word, taken apart — its roots and family

santoṣa is built on *sam* and the root √tuṣ, "to be satisfied, pleased" (MW; CDIAL 12895). Telugu took it as *santōṣam*, the everyday word for happiness.

What you've built

One more word for this chapter.

Your turn

- *Say it: santoṣaḥ*
- *Say it: santoṣaḥ*, once more
- *Say it:* say *santoṣaḥ*
- *Recall:* say the Sanskrit for wonder, then the Sanskrit for grief, then say *santoṣaḥ* again

Before you move on

What does सन्तोषः mean? ("Contentment".) Say it once more.

182.4 कृतज्ञता (kṛtajñatā) — gratitude

Before the new one: say the Sanskrit for grief, then the Sanskrit for contentment.

You'll want to know: कृतज्ञता

कृतज्ञता — *kṛtajñatā* — "gratitude".

The word, taken apart — its roots and family

kṛtajñatā is built from *kṛta*, "what was done", from the root √kṛ "to do", and *jña*, "knowing", with *-tā*, "-ness" (MW). Gratitude is knowing what was done for you.

What you've built

One more word for this chapter.

Your turn

- *Say it: kṛtajñatā*
- *Say it: kṛtajñatā*, once more
- *Say it:* say *kṛtajñatā*
- *Recall:* say the Sanskrit for grief, then the Sanskrit for contentment, then say *kṛtajñatā* again

Before you move on

What does कृतज्ञता mean? ("Gratitude".) Say it once more.

182.5 स्मृतिः (smṛtiḥ) — memory

Before the new one: say the Sanskrit for contentment, then the Sanskrit for gratitude.

You'll want to know: स्मृतिः

स्मृतिः — *smṛtiḥ* — "memory".

The word, taken apart — its roots and family

smṛti is built on the root √smṛ, "to remember", with the noun suffix *-ti* (MW). MW compares Latin *memor*, "mindful", the source of English *memory*. The same word names the body of remembered tradition, as

opposed to *śruti*, what was heard.

What you've built

One more word for this chapter.

Your turn

- *Say it: smṛtiḥ*
- *Say it: smṛtiḥ*, once more
- *Say it:* say *smṛtiḥ*
- *Recall:* say the Sanskrit for contentment, then the Sanskrit for gratitude, then say *smṛtiḥ* again

Before you move on

What does स्मृतिः mean? ("Memory".) Say it once more.

Chapter 183

Age, Auspicious hour, Hour, For a long time, After a long time

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say an age, an auspicious hour, an hour, for a long time and after a long time.
>
> *Complete the last lesson of chapter 183: I can say an age, an auspicious hour, an hour, for a long time and after a long time.*

183.1 युगम् (yugam) — an age, an era

Before the new one: say the Sanskrit for gratitude, then the Sanskrit for memory.

You'll want to know: युगम्

युगम् — *yugam* — "an age, an era".

The word, taken apart — its roots and family

yuga is built on the root √yuj, "to yoke, join" (MW). It first meant "yoke", then "a pair", "a generation", and "an age". The root is inherited from Indo-European: MW compares English *yoke* and Latin *iugum*, and Hindi *jūā*, "yoke", comes from *yuga* (CDIAL 10482).

What you've built

One more word for this chapter.

Your turn

- *Say it: yugam*
- *Say it: yugam*, once more
- *Say it:* say *yugam*
- *Recall:* say the Sanskrit for gratitude, then the Sanskrit for memory, then say *yugam* again

Before you move on

What does युगम् mean? ("An age, an era".) Say it once more.

183.2 मुहूर्तः (muhūrtaḥ) — an auspicious hour

Before the new one: say the Sanskrit for memory, then the Sanskrit for an age.

You'll want to know: मुहूर्तः

मुहूर्तः — *muhūrtaḥ* — "an auspicious hour".

The word, taken apart — its roots and family

muhūrta meant "a moment" in the Rigveda (CDIAL 10229) and later a fixed thirtieth of a day, 48 minutes (MW). MW files it beside *muhur*, "suddenly, in a moment"; its deeper origin is not settled. An auspicious hour is a well-chosen *muhūrta*.

What you've built

One more word for this chapter.

Your turn

- *Say it: muhūrtaḥ*
- *Say it: muhūrtaḥ*, once more
- *Say it:* say *muhūrtaḥ*

- *Recall:* say the Sanskrit for memory, then the Sanskrit for an age, then say *muhūrtaḥ* again

Before you move on

What does मुहूर्तः mean? ("An auspicious hour".) Say it once more.

183.3 होरा (horā) — an hour

Before the new one: say the Sanskrit for an age, then the Sanskrit for an auspicious hour.

You'll want to know: होरा

होरा — *horā* — "an hour".

The word, taken apart — its roots and family

horā was borrowed from Greek *hōra*, "hour, season" (MW), with the Greek astronomy and astrology that reached India. English *hour* comes from the same Greek word through Latin and French.

What you've built

One more word for this chapter.

Your turn

- *Say it: horā*
- *Say it: horā*, once more
- *Say it:* say *horā*
- *Recall:* say the Sanskrit for an age, then the Sanskrit for an auspicious hour, then say *horā* again

Before you move on

What does होरा mean? ("An hour".) Say it once more.

183.4 चिरम् (ciram) — for a long time

Before the new one: say the Sanskrit for an auspicious hour, then the Sanskrit for an hour.

You'll want to know: चिरम्

चिरम् — *ciram* — "for a long time".

The word, taken apart — its roots and family

ciram is the accusative of *cira*, "long-lasting", used as an adverb (MW). The origin of *cira* is uncertain: MW suggests the root √ci with a question mark. Gujarati and Marathi keep *cir*, "for a long time" (CDIAL 4824).

What you've built

One more word for this chapter.

Your turn

- *Say it: ciram*
- *Say it: ciram*, once more
- *Say it:* say *ciram*
- *Recall:* say the Sanskrit for an auspicious hour, then the Sanskrit for an hour, then say *ciram* again

Before you move on

What does चिरम् mean? ("For a long time".) Say it once more.

183.5 चिरात् (cirāt) — after a long time

Before the new one: say the Sanskrit for an hour, then the Sanskrit for for a long time.

You'll want to know: चिरात्

चिरात् — *cirāt* — "after a long time".

The word, taken apart — its roots and family

cirāt is the ablative of *cira*, "long-lasting": "from a long time", so "at last" (MW). *Cira* itself is of uncertain origin, and CDIAL 4824 traces it back to the Rigveda.

What you've built

One more word for this chapter.

Your turn

- *Say it: cirāt*
- *Say it: cirāt*, once more
- *Say it:* say *cirāt*
- *Recall:* say the Sanskrit for an hour, then the Sanskrit for for a long time, then say *cirāt* again

Before you move on

What does चिरात् mean? ("After a long time".) Say it once more.

Chapter 184

From afar, Close by, Between, Loudly, Softly

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say from afar, close by, between, loudly and softly.
>
> *Complete the last lesson of chapter 184: I can say from afar, close by, between, loudly and softly.*

184.1 दूरतः (dūrataḥ) — from afar

Before the new one: say the Sanskrit for for a long time, then the Sanskrit for after a long time.

You'll want to know: दूरतः

दूरतः — *dūrataḥ* — "from afar".

The word, taken apart — its roots and family

dūrataḥ is *dūra*, "far", with the ending *-tas*, "from" (MW). MW thinks *dūra* probably comes from the root √du, and it lives on as Hindi *dūr* (CDIAL 6495).

What you've built

One more word for this chapter.

Your turn

- *Say it: dūrataḥ*
- *Say it: dūrataḥ*, once more
- *Say it:* say *dūrataḥ*
- *Recall:* say the Sanskrit for for a long time, then the Sanskrit for after a long time, then say *dūrataḥ* again

Before you move on

What does दूरतः mean? ("From afar".) Say it once more.

184.2 निकटे (nikaṭe) — close by, near

Before the new one: say the Sanskrit for after a long time, then the Sanskrit for from afar.

You'll want to know: निकटे

निकटे — *nikaṭe* — "close by, near".

The word, taken apart — its roots and family

nikaṭe is the locative of *nikaṭa*, "nearness" (MW). Its origin is disputed: CDIAL 7136 thinks a Munda source unlikely and derives it from *nikṛta-*, "put at". Hindi keeps it as *neṛe*, "near".

What you've built

One more word for this chapter.

Your turn

- *Say it: nikaṭe*
- *Say it: nikaṭe*, once more
- *Say it:* say *nikaṭe*
- *Recall:* say the Sanskrit for after a long time, then the Sanskrit for from afar, then say *nikaṭe* again

Before you move on

What does निकटे mean? ("Close by, near".) Say it once more.

184.3 अन्तरा (antarā) — between

Before the new one: say the Sanskrit for from afar, then the Sanskrit for close by.

You'll want to know: अन्तरा

अन्तरा — *antarā* — "between".

The word, taken apart — its roots and family

antarā is an adverb formed from *antara*, "interior, near" (CDIAL 362), which comes from *antar*, "within". MW compares *antar* with Latin *inter*, "between", an inherited Indo-European word.

What you've built

One more word for this chapter.

Your turn

- *Say it: antarā*
- *Say it: antarā*, once more
- *Say it:* say *antarā*
- *Recall:* say the Sanskrit for from afar, then the Sanskrit for close by, then say *antarā* again

Before you move on

What does अन्तरा mean? ("Between".) Say it once more.

184.4 उच्चैः (uccaiḥ) — loudly, high

Before the new one: say the Sanskrit for close by, then the Sanskrit for between.

You'll want to know: उच्चैः

उच्चैः — *uccaiḥ* — "loudly, high".

The word, taken apart — its roots and family

uccaiḥ is an old case form of *ucca*, "high", used as an adverb (MW), and the Rigveda already has it (CDIAL 1634). *Ucca* lives on as Punjabi *uccā*, "high", and as the Hindi word for high. MW says it is said to come from *ud* "up" and √añc "bend".

What you've built

One more word for this chapter.

Your turn

- *Say it: uccaiḥ*
- *Say it: uccaiḥ*, once more
- *Say it:* say *uccaiḥ*
- *Recall:* say the Sanskrit for close by, then the Sanskrit for between, then say *uccaiḥ* again

Before you move on

What does उच्चैः mean? ("Loudly, high".) Say it once more.

184.5 नीचैः (nīcaiḥ) — softly, low

Before the new one: say the Sanskrit for between, then the Sanskrit for loudly.

You'll want to know: नीचैः

नीचैः — *nīcaiḥ* — "softly, low".

The word, taken apart — its roots and family

nīcaiḥ is an old case form of *nīca*, "low", which MW takes apart as *ni* "down" and √añc "bend". It is the mirror image of *uccaiḥ*, and *nīca*

lives on as Hindi *nīcā* (CDIAL 7540).

What you've built

One more word for this chapter.

Your turn

- *Say it: nīcaiḥ*
- *Say it: nīcaiḥ*, once more
- *Say it:* say *nīcaiḥ*
- *Recall:* say the Sanskrit for between, then the Sanskrit for loudly, then say *nīcaiḥ* again

Before you move on

What does नीचैः mean? ("Softly, low".) Say it once more.

Chapter 185

How much?, Of what kind?, For, Surely, Certainly

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say how much?, of what kind?, for, surely and certainly.
>
> *Complete the last lesson of chapter 185: I can say how much?, of what kind?, for, surely and certainly.*

185.1 कियत् (kiyat) — how much?

Before the new one: say the Sanskrit for loudly, then the Sanskrit for softly.

You'll want to know: कियत्

कियत् — *kiyat* — "how much?".

The word, taken apart — its roots and family

kiyat is built on *ki-*, the stem that asks a question (MW), the way *iyat* means "so much". That interrogative stem is inherited from Indo-European, and Latin *quis*, "who", is usually traced to the same source.

What you've built

One more word for this chapter.

Your turn

- *Say it: kiyat*
- *Say it: kiyat*, once more
- *Say it:* say *kiyat*
- *Recall:* say the Sanskrit for loudly, then the Sanskrit for softly, then say *kiyat* again

Before you move on

What does कियत् mean? ("How much?".) Say it once more.

185.2 कीदृशः (kīdṛśaḥ) — of what kind?

Before the new one: say the Sanskrit for softly, then the Sanskrit for how much?.

You'll want to know: कीदृशः

कीदृशः — *kīdṛśaḥ* — "of what kind?".

The word, taken apart — its roots and family

kīdṛśa is built on the question stem *kī-* and *-dṛśa*, "looking like", from the root √dṛś, "to see" (MW): "of what appearance". It lives on as Hindi *kaisā*, with *ka-* in place of *kī-*, and Gujarati *śũ*, "what" (CDIAL 3197).

What you've built

One more word for this chapter.

Your turn

- *Say it: kīdṛśaḥ*
- *Say it: kīdṛśaḥ*, once more
- *Say it:* say *kīdṛśaḥ*

- *Recall:* say the Sanskrit for softly, then the Sanskrit for how much?, then say *kīdṛśaḥ* again

Before you move on

What does कीदृशः mean? ("Of what kind?".) Say it once more.

185.3 हि (hi) — for, indeed

Before the new one: say the Sanskrit for how much?, then the Sanskrit for of what kind?.

You'll want to know: हि

हि — *hi* — "for, indeed".

The word, taken apart — its roots and family

hi is an old particle, already in the Vedas, that never stands first in its sentence (MW). MW compares it with the particles *ha* and *gha*; where it came from before that is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: hi*
- *Say it: hi*, once more
- *Say it:* say *hi*
- *Recall:* say the Sanskrit for how much?, then the Sanskrit for of what kind?, then say *hi* again

Before you move on

What does हि mean? ("For, indeed".) Say it once more.

185.4 नूनम् (nūnam) — surely

Before the new one: say the Sanskrit for of what kind?, then the Sanskrit for for.

You'll want to know: नूनम्

नूनम् — *nūnam* — "surely".

The word, taken apart — its roots and family

nūnam is built on *nu*, "now" (CDIAL 7576): in the Rigveda it means "now", and later "surely" (MW). The base is inherited from Indo-European; MW compares Greek *nyn*, Latin *nunc* and English *now*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nūnam*
- *Say it: nūnam*, once more
- *Say it:* say *nūnam*
- *Recall:* say the Sanskrit for of what kind?, then the Sanskrit for for, then say *nūnam* again

Before you move on

What does नूनम् mean? ("Surely".) Say it once more.

185.5 अवश्यम् (avaśyam) — certainly, necessarily

Before the new one: say the Sanskrit for for, then the Sanskrit for surely.

You'll want to know: अवश्यम्

अवश्यम् — *avaśyam* — "certainly, necessarily".

The word, taken apart — its roots and family

avaśyam is built on *a-*, "not", and *vaśa*, "will, control" (MW): what is not under anyone's control is inevitable, so "necessarily, certainly". MW sets it beside *āvaśyaka*, "necessary".

What you've built

One more word for this chapter.

Your turn

- *Say it: avaśyam*
- *Say it: avaśyam*, once more
- *Say it:* say *avaśyam*
- *Recall:* say the Sanskrit for for, then the Sanskrit for surely, then say *avaśyam* again

Before you move on

What does अवश्यम् mean? ("Certainly, necessarily".) Say it once more.

186.1 कोमलः (komalaḥ) — tender, soft

Before the new one: say the Sanskrit for surely, then the Sanskrit for certainly.

You'll want to know: कोमलः

कोमलः — *komalaḥ* — "tender, soft".

The word, taken apart — its roots and family

komala is of uncertain origin. MW offers, with a question mark, *ko-*, a form of *ku-* "little", with *mala* from √mlai "to fade", so "easily fading". It lives on as Gujarati *komaḷ*, "soft" (CDIAL 3523).

What you've built

One more word for this chapter.

Your turn

- *Say it: komalaḥ*
- *Say it: komalaḥ*, once more
- *Say it:* say *komalaḥ*
- *Recall:* say the Sanskrit for surely, then the Sanskrit for certainly, then say *komalaḥ* again

Before you move on

What does कोमलः mean? ("Tender, soft".) Say it once more.

186.2 वामनः (vāmanaḥ) — dwarfish, short

Before the new one: say the Sanskrit for certainly, then the Sanskrit for tender.

You'll want to know: वामनः

वामनः — *vāmanaḥ* — "dwarfish, short".

The word, taken apart — its roots and family

vāmana is of uncertain origin: MW calls it "of doubtful derivation". It is the name of Viṣṇu's dwarf form, and it lives on as Hindi *baunā*, "dwarf" (CDIAL 11538).

What you've built

One more word for this chapter.

Your turn

- *Say it: vāmanaḥ*
- *Say it: vāmanaḥ*, once more
- *Say it:* say *vāmanaḥ*
- *Recall:* say the Sanskrit for certainly, then the Sanskrit for tender, then say *vāmanaḥ* again

Before you move on

What does वामनः mean? ("Dwarfish, short".) Say it once more.

186.3 विशालः (viśālaḥ) — vast, broad

Before the new one: say the Sanskrit for tender, then the Sanskrit for dwarfish.

You'll want to know: विशालः

विशालः — *viśālaḥ* — "vast, broad".

The word, taken apart — its roots and family

viśāla probably comes from the root √viś, "to enter, settle", MW says, though others derive it from *vi-* with √śṛ. The derivation is not settled. Bengali keeps it as *bishāl*, "huge".

What you've built

One more word for this chapter.

Your turn

- *Say it: viśālaḥ*
- *Say it: viśālaḥ*, once more
- *Say it:* say *viśālaḥ*
- *Recall:* say the Sanskrit for tender, then the Sanskrit for dwarfish, then say *viśālaḥ* again

Before you move on

What does विशालः mean? ("Vast, broad".) Say it once more.

186.4 सूक्ष्मः (sūkṣmaḥ) — fine, subtle

Before the new one: say the Sanskrit for dwarfish, then the Sanskrit for vast.

You'll want to know: सूक्ष्मः

सूक्ष्मः — *sūkṣmaḥ* — "fine, subtle".

The word, taken apart — its roots and family

sūkṣma is probably connected with *sūci*, "needle", MW says: fine as a needle's point. CDIAL 13546 lists it with Pali *sukhuma*, "subtle, minute".

What you've built

One more word for this chapter.

Your turn

- *Say it: sūkṣmaḥ*
- *Say it: sūkṣmaḥ*, once more
- *Say it:* say *sūkṣmaḥ*
- *Recall:* say the Sanskrit for dwarfish, then the Sanskrit for vast, then say *sūkṣmaḥ* again

Before you move on

What does सूक्ष्मः mean? ("Fine, subtle".) Say it once more.

186.5 स्थिरः (sthiraḥ) — steady

Before the new one: say the Sanskrit for vast, then the Sanskrit for fine.

You'll want to know: स्थिरः

स्थिरः — *sthiraḥ* — "steady".

The word, taken apart — its roots and family

sthira is filed by MW under the root √sthā, "to stand", which MW compares with Latin *stāre* and English *stand*. CDIAL 13771 links it rather to a related root *sthar-*. Either way it lives on as Hindi *thir*,

"firm, fixed".

What you've built

One more word for this chapter.

Your turn

- *Say it: sthiraḥ*
- *Say it: sthiraḥ*, once more
- *Say it:* say *sthiraḥ*
- *Recall:* say the Sanskrit for vast, then the Sanskrit for fine, then say *sthiraḥ* again

Before you move on

What does स्थिरः mean? ("Steady".) Say it once more.

Chapter 187

Kind, Generous, Stingy, Truthful, Adept

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say kind, generous, stingy, truthful and adept.
>
> *Complete the last lesson of chapter 187: I can say kind, generous, stingy, truthful and adept.*

187.1 दयालुः (dayāluḥ) — kind

> Before the new one: say the Sanskrit for fine, then the Sanskrit for steady.

You'll want to know: दयालुः

दयालुः — *dayāluḥ* — "kind".

The word, taken apart — its roots and family

dayālu is *dayā*, "compassion", with the suffix -*ālu*, "inclined to" (MW). *Dayā* is built on the root √day, which MW glosses "to divide, impart" and also "to have pity on" (CDIAL 6185).

What you've built

One more word for this chapter.

Your turn

- *Say it: dayāluḥ*
- *Say it: dayāluḥ*, once more
- *Say it:* say *dayāluḥ*
- *Recall:* say the Sanskrit for fine, then the Sanskrit for steady, then say *dayāluḥ* again

Before you move on

What does दयालुः mean? ("Kind".) Say it once more.

187.2 उदारः (udāraḥ) — generous

Before the new one: say the Sanskrit for steady, then the Sanskrit for kind.

You'll want to know: उदारः

उदारः — *udāraḥ* — "generous".

The word, taken apart — its roots and family

udāra is built on *ud*, "up", and the root √ṛ, "to rise, move" (MW): "raised, lofty". In the Rigveda it means "exciting", and later "lofty, noble" (CDIAL 1935), and from noble comes generous.

What you've built

One more word for this chapter.

Your turn

- *Say it: udāraḥ*
- *Say it: udāraḥ*, once more
- *Say it:* say *udāraḥ*
- *Recall:* say the Sanskrit for steady, then the Sanskrit for kind, then say *udāraḥ* again

Before you move on

What does उदारः mean? ("Generous".) Say it once more.

187.3 कृपणः (kṛpaṇaḥ) — stingy

Before the new one: say the Sanskrit for kind, then the Sanskrit for generous.

You'll want to know: कृपणः

कृपणः — *kṛpaṇaḥ* — "stingy".

The word, taken apart — its roots and family

kṛpaṇa is built on the root √kṛp, "to mourn, lament, implore" (MW). It first meant "pitiable, wretched", and later "miserly, stingy": the miser as a poor soul.

What you've built

One more word for this chapter.

Your turn

- *Say it: kṛpaṇaḥ*
- *Say it: kṛpaṇaḥ*, once more
- *Say it:* say *kṛpaṇaḥ*
- *Recall:* say the Sanskrit for kind, then the Sanskrit for generous, then say *kṛpaṇaḥ* again

Before you move on

What does कृपणः mean? ("Stingy".) Say it once more.

187.4 सत्यवादी (satyavādī) — truthful

Before the new one: say the Sanskrit for generous, then the Sanskrit for stingy.

You'll want to know: सत्यवादी

सत्यवादी — *satyavādī* — "truthful".

The word, taken apart — its roots and family

satyavādī is a compound of *satya*, "true", and *vādin*, "one who says", from the root √vad, "to speak" (MW). *Satya* lives on as Hindi *saccā*, "true" (CDIAL 13112).

What you've built

One more word for this chapter.

Your turn

- *Say it: satyavādī*
- *Say it: satyavādī*, once more
- *Say it:* say *satyavādī*
- *Recall:* say the Sanskrit for generous, then the Sanskrit for stingy, then say *satyavādī* again

Before you move on

What does सत्यवादी mean? ("Truthful".) Say it once more.

187.5 पटुः (paṭuḥ) — adept, skilful

Before the new one: say the Sanskrit for stingy, then the Sanskrit for truthful.

You'll want to know: पटुः

पटुः — *paṭuḥ* — "adept, skilful".

The word, taken apart — its roots and family

paṭu first meant "sharp, pungent, keen", then "clever, skilful" (MW). Its origin is uncertain: MW suggests the root √paṭ, with a question mark.

What you've built

One more word for this chapter.

Your turn

- *Say it: paṭuḥ*
- *Say it: paṭuḥ*, once more
- *Say it:* say *paṭuḥ*
- *Recall:* say the Sanskrit for stingy, then the Sanskrit for truthful, then say *paṭuḥ* again

Before you move on

What does पटुः mean? ("Adept, skilful".) Say it once more.

Chapter 188

Thirsty, Ready, Busy, Spotless, Bright

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say thirsty, ready, busy, spotless and bright.
>
> *Complete the last lesson of chapter 188: I can say thirsty, ready, busy, spotless and bright.*

188.1 तृषितः (tṛṣitaḥ) — thirsty

> Before the new one: say the Sanskrit for truthful, then the Sanskrit for adept.

You'll want to know: तृषितः

तृषितः — *tṛṣitaḥ* — "thirsty".

The word, taken apart — its roots and family

tṛṣita is the past participle of the root √tṛṣ, "to be thirsty" (MW). The root is inherited from Indo-European: MW compares Gothic *thaursus*, "dry", and English *thirst* is usually traced to the same source. CDIAL 5937 gives Gujarati *tarśyũ*, "thirsty", as a descendant.

What you've built

One more word for this chapter.

Your turn

- *Say it: tṛṣitaḥ*
- *Say it: tṛṣitaḥ*, once more
- *Say it:* say *tṛṣitaḥ*
- *Recall:* say the Sanskrit for truthful, then the Sanskrit for adept, then say *tṛṣitaḥ* again

Before you move on

What does तृषितः mean? ("Thirsty".) Say it once more.

188.2 सज्जः (sajjaḥ) — ready

Before the new one: say the Sanskrit for adept, then the Sanskrit for thirsty.

You'll want to know: सज्जः

सज्जः — *sajjaḥ* — "ready".

The word, taken apart — its roots and family

sajja comes from *sajj*, a form of the root √sañj, "to cling, fasten", under which MW files it. Its first senses are "fixed, prepared, equipped": what is fastened in place is ready.

What you've built

One more word for this chapter.

Your turn

- *Say it: sajjaḥ*
- *Say it: sajjaḥ*, once more
- *Say it:* say *sajjaḥ*
- *Recall:* say the Sanskrit for adept, then the Sanskrit for thirsty, then say *sajjaḥ* again

Before you move on

What does सज्जः mean? ("Ready".) Say it once more.

188.3 व्यस्तः (vyastaḥ) — busy

Before the new one: say the Sanskrit for thirsty, then the Sanskrit for ready.

You'll want to know: व्यस्तः

व्यस्तः — *vyastaḥ* — "busy".

The word, taken apart — its roots and family

vyasta comes from *vi-* with the root √as, "to throw", as its past participle (MW): "thrown apart, scattered". A mind scattered over many tasks is busy, and Hindi and Marathi use *vyast* in that sense.

What you've built

One more word for this chapter.

Your turn

- *Say it: vyastaḥ*
- *Say it: vyastaḥ*, once more
- *Say it:* say *vyastaḥ*
- *Recall:* say the Sanskrit for thirsty, then the Sanskrit for ready, then say *vyastaḥ* again

Before you move on

What does व्यस्तः mean? ("Busy".) Say it once more.

188.4 निर्मलः (nirmalaḥ) — spotless, pure

Before the new one: say the Sanskrit for ready, then the Sanskrit for busy.

You'll want to know: निर्मलः

निर्मलः — *nirmalaḥ* — "spotless, pure".

The word, taken apart — its roots and family

nirmala is built on *nis*, "without", and *mala*, "dirt, impurity" (MW; CDIAL 7366). *Mala* itself lives on as Hindi *mal*, "dirt" (CDIAL 9899).

What you've built

One more word for this chapter.

Your turn

- *Say it: nirmalaḥ*
- *Say it: nirmalaḥ*, once more
- *Say it:* say *nirmalaḥ*
- *Recall:* say the Sanskrit for ready, then the Sanskrit for busy, then say *nirmalaḥ* again

Before you move on

What does निर्मलः mean? ("Spotless, pure".) Say it once more.

188.5 उज्ज्वलः (ujjvalaḥ) — bright, shining

Before the new one: say the Sanskrit for busy, then the Sanskrit for spotless.

You'll want to know: उज्ज्वलः

उज्ज्वलः — *ujjvalaḥ* — "bright, shining".

The word, taken apart — its roots and family

ujjvala is built on *ud*, "up", and the root √jval, "to blaze, glow" (MW): "blazing up". It lives on as Hindi *ujlā*, "bright" (CDIAL 1670).

What you've built

One more word for this chapter.

Your turn

- *Say it: ujjvalaḥ*
- *Say it: ujjvalaḥ*, once more
- *Say it:* say *ujjvalaḥ*
- *Recall:* say the Sanskrit for busy, then the Sanskrit for spotless, then say *ujjvalaḥ* again

Before you move on

What does उज्ज्वलः mean? ("Bright, shining".) Say it once more.

Chapter 189

Trunk, Hanging basket, Basket, Mat, Carpet

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a trunk, a hanging basket, a basket, a mat and a carpet.
>
> *Complete the last lesson of chapter 189: I can say a trunk, a hanging basket, a basket, a mat and a carpet.*

189.1 मञ्जूषा (mañjūṣā) — a trunk, a chest

Before the new one: say the Sanskrit for spotless, then the Sanskrit for bright.

You'll want to know: मञ्जूषा

मञ्जूषा — *mañjūṣā* — "a trunk, a chest".

The word, taken apart — its roots and family

mañjūṣā may be borrowed from Dravidian: CDIAL 9721 says "possibly", and DEDR 4640 compares Tamil *mañcikai*, "chest, box", with a question mark. Pali has it as *mañjūsā*, "casket".

What you've built

One more word for this chapter.

Your turn

- *Say it: mañjūṣā*
- *Say it: mañjūṣā*, once more
- *Say it:* say *mañjūṣā*
- *Recall:* say the Sanskrit for spotless, then the Sanskrit for bright, then say *mañjūṣā* again

Before you move on

What does मञ्जूषा mean? ("A trunk, a chest".) Say it once more.

189.2 शिक्यम् (śikyam) — a hanging basket

Before the new one: say the Sanskrit for bright, then the Sanskrit for a trunk.

You'll want to know: शिक्यम्

शिक्यम् — *śikyam* — "a hanging basket".

The word, taken apart — its roots and family

śikya is a rope loop hung from a pole or yoke to carry a load (MW), and so a hanging basket. Neither MW nor CDIAL 12427 gives a derivation, so its origin is uncertain; CDIAL compares *śic*, "sling, net". It lives on as Hindi *chīkā*, "hanging net".

What you've built

One more word for this chapter.

Your turn

- *Say it: śikyam*
- *Say it: śikyam*, once more
- *Say it:* say *śikyam*

- *Recall:* say the Sanskrit for bright, then the Sanskrit for a trunk, then say *śikyam* again

Before you move on

What does शिक्यम् mean? ("A hanging basket".) Say it once more.

189.3 पिटकम् (piṭakam) — a basket

Before the new one: say the Sanskrit for a trunk, then the Sanskrit for a hanging basket.

You'll want to know: पिटकम्

पिटकम् — *piṭakam* — "a basket".

The word, taken apart — its roots and family

piṭaka is probably borrowed from a non-Indo-Aryan language: CDIAL 8164 calls it "non-Aryan", while MW derives it from a root √piṭ, "to gather". The Buddhist canon is the *Tipiṭaka*, "three baskets".

What you've built

One more word for this chapter.

Your turn

- *Say it: piṭakam*
- *Say it: piṭakam*, once more
- *Say it:* say *piṭakam*
- *Recall:* say the Sanskrit for a trunk, then the Sanskrit for a hanging basket, then say *piṭakam* again

Before you move on

What does पिटकम् mean? ("A basket".) Say it once more.

189.4 कटः (kaṭaḥ) — a mat

Before the new one: say the Sanskrit for a hanging basket, then the Sanskrit for a basket.

You'll want to know: कटः

कटः — *kaṭaḥ* — "a mat".

The word, taken apart — its roots and family

kaṭa is a twist of straw and so a straw mat. MW thinks it may stand for *karta* from √kṛt, "to spin, twist", and CDIAL 2629 supports a derivation of that kind. In Hindi the word became *kaṛā*, "ring, bracelet".

What you've built

One more word for this chapter.

Your turn

- *Say it: kaṭaḥ*
- *Say it: kaṭaḥ*, once more
- *Say it:* say *kaṭaḥ*
- *Recall:* say the Sanskrit for a hanging basket, then the Sanskrit for a basket, then say *kaṭaḥ* again

Before you move on

What does कटः mean? ("A mat".) Say it once more.

189.5 आस्तरणम् (āstaraṇam) — a carpet, a spread

Before the new one: say the Sanskrit for a basket, then the Sanskrit for a mat.

You'll want to know: आस्तरणम्

आस्तरणम् — *āstaraṇam* — "a carpet, a spread".

The word, taken apart — its roots and family

āstaraṇa is built on *ā-* and the root √stṛ, "to spread, strew" (MW): a carpet is what is spread out. In the Atharvaveda it is a layer of sacred grass (CDIAL 1506), and Marathi keeps it as *ãthrūṇ*, "bedspread".

What you've built

One more word for this chapter.

Your turn

- *Say it: āstaraṇam*
- *Say it: āstaraṇam*, once more
- *Say it:* say *āstaraṇam*
- *Recall:* say the Sanskrit for a basket, then the Sanskrit for a mat, then say *āstaraṇam* again

Before you move on

What does आस्तरणम् mean? ("A carpet, a spread".) Say it once more.

Chapter 190

Black gram, Barley, Date palm's fruit, Amla, Rose apple

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say black gram, barley, a date palm's fruit, an amla and a rose apple.
>
> *Complete the last lesson of chapter 190: I can say black gram, barley, a date palm's fruit, an amla and a rose apple.*

190.1 माषः (māṣaḥ) — black gram

Before the new one: say the Sanskrit for a mat, then the Sanskrit for a carpet.

You'll want to know: माषः

माषः — *māṣaḥ* — "black gram".

The word, taken apart — its roots and family

māṣa is already in the Rigveda as "bean" (CDIAL 10097), and later names black gram in particular (MW). MW gives no derivation for it, so its origin is uncertain. The same word also named a small weight of gold.

What you've built

One more word for this chapter.

Your turn

- *Say it: māṣaḥ*
- *Say it: māṣaḥ*, once more
- *Say it:* say *māṣaḥ*
- *Recall:* say the Sanskrit for a mat, then the Sanskrit for a carpet, then say *māṣaḥ* again

Before you move on

What does माषः mean? ("Black gram".) Say it once more.

190.2 यवः (yavaḥ) — barley

Before the new one: say the Sanskrit for a carpet, then the Sanskrit for black gram.

You'll want to know: यवः

यवः — *yavaḥ* — "barley".

The word, taken apart — its roots and family

yava is an inherited grain word: MW compares Avestan *yava* and Greek *zeia*, a kind of wheat, and says it first meant any grain. It lives on as Hindi *jau*, "barley" (CDIAL 10431).

What you've built

One more word for this chapter.

Your turn

- *Say it: yavaḥ*
- *Say it: yavaḥ*, once more
- *Say it:* say *yavaḥ*
- *Recall:* say the Sanskrit for a carpet, then the Sanskrit for black gram, then say *yavaḥ* again

Before you move on

What does यवः mean? ("Barley".) Say it once more.

190.3 खर्जूरम् (kharjūram) — a date palm's fruit

Before the new one: say the Sanskrit for black gram, then the Sanskrit for barley.

You'll want to know: खर्जूरम्

खर्जूरम् — *kharjūram* — "a date palm's fruit".

The word, taken apart — its roots and family

kharjūra names the date palm as early as the Taittirīya Saṃhitā, and its fruit later (CDIAL 3828). MW offers no derivation, and its origin is uncertain. It lives on as Hindi *khajūr*.

What you've built

One more word for this chapter.

Your turn

- *Say it: kharjūram*
- *Say it: kharjūram*, once more
- *Say it:* say *kharjūram*
- *Recall:* say the Sanskrit for black gram, then the Sanskrit for barley, then say *kharjūram* again

Before you move on

What does खर्जूरम् mean? ("A date palm's fruit".) Say it once more.

190.4 आमलकम् (āmalakam) — an amla, gooseberry

Before the new one: say the Sanskrit for barley, then the Sanskrit for a date palm's fruit.

You'll want to know: आमलकम्

आमलकम् — *āmalakam* — "an amla, gooseberry".

The word, taken apart — its roots and family

āmalaka names the emblic tree and its sour fruit, already in the Chāndogya Upaniṣad (CDIAL 1247). MW gives no derivation, so its origin is uncertain. CDIAL lists Punjabi *āmlā* among its descendants.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *āmalakam*
- *Say it:* *āmalakam*, once more
- *Say it:* say *āmalakam*
- *Recall:* say the Sanskrit for barley, then the Sanskrit for a date palm's fruit, then say *āmalakam* again

Before you move on

What does आमलकम् mean? ("An amla, gooseberry".) Say it once more.

190.5 जम्बूफलम् (jambūphalam) — a rose apple

Before the new one: say the Sanskrit for a date palm's fruit, then the Sanskrit for an amla.

You'll want to know: जम्बूफलम्

जम्बूफलम् — *jambūphalam* — "a rose apple".

The word, taken apart — its roots and family

jambūphala is a compound of *jambū*, "the rose-apple tree" (MW), and *phala*, "fruit": the tree's fruit. *Jambū* lives on as Hindi *jām* (CDIAL 5131).

What you've built

One more word for this chapter.

Your turn

- *Say it: jambūphalam*
- *Say it: jambūphalam*, once more
- *Say it:* say *jambūphalam*

191.1 शरावः (śarāvaḥ) — an earthen dish

Before the new one: say the Sanskrit for an amla, gooseberry, then the Sanskrit for a rose apple.

You'll want to know: शरावः

शरावः — *śarāvaḥ* — "an earthen dish".

The word, taken apart — its roots and family

śarāva is a shallow dish or platter of earthenware, and also its flat lid (MW). Neither MW nor CDIAL 12334 gives a derivation, so its origin is uncertain. It lives on as Hindi *sarā*, "earthen cover".

What you've built

One more word for this chapter.

Your turn

- *Say it: śarāvaḥ*
- *Say it: śarāvaḥ*, once more
- *Say it:* say *śarāvaḥ*
- *Recall:* say the Sanskrit for an amla, gooseberry, then the Sanskrit for a rose apple, then say *śarāvaḥ* again

Before you move on

What does शरावः mean? ("An earthen dish".) Say it once more.

191.2 कुम्भः (kumbhaḥ) — a pitcher

Before the new one: say the Sanskrit for a rose apple, then the Sanskrit for an earthen dish.

You'll want to know: कुम्भः

कुम्भः — *kumbhaḥ* — "a pitcher".

The word, taken apart — its roots and family

kumbha is a Rigvedic word for a water jar (CDIAL 3308). MW compares Greek *kymbē*, "cup", and CDIAL compares Avestan *xumba-*, "pot", so it is an old word shared with Iranian. *Kumbha* is also the sign Aquarius, the water-carrier.

What you've built

One more word for this chapter.

Your turn

- *Say it: kumbhaḥ*
- *Say it: kumbhaḥ*, once more
- *Say it:* say *kumbhaḥ*

- *Recall:* say the Sanskrit for a rose apple, then the Sanskrit for an earthen dish, then say *kumbhaḥ* again

Before you move on

What does कुम्भः mean? ("A pitcher".) Say it once more.

191.3 उलूखलम् (ulūkhalam) — a mortar

Before the new one: say the Sanskrit for an earthen dish, then the Sanskrit for a pitcher.

You'll want to know: उलूखलम्

उलूखलम् — *ulūkhalam* — "a mortar".

The word, taken apart — its roots and family

ulūkhala is a wooden mortar, already in the Rigveda. CDIAL 2360 takes it as borrowed from Dravidian, following Mayrhofer, and notes it shares the ending -*ala* with *musala*, "pestle". Punjabi *ukkhal*, "small wooden mortar", comes from a variant of it.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ulūkhalam*
- *Say it:* *ulūkhalam*, once more
- *Say it:* say *ulūkhalam*
- *Recall:* say the Sanskrit for an earthen dish, then the Sanskrit for a pitcher, then say *ulūkhalam* again

Before you move on

What does उलूखलम् mean? ("A mortar".) Say it once more.

191.4 मुसलम् (musalam) — a pestle

Before the new one: say the Sanskrit for a pitcher, then the Sanskrit for a mortar.

You'll want to know: मुसलम्

मुसलम् — *musalam* — "a pestle".

The word, taken apart — its roots and family

musala is probably not an Indo-Aryan word: CDIAL 10223 says its sounds point to a non-Aryan origin, with Bloch suggesting Dravidian. It lives on as Hindi *mūsal*, "small pestle".

What you've built

One more word for this chapter.

Your turn

- *Say it: musalam*
- *Say it: musalam*, once more
- *Say it:* say *musalam*
- *Recall:* say the Sanskrit for a pitcher, then the Sanskrit for a mortar, then say *musalam* again

Before you move on

What does मुसलम् mean? ("A pestle".) Say it once more.

191.5 चालनी (cālanī) — a sieve

Before the new one: say the Sanskrit for a mortar, then the Sanskrit for a pestle.

You'll want to know: चालनी

चालनी — *cālanī* — "a sieve".

The word, taken apart — its roots and family

cālanī is built on the root √cal, "to move, shake" (MW): a sieve is what you shake to sift. CDIAL 4771 lists it, and it lives on as Hindi *cālnī*, "sieve".

What you've built

One more word for this chapter.

Your turn

- *Say it: cālanī*
- *Say it: cālanī*, once more
- *Say it:* say *cālanī*
- *Recall:* say the Sanskrit for a mortar, then the Sanskrit for a pestle, then say *cālanī* again

Before you move on

What does चालनी mean? ("A sieve".) Say it once more.

192.1 हारः (hāraḥ) — a necklace

Before the new one: say the Sanskrit for a pestle, then the Sanskrit for a sieve.

You'll want to know: हारः

हारः — *hāraḥ* — "a necklace".

The word, taken apart — its roots and family

MW lists "necklace, string of pearls" among the senses of *hāra*, a noun of the root √hṛ, "to carry, take". CDIAL 14059 treats the necklace word as a separate *hāra*, so the link is not settled. It lives on as Punjabi and Gujarati *hār*, "necklace".

What you've built

One more word for this chapter.

Your turn

- *Say it: hāraḥ*
- *Say it: hāraḥ*, once more
- *Say it:* say *hāraḥ*
- *Recall:* say the Sanskrit for a pestle, then the Sanskrit for a sieve, then say *hāraḥ* again

Before you move on

What does हारः mean? ("A necklace".) Say it once more.

192.2 मुकुटम् (mukuṭam) — a crown

Before the new one: say the Sanskrit for a sieve, then the Sanskrit for a necklace.

You'll want to know: मुकुटम्

मुकुटम् — *mukuṭam* — "a crown".

The word, taken apart — its roots and family

mukuṭa was borrowed from Dravidian, CDIAL 10144 says, comparing Tamil *mukaṭu*, "top, highest part" (DEDR 4888). It lives on as Hindi *mauṛ*, the crown a bridegroom wears.

What you've built

One more word for this chapter.

Your turn

- *Say it: mukuṭam*
- *Say it: mukuṭam*, once more
- *Say it:* say *mukuṭam*
- *Recall:* say the Sanskrit for a sieve, then the Sanskrit for a necklace, then say *mukuṭam* again

Before you move on

What does मुकुटम् mean? ("A crown".) Say it once more.

192.3 अधोवस्त्रम् (adhovastram) — a lower garment

Before the new one: say the Sanskrit for a necklace, then the Sanskrit for a crown.

You'll want to know: अधोवस्त्रम्

अधोवस्त्रम् — *adhovastram* — "a lower garment".

The word, taken apart — its roots and family

adhovastra is a compound of *adhas*, "below", and *vastra*, "garment", built on the root √vas, "to wear" (MW). MW compares √vas with Latin *vestis*, "garment", and English *wear*; MW does not list this compound itself.

What you've built

One more word for this chapter.

Your turn

- *Say it: adhovastram*
- *Say it: adhovastram*, once more
- *Say it:* say *adhovastram*
- *Recall:* say the Sanskrit for a necklace, then the Sanskrit for a crown, then say *adhovastram* again

Before you move on

What does अधोवस्त्रम् mean? ("A lower garment".) Say it once more.

192.4 परिधानम् (paridhānam) — clothing

Before the new one: say the Sanskrit for a crown, then the Sanskrit for a lower garment.

You'll want to know: परिधानम्

परिधानम् — *paridhānam* — "clothing".

The word, taken apart — its roots and family

paridhāna is built on *pari*, "around", and the root √dhā, "to put, place" (MW): clothing is what is put round you. MW compares √dhā with English *do*, and CDIAL 7838 traces Hindi *pahirnā*, "clothes", to *paridhāna*.

What you've built

One more word for this chapter.

Your turn

- *Say it: paridhānam*
- *Say it: paridhānam*, once more
- *Say it:* say *paridhānam*
- *Recall:* say the Sanskrit for a crown, then the Sanskrit for a lower garment, then say *paridhānam* again

Before you move on

What does परिधानम् mean? ("Clothing".) Say it once more.

192.5 वसनम् (vasanam) — a garment

Before the new one: say the Sanskrit for a lower garment, then the Sanskrit for clothing.

You'll want to know: वसनम्

वसनम् — *vasanam* — "a garment".

The word, taken apart — its roots and family

vasana is built on the root √vas, "to wear, put on" (MW; CDIAL 11436), the root of *vastra*. MW compares Latin *vestis*, "garment", and English *wear*, so it is an inherited Indo-European root.

What you've built

One more word for this chapter.

Your turn

- *Say it: vasanam*
- *Say it: vasanam*, once more
- *Say it:* say *vasanam*
- *Recall:* say the Sanskrit for a lower garment, then the Sanskrit for clothing, then say *vasanam* again

Before you move on

What does वसनम् mean? ("A garment".) Say it once more.

Chapter 193

Purchase, Sale, Object, Item, Tool

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a purchase, a sale, an object, an item and a tool.
>
> *Complete the last lesson of chapter 193: I can say a purchase, a sale, an object, an item and a tool.*

193.1 क्रयः (krayaḥ) — a purchase

Before the new one: say the Sanskrit for clothing, then the Sanskrit for a garment.

You'll want to know: क्रयः

क्रयः — *krayaḥ* — "a purchase".

The word, taken apart — its roots and family

kraya is built on the root √krī, "to buy", whose present is *krīṇāti* (MW; CDIAL 3581). MW compares Greek *priamai*, "I buy". The verb lives on as Bengali *kinā*, "to buy" (CDIAL 3594), though most modern languages replaced it with other verbs.

What you've built

One more word for this chapter.

Your turn

- *Say it: krayaḥ*
- *Say it: krayaḥ*, once more
- *Say it:* say *krayaḥ*
- *Recall:* say the Sanskrit for clothing, then the Sanskrit for a garment, then say *krayaḥ* again

Before you move on

What does क्रयः mean? ("A purchase".) Say it once more.

193.2 विक्रयः (vikrayaḥ) — a sale

Before the new one: say the Sanskrit for a garment, then the Sanskrit for a purchase.

You'll want to know: विक्रयः

विक्रयः — *vikrayaḥ* — "a sale".

The word, taken apart — its roots and family

vikraya is built on *vi-* and the root √krī, "to buy" (MW): *vi-* turns buying into selling. CDIAL 11638 lists Hindi *bikrī*, "sale", under it, possibly by way of a learned form.

What you've built

One more word for this chapter.

Your turn

- *Say it: vikrayaḥ*
- *Say it: vikrayaḥ*, once more
- *Say it:* say *vikrayaḥ*
- *Recall:* say the Sanskrit for a garment, then the Sanskrit for a purchase, then say *vikrayaḥ* again

Before you move on

What does विक्रयः mean? ("A sale".) Say it once more.

193.3 वस्तु (vastu) — an object, a thing

Before the new one: say the Sanskrit for a purchase, then the Sanskrit for a sale.

You'll want to know: वस्तु

वस्तु — *vastu* — "an object, a thing".

The word, taken apart — its roots and family

vastu is built on the root √vas, "to dwell, abide" (MW), the root of *vasāmi*, "I live", one of your first verbs. It first meant "the seat or place of something", then "a really existing thing" (CDIAL 11449).

What you've built

One more word for this chapter.

Your turn

- *Say it: vastu*
- *Say it: vastu*, once more
- *Say it:* say *vastu*
- *Recall:* say the Sanskrit for a purchase, then the Sanskrit for a sale, then say *vastu* again

Before you move on

What does वस्तु mean? ("An object, a thing".) Say it once more.

193.4 पदार्थः (padārthaḥ) — an item, a thing

Before the new one: say the Sanskrit for a sale, then the Sanskrit for an object.

You'll want to know: पदार्थः

पदार्थः — *padārthaḥ* — "an item, a thing".

The word, taken apart — its roots and family

padārtha is built from *pada*, "word", and *artha*, "meaning" (MW). It first meant "the meaning of a word", then the thing the word stands for, and so "an item, a thing".

What you've built

One more word for this chapter.

Your turn

- *Say it: padārthaḥ*
- *Say it: padārthaḥ*, once more
- *Say it:* say *padārthaḥ*
- *Recall:* say the Sanskrit for a sale, then the Sanskrit for an object, then say *padārthaḥ* again

Before you move on

What does पदार्थः mean? ("An item, a thing".) Say it once more.

193.5 उपकरणम् (upakaraṇam) — a tool, an instrument

Before the new one: say the Sanskrit for an object, then the Sanskrit for an item.

You'll want to know: उपकरणम्

उपकरणम् — *upakaraṇam* — "a tool, an instrument".

The word, taken apart — its roots and family

upakaraṇa is built on *upa-*, “towards”, and the root √kṛ, “to do” (MW). It means both “doing someone a service” and “an implement”, the thing that does the work for you (CDIAL 2138).

What you’ve built

One more word for this chapter.

Your turn

- *Say it: upakaraṇam*
- *Say it: upakaraṇam*, once more
- *Say it:* say *upakaraṇam*
- *Recall:* say the Sanskrit for an object, then the Sanskrit for an item, then say *upakaraṇam* again

Before you move on

What does उपकरणम् mean? (“A tool, an instrument”.) Say it once more.

Chapter 194

Prize, Invitation, Assembly, Discussion group, Fair

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a prize, an invitation, an assembly, a discussion group and a fair.
>
> *Complete the last lesson of chapter 194: I can say a prize, an invitation, an assembly, a discussion group and a fair.*

194.1 पारितोषिकम् (pāritoṣikam) — a prize

Before the new one: say the Sanskrit for an item, then the Sanskrit for a tool.

You'll want to know: पारितोषिकम्

पारितोषिकम् — *pāritoṣikam* — "a prize".

The word, taken apart — its roots and family

pāritoṣika comes from *paritoṣa*, "delight, satisfaction", built on *pari-* and the root √tuṣ, "to be pleased" (MW). It first meant "gratifying", and then "a reward", the thing that pleases.

What you've built

One more word for this chapter.

Your turn

- *Say it: pāritoṣikam*
- *Say it: pāritoṣikam*, once more
- *Say it:* say *pāritoṣikam*
- *Recall:* say the Sanskrit for an item, then the Sanskrit for a tool, then say *pāritoṣikam* again

Before you move on

What does पारितोषिकम् mean? ("A prize".) Say it once more.

194.2 निमन्त्रणम् (nimantraṇam) — an invitation

Before the new one: say the Sanskrit for a tool, then the Sanskrit for a prize.

You'll want to know: निमन्त्रणम्

निमन्त्रणम् — *nimantraṇam* — "an invitation".

The word, taken apart — its roots and family

nimantraṇa is built on *ni-* and *mantrayate*, "speaks, takes counsel", a verb MW makes from *mantra*, which is built on the root √man, "to think". MW glosses it "invitation, a summons", and Hindi took it over as *nimantraṇ*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nimantraṇam*
- *Say it: nimantraṇam*, once more
- *Say it:* say *nimantraṇam*

- *Recall:* say the Sanskrit for a tool, then the Sanskrit for a prize, then say *nimantraṇam* again

Before you move on

What does निमन्त्रणम् mean? ("An invitation".) Say it once more.

194.3 सभा (sabhā) — an assembly, a meeting

Before the new one: say the Sanskrit for a prize, then the Sanskrit for an invitation.

You'll want to know: सभा

सभा — *sabhā* — "an assembly, a meeting".

The word, taken apart — its roots and family

sabhā is of unknown derivation, MW says, though probably connected with *sa-*, "together". MW compares Gothic *sibja*, "kinship", and English *gossip*, which MW also cites in its older form *god-sib*. It is a Rigvedic word for an assembly or hall (CDIAL 13167).

What you've built

One more word for this chapter.

Your turn

- *Say it: sabhā*
- *Say it: sabhā*, once more
- *Say it:* say *sabhā*
- *Recall:* say the Sanskrit for a prize, then the Sanskrit for an invitation, then say *sabhā* again

Before you move on

What does सभा mean? ("An assembly, a meeting".) Say it once more.

194.4 गोष्ठी (goṣṭhī) — a discussion group

Before the new one: say the Sanskrit for an invitation, then the Sanskrit for an assembly.

You'll want to know: गोष्ठी

गोष्ठी — *goṣṭhī* — "a discussion group".

The word, taken apart — its roots and family

goṣṭhī comes from *goṣṭha*, a cow-pen, built on *go*, "cow", and *stha*, "standing" (MW). The cow-pen became a meeting place, then an assembly, then a talk (CDIAL 4339). Marathi *goṭh* now means "a tale".

What you've built

One more word for this chapter.

Your turn

- *Say it: goṣṭhī*
- *Say it: goṣṭhī*, once more
- *Say it:* say *goṣṭhī*

Before you move on

What does गोष्ठी mean? ("A discussion group".) Say it once more.

194.5 मेलकः (melakaḥ) — a fair, a gathering

Before the new one: say the Sanskrit for an assembly, then the Sanskrit for a discussion group.

You'll want to know: मेलकः

मेलकः — *melakaḥ* — "a fair, a gathering".

The word, taken apart — its roots and family

melaka is *mela*, "meeting", built on the root √mil, "to meet" (MW), with the suffix *-ka*. It lives on as Hindi *melā*, "fair" (CDIAL 10331).

What you've built

One more word for this chapter.

Your turn

- *Say it: melakaḥ*
- *Say it: melakaḥ*, once more
- *Say it:* say *melakaḥ*

195.1 पत्तनम् (pattanam) — a port town

Before the new one: say the Sanskrit for a discussion group, then the Sanskrit for a fair.

You'll want to know: पत्तनम्

पत्तनम् — *pattanam* — "a port town".

The word, taken apart — its roots and family

The origin of *pattana* is disputed. CDIAL 7705 reports that it is probably borrowed from Dravidian, but notes that its sense "ferry" in several modern languages supports a native **partana-*, related to Latin *portus*, "harbour"; the two may have merged. It lives on as Hindi *pāṭan*, "town".

What you've built

One more word for this chapter.

Your turn

- *Say it: pattanam*
- *Say it: pattanam*, once more
- *Say it:* say *pattanam*
- *Recall:* say the Sanskrit for a discussion group, then the Sanskrit for a fair, then say *pattanam* again

Before you move on

What does पत्तनम् mean? ("A port town".) Say it once more.

195.2 राजधानी (rājadhānī) — a capital

Before the new one: say the Sanskrit for a fair, then the Sanskrit for a port town.

You'll want to know: राजधानी

राजधानी — *rājadhānī* — "a capital".

The word, taken apart — its roots and family

rājadhānī is a compound of *rāja-*, "king", and *dhānī*, "receptacle, seat", built on the root √dhā, "to put, place" (MW): the place where the king is set. MW lists it as a royal residence, and modern languages use it for a capital city.

What you've built

One more word for this chapter.

Your turn

- *Say it: rājadhānī*
- *Say it: rājadhānī*, once more
- *Say it:* say *rājadhānī*

Before you move on

What does राजधानी mean? ("A capital".) Say it once more.

195.3 जनपदः (janapadaḥ) — a district, a region

Before the new one: say the Sanskrit for a port town, then the Sanskrit for a capital.

You'll want to know: जनपदः

जनपदः — *janapadaḥ* — "a district, a region".

The word, taken apart — its roots and family

janapada is a compound of *jana*, "people", and *pada*, "footing, place" (MW). In the Śatapatha Brāhmaṇa it means "a people", and in the Mahābhārata "a country" (CDIAL 5101).

What you've built

One more word for this chapter.

Your turn

- *Say it: janapadaḥ*
- *Say it: janapadaḥ*, once more
- *Say it:* say *janapadaḥ*

What does जनपदः mean? ("A district, a region".) Say it once more.

195.4 प्रान्तः (prāntaḥ) — a province, a border

Before the new one: say the Sanskrit for a capital, then the Sanskrit for a district.

You'll want to know: प्रान्तः

प्रान्तः — *prāntaḥ* — "a province, a border".

The word, taken apart — its roots and family

prānta is *pra* with *anta*, "end, limit" (MW), and so "edge, border" (CDIAL 8940); a province is the land out at the edge. MW compares *anta* with English *end*, an inherited Indo-European word.

What you've built

One more word for this chapter.

Your turn

- *Say it: prāntaḥ*
- *Say it: prāntaḥ*, once more
- *Say it:* say *prāntaḥ*
- *Recall:* say the Sanskrit for a capital, then the Sanskrit for a district, then say *prāntaḥ* again

Before you move on

What does प्रान्तः mean? ("A province, a border".) Say it once more.

195.5 सीमा (sīmā) — a boundary

Before the new one: say the Sanskrit for a district, then the Sanskrit for a province.

You'll want to know: सीमा

सीमा — *sīmā* — "a boundary".

The word, taken apart — its roots and family

sīmā comes from *sīman*, which in the Atharvaveda means "the parting of the hair" (CDIAL 13435): a line that divides. Later it means "boundary" (MW). It lives on as Gujarati *sīm*, "boundary of a village".

What you've built

One more word for this chapter.

Your turn

- *Say it:* *sīmā*
- *Say it:* *sīmā*, once more
- *Say it:* say *sīmā*

Before you move on

What does सीमा mean? ("A boundary".) Say it once more.

