Preface

This book teaches Tamil one word at a time, and it teaches each word by taking it apart. It is written for someone starting from zero — who may not read a single Tamil letter — so the script is taught *inside the word lessons themselves*: each word introduces exactly the letters it needs, so you learn to read வணக்கம் *and* learn that it means "greetings" in the same few minutes. There is no alphabet drill to sit through first.

Many readers will not be starting from zero at all. If you grew up speaking Tamil at home and never studied it — fluent in the language, hesitant with the letters, never once told *why* any of it works the way it does — this book is written for you as well. Skim the "letters in this word" notes for the handful of shapes you are unsure of, and read the rest for the grammar and the history nobody sat you down and explained.

Tamil rewards this depth more than most languages. It is the oldest-attested of the **Dravidian** tongues — a family entirely separate from the Indo-European one that gave us English, Latin, and Sanskrit — and it is famously protective of its own word-stock. Again and again you will find Tamil keeping a home-grown word (வணக்கம் *vaṇakkam*, "hello"; நன்றி *naṉṟi*, "thanks") where its sisters Kannada, Telugu, and Malayalam reached for a Sanskrit one. So each lesson sets the word beside its cousins across the family — English always, and Sanskrit, Hindi, and the other Dravidian languages where they illuminate — every form supplied in full, so no prior knowledge of any of them is assumed.

How to use this book

Every numbered section is one word, or one small phrase, and takes a few minutes — the length of a queue, an errand, or the walk to the bus. Read them in order the first time through: each section stands on the ones before it, and nothing is used before it has been taught. After that the book becomes reference, and you can open it anywhere.

Say the Tamil out loud wherever you can. The prompts under *Your turn* are written to be spoken, and saying a word is most of what makes it stay. The questions under *Before you move on* carry their own answers in brackets: cover them, answer from memory, then look.

Nothing here is gated behind the alphabet. Each lesson introduces exactly the letters and sounds its own word needs, so you are reading real words from the first page rather than drilling a chart. The whole script is gathered in a reference at the back of the book — somewhere to look things up when you are curious, never a chapter to sit through first.

Chapter 1

Greetings

Modes: **voice** (8) **pen** (2) **Hands-free start:** the first of 10 lessons.

> ***By the end of this chapter:*** I can greet someone, say yes, no and thank you, agree with sari, hold a short exchange out loud, and copy my first Tamil shape with a visible model.
>
> *Hold the whole exchange out loud, say back where vaṇakkam and naṉṟi come from and how Tamil answers yes, then copy* வ *once beside the visible model and compare only that shape.*

1.1 Vaṇakkam — "greetings"

> The first Tamil word, and the one you will use most. One word, one lesson. Say it, and you have greeted someone.

You'll want to know: vaṇakkam

vaṇakkam — **"greetings."**

Say it *va-ṇak-kam*, with the *kk* held a beat longer than a single *k*.

It is what you say walking into a room, answering a phone, or meeting anyone at all. It does not change for morning or evening, and it does not change for one person or many.

> Its root is the verb *vaṇaṅku*, "to bow." *Vaṇakkam* is the act of bowing, turned into a word — and it is native Tamil, not borrowed from Sanskrit.

In the family, and next door

	word
Kannada	ನಮಸ್ಕಾರ (*namaskāra*)
Telugu	నమస్కారం (*namaskāram*)
Malayalam	നമസ്കാരം (*namaskāram*)
Hindi (neighbour)	नमस्ते (*namaste*)
English	hello / greetings (vaṇakkam

The letters in this word

Say it *va-ṇak-kam*. The ṇ is a **retroflex** *n* — curl the tongue back to the roof of the mouth, further back than an English *n*, and Tamil writes it with its own letter, ண. The *kk* is **held**, a beat longer than a single *k*, and that length is doing real work: Tamil distinguishes words by it.

The word, taken apart — its roots and family

Vaṇakkam comes from the verb *vaṇaṅku*, "to bow, to pay homage." Turned into a noun of the action, it means "a bowing, an act of reverence" — the idea of *namaste*, but from a **native Tamil** root, not a Sanskrit one. That is Tamil's whole personality: an old language that keeps its home-grown words where its neighbours borrowed.

Why it's said this way

Said with the palms pressed together and a small bow — the gesture *is* the word. It serves as both **hello and goodbye**, any time, to almost anyone, respectful without being stiff.

Writing — let your finger meet one shape

Here is the first printed shape of the greeting's written form: வ. Follow that shape once with your finger while you say the whole greeting.

Do not write it yet; the next lesson shows the whole written greeting and asks for one supported copy of this shape. A later script lesson will teach how Tamil letters are formed; tracing a typeface here does not claim a handwriting stroke order.

Your turn

Say these aloud:

- "vaṇakkam" — hold the *kk*
- it to someone arriving
- it to someone leaving — the same word does both

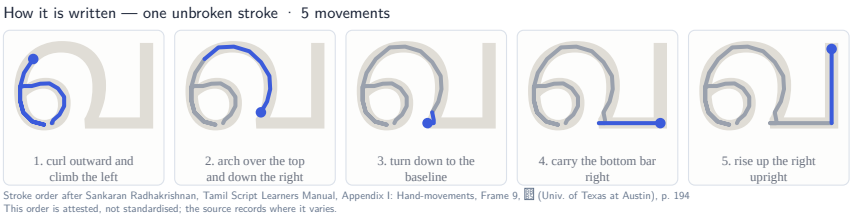

Before you move on

Say *vaṇakkam*. Does it change between morning and evening? (**No** — one greeting, all day.) Does it change for one person or a crowd? (**No**.) Next: the same greeting across the Dravidian family.

1.2 வ (va) — copy one visible shape with help

Here is the whole greeting, written: **வணக்கம்**. Point to it and say *vaṇakkam* once. Keep the model on the page. Find the first shape, **வ** (*va*), which your finger just followed.

Writing — one supported copy

How **வ** *is written, stroke by stroke*

Copy **வ** once beside the model. Look back as often as you need. Your copy can be large and slow; it does not need to look like a font.

This is shape familiarity, not a stroke-order test. Do not hide the model, do not copy the rest of **வணக்கம்**, and do not add a second new shape today. The later Tamil writing sequence will teach letter construction explicitly.

Before you move on

Compare your one copy with வ (*va*) while both remain visible. Repair one curve if you want, then stop. Say *vaṇakkam* once more: one known greeting, one tiny hand movement.

1.3 வணக்கம் — one bow, two lexical loyalties

Vaṇakkam names a bow. Neighboring languages name the same gesture with a different inherited or borrowed root.

The word, taken apart — its roots and family

Language	"Hello"	Source
Tamil	*vaṇakkam*	**native Dravidian** *vaṇaṅku*
Kannada	*namaskāra*	Sanskrit
Telugu	*namaskāram*	Sanskrit
Malayalam	*namaskāram*	Sanskrit
Hindi	*namaste*	Sanskrit
English	*hello*	Germanic hailing-call

Four tracks use Sanskrit *namas-*, "bow." Tamil kept its own verb. The gesture and social meaning match; the lexical loyalty differs.

Why it's said this way

Vaṇakkam is said with pressed palms or a small head-bow: the gesture is the word. It works as **hello and goodbye**, at any time, to almost anyone. It is respectful without being stiff; cinema and formal speech can also use it as a ringing one-word salutation to a whole room.

Your turn

- *Say it:* "vaṇakkam", the word that names the bow
- *Contrast:* Tamil *vaṇaṅku* · neighbors Sanskrit *namas-*
- *Choose:* greeting or parting → வணக்கம் works

Before you move on

Which Dravidian language kept its native bow-word? (**Tamil**.) What did the neighbors borrow? (Sanskrit ***namas-***.) Can *vaṇakkam* greet and part? (**Yes** — it is an all-day respectful salutation.)

1.4 ஆம் (ām) — "yes"

The plain yes. One word, and then we will put these together.

You'll want to know: ஆம்

ஆம் — *ām* — **"yes."**

One beat, with a long opening *aa*.

Stretch it and you get ***āmām*** — "yes, indeed; that's right." Tamil doubles words for warmth and certainty, the way *sari sari* does.

> *Ām* is a worn-down form of *āgum*, "it becomes, it will be" — a yes that started life as a verb, which is a very Tamil way to agree.

In the family, and next door

	word
Kannada	**ಹೌದು** (*haudu*)
Telugu	**అవును** (*avunu*)
Malayalam	**അതെ** (*athe*)
Hindi (neighbour)	**हाँ** (*hāṃ*)
English	yes

The letters in this word

Say it *ām* — a **long** *a*, held about twice as long as the short one, closing on a plain *m*. Vowel length is meaningful in Tamil, so the length is not decoration.

The word, taken apart — its roots and family

ஆம் (*ām*) is the plain "yes." Doubled for emphasis it becomes *āmām*, "yes, indeed." It is native Dravidian, worn down from *ākum*, "it will be" (DEDR 333).

Grammar lens

Tamil often says "yes" by **echoing the verb**: asked *vandāyā?* ("did you come?"), a natural yes is *vandēṉ* ("I came"). Bank *ām* as the simple word, but expect a "yes" to come back as a whole verb.

Your turn

Say these aloud:

- "ām" — one long *aa*, closed on the *m*
- "āmām" — the emphatic double
- "ām" then "sari" — yes, and alright

Before you move on

Say ஆம். What does ***āmām*** add? (**Emphasis** — "yes, indeed.") Next: the word for no.

1.5 இல்லை (illai) — "no"

The other half of the pair. One word, and then the lesson that puts all five together.

You'll want to know: இல்லை

இல்லை — *illai* — **"no."**

Two beats: *il-lai*, with the *l* held across the join.

On its own it is the everyday **no**. But it is not really the adjective "no" — it is a small statement meaning **"is not."** That will matter when we put the five words together.

Its root is *il*, the idea of *not-being*. Its positive twin is *uṇḍu*, "there is."

In the family, and next door

	word	same root
Kannada	ಇಲ್ಲ (*illa*)	yes
Telugu	లేదు (*lēdu*)	
Malayalam	ഇല്ല (*illa*)	yes
Hindi (neighbour)	नहीं (*nahīṃ*)	
English	no / there isn't (illai	

The letters in this word

Say it *il-lai*, with the *l* **held** across the join — the same doubling you met in *vaṇak-kam*. The ending is the diphthong *ai*, as in English "eye," not two separate vowels.

The word, taken apart — its roots and family

இல்லை (*illai*) is built on இல் (*il*), "not-being, absence" — so it is not really the adjective "no" but the statement **"[it] is not, [there] is not."** Its positive twin is *uṇḍu*, "there is."

Grammar lens

Tamil negates by *being*, not with a "not"-word. Where English inserts *not*/*no*, Tamil swaps in the negative verb of existence: *puttakam* ***uṇḍu*** ("there *is* a book") → *puttakam* ***illai*** ("there *is not* a book"). So *illai* is both the everyday "no" and the word that makes a whole sentence negative — a deeply Dravidian habit, unlike English or Hindi.

Your turn

Say these aloud:

- "illai" — two beats, the *l* held across the join
- the pair — "ām" … "illai"
- it alone, as a complete answer

Before you move on

Say இல்லை. Is it closer to English *no*, or to *is not*? (**Is not** — it is a statement, not a label.) Next: the word for thank you.

1.6 Nan̲r̲i — "thank you"

One word again. This is the one you will reach for second-most, and Tamil says it with a noun rather than a verb.

You'll want to know: nan̲r̲i

nan̲r̲i — **"thank you."**

Two beats: *nan̲-r̲i*. The *n̲* and the *r̲* are both made further back than English *n* and *r*; copy the sound rather than the spelling.

It works on its own, with no verb around it. Someone hands you something; you say *nan̲r̲i*, and that is a whole sentence.

Its root is *nal*, "good" — the same *nal-* inside *nalla* ("good") and *nanmai* ("a good deed"). Saying *nan̲r̲i* names the good someone did you.

In the family, and next door

	word	same root
Kannada	ಧನ್ಯವಾದ (*dhanyavāda*)	
Telugu	ధన్యవాదములు (*dhanyavādamulu*)	
Malayalam	നന്ദി (*nandi*)	yes
Hindi (neighbour)	धन्यवाद (*dhanyavād*)	
English	thank you (nan̲r̲i	

The letters in this word

Say it *nan̲-r̲i*. Tamil hears **three** different *n* sounds and this word uses two of them: a **dental** *n* (tongue on the teeth) to open, written ந, then an **alveolar** *n̲* (on the ridge just behind them), written ன. The *r̲* is its own sound again, not the English *r*, and it has its own letter too: ற. English ears flatten all of this to "nandri," which is close enough to be understood. The whole written word joins these three letters in the next lesson.

The word, taken apart — its roots and family

Nan̲r̲i grows from the root *nal* (DEDR 3610), "good" — so it literally means **"goodness."** To thank, in Tamil, is naming the good done to you.

Grammar lens

Tamil hears three of every *n*, *l*, and *r*. You have now heard two of the three *n*s inside this one word: a dental *n* (tongue on the teeth) and an alveolar *n̲* (on the ridge behind them). There is a third, the retroflex *ṉ* you met in *vaṇakkam* — curled back. Tamil does the same for *l* (*l*, *l̲*, *ḷ*) and for *r* (*r*, *r̲*). English fuses each set into one letter; Tamil keeps them apart, and the differences *change meaning*.
Each of those sounds has its own letter, and you will meet the letters one at a time later, spelling words you already say. Learn the sounds word by word, not as a chart.

Your turn

Say these aloud:

- "naṉṟi" — two beats, both consonants far back
- "vaṇakkam" then "naṉṟi" — greeting, then thanks
- it on its own, with nothing around it

Before you move on

Say *naṉṟi*. Does it need a verb to be a complete reply? (**No** — it stands alone.) Next: how thanks travels across the family.

1.7 நன்றி — a native family word with a register edge

Naṉṟi literally names goodness. Its family distribution mirrors the greeting split you just saw.

The word, taken apart — its roots and family

Language	"Thanks"	Source
Tamil	*nan̲r̲i*	native *nal*, "good"
Malayalam	*nandi*	the **same Dravidian word**
Kannada	*dhanyavāda*	Sanskrit
Telugu	*dhanyavādamulu*	Sanskrit
Hindi	*dhanyavād / shukriyā*	Sanskrit / Perso-Arabic

Tamil and its closest sister Malayalam kept the native word. Kannada and Telugu borrowed Sanskrit *dhanyavāda*, repeating the split seen with "hello."

Why it's said this way

Spoken *nan̲r̲i* can feel a little formal. Everyday warmth may live in a smile or nod; among close family an explicit thank-you can sound oddly distant. Use **romba nan̲r̲i**, "many thanks," when you want to mark gratitude strongly.
This is a register tendency, not a ban: the relationship and moment determine whether naming the gratitude feels warm or ceremonious.

Your turn

- *Say it:* Tamil *nan̲r̲i* · Malayalam *nandi*
- *Say it:* "romba nan̲r̲i" — many thanks
- *Choose:* close-family routine favor → warmth may be nonverbal

Before you move on

Which sister shares Tamil's native gratitude word? (**Malayalam**.)
What did Kannada and Telugu borrow? (Sanskrit ***dhanyavāda***.)
Why can explicit *nan̲r̲i* sound marked? (Among intimates, gratitude may be assumed; the word can feel **formal**.)

1.8 சரி (sari) — “okay”

The most useful small word in the language, and the easiest to say.

You’ll want to know: சரி

சரி — *sari* — **“okay, alright, correct.”**

Two beats: *sa-ri*.

It is the verbal nod of Tamil. Someone proposes a plan and the whole reply is one warm *sari*. Doubled — *sari, sari* — it means “yes yes, fine, go on.”

It began as “correct, even, level,” and slid from *that is right* to *alright* the way English *right* did.

In the family, and next door

	word	same root
Kannada	ಸರಿ (*sari*)	yes
Telugu	సరే (*sarē*)	yes
Malayalam	ശരി (*śari*)	yes
English	okay / alright / correct	

The letters in this word

Say it *sari*, two light syllables, stress even. The opening sound sits between English *s* and *ch*, and Tamil treats that whole range as one sound chosen by **position** in the word rather than by a separate spelling — the same economy that lets one *k*-sound also be heard as *g* or a soft *h*.

The word, taken apart — its roots and family

சரி (*sari*) means “correct, even, level,” and so “okay, agreed.” Its origin is uncertain: DEDR has no entry for it, and the usual guess is Sanskrit *sadṛśa*, “like, equal,” through a Prakrit form such as *sarisa* (CDIAL 13120). It is the verbal nod of the language: propose a plan, hear a warm *sari*; doubled, *sari sari* = “alright, alright.”

Grammar lens

One letter, several sounds. For its stop-consonants Tamil writes *one* letter per mouth-position and lets rules of position fill in the voicing (k/g, s/ch). The payoff is a strikingly *small* alphabet; the price is that the exact sound isn't always predictable from the letter alone — you pick it up by ear, word by word.

Your turn

Say these aloud:

- "sari"
- "sari, sari" — the doubled, hurry-along version
- agree to something with nothing but this word

Before you move on

Say சரி. What does doubling it add? (**Hurry, or easy agreement** — "yes yes, fine.") Next: putting the five words together.

1.9 Putting the five together — how Tamil answers

Five words, one at a time. Now they go into a conversation, and two habits show up that English does not have.

The exchange — built from the five words

A whole exchange, built only from the five words:

— vaṇakkam. — vaṇakkam. — sari? — ām. — naṉṟi. — sari.

— Hello. — Hello. — Alright? — Yes. — Thank you. — Alright.

Every reply is one word. Tamil is comfortable with that in a way English is not.

Say the exchange, don't read it. Each of these five words is printed in Tamil in its own lesson, and the letters arrive later, one at a time.

The word, taken apart — its roots and family

In ஆம் / இல்லை / சரி (*ām / illai / sari*), *ām* is worn down from *ākum*, "it will be", a form of the native verb "to become" (DEDR 333), and *illai* is native "not being" (DEDR 2559). DEDR compares Sanskrit *ām*, "yes". The origin of *sari* is uncertain, and its own lesson gives the usual guess.

Grammar Lens: two habits behind the answers

One — Tamil often answers by echoing the verb.
Ām is correct, but a speaker will often say yes by **repeating the verb of the question**. Asked "did you come?", a natural yes is *vandēṉ* — "I came." Keep *ām* as your word, and expect a yes to come back as a whole verb.

Two — Tamil negates by *being*, not with a "not"-word.
English makes a sentence negative by inserting *not*. Tamil swaps in the negative verb of existence:

puttakam ***uṇḍu***	"there **is** a book"
puttakam ***illai***	"there **is not** a book"

So *illai* does double duty: alone it is the everyday **no**; inside a sentence it is what makes the whole thing negative. Learn it as *is not* and both uses fall out.

Your turn

- *Say it:* the exchange above, both parts
- *Hear:* "puttakam uṇḍu" … "puttakam illai" — only the last word changed

Before you move on

Give a one-word reply to *sari?* and to *naṉṟi*. (**ām** / **sari**.) Besides *ām*, what else is a natural yes? (**Repeating the verb**.) What does *illai* do inside a sentence? (**Makes it negative** — it is the "is not" verb.) Next: the chapter's own recap, and then names.

1.10 Chapter 1 — a five-word recap

Five spoken words, plus the one visible shape your hand has copied. Let's gather only what you have already learned and make it feel easy.

What you've built — say them back

Say each one before you check the meaning:

Say this	Meaning
vaṇakkam	hello / greetings
naṉṟi	thank you
āṁ	yes
illai	no / there isn't
sari	okay / correct

These are sounds to say, not text to decode. The one shape your hand has met is வ, the opening of வணக்கம்; the copy below keeps that model in view. The letters arrive later, one at a time, each spelling a word you already say.

Your turn — what the words carry

Each word brought a story or a habit with it. Answer aloud first.

- *Vaṇakkam* comes from which verb? (*Vaṇaṅku*, **"to bow"** — native Tamil, where the neighbours borrowed Sanskrit ***namas-***.)
- How do you thank someone strongly? (***Romba naṉṟi.***) Which sister shares *naṉṟi*? (**Malayalam**, *nandi.*) Among close family it can sound **formal**: gratitude there may be assumed.
- An emphatic yes? (***Āmāṁ.***) Besides *āṁ*, a natural yes **echoes the verb**: asked "did you come", *vandēṉ*, "I came."

Why it's said this way

Tamil avoids a blunt goodbye: a bare "I am leaving" sounds final, even ill-omened, so the everyday farewell promises **a return** instead. That exchange needs two verbs you have not met, so it gets a chapter of its own.
Until then, வணக்கம் is your farewell. It parts as well as it meets,

with the same respect both ways.

Your turn

- *Say it:* all five — vaṇakkam · nan̲ri · ām · illai · sari
- *Say it:* greet and thank — “vaṇakkam!” … “nan̲ri.”
- *Copy:* வ once beside the visible model, large and slowly

Before you move on

Say all five words aloud. Which one works both to meet someone and to part from them? (வணக்கம்.) *Check:* your one copied வ against the model — repair one curve if you want, then stop
Next chapter starts introducing yourself, one short possession form at a time.

Chapter 2

Introducing Yourself

Modes: 🚗 **voice** (8) 🚗 **Hands-free start:** all 8 lessons.

> ***By the end of this chapter:*** I can introduce myself in Tamil, give my name, and understand the other person's name.
>
> *Hold the whole introduction out loud — give your name, ask for theirs, and answer that you are pleased to meet them — using only the possession forms this chapter built.*

2.1 பெயர் (peyar) — "name," where the family is *not* Indo-European

"Name" — and a word that shows Tamil at its most itself.

The word, taken apart — its roots and family

பெயர் (*peyar*, "name") is **native Dravidian**, from Proto-Dravidian ***peyar / *pēr** — and it is *not* related to Sanskrit *nāma* (Hindi *nām*, English *name*). Here the two great families part: Indo-European shares one word for "name" from Ireland to North India, but the Dravidian south kept its own.
Across the family:

Language	**"Name"**	**Source**
Tamil	*peyar*	**native Dravidian** (*peyar)
Malayalam	*pēr*	the *same* Dravidian root
Telugu	*pēru*	the *same* Dravidian root
Kannada	*hesaru*	Dravidian (*pesar, with $p \to h$)
Hindi	*nām*	Sanskrit *nāman* (Indo-European)
English	*name*	Indo-European

Four Dravidian tongues share *peyar/pēru*; only the Indo-European languages have *name/nām*.

In the family, and next door

	word	**same root**
Kannada	ಹೆಸರು (*hesaru*)	yes
Telugu	పేరు (*pēru*)	yes
Malayalam	പേര് (*pēr*)	yes
Hindi (neighbour)	नाम (*nām*)	
English	name	

Your turn

Say these aloud:

- "peyar"
- the Dravidian cousins — *peyar* / *pēr* / *pēru*
- what it is *not* — not *nām*, not *name*

Before you move on

Is பெயர் related to English *name*? (No — it's native Dravidian, **peyar*; *name/nām* are Indo-European.) Which languages share *peyar/pēru*? (Tamil, Malayalam, Telugu — and Kannada's *hesaru*.)

2.2 என் (en̲) — "my"

"My" — and, like *peyar*, a word with no European cousin at all.

The word, taken apart — its roots and family

என் (*en̲*) means "my." It belongs to Tamil's native Dravidian first-person family, not to the Indo-European family behind English *I/my*. You will meet the related word for "I" in its own lesson; today you only need *en̲*.

In the family, and next door

	word	same root
Kannada	ನನ್ನ (*nanna*)	
Telugu	నా (*nā*)	
Malayalam	എന്റെ (*en̲re*)	yes
Hindi (neighbour)	मेरा (*merā*)	
English	my	

Your turn

Say these aloud:

- "en̲"
- *en̲* once with its meaning, "my"

Before you move on

What does என் mean? ("My.") Does it share a root with English *my*? (No — it is native Dravidian.)

2.3 என் பெயர் ... (en̲ peyar ...) — "my name is...," with no "is"

Assemble the two atoms — *en̲* and *peyar* — and notice a whole word English needs that Tamil doesn't.

The word, taken apart — its roots and family

- en̲ (my) + peyar (name) + your name.

  என் பெயர் ... = "my name ..." → **"my name is..."**

En̲ peyar Arun. → "My name is Arun."
Both words are native Dravidian: *en̲* (DEDR 5160) and *peyar* (DEDR 4410).

In the family, and next door

	word	same root
Kannada	ನನ್ನ ಹೆಸರು ... (*nanna hesaru ...*)	
Telugu	నా పేరు ... (*nā pēru ...*)	
Malayalam	എന്റെ പേര് ... ആണ് (*en̲re pēr ... āṇŭ*)	yes
Hindi (neighbour)	मेरा नाम ... है (*merā nām ... hai*)	
English	my name is...	

Grammar Lens: Tamil has no word for "is" here

Look at what's missing: there is **no verb**. Tamil sets "my name" beside "Arun" — *en̲ peyar Arun* — and the "is" is simply understood. This is the **zero copula**: for equational sentences (X is Y), Dravidian needs no "to be" at all — where English needs *is*, Hindi needs *hai*, Arabic (you'll see) also drops it. Tamil says only "my name Arun."

Your turn

Say these aloud:

- "en̲ peyar ..." with your name
- notice — no word for "is"

Before you move on

Give your name in Tamil. (*En̲ peyar ....*) What does Tamil leave out that English requires? (The verb "is" — the zero copula.)

2.4 நீ / நீங்கள் (nī / nīṅgaḷ) — "you," familiar and respectful

To ask a name you need "you" — and Tamil makes respect the same way French does.

The word, taken apart — its roots and family

நீ (*nī*, familiar "you") ← Proto-Dravidian ***nīn*** — native, unrelated to the European "you" words (from **tū*). நீங்கள் (*nīṅgaḷ*) is *nī* + the plural ending **-kaḷ**.

In the family, and next door

	word	same root
Kannada	నీను (*nīnu*)	yes
Telugu	నువ్వు (*nuvvu*)	
Malayalam	നീ (*nī*)	yes
Hindi (neighbour)	आप (*āp*)	
English	you	

Grammar Lens: respect by the plural — again

Tamil grades "you" in two: **nī** (familiar — friends, children) and **nīṅgaḷ** (respectful — and literally the **plural**, "you-all"). This is the *same* politeness-by-plural as French *vous*: address one respected person as "you all." For a first meeting, always **nīṅgaḷ**.

Your turn

Say these aloud:

- "nī" (familiar), "nīṅgaḷ" (respectful)
- nīṅgaḷ = nī + plural -kaḷ

Before you move on

How does Tamil make "you" respectful, and which European language uses the same trick? (By the plural — *nīṅgaḷ*; French *vous*.)

2.5 என்ன (en̲n̲a) — "what"

The last piece of the question: "what."

The word, taken apart — its roots and family

என்ன (*en̲n̲a*, "what") is native Dravidian, on the interrogative stem ***yā- / *e-** that heads Tamil's whole question family: *en̲n̲a* (what), *yār* (who), *eppo* (when), *enge* (where), *ēn̲* (why). Like Hindi's *k-* words and English's *wh-* words — but from a *different*, Dravidian root.

In the family, and next door

	word	same root
Kannada	ಏನು (*ēnu*)	yes
Telugu	ఏమిటి (*ēmiṭi*)	
Malayalam	എന്ത് (*entŭ*)	yes
Hindi (neighbour)	क्या (*kyā*)	
English	what	

Your turn

Say these aloud:

- "en̲n̲a"
- the Tamil question family — en̲n̲a, yār, enge

Before you move on

What stem heads Tamil's question-words, and is it the same as English's *wh-*? (**yā-/*e-*; same *idea*, different — Dravidian — root.)

2.6 உங்கள் பெயர் என்ன? (uṅgaḷ peyar en̲n̲a?) — "what's your name?"

Assemble the question — your + name + what — and note, again, no "is."

The word, taken apart — its roots and family

- **உங்கள்** (*uṅgaḷ*, "your") = the possessive of *nīṅgaḷ* ("you," respectful).

  உங்கள் பெயர் என்ன? = literally "**your name what?**" = "what's your name?"

Three words, **no verb** — the zero copula holds for questions too. Tamil never adds an "is." All three words are native Dravidian: *uṅgaḷ* (DEDR 3688), *peyar* (DEDR 4410) and *en̲n̲a* (DEDR 5151).

In the family, and next door

	word
Kannada	ನಿಮ್ಮ ಹೆಸರು ಏನು? (*nimma hesaru ēnu?*)
Telugu	మీ పేరు ఏమిటి? (*mī pēru ēmiṭi?*)
Malayalam	നിന്റെ പേര് എന്താണ്? (*nin̲re pēr entāṇŭ?*)
Hindi (neighbour)	आपका नाम क्या है? (*āpkā nām kyā hai?*)
English	what's your name?

Grammar Lens: answer, and the familiar version

Answer with the sentence you built: **En̲ peyar Arun.** The familiar "your" swaps *uṅgaḷ* for **un̲** (from *nī*): *un̲ peyar en̲n̲a?*

Your turn

Say these aloud:

- "uṅgaḷ peyar en̲n̲a?"
- ask, then answer — "uṅgaḷ peyar en̲n̲a?" / "en̲ peyar …"

Before you move on

What does **உங்கள் பெயர் என்ன?** literally say, and what's missing versus English? ("Your name what?"; no "is" — zero copula.)

2.7 மகிழ்ச்சி (magiḻcci) — "joy," and "pleased to meet you"

The warm close — and a sound almost unique to Tamil.

You'll want to know: மகிழ்ச்சி

The full form is ***uṅgaḷai sandittatil magiḻcci*** — "**in having met you, joy**." Say it; the extra two words are longer than you need today, and மகிழ்ச்சி on its own already carries the whole meaning.

In the family, and next door

	word
Kannada	ಸಂತೋಷ (*santōṣa*)
Telugu	సంతోషం (*santōṣam*)
Malayalam	സന്തോഷം (*santōṣaṁ*)
Hindi (neighbour)	आपसे मिलकर ख़ुशी हुई (*āpse milkar khushī huī*)
English	joy / pleased to meet you

The word, taken apart — its roots and family

மகிழ்ச்சி (*magiḻcci*, "joy, gladness") is native Dravidian, from **magiḻ** ("to rejoice"). It carries the letter ழ (*ḻ*) — a retroflex glide almost unique to Tamil, with no English equivalent (the same sound in the name *Tamiḻ* itself). In casual speech, a smile or the English "nice to meet you" also does the job.

Your turn

Say these aloud:

- "magiḻcci" — feel the ழ (*ḻ*) glide
- the fuller form — "uṅgaḷai sandittatil magiḻcci"

Before you move on

What does மகிழ்ச்சி mean and from what verb? ("Joy," from *magiḻ*, "to rejoice.") What rare Tamil sound does it contain? (ழ, *ḻ* — also in *Tamiḻ*.)

2.8 Chapter 2 — the introduction, whole

Every atom built, and every one of them native Dravidian.

The exchange — the whole introduction

Say this	English
en̲ peyar Mira.	My name is Mira.
uṅgaḷ peyar enn̲a?	What's your name?
en̲ peyar Arun.	My name is Arun.
magi̲lcci.	Pleased to meet you.

Every atom native and traced:

- **peyar** ← Dravidian **peyar* (*not* English *name*)
- **en̲** ← *nān̲* ("I")
- **enn̲a** ← Dravidian question-stem **yā-/*e-*
- **magi̲lcci** ← *magi̲l* ("to rejoice")

And the Tamil habit to keep: the **zero copula** — an equational sentence ("X is Y") needs *no* word for "is" at all. Where Hindi added *hai* and English needs *is*, Tamil says only "my name Arun."

Your turn

Say these aloud:

- the whole exchange, both voices
- your own introduction — "en̲ peyar …"
- ask it back — "uṅgaḷ peyar enn̲a?"

Before you move on

Give your name, ask someone else's, say you're pleased. (*En̲ peyar …. / Uṅgaḷ peyar enn̲a? / Magi̲lcci.*) What does Tamil leave out that English and Hindi require? (The verb "is" — zero copula.) Next chapter: *eppaḍi irukkīṅgaḷ?* ("how are you?") and answering with *nallā* — the responding cycle.

Chapter 3

How Are You?

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can ask how someone is in Tamil, answer naturally, and return the question.
>
> *Take the how-are-you exchange both ways out loud: ask it respectfully, answer that you are well, thank them, and wave the thanks away.*

3.1 எப்படி (eppaḍi) — "how," another of the e- questions

You met ***e<u>nn</u>a*** ("what") in Chapter 2. Here is its sibling — and, like all of Tamil's question-words, it begins with **e-**.

The word, taken apart — its roots and family

எப்படி (*eppaḍi*, "how") is native Dravidian, built on the interrogative base **எ-** (*e-*) + *paḍi* ("manner, way") — literally "in what manner." Notice the pattern: Tamil's questions nearly all start with this **e-** — *e<u>nn</u>a* (what), *eppaḍi* (how), *eppōdu* (when), *eṅgē* (where), *ē<u>n</u>* (why), and *yār* (who). Where Hindi and English gather their questions under *k-* / *wh-*, Tamil gathers its own under **e-** — a separate, older family, evolved on its own.

In the family, and next door

	word
Kannada	ಹೇಗೆ (*hēge*)
Telugu	ఎలా (*elā*)
Malayalam	എങ്ങനെ (*eṅṅane*)
Hindi (neighbour)	कैसा (*kaisā*)
English	how

Your turn

Say these aloud:

- "eppaḍi"
- the e- question family — *eṉṉa, eppaḍi, eppōdu, eṅgē, ēṉ*
- what it's built from (*e-* "what" + *paḍi* "manner")

Before you move on

What base do Tamil's question-words share, and how is it different from Hindi's? (The interrogative *e-*; it is native Dravidian, unrelated to Hindi's *k-* / English's *wh-*.)

3.2 நீங்கள் எப்படி இருக்கிறீர்கள்? (nīṅgaḷ eppaḍi irukkiṟīrgaḷ?)

The everyday "how are you?" — and the first time Tamil actually *needs* a verb "to be."

The word, taken apart — its roots and family

நீங்கள் எப்படி இருக்கிறீர்கள்? = நீங்கள் (*nīṅgaḷ*, "you," respectful) + எப்படி (*eppaḍi*, "how") + இருக்கிறீர்கள் (*irukkiṟīrgaḷ*, "are/exist") — "you how are?" The verb comes **last**, as in every Tamil sentence.
The verb is இரு (*iru*), "to be, to exist, to stay" — native Dravidian. Inside *irukkiṟīrgaḷ* that stem carries two endings: *iru* + *-kkiṟ-* (present) + *-īrgaḷ* ("you," respectful/plural) — the three run together exactly as written. A long word, but built of clean pieces, and you can hear all

three.

In the family, and next door

	word
Kannada	ನೀವು ಹೇಗಿದ್ದೀರಾ? (*nīvu hēgiddīrā*)
Telugu	మీరు ఎలా ఉన్నారు? (*mīru elā unnāru?*)
Malayalam	സുഖമാണോ? (*sukhamāṇō?*)
Hindi (neighbour)	आप कैसे हैं? (*āp kaise haiṁ?*)
English	how are you?

Grammar Lens: now the copula returns

In Chapter 2 you learned Tamil drops "is" entirely: *eṉ peyar Arun* ("my name Arun"). That **zero copula** works for *equations* (X is Y). But "how are you?" is about a **state** — how you *exist* right now — and for that Tamil does use a verb, "to be, to exist," the *iru-* at the front of *irukkiṟīrgaḷ*. So: no verb for "my name is Arun," but a real verb for "how are you." The verb ending **-ீர்கள்** (*-īrgaḷ*) already means "you (respectful)," so *nīṅgaḷ* can even be dropped.

Your turn

Say these aloud:

- the respectful question — *nīṅgaḷ eppaḍi irukkiṟīrgaḷ?*
- the verb and its meaning (*iru* — "to be / exist / stay")
- why here Tamil needs a verb but "my name is Arun" doesn't (state vs. equation)

Before you move on

What verb does "how are you?" use, and why does this sentence need one when "my name is Arun" didn't? (*Iru*, "to be/exist"; because it describes a state, not an equation — the zero copula only covers X is Y.)

3.3 நான் (nāṉ) — "I," the Dravidian first person

To answer "how are you?" you first need "I." In Chapter 2 you learned *eṉ* ("my"); here is its owner.

The word, taken apart — its roots and family

நான் (*nāṉ*, "I") ← Proto-Dravidian ***yāṉ / *nāṉ** — a native first-person word, and (unlike Hindi's *maiṁ*, cousin of English *me*) **not** related to the European "I/me" family at all. Its possessive is the ***eṉ*** ("my") you already met: *nāṉ* "I," *eṉ* "my" — the same root, one standing, one leaning on a noun. Tamil's "I" is one of the clearest markers that Dravidian grew up entirely apart from the Indo-European world around it.

In the family, and next door

	word	same root
Kannada	ನಾನು (*nānu*)	yes
Telugu	నేను (*nēnu*)	yes
Malayalam	ഞാൻ (*ñān*)	yes
Hindi (neighbour)	मैं (*maiṁ*)	
English	I	

Grammar Lens: "I" you can drop

Tamil verbs carry the person in their ending — *irukk-iṟēṉ* already means "**I** am" — so *nāṉ* is often left out once it's clear. You will still learn it first, because the answer to *eppaḍi irukkiṟīrgaḷ?* begins with it.

Your turn

Say these aloud:

- "nāṉ"
- the pair — *nāṉ* (I), *eṉ* (my)
- is it related to English *me*? (No — Dravidian, a separate family)

Before you move on

What is *nāṉ*'s possessive, and is it cousin to English *me*? (*Eṉ*, "my"; no — it is native Dravidian, unrelated to the Indo-European pronouns.)

3.4 நலம் (nalam) — "well," and how to answer

The word that answers "how are you?" — and a whole family of Tamil "good" grows from it.

The word, taken apart — its roots and family

நலம் (*nalam*, "wellness, good, welfare") is native Dravidian, from the root *nal-* ("good") — the same root behind *nalla* ("good," an everyday adjective) and *naṉṟi* ("thanks" — literally "goodness," which you met in Chapter 1). So "thank you" and "I'm well" in Tamil share a root: both are *nal-*, "good." A purely Dravidian word, with no Sanskrit or European cousin — Tamil answering in its own voice.

In the family, and next door

	word
Kannada	ಚೆನ್ನಾಗಿ (*cennāgi*)
Telugu	బాగా (*bāgā*)
Malayalam	സുഖം (*sukham*)
Hindi (neighbour)	ठीक (*ṭhīk*)
English	well, wellness, good

You'll want to know: நலம்

Assemble it: ***nāṉ nalamāga irukkiṟēṉ*** — "**I am well**." The piece *nalam* + *-āga* ("in a … way") makes the adverb *nalamāga* ("well-ly"); *irukkiṟēṉ* is "I am/exist" (the *iru* verb, first person). The whole exchange:

> — *nīṅgaḷ eppaḍi irukkiṟīrgaḷ?* ("How are you?") — *nāṉ nalamāga irukkiṟēṉ, naṉṟi.* ("I'm well, thank you.")

Casually, Tamils shorten it to *nallā irukkēṉ* ("I'm good").

Your turn

Say these aloud:

- "nalam"
- the full reply — *nāṉ nalamāga irukkiṟēṉ*
- the root it shares with "thanks" (*nal-* "good," as in *naṉṟi*)

Before you move on

Give the full reply to "how are you?", and name the Chapter-1 word that shares *nalam*'s root. (*Nāṉ nalamāga irukkiṟēṉ*; *naṉṟi*, "thanks" — both from *nal-*, "good.")

3.5 பரவாயில்லை (paravāyillai) — "no problem"

When someone thanks you — or apologises — this is the easy, gracious reply, and it hides one of the most Tamil words there is.

The word, taken apart — its roots and family

பரவாயில்லை literally means "**there is no concern**" — *paravāy* ("care, concern") + *illai* ("is-not, there-is-not"). It serves as "it's okay / no worries / never mind / you're welcome." *Paravāy* is a loan: Persian *parvā*, "care, concern," which reached Tamil through Hindustani. The key atom, *illai*, you already met in Chapter 1 — the Tamil word for negation and non-existence, the mirror of *iru* ("to be"). Where *iru* says "it is," *illai* says "it is not." This one word is shared, in almost the same shape, across Tamil, Kannada, and Malayalam (*illa*) — one of the deep bonds of the Dravidian south. (Telugu's *lēdu* looks different, but DEDR 2559 files it with them.)

In the family, and next door

	word	same root
Kannada	ಪರವಾಗಿಲ್ಲ (*paravāgilla*)	yes
Telugu	పరవాలేదు (*paravālēdu*)	yes
Malayalam	സാരമില്ല (*sāramilla*)	
Hindi (neighbour)	आपका स्वागत है (*āpkā svāgat hai*)	
English	it's okay / no problem / you're welcome	

Grammar Lens: *illai*, the all-purpose "no"

Illai negates existence and equations alike: *nāṉ illai* ("it's not me"), *paṇam illai* ("there's no money"). It is also, on its own, one way to say plain "no." Learn *iru* / *illai* together — "is" and "is-not" — and you can already affirm or deny almost anything.

Your turn

Say these aloud:

- "paravāyillai"
- what it literally means ("there is no harm")
- the *iru* / *illai* pair — "is" and "is-not"

Before you move on

What does *paravāyillai* literally say, and which Dravidian languages share its *illai*? ("There is no harm"; Tamil, Kannada, Malayalam — Telugu uses *lēdu* instead.)

3.6 Chapter 3 — The how-are-you exchange

No new words. The whole responding cycle, from atoms you now own.

The exchange

Say these aloud:

- "How are you?" (respectful) — *nīṅgaḷ eppaḍi irukkiṟīrgaḷ?*
- "I'm well, thank you." — *nāṉ nalamāga irukkiṟēṉ, naṉṟi.*
- "No problem / you're welcome." — *paravāyillai.*
- the casual version — *nallā irukkēṉ.*

Your turn — the atoms

Say these aloud:

- the e- question-word for "how" (*eppaḍi*)
- "I" and the verb "to be" (*nāṉ*, *iru*)
- the "is / is-not" pair (*iru* / *illai*)

What you've built — roots you now carry

- *eppaḍi* ← the interrogative *e-* (native Dravidian, not Hindi's *k-*)
- *nāṉ* ← Proto-Dravidian **nāṉ* (unrelated to English *me*); possessive *eṉ*
- *nalam* ← *nal-* "good" — the same root as *naṉṟi* ("thanks")
- *iru* / *illai* — "to be" and "to be-not"; *illai* shared with Kannada & Malayalam

Grammar lens — what you now hold

- *Say it:* when Tamil needs the verb *iru* and when it drops the copula (state vs. equation)

Before you move on

A stranger asks *nīṅgaḷ eppaḍi irukkiṟīrgaḷ?* — give a full, polite reply, and answer their thanks. (*Nāṉ nalamāga irukkiṟēṉ, naṉṟi* — and to thanks, *paravāyillai.*)

Chapter 4

Farewells

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 4 of 6 lessons.

> ***By the end of this chapter:*** I can end a Tamil conversation politely and choose a farewell that fits the situation.
>
> *Close a conversation the Tamil way out loud: promise to go and come back, answer the same promise, and choose between tomorrow and next-time.*

4.1 போ (pō) — "go," and *vā* (come)

Two of the shortest, oldest verbs in Tamil — and together they make the Tamil goodbye.

The word, taken apart — its roots and family

போ (*pō*, "to go") and ***vā*** ("to come") are native Dravidian verbs of the deepest layer — single syllables, unchanged for millennia. As bare commands they are already whole words: *pō!* ("go!"), *vā!* ("come!"). You need both for the next lesson, because Tamil does not say a plain "goodbye" — it says "I go, and I **come back**."

Your turn

Say these aloud:

- "pō" (go) and "vā" (come)
- the commands — *pō!* / *vā!*

Before you move on

What do *pō* and *vā* mean, and why will you need them both to say goodbye? ("Go" and "come"; the Tamil farewell is "I go and come back," not "I leave.")

4.2 போய் வருகிறேன் (pōy varugiṟēṉ) — "I'll go and come back"

The everyday Tamil goodbye — and it is, quite literally, a promise to return.

The word, taken apart — its roots and family

போய் வருகிறேன் = போய் (*pōy*, "having gone") + வருகிறேன் (*varugiṟēṉ*, "I come") — literally "**having gone, I come**," i.e. "**I'll go and come back**." A Tamil speaker never signs off with a bare "I'm leaving" — that sounds final, even ill-omened. Instead they promise return. The reply is warm: ***pōy vā*** ("go and come [back]").

The same promise, in each language's own words:

Language	**"go and come back" (goodbye)**
Tamil	*pōy varugiṟēṉ*
Kannada	*hōgi baruttēne*
Telugu	*veḷḷi vastānu*
Malayalam	*pōyi varāṁ*
Bengali (Indo-Aryan)	*āshi* ("I come")
Hindi (Indo-Aryan)	*phir milenge* ("we'll meet again")

The whole subcontinent, Dravidian and Indo-Aryan alike, prefers a promise of return to a blunt farewell.

Varugiṟēṉ itself is built in three parts: *varu* ("come") + a present-tense marker + *-ēṉ* ("I"). Chapter 5 makes that stem-tense-person pattern explicit; here it is enough to hear the three pieces. Both verbs are native Dravidian: *pō*, "go" (DEDR 4572), and *varu*, "come" (DEDR 5270).

In the family, and next door

	word	same root
Kannada	ಹೋಗಿ ಬರುತ್ತೇನೆ (*hōgi baruttēne*)	yes
Telugu	వెళ్ళి వస్తాను (*veḷḷi vastānu*)	
Malayalam	പോയി വരാം (*pōyi varāṁ*)	yes
Hindi (neighbour)	अलविदा (*alvidā*)	
English	goodbye	

Grammar Lens: the "having ...d" participle

Pōy is Tamil's way of chaining actions: "having gone, (then) I come." Tamil strings verbs like beads — one in the participle "-y" form, the last one fully conjugated. You will see this chaining everywhere.

Your turn

Say these aloud:

- the goodbye — *pōy varugiṟēṉ*
- its literal meaning ("having gone, I come" → "I'll come back")
- the warm reply — *pōy vā*

Before you move on

What does the Tamil goodbye literally promise, and how do you answer it? ("I'll go and come back"; reply *pōy vā*, "go and come [back]".)

4.3 நாளை பார்க்கலாம் (nāḷai pārkkalām) — "see you tomorrow"

A goodbye with a date on it — built on the Tamil word for "day."

The word, taken apart — its roots and family

நாளை (*nāḷai*, "tomorrow") is native Dravidian, from நாள் (*nāḷ*, "day") — the same *nāḷ* in *iṉṟu* / *nāḷ* counting and in *nal-vāḻttukkaḷ* ("good [day]-wishes"). பார்க்கலாம் (*pārkkalām*) is "let's see / we may see" — *pār* ("to see, to look") plus the ending *-kkalām*, "let's / we may" — so the whole phrase is "**tomorrow, let's see [each other]**," the Tamil "see you tomorrow." Note the retroflex ள் (*ḷ*) — a sound English lacks entirely, made with the tongue-tip curled up and back.

In the family, and next door

Malayalam	നാളെ കാണാം (*nāḷe kāṇām*)
Hindi (neighbour)	कल मिलते हैं (*kal milte haiṁ*)
English	see you tomorrow

Your turn

Say these aloud:

- "nāḷai pārkkalām"
- the word for "day" inside "tomorrow" (*nāḷ*)
- the verb "to see" (*pār*)

Before you move on

What does *nāḷai* come from, and what does *pārkkalām* add? (*Nāḷ*, "day"; "let's see" — from *pār*, "to see" — so "tomorrow, let's see each other.")

4.4 மீண்டும் சந்திப்போம் (mīṇḍum sandippōm) — "we'll meet again"

A warmer, open-ended goodbye — and a chance to see Tamil's two vocabularies side by side.

The word, taken apart — its roots and family

மீண்டும் சந்திப்போம் = மீண்டும் (*mīṇṭum*, "again") + சந்திப்போம் (*sandippōm*, "we will meet") — "**we'll meet again**." Two vocabularies meet in these two words:

- மீண்டும் (*mīṇṭum*, "again") is **native Dravidian**, from *mīḷ* ("to return"). Say it *mīṇ-ṭum*: the *ṇṭ* in the middle is a retroflex pair, both halves made with the tongue curled back, and it is one gesture rather than two.
- சந்தி (*sandi*, "to meet, a junction") is a **Sanskrit** loan — from *sandhi* ("a joining, union"), the very word Sanskrit grammar uses for how sounds join at a word-boundary. The ending on it is *-ppōm*, "we will," so *sandippōm* is "we will meet."

So even a goodbye shows Tamil's balance: an ancient Dravidian core (*mīṇṭum*) beside a Sanskrit borrowing (*sandi*) — the recurring thread of this whole track.

Hindi (neighbour)	फिर मिलेंगे (*phir milenge*)
English	we'll meet again

Your turn

Say these aloud:

- "mīṇṭum sandippōm"
- which word is native Dravidian and which is Sanskrit (*mīṇṭum* / *sandi*)

Before you move on

What does the phrase mean, and which of its two words is the Sanskrit loan? ("We'll meet again"; *sandi* "to meet" ← Sanskrit

sandhi — while *mīṇḍum* "again" is native Dravidian.)

4.5 Tamil's curves — the writing surface leaves a trace

Before the first letter, look at a line of Tamil and notice what isn't there:

வணக்கம்

Nothing joins the letters together, and there are far fewer corners than in Devanagari — no hanging head-line, and a great deal of curve. (Straight strokes do exist: most of these letters have a flat bar across the top.) The roundness has a usual explanation, and it is the best story in this chapter.

Script you'll notice: The script is the shape of its writing surface

Tamil was written for centuries on **palm leaves**, scratched with a metal stylus and then rubbed with soot to make the scratches show.

A palm leaf has a **grain**, like wood. Draw a long straight line along that grain and the stylus can **split the leaf**. The usual account is that scribes bent their strokes in response: a curve crosses the fibres at an angle instead of running with them.

Treat that as **the standard explanation rather than a settled fact.** The earliest Tamil writing — Tamil-Brahmi, cut into stone and pottery — is noticeably *angular*; the rounding came later, through the Vaṭṭeḻuttu ("round script") stage. And Devanagari was written on the same leaves without going round. So the leaf is one pressure among several, not a complete answer.

It is still worth carrying, because it makes the right general point: **the tool leaves fingerprints on the letters.** Latin's straight strokes suit a wax tablet and a chisel; Tamil's curves suit a stylus and a leaf.

Script you'll notice: The vowel you get for free

Tamil is an **abugida**, like Devanagari: a consonant already contains a vowel.

க is not "k". க is "ka".

Every consonant carries a built-in **a** until a later mark removes or replaces it.

Your turn

- *Say it:* "a consonant carries a built-in **a**"
- *Trace it:* a curve crossing the imagined grain of a palm leaf
- *Contrast:* angular Tamil-Brahmi · later rounded Vaṭṭeḻuttu
- *Say it:* the usual reason for the curves — "a straight line can **split the leaf**"

Before you move on

Why is Tamil round? (The **usual** explanation: it was incised on **palm leaves**, where a straight stroke along the grain can **split** them — though early Tamil-Brahmi was angular, so it is not the whole story.) What broader point does the account teach? (**Tools and surfaces leave fingerprints on scripts.**) Next: the chapter's own recap of the farewells.

4.6 Chapter 4 — The farewells

No new words. Three ways to part — none of them a blunt "goodbye."

Your turn — the farewells

Say these aloud:

- the everyday goodbye — *pōy varugiṟēṉ* ("I'll go and come back")
- the warm reply — *pōy vā* ("go and come back")
- "see you tomorrow" — *nāḷai pārkkalām*
- "we'll meet again" — *mīṇḍum sandippōm*

Your turn — the atoms

Say these aloud:

- the two oldest verbs (*pō* go, *vā* come)
- "day" hidden in "tomorrow" (*nāḷ*)
- which farewell-word is a Sanskrit loan (*sandi* ← *sandhi*)

What you've built — roots you now carry

- *pōy varugiṟēṉ* — "having gone, I come"; the Dravidian promise-of-return goodbye
- *nāḷai* ← *nāḷ* "day"; *pār* "to see"
- *mīṇḍum* (native "again") + *sandi* (Sanskrit "to meet") — the two vocabularies

Before you move on

Why does Tamil never say a plain "I'm leaving," and what does its everyday goodbye promise instead? (It sounds final/ill-omened; *pōy varugiṟēṉ* promises "I'll go and come back.")

Chapter 5

The First Verbs

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can build short present-tense Tamil sentences with the chapter's first verbs.
>
> *Build a short present-tense sentence about yourself out loud — speak, live, work — by putting the stem, the present marker and the person ending together.*

5.1 பேசு (pēsu) — "to speak," your first full verb

So far, "to be." Here is a verb that *does* something — and it shows how Tamil builds "I do X."

The word, taken apart — its roots and family

பேசு (*pēsu*, "to speak") is native Dravidian. The bare stem *pēsu* is also the command "speak!" To say "**I speak**," Tamil adds a two-part ending to the stem: **tense** + **person**:

> *pēsu-* (speak) + *-gi̲r-* (present) + *-ē̲n* ("I") → ***pēsugi̲r̲ē̲n̲***, "I speak."

The ***-ē̲n̲*** ending *is* "I" — so, as with *irukki̲r̲ē̲n̲*, you rarely need the word *nā̲n̲*. Change the ending, change the person: *pēsugi̲r̲ā̲n̲* ("he speaks"), *pēsugi̲r̲ā̲ḷ* ("she speaks"), *pēsugi̲r̲ārgaḷ* ("they/you-respectful speak").

In the family, and next door

Telugu	మాట్లాడు (*māṭlāḍu*)
Malayalam	സംസാരിക്കുക (*saṁsārikkuka*)
Hindi (neighbour)	बोलना (*bolnā*)
English	to speak

Grammar Lens: stem + tense + person

Every Tamil verb is built this way — a stem, a tense-marker, a person-ending, stacked in that order and glued together. Learn the pattern once and every verb follows it.

Your turn

Say these aloud:

- "pēsu" (speak!)
- "I speak" — *pēsugiṟēṉ*
- the three stacked pieces (stem *pēsu* + present *-giṟ-* + "I" *-ēṉ*)

Before you move on

Build "I speak" from *pēsu*, and name the three pieces of a Tamil verb. (*Pēsugiṟēṉ*; stem + tense + person.)

5.2 நான் தமிழ் பேசுகிறேன் (nāṉ tamiḻ pēsugiṟēṉ) — "I speak Tamil"

Your first full, moving sentence — and it names the language itself, with a sound almost no other language has.

The word, taken apart — its roots and family

நான் தமிழ் பேசுகிறேன் = நான் (*nāṉ*, "I") + தமிழ் (*tamiḻ*, "Tamil," the object) + பேசுகிறேன் (*pēsugiṟēṉ*, "speak") — "**I Tamil speak**," the verb last as always. The name தமிழ் (*tamiḻ*) is

native (DEDR 3080), of disputed but clearly Dravidian origin (often linked to a sense of "sweetness / one's own speech"); it names one of the oldest living literary languages in the world, with poetry two thousand years old still read today.
That final sound is worth dwelling on. The *ḻ* of *tamiḻ* is a curled retroflex sitting somewhere between an *r*, an *l* and a *zh* — rare enough among the world's languages that Tamil is sometimes called "the *ḻ* language." Getting it approximately right matters more than getting it perfect; nobody will mistake what you mean.

Grammar Lens: no gender on "I speak"

Notice *pēsugiṟēṉ* is the same whether a man or a woman says it — Tamil marks **no gender in the first or second person** (only the third: *pēsugiṟāṉ* he / *pēsugiṟāḷ* she). This is unlike Hindi, where even "I speak" changes for a male or female speaker (*boltā/boltī*). Tamil saves gender for "he/she/it."

Your turn

Say these aloud:

- "nāṉ tamiḻ pēsugiṟēṉ"
- the special Tamil sound in *tamiḻ* (the retroflex *ḻ*)
- does "I speak" change for a man vs. a woman? (No — Tamil marks no gender in the 1st person)

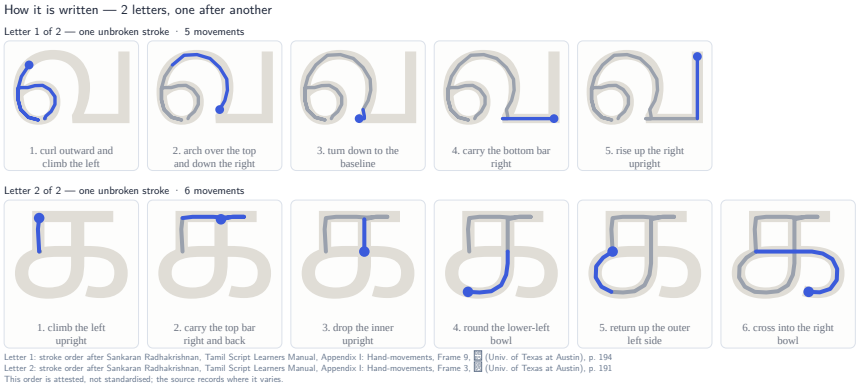

Before you move on

Say "I speak Tamil," and name the rare sound in the word *tamiḻ*. (*Nāṉ tamiḻ pēsugiṟēṉ*; the retroflex *ḻ* — ழ.)

5.3 வ and க — the vowel inside each consonant

Tamil's letters do not join and they carry many curves. Now learn the sound that arrives for free inside every consonant.

Script you'll notice: The vowel you get for free

How these letters are written, one after another, stroke by stroke: வ, க

The last lesson showed that Tamil is an **abugida**: a consonant already carries a built-in **a**. Here are the first two consonants that carry it.

Script you'll notice: வ — "va"

1. **a near-closed loop on the left**
2. **a full-height arm across the top, ending in a descender on the right**

Script you'll notice: க — "ka"

1. **a straight horizontal top bar**
2. **a bowl hanging from its left end**
3. **a short right stroke that hooks left below**

The letters in this word

Devanagari separates क, ख, ग, घ. Tamil uses க across that space: *k* at the start of a word and when doubled (க்க), *g* after a nasal (ங்க), and a softer *h*-like sound between vowels. **Position**, not a new spelling, selects the sound.
Tamil therefore needs only 18 consonant letters where Devanagari needs 33; its native words do not depend on those written distinctions.

Grammar lens

One letter, three sounds — now on the page. Chapter~1 said Tamil picks this sound by position rather than by spelling; here is the letter that does it. Devanagari spells *ka*, *kha*, *ga* and *gha* with four separate letters. Tamil writes க for all of them: *k* at the start of a word and when doubled (க்க), *g* after a nasal (ங்க), and a softer *h*-like sound between vowels. That is why Tamil needs only 18 consonant letters where Devanagari needs 33 — its native words do not depend on those written distinctions.

Your turn

- *Write it:* வ — "left loop, top arm, descender"
- *Write it:* க — "top bar, left bowl, hooking right stroke"
- *Say it:* "க is **ka**, not k"
- *Contrast:* initial *k* · after a nasal *g* · between vowels soft *h*

Before you move on

What does க say alone? (**Ka** — the vowel is inherent.) What kind of script is this? (An **abugida**.) Which sounds can க spell? (*k*, *g*, and a softer *h*-like sound, chosen by **position**.) Draw வ and க.

5.4 வாழ் (vāḻ) — "to live, to flourish"

A second verb — and one of the most beloved words in the language, the one Tamils use to bless.

The word, taken apart — its roots and family

வாழ் (*vāḻ*, "to live, to flourish, to thrive") is native Dravidian, and carries more warmth than a plain "to reside." From it grow *vāḻkkai* ("life") and the blessing *vāḻga* ("may you live / long live"), heard in *vāḻga tamiḻ* ("long live Tamil"). To say "I live," add the familiar ending: ***nāṉ ... vāḻgiṟēṉ***, stem + present *-giṟ-* + "I" *-ēṉ*, exactly like *pēsugiṟēṉ*.

Grammar Lens: same engine, new verb

You already know the machine: *vāḻ-* (stem) + *-giṟ-* (present) + *-ēṉ* ("I") → *vāḻgiṟēṉ* ("I live"). Every verb you learn slots into the same three-part frame — that is the reward for learning *pēsu* carefully.

Your turn

Say these aloud:

- "vāḻ" — feel the retroflex *ḻ*
- "I live" — *nāṉ vāḻgiṟēṉ*
- the blessing — *vāḻga!* ("long live / may you flourish")

Before you move on

Build "I live" from *vāḻ*, and give the blessing made from it.
(*Vāḻgiṟēṉ*; *vāḻga!*, "may you live / long live.")

5.5 வேலை செய் (vēlai sey) — "to work"

The last verb of the chapter — and, like Hindi's *karnā*, it is a "do" verb that builds a hundred others.

The word, taken apart — its roots and family

செய் (*sey*, "to do, to make") is a core native Dravidian verb, and Tamil — like Hindi with *karnā* — builds compound verbs by putting a noun in front of it:

- வேலை செய் (*vēlai sey*) = "work-do" = "**to work**" (*vēlai*, "work")
- சமையல் செய் (*samaiyal sey*) = "to cook"
- ***udavi sey*** = "to help"

So "I work" is ***nāṉ vēlai seygiṟēṉ*** — *sey-* + *-giṟ-* + *-ēṉ*, "I do work." Master *sey* and a whole grammar of "do-verbs" opens up.
In the family, and next door

	word
Kannada	ಕೆಲಸ ಮಾಡು (*kelasa māḍu*)
Telugu	పని చేయు (*pani cēyu*)
Malayalam	ജോലി ചെയ്യുക (*jōli ceyyuka*)
English	to work

Grammar Lens: noun + செய் = a new verb

This "noun + *sey*" pattern is the exact twin of Hindi's "noun + *karnā*" (*kām karnā*, "to work"). Two unrelated language families — Dravidian and Indo-Aryan — landed on the same clever trick: make an all-purpose "do" verb, then bolt nouns onto it. Living side by side for millennia, Tamil and Hindi have quietly traded habits like this.

Your turn

Say these aloud:

- "vēlai sey" (to work)
- "I work" — *nāṉ vēlai seygiṟēṉ*
- the Hindi twin of this trick (noun + *karnā*)

Before you move on

How does Tamil turn "work" into "to work," and what Hindi verb works the same way? (*Vēlai* + *sey* = "work-do"; Hindi's *karnā*, as in *kām karnā*.)

5.6 Chapter 5 — The first verbs

No new words. Three verbs, one engine — build real sentences about yourself.

Your turn — build the sentences

Say these aloud:

- "I speak Tamil" — *nāṉ tamiḻ pēsugiṟēṉ*

- "I live in Chennai" — *nāṉ Cheṉṉaiyil vāḻgiṟēṉ*
- "I work" — *nāṉ vēlai seygiṟēṉ*
- "he speaks" vs. "she speaks" — *pēsugiṟāṉ* / *pēsugiṟāḷ*

Grammar lens — the engine

Say these aloud:

- the three stacked pieces of every Tamil verb (stem + tense + person)
- the ending that means "I" (*-ēṉ*)
- where Tamil marks gender — and where it doesn't (3rd person only)

The word, taken apart — its roots and family

All four words in this recap are native Dravidian, and each has a cousin in Malayalam: *pēsu*, "to speak" (DEDR 4430; Malayalam pēcuka), *vāḻ*, "to live" (DEDR 5372; Malayalam vāḻuka), *sey*, "to do" (DEDR 1957; Malayalam ceyka), and *vēlai*, "work" (DEDR 5540; Malayalam vēla).

What you've built — roots you now carry

- *pēsu* "to speak" (native Dravidian)
- *vāḻ* "to live/flourish" → *vāḻkkai* "life," *vāḻga* "long live"
- *sey* "to do" → *vēlai sey* "to work" (the twin of Hindi's *karnā*)
- *tamiḻ* — the language, and its signature retroflex *ḻ*

Before you move on

In one breath, say your language and your work in Tamil, then bless someone with the *vāḻ* verb. (*Nāṉ tamiḻ pēsugiṟēṉ. Nāṉ vēlai seygiṟēṉ. Vāḻga!*)

Chapter 6

Dative Case and Dative Subjects

Modes: **voice** (3) **eyes** (1) **pen** (5) **Hands-free start:** the first of 9 lessons.

> ***By the end of this chapter:*** I can attach -உக்கு to a noun in either of its surface forms and say why "I know Tamil" puts the experiencer in the dative instead of giving the sentence a subject.
>
> *Line up* எனக்கு, నాకు, ನನಗೆ *and* എനിക്ക്, *point to the experiencer in each, and paraphrase* எனக்குத் தமிழ் தெரியும் *as "the language is known to me"; rebuild peyarukku, vēlaikku and enakku, say how -ukku stacks where Latin fuses, then point to* வ, ண *and* ம *in* வணக்கம் *and say the retroflex ṇ.*

6.1 -உக்கு (-ukku) — "to, for"

Your first **case ending**. English says "**to** me" with a separate word in front. Tamil says it with a piece **stuck on the back** — and that small difference is the biggest structural fact about the language.

Grammar Lens: Adding it on

Take a noun you know and add **-உக்கு**:

word	**+ the dative**	**meaning**
peyar — name	*peyar**ukku***	to/for the name
vēlai — work	*vēlai**kku***	for work

The suffix has two shapes — **-உக்கு** *-ukku* and **-க்கு** *-kku* — chosen by

the sound the noun ends in. One case, two forms; the seam still shows. And with "I" — this one is irregular and worth memorising, because you'll use it constantly:

nāṉ ("I") → *enakku* ("to me")

The pronoun changes its body (*nāṉ* → *en-*) before the suffix lands. Nouns don't — they just take the ending.

In the family, and next door

	word	**same root**
Kannada	-ಗೆ (*-ge*)	
Telugu	-కు (*-ku*)	yes
Malayalam	-ിക്ക് (*-ikkŭ*)	yes
English	the dative suffix -ukku, 'to / for,' including its two surface forms and irregular enakku	

The word, taken apart — its roots and family

-உக்கு (*-ukku*) is the native Dravidian dative, and the sister languages keep their own forms of it: Malayalam *-kku*, Kannada *-ge* and *-kke*, Telugu *-ku*. It is an ending, not a word, so the etymological dictionary gives it no entry of its own; the match across the family is the evidence.

Your turn

Say these aloud:

- "*peyar* … *peyarukku*"
- "*nāṉ* … *enakku*" — "I" … "to me"
- "*vēlaikku*" — "for work," from Ch. 5's *vēlai*

Before you move on

What does **-உக்கு** mean? ("**To**" or "**for**.") Where does it go? (**On the end** of the noun — Tamil adds, it doesn't put a word in front.)

What is “to me”? (***enakku*** — the pronoun’s body changes to *en-* first.) Why does the suffix show up as *-ukku* and *-kku*? (**One case, two shapes**, chosen by the noun’s ending.) Next: two more letters — மo and retroflex ண.

6.2 வ — one spiral, one motion

One letter this time. Just one.

It is the first letter of the first word you learned, and it is the easiest one in this book to write: the pen never leaves the paper.

Script you’ll notice: வ

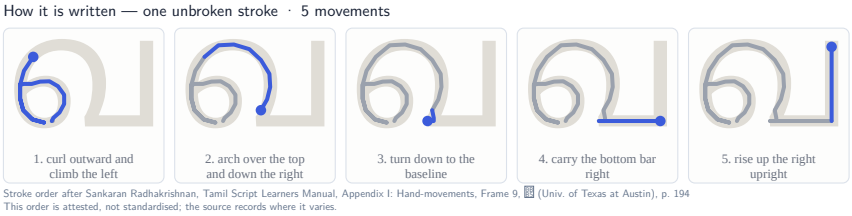

வ — *va*.

What it is made of:

- a spiral loop on the left
- a bottom bar
- a tall right upright

வணக்கம் starts with it, and so does வாழ் — *to live*.

Writing: வ

How வ *is written, stroke by stroke*

- **1.** start at the inner curl and spiral outward, climbing the left side
- **2.** without lifting, arch over the top and descend on the right
- **3.** without lifting, turn down to the baseline

- **4.** without lifting, carry the bottom bar to the right
- **5.** without lifting, rise up the right upright — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested teaching order, not a national standard — Tamil handwriting is taught with school-to-school variation. Source: Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 9, வ (Univ. of Texas at Austin), p. 194.

Your turn

- *Trace it:* வ once, slowly, following the steps above
- *Say it:* "va" as you finish it
- *Trace it:* it twice more, without looking back at the steps

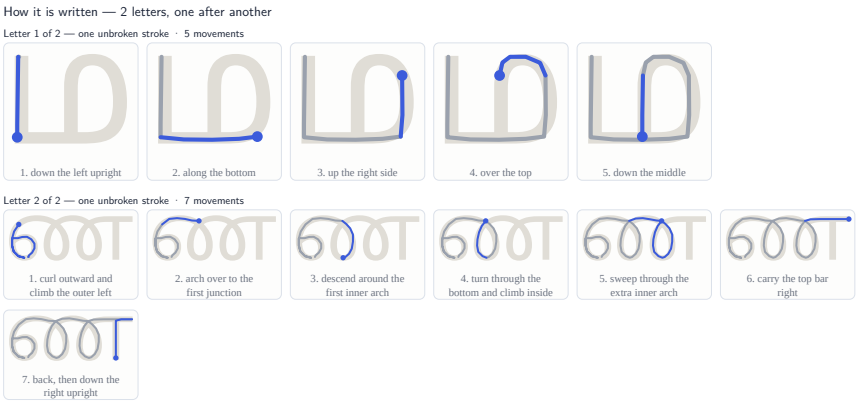

Before you move on

How many times does the pen lift while writing வ? (**None** — one unbroken motion.) What sound does it carry on its own? (**va**.)

6.3 ம and ண — a loop, and a curled tongue

Two more letters, and with them you'll have every letter of this book's first word. One is easy. The other is a sound you may not be able to hear yet.

Script you'll notice: ம

How these letters are written, one after another, stroke by stroke: ம, ண

1. **a straight vertical stroke on the LEFT**
2. **a horizontal along the bottom**
3. **a rounded arch closing it on the RIGHT**

Get the sides the right way round. The **upright is on the left** and the **curve on the right** — which is the reverse of what most people guess, and the reverse of the Devanagari habit of hanging a shape off a right-hand spine.

Script you'll notice: ண

1. **a straight top bar**
2. **a loop on the left**
3. **two arches**
4. **a straight vertical on the right, down to the baseline**

The dot under the romanization — **ṇ**, not plain *n* — is doing real work.

The letters in this word

Say English **n**. Your tongue touches just behind your teeth.
Now curl the tip of your tongue **up and back** toward the roof of your mouth, and say it again. That is **ṇ**, and it is a different letter in Tamil. English has no such sound and no way to write one, which is why an English speaker typically **cannot hear the difference at first**. That is expected. The ear learns it after the hand does, which is one good argument for writing the letters rather than only reading them.
Retroflex sounds are a signature of the languages of India — they show up across Tamil, Telugu, Kannada, Malayalam, Hindi and Sanskrit alike, in families that are otherwise unrelated to each other. It's one of the features that makes South Asia a *linguistic area*: neighbouring languages that borrowed a sound from each other rather than inheriting it.

Your turn

- *Write it:* ம — "left upright, bottom, **right** arch"
- *Write it:* ண — "top bar, left loop, **two** arches, straight vertical"
- *Say it:* plain *n*, then curl the tongue back — **ṇ**

Before you move on

Draw ம — which side is the upright on? (**The left**; the arch closes it on the right.) Draw ண — what makes it *not* ன? (**One extra arch**: ண has **two** arches where ன has one. Both end in the same straight vertical.) What does the dot in **ṇ** mean? (**Retroflex** — the tongue curls **back** to the roof of the mouth.) Why can't you hear it yet? (**English has no such sound**; the ear learns it after the hand.) Next: stacking that dative suffix where Latin would fuse several meanings.

6.4 -உக்கு — one carriage in a suffix train

You can point to *peyar* and *-ukku* separately. That visible seam is the structural lesson.

Grammar Lens: Stacking versus fusion

	Tamil -ukku	**Latin -īs**
fixes the case?	**dative**, always	dative **or** ablative
carries number?	no; another suffix can	plural is baked in
carries declension?	no	first/second class is baked in
visible seam?	**peyar + ukku**	one fused ending

Tamil **stacks**. Each suffix contributes one meaning in a fixed order, like a train carriage. Latin **fuses** case, number, and class into an indivisible ending, and *-īs* does not even identify one case by itself. This is **agglutinative** structure: long words remain buildable because their pieces stay legible. The comparison is not about simplicity; it is about where the grammatical information lives.

Your turn

- *Break apart: peyar + ukku*
- *Say it:* "one suffix, one meaning, visible seam"
- *Contrast:* Tamil stacks · Latin fuses

Before you move on

What does *-ukku* contribute? (**Dative to/for**, one meaning.) What does Latin *-īs* fuse? (**Case, plural number, and declension class**.) Which system leaves the seam visible? (**Tamil's agglutinative stack**.)

6.5 எனக்குத் தமிழ் தெரியும் — "I know Tamil"

In Chapter 5 you said ***nāṉ tamiḻ pēsugiṟēṉ*** — "**I** speak Tamil," with *nāṉ* as the subject. Now say "I **know** Tamil." Tamil will not let you use *nāṉ*.

You'll want to know: The sentence

எனக்குத் தமிழ் தெரியும். *enakku tamiḻ teriyum.* literally: "**to-me** Tamil is-known."

Word by word:

piece	
எனக்கு(த்) *enakku(t)*	"to me" — the dative from the last lesson
தமிழ் *tamiḻ*	Tamil (Ch. 5)
தெரியும் *teriyum*	"is known / is apparent"

Enakku and *teriyum* are Dravidian (DEDR 5160, 3419).

That extra த் on *enakku* is **sandhi** — a joining consonant Tamil inserts between certain words to smooth the seam. It belongs to neither word on its own; it exists only because they are next to each other. Nothing to learn yet; you will see it constantly.

You are not the subject. *Nāṉ* is gone — the person has been moved into the dative. What's left in the plain, unmarked form is *tamiḻ*: the sentence is now about **the language**, and you are merely the one it is known **to**.

(Grammarians call *enakku* the **dative subject**, because it behaves like the subject even though it isn't in the subject case. The odd feeling of the sentence is exactly that split.)

In the family, and next door

	word
Kannada	ನನಗೆ ಕನ್ನಡ ಗೊತ್ತು (*nanage kannaḍa gottu*)
Telugu	నాకు తెలుగు వచ్చు (*nāku telugu vaccu*)
Malayalam	എനിക്ക് മലയാളം അറിയാം (*enikkŭ malayāḷaṁ aṟiyāṁ*)
English	'I know Tamil'

Grammar Lens: Why: things that happen *to* you

Tamil sorts verbs by whether you **do** something or something **happens to** you. Speaking is something you do — so Ch. 5 used *nāṉ*. But knowing, liking, wanting, being hungry, being cold: these arrive at you. Tamil marks that by putting the person in the **dative**.

English frames it as	Tamil frames it as
I **know** Tamil	Tamil is known **to me**
I **like** it	it is pleasing **to me**
I **am** cold	cold is **to me**

English does this occasionally and archaically — "**methinks**" is exactly it (*me* is dative: "it seems **to me**"). Tamil made it a rule.

Your turn

Say these aloud:

- "*enakku tamiḻ teriyum*"
- the contrast — "*nāṉ tamiḻ pēsugiṟēṉ*" (I speak) … "*enakku tamiḻ teriyum*" (known to me)
- the literal — "to-me Tamil is-known"

Before you move on

What does எனக்குத் தமிழ் தெரியும் literally say? ("**To-me** Tamil **is-known**.") Which word has English got that Tamil hasn't? (A nominative "**I**" — *nāṉ* is replaced by the dative *enakku*.) Why does Tamil use the dative here? (Because knowing **happens to** you; you don't **do** it.) Which English word preserves the same idea? (**Methinks** — "it seems **to me**".) Next: watch all four Dravidian sisters use the same experiencer shape.

6.6 -ukku, -ku, -ge, -ikku — the family shows its bones

Tamil says knowing happens **to** you. Its three closest sisters make the same grammatical choice.

Grammar Lens: Four sentences, one construction

language	"I know [the language]"	dative
Tamil	*enakku tamiḻ teriyum*	**-ukku**
Telugu	*nāku telugu vaccu*	**-ku**
Kannada	*nanage kannaḍa gottu*	**-ge**
Malayalam	*enikku malayāḷam aṟiyām*	**-ikku**

The verbs differ, but the experiencer sits in a dative whose forms visibly belong together: *-ukku / -ku / -ge / -ikku*. This is family evidence, just as *blanc/bianco/branco* exposes Romance kinship. The comparison also makes cross-language practice useful: once you recognize "to me," you can search for the known or apparent thing rather than forcing an English subject onto the sentence.

Your turn

- *Say it:* "-ukku · -ku · -ge · -ikku"
- *Point to:* the experiencer in each sentence
- *Put it another way:* "the language is known to me"

Your turn — the ending underneath

- Say "for the name", then "for work". (***peyarukku***, ***vēlaikku*** — one case, two shapes, picked by the noun's ending.) And "to me"? (***enakku*** — *nāṉ* changes its body to *en-* first.)
- How is *-ukku* unlike Latin *-īs*? (**One** meaning, seam visible — Tamil **stacks**; Latin **fuses** case, number and class.)
- Why the dative for knowing? (Knowing **happens to** you; speaking you **do**.)

Script — வ, ம and ண

வணக்கம்

- *Point to:* வ, then ண, then ம

- *Say it:* plain *n*, then curl the tongue back — **ṇ**

(வ: *va*, one motion, no pen lift. ம: upright on the **left**, arch on the right. ண: **two** arches; its dot-*ṇ* is **retroflex**, tongue curled back.)

Before you move on

Do the four sisters agree on dative experiencers? (**Yes**.) Which four suffix shapes reveal the relationship? (***-ukku, -ku, -ge, -ikku***.) What stays plain in the sentence? (The thing **known or experienced**.)

6.7 ண — the first of three n's

Before the new one: say the sound of வ.

One letter this time. Just one.

Tamil has three different letters for sounds English hears as one *n*. This is the first, and the dot under its romanization — **ṇ**, not plain *n* — is doing real work: the tongue curls back to the roof of the mouth. Words genuinely differ by it.

Script you'll notice: ண

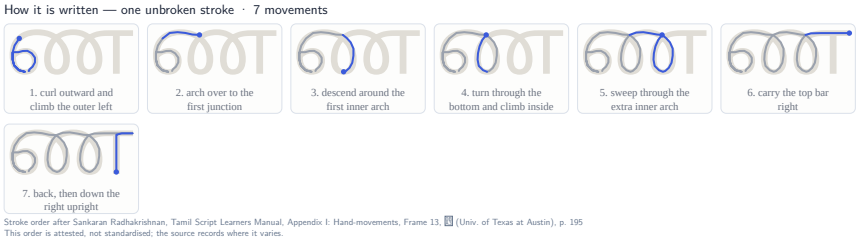

ண — *ṇa*.

What it is made of:

- a spiral loop on the left
- TWO rounded inner arches
- a straight top bar
- a straight vertical on the right, hanging from the bar down to the baseline

It is the second letter of வணக்கம்.

Writing: ணா

How ணா is written, stroke by stroke

- **1.** start in the lower-left curl and spiral outward, climbing the outer left side
- **2.** without lifting, arch over the top of the left loop to the first junction
- **3.** without lifting, descend around the outside of the first inner arch
- **4.** without lifting, turn through its bottom and climb the inside back to the first junction
- **5.** without lifting, sweep through the extra inner arch — over its top, around its outside and bottom, then up its inside to the right junction
- **6.** without lifting, carry the top bar to the right edge
- **7.** without lifting, come back along the bar to the right upright and draw it straight down — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested teaching order, not a national standard — Tamil handwriting is taught with school-to-school variation. Source: Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 13, ணா (Univ. of Texas at Austin), p. 195.

Your turn

- *Trace it:* ணா once, slowly, following the steps above
- *Say it:* "ṇa" as you finish it
- *Trace it:* it twice more, without looking back at the steps

Before you move on

Where does the tongue go for ணா? (**Curled back**, to the roof of the mouth.) How many pen lifts? (**None** — the bar runs back into the upright.)

6.8 ந, னா, ணா — three stops on one tongue-map

English writes one *n*. Tamil keeps three tongue positions apart.

Script you'll notice: The backward walk

How these letters are written, one after another, stroke by stroke: ந, னா, ணா

letter	sound	tongue
ந	*na*	against the **teeth** (dental)
ன	*n̲a*	on the **ridge** behind the teeth (alveolar)
ண	*ṇa*	**curled back** to the roof (retroflex)

Move backward: teeth → ridge → curled roof. English spells all three with one letter and initially hears them as the same sound; Tamil uses separate letters because its words depend on the contrast.

You will draw ந and ன when *nandri* needs them. For now compare the last pair: **ண is ன with one extra arch**. Both open with a top bar and loop and finish with the same vertical. ன has one middle arch; ண has two.

Retroflex sounds occur across unrelated South Asian language families. That shared geography makes the region a **linguistic area**: neighbors can borrow a sound pattern without inheriting it from one ancestor.

Your turn

- *Say it:* dental ந at the teeth
- *Say it:* alveolar ன at the ridge
- *Say it:* retroflex ண with the tongue curled back
- *Trace it:* one arch in ன · two arches in ண

Before you move on

How many n-letters does Tamil have? (**Three**.) What separates them? (Tongue position: **dental, alveolar, retroflex**.) Which two differ by one arch? (ன has one; ண has two.) Next: the numbers one to five.

6.9 ⊔ — one character, met inside words you already say

Curvy and loopy with flat top-bars on many letters, repeated arches, and no continuous head-line.