Chapter 196

Copper, Rock, Ocean, Stream, Cave

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say copper, a rock, the ocean, a stream and a cave.
>
> *Complete the last lesson of chapter 196: I can say copper, a rock, the ocean, a stream and a cave.*

196.1 ताम्रम् (tāmram) — copper

Before the new one: say the Sanskrit for a province, then the Sanskrit for a boundary.

You'll want to know: ताम्रम्

ताम्रम् — *tāmram* — "copper".

The word, taken apart — its roots and family

tāmra first meant "dark red, copper-coloured", then the metal itself (CDIAL 5779). Its origin is uncertain: MW and CDIAL both point to a root √tam, CDIAL with a question mark. It lives on as Hindi *tāmā*, "copper".

What you've built

One more word for this chapter.

Your turn

- *Say it: tāmram*
- *Say it: tāmram*, once more
- *Say it:* say *tāmram*
- *Recall:* say the Sanskrit for a province, then the Sanskrit for a boundary, then say *tāmram* again

Before you move on

What does ताम्रम् mean? ("Copper".) Say it once more.

196.2 पाषाणः (pāṣāṇaḥ) — a rock, a stone

Before the new one: say the Sanskrit for a boundary, then the Sanskrit for copper.

You'll want to know: पाषाणः

पाषाणः — *pāṣāṇaḥ* — "a rock, a stone".

The word, taken apart — its roots and family

pāṣāṇa is of uncertain origin: MW reports a grammarian's derivation from a root √paṣ, and CDIAL 8138 finds its later sound changes unexplained. It lives on as Hindi *pāhan*, "stone".

What you've built

One more word for this chapter.

Your turn

- *Say it: pāṣāṇaḥ*
- *Say it: pāṣāṇaḥ*, once more
- *Say it:* say *pāṣāṇaḥ*

196.3 रत्नाकरः (ratnākaraḥ) — the ocean

Before the new one: say the Sanskrit for copper, then the Sanskrit for a rock.

You'll want to know: रत्नाकरः

रत्नाकरः — *ratnākaraḥ* — "the ocean".

The word, taken apart — its roots and family

ratnākara is a compound of *ratna*, "jewel", and *ākara*, "mine, store" (MW): a jewel-mine. Poets called the ocean the great store of jewels (CDIAL 10601).

What you've built

One more word for this chapter.

Your turn

196.4 सरित् (sarit) — a stream, a river

Before the new one: say the Sanskrit for a rock, then the Sanskrit for the ocean.

You'll want to know: सरित्

सरित् — *sarit* — "a stream, a river".

The word, taken apart — its roots and family

sarit is built on the root √sṛ, "to run, flow" (MW): a stream is what runs. It is a Rigvedic word (CDIAL 13261), and Marathi *sarī*, "water-channel", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: sarit*

196.5 गुहा (guhā) — a cave

Before the new one: say the Sanskrit for the ocean, then the Sanskrit for a stream.

You'll want to know: गुहा

गुहा — *guhā* — "a cave".

The word, taken apart — its roots and family

guhā is built on the root √guh, "to hide, conceal" (MW): a cave is a hiding place (CDIAL 4220). The Telugu, Malayalam and Kannada words for cave were borrowed from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: guhā*
- *Say it: guhā*, once more
- *Say it:* say *guhā*
- *Recall:* say the Sanskrit for the ocean, then the Sanskrit for a stream, then say *guhā* again

Before you move on

What does गुहा mean? ("A cave".) Say it once more.

196.6 Words from chapters 191-193 — a first pass

Say the words for a stream and a cave.

Your turn

Say these aloud:

- an earthen dish, a pitcher, a mortar, a pestle, a sieve
- a necklace, a crown, a lower garment, clothing, a garment
- a purchase, a sale, an object, an item, a tool

Before you move on

An earthen dish? (शरावः, *śarāvaḥ.*) A pitcher? (कुम्भः, *kumbhaḥ.*) A mortar? (उलूखलम्, *ulūkhalam.*) A pestle? (मुसलम्, *musalam.*) A sieve? (चालनी, *cālanī.*) A necklace? (हारः, *hāraḥ.*) A crown? (मुकुटम्, *mukuṭam.*) A lower garment? (अधोवस्त्रम्, *adhovastram.*) Clothing? (परिधानम्, *paridhānam.*) A garment? (वसनम्, *vasanam.*) A purchase? (क्रयः, *krayaḥ.*) A sale? (विक्रयः, *vikrayaḥ.*) An object? (वस्तु, *vastu.*) An item? (पदार्थः, *padārthaḥ.*) A tool? (उपकरणम्, *upakaraṇam.*)

196.7 Words from chapters 194-196 — a second pass

Say the words for a prize and an invitation.

Your turn

Say these aloud:

- a prize, an invitation, an assembly, a discussion group, a fair
- a port town, a capital, a district, a province, a boundary
- copper, a rock, the ocean, a stream, a cave

Before you move on

A prize? (पारितोषिकम्, *pāritoṣikam.*) An invitation? (निमन्त्रणम्, *nimantraṇam.*) An assembly? (सभा, *sabhā.*) A discussion group? (गोष्ठी, *goṣṭhī.*) A fair? (मेलकः, *melakaḥ.*) A port town? (पत्तनम्, *pattanam.*) A capital? (राजधानी, *rājadhānī.*) A district? (जनपदः, *janapadaḥ.*) A province? (प्रान्तः, *prāntaḥ.*) A boundary? (सीमा, *sīmā.*) Copper? (ताम्रम्, *tāmram.*) A rock? (पाषाणः, *pāṣāṇaḥ.*) The ocean? (रत्नाकरः, *ratnākaraḥ.*) A stream? (सरित्, *sarit.*) A cave? (गुहा, *guhā.*)

Chapter 197

Bamboo grove, Rainbow, Hail, Dew, Moonlight

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a bamboo grove, a rainbow, hail, dew and moonlight.
>
> *Complete the last lesson of chapter 197: I can say a bamboo grove, a rainbow, hail, dew and moonlight.*

197.1 वेणुवनम् (veṇuvanam) — a bamboo grove

Before the new one: say the Sanskrit for a stream, a river, then the Sanskrit for a cave.

You'll want to know: वेणुवनम्

वेणुवनम् — *veṇuvanam* — "a bamboo grove".

The word, taken apart — its roots and family

veṇuvana is a compound of *veṇu*, "bamboo, reed" (CDIAL 12096), and *vana*, "forest" (MW). *Vana* lives on as Hindi *ban*, "forest" (CDIAL 11258).

What you've built

One more word for this chapter.

Your turn

- *Say it: veṇuvanam*
- *Say it: veṇuvanam*, once more
- *Say it:* say *veṇuvanam*
- *Recall:* say the Sanskrit for a stream, a river, then the Sanskrit for a cave, then say *veṇuvanam* again

Before you move on

What does वेणुवनम् mean? ("A bamboo grove".) Say it once more.

197.2 इन्द्रधनुः (indradhanuḥ) — a rainbow

Before the new one: say the Sanskrit for a cave, then the Sanskrit for a bamboo grove.

You'll want to know: इन्द्रधनुः

इन्द्रधनुः — *indradhanuḥ* — "a rainbow".

The word, taken apart — its roots and family

indradhanus is built from *Indra*, the god of thunder and rain, and *dhanus*, "bow" (MW): the rainbow is Indra's bow. Hindi and Telugu took the compound over unchanged.

What you've built

One more word for this chapter.

Your turn

- *Say it: indradhanuḥ*
- *Say it: indradhanuḥ*, once more
- *Say it:* say *indradhanuḥ*
- *Recall:* say the Sanskrit for a cave, then the Sanskrit for a bamboo grove, then say *indradhanuḥ* again

Before you move on

What does इन्द्रधनुः mean? ("A rainbow".) Say it once more.

197.3 करका (karakā) — hail

Before the new one: say the Sanskrit for a bamboo grove, then the Sanskrit for a rainbow.

You'll want to know: करका

करका — *karakā* — "hail".

The word, taken apart — its roots and family

MW lists *karaka* as "hail", and CDIAL 2782 knows the word only from the old lexicons. Its origin is uncertain, but it lives on as Gujarati *karā*, "hail"; CDIAL also lists Marathi *gārā*, with a query.

What you've built

One more word for this chapter.

Your turn

- *Say it: karakā*
- *Say it: karakā*, once more
- *Say it:* say *karakā*
- *Recall:* say the Sanskrit for a bamboo grove, then the Sanskrit for a rainbow, then say *karakā* again

Before you move on

What does करका mean? ("Hail".) Say it once more.

197.4 अवश्यायः (avaśyāyaḥ) — dew

Before the new one: say the Sanskrit for a rainbow, then the Sanskrit for hail.

You'll want to know: अवश्यायः

अवश्यायः — *avaśyāyaḥ* — "dew".

The word, taken apart — its roots and family

avaśyāya is built on *ava-*, "down", and the root √śyai, "to congeal" (CDIAL 855): dew and hoar-frost settle and freeze. Its twin *avaśyā* lives on as Hindi *os*, "dew".

What you've built

One more word for this chapter.

Your turn

- *Say it: avaśyāyaḥ*
- *Say it: avaśyāyaḥ*, once more
- *Say it:* say *avaśyāyaḥ*
- *Recall:* say the Sanskrit for a rainbow, then the Sanskrit for hail, then say *avaśyāyaḥ* again

Before you move on

What does अवश्यायः mean? ("Dew".) Say it once more.

197.5 ज्योत्स्ना (jyotsnā) — moonlight

Before the new one: say the Sanskrit for hail, then the Sanskrit for dew.

You'll want to know: ज्योत्स्ना

ज्योत्स्ना — *jyotsnā* — "moonlight".

The word, taken apart — its roots and family

jyotsnā is filed by MW under the root √jyut, "to shine". It first meant "a moonlit night" and then "moonlight" (CDIAL 5301), and lives on as Hindi *junhāī*.

What you've built

One more word for this chapter.

Your turn

- *Say it: jyotsnā*
- *Say it: jyotsnā*, once more
- *Say it:* say *jyotsnā*
- *Recall:* say the Sanskrit for hail, then the Sanskrit for dew, then say *jyotsnā* again

Before you move on

What does ज्योत्स्ना mean? ("Moonlight".) Say it once more.

Chapter 198

Deer, Leopard, Rhinoceros, Nest, Egg

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a deer, a leopard, a rhinoceros, a nest and an egg.
>
> *Complete the last lesson of chapter 198: I can say a deer, a leopard, a rhinoceros, a nest and an egg.*

198.1 हरिणः (hariṇaḥ) — a deer

Before the new one: say the Sanskrit for dew, then the Sanskrit for moonlight.

You'll want to know: हरिणः

हरिणः — *hariṇaḥ* — "a deer".

The word, taken apart — its roots and family

hariṇa is built on *hari*, "tawny, yellowish", so the deer is "the fawn-coloured one" (MW). MW compares *hari* with English *yellow*. The word lives on as Hindi *hiran* (CDIAL 13982).

What you've built

One more word for this chapter.

Your turn

- *Say it: hariṇaḥ*
- *Say it: hariṇaḥ*, once more
- *Say it:* say *hariṇaḥ*
- *Recall:* say the Sanskrit for dew, then the Sanskrit for moonlight, then say *hariṇaḥ* again

Before you move on

What does हरिणः mean? ("A deer".) Say it once more.

198.2 चित्रकः (citrakaḥ) — a leopard

Before the new one: say the Sanskrit for moonlight, then the Sanskrit for a deer.

You'll want to know: चित्रकः

चित्रकः — *citrakaḥ* — "a leopard".

The word, taken apart — its roots and family

citraka is built on *citra*, "bright, variegated", from the root √cit (MW): the spotted one. It lives on as Hindi *cītā*, "leopard" (CDIAL 4804), and English *cheetah* was borrowed from Hindi.

What you've built

One more word for this chapter.

Your turn

- *Say it: citrakaḥ*
- *Say it: citrakaḥ*, once more
- *Say it:* say *citrakaḥ*
- *Recall:* say the Sanskrit for moonlight, then the Sanskrit for a deer, then say *citrakaḥ* again

Before you move on

What does चित्रकः mean? ("A leopard".) Say it once more.

198.3 गण्डकः (gaṇḍakaḥ) — a rhinoceros

Before the new one: say the Sanskrit for a deer, then the Sanskrit for a leopard.

You'll want to know: गण्डकः

गण्डकः — *gaṇḍakaḥ* — "a rhinoceros".

The word, taken apart — its roots and family

gaṇḍaka is probably not an Indo-Aryan word: CDIAL 4000 thinks it shares a non-Aryan origin with *khaḍga*, another rhinoceros word, perhaps from Munda. Hindi *gaĩṛā* comes from a related form.

What you've built

One more word for this chapter.

Your turn

- *Say it: gaṇḍakaḥ*
- *Say it: gaṇḍakaḥ*, once more
- *Say it:* say *gaṇḍakaḥ*
- *Recall:* say the Sanskrit for a deer, then the Sanskrit for a leopard, then say *gaṇḍakaḥ* again

Before you move on

What does गण्डकः mean? ("A rhinoceros".) Say it once more.

198.4 नीडम् (nīḍam) — a nest

Before the new one: say the Sanskrit for a leopard, then the Sanskrit for a rhinoceros.

You'll want to know: नीडम्

नीडम् — *nīḍam* — "a nest".

The word, taken apart — its roots and family

nīḍa is built on *ni*, "down", and the root √sad, "to sit" (MW): a nest is where a bird sits down. It is inherited from Indo-European: MW compares Latin *nīdus* and English *nest*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nīḍam*
- *Say it: nīḍam*, once more
- *Say it:* say *nīḍam*
- *Recall:* say the Sanskrit for a leopard, then the Sanskrit for a rhinoceros, then say *nīḍam* again

Before you move on

What does नीडम् mean? ("A nest".) Say it once more.

198.5 अण्डम् (aṇḍam) — an egg

Before the new one: say the Sanskrit for a rhinoceros, then the Sanskrit for a nest.

You'll want to know: अण्डम्

अण्डम् — *aṇḍam* — "an egg".

The word, taken apart — its roots and family

aṇḍa is usually traced to a Munda source: CDIAL 1111 reports that Mayrhofer, following Kuiper, takes it from Munda. It lives on as Hindi *aṇḍā*, "egg".

What you've built

One more word for this chapter.

Your turn

- *Say it: aṇḍam*
- *Say it: aṇḍam*, once more
- *Say it:* say *aṇḍam*
- *Recall:* say the Sanskrit for a rhinoceros, then the Sanskrit for a nest, then say *aṇḍam* again

Before you move on

What does अण्डम् mean? ("An egg".) Say it once more.

Chapter 199

Sentence, Language, Grammar, Mathematics, Science

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a sentence, a language, grammar, mathematics and science.
>
> *Complete the last lesson of chapter 199: I can say a sentence, a language, grammar, mathematics and science.*

199.1 वाक्यम् (vākyam) — a sentence

Before the new one: say the Sanskrit for a nest, then the Sanskrit for an egg.

You'll want to know: वाक्यम्

वाक्यम् — *vākyam* — "a sentence".

The word, taken apart — its roots and family

vākya is built on the root √vac, "to speak" (MW): a sentence is something said (CDIAL 11468). The root is inherited from Indo-European, and MW compares Latin *vōx*, "voice".

What you've built

One more word for this chapter.

Your turn

- *Say it: vākyam*
- *Say it: vākyam*, once more
- *Say it:* say *vākyam*
- *Recall:* say the Sanskrit for a nest, then the Sanskrit for an egg, then say *vākyam* again

Before you move on

What does वाक्यम् mean? ("A sentence".) Say it once more.

199.2 भाषा (bhāṣā) — a language

Before the new one: say the Sanskrit for an egg, then the Sanskrit for a sentence.

You'll want to know: भाषा

भाषा — *bhāṣā* — "a language".

The word, taken apart — its roots and family

bhāṣā is built on the root √bhāṣ, "to speak" (MW). MW notes it meant everyday spoken language, as opposed to the language of the Veda; CDIAL 9479 lists it, and Hindi and Telugu still use it for "language".

What you've built

One more word for this chapter.

Your turn

- *Say it: bhāṣā*
- *Say it: bhāṣā*, once more
- *Say it:* say *bhāṣā*
- *Recall:* say the Sanskrit for an egg, then the Sanskrit for a sentence, then say *bhāṣā* again

Before you move on

What does भाषा mean? ("A language".) Say it once more.

199.3 व्याकरणम् (vyākaraṇam) — grammar

Before the new one: say the Sanskrit for a sentence, then the Sanskrit for a language.

You'll want to know: व्याकरणम्

व्याकरणम् — *vyākaraṇam* — "grammar".

The word, taken apart — its roots and family

vyākaraṇa is built on *vi-ā-* with the root √kṛ, "to do, make" (MW). The verb means "to separate, explain", so grammar is the taking apart of language (CDIAL 12182).

What you've built

One more word for this chapter.

Your turn

- *Say it: vyākaraṇam*
- *Say it: vyākaraṇam*, once more
- *Say it:* say *vyākaraṇam*
- *Recall:* say the Sanskrit for a sentence, then the Sanskrit for a language, then say *vyākaraṇam* again

Before you move on

What does व्याकरणम् mean? ("Grammar".) Say it once more.

199.4 गणितम् (gaṇitam) — mathematics

Before the new one: say the Sanskrit for a language, then the Sanskrit for grammar.

You'll want to know: गणितम्

गणितम् — *gaṇitam* — "mathematics".

The word, taken apart — its roots and family

gaṇita is the past participle of *gaṇayati*, "counts", built on the root √gaṇ (MW; CDIAL 3996). "What is counted" became "reckoning", and then mathematics.

What you've built

One more word for this chapter.

Your turn

- *Say it: gaṇitam*
- *Say it: gaṇitam*, once more
- *Say it:* say *gaṇitam*
- *Recall:* say the Sanskrit for a language, then the Sanskrit for grammar, then say *gaṇitam* again

Before you move on

What does गणितम् mean? ("Mathematics".) Say it once more.

199.5 विज्ञानम् (vijñānam) — science

Before the new one: say the Sanskrit for grammar, then the Sanskrit for mathematics.

You'll want to know: विज्ञानम्

विज्ञानम् — *vijñānam* — "science".

The word, taken apart — its roots and family

vijñāna is built on *vi-* and the root √jñā, "to know" (MW), the root of *jānāti*, "knows". It first meant "the act of discerning" (CDIAL 11707), and later "science".

What you've built

One more word for this chapter.

Your turn

- *Say it: vijñānam*
- *Say it: vijñānam*, once more
- *Say it:* say *vijñānam*
- *Recall:* say the Sanskrit for grammar, then the Sanskrit for mathematics, then say *vijñānam* again

Before you move on

What does विज्ञानम् mean? ("Science".) Say it once more.

Chapter 200

Reading, Listening, Speech, Discussion, Dispute

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say reading, listening, a speech, a discussion and a dispute.
>
> *Complete the last lesson of chapter 200: I can say reading, listening, a speech, a discussion and a dispute.*

200.1 पठनम् (paṭhanam) — reading

Before the new one: say the Sanskrit for mathematics, then the Sanskrit for science.

You'll want to know: पठनम्

पठनम् — *paṭhanam* — "reading".

The word, taken apart — its roots and family

paṭhana is built on the root √paṭh, "to read aloud, recite" (MW; CDIAL 7713), the root of *paṭhati*, "reads", which you have already met. The verb lives on as Hindi *paṛhnā*, "to read" (CDIAL 7712).

What you've built

One more word for this chapter.

Your turn

- *Say it: paṭhanam*
- *Say it: paṭhanam*, once more
- *Say it:* say *paṭhanam*
- *Recall:* say the Sanskrit for mathematics, then the Sanskrit for science, then say *paṭhanam* again

Before you move on

What does पठनम् mean? ("Reading".) Say it once more.

200.2 श्रवणम् (śravaṇam) — listening

Before the new one: say the Sanskrit for science, then the Sanskrit for reading.

You'll want to know: श्रवणम्

श्रवणम् — *śravaṇam* — "listening".

The word, taken apart — its roots and family

śravaṇa is built on the root √śru, "to hear" (MW), with the action suffix *-ana*. The root is inherited from Indo-European: MW compares Greek *klyō*, "I hear", and English *loud*. The same root gives *śruti*, "what is heard", the name for the Veda.

What you've built

One more word for this chapter.

Your turn

- *Say it: śravaṇam*
- *Say it: śravaṇam*, once more
- *Say it:* say *śravaṇam*

- *Recall:* say the Sanskrit for science, then the Sanskrit for reading, then say *śravaṇam* again

Before you move on

What does श्रवणम् mean? ("Listening".) Say it once more.

200.3 भाषणम् (bhāṣaṇam) — a speech

Before the new one: say the Sanskrit for reading, then the Sanskrit for listening.

You'll want to know: भाषणम्

भाषणम् — *bhāṣaṇam* — "a speech".

The word, taken apart — its roots and family

bhāṣaṇa is built on the root √bhāṣ, "to speak", with the action suffix *-ana* (MW): "the act of speaking", and so a speech. It shares its root with *bhāṣā*, "language", and Hindi took the word over as *bhāṣaṇ*.

What you've built

One more word for this chapter.

Your turn

- *Say it: bhāṣaṇam*
- *Say it: bhāṣaṇam*, once more
- *Say it:* say *bhāṣaṇam*
- *Recall:* say the Sanskrit for reading, then the Sanskrit for listening, then say *bhāṣaṇam* again

Before you move on

What does भाषणम् mean? ("A speech".) Say it once more.

200.4 चर्चा (carcā) — a discussion

Before the new one: say the Sanskrit for listening, then the Sanskrit for a speech.

You'll want to know: चर्चा

चर्चा — *carcā* — "a discussion".

The word, taken apart — its roots and family

carcā first meant the repeating of a word in Vedic recitation (CDIAL 4695). It goes with the verb *carcayati*, which MW glosses "to repeat a word" and "to talk over, discuss". MW gives no older source for the root, and Telugu and Malayalam borrowed the noun.

What you've built

One more word for this chapter.

Your turn

- *Say it: carcā*
- *Say it: carcā*, once more
- *Say it:* say *carcā*
- *Recall:* say the Sanskrit for listening, then the Sanskrit for a speech, then say *carcā* again

Before you move on

What does चर्चा mean? ("A discussion".) Say it once more.

200.5 विवादः (vivādaḥ) — a dispute

Before the new one: say the Sanskrit for a speech, then the Sanskrit for a discussion.

You'll want to know: विवादः

विवादः — *vivādaḥ* — "a dispute".

The word, taken apart — its roots and family

vivāda is built on *vi-*, "apart", and the root √vad, "to speak" (MW), which you met early on in *vadāmi*, "I speak". People who speak apart from each other are disputing.

What you've built

One more word for this chapter.

Your turn

- *Say it: vivādaḥ*
- *Say it: vivādaḥ*, once more
- *Say it:* say *vivādaḥ*
- *Recall:* say the Sanskrit for a speech, then the Sanskrit for a discussion, then say *vivādaḥ* again

Before you move on

What does विवादः mean? ("A dispute".) Say it once more.

Chapter 201

Plan, Goal, Way, Problem, Solution

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a plan, a goal, a way, a problem and a solution.
>
> *Complete the last lesson of chapter 201: I can say a plan, a goal, a way, a problem and a solution.*

201.1 योजना (yojanā) — a plan, a scheme

Before the new one: say the Sanskrit for a discussion, then the Sanskrit for a dispute.

You'll want to know: योजना

योजना — *yojanā* — "a plan, a scheme".

The word, taken apart — its roots and family

yojanā is built on the root √yuj, "to yoke, join" (MW), the root of *yuga* and *yoga*. A plan is an arrangement of parts joined together. MW compares √yuj with Latin *iungere*, "to join", and English *yoke*.

What you've built

One more word for this chapter.

Your turn

- *Say it: yojanā*
- *Say it: yojanā*, once more
- *Say it:* say *yojanā*
- *Recall:* say the Sanskrit for a discussion, then the Sanskrit for a dispute, then say *yojanā* again

Before you move on

What does योजना mean? ("A plan, a scheme".) Say it once more.

201.2 लक्ष्यम् (lakṣyam) — a goal, a target

Before the new one: say the Sanskrit for a dispute, then the Sanskrit for a plan.

You'll want to know: लक्ष्यम्

लक्ष्यम् — *lakṣyam* — "a goal, a target".

The word, taken apart — its roots and family

lakṣya is built on *lakṣa*, "mark, sign, stake", from the root √lakṣ, "to mark, observe" (MW). The Muṇḍaka Upaniṣad already uses it for an aim or target (CDIAL 10881). *Lakṣa* also became "100,000", the source of Hindi *lākh*.

What you've built

One more word for this chapter.

Your turn

- *Say it: lakṣyam*
- *Say it: lakṣyam*, once more
- *Say it:* say *lakṣyam*

- *Recall:* say the Sanskrit for a dispute, then the Sanskrit for a plan, then say *lakṣyam* again

Before you move on

What does लक्ष्यम् mean? ("A goal, a target".) Say it once more.

201.3 उपायः (upāyaḥ) — a way, a means

Before the new one: say the Sanskrit for a plan, then the Sanskrit for a goal.

You'll want to know: उपायः

उपायः — *upāyaḥ* — "a way, a means".

The word, taken apart — its roots and family

upāya is built on *upa-*, "near", and the root √i, "to go" (MW): first "approach, coming near", then the way by which you reach your aim (CDIAL 2308).

What you've built

One more word for this chapter.

Your turn

- *Say it: upāyaḥ*
- *Say it: upāyaḥ*, once more
- *Say it:* say *upāyaḥ*
- *Recall:* say the Sanskrit for a plan, then the Sanskrit for a goal, then say *upāyaḥ* again

Before you move on

What does उपायः mean? ("A way, a means".) Say it once more.

201.4 समस्या (samasyā) — a problem

Before the new one: say the Sanskrit for a goal, then the Sanskrit for a way.

You'll want to know: समस्या

समस्या — *samasyā* — "a problem".

The word, taken apart — its roots and family

samasyā is built on *sam*, "together", and the root √as, "to throw, put" (MW): first "joining together". MW gives a second sense, part of a verse handed to someone else to complete, and the puzzle to be completed became the modern sense "problem".

What you've built

One more word for this chapter.

Your turn

- *Say it: samasyā*
- *Say it: samasyā*, once more
- *Say it:* say *samasyā*
- *Recall:* say the Sanskrit for a goal, then the Sanskrit for a way, then say *samasyā* again

Before you move on

What does समस्या mean? ("A problem".) Say it once more.

201.5 समाधानम् (samādhānam) — a solution

Before the new one: say the Sanskrit for a way, then the Sanskrit for a problem.

You'll want to know: समाधानम्

समाधानम् — *samādhānam* — "a solution".

The word, taken apart — its roots and family

samādhāna is built on *sam-ā-* and the root √dhā, "to put, place" (MW): "putting together, adjusting, settling" (CDIAL 13210). Settling a difficulty is solving it.

What you've built

One more word for this chapter.

Your turn

- *Say it: samādhānam*
- *Say it: samādhānam*, once more
- *Say it:* say *samādhānam*
- *Recall:* say the Sanskrit for a way, then the Sanskrit for a problem, then say *samādhānam* again

Before you move on

What does समाधानम् mean? ("A solution".) Say it once more.

Chapter 202

Wayfarer, Direction, East, West, North

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a wayfarer, a direction, the east, the west and the north.
>
> *Complete the last lesson of chapter 202: I can say a wayfarer, a direction, the east, the west and the north.*

202.1 पथिकः (pathikaḥ) — a wayfarer

Before the new one: say the Sanskrit for a problem, then the Sanskrit for a solution.

You'll want to know: पथिकः

पथिकः — *pathikaḥ* — "a wayfarer".

The word, taken apart — its roots and family

pathika is *pathin*, "path, road", with the suffix *-ika* (MW): one who is on the road (CDIAL 7745). *Pathin* is an inherited Indo-European word: MW compares Greek *patos*, "path", and Latin *pōns*, "bridge".

What you've built

One more word for this chapter.

Your turn

- *Say it: pathikaḥ*
- *Say it: pathikaḥ*, once more
- *Say it:* say *pathikaḥ*
- *Recall:* say the Sanskrit for a problem, then the Sanskrit for a solution, then say *pathikaḥ* again

Before you move on

What does पथिकः mean? ("A wayfarer".) Say it once more.

202.2 दिशा (diśā) — a direction

Before the new one: say the Sanskrit for a solution, then the Sanskrit for a wayfarer.

You'll want to know: दिशा

दिशा — *diśā* — "a direction".

The word, taken apart — its roots and family

diśā is a later form of *diś*, "direction, quarter" (CDIAL 6339), built on the root √diś, "to point out, show" (MW): a direction is where you point. MW compares the root with Greek *deiknymi*, "I show", and Latin *dīcere*.

What you've built

One more word for this chapter.

Your turn

- *Say it: diśā*
- *Say it: diśā*, once more
- *Say it:* say *diśā*

- *Recall:* say the Sanskrit for a solution, then the Sanskrit for a wayfarer, then say *diśā* again

Before you move on

What does दिशा mean? ("A direction".) Say it once more.

202.3 पूर्वा (pūrvā) — the east

Before the new one: say the Sanskrit for a wayfarer, then the Sanskrit for a direction.

You'll want to know: पूर्वा

पूर्वा — *pūrvā* — "the east".

The word, taken apart — its roots and family

pūrva means "in front, former, first" (CDIAL 8343), and MW connects it with *purā*, "before", and *pra*, "forth". Facing the sunrise, the east is the direction in front of you, so *pūrvā* (*diś*) is the east.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *pūrvā*
- *Say it:* *pūrvā*, once more
- *Say it:* say *pūrvā*
- *Recall:* say the Sanskrit for a wayfarer, then the Sanskrit for a direction, then say *pūrvā* again

Before you move on

What does पूर्वा mean? ("The east".) Say it once more.

202.4 पश्चिमा (paścimā) — the west

Before the new one: say the Sanskrit for a direction, then the Sanskrit for the east.

You'll want to know: पश्चिमा

पश्चिमा — *paścimā* — "the west".

The word, taken apart — its roots and family

paścima is built on *paścā*, "behind, after" (MW; CDIAL 8007): facing the sunrise, the west is behind you, so *paścimā* is the west. Pali has it as *pacchima*, "western, last".

What you've built

One more word for this chapter.

Your turn

- *Say it: paścimā*
- *Say it: paścimā*, once more
- *Say it:* say *paścimā*
- *Recall:* say the Sanskrit for a direction, then the Sanskrit for the east, then say *paścimā* again

Before you move on

What does पश्चिमा mean? ("The west".) Say it once more.

202.5 उत्तरा (uttarā) — the north

Before the new one: say the Sanskrit for the east, then the Sanskrit for the west.

You'll want to know: उत्तरा

उत्तरा — *uttarā* — "the north".

The word, taken apart — its roots and family

uttara is the comparative of *ud*, "up": "higher, upper" (MW; CDIAL 1767). MW explains "northern" as the higher part of India, and also as the left hand when you face the sunrise. The same word also means "answer".

What you've built

One more word for this chapter.

Your turn

- *Say it: uttarā*
- *Say it: uttarā*, once more
- *Say it:* say *uttarā*
- *Recall:* say the Sanskrit for the east, then the Sanskrit for the west, then say *uttarā* again

Before you move on

What does उत्तरा mean? ("The north".) Say it once more.

202.6 Words from chapters 197-199 — a first pass

Say the words for the west and the north.

Your turn

Say these aloud:

- a bamboo grove, a rainbow, hail, dew, moonlight
- a deer, a leopard, a rhinoceros, a nest, an egg

Before you move on

A bamboo grove? (वेणुवनम्, *veṇuvanam.*) A rainbow? (इन्द्रधनुः, *indradhanuḥ.*) Hail? (करका, *karakā.*) Dew? (अवश्यायः, *avaśyāyaḥ.*) Moonlight? (ज्योत्स्ना, *jyotsnā.*) A deer? (हरिणः, *hariṇaḥ.*) A leopard? (चित्रकः, *citrakaḥ.*) A rhinoceros? (गण्डकः, *gaṇḍakaḥ.*) A nest? (नीडम्, *nīḍam.*) An egg? (अण्डम्, *aṇḍam.*) A sentence? (वाक्यम्, *vākyam.*) A language? (भाषा, *bhāṣā.*) Grammar? (व्याकरणम्, *vyākaraṇam.*) Mathematics? (गणितम्, *gaṇitam.*) Science? (विज्ञानम्, *vijñānam.*)

202.7 Words from chapters 200-202 — a second pass

Say the words for reading and listening.

Your turn

Say these aloud:

- reading, listening, a speech, a discussion, a dispute
- a plan, a goal, a way, a problem, a solution
- a wayfarer, a direction, the east, the west, the north

Before you move on

Reading? (पठनम्, *paṭhanam.*) Listening? (श्रवणम्, *śravaṇam.*) A speech? (भाषणम्, *bhāṣaṇam.*) A discussion? (चर्चा, *carcā.*) A dispute? (विवादः, *vivādaḥ.*) A plan? (योजना, *yojanā.*) A goal? (लक्ष्यम्, *lakṣyam.*) A way? (उपायः, *upāyaḥ.*) A problem? (समस्या, *samasyā.*) A solution? (समाधानम्, *samādhānam.*) A wayfarer? (पथिकः, *pathikaḥ.*) A direction? (दिशा, *diśā.*) The east? (पूर्वा, *pūrvā.*) The west? (पश्चिमा, *paścimā.*) The north? (उत्तरा, *uttarā.*)

203.1 मोदते (modate) — rejoices

Before the new one: say the Sanskrit for the west, then the Sanskrit for the north.

You'll want to know: मोदते

मोदते — *modate* — "rejoices".

The word, taken apart — its roots and family

modate is the present of the root √mud, "to be merry, glad, rejoice" (MW). The same root gives *mud*, "joy"; MW gives it no older source, so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: modate*
- *Say it: modate*, once more
- *Say it:* say *modate*
- *Recall:* say the Sanskrit for the west, then the Sanskrit for the north, then say *modate* again

203.3 याचते (yācate) — begs, asks for

Before the new one: say the Sanskrit for rejoices, then the Sanskrit for salutes.

You'll want to know: याचते

याचते — *yācate* — "begs, asks for".

The word, taken apart — its roots and family

yācate is the middle present of the root √yāc, "to ask, beg" (MW): the middle voice means asking for yourself. It is already in the Rigveda (CDIAL 10447), and *yācaka*, "beggar", is built on it.

What you've built

One more word for this chapter.

Your turn

- *Say it: yācate*
- *Say it: yācate*, once more
- *Say it:* say *yācate*
- *Recall:* say the Sanskrit for rejoices, then the Sanskrit for salutes, then say *yācate* again

What does याचते mean? ("Begs, asks for".) Say it once more.

203.4 भाषते (bhāṣate) — speaks, talks

Before the new one: say the Sanskrit for salutes, then the Sanskrit for begs.

You'll want to know: भाषते

भाषते — *bhāṣate* — "speaks, talks".

The word, taken apart — its roots and family

bhāṣate is the present of the root √bhāṣ, "to speak, say" (MW), first found in the Taittirīya Brāhmaṇa (CDIAL 9478). The nouns *bhāṣā*, "language", and *bhāṣaṇa*, "speech", are built on the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: bhāṣate*
- *Say it: bhāṣate*, once more
- *Say it:* say *bhāṣate*
- *Recall:* say the Sanskrit for salutes, then the Sanskrit for begs, then say *bhāṣate* again

Before you move on

What does भाषते mean? ("Speaks, talks".) Say it once more.

203.5 शोभते (śobhate) — shines, looks fine

Before the new one: say the Sanskrit for begs, then the Sanskrit for speaks.

You'll want to know: शोभते

शोभते — *śobhate* — "shines, looks fine".

The word, taken apart — its roots and family

śobhate is the present of the root √śubh, "to beautify; to look beautiful, shine" (MW). The adjective *śubha*, "bright, auspicious", comes from the same root, as in Hindi *śubh rātri*, "good night".

What you've built

One more word for this chapter.

Your turn

- *Say it: śobhate*
- *Say it: śobhate*, once more
- *Say it:* say *śobhate*
- *Recall:* say the Sanskrit for begs, then the Sanskrit for speaks, then say *śobhate* again

206.3 खेलति (khelati) — frolics, plays

Before the new one: say the Sanskrit for sinks, then the Sanskrit for bathes.

You'll want to know: खेलति

खेलति — *khelati* — "frolics, plays".

The word, taken apart — its roots and family

khelati first means "shakes, moves to and fro" (MW), and later "plays". CDIAL 3918 says it may go with a family of "play" words that are perhaps non-Aryan; their origin is uncertain. Hindi *khelnā*, "to play", belongs to that family.

What you've built

One more word for this chapter.

Your turn

- *Say it: khelati*
- *Say it: khelati*, once more

आस्वादयति — *āsvādayati* — "tastes".

The word, taken apart — its roots and family

āsvādayati is built on *ā-* and the causative of the root √svad, "to taste well, be sweet" (MW). MW derives the root, probably, from *su* "well" and √ad "eat", and compares its adjective *svādu*, "sweet", with Latin *suāvis* and English *sweet*.

What you've built

One more word for this chapter.

Your turn

- *Say it: āsvādayati*
- *Say it: āsvādayati*, once more
- *Say it:* say *āsvādayati*
- *Recall:* say the Sanskrit for gambles, then the Sanskrit for flows, then say *āsvādayati* again

Before you move on

What does आस्वादयति mean? ("Tastes".) Say it once more.

207.4 उपदिशति (upadiśati) — advises, instructs

Before the new one: say the Sanskrit for flows, then the Sanskrit for tastes.

You'll want to know: उपदिशति

उपदिशति — *upadiśati* — "advises, instructs".

The word, taken apart — its roots and family

upadiśati is built on *upa*, "towards", and the root √diś, "to point out, show" (MW), the root of *diśā*, "direction". To instruct someone is to point things out to them, and the noun *upadeśa* means "teaching".

What you've built

One more word for this chapter.

Your turn

- *Say it: upadiśati*
- *Say it: upadiśati*, once more
- *Say it:* say *upadiśati*
- *Recall:* say the Sanskrit for flows, then the Sanskrit for tastes, then say *upadiśati* again

Before you move on

What does उपदिशति mean? ("Advises, instructs".) Say it once more.

207.5 सम्मानयति (sammānayati) — honours

Before the new one: say the Sanskrit for tastes, then the Sanskrit for advises.

You'll want to know: सम्मानयति

सम्मानयति — *sammānayati* — "honours".

The word, taken apart — its roots and family

sammānayati is built on *sam* and *mānayati*, "esteems, honours" (CDIAL 10047), which MW calls the causative of the root √man, "to think". To honour someone is to make them thought of. MW compares √man with Latin *meminisse*, "to remember", and English *mean*.

What you've built

One more word for this chapter.

Your turn

- *Say it: sammānayati*
- *Say it: sammānayati*, once more
- *Say it:* say *sammānayati*
- *Recall:* say the Sanskrit for tastes, then the Sanskrit for advises, then say *sammānayati* again

Before you move on

What does सम्मानयति mean? ("Honours".) Say it once more.

Chapter 208

Household, Relative, Companion, Enemy, Neighbour

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a household, a relative, a companion, an enemy and a neighbour.
>
> *Complete the last lesson of chapter 208: I can say a household, a relative, a companion, an enemy and a neighbour.*

208.1 परिवारः (parivāraḥ) — a household, a family

Before the new one: say the Sanskrit for advises, then the Sanskrit for honours.

You'll want to know: परिवारः

परिवारः — *parivāraḥ* — "a household, a family".

The word, taken apart — its roots and family

parivāra is built on *pari*, "around", and the root √vṛ, "to cover, surround" (MW). It first meant "cover, surroundings", then "followers" (CDIAL 7876), and Hindi took it as *parivār*, "family".

What you've built

One more word for this chapter.

Your turn

- *Say it: parivāraḥ*
- *Say it: parivāraḥ*, once more
- *Say it:* say *parivāraḥ*
- *Recall:* say the Sanskrit for advises, then the Sanskrit for honours, then say *parivāraḥ* again

Before you move on

What does परिवारः mean? ("A household, a family".) Say it once more.

208.2 बन्धुः (bandhuḥ) — a relative

Before the new one: say the Sanskrit for honours, then the Sanskrit for a household.

You'll want to know: बन्धुः

बन्धुः — *bandhuḥ* — "a relative".

The word, taken apart — its roots and family

bandhu is built on the root √bandh, "to bind, tie" (MW): a relative is someone bound to you. The root is inherited from Indo-European, and MW compares English *bind*. It is a Rigvedic word for "kinsman" (CDIAL 9144).

What you've built

One more word for this chapter.

Your turn

- *Say it: bandhuḥ*
- *Say it: bandhuḥ*, once more
- *Say it:* say *bandhuḥ*

- *Recall:* say the Sanskrit for honours, then the Sanskrit for a household, then say *bandhuḥ* again

Before you move on

What does बन्धुः mean? ("A relative".) Say it once more.

208.3 सखा (sakhā) — a companion, a (male) friend

Before the new one: say the Sanskrit for a household, then the Sanskrit for a relative.

You'll want to know: सखा

सखा — *sakhā* — "a companion, a (male) friend".

The word, taken apart — its roots and family

sakhā is the nominative of *sakhi*, "friend, companion", which MW files under the root √sac, "to accompany". MW compares Latin *socius*, "companion". Its feminine *sakhī* lives on as Hindi *sahelī* (CDIAL 13074).

What you've built

One more word for this chapter.

Your turn

- *Say it: sakhā*
- *Say it: sakhā*, once more
- *Say it:* say *sakhā*
- *Recall:* say the Sanskrit for a household, then the Sanskrit for a relative, then say *sakhā* again

Before you move on

What does सखा mean? ("A companion, a (male) friend".) Say it once more.

208.4 शत्रुः (śatruḥ) — an enemy

Before the new one: say the Sanskrit for a relative, then the Sanskrit for a companion.

You'll want to know: शत्रुः

शत्रुः — *śatruḥ* — "an enemy".

The word, taken apart — its roots and family

śatru is a Rigvedic word for "enemy" (CDIAL 12286). MW reports that it is said to come from √śad, "the overthrower", and compares Greek *kotos*, "grudge", and English *hate*; the derivation is only reported, not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: śatruḥ*
- *Say it: śatruḥ*, once more
- *Say it:* say *śatruḥ*
- *Recall:* say the Sanskrit for a relative, then the Sanskrit for a companion, then say *śatruḥ* again

Before you move on

What does शत्रुः mean? ("An enemy".) Say it once more.

208.5 प्रतिवेशी (prativeśī) — a neighbour

Before the new one: say the Sanskrit for a companion, then the Sanskrit for an enemy.

You'll want to know: प्रतिवेशी

प्रतिवेशी — *prativeśī* — "a neighbour".

The word, taken apart — its roots and family

prativeśī comes from *prativeśa*, "a neighbouring house", built on *prati*, "facing", and *veśa*, "dwelling" (MW). A related form, *prativeśya*, lives on as Hindi *paṛosī*, "neighbour" (CDIAL 8599).

What you've built

One more word for this chapter.

Your turn

- *Say it: prativeśī*
- *Say it: prativeśī*, once more
- *Say it:* say *prativeśī*
- *Recall:* say the Sanskrit for a companion, then the Sanskrit for an enemy, then say *prativeśī* again

Before you move on

What does प्रतिवेशी mean? ("A neighbour".) Say it once more.

Chapter 209

Poet, Singer, Dancer, Painter, Craftsman

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a poet, a singer, a dancer, a painter and a craftsman.

209.1 कविः (kaviḥ) — a poet

Before the new one: say the Sanskrit for an enemy, then the Sanskrit for a neighbour.

You'll want to know: कविः

कविः — *kaviḥ* — "a poet".

The word, taken apart — its roots and family

kavi is a Rigvedic word for a wise man or seer, and later a poet (CDIAL 2964). MW links it to a root √kū and to *kāvya*, "poetry". Hindi, Telugu and Malayalam took it over as their word for "poet".

What you've built

One more word for this chapter.

Your turn

- *Say it: kaviḥ*
- *Say it: kaviḥ*, once more
- *Say it:* say *kaviḥ*
- *Recall:* say the Sanskrit for an enemy, then the Sanskrit for a neighbour, then say *kaviḥ* again

Before you move on

What does कविः mean? ("A poet".) Say it once more.

209.2 गायकः (gāyakaḥ) — a singer

Before the new one: say the Sanskrit for a neighbour, then the Sanskrit for a poet.

You'll want to know: गायकः

गायकः — *gāyakaḥ* — "a singer".

The word, taken apart — its roots and family

gāyaka is built on the root √gai, "to sing", with the agent suffix *-aka* (MW): "one who sings". The verb *gāyati* lives on as Gujarati *gāvũ*, "sings" (CDIAL 4135).

What you've built

One more word for this chapter.

Your turn

- *Say it: gāyakaḥ*
- *Say it: gāyakaḥ*, once more
- *Say it:* say *gāyakaḥ*
- *Recall:* say the Sanskrit for a neighbour, then the Sanskrit for a poet, then say *gāyakaḥ* again

Before you move on

What does गायकः mean? ("A singer".) Say it once more.

209.3 नर्तकः (nartakaḥ) — a dancer

Before the new one: say the Sanskrit for a poet, then the Sanskrit for a singer.

You'll want to know: नर्तकः

नर्तकः — *nartakaḥ* — "a dancer".

The word, taken apart — its roots and family

nartaka is built on the causative of the root √nṛt, "to dance" (MW), the root of *nṛtya*, "dance", which you have already met. The verb *nṛtyati* lives on as Hindi *nācnā*, "to dance" (CDIAL 7583).

What you've built

One more word for this chapter.

Your turn

- *Say it: nartakaḥ*
- *Say it: nartakaḥ*, once more
- *Say it:* say *nartakaḥ*
- *Recall:* say the Sanskrit for a poet, then the Sanskrit for a singer, then say *nartakaḥ* again

Before you move on

What does नर्तकः mean? ("A dancer".) Say it once more.

209.4 चित्रकारः (citrakāraḥ) — a painter

Before the new one: say the Sanskrit for a singer, then the Sanskrit for a dancer.

You'll want to know: चित्रकारः

चित्रकारः — *citrakāraḥ* — "a painter".

The word, taken apart — its roots and family

citrakāra is a compound of *citra*, "bright, variegated; a picture", and *kāra*, "maker", from the root √kṛ (MW; CDIAL 4807). It lives on as Hindi *citārī*, "painter".

What you've built

One more word for this chapter.

Your turn

- *Say it: citrakāraḥ*
- *Say it: citrakāraḥ*, once more
- *Say it:* say *citrakāraḥ*
- *Recall:* say the Sanskrit for a singer, then the Sanskrit for a dancer, then say *citrakāraḥ* again

Before you move on

What does चित्रकारः mean? ("A painter".) Say it once more.

209.5 शिल्पी (śilpī) — a craftsman, a sculptor

Before the new one: say the Sanskrit for a dancer, then the Sanskrit for a painter.

You'll want to know: शिल्पी

शिल्पी — *śilpī* — "a craftsman, a sculptor".

The word, taken apart — its roots and family

śilpī is the nominative of *śilpin*, "one who has a craft", built on *śilpa*, "art, craft" (MW). MW calls *śilpa* "of doubtful derivation", so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: śilpī*
- *Say it: śilpī*, once more
- *Say it:* say *śilpī*
- *Recall:* say the Sanskrit for a dancer, then the Sanskrit for a painter, then say *śilpī* again

Before you move on

What does शिल्पी mean? ("A craftsman, a sculptor".) Say it once more.

Chapter 210

Preceptor, Head teacher, Pupil, Classmate, Doctor

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a preceptor, a head teacher, a pupil, a classmate and a doctor.
>
> *Complete the last lesson of chapter 210: I can say a preceptor, a head teacher, a pupil, a classmate and a doctor.*

210.1 आचार्यः (ācāryaḥ) — a preceptor, a teacher

Before the new one: say the Sanskrit for a painter, then the Sanskrit for a craftsman.

You'll want to know: आचार्यः

आचार्यः — *ācāryaḥ* — "a preceptor, a teacher".

The word, taken apart — its roots and family

ācārya is built on *ācāra*, "conduct, the rules of behaviour", from *ā-* with the root √car, "to move, behave" (MW; CDIAL 1072). MW explains it as "one who knows or teaches the rules". Tamil *āciriyar*, "teacher", was borrowed from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: ācāryaḥ*
- *Say it: ācāryaḥ*, once more
- *Say it:* say *ācāryaḥ*
- *Recall:* say the Sanskrit for a painter, then the Sanskrit for a craftsman, then say *ācāryaḥ* again

Before you move on

What does आचार्यः mean? ("A preceptor, a teacher".) Say it once more.

210.2 प्रधानाचार्यः (pradhānācāryaḥ) — a head teacher

Before the new one: say the Sanskrit for a craftsman, then the Sanskrit for a preceptor.

You'll want to know: प्रधानाचार्यः

प्रधानाचार्यः — *pradhānācāryaḥ* — "a head teacher".

The word, taken apart — its roots and family

pradhānācārya is a compound of *pradhāna*, "chief, principal", built on *pra-* and the root √dhā, "to put" (MW), and *ācārya*, "teacher". MW does not list the compound, so its use for a school's head teacher is a modern pairing.

What you've built

One more word for this chapter.

Your turn

- *Say it: pradhānācāryaḥ*
- *Say it: pradhānācāryaḥ*, once more

- *Say it:* say *pradhānācāryaḥ*
- *Recall:* say the Sanskrit for a craftsman, then the Sanskrit for a preceptor, then say *pradhānācāryaḥ* again

Before you move on

What does प्रधानाचार्यः mean? ("A head teacher".) Say it once more.

210.3 विद्यार्थी (vidyārthī) — a pupil, a learner

Before the new one: say the Sanskrit for a preceptor, then the Sanskrit for a head teacher.

You'll want to know: विद्यार्थी

विद्यार्थी — *vidyārthī* — "a pupil, a learner".

The word, taken apart — its roots and family

vidyārthī is a compound of *vidyā*, "knowledge", built on the root √vid, "to know", and *arthin*, "one who seeks" (MW): a pupil is one who seeks knowledge. MW already glosses it "a student", and Gujarati and Kannada use the same word.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *vidyārthī*
- *Say it:* *vidyārthī*, once more
- *Say it:* say *vidyārthī*
- *Recall:* say the Sanskrit for a preceptor, then the Sanskrit for a head teacher, then say *vidyārthī* again

Before you move on

What does विद्यार्थी mean? ("A pupil, a learner".) Say it once more.

210.4 सहपाठी (sahapāṭhī) — a classmate

Before the new one: say the Sanskrit for a head teacher, then the Sanskrit for a pupil.

You'll want to know: सहपाठी

सहपाठी — *sahapāṭhī* — "a classmate".

The word, taken apart — its roots and family

sahapāṭhī is built on *saha*, "with", and *pāṭhin*, "one who has studied, a student", from the root √paṭh, "to read, recite" (CDIAL 8039). MW does not list the compound, so the pairing for a classmate is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: sahapāṭhī*
- *Say it: sahapāṭhī*, once more
- *Say it:* say *sahapāṭhī*
- *Recall:* say the Sanskrit for a head teacher, then the Sanskrit for a pupil, then say *sahapāṭhī* again

Before you move on

What does सहपाठी mean? ("A classmate".) Say it once more.

210.5 चिकित्सकः (cikitsakaḥ) — a doctor

Before the new one: say the Sanskrit for a pupil, then the Sanskrit for a classmate.

You'll want to know: चिकित्सकः

चिकित्सकः — *cikitsakaḥ* — "a doctor".

The word, taken apart — its roots and family

cikitsaka is built on *cikitsā*, "medical treatment", from *cikitsati*, the desiderative of √cit, "to perceive, attend to" (MW). The desiderative means "wishes to attend to", and so "cares for, treats medically".

What you've built

One more word for this chapter.

Your turn

- *Say it: cikitsakaḥ*
- *Say it: cikitsakaḥ*, once more
- *Say it:* say *cikitsakaḥ*
- *Recall:* say the Sanskrit for a pupil, then the Sanskrit for a classmate, then say *cikitsakaḥ* again

Before you move on

What does चिकित्सकः mean? ("A doctor".) Say it once more.

Chapter 211

Exercise, Yoga, Toil, Tiredness, Bath

211.1 व्यायामः (vyāyāmaḥ) — exercise

Before the new one: say the Sanskrit for a classmate, then the Sanskrit for a doctor.

You'll want to know: व्यायामः

व्यायामः — *vyāyāmaḥ* — "exercise".

The word, taken apart — its roots and family

vyāyāma is built on *vi-ā-* and the root √yam, "to hold, stretch" (MW). In the Atharvaveda it means "dragging different ways, a contest"; later "exertion" and "exercise" (CDIAL 12209).

What you've built

One more word for this chapter.

Your turn

- *Say it:* *vyāyāmaḥ*
- *Say it:* *vyāyāmaḥ*, once more
- *Say it:* say *vyāyāmaḥ*
- *Recall:* say the Sanskrit for a classmate, then the Sanskrit for a doctor, then say *vyāyāmaḥ* again

Before you move on

What does व्यायामः mean? ("Exercise".) Say it once more.

211.2 योगः (yogaḥ) — yoga

Before the new one: say the Sanskrit for a doctor, then the Sanskrit for exercise.

You'll want to know: योगः

योगः — *yogaḥ* — "yoga".

The word, taken apart — its roots and family

yoga is built on the root √yuj, "to yoke, join" (MW). In the Rigveda it means "yoking, employment" (CDIAL 10526), and later the discipline that yokes the mind. MW compares √yuj with English *yoke* and Latin *iugum*.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *yogaḥ*
- *Say it:* *yogaḥ*, once more
- *Say it:* say *yogaḥ*

- *Recall:* say the Sanskrit for a doctor, then the Sanskrit for exercise, then say *yogaḥ* again

Before you move on

What does योगः mean? ("Yoga".) Say it once more.

211.3 श्रमः (śramaḥ) — toil, fatigue

Before the new one: say the Sanskrit for exercise, then the Sanskrit for yoga.

You'll want to know: श्रमः

श्रमः — *śramaḥ* — "toil, fatigue".

The word, taken apart — its roots and family

śrama is built on the root √śram, "to toil, become tired" (MW). In the Rigveda it means "labour", in the Atharvaveda also "fatigue" (CDIAL 12682). The same root gives *āśrama*, "hermitage", a place of religious toil.

What you've built

One more word for this chapter.

Your turn

- *Say it: śramaḥ*
- *Say it: śramaḥ*, once more
- *Say it:* say *śramaḥ*
- *Recall:* say the Sanskrit for exercise, then the Sanskrit for yoga, then say *śramaḥ* again

What does श्रमः mean? ("Toil, fatigue".) Say it once more.

211.4 क्लान्तिः (klāntiḥ) — tiredness

Before the new one: say the Sanskrit for yoga, then the Sanskrit for toil.

You'll want to know: क्लान्तिः

क्लान्तिः — *klāntiḥ* — "tiredness".

The word, taken apart — its roots and family

klānti is built on the root √klam, "to be fatigued, weary", with the noun suffix *-ti* (MW). MW gives √klam as an equivalent of √śram, "to toil", and Bengali uses its participle *klānta*, "tired".

What you've built

One more word for this chapter.

Your turn

- *Say it: klāntiḥ*
- *Say it: klāntiḥ*, once more
- *Say it:* say *klāntiḥ*
- *Recall:* say the Sanskrit for yoga, then the Sanskrit for toil, then say *klāntiḥ* again

Before you move on

What does क्लान्तिः mean? ("Tiredness".) Say it once more.

211.5 स्नानम् (snānam) — a bath

Before the new one: say the Sanskrit for toil, then the Sanskrit for tiredness.

You'll want to know: स्नानम्

स्नानम् — *snānam* — "a bath".

The word, taken apart — its roots and family

snāna is built on the root √snā, "to bathe" (MW), the root of *snāti*, "bathes", which you have already met. It lives on as Hindi *nahān*, "bathing" (CDIAL 13789).

What you've built

One more word for this chapter.

Your turn

- *Say it: snānam*
- *Say it: snānam*, once more
- *Say it:* say *snānam*

212.1 बुद्धिः (buddhiḥ) — intelligence

Before the new one: say the Sanskrit for tiredness, then the Sanskrit for a bath.

You'll want to know: बुद्धिः

बुद्धिः — *buddhiḥ* — "intelligence".

The word, taken apart — its roots and family

buddhi is built on the root √budh, "to wake, notice, understand" (MW), the root of *buddha*, "the awakened one". MW compares the root with Greek *pynthanomai*, "I learn". It lives on as Hindi *budh*, "intelligence" (CDIAL 9277).

What you've built

One more word for this chapter.

Your turn

- *Say it: buddhiḥ*
- *Say it: buddhiḥ*, once more
- *Say it:* say *buddhiḥ*

Before you move on

What does बुद्धिः mean? ("Intelligence".) Say it once more.

212.2 मनः (manaḥ) — the mind

Before the new one: say the Sanskrit for a bath, then the Sanskrit for intelligence.

You'll want to know: मनः

मनः — *manaḥ* — "the mind".

The word, taken apart — its roots and family

manas is built on the root √man, "to think" (MW). It is inherited from Indo-European: MW compares Greek *menos*, "spirit, force", and the root itself with English *mean*. It lives on as Hindi *man*, "mind" (CDIAL 9822).

What you've built

One more word for this chapter.