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ப

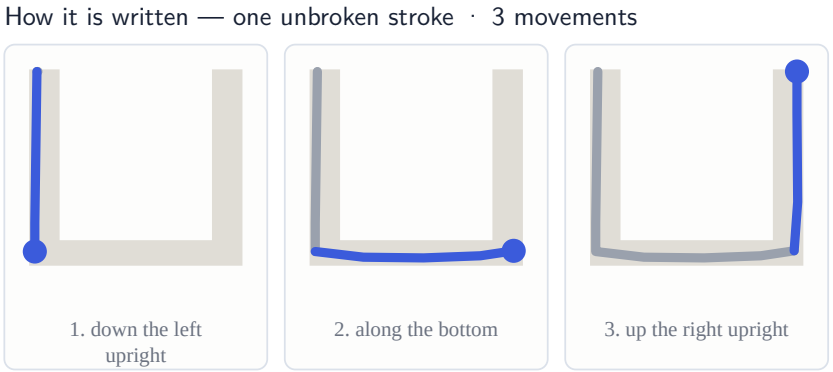

ப — *pa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *p*, it is **pa**.

You already say these, and every one of them has ப somewhere inside it:

- பெயர் *peyar* — name
- என் பெயர் **...** *en̲ peyar …* — my name is… (with no "is")
- எப்படி *eppaḍi* — how
- பரவாயில்லை *paravāyillai* — it's okay / no problem / you're welcome

Writing: ப — follow the numbered strip

Stroke order after Sankaran Radhakrishnan, Tamil Script Learners Manual, Frame 1, (University of Texas at Austin, 2009)
This order is attested, not standardised; the source records where it varies.

How ப is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ப yourself — slowly, and larger than it is printed.

The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ப in the ones that have it

  பெயர் · வணக்கம்

- *Trace it:* ப three times, saying *pa* as you finish each one
- *Look:* back at any page of this chapter and find ப once more

Before you move on

Which character is this — ப? What sound does it carry? (***pa***.) Name one word you already say that contains it.

Chapter 7

Numbers One to Ten

Modes: 🚗 **voice** (4) ✓ **pen** (16) 🚗 **Hands-free start:** the first of 20 lessons.

> ***By the end of this chapter:*** I can hear, say, read, and write representative numbers from one to ten in Tamil and recognize their Dravidian family history.
>
> *Count onru to pattu, read all ten Tamil numeral shapes out of order, write eezhu with its numeral from sound alone, and recall the pattu/hattu relationship.*

7.1 One to five — voice first

Keep your pencil down. Hear five Tamil number words, attach each to a quantity, and say them before your eyes meet Tamil writing.

The letters in this word

quantity	said
1	***onru***
2	***irantu***
3	***muunru***
4	***naanku***
5	***aintu***

Count up aloud, one word to each beat: *onru, irantu, muunru, naanku, aintu. Twice through:*
These are inherited Dravidian words, not borrowed Sanskrit number

names. The family history can wait until the sounds and quantities feel secure.

Your turn

- *Hear: muunru*, then say the number — three
- *Hear: aintu*, then say the number — five
- *Say it: onru* through *aintu*, one number to each beat

Before you move on

Count from one to five without looking. Which word means two? (***Irantu.***) Are these forms borrowed from Sanskrit? (**No.**) Next, only three numeral shapes arrive.

7.2 க · ஒ · ூ — three numeral shapes

Say *onru, irantu, muunru*. The meanings and sounds are familiar; this lesson adds only their three numeral shapes.

Script

- க means 1: *onru*.
- ஒ means 2: *irantu*.
- ூ means 3: *muunru*.

Point in order, then out of order: ூ க ஒ.

Writing — observe and trace

Keep the models visible. Finger-trace க, ஒ, and ூ once each. Say the number word only after your finger stops. Do not copy from memory yet.

Before you move on

Point to ஒ and say it. (***Irantu.***) Which shape means three? (ூ.) How many new shapes arrived? (**Three.**)

7.3 சா · ஞ — finish the first five numerals

Read க உ ங. Two shapes remain in the first group.

Script

- சா means 4: *naanku*.
- ஞ means 5: *aintu*.

Point through க உ ங சா ஞ once.

Writing — observe and trace

Keep both models visible. Trace சா once and ஞ once. Then circle the one you hear: *Hear: aintu*. (ஞ.)

Before you move on

Which shape means four? (சா.) Read ஞ. (***Aintu.***) This lesson added two shapes, not five.

7.4 Five familiar words — now in Tamil script

Say one to five, then read க உ ங சா ஞ. No new numeral shape appears below.

Script

numeral	word	said
க	ஒன்று	*onru*
உ	இரண்டு	*irantu*
ங	மூன்று	*muunru*
சா	நான்கு	*naanku*
ஞ	ஐந்து	*aintu*

Follow each word with your finger while saying it. The letters have appeared earlier; this step only joins familiar pieces.

Writing — observe and trace

Trace ஒன்று — க once with the model visible. Read the other four rows; do not copy the whole table yet.

Before you move on

Read ங — மூன்று. (***Muunru**, three.*) Which word belongs to ஞ? (ஐந்து, *aintu.*) No new shape was added.

7.5 க உ ங ச ஞ — one visible copy

Point through க உ ங ச ஞ and say the five words. Keep the row visible.

Writing — guided copy

Copy the row once beneath its model. Look back after every shape if needed. Say *onru* through *aintu* as you check. Repair only one shape.

Before you move on

Read ச. (***Naanku.***) No new shape was added here.

7.6 Five numerals — hide, then write

Study க உ ங ச ஞ for five seconds. Say each number, then cover the row.

Writing — delayed copy

Write the five numerals in order while the model is hidden. Peek once if one will not come, cover it again, and continue. Uncover and repair one place.

Before you move on

What changed from the previous lesson? (**The model was hidden before writing.**)

7.7 Three heard numbers — write their numerals

Cover the answer line. You will hear familiar words, never an untaught form.

Writing — dictation

Hear: irantu — aintu — muunru

Write the three numeral shapes from sound alone. Then uncover: ೭ ൫ ൱. Repair one shape if needed; do not rewrite the line.

Before you move on

Write the numeral for *naanku* from sound alone. (൪.) Now the Dravidian family lesson can deepen forms you can already hear and read.

7.8 Two to five — one family in four regional coats

Hindi's number forms are Sanskrit worn smooth. Tamil's are native Dravidian, so their sister-language shapes reveal the family directly.

The word, taken apart — its roots and family

number	Tamil	Kannada / Telugu / Malayalam
2	*iraṇṭu*	*eraḍu* / *reṇḍu* / *raṇṭu*
3	*mūṉṟu*	*mūru* / *mūḍu* / *mūnnu*
4	*nāṉku*	*nālku* / *nālugu* / *nālu*
5	*aintu*	*aidu* / *aidu* / *añcu*

Each row is one word in four regional coats. That shared skeleton is why one Dravidian language gives you a running start on another. **One** is less tidy: Tamil *oṉṟu*, Kannada *ondu*, and Malayalam *onnu* share old *oṉ-*, while Telugu uses the separate formation *okaṭi*. The family agrees more neatly on 2–5 than on 1.

The letters in this word

In *oṉṟu* and *mūṉṟu*, ன்ற is alveolar *n* running into hard *ṟ*, almost one knock: *on-ru, muun-ru*. Puḷḷi on ன் removes its vowel before the cluster.

Your turn

- *Say it:* "iraṇṭu · eraḍu · reṇḍu · raṇṭu"
- *Say it: oṉṟu* and *mūṉṟu*, holding ன்ற together
- *Identify:* Telugu *okaṭi* as the different "one"

Before you move on

Are these forms borrowed? (**No**, native Dravidian.) Which numbers stay tidiest across the family? (**Two through five**.) Which language forms "one" differently? (**Telugu**, *okaṭi*.)

7.9 Six to ten — voice first

Count *onru* through *aintu*. Keep your pencil down: five new meanings and sounds come before their shapes.

The letters in this word

quantity	said
6	***aaru***
7	***eezhu***
8	***ettu***
9	***onpatu***
10	***pattu***

Say the row once slowly, then once at counting speed. *Twice through.*

Why it's said this way

The middle of *eezhu*, seven, has Tamil's characteristic curled *zh*. Practise the sound now; its letter waits.

The word, taken apart — its roots and family

Nine, *onpatu*, is usually read as one plus ten: one short of *pattu*. Say *on-patu*, then *onpatu*. The word is native Dravidian (DEDR 1025), and how it was built is uncertain: DEDR sets it beside both "one" and an older word for nine.

Your turn

- *Say it: aaru, eezhu, ettu, onpatu, pattu*
- *Hear: eezhu*, then say the number — seven
- *Hear: onpatu*, then say the number — nine

Before you move on

Count six to ten. Which word keeps the curled *zh*? (***Eezhu.***) Which word leans on ten? (***Onpatu****, nine.*) Next, three numeral shapes.

7.10 சு · எ · அ — three more numeral shapes

Say *aaru, eezhu, ettu*. Only their shapes are new.

Script

- சு means 6: *aaru*.
- எ means 7: *eezhu*.
- அ means 8: *ettu*.

Point out of order: அ சு எ.

Writing — observe and trace

Trace சு, எ, and அ once each with the models visible. Say the word after each trace. Memory writing waits.

Before you move on

Which shape means seven? (எ.) Read அ. (***Ettu.***) Three new shapes arrived.

7.11 கூ · ழ — nine and ten

Read சூ எ அ. Two shapes finish the row.

Script

- கூ means 9: *onpatu*.
- ழ means 10: *pattu*.

Point through சூ எ அ கூ ழ once.

Writing — observe and trace

Trace கூ once and ழ once with their models visible. Circle the one you hear: *Hear: onpatu*. (கூ.)

Before you move on

Which shape means ten? (ழ.) Read கூ. (***Onpatu.***) Two new shapes arrived.

7.12 Six to ten — now in Tamil script

Say six to ten, then read சூ எ அ கூ ழ. No new numeral shape appears below.

Script

numeral	word	said
சூ	ஆறு	*aaru*
எ	ஏழு	*eezhu*
அ	எட்டு	*ettu*
கூ	ஒன்பது	*onpatu*
ழ	பத்து	*pattu*

The curled sound you heard in *eezhu* is ழ. Follow ஏழு with your finger while saying it; every shape has had earlier support.

Writing — observe and trace

Trace ஏழு — எ once with the model visible. Read the remaining rows without copying the whole table.

Before you move on

Which letter carries the curled sound? (ழ.) Read எ — ஏழு. (***Eezhu**, seven.*) No new shape was added.

7.13 சூ எ அ சூ ஐ — one supported copy

Read சூ எ அ சூ ஐ. Keep both models below visible.

Writing — guided copy

Copy சூ எ அ சூ ஐ once. Then copy ஏழு — எ once. Look back whenever you need. Check only one place, then stop.

Before you move on

Read your copied word. (***Eezhu**, seven.*) Which numeral belongs beside it? (எ.)

7.14 ன — the second n, and how to tell it from ண

Before the new one: say the sound of ண.

One letter this time. Just one.

Look at ண and ன side by side. Same spiral loop, same top bar, same upright on the right. The whole difference is **how many arches sit inside**: ண has two, ன has one. That is the entire distinction, and it is why these two are learned together rather than a chapter apart.

Script you'll notice: ன

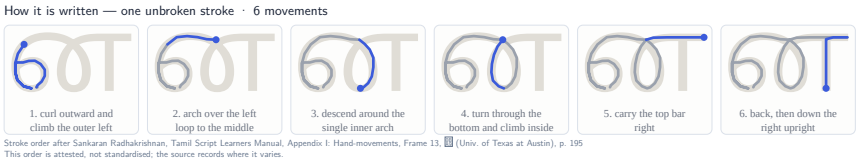

ன — *n̲a*.

What it is made of:

- a spiral loop on the left
- ONE rounded inner arch
- a straight top bar
- a straight vertical on the right, hanging from the bar down to the baseline

It ends நான் — *I* — and நன்றி's second syllable.

Writing: ன

How **ன** *is written, stroke by stroke*

- **1.** start in the lower-left curl and spiral outward, climbing the outer left side
- **2.** without lifting, arch over the top of the left loop to the middle junction
- **3.** without lifting, descend around the outside of the single inner arch
- **4.** without lifting, turn through its bottom and climb the inside back to the top junction
- **5.** without lifting, carry the top bar to the right edge
- **6.** without lifting, come back along the bar to the right upright and draw it straight down — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested teaching order, not a national standard — Tamil handwriting is taught with school-to-school variation. Source: Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 13, ன (Univ. of Texas at Austin), p. 195.

Your turn

- *Trace it:* ன once, slowly, following the steps above
- *Say it:* "n̲a" as you finish it
- *Trace it:* it twice more, without looking back at the steps

Before you move on

What separates ண from ன? (**Two inner arches against one.**) Which one is this? (ன, one arch.)

7.15 ஏழு — hide, then write

Study ஏழு — ஏ for five seconds. Say *eezhu*, then cover both forms.

Writing — delayed copy

Write the word and numeral while the model is hidden. Peek once if needed, cover again, and finish. Uncover and repair one shape.

Before you move on

Which letter carries the curled sound? (ழ.) What changed from guided copy? (**The model was hidden before writing.**)

7.16 Heard numbers — write without a model

Cover the answer line. Every sound and shape has had a supported turn.

Writing — dictation and transcription

Hear: aaru — eezhu — onpatu

Write the three numerals from sound alone. For *eezhu*, also write the word. Then uncover: ௬ — எ ஏழு — ௯. Repair one place.

Before you move on

Write the numeral for *pattu*. (௰.) Write seven. (ஏழு.) Next, compare only forms you can already hear and read.

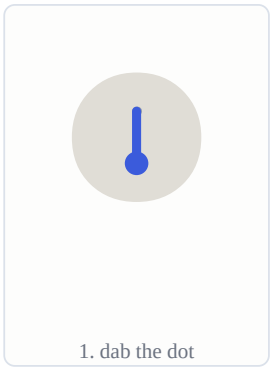

7.17 ◌் — the dot that leaves both letters visible

Every consonant carries a built-in **a**. So how do you write a consonant with **no** vowel — the *k* in *vaṇakkam*, or the *m* at the end?

One dot.

Script you'll notice: The puḷḷi

How it is written — one unbroken stroke · 1 movement

Stroke order after Abhinaya Rajarajan, Varai (Swift Student Challenge 2026), reference drawings recorded by hand for the 18 Tamil consonants with pulli, க் to ன் (repository commit 952294fa, no licence: facts only)
This order is attested, not standardised; the source records where it varies.

How ◌் is written, stroke by stroke

க = *ka* → க் = *k*

புள்ளி (*puḷḷi*) means simply **"the dot."** Written above a letter, it removes the inherent vowel. That's the whole rule.

A standing note for this whole track. These lessons quote real Tamil words and examples, and most of them contain letters the track has not taught you to draw yet — *puḷḷi*'s own name uses ப, ள and the ◌ள sign, and the comparisons below reach for others again. **Read anything printed here; only draw the letters a lesson has actually broken into strokes.** The data file behind this track covers 11 letters so far and says so (`complete: false`) — it grows as the chapters need it.

Script you'll notice: What Tamil does *not* do

If you have done the Devanagari track, this is the moment to notice a real divergence.

In Devanagari, killing the vowel makes the bare consonant **fuse** with the next one into a squeezed **conjunct** — स् + त becomes स्त, and the first letter loses its spine. The virama usually disappears into the ligature.

Tamil doesn't do that. The dot stays visible, and both letters keep their full shape:

Devanagari	स् + त → स्त — a new fused shape
Tamil	க் + க → க்க — two letters, dot intact

The consequence is arithmetic. Tamil's whole set is **247 characters**: 12 vowels + 18 consonants + the 216 consonant-vowel combinations + the **āytam** ஃ. That is genuinely all of them. Devanagari's conjuncts run to many hundreds of ligature shapes on top of its letters, each to be learned or at least recognised.

(One honest exception: Tamil does have a few **ligatures borrowed with Sanskrit words** — க்ஷ *kṣa* and ஸ்ரீ *śrī*. They sit outside the 18 native consonants and outside the 247.)

Your turn

Write these out:

- க் — "க, then the dot above"
- க்க — two full letters, dot intact, **no fusing**

Before you move on

What does the **puḷḷi** do, and what does the word mean? (Removes the **inherent vowel**; *puḷḷi* is simply "**the dot**".) What does Devanagari do that Tamil doesn't? (**Fuses** the letters into a **conjunct** — Tamil keeps both shapes and the dot.) What does Tamil get in exchange? (A **much smaller character set** — 247, with **almost** no ligatures: only the borrowed ஶ and ஸ்ரீ.) Next: six, seven and ten across the family.

7.18 Six to ten — family resemblances and one Kannada shift

The Tamil forms are learned. Now use their sister shapes as evidence for inheritance and regular sound change.

The word, taken apart — its roots and family

Six and seven remain close: Tamil *āṟu*, Kannada *āru*, Malayalam *āṟu*; Tamil *ēḻu*, Kannada *ēḷu*, Malayalam *ēḻu*. Tamil and Malayalam also keep eight and nine nearly identical: *eṭṭu* and *oṉpatu/onpatu*. Telugu wanders on eight and nine with *enimidi* and *tommidi*, so those forms are less reliable as family-wide recognition anchors.

The word, taken apart — its roots and family

Tamil and Malayalam say **pattu**, while Kannada says **hattu**. The initial $p \rightarrow h$ is a regular Kannada shift, not a random replacement. Compare Tamil *pāl*, "milk," with Kannada *hālu*.
A correspondence lets differences prove relationship: repeated *p/h* pairs are stronger evidence than one accidental resemblance.

Your turn

- *Say it:* Tamil *pattu* · Kannada *hattu*
- *Say it:* Tamil *pāl* · Kannada *hālu*
- *Identify:* *ēḻu* / *ēḷu* / *ēḻu* as one inherited seven

Before you move on

What happens to Tamil *pattu* in Kannada? (*P* regularly softens to ***h***: *hattu*.) Which second pair confirms the pattern? (*Pāl / hālu*, "milk.") Which language diverges most on eight and nine? (**Telugu**.)

7.19 ோ — one character, met inside words you already say

Before the new one: ப — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ோ

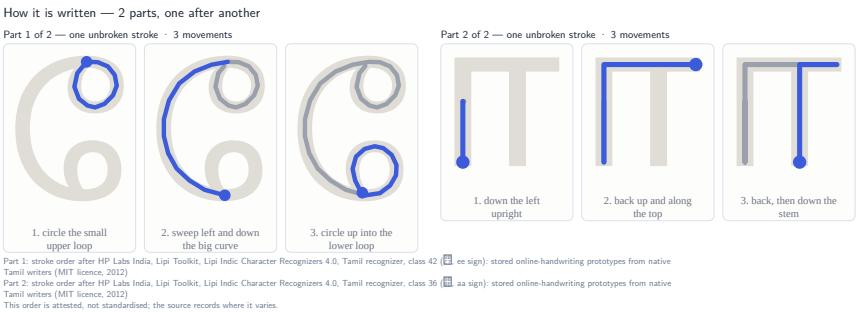

ோ — *ō*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ō*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ோ somewhere inside it:

- போய் வருகிறேன் *pōy varugiṟēṉ* — goodbye (lit. "I'll go and come back")
- மீண்டும் சந்திப்போம் *mīṇḍum sandippōm* — we'll meet again

Writing: ோ — follow the numbered strip

Part 1: stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Tamil recognizer, class 42 (ee sign): stored online-handwriting prototypes from native Tamil writers (MIT licence, 2012)
Part 2: stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Tamil recognizer, class 36 (aa sign): stored online-handwriting prototypes from native Tamil writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ோ is written, part by part, stroke by stroke

Follow the numbered strip: it writes ோ in two parts, the left part first, each drawn movement by movement. Then write ோ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ோ in the ones that have it

  வணக்கம்

- *Trace it:* ோ three times, saying *ō* as you finish each one
- *Look:* back at any page of this chapter and find ோ once more

Before you move on

Which character is this — ோ? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ō* on; takes the built-in *a* off.**) Name one word you already say that contains it.

7.20 One to ten — the cumulative payoff

> Count from *onru* to *pattu* once without looking. No new word or shape appears in this lesson.

Your turn — read, not recite

Read these shuffled numerals:

- First row: எ உ ஐ ரு அ
- Second row: ஙூ சூ கூ சூ சூ

Now check against க உ ஙூ சூ ரு சூ எ அ சூ ஐ.

Why it's said this way

- Which forms are inherited rather than borrowed? (**The Tamil number words.**)
- Which word is usually read as one short of ten? (ஒன்பது, *onpatu*, nine.)
- Which Kannada shift links Tamil *pattu* to Kannada *hattu*? (***p* to *h*.**)

Writing — independent dictation

Cover the answer. *Hear: eezhu* Write its numeral and word. Uncover: ஏ — ஏழு. Repair one shape if needed.

Before you move on

Count one to ten, then read கூ சு ஏ out of order. You can now hear, say, read, and write a representative part of the sequence.

Chapter 8

Please

Modes: **voice** (3) **eyes** (1) **pen** (8) **Hands-free start:** the first 3 of 12 lessons.

> ***By the end of this chapter:*** I can tell an emphatic தயவுசெய்து from the everyday courtesy that lives in the -உங்கள் verb ending, and I can write சொல்லுங்கள் from hearing.
>
> *Ask for something twice — தயவுசெய்து when the request needs weight, plain* உட்காருங்கள் *when it does not — read the join in* செய்து*, and write* சொல்லுங்கள் *from hearing.*

8.1 சொந்தம் (sontham) — one's own; a relative

> Before the new word: say the last thing you learned, once, out loud.

You'll want to know: சொந்தம்

சொந்தம் — *sontham* — "one's own; a relative".

Say it: *sontham*. *Look:* at its shape as you say it. The next lesson takes one piece of it, சொ, and writes it on its own.

In the family, and next door

	word
Hindi (neighbour)	अपना (*apnā*)
English	one's own

The word, taken apart — its roots and family

சொந்தம் (*sontham*) is not native, but its route is not settled. It is usually derived from Sanskrit *svānta*, "one's own", built on *sva*, "self", probably through Telugu *sonta*, "own". Treat the route as likely, not proven.

Your turn

Say these aloud:

- *sontham*
- *sontham*, and what it means

Before you move on

What is "one's own; a relative"? (சொந்தம், *sontham*.)

8.2 தயவுசெய்து (tayavu seytu) — please (do the kindness)

Across a whole band of Asia, the word for *please* is really the word **compassion**, dressed as a small request. Tamil says it most literally of all: "**do** the kindness."

You'll want to know: The phrase

தயவுசெய்து = **please**, literally "**do the kindness / grace**." It is two pieces snapped together:

- தயவு (*tayavu*) = **kindness, compassion, grace** — from Sanskrit **daya** "compassion."
- செய்து (*seytu*) = "**having done**," from the verb செய் (*sey*) "to do."

So *tayavu seytu* is an invitation: *do me the kindness (of…).* You place it in front of a request the way English puts "please" in front of one.

This is the same instinct as **Arabic** *min faḍlik* ("from your **grace**") and **Hindi** *kṛpayā* (from *kṛpā*, "**compassion**"). Naming the kindness you hope

for is one of the great strategies of politeness — different from French's "if it **pleases** you," and from Latin/German's "I **ask**."

In the family, and next door

	word	**same root**
Kannada	ದಯವಿಟ್ಟು (*dayaviṭṭu*)	yes
Telugu	దయచేసి (*dayacēsi*)	
Malayalam	ദയവായി (*dayavāyi*)	yes
Hindi (neighbour)	कृपया (*kṛpayā*)	
English	please (tayavu seytu	

The word, taken apart — its roots and family

All four Dravidian cousins build *please* the very same way — **daya** plus a light verb "do / place / become":

- Tamil தயவுசெய்து *tayavu* ***seytu*** — kindness + **do**
- Kannada ದಯವಿಟ್ಟು *daya**viṭṭu*** — compassion + **having placed**
- Telugu దయచేసి *daya**cēsi*** — compassion + **having done**
- Malayalam ദയവായി *daya**vāyi*** — compassion + **as / having become**

One idea, four scripts. Learn one and you can almost read the others.

Your turn

Say these aloud:

- "tayavu" — the kindness — then "seytu," having done
- the whole phrase — "tayavu seytu" = please, do the kindness

Before you move on

What is the Tamil phrase for please? (தயவுசெய்து *tayavu seytu.*) What do its two pieces mean? ("**Kindness**" *tayavu* + "**having done**" *seytu — do the kindness.*) Which languages ask the same way? (**Kannada, Telugu, Malayalam** with *daya*, and further off **Arabic** *faḍl* and **Hindi** *kṛpā.*) Next: decide when the standalone phrase is natural and when the verb carries the courtesy.

8.3 Solluṅgaḷ — please tell me

You know *tayavu seytu*, the weightier "do me the kindness." Now learn one ordinary respectful request by ear before meeting its written shape.

You'll want to know: one useful request

Solluṅgaḷ means **please tell me**. The ending *-uṅgaḷ* makes the request respectful. For now, keep the whole expression together: one sound, one useful meaning.

Say it in three easy pulses: *sol* · *luṅ* · *gaḷ*. Then say it smoothly once: *solluṅgaḷ*.

The word, taken apart — its roots and family

Solluṅgaḷ is native Dravidian: the verb *sol*, "to say" (DEDR 2855), with the respectful ending. Malayalam *colluka* and Kannada *sollu* are the same verb.

Your turn

- *Hear: solluṅgaḷ* → YOU CHOOSE: "please tell me"
- *Say it: sol* · *luṅ* · *gaḷ* — then *solluṅgaḷ*

Before you move on

How do you respectfully ask someone to tell you? (***Solluṅgaḷ.***) Keep that sound and meaning in mind. Next you will uncover just one new written sign inside this already-familiar request.

8.4 𑀯𑁆𑀲𑀺 — one new sign in a familiar request

Say *solluṅgaḷ*: **please tell me**. Its first sound is *so*. You already know the sound and meaning; today only its written vowel sign is new.

Script you'll notice: 𑀯𑁆◌𑀺

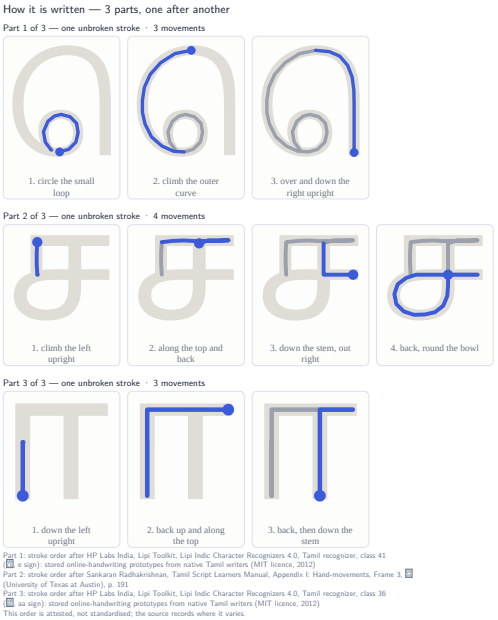

The consonant 𑀲 begins with *ca*. Add the short-*o* sign 𑀯𑁆◌𑀺, and it reads *so*:

ச + ொ → சொ

The short-*o* sign reaches around its consonant. Part appears on the left and part on the right, but together they are one vowel sign. Read the whole joined shape as one syllable: சொ, *so*.

Do not invent a stroke order from the printed font: the strip gives a sourced one, in written order — the left part of ொ, then ச, then the right part.

Writing — observe and trace

How சொ *is written, part by part, stroke by stroke*

Trace சொ once with the model visible. Say *so* as your finger reaches the vowel sign. Then point to the first syllable in சொல்லுங்கள் and say the whole familiar request, *solluṅgaḷ*.

Before you move on

Read சொ. (***So.***) What does the whole spoken request *solluṅgaḷ* mean? (**Please tell me.**) One new sign is enough for today.

8.5 சொல்லுங்கள் — one visible copy

Point to சொ at the start of சொல்லுங்கள். Read *so*, then say the whole request: *solluṅgaḷ*, **please tell me**.

Writing — guided copy

Copy சொல்லுங்கள் once beneath its visible model. Pause after சொ and check that the short-*o* sign reaches around ச. Look back after every piece if needed. Say the request once when you finish.

Before you move on

Point to the short-*o* syllable in சொல்லுங்கள். (சொ.) What does the word ask? (**Please tell me.**)

8.6 Solluṅgaḷ — hide, then write

Study சொல்லுங்கள் for five seconds. Point to சொ, say *solluṅgaḷ*, then cover the model.

Writing — delayed copy

Write சொ while the model is hidden. If that feels secure, continue and write the whole request. Peek once if needed, cover it again, and finish. Then uncover the model and repair only the short-*o* syllable.

Before you move on

What changed from the previous step? (**The model was hidden before writing.**) Say what your word means. (**Please tell me.**)

8.7 One heard request — write it

Cover every Tamil model. You will hear the same useful request you have already said, traced, copied, and retrieved.

Writing — dictation

Hear: solluṅgaḷ — **please tell me**

Write the request from sound alone. Then uncover சொல்லுங்கள். Check சொ first: the short-*o* sign should reach around ச. Repair one place if needed; do not rewrite the whole word.

Before you move on

Without looking, write only the opening syllable of *solluṅgaḷ*. (சொ.) You are ready to compare this ordinary respectful request with the weightier *tayavu seytu*.

8.8 தயவுசெய்து or -உங்கள்? — politeness in phrase or verb

Tamil has a phrase meaning "do the kindness," but everyday courtesy often sits somewhere English speakers do not expect: inside the verb.

Why it's said this way

A standalone தயவுசெய்து is more emphatic and formal than English "please." Ordinary polite commands use respectful **-உங்கள்** (*-uṅgaḷ*):

- உட்காருங்கள் *uṭkāruṅgaḷ* — please sit
- சொல்லுங்கள் *solluṅgaḷ* — please tell me — the request you can now say, read, and write from hearing

Use *tayavu seytu* to mark "please, do me the kindness" warmly or formally. Let the verb ending carry routine courtesy.

Script you'll notice: Read the join in செய்து

செ is *ca* with the ெ sign for *e*. ய் is *ya* shut off by puḷḷi, a bare *y*, before து *tu*. The same dot that built numbers now makes the consonant seam in *seytu* visible.

Your turn

- *Choose:* emphatic request → தயவுசெய்து
- *Choose:* ordinary "please sit" → உட்காருங்கள்
- *Read it:* சொல்லுங்கள் — and point to சொ, the short-*o* syllable
- *Break apart:* செ + ய் + து → செய்து

Before you move on

What carries everyday "please"? (The respectful verb ending ***-uṅgaḷ***.) When is *tayavu seytu* especially useful? (A **markedly polite or emphatic** request.) What silences *y* in ய்? (The **puḷḷi**.)

8.9 ந — the third n, and the only one built from uprights

Before the new one: say the sound of ன.

One letter this time. Just one.

The third n, and the one that finally looks different: no spiral loop at all. ந is built from a top bar and two uprights, with a right stroke that curls below the baseline. If you can see that it has no loop, you can already tell it from the other two.

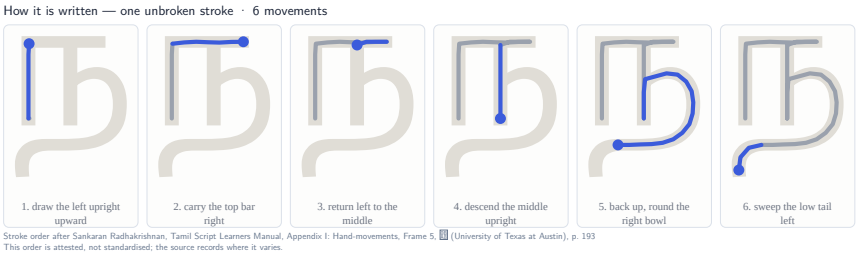

Script you'll notice: ந

ந — *na*.
What it is made of:

- a left upright joined to the top bar
- a middle upright hanging from the top bar
- a right bowl that leaves the middle upright, curls below the baseline, and sweeps left into a descender

நன்றி — *thank you* — opens with it, and so does நான்.

Writing: ந

How ந *is written, stroke by stroke*

- **1.** start at the lower left and draw the left upright upward
- **2.** without lifting, carry the top bar to the right
- **3.** without lifting, make the short return left to the middle upright
- **4.** without lifting, draw the middle upright straight down
- **5.** without lifting, climb back up to the junction and descend around the outside of the right bowl
- **6.** without lifting, turn through the bottom and sweep left into the below-baseline tail — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested teaching order, not a national standard — Tamil handwriting is taught with school-to-school variation. Module 5 notes that the extended final curve may be omitted. Source: Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 5, ந (University of Texas at Austin), p. 193.

Your turn

- *Trace it:* ந once, slowly, following the steps above
- *Say it:* "na" as you finish it
- *Trace it:* it twice more, without looking back at the steps

Before you move on

Which of the three n's has no spiral loop? (ந.) How many pen lifts does it take? (**None**.)

8.10 வணக்கம் — the first whole written word

You know the four letter bodies and the vowel-killing dot. Assemble them left to right.

Script you'll notice: Build the word

How வணக்கம் *is written, part by part, stroke by stroke*

piece		
வ	*va*	Lesson 1
ண	*ṇa*	Lesson 2
க்	*k* — க with the dot	last lesson
க	*ka*	Lesson 1
ம்	*m* — ம with the dot	this lesson

வ · ண · க் · க · ம் → வணக்கம்

Hear two details. **க்க** is a **doubled** consonant: hold it, *vaṇak-kam*, not *vaṇakam*. Tamil distinguishes single from double consonants. Final **ம்** is a bare *m*, so the word closes instead of trailing into *ma*.

That is the first word of this book, written by hand.

Your turn

- *Write it:* **க்** — **க** with the dot
- *Write it:* **க்க** — two full letters, dot intact
- *Write it:* **வணக்கம்** — five pieces, left to right
- *Say it:* "vaṇa**k-k**am" — hold the middle

Before you move on

Write **வணக்கம்**. What is special about **க்க**? (It is **doubled** and held.) Why does the word end in *m*, not *ma*? (Final **ம்** carries a **puḷḷi**.) Next: the formal way to say *please forgive me*.

8.11 எ — one character, met inside words you already say

Before the new one: **ே** — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: எ

எ — *e*.

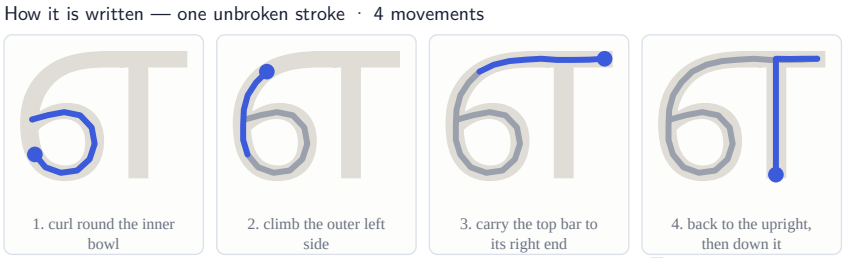

It is an **independent vowel** — the shape the vowel *e* takes when a word begins with it, rather than the sign it becomes inside a word.

You already say these, and every one of them has **எ** somewhere inside it:

- **என்** *en̲* — my
- **என் பெயர் ...** *en̲ peyar …* — my name is… (with no "is")

- என்ன *enṉa* — what
- எப்படி *eppaḍi* — how

Writing: எ — follow the numbered strip

Name one word you already say that contains it.

8.12 உ — the letter behind a sign you have used for chapters

Before the new one: எ — what sound does it carry?

One character again. This one closes a gap you have been walking past since Chapter 4.

Script you'll notice: உ

உ — *u*.

You already know its **sign**, ு, the little tail that hangs off a consonant inside a word. This is the other half of the same vowel: the **independent** shape, used when a word *begins* with the sound.

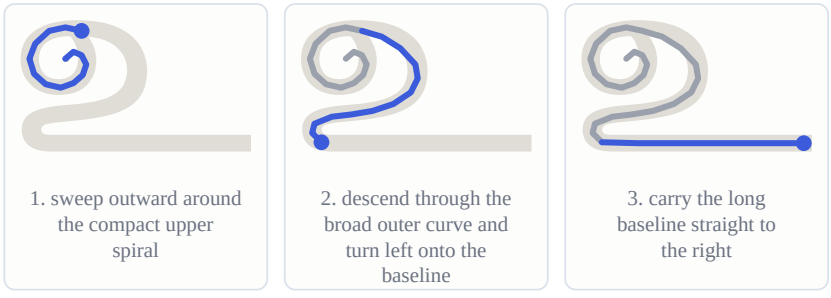

That is the whole Tamil pattern, met once more. Every vowel has two bodies — a free-standing letter for the front of a word, and a sign for inside one — and you have been using this vowel's sign for chapters without ever meeting the letter it belongs to.

Every one of these begins with it, and every other shape in them you can already read:

- உங்கள் *uṅgaḷ* — your, which you have been saying for a while
- உம் *um* — the "also / and" ending, which the next apology needs
- உண் *uṇ* — the old verb "to eat", waiting in the verbs to come

Writing: உ — follow the numbered strip

Chapter 9

Sorry

Modes: **voice** (1) **eyes** (1) **pen** (1) **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can apologise with மன்னிக்கவும் where its register fits, and say plainly where colloquial Tamil varies by region instead of pretending one form is standard.
>
> *Say man̲-n̲i-kkavum holding both doubled consonants, use it for a considered apology, and qualify the casual alternatives rather than asserting one.*

9.1 மன்னிக்கவும் (man̲n̲ikkavum) — please forgive

You already know தயவுசெய்து, "please." Tamil's "sorry" gives you something its Dravidian cousins don't: a forgiveness-word that's Tamil through and through, not borrowed from Sanskrit.

The word, taken apart — its roots and family

மன்னிக்கவும் is built from three pieces:

- மன்னி (*man̲n̲i*) = "**to forgive, excuse, pardon**" — and unlike the words Kannada, Telugu, and Malayalam reach for, this is Tamil's **own** native verb, not borrowed from Sanskrit **kṣamā**.
- **-க்க** (*-kka*) = an infinitive-forming ending.

- **-உம்** (*-um*) = a formal, written-register particle used to make a soft, general request or permission — the same particle you'd see on a sign asking visitors to **வரவும்** ("please come" / "you may come").

So **மன்னிக்கவும்** reads as something like "**may [one] forgive**" — a polite, slightly formal way of asking for forgiveness, more at home in writing or a considered apology than tossed off in passing.

In the family, and next door

	word
Kannada	**ಕ್ಷಮಿಸಿ** (*kṣamisi*)
Telugu	**క్షమించండి** (*kṣamiñcaṇḍi*)
Malayalam	**ക്ഷമിക്കണം** (*kṣamikkaṇaṁ*)
Hindi (neighbour)	**माफ़ कीजिए** (*māf kījiye*)
English	please forgive (maṉṉikkavum

The word, taken apart — its roots and family

Where Kannada, Telugu, and Malayalam all reach for the Sanskrit noun **kṣamā** ("patience, forgiveness") and turn it into a verb, **Tamil uses its own root**:

- Tamil **மன்னிக்கவும்** *maṉṉi**kkavum*** — from Tamil **மன்னி** *maṉṉi*
- Kannada **ಕ್ಷಮಿಸಿ** *kṣami**si*** — from Sanskrit **kṣamā**
- Telugu **క్షమించండి** *kṣamiñ**caṇḍi*** — from Sanskrit **kṣamā**
- Malayalam **ക്ഷമിക്കണം** *kṣami**kkaṇam*** — from Sanskrit **kṣamā**

Where "please" showed the whole family sharing one Sanskrit-derived idea (*daya*), "sorry" shows the opposite: Tamil kept its own word while its cousins borrowed the same Sanskrit one.

Your turn

Say these aloud:

- "maṉṉi" — forgive — the Tamil root, not from Sanskrit

- the whole word — "mannikkavum" = please forgive
- contrast — Kannada, Telugu, Malayalam all use kṣamā instead

Before you move on

What does மன்னிக்கவும் mean, and what is it built from? (**"Please forgive"** — *maṉṉi* "to forgive" + *-kkavum*, a formal request ending.) What's different about Tamil's forgiveness-word compared to Kannada, Telugu, and Malayalam? (**It's Tamil's own native root** — the other three borrow Sanskrit *kṣamā* instead.) Next: place the word in its real register and read the doubled alveolar n.

9.2 மன்னிக்கவும் — formal forgiveness and a doubled n

The root is native Tamil. Its everyday conversational fit is less simple than a one-to-one dictionary entry suggests.

Why it's said this way

மன்னிக்கவும் leans formal: a "please forgive" on a notice or in a considered apology. Spoken Tamil may use shorter regional forms or borrow English "sorry." Colloquial variation is real, so treat formal/written as a reliable center, not a claim that one casual form covers every region.

Script you'll notice: Read ன்னி

In ன்னி, alveolar ன is first silenced by puḷḷi and then repeated before the vowel. The spelling holds the consonant across the syllable boundary:

ன் + னி → ன்னி — *ṉ-ṉi*

This is the same gemination-by-repetition principle used elsewhere in Tamil; the sound is doubled without inventing a new ligature.