Your turn

- *Say it: manaḥ*

212.3 आत्मा (ātmā) — the self, the soul

Before the new one: say the Sanskrit for intelligence, then the Sanskrit for the mind.

You'll want to know: आत्मा

आत्मा — *ātmā* — "the self, the soul".

The word, taken apart — its roots and family

ātmā is the nominative of *ātman*, which first meant "breath" and then "soul, self" (CDIAL 1135). MW notes it is variously derived, from roots meaning "to breathe", "to move" or "to blow", and compares German *Atem*, "breath". Hindi *āp*, the polite "you", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ātmā*
- *Say it:* *ātmā*, once more
- *Say it:* say *ātmā*
- *Recall:* say the Sanskrit for intelligence, then the Sanskrit for the mind, then say *ātmā* again

Before you move on

What does आत्मा mean? ("The self, the soul".) Say it once more.

212.4 स्वप्नः (svapnaḥ) — a dream

Before the new one: say the Sanskrit for the mind, then the Sanskrit for the self.

You'll want to know: स्वप्नः

स्वप्नः — *svapnaḥ* — "a dream".

The word, taken apart — its roots and family

svapna is built on the root √svap, "to sleep" (MW): first "sleep", then "dream" (CDIAL 13904). The root is inherited from Indo-European: MW compares Latin *somnus*, "sleep", and Greek *hypnos*. Hindi *sapnā*, "dream", goes back to it, though CDIAL 13904 does not list the Hindi form.

What you've built

One more word for this chapter.

Your turn

- *Say it: svapnaḥ*
- *Say it: svapnaḥ*, once more
- *Say it:* say *svapnaḥ*
- *Recall:* say the Sanskrit for the mind, then the Sanskrit for the self, then say *svapnaḥ* again

Before you move on

What does स्वप्नः mean? ("A dream".) Say it once more.

212.5 तृप्तिः (tṛptiḥ) — satisfaction

Before the new one: say the Sanskrit for the self, then the Sanskrit for a dream.

You'll want to know: तृप्तिः

तृप्तिः — *tṛptiḥ* — "satisfaction".

The word, taken apart — its roots and family

tṛpti is built on the root √tṛp, "to be satisfied", with the noun suffix *-ti* (MW). It is a Rigvedic word (CDIAL 5931), and Tamil borrowed it as *tirupti*.

What you've built

One more word for this chapter.

Your turn

- *Say it: tṛptiḥ*
- *Say it: tṛptiḥ*, once more
- *Say it:* say *tṛptiḥ*
- *Recall:* say the Sanskrit for the self, then the Sanskrit for a dream, then say *tṛptiḥ* again

Before you move on

What does तृप्तिः mean? ("Satisfaction".) Say it once more.

Chapter 213

At once, Instantly, Formerly, Afterwards, As long as

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say at once, instantly, formerly, afterwards and as long as.
>
> *Complete the last lesson of chapter 213: I can say at once, instantly, formerly, afterwards and as long as.*

213.1 सद्यः (sadyaḥ) — at once

> Before the new one: say the Sanskrit for a dream, then the Sanskrit for satisfaction.

You'll want to know: सद्यः

सद्यः — *sadyaḥ* — "at once".

The word, taken apart — its roots and family

sadyaḥ is built on *sa-*, "same", and *dyu*, "day" (MW; CDIAL 13123): "on the same day", and so "at once". It is already in the Rigveda.

What you've built

One more word for this chapter.

Your turn

- *Say it: sadyaḥ*
- *Say it: sadyaḥ*, once more
- *Say it:* say *sadyaḥ*
- *Recall:* say the Sanskrit for a dream, then the Sanskrit for satisfaction, then say *sadyaḥ* again

Before you move on

What does सद्यः mean? ("At once".) Say it once more.

213.2 तत्क्षणम् (tatkṣaṇam) — instantly

Before the new one: say the Sanskrit for satisfaction, then the Sanskrit for at once.

You'll want to know: तत्क्षणम्

तत्क्षणम् — *tatkṣaṇam* — "instantly".

The word, taken apart — its roots and family

tatkṣaṇam is built on *tat*, "that", and *kṣaṇa*, "moment" (MW): "at that very moment". CDIAL 5640 traces Hindi *takhan*, "then", to it, and CDIAL 3642 links *kṣaṇa* to *akṣi*, "eye", as the twinkling of an eye.

What you've built

One more word for this chapter.

Your turn

- *Say it: tatkṣaṇam*
- *Say it: tatkṣaṇam*, once more
- *Say it:* say *tatkṣaṇam*
- *Recall:* say the Sanskrit for satisfaction, then the Sanskrit for at once, then say *tatkṣaṇam* again

Before you move on

What does तत्क्षणम् mean? ("Instantly".) Say it once more.

213.3 प्राक् (prāk) — formerly, before

Before the new one: say the Sanskrit for at once, then the Sanskrit for instantly.

You'll want to know: प्राक्

प्राक् — *prāk* — "formerly, before".

The word, taken apart — its roots and family

prāk is a form of *prāñc*, "turned forward, facing", built on *pra*, "forth", and √añc, "to bend, turn" (MW). What lies forward is "before" in time and, facing the sunrise, the east.

What you've built

One more word for this chapter.

Your turn

- *Say it: prāk*
- *Say it: prāk*, once more
- *Say it:* say *prāk*
- *Recall:* say the Sanskrit for at once, then the Sanskrit for instantly, then say *prāk* again

Before you move on

What does प्राक् mean? ("Formerly, before".) Say it once more.

213.4 अनन्तरम् (anantaram) — afterwards, next

Before the new one: say the Sanskrit for instantly, then the Sanskrit for formerly.

You'll want to know: अनन्तरम्

अनन्तरम् — *anantaram* — "afterwards, next".

The word, taken apart — its roots and family

anantaram is built on *an-*, "not", and *antara*, "interval" (MW): "with no interval", and so "immediately after" (CDIAL 287). CDIAL lists Marathi *nãtar*, "afterwards", under it, asking whether Marathi took it from Sanskrit.

What you've built

One more word for this chapter.

Your turn

- *Say it: anantaram*
- *Say it: anantaram*, once more
- *Say it:* say *anantaram*
- *Recall:* say the Sanskrit for instantly, then the Sanskrit for formerly, then say *anantaram* again

Before you move on

What does अनन्तरम् mean? ("Afterwards, next".) Say it once more.

213.5 यावत् (yāvat) — as long as, until

Before the new one: say the Sanskrit for formerly, then the Sanskrit for afterwards.

You'll want to know: यावत्

यावत् — *yāvat* — "as long as, until".

The word, taken apart — its roots and family

yāvat is built on the relative stem *ya-*, "which" (MW), and MW pairs it with its correlative *tāvat*, "so long". It is a Rigvedic word for "as

long as, until" (CDIAL 10474).

What you've built

One more word for this chapter.

Your turn

- *Say it: yāvat*
- *Say it: yāvat*, once more
- *Say it:* say *yāvat*
- *Recall:* say the Sanskrit for formerly, then the Sanskrit for afterwards, then say *yāvat* again

Before you move on

What does यावत् mean? ("As long as, until".) Say it once more.

Chapter 214

Exactly, Indeed, Like, Without, Towards

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say exactly, indeed, like, without and towards.
>
> *Complete the last lesson of chapter 214: I can say exactly, indeed, like, without and towards.*

214.1 एव (eva) — exactly, only

Before the new one: say the Sanskrit for afterwards, then the Sanskrit for as long as.

You'll want to know: एव

एव — *eva* — "exactly, only".

The word, taken apart — its roots and family

eva is an old particle, already in the Rigveda as "so, indeed" (CDIAL 2524). MW derives it from a pronoun stem and compares Avestan *aēva* and Gothic *aiw*, "ever", so it is inherited from Indo-European.

What you've built

One more word for this chapter.

Your turn

- *Say it: eva*
- *Say it: eva*, once more
- *Say it:* say *eva*
- *Recall:* say the Sanskrit for afterwards, then the Sanskrit for as long as, then say *eva* again

Before you move on

What does एव mean? ("Exactly, only".) Say it once more.

214.2 खलु (khalu) — indeed

Before the new one: say the Sanskrit for as long as, then the Sanskrit for exactly.

You'll want to know: खलु

खलु — *khalu* — "indeed".

The word, taken apart — its roots and family

khalu is a particle of assurance, already in the Rigveda (CDIAL 3846). MW gives no derivation for it, so its origin is unknown. Pali has it as *khalu* and *kho*.

What you've built

One more word for this chapter.

Your turn

- *Say it: khalu*
- *Say it: khalu*, once more
- *Say it:* say *khalu*
- *Recall:* say the Sanskrit for as long as, then the Sanskrit for exactly, then say *khalu* again

Before you move on

What does खलु mean? ("Indeed".) Say it once more.

214.3 इव (iva) — like, as if

Before the new one: say the Sanskrit for exactly, then the Sanskrit for indeed.

You'll want to know: इव

इव — *iva* — "like, as if".

The word, taken apart — its roots and family

iva is built on the pronoun stem *i-*, "this" (MW), and means "like, as it were". It follows the word it compares, as in *patheva*, "as if on a path".

What you've built

One more word for this chapter.

Your turn

- *Say it: iva*
- *Say it: iva*, once more
- *Say it:* say *iva*
- *Recall:* say the Sanskrit for exactly, then the Sanskrit for indeed, then say *iva* again

Before you move on

What does इव mean? ("Like, as if".) Say it once more.

214.4 विना (vinā) — without

Before the new one: say the Sanskrit for indeed, then the Sanskrit for like.

You'll want to know: विना

विना — *vinā* — "without".

The word, taken apart — its roots and family

vinā is probably an old case form of *vi*, "apart, away" (MW). It lives on as Hindi *bin*, "without" (CDIAL 11772), and Hindi *binā* is the same word.

What you've built

One more word for this chapter.

Your turn

- *Say it: vinā*
- *Say it: vinā*, once more
- *Say it:* say *vinā*
- *Recall:* say the Sanskrit for indeed, then the Sanskrit for like, then say *vinā* again

Before you move on

What does विना mean? ("Without".) Say it once more.

214.5 प्रति (prati) — towards

Before the new one: say the Sanskrit for like, then the Sanskrit for without.

You'll want to know: प्रति

प्रति — *prati* — "towards".

The word, taken apart — its roots and family

prati is an old preposition, "towards, against, back" (CDIAL 8540). It is inherited from Indo-European: MW compares Avestan *paiti* and Greek *proti* and *pros*, "towards".

What you've built

One more word for this chapter.

Your turn

- *Say it: prati*
- *Say it: prati*, once more
- *Say it:* say *prati*
- *Recall:* say the Sanskrit for like, then the Sanskrit for without, then say *prati* again

Before you move on

What does प्रति mean? ("Towards".) Say it once more.

Chapter 215

Moving, Slow, Sharp, Blunt, Valuable

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say moving, slow, sharp, blunt and valuable.
>
> *Complete the last lesson of chapter 215: I can say moving, slow, sharp, blunt and valuable.*

215.1 चलः (calaḥ) — moving, unsteady

Before the new one: say the Sanskrit for without, then the Sanskrit for towards.

You'll want to know: चलः

चलः — *calaḥ* — "moving, unsteady".

The word, taken apart — its roots and family

cala is built on the root √cal, "to move, stir, tremble" (MW; CDIAL 4713). MW compares Latin *celer*, "swift". The verb *calati* lives on as Hindi *calnā*, "to move, go" (CDIAL 4715).

What you've built

One more word for this chapter.

Your turn

- *Say it: calaḥ*
- *Say it: calaḥ*, once more
- *Say it:* say *calaḥ*
- *Recall:* say the Sanskrit for without, then the Sanskrit for towards, then say *calaḥ* again

Before you move on

What does चलः mean? ("Moving, unsteady".) Say it once more.

215.2 मन्दः (mandaḥ) — slow, dull

Before the new one: say the Sanskrit for towards, then the Sanskrit for moving.

You'll want to know: मन्दः

मन्दः — *mandaḥ* — "slow, dull".

The word, taken apart — its roots and family

manda means "slow, sluggish, weak, faint" (MW). Its origin is uncertain: CDIAL 9754 groups it with *manthara*, "slow, bent", and other words for defects whose source is unclear.

What you've built

One more word for this chapter.

Your turn

- *Say it: mandaḥ*
- *Say it: mandaḥ*, once more
- *Say it:* say *mandaḥ*
- *Recall:* say the Sanskrit for towards, then the Sanskrit for moving, then say *mandaḥ* again

Before you move on

What does मन्दः mean? ("Slow, dull".) Say it once more.

215.3 तीक्ष्णः (tīkṣṇaḥ) — sharp

Before the new one: say the Sanskrit for moving, then the Sanskrit for slow.

You'll want to know: तीक्ष्णः

तीक्ष्णः — *tīkṣṇaḥ* — "sharp".

The word, taken apart — its roots and family

tīkṣṇa is built on the root √tij, "to be or become sharp" (MW). In the Rigveda it means "sharp", later also "hot, pungent" (CDIAL 5839). It lives on as Hindi *tīkhā*, "sharp, pungent". MW compares √tij with Greek *stizō*, "I prick".

What you've built

One more word for this chapter.

Your turn

- *Say it: tīkṣṇaḥ*
- *Say it: tīkṣṇaḥ*, once more
- *Say it:* say *tīkṣṇaḥ*
- *Recall:* say the Sanskrit for moving, then the Sanskrit for slow, then say *tīkṣṇaḥ* again

Before you move on

What does तीक्ष्णः mean? ("Sharp".) Say it once more.

215.4 कुण्ठः (kuṇṭhaḥ) — blunt

Before the new one: say the Sanskrit for slow, then the Sanskrit for sharp.

You'll want to know: कुण्ठः

कुण्ठः — *kuṇṭhaḥ* — "blunt".

The word, taken apart — its roots and family

kuṇṭha is of uncertain origin. CDIAL 3261 compares Persian *kund*, "blunt", but also counts it among a set of words for defects whose source is not settled. MW files it under a root √kuṇṭh.

What you've built

One more word for this chapter.

Your turn

- *Say it: kuṇṭhaḥ*
- *Say it: kuṇṭhaḥ*, once more
- *Say it:* say *kuṇṭhaḥ*
- *Recall:* say the Sanskrit for slow, then the Sanskrit for sharp, then say *kuṇṭhaḥ* again

Before you move on

What does कुण्ठः mean? ("Blunt".) Say it once more.

215.5 मूल्यवान् (mūlyavān) — valuable

Before the new one: say the Sanskrit for sharp, then the Sanskrit for blunt.

You'll want to know: मूल्यवान्

मूल्यवान् — *mūlyavān* — "valuable".

The word, taken apart — its roots and family

mūlyavān is the nominative of *mūlyavat*, built on *mūlya*, "original value, price", and the suffix *-vat*, "having" (MW). *Mūlya* comes from *mūla*, "root", so a price is the root value of a thing (CDIAL 10257). Gujarati *mūl*, "price", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: mūlyavān*
- *Say it: mūlyavān*, once more
- *Say it:* say *mūlyavān*
- *Recall:* say the Sanskrit for sharp, then the Sanskrit for blunt, then say *mūlyavān* again

Before you move on

What does मूल्यवान् mean? ("Valuable".) Say it once more.

Chapter 216

Able, Expert, Ignorant, Wise, Intelligent

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say able, expert, ignorant, wise and intelligent.
>
> *Complete the last lesson of chapter 216: I can say able, expert, ignorant, wise and intelligent.*

216.1 कुशलः (kuśalaḥ) — able, well

> Before the new one: say the Sanskrit for blunt, then the Sanskrit for valuable.

You'll want to know: कुशलः

कुशलः — *kuśalaḥ* — "able, well".

The word, taken apart — its roots and family

kuśala is the word behind *kuśalam*, "well-being", from your first greetings, and its origin is not settled (CDIAL 3365 judges the one modern derivation it cites "very doubtful"). A popular explanation takes it from *kuśa*, the sacred grass, with a root of cutting, "skilled at cutting the grass", but no dictionary we checked (MW, Apte, CDIAL) supports it. MW gives both "well, healthy" and "competent, skilful".

What you've built

One more word for this chapter.

Your turn

- *Say it: kuśalaḥ*
- *Say it: kuśalaḥ*, once more
- *Say it:* say *kuśalaḥ*
- *Recall:* say the Sanskrit for blunt, then the Sanskrit for valuable, then say *kuśalaḥ* again

Before you move on

What does कुशलः mean? ("Able, well".) Say it once more.

216.2 निपुणः (nipuṇaḥ) — expert

Before the new one: say the Sanskrit for valuable, then the Sanskrit for able.

You'll want to know: निपुणः

निपुणः — *nipuṇaḥ* — "expert".

The word, taken apart — its roots and family

nipuṇa means "clever, adroit, skilful" (MW). MW says it is "said to be from a √puṇ" with *ni-*, and only reports that view, so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: nipuṇaḥ*
- *Say it: nipuṇaḥ*, once more

- *Say it:* say *nipuṇaḥ*
- *Recall:* say the Sanskrit for valuable, then the Sanskrit for able, then say *nipuṇaḥ* again

Before you move on

What does निपुणः mean? ("Expert".) Say it once more.

216.3 अज्ञः (ajñaḥ) — ignorant

Before the new one: say the Sanskrit for able, then the Sanskrit for expert.

You'll want to know: अज्ञः

अज्ञः — *ajñaḥ* — "ignorant".

The word, taken apart — its roots and family

ajña is *a-*, "not", with *jña*, "knowing", from the root √jñā, "to know" (MW; CDIAL 160). √jñā is the root of *jānāti*, "knows", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: ajñaḥ*
- *Say it: ajñaḥ*, once more
- *Say it:* say *ajñaḥ*
- *Recall:* say the Sanskrit for able, then the Sanskrit for expert, then say *ajñaḥ* again

Before you move on

What does अज्ञः mean? ("Ignorant".) Say it once more.

216.4 विज्ञः (vijñaḥ) — wise, knowing

Before the new one: say the Sanskrit for expert, then the Sanskrit for ignorant.

You'll want to know: विज्ञः

विज्ञः — *vijñaḥ* — "wise, knowing".

The word, taken apart — its roots and family

vijña is built on *vi-*, "apart", and *jña*, "knowing", from the root √jñā, "to know" (MW): one who knows things apart, wise. It is the opposite of *ajña*, and *vijñāna*, "science", is built the same way.

What you've built

One more word for this chapter.

Your turn

- *Say it: vijñaḥ*
- *Say it: vijñaḥ*, once more
- *Say it:* say *vijñaḥ*
- *Recall:* say the Sanskrit for expert, then the Sanskrit for ignorant, then say *vijñaḥ* again

Before you move on

What does विज्ञः mean? ("Wise, knowing".) Say it once more.

216.5 बुद्धिमान् (buddhimān) — intelligent

Before the new one: say the Sanskrit for ignorant, then the Sanskrit for wise.

You'll want to know: बुद्धिमान्

बुद्धिमान् — *buddhimān* — "intelligent".

The word, taken apart — its roots and family

buddhimān is the nominative of *buddhimat*, *buddhi*, "intelligence", with the suffix *-mat*, "having" (MW). *Buddhi* is built on the root √budh, "to wake, notice". Hindi and Bengali took the word over as *buddhimān*.

What you've built

One more word for this chapter.

Your turn

- *Say it: buddhimān*
- *Say it: buddhimān*, once more
- *Say it:* say *buddhimān*
- *Recall:* say the Sanskrit for ignorant, then the Sanskrit for wise, then say *buddhimān* again

Before you move on

What does बुद्धिमान् mean? ("Intelligent".) Say it once more.

Chapter 217

Red, Reddish, Tawny, Equal, Uneven

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say red, reddish, tawny, equal and uneven.
>
> *Complete the last lesson of chapter 217: I can say red, reddish, tawny, equal and uneven.*

217.1 रक्तः (raktaḥ) — red

Before the new one: say the Sanskrit for wise, then the Sanskrit for intelligent.

You'll want to know: रक्तः

रक्तः — *raktaḥ* — "red".

The word, taken apart — its roots and family

rakta is the past participle of the root √rañj, "to be coloured, dyed" (MW): "dyed", then "red", then "blood" (CDIAL 10539). It lives on as Hindi *rātā*, "dyed, red".

What you've built

One more word for this chapter.

Your turn

- *Say it: raktaḥ*
- *Say it: raktaḥ*, once more
- *Say it:* say *raktaḥ*
- *Recall:* say the Sanskrit for wise, then the Sanskrit for intelligent, then say *raktaḥ* again

Before you move on

What does रक्तः mean? ("Red".) Say it once more.

217.2 अरुणः (aruṇaḥ) — reddish, dawn-red

Before the new one: say the Sanskrit for intelligent, then the Sanskrit for red.

You'll want to know: अरुणः

अरुणः — *aruṇaḥ* — "reddish, dawn-red".

The word, taken apart — its roots and family

aruṇa is the Rigvedic colour of dawn, "reddish, tawny" (CDIAL 616). MW takes it from the root √ṛ, while CDIAL suggests, with a question mark, a stem *aru-*, so the derivation is not settled. Hindi keeps it as *arun*.

What you've built

One more word for this chapter.

Your turn

- *Say it: aruṇaḥ*
- *Say it: aruṇaḥ*, once more
- *Say it:* say *aruṇaḥ*

- *Recall:* say the Sanskrit for intelligent, then the Sanskrit for red, then say *aruṇaḥ* again

Before you move on

What does अरुणः mean? ("Reddish, dawn-red".) Say it once more.

217.3 कपिलः (kapilaḥ) — tawny, brown

Before the new one: say the Sanskrit for red, then the Sanskrit for reddish.

You'll want to know: कपिलः

कपिलः — *kapilaḥ* — "tawny, brown".

The word, taken apart — its roots and family

kapila is a Rigvedic colour word, "brown, tawny, reddish" (CDIAL 2750). MW says it is more probably connected with *kapi*, "monkey": monkey-coloured. Gujarati *koḷũ*, "reddish brown", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: kapilaḥ*
- *Say it: kapilaḥ*, once more
- *Say it:* say *kapilaḥ*
- *Recall:* say the Sanskrit for red, then the Sanskrit for reddish, then say *kapilaḥ* again

Before you move on

What does कपिलः mean? ("Tawny, brown".) Say it once more.

217.4 समः (samaḥ) — equal, even

Before the new one: say the Sanskrit for reddish, then the Sanskrit for tawny.

You'll want to know: समः

समः — *samaḥ* — "equal, even".

The word, taken apart — its roots and family

sama is an inherited Indo-European word for "equal, level" (CDIAL 13173). MW compares Greek *homos*, Latin *similis* and English *same*.

What you've built

One more word for this chapter.

Your turn

- *Say it: samaḥ*
- *Say it: samaḥ*, once more
- *Say it:* say *samaḥ*
- *Recall:* say the Sanskrit for reddish, then the Sanskrit for tawny, then say *samaḥ* again

Before you move on

What does समः mean? ("Equal, even".) Say it once more.

217.5 विषमः (viṣamaḥ) — uneven, odd

Before the new one: say the Sanskrit for tawny, then the Sanskrit for equal.

You'll want to know: विषमः

विषमः — *viṣamaḥ* — "uneven, odd".

The word, taken apart — its roots and family

viṣama is built on *vi-*, "apart", and *sama*, "even, equal" (MW): "uneven, unequal", and so "odd", "difficult" (CDIAL 11972). The *s* of *sama* turns to *ṣ* after *vi-*.

What you've built

One more word for this chapter.

Your turn

- *Say it: viṣamaḥ*
- *Say it: viṣamaḥ*, once more
- *Say it:* say *viṣamaḥ*
- *Recall:* say the Sanskrit for tawny, then the Sanskrit for equal, then say *viṣamaḥ* again

Before you move on

What does विषमः mean? ("Uneven, odd".) Say it once more.

218.1 सम्मार्जनी (sammārjanī) — a broom

Before the new one: say the Sanskrit for equal, then the Sanskrit for uneven.

You'll want to know: सम्मार्जनी

सम्मार्जनी — *sammārjanī* — "a broom".

The word, taken apart — its roots and family

sammārjanī is built on *sam-*, "together, thoroughly", and the root √mṛj, "to wipe, rub clean". MW lists *sammārjana*, "sweeping or cleansing thoroughly", and also "a wisp or broom". MW compares √mṛj with Latin *mulgēre* and English *milk*.

What you've built

One more word for this chapter.

Your turn

- *Say it: sammārjanī*
- *Say it: sammārjanī*, once more

Before you move on

What does सम्मार्जनी mean? ("A broom".) Say it once more.

218.2 कुठारः (kuṭhāraḥ) — an axe

Before the new one: say the Sanskrit for uneven, then the Sanskrit for a broom.

You'll want to know: कुठारः

कुठारः — *kuṭhāraḥ* — "an axe".

The word, taken apart — its roots and family

kuṭhāra is probably borrowed from Dravidian: CDIAL 3244, following Mayrhofer, connects it with *kuṭṭ-*, "to break, cut" (CDIAL 3236). It lives on as Hindi *kulhāṛā* and *kulhāṛī*, "axe".

What you've built

One more word for this chapter.

Your turn

- *Say it: kuṭhāraḥ*
- *Say it: kuṭhāraḥ*, once more
- *Say it:* say *kuṭhāraḥ*
- *Recall:* say the Sanskrit for uneven, then the Sanskrit for a broom, then say *kuṭhāraḥ* again

Before you move on

What does कुठारः mean? ("An axe".) Say it once more.

218.3 खनित्रम् (khanitram) — a spade

Before the new one: say the Sanskrit for a broom, then the Sanskrit for an axe.

You'll want to know: खनित्रम्

खनित्रम् — *khanitram* — "a spade".

The word, taken apart — its roots and family

khanitra is built on the root √khan, "to dig", with the instrument suffix *-tra* (MW), and is already in the Rigveda (CDIAL 3814). It is the tool of *khanati*, "digs", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: khanitram*
- *Say it: khanitram*, once more
- *Say it:* say *khanitram*
- *Recall:* say the Sanskrit for a broom, then the Sanskrit for an axe, then say *khanitram* again

Before you move on

What does खनित्रम् mean? ("A spade".) Say it once more.

218.4 हलम् (halam) — a plough

Before the new one: say the Sanskrit for an axe, then the Sanskrit for a spade.

You'll want to know: हलम्

हलम् — *halam* — "a plough".

The word, taken apart — its roots and family

hala is the plough, and MW gives a root √hal, "to plough", while noting the root may have been made from the noun. Its deeper origin is uncertain. It lives on as Hindi *hal*, "plough" (CDIAL 14000).

What you've built

One more word for this chapter.

Your turn

- *Say it: halam*
- *Say it: halam*, once more
- *Say it:* say *halam*
- *Recall:* say the Sanskrit for an axe, then the Sanskrit for a spade, then say *halam* again

Before you move on

What does हलम् mean? ("A plough".) Say it once more.

218.5 दात्रम् (dātram) — a sickle

Before the new one: say the Sanskrit for a spade, then the Sanskrit for a plough.

You'll want to know: दात्रम्

दात्रम् — *dātram* — "a sickle".

The word, taken apart — its roots and family

dātra is built on the root √do, "to cut", with the instrument suffix *-tra* (CDIAL 6260): "the cutter", a sickle. It is a different word from *dātra*, "gift", from √dā, "to give". Hindi *dā*, "sickle, chopper", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: dātram*
- *Say it: dātram*, once more
- *Say it:* say *dātram*
- *Recall:* say the Sanskrit for a spade, then the Sanskrit for a plough, then say *dātram* again

Before you move on

What does दात्रम् mean? ("A sickle".) Say it once more.

Chapter 219

Bael fruit, Orange, Wood apple, Apple, Flattened rice

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a bael fruit, an orange, a wood apple, an apple and flattened rice.
>
> *Complete the last lesson of chapter 219: I can say a bael fruit, an orange, a wood apple, an apple and flattened rice.*

219.1 बिल्वम् (bilvam) — a bael fruit

Before the new one: say the Sanskrit for a plough, then the Sanskrit for a sickle.

You'll want to know: बिल्वम्

बिल्वम् — *bilvam* — "a bael fruit".

The word, taken apart — its roots and family

bilva is of Dravidian origin, CDIAL 9248 says, while DEDR 5509 sets Dravidian wood-apple words such as Telugu *velāga* beside it only with a question mark. It lives on as Hindi *bīl*, the tree.

What you've built

One more word for this chapter.

Your turn

- *Say it: bilvam*
- *Say it: bilvam*, once more
- *Say it:* say *bilvam*
- *Recall:* say the Sanskrit for a plough, then the Sanskrit for a sickle, then say *bilvam* again

Before you move on

What does बिल्वम् mean? ("A bael fruit".) Say it once more.

219.2 नारंगम् (nāraṅgam) — an orange

Before the new one: say the Sanskrit for a sickle, then the Sanskrit for a bael fruit.

You'll want to know: नारंगम्

नारंगम् — *nāraṅgam* — "an orange".

The word, taken apart — its roots and family

nāraṅga names the orange tree, first in Suśruta (CDIAL 7073); MW gives no derivation, so its origin is uncertain. EtymDB traces it west: Persian borrowed it as *nārang*, Arabic took *nāranj*, and through Old French it became English *orange*. At home it stays as Hindi *nāraṅgī*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nāraṅgam*
- *Say it: nāraṅgam*, once more
- *Say it:* say *nāraṅgam*

- *Recall:* say the Sanskrit for a sickle, then the Sanskrit for a bael fruit, then say *nāraṅgam* again

Before you move on

What does नारंगम् mean? ("An orange".) Say it once more.

219.3 कपित्थः (kapitthaḥ) — a wood apple

Before the new one: say the Sanskrit for a bael fruit, then the Sanskrit for an orange.

You'll want to know: कपित्थः

कपित्थः — *kapitthaḥ* — "a wood apple".

The word, taken apart — its roots and family

MW reads *kapittha* as *kapi*, "monkey", with *-ttha*, a form of *stha*, "standing, dwelling": the tree monkeys live in. CDIAL 2749 disagrees: it compares the ending of *aśvattha*, the sacred fig, and thinks the link with *kapi* is probably only folk etymology, so the origin is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: kapitthaḥ*
- *Say it: kapitthaḥ*, once more
- *Say it:* say *kapitthaḥ*
- *Recall:* say the Sanskrit for a bael fruit, then the Sanskrit for an orange, then say *kapitthaḥ* again

Before you move on

What does कपित्थः mean? ("A wood apple".) Say it once more.

219.4 सेवफलम् (sevaphalam) — an apple

Before the new one: say the Sanskrit for an orange, then the Sanskrit for a wood apple.

You'll want to know: सेवफलम्

सेवफलम् — *sevaphalam* — "an apple".

The word, taken apart — its roots and family

sevaphala is *seva*, "apple", with *phala*, "fruit". MW lists *seva* only from the lexicons and derives it uncertainly from √sev or √siv, so its source is uncertain, and MW does not list the compound, so the pairing is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: sevaphalam*
- *Say it: sevaphalam*, once more
- *Say it:* say *sevaphalam*
- *Recall:* say the Sanskrit for an orange, then the Sanskrit for a wood apple, then say *sevaphalam* again

Before you move on

What does सेवफलम् mean? ("An apple".) Say it once more.

219.5 चिपिटकः (cipiṭakaḥ) — flattened rice

Before the new one: say the Sanskrit for a wood apple, then the Sanskrit for an apple.

You'll want to know: चिपिटकः

चिपिटकः — *cipiṭakaḥ* — "flattened rice".

The word, taken apart — its roots and family

cipiṭaka is *cipiṭa*, "flat, flattened" (MW), with the suffix *-ka*: rice beaten flat. It lives on as Hindi *cūṛā* and Bengali *ciṛā* (CDIAL 4818).

What you've built

One more word for this chapter.

Your turn

- *Say it: cipiṭakaḥ*
- *Say it: cipiṭakaḥ*, once more
- *Say it:* say *cipiṭakaḥ*
- *Recall:* say the Sanskrit for a wood apple, then the Sanskrit for an apple, then say *cipiṭakaḥ* again

Before you move on

What does चिपिटकः mean? ("Flattened rice".) Say it once more.

Chapter 220

Balance, Measuring rod, Stick, Staff, Archer's bow

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a balance, a measuring rod, a stick, a staff and an archer's bow.
>
> *Complete the last lesson of chapter 220: I can say a balance, a measuring rod, a stick, a staff and an archer's bow.*

220.1 तुला (tulā) — a balance, scales

Before the new one: say the Sanskrit for an apple, then the Sanskrit for flattened rice.

You'll want to know: तुला

तुला — *tulā* — "a balance, scales".

The word, taken apart — its roots and family

tulā is built on the root √tul, "to lift up, weigh" (MW): a balance lifts things to weigh them (CDIAL 5886). MW compares the root with Latin *tulī*, "I carried", an inherited Indo-European root. It is also the sign Libra, the Scales.

What you've built

One more word for this chapter.

Your turn

- *Say it: tulā*
- *Say it: tulā*, once more
- *Say it:* say *tulā*
- *Recall:* say the Sanskrit for an apple, then the Sanskrit for flattened rice, then say *tulā* again

Before you move on

What does तुला mean? ("A balance, scales".) Say it once more.

220.2 मानदण्डः (mānadaṇḍaḥ) — a measuring rod

Before the new one: say the Sanskrit for flattened rice, then the Sanskrit for a balance.

You'll want to know: मानदण्डः

मानदण्डः — *mānadaṇḍaḥ* — "a measuring rod".

The word, taken apart — its roots and family

mānadaṇḍa is a compound of *māna*, "measure, standard" (CDIAL 10041), built on the root √mā, "to measure", and *daṇḍa*, "stick, rod". MW does not list the compound, so the pairing for a measuring rod is modern; *mānadaṇḍa* also means "standard".

What you've built

One more word for this chapter.

Your turn

- *Say it: mānadaṇḍaḥ*
- *Say it: mānadaṇḍaḥ*, once more
- *Say it:* say *mānadaṇḍaḥ*

- *Recall:* say the Sanskrit for flattened rice, then the Sanskrit for a balance, then say *mānadaṇḍaḥ* again

Before you move on

What does मानदण्डः mean? ("A measuring rod".) Say it once more.

220.3 दण्डः (daṇḍaḥ) — a stick

Before the new one: say the Sanskrit for a balance, then the Sanskrit for a measuring rod.

You'll want to know: दण्डः

दण्डः — *daṇḍaḥ* — "a stick".

The word, taken apart — its roots and family

daṇḍa is a Rigvedic word for "stick, club" (CDIAL 6128). MW relates it to Greek *dendron*, "tree", and to Sanskrit *dāru*, "wood", but CDIAL thinks it probably non-Aryan and finds no support for the Greek comparison, so the origin is not settled. It later also meant "punishment", the stick that rules.

What you've built

One more word for this chapter.

Your turn

- *Say it: daṇḍaḥ*
- *Say it: daṇḍaḥ*, once more
- *Say it:* say *daṇḍaḥ*
- *Recall:* say the Sanskrit for a balance, then the Sanskrit for a measuring rod, then say *daṇḍaḥ* again

Before you move on

What does दण्डः mean? ("A stick".) Say it once more.

220.4 यष्टिः (yaṣṭiḥ) — a staff

Before the new one: say the Sanskrit for a measuring rod, then the Sanskrit for a stick.

You'll want to know: यष्टिः

यष्टिः — *yaṣṭiḥ* — "a staff".

The word, taken apart — its roots and family

yaṣṭi means "any support, a staff, pole" (MW), and MW derives it, probably, from √yam, "to hold, support". It is in the Śatapatha Brāhmaṇa, and Hindi *jāṭh*, "post, beam in a sugar mill", comes from it (CDIAL 10444).

What you've built

One more word for this chapter.

Your turn

- *Say it: yaṣṭiḥ*
- *Say it: yaṣṭiḥ*, once more
- *Say it:* say *yaṣṭiḥ*
- *Recall:* say the Sanskrit for a measuring rod, then the Sanskrit for a stick, then say *yaṣṭiḥ* again

Before you move on

What does यष्टिः mean? ("A staff".) Say it once more.

220.5 धनुः (dhanuḥ) — an archer's bow

Before the new one: say the Sanskrit for a stick, then the Sanskrit for a staff.

You'll want to know: धनुः

धनुः — *dhanuḥ* — "an archer's bow".

The word, taken apart — its roots and family

dhanuḥ is the nominative of *dhanus*, "bow", already in the Rigveda (CDIAL 6726). MW gives no derivation, so its origin is uncertain. It is the second half of *indradhanus*, "rainbow", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: dhanuḥ*
- *Say it: dhanuḥ*, once more
- *Say it:* say *dhanuḥ*
- *Recall:* say the Sanskrit for a stick, then the Sanskrit for a staff, then say *dhanuḥ* again

Before you move on

What does धनुः mean? ("An archer's bow".) Say it once more.

220.6 Words from chapters 212-215 — a first pass

Say the words for a staff and an archer's bow.

Your turn

Say these aloud:

- intelligence, the mind, the self, a dream, satisfaction
- at once, instantly, formerly, afterwards, as long as
- exactly, indeed, like, without, towards
- moving, slow, sharp, blunt, valuable

Before you move on

Intelligence? (बुद्धिः, *buddhiḥ.*) The mind? (मनः, *manaḥ.*) The self? (आत्मा, *ātmā.*) A dream? (स्वप्नः, *svapnaḥ.*) Satisfaction? (तृप्तिः, *tṛptiḥ.*) At once? (सद्यः, *sadyaḥ.*) Instantly? (तत्क्षणम्, *tatkṣaṇam.*) Formerly? (प्राक्, *prāk.*) Afterwards? (अनन्तरम्, *anantaram.*) As long as? (यावत्, *yāvat.*) Exactly? (एव, *eva.*) Indeed? (खलु, *khalu.*) Like? (इव, *iva.*) Without? (विना, *vinā.*) Towards? (प्रति, *prati.*) Moving? (चलः, *calaḥ.*) Slow? (मन्दः, *mandaḥ.*) Sharp? (तीक्ष्णः, *tīkṣṇaḥ.*) Blunt? (कुण्ठः, *kuṇṭhaḥ.*) Valuable? (मूल्यवान्, *mūlyavān.*)

220.7 Words from chapters 216-220 — a second pass

Say the words for able and expert.

Your turn

Say these aloud:

- able, expert, ignorant, wise, intelligent
- red, reddish, tawny, equal, uneven
- a broom, an axe, a spade, a plough, a sickle
- a bael fruit, an orange, a wood apple, an apple, flattened rice
- a balance, a measuring rod, a stick, a staff, an archer's bow

Before you move on

Able? (कुशलः, *kuśalaḥ.*) Expert? (निपुणः, *nipuṇaḥ.*) Ignorant? (अज्ञः, *ajñaḥ.*) Wise? (विज्ञः, *vijñaḥ.*) Intelligent? (बुद्धिमान्, *buddhimān.*) Red? (रक्तः, *raktaḥ.*) Reddish? (अरुणः, *aruṇaḥ.*) Tawny? (कपिलः, *kapilaḥ.*) Equal? (समः, *samaḥ.*) Uneven? (विषमः, *viṣamaḥ.*) A broom? (सम्मार्जनी, *sammārjanī.*) An axe? (कुठारः, *kuṭhāraḥ.*) A spade? (खनित्रम्, *khanitram.*) A plough? (हलम्, *halam.*) A sickle? (दात्रम्, *dātram.*) A bael fruit? (बिल्वम्, *bilvam.*) An orange? (नारंगम्, *nāraṅgam.*) A wood apple? (कपित्थः, *kapitthaḥ.*) An apple? (सेवफलम्,

sevaphalam.) Flattened rice? (चिपिटकः, *cipiṭakaḥ.*) A balance? (तुला, *tulā.*) A measuring rod? (मानदण्डः, *mānadaṇḍaḥ.*) A stick? (दण्डः, *daṇḍaḥ.*) A staff? (यष्टिः, *yaṣṭiḥ.*) An archer's bow? (धनुः, *dhanuḥ.*)

Chapter 221

Cotton, Silk, Leather, Knot, Small stool

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say cotton, silk, leather, a knot and a small stool.
>
> *Complete the last lesson of chapter 221: I can say cotton, silk, leather, a knot and a small stool.*

221.1 कार्पासः (kārpāsaḥ) — cotton

Before the new one: say the Sanskrit for a staff, then the Sanskrit for an archer's bow.

You'll want to know: कार्पासः

कार्पासः — *kārpāsaḥ* — "cotton".

The word, taken apart — its roots and family

kārpāsa is the adjective of *karpāsa*, "the cotton plant", used for cotton itself (MW). CDIAL 2877 takes *karpāsa* from Austroasiatic, and MW compares Greek *karpasos* and Latin *carbasus*, "fine flax". Punjabi *kapāh*, "cotton", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: kārpāsaḥ*
- *Say it: kārpāsaḥ*, once more
- *Say it:* say *kārpāsaḥ*
- *Recall:* say the Sanskrit for a staff, then the Sanskrit for an archer's bow, then say *kārpāsaḥ* again

Before you move on

What does कार्पासः mean? ("Cotton".) Say it once more.

221.2 कौशेयम् (kauśeyam) — silk

Before the new one: say the Sanskrit for an archer's bow, then the Sanskrit for cotton.

You'll want to know: कौशेयम्

कौशेयम् — *kauśeyam* — "silk".

The word, taken apart — its roots and family

kauśeya is an adjective from *kośa*, "case, sheath", here the silkworm's cocoon (MW): "silken", and so silk cloth. *Kośa* itself is a Rigvedic word for "bucket, case" (CDIAL 3539).

What you've built

One more word for this chapter.

Your turn

- *Say it: kauśeyam*
- *Say it: kauśeyam*, once more
- *Say it:* say *kauśeyam*
- *Recall:* say the Sanskrit for an archer's bow, then the Sanskrit for cotton, then say *kauśeyam* again

Before you move on

What does कौशेयम् mean? ("Silk".) Say it once more.

221.3 चर्म (carma) — leather, hide

Before the new one: say the Sanskrit for cotton, then the Sanskrit for silk.

You'll want to know: चर्म

चर्म — *carma* — "leather, hide".

The word, taken apart — its roots and family

carma is the nominative of *carman*, "hide, skin", a Rigvedic word (CDIAL 4701). MW compares Latin *corium*, "hide, leather", so it is an inherited Indo-European word. It lives on as Hindi *cām*, "hide, leather".

What you've built

One more word for this chapter.

Your turn

- *Say it: carma*
- *Say it: carma*, once more
- *Say it:* say *carma*
- *Recall:* say the Sanskrit for cotton, then the Sanskrit for silk, then say *carma* again

Before you move on

What does चर्म mean? ("Leather, hide".) Say it once more.

221.4 ग्रन्थिः (granthiḥ) — a knot

Before the new one: say the Sanskrit for silk, then the Sanskrit for leather.

You'll want to know: ग्रन्थिः

ग्रन्थिः — *granthiḥ* — "a knot".

The word, taken apart — its roots and family

granthi is built on the root √granth, "to fasten, tie, string together" (MW): a knot. It is a Rigvedic word (CDIAL 4354). The same root gives *grantha*, "a book", words strung together.

What you've built

One more word for this chapter.

Your turn

- *Say it: granthiḥ*
- *Say it: granthiḥ*, once more
- *Say it:* say *granthiḥ*
- *Recall:* say the Sanskrit for silk, then the Sanskrit for leather, then say *granthiḥ* again

Before you move on

What does ग्रन्थिः mean? ("A knot".) Say it once more.

221.5 पीठिका (pīṭhikā) — a small stool

Before the new one: say the Sanskrit for leather, then the Sanskrit for a knot.

You'll want to know: पीठिका

पीठिका — *pīṭhikā* — "a small stool".

The word, taken apart — its roots and family

pīṭhikā is *pīṭha*, "stool, seat", with the diminutive *-ikā*. MW suggests *pīṭha* may be worn down from *pi-sad*, "to sit upon", while CDIAL 8222 says its many forms suggest a non-Aryan origin; the question is not

settled. It lives on as Hindi *pīṛhā*, “stool”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: pīṭhikā*
- *Say it: pīṭhikā*, once more
- *Say it:* say *pīṭhikā*
- *Recall:* say the Sanskrit for leather, then the Sanskrit for a knot, then say *pīṭhikā* again

Before you move on

What does पीठिका mean? (“A small stool”.) Say it once more.

Chapter 222

Instrument, Load, Goods for sale, Shopkeeper, Newspaper

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say an instrument, a load, goods for sale, a shopkeeper and a newspaper.
>
> *Complete the last lesson of chapter 222: I can say an instrument, a load, goods for sale, a shopkeeper and a newspaper.*

222.1 साधनम् (sādhanam) — an instrument, a means

Before the new one: say the Sanskrit for a knot, then the Sanskrit for a small stool.

You'll want to know: साधनम्

साधनम् — *sādhanam* — "an instrument, a means".

The word, taken apart — its roots and family

sādhana is built on the root √sādh, "to go straight to a goal, accomplish" (MW). In the Rigveda it means "furthering", and later "completion" and "means" (CDIAL 13334): the instrument that gets something done.

What you've built

One more word for this chapter.

Your turn

- *Say it: sādhanam*
- *Say it: sādhanam*, once more
- *Say it:* say *sādhanam*
- *Recall:* say the Sanskrit for a knot, then the Sanskrit for a small stool, then say *sādhanam* again

Before you move on

What does साधनम् mean? ("An instrument, a means".) Say it once more.

222.2 भारः (bhāraḥ) — a load, a burden

Before the new one: say the Sanskrit for a small stool, then the Sanskrit for an instrument.

You'll want to know: भारः

भारः — *bhāraḥ* — "a load, a burden".

The word, taken apart — its roots and family

bhāra is built on the root √bhṛ, "to bear, carry" (MW), the root of *bharati*, "bears": a load is what is borne. It lives on as Hindi *bhār*, "load" (CDIAL 9459).

What you've built

One more word for this chapter.

Your turn

- *Say it: bhāraḥ*
- *Say it: bhāraḥ*, once more
- *Say it:* say *bhāraḥ*
- *Recall:* say the Sanskrit for a small stool, then the Sanskrit for an instrument, then say *bhāraḥ* again

Before you move on

What does भारः mean? ("A load, a burden".) Say it once more.

222.3 पण्यम् (paṇyam) — goods for sale

Before the new one: say the Sanskrit for an instrument, then the Sanskrit for a load.

You'll want to know: पण्यम्

पण्यम् — *paṇyam* — "goods for sale".

The word, taken apart — its roots and family

paṇya is built on the root √paṇ, "to barter, purchase" (MW): "to be bought or sold", and so goods for sale (CDIAL 7719). *Paṇa*, "a coin, a stake", comes from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: paṇyam*
- *Say it: paṇyam*, once more
- *Say it:* say *paṇyam*
- *Recall:* say the Sanskrit for an instrument, then the Sanskrit for a load, then say *paṇyam* again

Before you move on

What does पण्यम् mean? ("Goods for sale".) Say it once more.

222.4 आपणिकः (āpaṇikaḥ) — a shopkeeper

Before the new one: say the Sanskrit for a load, then the Sanskrit for goods for sale.

You'll want to know: आपणिकः

आपणिकः — *āpaṇikaḥ* — "a shopkeeper".

The word, taken apart — its roots and family

āpaṇika is built on *āpaṇa*, "market, shop", from *ā-* with the root √paṇ, "to barter" (MW), and the suffix *-ika*: "one of the market", a trader (CDIAL 1192).

What you've built

One more word for this chapter.

Your turn

- *Say it: āpaṇikaḥ*
- *Say it: āpaṇikaḥ*, once more
- *Say it:* say *āpaṇikaḥ*
- *Recall:* say the Sanskrit for a load, then the Sanskrit for goods for sale, then say *āpaṇikaḥ* again

Before you move on

What does आपणिकः mean? ("A shopkeeper".) Say it once more.

222.5 पत्रिका (patrikā) — a newspaper, a magazine

Before the new one: say the Sanskrit for goods for sale, then the Sanskrit for a shopkeeper.

You'll want to know: पत्रिका

पत्रिका — *patrikā* — "a newspaper, a magazine".

The word, taken apart — its roots and family

patrikā is *pattra*, "wing-feather, leaf, leaf of a book" (CDIAL 7733), with the suffix *-ikā*: a little leaf, a letter or document (MW). Its use for a newspaper or magazine is modern. *Pattra* lives on as Hindi *pattā*, "leaf".

What you've built

One more word for this chapter.

Your turn

- *Say it: patrikā*
- *Say it: patrikā*, once more
- *Say it:* say *patrikā*
- *Recall:* say the Sanskrit for goods for sale, then the Sanskrit for a shopkeeper, then say *patrikā* again

Before you move on

What does पत्रिका mean? ("A newspaper, a magazine".) Say it once more.

Chapter 223

Traveller, Guide, Holy ford, Hermitage, Monastery

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a traveller, a guide, a holy ford, a hermitage and a monastery.
>
> *Complete the last lesson of chapter 223: I can say a traveller, a guide, a holy ford, a hermitage and a monastery.*

223.1 यात्रिकः (yātrikaḥ) — a traveller, a pilgrim

Before the new one: say the Sanskrit for a shopkeeper, then the Sanskrit for a newspaper.

You'll want to know: यात्रिकः

यात्रिकः — *yātrikaḥ* — "a traveller, a pilgrim".

The word, taken apart — its roots and family

yātrika is built on *yātrā*, "journey, procession", from the root √yā, "to go" (MW), with the suffix *-ika*: one on a journey (CDIAL 10457). *Yātrā* lives on as Sindhi *jāṭra*, "body of pilgrims" (CDIAL 10456).

What you've built

One more word for this chapter.

Your turn

- *Say it: yātrikaḥ*
- *Say it: yātrikaḥ*, once more
- *Say it:* say *yātrikaḥ*
- *Recall:* say the Sanskrit for a shopkeeper, then the Sanskrit for a newspaper, then say *yātrikaḥ* again

Before you move on

What does यात्रिकः mean? ("A traveller, a pilgrim".) Say it once more.

223.2 मार्गदर्शकः (mārgadarśakaḥ) — a guide

Before the new one: say the Sanskrit for a newspaper, then the Sanskrit for a traveller.

You'll want to know: मार्गदर्शकः

मार्गदर्शकः — *mārgadarśakaḥ* — "a guide".

The word, taken apart — its roots and family

mārgadarśaka is MW's "way-shower": *mārga*, "road", with *darśaka*, "one who shows", from the root √dṛś, "to see". *Mārga* first meant the track of a wild animal, from *mṛga*, "deer" (CDIAL 10071).

What you've built

One more word for this chapter.

Your turn

- *Say it: mārgadarśakaḥ*
- *Say it: mārgadarśakaḥ*, once more
- *Say it:* say *mārgadarśakaḥ*

- *Recall:* say the Sanskrit for a newspaper, then the Sanskrit for a traveller, then say *mārgadarśakaḥ* again

Before you move on

What does मार्गदर्शकः mean? ("A guide".) Say it once more.

223.3 तीर्थम् (tīrtham) — a holy ford, a place of pilgrimage

Before the new one: say the Sanskrit for a traveller, then the Sanskrit for a guide.

You'll want to know: तीर्थम्

तीर्थम् — *tīrtham* — "a holy ford, a place of pilgrimage".

The word, taken apart — its roots and family

tīrtha is built on the root √tṝ, "to cross over" (MW): a ford is where you cross a river (CDIAL 5846). Holy bathing places on rivers became places of pilgrimage. √tṝ is also the root of *vitarati*, "hands out", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: tīrtham*
- *Say it: tīrtham*, once more
- *Say it:* say *tīrtham*
- *Recall:* say the Sanskrit for a traveller, then the Sanskrit for a guide, then say *tīrtham* again

Before you move on

What does तीर्थम् mean? ("A holy ford, a place of pilgrimage".) Say it once more.

223.4 आश्रमः (āśramaḥ) — a hermitage

Before the new one: say the Sanskrit for a guide, then the Sanskrit for a holy ford.

You'll want to know: आश्रमः

आश्रमः — *āśramaḥ* — "a hermitage".

The word, taken apart — its roots and family

āśrama is built on *ā-* and the root √śram, "to toil, exert oneself" (MW), the root of *śrama*, "toil": a hermitage is a place of religious exertion. It also names the four stages of a life.

What you've built

One more word for this chapter.

Your turn

- *Say it: āśramaḥ*
- *Say it: āśramaḥ*, once more
- *Say it:* say *āśramaḥ*
- *Recall:* say the Sanskrit for a guide, then the Sanskrit for a holy ford, then say *āśramaḥ* again

Before you move on

What does आश्रमः mean? ("A hermitage".) Say it once more.

223.5 मठः (maṭhaḥ) — a monastery

Before the new one: say the Sanskrit for a holy ford, then the Sanskrit for a hermitage.

You'll want to know: मठः

मठः — *maṭhaḥ* — "a monastery".

The word, taken apart — its roots and family

maṭha first meant a hut, the cell of an ascetic or a student (MW), and later a monastery. Its origin is uncertain: CDIAL 9727 sends the reader to *maṇḍapa*, a word it suspects is non-Aryan. It lives on as Hindi *maṛhī*, "hut".

What you've built

One more word for this chapter.

Your turn

- *Say it: maṭhaḥ*
- *Say it: maṭhaḥ*, once more
- *Say it:* say *maṭhaḥ*
- *Recall:* say the Sanskrit for a holy ford, then the Sanskrit for a hermitage, then say *maṭhaḥ* again

Before you move on

What does मठः mean? ("A monastery".) Say it once more.

Chapter 224

Centre, Tall building, Darkness, Radiance, Ground

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a centre, a tall building, darkness, radiance and the ground.
>
> *Complete the last lesson of chapter 224: I can say a centre, a tall building, darkness, radiance and the ground.*

224.1 केन्द्रम् (kendram) — a centre

Before the new one: say the Sanskrit for a hermitage, then the Sanskrit for a monastery.

You'll want to know: केन्द्रम्

केन्द्रम् — *kendram* — "a centre".

The word, taken apart — its roots and family

kendra was borrowed from Greek *kentron*, "point, centre of a circle" (MW), with Greek astronomy. English *centre* comes from the same Greek word through Latin *centrum*.

What you've built

One more word for this chapter.

Your turn

- *Say it: kendram*
- *Say it: kendram*, once more
- *Say it:* say *kendram*
- *Recall:* say the Sanskrit for a hermitage, then the Sanskrit for a monastery, then say *kendram* again

Before you move on

What does केन्द्रम् mean? ("A centre".) Say it once more.

224.2 अट्टालिका (aṭṭālikā) — a tall building

Before the new one: say the Sanskrit for a monastery, then the Sanskrit for a centre.

You'll want to know: अट्टालिका

अट्टालिका — *aṭṭālikā* — "a tall building".

The word, taken apart — its roots and family

aṭṭālikā is built on *aṭṭāla*, "watch-tower" (CDIAL 185), from *aṭṭa*, "high; tower". CDIAL 180 reports Mayrhofer's view that *aṭṭa* is non-Aryan, so it was probably borrowed. MW glosses *aṭṭālikā* "a palace".

What you've built

One more word for this chapter.

Your turn

- *Say it: aṭṭālikā*
- *Say it: aṭṭālikā*, once more
- *Say it:* say *aṭṭālikā*

- *Recall:* say the Sanskrit for a monastery, then the Sanskrit for a centre, then say *aṭṭālikā* again

Before you move on

What does अट्टालिका mean? ("A tall building".) Say it once more.

224.3 अन्धकारः (andhakāraḥ) — darkness

Before the new one: say the Sanskrit for a centre, then the Sanskrit for a tall building.

You'll want to know: अन्धकारः

अन्धकारः — *andhakāraḥ* — "darkness".

The word, taken apart — its roots and family

andhakāra is built on *andha*, "blind, dark", and *kāra*, "making", from the root √kṛ (CDIAL 386): what makes blind. It lives on as Gujarati *ãdhārũ* and Marathi *ãdhār*, "darkness".

What you've built

One more word for this chapter.

Your turn

- *Say it: andhakāraḥ*
- *Say it: andhakāraḥ*, once more
- *Say it:* say *andhakāraḥ*
- *Recall:* say the Sanskrit for a centre, then the Sanskrit for a tall building, then say *andhakāraḥ* again

Before you move on

What does अन्धकारः mean? ("Darkness".) Say it once more.

224.4 ज्योतिः (jyotiḥ) — radiance, a flame

Before the new one: say the Sanskrit for a tall building, then the Sanskrit for darkness.

You'll want to know: ज्योतिः

ज्योतिः — *jyotiḥ* — "radiance, a flame".

The word, taken apart — its roots and family

jyotiḥ is the nominative of *jyotis*, "light", built on the root √jyut, "to shine", which MW calls a form of √dyut. It is a Rigvedic word (CDIAL 5300), and *jyotsnā*, "moonlight", comes from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: jyotiḥ*
- *Say it: jyotiḥ*, once more
- *Say it:* say *jyotiḥ*
- *Recall:* say the Sanskrit for a tall building, then the Sanskrit for darkness, then say *jyotiḥ* again

Before you move on

What does ज्योतिः mean? ("Radiance, a flame".) Say it once more.

224.5 भूमिः (bhūmiḥ) — the ground, land

Before the new one: say the Sanskrit for darkness, then the Sanskrit for radiance.

You'll want to know: भूमिः

भूमिः — *bhūmiḥ* — "the ground, land".

The word, taken apart — its roots and family

bhūmi is built on the root √bhū, "to be, become" (MW), the root of *bhavati*: the earth is where things come to be. It is a Rigvedic word (CDIAL 9557). MW compares √bhū with English *be*.