Your turn

- *Say it:* "ma<u>n</u>-<u>n</u>i-kkavum," holding both doubled consonants
- *Choose:* considered/formal apology → மன்னிக்கவும்
- *Qualify:* casual alternatives vary by region

Before you move on

What is the reliable register center of *ma<u>nn</u>ikkavum*? (**Formal/ written or considered apology**.) Must every region use it casually? (**No**.) How does ன்னி show a doubled *<u>n</u>*? (Pul<u>l</u>i stops the first ன், then full னி follows.)

9.3 ல — one character, met inside words you already say

Before the new one: எ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ல

ல — *la*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *l*, it is **la**.

What it is made of:

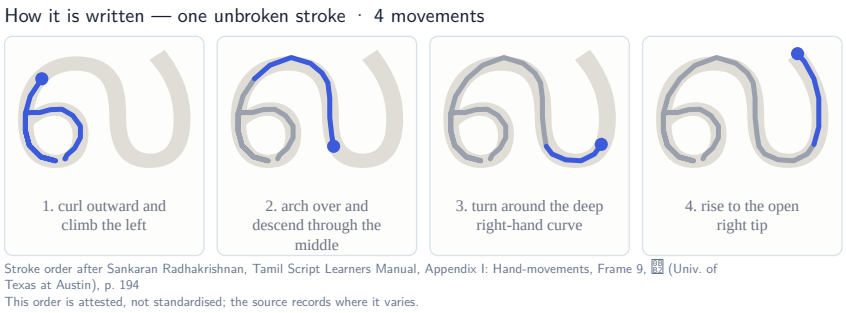

- a spiral loop on the left
- a deep U-shaped turn
- an open rising tip on the right

You already say these, and every one of them has ல somewhere inside it:

- இல்லை *illai* — no / there isn't (illai — the negative)
- ஆம் / இல்லை / சரி *ām / illai / sari* — answering in Tamil

- நலம் *nalam* — well, wellness, good — and the reply ”நான் நலமாக இருக்கிறேன்
- பரவாயில்லை *paravāyillai* — it’s okay / no problem / you’re welcome

Writing: ல

How ல *is written, stroke by stroke*

- **1.** start at the inner curl and spiral outward, climbing the left side
- **2.** without lifting, arch over the top and descend through the middle
- **3.** without lifting, turn around the deep right-hand curve
- **4.** without lifting, rise to the open right tip — and only now lift

Pen lifts: 0. The pen never leaves the paper.

One unbroken stroke — four joined movements, no pen lift; cited to Radhakrishnan, Tamil Script Learners Manual, Frame 9, ல.

Days of the Week

Modes: 🚗 **voice** (1) ✓ **pen** (4) 🚗 **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can name the seven weekdays, take each apart as planet plus கிழமை, and say which are Tamil's own words and which arrived from Sanskrit.
>
> *Complete TA-C10-checkpoint, the chapter's closing checkpoint: run the week from thiṅgaḷ to ñāyiṟu with kizhamai, sort the four native planet-words from the three Sanskrit ones, tell* ந *from* ன *and name* ற*, find* ◌ா *in* நான்*, then write* ந*,* ன*,* ற *and* நா *from sound.*

10.1 திங்கள்–ஞாயிறு — a home-grown and borrowed week

Hindi's week is built entirely from Sanskrit deity-names plus वार (*vār*). Tamil's week tells a richer story: it uses its **own** word for "day," and **some** of its planet-names are Tamil's own too — while others are borrowed, just like Hindi's.

Grammar Lens: The pattern: [planet] + கிழமை, "day"

Every Tamil weekday ends in கிழமை (*kizhamai*), "**day**" — a native Dravidian word, not the Sanskrit வாரம் (*vāram*) that Hindi, Kannada, and Telugu build on (though Tamil also keeps a more formal, Sanskritic *-vāram* set alongside this everyday one):

Tamil weekday	planet-word, meaning, and source
திங்கள்கிழமை	*thiṅgaḷ*, "**Moon**" — Tamil's **own** word
செவ்வாய்க்கிழமை	*cevvāy*, traditionally "**the red one**" — likely Tamil's **own** descriptive name
புதன்கிழமை	*pudhaṉ*, **Mercury** — borrowed from Sanskrit **Budha**
வியாழக்கிழமை	*viyāzhaṉ*, **Jupiter** — likely from Sanskrit, via a name for **Bṛhaspati**
வெள்ளிக்கிழமை	*veḷḷi*, traditionally "**silver**" — likely Tamil's **own** descriptive name
சனிக்கிழமை	*saṉi*, **Saturn** — borrowed from Sanskrit **Śani**
ஞாயிற்றுக்கிழமை	*ñāyiṟu*, "**Sun**" — Tamil's **own** word

Why it's said this way

Notice the pattern: **Moon, Mars, Venus, and Sun** all carry Tamil's own descriptive or native words, while **Mercury, Jupiter, and Saturn** carry Sanskrit ones. This isn't Tamil "failing" to have its own full week — it's a genuine **blend**, native Dravidian vocabulary standing right alongside Sanskrit loans, in the same list. (Note for the Tamil-speaking reviewer: this lesson spells Monday திங்கள்கிழமை, the common form — the more traditional sandhi-shifted spelling திங்கட்கிழமை may be preferred and should be swapped in on review if so. The *cevvāy* "red one" and *viyāzhaṉ* Jupiter-name derivations in particular are worth treating as the traditional, commonly-given account rather than settled certainty — exact planet-name histories this old are not always fully nailed down.)

Your turn

Say these aloud:

- "thiṅgaḷ" — moon, Tamil's own word — then "kizhamai," day
- the borrowed ones — "pudhaṉ, viyāzhaṉ, saṉi" — Mercury, Jupiter, Saturn from Sanskrit
- the native ones — "thiṅgaḷ, cevvāy, veḷḷi, ñāyiṟu" — moon, Mars, Venus, sun

Before you move on

What does every Tamil weekday end in, and where does that word come from? (கிழமை *kizhamai*, "day" — Tamil's **own** word, not Sanskrit *vāra*.) Which four planet-names are Tamil's own, and which three are Sanskrit borrowings? (**Moon, Mars, Venus, Sun are native**; **Mercury, Jupiter, Saturn are Sanskrit** — *Budha, Bṛhaspati, Śani*.)

10.2 ற — the last of the family, and the one that drops below the line

Before the new one: say the sound of ந.

One letter this time. Just one.

The fourth member of this top-bar family, and the one with a habit none of the others have: its right leg keeps going **below the baseline** and sweeps left into a long descender. Tamil letters mostly sit on the line. This one hangs off it.

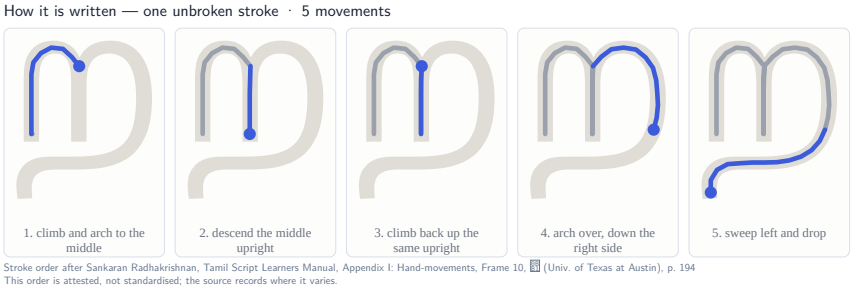

Script you'll notice: ற

ற — *ṟa*.
What it is made of:

- two arches side by side, giving three legs down to the baseline
- the right leg continues BELOW the baseline, sweeps left, and drops into a long descender

It is the ṟ in நன்றி — and with it, every consonant of *thank you*.

Writing: ഈ

How ഈ is written, stroke by stroke

- **1.** start at the lower left, climb the left side, and arch to the middle
- **2.** without lifting, descend the middle upright
- **3.** without lifting, climb back up the same upright
- **4.** without lifting, arch over and descend the right side
- **5.** without lifting, sweep left below the baseline and drop into the long descender — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested teaching order, not a national standard — Tamil handwriting is taught with school-to-school variation. Source: Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 10, ഈ (Univ. of Texas at Austin), p. 194.

Your turn

- *Trace it:* ഈ once, slowly, following the steps above
- *Say it:* "ra" as you finish it
- *Trace it:* it twice more, without looking back at the steps

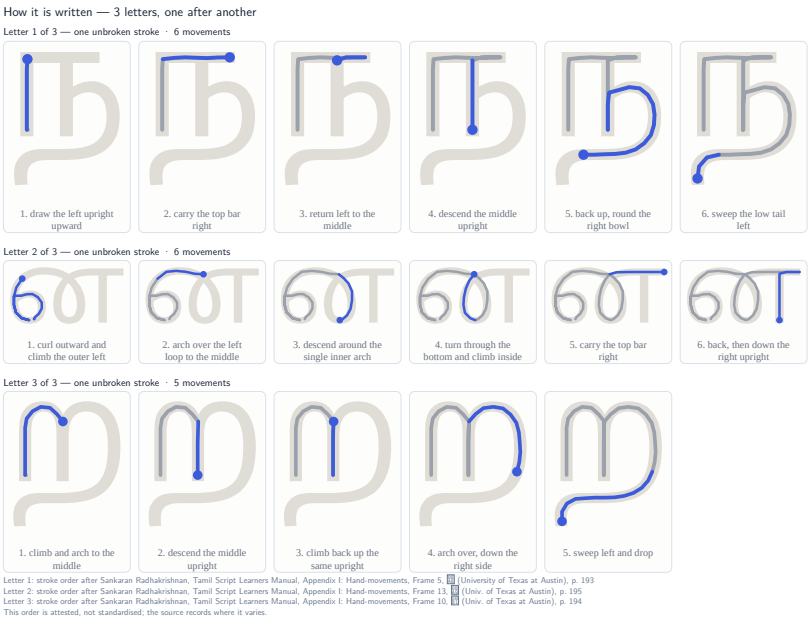

Before you move on

What does ற do that ண, ன and ந do not? (**Drops below the baseline.**) Which word have you now met all the consonants of? (நன்றி.)

10.3 ந, ன, ற — the letter bodies inside நன்றி

Lesson 2 showed you that Tamil has **three** n-letters and promised you'd draw the other two when a word needed them. Chapter 1's *thank you* needs both.

Script you'll notice: The two remaining n's

How these letters are written, one after another, stroke by stroke: ந, ன, ற

ந — *na*, the **dental** n, tongue against the teeth:

1. **a straight top bar**
2. **a vertical on the left**

3. **a second vertical in the middle**
4. **a right stroke that curls below the baseline** and sweeps left into a descender

ன — *n̲a*, the **alveolar** n, tongue on the ridge behind the teeth:

1. **a straight top bar**
2. **a loop on the left**
3. **one arch**
4. **a straight vertical on the right, down to the baseline**

Compare it with Lesson 2's ண: same top bar, same loop, same closing vertical. **ண simply has a second arch inserted before that vertical.** So **ன is ண minus one arch** — one arch for ன, two for ண. That is the whole contrast, and it is the cheapest way to keep them apart.

With Lesson 2's ண (retroflex), that completes the set. Same consonant to an English ear; three letters, three tongue positions, in Tamil.

Script you'll notice: ற — "r̲a", the hard r

1. **two arches side by side** — giving it three legs down to the baseline
2. **the right leg keeps going below the baseline**, sweeps **left**, and drops into a long descender

It is the tallest thing you have drawn: most Tamil letters sit on the baseline, and ற hangs well beneath it.

The dot under **r̲** marks it as the *hard* or trilled r, distinct from Tamil's other r. You'll meet the contrast properly later; for now, learn the shape.

Your turn

Write these out:

- ற — "top bar, **two** verticals, then the curl that sweeps left"
- ன — "top bar, left loop, **one** arch, straight vertical"
- ற — "two arches, then the leg that sweeps left and drops"

Before you move on

Name Tamil's three n-letters and their tongue positions. (ந dental, ன alveolar, ண retroflex.) What are a consonant's three possibilities so far? (Keep the built-in **a** or **remove** it with the puḷḷi.) Which letter hangs below the baseline? (ற, the hard *r̲*.) Next: the colours — black, white, red and blue.

10.4 ◌ா — one character, met inside words you already say

Before the new one: ல — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ◌ா

◌ா — *ā*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ā*. Replaces, not adds — the *a* is gone.

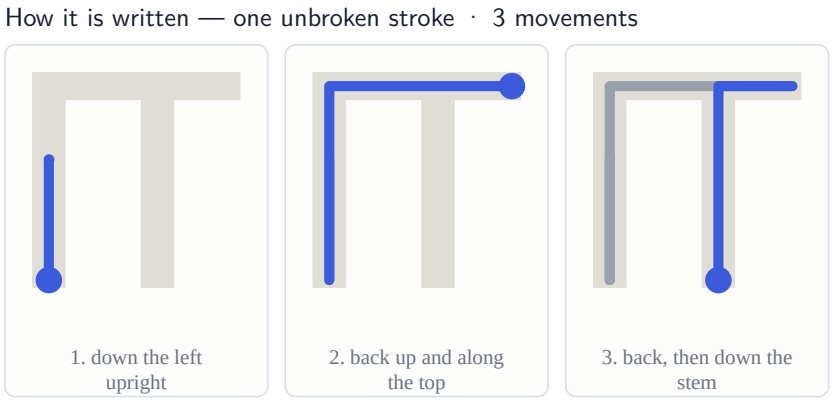

Where it sits: a vertical stroke with a small top hook, written after the consonant.

Worked through: ம + ◌ா = மா — *mā*.

You already say these, and every one of them has ◌ா somewhere inside it:

- வணக்கம் / நமஸ்காரம் *vaṇakkam / namaskāram* — Tamil kept a native bow-word where its neighbors borrowed Sanskrit
- நான் *nāṉ* — I
- பரவாயில்லை *paravāyillai* — it's okay / no problem / you're welcome
- நாளை பார்க்கலாம் *nāḷai pārkkalām* — see you tomorrow

Writing: ◌ா — follow the numbered strip

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Tamil recognizer, class 36 (▯▯, aa sign): stored online-handwriting prototypes from native Tamil writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ◌ா is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ◌ா yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ◌ா in the ones that have it

  நான் · வணக்கம்

- *Trace it:* ◌ா three times, saying *ā* as you finish each one
- *Look:* back at any page of this chapter and find ◌ா once more

Before you move on

Which character is this — ◌ா? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ā* on; takes the built-in *a* off.**) Name one word you already say that contains it.

10.5 Chapter 10 checkpoint — the week, three letters and a sign

Nothing new here. The week out loud first, then the letters and the sign this chapter put on the page.

Your turn — the week

- *Say it:* the seven planet-words, Monday to Sunday, each followed by *kizhamai*

(*Thiṅgaḷ, cevvāy, pudhaṉ, viyāzhaṉ, veḷḷi, saṉi, ñāyiṟu.*)

- What does *kizhamai* mean, and whose word is it? ("Day": Tamil's own, not the Sanskrit *vāram*.)
- Which four planet-words are Tamil's own, and which three came from Sanskrit? (Moon, Mars, Venus and Sun are native: *thiṅgaḷ, cevvāy, veḷḷi, ñāyiṟu*. Mercury, Jupiter and Saturn are borrowed: *pudhaṉ, viyāzhaṉ, saṉi*.)

Script — ந, ன, ற and ◌ா

- Which n is ந, and which is ன? (ந is the dental *n*: top bar, two verticals, the curl that sweeps left. ன is the alveolar *ṉ*: ண minus one arch.)
- Which letter hangs below the baseline, and whose consonants does it complete? (ற, the hard *ṟ*; with it you have every consonant of நன்றி.)
- In நான், which mark turns the *a* of ந into *ā*, and where does it sit? (◌ா, written after the consonant.)

Read it: நான் aloud, and point to the ◌ா in it

Writing — from sound

Cover: the Script block above, so no model stays in view
Write it: one letter each for the dental *n*, the alveolar *ṉ* and the hard *ṟ*
Write it: *nā* — the dental *n* carrying the *ā* sign
Check: against the key — நா, னா, மா, றா
Write it: one repaired shape, then stop

Before you move on

Say today's day in Tamil, then say whether its planet-word is Tamil's own or borrowed. That is the chapter: a week that blends two sources, and the letters that finish *thank you*.
Next chapter: the colours.

Chapter 11

Colours

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can name black, white, red, and blue in Tamil and say which three are native and which one is the Sanskrit loan.
>
> *Say karuppu, veḷḷai and sivappu as the native three, nīlam as the borrowed one, and hear veḷḷai echo veḷḷi from last chapter.*

11.1 கருப்பு, வெள்ளை, சிவப்பு, நீலம் — three of Tamil's own, one borrowed

You've already seen Tamil mix native and Sanskrit words in its day-names. Colors tell a **cleaner** version of the same story: three colors are Tamil's own, and the fourth is the one color that keeps showing up borrowed, in language after language.

The word, taken apart — its roots and family

- கருப்பு (*karuppu*) = "**black**" — native Tamil/Dravidian.
- வெள்ளை (*veḷḷai*) = "**white**" — native Tamil/Dravidian, and built on the very same வெள் (*veḷ-*, "bright, silvery") root you already met in வெள்ளி (*veḷḷi*), "Venus/silver," from the days-of-the-week lesson.
- சிவப்பு (*sivappu*) = "**red**" — native Tamil/Dravidian.

In the family, and next door

	word	same root
Kannada	ಕಪ್ಪು ಬಿಳಿ ಕೆಂಪು ನೀಲಿ (*kappu biḷi kempu nīli*)	
Telugu	నలుపు తెలుపు ఎరుపు నీలం (*nalupu telupu erupu nīlam*)	
Malayalam	കറുപ്പ് വെള്ള ചുവപ്പ് നീല (*karuppŭ veḷḷa cuvappŭ nīla*)	yes
English	black, white, red, blue	

The word, taken apart — its roots and family

நீலம் (*nīlam*) = "**blue**" — from **Sanskrit** नील (*nīla*), "dark blue," the very same root behind Hindi's नीला (*nīlā*). This *nīla* is also the name of the indigo plant and its dye — part of why blue dye is so historically linked to India — but be careful: the English word **indigo** itself is a *separate*, Greek-derived word (describing where the dye was imported *from*, not descended from *nīla* by sound change; the Hindi color lesson draws that careful distinction).

Why it's said this way

This isn't random. **"Blue"** is, across many of the world's languages, one of the **last** basic colors to settle into its own fixed word — often arriving late, or borrowed, compared to black, white, and red. Tamil's colors look like exactly this pattern in miniature: three old, native words, and one — blue — reaching outside the language for a Sanskrit loan.

(Note for the Tamil-speaking reviewer: please confirm *karuppu, veḷḷai, sivappu, nīlam* are the forms you'd teach first — regional/colloquial Tamil may prefer different everyday variants, and this lesson would benefit from your check the way the day-names lesson did.)

Your turn

Say these aloud:

- the three native ones — “karuppu, veḷḷai, sivappu” — black, white, red
- the borrowed one — “nīlam” — blue, from Sanskrit
- the echo — “veḷḷai” and “veḷḷi” share the same veḷ- root

Before you move on

Which three Tamil colors are native, and which one is borrowed? (**Karuppu, veḷḷai, sivappu** (black/white/red) are native; **nīlam** (blue) is a **Sanskrit** loan.) What root does *veḷḷai* share with a word you already know? (**Veḷ-** “bright/silvery” — the same root as *veḷḷi*, “Venus/silver.”) Why might blue be the one borrowed color? (**Blue is often one of the last basic colors** to settle into a fixed word across many languages — the same pattern Latin’s *caeruleus* showed.)

11.2 ழ — one character, met inside words you already say

Before the new one: ◌ா — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you’ll notice: ழ

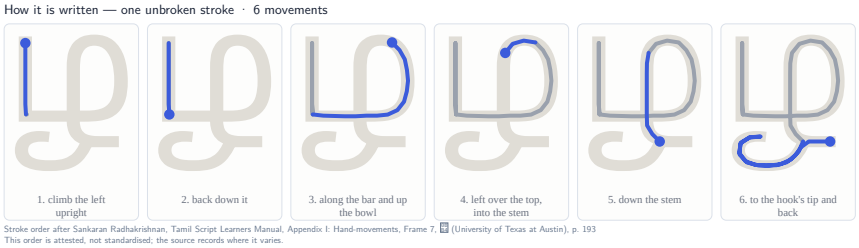

ழ — *lḷa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *lll*, it is **lḷa**.

You already say these, and every one of them has ழ somewhere inside it:

- தமிழ் எழுத்து *tamiḻ eḻuttu* — why Tamil writing is so round
- நான் தமிழ் பேசுகிறேன் *nāṉ tamiḻ pēsugiṟēṉ* — I speak Tamil
- வாழ் *vāḻ* — to live, to flourish
- எனக்குத் தமிழ் தெரியும் *enakkut tamiḻ teriyum* — ’I know Tamil’

Writing: ழ — follow the numbered strip

How ழ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ழ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ழ in the ones that have it

  வணக்கம்

- *Trace it:* ழ three times, saying *llla* as you finish each one
- *Look:* back at any page of this chapter and find ழ once more

Before you move on

Which character is this — ழ? What sound does it carry? (***llla***.) Name one word you already say that contains it.

Chapter 12

Family

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can use Tamil's four sibling words correctly, settling relative age before gender — the question English never makes you answer.
>
> *Name appā and ammā, then place aṇṇaṉ, tambi, akkā and tangai by asking "older, or younger?" before you can say "brother" at all.*

12.1 அப்பா, அம்மா, and four sibling words

You've learned Spanish *hermano* and *hermana*, plus French *frère* and *sœur* — one word each for "brother" and "sister." Tamil asks a question those languages never do: **is this sibling older or younger than you?**

The word, taken apart — its roots and family

- அப்பா (*appā*) = "**father**"
- அம்மா (*ammā*) = "**mother**"

Both are native Dravidian words, of the same simple, worldwide "baby-talk" shape (a repeated consonant plus a vowel) found across unrelated language families everywhere — not borrowed from Sanskrit, not a coincidence with any one language in particular, just how small children's mouths tend to form their first words for parents.

You'll want to know: Siblings — split by age, not just gender

Here's the real lesson: Tamil doesn't have one word for "brother" and one for "sister." It has **four**:

Tamil	meaning
அண்ணன் (*aṇṇaṉ*)	**older** brother
தம்பி (*tambi*)	**younger** brother
அக்கா (*akkā*)	**older** sister
தங்கை (*tangai*)	**younger** sister

There is no single Tamil word that just means "brother" the way Spanish *hermano* does — you're expected to know, and say, **whether they're older or younger than you** every time you refer to a sibling. This isn't a small detail: it reflects how central **relative age and seniority** are in South Asian family structure and address — the same instinct that makes "older sibling" versus "younger sibling" a live, spoken distinction, not just something you *could* mention if you wanted to.

Your turn

Say these aloud:

- "appā, ammā" — father, mother
- the four siblings — "aṇṇaṉ, tambi" (older/younger brother), "akkā, tangai" (older/younger sister)
- the key question — "older, or younger?" — before you can even say "brother" or "sister" in Tamil

Before you move on

How many Tamil words mean "brother" or "sister," and why? (**Four** — அண்ணன்/தம்பி for older/younger brother, அக்கா/தங்கை for older/younger sister — Tamil requires knowing the sibling's **age relative to you**.) Are அப்பா and அம்மா borrowed from Sanskrit? (**No** — native Dravidian baby-talk-type words, of a shape found across unrelated languages worldwide.)

12.2 ச — one character, met inside words you already say

Before the new one: ழ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ச

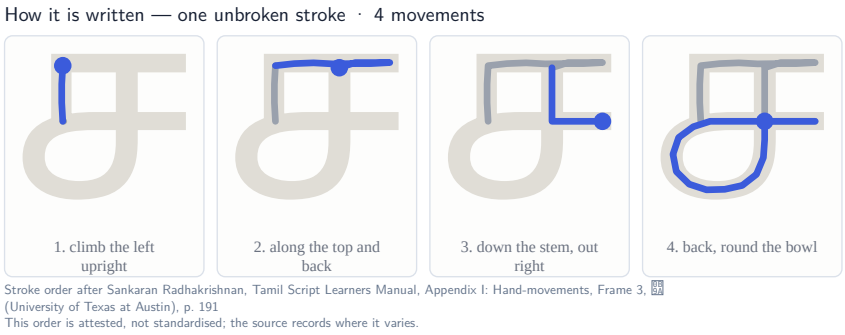

ச — *ca*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *c*, it is **ca**.

You already say these, and every one of them has ச somewhere inside it:

- சரி *sari* — okay / alright / correct (sari)
- ஆம் / இல்லை / சரி *ām / illai / sari* — answering in Tamil
- மீண்டும் சந்திப்போம் *mīṇḍum sandippōm* — we'll meet again
- பேசு *pēsu* — to speak

Writing: ச — follow the numbered strip

How ச is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ச yourself — slowly, and larger than it is printed.

The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find **ச** in the ones that have it

  சரி · வணக்கம்

- *Trace it:* **ச** three times, saying *ca* as you finish each one
- *Look:* back at any page of this chapter and find **ச** once more

Before you move on

Which character is this — **ச**? What sound does it carry? (***ca***.) Name one word you already say that contains it.

Chapter 13

Body Parts

Modes: **voice** (1) **pen** (4) **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can say head and hand in Tamil, account for why both stayed native here where Hindi's pair came from Sanskrit, and write நன்றி from its pieces.
>
> *Complete TA-C13-checkpoint, the chapter's closing checkpoint: say talai and kai as native words, explain the d in nandri, describe* க *and where* ி *attaches, find* ர *in* சரி*, then write* க*,* ர*,* றி *and* நன்றி *from sound.*

13.1 தலை, கை — head and hand, both Tamil's own

> You've seen Hindi's *sir* and *hāth* trace all the way back to Sanskrit. Tamil's words for the same two body parts tell a simpler story: **both are native.**

You'll want to know: The words

- தலை (*talai*) = "**head**" — native Dravidian.
- கை (*kai*) = "**hand**" — native Dravidian.

Neither is borrowed from Sanskrit, unlike Hindi's *sir* (< Sanskrit *śiras*) or *hāth* (< Sanskrit *hasta*). Tamil simply kept its own words for two of the most basic parts of the body.

In the family, and next door

	word	**same root**
Kannada	ತಲೆ ಕೈ (*tale kai*)	yes
Telugu	తల చెయ్యి (*tala ceyyi*)	yes
Malayalam	തല കൈ (*tala kai*)	yes
English	head and hand	

Your turn

Say these aloud:

- "talai" — head
- "kai" — hand
- the contrast — Hindi borrowed these from Sanskrit; Tamil didn't

Before you move on

What are Tamil's words for head and hand? (தலை *talai*, கை *kai*.) Are either of these Sanskrit loans? (**No** — both native Dravidian, unlike Hindi's Sanskrit-descended *sir* and *hāth*.)

13.2 க — the letter that is three bowls

Before the new one: say the sound of ற.

One letter this time. Just one.

The most-used consonant in Tamil, and the most built: a square frame on top, then two bowls hanging under it. One continuous stroke, and a long one. Take it slowly — the pen climbs, crosses, drops and goes round both bowls before it lifts.

Script you'll notice: க

க — *ka*.

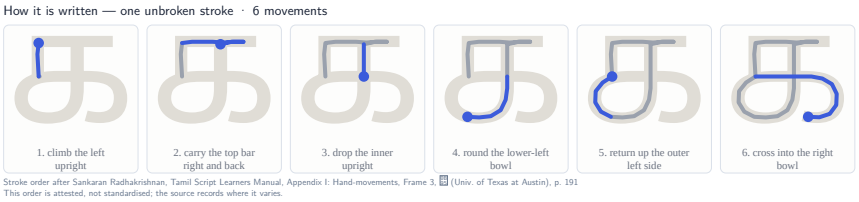

What it is made of:

- an upper square frame
- a large lower-left bowl

- a lower-right bowl with an open foot

வணக்கம் has it twice, doubled in the middle.

Writing: க

How க *is written, stroke by stroke*

- **1.** start at the middle left and climb the left upright
- **2.** without lifting, carry the top bar to the right and return along it to the inner corner
- **3.** without lifting, drop the inner upright to the inner crossing
- **4.** without lifting, curve down and around the lower-left bowl
- **5.** without lifting, return up its outer left side to the middle left
- **6.** without lifting, cross the middle bar and turn around the lower-right bowl — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested teaching order, not a national standard — Tamil handwriting is taught with school-to-school variation. Source: Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 3, க (Univ. of Texas at Austin), p. 191.

Your turn

- *Trace it:* க once, slowly, following the steps above
- *Say it:* "ka" as you finish it
- *Trace it:* it twice more, without looking back at the steps

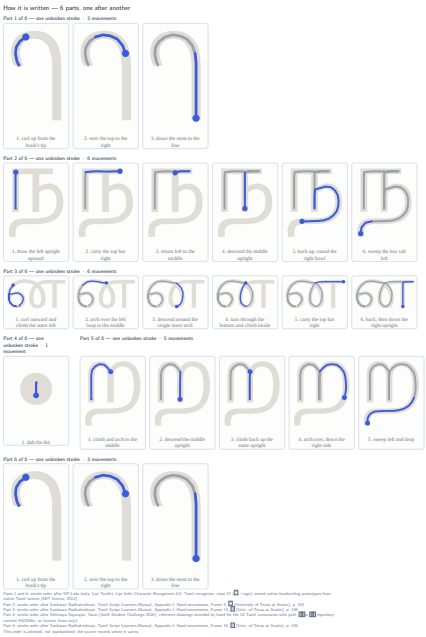

Before you move on

How many pen lifts does க take? (**None** — it is one continuous stroke.) What are the three parts? (**Upper frame, lower-left bowl, lower-right bowl.**)

13.3 ி and நன்றி — replace the vowel, then hear *ndr*

A consonant can keep *a* or lose it under a pu̲l̲li. The third option is to replace it with a vowel sign.

Script you'll notice: The first vowel sign

How ி, நன்றி *is written, part by part, stroke by stroke*

ற = *r̲a* → றி = *r̲i*

ி is a hook above and to the right. The consonant keeps its shape; the sign hangs from it. Later, ை (*ai*) will appear before its consonant on the page but after it in speech, the same eye/ear trap as Devanagari ि.

Script you'll notice: Assemble நன்றி

நன்றி

piece		
ந	*na* — dental	last lesson
ன்	*n̲* — alveolar, with puḷḷi	Lessons 3–4
றி	*r̲i* — ற plus the i-sign	this lesson

The letters in this word

ன் + ற is pronounced close to **ndr**. This follows a broader Tamil rule: a **nasal voices the stop after it**.

ந் + த	*nd*	வந்து *vandu*
ண் + ட	*ṇḍ*	retroflex pair
ன் + ற	*ndr*	நன்றி

Each n-letter creates its own cluster. That payoff explains both the three spellings and the common English romanization **nandri**, whose *d* is heard but not separately written.

Your turn

- *Write it:* றி — ற plus the hook above right
- *Write it:* நன்றி — three pieces
- *Say it:* "ன் + ற = **ndr**"

Before you move on

What are a consonant's three vowel choices? (Keep inherent **a**, **remove** it with puḷḷi, or **replace** it with a vowel sign.) Where does ி attach? (**Above and right**.) Why is *nan̲r̲i* often written *nandri*? (ன் + ற is pronounced *ndr* because a nasal voices the following stop.)

13.4 ர — one character, met inside words you already say

Before the new one: ச — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ர

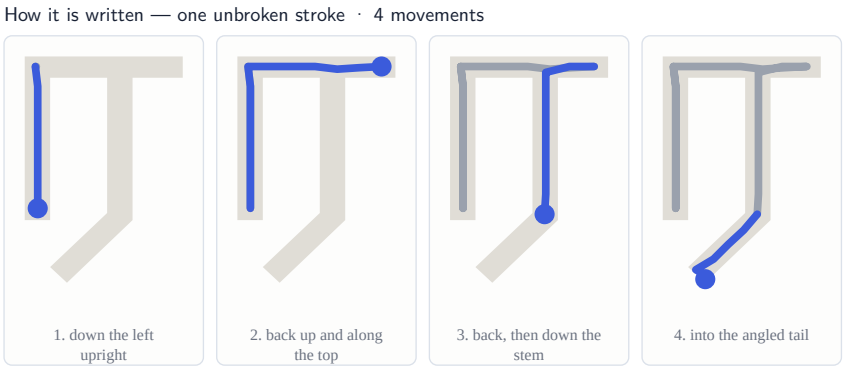

ர — *ra*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *r*, it is **ra**.

You already say these, and every one of them has ர somewhere inside it:

- வணக்கம் / நமஸ்காரம் *vaṇakkam / namaskāram* — Tamil kept a native bow-word where its neighbors borrowed Sanskrit
- சரி *sari* — okay / alright / correct (sari)
- ஆம் / இல்லை / சரி *ām / illai / sari* — answering in Tamil
- பெயர் *peyar* — name

Writing: ர — follow the numbered strip

How ர is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ர yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ர in the ones that have it

  சரி · வணக்கம்

- *Trace it:* ர three times, saying *ra* as you finish each one
- *Look:* back at any page of this chapter and find ர once more

Before you move on

Which character is this — ர? What sound does it carry? (***ra***.)
Name one word you already say that contains it.

13.5 Chapter 13 checkpoint — head, hand, and நன்றி from sound

Nothing new here. The two body words out loud first, then two letters, a vowel sign and the word *thank you* on the page.

And one from the colour chapter: which of the four colours is borrowed, and from where? (*Nīlam*, blue — Sanskrit *nīla*.) Is English *indigo* descended from *nīla*? (**No** — it is a separate word, from Greek.)

Your turn — head and hand

- *Say it:* "head", then "hand", in Tamil

(*Talai*; *kai*.)

- Are either of them Sanskrit loans, the way Hindi's *sir* and *hāth* are? (No: both are native Dravidian.)
- Why do people spell *thank you* as *nandri* when no *d* is written? (The nasal voices the stop after it: *n* plus *r* is said close to *ndr*.)

Script — க, ர and the i-sign

- What are the three parts of க, and how many times does the pen lift? (An upper frame, a lower-left bowl, a lower-right bowl; no lift at all.)
- Where does ி attach, and what does it do to the consonant's *a*? (Above and to the right; it replaces the *a*, so ற becomes றி.)
- Which three pieces build நன்றி? (ந · ன் · றி.)
- சரி is *okay*. Which letter in it carries *ra*? (ர.)

Read it: நன்றி and சரி aloud, and point to the ர

Writing — from sound

Cover: the Script block above, so no model stays in view
Write it: the letter for *ka*, then the letter for *ra*
Write it: *ri*, then the whole of *nanri*, "thank you"
Check: against the key — க, ர, றி, நன்றி
Write it: one repaired shape, then stop

Before you move on

Touch your head and say its word, then your hand and say its word. That is the chapter: two native words, and *thank you* written from its pieces.
Next chapter: the seasons.

Chapter 14

Seasons

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can name the four seasons in Tamil and say honestly which one is locally central instead of repeating a Western four-way split.
>
> *Build kodai/mazhai/kulir onto kaalam, name mazhai kaalam as the season that actually organises the year, and flag vasantha as the one loanword.*

14.1 வசந்த காலம், கோடை, மழை, குளிர் — the four words, and the real season underneath

Tamil has words that line up with Spanish's four seasons — but, just like Hindi's ऋतु, forcing them into a clean four-way split hides what actually matters on the ground.

You'll want to know: The four words

Tamil	meaning	source
வசந்த காலம் (*vasantha kaalam*)	"spring"	*vasantham* is a **Sanskrit** loan
கோடைக் காலம் (*kodai kaalam*)	"summer"	கோடை *kodai* is **native** Tamil for "heat"
மழைக் காலம் (*mazhai kaalam*)	"rainy season"	மழை *mazhai*, native Tamil for "rain"
குளிர் காலம் (*kulir kaalam*)	"winter/cold season"	குளிர் *kulir*, native Tamil for "cold"

Every one of these is built the same way: a word for the **feel** of the season (heat, rain, cold — or the borrowed *vasantham*) plus காலம் (*kaalam*), "**time/season**." Be honest about *kaalam* itself, too: it's ultimately from Sanskrit काल (*kāla*, "time") — but it was assimilated into Tamil so long ago and so thoroughly that it functions as completely ordinary vocabulary today, quite unlike a fresh, still-foreign-feeling loan like *vasantham*.

In the family, and next door

	word
Malayalam	വസന്തകാലം വേനൽക്കാലം മഴക്കാലം ശൈത്യകാലം (*vasantakālaṁ venalkkālaṁ maḻakkālaṁ śaityakālaṁ*)
English	spring, summer, monsoon, winter

Why it's said this way

Just as Hindi's traditional calendar makes the monsoon (*varṣā*) its own central season rather than a footnote, Tamil Nadu's actual climate is shaped far more by மழைக்காலம் (*mazhai kaalam*, "the rains") than by any crisp four-way Western split. There's no dramatic autumn leaf-fall in a tropical climate, and "spring" as a distinct, keenly-felt season is a much weaker idea here than in temperate Europe. The four words above are real and used — but the rains, not a European four-season year, are what actually organizes agricultural and everyday life across much of Tamil Nadu.

(Note for the Tamil-speaking reviewer: please check whether these are

the words and register you'd teach first, and whether there's more to say about how Tamil Nadu's own seasonal year is actually divided in practice.)

Your turn

Say these aloud:

- "kodai" — heat/summer, native — then "kaalam," time/season
- "mazhai kaalam" — the rains, the real central season
- "kulir kaalam" — the cold season
- the one loanword — "vasantha kaalam," spring, from Sanskrit

Before you move on

Which of the four season-words is a Sanskrit loan, and which are native Tamil? (வசந்தம் *vasantham* is Sanskrit; கோடை, மழை, குளிர் are all native.) What season actually shapes life in Tamil Nadu the most, and why doesn't the four-season frame capture that? (மழைக்காலம், the **rains** — Tamil Nadu's tropical climate doesn't have a sharp four-way split the way temperate Europe does.)

14.2 ட — one character, met inside words you already say

Before the new one: ற — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ட

ட — *tta*.

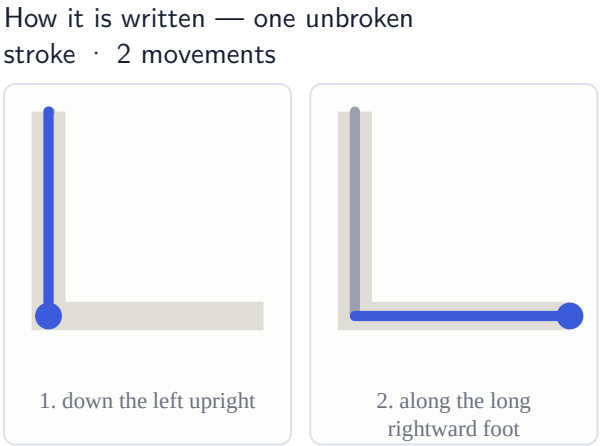

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *tt*, it is **tta**.

You already say these, and every one of them has ட somewhere inside it:

- எப்படி *eppaḍi* — how

- நீங்கள் எப்படி இருக்கிறீர்கள்? — how are you? (respectful)
- மீண்டும் சந்திப்போம் *mīṇḍum sandippōm* — we'll meet again
- இரண்டு மூன்று நான்கு ஐந்து *iraṇṭu mūṉṟu nāṉku aintu* — two through five remain visible cousins across the Dravidian family while one is less tidy

Writing: ㄴ — follow the numbered strip

Stroke order after Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 1, (University of Texas at Austin), p. 190
This order is attested, not standardised; the source records where it varies.

How ㄴ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ㄴ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Chapter 15

Water and Rice

Modes: 🚗 **voice** (1) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can ask for water and keep raw அரிசி apart from cooked சாதம், and state how far the arisi-to-"rice" claim can honestly be pushed.
>
> *Assemble taṇ plus nīr into taṇṇīr, switch between arisi and sātam by whether it is cooked, and label the English "rice" link as contested.*

15.1 தண்ணீர், அரிசி, சாதம் — water, and rice, the real staple

> European languages teach "bread" as the staple food. Here, that would be **dishonest** — bread isn't the everyday staple in Tamil food culture. **Rice** is, and it comes with one of the most famous (if contested) etymological journeys of any food-word.

You'll want to know: தண்ணீர் — water, literally "cool water"

தண்ணீர் (*taṇṇīr*) = "**water**" — built from தண் (*taṇ*, "**cool**") + நீர் (*nīr*, "**water**"). Everyday Tamil doesn't just say "water" — it says, quite literally, "**cool water**."

In the family, and next door

	word
Kannada	ನೀರು ಅಕ್ಕಿ ಅನ್ನ (*nīru akki anna*)
Telugu	నీళ్ళు బియ్యం అన్నం (*nīḷḷu biyyam annam*)
Malayalam	വെള്ളം അരി ചോറ് (*veḷḷam ari cōṟŭ*)
Hindi (neighbour)	पानी रोटी (*pānī roṭī*)
English	water, and rice

You'll want to know: அரிசி and சாதம் — rice, raw and cooked

Tamil, like most of South India, distinguishes the **uncooked grain** from the **cooked dish** with two separate words, not one:

- அரிசி (*arisi*) = "**rice**" (the raw, husked grain) — native Dravidian.
- சாதம் (*sātam*) = "**cooked rice**" (the meal itself, what's actually eaten) — likely Sanskrit-influenced. Tamil also keeps a native word for the same idea, சோறு (*cōṟu*) — the two sit side by side as everyday near-synonyms.