What you've built

One more word for this chapter.

Your turn

- *Say it: bhūmiḥ*
- *Say it: bhūmiḥ*, once more
- *Say it:* say *bhūmiḥ*
- *Recall:* say the Sanskrit for darkness, then the Sanskrit for radiance, then say *bhūmiḥ* again

Before you move on

What does भूमिः mean? ("The ground, land".) Say it once more.

Chapter 225

Valley, Desert, Woodland, Bower, Meadow

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a valley, a desert, a woodland, a bower and a meadow.
>
> *Complete the last lesson of chapter 225: I can say a valley, a desert, a woodland, a bower and a meadow.*

225.1 उपत्यका (upatyakā) — a valley

Before the new one: say the Sanskrit for radiance, then the Sanskrit for the ground.

You'll want to know: उपत्यका

उपत्यका — *upatyakā* — "a valley".

The word, taken apart — its roots and family

upatyakā is built on *upa*, "near, below", with the suffix *-tyaka*; Pāṇini 5.2.34 forms it beside *adhityakā*, "table-land", from *adhi*, "above". MW glosses it "land at the foot of a mountain, low-land" and "a valley".

What you've built

One more word for this chapter.

Your turn

- *Say it: upatyakā*
- *Say it: upatyakā*, once more
- *Say it:* say *upatyakā*
- *Recall:* say the Sanskrit for radiance, then the Sanskrit for the ground, then say *upatyakā* again

Before you move on

What does उपत्यका mean? ("A valley".) Say it once more.

225.2 मरुभूमिः (marubhūmiḥ) — a desert

Before the new one: say the Sanskrit for the ground, then the Sanskrit for a valley.

You'll want to know: मरुभूमिः

मरुभूमिः — *marubhūmiḥ* — "a desert".

The word, taken apart — its roots and family

marubhūmi is built from *maru*, "wilderness, sandy waste", and *bhūmi*, "land" (MW). MW derives *maru* probably from √mṛ, "to die": the dead land. MW also gives it as the name of a country, Marwar.

What you've built

One more word for this chapter.

Your turn

- *Say it: marubhūmiḥ*
- *Say it: marubhūmiḥ*, once more
- *Say it:* say *marubhūmiḥ*
- *Recall:* say the Sanskrit for the ground, then the Sanskrit for a valley, then say *marubhūmiḥ* again

Before you move on

What does मरुभूमिः mean? ("A desert".) Say it once more.

225.3 काननम् (kānanam) — a woodland

Before the new one: say the Sanskrit for a valley, then the Sanskrit for a desert.

You'll want to know: काननम्

काननम् — *kānanam* — "a woodland".

The word, taken apart — its roots and family

kānana is a word for "forest, grove" (MW). Its origin is not settled: MW reports a derivation from a root √kan, while CDIAL 3028 cites Mayrhofer for taking it, with *kāntāra*, "wilderness", from Dravidian.

What you've built

One more word for this chapter.

Your turn

- *Say it: kānanam*
- *Say it: kānanam*, once more
- *Say it:* say *kānanam*
- *Recall:* say the Sanskrit for a valley, then the Sanskrit for a desert, then say *kānanam* again

Before you move on

What does काननम् mean? ("A woodland".) Say it once more.

225.4 कुञ्जः (kuñjaḥ) — a bower, a thicket

Before the new one: say the Sanskrit for a desert, then the Sanskrit for a woodland.

You'll want to know: कुञ्जः

कुञ्जः — *kuñjaḥ* — "a bower, a thicket".

The word, taken apart — its roots and family

kuñja is a place overgrown with plants and creepers, a bower (MW; CDIAL 3226). Neither dictionary gives it a derivation, so its origin is uncertain. Hindi *kũjṛā*, "vegetable seller", is built on it.

What you've built

One more word for this chapter.

Your turn

- *Say it: kuñjaḥ*
- *Say it: kuñjaḥ*, once more
- *Say it:* say *kuñjaḥ*
- *Recall:* say the Sanskrit for a desert, then the Sanskrit for a woodland, then say *kuñjaḥ* again

Before you move on

What does कुञ्जः mean? ("A bower, a thicket".) Say it once more.

225.5 शाद्वलम् (śādvalam) — a meadow

Before the new one: say the Sanskrit for a woodland, then the Sanskrit for a bower.

You'll want to know: शाद्वलम्

शाद्वलम् — *śādvalam* — "a meadow".

The word, taken apart — its roots and family

śādvala is built on *śāda*, "young grass", with the suffix *-vala*, "abounding in" (MW): a place full of fresh grass. MW derives *śāda* from √śad, "to fall off", with a first sense "falling, dropping".

What you've built

One more word for this chapter.

Your turn

- *Say it: śādvalam*
- *Say it: śādvalam*, once more
- *Say it:* say *śādvalam*
- *Recall:* say the Sanskrit for a woodland, then the Sanskrit for a bower, then say *śādvalam* again

Before you move on

What does शाद्वलम् mean? ("A meadow".) Say it once more.

Chapter 226

Planet, Comet, Animal, Creature, Winged creature

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a planet, a comet, an animal, a creature and a winged creature.
>
> *Complete the last lesson of chapter 226: I can say a planet, a comet, an animal, a creature and a winged creature.*

226.1 ग्रहः (grahaḥ) — a planet

Before the new one: say the Sanskrit for a bower, then the Sanskrit for a meadow.

You'll want to know: ग्रहः

ग्रहः — *grahaḥ* — "a planet".

The word, taken apart — its roots and family

graha is built on the root √grah, "to seize" (MW), which you met in *gṛhṇāti*: a planet is a "seizer", believed to grip people's fortunes. In the Rigveda it means "as much as can be taken" (CDIAL 4363), and Punjabi *garauh* is "the influence of the planets".

What you've built

One more word for this chapter.

Your turn

- *Say it: grahaḥ*
- *Say it: grahaḥ*, once more
- *Say it:* say *grahaḥ*
- *Recall:* say the Sanskrit for a bower, then the Sanskrit for a meadow, then say *grahaḥ* again

Before you move on

What does ग्रहः mean? ("A planet".) Say it once more.

226.2 धूमकेतुः (dhūmaketuḥ) — a comet

Before the new one: say the Sanskrit for a meadow, then the Sanskrit for a planet.

You'll want to know: धूमकेतुः

धूमकेतुः — *dhūmaketuḥ* — "a comet".

The word, taken apart — its roots and family

dhūmaketu is a compound of *dhūma*, "smoke", and *ketu*, "bright sign, banner" (MW): a star with a banner of smoke. MW compares *dhūma* with Latin *fūmus*, "smoke", and *dhūma* lives on as the Hindi word for smoke (CDIAL 6849).

What you've built

One more word for this chapter.

Your turn

- *Say it: dhūmaketuḥ*
- *Say it: dhūmaketuḥ*, once more
- *Say it:* say *dhūmaketuḥ*

- *Recall:* say the Sanskrit for a meadow, then the Sanskrit for a planet, then say *dhūmaketuḥ* again

Before you move on

What does धूमकेतुः mean? ("A comet".) Say it once more.

226.3 पशुः (paśuḥ) — an animal

Before the new one: say the Sanskrit for a planet, then the Sanskrit for a comet.

You'll want to know: पशुः

पशुः — *paśuḥ* — "an animal".

The word, taken apart — its roots and family

paśu is a Rigvedic word for a domestic or sacrificial animal (CDIAL 7984). It is inherited from Indo-European: MW compares Latin *pecu*, "cattle", and English *fee*, from the time when wealth was counted in livestock. Hindi *pasū* means "animal".

What you've built

One more word for this chapter.

Your turn

- *Say it: paśuḥ*
- *Say it: paśuḥ*, once more
- *Say it:* say *paśuḥ*
- *Recall:* say the Sanskrit for a planet, then the Sanskrit for a comet, then say *paśuḥ* again

Before you move on

What does पशुः mean? ("An animal".) Say it once more.

226.4 जन्तुः (jantuḥ) — a creature

Before the new one: say the Sanskrit for a comet, then the Sanskrit for an animal.

You'll want to know: जन्तुः

जन्तुः — *jantuḥ* — "a creature".

The word, taken apart — its roots and family

jantu is built on the root √jan, "to be born, beget" (MW): first "offspring", then any creature (CDIAL 5110). MW compares √jan with Latin *gignere*, "to beget", and Greek *gignomai*, "I become".

What you've built

One more word for this chapter.

Your turn

- *Say it: jantuḥ*
- *Say it: jantuḥ*, once more
- *Say it:* say *jantuḥ*
- *Recall:* say the Sanskrit for a comet, then the Sanskrit for an animal, then say *jantuḥ* again

Before you move on

What does जन्तुः mean? ("A creature".) Say it once more.

226.5 पक्षी (pakṣī) — a winged creature, a bird

Before the new one: say the Sanskrit for an animal, then the Sanskrit for a creature.

You'll want to know: पक्षी

पक्षी — *pakṣī* — "a winged creature, a bird".

The word, taken apart — its roots and family

pakṣī is the nominative of *pakṣin*, "winged", built on *pakṣa*, "wing", with *-in*, "having" (MW): a bird is the winged one. It lives on as Gujarati and Punjabi *paṅkhī*, "bird" (CDIAL 7636).

What you've built

One more word for this chapter.

Your turn

- *Say it: pakṣī*
- *Say it: pakṣī*, once more
- *Say it:* say *pakṣī*
- *Recall:* say the Sanskrit for an animal, then the Sanskrit for a creature, then say *pakṣī* again

Before you move on

What does पक्षी mean? ("A winged creature, a bird".) Say it once more.

226.6 Words from chapters 221-223 — a first pass

Say the words for a creature and a winged creature.

Your turn

Say these aloud:

- cotton, silk, leather, a knot, a small stool
- an instrument, a load, goods for sale, a shopkeeper, a newspaper
- a traveller, a guide, a holy ford, a hermitage, a monastery

Before you move on

Cotton? (कार्पासः, *kārpāsaḥ.*) Silk? (कौशेयम्, *kauśeyam.*) Leather? (चर्म, *carma.*) A knot? (ग्रन्थिः, *granthiḥ.*) A small stool? (पीठिका, *pīṭhikā.*) An instrument? (साधनम्, *sādhanam.*) A load? (भारः, *bhāraḥ.*) Goods for sale? (पण्यम्, *paṇyam.*) A shopkeeper? (आपणिकः, *āpaṇikaḥ.*) A newspaper? (पत्रिका, *patrikā.*) A traveller? (यात्रिकः, *yātrikaḥ.*) A guide? (मार्गदर्शकः, *mārgadarśakaḥ.*) A holy ford? (तीर्थम्, *tīrtham.*) A hermitage? (आश्रमः, *āśramaḥ.*) A monastery? (मठः, *maṭhaḥ.*)

226.7 Words from chapters 224-226 — a second pass

Say the words for a centre and a tall building.

Your turn

Say these aloud:

- a centre, a tall building, darkness, radiance, the ground
- a valley, a desert, a woodland, a bower, a meadow
- a planet, a comet, an animal, a creature, a winged creature

Before you move on

A centre? (केन्द्रम्, *kendram.*) A tall building? (अट्टालिका, *aṭṭālikā.*) Darkness? (अन्धकारः, *andhakāraḥ.*) Radiance? (ज्योतिः, *jyotiḥ.*) The ground? (भूमिः, *bhūmiḥ.*) A valley? (उपत्यका, *upatyakā.*) A desert? (मरुभूमिः, *marubhūmiḥ.*) A woodland? (काननम्, *kānanam.*) A bower? (कुञ्जः, *kuñjaḥ.*) A meadow? (शाद्वलम्, *śādvalam.*) A planet? (ग्रहः, *grahaḥ.*) A comet? (धूमकेतुः, *dhūmaketuḥ.*) An animal? (पशुः, *paśuḥ.*) A creature? (जन्तुः, *jantuḥ.*) A winged creature? (पक्षी, *pakṣī.*)

Chapter 227

Wing, Tail, Horn, Beak, Vulture

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a wing, a tail, a horn, a beak and a vulture.
>
> *Complete the last lesson of chapter 227: I can say a wing, a tail, a horn, a beak and a vulture.*

227.1 पक्षः (pakṣaḥ) — a wing

Before the new one: say the Sanskrit for a creature, then the Sanskrit for a winged creature, a bird.

You'll want to know: पक्षः

पक्षः — *pakṣaḥ* — "a wing".

The word, taken apart — its roots and family

pakṣa is a Rigvedic word for "wing, feather, side" (CDIAL 7627). From the side of a body came the side of an argument and a party, and also each half of the lunar month. It lives on as Hindi *pākh*, "wing of a bird".

What you've built

One more word for this chapter.

Your turn

- *Say it: pakṣaḥ*
- *Say it: pakṣaḥ*, once more
- *Say it:* say *pakṣaḥ*
- *Recall:* say the Sanskrit for a creature, then the Sanskrit for a winged creature, a bird, then say *pakṣaḥ* again

Before you move on

What does पक्षः mean? ("A wing".) Say it once more.

227.2 पुच्छः (pucchaḥ) — a tail

Before the new one: say the Sanskrit for a winged creature, a bird, then the Sanskrit for a wing.

You'll want to know: पुच्छः

पुच्छः — *pucchaḥ* — "a tail".

The word, taken apart — its roots and family

puccha is the tail or hinder part, a word of the Atharvaveda (CDIAL 8249). MW gives no derivation, and CDIAL only compares *piccha*, "tail feather", so its origin is uncertain. It lives on as Gujarati *pũch*, "tail".

What you've built

One more word for this chapter.

Your turn

- *Say it: pucchaḥ*
- *Say it: pucchaḥ*, once more
- *Say it:* say *pucchaḥ*

- *Recall:* say the Sanskrit for a winged creature, a bird, then the Sanskrit for a wing, then say *pucchaḥ* again

Before you move on

What does पुच्छः mean? ("A tail".) Say it once more.

227.3 शृंगम् (śṛṅgam) — a horn

Before the new one: say the Sanskrit for a wing, then the Sanskrit for a tail.

You'll want to know: शृंगम्

शृंगम् — *śṛṅgam* — "a horn".

The word, taken apart — its roots and family

śṛṅga is the horn of an animal, and also a mountain peak (MW). MW suggests it may be connected with *śiras*, "head", and compares Latin *cornū* and English *horn*.

What you've built

One more word for this chapter.

Your turn

- *Say it: śṛṅgam*
- *Say it: śṛṅgam*, once more
- *Say it:* say *śṛṅgam*
- *Recall:* say the Sanskrit for a wing, then the Sanskrit for a tail, then say *śṛṅgam* again

Before you move on

What does शृंगम् mean? ("A horn".) Say it once more.

227.4 चञ्चुः (cañcuḥ) — a beak

Before the new one: say the Sanskrit for a tail, then the Sanskrit for a horn.

You'll want to know: चञ्चुः

चञ्चुः — *cañcuḥ* — "a beak".

The word, taken apart — its roots and family

cañcu is probably borrowed from Dravidian: CDIAL 4569 follows Mayrhofer in taking it from a Dravidian source. It lives on as Bengali *cãuc*, "beak".

What you've built

One more word for this chapter.

Your turn

- *Say it: cañcuḥ*
- *Say it: cañcuḥ*, once more
- *Say it:* say *cañcuḥ*
- *Recall:* say the Sanskrit for a tail, then the Sanskrit for a horn, then say *cañcuḥ* again

Before you move on

What does चञ्चुः mean? ("A beak".) Say it once more.

227.5 गृध्रः (gṛdhraḥ) — a vulture

Before the new one: say the Sanskrit for a horn, then the Sanskrit for a beak.

You'll want to know: गृध्रः

गृध्रः — *gṛdhraḥ* — "a vulture".

The word, taken apart — its roots and family

gṛdhra is built on the root √gṛdh, "to be greedy" (MW): the vulture is the greedy bird. Both senses are in the Rigveda (CDIAL 4233), and it lives on as Hindi *gīdh*, "vulture".

What you've built

One more word for this chapter.

Your turn

- *Say it: gṛdhraḥ*
- *Say it: gṛdhraḥ*, once more
- *Say it:* say *gṛdhraḥ*
- *Recall:* say the Sanskrit for a horn, then the Sanskrit for a beak, then say *gṛdhraḥ* again

Before you move on

What does गृध्रः mean? ("A vulture".) Say it once more.

Chapter 228

History, Geography, Music, Dance, Painting

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say history, geography, music, dance and painting.
>
> *Complete the last lesson of chapter 228: I can say history, geography, music, dance and painting.*

228.1 इतिहासः (itihāsaḥ) — history

Before the new one: say the Sanskrit for a beak, then the Sanskrit for a vulture.

You'll want to know: इतिहासः

इतिहासः — *itihāsaḥ* — "history".

The word, taken apart — its roots and family

itihāsa is built from a phrase frozen into a word: *iti*, "thus", *ha*, "indeed", and *āsa*, "it was" (MW). History is "so indeed it was", the telling of past events.

What you've built

One more word for this chapter.

Your turn

- *Say it: itihāsaḥ*
- *Say it: itihāsaḥ*, once more
- *Say it:* say *itihāsaḥ*
- *Recall:* say the Sanskrit for a beak, then the Sanskrit for a vulture, then say *itihāsaḥ* again

Before you move on

What does इतिहासः mean? ("History".) Say it once more.

228.2 भूगोलः (bhūgolaḥ) — geography

Before the new one: say the Sanskrit for a vulture, then the Sanskrit for history.

You'll want to know: भूगोलः

भूगोलः — *bhūgolaḥ* — "geography".

The word, taken apart — its roots and family

bhūgola is a compound of *bhū*, "earth", and *gola*, "ball" (MW): the "earth-ball", the globe. Its use for geography as a subject is modern. *Gola* lives on as Hindi *gol*, "round" (CDIAL 4321).

What you've built

One more word for this chapter.

Your turn

- *Say it: bhūgolaḥ*
- *Say it: bhūgolaḥ*, once more
- *Say it:* say *bhūgolaḥ*
- *Recall:* say the Sanskrit for a vulture, then the Sanskrit for history, then say *bhūgolaḥ* again

Before you move on

What does भूगोलः mean? ("Geography".) Say it once more.

228.3 संगीतम् (saṅgītam) — music

Before the new one: say the Sanskrit for history, then the Sanskrit for geography.

You'll want to know: संगीतम्

संगीतम् — *saṅgītam* — "music".

The word, taken apart — its roots and family

saṅgīta is built on *sam*, "together", and the root √gai, "to sing" (MW): "sung together", a chorus or concert (CDIAL 12849), and so music in general. *Gāyaka*, "singer", comes from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it: saṅgītam*
- *Say it: saṅgītam*, once more
- *Say it:* say *saṅgītam*
- *Recall:* say the Sanskrit for history, then the Sanskrit for geography, then say *saṅgītam* again

228.4 नृत्यम् (nṛtyam) — dance

Before the new one: say the Sanskrit for geography, then the Sanskrit for music.

You'll want to know: नृत्यम्

नृत्यम् — *nṛtyam* — "dance".

The word, taken apart — its roots and family

nṛtya is built on the root √nṛt, "to dance" (MW), the root of *nṛtyati*, "dances". It lives on as Hindi *nāc*, "dancing" (CDIAL 7582), which EtymDB gives as the source of English *nautch*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nṛtyam*
- *Say it: nṛtyam*, once more
- *Say it:* say *nṛtyam*
- *Recall:* say the Sanskrit for geography, then the Sanskrit for music, then say *nṛtyam* again

228.5 चित्रकला (citrakalā) — painting

Before the new one: say the Sanskrit for music, then the Sanskrit for dance.

You'll want to know: चित्रकला

चित्रकला — *citrakalā* — "painting".

The word, taken apart — its roots and family

citrakalā is a compound of *citra*, "picture", and *kalā*, "practical art". MW calls *kalā* of doubtful etymology, and CDIAL 2927 takes it in this sense from Dravidian. MW does not list the compound, so the pairing

for painting is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: citrakalā*
- *Say it: citrakalā*, once more
- *Say it:* say *citrakalā*
- *Recall:* say the Sanskrit for music, then the Sanskrit for dance, then say *citrakalā* again

Before the new one: say the Sanskrit for a rule, then the Sanskrit for righteousness.

You'll want to know: कर्तव्यम्

कर्तव्यम् — *kartavyam* — "an obligation, a duty".

The word, taken apart — its roots and family

kartavya is the future passive participle of the root √kṛ, "to do" (MW): "what is to be done", and so a duty (CDIAL 2859). It comes from the root of *karomi*, "I do", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: kartavyam*
- *Say it: kartavyam*, once more
- *Say it:* say *kartavyam*
- *Recall:* say the Sanskrit for a rule, then the Sanskrit for righteousness, then say *kartavyam* again

What does कर्तव्यम् mean? ("An obligation, a duty".) Say it once more.

229.4 अधिकारः (adhikāraḥ) — authority, a right

Before the new one: say the Sanskrit for righteousness, then the Sanskrit for an obligation.

You'll want to know: अधिकारः

अधिकारः — *adhikāraḥ* — "authority, a right".

The word, taken apart — its roots and family

adhikāra is built on *adhi*, "over", and the root √kṛ, "to do, make" (MW). The verb means "to place at the head, appoint", so the noun means "authority", and then a right that someone holds.

What you've built

One more word for this chapter.

Your turn

- *Say it: adhikāraḥ*
- *Say it: adhikāraḥ*, once more
- *Say it:* say *adhikāraḥ*
- *Recall:* say the Sanskrit for righteousness, then the Sanskrit for an obligation, then say *adhikāraḥ* again

229.5 प्रश्नपत्रम् (praśnapatram) — a question paper

Before the new one: say the Sanskrit for an obligation, then the Sanskrit for authority.

You'll want to know: प्रश्नपत्रम्

प्रश्नपत्रम् — *praśnapatram* — "a question paper".

The word, taken apart — its roots and family

praśnapatra is built from *praśna*, "question", from the root √prach, "to ask" (MW), and *patra*, "leaf, sheet of paper". MW does not list the compound, so it is a modern pairing. √prach is the root of *pṛcchati*, "asks", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: praśnapatram*
- *Say it: praśnapatram*, once more
- *Say it:* say *praśnapatram*

Before you move on

What does सफलता mean? ("Success".) Say it once more.

230.2 विफलता (viphalatā) — failure

Before the new one: say the Sanskrit for a question paper, then the Sanskrit for success.

You'll want to know: विफलता

विफलता — *viphalatā* — "failure".

The word, taken apart — its roots and family

viphalatā is built on *viphala*, "bearing no fruit, useless" (CDIAL 11803), from *vi-*, "without", and *phala*, "fruit" (MW). MW lists *viphalatā* itself as "fruitlessness", the mirror of *saphalatā*.

What you've built

One more word for this chapter.

Your turn

- *Say it: viphalatā*
- *Say it: viphalatā*, once more
- *Say it:* say *viphalatā*

What does प्रयत्नः mean? ("An effort".) Say it once more.

230.4 अवसरः (avasaraḥ) — an opportunity

Before the new one: say the Sanskrit for failure, then the Sanskrit for an effort.

You'll want to know: अवसरः

अवसरः — *avasaraḥ* — "an opportunity".

The word, taken apart — its roots and family

avasara is built on *ava*, "down", and the root √sṛ, "to run, flow" (MW). MW's first sense is "descent of water, rain", and then "occasion, favourable moment" (CDIAL 858). Hindi *osrā*, "turn, season", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: avasaraḥ*
- *Say it: avasaraḥ*, once more
- *Say it:* say *avasaraḥ*
- *Recall:* say the Sanskrit for failure, then the Sanskrit for an effort, then say *avasaraḥ* again

Before you move on

What does अवसरः mean? ("An opportunity".) Say it once more.

230.5 अनुभवः (anubhavaḥ) — experience

Before the new one: say the Sanskrit for an effort, then the Sanskrit for an opportunity.

You'll want to know: अनुभवः

अनुभवः — *anubhavaḥ* — "experience".

The word, taken apart — its roots and family

anubhava is built on *anu*, "after, along", and the root √bhū, "to be, become" (MW): to be along with something is to perceive it. MW

glosses it "perception, understanding", and the root is the one MW compares with English *be*.

What you've built

One more word for this chapter.

Your turn

- *Say it: anubhavaḥ*
- *Say it: anubhavaḥ*, once more
- *Say it:* say *anubhavaḥ*

231.1 मानचित्रम् (mānacitram) — a map

Before the new one: say the Sanskrit for an opportunity, then the Sanskrit for experience.

You'll want to know: मानचित्रम्

मानचित्रम् — *mānacitram* — "a map".

The word, taken apart — its roots and family

mānacitra is a compound of *māna*, "measure, standard" (CDIAL 10041), and *citra*, "picture": a picture drawn to measure. MW does not list the compound, so it is a modern pairing for a map.

What you've built

One more word for this chapter.

Your turn

- *Say it: mānacitram*
- *Say it: mānacitram*, once more
- *Say it:* say *mānacitram*
- *Recall:* say the Sanskrit for an opportunity, then the Sanskrit for experience, then say *mānacitram* again

- *Recall:* say the Sanskrit for rains, then the Sanskrit for sprouts, then say *pratīkṣate* again

Before you move on

What does प्रतीक्षते mean? ("Waits".) Say it once more.

233.4 अनुगच्छति (anugacchati) — follows

Before the new one: say the Sanskrit for sprouts, then the Sanskrit for waits.

You'll want to know: अनुगच्छति

अनुगच्छति — *anugacchati* — "follows".

The word, taken apart — its roots and family

anugacchati is built on *anu*, "after", and *gacchati*, "goes", from the root √gam (MW). To follow is to go after; √gam is the root of *gacchāmi*, "I go", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: anugacchati*
- *Say it: anugacchati*, once more
- *Say it:* say *anugacchati*
- *Recall:* say the Sanskrit for sprouts, then the Sanskrit for waits, then say *anugacchati* again

Before you move on

What does अनुगच्छति mean? ("Follows".) Say it once more.

233.5 निर्गच्छति (nirgacchati) — goes out

Before the new one: say the Sanskrit for waits, then the Sanskrit for follows.

You'll want to know: निर्गच्छति

निर्गच्छति — *nirgacchati* — "goes out".

The word, taken apart — its roots and family

nirgacchati is built on *nis*, "out", and *gacchati*, "goes", from the root √gam (MW): "goes out, comes forth". The *s* of *nis* becomes *r* before *g*.

What you've built

One more word for this chapter.

Your turn

- *Say it: nirgacchati*
- *Say it: nirgacchati*, once more
- *Say it:* say *nirgacchati*
- *Recall:* say the Sanskrit for waits, then the Sanskrit for follows, then say *nirgacchati* again

Before you move on

What does निर्गच्छति mean? ("Goes out".) Say it once more.

Chapter 234

Dries up, Floats, Begins, Finishes, Hands over

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say dries up, floats, begins, finishes and hands over.
>
> *Complete the last lesson of chapter 234: I can say dries up, floats, begins, finishes and hands over.*

234.1 शुष्यति (śuṣyati) — dries up

Before the new one: say the Sanskrit for follows, then the Sanskrit for goes out.

You'll want to know: शुष्यति

शुष्यति — *śuṣyati* — "dries up".

The word, taken apart — its roots and family

śuṣyati is the present of the root √śuṣ, "to dry, wither" (MW). MW thinks the root was first *suṣ*, and compares Greek *auō*, "I dry", and Lithuanian *sausas*, "dry", so it is inherited from Indo-European.

What you've built

One more word for this chapter.

Your turn

- *Say it: śuṣyati*
- *Say it: śuṣyati*, once more
- *Say it:* say *śuṣyati*
- *Recall:* say the Sanskrit for follows, then the Sanskrit for goes out, then say *śuṣyati* again

Before you move on

What does शुष्यति mean? ("Dries up".) Say it once more.

234.2 प्लवते (plavate) — floats

Before the new one: say the Sanskrit for goes out, then the Sanskrit for dries up.

You'll want to know: प्लवते

प्लवते — *plavate* — "floats".

The word, taken apart — its roots and family

plavate is the present of the root √plu, "to float, swim" (MW), a Rigvedic verb (CDIAL 9024). The root is inherited from Indo-European: MW compares Greek *pleō*, "I sail", and Latin *pluit*, "it rains".

What you've built

One more word for this chapter.

Your turn

- *Say it: plavate*
- *Say it: plavate*, once more
- *Say it:* say *plavate*

- *Recall:* say the Sanskrit for goes out, then the Sanskrit for dries up, then say *plavate* again

Before you move on

What does प्लवते mean? ("Floats".) Say it once more.

234.3 आरभते (ārabhate) — begins

Before the new one: say the Sanskrit for dries up, then the Sanskrit for floats.

You'll want to know: आरभते

आरभते — *ārabhate* — "begins".

The word, taken apart — its roots and family

ārabhate is built on *ā-* and the root √rabh, "to take hold of" (MW), which MW connects with √labh, "to obtain". In the Rigveda it means "seizes", and from the Śatapatha Brāhmaṇa "undertakes, begins" (CDIAL 1305): to begin is to take hold of a task.

What you've built

One more word for this chapter.

Your turn

- *Say it: ārabhate*
- *Say it: ārabhate*, once more
- *Say it:* say *ārabhate*
- *Recall:* say the Sanskrit for dries up, then the Sanskrit for floats, then say *ārabhate* again

Before you move on

What does आरभते mean? ("Begins".) Say it once more.

234.4 समापयति (samāpayati) — finishes

Before the new one: say the Sanskrit for floats, then the Sanskrit for begins.

You'll want to know: समापयति

समापयति — *samāpayati* — "finishes".

The word, taken apart — its roots and family

samāpayati is the causative of *sam-āp*, "to obtain completely", from the root √āp, "to reach, obtain" (MW). It first meant "causes to gain completely" and then "finishes" (CDIAL 13216). MW compares √āp with Latin *apīscor*, "I reach", and *aptus*, "fitted".

What you've built

One more word for this chapter.

Your turn

- *Say it: samāpayati*
- *Say it: samāpayati*, once more
- *Say it:* say *samāpayati*
- *Recall:* say the Sanskrit for floats, then the Sanskrit for begins, then say *samāpayati* again

Before you move on

What does समापयति mean? ("Finishes".) Say it once more.

234.5 प्रयच्छति (prayacchati) — hands over, gives

Before the new one: say the Sanskrit for begins, then the Sanskrit for finishes.

You'll want to know: प्रयच्छति

प्रयच्छति — *prayacchati* — "hands over, gives".

The word, taken apart — its roots and family

prayacchati is built on *pra*, "forth", and the root √yam, whose present is *yacchati*, "holds" (MW). To hold something out towards someone is to hand it over, so MW gives both "stretches forth" and "offers, gives".

What you've built

One more word for this chapter.

Your turn

- *Say it: prayacchati*
- *Say it: prayacchati*, once more
- *Say it:* say *prayacchati*
- *Recall:* say the Sanskrit for begins, then the Sanskrit for finishes, then say *prayacchati* again

Before you move on

What does प्रयच्छति mean? ("Hands over, gives".) Say it once more.

Chapter 235

Covers, Plants, Drives, Embraces, Kisses

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say covers, plants, drives, embraces and kisses.
>
> *Complete the last lesson of chapter 235: I can say covers, plants, drives, embraces and kisses.*

235.1 पिदधाति (pidadhāti) — covers, closes

Before the new one: say the Sanskrit for finishes, then the Sanskrit for hands over.

You'll want to know: पिदधाति

पिदधाति — *pidadhāti* — "covers, closes".

The word, taken apart — its roots and family

pidadhāti is built on *pi-*, a shortened form of *api*, "upon", and *dadhāti*, "puts", from the root √dhā (MW). To put something upon a thing is to cover or close it; the Veda still says *api-dhā*. MW compares √dhā with English *do*.

What you've built

One more word for this chapter.

Your turn

- *Say it: pidadhāti*
- *Say it: pidadhāti*, once more
- *Say it:* say *pidadhāti*
- *Recall:* say the Sanskrit for finishes, then the Sanskrit for hands over, then say *pidadhāti* again

Before you move on

What does पिदधाति mean? ("Covers, closes".) Say it once more.

235.2 आरोपयति (āropayati) — plants, raises

Before the new one: say the Sanskrit for hands over, then the Sanskrit for covers.

You'll want to know: आरोपयति

आरोपयति — *āropayati* — "plants, raises".

The word, taken apart — its roots and family

āropayati comes from *ā-ruh*, "to climb, rise", as its causative, from the root √ruh, "to rise, grow" (MW), the root of *rohati*, "grows". To make a plant rise is to plant it, and to make a thing rise is to raise it.

What you've built

One more word for this chapter.

Your turn

- *Say it: āropayati*
- *Say it: āropayati*, once more
- *Say it:* say *āropayati*
- *Recall:* say the Sanskrit for hands over, then the Sanskrit for covers, then say *āropayati* again

Before you move on

What does आरोपयति mean? ("Plants, raises".) Say it once more.

235.3 चालयति (cālayati) — drives, moves

Before the new one: say the Sanskrit for covers, then the Sanskrit for plants.

You'll want to know: चालयति

चालयति — *cālayati* — "drives, moves".

The word, taken apart — its roots and family

cālayati is the causative of the root √cal, "to move, stir" (MW): "makes something move", and so "drives". CDIAL 4772 records "shakes, drives away", and Hindi *cālnā*, "to shake, sift", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: cālayati*
- *Say it: cālayati*, once more
- *Say it:* say *cālayati*
- *Recall:* say the Sanskrit for covers, then the Sanskrit for plants, then say *cālayati* again

Before you move on

What does चालयति mean? ("Drives, moves".) Say it once more.

235.4 आलिंगति (ālinġati) — embraces

Before the new one: say the Sanskrit for plants, then the Sanskrit for drives.

You'll want to know: आलिंगति

आलिंगति — *ālinġati* — "embraces".

The word, taken apart — its roots and family

ālinġati is built on *ā-* and the root √liṅg (MW). MW glosses the compound "to clasp, join the limbs closely, embrace", and the Mahābhārata uses it for "embraces" (CDIAL 1383); MW gives the simple root no clear older source.

What you've built

One more word for this chapter.

Your turn

- *Say it: ālinġati*
- *Say it: ālinġati*, once more
- *Say it:* say *ālinġati*
- *Recall:* say the Sanskrit for plants, then the Sanskrit for drives, then say *ālinġati* again

Before you move on

What does आलिंगति mean? ("Embraces".) Say it once more.

235.5 चुम्बति (cumbati) — kisses

Before the new one: say the Sanskrit for drives, then the Sanskrit for embraces.

You'll want to know: चुम्बति

चुम्बति — *cumbati* — "kisses".

The word, taken apart — its roots and family

cumbati is the present of the root √cumb, "to kiss, touch with the mouth" (MW). MW gives no older source for the root, so its origin is

uncertain. It lives on as Hindi *cūmnā* and Gujarati *cumvũ*, "to kiss" (CDIAL 4870).

What you've built

One more word for this chapter.

Your turn

- *Say it: cumbati*
- *Say it: cumbati*, once more
- *Say it:* say *cumbati*
- *Recall:* say the Sanskrit for drives, then the Sanskrit for embraces, then say *cumbati* again

Before you move on

What does चुम्बति mean? ("Kisses".) Say it once more.

Chapter 236

Baby, Boy, Maiden, Young woman, Person

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a baby, a boy, a maiden, a young woman and a person.
>
> *Complete the last lesson of chapter 236: I can say a baby, a boy, a maiden, a young woman and a person.*

236.1 शिशुः (śiśuḥ) — a baby, an infant

Before the new one: say the Sanskrit for embraces, then the Sanskrit for kisses.

You'll want to know: शिशुः

शिशुः — *śiśuḥ* — "a baby, an infant".

The word, taken apart — its roots and family

śiśu is a Rigvedic word for "the young of an animal, a child" (CDIAL 12476). MW derives it from √śū, "to swell", that is, to grow. It lives on as Hindi *sisu*, "infant".

What you've built

One more word for this chapter.

Your turn

- *Say it: śiśuḥ*
- *Say it: śiśuḥ*, once more
- *Say it:* say *śiśuḥ*
- *Recall:* say the Sanskrit for embraces, then the Sanskrit for kisses, then say *śiśuḥ* again

Before you move on

What does शिशुः mean? ("A baby, an infant".) Say it once more.

236.2 कुमारः (kumāraḥ) — a boy, a youth

Before the new one: say the Sanskrit for kisses, then the Sanskrit for a baby.

You'll want to know: कुमारः

कुमारः — *kumāraḥ* — "a boy, a youth".

The word, taken apart — its roots and family

kumāra is a Rigvedic word for "boy" (CDIAL 3303). CDIAL suggests a first sense "weak, tender", perhaps related to *komala*, "soft", which you have already met. MW offers two hedged derivations, so the origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: kumāraḥ*
- *Say it: kumāraḥ*, once more
- *Say it:* say *kumāraḥ*

- *Recall:* say the Sanskrit for kisses, then the Sanskrit for a baby, then say *kumāraḥ* again

Before you move on

What does कुमारः mean? ("A boy, a youth".) Say it once more.

236.3 कुमारी (kumārī) — a maiden, a girl

Before the new one: say the Sanskrit for a baby, then the Sanskrit for a boy.

You'll want to know: कुमारी

कुमारी — *kumārī* — "a maiden, a girl".

The word, taken apart — its roots and family

kumārī is the feminine of *kumāra*, "boy", made with the ending *-ī* (MW). The Atharvaveda already has it as "young girl" (CDIAL 3303), and Punjabi *kãvārī*, "virgin", comes from it. India's southern tip, Kanyakumari, is named after the maiden goddess.

What you've built

One more word for this chapter.

Your turn

- *Say it: kumārī*
- *Say it: kumārī*, once more
- *Say it:* say *kumārī*
- *Recall:* say the Sanskrit for a baby, then the Sanskrit for a boy, then say *kumārī* again

Before you move on

What does कुमारी mean? ("A maiden, a girl".) Say it once more.

236.4 युवतिः (yuvatiḥ) — a young woman

Before the new one: say the Sanskrit for a boy, then the Sanskrit for a maiden.

You'll want to know: युवतिः

युवतिः — *yuvatiḥ* — "a young woman".

The word, taken apart — its roots and family

yuvati is the feminine of *yuvan*, "young" (MW), a Rigvedic word (CDIAL 10504). The stem is inherited from Indo-European: MW compares Latin *iuvenis* and English *young*. Hindi *joī*, "wife", comes from *yuvati*.

What you've built

One more word for this chapter.

Your turn

- *Say it: yuvatiḥ*
- *Say it: yuvatiḥ*, once more
- *Say it:* say *yuvatiḥ*
- *Recall:* say the Sanskrit for a boy, then the Sanskrit for a maiden, then say *yuvatiḥ* again

Before you move on

What does युवतिः mean? ("A young woman".) Say it once more.

236.5 पुरुषः (puruṣaḥ) — a person, a man

Before the new one: say the Sanskrit for a maiden, then the Sanskrit for a young woman.

You'll want to know: पुरुषः

पुरुषः — *puruṣaḥ* — "a person, a man".

The word, taken apart — its roots and family

puruṣa is a Rigvedic word for "man, male" (CDIAL 8289). MW derives it, probably, from √pṝ, "to fill", and connects it with *puru*, "much"; the derivation is not settled. In philosophy it names the conscious self.

What you've built

One more word for this chapter.

Your turn

- *Say it: puruṣaḥ*
- *Say it: puruṣaḥ*, once more
- *Say it:* say *puruṣaḥ*
- *Recall:* say the Sanskrit for a maiden, then the Sanskrit for a young woman, then say *puruṣaḥ* again

Before you move on

What does पुरुषः mean? ("A person, a man".) Say it once more.

Chapter 237

Potter, Goldsmith, Blacksmith, Weaver, Washerman

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a potter, a goldsmith, a blacksmith, a weaver and a washerman.
>
> *Complete the last lesson of chapter 237: I can say a potter, a goldsmith, a blacksmith, a weaver and a washerman.*

237.1 कुम्भकारः (kumbhakāraḥ) — a potter

Before the new one: say the Sanskrit for a young woman, then the Sanskrit for a person.

You'll want to know: कुम्भकारः

कुम्भकारः — *kumbhakāraḥ* — "a potter".

The word, taken apart — its roots and family

kumbhakāra is a compound of *kumbha*, "pot", which you have already met, and *kāra*, "maker", from the root √kṛ (MW). It lives on as Hindi *kumhār*, "potter" (CDIAL 3310).

What you've built

One more word for this chapter.

Your turn

- *Say it: kumbhakāraḥ*
- *Say it: kumbhakāraḥ*, once more
- *Say it:* say *kumbhakāraḥ*
- *Recall:* say the Sanskrit for a young woman, then the Sanskrit for a person, then say *kumbhakāraḥ* again

Before you move on

What does कुम्भकारः mean? ("A potter".) Say it once more.

237.2 स्वर्णकारः (svarṇakāraḥ) — a goldsmith

Before the new one: say the Sanskrit for a person, then the Sanskrit for a potter.

You'll want to know: स्वर्णकारः

स्वर्णकारः — *svarṇakāraḥ* — "a goldsmith".

The word, taken apart — its roots and family

svarṇakāra is a compound of *svarṇa*, "gold", which MW calls a contraction of *suvarṇa*, "of fine colour", and *kāra*, "maker" (MW). Its fuller form *suvarṇakāra* lives on as Hindi *sonār*, "goldsmith" (CDIAL 13520).

What you've built

One more word for this chapter.

Your turn

- *Say it: svarṇakāraḥ*
- *Say it: svarṇakāraḥ*, once more
- *Say it:* say *svarṇakāraḥ*

- *Recall:* say the Sanskrit for a person, then the Sanskrit for a potter, then say *svarṇakāraḥ* again

Before you move on

What does स्वर्णकारः mean? ("A goldsmith".) Say it once more.

237.3 लोहकारः (lohakāraḥ) — a blacksmith

Before the new one: say the Sanskrit for a potter, then the Sanskrit for a goldsmith.

You'll want to know: लोहकारः

लोहकारः — *lohakāraḥ* — "a blacksmith".

The word, taken apart — its roots and family

lohakāra is a compound of *loha*, first "red, copper", later "iron" (CDIAL 11158), and *kāra*, "maker" (MW). MW derives *loha* from a root meaning "to be red". It lives on as Hindi *lohār*, "blacksmith" (CDIAL 11159).

What you've built

One more word for this chapter.

Your turn

- *Say it: lohakāraḥ*
- *Say it: lohakāraḥ*, once more
- *Say it:* say *lohakāraḥ*
- *Recall:* say the Sanskrit for a potter, then the Sanskrit for a goldsmith, then say *lohakāraḥ* again

Before you move on

What does लोहकारः mean? ("A blacksmith".) Say it once more.

237.4 तन्तुवायः (tantuvāyaḥ) — a weaver

Before the new one: say the Sanskrit for a goldsmith, then the Sanskrit for a blacksmith.

You'll want to know: तन्तुवायः

तन्तुवायः — *tantuvāyaḥ* — "a weaver".

The word, taken apart — its roots and family

tantuvāya is a compound of *tantu*, "thread, warp", from the root √tan, "to stretch, spin out", and *vāya*, "weaver", from √ve, "to weave" (MW; CDIAL 5662). A weaver is a thread-weaver; the same word also names the spider.

What you've built

One more word for this chapter.

Your turn

- *Say it: tantuvāyaḥ*
- *Say it: tantuvāyaḥ*, once more
- *Say it:* say *tantuvāyaḥ*
- *Recall:* say the Sanskrit for a goldsmith, then the Sanskrit for a blacksmith, then say *tantuvāyaḥ* again

Before you move on

What does तन्तुवायः mean? ("A weaver".) Say it once more.

237.5 रजकः (rajakaḥ) — a washerman

Before the new one: say the Sanskrit for a blacksmith, then the Sanskrit for a weaver.

You'll want to know: रजकः

रजकः — *rajakaḥ* — "a washerman".

The word, taken apart — its roots and family

rajaka is built on the root √rañj, "to colour, dye" (MW; CDIAL 10575), the root of *rakta*, "red", which you have already met. MW explains the name from his cleaning or whitening clothes; dyeing and washing went together.

What you've built

One more word for this chapter.

Your turn

- *Say it: rajakaḥ*
- *Say it: rajakaḥ*, once more
- *Say it:* say *rajakaḥ*
- *Recall:* say the Sanskrit for a blacksmith, then the Sanskrit for a weaver, then say *rajakaḥ* again

Before you move on

What does रजकः mean? ("A washerman".) Say it once more.

Chapter 238

Nurse, Engineer, Scientist, Policeman, Driver

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a nurse, an engineer, a scientist, a policeman and a driver.
>
> *Complete the last lesson of chapter 238: I can say a nurse, an engineer, a scientist, a policeman and a driver.*

238.1 परिचारिका (paricārikā) — a nurse

Before the new one: say the Sanskrit for a weaver, then the Sanskrit for a washerman.

You'll want to know: परिचारिका

परिचारिका — *paricārikā* — "a nurse".

The word, taken apart — its roots and family

paricārikā is built on *pari*, "around", and the root √car, "to move, attend upon" (MW): one who moves around a person to look after them. MW glosses it "a female attendant"; the sense "nurse" is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: paricārikā*
- *Say it: paricārikā*, once more
- *Say it:* say *paricārikā*
- *Recall:* say the Sanskrit for a weaver, then the Sanskrit for a washerman, then say *paricārikā* again

Before you move on

What does परिचारिका mean? ("A nurse".) Say it once more.

238.2 अभियन्ता (abhiyantā) — an engineer

Before the new one: say the Sanskrit for a washerman, then the Sanskrit for a nurse.

You'll want to know: अभियन्ता

अभियन्ता — *abhiyantā* — "an engineer".

The word, taken apart — its roots and family

abhiyantā is a modern coinage, not in MW, built on *abhi-* and the root √yam, "to hold, control", with the agent ending *-tṛ*. √yam is also the root of *yantra*, "device, machine" (CDIAL 10412), so the engineer is the one who controls the machines.

What you've built

One more word for this chapter.

Your turn

- *Say it: abhiyantā*
- *Say it: abhiyantā*, once more
- *Say it:* say *abhiyantā*

- *Recall:* say the Sanskrit for a washerman, then the Sanskrit for a nurse, then say *abhiyantā* again

Before you move on

What does अभियन्ता mean? ("An engineer".) Say it once more.

238.3 वैज्ञानिकः (vaijñānikaḥ) — a scientist

Before the new one: say the Sanskrit for a nurse, then the Sanskrit for an engineer.

You'll want to know: वैज्ञानिकः

वैज्ञानिकः — *vaijñānikaḥ* — "a scientist".

The word, taken apart — its roots and family

vaijñānika is built on *vijñāna*, "knowledge, science", which you have already met, with the suffix *-ika* and the lengthened first vowel it brings (MW). MW glosses it "rich in knowledge"; the sense "scientist" is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: vaijñānikaḥ*
- *Say it: vaijñānikaḥ*, once more
- *Say it:* say *vaijñānikaḥ*

Before you move on

What does वैज्ञानिकः mean? ("A scientist".) Say it once more.

238.4 आरक्षकः (ārakṣakaḥ) — a policeman

Before the new one: say the Sanskrit for an engineer, then the Sanskrit for a scientist.

You'll want to know: आरक्षकः

आरक्षकः — *ārakṣakaḥ* — "a policeman".

The word, taken apart — its roots and family

ārakṣaka is built on *ā-* and the root √rakṣ, "to guard", with the agent suffix *-aka* (MW), like *rakṣaka*, "guard", which you have already met. MW already glosses it "a watchman, patrol, police magistrate".

What you've built

One more word for this chapter.

Your turn

- *Say it: ārakṣakaḥ*
- *Say it: ārakṣakaḥ*, once more
- *Say it:* say *ārakṣakaḥ*

Before you move on

What does आरक्षकः mean? ("A policeman".) Say it once more.

238.5 चालकः (cālakaḥ) — a driver

Before the new one: say the Sanskrit for a scientist, then the Sanskrit for a policeman.

You'll want to know: चालकः

चालकः — *cālakaḥ* — "a driver".

The word, taken apart — its roots and family

cālaka is built on the causative of the root √cal, "to move", with the agent suffix -*aka*: "one who sets in motion". MW knows it only as "a restive elephant", so the sense "driver" is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: cālakaḥ*
- *Say it: cālakaḥ*, once more
- *Say it:* say *cālakaḥ*

239.1 आशा (āśā) — hope

Before the new one: say the Sanskrit for a policeman, then the Sanskrit for a driver.

You'll want to know: आशा

आशा — *āśā* — "hope".

The word, taken apart — its roots and family

āśā is built on *ā-* and the root √śaṃs, "to recite, praise; to wish" (MW; CDIAL 1456). It lives on as Hindi *ās*, "hope".

What you've built

One more word for this chapter.

What does आशा mean? ("Hope".) Say it once more.

239.2 प्रेम (prema) — love

Before the new one: say the Sanskrit for a driver, then the Sanskrit for hope.

You'll want to know: प्रेम

प्रेम — *prema* — "love".

The word, taken apart — its roots and family

prema is the nominative of *preman*, "love", built on the root √prī, "to please, love" (MW; CDIAL 8999). The root is inherited from Indo-European: MW compares English *friend*. *Priya*, "dear", comes from the same root.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *prema*
- *Say it:* *prema*, once more
- *Say it:* say *prema*

- *Recall:* say the Sanskrit for a driver, then the Sanskrit for hope, then say *prema* again

Before you move on

What does प्रेम mean? ("Love".) Say it once more.

239.3 स्नेहः (snehaḥ) — affection

Before the new one: say the Sanskrit for hope, then the Sanskrit for love.

You'll want to know: स्नेहः

स्नेहः — *snehaḥ* — "affection".

The word, taken apart — its roots and family

sneha is built on the root √snih, "to be sticky, oily" (MW), which you met in *snihyati*. It first meant "grease, oiliness" and then "love" (CDIAL 13802): affection is what sticks. Sindhi *nehu*, "affection", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: snehaḥ*
- *Say it: snehaḥ*, once more
- *Say it:* say *snehaḥ*
- *Recall:* say the Sanskrit for hope, then the Sanskrit for love, then say *snehaḥ* again

Before you move on

What does स्नेहः mean? ("Affection".) Say it once more.

239.4 दया (dayā) — compassion

Before the new one: say the Sanskrit for love, then the Sanskrit for affection.

You'll want to know: दया

दया — *dayā* — "compassion".

The word, taken apart — its roots and family

dayā is built on the root √day, which MW glosses "to divide, impart" and "to have pity on" (CDIAL 6185). It is the base of *dayālu*, "kind", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: dayā*
- *Say it: dayā*, once more
- *Say it:* say *dayā*
- *Recall:* say the Sanskrit for love, then the Sanskrit for affection, then say *dayā* again

Before you move on

What does दया mean? ("Compassion".) Say it once more.

239.5 करुणा (karuṇā) — pity

Before the new one: say the Sanskrit for affection, then the Sanskrit for compassion.

You'll want to know: करुणा

करुणा — *karuṇā* — "pity".

The word, taken apart — its roots and family

karuṇā is the noun of *karuṇa*, "mournful, compassionate" (CDIAL 2811). Its root is uncertain: MW suggests √kṝ, and CDIAL 2809 suggests √kṛ with a question mark. It is one of the great virtues of Buddhism, compassion.

What you've built

One more word for this chapter.

Your turn

- *Say it: karuṇā*
- *Say it: karuṇā*, once more
- *Say it:* say *karuṇā*
- *Recall:* say the Sanskrit for affection, then the Sanskrit for compassion, then say *karuṇā* again

Before you move on

What does करुणा mean? ("Pity".) Say it once more.

Chapter 240

So long, Gradually, Every day, Daily, Constantly

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say so long, gradually, every day, daily and constantly.
>
> *Complete the last lesson of chapter 240: I can say so long, gradually, every day, daily and constantly.*

240.1 तावत् (tāvat) — so long, meanwhile

Before the new one: say the Sanskrit for compassion, then the Sanskrit for pity.

You'll want to know: तावत्

तावत् — *tāvat* — "so long, meanwhile".

The word, taken apart — its roots and family

tāvat is built on the pronoun stem *ta-*, "that" (MW): "so much, so long", the partner of *yāvat*, "as long as", which you have already met. It is a Rigvedic word (CDIAL 5804), and MW compares Latin *tantus*, "so great".

What you've built

One more word for this chapter.

Your turn

- *Say it: tāvat*
- *Say it: tāvat*, once more
- *Say it:* say *tāvat*
- *Recall:* say the Sanskrit for compassion, then the Sanskrit for pity, then say *tāvat* again

Before you move on

What does तावत् mean? ("So long, meanwhile".) Say it once more.

240.2 शनैः (śanaiḥ) — gradually, slowly

Before the new one: say the Sanskrit for pity, then the Sanskrit for so long.

You'll want to know: शनैः

शनैः — *śanaiḥ* — "gradually, slowly".

The word, taken apart — its roots and family

śanaiḥ comes from an old instrumental plural of *śana*, "quiet, soft", MW says, and MW connects *śana*, probably, with the root √śam, "to be calm". It is formed like *uccaiḥ*, "loudly", and *nīcaiḥ*, "softly".

What you've built

One more word for this chapter.

Your turn

- *Say it: śanaiḥ*
- *Say it: śanaiḥ*, once more
- *Say it:* say *śanaiḥ*
- *Recall:* say the Sanskrit for pity, then the Sanskrit for so long, then say *śanaiḥ* again

Before you move on

What does शनैः mean? ("Gradually, slowly".) Say it once more.

240.3 प्रतिदिनम् (pratidinam) — every day

Before the new one: say the Sanskrit for so long, then the Sanskrit for gradually.

You'll want to know: प्रतिदिनम्

प्रतिदिनम् — *pratidinam* — "every day".

The word, taken apart — its roots and family

pratidinam is built on *prati*, "towards, each", and *dina*, "day" (MW): "day by day". MW compares *dina* with the *-dinus* of Latin *nūndinus*, "of the ninth day", and it lives on as Hindi *din*, "day" (CDIAL 6328).

What you've built

One more word for this chapter.

Your turn

- *Say it: pratidinam*
- *Say it: pratidinam*, once more
- *Say it:* say *pratidinam*
- *Recall:* say the Sanskrit for so long, then the Sanskrit for gradually, then say *pratidinam* again

Before you move on

What does प्रतिदिनम् mean? ("Every day".) Say it once more.

240.4 प्रत्यहम् (pratyaham) — daily

Before the new one: say the Sanskrit for gradually, then the Sanskrit for every day.

You'll want to know: प्रत्यहम्

प्रत्यहम् — *pratyaham* — "daily".

The word, taken apart — its roots and family

pratyaham is built on *prati*, "each", and *ahan*, "day" (MW): "day by day". It means the same as *pratidinam* but uses the older Vedic word for day, *ahar* or *ahan*.

What you've built

One more word for this chapter.

Your turn

- *Say it: pratyaham*
- *Say it: pratyaham*, once more
- *Say it:* say *pratyaham*
- *Recall:* say the Sanskrit for gradually, then the Sanskrit for every day, then say *pratyaham* again

Before you move on

What does प्रत्यहम् mean? ("Daily".) Say it once more.

240.5 नित्यम् (nityam) — constantly, always

Before the new one: say the Sanskrit for every day, then the Sanskrit for daily.

You'll want to know: नित्यम्

नित्यम् — *nityam* — "constantly, always".

The word, taken apart — its roots and family

nityam is the adverb of *nitya*, which MW derives from *ni*, "in, into": first "innate, one's own", then "continual, eternal". The Rigveda already uses *nityam* for "always" (CDIAL 7190).

What you've built

One more word for this chapter.

Your turn

- *Say it: nityam*
- *Say it: nityam*, once more
- *Say it:* say *nityam*
- *Recall:* say the Sanskrit for every day, then the Sanskrit for daily, then say *nityam* again

Before you move on

What does नित्यम् mean? ("Constantly, always".) Say it once more.

240.6 Words from chapters 232-235 — a first pass

241.1 कृते (kṛte) — for the sake of

> Before the new one: say the Sanskrit for daily, then the Sanskrit for constantly, always.

You'll want to know: कृते

कृते — *kṛte* — "for the sake of".

The word, taken apart — its roots and family

kṛte comes from *kṛta*, "done", the past participle of the root √kṛ, "to do" (MW); it is its locative. "In the doing of", and so "for the sake of"; *mama kṛte* is "for me".

What you've built

One more word for this chapter.

Your turn

- *Say it: kṛte*
- *Say it: kṛte*, once more
- *Say it:* say *kṛte*
- *Recall:* say the Sanskrit for daily, then the Sanskrit for constantly, always, then say *kṛte* again

What does कृते mean? ("For the sake of".) Say it once more.

241.2 येन (yena) — by which, so that

Before the new one: say the Sanskrit for constantly, always, then the Sanskrit for for the sake of.

You'll want to know: येन

येन — *yena* — "by which, so that".

The word, taken apart — its roots and family

yena comes from the relative pronoun stem *ya-*, "which", as its instrumental (MW): "by which", and so "so that". It pairs with *tena*, "by that", from the next lesson.

What you've built

One more word for this chapter.

Your turn

- *Say it: yena*
- *Say it: yena*, once more
- *Say it:* say *yena*
- *Recall:* say the Sanskrit for constantly, always, then the Sanskrit for for the sake of, then say *yena* again

241.3 तेन (tena) — by that, therefore

Before the new one: say the Sanskrit for for the sake of, then the Sanskrit for by which.

You'll want to know: तेन

तेन — *tena* — "by that, therefore".

The word, taken apart — its roots and family

tena is the instrumental of the pronoun stem *ta-*, "that", whose neuter is *tad* (MW). The stem is inherited from Indo-European: MW compares Greek *to*, "the", and Gothic *thata*, the cousin of English *that*.

What you've built

One more word for this chapter.

Your turn

- *Say it: tena*
- *Say it: tena*, once more
- *Say it:* say *tena*
- *Recall:* say the Sanskrit for for the sake of, then the Sanskrit for by which, then say *tena* again

Before you move on

241.4 यत् (yat) — that (introducing a clause)

Before the new one: say the Sanskrit for by which, then the Sanskrit for by that.

You'll want to know: यत्

यत् — *yat* — "that (introducing a clause)".

The word, taken apart — its roots and family

yat is the neuter form of the relative pronoun stem *ya-*, "which, what" (MW). Used at the head of a clause it means "that", the way English *that* introduces "he said that ...". Hindi *jo*, "who, which", comes from the same stem (CDIAL 10391).

What you've built

One more word for this chapter.

Your turn

- *Say it: yat*
- *Say it: yat*, once more
- *Say it:* say *yat*
- *Recall:* say the Sanskrit for by which, then the Sanskrit for by that, then say *yat* again

Before you move on

What does यत् mean? ("That (introducing a clause)".) Say it once more.

241.5 परन्तु (parantu) — however, but

Before the new one: say the Sanskrit for by that, then the Sanskrit for that.

You'll want to know: परन्तु

परन्तु — *parantu* — "however, but".

The word, taken apart — its roots and family

parantu is built on *param*, “beyond, further, but”, from *para*, “far, other”, and *tu*, “but, on the other hand” (MW). Two words for “but” joined into one.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: parantu*
- *Say it: parantu*, once more
- *Say it:* say *parantu*
- *Recall:* say the Sanskrit for by that, then the Sanskrit for that, then say *parantu* again

Before you move on

What does परन्तु mean? (“However, but”.) Say it once more.

Chapter 242

Easy to get, Hard to get, Complicated, Easy to do, Hard to do

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say easy to get, hard to get, complicated, easy to do and hard to do.

> *Complete the last lesson of chapter 242: I can say easy to get, hard to get, complicated, easy to do and hard to do.*

242.1 सुलभः (sulabhaḥ) — easy to get, cheap

Before the new one: say the Sanskrit for that, then the Sanskrit for however.

You'll want to know: सुलभः

सुलभः — *sulabhaḥ* — "easy to get, cheap".

The word, taken apart — its roots and family

sulabha is built on *su-*, "well, easily", and the root √labh, "to take, obtain" (MW; CDIAL 13512). MW compares √labh with Greek *lambanō*, "I take". Pali *sulabha*, "easy to be obtained", carries it on.

What you've built

One more word for this chapter.

Your turn

- *Say it: sulabhaḥ*
- *Say it: sulabhaḥ*, once more
- *Say it:* say *sulabhaḥ*

242.3 जटिलः (jaṭilaḥ) — complicated

Before the new one: say the Sanskrit for easy to get, then the Sanskrit for hard to get.

You'll want to know: जटिलः

जटिलः — *jaṭilaḥ* — "complicated".

The word, taken apart — its roots and family

jaṭila is built on *jaṭā*, "hair twisted together", as worn by ascetics (MW): "having matted hair" (CDIAL 5087). Matted hair is tangled, and so the word came to mean "complicated".

What you've built

One more word for this chapter.

Your turn

- *Say it: jaṭilaḥ*
- *Say it: jaṭilaḥ*, once more

243.1 बलवान् (balavān) — mighty, strong

Before the new one: say the Sanskrit for easy to do, then the Sanskrit for hard to do.

You'll want to know: बलवान्

बलवान् — *balavān* — "mighty, strong".

The word, taken apart — its roots and family

balavān is the nominative of *balavat*, built on *bala*, "power, strength" (CDIAL 9161), with *-vat*, "having" (MW). EtymDB sets *bala* beside Greek *beltiōn*, "better", and Latin *dēbilis*, "weak". *Bala* lives on as Hindi *bal*, "strength".

What you've built

One more word for this chapter.

Your turn

- *Say it: balavān*

What does रुग्णः mean? ("Sick".) Say it once more.

243.3 स्वस्थः (svasthaḥ) — healthy

Before the new one: say the Sanskrit for mighty, then the Sanskrit for sick.

You'll want to know: स्वस्थः

स्वस्थः — *svasthaḥ* — "healthy".

The word, taken apart — its roots and family

svastha is a compound of *sva*, "self", and *stha*, "standing" (MW; CDIAL 13917): "being in one's own natural state", and so "well, healthy". It is the base of *svāsthya*, "health", which you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: svasthaḥ*

243.4 सुखी (sukhī) — happy

Before the new one: say the Sanskrit for sick, then the Sanskrit for healthy.

You'll want to know: सुखी

सुखी — *sukhī* — "happy".

The word, taken apart — its roots and family

sukhī is the nominative of *sukhin*, "having happiness", built on *sukha*, "pleasant, happiness" (MW). The usual account, which MW reports, takes *sukha* from *su* "good" and *kha* "axle-hole": a chariot that runs easily (CDIAL 13451).

What you've built

One more word for this chapter.

Your turn

- *Say it: sukhī*

- *Recall:* say the Sanskrit for unhappy, then the Sanskrit for proper, then say *anucitaḥ* again

Before you move on

What does अनुचितः mean? ("Improper".) Say it once more.

244.3 आवश्यकः (āvaśyakaḥ) — necessary

Before the new one: say the Sanskrit for proper, then the Sanskrit for improper.

You'll want to know: आवश्यकः

आवश्यकः — *āvaśyakaḥ* — "necessary".

The word, taken apart — its roots and family

āvaśyaka is built on *avaśya*, "inevitable", the stem of *avaśyam*, "certainly", which you have already met, with the suffix *-ka* and a lengthened first vowel (MW). What no will can avoid is necessary.

What you've built

One more word for this chapter.

Your turn

- *Say it: āvaśyakaḥ*
- *Say it: āvaśyakaḥ*, once more
- *Say it:* say *āvaśyakaḥ*
- *Recall:* say the Sanskrit for proper, then the Sanskrit for improper, then say *āvaśyakaḥ* again

Before you move on

What does आवश्यकः mean? ("Necessary".) Say it once more.

244.4 अन्यः (anyaḥ) — other

Before the new one: say the Sanskrit for improper, then the Sanskrit for necessary.

You'll want to know: अन्यः

अन्यः — *anyaḥ* — "other".

The word, taken apart — its roots and family

anya is an inherited word for "other" (CDIAL 399), and EtymDB sets it beside Avestan *anya*, "other". Hindi and Gujarati *ān*, "other", come from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: anyaḥ*
- *Say it: anyaḥ*, once more
- *Say it:* say *anyaḥ*
- *Recall:* say the Sanskrit for improper, then the Sanskrit for necessary, then say *anyaḥ* again

Before you move on

What does अन्यः mean? ("Other".) Say it once more.

244.5 एकाकी (ekākī) — alone

Before the new one: say the Sanskrit for necessary, then the Sanskrit for other.

You'll want to know: एकाकी

एकाकी — *ekākī* — "alone".

The word, taken apart — its roots and family

ekākī is the nominative of *ekākin*, built on *eka*, "one" (MW): "being one", alone. MW compares *eka* with Greek *oios*, "alone", and Gothic *ains*, "one", and *eka* lives on as Hindi *ek* (CDIAL 2462).

What you've built

One more word for this chapter.

Your turn

- *Say it: ekākī*
- *Say it: ekākī*, once more
- *Say it:* say *ekākī*
- *Recall:* say the Sanskrit for necessary, then the Sanskrit for other, then say *ekākī* again

Before you move on

What does एकाकी mean? ("Alone".) Say it once more.

Chapter 245

Tube, Buttermilk, Fruit juice, Clove, Cardamom

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a tube, buttermilk, fruit juice, a clove and cardamom.
>
> *Complete the last lesson of chapter 245: I can say a tube, buttermilk, fruit juice, a clove and cardamom.*

245.1 नालिका (nālikā) — a tube, a pipe

Before the new one: say the Sanskrit for other, then the Sanskrit for alone.

You'll want to know: नालिका

नालिका — *nālikā* — "a tube, a pipe".

The word, taken apart — its roots and family

nālikā is built on *nāla*, "hollow stalk, tube", which MW derives from *nala* or *naḍa*, "reed". CDIAL 7047 lists *nālikā* "stalk" under *nāḍī*, "tube", the word for the pulse: a pipe is a hollow reed.

What you've built

One more word for this chapter.

Your turn

- *Say it: nālikā*
- *Say it: nālikā*, once more
- *Say it:* say *nālikā*
- *Recall:* say the Sanskrit for other, then the Sanskrit for alone, then say *nālikā* again

Before you move on

What does नालिका mean? ("A tube, a pipe".) Say it once more.

245.2 तक्रम् (takram) — buttermilk

Before the new one: say the Sanskrit for alone, then the Sanskrit for a tube.

You'll want to know: तक्रम्

तक्रम् — *takram* — "buttermilk".

The word, taken apart — its roots and family

takra is buttermilk thinned with water (MW). MW and CDIAL 5617 both link it to the root √tañc, "to contract", as milk curdles, and CDIAL compares Persian *talx*, "bitter". It lives on as Marathi and Gujarati *tāk*, "buttermilk".

What you've built

One more word for this chapter.

Your turn

- *Say it: takram*
- *Say it: takram*, once more
- *Say it:* say *takram*

- *Recall:* say the Sanskrit for alone, then the Sanskrit for a tube, then say *takram* again

Before you move on

What does तक्रम् mean? ("Buttermilk".) Say it once more.

245.3 फलरसः (phalarasaḥ) — fruit juice

Before the new one: say the Sanskrit for a tube, then the Sanskrit for buttermilk.

You'll want to know: फलरसः

फलरसः — *phalarasaḥ* — "fruit juice".

The word, taken apart — its roots and family

phalarasa is a compound of *phala*, "fruit", and *rasa*, "sap, juice" (MW). *Rasa* is a Rigvedic word for the juice of plants, later also "taste" (CDIAL 10650), and it lives on as Hindi *ras*, "juice".

What you've built

One more word for this chapter.

Your turn

- *Say it: phalarasaḥ*
- *Say it: phalarasaḥ*, once more
- *Say it:* say *phalarasaḥ*
- *Recall:* say the Sanskrit for a tube, then the Sanskrit for buttermilk, then say *phalarasaḥ* again

Before you move on

What does फलरसः mean? ("Fruit juice".) Say it once more.

245.4 लवंगम् (lavaṅgam) — a clove

Before the new one: say the Sanskrit for buttermilk, then the Sanskrit for fruit juice.

You'll want to know: लवंगम्

लवंगम् — *lavaṅgam* — "a clove".

The word, taken apart — its roots and family

lavaṅga names the clove tree and its buds, first in the poets (CDIAL 10977). MW gives no derivation, so its origin is uncertain. It lives on as Hindi *laũg*, "clove".

What you've built

One more word for this chapter.

Your turn

- *Say it: lavaṅgam*
- *Say it: lavaṅgam*, once more
- *Say it:* say *lavaṅgam*
- *Recall:* say the Sanskrit for buttermilk, then the Sanskrit for fruit juice, then say *lavaṅgam* again

Before you move on

What does लवंगम् mean? ("A clove".) Say it once more.

245.5 एला (elā) — cardamom

Before the new one: say the Sanskrit for fruit juice, then the Sanskrit for a clove.

You'll want to know: एला

एला — *elā* — "cardamom".

The word, taken apart — its roots and family

elā is probably borrowed from Dravidian: CDIAL 2522 follows Mayrhofer in taking it from a Dravidian source. It lives on as Marathi *eḷā*, "cardamom".

What you've built

One more word for this chapter.

Your turn

- *Say it:* *elā*
- *Say it:* *elā*, once more
- *Say it:* say *elā*
- *Recall:* say the Sanskrit for fruit juice, then the Sanskrit for a clove, then say *elā* again

Before you move on

What does एला mean? ("Cardamom".) Say it once more.

Chapter 246

Puffed rice, Grain, Barley flour, Wild honey, Sweet dish

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say puffed rice, grain, barley flour, wild honey and a sweet dish.
>
> *Complete the last lesson of chapter 246: I can say puffed rice, grain, barley flour, wild honey and a sweet dish.*

246.1 लाजाः (lājāḥ) — puffed rice

Before the new one: say the Sanskrit for a clove, then the Sanskrit for cardamom.

You'll want to know: लाजाः

लाजाः — *lājāḥ* — "puffed rice".

The word, taken apart — its roots and family

lājāḥ is the plural of *lāja*, "fried or parched grain", used in the plural for the grains (MW). MW files it under a root √lāj, "to fry", and it is already in the Vājasaneyi Saṃhitā (CDIAL 11011). It lives on as Hindi *lāī*, "parched grain".

What you've built

One more word for this chapter.

Your turn

- *Say it: lājāḥ*
- *Say it: lājāḥ*, once more
- *Say it:* say *lājāḥ*
- *Recall:* say the Sanskrit for a clove, then the Sanskrit for cardamom, then say *lājāḥ* again

Before you move on

What does लाजाः mean? ("Puffed rice".) Say it once more.

246.2 धान्यम् (dhānyam) — grain

Before the new one: say the Sanskrit for cardamom, then the Sanskrit for puffed rice.

You'll want to know: धान्यम्

धान्यम् — *dhānyam* — "grain".

The word, taken apart — its roots and family

dhānya means "of grain", and then "grain, corn" itself; it is built on *dhānā*, "grain" (CDIAL 6778). It lives on as Hindi *dhān*, "growing or unhusked rice". It is a different word from *dhanya*, "fortunate", in *dhanyavādaḥ*.

What you've built

One more word for this chapter.

Your turn

- *Say it: dhānyam*
- *Say it: dhānyam*, once more
- *Say it:* say *dhānyam*

- *Recall:* say the Sanskrit for cardamom, then the Sanskrit for puffed rice, then say *dhānyam* again

Before you move on

What does धान्यम् mean? ("Grain".) Say it once more.

246.3 सक्तुः (saktuḥ) — barley flour

Before the new one: say the Sanskrit for puffed rice, then the Sanskrit for grain.

You'll want to know: सक्तुः

सक्तुः — *saktuḥ* — "barley flour".

The word, taken apart — its roots and family

saktu is coarsely ground meal, especially of barley, already in the Rigveda (CDIAL 13070). MW gives no derivation, so its origin is uncertain. It lives on as Hindi *sattū*, the flour of parched grain.

What you've built

One more word for this chapter.

Your turn

- *Say it: saktuḥ*
- *Say it: saktuḥ*, once more
- *Say it:* say *saktuḥ*
- *Recall:* say the Sanskrit for puffed rice, then the Sanskrit for grain, then say *saktuḥ* again

Before you move on

What does सक्तुः mean? ("Barley flour".) Say it once more.

246.4 क्षौद्रम् (kṣaudram) — wild honey

Before the new one: say the Sanskrit for grain, then the Sanskrit for barley flour.

You'll want to know: क्षौद्रम्

क्षौद्रम् — *kṣaudram* — "wild honey".

The word, taken apart — its roots and family

kṣaudra is built on *kṣudrā*, "a kind of bee", from *kṣudra*, "tiny" (MW): the honey of small wild bees. MW glosses *kṣaudra* "honey, a species of honey".

What you've built

One more word for this chapter.

Your turn

- *Say it: kṣaudram*
- *Say it: kṣaudram*, once more
- *Say it:* say *kṣaudram*
- *Recall:* say the Sanskrit for grain, then the Sanskrit for barley flour, then say *kṣaudram* again

Before you move on

What does क्षौद्रम् mean? ("Wild honey".) Say it once more.

246.5 मिष्टान्नम् (miṣṭānnam) — a sweet dish

Before the new one: say the Sanskrit for barley flour, then the Sanskrit for wild honey.

You'll want to know: मिष्टान्नम्

मिष्टान्नम् — *miṣṭānnam* — "a sweet dish".

The word, taken apart — its roots and family

miṣṭānna is a compound of *miṣṭa*, “dainty, sweet”, and *anna*, “food” (MW), which you have already met. CDIAL 10299 lists *miṣṭa* beside *mṛṣṭa*, “rubbed, prepared”, and Hindi *mīṭhā*, “sweet”, comes from it.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: miṣṭānnam*
- *Say it: miṣṭānnam*, once more
- *Say it:* say *miṣṭānnam*
- *Recall:* say the Sanskrit for barley flour, then the Sanskrit for wild honey, then say *miṣṭānnam* again

Before you move on

What does मिष्टान्नम् mean? (“A sweet dish”.) Say it once more.

Chapter 247

Arrow, Sword, Armour, Flag, Drum

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say an arrow, a sword, armour, a flag and a drum.
>
> *Complete the last lesson of chapter 247: I can say an arrow, a sword, armour, a flag and a drum.*

247.1 बाणः (bāṇaḥ) — an arrow

Before the new one: say the Sanskrit for wild honey, then the Sanskrit for a sweet dish.

You'll want to know: बाणः

बाणः — *bāṇaḥ* — "an arrow".

The word, taken apart — its roots and family

bāṇa is a reed-shaft and so an arrow, already in the Rigveda (CDIAL 9203). Its origin is uncertain: CDIAL reports proposed Austroasiatic sources without accepting one. It lives on as Hindi *bān*, "arrow".

What you've built

One more word for this chapter.

Your turn

- *Say it: bāṇaḥ*
- *Say it: bāṇaḥ*, once more
- *Say it:* say *bāṇaḥ*
- *Recall:* say the Sanskrit for wild honey, then the Sanskrit for a sweet dish, then say *bāṇaḥ* again

Before you move on

What does बाणः mean? ("An arrow".) Say it once more.

247.2 खड्गः (khaḍgaḥ) — a sword

Before the new one: say the Sanskrit for a sweet dish, then the Sanskrit for an arrow.

You'll want to know: खड्गः

खड्गः — *khaḍgaḥ* — "a sword".

The word, taken apart — its roots and family

khaḍga is a sword, and also the rhinoceros (MW). MW suggests, with a question mark, a root √khaḍ for √khaṇḍ, "to break", so its origin is uncertain; CDIAL 3786 takes the rhinoceros word as non-Aryan. Bengali *khāg* means "sword" (CDIAL 3787).

What you've built

One more word for this chapter.

Your turn

- *Say it: khaḍgaḥ*
- *Say it: khaḍgaḥ*, once more
- *Say it:* say *khaḍgaḥ*

- *Recall:* say the Sanskrit for a sweet dish, then the Sanskrit for an arrow, then say *khaḍgaḥ* again

Before you move on

What does खड्गः mean? ("A sword".) Say it once more.

247.3 कवचम् (kavacam) — armour

Before the new one: say the Sanskrit for an arrow, then the Sanskrit for a sword.

You'll want to know: कवचम्

कवचम् — *kavacam* — "armour".

The word, taken apart — its roots and family

kavaca is a coat of mail or jacket, in the Śatapatha Brāhmaṇa. CDIAL 2957 follows Mayrhofer in taking it from Dravidian, while MW suggests a root √ku. MW also gives it for a mystical syllable used as an amulet.

What you've built

One more word for this chapter.

Your turn

- *Say it: kavacam*
- *Say it: kavacam*, once more
- *Say it:* say *kavacam*
- *Recall:* say the Sanskrit for an arrow, then the Sanskrit for a sword, then say *kavacam* again

Before you move on

What does कवचम् mean? ("Armour".) Say it once more.

247.4 ध्वजः (dhvajaḥ) — a flag

Before the new one: say the Sanskrit for a sword, then the Sanskrit for armour.

You'll want to know: ध्वजः

ध्वजः — *dhvajaḥ* — "a flag".

The word, taken apart — its roots and family

dhvaja is a banner or flag, and also a flag-staff, already in the Rigveda (CDIAL 6897). MW takes it from a short form *dhvaj*, "banner", which it derives, with a question mark, from √dhū, "to shake", and √aj, "to drive", so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: dhvajaḥ*
- *Say it: dhvajaḥ*, once more
- *Say it:* say *dhvajaḥ*
- *Recall:* say the Sanskrit for a sword, then the Sanskrit for armour, then say *dhvajaḥ* again

Before you move on

What does ध्वजः mean? ("A flag".) Say it once more.

247.5 पटहः (paṭahaḥ) — a drum

Before the new one: say the Sanskrit for armour, then the Sanskrit for a flag.

You'll want to know: पटहः

पटहः — *paṭahaḥ* — "a drum".

The word, taken apart — its roots and family

paṭaha is a kettledrum or war-drum (MW). Its origin is disputed: CDIAL 7696 lists a Munda source and a Dravidian one, both with a question mark, and calls a third derivation, from *prahṛta*, "struck", very doubtful. Bengali *paṛā*, "drum", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: paṭahaḥ*
- *Say it: paṭahaḥ*, once more
- *Say it:* say *paṭahaḥ*
- *Recall:* say the Sanskrit for armour, then the Sanskrit for a flag, then say *paṭahaḥ* again

Before you move on

What does पटहः mean? ("A drum".) Say it once more.

Chapter 248

Sheath, Treasure, Rupee, Stake, Fee

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a sheath, a treasure, a rupee, a stake and a fee.
>
> *Complete the last lesson of chapter 248: I can say a sheath, a treasure, a rupee, a stake and a fee.*

248.1 कोशः (kośaḥ) — a sheath, a treasury

Before the new one: say the Sanskrit for a flag, then the Sanskrit for a drum.

You'll want to know: कोशः

कोशः — *kośaḥ* — "a sheath, a treasury".

The word, taken apart — its roots and family

kośa is a Rigvedic word for a bucket, then a case, a sheath and a store-room (CDIAL 3539), and so a treasury. MW suggests, with question marks, a root √kuś and a link with *kukṣi*, "belly"; the origin is not settled.

What you've built

One more word for this chapter.

Your turn

- *Say it: kośaḥ*
- *Say it: kośaḥ*, once more
- *Say it:* say *kośaḥ*
- *Recall:* say the Sanskrit for a flag, then the Sanskrit for a drum, then say *kośaḥ* again

Before you move on

What does कोशः mean? ("A sheath, a treasury".) Say it once more.

248.2 निधिः (nidhiḥ) — a treasure

Before the new one: say the Sanskrit for a drum, then the Sanskrit for a sheath.

You'll want to know: निधिः

निधिः — *nidhiḥ* — "a treasure".

The word, taken apart — its roots and family

nidhi is built on *ni*, "down", and the root √dhā, "to put" (MW): a hoard is what is laid down and stored. In the Rigveda it means "setting down" and "hoard" (CDIAL 7207).

What you've built

One more word for this chapter.

Your turn

- *Say it: nidhiḥ*
- *Say it: nidhiḥ*, once more
- *Say it:* say *nidhiḥ*
- *Recall:* say the Sanskrit for a drum, then the Sanskrit for a sheath, then say *nidhiḥ* again

Before you move on

What does निधिः mean? ("A treasure".) Say it once more.

248.3 रूप्यकम् (rūpyakam) — a rupee

Before the new one: say the Sanskrit for a sheath, then the Sanskrit for a treasure.

You'll want to know: रूप्यकम्

रूप्यकम् — *rūpyakam* — "a rupee".

The word, taken apart — its roots and family

rūpyaka is built on *rūpya*, "beautiful, bearing a stamp", and then "silver" (CDIAL 10805), from *rūpa*, "form" (MW). Stamped silver became the coin, and EtymDB traces Hindi *rupayā*, the rupee, to *rūpyaka*.

What you've built

One more word for this chapter.

Your turn

- *Say it: rūpyakam*
- *Say it: rūpyakam*, once more
- *Say it:* say *rūpyakam*
- *Recall:* say the Sanskrit for a sheath, then the Sanskrit for a treasure, then say *rūpyakam* again

Before you move on

What does रूप्यकम् mean? ("A rupee".) Say it once more.

248.4 पणः (paṇaḥ) — a stake, a wager, a coin

Before the new one: say the Sanskrit for a treasure, then the Sanskrit for a rupee.

You'll want to know: पणः

पणः — *paṇaḥ* — "a stake, a wager, a coin".

The word, taken apart — its roots and family

paṇa is built on the root √paṇ, "to barter, bet" (MW): "a wager, a stake", and so wages (CDIAL 7714). As the name of a coin, CDIAL 7715 treats it as a separate word, perhaps Austroasiatic. Hindi *pan* means "promise".

What you've built

One more word for this chapter.

Your turn

- *Say it: paṇaḥ*
- *Say it: paṇaḥ*, once more
- *Say it:* say *paṇaḥ*
- *Recall:* say the Sanskrit for a treasure, then the Sanskrit for a rupee, then say *paṇaḥ* again

Before you move on

What does पणः mean? ("A stake, a wager, a coin".) Say it once more.

248.5 शुल्कम् (śulkam) — a fee, a tax

Before the new one: say the Sanskrit for a rupee, then the Sanskrit for a stake.

You'll want to know: शुल्कम्

शुल्कम् — *śulkam* — "a fee, a tax".

The word, taken apart — its roots and family

śulka is a Rigvedic word for "price, value", and later "tax, toll" (CDIAL 12543). MW gives no derivation, so its origin is uncertain. A Middle Indo-Aryan form, *suṅka*, went into Tamil as *cuṅkam*, "customs duty".

What you've built

One more word for this chapter.

Your turn

- *Say it: śulkam*
- *Say it: śulkam*, once more
- *Say it:* say *śulkam*
- *Recall:* say the Sanskrit for a rupee, then the Sanskrit for a stake, then say *śulkam* again

Before you move on

What does शुल्कम् mean? ("A fee, a tax".) Say it once more.

Chapter 249

News, Drama, Poem, Film, Game

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

>
> *Complete the last lesson of chapter 249: I can say news, a drama, a poem, a film and a game.*

249.1 वार्ता (vārtā) — news

Before the new one: say the Sanskrit for a stake, then the Sanskrit for a fee.

You'll want to know: वार्ता

वार्ता — *vārtā* — "news".

The word, taken apart — its roots and family

vārtā is built on *vṛtti*, "way of life, conduct", from the root √vṛt, "to turn, proceed" (MW). It first meant "livelihood, business", then "tidings" (CDIAL 11564), and it lives on as Hindi *bāt*, "talk, matter".

What you've built

One more word for this chapter.

Your turn

- *Say it: vārtā*
- *Say it: vārtā*, once more
- *Say it:* say *vārtā*
- *Recall:* say the Sanskrit for a stake, then the Sanskrit for a fee, then say *vārtā* again

Before you move on

What does वार्ता mean? ("News".) Say it once more.

249.2 नाटकम् (nāṭakam) — a drama, a play

Before the new one: say the Sanskrit for a fee, then the Sanskrit for news.

You'll want to know: नाटकम्

नाटकम् — *nāṭakam* — "a drama, a play".

The word, taken apart — its roots and family

nāṭaka is built on *naṭa*, "dancer, actor", from √naṭ, which MW calls a Prakrit form of √nṛt, "to dance". It first meant "actor" (CDIAL 7045), then the play itself.

What you've built

One more word for this chapter.

Your turn

- *Say it: nāṭakam*
- *Say it: nāṭakam*, once more
- *Say it:* say *nāṭakam*
- *Recall:* say the Sanskrit for a fee, then the Sanskrit for news, then say *nāṭakam* again

Before you move on

What does नाटकम् mean? ("A drama, a play".) Say it once more.

249.3 काव्यम् (kāvyam) — a poem, poetry

Before the new one: say the Sanskrit for news, then the Sanskrit for a drama.

You'll want to know: काव्यम्

काव्यम् — *kāvyam* — "a poem, poetry".

The word, taken apart — its roots and family

kāvya is built on *kavi*, "seer, poet", which you have already met, with the suffix *-ya* and a lengthened first vowel (MW): "coming from a poet", and so poetry.

What you've built

One more word for this chapter.

Your turn

- *Say it: kāvyam*
- *Say it: kāvyam*, once more
- *Say it:* say *kāvyam*
- *Recall:* say the Sanskrit for news, then the Sanskrit for a drama, then say *kāvyam* again

What does काव्यम् mean? ("A poem, poetry".) Say it once more.

249.4 चित्रपटः (citrapaṭaḥ) — a film, a painted cloth

Before the new one: say the Sanskrit for a drama, then the Sanskrit for a poem.

You'll want to know: चित्रपटः

चित्रपटः — *citrapaṭaḥ* — "a film, a painted cloth".

The word, taken apart — its roots and family

citrapaṭa is a compound of *citra*, "picture", and *paṭa*, "woven cloth" (MW): a painting on cloth. CDIAL 7692 thinks *paṭa* is probably borrowed, like *karpāsa*, "cotton". The sense "film" is modern.

What you've built

One more word for this chapter.

Your turn

- *Say it: citrapaṭaḥ*
- *Say it: citrapaṭaḥ*, once more
- *Say it:* say *citrapaṭaḥ*

What does चित्रपटः mean? ("A film, a painted cloth".) Say it once more.

249.5 खेला (khelā) — a game

Before the new one: say the Sanskrit for a poem, then the Sanskrit for a film.

You'll want to know: खेला

खेला — *khelā* — "a game".

The word, taken apart — its roots and family

khelā, "sport, play" (MW), is the noun of *khelati*, "plays", which you have already met; MW's first sense of the root √khel is "to shake". CDIAL 3918 says these forms may be connected with the group behind Hindi *khel*, "game", whose origin is uncertain, perhaps non-Aryan.

What you've built

One more word for this chapter.

Your turn

- *Say it: khelā*
- *Say it: khelā*, once more

Chapter 250

Fort, Palace, Hut, Building, Lodging

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a fort, a palace, a hut, a building and lodging.
>
> *Complete the last lesson of chapter 250: I can say a fort, a palace, a hut, a building and lodging.*

250.1 दुर्गम् (durgam) — a fort

Before the new one: say the Sanskrit for a film, a painted cloth, then the Sanskrit for a game.

You'll want to know: दुर्गम्

दुर्गम् — *durgam* — "a fort".

The word, taken apart — its roots and family

durga is built on *dus-*, "hard", and *-ga*, "going", from the root √gam, "to go" (MW): "difficult of access", and so a fort. In the Rigveda it means "a difficult passage, danger" (CDIAL 6429). The goddess Durgā is "the hard to reach".

What you've built

One more word for this chapter.

Your turn

- *Say it: durgam*
- *Say it: durgam*, once more
- *Say it:* say *durgam*
- *Recall:* say the Sanskrit for a film, a painted cloth, then the Sanskrit for a game, then say *durgam* again

Before you move on

What does दुर्गम् mean? ("A fort".) Say it once more.

250.2 प्रासादः (prāsādaḥ) — a palace

Before the new one: say the Sanskrit for a game, then the Sanskrit for a fort.

You'll want to know: प्रासादः

प्रासादः — *prāsādaḥ* — "a palace".

The word, taken apart — its roots and family

prāsāda is built on *pra*, "forward", and the root √sad, "to sit" (MW): "a lofty seat or terrace" where one sits in view, and later a lofty mansion or palace (CDIAL 8971, which marks the root with a question mark). It is a different word from *prasāda*, "favour".

What you've built

One more word for this chapter.

Your turn

- *Say it: prāsādaḥ*
- *Say it: prāsādaḥ*, once more
- *Say it:* say *prāsādaḥ*

- *Recall:* say the Sanskrit for a game, then the Sanskrit for a fort, then say *prāsādaḥ* again

Before you move on

What does प्रासादः mean? ("A palace".) Say it once more.

250.3 कुटीरम् (kuṭīram) — a hut, a cottage

Before the new one: say the Sanskrit for a fort, then the Sanskrit for a palace.

You'll want to know: कुटीरम्

कुटीरम् — *kuṭīram* — "a hut, a cottage".

The word, taken apart — its roots and family

kuṭīra is built on *kuṭī*, "hut, cottage" (MW). CDIAL 3232 reports Mayrhofer's view that the word was borrowed from Dravidian. Marathi *kuḍī*, "hut", comes from *kuṭī*.

What you've built

One more word for this chapter.

Your turn

- *Say it: kuṭīram*
- *Say it: kuṭīram*, once more
- *Say it:* say *kuṭīram*
- *Recall:* say the Sanskrit for a fort, then the Sanskrit for a palace, then say *kuṭīram* again

Before you move on

What does कुटीरम् mean? ("A hut, a cottage".) Say it once more.

250.4 भवनम् (bhavanam) — a building, a house

Before the new one: say the Sanskrit for a palace, then the Sanskrit for a hut.

You'll want to know: भवनम्

भवनम् — *bhavanam* — "a building, a house".

The word, taken apart — its roots and family

bhavana is built on the root √bhū, "to be, become" (MW), the root of *bhavati*: a house is the place where one is. Manu uses it for "a place of abode" (CDIAL 9417), and Pali has *bhavana*, "dwelling".

What you've built

One more word for this chapter.

Your turn

- *Say it: bhavanam*
- *Say it: bhavanam*, once more
- *Say it:* say *bhavanam*
- *Recall:* say the Sanskrit for a palace, then the Sanskrit for a hut, then say *bhavanam* again

Before you move on

What does भवनम् mean? ("A building, a house".) Say it once more.

250.5 आवासः (āvāsaḥ) — lodging, a residence

Before the new one: say the Sanskrit for a hut, then the Sanskrit for a building.

You'll want to know: आवासः

आवासः — *āvāsaḥ* — "lodging, a residence".

The word, taken apart — its roots and family

āvāsa is built on *ā-* and the root √vas, "to dwell" (MW), the root of *vasāmi* and *nivāsa*: an abode, a house (CDIAL 1432). Gujarati *avās*, "abode", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *āvāsaḥ*
- *Say it:* *āvāsaḥ*, once more
- *Say it:* say *āvāsaḥ*
- *Recall:* say the Sanskrit for a hut, then the Sanskrit for a building, then say *āvāsaḥ* again

Before you move on

What does आवासः mean? ("Lodging, a residence".) Say it once more.

Chapter 251

Earth, Universe, World, Nature, Mud

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say the earth, the universe, the world, nature and mud.
>
> *Complete the last lesson of chapter 251: I can say the earth, the universe, the world, nature and mud.*

251.1 पृथिवी (pṛthivī) — the earth

Before the new one: say the Sanskrit for a building, then the Sanskrit for lodging.

You'll want to know: पृथिवी

पृथिवी — *pṛthivī* — "the earth".

The word, taken apart — its roots and family

pṛthivī is the feminine of *pṛthu*, "broad, wide" (MW): the earth is "the broad, extended one". MW compares *pṛthu* with Greek *platys*, "broad", and English *plate*, so the word is inherited from Indo-European.

What you've built

One more word for this chapter.

Your turn

- *Say it: pṛthivī*
- *Say it: pṛthivī*, once more
- *Say it:* say *pṛthivī*
- *Recall:* say the Sanskrit for a building, then the Sanskrit for lodging, then say *pṛthivī* again

Before you move on

What does पृथिवी mean? ("The earth".) Say it once more.

251.2 जगत् (jagat) — the universe, the world

Before the new one: say the Sanskrit for lodging, then the Sanskrit for the earth.

You'll want to know: जगत्

जगत् — *jagat* — "the universe, the world".

The word, taken apart — its roots and family

jagat is a reduplicated form of the root √gam, "to go" (MW): "moving, living". In the Rigveda it means "men and animals", and in the Śatapatha Brāhmaṇa "the world" (CDIAL 5078): the world as everything that moves.

What you've built

One more word for this chapter.

Your turn

- *Say it: jagat*
- *Say it: jagat*, once more
- *Say it:* say *jagat*

- *Recall:* say the Sanskrit for lodging, then the Sanskrit for the earth, then say *jagat* again

Before you move on

What does जगत् mean? ("The universe, the world".) Say it once more.

251.3 लोकः (lokaḥ) — the world, people

Before the new one: say the Sanskrit for the earth, then the Sanskrit for the universe.

You'll want to know: लोकः

लोकः — *lokaḥ* — "the world, people".

The word, taken apart — its roots and family

loka is a Rigvedic word for "free space, the world", and later "people" (CDIAL 11119). MW compares Latin *lūcus*, first "a clearing in a forest". Hindi *loī*, "people", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: lokaḥ*
- *Say it: lokaḥ*, once more
- *Say it:* say *lokaḥ*
- *Recall:* say the Sanskrit for the earth, then the Sanskrit for the universe, then say *lokaḥ* again

Before you move on

What does लोकः mean? ("The world, people".) Say it once more.

251.4 प्रकृतिः (prakṛtiḥ) — nature

Before the new one: say the Sanskrit for the universe, then the Sanskrit for the world.

You'll want to know: प्रकृतिः

प्रकृतिः — *prakṛtiḥ* — "nature".

The word, taken apart — its roots and family

prakṛti is built on *pra*, "before, forth", and the root √kṛ, "to make" (MW): "making or placing first", and so the original or natural form of anything. From there it came to mean "nature" (CDIAL 8446).

What you've built

One more word for this chapter.

Your turn

- *Say it: prakṛtiḥ*
- *Say it: prakṛtiḥ*, once more
- *Say it:* say *prakṛtiḥ*
- *Recall:* say the Sanskrit for the universe, then the Sanskrit for the world, then say *prakṛtiḥ* again

Before you move on

What does प्रकृतिः mean? ("Nature".) Say it once more.

251.5 पंकः (paṅkaḥ) — mud

Before the new one: say the Sanskrit for the world, then the Sanskrit for nature.

You'll want to know: पंकः

पंकः — *paṅkaḥ* — "mud".

The word, taken apart — its roots and family

paṅka is mud or mire (MW), and MW reports that it is said to come from a root √pac, "to spread", so its origin is uncertain. It lives on as Hindi *paṅkā*, "mud", and the lotus is *paṅkaja*, "mud-born" (CDIAL 7645).

What you've built

One more word for this chapter.

Your turn

- *Say it: paṅkaḥ*
- *Say it: paṅkaḥ*, once more
- *Say it:* say *paṅkaḥ*
- *Recall:* say the Sanskrit for the world, then the Sanskrit for nature, then say *paṅkaḥ* again

Before you move on

What does पंकः mean? ("Mud".) Say it once more.

Chapter 252

Vine, Thorn, Bud, Jasmine, Holy basil

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a vine, a thorn, a bud, jasmine and holy basil.
>
> *Complete the last lesson of chapter 252: I can say a vine, a thorn, a bud, jasmine and holy basil.*

252.1 वल्ली (vallī) — a vine

Before the new one: say the Sanskrit for nature, then the Sanskrit for mud.

You'll want to know: वल्ली

वल्ली — *vallī* — "a vine".

The word, taken apart — its roots and family

vallī may be borrowed from Dravidian: CDIAL 11429 says "possibly", comparing Tamil *vaḷḷi*, "creeper", and DEDR 5316 sets the Dravidian words beside it. The goddess Vaḷḷi of Tamil tradition bears the same name.

What you've built

One more word for this chapter.

Your turn

- *Say it: vallī*
- *Say it: vallī*, once more
- *Say it:* say *vallī*
- *Recall:* say the Sanskrit for nature, then the Sanskrit for mud, then say *vallī* again

Before you move on

What does वल्ली mean? ("A vine".) Say it once more.

252.2 कण्टकः (kaṇṭakaḥ) — a thorn

Before the new one: say the Sanskrit for mud, then the Sanskrit for a vine.

You'll want to know: कण्टकः

कण्टकः — *kaṇṭakaḥ* — "a thorn".

The word, taken apart — its roots and family

kaṇṭaka is a thorn or anything pointed, already in the Śatapatha Brāhmaṇa (CDIAL 2668). MW gives no derivation, so its origin is uncertain. It lives on as Punjabi *kaṇḍā* and as the Hindi word for thorn.

What you've built

One more word for this chapter.

Your turn

- *Say it: kaṇṭakaḥ*
- *Say it: kaṇṭakaḥ*, once more
- *Say it:* say *kaṇṭakaḥ*

- *Recall:* say the Sanskrit for mud, then the Sanskrit for a vine, then say *kaṇṭakaḥ* again

Before you move on

What does कण्टकः mean? ("A thorn".) Say it once more.

252.3 कलिका (kalikā) — a bud

Before the new one: say the Sanskrit for a vine, then the Sanskrit for a thorn.

You'll want to know: कलिका

कलिका — *kalikā* — "a bud".

The word, taken apart — its roots and family

kalikā is *kali*, "unblown bud", with the suffix -*kā*, first found in Kālidāsa (CDIAL 2934). Its origin is uncertain, but it lives on as Hindi *kalī*, "bud".

What you've built

One more word for this chapter.

Your turn

- *Say it: kalikā*
- *Say it: kalikā*, once more
- *Say it:* say *kalikā*
- *Recall:* say the Sanskrit for a vine, then the Sanskrit for a thorn, then say *kalikā* again

Before you move on

What does कलिका mean? ("A bud".) Say it once more.

252.4 मल्लिका (mallikā) — jasmine

Before the new one: say the Sanskrit for a thorn, then the Sanskrit for a bud.

You'll want to know: मल्लिका

मल्लिका — *mallikā* — "jasmine".

The word, taken apart — its roots and family

mallikā names the Arabian jasmine (MW). CDIAL 9913 compares Tamil *mullai*, "jasmine", and DEDR 4987 sets the Dravidian words beside it, so a Dravidian source is possible but not settled. Hindi *mallī*, "jasmine", comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: mallikā*
- *Say it: mallikā*, once more
- *Say it:* say *mallikā*
- *Recall:* say the Sanskrit for a thorn, then the Sanskrit for a bud, then say *mallikā* again

Before you move on

What does मल्लिका mean? ("Jasmine".) Say it once more.

252.5 तुलसी (tulasī) — holy basil

Before the new one: say the Sanskrit for a bud, then the Sanskrit for jasmine.

You'll want to know: तुलसी

तुलसी — *tulasī* — "holy basil".

The word, taken apart — its roots and family

tulasī is the holy basil, first in the Bhāgavata Purāṇa (CDIAL 5885). DEDR 3357 sets Tamil *tuḷaci* beside it and says some Dravidian forms were borrowed back from Sanskrit; its first origin is uncertain. It lives on as Hindi *tulsī*.

What you've built

One more word for this chapter.

Your turn

- *Say it: tulasī*
- *Say it: tulasī*, once more
- *Say it:* say *tulasī*
- *Recall:* say the Sanskrit for a bud, then the Sanskrit for jasmine, then say *tulasī* again

Before you move on

What does तुलसी mean? ("Holy basil".) Say it once more.

Chapter 253

Insect, Spider, Scorpion, Lizard, Crocodile

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say an insect, a spider, a scorpion, a lizard and a crocodile.
>
> *Complete the last lesson of chapter 253: I can say an insect, a spider, a scorpion, a lizard and a crocodile.*

253.1 कीटः (kīṭaḥ) — an insect

Before the new one: say the Sanskrit for jasmine, then the Sanskrit for holy basil.

You'll want to know: कीटः

कीटः — *kīṭaḥ* — "an insect".

The word, taken apart — its roots and family

kīṭa is an insect or worm, already in the Śatapatha Brāhmaṇa (CDIAL 3193). MW gives no derivation, so its origin is uncertain. It lives on as Hindi *kīṛā*, "insect, worm".

What you've built

One more word for this chapter.

Your turn

- *Say it: kīṭaḥ*
- *Say it: kīṭaḥ*, once more
- *Say it:* say *kīṭaḥ*
- *Recall:* say the Sanskrit for jasmine, then the Sanskrit for holy basil, then say *kīṭaḥ* again

Before you move on

What does कीटः mean? ("An insect".) Say it once more.

253.2 लूता (lūtā) — a spider

Before the new one: say the Sanskrit for holy basil, then the Sanskrit for an insect.

You'll want to know: लूता

लूता — *lūtā* — "a spider".

The word, taken apart — its roots and family

lūtā is a spider in Manu (CDIAL 11093). Neither MW nor CDIAL derives it, so its origin is uncertain. It also named a skin disease said to come from spiders, and Hindi *lūtā* keeps that sense.

What you've built

One more word for this chapter.

Your turn

- *Say it: lūtā*
- *Say it: lūtā*, once more
- *Say it:* say *lūtā*
- *Recall:* say the Sanskrit for holy basil, then the Sanskrit for an insect, then say *lūtā* again

Before you move on

What does लूता mean? ("A spider".) Say it once more.

253.3 वृश्चिकः (vṛścikaḥ) — a scorpion

Before the new one: say the Sanskrit for an insect, then the Sanskrit for a spider.

You'll want to know: वृश्चिकः

वृश्चिकः — *vṛścikaḥ* — "a scorpion".

The word, taken apart — its roots and family

vṛścika is a Rigvedic word for the scorpion (CDIAL 12081), probably built on the root √vraśc, "to cut, tear", though CDIAL marks that with a question mark. It is also the sign Scorpio, and Hindi *bīchā* comes from it.

What you've built

One more word for this chapter.

Your turn

- *Say it: vṛścikaḥ*
- *Say it: vṛścikaḥ*, once more
- *Say it:* say *vṛścikaḥ*
- *Recall:* say the Sanskrit for an insect, then the Sanskrit for a spider, then say *vṛścikaḥ* again

Before you move on

What does वृश्चिकः mean? ("A scorpion".) Say it once more.

253.4 गोधा (godhā) — a lizard

Before the new one: say the Sanskrit for a spider, then the Sanskrit for a scorpion.

You'll want to know: गोधा

गोधा — *godhā* — "a lizard".

The word, taken apart — its roots and family

godhā is a big lizard, the monitor, in the Vājasaneyi Saṃhitā. CDIAL 4286 thinks it probably came from Dravidian and was reshaped by folk etymology to look like *go*, "cow", and it points to Mayrhofer for an Indo-European account, so the question is not settled. It lives on as Hindi *goh*, "iguana".

What you've built

One more word for this chapter.

Your turn

- *Say it: godhā*
- *Say it: godhā*, once more
- *Say it:* say *godhā*
- *Recall:* say the Sanskrit for a spider, then the Sanskrit for a scorpion, then say *godhā* again

Before you move on

What does गोधा mean? ("A lizard".) Say it once more.

253.5 नक्रः (nakraḥ) — a crocodile

Before the new one: say the Sanskrit for a scorpion, then the Sanskrit for a lizard.

You'll want to know: नक्रः

नक्रः — *nakraḥ* — "a crocodile".

The word, taken apart — its roots and family

nakra is a crocodile or alligator, and also the sign Scorpio (MW). MW reports a grammarians' analysis into *na* and *kra*, but gives no sure derivation, so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: nakraḥ*
- *Say it: nakraḥ*, once more
- *Say it:* say *nakraḥ*
- *Recall:* say the Sanskrit for a scorpion, then the Sanskrit for a lizard, then say *nakraḥ* again

Before you move on

What does नक्रः mean? ("A crocodile".) Say it once more.

Chapter 254

Ruddy goose, Hawk, Breakfast, Dinner, Cooked food

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a ruddy goose, a hawk, breakfast, dinner and cooked food.
>
> *Complete the last lesson of chapter 254: I can say a ruddy goose, a hawk, breakfast, dinner and cooked food.*

254.1 चक्रवाकः (cakravākaḥ) — a ruddy goose

Before the new one: say the Sanskrit for a lizard, then the Sanskrit for a crocodile.

You'll want to know: चक्रवाकः

चक्रवाकः — *cakravākaḥ* — "a ruddy goose".

The word, taken apart — its roots and family

cakravāka is the ruddy goose, already in the Rigveda (CDIAL 4551). MW lists it as a compound of *cakra*, "wheel", but does not explain the second part or the name. Poets made the pair a symbol of lovers parted at night, and Hindi *cakwā* continues it.

What you've built

One more word for this chapter.

Your turn

- *Say it: cakravākaḥ*
- *Say it: cakravākaḥ*, once more
- *Say it:* say *cakravākaḥ*
- *Recall:* say the Sanskrit for a lizard, then the Sanskrit for a crocodile, then say *cakravākaḥ* again

Before you move on

What does चक्रवाकः mean? ("A ruddy goose".) Say it once more.

254.2 श्येनः (śyenaḥ) — a hawk

Before the new one: say the Sanskrit for a crocodile, then the Sanskrit for a ruddy goose.

You'll want to know: श्येनः

श्येनः — *śyenaḥ* — "a hawk".

The word, taken apart — its roots and family

śyena is a hawk or eagle, the bird that brings the Soma down in the Rigveda (MW). MW gives it no derivation, so its origin is uncertain.

What you've built

One more word for this chapter.

Your turn

- *Say it: śyenaḥ*
- *Say it: śyenaḥ*, once more
- *Say it:* say *śyenaḥ*
- *Recall:* say the Sanskrit for a crocodile, then the Sanskrit for a ruddy goose, then say *śyenaḥ* again

Before you move on

What does श्येनः mean? ("A hawk".) Say it once more.

254.3 प्रातराशः (prātarāśaḥ) — breakfast

Before the new one: say the Sanskrit for a ruddy goose, then the Sanskrit for a hawk.

You'll want to know: प्रातराशः

प्रातराशः — *prātarāśaḥ* — "breakfast".

The word, taken apart — its roots and family

prātarāśa is a compound of *prātar*, "early in the morning", and *āśa*, "eating, food", from the root √aś, "to eat" (MW): the morning meal. MW compares *prātar* with Greek *prōi* and German *früh*, "early".

What you've built

One more word for this chapter.

Your turn

- *Say it: prātarāśaḥ*
- *Say it: prātarāśaḥ*, once more
- *Say it:* say *prātarāśaḥ*
- *Recall:* say the Sanskrit for a ruddy goose, then the Sanskrit for a hawk, then say *prātarāśaḥ* again

Before you move on

What does प्रातराशः mean? ("Breakfast".) Say it once more.

254.4 रात्रिभोजनम् (rātribhojanam) — dinner

Before the new one: say the Sanskrit for a hawk, then the Sanskrit for breakfast.

You'll want to know: रात्रिभोजनम्

रात्रिभोजनम् — *rātribhojanam* — "dinner".

The word, taken apart — its roots and family

rātribhojana is a compound of *rātri*, "night", and *bhojana*, "eating, food", from the root √bhuj, "to enjoy, eat" (CDIAL 9630). MW lists the compound as "eating at night"; its use for the evening meal is the modern one.

What you've built

One more word for this chapter.

Your turn

- *Say it: rātribhojanam*
- *Say it: rātribhojanam*, once more
- *Say it:* say *rātribhojanam*

Before you move on

What does रात्रिभोजनम् mean? ("Dinner".) Say it once more.

254.5 पक्वान्नम् (pakvānnam) — cooked food

Before the new one: say the Sanskrit for breakfast, then the Sanskrit for dinner.

You'll want to know: पक्वान्नम्

पक्वान्नम् — *pakvānnam* — "cooked food".

The word, taken apart — its roots and family

pakvānna is a compound of *pakva*, "cooked, ripe", from the root √pac, "to cook", and *anna*, "food" (MW). *Pakva* lives on as Hindi *pakkā*,

"cooked, ripe, real" (CDIAL 7621), and *anna* is the food word you have already met.

What you've built

One more word for this chapter.

Your turn

- *Say it: pakvānnam*
- *Say it: pakvānnam*, once more
- *Say it:* say *pakvānnam*

255.1 शिक्षा (śikṣā) — education

Before the new one: say the Sanskrit for dinner, then the Sanskrit for cooked food.

You'll want to know: शिक्षा

शिक्षा — *śikṣā* — "education".

The word, taken apart — its roots and family

śikṣā is built on *śikṣ*, "to learn", which MW calls the desiderative of √śak, "to be able": learning is wanting to be able. MW's first sense is "desire of being able", then "learning, study". The verb *śikṣate* lives on as Hindi *sīkhnā*, "to learn" (CDIAL 12430).

What you've built

One more word for this chapter.

Your turn

- *Say it: śikṣā*
- *Say it: śikṣā*, once more
- *Say it:* say *śikṣā*
- *Recall:* say the Sanskrit for dinner, then the Sanskrit for cooked food, then say *śikṣā* again

Before you move on

What does शिक्षा mean? ("Education".) Say it once more.

255.2 ज्ञानम् (jñānam) — knowledge

Before the new one: say the Sanskrit for cooked food, then the Sanskrit for education.

You'll want to know: ज्ञानम्

ज्ञानम् — *jñānam* — "knowledge".

The word, taken apart — its roots and family

jñāna is built on the root √jñā, "to know" (MW), the root of *jānāti*, "knows": "knowing, knowledge" (CDIAL 5281). Hindi uses it as *jñān*, said *gyān*.

What you've built

One more word for this chapter.

Your turn

- *Say it: jñānam*
- *Say it: jñānam*, once more
- *Say it:* say *jñānam*
- *Recall:* say the Sanskrit for cooked food, then the Sanskrit for education, then say *jñānam* again

Before you move on

What does ज्ञानम् mean? ("Knowledge".) Say it once more.

255.3 अभ्यासः (abhyāsaḥ) — practice

Before the new one: say the Sanskrit for education, then the Sanskrit for knowledge.

You'll want to know: अभ्यासः

अभ्यासः — *abhyāsaḥ* — "practice".

The word, taken apart — its roots and family

abhyāsa is built on *abhi*, "towards", and the root √as, "to throw" (MW): "throwing towards, adding", and then "repetition" and "practice". Practice is doing a thing again and again; Hindi took the word as *abhyās*.

What you've built

One more word for this chapter.

Your turn

- *Say it: abhyāsaḥ*
- *Say it: abhyāsaḥ*, once more
- *Say it:* say *abhyāsaḥ*
- *Recall:* say the Sanskrit for education, then the Sanskrit for knowledge, then say *abhyāsaḥ* again

Before you move on

What does अभ्यासः mean? ("Practice".) Say it once more.

255.4 गृहकार्यम् (gṛhakāryam) — homework

Before the new one: say the Sanskrit for knowledge, then the Sanskrit for practice.

You'll want to know: गृहकार्यम्

गृहकार्यम् — *gṛhakāryam* — "homework".

The word, taken apart — its roots and family

gṛhakārya is a compound of *gṛha*, "house", and *kārya*, "what is to be done", from the root √kṛ (MW; CDIAL 3078). MW glosses it "a domestic affair"; its use for school homework is modern. *Kārya* lives on as Hindi *kāj*, "work".

What you've built

One more word for this chapter.

Your turn

- *Say it: gṛhakāryam*
- *Say it: gṛhakāryam*, once more
- *Say it:* say *gṛhakāryam*
- *Recall:* say the Sanskrit for knowledge, then the Sanskrit for practice, then say *gṛhakāryam* again

Before you move on

What does गृहकार्यम् mean? ("Homework".) Say it once more.

255.5 उत्तरम् (uttaram) — an answer

Before the new one: say the Sanskrit for practice, then the Sanskrit for homework.

You'll want to know: उत्तरम्

उत्तरम् — *uttaram* — "an answer".

The word, taken apart — its roots and family

uttara is the comparative of *ud*, "up": "higher", and also "following, later" (MW). The answer is the later word: CDIAL 1767 explains *uttaram* as *uttaram vākyam*, "the following speech". The same word means "north".

What you've built

One more word for this chapter.

Your turn

- *Say it: uttaram*
- *Say it: uttaram*, once more
- *Say it:* say *uttaram*
- *Recall:* say the Sanskrit for practice, then the Sanskrit for homework, then say *uttaram* again

Before you move on

What does उत्तरम् mean? ("An answer".) Say it once more.

Chapter 256

Training, Conference, Decision, Thought, Opinion

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say training, a conference, a decision, a thought and an opinion.
>
> *Complete the last lesson of chapter 256: I can say training, a conference, a decision, a thought and an opinion.*

256.1 प्रशिक्षणम् (praśikṣaṇam) — training

Before the new one: say the Sanskrit for homework, then the Sanskrit for an answer.

You'll want to know: प्रशिक्षणम्

प्रशिक्षणम् — *praśikṣaṇam* — "training".

The word, taken apart — its roots and family

praśikṣaṇa is built on *pra-* and *śikṣaṇa*, "learning; teaching, instruction" (MW), from *śikṣ*, the desiderative of √śak, "to be able". MW does not list *praśikṣaṇa*, so the word for training is a modern coinage.

What you've built

One more word for this chapter.

Your turn

- *Say it: praśikṣaṇam*
- *Say it: praśikṣaṇam*, once more
- *Say it:* say *praśikṣaṇam*
- *Recall:* say the Sanskrit for homework, then the Sanskrit for an answer, then say *praśikṣaṇam* again

Before you move on

What does प्रशिक्षणम् mean? ("Training".) Say it once more.

256.2 सम्मेलनम् (sammelanam) — a conference

Before the new one: say the Sanskrit for an answer, then the Sanskrit for training.

You'll want to know: सम्मेलनम्

सम्मेलनम् — *sammelanam* — "a conference".

The word, taken apart — its roots and family

sammelana is built on *sam*, "together", and the root √mil, "to meet" (MW): "mingling or meeting together". The same root gives *melaka*, "fair", which you have already met, and Hindi *milnā*, "to meet" (CDIAL 10133).

What you've built

One more word for this chapter.

Your turn

- *Say it: sammelanam*
- *Say it: sammelanam*, once more
- *Say it:* say *sammelanam*

- *Recall:* say the Sanskrit for an answer, then the Sanskrit for training, then say *sammelanam* again

Before you move on

What does सम्मेलनम् mean? ("A conference".) Say it once more.