Why it's said this way

Here's the exciting part, held with appropriate care: many etymologists connect அரிசி (*arisi*) to the **English word "rice" itself** — the proposed chain runs Dravidian *arisi* → **Greek** *óryza* → Latin *oryza* → Old French *ris* → English **rice**. If true, English speakers have been saying a Dravidian word for centuries without knowing it. But be honest: standard etymological dictionaries mark Greek *óryza*'s origin as **genuinely uncertain** — a Dravidian source is one widely cited hypothesis among others (an Indo-Aryan *vrīhi*-related source is also proposed), not a settled, universally agreed fact.

Your turn

Say these aloud:

- "taṇ" — cool — then "nīr," water — then "taṇṇīr," cool water
- "arisi" — raw rice — then "sātam," cooked rice

- the famous (contested) link — "arisi" → possibly English "rice"

Before you move on

What does தண்ணீர் literally mean? (**"Cool water"** — *taṇ* "cool" + *nīr* "water.") What two words does Tamil use for rice, and why two? (அரிசி *arisi*, raw grain; சாதம் *sātam*, cooked rice — the raw grain and the cooked meal get separate words.) Is it certain that English "rice" comes from Tamil *arisi*? (**Not certain** — it's a widely cited hypothesis via Greek *óryza*, but that Greek word's origin is genuinely disputed among etymologists.)

15.2 அ — one character, met inside words you already say

அ — *a*.

It is an **independent vowel** — the shape the vowel *a* takes when a word begins with it, rather than the sign it becomes inside a word.

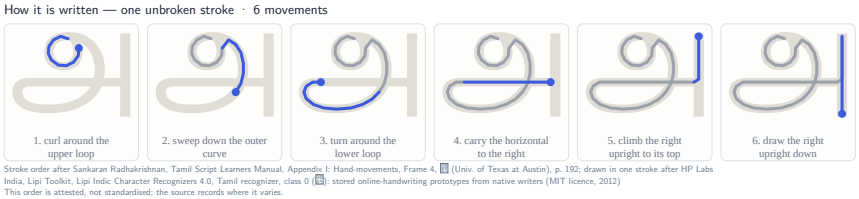

What it is made of:

- a curl at the upper left
- a long horizontal stroke
- a straight vertical on the right

You already say these, and every one of them has அ somewhere inside it:

- அப்பா அம்மா அண்ணன் தம்பி அக்கா தங்கை — father, mother, and FOUR sibling words
- தண்ணீர் அரிசி சாதம் — water, and rice — the actual staple food here, not bread — with a widely-cited

- **5.** without lifting, climb the right upright from there to its top
- **6.** without lifting, draw the upright straight down over that ink — and only now lift

Pen lifts: 0. The pen never leaves the paper.

One continuous stroke — six joined movements, no pen lift; it goes up the right upright from the horizontal and back down it; order from Radhakrishnan, Tamil Script Learners Manual, Frame 4, அ, with the stroke count from native writers' pen traces in HP Labs India's LipiTk Tamil recognizer, class 0.

Tamil Months

Modes: 🚗 **voice** (1) ✓ **pen** (4) 🚗 **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can name the twelve months of the Tamil solar calendar and place Tamil New Year and Pongal inside it.
>
> *Complete TA-C16-checkpoint, the chapter's closing checkpoint: say the twelve months from Chithirai to Panguṉi, place Tamil New Year and Pongal, say why* ஆம் *opens on a full vowel letter, then write* ம, ஆ *and* ஆம் *from sound.*

16.1 சித்திரை to பங்குனி — Tamil's own solar calendar

By now you've seen Arabic and Hindi each juggle two calendars. Tamil adds a **third distinct system** to the mix — one still actively used for Tamil New Year and Pongal, not a historical curiosity.

You'll want to know: The twelve Tamil months

சித்திரை, வைகாசி, ஆனி, ஆடி, ஆவணி, புரட்டாசி, ஐப்பசி, கார்த்திகை, மார்கழி, தை, மாசி, பங்குனி (*Chithirai, Vaikāsi, Āṉi, Āḍi, Āvaṇi, Puraṭṭāsi, Aippasi, Kārthigai, Mārgazhi, Thai, Māsi, Panguṉi*).

This is the **Tamil solar calendar** — a real, independent civil calendar, distinct from both the Gregorian calendar and the Hindu lunisolar (Vikram Samvat–style) calendar. Its months are traditionally tied to **nakshatras** (the 27 lunar-mansion star groups): each month is named for the nakshatra

the **moon** sits near on the **full-moon (pournami) day** that falls within that month — the moon's position, not the sun's, and tied to that month's full moon specifically, not simply the month's start.

The word, taken apart — its roots and family

Most of the twelve names are Sanskrit star names in Tamil dress: *Chithirai* from *Citrā*, *Vaikāsi* from *Viśākhā*, *Kārthigai* from *Kṛttikā*, *Māsi* from *Māgha*. Tamil gave them its own sounds and endings.

Why it's said this way

You've now met three genuinely separate calendar traditions: the Gregorian solar calendar (borrowed names, everyday civil use in most of the world), the pan-Indian Hindu lunisolar calendar (Chaitra, Vaishākh... tied to the six *ṛtu*), and now Tamil's **own** solar calendar, following neither. **சித்திரை 1** (the 1st of Chithirai) is **Tamil New Year**; **தை 1** (the 1st of Thai) is **Pongal**, one of Tamil Nadu's most important harvest festivals. These dates are fixed by the Tamil solar calendar, and only shift slightly against the Gregorian calendar (rather than drifting widely, the way lunar/lunisolar festival dates do) because it's solar too — just a different solar calendar, starting its year at a different point and naming its months differently.

Your turn

Say these aloud:

- the twelve — "Chithirai, Vaikāsi, Āṉi, Āḍi, Āvaṇi, Puraṭṭāsi, Aippasi, Kārthigai, Mārgazhi, Thai, Māsi, Paṅguṉi"
- "Chithirai 1" — Tamil New Year
- "Thai 1" — Pongal

Before you move on

What kind of calendar is the Tamil month system — solar, lunar, or lunisolar? (**Solar** — a genuinely separate calendar from both Gregorian and Hindu lunisolar.) What are the twelve months traditionally named for? (**Nakshatras**, lunar-mansion star groups.) What two important occasions are dated by this calendar? (**Tamil**

New Year (Chithirai 1) and **Pongal** (Thai 1).)

16.2 ம — upright on the left, curve on the right

Before the new one: say the sound of க.

One letter this time. Just one.

One unbroken stroke again, like வ. The only thing to get right is which way round it goes: the **upright is on the LEFT** and the **curve on the right**. Most people guess the reverse, because that is the habit Devanagari teaches — hanging a shape off a right-hand spine.

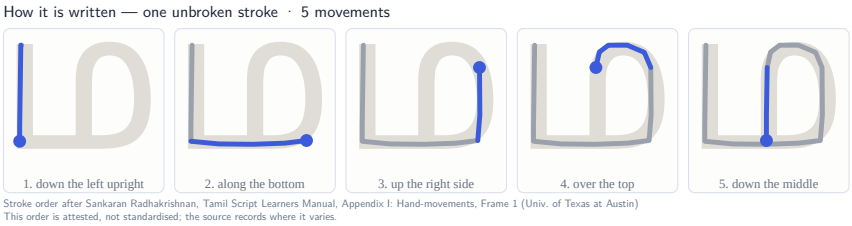

Script you'll notice: ம

ம — *ma*.
What it is made of:

- a straight vertical stroke on the LEFT
- a horizontal along the bottom
- a rounded arch closing it on the RIGHT

It is the last consonant of வணக்கம்.

Writing: ம

How ம *is written, stroke by stroke*

- **1.** start at the top left and draw the left upright straight DOWN to the baseline

- **2.** without lifting, turn right and run along the bottom to the far right
- **3.** without lifting, turn up and rise up the right side
- **4.** without lifting, curve over the top and back towards the left
- **5.** without lifting, come down the middle to the bottom bar — and only now lift

Pen lifts: 0. The pen never leaves the paper.

- *Say it:* "ma" as you finish it
- *Trace it:* it twice more, without looking back at the steps

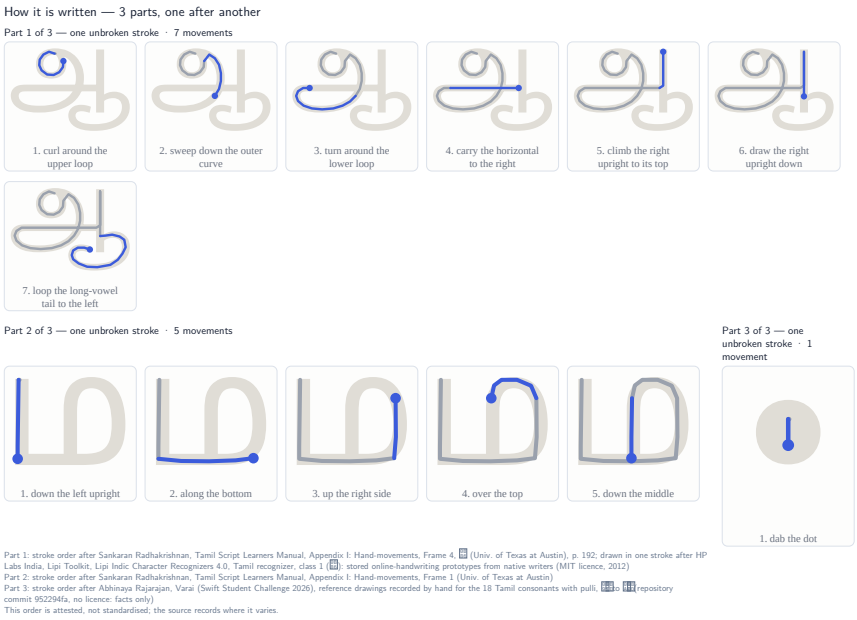

Before you move on

Which side is the upright on? (**The left.**) How many pen lifts? (**None.**)

16.3 ஆம் — writing a word that starts with a vowel

Every vowel *sign* so far has hooked onto a consonant — the ா on ற. This word has no consonant to hook onto.

Script you'll notice: a vowel standing alone

How ஆம் is written, part by part, stroke by stroke

Tamil writes a vowel two ways, and which one you use depends on **where it sits**:

inside a word, after a consonant	a small **sign** — ி in றி
starting a word, with nothing before it	a full **independent letter**

ஆ is the independent letter for long *ā*. It is not a sign and never hangs off anything; it is a letter in its own right.

Long *ā* is short அ plus a tail, so அ is where it starts — and you have not been shown that one yet. Its parts, then the tail:

1. **a curl at the upper left**
2. **a long horizontal stroke**
3. **a straight vertical on the right** — that is அ
4. **a tail added on the right** — and now it is ஆ

Those are the parts in writing order. Where the pen lifts is not settled: Tamil handwriting varies by region and by school, and this book only claims a pen path where it has a sourced one.

That is a rule, not a special case: any Tamil word that opens on a vowel opens with a full vowel letter.

Script you'll notice: build the word

piece		
ஆ	$\bar{a}$	this lesson — independent
ம்	m — ம with the puḷḷi	the dot you already know

ஆ · ம் → ஆம்

Two pieces only. The puḷḷi on ம் closes the word on a bare m, exactly as it did at the end of வணக்கம்.

Your turn

Write these out:

- அ — curl, horizontal, right vertical
- ஆ — the same three parts, then the right-hand tail
- ம் — ம with the dot
- ஆம் — two pieces, left to right

Before you move on

Write ஆம். When does a Tamil vowel get a full letter instead of a sign? (**When it starts a word** — nothing precedes it to hook onto.) What closes the word? (ம் — the puḷḷi on ம.) Next: noon and midnight.

- ஆம் — yes (ām)
- ஆம் / இல்லை / சரி *ām / illai / sari* — answering in Tamil

- Which day is Tamil New Year, and which is Pongal? (*Chithirai* 1; *Thai* 1.)

Script — ம, ஆ and ஆம்

- Which side of ம is the upright on? (The left, with the curve on the right.)

Which month opens the Tamil year, and which month opens with Pongal? (*Chithirai*; *Thai*.) That is the chapter: a calendar of Tamil's own, and the first word you can write that opens on a vowel. Next chapter: noon and midnight.

Chapter 17

Noon and Midnight

Modes: 🚗 **voice** (2) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can use both the fused and the transparent Tamil words for noon and midnight, and point to the நடு "middle" that makes one pair readable on sight.
>
> *Say naṇpakal beside naṭuppakal and naḷḷiravu beside naṭu iravu, pointing at naṭu as the everyday "middle" still visible in the second of each pair.*

17.1 நண்பகல், நள்ளிரவு — one old "middle" root, two survival stories

You've just watched Kannada and Telugu each reach for Sanskrit's *madhya* to name noon. Tamil doesn't reach for Sanskrit at all here — it reaches into its own, much older layer of vocabulary instead.

The word, taken apart — its roots and family

Both of today's words trace back to the same root: நள் (*naḷ*), a **Proto-Dravidian** word for "**middle, centre**" — a genuine synonym of the everyday நடு (*naṭu*, "middle") you already know, just from an older layer of the vocabulary. நள் didn't disappear from Tamil; it survives today mainly in **literary/poetic** compounds — நள்ளிருள் (*naḷḷiruḷ*, "thick darkness") and நள்ளென் கங்குல் (*naḷḷeṉ kaṅkul*, "deep night") — rather than in everyday colloquial speech.

In the family, and next door

	word
Kannada	ಮಧ್ಯಾಹ್ನ ಮಧ್ಯರಾತ್ರಿ (*madhyāhna madhyarātri*)
Telugu	మధ్యాహ్నం అర్ధరాత్రి (*madhyāhnam ardharātri*)
Hindi (neighbour)	दोपहर आधी रात (*dopahar ādhī rāt*)
English	noon and midnight

The word, taken apart — its roots and family

நள்ளிரவு (*naḷḷiravu*) = "**midnight**" = நள் (*naḷ*, "middle") + இரவு (*iravu*, "**night**," a word every Tamil speaker still uses on its own) — நள் shows up here exactly as you'd expect. நண்பகல் (*naṇpakal*) = "**noon, midday**" traces to the **same** நள் root, fused with பகல் (*pakal*, "**daytime**") — but here it surfaces as **நண்-** rather than **நள்-**, a sandhi-driven surface change before the following ப. Same root, two different faces, depending on what it's fused to.

Your turn

Say these aloud:

- "naḷ" — an old word for "middle" — then "naḷḷiravu," midnight
- "naṇpakal" — noon, the same naḷ root, resurfacing as naṇ-

Before you move on

What old Proto-Dravidian root do நண்பகல் and நள்ளிரவு both trace back to, and what does it mean? (நள் *naḷ*, "middle" — surviving mainly in literary compounds like *naḷḷiruḷ*, "thick darkness.") Why does it surface as **naṇ-** in *naṇpakal*? (A sandhi change before following **p**.) Does Tamil reach for Sanskrit here? (**No**.) Next: meet the transparent *naṭu* synonyms Tamil kept beside these older compounds.

17.2 நடுப்பகல் and நடு இரவு — the transparent twins

Naṇpakal and *naḷḷiravu* preserve an older middle-root in fused forms. Tamil also kept versions whose pieces remain obvious today.

You'll want to know: The living synonyms

- நடுப்பகல் (*naṭuppakal*) — "middle-daytime," a dictionary synonym of *naṇpakal*
- நடு இரவு (*naṭu iravu*) — "middle night," the transparent synonym of *naḷḷiravu*

Both use நடு (*naṭu*, "middle"), the everyday word still heard in *naṭuvē*, "in the middle."

Latin daughter languages often inherit one fate for an old compound: eroded or transparent. Tamil kept **both fates inside one language**—old fused forms and fresh transparent synonyms side by side.

The word, taken apart — its roots and family

All three parts are native Dravidian: *naṭu*, "middle" (DEDR 3584; Malayalam *naṭu*, Kannada *naḍu*), *pakal*, "daytime" (DEDR 3805; Malayalam *pakal*), and *iravu*, "night" (DEDR 2552; Malayalam *iravu*).

Your turn

- *Say it:* "naṇpakal · naṭuppakal" — two noon forms
- *Say it:* "naḷḷiravu · naṭu iravu" — two midnight forms
- *Point to: naṭu* as the visible everyday "middle"

Before you move on

Which everyday word builds the transparent forms? (நடு, *naṭu*, "middle.") What did Tamil keep simultaneously? (**Older fused compounds and transparent synonyms**.) Are any pieces Sanskrit loans? (**No**.)

17.3 ◌ூ — one character, met inside words you already say

Before the new one: ஆ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ◌ூ

◌ூ — *u*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *u*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ◌ூ somewhere inside it:

- போய் வருகிறேன் *pōy varugiṟēṉ* — goodbye (lit. "I'll go and come back")
- மீண்டும் சந்திப்போம் *mīṇḍum sandippōm* — we'll meet again
- தமிழ் எழுத்து *tamiḻ eḻuttu* — why Tamil writing is so round
- பேசு *pēsu* — to speak

Writing: ◌ூ — copy what you see

Put your pen on ◌ூ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ◌ூ in the ones that have it

  வணக்கம்

- *Trace it:* ◌ु three times, saying *u* as you finish each one
- *Look:* back at any page of this chapter and find ◌ु once more

Before you move on

Which character is this — ◌ु? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *u* on; takes the built-in *a* off.**) Name one word you already say that contains it.

Chapter 18

Telling Time

Modes: **voice** (1) **eyes** (1) **pen** (3) **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can tell the time on the hour in Tamil and keep the hour-word மணி apart from the unrelated Sanskrit gem-word spelled exactly the same way.
>
> *Say oru maṇi and iraṇṭu maṇi for one and two o'clock, then choose hour or gem by the context the word sits in; write* இல்லை *piece by piece and say what the puḷḷi and the left-standing ai sign do.*

18.1 மணி — Tamil's native "bell," and a real homophone trap

You've watched Kannada and Telugu both borrow Sanskrit's "bell" word for "hour," matching Hindi exactly. Tamil goes its own way again here — with a genuinely tricky twist along the way.

The word, taken apart — its roots and family

மணி (*maṇi*) = "**hour, o'clock**" — and it also means "**bell, gong**," the same double duty you've now seen several times. Wiktionary's Tamil entry gives this *maṇi* its **own etymology**, separate from a Sanskrit-loan entry of the same spelling — most likely a **native Dravidian** word, not the Sanskrit घण्टा (*ghaṇṭā*) behind Kannada's *gaṇṭe*, Telugu's *ganṭa*, and Hindi's *ghanṭā*. On this account, Tamil underwent the **same** "a bell announces the hour, so the bell-word

becomes the hour-word" shift on its own, from a different starting point — though even the comparative Dravidian dictionary (DEDR 4672) flags a possible Sanskrit connection for this whole word-family as unresolved, so hold "native" as the best current account rather than a settled fact.

In the family, and next door

	word	**same root**
Kannada	ಗಂಟೆ (*gaṇṭe*)	
Telugu	గంట (*ganṭa*)	
Malayalam	മണി (*maṇi*)	yes
Hindi (neighbour)	घंटा (*ghaṇṭā*)	
English	hour	

Your turn

- *Say it:* "maṇi" — hour, also "bell" — native, NOT from Sanskrit ghaṇṭā
- *Read it:* ௬ மணி — the numeral from chapter seven and the hour word you have met, side by side

Before you move on

Is Tamil's மணி ("hour") from the same Sanskrit root as Kannada/Telugu/Hindi's hour-words? (**Most likely no** — it's treated as a native Dravidian "bell" word that independently reached "hour" the same way, though even DEDR flags this as not fully settled.) What semantic path links the meanings? (A **bell announces the hour**.) Next: writing இல்லை — a second independent vowel, ல, and the ai sign.

18.2 ◌் — the dot that takes the vowel away

Not a letter this time — a mark that changes the letter under it.

Script you'll notice: ◌்

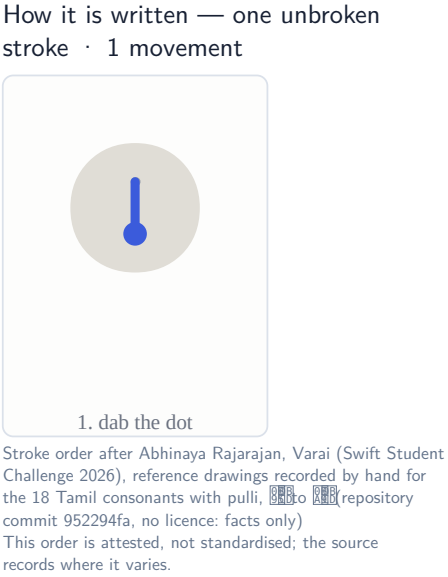

Every Tamil consonant you have written so far carries a hidden *a*. வ is not *v*, it is **va**. ம is **ma**. That is what an abugida is: the vowel is built in.

The puḷḷi is how you take it back. One dot above the letter, and வ becomes plain **v**.

Here is what Tamil does that Devanagari does not: **the dot stays visible and both letters keep their full shape.** Devanagari fuses two consonants into a single new conjunct you have to learn separately. Tamil just writes the dot. There is nothing extra to memorise.

Where it sits: a DOT written above the letter, removing the inherent vowel; unlike Devanagari's virama it does not trigger a conjunct — both letters keep their full shape and the dot stays visible

Writing: ◌்

How ◌் is written, stroke by stroke

With this you can write வணக்கம் — every letter, in order:

வ + ண + க + ◌் + க + ம + ◌்

Seven marks on the page, and you have written *hello*.

Your turn

- *Trace it:* the mark on a letter you already know
- *Say it:* the letter's sound with the mark, then without it
- *Write it:* the whole word above, one mark at a time

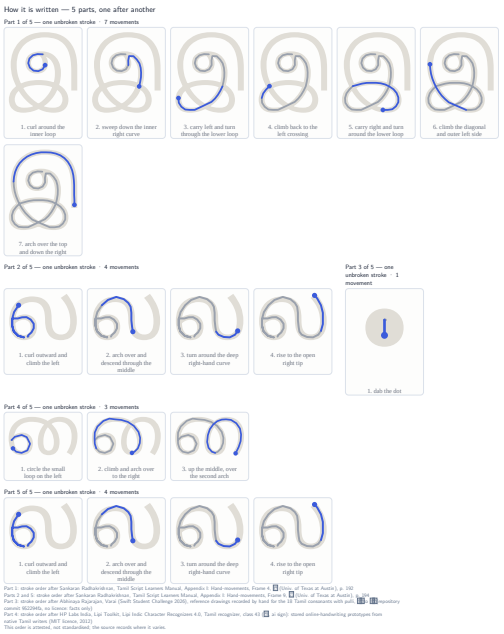

Before you move on

What does the puḷḷi do? (**Removes the built-in vowel.**) What is வ with a puḷḷi? (**v**, not *va*.) What does Tamil NOT do that Devanagari does? (**Fuse the letters into a new shape.**)

18.3 இல்லை — a vowel in front, a vowel sign behind

Last lesson gave you the rule: a word opening on a vowel opens with a full letter. Here is the same rule with a different vowel, plus one new sign.

Script you'll notice: இ and ல

How இல்லை *is written, part by part, stroke by stroke*

இ is the independent letter for short *i* — the same job ஆ did, one vowel over. Its parts, in writing order:

1. **a crossing spiral on the left**
2. **a tall straight vertical on the right**

ல is *la*, with its built-in *a* like every consonant:

1. **a curl that turns back on itself**
2. **a stroke rising to the right**

Put the puḷḷi on it and you get ல், a bare *l*.

The new mark is ை, the sign for *ai*, and it does something ி did not. **It is written to the LEFT of its consonant, but pronounced after it.**

> ல + ை → லை, and on the page the hook stands *before* the ல — yet you say *lai*, not *ail*.

Your eye meets the vowel first and your mouth says it second. Devanagari does the same thing with ि, and it catches everyone once.

> Tamil keeps **three** *l*-letters (ல ள ழ) and **two** *r*-letters (ர ற), the same way it keeps three *n*'s. This is the first of the *l*'s.

Script you'll notice: build the word

piece		
இ	*i*	independent — the word opens on a vowel
ல்	*l* — ல with the puḷḷi	bare consonant
லை	*lai* — ல with the ai sign	this lesson

இ · ல் · லை → இல்லை

The ல் + லை is a doubled *l*, held like the க்க of *vaṇakkam*: *il-lai*, not *ilai*.

Your turn

- *Write it:* இ — spiral, then the right-hand vertical
- *Write it:* ல — curl, then rising stroke
- *Write it:* லை — the ai hook goes on the LEFT
- *Write it:* இல்லை — three pieces
- *Say it:* "il-lai" — hold the doubled *l*

Before you move on

Write இல்லை. Why does it open with இ rather than a sign? (**The word starts on a vowel**.) Which side of its consonant does ை sit on? (**The left** — written first, spoken second.) Next: the gem-word homophone, and telling clock time.

18.4 மணி — hour or jewel? Context decides

The likely native bell/hour word shares its spelling and sound with a clear Sanskrit loan meaning something entirely different.

The word, taken apart — its roots and family

Tamil dictionaries list a second மணி from Sanskrit मणि (*maṇi*), "gem, jewel." On that analysis, bell/hour and gem are **homophones**: one likely native, one borrowed, identical on the page. Context separates clock time from a jewel or personal name.
The comparative Dravidian dictionary lists the bell/hour word with Malayalam *maṇi*, "little bells, gong, hour", and Kota, Toda and Tulu bell words (DEDR 4672). It adds a query about a source in Sanskrit *maṇi*, "jewel", and leaves it open.

Grammar Lens: Tell the time

இரண்டு மணி. — two o'clock, literally "two hour/bell"

மூன்று மணி. — three o'clock

The number comes first; *maṇi* supplies the clock unit.

Your turn

- *Say it:* "iraṇṭu maṇi" — two o'clock
- *Say it:* "mūn̲ru maṇi" — three o'clock
- *Choose by context:* clock → hour · jewelry/name → gem

Script — the puḷḷi and இல்லை

- *Write it:* இல்லை — இ, then ல், then லை
- *Point to:* the puḷḷi, then the ai hook

What does the puḷḷi do to ல? (**Removes its built-in *a*** — bare *l*.) Why open on இ? (**The word starts on a vowel.**) Which side does ை sit on? (**The left** — written first, spoken second.)

Before you move on

What is the homophone trap? (A likely separate Sanskrit-borrowed **மணி** means **gem**.) Does Malayalam analyze the same forms identically? (**No**.) How do you say two o'clock? (**இரண்டு மணி**, *iraṇṭu maṇi*.)

18.5 த — one character, met inside words you already say

Before the new one: ◌ை — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: த

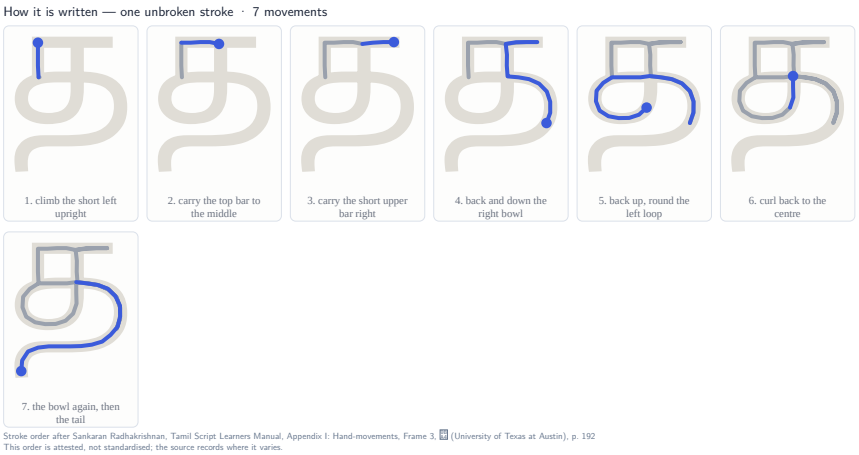

த — *ta*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *t*, it is **ta**.

You already say these, and every one of them has த somewhere inside it:

- மீண்டும் சந்திப்போம் *mīṇḍum sandippōm* — we'll meet again
- தமிழ் எழுத்து *tamiḻ eḻuttu* — why Tamil writing is so round
- நான் தமிழ் பேசுகிறேன் *nāṉ tamiḻ pēsugiṟēṉ* — I speak Tamil
- எனக்குத் தமிழ் தெரியும் *enakkut tamiḻ teriyum* — 'I know Tamil'

Writing: த — follow the numbered strip

How த *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write த yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find த in the ones that have it

  வணக்கம்

- *Trace it:* த three times, saying *ta* as you finish each one
- *Look:* back at any page of this chapter and find த once more

Before you move on

Which character is this — த? What sound does it carry? (***ta***.)
Name one word you already say that contains it.

Chapter 19

Asking Someone's Age

Modes: **voice** (2) **pen** (4) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can ask someone's age in both the casual possessive shape and the formal dative-plus-become shape, and answer with my own.
>
> *Complete TA-C19-checkpoint, the chapter's closing checkpoint: ask an age casually and formally and answer in the formal shape, place vayathu in Sanskrit vayas, say what ி and ச do, find ே in பேசு, then write றி, சரி and ே from sound.*

19.1 உனக்கு எத்தனை வயது ஆகிறது? (unakku ettanai vayathu aakirathu?) — Tamil actually has BOTH shapes

> Same Sanskrit word one more time — but be careful here: Tamil isn't locked into just one of the two grammatical shapes you've now seen. It has both, in different registers.

You'll want to know: வயது — the same Sanskrit "vigor/ age" word, a fourth time

வயது (*vayathu*) = "**age**" — the same Sanskrit वयस् (*vayas*, "age, vigor," PIE cousin of Latin **vīs**) you've now met four times across Kannada, Telugu, Malayalam, and Tamil. All four Dravidian languages borrowed this exact Sanskrit word for "age" — none of them built a native alternative for this particular concept, the way they did for so many others.

In the family, and next door

	word
Kannada	ನಿನ್ನ ವಯಸ್ಸು ಎಷ್ಟು? (*ninna vayassu eṣṭu?*)
Telugu	నీ వయసెంత? (*nī vayasenta*)
Malayalam	നിങ്ങൾക്ക് എത്ര വയസ്സുണ്ട്? (*niṅṅaḷkkŭ etra vayassuṇṭŭ?*)
English	how old are you?

Your turn

- *Say it:* "vayathu" — age — then the whole formal question, "unakku ettanai vayathu aakirathu?"
- *Connect:* Sanskrit *vayas* · Tamil *vayathu* · Latin *vīs*

Before you move on

Is Tamil's வயது the same Sanskrit word borrowed by all four Dravidian languages here? (**Yes** — none built a native alternative for this concept.) What did *vayas* originally include besides age? (**Vigor**.) Next: choose between Tamil's casual possessive and formal dative-plus-become shapes.

19.2 Your age what? / To you how many years becomes?

Tamil did not choose one age construction. Register selects between two shapes already visible elsewhere in the family.

Grammar Lens: Casual possessive

உன் வயசு என்ன? — "your age what?"

Casual speech uses a plain possessive with no dative and no verb, like Kannada and Telugu.

Grammar Lens: Formal dative plus "become"

> **உனக்கு எத்தனை வயது ஆகிறது?** — "to you how many years is becoming?"
>
> **எனக்குப் பத்து வயது ஆகிறது.** — "to me ten years is becoming."

Formal/written Tamil uses the dative experiencer plus **ஆகிறது** (*aakirathu*, "is becoming," from *aaku*). Written Tamil also doubles the ப of *pattu* back onto *enakku* as ப்: *enakkup pattu*. Malayalam uses a similar dative shape but chooses "exists" instead.
Do not compress these into "Tamil's one grammar." Both live in the language; setting and register choose between them.

Your turn

- *Say it:* "un vayasu enna?" — casual
- *Say it:* "unakku ettanai vayathu aakirathu?" — formal
- *Answer:* "enakkup pattu vayathu aakirathu"

Before you move on

Which shape is casual? (**Possessive**: "your age what?") Which is formal? (**Dative + aakirathu**, "become.") Does Malayalam use the same verb? (**No** — it uses "exists.")

19.3 ி — the first vowel sign

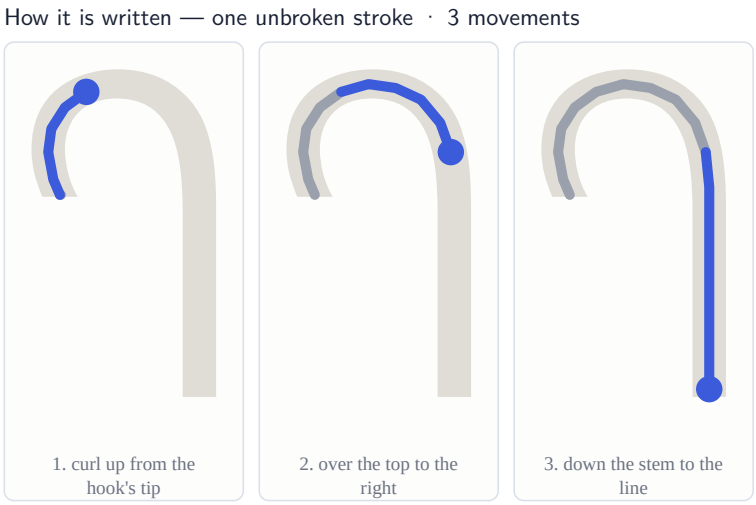

> Not a letter this time — a mark that changes the letter under it.

Script you'll notice: ி

A consonant carries *a*. To make it carry a different vowel you add a **sign** — and the sign replaces the built-in vowel rather than sitting beside it.

The i-sign is a hook written above and to the right. ற is *ṟa*; றி is **ṟi**.
Where it sits: a hook written above and to the right of the consonant

Writing: ி

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Tamil recognizer, class 37 (, i sign): stored online-handwriting prototypes from native Tamil writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ி is written, stroke by stroke

And with that: நன்றி.

ந + ன + ் + ற + ி

Thank you — the second word you can write.

Your turn

- *Trace it:* the mark on a letter you already know
- *Say it:* the letter's sound with the mark, then without it
- *Write it:* the whole word above, one mark at a time

Before you move on

Does a vowel sign add a vowel or replace one? (**Replace** — the built-in *a* is gone.) What is ற with an i-sign? (**ri**.)

19.4 சரி — one letter, several sounds

You have seen க cover *k*, *g* and a soft *h* depending on where it sits. Here is the same economy on a second letter.

Script you'll notice: ச and ர

How சரி *is written, part by part, stroke by stroke*

ச is written once and does the work English splits between **s**, **ch** and **j**. Position picks which:

where	**sound**
starting a word	*s* or *ch*
between vowels	softened
after a nasal, as in ஞ்ச	*j*

That is exactly the pattern க showed — *k* at the start, *g* after a nasal, a soft *h* between vowels. One letter per position of the mouth, and context fills in the rest.

ர is *ra*, with its built-in *a*. It is the other of Tamil's **two** *r*-letters, alongside the ற you met in நன்றி.

Read both letters here. The strip writes ச, ர and then the ி sign, numbered movement by movement, with each source beneath it.

Script you'll notice: build the word

piece		
ச	*sa* here	this lesson
ரி	*ri* — ர with the ி sign	the sign from நன்றி

ச · ரி → சரி

Two pieces, and both parts are things you already hold: a consonant, and the vowel sign you first hooked onto ற.

Your turn

- *Read it:* ச — then சரி
- *Say it:* "sari"
- *Contrast:* ரி and லை — the ி sign follows its letter, the ை sign precedes it
- *Write it:* ஆம் and இல்லை again, from memory — yes and no, the two you will reach for most

Before you move on

Read சரி. Which English sounds does ச cover on its own? (***s*** or ***ch*** at the start, softened between vowels, ***j*** after a nasal.) How many *r*-letters does Tamil keep? (**Two** — ர and ற.) In லை, which side of the ல does the ai sign sit on? (**The left**.) And why does இல்லை open with இ rather than a sign? (**It starts on a vowel**.) Next: the numbers eleven to twenty.

19.5 ே — one character, met inside words you already say

Before the new one: த — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ே

ே — *ē*.

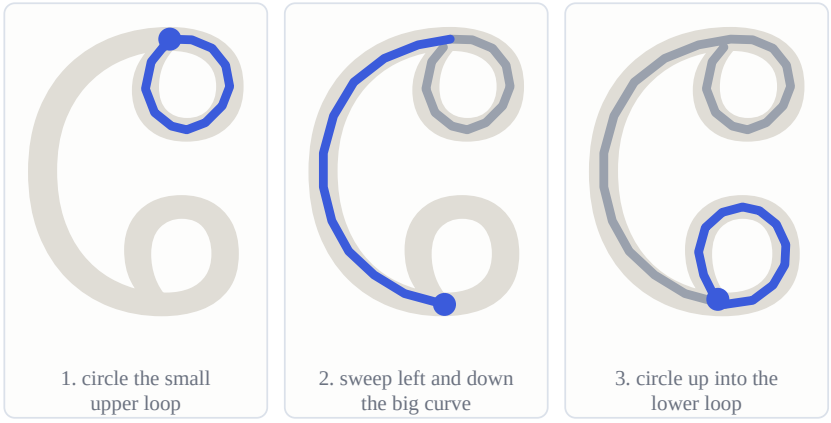

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ē*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ே somewhere inside it:

- போய் வருகிறேன் *pōy varugiṟēṉ* — goodbye (lit. "I'll go and come back")
- பேசு *pēsu* — to speak
- நான் தமிழ் பேசுகிறேன் *nāṉ tamiḻ pēsugiṟēṉ* — I speak Tamil
- வேலை செய் *vēlai sey* — to work (lit. "work-do")

Writing: ே — follow the numbered strip

How it is written — one unbroken stroke · 3 movements

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Tamil recognizer, class 42 (ே, ee sign): stored online-handwriting prototypes from native Tamil writers (MIT licence, 2012)

How ே is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ே yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

- *Look:* at these words, and find ே in the ones that have it

  பேசு · வணக்கம்

- *Trace it:* ே three times, saying *ē* as you finish each one
- *Look:* back at any page of this chapter and find ே once more

Before you move on

Which character is this — ே? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ē* on; takes the built-in *a* off.**) Name one word you already say that contains it.

19.6 Chapter 19 checkpoint — two ways to ask an age, and சரி from sound

> Nothing new here. The age question in both its shapes first, then a vowel sign, a word and one more sign on the page.

Your turn — the age question

- *Say it:* the casual question, to a friend
- *Say it:* the formal question, to someone you would address with care
- *Answer:* in the formal shape, giving twenty as the age

(*Un vayasu enna? — Unakku ettanai vayathu aakirathu? — Enakku irupathu vayathu aakirathu.*)

- Where does *vayathu* come from? (Sanskrit *vayas*, "age, vigor", which all four Dravidian languages here borrowed.)
- Which shape uses the dative and *aakirathu*, "becomes"? (The formal one; the casual one is a plain possessive with no verb.)

Script — ◌ி, ச and ே◌

- Does ◌ி add a vowel or replace one? (It replaces the built-in *a*: ற is *ṟa*, றி is *ṟi*.)
- Which sounds does ச cover on its own? (*s* or *ch* at the start of a word, softened between vowels, *j* after a nasal.)
- Which two pieces build சரி? (ச · ரி: ர carrying the i-sign.)
- In பேசு, *pēsu*, "to speak", which mark gives the first consonant its *ē*? (ே◌.)

Read it: சரி and பேசு aloud, and point to the ே◌

Writing — from sound

Cover: the Script block above, so no model stays in view
Write it: *ṟi*, then *sari*, "okay"
Write it: the sign that turns a consonant's *a* into *ē*
Check: against the key — றி, சரி, ே◌
Write it: one repaired shape, then stop

Before you move on

A friend asks your age, then an elder does. Which shape does each one use? (The possessive for the friend; the dative with *aakirathu* for the elder.) That is the chapter: one borrowed word, two grammars, and *okay* written from sound.
Next chapter: the numbers eleven to twenty.

Chapter 20

Numbers Eleven to Twenty and Weather

Modes: **voice** (2) **pen** (1) **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can count eleven to twenty as the transparent compounds they are, and say what the weather is doing.
>
> *Count 11 and 12 as ten-plus-a-digit and take irupathu apart as "two-tens", then take vāṉilai apart into vāṉam plus nilai and report the weather with mazhai peykiRathu.*

20.1 பதினொன்று–இருபது — shared Dravidian patterns

> Here's how this arc closes: four completely different approaches to "twenty" across Sanskrit, Latin, Arabic — and then all four Dravidian languages quietly agreeing on the exact same compositional idea.