256.3 निर्णयः (nirṇayaḥ) — a decision

Before the new one: say the Sanskrit for training, then the Sanskrit for a conference.

You'll want to know: निर्णयः

निर्णयः — *nirṇayaḥ* — "a decision".

The word, taken apart — its roots and family

nirṇaya is built on *nis*, "out", and the root √nī, "to lead" (MW). The verb means "to carry off" and then "to find out, settle, decide", and the noun means "complete ascertainment, decision".

What you've built

One more word for this chapter.

Your turn

- *Say it: nirṇayaḥ*
- *Say it: nirṇayaḥ*, once more
- *Say it:* say *nirṇayaḥ*
- *Recall:* say the Sanskrit for training, then the Sanskrit for a conference, then say *nirṇayaḥ* again

Before you move on

What does निर्णयः mean? ("A decision".) Say it once more.

256.4 विचारः (vicāraḥ) — a thought, an idea

Before the new one: say the Sanskrit for a conference, then the Sanskrit for a decision.

You'll want to know: विचारः

विचारः — *vicāraḥ* — "a thought, an idea".

The word, taken apart — its roots and family

vicāra is built on *vi-*, "apart, about", and the root √car, "to move" (MW): first "mode of acting", then "pondering, deliberation" (CDIAL 11683). Thought is the mind moving to and fro.

What you've built

One more word for this chapter.

Your turn

- *Say it: vicāraḥ*
- *Say it: vicāraḥ*, once more
- *Say it:* say *vicāraḥ*
- *Recall:* say the Sanskrit for a conference, then the Sanskrit for a decision, then say *vicāraḥ* again

Before you move on

What does विचारः mean? ("A thought, an idea".) Say it once more.

256.5 मतम् (matam) — an opinion

Before the new one: say the Sanskrit for a decision, then the Sanskrit for a thought.

You'll want to know: मतम्

मतम् — *matam* — "an opinion".

The word, taken apart — its roots and family

mata is the past participle of the root √man, "to think" (MW): "what is thought", an opinion. MW compares √man with Latin *meminisse*, "to remember", and *monēre*, "to remind". The same root gives *manas*, "mind".

What you've built

One more word for this chapter.

Your turn

- *Say it: matam*
- *Say it: matam*, once more

Border, Bus, Car, Arrival, Departure

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say a border, a bus, a car, arrival and departure.
>
> *Complete the last lesson of chapter 257: I can say a border, a bus, a car, arrival and departure.*

257.1 सीमान्तः (sīmāntaḥ) — a border

Before the new one: say the Sanskrit for a thought, then the Sanskrit for an opinion.

You'll want to know: सीमान्तः

सीमान्तः — *sīmāntaḥ* — "a border".

The word, taken apart — its roots and family

sīmānta is a compound of *sīmā*, "boundary", and *anta*, "end, edge" (CDIAL 13437): the outer line of a boundary. MW glosses it "a border, boundary", and also the boundary of a village.

What you've built

One more word for this chapter.

Your turn

- *Say it: sīmāntaḥ*
- *Say it: sīmāntaḥ*, once more
- *Say it:* say *sīmāntaḥ*
- *Recall:* say the Sanskrit for a thought, then the Sanskrit for an opinion, then say *sīmāntaḥ* again

Before you move on

What does सीमान्तः mean? ("A border".) Say it once more.

257.2 लोकयानम् (lokayānam) — a bus

Before the new one: say the Sanskrit for an opinion, then the Sanskrit for a border.

You'll want to know: लोकयानम्

लोकयानम् — *lokayānam* — "a bus".

The word, taken apart — its roots and family

lokayāna is a compound of *loka*, "people, the public", and *yāna*, "vehicle", from the root √yā, "to go" (MW; CDIAL 10459): the people's vehicle. MW does not list the compound, so it is a modern coinage for the bus.

What you've built

One more word for this chapter.

Your turn

- *Say it: lokayānam*
- *Say it: lokayānam*, once more
- *Say it:* say *lokayānam*

Before you move on

What does लोकयानम् mean? ("A bus".) Say it once more.

257.3 कारयानम् (kārayānam) — a car

Before the new one: say the Sanskrit for a border, then the Sanskrit for a bus.

You'll want to know: कारयानम्

कारयानम् — *kārayānam* — "a car".

The word, taken apart — its roots and family

kārayāna is a modern coinage, not in MW. Its second part is *yāna*, "vehicle", from the root √yā, "to go" (CDIAL 10459). Its first part is not settled: it echoes English *car*, but no dictionary we follow explains it.

What you've built

One more word for this chapter.

Your turn

- *Say it: kārayānam*
- *Say it: kārayānam*, once more
- *Say it:* say *kārayānam*

Before you move on

What does कारयानम् mean? ("A car".) Say it once more.

257.4 आगमनम् (āgamanam) — arrival

Before the new one: say the Sanskrit for a bus, then the Sanskrit for a car.

You'll want to know: आगमनम्

आगमनम् — *āgamanam* — "arrival".

The word, taken apart — its roots and family

āgamana is built on *ā-*, "towards", and the root √gam, "to go" (MW): going towards is coming, so "arrival" (CDIAL 1046). MW compares √gam with English *come*, and *āgacchati*, "comes", is its verb.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *āgamanam*
- *Say it:* *āgamanam*, once more
- *Say it:* say *āgamanam*

Before you move on

What does आगमनम् mean? ("Arrival".) Say it once more.

257.5 प्रस्थानम् (prasthānam) — departure

Before the new one: say the Sanskrit for a car, then the Sanskrit for arrival.

You'll want to know: प्रस्थानम्

प्रस्थानम् — *prasthānam* — "departure".

The word, taken apart — its roots and family

prasthāna is built on *pra*, "forth", and the root √sthā, "to stand" (MW): to stand forth is to set out, so "departure" (CDIAL 8872). It is the opposite of *āgamana*, "arrival".

What you've built

One more word for this chapter.

Your turn

- *Say it: prasthānam*
- *Say it: prasthānam*, once more
- *Say it:* say *prasthānam*

Before you move on

What does प्रस्थानम् mean? ("Departure".) Say it once more.

257.6 Words from chapters 250-253 — a first pass

Say the words for arrival and departure.

Your turn

Say these aloud:

- a fort, a palace, a hut, a building, lodging
- the earth, the universe, the world, nature, mud
- a vine, a thorn, a bud, jasmine, holy basil
- an insect, a spider, a scorpion, a lizard, a crocodile

Before you move on

A fort? (दुर्गम्, *durgam.*) A palace? (प्रासादः, *prāsādaḥ.*) A hut? (कुटीरम्, *kuṭīram.*) A building? (भवनम्, *bhavanam.*) Lodging? (आवासः, *āvāsaḥ.*) The earth? (पृथिवी, *pṛthivī.*) The universe? (नक्रः, *nakraḥ.*)

257.7 Words from chapters 254-257 — a second pass

Say the words for a ruddy goose and a hawk.

Your turn

Say these aloud:

- a ruddy goose, a hawk, breakfast, dinner, cooked food
- education, knowledge, practice, homework, an answer
- training, a conference, a decision, a thought, an opinion
- a border, a bus, a car, arrival, departure

Before you move on

A ruddy goose? (चक्रवाकः, *cakravākaḥ.*) A hawk? (श्येनः, *śyenaḥ.*) Breakfast? (प्रातराशः, *prātarāśaḥ.*) Dinner? (रात्रिभोजनम्, *rātribhojanam.*) Cooked food? (पक्वान्नम्, *pakvānnam.*) Education? (शिक्षा, *śikṣā.*) Knowledge? (ज्ञानम्, *jñānam.*) Practice? (अभ्यासः, *abhyāsaḥ.*) Homework? (गृहकार्यम्, *gṛhakāryam.*) An answer? (उत्तरम्, *uttaram.*) Training? (सीमान्तः, *sīmāntaḥ.*) A bus? (लोकयानम्, *lokayānam.*) A car? (कारयानम्,

kārayānam.) Arrival? (आगमनम्, *āgamanam.*) Departure? (प्रस्थानम्, *prasthānam.*)

Chapter 258

A connected A2 message

Modes: ✓ **pen** (1) 🚗 **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can plan and write a connected 70–90 word Sanskrit message in Devanagari for a named reader and practical purpose.
>
> *Complete chapter 258 by writing a model-free 70–90 word connected Sanskrit message for a named reader and practical purpose.*

258.1 A connected message about your familiar day

A connected message is not a pile of vocabulary and not one long sentence. It is a short route for one reader. Before writing, draw eight empty boxes and give them these jobs:

1. reader and greeting;
2. reason for writing;
3. where or when your day begins;
4. two familiar actions;
5. what happens next and a second time anchor;
6. one preference and one reason;
7. one direct question about tomorrow;
8. a close.

Write only one or two English cue words in each box. Do not draft Sanskrit yet.

Writing — connected composition

There is no model, Sanskrit sentence bank, or copyable answer on this page.

Reader: your friend Kiran. **Purpose:** help Kiran understand your familiar day and choose a good time to meet tomorrow.

Write **70–90 words in Sanskrit using Devanagari**. Use every planning box. Include at least four familiar actions, two time anchors, one sequence link, one preference, one reason, and one direct question for Kiran. Make every detail help with tomorrow's meeting. The instructions give content, not sentences: choose only words and forms this book has taught, and connect them yourself. Use only external-sandhi changes that the book has taught; simplify an uncertain boundary instead of inventing a join.

This first connected attempt is untimed. Put away romanization, dictionaries, grammar references, translators, generative assistants, and spell-checkers. Do not copy from an earlier lesson. Ordinary legible Devanagari handwriting is enough.

When the whole message exists, count its words once. If it is short, add one useful taught detail to a planning box. If it is long, remove a detail that does not help Kiran. Do not replace the message with a memorised model.

Before you move on

Review the same attempt in four separate passes:

1. **Task fulfilment and relevant content** — Kiran, the familiar day, tomorrow's meeting, and every requested content point are present.
2. **Comprehensibility and organisation** — the eight jobs form a route rather than a list of unrelated words or lines.
3. **Sanskrit vocabulary and grammar** — every form and external-sandhi change comes from the taught Sanskrit track; a simpler familiar boundary is better than an invented join.
4. **Devanagari orthographic control** — word-final visarga or anusvara, continuous śirorekhā, word boundaries, and danda or other punctuation remain readable.

Mark one strength and one next step. Repair only the next step; keep the original attempt so the next 70–90-word message can show real growth.

This is one untimed curriculum practice attempt, not the complete 30-minute A2 writing paper and not evidence that either timed mock has been passed. Closing the machine-measured connected-composition stage does not prove A2 attainment or readiness, learner proof, independent review, standard setting, or complete external-sandhi mastery.

Chapter 259

Our and your-plural

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can distinguish one possessor from several and say our and your-plural in Sanskrit.
>
> *Complete chapter 259 by choosing and retrieving the singular and plural possessor forms in known noun frames.*

259.1 अस्माकम् (asmākam) — our, of us

Say मम गृहम् (*mama gṛham*), "my house". One person possesses the house. Keep मम ready.

You'll want to know: one possessor, then several

possessors	Sanskrit	meaning
one: me	मम (*mama*)	my, of me
several: us	अस्माकम् (*asmākam*)	our, of us

Say the new form slowly: *as-mā-kam*. The long **ā** holds the middle beat.

These are genitive forms: they answer "whose?" Sanskrit uses that relationship where English often uses a possessive word.

The word, taken apart — its roots and family

Whitney's *Sanskrit Grammar* §493 lists अस्माकम् as the genitive plural in the first-person paradigm. Historically, he explains it as a fixed case-form of an older adjective stem: the form is derived from *asmāka*.

The history is unusual; the job in the sentence is simple: अस्माकम् answers "of us / whose?" and stays fixed before the noun.
Source: William Dwight Whitney, *Sanskrit Grammar* (1889), §§493 and 516.

Your turn

Say these aloud:

- "my house" — *mama gṛham*
- "our house" — *asmākam gṛham*
- one possessor — *mama*; several possessors — *asmākam*

Before you move on

Several people point to one house and say "our house". Which first word do they use? (अस्माकम्, *asmākam.*)

259.2 युष्माकम् (yuṣmākam) — your, of you all

Say "our" (अस्माकम्, *asmākam*). Then recall the first word of तव नाम किम्? (*tava nāma kim?*): तव, "your" to one familiar person.

You'll want to know: one addressee, then several

people addressed	Sanskrit	meaning
one	तव (*tava*)	your, of you
several	युष्माकम् (*yuṣmākam*)	your, of you all

Say the new form slowly: *yuṣ-mā-kam.* The ending sounds like *asmākam*; the opening tells you that the possessors are the people being addressed.

Like *tava*, युष्माकम् is a genitive. It answers "whose?" for several people, and the noun it comes before does not have to change.

The word, taken apart — its roots and family

Whitney's *Sanskrit Grammar* §493 places युष्माकम् beside अस्माकम् as the second-person genitive plural. It too is historically a fixed case-form of an older adjective stem: the form is derived from

yuṣmāka. For use here, keep the functional contrast: तव addresses one person; युष्माकम् addresses several.
Source: William Dwight Whitney, *Sanskrit Grammar* (1889), §§493 and 516.

Your turn

Say these aloud:

- several speakers say "our house" — *asmākam gṛham*
- speaking to several people, "your house" — *yuṣmākam gṛham*
- one addressee — *tava*; several addressees — *yuṣmākam*

Before you move on

You speak to several people about their house. Which first word means "your, of you all"? (युष्माकम्, *yuṣmākam.*)

259.3 One possessor or several?

Give the three forms you can now retrieve directly: "my", "our", and "your, of you all". (*Mama; asmākam; yuṣmākam.*)

Grammar Lens: the choice

Choose by counting the possessors or addressees:

- one possessor speaking: मम (*mama*);
- several possessors speaking: अस्माकम् (*asmākam*);
- one familiar addressee: तव (*tava*);
- several addressees: युष्माकम् (*yuṣmākam*).

All four answer "whose?" In this paradigm they are fixed genitive forms, **not possessive adjectives** that you inflect to agree with the thing possessed. Whitney §493 records the older adjectival history of the two plural forms; that history does not change the learner's choice here.

Your turn — choose before you speak

Say these aloud:

- one speaker, one family: "my family" — *mama kuṭumbam*
- several speakers, one family: "our family" — *asmākam kuṭumbam*
- to one familiar person: "your house" — *tava gṛham*
- to several people: "your house" — *yuṣmākam gṛham*
- the rule — choose by whether the possessor or addressee is one or several

Before you move on

Without looking back, give "our family" and "your house" when you address several people. Then say why the first word changes. (*Asmākam kuṭumbam; yuṣmākam gṛham; the possessor or addressee is several, not one.*)

Chapter 260

Me and you as objects

Modes: **voice** (3) **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can say that someone sees me or one familiar person addressed.
>
> *Complete chapter 260 by choosing and producing the first- or second-person singular object in a known seeing frame.*

260.1 माम् (mām) — me, as the object

Say सः पश्यति (*saḥ paśyati*), "he sees". Keep the seeing verb. Now make the person seen be the speaker.

You'll want to know: माम्

माम् (*mām*) means "me" when I am the object of the action.

> सः माम् पश्यति।
>
> *saḥ mām paśyati.*
>
> **He sees me.**

The verb still says who does the seeing. माम् names the person the seeing reaches.

Whitney's *Sanskrit Grammar* §491 lists माम् as the independent accusative singular of the first-person pronoun. "Accusative" is the case label; "the object" is the job you can hear in this sentence.

The word, taken apart — its roots and family

As a grammatical form, माम् comes from the first-person pronoun paradigm; it is not a word from a separate lexical root. Whitney's *Sanskrit Grammar* §491 records it as the independent accusative singular. This lesson makes no deeper historical derivation claim. Source: Whitney, *Sanskrit Grammar* (1889), §491.

Your turn

Say these aloud:

- "me" as the object — *mām*
- "he sees me" — *saḥ mām paśyati*
- the person seen is the speaker — *mām*

Before you move on

Someone sees the speaker. Which one-word object do you use? (माम्, *mām*.)

260.2 त्वाम् (tvām) — you, one familiar person, as the object

Say "he sees me": सः माम् पश्यति (*saḥ mām paśyati*). Keep the frame and turn the object toward one familiar person.

You'll want to know: त्वाम्

त्वाम् (*tvām*) means "you" when one familiar addressee is the object.

सः त्वाम् पश्यति।

saḥ tvām paśyati.

He sees you.

The opening **tv-** also appears in familiar **tvam** and **tava**. Here the long **ā** and final **m** belong to the independent accusative singular. Whitney §491 places त्वाम् beside माम् in the first- and second-person paradigms.

The word, taken apart — its roots and family

As a grammatical form, त्वाम् comes from the second-person pronoun paradigm; it is not a word from a separate lexical root. Whitney's *Sanskrit Grammar* §491 records it as the independent accusative singular. This lesson makes no deeper historical derivation claim. Source: Whitney, *Sanskrit Grammar* (1889), §491.

Your turn

Say these aloud:

- "he sees me" — *saḥ mām paśyati*
- "he sees you" — *saḥ tvām paśyati*
- speaker as object — *mām*; one addressee as object — *tvām*

Before you move on

One familiar person is seen. Which object form addresses that person? (त्वाम्, *tvām.*)

260.3 Is the one person me or you?

Give the two singular objects: "me" and "you". (*Mām; tvām.*)

Grammar Lens: choose by person

There is one person in either sentence. Choose by who that person is:

- the speaker as object: माम् (*mām*);
- one familiar addressee as object: त्वाम् (*tvām*).

Both are independent full forms and both take the same place before पश्यति. The choice changes the person seen, not the verb.

Your turn

- *Say it:* "he sees me" — *saḥ mām paśyati*

- *Say it:* “he sees you” — *saḥ tvām paśyati*
- *Say it:* the rule — choose *mām* for the speaker, *tvām* for one familiar addressee
- *Contrast: mām; tvām; mām; tvām*

Before you move on

Say both sentences without looking back, then name what changes. (*Saḥ mām paśyati; saḥ tvām paśyati; the person used as the object changes.*)

Chapter 261

Us two and you two as objects

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can distinguish us two from you two when the pair is the object.
>
> *Complete chapter 261 by deciding whether an object pair includes the speaker and producing the matching dual form.*

261.1 आवाम् (āvām) — us two, as the object

Say माम्, "me". Then recall the Sanskrit number reserved for exactly two: the dual. Now make the object be the speaker and one other person.

You'll want to know: आवाम्

आवाम् (*āvām*) means "us two" as the object.

> सः आवाम् पश्यति।
>
> *saḥ āvām paśyati.*
>
> **He sees us two.**

Whitney §491 lists आवाम् as the independent dual form used for both subject and object. Here its position in the known frame makes the object job clear. Hold the first vowel long: *ā-vām*.

The word, taken apart — its roots and family

As a grammatical form, आवाम् comes from the first-person pronoun paradigm; it is not a word from a separate lexical root. Whitney's *Sanskrit Grammar* §491 records it as the independent dual used for both subject and object. This lesson makes no deeper historical derivation claim.
Source: Whitney, *Sanskrit Grammar* (1889), §491.

Your turn

Say these aloud:

- one speaker as object — *mām*
- the speaker plus one other as object — *āvām*
- "he sees us two" — *saḥ āvām paśyati*

Before you move on

The speaker and exactly one companion are seen. Which object form means "us two"? (आवाम्, *āvām*.)

261.2 युवाम् (yuvām) — you two, as the object

One familiar addressee as object is त्वाम् (*tvām*). The speaker plus one other is आवाम् (*āvām*). Turn the dual toward two addressees.

You'll want to know: युवाम्

युवाम् (*yuvām*) means "you two" as the object.

सः युवाम् पश्यति।

saḥ yuvām paśyati.

He sees you two.

Whitney §491 lists युवाम् beside आवाम्. Both are independent dual forms; the opening tells you whether the pair includes the speaker or consists of the two people addressed.

The word, taken apart — its roots and family

As a grammatical form, युवाम् comes from the second-person pronoun paradigm; it is not a word from a separate lexical root. Whitney's *Sanskrit Grammar* §491 records it as the independent dual used for both subject and object. This lesson makes no deeper historical derivation claim.
Source: Whitney, *Sanskrit Grammar* (1889), §491.

Your turn

Say these aloud:

- "he sees us two" — *saḥ āvām paśyati*
- "he sees you two" — *saḥ yuvām paśyati*
- our pair — *āvām*; your pair — *yuvām*

Before you move on

Exactly two familiar addressees are seen. Which object form do you use? (युवाम्, *yuvām.*)

261.3 Does the pair include the speaker?

Give "us two", then "you two". (*Āvām; yuvām.*)

Grammar Lens: choose the pair

Both forms point to exactly two people. Choose by whether the speaker belongs to the pair:

- speaker plus one other: आवाम् (*āvām*), "us two";
- two familiar addressees: युवाम् (*yuvām*), "you two".

That is the dual contrast. Count two first; then ask whether the speaker is inside the pair.

Your turn

- *Say it:* "he sees us two" — *saḥ āvām paśyati*
- *Say it:* "he sees you two" — *saḥ yuvām paśyati*
- *Contrast:* "me" then "us two" — *mām; āvām*
- *Contrast:* "you one" then "you two" — *tvām; yuvām*
- *Say it:* pair includes the speaker — *āvām*; pair is addressed — *yuvām*
- *Contrast: āvām; yuvām; āvām; yuvām*

Before you move on

Say both dual sentences, then say the deciding question. (*Saḥ āvām paśyati; saḥ yuvām paśyati; does the pair include the speaker?*)

Chapter 262

Us and you all as objects

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can choose first or second person and one, two, or several people for a known object frame.
>
> *Complete chapter 262 by retrieving all six independent first- and second-person objects from person-and-number cues.*

262.1 अस्मान् (asmān) — us, several people, as the object

"Us two" is आवाम् (*āvām*). "Our" for several possessors is अस्माकम् (*asmākam*). Keep the **asm-** opening and make several people the object.

You'll want to know: अस्मान्

अस्मान् (*asmān*) means "us" when several people including the speaker are the object.

> सः अस्मान् पश्यति।
>
> *saḥ asmān paśyati.*
>
> **He sees us.**

Whitney §491 lists अस्मान् as the independent accusative plural. Do not confuse it with अस्माकम्, "our / of us": **asmān** is a person reached by the action; **asmākam** answers "whose?".

The word, taken apart — its roots and family

As a grammatical form, अस्मान् comes from the first-person pronoun paradigm; it is not a word from a separate lexical root. Whitney's *Sanskrit Grammar* §491 records it as the independent accusative plural. This lesson makes no deeper historical derivation claim. Source: Whitney, *Sanskrit Grammar* (1889), §491.

Your turn

- *Say it:* "us two" as object — *āvām*
- *Say it:* "us, several people" as object — *asmān*
- *Say it:* "he sees us" — *saḥ asmān paśyati*
- *Contrast:* object *asmān*; possessor *asmākam*

Before you move on

Several people including the speaker are seen. Which object form means "us"? (अस्मान्, *asmān*.)

262.2 युष्मान् (yuṣmān) — you, several people, as the object

"Us, several people" is अस्मान् (*asmān*). "Your" to several people is युष्माकम् (*yuṣmākam*). Keep the **yuṣm-** opening and make the several addressees the object.

You'll want to know: युष्मान्

युष्मान् (*yuṣmān*) means "you" when several familiar addressees are the object.

सः युष्मान् पश्यति।

saḥ yuṣmān paśyati.

He sees you all.

Whitney §491 lists युष्मान् as the independent accusative plural. Keep it apart from युष्माकम्, "your / of you all": the first is an object and the second is a possessor.

The word, taken apart — its roots and family

As a grammatical form, युष्मान् comes from the second-person pronoun paradigm; it is not a word from a separate lexical root. Whitney's *Sanskrit Grammar* §491 records it as the independent accusative plural. This lesson makes no deeper historical derivation claim.
Source: Whitney, *Sanskrit Grammar* (1889), §491.

Your turn

- *Say it:* "he sees us" — *saḥ asmān paśyati*
- *Say it:* "he sees you all" — *saḥ yuṣmān paśyati*
- *Say it:* several people with the speaker — *asmān*; several addressees — *yuṣmān*
- *Contrast:* object *yuṣmān*; possessor *yuṣmākam*

Before you move on

Several familiar addressees are seen. Which object form means "you all"? (युष्मान्, *yuṣmān.*)

262.3 Who is seen, and how many?

Give the singular pair, then the dual pair, then the several-person pair. (*Mām, tvām; āvām, yuvām; asmān, yuṣmān.*)

Grammar Lens: person first, then number

Choose in two small steps.
First ask who the object is:

- first person includes the speaker;
- second person is the familiar person or people addressed.

Then count the people:

- one person: माम् / त्वाम् (*mām / tvām*);

- two people: आवाम् / युवाम् (*āvām / yuvām*);
- several people: अस्मान् / युष्मान् (*asmān / yuṣmān*).

The six are independent full forms. Choose person, choose number, then place the chosen object before the known verb.

Your turn

Say these aloud:

- first person, one — *mām*; first person, two — *āvām*; first person, several — *asmān*
- second person, one — *tvām*; second person, two — *yuvām*; second person, several — *yuṣmān*
- "he sees us two" — *saḥ āvām paśyati*
- "he sees you all" — *saḥ yuṣmān paśyati*

Before you move on

What are the two choices you make before selecting the object form? (Person: speaker included or addressee; then number: one, two, or several.)

262.4 One, two, or several — me/us or you

Say the decision aloud: person first, then number. Do not recite a table; answer each scene separately.

Your turn — choose before you speak

Say these aloud:

- the speaker alone is seen — *saḥ mām paśyati*
- one familiar addressee is seen — *saḥ tvām paśyati*
- the speaker and one companion are seen — *saḥ āvām paśyati*

- two familiar addressees are seen — *saḥ yuvām paśyati*
- several people including the speaker are seen — *saḥ asmān paśyati*
- several familiar addressees are seen — *saḥ yuṣmān paśyati*

Grammar Lens: the boundary of this chapter

These six are the independent full forms taught here. Classical Sanskrit also has short alternatives in particular positions, and it has third-person and respectful object forms. Those belong to later lessons. This set is **not the whole Classical Sanskrit pronoun system**; it is the complete first- and second-person full-form choice across one person, two people, and several people.
Source for the full and short forms: William Dwight Whitney, *Sanskrit Grammar* (1889), §491.

Before you move on

Without a table, answer six prompts: me, you one, us two, you two, us several, you several. (*Mām; tvām; āvām; yuvām; asmān; yuṣmān.*)

Chapter 263

I will go tomorrow

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can distinguish will go from I will go and say that I will go tomorrow.
>
> *Complete chapter 263 by producing a first-person future plan with a known time word.*

263.1 गमिष्यामि (gamiṣyāmi) — I will go

Close the last chapter with one quick choice: several people including the speaker are the object, so say अस्मान् (*asmān*). Now say गमिष्यति (*gamiṣyati*), "will go." That known form is the bridge to one new speaker form.

You'll want to know: गमिष्यामि

गमिष्यामि — *gamiṣyāmi* — means "I will go." Hear the long **-āmi** at the end. For now, learn the complete form as one usable promise.

The word, taken apart — its roots and family

गमिष्यामि comes from the root गम् (*gam*), "go," with the ordinary future formation **-इष्य-** (*-iṣya-*), and ends in first-person **-आमि** (*-āmi*). Whitney describes this Sanskrit s-future and its **-iṣya- / -sya-** formation in *Sanskrit Grammar* §§932–935. This lesson makes no claim beyond that transparent grammatical history.

Your turn

Say these aloud:

- "will go" — *gamiṣyati*
- "I will go" — *gamiṣyāmi*
- hear *gamiṣyāmi* and answer "I will go"

Before you move on

Without looking back, say "I will go." (गमिष्यामि.)

263.2 The speaker inside the future

Contrast गमिष्यति, "will go," with गमिष्यामि, "I will go."

Grammar Lens: first-person singular

In the complete form गमिष्यामि, the ending -आमि (*-āmi*) marks the speaker: "I." The future portion comes before it. This is a **first-person singular** ramp. Learn this whole form before extending the pattern.

Your turn

Say these aloud:

- another person "will go" — *gamiṣyati*
- the speaker says "I will go" — *gamiṣyāmi*
- name the ending that carries "I" — *-āmi*

Before you move on

Which complete taught form means "I will go," and which ending marks the speaker? (गमिष्यामि; -आमि.)

263.3 Who will go?

Listen for the ending before you translate.

Your turn

Say these aloud:

- "he will go" — *saḥ gamiṣyati*
- "I will go" — *ahaṃ gamiṣyāmi*
- teacher points away — *gamiṣyati*
- teacher points to you as speaker — *gamiṣyāmi*

Before you move on

Say the pair in order: "will go; I will go." (*Gamiṣyati; gamiṣyāmi.*)

263.4 Tomorrow, I will go

Recall the one word for "tomorrow." (श्वः, *śvaḥ.*)

Your turn

Put the known time word first, then choose the speaker form.

Say these aloud:

- "Tomorrow, I will go" — *śvaḥ gamiṣyāmi*
- "Tomorrow, he will go" — *śvaḥ saḥ gamiṣyati*
- change "he will go" to "I will go" — *gamiṣyāmi*

Before you move on

You have made a decision for tomorrow. Say only: "Tomorrow, I will go." (श्वः गमिष्यामि।)

Chapter 264

What I will do next

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can make a near-term first-person plan with three taught future forms.
>
> *Complete chapter 264 by independently choosing a time and a taught first-person future action.*

264.1 करिष्यामि (kariṣyāmi) — I will do

Say "I do," करोमि, then "I will go," गमिष्यामि.

You'll want to know: करिष्यामि

करिष्यामि — *kariṣyāmi* — means "I will do" or "I will make." Keep the whole future form together: करिष्यामि.

The word, taken apart — its roots and family

करिष्यामि comes from the root कृ (*kṛ*), "do, make," already met inside करोमि. The future stem appears as करिष्य- (*kariṣya-*), followed here by first-person -आमि. Whitney, *Sanskrit Grammar* §§932–935, describes the Sanskrit s-future and its **-iṣya- / -sya-** formation.

Your turn

Say these aloud:

- "I will do" — *kariṣyāmi*
- "Tomorrow, I will do the work" — *śvaḥ kāryaṃ kariṣyāmi*
- choose "I will go" — *gamiṣyāmi*; now "I will do" — *kariṣyāmi*

Before you move on

Say "I will do." (करिष्यामि.)

264.2 पठिष्यामि (paṭhiṣyāmi) — I will read

Retrieve "I will go" and "I will do." (*Gamiṣyāmi; kariṣyāmi.*)

You'll want to know: पठिष्यामि

पठिष्यामि — *paṭhiṣyāmi* — means "I will read" or "I will study." Learn the complete form; its future stem is given, not guessed.

The word, taken apart — its roots and family

पठिष्यामि comes from the root पठ् (*paṭh*), "read, recite." Its future here is पठिष्य- (*paṭhiṣya-*), followed by first-person **-आमि**. Whitney, *Sanskrit Grammar* §§932–935, describes the Sanskrit s-future and the **-iṣya- / -sya-** formation used here.

Your turn

Say these aloud:

- "I will read" — *paṭhiṣyāmi*
- "Tomorrow, I will read" — *śvaḥ paṭhiṣyāmi*
- "I will do; I will read" — *kariṣyāmi; paṭhiṣyāmi*

Before you move on

Say "I will read." (पठिष्यामि.)

264.3 A small plan: when, then what I will do

Recall tomorrow, the day after tomorrow, and the three complete forms "I will go," "I will do," and "I will read."

Grammar Lens: time first, plan second

Make a near-term plan in two small choices: choose श्वः (*śvaḥ*) or परश्वः (*paraśvaḥ*), then choose one complete first-person future form.

Your turn

Say these aloud:

- "Tomorrow, I will read" — *śvaḥ paṭhiṣyāmi*
- "The day after tomorrow, I will go" — *paraśvaḥ gamiṣyāmi*
- "Tomorrow, I will do the work" — *śvaḥ kāryaṃ kariṣyāmi*

Before you move on

What are the two choices in a small plan? (When; then what I will do.)

264.4 Three plans, no copied model

Keep the speaker ending in every answer: this round is all "I."

Your turn

There is no Sanskrit model to copy. Build each answer from the English cue.

Say these aloud:

- tomorrow + I will go — *śvaḥ gamiṣyāmi*
- tomorrow + I will read — *śvaḥ paṭhiṣyāmi*
- day after tomorrow + I will do the work — *paraśvaḥ kāryaṃ kariṣyāmi*

Before you move on

Give the three future forms only: I will go, I will do, I will read. (*Gamiṣyāmi; kariṣyāmi; paṭhiṣyāmi.*)

264.5 Say what you will do

This is a **first-person singular** checkpoint. Every answer tells your own near-term plan.

Your turn — independent retrieval

Say these aloud:

- You plan to travel tomorrow. Say when and what you will do. — *śvaḥ gamiṣyāmi*
- You plan to study tomorrow. Say when and what you will do. — *śvaḥ paṭhiṣyāmi*
- You plan to do the work the day after tomorrow. — *paraśvaḥ kāryaṃ kariṣyāmi*
- Choose a different one of the three actions and make your own tomorrow plan.

Grammar Lens: the boundary

These three complete forms make a useful first-person singular ramp. This is **not a complete future paradigm**. Second person, dual, and plural forms, and the future stems of other roots, wait for later lessons.

Before you move on

Without a model, say one true or imagined plan for tomorrow with गमिष्यामि, करिष्यामि, or पठिष्यामि.

Chapter 265

A gentle order at a meal

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can politely ask for a familiar food or drink in a restaurant.
>
> *Complete chapter 265 by independently choosing a familiar item and making a polite request.*

265.1 A meal in a familiar place

Say "armour," then contrast "my" with "our," and finish with "I will do." (*Kavacam; mama, asmākam; kariṣyāmi.*)

Grammar Lens: bring the meal words back

Nothing here is new. भोजनालयः (*bhojanālayaḥ*) is a restaurant; भोजनम् (*bhojanam*) is a meal or food. You already know खादति (*khādati*), "eats," along with अन्नम् (*annam*), food, पानीयम् (*pānīyam*), water, and क्षीरम् (*kṣīram*), milk.

Your turn

- *Say it:* "restaurant" — *bhojanālayaḥ*
- *Say it:* "meal" — *bhojanam*
- *Say it:* "eats food" — *annaṃ khādati*
- *Contrast:* water, then milk — *pānīyam; kṣīram*

Before you move on

Say "restaurant" and "meal." (भोजनालयः; भोजनम्.)

265.2 ददातु (dadātu) — please give

Say "flag," then "me" as an object, then "I will read."
(*Dhvajaḥ; mām; paṭhiṣyāmi.*)

Grammar Lens: one useful request form

You know ददाति (*dadāti*), "he or she gives." For a gentle request, use the complete form ददातु (*dadātu*): "let him or her give," or in this exchange, "please give."

> पानीयम् ददातु।
>
> *Pānīyaṃ dadātu.*
>
> Please give water.

Here ददातु is the **third-person singular imperative**. Whitney, *Sanskrit Grammar* §§617 and 668–669, records the present imperative and this reduplicating root. Keep the whole form together. This is **not a complete imperative paradigm**: other persons, numbers, and roots wait for later.

Your turn

- *Contrast:* gives; please give — *dadāti; dadātu*
- *Say it:* "Please give water" — *pānīyaṃ dadātu*
- *Say it:* the request form once more — *dadātu*

Before you move on

Change ददाति, "gives," into the one taught request form. (ददातु.)

265.3 Give me one familiar item

Say "drum," then "you" as one object, then make one plan for tomorrow. (*Paṭahaḥ; tvām; śvaḥ* plus a taught first-person future form.)

Grammar Lens: receiver, item, request

Build the request in three small pieces:

मह्यम् + familiar item + ददातु

to me + item + please give

So मह्यम् पानीयं ददातु (*mahyaṃ pānīyaṃ dadātu*) asks, "Please give me water." The item changes; the frame stays still.

Your turn

Say these aloud:

- "Give me food" — *mahyaṃ annaṃ dadātu*
- "Give me water" — *mahyaṃ pānīyaṃ dadātu*
- "Give me milk" — *mahyaṃ kṣīraṃ dadātu*

Before you move on

What are the three pieces? (Receiver मह्यम्, a familiar item, then ददातु.)

265.4 Name the meal or make the order

Say "treasury," then explain the choice between माम् and त्वाम्: is the one person used as object the speaker or the addressee?

Grammar Lens: name or request

भोजनम् names a meal. It does not itself order anything. Put the courtesy word before the frame when you make the request:

कृपया मह्यम् अन्नं ददातु।

Kṛpayā mahyam annaṃ dadātu.

Please give me food.

Your turn

Say these aloud:

- name a meal — *bhojanam*
- "Please give me water" — *kṛpayā mahyaṃ pānīyaṃ dadātu*
- "Please give me milk" — *kṣīraṃ dadātu*

Before you move on

Add the courtesy word to one complete request of your choice.

265.5 Choose and order

Say "treasure," then say the independent object form for "us two." (*Nidhiḥ; āvām.*)

Your turn — independent choice

No Sanskrit model is shown before you answer. Build each request from meaning.

Say these aloud:

- In a restaurant, politely ask for water.
- Politely ask for milk.
- Politely ask for food.
- Name the place, name the meal, then say that someone eats food.

What you've built

Possible answers are कृपया मह्यं पानीयं ददातु, कृपया मह्यं क्षीरं ददातु, and कृपया मह्यम् अन्नं ददातु. The place is भोजनालयः; the meal is भोजनम्; "eats food" is अन्नं खादति.

Before you move on

Choose a different item from your last answer and order it again.

265.6 Make the order yourself

Say "rupee," then say the independent object form for "you two." (*Rūpyakam; yuvām.*)

Your turn — final retrieval

No Sanskrit model is shown before you answer. Imagine you are in a भोजनालयः. Choose अन्नम्, पानीयम्, or क्षीरम्, and make the complete polite request from memory.

Now choose a second item and make a different request.

Finally, name the meal and say that someone eats food.

What you've built

Your request should contain कृपया, मह्यम्, the chosen item, and ददातु. For example, after answering: कृपया मह्यं पानीयं ददातु is the track's water request. It preserves the chapter-24 distinction between जलम्, water as a substance, and पानीयम्, a drink offered to someone. भोजनम्; अन्नं खादति completes the last prompt.

Grammar Lens: the boundary

This chapter gives you one useful request with familiar items. It is **not a complete imperative paradigm**, a complete restaurant vocabulary, or evidence that every possible meal exchange is covered.

Before you move on

Without looking back, make one final polite order for a familiar food or drink.

Chapter 266

A small market exchange

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can choose a familiar item, ask its price, request it, and close politely.
>
> *Complete chapter 266 by independently choosing a familiar item and completing a small market transaction.*

266.1 Bring the market words back together

Say "a stake," then choose the correct two-person object form, then say the request form "please give." (*Paṇaḥ; the taught dual object form; dadātu.*)

Your turn

- *Recall:* buys; sells — *krīṇāti; vikrīṇāti*
- *Recall:* money; a price; valuable — धनम्; मूल्यम्; मूल्यवान् — *dhanam; mūlyam; mūlyavān*
- *Recall:* a shop; a market — आपणः; विपणिः — *āpaṇaḥ; vipaṇiḥ*
- *Recall:* goods for sale; a shopkeeper — पण्यम्; आपणिकः — *paṇyam; āpaṇikaḥ*
- *Recall:* a rupee — *rūpyakam*

What you've built

You already own the people, places, actions, and value words. The next step is to make them carry one whole exchange.

Before you move on

Say four pieces without looking: buys, a price, a shop, a shopkeeper. (*Krīṇāti; mūlyam; āpaṇaḥ; āpaṇikaḥ.*)

266.2 क्रीणामि (krīṇāmi) — I buy

Say "a fee," then "us" as an object, then make one complete polite request for a familiar item. (*Śulkam; asmān; the frame ending in dadātu.*)

Grammar Lens: the buyer speaks

You know क्रीणाति (*krīṇāti*), "he or she buys." When the buyer speaks for themselves, keep the whole new form together:

अहं फलं क्रीणामि।

Ahaṃ phalaṃ krīṇāmi.

I buy fruit.

Here क्रीणामि is the **first-person singular present**. The final **-मि** (*-mi*) points to the speaker, as it does in forms you already know. Both checked-in A1 mocks use this complete form. This is **not a complete present paradigm**: the other persons, numbers, and class-nine forms wait for later.

Your turn

- *Contrast:* buys; I buy — *krīṇāti; krīṇāmi*
- *Say it:* "I buy fruit" — *ahaṃ phalaṃ krīṇāmi*
- *Say it:* the buyer form once more — *krīṇāmi*

Before you move on

Change क्रीणाति, "buys," into the one taught speaker form. (क्रीणामि.)

266.3 Ask the price and hear the answer

Say "news," then "you two" as an object. (*Vārtā; yuṣmān.*)

Grammar Lens: one price turn

Put two known words together to ask the question used in the A1 mocks:

> मूल्यं कियत्?
>
> *Mūlyaṃ kiyat?*
>
> How much is the price?

One short answer is:

> विंशतिः रूप्यकाणि।
>
> *Viṃśatiḥ rūpyakāṇi.*
>
> Twenty rupees.

You already know रूप्यकम्, one rupee. Keep रूप्यकाणि together inside this useful price answer. This small exchange does not teach the complete neuter plural system or every way to state a price.

Your turn

Say these aloud:

- ask the price — *mūlyaṃ kiyat?*
- answer "twenty rupees" — *viṃśatiḥ rūpyakāṇi*
- the question and answer as one turn

Before you move on

Ask one price, then answer with twenty rupees.

266.4 Complete one small transaction

Say "a drama," then explain how the taught object forms change for person and number. (*Nāṭakam; use the object-person-and-number contrast.*)

Your turn: five turns

Build the exchange one complete turn at a time:

1. अहं फलं क्रीणामि। — *Ahaṃ phalaṃ krīṇāmi.* — I buy fruit.
2. मूल्यं कियत्? — *Mūlyaṃ kiyat?* — How much is the price?
3. विंशतिः रूप्यकाणि। — *Viṃśatiḥ rūpyakāṇi.* — Twenty rupees.
4. कृपया मह्यं फलं ददातु। — *Kṛpayā mahyaṃ phalaṃ dadātu.* — Please give me fruit.
5. धन्यवादः। — *Dhanyavādaḥ.* — Thank you.

Say the five turns once without breaking the exchange apart.

What you've built

The vocabulary was already yours. Now it carries one complete A1 transaction.

Before you move on

Name the five jobs in order: choose and buy, ask the price, hear the price, request the item, close politely.

266.5 Choose and complete the exchange

Say "a poem." (*Kāvyam.*)

Your turn: independent round one

No Sanskrit model is shown before you answer.

You are speaking to a shopkeeper at a market. Choose one familiar item. Say that you buy it. Ask the price. The shopkeeper says that the price is twenty rupees. Request the item politely, then close with thanks.

What you've built: check after speaking

One complete answer with fruit is अहं फलं क्रीणामि। मूल्यं कियत्? विंशतिः रूप्यकाणि। कृपया मह्यं फलं ददातु। धन्यवादः। Your item may differ; the five jobs must remain.

Before you move on

Which two new pieces held the old vocabulary together? (The buyer form क्रीणामि and the price-exchange pattern.)

266.6 Retrieve the whole market transaction

Say "a film," then "I will go." (*Citrapaṭaḥ; gamiṣyāmi.*)

Your turn: independent round two

No Sanskrit model is shown before you answer.

Choose a shop or market and a different familiar item. Say that you buy it. Ask its price. The shopkeeper says that the price is twenty rupees. Request the item politely and close with thanks.

What you've built: check after speaking

A complete answer still has five jobs: say what you buy; ask the price; hear the rupee amount; request the item; thank the shopkeeper. Your chosen item may differ from the first round.

Before you move on

You can now complete one small A1 market exchange with familiar language. This is **not** complete commerce, currency, bargaining, consumer-rights, or present paradigm coverage, and it is not evidence of exam readiness or learner success.

Chapter 267

One small school-day plan

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can ask when an exam will be and state a short homework and study plan.
>
> *Complete chapter 267 by independently asking and answering an exam-time question and stating two schoolwork plans.*

267.1 The school words are already yours

Say "a game," then state the cue carried by the complete first-person future forms, then say "I buy." (*Khelā; the taught first-person-singular future cue; krīṇāmi.*)

Your turn

- *Recall:* विद्यालयः; छात्रः; अध्यापकः — *vidyālayaḥ; chātraḥ; adhyāpakaḥ* — school; student; teacher
- *Recall:* पाठः; परीक्षा — *pāṭhaḥ; parīkṣā* — lesson; exam
- *Recall:* समयसारणी; कक्षा — *samayasāraṇī; kakṣā* — timetable; classroom
- *Recall:* अंकः — *aṅkaḥ* — a mark or number
- *Recall:* गृहकार्यम्; उत्तरम् — *gṛhakāryam; uttaram* — homework; answer

What you've built

The institution, its people, the timetable, the classroom, and the assessment words were already in the book. This chapter makes them carry one small plan.

Before you move on

Say five pieces without looking: school, exam, timetable, classroom, and mark.

267.2 Build one bounded school plan

Ask the familiar market question and give its short rupee answer. (*Mūlyaṃ kiyat? Viṃśatiḥ rūpyakāṇi.*)

Grammar Lens: four complete turns

Put four known pieces together:

परीक्षा कदा भविष्यति?

Parīkṣā kadā bhaviṣyati?

When will the exam be?

Answer from the smallest possible timetable:

श्वः परीक्षा भविष्यति।

Śvaḥ parīkṣā bhaviṣyati.

The exam will be tomorrow.

This is one useful school-time pattern. It does not teach a new future paradigm or a complete timetable system. Complete the bounded plan with two whole schoolwork frames:

गृहकार्यं करिष्यामि।

Gṛhakāryaṃ kariṣyāmi.

I will do the homework.

पाठं पठिष्यामि।

Pāṭhaṃ paṭhiṣyāmi.

I will read or study the lesson.

Own those two lines as complete frames. In particular, पाठं belongs to the whole second frame here; do not use it to infer a masculine accusative rule.

Your turn

Say these aloud:

- ask when the exam will be
- answer that it will be tomorrow
- the complete homework frame
- the complete study frame

Before you move on

Ask and answer the exam-time turn, then say both complete schoolwork frames from memory.

267.3 Retrieve your homework and study plan

Say "a lesson," then "homework." (*Pāṭhaḥ; gṛhakāryam.*)

Grammar Lens: two complete owned frames

Retrieve the two whole frames introduced in the preceding lesson:

गृहकार्यं करिष्यामि।

Gṛhakāryaṃ kariṣyāmi.

I will do the homework.

पाठं पठिष्यामि।

Pāṭhaṃ paṭhiṣyāmi.

I will read or study the lesson.

The school-plan atom owns both complete lines. This lesson does not derive पाठं from पाठः, generalise a masculine accusative rule, or add a new future form.

Your turn

Say these aloud:

- "I will do the homework"
- "I will study the lesson"
- both plans after the exam-time answer

Before you move on

State the homework plan and the study plan without looking.

267.4 Join the pieces into one school-day plan

Say "a fort," then "I will do." (*Durgam; kariṣyāmi.*)

Your turn

First name the setting and its useful records: विद्यालयः, school; कक्षा, classroom; समयसारणी, timetable; अंकः, mark; उत्तरम्, answer. Name the people: छात्रः, student; अध्यापकः, teacher.

Then say the working plan:

1. परीक्षा कदा भविष्यति? — When will the exam be?
2. श्वः परीक्षा भविष्यति। — The exam will be tomorrow.
3. गृहकार्यं करिष्यामि। — I will do the homework.
4. पाठं पठिष्यामि। — I will study the lesson.

What you've built

The nouns were already yours. Now a timetable question, answer, and two plans hold them together without adding a new paradigm.

Before you move on

Say the question, the answer, the homework plan, and the study plan.

267.5 Independent school plan: round one

Say "a palace," then "I will read or study." (*Prāsādaḥ; paṭhiṣyāmi.*)

Your turn: answer before the check

No Sanskrit model is shown before you answer.

You are a student reading a school timetable. Ask when the exam will be. Answer that it will be tomorrow. State that you will do the homework and study the lesson. Then name the teacher, classroom, mark, and answer words that belong to this school setting.

What you've built: check after speaking

A complete response has four connected turns and the setting words. One check is परीक्षा कदा भविष्यति? श्वः परीक्षा भविष्यति। गृहकार्यं करिष्यामि। पाठं पठिष्यामि। Then recall विद्यालयः, छात्रः, अध्यापकः, समयसारणी, कक्षा, अंकः, उत्तरम्.

Before you move on

What held the old school words together? (One timetable question, its answer, and two first-person plans.)

267.6 Independent school plan: round two

Say "a hut," then make one familiar near-term first-person plan. (*Kuṭīram; use the taught śvaḥ/paraśvaḥ plan frame.*)

Your turn: a fresh prompt

No Sanskrit model is shown before you answer.

Imagine that a teacher points to the timetable in a classroom. Ask when the exam will be and answer that it will be tomorrow. Say what homework you will do and what lesson you will study. Finish by recalling the school, student, teacher, mark, and answer words.

What you've built: boundary

You can now complete one small A1 school-day plan with familiar language. This is **not** complete classroom discourse, school-system, grading, educational rights, or future-paradigm coverage, and it is not evidence of exam readiness, human validation, or learner success.

Before you move on

Name the four jobs: read the timetable, ask and answer the exam time, state the homework plan, and state the study plan.

Chapter 268

Four services on one small map

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can ask where four familiar public services are and answer here or there.
>
> *Complete chapter 268 by independently asking and answering where four familiar service referents are.*

268.1 Three service words are already yours

Say "here," "there," "where?", and "is." (*Atra; tatra; kutra; asti.*)

Your turn

- *Recall:* पत्रालयः — *patrālayaḥ* — a post office
- *Recall:* चिकित्सालयः — *cikitsālayaḥ* — a hospital
- *Recall:* आरक्षकः — *ārakṣakaḥ* — a policeman

What you've built

The post, health, and police referents were already in the book. You also already know how to ask where something is. One missing service word comes next.

Before you move on

Say the three service words again without looking.

268.2 वित्तकोषः (vittakoṣaḥ) — a financial bank

Recall the Sanskrit for a riverbank, then the post office, hospital, and policeman. (*Tīram; patrālayaḥ; cikitsālayaḥ; ārakṣakaḥ.*)

You'll want to know: वित्तकोषः

वित्तकोषः — *vittakoṣaḥ* — "a financial bank." This is the institution that handles money, **not the riverbank तीरम्** that you already know.

The modern financial sense is explicitly attested in the Kosha Sanskrit Today "Places — Bank" glossary and in the Sanskrit Documents combined dictionary. This lesson teaches only that sourced financial-institution sense.

The word, taken apart — its roots and family

वित्तकोषः is transparently formed from वित्त, "wealth, money," and कोष, "treasury, store." The compound names the financial institution; it does not change the older water-edge meaning of तीरम्.

Your turn

- *Say it:* वित्तकोषः — a financial bank
- *Contrast:* वित्तकोषः — financial bank; तीरम् — riverbank

Before you move on

What is the sourced word in this lesson for a financial bank?

268.3 One small four-service location exchange

Say "financial bank," then "here," "there," "where?", and "is."

You'll want to know: four complete turns

Keep the familiar question frame whole and change only its first word:

- पत्रालयः कुत्र अस्ति? पत्रालयः तत्र अस्ति। — Where is the post office? The post office is there.
- चिकित्सालयः कुत्र अस्ति? चिकित्सालयः अत्र अस्ति। — Where is the hospital? The hospital is here.
- वित्तकोषः कुत्र अस्ति? वित्तकोषः तत्र अस्ति। — Where is the financial bank? The financial bank is there.
- आरक्षकः कुत्र अस्ति? आरक्षकः अत्र अस्ति। — Where is the policeman? The policeman is here.

These four complete turns are the whole pattern. Do not use them to infer a new declension or a broader directions system.

Your turn

Ask where the post office is and answer "there." Then ask where the hospital is and answer "here."

Before you move on

What stays fixed in all four questions? (*Kutra asti?*)

268.4 The second pair, from memory

Say "financial bank" and "policeman."

Your turn

- *Ask and answer:* Where is the financial bank? The financial bank is there.
- *Ask and answer:* Where is the policeman? The policeman is here.

Check only after speaking: वित्तकोषः कुत्र अस्ति? वित्तकोषः तत्र अस्ति। आरक्षकः कुत्र अस्ति? आरक्षकः अत्र अस्ति।

What you've built

You have now retrieved both halves of the four-service exchange. Nothing here adds directions, a police station, or a service transaction.

Before you move on

Ask the two questions once more, without looking.

268.5 Independent service locations: round one

Recall the four small location pieces: here, there, where, is.

Your turn: one small map

No Sanskrit model is shown before you answer.

Ask where each of these is: the post office, hospital, financial bank, and policeman. Answer "there" for the post office and bank, and "here" for the hospital and policeman.

What you've built: boundary

You can complete one small four-service location round. You have not yet learned directions, transactions, emergency requests, or institutional systems.

Before you move on

Name the four referents again without looking.

268.6 Independent service locations: round two

Contrast the financial bank with the riverbank one last time.

Your turn: a fresh arrangement

No Sanskrit model is shown before you answer.

Ask where each of the same four referents is. This time answer "here" for the post office and financial bank, and "there" for the hospital and policeman.

What you've built: boundary

You can retrieve four service referents and one bounded location exchange. This is not evidence of directions, postal or banking transactions, medical or emergency communication, police-station vocabulary, human validation, learner success, or exam readiness.

Before you move on

Name the four services, then name the one exchange you can now complete with each.

Chapter 269

Six communication words, gently joined

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can retrieve six familiar media and communication words from meaning.
>
> *Complete chapter 269 by independently retrieving six media and communication meanings a second time.*

269.1 Four communication words are already yours

Say the Sanskrit for a newspaper or magazine, then a telephone.

Your turn

- *Recall:* पत्रिका — *patrikā* — a newspaper or magazine
- *Recall:* दूरभाषः — *dūrabhāṣaḥ* — a telephone
- *Recall:* दूरदर्शनम् — *dūradarśanam* — a television
- *Recall:* लेखः — *lekhaḥ* — a letter or article

What you've built

These four meanings were already in the book. Radio and internet are the two missing members of this small lexical field.

Before you move on

Say the four familiar words again without looking.

269.2 आकाशवाणी (ākāśavāṇī) — radio

Recall the four familiar words from the previous lesson.

You'll want to know: आकाशवाणी

आकाशवाणी — *ākāśavāṇī* — "radio." The Kosha Sanskrit Today radio entry explicitly attests this modern use. This tranche teaches **only the modern radio meaning**. It does not ask you to generalise from the word's older "voice from the sky" sense.

The word, taken apart — its roots and family

The cited entry attests the whole modern term but does not document who coined it or when, so its **origin remains unknown** here. For memory only, the written form visibly contains आकाश, "sky," and वाणी, "voice." The one meaning to retrieve is "radio."

Your turn

- *Say it:* आकाशवाणी — radio
- *Contrast:* आकाशवाणी — radio; दूरभाषः — telephone

Before you move on

What is the sourced modern radio word in this lesson?

269.3 अन्तर्जालम् (antarjālam) — the internet

Say the new radio word once from memory.

You'll want to know: अन्तर्जालम्

अन्तर्जालम् — *antarjālam* — "the internet." The modern computing term is explicitly attested in the Kosha Sanskrit Today internet entry and its Computer — Internet glossary. This lesson owns only that sourced modern meaning.

The word, taken apart — its roots and family

The cited entries attest the whole modern term but do not document who coined it or when, so its **origin remains unknown** here. For memory only, the written form visibly contains अन्तर्, "between" or "inter-," and जाल, "net." That "inter-net" shape is not a lesson in using the internet.

Your turn

- *Say it:* अन्तर्जालम् — the internet
- *Contrast:* आकाशवाणी — radio; अन्तर्जालम् — internet

Before you move on

Say the internet word once more without looking.

269.4 Six words, one small field

Say "radio," then "internet."

Your turn

Retrieve each word before checking:

- press: पत्रिका — *patrikā*
- telephone: दूरभाषः — *dūrabhāṣaḥ*
- radio: आकाशवाणी — *ākāśavāṇī*
- television: दूरदर्शनम् — *dūradarśanam*
- internet: अन्तर्जालम् — *antarjālam*
- letter or article: लेखः — *lekhaḥ*

What you've built

You can now distinguish six meanings in one compact lexical field. This is word retrieval, not evidence that you can use devices, follow news, write correspondence, broadcast, or navigate online.

Before you move on

Which two words were new in this chapter?

269.5 Independent media words: round one

Recall which two meanings entered in this chapter.

Your turn: six English cues

No Sanskrit model is shown before you answer.

Say the Sanskrit for these six meanings, in order: press, telephone, radio, television, internet, and a letter or article.

What you've built: boundary

You have completed one independent six-word retrieval. That does not yet show device use, news comprehension, correspondence, broadcasting, internet navigation, or digital literacy.

Before you move on

Retrieve radio and internet once more.

269.6 Independent media words: round two

Recall the two written-media meanings: press, then a letter or article.

Your turn: a fresh order

No Sanskrit model is shown before you answer.