You'll want to know: பதினொன்று–பத்தொன்பது — "ten" + digit

Tamil's teens echo பத்து (*pathu*, "**ten**") plus each digit — பதினொன்று (*patiṉoṉṟu*, 11), பன்னிரண்டு (*paṉṉiraṇṭu*, 12), and onward through பத்தொன்பது (*pattoṉbatu*, 19) — the same digit-plus- ten-echo compounding you've now seen across Kannada, Telugu, and Malayalam.

In the family, and next door

	word	same root
Kannada	ಹನ್ನೊಂದು — ಇಪ್ಪತ್ತು (*hannondu — ippattu*)	yes
Telugu	పదకొండు — ఇరవై (*padakoṇḍu — iravai*)	yes
Malayalam	പതിനൊന്ന് — ഇരുപത് (*patinonnŭ — irupatŭ*)	yes
English	11-20	

The word, taken apart — its roots and family

Both halves are native Dravidian. *Pattu*, "ten", is DEDR 3918, with Malayalam *pattu*, Kannada *pattu* and Telugu *padi*. The bound *iru*, "two", is DEDR 474, and that entry lists Malayalam *iru-patu* and Kannada *irpattu*, "twenty", built the same way.

You'll want to know: இருபது — transparently "two-tens"

இரு + பத்து → இருபது (*irupathu*, "**twenty**"): an older word for "**two**," alongside the everyday இரண்டு *iraṇḍu*, plus *pathu*, "**ten**" — fully transparent as "**two-tens**," matching **Malayalam's** own *irupathu* almost letter-for-letter.

Why it's said this way

This closes the numbers arc with a genuinely clean pattern. All four major Dravidian languages build "twenty" the **same** compositional way — some (Tamil, Malayalam) keeping it fully transparent on the surface today, some (Kannada) with the same compositional origin but no longer visibly matching the modern standalone words for "two" and "ten," some (Telugu) worn down further but most likely from the same root. Compare that to the other three families you've met: Sanskrit's विंशति (*vimshati*), Latin's **vīgintī**, and Arabic's عشرون (*ʿishrūn*) are each their **own** special, non-compositional word for twenty — none built transparently from "two" and "ten" the way Tamil, Telugu, Kannada, and Malayalam all do.

Your turn

Say these aloud:

- "patinon̲d̲ru, pan̲n̲iraṇḍu" — 11, 12
- "iru" — an older word for two, "pathu" — ten
- "irupathu" — twenty, "two-tens," transparent

Before you move on

What two pieces build இருபது (twenty)? (இரு + பத்து → இருபது: "two" and "ten" — "**two-tens**.") Do all four major Dravidian languages build "twenty" the same compositional way? (**Yes** — Tamil and Malayalam keep it fully transparent today; Kannada shares the same compositional origin but its modern "two"/"ten" words no longer visibly match; Telugu's is worn down further but most likely the same root.) Do Sanskrit, Latin, or Arabic build their word for twenty this way? (**No** — each has its own special, non-compositional standalone word instead.)

20.2 வானிலை — "the standing of the sky," most likely all native

You've now seen a Persian+Sanskrit hybrid (Kannada), a pure Sanskrit compound (Telugu), and a Sanskrit compound echoing "time" (Malayalam). Tamil most likely breaks the pattern one more time — with a word built entirely from native pieces.

You'll want to know: வானிலை — vaanam + nilai

வானிலை (*vān̲ilai*) = "**weather**" — built from:

- வானம் (*vān̲am*, "**sky**") — most likely a **native Dravidian** word, with confirmed cognates in **Kannada** ಬಾನು (*bānu*, "sky") and **Telugu** వాన (*vāna*, "rain," from the same sky/rain-cloud root) — distinct from the Sanskrit sky word *ākāśa* that those same two languages use elsewhere.
- நிலை (*nilai*, "**state, standing, condition**") — from நில் (*nil*, "**to stand**"), one of Tamil's most basic native verb roots.

So *vāṉilai* literally means "**the standing of the sky**" — and unlike its three Dravidian cousins, neither piece is a Sanskrit or Persian/Arabic loan. ("Native" is the best current account, not a settled fact — but both pieces are well-attested as old Dravidian vocabulary.)

In the family, and next door

	word
Kannada	ಹವಾಮಾನ (*havāmāna*)
Telugu	వాతావరణం (*vātāvaraṇam*)
Malayalam	കാലാവസ്ഥ (*kālāvastha*)
Hindi (neighbour)	मौसम (*mausam*)
English	weather

You'll want to know: மழை பெய்கிறது — "rain is falling"

> மழை பெய்கிறது. — "It's raining." — literally "**rain is falling**." (*mazhai peykiRathu* — from பெய் *pey*, "to fall/pour," specifically used for rain.)

Your turn

Say these aloud:

- "vāṉilai" — weather, "the standing of the sky"
- "vāṉam" — sky, "nilai" — state, from "nil," to stand
- "mazhai peykiRathu" — it's raining, "rain is falling"

Your turn — eleven to twenty

- Say 11, then 12. (***patiṉoṉṟu***, ***paṉṉiraṇḍu*** — பத்து, ten, echoed plus a digit.)
- Say twenty and take it apart. (***irupathu*** — *iru*, an older "two," + பத்து, "ten": "**two-tens**.")
- Do Sanskrit, Latin or Arabic build twenty that way? (**No** — each has its own special word; all four Dravidian sisters compose it.)

Before you move on

What are the two pieces of வானிலை, and what does the whole word literally mean? (வானம், "sky," + நிலை, "state/standing" — "**the standing of the sky**.") Is either piece a Sanskrit or Persian/Arabic loan, unlike Kannada, Telugu, or Malayalam's weather words? (**Most likely not** — both pieces are native Dravidian.) What Tamil word does Malayalam's *mazha* match for "rain"? (மழை, *mazhai*.)

20.3 ய — one character, met inside words you already say

Before the new one: ே — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ய

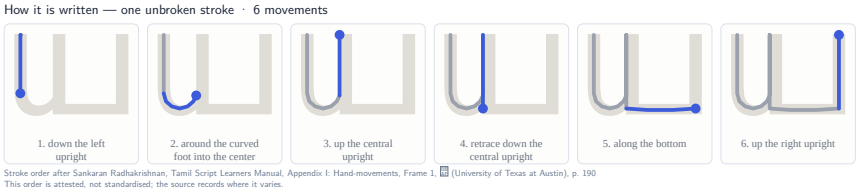

ய — *ya*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *y*, it is **ya**.

You already say these, and every one of them has ய somewhere inside it:

- பெயர் *peyar* — name
- என் பெயர் **...** *en̲ peyar …* — my name is… (with no "is")
- பரவாயில்லை *paravāyillai* — it's okay / no problem / you're welcome
- போய் வருகிறேன் *pōy varugi̲rēn̲* — goodbye (lit. "I'll go and come back")

Writing: ய — follow the numbered strip

How ய *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ய yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ய in the ones that have it

  பெயர் · வணக்கம்

- *Trace it:* ய three times, saying *ya* as you finish each one
- *Look:* back at any page of this chapter and find ய once more

Before you move on

Which character is this — ய? What sound does it carry? (***ya***.)
Name one word you already say that contains it.

Chapter 21

Dog and Cat

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can say dog and cat in Tamil and say which of the two rests on an undisputed Dravidian root and which sits inside a three-way family split.
>
> *Say nāy and pūnai, then place Kannada's bekku and Telugu's pilli as two other roots entirely rather than variants of the same word.*

21.1 நாய், பூனை — solid ground to close the arc, and an honest three-way split

> This whole ANIMALS arc kept finding mystery dog-words — Spanish's *perro*, English's *dog*, Hindi's *kuttā*, each one an unsolved puzzle displacing an older, expected word. Tamil's dog-word closes the arc on the complete opposite footing: total, undisputed solid ground.

You'll want to know: நாய் — no mystery, anywhere

நாய் (*nāy*, "**dog**") is a solid, native **Proto-Dravidian** root — the exact same one behind Kannada's ನಾಯಿ (*nāyi*) and Malayalam's നായ (*nāya*). There is no debate about its origin, no substrate mystery, nothing like the *perro*/*dog*/*kuttā* pattern that ran through Spanish, English, and Hindi. Three unrelated language families each lost their expected word for "dog" to an unexplained newcomer — and right here, in the Dravidian family, the expected word simply **survived**, plainly and solidly, across (at least) three of its languages.

In the family, and next door

	word	same root
Kannada	ನಾಯಿ, ಬೆಕ್ಕು (*nāyi, bekku*)	
Telugu	కుక్క, పిల్లి (*kukka, pilli*)	
Malayalam	നായ, പൂച്ച (*nāya, pūcca*)	yes
Hindi (neighbour)	कुत्ता (*kuttā*)	
English	dog and cat	

The word, taken apart — its roots and family

பூனை (*pūnai*, "**cat**") is Tamil's own everyday word, matching Malayalam's പൂച്ച (*pūcha*) closely — but be honest that "cat" splits Dravidian in a way "dog" doesn't. Kannada's everyday word, ಬೆಕ್ಕು (*bekku*), comes from a **different** ancient root (related to the word for "wildcat"); Telugu's, పిల్లి (*pilli*), comes from yet **another** separate Proto-Dravidian root, most likely the very source behind Sanskrit's *biḍāla* and Hindi's *billī*. Tamil itself even keeps **rarer, alternate** cat-words — பில்லி and வெருகு — cognate with Telugu's and Kannada's everyday choices respectively, showing that all three roots were once available across the family; each language just settled on a different one as its everyday word.

Your turn

Say these aloud:

- "nāy" — dog, solid native Dravidian, no mystery anywhere
- "pūnai" — cat, Tamil's everyday word, matching Malayalam
- the honest split — Kannada's bekku and Telugu's pilli come from two other, separate ancient roots

Before you move on

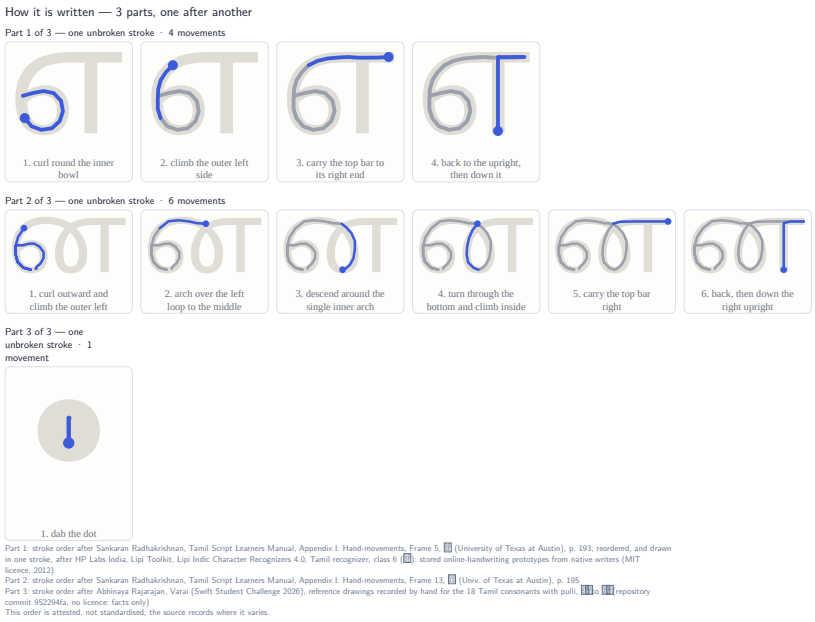

Is நாய் a mystery word, like Spanish's *perro*, English's *dog*, or Hindi's *kuttā*? (**No** — a solid, undisputed native Dravidian root, shared with Kannada and Malayalam.) Does பூனை share a root with Kannada's *bekku* or Telugu's *pilli*? (**No** — all three are

genuinely separate ancient Dravidian roots; Tamil even keeps rarer alternate cat-words, *pilli* and *veruku*, echoing both of them.) Which Dravidian cat-word is most likely the source of Sanskrit's *biḍāla* and Hindi's *billī*? (**Telugu's pilli**.)

21.2 என் — the third vowel that opens a word

You know the rule already: a Tamil word that opens on a vowel opens with a **full vowel letter**, never a sign. You have seen it twice — ஆ in *ām*, இ in *illai*. Here is the third, in a word you have been saying since chapter 2.

Script you'll notice: எ

How என் *is written, part by part, stroke by stroke*

எ is the independent letter for short *e*. Same job as ஆ and இ, one more vowel along.

ஆ	opens *āṁ*
இ	opens *illai*
எ	opens *en̲*

Three words, three different vowels, one rule doing the work each time. That is what makes the rule worth having: you did not need to be told about எ separately, only that word-initial vowels get a full letter.

> Read எ. The strip writes எ, ன and the puḷḷi in turn, numbered movement by movement, with each source beneath it.

Script you'll notice: build the word

piece		
எ	*e*	independent — the word opens on a vowel
ன்	bare *n̲* — ன under a puḷḷi	the alveolar *n*, from நன்றி

எ · ன் → என்

Two pieces, and you have met both halves before: the alveolar ன is the middle one of Tamil's three *n*'s, and the dot on top is the same puḷḷi that closes வணக்கம்.

Your turn

- *Read it:* எ — then என்
- *Say it:* "en̲" — "my"
- *Contrast:* ஆம் · இல்லை · என் — three words, three opening vowels

Before you move on

Read என். Why does it open with a full எ rather than a sign? (**The word starts on a vowel** — there is no consonant to hook onto.) Which vowel opens இல்லை? (இ.) What is the dot doing on ன்? (**Removing the built-in *a***, leaving a bare *n̲*.) Next: green

and yellow, and a colour word the whole Dravidian family shares.

Chapter 22

Green and Yellow

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can say green and yellow in Tamil, recognise பசுப்பு as a rarer doublet, and keep the pan-Dravidian root separate from the independent one.
>
> *Say* பச்சை *as the pan-Dravidian green,* மஞ்சள் *as a separate native yellow, and* பசுப்பு *as the rarer doublet beside them.*

22.1 பச்சை, மஞ்சள் — closing the Dravidian arc, holding both patterns at once

> You've now seen three different Dravidian answers to "how do green and yellow relate": Kannada split them apart, Telugu fused them into one root, Malayalam kept them as two separate native words. Tamil, it turns out, quietly contains a trace of **both** of the last two patterns.

You'll want to know: பச்சை — the familiar pan-Dravidian green

பச்சை (**paccai**, "**green**") ← **Proto-Dravidian **pac-*** — the same root you've now met four times: Kannada's *hasiru*, Telugu's *pacca*, Malayalam's *paccha*, and now Tamil's own *paccai*.

In the family, and next door

	word	same root
Kannada	ಹಸಿರು, ಹಳದಿ (*hasiru haḷadi*)	
Telugu	పచ్చ, పసుపు (*pacca pasupu*)	
Malayalam	പച്ച, മഞ്ഞ (*pacca, mañña*)	yes
Hindi (neighbour)	हरा (*harā*)	
English	green and yellow	

The word, taken apart — its roots and family

மஞ்சள் (**mañcaḷ**, "**yellow, turmeric**") is Tamil's actual, everyday word for yellow — and it comes from a **completely separate** native Dravidian root, matching Malayalam's മഞ്ഞ/മഞ്ഞൾ (*mañña*/*mañña*ḷ) closely. Like Malayalam's pair, this root has no Sanskrit involvement — it sits alongside *paccai*, not descended from it.

The word, taken apart — its roots and family

The **Tamil Lexicon** also records பசுப்பு (**pacuppu**, "**greenish yellow**") — a genuine **doublet** of *paccai* itself, from the same ***pac-*** root, matching Telugu's *pasupu* closely. Unlike Telugu, though, this doublet is **not** Tamil's everyday word for yellow — that job belongs to *mañcaḷ*; *pacuppu* survives mainly as a dictionary-recorded shade word. So Tamil alone holds a trace of **both** patterns at once: a *pac-* doublet sitting quietly in the dictionary (Telugu's pattern), next to a separate, dominant root doing the everyday work (Malayalam's pattern).
(Note for the Tamil-speaking reviewer: *pacuppu*'s everyday currency is the part I'm least certain of — please confirm whether it's a word you'd recognize as "greenish yellow," or whether it reads as archaic/purely literary in the Tamil you'd teach first.)

Your turn

Say these aloud:

- "பச்சை" — green, the pan-Dravidian *pac- word*
- "மஞ்சள்" — yellow, Tamil's real everyday word, a separate root

- "பசுப்பு" — a rarer doublet of paccai, echoing Telugu's pattern

Before you move on

What is Tamil's everyday word for yellow, and is it related to **paccai**? (மஞ்சள், *mañcaḷ* — **no**, a completely separate native root, matching Malayalam's *mañña/mañña*ḷ.) What rarer Tamil word IS a doublet of *paccai*, from the same *pac-* root? (பசுப்பு, *pacuppu*, "greenish yellow" — echoing Telugu's *pacca/pasupu* pattern.) Does any one pattern hold across all four major Dravidian languages? (**No** — Kannada splits native/loan, Telugu fuses one root, Malayalam keeps two separate roots, and Tamil turns out to hold traces of both Telugu's and Malayalam's patterns at once.)

Chapter 23

Day

Modes: 🚗 **voice** (2) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can use நாள் as the everyday word for day and keep தினம் for the formal compounds where it actually belongs.
>
> *Say mūṉṟu nāḷ for three days and sutantira tiṉam for Independence Day, classifying each as everyday-native or formal-Sanskrit.*

23.1 நாள் (nāḷ) — "day," the one this arc's Dravidian languages didn't lose

Two from the animal and colour lessons first. Is everyday *mañcaḷ*, yellow, borrowed from Sanskrit? (**No** — it is its own native root; the rare *pacuppu* is the one that shares *paccai*'s root.) Do Kannada and Telugu name the cat with Tamil's *pūnai*? (**No** — *bekku* and *pilli* come from separate roots.)

You've now seen three Dravidian languages reach for a loanword — Sanskrit, twice, and Persian once — to name their everyday word for "day." Tamil doesn't. This lesson is about the one that didn't.

The word, taken apart — its roots and family

நாள் (**nāḷ**) — "**day**" — is native **Dravidian**, from **Proto-Dravidian** ****nāḷ***. You've already met it, hiding inside நாளை (*nāḷai*, "tomorrow," Chapter 4). But here's the honest headline of this lesson:

நாள் isn't a survivor clinging to one narrow sense the way some native Dravidian words are — it is simply Tamil's **plain, everyday, unmarked** word for counting a day, as ordinary as மூன்று நாள் (*mūn̲ru nāḷ*, "**three days**").

In the family, and next door

	word
Kannada	ದಿನ (*dina*)
Telugu	రోజు (*rōju*)
Malayalam	ദിവസം (*divasaṁ*)
Hindi (neighbour)	दिन (*din*)
English	day

Your turn

Say these aloud:

- "nāḷ" — "day," native Dravidian, already met inside "tomorrow"
- "mūn̲ru nāḷ" — three days

Before you move on

Where did you already meet நாள் before this lesson? (Inside நாளை, *nāḷai*, "tomorrow," Chapter 4.) Is Tamil's everyday day-word a loanword? (**No** — நாள் is native Dravidian.) Is it marginal or literary? (**No** — it is the plain everyday counting word.) Next: compare the other sisters' borrowed day-words and Tamil's formal *tin̲am*.

23.2 நாள் and தினம் — everyday native, formal borrowed

Nāḷ is plainly native and everyday. Put that lexical choice beside the other Dravidian tracks.

You'll want to know: Four everyday day-words

- Kannada **dina** — Sanskrit tatsama

- Telugu **rōju** — Persian loan
- Malayalam **divasam** — Sanskrit tatsama
- Tamil **nāḷ** — native Dravidian

Tamil is the only one here whose unmarked everyday counting word remains native.

You'll want to know: Tamil still has தினம்

தினம் (*tiṉam*) is the same Sanskrit *dina* as Kannada/Malayalam, ultimately from PIE ***dyew-***, "shine," also behind Latin *diēs*. Tamil assigns it formal and compound work: சுதந்திர தினம், "Independence Day," and தினசரி, "daily." Casual counting remains *nāḷ*.

The language did not reject the loan; it gave native and borrowed forms different jobs.

Your turn

- *Say it:* "mūṉṟu nāḷ" — three days
- *Say it:* "sutantira tiṉam" — Independence Day
- *Sort:* everyday native · formal/compound Sanskrit

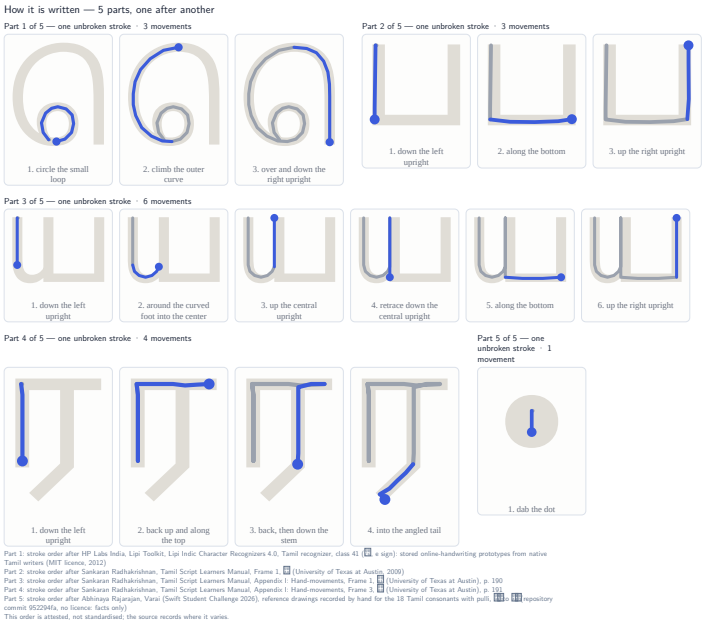

Before you move on

Which track alone keeps a native everyday day-word? (**Tamil**.) Where does *tiṉam* appear? (**Formal compounds**.) Is it unrelated to Kannada *dina*? (**No** — it is the same Sanskrit tatsama.)

23.3 பெயர் — a sign that waits on the left

One vowel sign you have met does something strange: ◌ெ stands to the **left** of its consonant and is spoken **after** it. That was not a one-off. Here is a second sign with the same habit.

Script you'll notice: ப and ய

How பயர் *is written, part by part, stroke by stroke*

Two consonants, each carrying its built-in *a* like every other:

ப	*pa*
ய	*ya*

Read both. The strip writes the whole word in written order, பி first, numbered movement by movement, with each source beneath it.

Script you'll notice: the பி sign

பி is the sign for *e*, and **it is written to the LEFT of its consonant and pronounced after it** — exactly what மை does.

ப + பி → பப, and on the page the hook stands *before* the ப — yet you say *pe*, not *ep*.

So the left-standing signs are a family, not an exception you have to remember one member at a time. Compare the three vowel signs you now hold:

sign	sound	where it sits
◌ி	*i*	above and to the right
◌ை	*ai*	to the **left**, spoken after
◌ெ	*e*	to the **left**, spoken after

Both halves of that are sourced. The description of ◌ை reads *"a double hook written BEFORE (to the left of) the consonant, though pronounced after it"*, and ◌ெ has its own entry, cited to a Tamil script manual: the sign for short *e* is always placed before the letter it belongs to.

Script you'll notice: build the word

piece		
பெ	*pe* — ப with the ◌ெ sign on its left	this lesson
ய	*ya*	this lesson
ர்	bare *r* — ர under a puḷḷi	ர from சரி

பெ · ய · ர் → பெயர்

Three pieces for a word you have used since chapter 2 without once needing to read it. That is the point of the order: the word came first, and the letters are catching up to a word you already own.

Your turn

- *Read it:* ப · ய — then பெ — then பெயர்
- *Say it:* "peyar" — "name"
- *Read it:* என் பெயர் — "my name," both words, straight off the page
- *Contrast:* றி and பெ — the ◌ி sign follows, the ◌ெ sign precedes

Before you move on

Read பெயர். Which side of its consonant does ெ sit on, and when is it spoken? (**The left**, and **after** — like னை.) Name the other left-standing sign you know. (னை, as in இல்லை.) Read என் பெயர் and say what it means. (**"My name"** — எ opens on a vowel, ர் closes on a bare *r*.) Next: the word for night.

Chapter 24

Night

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can use இரவு for night and இருள் for darkness without collapsing the two, and treat the claim that ராத்திரி is the more colloquial word as a claim still to be tested.
>
> *State the source's rāttiri claim with its hedge intact, set it against native regional usage, and hold iravu and iruḷ apart.*

24.1 இரவு (iravu) — "night," and a register question worth a native speaker's ear

> Last lesson, Tamil's native day-word had no real competition. This lesson's honest twist, hedged carefully, is that "night" may not tell the same story — and this is exactly the kind of claim worth checking against your own ear, not just a dictionary's.

You'll want to know: இரவு — already standing on its own, inside "midnight"

இரவு (**iravu**) — "**night**" — is native **Dravidian**, from **Proto-Dravidian** ****cira*** ("darkness"). You've technically already met it standing fully on its own: Chapter 17, while explaining நள்ளிரவு (*naḷḷiravu*, "midnight," நள் + இரவு), noted directly that இரவு itself is a word every Tamil speaker still uses on its own. This lesson gives it its own full chapter.

In the family, and next door

	word
Kannada	ರಾತ್ರಿ (*rātri*)
Telugu	రాత్రి (*rātri*)
Malayalam	രാത്രി (*rātri*)
Hindi (neighbour)	रात (*raat*)
English	night

The word, taken apart — its roots and family

Tamil also keeps ராத்திரி (**rāttiri**), a Sanskrit **tatsama** from रात्रि (*rātri*) — the same word that surfaces, as a tatsama, in Kannada's *ratri* and Telugu's *ratri*. It traces to **Proto-Indo-European **h₁reh₁-*** ("**to rest**"), a **completely different** root from Latin *nox*'s ****nókʷts*** — the same specific comparison already drawn for Hindi's *raat* and Malayalam's *rāthri*, now a third confirmation, same false-cognate pattern, same honest non-relationship to *nox*.

Your turn

Say these aloud:

- "iravu" — "night," native, already met inside naḷḷiravu
- "rāttiri" — Sanskrit loan, same PIE *h₁reh₁- already drawn for Hindi and Malayalam, NOT related to Latin nox*

Before you move on

Where did you already meet இரவு before this lesson? (Inside நள்ளிரவு, *naḷḷiravu*, "midnight," Chapter 17.) Does ராத்திரி's PIE root match Latin *nox*'s? (**No** — ****h₁reh₁-*** "to rest," the same false-cognate pattern already drawn for Hindi and Malayalam.) Next: treat the proposed register split as a hypothesis and keep "darkness" separate from "night."

24.2 Night words — a register hypothesis and a semantic boundary

Iravu is native and *rāttiri* borrowed. That alone does not tell you which one conversational Tamil prefers.

Why it's said this way

At least one dictionary says ராத்திரி is more common colloquially, implying native இரவு may lean literary/written. If accurate, this reverses the day story, where native *nāḷ* is uncontested everyday speech. But the evidence is limited and dictionary-level. Treat this as a prompt for a native speaker's ear, not settled fact. Register judgments require real usage, region, and setting—not a purity assumption about native versus borrowed words.

You'll want to know: Darkness is a different word

இருள் (*iruḷ*) means **darkness**, from Proto-Dravidian ***cirVḷ*** and cognate with Kannada, Telugu, and Malayalam forms. It is not *iravu* "night as a time period", but the two are not strangers: DEDR 2552 files *iruḷ* and *iravu* in one entry.

Your turn

- *Qualify:* "one source says *rāttiri* is more colloquial"
- *Ask:* compare that claim with native regional usage
- *Contrast: iravu* night · *iruḷ* darkness

Before you move on

Is the *rāttiri* register claim settled? (**No** — limited sourcing, worth checking against native usage.) Is இருள் interchangeable with இரவு? (**No** — darkness versus a time period, though DEDR files them in one entry.)

Chapter 25

Good Night

Modes: **voice** (1) **eyes** (1) **pen** (1) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can say good night in Tamil out of roots I already own, and trace every one of those forms back to நல்.
>
> *Say nalla iravu and iravu vaṇakkam, run nal- forward into nalam, naṉṟi and nalla, say which shared Sanskrit good-night phrase Tamil does without, then read* நான் *and say where the* ◌ா *sign sits.*

25.1 இனிய இரவு (iṉiya iravu) — "good night," and Tamil breaking the pattern one more time

Hindi, Kannada, Telugu, and Malayalam all reached for the same Sanskrit phrase to say "good night." This lesson closes the arc with the one that didn't — and it's a pattern you've actually seen from Tamil before, all the way back in Chapter 1.

The word, taken apart — its roots and family

இனிய இரவு (**iṉiya iravu**) — "**good night**" — literally "**sweet, pleasant night**." இனிய (*iṉiya*, "sweet, pleasant, dear") is native **Dravidian**, from **Proto-Dravidian **in-*** ("sweet") — the same root behind இனிப்பு (*iṉippu*, "sweet, dessert"). Paired with இரவு (*iravu*, "night," already met last lesson), the whole phrase is built from Tamil's own word-stock, start to finish.

In the family, and next door

	word
Kannada	ಶುಭ ರಾತ್ರಿ (*śubha rātri*)
Telugu	శుభ రాత్రి (*śubha rātri*)
Malayalam	ശുഭ രാത്രി (*śubha rātri*)
Hindi (neighbour)	शुभ रात्रि (*śubh rātri*)
English	good night

Why it's said this way

Tamil's Dravidian sisters and Hindi all reached for the **same** Sanskrit phrase: Hindi's शुभ रात्रि, Kannada's ಶುಭ ರಾತ್ರಿ, Telugu's శుభ రాత్రి, Malayalam's ശുഭ രാത്രി — all four built from the identical tatsama pair, **śubh** ("to be beautiful") + **rātri** ("night"). Tamil's standard phrase reaches for **none** of that — no śubha-descended "good night" turned up as a commonly used Tamil form in the phrasebook sources checked for this lesson. Instead, Tamil built its own phrase from its own vocabulary.

Your turn

Say these aloud:

- "iṉiya iravu" — "good night," literally "sweet night," fully native
- the pattern it breaks — every other language this arc shares one Sanskrit śubh(a) rātri phrase; Tamil doesn't

Before you move on

What does இனிய இரவு literally mean, and what root does இனிய come from? ("**Sweet/pleasant night**" — Proto-Dravidian ***in-***, "sweet.") Does Tamil's "good night" share the same Sanskrit śubha rātri phrase as Hindi, Kannada, Telugu, and Malayalam? (**No** — no such form turned up in the sources checked for this lesson; Tamil's standard phrase is fully native, breaking the pattern shared by all four other languages.) Next: the ◌ா sign, and reading நான் off the page.

25.2 நான் — the sign that stands after

Two places a vowel sign has sat so far: ி goes above and to the right, ை and ெ go to the left. Here is the third place, and it is the one you would have guessed first.

Script you'll notice: the ா sign

How நான் *is written, part by part, stroke by stroke*

ா is the sign for long *ā*, and this book's script data describes it plainly: **a vertical stroke with a small top hook, written after the consonant.**

ம + ா → மா, said *mā*.

That pairing is the example the data itself gives, on a letter you can already draw.

So the three positions, all seen now:

sign	sound	where it sits
◌ா	*ā*	**after** the consonant
◌ி	*i*	above and to the right
ை◌	*ai*	to the left, spoken after
ெ◌	*e*	to the left, spoken after

Notice also that ஆ, the independent long *ā* that opens a word, and ◌ா, the sign, carry the same lengthening. One is a letter standing on its own; the other hangs off a consonant.

Script you'll notice: build the word

piece		
நா	*nā* — ந with the ◌ா sign after it	ந drawn in நன்றி
ன்	bare *n̲* — ன under a puḷḷi	ன drawn there too, the alveolar *n*

நா · ன் → நான்

Two pieces and one new mark. நான் is "I," and its possessive is the என் ("my") you read in chapter 21 — so *nān̲* and *en̲* now both come off the page.

Your turn

- *Read it:* மா — then நா — then நான்
- *Say it:* "nān̲" — "I"
- *Contrast:* நா · றி · பெ — a sign after, a sign above-right, a sign before
- *Contrast:* ஆம் and நான் — the same long *ā*, once as a letter and once as a sign

Before you move on

Read நான். Where does ◌ா sit relative to its consonant? (**After it** — a vertical stroke with a small top hook.) Which of Tamil's three *n*-letters closes the word, and what is the dot doing? (ன, the

alveolar one; the puḷḷi **removes its built-in *a***.) Next: good night, out of roots you already own.

25.3 நல்ல இரவு and இரவு வணக்கம் — old roots recombined

Tamil's native "sweet night" repeats the lexical choice that opened this book: build greetings from its own roots rather than the shared Sanskrit formula.

You'll want to know: The Chapter 1 echo

வணக்கம் comes from native *vaṇaṅku*, "bow," while neighboring greetings use Sanskrit *namas-*. At the other end of the day, இனிய இரவு is native while the same neighbors share Sanskrit *śubha rātri*.

Tamil also keeps two transparent alternatives:

- நல்ல இரவு — "good night," using *nalla*, from the **nal-** "good" root already inside *nalam* and *naṉṟi*
- இரவு வணக்கம் — "night greetings," especially for close friends/ family, recombining two fully known words

The learner does not memorize isolated formulas; known roots generate options.

Your turn

- *Say it:* "nalla iravu" — good night
- *Say it:* "iravu vaṇakkam" — night greetings
- *Trace it: nal- → nalam / naṉṟi / nalla*

Your turn — the pattern it breaks

- Hindi, Kannada, Telugu and Malayalam share one "good night." Which? (***śubha rātri*** — Sanskrit *śubh* + *rātri*.) Does Tamil's standard phrase use it? (**No** — none turned up in the sources checked; Tamil built its own.)

Script — ◌ா and நான்

- *Read it:* மா — then நா — then நான்
- *Point to:* the ◌ா sign, then the pul̤l̤i

Where does ◌ா sit? (**After** its consonant.) Which *n* closes நான்? (ன, the alveolar one, its *a* removed by the pul̤l̤i.)

Before you move on

Which root builds நல்ல? (**Nal-**, good.) What two known words make இரவு வணக்கம்? (**Night + greetings**.) What lexical pattern connects Chapter 1 and this chapter? (**Tamil keeps native greeting roots where neighbors share Sanskrit formulas**.)

Chapter 26

Morning

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can say காலை for morning and state accurately that its origin is uncertain, rather than asserting a Sanskrit source the dictionary itself only hedges at.
>
> *Say kālai, repeat the source's own "possibly" instead of dropping it, and read atikaalai as a transparent ati- plus kālai compound.*

26.1 காலை (kālai) — "morning," an honestly uncertain etymology

Tamil's neighbours each had a confidently-sourced story for their "morning" word — Sanskrit, or clearly native. Tamil's own word for morning is different: even Wiktionary itself isn't sure where it comes from.

The word, taken apart — its roots and family

காலை (**kālai**) — "**morning**" — has an etymology that Wiktionary itself only hedges at: "**possibly** from Sanskrit काल्य (*kālya*)." That's a real hedge from the source itself, not one this lesson is adding for caution's sake. Complicating things further: the related word கால் (*kāl*) carries **six** entirely distinct etymologies in Tamil — "leg/foot," "irrigation channel," "forest," "wind," a Sanskrit-derived "time" sense, and a conjunction meaning "if, when" — and காலை may be an accusative-type form built on the "time" sense specifically, or may not be. Be honest: this is genuinely **less settled** than Kannada's

confidently-native morning word or Telugu's confidently-Sanskrit one. Don't manufacture certainty the primary source itself doesn't have.

In the family, and next door

	word
Kannada	ಬೆಳಗ್ಗೆ (*beḷagge*)
Telugu	ఉదయం (*udayam*)
Malayalam	രാവിലെ (*rāvile*)
Hindi (neighbour)	सुबह (*subah*)
English	morning

The word, taken apart — its roots and family

Wiktionary does confirm one solid fact: பகல் (already met, Chapter 17, "**daytime**") is listed as காலை's **coordinate term** — the two words sit side by side in the same semantic field, whatever காலை's deeper root turns out to be. And அதிகாலை ("**early dawn**") is confirmed, per the Tamil Lexicon, as a fully transparent compound: **ati-** ("excessive, very") + காலை, glossed simply as "early dawn" by the Tamil Lexicon.

Your turn

Say these aloud:

- "kālai" — "morning," an honestly uncertain etymology
- the hedge itself — Wiktionary says "possibly" Sanskrit kālya, not a confident claim
- "atikaalai" — "early dawn," a transparent ati- + kālai compound

Before you move on

Is காலை's etymology as confidently sourced as Kannada's or Telugu's morning words? (**No** — Wiktionary itself only says "possibly" Sanskrit kālya; genuinely uncertain, not settled.) What coordinate term does Wiktionary list alongside காலை? (பகல், "daytime," already met in Chapter 17.) What does அதிகாலை literally build on? (**ati-** ("very") + காலை — a transparent compound for "early dawn.")

Chapter 27

Evening

Modes: **voice** (1) **pen** (2) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can say மாலை for evening and keep it apart from the identically spelled garland word, which is a separate etymology rather than a second sense.
>
> *Complete TA-C27-checkpoint, the chapter's closing checkpoint: say mālai for evening, keep the garland mālai apart as a separate etymology and mark the darkness link as unproven, read* நீங்கள் *from its pieces, then write* நீ, நீங்கள் *and* மாலை *from sound.*

27.1 மாலை (mālai) — "evening," and a garland that only looks like the same word

Last lesson's morning word had an uncertain origin. This evening word is different — confidently native — but it comes with its own honest twist: it looks exactly like a completely unrelated word.

The word, taken apart — its roots and family

மாலை (**mālai**) — "**evening**" — happens to be spelled identically to another, completely **unrelated** Tamil word: மாலை meaning "**garland, wreath, necklace**." Wiktionary treats these as **two separate etymologies**, not one word with two senses. The garland sense traces to Old Tamil and is compared to Sanskrit माला (*mālā*) — with a genuinely interesting note: it's "**probably borrowed FROM Dravidian languages**" **into** Sanskrit, not the other way around. A

rare reverse-direction loan, worth noticing against this whole project's usual Sanskrit-into-Dravidian pattern.

In the family, and next door

	word
Kannada	ಸಂಜೆ (*sañje*)
Telugu	సాయంత్రం (*sāyantram*)
Malayalam	വൈകുന്നേരം (*vaikunnēraṁ*)
Hindi (neighbour)	शाम (*shaam*)
English	evening

The word, taken apart — its roots and family

The **evening** sense of மாலை is a **separate** Old Tamil word entirely, compared instead to மால் (*māl*) — which Wiktionary traces to **Proto-Dravidian **mā/*māl***, with senses including "கருமை" ("**blackness, darkness**"), plus archaic senses of "illusion, confusion" and, as a proper noun, the Hindu deity **Vishnu**. Be honest about the exact mechanism here: Wiktionary's own etymology for "evening" only says "**compare māl**" — it does **not** explicitly state that "evening" derives specifically from the **darkness** sense rather than some other sense of this multi-meaning root. The connection (evening = the time it grows dark) is natural and plausible, but not nailed down with full certainty by the source itself. What IS certain: this is confidently **native** Dravidian vocabulary, a genuine contrast with TA-C26's uncertain காலை.

Your turn

Say these aloud:

- "mālai" — "evening," confidently native Dravidian vocabulary
- the homonym twist — a completely separate word, mālai, means "garland," probably borrowed INTO Sanskrit from Dravidian
- the honest hedge — "evening" plausibly connects to māl's "darkness" sense, but Wiktionary doesn't spell out that exact link

Before you move on

Are evening-mālai and garland-mālai the same word with two meanings? (**No** — Wiktionary treats them as two entirely separate etymologies; a genuine homonym, not one word stretched.) Which direction did the garland sense's Sanskrit connection likely travel? (**Dravidian into Sanskrit** — a reverse-direction loan, per Wiktionary's own "probably borrowed from Dravidian languages" note.) Is it fully certain that "evening" derives from māl's "darkness" sense specifically? (**No** — plausible and natural, but Wiktionary only says "compare māl," without spelling out that exact mechanism.)

27.2 நீங்கள் — two old promises, paid

This book owes you two letters: the nasal in ங்க, printed before you knew what it was, and one of the three *l*-letters it promised. Both come due in one word.

Script you'll notice: ங and ள

ங	*ṅa* — the nasal made where க is made, the *ng* of "sing"
ள	*ḷa* — the retroflex *l*

ங is the reason க softens: in ங்க the nasal comes first — the "after a nasal" rule from your first writing lesson, with a face on it.

ள is the retroflex one of Tamil's three *l*-letters — ல ள ழ. You met ல in இல்லை; ழ still lies ahead. Retroflex: the tongue curls back, as for ண.

> Read both. The strip writes the whole word, numbered movement by movement, with each source beneath it. ள's own entry gives the tongue curled back; ங's place is this lesson's own, since the data says nothing about where க is made.

Script you'll notice: the ீ sign

ீ is the long partner of the ி you hooked onto ற in நன்றி — the same short/long pairing அ and ஆ have.

> ந + ீ → நீ, said *nī*, the familiar "you."