Say the Sanskrit for these meanings in a new order: internet, a letter or article, television, press, radio, and telephone.

What you've built: boundary

You can retrieve six media and communication meanings twice without a visible model. This closes one editorial inventory point. It is not evidence of device use, news comprehension, correspondence, broadcasting, online navigation, digital literacy, human validation, learner attainment, or exam readiness.

Before you move on

Name the six meanings that belong to this bounded field.

Chapter 270

Two modern-technology words, retrieved twice

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can retrieve the familiar words for computer and internet from meaning.
>
> *Complete chapter 270 by independently retrieving internet and computer in a second order.*

270.1 Two modern-technology words: round one

Prepare to retrieve two familiar nouns from their English meanings.

Your turn: independent retrieval

No Sanskrit model is shown before you answer.

Say the Sanskrit for these meanings, in order: a computer, then the internet.

What you've built: check after answering

Now check: संगणकम् (*saṅgaṇakam*) is "a computer," and अन्तर्जालम् (*antarjālam*) is "the internet."

Before you move on

You have completed one two-word retrieval. It shows recall of two nouns, not a claim about using either technology.

270.2 Two modern-technology words: round two

Prepare to retrieve the same two meanings in a fresh order.

Your turn: independent retrieval in a fresh order

No Sanskrit model is shown before you answer.

Say the Sanskrit for these meanings in the reverse order: the internet, then a computer.

What you've built: check after answering

Now check: अन्तर्जालम् (*antarjālam*) is "the internet," and संगणकम् (*saṅgaṇakam*) is "a computer."

Before you move on

You can retrieve two modern-technology nouns twice without a visible model. This is not evidence of device use, internet navigation, digital literacy, technological competence, human validation, learner attainment, or exam readiness.

Chapter 271

Two spoken requests, gently joined

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can retrieve one person request and one quiet request from meaning.
>
> *Complete chapter 271 by independently retrieving both spoken requests a second time.*

271.1 Ask for a familiar person

Recall four known pieces: अध्यापकः, "teacher"; अत्र, "here"; अस्ति, "is"; and आम्, "yes."

Grammar Lens: build the person request

At a doorway or on a call, put the familiar person first and ask whether that person is here. The question mark and rising question voice turn the known statement into a bounded availability question. Then answer by echoing the statement, as chapter 1 taught:

> अध्यापकः अत्र अस्ति?
>
> *adhyāpakaḥ atra asti?*
>
> "Is the teacher here?"
>
> आम्, अध्यापकः अत्र अस्ति।
>
> *ām, adhyāpakaḥ atra asti.*

"Yes, the teacher is here."

Nothing in this exchange is a new word. The new skill is the complete doorway/telephone turn: asking whether a familiar person is present and giving the positive response. It does not claim a general polar-question system.

Your turn

You call the school and need to speak with the teacher. Ask, "Is the teacher here?" Then give the positive answer, "Yes, the teacher is here."

What you've built

अध्यापकः अत्र अस्ति? — आम्, अध्यापकः अत्र अस्ति। (*adhyāpakaḥ atra asti? — ām, adhyāpakaḥ atra asti.*) is one bounded way to ask for a familiar person and respond. It does not establish a general service-counter or telephone script.

Before you move on

Ask and answer: "Is the teacher here?" — "Yes, the teacher is here."

271.2 कृपया तूष्णीं भव — please be quiet

Recall कृपया, "please," and the complete person request from the previous lesson.

You'll want to know: कृपया तूष्णीं भव

कृपया तूष्णीं भव।

kṛpayā tūṣṇīṃ bhava.

"Please be quiet."

The Board of School Education Haryana copy of the NCERT Class 10 *Śemuṣī* Sanskrit reader uses the exact command तूष्णीं भव. The grammatical commentary on Pāṇini 3.4.63 also explicitly treats तूष्णीम् with √भू. The कृपया at the front is the "please" you already know. The sources attest the

command तूष्णीं भव and its construction; the full polite request transparently combines that command with already-owned कृपया.

Grammar Lens: one complete request

This lesson owns the complete familiar-person request. It does not teach the imperative paradigm, and it does not license you to manufacture other command forms from भव.

Your turn

A familiar person is speaking while you need silence. Ask politely: "Please be quiet."

Before you move on

What is the complete composed request for "Please be quiet"?

271.3 Two spoken requests: round one

Prepare to retrieve two complete spoken turns from meaning.

Your turn: independent retrieval

No Sanskrit model is shown before you answer.

Say the Sanskrit for these two acts, in order. First ask, "Is the teacher here?" and give the positive answer, "Yes, the teacher is here." Then ask a familiar person, "Please be quiet."

What you've built: check after answering

Now check: अध्यापकः अत्र अस्ति? — आम्, अध्यापकः अत्र अस्ति। (*adhyāpakaḥ atra asti? — ām, adhyāpakaḥ atra asti.*) asks whether the teacher is here and gives the positive response. कृपया तूष्णीं भव। (*kṛpayā tūṣṇīṃ bhava.*) asks a familiar person, politely, to be quiet.

Before you move on

You have retrieved two bounded turns once without a visible model. That is not a claim of general command formation or conversation-wide ability.

271.4 Two spoken requests: round two

Prepare to retrieve the same two turns in a fresh order.

Your turn: independent retrieval in a fresh order

No Sanskrit model is shown before you answer.

Say the Sanskrit for these two acts in reverse order. First: "Please be quiet." Then ask, "Is the teacher here?" and give the positive answer, "Yes, the teacher is here."

What you've built: check after answering

Now check: कृपया तूष्णीं भव। (*kṛpayā tūṣṇīṃ bhava.*) is the quiet request. अध्यापकः अत्र अस्ति? — आम्, अध्यापकः अत्र अस्ति। (*adhyāpakaḥ atra asti? — ām, adhyāpakaḥ atra asti.*) is the person request and positive response.

Before you move on

You can retrieve these two bounded spoken acts twice without a visible model. This is not evidence of general imperative mastery, conversational competence, human validation, learner attainment, or exam readiness.

Chapter 272

One condolence, held as a whole

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can offer one attested condolence to bereaved family members.
>
> *Complete chapter 272 by independently retrieving the bounded condolence a second time.*

272.1 One condolence, held as a whole

Recall मम, "my"; दुःखम्, "sorrow"; शोकः, "grief"; म्रियते, "dies"; and दया, "compassion." These known words prepare the meaning. They are not yet a condolence you can say to somebody.

You'll want to know: one attested condolence

मम संवेदनाः शोकसन्तप्त-परिजनैः सह सन्ति।

mama saṃvedanāḥ śokasantapta-parijanaiḥ saha santi.

"My condolences are with the bereaved family members."

A contemporary Sanskrit report from *Hindusthān Samācār* quotes the same complete sentence, including the editorial hyphen inside शोकसन्तप्त-परिजनैः. The report types an ASCII colon after परिजनै; the lesson normalizes that one character to the Devanagari visarga ः shown above. All India Radio Sanskrit bulletins independently use plural शोकसंवेदनाः for condolences

directed to bereaved families. The sentence here is therefore attested contemporary Sanskrit, not a translation silently built from an English formula.

Grammar Lens: keep the formula whole

Hear the sentence in three meaning-chunks:

- मम संवेदनाः — "my condolences"
- शोकसन्तप्त-परिजनैः सह — "with the bereaved family members"
- सन्ति — "are"

For now, keep these chunks together as one whole social formula. This lesson does not teach the instrumental plural or license new sentences from its pieces.
The linked report also says तस्मै विनम्र-श्रद्धाञ्जलिः, a respectful tribute directed to the person who died. That is a different act. The sentence you are learning offers a condolence to the bereaved family; it is not a tribute to the person who died.

Your turn

A family has lost somebody close. Address the bereaved family members and say the complete condolence slowly once.

Before you move on

Say, "My condolences are with the bereaved family members." Keep the attested sentence whole.

272.2 Offer the condolence: round one

> Prepare to retrieve the complete sentence from its social purpose.

Your turn: independent retrieval

No Sanskrit model is shown before you answer.

A neighbour has lost a close relative. You are speaking to the bereaved family members, not paying tribute to the person who died. Say the Sanskrit for "My condolences are with the bereaved family members."

What you've built: check after answering

Now check: मम संवेदनाः शोकसन्तप्त-परिजनैः सह सन्ति। (*mama saṃvedanāḥ śokasantapta-parijanaiḥ saha santi.*)

Before you move on

You have retrieved one bounded condolence once without a visible model. This is not a claim of a wider condolence repertoire or general social competence.

272.3 Offer the condolence: round two

Retrieve the same social formula in a different setting.

Your turn: independent retrieval in a fresh context

No Sanskrit model is shown before you answer.

At a memorial gathering, you turn from remembering the person who died to address the bereaved family members directly. Say the Sanskrit for "My condolences are with the bereaved family members."

What you've built: check after answering

Now check: मम संवेदनाः शोकसन्तप्त-परिजनैः सह सन्ति। (*mama saṃvedanāḥ śokasantapta-parijanaiḥ saha santi.*)

Before you move on

You can retrieve this one attested condolence twice without a visible model. That is not evidence of general social competence, human validation, learner attainment, or exam readiness.

Chapter 273

One reflexive relation, held as a whole

Modes: **voice** (2) **eyes** (1) **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can say one attested sentence in which the object points back to the first-person subject.
>
> *Complete chapter 273 by independently retrieving the bounded reflexive sentence a second time.*

273.1 One reflexive relation, held as a whole

Recall the known आत्मा, "the self" or "the soul." Today that known word helps you hear who an object points back to inside one sentence.

You'll want to know: one complete attested sentence

अहमेव स्वात्मानं न वेद्मि।

ahameva svātmānaṃ na vedmi.

"I myself do not know my own self."

This complete attested sentence appears in Central Sanskrit University's *Ādhunika Saṃskṛta Sāhitya Pustakālaya.* The lesson preserves the source sentence rather than silently composing a new Sanskrit line from the English meaning.

Grammar Lens: notice one relation

In this one whole line, the speaker is "I." The form स्वात्मानम् is the object and points back to the first-person subject: the speaker does not know the speaker's own self.
Keep the complete sentence together. This lesson does not teach every reflexive form, the middle voice, or a productive method for building new case forms or sandhi combinations.

Your turn

Read the sentence once slowly. Then say it as one admission: "I myself do not know my own self."

Before you move on

Say the complete line once more. Keep the object-to-speaker relation inside this attested sentence.

273.2 Retrieve the reflexive sentence: round one

Prepare to retrieve the complete sentence from its meaning.

Your turn: independent retrieval

No Sanskrit model is shown before you answer.

In a story, a speaker admits that he does not even know his own self. Say the Sanskrit for "I myself do not know my own self."

What you've built: check after answering

Now check: अहमेव स्वात्मानं न वेद्मि। (*ahameva svātmānaṃ na vedmi.*)

Before you move on

You have retrieved one bounded relation once without a visible model. This is not evidence of middle-voice mastery, a reflexive paradigm, productive case or sandhi mastery, human validation, learner attainment, or exam readiness.

273.3 Retrieve the reflexive sentence: round two

Retrieve the same admission in a fresh story setting.

Your turn: independent retrieval in a fresh context

No Sanskrit model is shown before you answer.

A character is surprised by what others claim about him and admits that he does not even know his own self. Say the Sanskrit for "I myself do not know my own self."

What you've built: check after answering

Now check: अहमेव स्वात्मानं न वेद्मि। (*ahameva svātmānaṃ na vedmi.*)

Before you move on

You can retrieve this one attested relation twice without a visible model. That is not evidence of middle-voice mastery, a reflexive paradigm, productive case or sandhi mastery, human validation, learner attainment, or exam readiness.

Chapter 274

One rental exchange, held as a whole

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can ask and answer one attested question about a rented house.
>
> *Complete chapter 274 by independently retrieving the bounded rental exchange a second time.*

274.1 One rental exchange, held as a whole

Recall गृहम्, "house" or "home," and क्रीणामि, "I buy." Then recall the familiar household actions पचति, प्रक्षालयति, and मार्जयति: cooking, washing, and cleaning. This is your known house, buying, and household-work field.

You'll want to know: one complete attested exchange

किं तत् भाटकितं गृहम्?

kiṃ tat bhāṭakitaṃ gṛham?

"Is that a rented house?"

न, अहं भाटकं न ददामि।

na, ahaṃ bhāṭakaṃ na dadāmi.

"No, I do not pay rent."

The direct conversation source supplies this complete attested exchange. A 1954 *Saṃskṛtavyavahārapraśnottarī* conversation and its Hindi gloss corroborate the rented-house and rent-payment function.

The older volunteer rendering prints भाटं, with an apparent dropped syllable. The Government of India's Commission for Scientific and Technical Terminology gives भाटकम् for "hire, rent" and गृहभाटकम् for "house rent." The conversation above independently preserves भाटकं, so this lesson uses the cross-checked complete exchange rather than copying that apparent omission.

Grammar Lens: keep the exchange bounded

Hear the question and answer as one practical pair. The lesson does not turn भाटकितम्, गृहम्, or भाटकम् into a productive participle or case paradigm, and it does not ask you to derive their sandhi.

Your turn

Listen to the question and answer once slowly. Then say them together as one exchange about whether a house is rented.

Before you move on

Say the complete pair once more. Keep the attested wording together.

274.2 Retrieve the rental exchange: round one

Prepare to retrieve both turns from their meaning.

Your turn: independent retrieval

No Sanskrit model is shown before you answer.

You visit someone at home. Ask, "Is that a rented house?" Then answer, "No, I do not pay rent." Say the Sanskrit rental exchange.

What you've built: check after answering

Now check: किं तत् भाटकितं गृहम्? — न, अहं भाटकं न ददामि। (*kiṃ tat bhāṭakitaṃ gṛham? — na, ahaṃ bhāṭakaṃ na dadāmi.*)

Before you move on

One successful retrieval is not evidence of productive participle, case, or sandhi mastery, a general renting repertoire, housing competence, human validation, learner attainment, or exam readiness.

274.3 Retrieve the rental exchange: round two

Retrieve the same two turns in a fresh home context.

Your turn: independent retrieval in a fresh context

No Sanskrit model is shown before you answer.

A friend points to another home. Ask, "Is that a rented house?" Then answer, "No, I do not pay rent." Say the Sanskrit rental exchange.

What you've built: check after answering

Now check: किं तत् भाटकितं गृहम्? — न, अहं भाटकं न ददामि। (*kiṃ tat bhāṭakitaṃ gṛham? — na, ahaṃ bhāṭakaṃ na dadāmi.*)

Before you move on

Two bounded retrievals are not evidence of productive participle, case, or sandhi mastery, a general renting repertoire, housing competence, human validation, learner attainment, or exam readiness.

Chapter 275

What Everyone Will Do

Modes: **voice** (2) **eyes** (1) **Hands-free start:** the first 2 of 3 lessons.

By the end of this chapter: I can say what anyone will do, in every person and number (kariṣyāmi, kariṣyati, kariṣyanti), with each verb's own future stem (paṭhiṣyati, drakṣyati, dāsyati).

Complete SA-R275-what-everyone-will-do: say what you, your friends and everyone else will do.

275.1 करिष्यति (kariṣyati) — the future, person by person

Before the new one: say "I will do", करिष्यामि (*kariṣyāmi*), and "I will go", गमिष्यामि (*gamiṣyāmi*). Then say "tomorrow". (*śvaḥ.*) This lesson gives that future to every person.

You'll want to know: I, you, he and she

अहं करिष्यामि।

ahaṃ kariṣyāmi. — "I will do it."

त्वं करिष्यसि।

tvaṃ kariṣyasi. — "You will do it."

सः करिष्यति।

saḥ kariṣyati. — "He will do it."

करिष्य- (*kariṣya-*) is the future stem of "do", and the present's endings follow it: *kariṣyāmi* like *gacchāmi*, *kariṣyati* like *gacchati*.

सः श्वः कार्यं करिष्यति।

saḥ śvaḥ kāryaṃ kariṣyati. — "He will do the work tomorrow."

You'll want to know: we, you all, they, and the two

वयम् (*vayam*) is "we", यूयम् (*yūyam*) "you all", and ते (*te*) "they".

वयं करिष्यामः।

vayaṃ kariṣyāmaḥ. — "We will do it."

ते करिष्यन्ति।

te kariṣyanti. — "They will do it."

who	the future of "do"
अहम् (*aham*), I	करिष्यामि (*kariṣyāmi*)
त्वम् (*tvam*), you	करिष्यसि (*kariṣyasi*)
सः, सा (*saḥ*, *sā*), he, she	करिष्यति (*kariṣyati*)
वयम् (*vayam*), we	करिष्यामः (*kariṣyāmaḥ*)
यूयम् (*yūyam*), you all	करिष्यथ (*kariṣyatha*)
ते (*te*), they	करिष्यन्ति (*kariṣyanti*)

Exactly two people take the dual, as वदावः (*vadāvaḥ*), "we two speak", did:

अरुणः मीरा च करिष्यतः।

aruṇaḥ mīrā ca kariṣyataḥ. — "Arun and Mira will do it."

A question puts किम् (*kim*) first; "not" puts न (*na*) before the verb:

किं त्वं श्वः गमिष्यसि?

kiṃ tvaṃ śvaḥ gamiṣyasi? — "Will you go tomorrow?"

न, अहं न गमिष्यामि।

na, ahaṃ na gamiṣyāmi. — "No, I will not go."

Your turn

Say these aloud:

- "I will go home" — *ahaṃ gṛhaṃ gamiṣyāmi*
- "We will go home" — *vayaṃ gṛhaṃ gamiṣyāmaḥ*
- "They will go home" — *te gṛhaṃ gamiṣyanti*

Before you move on

"You will do it"? (त्वं करिष्यसि.) "They will do it"? (ते करिष्यन्ति.) Arun and Mira, the two of them? (करिष्यतः.) Which word opens the question? (किम्.)

275.2 पठिष्यति · द्रक्ष्यति (paṭhiṣyati · drakṣyati) — each verb's own future

Say "she will do it" and "we will do it". (*sā kariṣyati*, *vayaṃ kariṣyāmaḥ*.) Then say "I will read". (*paṭhiṣyāmi*.) The endings stay the same; the stem belongs to each verb.

You'll want to know: -इष्य-

सः पठिष्यति।

saḥ paṭhiṣyati. — "He will read."

Most verbs you know make the future with **-इष्य-** (*-iṣya-*) after the root: पठति gives पठिष्यति, and खादति (*khādati*), "eats", gives खादिष्यति (*khādiṣyati*).

मीरा पुस्तकं पठिष्यति।

mīrā pustakaṃ paṭhiṣyati. — "Mira will read the book."

बालः फलं खादिष्यति।

bālaḥ phalaṃ khādiṣyati. — "The boy will eat the fruit."

वदति (*vadati*), "speaks", gives वदिष्यति (*vadiṣyati*). भवति gives भविष्यति (*bhaviṣyati*), the "will be" you know. लिखति (*likhati*) changes its vowel: लेखिष्यति (*lekhiṣyati*), "will write".

सा श्वः लेखिष्यति।

sā śvaḥ lekhiṣyati. — "She will write tomorrow."

You'll want to know: -स्य-

A few verbs take **-स्य-** (*-sya-*) instead, on the root itself. पश्यति (*paśyati*), "sees", has the root √dṛś, and its future is द्रक्ष्यति (*drakṣyati*):

सः नगरं द्रक्ष्यति।

saḥ nagaraṃ drakṣyati. — "He will see the city."

ददाति (*dadāti*), "gives", has दास्यति (*dāsyati*); तिष्ठति (*tiṣṭhati*), "stands, stays", has स्थास्यति (*sthāsyati*):

सा पानीयं दास्यति।

sā pānīyaṃ dāsyati. — "She will give water."

अहम् अत्र स्थास्यामि।

aham atra sthāsyāmi. — "I will stay here."

the present	the future
पठति, खादति, वदति	पठिष्यति, खादिष्यति, वदिष्यति
लिखति	लेखिष्यति
गच्छति	गमिष्यति
पश्यति	द्रक्ष्यति
ददाति, तिष्ठति	दास्यति, स्थास्यति

So a future is learned with its verb, as a dictionary gives it: Monier-Williams lists द्रक्ष्यति under √dṛś and लेखिष्यति under √likh.

Your turn

Say these aloud:

- "He will read the book" — *saḥ pustakaṃ paṭhiṣyati*
- "He will see the book" — *saḥ pustakaṃ drakṣyati*
- "He will give the book" — *saḥ pustakaṃ dāsyati*

Before you move on

"Will eat"? (खादिष्यति.) "Will see"? (द्रक्ष्यति: the stem comes with the verb.) "Will give"? (दास्यति.) And "I will stay"? (स्थास्यामि.)

275.3 Review — what everyone will do

Say "I will do it" and "he will read". (*ahaṃ kariṣyāmi*, *saḥ paṭhiṣyati*.)

Your turn

Say these aloud:

- Tomorrow I will read a book.
- Will you go home? No, I will not go.
- Arun and Mira will see the city.
- We will eat the fruit, and they will give water.
- She will stay here tomorrow.

Before you move on

करिष्यन्ति: how many people? (Three or more.) करिष्यतः? (Two.) Now the other way round: "will see"? (द्रक्ष्यति.) "Will stay"? (स्थास्यति.) "We will write"? (वयं लेखिष्यामः.)

Chapter 276

What Happened, and What Was Going On

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can say what someone did, with the past that follows the doer (saḥ gatavān, sā gatavatī), and what was going on at the time (saḥ paṭhati sma; yadā … tadā …).
>
> *Complete SA-R276-what-happened: say what happened and what was going on when it happened.*

276.1 सः गतवान् (saḥ gatavān) — the past that follows the doer

Before the new one: say "the boy went", with the past you know. (*bālaḥ agacchat.*) Then say "yesterday". (*hyaḥ.*) This lesson gives a second past, the one the stories in this book are told in.

You'll want to know: गतवान्, गतवती

सः गतवान्।

saḥ gatavān. — "He went."

सा गतवती।

sā gatavatī. — "She went."

गतवान् (*gatavān*), "went", is a describing word made from the verb: *-vān* for a man, *-vatī* for a woman.

सः ह्यः गृहं गतवान्।

saḥ hyaḥ gṛhaṃ gatavān. — "He went home yesterday."

मीरा ह्यः आपणं गतवती।

mīrā hyaḥ āpaṇaṃ gatavatī. — "Mira went to the shop yesterday."

For several people, गतवन्तः (*gatavantaḥ*); for two, गतवन्तौ (*gatavantau*):

ते ह्यः ग्रामं गतवन्तः।

te hyaḥ grāmaṃ gatavantaḥ. — "They went to the village yesterday."

It needs no अस्मि: a man says *ahaṃ gatavān*, "I went", a woman *ahaṃ gatavatī*.

You'll want to know: the stem under it

The part before *-vat-* is the verb's *-ta* form, which describes on its own: गतः (*gataḥ*), "gone". Each verb has its own, given with it in the dictionary:

the verb	the past (a man)
"does"	कृतवान् (*kṛtavān*)
पठति	पठितवान् (*paṭhitavān*)
खादति	खादितवान् (*khāditavān*)
लिखति	लिखितवान् (*likhitavān*)
पश्यति	दृष्टवान् (*dṛṣṭavān*)
आगच्छति	आगतवान् (*āgatavān*)

The thing done stays as it was:

सः अन्नं खादितवान्।

saḥ annaṃ khāditavān. — "He ate the food."

मीरा पुस्तकं पठितवती।

mīrā pustakaṃ paṭhitavatī. — "Mira read the book."

"Said" comes from the other "say" root, √vac: उक्तवान् (*uktavān*; Monier-Williams gives *ukta* there).

सा किम् उक्तवती?

sā kim uktavatī? — "What did she say?"

The past you know still stands: *agacchat* and *gatavān* both say "went", and both are correct. This book tells its stories with *gatavān*, one shape for every verb (Pāṇini 1.1.26 names *-ta* and *-tavat* together).

Your turn

Say these aloud:

- "He came home" — *saḥ gṛham āgatavān*
- "She came home" — *sā gṛham āgatavatī*
- "They came home" — *te gṛham āgatavantaḥ*

Before you move on

"She went"? (सा गतवती.) "I did the work", said by a man? (अहं कार्यं कृतवान्.) Who decides *-vān* or *-vatī*? (The one who did it.)

276.2 सः पठति स्म (saḥ paṭhati sma) — what was going on

Say "he read the book". (*saḥ pustakaṃ paṭhitavān.*) That tells one finished event. This lesson tells the scene around it.

You'll want to know: the present with स्म

सः पठति स्म।

saḥ paṭhati sma. — "He was reading."

स्म (*sma*) after a present puts it in the past: "he was reading", or "he used to read". The verb keeps its present ending. Lanman's vocabulary describes it as a present that tells the past (he cites Whitney §778).

बालाः क्रीडन्ति स्म।

bālāḥ krīḍanti sma. — "The children were playing."

सा प्रतिदिनं पठति स्म।

sā pratidinaṃ paṭhati sma. — "She used to read every day."

You'll want to know: यदा ... तदा

यदा (*yadā*) is "when", opening the scene; तदा (*tadā*), "then", opens what broke into it. The scene takes स्म, the event the past:

यदा अहं पठामि स्म,

yadā ahaṃ paṭhāmi sma,

तदा मीरा आगतवती।

tadā mīrā āgatavatī. — "When I was reading, Mira came."

यदा सः खादति स्म,

yadā saḥ khādati sma,

तदा अहं गतवान्।

tadā ahaṃ gatavān. — "While he was eating, I left."

the sentence	what it tells
सः पठितवान्	one event: he read
सः पठति स्म	the scene: he was reading

Your turn

Say these aloud:

- "I was reading" — *ahaṃ paṭhāmi sma*
- "I was eating" — *ahaṃ khādāmi sma*
- "I was writing" — *ahaṃ likhāmi sma*

Before you move on

"He was playing"? (सः क्रीडति स्म.) "When I was reading, Arun came"? (यदा अहं पठामि स्म, तदा अरुणः आगतवान्.) Which form tells the scene? (The present with स्म.)

276.3 घटते (ghaṭate) — happens

Before the new one: say "when I was reading, Mira came". (*yadā ahaṃ paṭhāmi sma, tadā mīrā āgatavatī.*)

You'll want to know: घटते

घटते — *ghaṭate* — "happens". It ends in *-te*, as रोचते (*rocate*) does.

अत्र किं घटते?

atra kiṃ ghaṭate? — "What is happening here?"

एतत् प्रतिदिनं घटते।

etat pratidinaṃ ghaṭate. — "This happens every day."

"It happened" is its *-ta* form, घटितम् (*ghaṭitam*), the way गतः says "gone":

ह्यः किं घटितम्?

hyaḥ kiṃ ghaṭitam? — "What happened yesterday?"

The word, taken apart — its roots and family

घटते (*ghaṭate*) is built on the root √ghaṭ. Monier-Williams gives its first sense as being busy with something or striving for it, and a later one as happening, taking place; he gives *ghaṭita* as "happened". It lives on as Marathi *ghaḍṇẽ*, "to happen" (CDIAL 4407).

Your turn

Say these aloud:

- *ghaṭate*
- "What is happening here?" — *atra kiṃ ghaṭate?*
- "What happened yesterday?" — *hyaḥ kiṃ ghaṭitam?*

Before you move on

What does घटते mean? (“Happens”.) “What happened?” (किं घटितम्?)

276.4 घ — one character, met first in घटते

Before the new one: say घटते (*ghaṭate*), “happens”. Then say the sounds of ग and ध. (*ga*, *dha*.)

One character this time: the one that opens घटते.

Script you’ll notice: घ

घ — *gha*.

It is a **consonant**: *g* with a breath after it, as ध is *d* with a breath. What it is made of:

- a continuous upper curl, middle hook, lower bowl, and rising right side
- a short descending lower stem
- the top shirorekhā

You have met it here:

- घटते *ghaṭate* — happens

Writing: घ

How it is written — 2 strokes · 1 pen lift · 4 movements

Stroke order after Opiaterein, ‘Deva-घ-order.gif’, strokes 1–3, Wikimedia Commons, 9 May 2009
This order is attested, not standardised; the source records where it varies.

How घ *is written, stroke by stroke*

- **1.** start below the headline at the upper-left, curve down and clockwise around the upper curl, turn back left through the middle hook, continue clockwise around the lower bowl, and rise along the right side to the headline
- **2.** without lifting, come back down the right side to the lower junction
- **3.** descend the short stem below the bowl
- **4.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up 1 time and no more.

The source shows three movements; native writers draw घ as two pen-down strokes (83% of HP Labs India's native-writer samples, 68 of 82). This ductus follows the three movements in order and direction, lifting only before the headline: after rising to the headline the pen comes back down the right side into the short lower stem.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Opiaterein, 'Deva-घ-order.gif', strokes 1–3, Wikimedia Commons, 9 May 2009.

Your turn

- *Look:* at this, and find घ in it

  घटते

- *Trace it:* घ three times, saying *gha* as you finish each one
- *Look:* at किं घटितम्? and find घ once more

Before you move on

Which character is this — घ? What sound does it carry? (*gha.*)
Which word did it come from? (घटते, "happens".)

276.5 Review — what happened, and what was going on

Say "they will go" and "I will see the city". (*te gamiṣyanti*, *ahaṃ nagaraṃ drakṣyāmi*.)

Your turn

- *Say it:* Yesterday Mira went to the shop.
- *Say it:* Arun ate the food, and Mira read the book.
- *Say it:* The children were playing.
- *Say it:* When I was reading, Mira came.
- *Say it:* What happened yesterday?
- *Read it:* घटते and किं घटितम्? aloud

Before you move on

गतवती: a man or a woman? (A woman.) सः पठति स्म: one event, or the scene? (The scene.) Now the other way round: "she read the book"? (सा पुस्तकं पठितवती.) "What did he say?" (सः किम् उक्तवान्?)

Chapter 277

One Thing, Then the Next

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can tell events in order, with -tvā and -ya (gatvā, āgatya) and first, then, in the end (prathamam, tataḥ, ante), and follow a short story told that way.
>
> *Complete SA-R277-a-day-in-order: tell a short day in order, one event after another.*

277.1 आगत्य (āgatya) — one action, then the next

Before the new one: say "the boy, having gone home, reads". (*bālaḥ gṛhaṃ gatvā paṭhati.*) Then say "he went home". (*saḥ gṛhaṃ gatavān.*) Now put the two together.

You'll want to know: -त्वा with the past

सः खादित्वा गतवान्।

saḥ khāditvā gatavān. — "He ate, then he left."

The **-त्वा** form finishes the first action, and the last verb carries the past for both. खादित्वा (*khāditvā*) is "having eaten", and कृत्वा (*kṛtvā*) "having done":

सा गृहं गत्वा पठितवती।

sā gṛhaṃ gatvā paṭhitavatī. — "She went home and read."

ते कार्यं कृत्वा गतवन्तः।

te kāryaṃ kṛtvā gatavantaḥ. — "They did the work and left."

Both actions belong to one doer, and the **-त्वा** action comes first.

You'll want to know: -य after a prefix

A verb with a prefix, such as **आगच्छति** (*āgacchati*), "comes", or **प्रविशति** (*praviśati*), "goes in", takes **-य** (*-ya*) in place of **-त्वा**: one short ending, after a prefix (Pāṇini 7.1.37).

सः आगत्य पठति।

saḥ āgatya paṭhati. — "He comes and reads."

मीरा गृहं प्रविश्य उपविशति।

mīrā gṛhaṃ praviśya upaviśati. — "Mira goes into the house and sits down."

सा उपविश्य खादितवती।

sā upaviśya khāditavatī. — "She sat down and ate."

the verb	the action finished
गच्छति	गत्वा (*gatvā*)
आगच्छति	आगत्य (*āgatya*)
प्रविशति	प्रविश्य (*praviśya*)
उपविशति	उपविश्य (*upaviśya*)

Your turn

Say these aloud:

- "Having come, he reads" — *saḥ āgatya paṭhati*
- "Having come, he eats" — *saḥ āgatya khādati*
- "Having come, he sits down" — *saḥ āgatya upaviśati*

Before you move on

"Having gone in"? (प्रविश्य.) Why *-ya* and not *-tvā*? (The verb has a prefix.) "She ate and then left"? (सा खादित्वा गतवती.)

277.2 प्रथमम् · ततः · अन्ते (prathamam · tataḥ · ante) — first, then, in the end

Say "she went home and read". (*sā gṛhaṃ gatvā paṭhitavatī.*) Two actions in one sentence. A story needs more sentences, and words to order them.

You'll want to know: प्रथमम्, ततः, अनन्तरम्

प्रथमम् (*prathamam*), "first", is प्रथमः (*prathamaḥ*), "first", said as an adverb. ततः (*tataḥ*), "then", and अनन्तरम् (*anantaram*), "afterwards", you know.

प्रथमं सः खादितवान्।

prathamaṃ saḥ khāditavān. — "First he ate."

ततः सः पठितवान्।

tataḥ saḥ paṭhitavān. — "Then he read."

अनन्तरं सः गतवान्।

anantaraṃ saḥ gatavān. — "Afterwards he left."

You'll want to know: अन्ते

अन्ते (*ante*), "in the end", closes the story.

अन्ते सः गृहम् आगतवान्।

ante saḥ gṛham āgatavān. — "In the end he came home."

Four lines, in order. क्रीतवती (*krītavatī*) is the past of क्रीणाति (*krīṇāti*), "buys":

प्रथमं मीरा आपणं गतवती।

prathamaṃ mīrā āpaṇaṃ gatavatī. — "First Mira went to the shop."

ततः सा फलं क्रीतवती।

tataḥ sā phalaṃ krītavatī. — "Then she bought a fruit."

अनन्तरं सा गृहम् आगतवती।

anantaraṃ sā gṛham āgatavatī. — "Afterwards she came home."

अन्ते सा फलं खादितवती।

ante sā phalaṃ khāditavatī. — "In the end she ate the fruit."

Your turn

Say these aloud:

- "First I ate" — *prathamam ahaṃ khāditavān*
- "Then I ate" — *tataḥ ahaṃ khāditavān*
- "In the end I ate" — *ante ahaṃ khāditavān*

Before you move on

"First"? (प्रथमम्.) "Afterwards"? (अनन्तरम्.) "In the end"? (अन्ते.) Which of them opens a story? (प्रथमम्.)

277.3 शीघ्रम् (śīghram) — quickly

Before the new one: say "first he ate, then he left". (*prathamaṃ saḥ khāditavān, tataḥ saḥ gatavān.*)

You'll want to know: शीघ्रम्

शीघ्रम् — *śīghram* — "quickly".

शीघ्रम् आगच्छतु।

śīghram āgacchatu. — "Please come quickly."

सः शीघ्रं धावति।

saḥ śīghraṃ dhāvati. — "He runs quickly."

सा शीघ्रं गृहं गतवती।

sā śīghraṃ gṛhaṃ gatavatī. — "She went home quickly."

The word, taken apart — its roots and family

शीघ्रम् (*śīghram*) is the neuter of शीघ्र (*śīghra*), "quick, swift", said as an adverb, as प्रथमम् is. Monier-Williams calls its derivation doubtful, so its origin is uncertain. It lives on as Sindhi *sigho*, "quick" (CDIAL 12484).

Your turn

Say these aloud:

- *śīghram*
- "Please come quickly" — *śīghram āgacchatu*
- "First he came quickly" — *prathamaṃ saḥ śīghram āgatavān*

Before you move on

What does शीघ्रम् mean? ("Quickly".) "She went home quickly"? (सा शीघ्रं गृहं गतवती.)

277.4 (reading) — Mira's day in the city

Eighty words, all met before but two new forms: प्रविष्टवती (*praviṣṭavatī*), "she went in", and दृष्ट्वा (*dṛṣṭvā*), "having seen".

Read it: the passage a second time with the romanization covered, once through, without stopping; do not translate as you go

Why it's said this way

How this book writes: Pāṇini (1.4.109) calls words said close together *saṃhitā*, and there the sounds at the joins change. Where this book has *bālaḥ gacchati*, a classical page has बालो गच्छति (*bālo gacchati*), and *saḥ gacchati* is स गच्छति (*sa gacchati*; Pāṇini 6.1.132). This book writes each word whole, with the one join you know, *gṛhaṃ gacchati*. Recognise the joined forms; there is nothing here to apply.

Your turn

Say these aloud:

- what Mira did first, at the station
- how the day ended, with *ante*

Before you move on

Why *paṭhati sma* in the train? (The reading was going on when the rain came.) Which words keep the steps in order? (*prathamam*, *tataḥ*, *anantaram*, *ante*.)

277.5 Review — a day, in order

Say "she went home" and "when I was reading, Arun came". (*sā gṛhaṃ gatavatī*, *yadā ahaṃ paṭhāmi sma, tadā aruṇaḥ āgatavān*.)

Your turn

Say these aloud:

- First I went to the station.
- Then I bought a ticket and got on the train.
- Mira came in and sat down.
- Afterwards we ate quickly.
- In the end Arun came home.
- Tell Mira's day in the city in four lines, with *prathamam*, *tataḥ*, *anantaram* and *ante*.

Before you move on

"Having gone in": *-ya* or *-tvā*? (*-ya*, प्रविश्य: the verb has a prefix.) "Having eaten"? (खादित्वा.) Now the other way round: what does शीघ्रम् mean? ("Quickly".) And अन्ते? ("In the end".)

Chapter 278

What I Think, and Why

Modes: 🚗 **voice** (5) ✓ **pen** (1) 🚗 **Hands-free start:** the first 4 of 6 lessons.

> ***By the end of this chapter:*** I can give an opinion (mama matena …, ahaṃ manye yat …) and a reason for it (yataḥ …, varṣākāraṇāt …).
>
> *Complete SA-R278-opinion-and-reason: say what you think and give a reason for it.*

278.1 मम मतेन (mama matena) — in my opinion

Before the new one: say "an opinion". (*matam.*) And "my". (*mama.*) This chapter gives your opinion, and a reason for it.

You'll want to know: मम मतेन

> मम मतेन एतत् सुन्दरम्।
>
> *mama matena etat sundaram.* — "In my opinion this is beautiful."

मतेन (*matena*) is मतम् (*matam*), "an opinion", with *-ena*, "by": "by my opinion", that is, "in my opinion".

> मम मतेन सः सत्यं वदति।
>
> *mama matena saḥ satyaṃ vadati.* — "In my opinion he is telling the truth."
>
> तव मतेन किम्?
>
> *tava matena kim?* — "What is your opinion?"

You'll want to know: अहं मन्ये

मन्ये (*manye*) is "I think". It ends in *-e*, the "I" ending of verbs like रोचते (*rocate*). यत् (*yat*), "that", opens what you think:

> अहं मन्ये यत् वर्षा भविष्यति।
>
> *ahaṃ manye yat varṣā bhaviṣyati.* — "I think that it will rain."

Or say the thought first and close it with इति (*iti*), as you close what someone said:

> वर्षा भविष्यति इति मन्ये।
>
> *varṣā bhaviṣyati iti manye.* — "It will rain, I think."

Your turn

Say these aloud:

- "I think that he will go" — *ahaṃ manye yat saḥ gamiṣyati*
- "I think that she will go" — *ahaṃ manye yat sā gamiṣyati*
- "I think that they will go" — *ahaṃ manye yat te gamiṣyanti*

Before you move on

"In my opinion"? (मम मतेन.) "I think that it will rain"? (अहं मन्ये यत् वर्षा भविष्यति.) Where does इति stand? (After the thought.)

278.2 यतः · कारणात् (yataḥ · kāraṇāt) — because, and because of

Say "I think that it will rain". (*ahaṃ manye yat varṣā bhaviṣyati.*) Now give the reason for a choice.

You'll want to know: यतः

यतः (*yataḥ*), "because", opens the reason, and the reason can follow what you did:

> अहं न आगमिष्यामि,
>
> *ahaṃ na āgamiṣyāmi,*
>
> यतः अहं रुग्णः अस्मि।
>
> *yataḥ ahaṃ rugṇaḥ asmi.* — "I will not come, because I am ill."
>
> सः न पठति,
>
> *saḥ na paṭhati,*
>
> यतः सः श्रान्तः अस्ति।
>
> *yataḥ saḥ śrāntaḥ asti.* — "He is not reading, because he is tired."

आगमिष्यामि (*āgamiṣyāmi*) is गमिष्यामि with the prefix आ- of आगच्छति: "I will come".

You'll want to know: कारणात्, हेतुः

कारणात् (*kāraṇāt*) is कारणम् (*kāraṇam*), "a reason", with -*āt*, "from": "because of". The cause goes in front of it, joined to it as one word:

> वर्षाकारणात् सः न आगतवान्।
>
> *varṣākāraṇāt saḥ na āgatavān.* — "Because of the rain he did not come."

हेतुः (*hetuḥ*), "a cause", names the reason as a thing:

> हेतुः किम्?
>
> *hetuḥ kim?* — "What is the cause?"
>
> हेतुः वर्षा अस्ति।
>
> *hetuḥ varṣā asti.* — "The cause is the rain."

Your turn

Say these aloud:

- "I will not come, because I am tired" — *ahaṃ na āgamiṣyāmi, yataḥ ahaṃ śrāntaḥ asmi*
- "I will not come, because I am ill" — *ahaṃ na āgamiṣyāmi, yataḥ ahaṃ rugṇaḥ asmi*
- "I will not come, because I am afraid" — *ahaṃ na āgamiṣyāmi, yataḥ ahaṃ bhītaḥ asmi*

Before you move on

"Because" before a reason? (यतः.) "Because of the rain"? (वर्षाकारणात्.) "What is the cause?" (हेतुः किम्?)

278.3 मन्यते (manyate) — thinks

Before the new one: say "I think that it will rain". (*ahaṃ manye yat varṣā bhaviṣyati.*) You have said this verb's "I" form.

You'll want to know: मन्यते

मन्यते — *manyate* — "thinks". मन्ये (*manye*) is its "I".

सः किं मन्यते?

saḥ kiṃ manyate? — "What does he think?"

मीरा मन्यते यत् एतत् सत्यम्।

mīrā manyate yat etat satyam. — "Mira thinks that this is true."

The word, taken apart — its roots and family

मन्यते (*manyate*) is built on the root √man, "to think", which Monier-Williams lists in the fourth class with the middle ending *-te*. मतम् (*matam*), "an opinion", is its *-ta* form: what is thought. It lives on as Hindi *mānnā*, "to respect, obey" (CDIAL 9857).

Your turn

Say these aloud:

- *manyate*
- "What does Mira think?" — *mīrā kiṃ manyate?*
- "Arun thinks that this is true" — *aruṇaḥ manyate yat etat satyam*

Before you move on

What does मन्यते mean? ("Thinks".) Its "I" form? (मन्ये.)

278.4 दृढः (dṛḍhaḥ) — firm

Before the new one: say "what does he think?" (*saḥ kiṃ manyate?*)

You'll want to know: दृढः

दृढः — *dṛḍhaḥ* — "firm". It agrees with its noun: दृढः for a masculine noun, दृढा (*dṛḍhā*) for a feminine one, दृढम् (*dṛḍham*) for a neuter one.

मम दृढः विश्वासः अस्ति।

mama dṛḍhaḥ viśvāsaḥ asti. — "I have a firm belief."

गृहं दृढम् अस्ति।

gṛhaṃ dṛḍham asti. — "The house is solid."

मम निर्णयः दृढः।

mama nirṇayaḥ dṛḍhaḥ. — "My decision is firm."

The word, taken apart — its roots and family

दृढः (*dṛḍhaḥ*) comes from दृढ (*dṛḍha*), "fixed, firm, strong", in Monier-Williams; CDIAL 6508 sets it under the root √dṛṃh and lists Hindi *diṛh*, "firm", among its descendants.

Your turn

Say these aloud:

- *dṛḍhaḥ*
- "My decision is firm" — *mama nirṇayaḥ dṛḍhaḥ*
- "In my opinion the house is solid" — *mama matena gṛhaṃ dṛḍham*

Before you move on

What does दृढः mean? ("Firm".) "A solid house"? (दृढं गृहम्.)

278.5 ढ — one character, met first in दृढः

Before the new one: say दृढः (*dṛḍhaḥ*), "firm". Then say the sounds of ड and घ. (*ḍa*, *gha*.)

One character this time: the one in the middle of दृढः.

Script you'll notice: ढ

ढ — *ḍha*.

It is a **consonant**: ड (*ḍa*) with a breath after it, as घ is ग with a breath. What it is made of:

- a descending stem joined to a broad outer bowl and closed inner loop
- the top shirorekhā

You have met it here:

- दृढः *dṛḍhaḥ* — firm

Writing: ढ

How it is written — 2 strokes · 1 pen lift · 2 movements

Stroke order after Opiaterein, 'Deva-ढ-order.gif', strokes 1–2, Wikimedia Commons, 10 May 2009
This order is attested, not standardised; the source records where it varies.

How ढ is written, stroke by stroke

- **1.** start at the stem's headline junction, descend, turn left through the upper shoulder, sweep counterclockwise around the broad outer bowl, and continue counterclockwise around the closed inner loop without lifting
- **2.** lift and draw the top shirorekhā left-to-right

Pen lifts: 1. The pen comes up 1 time and no more.

Verified two-stroke teaching form fitted to the bundled printed outline.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Opiaterein, 'Deva-ढ-order.gif', strokes 1–2, Wikimedia Commons, 10 May 2009.

Your turn

- *Look:* at this, and find ढ in it

  दृढः

- *Trace it:* ढ three times, saying *ḍha* as you finish each one
- *Look:* at मम निर्णयः दृढः and find ढ once more

Before you move on

Which character is this — ढ? What sound does it carry? (*ḍha.*) Which word did it come from? (दृढः, "firm".)

278.6 Review — what I think, and why

Say "first Mira went to the shop". (*prathamaṃ mīrā āpaṇaṃ gatavatī.*) Then "she came in and sat down". (*sā praviśya upaviśati.*)

Your turn

- *Say it:* In my opinion the city is beautiful.
- *Say it:* I think that Mira will come tomorrow.
- *Say it:* I will not go, because I am tired.
- *Say it:* Because of the rain Mira did not come.
- *Say it:* What does Arun think? My decision is firm.
- *Read it:* दृढः and मम दृढः विश्वासः अस्ति aloud

Before you move on

मन्ये or मन्यते, for "I think"? (मन्ये.) यतः or कारणात्, before a whole reason? (यतः.) Now the other way round: what does हेतुः किम्? ask? ("What is the cause?")

Chapter 279

Advice, and What Follows

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can give advice (bhavān vaidyaṃ gacchet, tvaṃ paṭheḥ) and say what follows from a reason (ataḥ, tasmāt).
>
> *Complete SA-R279-advice-and-what-follows: give advice and say what follows from a reason.*

279.1 भवान् गच्छेत् (bhavān gacchet) — you should go

Say "I will not come, because I am ill". (*ahaṃ na āgamiṣyāmi, yataḥ ahaṃ rugṇaḥ asmi.*) A friend answers with advice.

You'll want to know: -एत्, "should"

भवान् गच्छेत्।

bhavān gacchet. — "You should go."

गच्छेत् (*gacchet*) is गच्छति with *-et* in place of *-ati*: "should go". It speaks to भवान् (*bhavān*), "you", said with respect, and about anyone else:

भवान् वैद्यं गच्छेत्।

bhavān vaidyaṃ gacchet. — "You should go to the doctor."

सः सत्यं वदेत्।

saḥ satyaṃ vadet. — "He should tell the truth."

To a woman, भवती (*bhavatī*):

भवती गृहे तिष्ठेत्।

bhavatī gṛhe tiṣṭhet. — "You should stay at home."

भवेत् (*bhavet*), from भवति, is "should be", and also "may be":

सः गृहे भवेत्।

saḥ gṛhe bhavet. — "He may be at home."

Pāṇini (3.3.161) gives this form for bidding and asking.

You'll want to know: त्वं पठेः, and मया गन्तव्यम्

To a friend, with त्वम्, the ending is *-eḥ*:

त्वं प्रतिदिनं पठेः।

tvaṃ pratidinaṃ paṭheḥ. — "You should read every day."

For yourself, "I must" can be said another way, word for word "by me, to be gone":

मया गन्तव्यम्।

mayā gantavyam. — "I must go."

गन्तव्यम् (*gantavyam*) is shaped like कर्तव्यम् (*kartavyam*), "a duty", and मया (*mayā*) is "by me". Meet it when you hear it; you do not need to build it.

भवान् गच्छेत्	you should go
त्वं पठेः	you (a friend) should read
सः वदेत्	he should say
मया गन्तव्यम्	I must go

These verbs end in *-ati*, like गच्छति; a verb such as करोति has an optative of its own, met one at a time.

Your turn

Say these aloud:

- "You should go home" — *bhavān gṛhaṃ gacchet*
- "You should stay at home" — *bhavān gṛhe tiṣṭhet*
- "You should read at home" — *bhavān gṛhe paṭhet*

Before you move on

"You should go", with respect? (भवान् गच्छेत्.) "You should read", to a friend? (त्वं पठेः.) "He may be at home"? (सः गृहे भवेत्.) What does मया गन्तव्यम् say? ("I must go".)

279.2 अतः · तस्मात् (ataḥ · tasmāt) — so, and therefore

Say "you should go to the doctor". (*bhavān vaidyaṃ gacchet.*) Now say why, and what follows.

You'll want to know: अतः

यतः gives the reason after the event; अतः (*ataḥ*), "so", gives the result after the reason:

अहं रुग्णः अस्मि।

ahaṃ rugṇaḥ asmi. — "I am ill."

अतः अहं न आगमिष्यामि।

ataḥ ahaṃ na āgamiṣyāmi. — "So I will not come."

वर्षा भवति, अतः सः गृहे अस्ति।

varṣā bhavati, ataḥ saḥ gṛhe asti. — "It is raining, so he is at home."

You'll want to know: तस्मात्, ततः

तस्मात् (*tasmāt*), "from that", says the same with more weight: "therefore". ततः (*tataḥ*), "then" in a story, can also mean "so":

> सा श्रान्ता अस्ति।
>
> *sā śrāntā asti.* — "She is tired."
>
> तस्मात् सा गृहे तिष्ठति।
>
> *tasmāt sā gṛhe tiṣṭhati.* — "Therefore she is staying at home."
>
> धूमयानं न आगतम्, ततः वयं गतवन्तः।
>
> *dhūmayānaṃ na āgatam, tataḥ vayaṃ gatavantaḥ.* — "The train did not come, so we left."

आगतम् (*āgatam*) is आगतः, "come", for a neuter noun such as धूमयानम्.

Your turn

Say these aloud:

- "So I will stay at home" — *ataḥ ahaṃ gṛhe sthāsyāmi*
- "So I will read at home" — *ataḥ ahaṃ gṛhe paṭhiṣyāmi*
- "So I will eat at home" — *ataḥ ahaṃ gṛhe khādiṣyāmi*

Before you move on

Which word opens the reason, यतः or अतः? (यतः.) And the result? (अतः, or तस्मात्.) "She is tired"? (सा श्रान्ता अस्ति.)

279.3 उपदेशः (upadeśaḥ) — a piece of advice

Before the new one: say "you should go to the doctor". (*bhavān vaidyaṃ gacchet.*) That sentence is a piece of advice.

You'll want to know: उपदेशः

उपदेशः — *upadeśaḥ* — "a piece of advice". It is a masculine noun.

> मम उपदेशः अस्ति।
>
> *mama upadeśaḥ asti.* — "I have a piece of advice."
>
> सः मम उपदेशं न शृणोति।
>
> *saḥ mama upadeśaṃ na śṛṇoti.* — "He does not listen to my advice."
>
> वैद्यः उपदेशं दास्यति।
>
> *vaidyaḥ upadeśaṃ dāsyati.* — "The doctor will give advice."

The word, taken apart — its roots and family

उपदेशः (*upadeśaḥ*) is built from उप (*upa*), "towards", and the root √diś, "to point out". Monier-Williams gives its first sense as pointing something out to someone, and then instruction, teaching and advice.

Your turn

Say these aloud:

- *upadeśaḥ*
- "I have a piece of advice" — *mama upadeśaḥ asti*
- "My advice: you should stay at home" — *mama upadeśaḥ: bhavān gṛhe tiṣṭhet*

Before you move on

What does उपदेशः mean? ("A piece of advice".) Masculine or neuter? (Masculine.)

279.4 Review — advice, and what follows

> Say "in my opinion this is beautiful". (*mama matena etat sundaram.*) Then "because of the rain". (*varṣākāraṇāt.*)

Your turn

Say these aloud:

- You are ill. You should go to the doctor.
- You should read every day, to a friend.
- It is raining, so we will stay at home.
- She is tired, therefore she is not coming.
- I have a piece of advice: he should tell the truth.

Before you move on

गच्छेत् or गच्छति, for advice? (गच्छेत्.) पठेः: to whom? (A friend, त्वम्.) Now the other way round: "so, therefore"? (अतः, तस्मात्.) "I must go"? (मया गन्तव्यम्.)

Chapter 280

Which Way to the Station?

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can ask the way (sthānakaṃ kutra asti? kathaṃ gacchāmi? kiyat dūram?) and follow the answer: left, right, straight on (vāmataḥ, dakṣiṇataḥ, ṛju gacchatu).
>
> *Complete SA-R280-asking-the-way: ask the way and follow the answer.*

280.1 स्थानकं कुत्र अस्ति? (sthānakaṃ kutra asti?) — asking the way

Before the new one: say "where?" and "please". (*kutra*, *kṛpayā*.) You are in a town you do not know, and you need the station.

You'll want to know: where, how, how far

स्थानकं कुत्र अस्ति?

sthānakaṃ kutra asti? — "Where is the station?"

कियत् दूरम् अस्ति?

kiyat dūram asti? — "How far is it?"

कियत् (*kiyat*), "how much", with दूरम् (*dūram*), "far", asks the distance, and कथं गच्छामि? (*kathaṃ gacchāmi?*) asks "how do I get there?" The answer:

बहु दूरं न अस्ति।

bahu dūraṃ na asti. — "It is not very far."

You'll want to know: left, right, straight on

वामतः (*vāmataḥ*), "on the left", is वामः, "left", with *-taḥ*; दक्षिणतः (*dakṣiṇataḥ*), "on the right", is दक्षिणः with it. ऋजु (*ṛju*), "straight", is ऋजुः said as an adverb. What to do takes -तु, the polite ending of ददातु (*dadātu*): गच्छतु (*gacchatu*), "please go".

ऋजु गच्छतु।

ṛju gacchatu. — "Go straight on."

ततः वामतः गच्छतु।

tataḥ vāmataḥ gacchatu. — "Then turn left."

स्थानकं दक्षिणतः अस्ति।

sthānakaṃ dakṣiṇataḥ asti. — "The station is on the right."

-तु speaks to भवान्, or to भवती (*bhavatī*), a woman:

भवती अत्र तिष्ठतु।

bhavatī atra tiṣṭhatu. — "Please wait here."

Your turn

Say these aloud:

- "Please go left" — *kṛpayā vāmataḥ gacchatu*
- "Please go right" — *kṛpayā dakṣiṇataḥ gacchatu*
- "Please go straight on" — *kṛpayā ṛju gacchatu*

Before you move on

"Where is the station?" (स्थानकं कुत्र अस्ति?) "How far is it?" (कियत् दूरम् अस्ति?) "On the left"? (वामतः.) "Please go"? (गच्छतु.)

280.2 Review — asking the way

Say "you should read every day", to a friend. (*tvaṃ pratidinaṃ paṭheḥ.*) Then "therefore she is staying at home". (*tasmāt sā gṛhe tiṣṭhati.*)

Your turn

Say these aloud:

- Please, where is the shop?
- How do I get to the school?
- How far is the station? It is quite near.
- Go straight on, then turn left.
- The station is on the right. Please wait here.

Before you move on

वामतः or दक्षिणतः, for "on the right"? (दक्षिणतः.) Which ending makes a request polite? (-तुः गच्छतु, तिष्ठतु.) Now the other way round: what does कथं गच्छामि? ask? ("How do I get there?")

Chapter 281

At the Station, and When Things Go Wrong

Modes: 🚗 **voice** (5) ✓ **pen** (1) 🚗 **Hands-free start:** the first 4 of 6 lessons.

> ***By the end of this chapter:*** I can ask for tickets and when the next train leaves (ekaṃ yānapatraṃ dadātu; agrimaṃ dhūmayānaṃ kadā?), and say what went wrong (mama syūtaḥ naṣṭaḥ; dhūmayānaṃ gatam; ahaṃ rugṇaḥ asmi).
>
> *Complete SA-R281-at-the-station: buy a ticket, ask when the train leaves, and say what went wrong.*

281.1 एकं यानपत्रं ददातु (ekaṃ yānapatraṃ dadātu) — a ticket, please

Before the new one: say "where is the station?" (*sthānakaṃ kutra asti?*) Then say "a ticket". (*yānapatram.*) You are at the counter now.

You'll want to know: tickets

एकं यानपत्रं ददातु।

ekaṃ yānapatraṃ dadātu. — "One ticket, please."

एकम् (*ekam*), "one", agrees with यानपत्रम्, a neuter noun. For two, the number is द्वे (*dve*) and the noun takes the dual, यानपत्रे (*yānapatre*):

कृपया द्वे यानपत्रे ददातु।

kṛpayā dve yānapatre dadātu. — "Two tickets, please."

मूल्यं कियत्?

mūlyaṃ kiyat? — "How much is it?"

You'll want to know: when does it leave?