The data describes ி and has no entry for ீ, so the pairing is stated from the pattern, not from a source.

Script you'll notice: build the word

piece		
நீ	*nī* — ந with the ீ sign	"you," familiar
ங்	bare *ṅ* — ங under a puḷḷi	this lesson
க	*ka*, softened to *ga* by the nasal in front of it	from வணக்கம்
ள்	bare *ḷ* — ள under a puḷḷi	this lesson

> நீ · ங் · க · ள் → நீங்கள்

The middle two are the ங்க you were shown when க was new and ங unreadable. நீங்கள் is the respectful "you" — நீ plus a plural ending — so the shorter word sits inside the longer one.

Your turn

- *Read it:* நீ — then ங்க — then நீங்கள்
- *Say it:* "nī" … "nīṅgaḷ" — familiar, then respectful
- *Contrast:* றி and நீ — the short *i* sign and the long *ī* sign
- *Contrast:* ல and ள — the first two of the three *l*-letters

Before you move on

Read நீங்கள், then find the shorter நீ inside it. Why does the க in the middle sound like *g*? (ங் stands in front of it — a nasal.) How many *l*-letters does Tamil keep, and which is ள? (**Three** — ல ள ழ; the **retroflex** one.) What are the two dots doing? (**Removing the built-in *a*** from ங and ள.) Next: the afternoon word.

27.3 Chapter 27 checkpoint — evening, and நீங்கள் from sound

Nothing new here. The evening word out loud first, then the respectful *you* and the evening word on the page.

And one from the morning lesson: what is *atikālai* built from? (*Ati-*, "very," plus *kālai* — **early dawn**.)

Your turn — the evening word

- *Say it:* "evening" in Tamil

(*Mālai.*)

- Is the garland *mālai* the same word with a second meaning? (No: two separate etymologies that happen to be spelled alike.)
- Which way did the garland word likely travel? (From Dravidian into Sanskrit *mālā*: a loan in the reverse of the usual direction.)

- Is it certain that evening *mālai* comes from *māl*'s "darkness" sense? (No: it is plausible, but the source only says "compare *māl*".)

Script — ங, ள and ீ

- Which four pieces build நீங்கள்? (நீ · ங் · க · ள்.)
- Why does the க in the middle sound like *g*? (ங், a nasal, stands in front of it.)
- Which of the three *l*-letters is ள? (The retroflex one, tongue curled back.)
- How does ீ differ from ி? (It is the long *ī*: நீ is *nī*, where றி is *ṟi*.)

Read it: நீங்கள் aloud, then find நீ inside it

Writing — from sound

Cover: the Script block above, so no model stays in view

Write it: *nī*, then *nīṅgaḷ*, the respectful "you"

Write it: *mālai*, "evening" — the ai sign goes before its letter on the page

Check: against the key — நீ, நீங்கள், மாலை

Write it: one repaired shape, then stop

Before you move on

You have written மாலை. Can the page alone tell you whether it means evening or garland? (No: only the context can.) That is the chapter: one spelling, two words, and the respectful *you* read from its pieces.

Next chapter: the afternoon word.

Chapter 28

Afternoon

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can say பிற்பகல் for afternoon, read it as "after" plus "daytime," and name exactly where the dictionary's own noon and afternoon labels overlap.
>
> *Show naṭuppakal straddling noon and afternoon, place matiyam as a Sanskrit noon-word, and label the unsourced moon claim unsupported.*

28.1 பிற்பகல் (pir̲pakal) — "afternoon," a similar sandhi trick to நண்பகல்

You already met a sandhi-driven surface change in Chapter 17 — நள் resurfacing as நண். This lesson's afternoon word does a similar kind of trick, with a different word — though be honest that the two changes aren't identical.

You'll want to know: பிற்பகல் — பின் (after) + பகல் (daytime), a similar sandhi story

பிற்பகல் (**pir̲pakal**) — "**afternoon**" — is a transparent compound: பின் (*piṉ*, "**after**") plus பகல் (*pakal*, "**daytime**," already met inside நண்பகல், TA-C17 — though be aware the பிற்பகல் Wiktionary page itself glosses பகல் as "noon" in its own etymology line, a small inconsistency across Wiktionary's own entries, not something this lesson introduces). Here's the familiar pattern: பின் doesn't stay பின் in this compound — it surfaces as பிற்- before the following ப — a **similar** kind of consonant

sandhi to the one already taught in Chapter 17, where நள் became நண் before its own following ப. Be honest, though: Wiktionary's own etymology for பிற்பகல் doesn't discuss this mechanism at all, and the two changes move in different phonetic directions (nasal→stop here, lateral→nasal there) — this is the lesson's own observation, not a sourced equivalence. Wiktionary labels this word **formal register**.

In the family, and next door

	word
Kannada	ಅಪರಾಹ್ನ (*aparāhna*)
Telugu	మధ్యాహ్నం (*madhyāhnam*)
Malayalam	ഉച്ചകഴിഞ്ഞ് (*uccakaḻiññŭ*)
Hindi (neighbour)	दोपहर (*dopahar*)
English	afternoon

The word, taken apart — its roots and family

பிற்பகல் (*piṟpakal*) is a native compound of *piṉ*, "after, behind" (DEDR 4205; Malayalam *pin*, Kannada *pin*), and *pakal*, "daytime" (DEDR 3805; Malayalam *pakal*).

Your turn

Say these aloud:

- "piṟpakal" — "afternoon," piṉ ("after") + pakal ("daytime")
- the sandhi echo — piṉ surfaces as piṟ-, a similar kind of change to TA-C17's naḷ→naṇ, though not phonetically identical

Before you move on

What does பிற்பகல் literally build from, and what sandhi change happens to the first piece? (பின் "after" + பகல் "daytime" — பின் surfaces as பிற்-, a similar kind of sandhi to TA-C17's naḷ→naṇ, though the two changes move in different phonetic directions, not identical mechanisms.) What register does the fetched page label? (**Formal**.) Next: inspect the real noon/afternoon boundary blur and the separate *matiyam* root.

28.2 Noon or afternoon? — let the sources keep their blur

Piṟpakal transparently says after-daytime. Dictionaries still do not draw a perfectly hard semantic boundary around its synonyms.

You'll want to know: நடுப்பகல் overlaps

Wiktionary's *piṟpakal* page lists நடுப்பகல் as an afternoon synonym, while the earlier noon lesson documents the same word as a synonym of நண்பகல், "noon." This is genuine noon/afternoon boundary blur, not an inconsistency to erase. Time-period categories can widen differently across speakers and sources.

The word, taken apart — its roots and family

மதியம் (*matiyam*) is a Sanskrit tatsama from *madhya*, "middle," the same root used by Kannada and Telugu. The fetched entry gives it **noon**, a synonym of *naṇpakal*, not a dedicated afternoon meaning. An initial search summary claimed *matiyam* once meant "moon," but that claim is absent from the actual fetched page. It is therefore **not asserted**. Source inspection outranks a search snippet.

Your turn

- *Say it: naṭuppakal* can overlap noon and afternoon
- *Say it: matiyam* — Sanskrit *madhya*, "middle," listed as noon
- *Label:* the moon claim unsupported

Before you move on

Does the source draw a hard noon/afternoon line? (**No**.) What is *matiyam*'s sourced root and sense? (Sanskrit ***madhya***, "middle," and **noon**.) Is "originally moon" confirmed? (**No**.)

Chapter 29

Good Morning

Modes: 🚗 **voice** (1) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can greet someone with காலை வணக்கம் before mid-morning and see it as காலை plus the வணக்கம் I already had, with no borrowed blessing-word in it.
>
> *Greet with kālai vaṇakkam from sunrise to about 11, naming its two known pieces and the borrowed word that is absent.*

29.1 காலை வணக்கம் — "morning greetings"

> Tamil's neighbours each built "good morning" on a word meaning "good" or "auspicious." Tamil does something completely different: it just puts its everyday greeting word after its word for "morning."

You'll want to know: காலை வணக்கம் — literally, "morning greetings"

காலை வணக்கம் (**kālai vaṇakkam**) — "**good morning**" — is confirmed, by two independently-fetched sources, as Tamil's standard greeting for this time of day, used "**from sunrise until around 11 AM**." It's built from two words you already have: காலை (already met, Chapter 26, "**morning**") plus வணக்கம் (already met, Chapter 1, "**reverence, homage**" — Tamil's everyday word for "hello"). Literally: "**morning salutations**."

In the family, and next door

	word
Kannada	ಶುಭೋದಯ (*śubhōdaya*)
Telugu	శుభోదయం (*śubhōdayam*)
Malayalam	സുപ്രഭാതം (*suprabhātam*)
Hindi (neighbour)	सुप्रभात (*suprabhāt*)
English	good morning

The word, taken apart — its roots and family

Vaṇakkam is native, from the verb "to bow" (DEDR 5236). *Kālai*, "morning", looks native too, but DEDR has no entry for it, and its origin is uncertain.

Why it's said this way

Here's the honest structural surprise: Hindi, Kannada, Telugu, and Malayalam each build their morning greeting on a **śubha**-equivalent word ("good, auspicious") plus a time-word. Tamil does something genuinely **different** — there's no "good/auspicious" word here at all. It's simply வணக்கம், Tamil's own general greeting, specified with காலை in front of it to mean "morning" greetings specifically. Also be honest about a claim that didn't hold up: an initial search summary suggested a Sanskrit-borrowed word, "suprabhatham," serves as a casual alternative — but that claim appears on **neither** of the two pages actually fetched, so it's deliberately **not** asserted here.

Your turn

Say these aloud:

- "kālai vaṇakkam" — "good morning," literally "morning greetings"
- the honest structural surprise — no śubha-equivalent word here at all, unlike Tamil's neighbours
- the two pieces you already know — kālai (Chapter 26) + vaṇakkam (Chapter 1)

Before you move on

- What two known words build காலை வணக்கம்? (காலை, "morning" + வணக்கம், "reverence/hello.")
- Does it follow the śubha-equivalent + time-word pattern used by Hindi, Kannada, Telugu, and Malayalam? (**No** — காலை simply specifies Tamil's own general greeting, வணக்கம்.)
- Is "suprabhatham" confirmed as a casual alternative? (**No** — neither fetched source supports that claim, so this lesson does not assert it.)

29.2 எப்படி — the retroflex stop

You can read the first word of the question you have been asking since chapter 3. Here is the second, and it needs one new consonant.

Script you'll notice: ட

ட is *ṭa*, the retroflex *t* — the tongue curled back to the roof of the mouth. That is the same curl that makes ண a retroflex *n*, so hold the pair together: ட is that position stopped, ண is that position hummed through the nose.

Between vowels it softens toward *ḍ*, which is why டி in எப்படி is said *ḍi*. That is the position-picks-the-sound economy க and ச already showed you, now on a third letter.

Read it; do not draw it yet. ட has no entry in this book's script data, so it gets no stroke order — and both claims above are stated from sourced neighbours rather than from ட itself: the retroflex description leans on ண's, and the softening leans on the position-picks-the-sound note the data carries for க.

Script you'll notice: build the word

piece		
எ	*e*	the question vowel, from என்
ப்	bare *p* — ப under a puḷḷi	ப from பெயர்
ப	*pa*	the same letter again
டி	*ḍi* — ட with the ி sign	this lesson

எ · ப் · ப · டி → எப்படி

The doubled ப் + ப is held, like the க்க of *vaṇakkam* and the ல் + லை of *illai*. Tamil marks a long consonant by writing it twice, with the puḷḷi on the first.

Your turn

- *Read it:* டி — then எப்படி
- *Say it:* "eppaḍi" — "how"
- *Read it:* நீங்கள் எப்படி — two words of the question, straight off the page

Before you move on

Read எப்படி. Which letter you already knew shares ட's tongue position? (ண — the same curl back, stopped rather than nasal.) How does Tamil write the doubled *p*? (ப் + ப — the letter twice, puḷḷi on the first.) Read நீங்கள் again. Next: good evening.

Chapter 30

Good Evening

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can greet someone with மாலை வணக்கம் from late afternoon through nightfall, built on the same two-piece pattern as the morning greeting.
>
> *Greet with mālai vaṇakkam, assembling mālai plus vaṇakkam, and note the pattern was re-checked rather than assumed to carry over.*

30.1 மாலை வணக்கம் — "evening greetings"

> Last chapter's morning greeting followed its own pattern. This lesson checks whether the evening greeting follows the same one — rather than assuming it automatically does.

You'll want to know: மாலை வணக்கம் — the same compositional pattern, independently confirmed

மாலை வணக்கம் (**mālai vaṇakkam**) — "**good evening**" — is confirmed, by two independently-fetched sources, as a real, standard Tamil evening greeting, used roughly from **afternoon through nightfall** (the two sources give slightly different exact windows — "after noon through evening" versus "late afternoon until nightfall" — a small, unsurprising looseness, matching the noon/afternoon boundary-blur already seen in TA-C28). It's built exactly the same way as TA-C29's morning greeting: மாலை (already met, Chapter 27, "**evening**") plus வணக்கம் (already met, Chapter 1, Tamil's general greeting). Literally: "**evening salutations**."

In the family, and next door

	word
Kannada	ಶುಭ ಸಂಜೆ (*śubha sañje*)
Telugu	శుభ సాయంత్రం (*śubha sāyantram*)
Malayalam	ശുഭ സായാഹ്നം (*śubha sāyāhnam*)
Hindi (neighbour)	शुभ संध्या (*shubh sandhyā*)
English	good evening

The word, taken apart — its roots and family

Both words are native. *Mālai*, "evening", sits in DEDR 4781 among words for black and dark, beside Malayalam *māla*, "night, darkness"; *vaṇakkam* is from the verb "to bow" (DEDR 5236). The *mālai* that means "garland" is a different word.

Why it's said this way

Here's the honest methodological point: just because TA-C29's morning greeting followed the "time-word + vaṇakkam" pattern doesn't mean this evening greeting was assumed to follow it automatically. This arc has repeatedly found that greeting formation doesn't reliably generalize, even within the very same language — Malayalam's own morning greeting broke from the śubha+time-word pattern its afternoon and evening greetings both share, so "the pattern probably repeats" was never a safe assumption on its own. So this greeting was independently verified via direct fetch before confirming the pattern really does repeat here — and it does, cleanly: no śubha-equivalent word appears in Tamil's evening greeting either, same as the morning one.

Your turn

Say these aloud:

- "mālai vaṇakkam" — "good evening," literally "evening greetings"
- the two pieces you already know — mālai (Chapter 27) + vaṇakkam (Chapter 1)
- the honest methodological point — this pattern was re-verified, not assumed to carry over automatically

Before you move on

What two already-known words does மாலை வணக்கம் build from? (மாலை, "evening" + வணக்கம், "greetings.") Was it assumed that the evening greeting would follow the same pattern as the morning one, or was it independently checked? (**Independently checked** — via direct fetch, not assumed, since this arc has learned that greeting patterns don't reliably generalize.) Does மாலை வணக்கம் use a śubha-equivalent word, like Hindi/Kannada/Telugu/Malayalam's evening greetings do? (**No** — same as Tamil's morning greeting, no śubha-equivalent word appears here either.)

Chapter 31

Good Afternoon

Modes: **voice** (2) **pen** (1) **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can greet someone with மதிய வணக்கம் around midday and say which word the மதிய inside it actually comes from — noon, not afternoon.
>
> *Greet with matiya vaṇakkam, trace matiyam back to madhya "middle," and keep pirpakal as the separate after-plus-daytime word.*

31.1 மதிய வணக்கம் (matiya vaṇakkam) — a sourced afternoon greeting

You already know that Tamil's noon and afternoon boundaries can blur. Now learn one afternoon greeting without pretending that all speakers or teaching sources divide the day in exactly the same way.

The word, taken apart — its roots and family

மதிய வணக்கம் (**matiya vaṇakkam**) — "**good afternoon**" — is confirmed, by two independently-fetched sources, as Tamil's afternoon greeting, used roughly "**noon to around 4 PM**." A third source, already used for the morning and evening greetings, doesn't list a distinct afternoon greeting at all — it only covers "before noon" and "after noon through evening," implicitly treating those two as bookending the whole day. This is an honest extension of TA-C28's own noon/afternoon boundary-blur into the greeting layer, not a new

problem to worry about.
Use மதிய வணக்கம் when that afternoon slot fits the people and setting around you. Treat "noon to 4" as a useful learning window, not as a universal clock rule. The two words come from different places: *matiya* from Sanskrit *madhya*, "middle" (CDIAL 9804), and *vaṇakkam*, native, from the verb "to bow" (DEDR 5236).

In the family, and next door

	word

Malayalam	ശുഭ മധ്യാഹ്നം (*śubha madhyāhnaṁ*)
Hindi (neighbour)	शुभ दोपहर (*shubh dopahar*)
English	good afternoon, confirmed by two sources for roughly noon to 4 PM, while a third source does not teach a separate afternoon greeting

Your turn

Say these aloud:

- "matiya vaṇakkam" — "good afternoon," confirmed real, used roughly noon to 4 PM
- the honest qualification — one source does not teach a separate afternoon greeting at all

Before you move on

What is one sourced Tamil greeting for "good afternoon"? (**மதிய வணக்கம், matiya vaṇakkam**.) Do all three fetched sources agree on a distinct "afternoon" greeting slot? (**No** — two confirm மதிய வணக்கம் directly; a third doesn't list a separate afternoon greeting at all, treating morning and evening as bookending the day.) What clock window is a useful guide rather than a universal rule? (**Roughly noon to 4 PM**.)

31.2 மதிய — the greeting takes a different root

You can now say **மதிய வணக்கம்**. This final step explains why its first word is not the ordinary afternoon word **பிற்பகல்**.

The word, taken apart — its roots and family

The greeting begins with **மதிய** (**matiya**). It is the adjectival form of **மதியம்** (**matiyam**), "noon." That noun entered Tamil from Sanskrit **madhya**, "middle": noon is the middle of the day.
The adjective **மதிய** can be glossed "of or pertaining to afternoon." That lets Tamil build **மதிய வணக்கம்** even though the dedicated word you learned for "afternoon" was **பிற்பகல்**, the native compound from **piṉ** (after) + **pakal** (daytime).
Keep the two paths separate:

- **பிற்பகல்**: after + daytime → afternoon
- **மதிய வணக்கம்**: middle/noon adjective + greeting → good afternoon

The time word and the greeting do not have to share a root. That is one more reason not to manufacture a greeting by translating its pieces from another language.

Your turn

Say these aloud:

- matiyam — "noon," ultimately from Sanskrit madhya, "middle"
- pirpakal — "afternoon," built from "after" + "daytime"
- matiya vaṇakkam — the afternoon greeting, built on matiya

Before you move on

Does **மதிய வணக்கம்** begin with **பிற்பகல்**? (**No.**) What noun is **மதிய** related to? (**மதியம், "noon."**) What older root lies behind it? (**Sanskrit madhya, "middle."**) Why should you learn the whole greeting rather than construct it from the time word? (**Tamil uses a different root in the greeting.**)

31.3 இருக்கிறீர்கள் — the last sign, and the whole question

Two words of the question already come off the page. One vowel sign stands between you and the third.

Script you'll notice: the ◌ூ sign

◌ூ is the sign for short *u*. It is not left-standing — but it does not stand beside its letter the way ◌ா does either: it joins on below and to the right, and the pair is usually drawn as one shape.

Careful with "after": *every* vowel sign is **spoken** after its consonant, ◌ை and ◌ெ included. The signs differ in where the mark sits, not when you say it.

ர + ◌ூ → ரு, said *ru*.

The script data behind this book carries entries for ◌ா, ◌ி, ◌ை and the puḷḷi, and none for ◌ூ — so everything here, the joined shape included, is this lesson's own statement of ordinary Tamil, not something it can cite.

Script you'll notice: build the word

Every piece is now yours:

piece		
இ	*i*	independent — the word opens on a vowel
ரு	*ru* — ர with the ◌ூ sign	this lesson
க்	bare *k*	க under a puḷḷi
கி	*ki* — க with the ◌ி sign	
றீ	*r̲ī* — ற with the ◌ீ sign	ற from நன்றி
ர்	bare *r*	ர from சரி
க	*ka*	
ள்	bare *ḷ*	from நீங்கள்

இ · ரு · க் · கி · றீ · ர் · க · ள் → இருக்கிறீர்கள்

And the whole question:

நீங்கள் எப்படி இருக்கிறீர்கள்?

Nothing in it is new to say. You have asked it since chapter 3; the letters took until now to catch up.

Your turn

- *Read it:* ரு — then இருக்கிறீர்கள்
- *Read it:* the whole question — நீங்கள் எப்படி இருக்கிறீர்கள்?
- *Say it:* "nīṅgaḷ eppaḍi irukkiṟīrgaḷ?" — "how are you?"
- *Contrast:* நான் and நீங்கள் — the *I* of the answer, the *you* of the question

Before you move on

Read நீங்கள் எப்படி இருக்கிறீர்கள்? aloud. Is ◌ர written before its consonant or after? (**After** — ◌ை and ◌ெ are the ones written before.) When is a vowel sign *spoken*? (**Always after**, wherever it sits.) Which word did you learn to read first? (நீங்கள்.) Next: the verb இரு on its own.

The Core Verbs

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can build a Tamil verb as stem plus tense plus person, swap the tense bead for past or future, tell a strong verb from a weak one by its doubled consonant, and say why தெரியும் carries no person at all.

> *Say* எனக்குத் தமிழ் தெரியும், *name the three slots that built* irukkiṟēṉ, pōgiṟēṉ *and* pārkkiṟēṉ, *and explain which slot* தெரியும் *leaves empty and where its person went instead.*

32.1 இரு (iru) — "to be," and the machine inside every Tamil verb

> Thirty-one chapters of words. Now the engine room. Tamil builds a verb the way you thread beads on a string, and this first verb carries the whole string.

You'll want to know: இரு

> **இரு** — *iru* — **to be, to exist, to stay**

It is native Dravidian, from an old root meaning "be, remain, stay put." Kannada kept the very same word, ಇರು (*iru*), and Malayalam has ഇരിക്കുക (*irikkuka*); Telugu went its own way with ఉండు (*uṇḍu*).

Iru is about **existing** or **being somewhere**, not about linking two nouns. Tamil says "I am at home" with *iru*, and says "I am a teacher" with no verb at all, just the two words side by side.

Its everyday first-person form is இருக்கிறேன் (*irukkiṟēṉ*), "I am." You have already heard it: the question *eppaḍi irukkiṟīrgaḷ?* — "how are you?" — is this verb wearing a different ending.

In the family, and next door

	word	**same root**
Kannada	ಇರು (*iru*)	yes
Telugu	ఉండు (*uṇḍu*)	
Malayalam	ഉണ്ട് (*uṇṭŭ*)	
Hindi (neighbour)	हूँ (*hūṁ*)	
English	to be, to exist, to stay	

The letters in this word

இ (the standing vowel *i*) + ரு (*ru*) → இரு. Both shapes turned up in இரவு (*iravu*, "night").
In *irukkiṟēṉ* the க்க is held long — *i-ruk-ki*, with a catch in the middle. That length is not decoration; a later lesson turns it into a rule.

Grammar Lens: stem, then tense, then person

English changes a verb by putting words **around** it: *I am, I was, I will be.* Tamil changes it by gluing pieces **onto the end** of it, always in the same order:

இரு + க்கிற் + ஏன் → இருக்கிறேன்

iru (be) + *-kkiṟ-* (happening now) + *-ēṉ* (I) → *irukkiṟēṉ*

Left to right, the word says **be** — **present** — **I**. Three slots, filled in that order, welded into one word. Languages built this way are called **agglutinative**, from Latin *glutinare*, "to glue."
Two payoffs arrive at once. The last piece already means "I," so *nāṉ* is optional. And nothing here belongs to *iru* alone: every verb in this chapter is the same three slots with a new first bead.

Your turn

Say these aloud:

- "iru" — be, exist, stay

- "irukkiṟēṉ" — I am
- the three beads in order — "iru … kkiṟ … ēṉ"

Before you move on

What are the three pieces of *irukkiṟēṉ*, in order? (**Stem, tense, person** — *iru*, *-kkiṟ-*, *-ēṉ*.) Which piece carries "I"? (**The last one**, *-ēṉ* — which is why *nāṉ* can be dropped.) Which sister language kept the same verb? (**Kannada**, *iru*.) Next: the same machine, with the tense bead swapped.

32.2 போ (pō) — "to go," and the bead that carries time

From the afternoon greeting first: which road is *matiya* on — native *piṉ* plus *pakal*, or Sanskrit? (**Sanskrit** *madhya*, "middle" — noon, then afternoon.)

You have the three slots — stem, tense, person. Keep the first and last beads still, and swap only the middle one. That is the whole of Tamil tense.

You'll want to know: போ

போ — *pō* — to go

Two letters, ப (*pa*) with the long-*ō* sign, and a word so old it has barely moved. It is native Dravidian: Telugu పోవు (*pōvu*) and Malayalam പോകുക (*pōkuka*) are the same verb.

Kannada's everyday word for "go" is ಹೋಗು (*hōgu*) — and that *h* is not a different root. It is the same softening of an old *p* that turned Tamil *pattu* ("ten") into Kannada *hattu*. One sound-law, met once with numbers, now paying off with a verb.

You met the bare stem in the farewell chapter, where *pō!* is already a whole command: "go!"

In the family, and next door

	word	same root
Kannada	ಹೋಗು (*hōgu*)	yes
Telugu	వెళ్ళు (*veḷḷu*)	
Malayalam	പോകുക (*pōkuka*)	yes
Hindi (neighbour)	जाना (*jānā*)	
English	to go	

The word, taken apart — its roots and family

போ (*pō*) is native Dravidian. DEDR 4572 lists Malayalam *pōka*, Kannada *pōgu* (and *hōgu*) and Telugu *pōvu*.

Grammar Lens: past, present, future — one bead each

Hold the stem *pō-* and the person-ending *-ēṉ* ("I") fixed, and let the middle piece do the work:

when	Tamil	the middle bead
now	*pōgiṟēṉ*	*-giṟ-*
already	*pōṉēṉ*	*-ṉ-*
not yet	*pōvēṉ*	*-v-*

"I go," "I went," "I will go" — one syllable of difference, sitting between two pieces that never moved. English needs a new word (*will*) or a whole new shape (*went*); Tamil needs one bead.
The tense bead voices to *-giṟ-* after a vowel, which is why it sounds like *pō-gi-ṟēṉ* here but *iruk-ki-ṟēṉ* after the doubled *k* of *iru*.

Your turn

Say these aloud:

- "pō" — go
- the three times — "pōgiṟēṉ … pōṉēṉ … pōvēṉ"
- the pair that shares one sound-law — "pattu … hattu", "pō … hōgu"
- "irukkiṟēṉ" and "pōgiṟēṉ" — one machine, two stems

Before you move on

Which of the three beads changes for tense? (**The middle one**.) Say "I will go." (*Pōvēṉ*.) Is Kannada's *hōgu* a different root from *pō*? (**No** — the same old *p* softened to *h*, exactly as in *pattu* and *hattu*.) Next: a verb whose stem refuses to sit still.

32.3 വാ (vā) — "to come," and a stem with two shapes

Pō threads its beads on without a fuss. Its partner *vā* does not — and the farewell you learned long ago has been hiding the reason.

You'll want to know: വാ

വാ — *vā* — to come

വ (*va*) with the long-*ā* sign, and, like *pō*, a whole command on its own: *vā!*, "come!" Native Dravidian, and the family keeps it: Malayalam വരുക (*varuka*), Kannada ಬಾ (*bā*), Telugu రా (*rā*). Kannada's *b* and Telugu's *r* are two regular reshapings of the same old word, not three separate verbs.

In the family, and next door

	word	same root
Kannada	ಬಾ (*bā*)	yes
Telugu	రా (*rā*)	
Malayalam	വരുക (*varuka*)	yes
Hindi (neighbour)	आना (*ānā*)	
English	to come	

The word, taken apart — its roots and family

വാ (*vā*) is native Dravidian. DEDR 5270 files it under *varu*, with Malayalam *varuka*, Kannada *bā* and Telugu *rā*.

Grammar Lens: the word you say it by is not the word you build on

Thread the beads onto *vā-* and you get nothing a Tamil speaker says. The suffixes attach to **வரு-** (*varu-*) instead:

varu- + *-gi̲r-* + *-ē̲n* → **வருகிறேன்** (*varugi̲rē̲n*), "I come."

Past: **வந்தேன்** (*vantē̲n*), "I came." Future: **வருவேன்** (*varuvē̲n*). So a Tamil verb has a form you **call** it by — the bare command, the form a dictionary lists — and a form the beads actually **attach** to. For most verbs those are the same shape. For a handful of very common ones, of which *vā* is the commonest, they are not, and the pair simply has to be learned together: *vā*, *varu-*.
You have said this word already. The farewell **போய் வருகிறேன்** (*pōy varugi̲rē̲n*) — "I go and come back" — is *pō* and *varu-* standing side by side, and that *varugi̲rē̲n* is the very form above.

Your turn

Say these aloud:

- the command — "vā!"
- the pair that must be learned together — "vā … varu-"
- "varugi̲rē̲n … vantē̲n … varuvē̲n"
- the farewell you now understand — "pōy varugi̲rē̲n"

Before you move on

What shape do the beads attach to for "come"? (**வரு-**, *varu-*, not *vā-*.) Say "I come." (*Varugi̲rē̲n*.) Which two verbs are standing in *pōy varugi̲rē̲n*? (**போ** and **வா** — go, and come back.) Are Kannada *bā* and Telugu *rā* different verbs? (**No** — the same Dravidian word, reshaped.) Next: a verb Tamil built for itself.

32.4 சாப்பிடு (sāppiḍu) — "to eat," a verb built out of two words

Iru, *pō*, *vā* — three single syllables inherited whole from the oldest layer of Dravidian. The everyday word for "eat" is nothing of the kind. It was assembled.

You'll want to know: சாப்பிடு

சாப்பிடு — *sāppiḍu* — **to eat**

Four beats: *sāp-pi-ḍu*, with the **ப்ப** held long, the same doubling you heard in *irukkiṟēṉ*. Threaded up, it is **சாப்பிடுகிறேன்** (*sāppiḍugiṟēṉ*), "I eat" — stem, then *-giṟ-*, then *-ēṉ*, with no surprises. Past: **சாப்பிட்டேன்** (*sāppiṭṭēṉ*).

In the family, and next door

	word
Kannada	**తిన్ను** (*tinnu*)
Telugu	**తిను** (*tinu*)
Malayalam	**തിന്നുക** (*tinnuka*)
English	to eat

The word, taken apart — its roots and family

The word comes apart cleanly into two Tamil words:

- **சாப்பு** (*sāppu*) — food, a meal; the everyday **சாப்பாடு** (*sāppāḍu*, "a meal") is built from it.
- **இடு** (*iḍu*) — to put, to place.

Put food. That is all *sāppiḍu* literally says. **இடு** is what grammarians call a **light verb**: a plain, hard-working verb that lends its endings to a noun so the pair can act as one verb. Tamil builds a great many verbs this way, so *iḍu* is worth knowing on its own. (Where *sāppu* itself came from is not settled; treat the compound as transparent and the deeper root as open.)

Then the honest part. The inherited Dravidian word for eating is ***tiṉ-***, and it is thriving next door: Telugu **తిను** (*tinu*), Kannada **తిన్ను** (*tinnu*), Malayalam **തിന്നുക** (*tinnuka*). Tamil kept it too, as **தின்** (*tiṉ*) — now narrowed to chewing and snacking — and kept the old

literary உண் (*uṇ*), Malayalam's ഉണ്ണുക (*uṇṇuka*), besides. So Tamil did not lose the ancient eat-verbs. It built a new one and let them keep their smaller jobs.

Your turn

Say these aloud:

- "sāppiḍu" — eat
- "sāppiḍugiṟēṉ" — I eat — then "sāppiṭṭēṉ", I ate
- the two halves — "sāppu" (food) + "iḍu" (put)
- the inherited root next door — "tinu … tinnu … tinnuka"

Before you move on

What two words is *sāppiḍu* made of? (சாப்பு, food, and இடு, to put.) What is a light verb doing there? (**Lending its endings** to a noun so the pair works as one verb.) Did Tamil lose the inherited eat-root? (**No** — *tiṉ* narrowed to chewing, *uṇ* stayed literary, and the cousins kept *tinu*, *tinnu*, *tinnuka*.) Next: the verb that splits Tamil's verbs into two classes.

32.5 பார் (pār) — "to see," and Tamil's two kinds of verb

Four verbs in, one small thing has been inconsistent. *Pōgiṟēṉ* has a single *k*. *Irukkiṟēṉ* has a doubled one. That is not sloppiness — it is a sorting rule, and this verb is where it gets a name.

You'll want to know: பார்

பார் — *pār* — **to see, to watch**

ப with the long-*ā* sign, then ர் with a puḷḷi to strip its vowel: *pār*, one syllable ending on the *r*. From it comes the noun பார்வை (*pārvai*), "sight, vision."

Each Dravidian sister settled on a different everyday word for seeing — Kannada ನೋಡು (*nōḍu*), Telugu చూడు (*cūḍu*), Malayalam കാണുക

(*kāṇuka*) — so *pār* is Tamil's own choice, not the family's. But the family's shared root is here too: Tamil keeps காண் (*kāṇ*), "to see," for formal and literary use, and that is the same word as Malayalam's *kāṇuka* and Kannada's ಕಾಣು (*kāṇu*). Four sisters, one inherited root, four everyday preferences.

In the family, and next door

	word
Kannada	ನೋಡು (*nōḍu*)
Telugu	చూడు (*cūḍu*)
Malayalam	കാണുക (*kāṇuka*)
English	to see, to look

Grammar Lens: strong verbs and weak verbs

Every Tamil verb belongs to one of two camps, and the tense bead tells you which:

camp	**present**	**past**
weak — *pō*	*pōgiṟēṉ*	*pōṉēṉ*
strong — *pār*	*pārkkiṟēṉ*	*pārttēṉ*

Weak verbs take the tense bead lightly: a single *k*, softened to *g*. **Strong** verbs double it — *-kkiṟ-*, held long — and take a doubled *t* in the past. *Iru* is strong, which is why "I am" was *irukkiṟēṉ* and never *irugiṟēṉ*. *Sāppiḍu* is weak, like *pō*.

There is no rule you can hear in the bare stem that tells you which camp a verb is in, so it is learned with the verb, the way a noun's gender is learned in other languages. Two camps, though — not twenty. Meet a verb once in its present form and it is settled forever.

Your turn

Say these aloud:

- "pār" — see, watch
- the contrast, holding the long *kk* — "pōgiṟēṉ … pārkkiṟēṉ"
- the past pair — "pōṉēṉ … pārttēṉ"
- which camp each verb sits in — "iru strong, pō weak, sāppiḍu weak, pār strong"

Before you move on

What separates a strong verb from a weak one? (**The doubled consonant** in the tense bead — *pārkkiṟēṉ* against *pōgiṟēṉ*.) Which camp is *iru* in, and how do you know? (**Strong** — *irukkiṟēṉ* holds the *kk*.) Which Tamil verb for "see" is shared with Malayalam and Kannada? (காண், *kāṇ* — kept for formal use beside everyday *pār*.) Next: a verb with no person on the end at all.

32.6 தெரி (teri) — "to know," the verb that drops the person

Five verbs, and every one ended on -*ēṉ*, the bead that means "I." The last verb of the chapter refuses that bead — and Chapter 6 already gave you the sentence it makes.

You'll want to know: தெரி

தெரி — *teri* — **to know; to be apparent, to be visible**

த (*ta*) with the short-*e* sign, then ரி (*ri*). Its base sense is not "know" but "**show up, be clear**" — a thing *teri*-s to you the way a shape resolves out of fog. The everyday form is தெரியும் (*teriyum*): "it is known," "it is apparent."

Tamil keeps a second know-verb, அறி (*aṟi*), for knowing by learning — the same word as Kannada ಅರಿ (*ari*) and Malayalam അറിയുക (*aṟiyuka*). *Teri* has an exact cousin too: Telugu's తెలుసు (*telusu*), from తెలియు (*teliyu*).

In the family, and next door

	word	same root
Kannada	ಗೊತ್ತು (*gottu*)	
Telugu	తెలుసు (*telusu*)	yes
Malayalam	അറിയുക (*aṟiyuka*)	
Hindi (neighbour)	मैं जानता हूँ (*maiṁ jāntā hūṁ*)	
English	to know, to be apparent	

Grammar Lens: no person on the verb, so the person moves

> **எனக்குத் தமிழ் தெரியும்.** — *enakkut tamiḻ teriyum* — "I know Tamil."

Chapter 6 gave you that sentence whole; here is the verb inside it. **தெரியும்** has no person bead, and stays the same shape no matter who knows:

- *enakku teriyum* — it is known **to me**
- *uṉakku teriyum* — it is known **to you**
- *avaṉukku teriyum* — it is known **to him**

Only the little dative word in front changes. Tamil treats knowing as something that **happens to** you rather than something you **do**, so the knower is not the subject and cannot climb into the verb's last slot. That is the chapter's closing symmetry. Five verbs carried the person in the ending, and *nāṉ* could be dropped. Here the ending carries no person, so the dative word is the one thing you cannot drop. Telugu builds it identically: **నాకు తెలుసు** (*nāku telusu*), "to me it is known."

Your turn

Say these aloud:

- "teri" — be apparent — then "teriyum", it is known
- "enakkut tamiḻ teriyum" — I know Tamil
- the three knowers, one verb — "enakku … uṉakku … avaṉukku teriyum"
- the five that carried the person — "irukkiṟēṉ, pōgiṟēṉ, varugiṟēṉ, sāppiḍugiṟēṉ, pārkkiṟēṉ"

Before you move on

What does *teri* mean underneath "know"? (**To be apparent, to show up**.) Which bead is missing from *teriyum*? (**The person** — so the knower sits in the dative word instead.) Say "I know Tamil."

(*Enakkut tamiḻ teriyum.*) Name the three slots one last time, with a strong verb in them. (**Stem, tense, person** — *pār* + *-kkiṟ-* + *-ēṉ.*) Which sister builds the knowing-sentence the same way? (**Telugu**, *nāku telusu.*)

Chapter 33

Four Verbs of the Mind

Modes: 👁 **eyes** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can say I think, I understand, I read and I write in Tamil with the same three slots, tell a strong verb from a weak one by its held consonant, explain why எனக்குப் புரிகிறது has no I in it, and make the ழ in எழுது.
>
> *Say* நான் தமிழ் எழுதுகிறேன், *run the chapter's four verbs in the present and sort them into strong and weak, produce* ழ *without letting the tongue touch, and name the one word here whose origin is unsettled.*

33.1 நினை (ninai) — "to think," which is also "to remember"

> *Teri* refused to carry a person: *enakku teriyum*, "it is known to me." Say *enakkut tamil̲ teriyum* once. This verb takes the person back.

You'll want to know: நினை

> **நினை** — *ninai* — **to think; to think of, to remember**

Two light beats, *ni-nai*. Threaded up: நினைக்கிறேன் (*ninaikkir̲ēn̲*), "I think" — stem, tense, person, with nothing new in the machine.

In the family, and next door

	word
Kannada	ಯೋಚಿಸು (*yōcisu*)
Telugu	అనుకో (*anukō*)
Malayalam	ചിന്തിക്കുക (*cintikkuka*)
Hindi (neighbour)	सोचना (*sochnā*)
English	to think

The letters in this word

நி is the **dental** ந with the *i* sign ி; னை is the **alveolar** ன with the *ai* sign ை. Two of Tamil's three n-letters in one word, and not interchangeable: the first sits on the teeth, the second on the ridge behind them. Chapter 6's three-n lesson mapped all three — ந, ன, ண.

Grammar Lens: it doubles, so it is strong

The **k** in *ninaikkiṟēṉ* is held long — *ninaik-ki* — as it was in *irukkiṟēṉ* and *pārkkiṟēṉ*, and not as it was in *pōgiṟēṉ*. So **நினை is strong**, and its past is நினைத்தேன் (*ninaittēṉ*), with the strong verb's doubled *t*. One held consonant answers a question you would otherwise ask of every new verb. You are not learning a machine per verb: you learn which of two camps a stem sits in, then reuse the same three slots forever.

The word, taken apart — its roots and family

நினை is native Dravidian and does two English jobs at once: *ninaikkiṟēṉ* is "I think" and equally "I remember." The noun says so — நினைவு (*ninaivu*) is **memory**. Kannada agrees with ನೆನೆ (*nene*), "remember," and ನೆನಪು (*nenapu*), "memory"; Malayalam has നിനയ്ക്കുക (*ninaykkuka*).
One honest note for this chapter and the next: English took real words from Tamil — *catamaran*, *mango*, *curry*, *pariah* — but **none from these verbs**. Inventing a cousin would be worse than having none.