The future asks when: गमिष्यति (*gamiṣyati*), "will go", is "will leave".

धूमयानं कदा गमिष्यति?

dhūmayānaṃ kadā gamiṣyati? — "When will the train leave?"

सायं गमिष्यति।

sāyaṃ gamiṣyati. — "It will leave in the evening."

लोकयानं कुत्र तिष्ठति?

lokayānaṃ kutra tiṣṭhati? — "Where does the bus stop?"

Your turn

Say these aloud:

- "The train will leave in the morning" — *dhūmayānaṃ prātaḥ gamiṣyati*
- "The bus will leave in the morning" — *lokayānaṃ prātaḥ gamiṣyati*
- "The plane will leave in the morning" — *vimānaṃ prātaḥ gamiṣyati*

Before you move on

"One ticket, please"? (एकं यानपत्रं ददातु.) "Two tickets"? (द्वे यानपत्रे.) "When will the train leave?" (धूमयानं कदा गमिष्यति?)

281.2 अग्रिमः (agrimaḥ) — next

Before the new one: say "when will the train leave?" (*dhūmayānaṃ kadā gamiṣyati?*) That one has gone. You want the next.

You'll want to know: अग्रिमः

अग्रिमः — *agrimaḥ* — "next", the one coming up. It agrees with its noun: अग्रिमम् (*agrimam*) for a neuter noun such as धूमयानम्.

> अग्रिमं धूमयानं कदा?
>
> *agrimaṃ dhūmayānaṃ kadā?* — "When is the next train?"

अग्रिमः सप्ताहः (*agrimaḥ saptāhaḥ*) is "next week".

> अहम् अग्रिमे सप्ताहे गमिष्यामि।
>
> *aham agrime saptāhe gamiṣyāmi.* — "I will go next week."

अग्रिमे सप्ताहे (*agrime saptāhe*) is "in the next week": *-e* says "in", for a time as for a place.

The word, taken apart — its roots and family

अग्रिमः (*agrimaḥ*) is built on अग्र (*agra*), "the foremost point, the front": Monier-Williams gives *agrima* as "being in front, preceding". The next train is the one in front. CDIAL 92 lists Punjabi *aggiõ*, "first".

Your turn

Say these aloud:

- *agrimaḥ*
- "When is the next train?" — *agrimaṃ dhūmayānaṃ kadā?*
- "When is the next bus?" — *agrimaṃ lokayānaṃ kadā?*

Before you move on

What does अग्रिमः mean? ("Next".) "The next train"? (अग्रिमं धूमयानम्.)

281.3 मम स्यूतः नष्टः (mama syūtaḥ naṣṭaḥ) — when things go wrong

Say "the next train". (*agrimaṃ dhūmayānam.*) Then say "is lost". (*naśyati.*) Now something has gone wrong.

You'll want to know: lost

मम स्यूतः नष्टः।

mama syūtaḥ naṣṭaḥ. — "My bag is lost."

नष्टः (*naṣṭaḥ*), "lost", is the *-ta* form of नश्यति (*naśyati*), "is lost". It describes, so it agrees with the thing: स्यूतः is masculine, so नष्टः.

मम यानपत्रं नष्टम्।

mama yānapatraṃ naṣṭam. — "My ticket is lost."

मम माला नष्टा।

mama mālā naṣṭā. — "My garland is lost."

You'll want to know: missed, and ill

धूमयानं गतम्।

dhūmayānaṃ gatam. — "The train has gone."

गतम् (*gatam*) is गतः for a neuter noun: the train is gone.

अहं रुग्णः अस्मि।

ahaṃ rugṇaḥ asmi. — "I am ill."

A woman says अहं रुग्णा अस्मि (*ahaṃ rugṇā asmi*). And to ask for help, the polite -तु on "does":

कृपया साहाय्यं करोतु।

kṛpayā sāhāyyaṃ karotu. — "Please help."

Your turn

Say these aloud:

- "My bag is lost" — *mama syūtaḥ naṣṭaḥ*
- "My ticket is lost" — *mama yānapatraṃ naṣṭam*
- "My book is lost" — *mama pustakaṃ naṣṭam*

Before you move on

"My bag is lost"? (मम स्यूतः नष्टः.) Why नष्टम् with यानपत्रम्? (It is neuter.) "The train has gone"? (धूमयानं गतम्.)

281.4 औषधम् (auṣadham) — a medicine

Before the new one: say "I am ill". (*ahaṃ rugṇaḥ asmi.*) Then "you should go to the doctor", and "the doctor will give advice". (*bhavān vaidyaṃ gacchet*; *vaidyaḥ upadeśaṃ dāsyati.*)

You'll want to know: औषधम्

औषधम् — *auṣadham* — "a medicine". It is a neuter noun.

औषधं कुत्र अस्ति?

auṣadhaṃ kutra asti? — "Where is the medicine?"

वैद्यः औषधं दास्यति।

vaidyaḥ auṣadhaṃ dāsyati. — "The doctor will give medicine."

भवान् औषधं पिबेत्।

bhavān auṣadhaṃ pibet. — "You should take the medicine."

पिबेत् (*pibet*) is पिबति (*pibati*), "drinks", with the *-et* of advice.

The word, taken apart — its roots and family

औषधम् (*auṣadham*) is built on ओषधि (*oṣadhi*), "a herb": Monier-Williams gives *auṣadha* as "consisting of herbs", and then herbs used as medicine. It lives on as Oriya *usuā*, "medicine" (CDIAL 2571).

Your turn

Say these aloud:

- *auṣadham*
- "I am ill. Where is the medicine?" — *ahaṃ rugṇaḥ asmi. auṣadhaṃ kutra asti?*
- "You should take the medicine" — *bhavān auṣadhaṃ pibet*

Before you move on

What does औषधम् mean? ("A medicine".) "Where is the medicine?" (औषधं कुत्र अस्ति?)

281.5 औ — the vowel of ौ, standing alone

Before the new one: say औषधम् (*auṣadham*), "a medicine". Then name the sign ौ and the letter अ. (*au*, *a*.)

The sign ौ has a standing form, and औषधम् opens with it.

Script you'll notice: औ

औ — *au*.

It is an **independent vowel**: the full-size letter *au* wears when it opens a word. On a consonant the same vowel is the sign ौ, as in द्वौ (*dvau*).

What it is made of:

- the joined upper and lower bowls of अ
- a middle shoulder running into the inner stem
- the inner stem

- the trailing stem
- two separate upper arcs
- the top shirorekhā

You have met it here:

- **औषधम्** *auṣadham* — a medicine

Writing: औ

How **औ** *is written, stroke by stroke*

- **1.** curve right around the upper bowl and continue down and around the lower bowl without lifting
- **2.** lift and sweep the middle shoulder right
- **3.** without lifting, climb up the inner stem to the headline
- **4.** descend the inner stem
- **5.** lift and descend the trailing stem
- **6.** lift at the trailing stem's headline junction and sweep the lower upper arc upward and left
- **7.** lift at the same junction and sweep the taller upper arc upward and left
- **8.** lift and draw the top shirorekhā left-to-right

Pen lifts: 5. The pen comes up 5 times and no more.

The source shows seven movements; native writers draw औ as six pen-down strokes (60% of HP Labs India's native-writer samples, 49 of 82). This ductus follows the seven movements in order and direction, lifting five times: the middle shoulder runs on, climbing the inner stem and descending it, and every other movement starts with a lift.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Saurmandal, 'Devanagari औ stroke order.svg', panels 1–7, Wikimedia Commons, 5 August 2023.

Your turn

- *Look:* at this, and find औ in it

  औषधम्

- *Trace it:* औ three times, saying *au* as you finish each one
- *Look:* at औषधं कुत्र अस्ति? and find औ once more

Before you move on

Which character is this — औ? What sound does it carry? (*au.*) Its form on a consonant? (ौ.) Which word did it come from? (औषधम्, "a medicine".)

281.6 Review — at the station, and when things go wrong

Say "where is the station?" and "go straight on". (*sthānakaṃ kutra asti?*, *ṛju gacchatu.*)

Your turn

- *Say it:* One ticket, please. How much is it?
- *Say it:* When is the next train? It will leave in the evening.

- *Say it:* My bag is lost, and the train has gone.
- *Say it:* I am ill. Where is the medicine?
- *Say it:* Please help.
- *Read it:* औषधम् aloud, and name the sign its first vowel takes on a consonant

Before you move on

द्वे यानपत्रे: how many tickets? (Two.) मम माला नष्टा: why नष्टा? (माला is feminine.) Now the other way round: "the next bus"? (अग्रिमं लोकयानम्.)

Chapter 282

How I Feel, and What I Hope For

Modes: **voice** (3) **eyes** (1) **Hands-free start:** the first 3 of 4 lessons.

> ***By the end of this chapter:*** I can say how I feel, with the adjective agreeing with me (ahaṃ prasannaḥ / prasannā asmi), and what I want to become (ahaṃ vaidyaḥ bhavitum icchāmi; mama svapnaḥ asti …).
>
> *Complete SA-R282-feelings-and-hopes: say how you feel and what you hope to become.*

282.1 अहं प्रसन्नः अस्मि (ahaṃ prasannaḥ asmi) — how I feel

Before the new one: say "I am ill". (*ahaṃ rugṇaḥ asmi.*) And a woman? (*ahaṃ rugṇā asmi.*) Feelings work the same way.

You'll want to know: the feeling follows the speaker

अहं प्रसन्नः अस्मि।

ahaṃ prasannaḥ asmi. — "I am pleased."

अहं प्रसन्ना अस्मि।

ahaṃ prasannā asmi. — "I am pleased."

The first is a man speaking, the second a woman: the word for the feeling takes the speaker's gender, *-aḥ* or *-ā*.

मीरा भीता अस्ति।

mīrā bhītā asti. — "Mira is afraid."

अरुणः श्रान्तः अस्ति।

aruṇaḥ śrāntaḥ asti. — "Arun is tired."

ते कुपिताः सन्ति।

te kupitāḥ santi. — "They are angry."

सन्ति (*santi*) is "are", for several.

You'll want to know: happy, and what I like

सुखी (*sukhī*), "happy", and दुःखी (*duḥkhī*), "unhappy", end in *-ī* for a man.

अद्य अहं सुखी अस्मि।

adya ahaṃ sukhī asmi. — "Today I am happy."

What you like keeps the frame you know, with मह्यम् (*mahyam*), "to me":

मह्यं संगीतं रोचते।

mahyaṃ saṅgītaṃ rocate. — "I like music."

A feeling with its reason:

अहं प्रसन्नः अस्मि,

ahaṃ prasannaḥ asmi,

यतः अरुणः आगतवान्।

yataḥ aruṇaḥ āgatavān. — "I am pleased, because Arun has come."

Your turn

Say these aloud:

- "I am afraid" — *ahaṃ bhītaḥ asmi*
- "I am tired" — *ahaṃ śrāntaḥ asmi*
- "I am angry" — *ahaṃ kupitaḥ asmi*

Before you move on

"I am pleased", said by a woman? (अहं प्रसन्ना अस्मि.) "Mira is afraid"? (मीरा भीता अस्ति.) "I like music"? (मह्यं संगीतं रोचते.)

282.2 भवितुम् इच्छामि (bhavitum icchāmi) — what I want to become

Say "I am pleased". (*ahaṃ prasannaḥ asmi.*) Then "I want to go". (*ahaṃ gantum icchāmi.*) Now say what you want to become.

You'll want to know: भवितुम् इच्छामि

अहं वैद्यः भवितुम् इच्छामि।

ahaṃ vaidyaḥ bhavitum icchāmi. — "I want to become a doctor."

भवितुम् (*bhavitum*) is the *-tum* form of भवति: "to become". What you become stays in the same case as you: वैद्यः, like अहम्.

सः अध्यापकः भवितुम् इच्छति।

saḥ adhyāpakaḥ bhavitum icchati. — "He wants to become a teacher."

अहं नगरं गन्तुम् इच्छामि।

ahaṃ nagaraṃ gantum icchāmi. — "I want to go to the city."

You'll want to know: मम स्वप्नः अस्ति

मम स्वप्नः अस्ति (*mama svapnaḥ asti*), "my dream is", opens a hope; यत् gives what it is:

मम स्वप्नः अस्ति,

mama svapnaḥ asti,

यत् अहं वैद्यः भविष्यामि।

yat ahaṃ vaidyaḥ bhaviṣyāmi. — "My dream is that I will become a doctor."

मीरायाः स्वप्नः अस्ति,

mīrāyāḥ svapnaḥ asti,

यत् सा नगरं गमिष्यति।

yat sā nagaraṃ gamiṣyati. — "Mira's dream is that she will go to the city."

मीरायाः (*mīrāyāḥ*) is "Mira's".

Your turn

Say these aloud:

- "I want to become a doctor" — *ahaṃ vaidyaḥ bhavitum icchāmi*
- "I want to become a teacher" — *aham adhyāpakaḥ bhavitum icchāmi*
- "I want to become a student" — *ahaṃ chātraḥ bhavitum icchāmi*

Before you move on

"To become"? (भवितुम्.) "He wants to become a teacher"? (सः अध्यापकः भवितुम् इच्छति.) "My dream is that …"? (मम स्वप्नः अस्ति, यत् …)

282.3 उत्सुकः (utsukaḥ) — eager

Before the new one: say "I want to become a doctor". (*ahaṃ vaidyaḥ bhavitum icchāmi.*)

You'll want to know: उत्सुकः

उत्सुकः — *utsukaḥ* — "eager". Like every feeling, it takes the gender of the one who feels it: उत्सुका (*utsukā*) for a woman.

अहम् उत्सुकः अस्मि।

aham utsukaḥ asmi. — "I am eager."

मीरा उत्सुका अस्ति।

mīrā utsukā asti. — "Mira is eager."

अहं नगरं द्रष्टुम् उत्सुकः अस्मि।

ahaṃ nagaraṃ draṣṭum utsukaḥ asmi. — "I am eager to see the city."

द्रष्टुम् (*draṣṭum*), "to see", is the *-tum* form of पश्यति, from the root √dṛś of द्रक्ष्यति.

The word, taken apart — its roots and family

उत्सुकः (*utsukaḥ*) is built from उत् (*ut*), "apart", and सु (*su*), "well", with the ending *-ka*, as Monier-Williams takes it apart; he gives its senses as restless and uneasy, then eager and longing for something.

Your turn

Say these aloud:

- *utsukaḥ*
- "The children are eager" — *bālāḥ utsukāḥ santi*
- "I am eager to see the city" — *ahaṃ nagaraṃ draṣṭum utsukaḥ asmi*

Before you move on

What does उत्सुकः mean? ("Eager".) "Mira is eager"? (मीरा उत्सुका अस्ति.)

282.4 Review — feelings and hopes

Say "my bag is lost" and "one ticket, please". (*mama syūtaḥ naṣṭaḥ, ekaṃ yānapatraṃ dadātu.*)

Your turn

Say these aloud:

- I am pleased today, because Mira has come.
- Mira is tired, and Arun is afraid.
- I like music.
- I want to become a teacher.
- My dream is that I will see the city. I am eager.

Before you move on

श्रान्ता: a man or a woman? (A woman.) भवितुम् is the *-tum* form of which verb? (भवति.) Now the other way round: "I am eager", said by a woman? (अहम् उत्सुका अस्मि.)

Chapter 283

Bigger, Better, and How Long

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can compare two things (nagaraṃ grāmāpekṣayā mahat; grāmāt mahattaram), say which is best (sarveṣu … śreṣṭhaḥ), and say how long something lasts (prātaḥ ārabhya rātriparyantam; ekāṃ horām).
>
> *Complete SA-R283-comparing-and-time: compare two things, say which is best, and say how long something lasted.*

283.1 अपेक्षया (apekṣayā) — compared with

Before the new one: say "big". (*mahat.*) Then say "the city is big". (*nagaraṃ mahat asti.*) Now set it beside the village.

You'll want to know: Y-अपेक्षया

नगरं ग्रामापेक्षया महत्।

nagaraṃ grāmāpekṣayā mahat. — "The city is bigger than the village."

अपेक्षया (*apekṣayā*), "compared with", joins the end of the thing compared, as one word: *grāma* and *apekṣayā* meet as ग्रामापेक्षया (*grāmāpekṣayā*), two short *a*s making one long *ā*. Monier-Williams gives *apekṣayā* as "with regard to", at the end of a compound: with regard to the village, the city is big. The describing word stays as it is: महत्, "big", says "bigger" here.

उद्यानं वनापेक्षया सुन्दरम्।

udyānaṃ vanāpekṣayā sundaram. — "The garden is more beautiful than the forest."

धूमयानं लोकयानापेक्षया शीघ्रं गच्छति।

dhūmayānaṃ lokayānāpekṣayā śīghraṃ gacchati. — "The train goes faster than the bus."

You'll want to know: -आत् with -तर, and the best

The other way puts the thing compared in the *-āt* form you know from भारतात् (*bhāratāt*), "from India", and adds **-तर** (*-tara*), "more", to the describing word (Pāṇini 2.3.42):

नगरं ग्रामात् महत्तरम्।

nagaraṃ grāmāt mahattaram. — "The city is bigger than the village."

उद्यानं वनात् सुन्दरतरम्।

udyānaṃ vanāt sundarataram. — "The garden is more beautiful than the forest."

For the best of all, सर्वेषु (*sarveṣu*), "among all", with श्रेष्ठः (*śreṣṭhaḥ*), "best":

सर्वेषु फलेषु आम्रं श्रेष्ठम्।

sarveṣu phaleṣu āmraṃ śreṣṭham. — "Of all fruits, the mango is the best."

सर्वेषु मीरा श्रेष्ठा।

sarveṣu mīrā śreṣṭhā. — "Mira is the best of all."

Your turn

Say these aloud:

- "The house is bigger than the shop" — *gṛham āpaṇāpekṣayā mahat*
- "The garden is bigger than the shop" — *udyānam āpaṇāpekṣayā mahat*
- "The city is bigger than the shop" — *nagaram āpaṇāpekṣayā mahat*

Before you move on

"Compared with the village"? (ग्रामापेक्षया.) "Bigger than the village", the other way? (ग्रामात् महत्तरम्.) "The best"? (श्रेष्ठः.)

283.2 आरभ्य · पर्यन्तम् (ārabhya · paryantam) — from, until, and how long

Say "morning" and "night". (*prātaḥ*, *rātriḥ*.) Then say "the city is bigger than the village". (*nagaraṃ grāmāpekṣayā mahat*.)

You'll want to know: from … until

प्रातः आरभ्य रात्रिपर्यन्तम्।

prātaḥ ārabhya rātriparyantam. — "From morning until night."

आरभ्य (*ārabhya*) is the *-ya* form of आरभते (*ārabhate*), "begins": "beginning from", so "from, since". पर्यन्तम् (*paryantam*) is "up to, until", and it joins the end of the time it reaches, as अपेक्षया joins its word: रात्रिपर्यन्तम् (*rātriparyantam*), "until night". Monier-Williams gives *paryanta*, "extending as far as", at the end of a compound.

अहं रात्रिपर्यन्तं कार्यं करोमि।

ahaṃ rātriparyantaṃ kāryaṃ karomi. — "I work until night."

सः ह्यः आरभ्य रुग्णः अस्ति।

saḥ hyaḥ ārabhya rugṇaḥ asti. — "He has been ill since yesterday."

You'll want to know: for how long

How long a thing lasts needs no word for "for": the time takes the *-am* form, the form of the thing a verb acts on (Pāṇini 2.3.5). होरा (*horā*), "an hour", becomes होराम्:

अहम् एकां होरां पठामि।

aham ekāṃ horāṃ paṭhāmi. — "I read for an hour."

सः सर्वं दिनं कार्यं करोति।

saḥ sarvaṃ dinaṃ kāryaṃ karoti. — "He works the whole day."

For two, the dual: द्वौ मासौ (*dvau māsau*), "two months". स्थितवती (*sthitavatī*) is the past of तिष्ठति, "stays":

सा द्वौ मासौ ग्रामे स्थितवती।

sā dvau māsau grāme sthitavatī. — "She stayed in the village for two months."

Your turn

Say these aloud:

- "I read for an hour" — *aham ekāṃ horāṃ paṭhāmi*
- "I read the whole day" — *ahaṃ sarvaṃ dinaṃ paṭhāmi*
- "I read until night" — *ahaṃ rātriparyantaṃ paṭhāmi*

Before you move on

"From morning"? (प्रातः आरभ्य.) "Until night"? (रात्रिपर्यन्तम्.) "For an hour"? (एकां होराम्.) Which word means "for"? (None: the time says it by its form.)

283.3 ईदृशः (īdṛśaḥ) — such, of this kind

Before the new one: say "the mango is the best of all fruits". (*sarveṣu phaleṣu āmraṃ śreṣṭham.*)

You'll want to know: ईदृशः

ईदृशः — *īdṛśaḥ* — "such, of this kind". It agrees with its noun: ईदृशम् (*īdṛśam*) for a neuter noun, ईदृशी (*īdṛśī*) for a feminine one.

ईदृशः अनुभवः मह्यं रोचते।

īdṛśaḥ anubhavaḥ mahyaṃ rocate. — "I like an experience like this."

ईदृशं नगरम् अहं न दृष्टवान्।

īdṛśaṃ nagaram ahaṃ na dṛṣṭavān. — "I have not seen a city like this."

The word, taken apart — its roots and family

ईदृशः (*īdṛśaḥ*) is built from *ī*, "this", and the root √dṛś, "to see", the root of द्रक्ष्यति: "looking like this" (CDIAL 1611 gives the two parts). Monier-Williams compares its ending *-dṛśa* with the *-li-* of Latin *tālis*, "such". It lives on as Hindi *aisā*, "such, like this" (CDIAL 1611).

Your turn

Say these aloud:

- *īdṛśaḥ*
- "Such an experience" — *īdṛśaḥ anubhavaḥ*
- "Such a city" — *īdṛśaṃ nagaram*

Before you move on

What does ईदृशः mean? ("Such, of this kind".) "Such a city"? (ईदृशं नगरम्.)

283.4 ई — the long ī, standing alone

Before the new one: say ईदृशः (*īdṛśaḥ*), "such". Then name the sign ी and the letter इ. (*ī*, *i*.)

The long sign ी has a standing form, and ईदृशः opens with it.

Script you'll notice: ई

ई — *ī*.

It is an **independent vowel**: इ (*i*) made long. On a consonant the same vowel is the sign ी, as in नदी (*nadī*).

What it is made of:

- the continuous body of इ

- a separate upper curl
- the top shirorekhā

You have met it here:

- ईदृशः *īdṛśaḥ* — such

Writing: ई

How ई is written, stroke by stroke

- **1.** descend the upright, turn through both bowls, and finish down-right through the tail without lifting
- **2.** lift at the headline junction and sweep the upper curl upward, left, and around to the right
- **3.** lift and draw the top shirorekhā left-to-right

Pen lifts: 2. The pen comes up 2 times and no more.

Verified modern printed teaching form; everyday handwriting may simplify the curves.

This is one attested teaching order and not a national standard — handwriting here is taught with school-to-school variation. Source: Saurmandal, 'Devanagari ई stroke order.svg', panels 1–3, Wikimedia Commons, 5 August 2023.

Your turn

- *Look:* at this, and find ई in it

  ईदृशः

- *Trace it:* ई three times, saying *ī* as you finish each one
- *Look:* at ईदृशं नगरम् and find ई once more

Before you move on

Which character is this — ई? What sound does it carry? (*ī*.) How is it unlike इ? (One more curl above, and a long sound.) Which word did it come from? (ईदृशः, "such".)

283.5 Review — bigger, better, and how long

Say "I am pleased", then "my dream is that I will become a doctor". (*ahaṃ prasannaḥ asmi*; *mama svapnaḥ asti, yat ahaṃ vaidyaḥ bhaviṣyāmi.*)

Your turn

- *Say it:* The city is bigger than the village.
- *Say it:* The train goes faster than the bus.
- *Say it:* Of all fruits, the mango is the best.
- *Say it:* I worked from morning until night.
- *Say it:* She stayed in the village for two months. I like such an experience.
- *Read it:* ईदृशः aloud, and name the sign its first vowel takes on a consonant

Before you move on

ग्रामापेक्षया or ग्रामात्, with महत्तरम्? (ग्रामात्.) एकां होराम्: one hour, or the hour itself? (For one hour.) Now the other way round: "until"?

(पर्यन्तम्.)

Chapter 284

If It Rains

Modes: **voice** (3) **eyes** (1) **Hands-free start:** the first 3 of 4 lessons.

> ***By the end of this chapter:*** I can say what follows if something happens (yadi … tarhi …), with the present or the future in both halves, and what will happen otherwise (anyathā).
>
> *Complete SA-R284-if-and-otherwise: say what follows if something happens, and what happens otherwise.*

284.1 यदि ... तर्हि ... (yadi ... tarhi ...) — if, then

Before the new one: say "if" and "then, in that case". (*yadi*, *tarhi*.) You have both words; this chapter puts them to work.

You'll want to know: यदि ... तर्हि

यदि (*yadi*), "if", opens the condition; तर्हि (*tarhi*), "then", opens what follows from it:

> यदि वर्षा भवति,
>
> *yadi varṣā bhavati,*
>
> तर्हि अहं गृहे तिष्ठामि।
>
> *tarhi ahaṃ gṛhe tiṣṭhāmi.* — "If it rains, I stay at home."
>
> यदि सः आगच्छति,

yadi saḥ āgacchati,

तर्हि वयं खादामः।

tarhi vayaṃ khādāmaḥ. — "If he comes, we eat."

You'll want to know: if not, and the condition second

"If not" puts न before the verb of the यदि half:

यदि सः न आगच्छति,

yadi saḥ na āgacchati,

तर्हि अहं गच्छामि।

tarhi ahaṃ gacchāmi. — "If he does not come, I go."

The condition can also come second, with no तर्हि:

अहं गच्छामि, यदि सः न आगच्छति।

ahaṃ gacchāmi, yadi saḥ na āgacchati. — "I go if he does not come."

Your turn

Say these aloud:

- "If he comes, we eat" — *yadi saḥ āgacchati, tarhi vayaṃ khādāmaḥ*
- "If he comes, we read" — *yadi saḥ āgacchati, tarhi vayaṃ paṭhāmaḥ*
- "If he comes, we play" — *yadi saḥ āgacchati, tarhi vayaṃ krīḍāmaḥ*

Before you move on

"If"? (यदि.) "Then"? (तर्हि.) "If he does not come"? (यदि सः न आगच्छति.)

284.2 यदि वर्षा भविष्यति (yadi varṣā bhaviṣyati) — if it happens, it will follow

Say "if it rains, I stay at home". (*yadi varṣā bhavati, tarhi ahaṃ gṛhe tiṣṭhāmi.*) That is what happens every time. Now say what will happen tomorrow.

You'll want to know: the future in both halves

For one real thing ahead, both halves take the future, as Lanman's vocabulary shows for यदि:

यदि वर्षा भविष्यति,

yadi varṣā bhaviṣyati,

तर्हि अहं गृहे स्थास्यामि।

tarhi ahaṃ gṛhe sthāsyāmi. — "If it rains, I will stay at home."

यदि समयः भविष्यति,

yadi samayaḥ bhaviṣyati,

तर्हि अहम् आगमिष्यामि।

tarhi aham āgamiṣyāmi. — "If there is time, I will come."

यदि भवान् आगमिष्यति,

yadi bhavān āgamiṣyati,

तर्हि मीरा प्रसन्ना भविष्यति।

tarhi mīrā prasannā bhaviṣyati. — "If you come, Mira will be pleased."

You'll want to know: if ..., then do this

After a condition in the present, the second half can ask or advise, with **-तु** or **-एत्**:

> **यदि भवान् रुग्णः अस्ति,**
>
> *yadi bhavān rugṇaḥ asti,*
>
> **तर्हि वैद्यं गच्छतु।**
>
> *tarhi vaidyaṃ gacchatu.* — "If you are ill, please go to the doctor."
>
> **यदि धूमयानं गतम्,**
>
> *yadi dhūmayānaṃ gatam,*
>
> **तर्हि भवान् लोकयानेन गच्छेत्।**
>
> *tarhi bhavān lokayānena gacchet.* — "If the train has gone, you should go by bus."

लोकयानेन (*lokayānena*) is "by bus": *-ena*, "by", as in **मतेन**.

Your turn

Say these aloud:

- "If there is time, I will come" — *yadi samayaḥ bhaviṣyati, tarhi aham āgamiṣyāmi*
- "If there is time, I will read" — *yadi samayaḥ bhaviṣyati, tarhi ahaṃ paṭhiṣyāmi*
- "If there is time, I will write" — *yadi samayaḥ bhaviṣyati, tarhi ahaṃ lekhiṣyāmi*

Before you move on

"If it rains tomorrow, I will stay at home"? (**यदि श्वः वर्षा भविष्यति, तर्हि अहं गृहे स्थास्यामि**.) Which form goes in both halves? (The future.) "If

you are ill, please go to the doctor"? (यदि भवान् रुग्णः अस्ति, तर्हि वैद्यं गच्छतु.)

284.3 अन्यथा (anyathā) — otherwise

Before the new one: say "if there is time, I will come". (*yadi samayaḥ bhaviṣyati, tarhi aham āgamiṣyāmi.*) Then say "quickly". (*śīghram.*)

You'll want to know: अन्यथा

अन्यथा — *anyathā* — "otherwise": if not, then this.

शीघ्रं गच्छतु,

śīghraṃ gacchatu,

अन्यथा धूमयानं गमिष्यति।

anyathā dhūmayānaṃ gamiṣyati. — "Go quickly, otherwise the train will leave."

कृपया शीघ्रम् आगच्छतु,

kṛpayā śīghram āgacchatu,

अन्यथा अहं गमिष्यामि।

anyathā ahaṃ gamiṣyāmi. — "Please come quickly, otherwise I will leave."

The word, taken apart — its roots and family

अन्यथा (*anyathā*) is built on अन्य (*anya*), "other", with *-thā*, "in the way of": "in another way". Monier-Williams gives it as "otherwise, in a different manner", and also "in the contrary case", the sense here.

Your turn

Say these aloud:

- *anyathā*
- "Go quickly, otherwise the train will leave" — *śīghraṃ gacchatu, anyathā dhūmayānaṃ gamiṣyati*
- "You should take the medicine, otherwise you will be ill" — *bhavān auṣadhaṃ pibet, anyathā rugṇaḥ bhaviṣyati*

Before you move on

What does अन्यथा mean? ("Otherwise".) "Otherwise I will leave"? (अन्यथा अहं गमिष्यामि.)

284.4 Review — if, and otherwise

Say "the train goes faster than the bus". (*dhūmayānaṃ lokayānāpekṣayā śīghraṃ gacchati.*) Then "from morning until night". (*prātaḥ ārabhya rātriparyantam.*)

Your turn

Say these aloud:

- If it rains, I stay at home.
- If he does not come, we will go.
- If there is time tomorrow, I will see the city.
- If you are tired, please sit down.
- Come quickly, otherwise the bus will leave.

Before you move on

यदि or तर्हि, to open the condition? (यदि.) For tomorrow, which form in both halves? (The future.) Now the other way round: what does अन्यथा add? ("Otherwise": what happens if not.)

Chapter 285

It Depends, and What Would Have Been

Modes: **voice** (4) **pen** (1) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can say what something depends on (tat samayādhīnam) and what would have happened (yadi samayaḥ abhaviṣyat, tarhi aham āgamiṣyam), and tell a short trip in six connected lines.
>
> *Complete SA-R285-depends-and-would: say what something depends on and what would have happened.*

285.1 अधीनम् (adhīnam) — depending on

Before the new one: say "if there is time, I will come". (*yadi samayaḥ bhaviṣyati, tarhi aham āgamiṣyāmi.*) A shorter answer says only what it depends on.

You'll want to know: अधीनम्

अधीनम् — *adhīnam* — "depending on". It comes at the end of what it depends on, joined to it as one word: *samaya* and *adhīnam* meet as समयाधीनम् (*samayādhīnam*).

> तत् समयाधीनम्।
>
> *tat samayādhīnam.* — "That depends on time."
>
> सर्वं वर्षाधीनम्।

sarvaṃ varṣādhīnam. — "Everything depends on the rain."

एतत् धनाधीनम्।

etat dhanādhīnam. — "This depends on money."

The word, taken apart — its roots and family

अधीनम् (*adhīnam*) is built on अधि (*adhi*), "over, on": what rests on something. Monier-Williams gives *adhīna* as "resting on", and "depending on, subject to", always at the end of a compound, and Macdonell gives it the same way, which is why this book joins it to the word before it. Pali kept it as *adhīna*, "dependent on" (CDIAL 266).

Your turn

Say these aloud:

- *adhīnam*
- "That depends on time" — *tat samayādhīnam*
- "That depends on the rain" — *tat varṣādhīnam*

Before you move on

What does अधीनम् mean? ("Depending on".) "It depends on money"? (तत् धनाधीनम्.)

285.2 तत् समयाधीनम् (tat samayādhīnam) — it depends

Say "that depends on time". (*tat samayādhīnam.*) Then say "if it rains, I stay at home". (*yadi varṣā bhavati, tarhi ahaṃ gṛhe tiṣṭhāmi.*)

You'll want to know: what depends sets the ending

-अधीन describes the thing that depends, so it takes that thing's gender: *-aḥ* for a masculine noun, *-ā* for a feminine one, *-am* for a neuter one.

मम निर्णयः धनाधीनः।

mama nirṇayaḥ dhanādhīnaḥ. — "My decision depends on money."

यात्रा वर्षाधीना।

yātrā varṣādhīnā. — "The trip depends on the rain."

कार्यं समयाधीनम्।

kāryaṃ samayādhīnam. — "The work depends on time."

निर्णयः is masculine, so **-अधीनः**; यात्रा is feminine, so **-अधीना**.

You'll want to know: it depends, and then the condition

Say what it depends on, then lay out the condition with यदि … तर्हि:

मम यात्रा वर्षाधीना।

mama yātrā varṣādhīnā. — "My trip depends on the rain."

यदि वर्षा न भविष्यति,

yadi varṣā na bhaviṣyati,

तर्हि वयं गमिष्यामः।

tarhi vayaṃ gamiṣyāmaḥ. — "If it does not rain, we will go."

तत् भवदधीनम्।

tat bhavadadhīnam. — "That is up to you."

भवदधीनम् (*bhavadadhīnam*) is *bhavat*, the stem of भवान्, with *adhīnam*: "depending on you", that is, "up to you".

Your turn

Say these aloud:

- "My decision depends on money" — *mama nirṇayaḥ dhanādhīnaḥ*
- "My decision depends on time" — *mama nirṇayaḥ samayādhīnaḥ*
- "My decision depends on the rain" — *mama nirṇayaḥ varṣādhīnaḥ*

Before you move on

"The trip depends on the rain"? (यात्रा वर्षाधीना.) Why -अधीना? (यात्रा is feminine.) "That is up to you"? (तत् भवदधीनम्.)

285.3 यदि समयः अभविष्यत् (yadi samayaḥ abhaviṣyat) — what would have been

Say "if there is time, I will come". (*yadi samayaḥ bhaviṣyati, tarhi aham āgamiṣyāmi.*) Then say "he went", the old way. (*saḥ agacchat.*) The next form puts those two together.

You'll want to know: the conditional

यदि समयः अभविष्यत्,

yadi samayaḥ abhaviṣyat,

तर्हि अहम् अगमिष्यम्।

tarhi aham agamiṣyam. — "If there had been time, I would have gone."

अभविष्यत् (*abhaviṣyat*), "would have been", is the future stem भविष्य- with the अ- and the *-t* of अगच्छत् around it. For "I" the ending is *-am*: अगमिष्यम् (*agamiṣyam*), "I would have gone". It says that the thing did not happen (Pāṇini 3.3.139; the अ-, 6.4.71).

the future	the conditional
भविष्यति, will be	अभविष्यत्, would have been
गमिष्यति, will go	अगमिष्यत्, would have gone
करिष्यति, will do	अकरिष्यत्, would have done
गमिष्यामि, I will go	अगमिष्यम्, I would have gone

After the prefix आ-, the अ- melts into its long *ā*: आगमिष्यम् (*āgamiṣyam*), "I would have come".

यदि समयः अभविष्यत्,

yadi samayaḥ abhaviṣyat,

तर्हि अहम् आगमिष्यम्।

tarhi aham āgamiṣyam. — "If there had been time, I would have come."

You'll want to know: both halves, and "if he were to"

Both halves take it, for a past that did not come about:

यदि धनम् अभविष्यत्,

yadi dhanam abhaviṣyat,

तर्हि सः कार्यम् अकरिष्यत्।

tarhi saḥ kāryam akariṣyat. — "If there had been money, he would have done the work."

You may also hear यदि with the *-et* of advice, "if he were to …"; meet it, and say the conditional yourself:

यदि सः आगच्छेत्,

yadi saḥ āgacchet,

तर्हि मीरा प्रसन्ना भवेत्।

tarhi mīrā prasannā bhavet. — "If he were to come, Mira would be pleased."

Your turn

Say these aloud:

- "If there had been time, I would have gone" — *yadi samayaḥ abhaviṣyat, tarhi aham agamiṣyam*
- "If there had been time, he would have gone" — *yadi samayaḥ abhaviṣyat, tarhi saḥ agamiṣyat*
- "If there had been time, he would have done it" — *yadi samayaḥ abhaviṣyat, tarhi saḥ akariṣyat*

Before you move on

"Would have been"? (अभविष्यत्.) "I would have come"? (आगमिष्यम्.) Did the thing happen? (No: that is what the conditional says.)

285.4 Six lines about a trip

This task asks for six lines that tell a story: a trip, real or invented.

Pick one reader: Mira, or a friend you name. Say घटितम्, दृढः, औषधम् and ईदृशः aloud; one of them will go in.

What to know first

A told story is not a list of events. It has **events** in the past of *-vān* and *-vatī*, kept in order with प्रथमम्, ततः, अनन्तरम् and अन्ते, and joined with *-tvā* or *-ya*. It has a **scene**, with स्म, or with यदा … तदा. It has a **reason**, with यतः or **-**कारणात्, and a **feeling**, with अहं प्रसन्नः अस्मि or प्रसन्ना.

A good one ends by looking at what might have been: यदि … अभविष्यत्, तर्हि ….

Writing — connected composition

On paper, in Devanagari, write **six lines** to your reader about the trip, one line for each of these:

1. what happened, and when: ह्यः अहं **...** गतवान्। or गतवती।;
2. the scene as it began: यदा अहं **...** स्म, तदा **...**;
3. what happened next, in order: प्रथमम् or ततः, with a *-tvā* or *-ya* form, and one thing that went wrong: **...** नष्टः or धूमयानं गतम्;
4. why, with यतः **...** or **...**कारणात्;
5. how it ended and how you felt, with अन्ते and अहम् … अस्मि: प्रसन्नः, श्रान्ता, उत्सुकः;
6. what would have been, with यदि **...** अभविष्यत्, तर्हि **...**, and one word with घ, ढ, औ or ई: घटितम्, दृढः, औषधम्, ईदृशः.

There is no model in this lesson. Use only words and forms this book has taught, written whole, with the one join you know: गृहं गच्छामि. The work is choosing the right past for each line, and joining the lines.

Before you move on

Now read your lines as you read Mira's day. Mark every verb **e** for an event and **s** for the scene: line two **s**, lines one and three mostly **e**. Then three checks. A past in *-vān* or *-vatī* follows the one who did it: अहं गतवती, if you are a woman. A verb with a prefix takes *-ya*: प्रविश्य, उपविश्य. A feeling takes your gender: प्रसन्नः or प्रसन्ना.
Last, read line six alone. Does its यदि half say what did not happen, with अभविष्यत्?

285.5 Review — it depends, and what would have been

Say "if he does not come, I go", and "if you are ill, please go to the doctor". (*yadi saḥ na āgacchati, tarhi ahaṃ gacchāmi*; *yadi bhavān rugṇaḥ asti, tarhi vaidyaṃ gacchatu.*) Then "otherwise". (*anyathā.*)

Your turn

Say these aloud:

- That depends on time.
- The trip depends on the rain.
- My decision depends on money.
- If there had been time, I would have come.
- If there had been money, he would have done the work.

Before you move on

वर्षाधीना: what depends, a masculine or a feminine thing? (A feminine one, such as यात्रा.) अभविष्यत्: did it happen? (No.) Now the other way round: "I would have gone"? (अगमिष्यम्.) "That is up

to you”? (तत् भवदधीनम्.)

Chapter 286

A Theft in the Village

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can say what was stolen and who saw it.
>
> *Complete the last lesson of chapter 286: I can say what was stolen and who saw it.*

286.1 चौर्यम् (cauryam) — a theft

Before the new one: say the Sanskrit for radio, then the Sanskrit for the internet.

You'll want to know: चौर्यम्

चौर्यम् — *cauryam* — "a theft".

> ह्यः रात्रौ ग्रामे चौर्यं घटितम्।
>
> *hyaḥ rātrau grāme cauryaṃ ghaṭitam.*
>
> A theft took place in the village last night.

A neuter noun.

The word, taken apart — its roots and family

चौर्यम् (*cauryam*) is built on *caura*, "a thief", with the ending *-ya* that makes a noun of the deed; MW gives *caurya* as the act of a thief, theft (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: cauryam*
- *Say it: cauryam*, once more
- *Say it: hyaḥ rātrau grāme cauryaṃ ghaṭitam.* — A theft took place in the village last night.
- *Recall:* say the Sanskrit for radio, then the Sanskrit for the internet, then say *cauryam* again

Before you move on

What does चौर्यम् mean? ("A theft".) Say it once more.

286.2 यामिकः (yāmikaḥ) — a night watchman

Before the new one: say the Sanskrit for the internet, then the Sanskrit for a theft.

You'll want to know: यामिकः

यामिकः — *yāmikaḥ* — "a night watchman".

ग्रामः रात्रौ यामिकाधीनः।

grāmaḥ rātrau yāmikādhīnaḥ.

At night the village depends on its watchman.

A masculine noun.

The word, taken apart — its roots and family

यामिकः (*yāmikaḥ*) is built on *yāma*, "a watch of the night" (MW: a turn of three hours), with the ending *-ika*; MW gives *yāmika* as a night-watcher or watchman (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: yāmikaḥ*
- *Say it: yāmikaḥ*, once more
- *Say it: grāmaḥ rātrau yāmikādhīnaḥ.* — At night the village depends on its watchman.
- *Recall:* say the Sanskrit for the internet, then the Sanskrit for a theft, then say *yāmikaḥ* again

Before you move on

What does यामिकः mean? ("A night watchman".) Say it once more.

286.3 अपहरति (apaharati) — makes off with; snatches away

Before the new one: say the Sanskrit for a theft, then the Sanskrit for a night watchman.

You'll want to know: अपहरति

अपहरति — *apaharati* — "makes off with; snatches away".

चौरः धनम् अपहरति।

cauraḥ dhanam apaharati.

The thief makes off with the money.

Past (he …): सः धनम् अपहृतवान्, *saḥ dhanam apahṛtavān.*

The word, taken apart — its roots and family

अपहरति (*apaharati*) is built from the prefix *apa*, "away", and the root √hṛ, "to take"; MW gives *apa-hṛ* as to snatch away or plunder (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: apaharati*
- *Say it: apaharati*, once more
- *Say it: cauraḥ dhanam apaharati.* — The thief makes off with the money.
- *Recall:* say the Sanskrit for a theft, then the Sanskrit for a night watchman, then say *apaharati* again

Before you move on

What does अपहरति mean? ("Makes off with; snatches away".) Say it once more.

286.4 साक्षी (sākṣī) — a witness

Before the new one: say the Sanskrit for a night watchman, then the Sanskrit for makes off with.

You'll want to know: साक्षी

साक्षी — *sākṣī* — "a witness".

साक्षी चौरं न दृष्टवान्।

sākṣī cauraṃ na dṛṣṭavān.

The witness did not see the thief.

A masculine or feminine noun, by the person meant.

The word, taken apart — its roots and family

साक्षी (*sākṣī*) is the nominative of *sākṣin*, which MW gives as one who sees with his own eyes, an eye-witness, and a witness in law; it sits beside MW's *sākṣāt*, "with one's own eyes", but MW gives no derivation in the entry, so its origin is left uncertain here (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: sākṣī*
- *Say it: sākṣī*, once more
- *Say it: sākṣī cauraṃ na dṛṣṭavān.* — The witness did not see the thief.
- *Recall:* say the Sanskrit for a night watchman, then the Sanskrit for makes off with, then say *sākṣī* again

286.5 पलायते (palāyate) — runs away

Before the new one: say the Sanskrit for makes off with, then the Sanskrit for a witness.

You'll want to know: पलायते

पलायते — *palāyate* — "runs away".

चौरः शीघ्रं पलायते।

cauraḥ śīghraṃ palāyate.

The thief runs away fast.

Past (he …): सः शीघ्रं पलायितवान्, *saḥ śīghraṃ palāyitavān.*
Future: पलायिष्यते, *palāyiṣyate.*

The word, taken apart — its roots and family

पलायते (*palāyate*) is built on *palā*, a form of *parā*, "away", and the root √ay, "to go": to go away, flee (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: palāyate*
- *Say it: palāyate*, once more
- *Say it: cauraḥ śīghraṃ palāyate.* — The thief runs away fast.
- *Recall:* say the Sanskrit for makes off with, then the Sanskrit for a witness, then say *palāyate* again

Before you move on

What does पलायते mean? ("Runs away".) Say it once more.

yāmikaḥ sarvāṃ rātriṃ jāgarti.

The watchman stays awake all night.

Past (he …): सः रात्रौ जागरितवान्, *saḥ rātrau jāgaritavān.*

The word, taken apart — its roots and family

जागर्ति (*jāgarti*) comes from the root √jāgṛ, "to be awake, watch"; MW compares Greek *egeirō* and Latin *vigilo* (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: jāgarti*
- *Say it: jāgarti*, once more
- *Say it: yāmikaḥ sarvāṃ rātriṃ jāgarti.* — The watchman stays awake all night.
- *Recall:* say the Sanskrit for speed, then the Sanskrit for creeps up to, then say *jāgarti* again

Before you move on

What does जागर्ति mean? ("Stays awake; keeps watch".) Say it once more.

287.5 कोलाहलः (kolāhalaḥ) — an uproar

Before the new one: say the Sanskrit for creeps up to, then the Sanskrit for stays awake.

You'll want to know: कोलाहलः

कोलाहलः — *kolāhalaḥ* — "an uproar".

यदि कोलाहलः अभविष्यत्, तर्हि यामिकः आगमिष्यत्।

yadi kolāhalaḥ abhaviṣyat, tarhi yāmikaḥ āgamiṣyat.

If there had been an uproar, then the watchman would have come.

A masculine noun.

The word, taken apart — its roots and family

कोलाहलः (*kolāhalaḥ*) comes from the sound itself: MW marks *kolāhala* as onomatopoeic, a loud and confused noise of people or animals (MW).

What you've built

One more word for telling what happened.

Your turn

> ***By the end of this chapter:*** I can say what I saw and what would have been different.
>
> *Complete the last lesson of chapter 289: I can say what I saw and what would have been different.*

289.1 अभिजानाति (abhijānāti) — recognizes

Before the new one: say the Sanskrit for threatens, then the Sanskrit for a weapon.

You'll want to know: अभिजानाति

अभिजानाति — *abhijānāti* — "recognizes".

> यदि दीपः अभविष्यत्, साक्षी चौरम् अभ्यज्ञास्यत्।
>
> *yadi dīpaḥ abhaviṣyat, sākṣī cauram abhyajñāsyat.*
>
> If there had been a lamp, the witness would have recognized the thief.

Past (he ...): सः चौरम् अभिज्ञातवान्, *saḥ cauram abhijñātavān.*
Future: अभिज्ञास्यति, *abhijñāsyati.*

The word, taken apart — its roots and family

अभिजानाति (*abhijānāti*) is built from *abhi*, "towards", and the root √jñā, "to know"; MW gives *abhi-jñā* as to recognize or become aware of (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: abhijānāti*
- *Say it: abhijānāti*, once more
- *Say it: yadi dīpaḥ abhaviṣyat, sākṣī cauram abhyajñāsyat.* — If there had been a lamp, the witness would have recognized the thief.
- *Recall:* say the Sanskrit for threatens, then the Sanskrit for a weapon, then say *abhijānāti* again

Before you move on

What does अभिजानाति mean? ("Recognizes".) Say it once more.

289.2 वर्णयति (varṇayati) — describes

Before the new one: say the Sanskrit for a weapon, then the Sanskrit for recognizes.

The Curse and the Boon

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can tell how a curse was laid and what followed.
>
> *Complete the last lesson of chapter 333: I can tell how a curse was laid and what followed.*

333.1 शापः (śāpaḥ) — a curse

Before the new one: say the Sanskrit for penance, then the Sanskrit for curses.

You'll want to know: शापः

शापः — *śāpaḥ* — "a curse".

> ऋषेः शापेन राजा दुःखी भवति।
>
> *ṛṣeḥ śāpena rājā duḥkhī bhavati.*
>
> The seer's curse makes the king unhappy.

A masculine noun.

The word, taken apart — its roots and family

शापः (*śāpaḥ*) comes from the root √śap, "to curse", as in *śapati*; MW gives *śāpa* as a curse, malediction, oath (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: śāpaḥ*
- *Say it: śāpaḥ*, once more
- *Say it: ṛṣeḥ śāpena rājā duḥkhī bhavati.* — The seer's curse makes the king unhappy.
- *Recall:* say the Sanskrit for penance, then the Sanskrit for curses, then say *śāpaḥ* again

Before you move on

What does शापः mean? ("A curse".) Say it once more.

333.2 देवः (devaḥ) — a god

Before the new one: say the Sanskrit for curses, then the Sanskrit for a curse.

You'll want to know: देवः

देवः — *devaḥ* — "a god".

देवः ऋषेः तपः पश्यति।

devaḥ ṛṣeḥ tapaḥ paśyati.

The god sees the seer's penance.

A masculine noun.

The word, taken apart — its roots and family

देवः (*devaḥ*) comes from the root √div, "to shine"; MW gives *deva* as heavenly, divine and, as a noun, a deity, a god (MW).

What you've built

One more word for telling what happened.

Your turn

Before you move on

What does देवः mean? ("A god".) Say it once more.

333.3 वरः (varaḥ) — a boon

Before the new one: say the Sanskrit for a curse, then the Sanskrit for a god.

You'll want to know: वरः

वरः — *varaḥ* — "a boon".

देवः ऋषये वरं ददाति।

devaḥ ṛṣaye varaṃ dadāti.

The god gives the seer a boon.

A masculine noun.

The word, taken apart — its roots and family

वरः (*varaḥ*) comes from the root √vṛ, "to choose", like the *vara* who is chosen as a bridegroom; MW gives *vara* as choosing, a wish, and a boon or gift (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: varaḥ*
- *Say it: varaḥ*, once more
- *Say it: devaḥ ṛṣaye varaṃ dadāti.* — The god gives the seer a boon.

Before the new one: say the Sanskrit for a god, then the Sanskrit for a boon.

You'll want to know: प्रसीदति

प्रसीदति — *prasīdati* — "shows favour; is gracious".

तपः दृष्ट्वा देवः प्रसीदति।

tapaḥ dṛṣṭvā devaḥ prasīdati.

Seeing the penance, the god shows favour.

Past (he …): सः अन्ते प्रसन्नवान्, *saḥ ante prasannavān.*

The word, taken apart — its roots and family

प्रसीदति (*prasīdati*) is built from *pra* and the root √sad, "to sit, settle"; MW gives *pra-sad* as to settle down, grow clear and calm, and to be gracious (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: prasīdati*
- *Say it: prasīdati*, once more
- *Say it: tapaḥ dṛṣṭvā devaḥ prasīdati.* — Seeing the penance, the god shows favour.
- *Recall:* say the Sanskrit for a god, then the Sanskrit for a boon, then say *prasīdati* again

Before you move on

What does प्रसीदति mean? ("Shows favour; is gracious".) Say it once more.

333.5 अमरः (amaraḥ) — immortal

Before the new one: say the Sanskrit for a boon, then the Sanskrit for shows favour.

You'll want to know: अमरः

अमरः — *amaraḥ* — "immortal".

वरेण ऋषिः अमरः भवति।

vareṇa ṛṣiḥ amaraḥ bhavati.

Through the boon the seer becomes immortal.

The word, taken apart — its roots and family

अमरः (*amaraḥ*) is built from *a*, "not", and *mara*, "dying", from the root √mṛ, as in *mriyate*; MW gives *amara* as undying, immortal, and as a noun a god (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: amaraḥ*
- *Say it: amaraḥ*, once more
- *Say it: vareṇa ṛṣiḥ amaraḥ bhavati.* — Through the boon the seer becomes immortal.
- *Recall:* say the Sanskrit for a boon, then the Sanskrit for shows favour, then say *amaraḥ* again

Before you move on

What does अमरः mean? ("Immortal".) Say it once more.

Chapter 334

Gods and Demons

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can tell a story of gods and demons.

असुरः — *asuraḥ* — "an asura; an enemy of the gods".

देवाः असुरान् जयन्ति।

devāḥ asurān jayanti.

The gods defeat the asuras.

A masculine noun.

The word, taken apart — its roots and family

असुरः (*asuraḥ*) MW reports a grammarians' derivation from √as and, beside older senses of a spirit, gives *asura* as an evil spirit, an opponent

of the gods, so its origin is uncertain (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: asuraḥ*
- *Say it: asuraḥ*, once more

वीरः राक्षसस्य वधं करोति।

vīraḥ rākṣasasya vadhaṃ karoti.

The hero slays the demon.

A masculine noun.

The word, taken apart — its roots and family

वधः (*vadhaḥ*) MW gives *vadha* as one who kills, a deadly weapon, and the act of striking or killing, without a root in the entry, so its origin is left uncertain here (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: vadhaḥ*
- *Say it: vadhaḥ*, once more
- *Say it: vīraḥ rākṣasasya vadhaṃ karoti.* — The hero slays the demon.

> एतत् सर्वं राक्षसस्य माया अस्ति।
>
> *etat sarvaṃ rākṣasasya māyā asti.*
>
> All this is the demon's illusion.

A feminine noun.

The word, taken apart — its roots and family

माया (*māyā*) MW gives *māyā* first as art, wisdom, extraordinary power, and later as illusion, deception, trickery and magic, without a root in the entry, so its origin is left uncertain here (MW).

What you've built

One more word for telling what happened.

Your turn

- *Say it: māyā*
- *Say it: māyā*, once more
- *Say it: etat sarvaṃ rākṣasasya māyā asti.* — All this is the demon's illusion.

ऋते — *ṛte* — "except".

यदि माम् ऋते सर्वे आगच्छन्ति, तर्हि अहं दुःखी भविष्यामि।

yadi mām ṛte sarve āgacchanti, tarhi ahaṃ duḥkhī bhaviṣyāmi.

If everyone comes but me, I will be sad.

The word, taken apart — its roots and family

ऋते (*ṛte*) is the word MW gives for excepting, without, unless, and reports as perhaps a case form of the past participle of the root √ṛ, "to go", so its origin is uncertain (MW).

What you've built

One more word for saying what happens if.

Your turn

- *Say it: ṛte*
- *Say it: ṛte*, once more
- *Say it: yadi mām ṛte sarve āgacchanti, tarhi ahaṃ duḥkhī bhaviṣyāmi.* — If everyone comes but me, I will be sad.

The Devanagari script and Sanskrit sounds — a reference

A **reference**, not a chapter — the lessons teach reading through real words. This page gathers the system and the points Sanskrit needs even from a Devanagari reader.

How Devanagari works (the three facts)

1. **Consonants carry a built-in "a".** क = ka, न = na, म = ma — left to right under a connecting top line.
2. **A vowel sign changes it:** का kā · कि ki · की kī · कु ku · के ke · को ko. A word-initial vowel has its own letter: अ a · आ ā · इ i · ई ī · उ u · ए e · ओ o · औ au.
3. **A *halant* (्) removes the vowel**, and the bare consonant joins the next as a conjunct: स् + त → स्त, न् + य → न्य.

What Sanskrit needs even from a Devanagari reader

- **The visarga ः (ḥ)** — a soft breathed echo of the preceding vowel at a word's end (*namaskāraḥ*, *rāmaḥ*), usually the masculine-singular ending, so grammatical as well as phonetic.
- **The anusvāra ं (ṃ, also written ṅ)** — a dot above the line, nasalising the vowel or standing for a nasal before another consonant; very frequent in Sanskrit.
- **The vocalic ṛ ऋ** — Sanskrit treats ṛ as a *vowel*: *mātṛ* "mother," *pitṛ* "father" (the words that proved Sanskrit's kinship with Latin

māter/pater and English *mother/father*), *Ṛgveda*.

- **Sandhi** — fixed sound-rules fuse words at their seams: *su* + *āgata* → *svāgata*. The lessons flag each fusion where it happens.

Sanskrit in the family

Sanskrit is the classical language of India — the tongue of the Vedas, of Kālidāsa, of Hindu, Buddhist, and Jain learning — and the ancestor of the modern Indo-Aryan languages (Hindi, Marathi, Punjabi, Bengali, and more). It is a senior branch of **Indo-European**, sister to Greek, Latin, and the Germanic languages including English. This curriculum treats it, with Latin, as a **taproot**: its words reach east into South Asia and west into Europe, and the lessons trace both directions.