Your turn

Say these aloud:

- "ninai" — think, remember — then "ninaikkiṟēṉ"

- the strong pair — "irukkiṟēṉ … ninaikkiṟēṉ"
- the noun — "ninaivu", memory — then Kannada "nenapu"
- the two shapes — "enakku teriyum … nāṉ ninaikkiṟēṉ"

Before you move on

What two English verbs does *ninai* cover, and which camp is it in? (**Think** and **remember**; **strong**, from the held *kk*.) What is *ninaivu*, and which sister keeps the root? (**Memory**; **Kannada**, *nene* / *nenapu*.) Which two n's does *ninai* use, in order? (**Dental** ந, then **alveolar** ன.) And why does *teriyum* carry no *-ēṉ*? (**Knowing happens to you** — its person sits in the dative instead.)

33.2 புரி (puri) — "to become clear," and who it becomes clear to

Two shapes. *Nāṉ ninaikkiṟēṉ* — I do the thinking. *Enakku teriyum* — the knowing happens to me. Say both.

You'll want to know: புரி

புரி — *puri* — **to be understood; to become clear**

The everyday form is புரிகிறது (*purigiṟadu*):

எனக்குத் தமிழ் புரிகிறது. — *enakkut tamiḻ purigiṟadu* — "I understand Tamil."

Word for word, "**to me** Tamil is becoming clear." The verb is weak: the softened *-giṟ-* of *pōgiṟēṉ*, not the long *-kkiṟ-* of *ninaikkiṟēṉ*.

In the family, and next door

	word
Kannada	ಅರ್ಥಮಾಡಿಕೊ (*arthamāḍiko*)
Telugu	అర్థం చేసుకో (*artham cēsukō*)
Malayalam	മനസ്സിലാക്കുക (*manassilākkuka*)
Hindi (neighbour)	समझना (*samajhnā*)
English	to be understood, to become clear

The letters in this word

பு is ப carrying the *u* sign, which fuses into the letter's shape rather than hanging off it; ரி is ர with the *i* sign ி.

Grammar Lens: the last slot can say "it"

Teriyum had no person slot at all. *Purigi̲radu* **fills** it, with **-அது** (*-adu*), "**it**."

புரி + கிற் + அது → புரிகிறது

So the thing becoming clear is *it*, and the understander is pushed out of the verb into the dative word **எனக்கு** (*enakku*) that Chapter 6 built for this job. Change the understander and only that word moves:

- *enakku purigi̲radu* — I understand
- *u̲nakku purigi̲radu* — you understand
- *ava̲nukku purigi̲radu* — he understands

Two verbs, two mechanisms, one result: **the experiencer sits in the dative.** Not an exception — the ordinary way to report what happens inside a person.

The word, taken apart — its roots and family

Tamil's dictionaries keep more than one **புரி**: an old literary one, "to do, to perform," and this everyday one. Whether they are one root is **not settled**. Certain is the verbal noun in **-தல்**: **புரிதல்** (*puridal*), "understanding."
The family evidence is stronger. Each sister chose a different verb, and every one puts the understander in the dative:

- Kannada **ನನಗೆ ಅರ್ಥವಾಯಿತು** — *nanage arthavāyitu*
- Telugu **నాకు అర్థమైంది** — *nāku arthamaindi*
- Malayalam **എനിക്ക് മനസ്സിലായി** — *enikku manassilāyi*, "it entered my mind"

Different words, one grammar. Chapter 6 showed the four dative endings were cousins; here they do the same job in the same sentence.

Your turn

Say these aloud:

- "enakkut tamil̲ purigi̲radu" — I understand Tamil
- three understanders, one verb — "enakku … una̲kku … avan̲ukku purigi̲radu"
- the pair that share a shape — "enakku teriyum … enakku purigi̲radu"
- the sisters' datives — "enakku … nanage … nāku … enikku"

Before you move on

What does *puri* mean underneath "understand," and what fills its person slot? (**To become clear**; **-அது**, "it".) So where does the understander go? (**Into the dative** — *enakku.*) Name the other verb that puts you there. (***Teri*** — *enakku teriyum.*) And which verb from this chapter keeps the person on the ending? (***Ninai*** — *nān̲ ninaikkiṟēn̲.*)

33.3 படி (paḍi) — "to read," and the letter that is two sounds

Say *enakkut tamil̲ purigi̲radu* — Tamil becomes clear to me. Now the verb for the work that gets you there.

You'll want to know: படி

படி — *paḍi* — **to read; to study, to learn**

படிக்கிறேன் (*paḍikkiṟēn̲*), "I read, I study." The *kk* is held, so **படி is strong**, like *ninai* and *pār*; its past is **படித்தேன்** (*paḍittēn̲*).

நான் தமிழ் படிக்கிறேன். — *nān̲ tamil̲ paḍikkiṟēn̲* — "I study Tamil."

Tamil does not split reading from studying: **படிப்பு** (*paḍippu*) is both "reading" and "an education."

In the family, and next door

	word	**same root**
Kannada	ಓದು (*ōdu*)	
Telugu	చదువు (*caduvu*)	
Malayalam	വായിക്കുക (*vāyikkuka*)	
Hindi (neighbour)	पढ़ना (*paṛhnā*)	yes
English	to read, to study	

The letters in this word

ப (*pa*) + டி, which is ட wearing the *i* sign ி.

Now a mystery worth clearing up. The letter is ட, named *ṭa*, yet the word is written here *paḍi*, with a **d**. Nothing is inconsistent: **Tamil marks no voicing.** One letter covers both sounds and **position decides** — hard word-initially or doubled, soft between vowels. That is Chapter 5's rule for க, which spells *k*, *g* and a soft *h* without changing shape.

So ட is soft between the vowels of *paḍi* and hard in the doubled ட்ட of *paḍittēṉ*. It is why *pō* becomes *pōgiṟēṉ*, why *sāppiḍu* has a *ḍ*, and why every romanization here softens where a speaker softens.

ட is also **retroflex**, made where ண is: tongue tip curled back to the roof of the mouth. That curl matters more than the *d*-versus-*t*.

The word, taken apart — its roots and family

Tamil's own dictionaries list படி as native. Others connect it to Sanskrit पठ् (*paṭh*), "to recite, to read aloud" — not a silly idea, because **Tamil has no aspirated consonants**, so a borrowed *paṭh* would arrive as *paṭi* automatically, with no letter to carry the puff of breath.

Next door the evidence is split. Malayalam says പഠിക്കുക (*paṭhikkuka*) and **keeps the aspirate**, in the Sanskrit-series letter ഠ; Kannada and Telugu use ಓದು (*ōdu*) and చదువు (*caduvu*), unrelated to either candidate.

Carry away the certain part: **an aspirate cannot survive into Tamil**, so a stripped-down look-alike is never by itself proof of borrowing.

Your turn

Say these aloud:

- "nāṉ tamiḻ paḍikkiṟēṉ" — I study Tamil
- the soft and the hard ட — "paḍi … paḍittēṉ"
- the strong three — "ninaikkiṟēṉ, paḍikkiṟēṉ, pārkkiṟēṉ"
- the weak one beside them — "purigiṟadu"

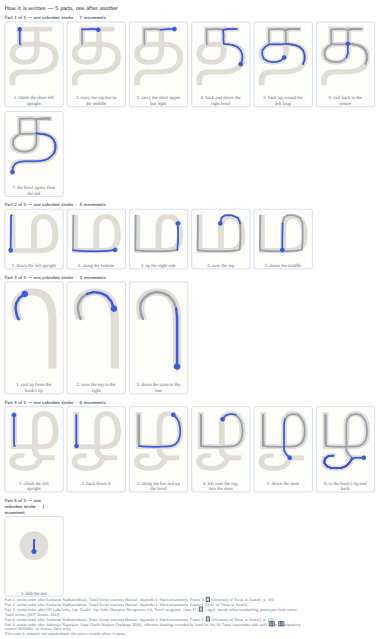

Before you move on

Why is ட written one way and heard two ways, and where is it made? (**Tamil marks no voicing** — position decides, as with க; and it is **retroflex**, made where ண is.) Is *paḍi* borrowed from Sanskrit *paṭh*, and what can Tamil never keep from a Sanskrit word? (**Unsettled**; **the aspiration**.) Say "I study Tamil." (*Nāṉ tamiḻ paḍikkiṟēṉ.*)

33.4 தமிழ் — the letter the language is named for

This book has said more than once that Tamil keeps three *l*-letters, and the strand has shown you two: ல in இல்லை, ள in நீங்கள். The third has been outstanding since chapter 18. Here it is, in the word it matters most in.

Script you'll notice: த and ழ

How தமிழ் *is written, part by part, stroke by stroke*

த	*ta* — the dental *t*, tongue on the teeth
ழ	*ḻ* — the third *l*-letter, curled far back

த is the dental partner of the retroflex ட you read in எப்படி: same kind of stop, different place in the mouth. Tamil keeps the pair apart in writing, so த and ட are never interchangeable.

ழ is the one Tamil is known for. It is made further back than ள, and its sound sits somewhere between an *r*, an *l* and a *zh* — rare enough in the world's languages that Tamil is sometimes called the ழ் language. That is why the word for the language itself ends in it.

> Read both. The strip writes the whole word, numbered movement by movement, with each source beneath it. The script data calls த dental and ழ retroflex; the finer mouth positions above are this lesson's own.

Script you'll notice: build the word

த	*ta*	this lesson
மி	*mi* — ம with the ி sign	ம from வணக்கம், ி from நன்றி
ழ்	bare *l̲* — ழ under a pul̲li	this lesson

த · மி · ழ் → தமிழ்

Three pieces, and you can now read the name of the language you have been speaking since page one. That was the plan: the word first, the letters when they can be earned.

Your turn

- *Read it:* த · ழ — then தமிழ்
- *Say it:* "tamil̲" — and hold that last sound
- *Contrast:* த and ட — dental and retroflex, teeth and roof
- *Contrast:* ல · ள · ழ — all three *l*-letters, at last

Before you move on

Read தமிழ். Which letter is த's retroflex partner? (ட, from எப்படி.) Which of the three *l*-letters ends the word, and what is the dot doing? (ழ; the pul̲li **removes its built-in *a***.) Next: the verb for writing — spelled with the ழ you just met.

33.5 எழுது (el̲udu) — "to write," and the sound Tamil is named for

Ninaikkir̲ēn̲, *purigir̲adu*, *paḍikkir̲ēn̲* — think, understand, read. Say all three. The fourth is reading's other half.

You'll want to know: எழுது

எழுது — *e̲ludu* — **to write; to draw**

எழுதுகிறேன் (*e̲ludugiṟēn̲*), "I write." The tense bead is the **single softened *-giṟ-***, so **எழுது is weak**, like *pō* and *sāppiḍu*.

நான் தமிழ் எழுதுகிறேன். — *nān̲ tamiḻ̲ e̲ludugiṟēn̲* — "I write Tamil."

In the family, and next door

	word	same root
Kannada	ಬರೆ (*bare*)	
Telugu	రాయు (*rāyu*)	
Malayalam	എഴുതുക (*e̲lutuka*)	yes
Hindi (neighbour)	लिखना (*likhnā*)	
English	to write	

The letters in this word

எ is the standing vowel *e*; ழு is ழ with the *u* sign and து is த with the same sign.

The dot returns in the noun எழுத்து (*e̲luttu*), "**a letter of the alphabet**," spelled எ ழு த் து: a **puḷḷi** strips the vowel from the first த் and the second து stands whole beside it. Two full letters and a visible dot, never a fused shape: the puḷḷi lesson's bargain.

The letters in this word

ழ — written *ḻ* — is the sound in தமிழ் (*tamiḻ̲*) itself and in வாழ் (*vāḻ̲*), "to live," and is reputed to be the language's hardest.
Curl the tongue tip back as for ட or ண, then **do not let it touch**. Leave a gap and voice through it: what comes out sits between an American *r* and an *l*, and it is a **glide**, not a stop.
Two honest notes. Many fluent speakers merge ழ with ள and are understood everywhere. And the family already voted — Chapter 7 gave you Tamil **ē̲lu** against Kannada **ēḷu**. Kannada and Telugu each had a letter for it and let it go; **Tamil and Malayalam kept it.**

The word, taken apart — its roots and family

எழுது looks like எழு (*e̱lu*), "**to rise**," but DEDR keeps them as **separate entries**. Native Dravidian (DEDR 853), unlike *paḍi*'s open question. Beside it sits எழுத்தாளர் (*e̱luttāḷar*), a writer.
The cousin is exact: Malayalam എഴുതുക (*e̱lutuka*), same verb, same ഴ. Kannada and Telugu write with other verbs.

Your turn

Say these aloud:

- the three ழ words — "tami̱l … vā̱l … e̱ludu"
- "nā̱n tami̱l e̱ludugi̱rē̱n" — I write Tamil
- the chapter — "ninaikki̱rē̱n, purigi̱radu, paḍikki̱rē̱n, e̱ludugi̱rē̱n"
- the split — "Tamil ē̱lu … Kannada ēḷu"

Before you move on

Say the chapter's four verbs and name the two weak ones. (*Ninaikki̱rē̱n, purigi̱radu, paḍikki̱rē̱n, e̱ludugi̱rē̱n*; ***puri*** and ***e̱ludu***.) How is ழ made, and who kept it? (**Curled back, not touching**; **Malayalam** did, **Kannada** and **Telugu** dropped it.) What keeps the two த's of *e̱luttu* apart, and which word here has an unsettled origin? (**The puḷḷi**; ***paḍi***.)

Chapter 34

Four Verbs Between People

Modes: 🚗 **voice** (1) 👁 **eyes** (3) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can say I take, I ask, I help and I like in Tamil, hear கேள் doing the work of both asking and hearing, choose between பிடிக்கும் and விரும்பு, and say எனக்குப் பிடிக்கும் knowing why the liker sits in the dative exactly as with தெரியும்.
>
> *Say* எனக்குத் தமிழ் பிடிக்கும் *and unpack it as "to me, Tamil catches"; name the three dative-experiencer verbs* தெரியும் / புரிகிறது / பிடிக்கும், *contrast* விரும்பு*'s ordinary subject, and place Kannada* ಹಿಡಿ *on the p→h shift met in Chapter 7.*

34.1 எடு (eḍu) — "to take," beside the "put" you already own

The last chapter's verbs happened inside your head. These four happen between you and somebody else. Say *paḍikkiṟēṉ* and *eṟudugiṟēṉ* once more, then put your hands back in the world.

You'll want to know: எடு

எடு — *eḍu* — to take; to pick up, to lift, to remove

எடுக்கிறேன் (*eḍukkiṟēṉ*), "I take." The *kk* is held, so **எடு is strong**; past எடுத்தேன் (*eḍuttēṉ*). Two sentences you can already build in full:

நான் தண்ணீர் எடுக்கிறேன். — *nāṉ taṇṇīr eḍukkiṟēṉ* — "I take water."

நான் அரிசி எடுக்கிறேன். — *nāṉ arisi eḍukkiṟēṉ* — "I take rice."

Kannada	ತೆಗೆದುಕೊ (*tegeduko*)
Telugu	తీసుకో (*tīsukō*)
Malayalam	എടുക്കുക (*eṭukkuka*)
Hindi (neighbour)	लेना (*lenā*)
English	to take, to pick up

The letters in this word

எ is the standing vowel *e*, from எழுது; டு is ட with the *u* sign, and ட came apart in படி. Nothing here is new — the first time in this book that has been true of a whole headword. The *ḍ* you hear is the same positional softening: ட goes soft between vowels and hard when doubled, as in *eḍuttēṉ*.

The word, taken apart — its roots and family

You have met this verb's near-twin already, hiding inside a meal. சாப்பிடு (*sāppiḍu*), "to eat," is *sāppu* (food) plus இடு (*iḍu*), "**to put**" — the light verb that lends its endings to a noun.

verb	**what it does**
இடு *iḍu*	put it **down**
எடு *eḍu*	pick it **up**

One standing vowel apart — இ against எ — pointing opposite ways. That is a gift to your memory and **not** an etymology: Tamil's dictionaries keep them as **separate roots**, and a tidy pair of opposites is exactly the resemblance that fools people. Use it to remember; never as evidence.

What *is* inherited is *eḍu* itself. Malayalam has എടുക്കുക (*eṭukkuka*), the same verb; the etymological dictionary files them together. Kannada and Telugu ಎತ್ತು / ఎత్తు (*ettu*), "to lift," look close but are filed under a **separate root**: perhaps a cousin, not a proven one.

Your turn

Say these aloud:

- the opposed pair — "iḍu, put … eḍu, take"
- "nāṉ taṇṇīr eḍukkiṟēṉ" — I take water
- "nāṉ arisi eḍukkiṟēṉ" — I take rice
- the true cousin, then the look-alike — "eṭukkuka … ettu"

Before you move on

What does *eḍu* mean, and which camp is it in? (**To take**; **strong** — *eḍukkiṟēṉ* holds the *kk*.) Which verb is one vowel away, and where did you meet it? (இடு, "to put" — inside சாப்பிடு.) Is that pair related? (**No** — the dictionaries keep them apart; it is a memory hook, not evidence.) Say "I take water," then "I take rice." (*Nāṉ taṇṇīr eḍukkiṟēṉ*; *nāṉ arisi eḍukkiṟēṉ*.)

34.2 கேள் (kēḷ) — one verb for asking and for hearing

Eḍukkiṟēṉ — I take. Name the verb it is one vowel away from. Now a verb doing two English jobs at once.

You'll want to know: கேள்

கேள் — *kēḷ* — **to ask; to hear, to listen**

One syllable, ending on retroflex ள். The everyday form surprises:

நான் கேட்கிறேன். — *nāṉ kēṭkiṟēṉ* — "I ask." (Also: "I hear.")

The ள் has hardened to ட் — வா's trick a second time: you say it *vā*, but the endings attach to *varu-*. Here they attach to **கேட்-** (*kēṭ-*), and the past is **கேட்டேன்** (*kēṭṭēṉ*), a strong verb's doubled consonant. Two verbs with two stems apiece.

In the family, and next door

	word	**same root**
Kannada	ಕೇಳು (*kēḷu*)	yes
Telugu	అడుగు (*aḍugu*)	
Malayalam	ചോദിക്കുക (*cōdikkuka*)	
Hindi (neighbour)	पूछना (*pūchnā*)	
English	to ask	

The letters in this word

கே is க with the long-*ē* sign ே; ள் is retroflex ள shut off by a **puḷḷi** — the dot Chapter 8 pointed at inside செய்து. In கேட்கிறேன் the seam is ட்க.

The word, taken apart — its roots and family

English keeps *ask* and *hear* apart. Tamil does not, and neither does its noun: கேள்வி (*kēḷvi*) is **"a question"** and also "a hearing." The family splits down the middle:

- Kannada ಕೇಳು (*kēḷu*) does **both** jobs, as Tamil does.
- Malayalam കേൾക്കുക (*kēḷkkuka*) kept only "hear."
- Telugu splits them: విను (*vinu*), hear; అడుగు (*aḍugu*), ask.

The verb is inherited, but four languages cannot settle which arrangement came first; treat the fusion as Tamil's and Kannada's shared habit alone.

Why it's said this way

Tamil is **diglossic**: its literary variety and the variety people speak have drifted far apart. This verb makes that impossible to ignore.

- கேள் is the dictionary and literary form.
- கேட்கிறேன் is standard spoken Tamil — **the register these lessons teach**, as every lesson's variety line has said.
- Relaxed speech says கேக்கிறேன் (*kēkkiṟēṉ*) and கேக்க (*kēkka*). Recognise them; you need not say them.

For a polite request use Chapter 8's respectful ending: கேளுங்கள் (*kēḷungaḷ*), "please ask." Keep தயவுசெய்து for emphasis.

Your turn

Say these aloud:

- the two shifting stems — "vā … varugiṟēṉ" then "kēḷ … kēṭkiṟēṉ"
- "kēḷvi" — a question — then the polite "kēḷungaḷ"
- the family split — "Kannada kēḷu, both … Telugu vinu and aḍugu, two"

Before you move on

What two English verbs is *kēḷ*, and what happens to its ள் before an ending? (**Ask** and **hear**; it hardens to ட்.) Which verb taught you to expect a second stem, and what is *kēḷvi*? (வா, built on *varu-*; **a question**.) Which register do these lessons teach, and how do you ask politely? (**Standard spoken** *kēṭkiṟēṉ*; ***kēḷungaḷ***.)

34.3 பேசு — the long partner of ெ

Twice now a Tamil vowel has come in a short and a long version: அ and ஆ, ி and ீ. For அ/ஆ the script data even says the long one is the short one plus a tail; for ி/ீ it says nothing, and the pairing is the lesson's. Here is a third pair.

Script you'll notice: the ே sign

ே is the sign for long *ē*, and it is the long partner of the ெ you met in பெயர். Like ெ, it is written to the **left** of its consonant and spoken after it.

ப + ே → பே, said *pē*.

sign	sound	where it is written
ெ	short *e*	to the left
ே	long *ē*	to the left
ை	*ai*	to the left

Three left-standing signs now. The evidence is the same as it was for ெ: the script data describes ை and has no entry for ெ or ே at all, so both the shared position **and** the short/long pairing are stated from the pattern these signs share, not from a source for either one.

Script you'll notice: build the word

piece		
பே	*pē* — ப with the ே sign on its left	ப from பெயர்
சு	*su* — ச with the ு sign	ச from சரி, ு from இருக்கிறீர்கள்

பே · சு → பேசு

Two pieces, one new sign, and its two signs pull in opposite directions on the page: ே stands before its letter, ு joins after it. பேசு is "speak" — the verb every lesson so far has been in service of.

Your turn

- *Read it:* பே — then பேசு
- *Say it:* "pēsu" — "speak"
- *Contrast:* பெ and பே — the short sign and the long one, both on the left
- *Contrast:* பே and சு — a sign before, a sign after, inside one word
- *Read it:* தமிழ் பேசு — "speak Tamil," both words off the page

Before you move on

Read பேசு. Which side of its consonant is ே written on? (**The left** — like ெ and ை.) Which sign is its short partner? (ெ, as in பெயர்.) What is the ச doing here — is it *s* or *ch*? (**Either**; one letter covers both, and position picks.) Next: the verb for helping.

34.4 உதவு (udavu) — "to help," and a word Tamil did not borrow

Kēṭkiṟēṉ — I ask. *Kēḷungaḷ* — please ask. Say both, and keep that polite ending in your ear; it is about to arrive on a second verb unchanged.

You'll want to know: உதவு

உதவு — *udavu* — **to help; to be of use**

உதவுகிறேன் (*udavugiṟēṉ*), "I help." The single softened *-giṟ-* puts **உதவு** in the **weak** camp with *pō* and *eḻudu*, and the noun is one step away: **உதவி** (*udavi*), "**help**."

நான் உங்களுக்கு உதவுகிறேன். — *nāṉ ungaḷukku udavugiṟēṉ* — "I help you."

The person helped takes the dative **-உக்கு** from Chapter 6, and the polite form needs nothing new: **உதவுங்கள்** (*udavungaḷ*), "please help" — the same respectful **-உங்கள்** you just put on *kēḷ*.

In the family, and next door

	word
Kannada	**ಸಹಾಯ ಮಾಡು** (*sahāya māḍu*)
Telugu	**సహాయం చేయు** (*sahāyaṁ cēyu*)
Malayalam	**സഹായിക്കുക** (*sahāyikkuka*)
Hindi (neighbour)	**मदद करना** (*madad karnā*)
English	to help, to be of use

The letters in this word

உ is the standing vowel *u*, used when a word begins with it; then **த** and **வு**, which is **வ** with the *u* sign. The *d* you hear is **த** between two vowels, softening exactly as **ட** did in *paḍi* and **க** does in *pōgiṟēṉ*.

The word, taken apart — its roots and family

Tamil turns verbs into nouns with a small ending, and you have collected three without being told to: **புரி** → **புரிதல்** (*puridal*), understanding; **கேள்** → **கேள்வி** (*kēḷvi*), a question; **உதவு** →

உதவி (*udavi*), help.
Now the part worth keeping. For "help," the neighbours nearly all reach for Sanskrit सहाय (*sahāya*): Telugu సహాయం, Kannada ಸಹಾಯ, Malayalam സഹായം, Hindi सहायता. Tamil's everyday word is உதவி, its own.
Hold that against Chapter 8, where *please* went the other way: **all four** sisters built it on Sanskrit दया (*daya*) plus a light verb — *tayavuseytu*, *dayaviṭṭu*, *dayacēsi*, *dayavāyi*. Same four languages, opposite outcome. So the rule is not "Tamil refuses to borrow"; it is that **borrowing happens word by word**, and the only way to know is to check each one.

Your turn

Say these aloud:

- "nāṉ ungaḷukku udavugiṟēṉ" — I help you
- the two polite forms — "kēḷungaḷ … udavungaḷ"
- the three nouns — "puridal … kēḷvi … udavi"
- the borrowed one and the kept one — "tayavuseytu … udavi"

Before you move on

Which camp is *udavu* in, and what is *udavi*? (**Weak**, by the single softened bead; **help**, the noun.) Say "I help you," then "please help." (*Nāṉ ungaḷukku udavugiṟēṉ*; *udavungaḷ*.) Which word do the neighbours borrow from Sanskrit where Tamil keeps its own? (**Help** — *sahāya* against *udavi*.) And which word did all four sisters borrow together? (***Please*** — *daya* plus a light verb.)

34.5 பிடி (piḍi) — "to catch," and therefore "to like"

Say this chapter's three verbs — *eḍukkiṟēṉ*, *kēṭkiṟēṉ*, *udavugiṟēṉ* — then the two sentences with no *nāṉ*: *enakku teriyum*, *enakku purigiṟadu*.

You'll want to know: பிடி

பிடி — *piḍi* — **to catch, to seize, to hold**

பிடிக்கிறேன் (*piḍikkiṟēṉ*) is "I catch, I hold," and the held *kk* puts it in the **strong** camp with *ninai*, *paḍi* and *eḍu*.

In the family, and next door

	word
Kannada	**ನನಗೆ ಕನ್ನಡ ಇಷ್ಟ** (*nanage kannaḍa iṣṭa*)
Telugu	**నాకు తెలుగు ఇష్టం** (*nāku telugu iṣṭaṁ*)
Malayalam	**എനിക്ക് മലയാളം ഇഷ്ടമാണ്** (*enikkŭ malayāḷaṁ iṣṭamāṇŭ*)
Hindi (neighbour)	**मुझे … पसंद है** (*mujhe … pasand hai*)
English	to catch, to hold

Grammar Lens: எனக்குப் பிடிக்கும்

எனக்குத் தமிழ் பிடிக்கும். — *enakkut tamiḻ piḍikkum* — "I like Tamil."

Word for word: "**to me**, Tamil catches." The Tamil does the catching; you are caught. **பிடிக்கும்** carries **no person at all** — the person-less ending of **தெரியும்** — so only the dative word changes: *enakku piḍikkum*, *uṉakku piḍikkum*, *avaṉukku piḍikkum*.
That makes three: **தெரியும்**, **புரிகிறது**, **பிடிக்கும்** — knowing, understanding, liking. Three endings; each puts the experiencer in the dative and the thing in the subject. Chapter 6's **dative subject** was never an exception.

You'll want to know: விரும்பு

விரும்பு — *virumbu* — **to want, to like, to love**

An ordinary verb with an ordinary subject: **நான் விரும்புகிறேன்** (*nāṉ virumbugiṟēṉ*), "I want." Weak; its noun is **விருப்பம்** (*viruppam*), a wish. Not a synonym: **பிடிக்கும்** is taste, which you had no say in; **விரும்பு** is choice.

The word, taken apart — its roots and family

The grasp-verb is native and shared (DEDR 4148): Malayalam പിടിക്കുക (*piṭikkuka*) and Telugu పట్టు (*paṭṭu*) both mean "catch, hold." Kannada's is ಹಿಡಿ (*hiḍi*) — not a different word: Old Kannada wrote *piḍi*, and the **p** → **h** shift behind *pattu / hattu* and *pāl / hālu* turned it into *hiḍi*. A third instance of a rule you know.
The wider point: Spanish says *me gusta*, Italian *mi piace*, Hindi *mujhe pasand hai* — each putting the liker in the dative and the liked thing in the subject, exactly as *enakkut tamiḻ piḍikkum* does, and none of them related to Tamil. **Two unrelated families reached the same design independently.**

Your turn

Say these aloud:

- the three dative sentences — "enakku teriyum … purigiṟadu … piḍikkum"
- the other design — "nāṉ virumbugiṟēṉ", I want
- the chapter — "eḍukkiṟēṉ, kēṭkiṟēṉ, udavugiṟēṉ, piḍikkum"
- the Kannada shift — "piḍi … hiḍi", as "pattu … hattu"

Before you move on

Say "I like Tamil" and name its subject. (*Enakkut tamiḻ piḍikkum*, "to me, Tamil catches"; the subject is **Tamil**.) Name the three verbs built that way, and what *virumbu* does differently. (***Teriyum***, ***purigiṟadu***, ***piḍikkum***; *virumbu* takes an **ordinary subject**.)
Why is Kannada's *hiḍi* the same word as *piḍi*, and which unrelated language builds "I like" this way? (**The p → h shift**; **Spanish** *me gusta*.)

Chapter 35

Arriving at a House

Modes: 👁 **eyes** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can name a Tamil house, its door, a room and a chair, take நாற்காலி apart into 'four' and 'leg', place வீடு against Kannada ಬೀಡು on the v-to-b shift, and say why கதவு stayed everyday while Sanskrit-derived கபாடம் stayed in books.
>
> *Walk a guest from* வீடு *through* கதவு *into* அறை *and offer a* நாற்காலி*; split the chair into* நால் *and* கால் *and hear* ல் *harden to* ற் *at the join; hold the hard* ற *at the ridge rather than the roof; and name what the pu̱lli does at* ற்கா *and what Tamil refuses to do there.*

35.1 வீடு (vīḍu) — "house," and the place the greeting happens

Three verbs from the chapter you have just finished: *pidi*, "to like"; *uḍavu*, "to help"; *kēḷ*, "to ask." Say them. Now a noun, and the one a conversation usually starts inside.

You'll want to know: வீடு

வீடு — *vīḍu* — **house; home**

One word covers both. Tamil does not split the building from the belonging: **என் வீடு** (*en̲ vīḍu*) is "my house" and "my home" at once, and choosing between them is the translator's problem.

With the dative you already own:

வீட்டுக்கு — *vīṭṭukku* — **to the house**

The soft *ḍ* hardens and doubles to *ṭṭ* — the **படி** / **படித்தேன்** rule.

In the family, and next door

	word	**same root**
Kannada	**ಮನೆ** (*mane*)	
Malayalam	**വീട്** (*vīṭŭ*)	yes
Hindi (neighbour)	**घर** (*ghar*)	
English	house, home	

The letters in this word

வீ is **வ**, the first letter you learned, wearing the long *ī* sign ◌ீ. Then **டு**: **ட** with the *u* sign.

You are at a door about to say **வணக்கம்**, so read that word while you are here: **வ** + **ண** + **க்** + **க** + **ம்**. The **வ** that opens *vaṇakkam* is the **வ** that opens *vīḍu*.

The word, taken apart — its roots and family

வீடு is inherited, not borrowed:

the cousin	**language and sense**
വീട് *vīḍ*	Malayalam, "house"
వీడు *vīḍu*	Telugu, "town, camp"
ಬೀಡು *bīḍu*	Kannada, "abode, encampment"

Kannada has changed the front of the word: Tamil says **v**, Kannada says **b**. Not a slip — Kannada alone among its neighbours turned inherited word-initial *v-* into *b-*, and the inscriptions show it from about the seventh century. Store the correspondence — it keeps paying.

The **sense** has drifted where the form has not: Telugu's *vīḍu* is a town, Kannada's *bīḍu* an encampment. Tamil and Malayalam kept it on the dwelling.

One more thing, not a coincidence to explain away. Tamil has a second **வீடு** meaning "**release, deliverance**," as in **வீடுபேறு**. The Dravidian dictionary files house and release under **one entry**, headed by **விடு** (*viḍu*), "to let go." A house is where you are let go.

Your turn

Say these aloud:

- "vīḍu" — house and home in one word
- "en̲ vīḍu," then the hardening — "vīṭṭukku"
- the cousins, ending on the front-swap — "vīḍ … vīḍu … bīḍu"
- the root under the house — "viḍu, to let go"

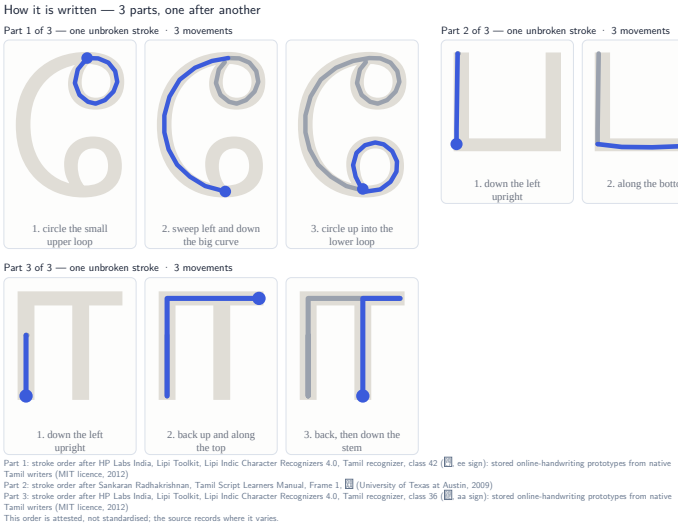

Before you move on

Why does one Tamil word do two English jobs here, and which letter opens both *vīḍu* and *vaṇakkam*? (**House** and **home** are not split; and வ.) What does Kannada put at the front instead of *v*, and is it a one-off? (**b** — *bīḍu*; **regular**, from the seventh century on.) Is the Tamil word for "release" the same root as the house? (**Yes** — both under விடு, "to let go.")

35.2 ᮔᮥᮀ — one sign, two marks

Every vowel sign so far has been one mark in one place: before the consonant, above it, or after it. This one is in two places at once, and you already own both halves.

Script you'll notice: the கோ sign

How கோ *is written, part by part, stroke by stroke*

கோ is the sign for long *ō*, and it **wraps** its consonant: a hook on the left, a stroke on the right, one vowel.

Those two halves are not a guess. The Unicode Character Database gives கோ a canonical decomposition, and it is exactly the two signs you have:

> கோ = கெ (the long-*ē* hook, written left) + ா (the long-*ā* stroke, written right)

So this is not one more mark to memorise. It is the sign you learned last lesson and the sign you learned in நான், put around the same letter — read the letter in the middle, and say the vowel once.

> Be exact about what that citation settles. A canonical decomposition says the character is **composed of** those two, for text processing; it says nothing about how either half is drawn or where it lands. `tamil.json` has no entry for கோ at all. So take the composition from Unicode and the placement — hook left, stroke right — from the page in front of you.

Script you'll notice: build the word

piece		
ப	*pa*	from பெயர்
◌ோ	long *ō*, wrapped around it	this lesson

ப + ◌ோ → போ

One letter and one wrapped sign, and the whole word is two marks on the page. போ is "go" — the போ inside *pōy varugiṟēṉ*, "I'll go and come back," the farewell chapter 1 closes on and chapter 4 takes apart.

Your turn

- *Read it:* பே — then போ — the hook alone, then the hook with the stroke
- *Say it:* "pō" — "go"
- *Contrast:* பே · பா · போ — left only, right only, both at once
- *Read it:* பேசு again, and notice its ◌ே is the same hook

Before you move on

Read போ. Which two signs is ◌ோ made of, and where does each one sit? (◌ே on the **left**, ◌ா on the **right**.) How many vowels do you say when you read it? (**One** — the two marks are one sign.) Which of its halves did you meet in நான்? (◌ா.) Next: the word for a door.

35.3 கதவு (kadavu) — "door," and a word Tamil never gave up

Vīḍu — house. Say the cousin that swaps the front letter. (*Bīḍu*, Kannada.) Now the part of the house you actually stand at.

You'll want to know: கதவு

கதவு — *kadavu* — **door**

The leaf that swings, and the thing somebody opens when you arrive.

வீட்டுக் கதவு — *vīṭṭuk kadavu* — **the house door**

Two nouns in a row, the first leaning on the second. Tamil builds a great deal this way, and you have seen it inside a single word: **தண்ணீர்** is *taṇ* plus *nīr*, "cool" plus "water."

In the family, and next door

	word
Kannada	**ಬಾಗಿಲು** (*bāgilu*)
Telugu	**తలుపు** (*talupu*)
Malayalam	**വാതിൽ** (*vātil*)
Hindi (neighbour)	**दरवाज़ा** (*darvāzā*)
English	door

The letters in this word

க + **த** + **வு**. The first letter is the one that taught you Tamil marks no voicing: **க** spells a hard *k*, a soft *g* and even an *h*, and **position decides**. Here it opens the word, so it is hard — *ka*, not *ga*.

The same rule then lands on the second letter. **த** is named *ta*, but it sits between two vowels, so it softens. That is why this book writes *ka**d**avu* and not *katavu*. One rule, two letters, one word.

The word, taken apart — its roots and family

கதவு is inherited Dravidian. Kannada's **ಕದ** (*kada*) is the same word with less on the end; Malayalam's **കതവ്** (*katavu*) matches Tamil closely.

Tamil also owns a second word for a door-leaf: **கபாடம்** (*kabāḍam*), taken from Sanskrit **कपाट** (*kapāṭa*). It exists, it is correct, and almost nobody says it. It lives in poetry and temple description; **கதவு** lives in the house.

That split is this language's habit. Where a neighbour borrowed a Sanskrit word and let the inherited one fade, Tamil often kept both and gave them different jobs — the inherited word for the everyday thing, the borrowed one for the elevated register. Do not turn that into

a rule that Tamil never borrows. It borrows; it rarely evicts.

Your turn

Say these aloud:

- "kadavu" — door
- "vīṭṭuk kadavu" — the house door
- the hard one and the soft one in one word — "ka … da"
- the everyday word, then the bookish one — "kadavu … kabāḍam"

Before you move on

Say "the house door," then explain why the க is hard and the த soft when neither changed shape. (*Vīṭṭuk kadavu*; **Tamil marks no voicing** — position decides.) Which of *kadavu* and *kabāḍam* would you hear at somebody's house, and where did the other come from? (***Kadavu***; *kabāḍam* is **Sanskrit**, and stays literary.) Does keeping both mean Tamil refuses to borrow? (**No** — it borrows without evicting.)

35.4 அறை (aṟai) — "room," and Tamil's second r

Vīḍu, house. *Kadavu*, door — the everyday word Tamil kept while the Sanskrit one stayed in books. Open that door and you are in this word.

You'll want to know: அறை

அறை — *aṟai* — **room**

Any room: in a house, in a hotel, a cell. Put it behind *vīḍu* the way you put *kadavu* there:

வீட்டு அறை — *vīṭṭu aṟai* — **a room of the house**

And with the dative, அறைக்கு (*aṟaikku*), “to the room.”

In the family, and next door

	word
Malayalam	മുറി (*muṟi*)
Hindi (neighbour)	कमरा (*kamrā*)
English	room

The letters in this word

அ is the standing vowel *a* — a letter in its own right, not a sign hung on a consonant. Then ற, then the *ai* sign ை, which wraps around the front of its consonant: ற + ை → றை.

ற is the hard *r* you first met inside நன்றி. It is not ர. Tamil keeps two r-letters and uses both.

The word, taken apart — its roots and family

அறை is inherited. Malayalam’s അറ (*aṟa*) is the same word, used for a chamber or an inner store-room, and it keeps the same hard r. So this is *kadavu*’s situation over: an everyday inherited word with a Sanskrit-derived alternative sitting unused in the higher register.

The letters in this word

Say the English word *hurry* and stop on the middle sound. That flick of the tongue against the ridge behind your teeth is close to Tamil ர (*ra*). Now make it stronger and longer, with real contact: that is ற (*ṟa*). Two cautions. **Do not curl your tongue back** — retroflex belongs to ண and ட; ற is made at the ridge. And **do not soften it into the English r of *red***, which is the wrong shape for both Tamil letters. Many Tamil speakers merge ர and ற in casual speech, so you will be understood either way. Learn the difference anyway: the **spelling** depends on it, and a word written with the wrong r is simply misspelled.

Your turn

Say these aloud:

- “aṟai” — room, on the hard r

- the two r's apart — "ra … ṟa"
- "vīṭṭu aṟai" — a room of the house
- the three so far — "vīḍu, kadavu, aṟai"

Before you move on

Say "a room of the house," and name which of Tamil's two r-letters is in *aṟai* and where else you have read it. (*Vīṭṭu aṟai*; ற, the hard one, in நன்றி.) Where is ற made, and what must your tongue not do? (At the **ridge** behind the teeth — **do not curl it back**.) If many speakers merge the two r's, why bother? (Because the **spelling** does not merge.)

35.5 நாற்காலி (nāṟkāli) — "chair," counted out in legs

Three words in the order you meet them arriving: *vīḍu*, *kadavu*, *aṟai*. Hold the hard r in *aṟai* at the ridge, not the roof. Now the one thing in that room a guest is always pointed at.

You'll want to know: நாற்காலி

நாற்காலி — *nāṟkāli* — **chair**

Five syllables for a chair, which sounds extravagant until you find out what it is made of.

நான் நாற்காலி எடுக்கிறேன். — *nāṉ nāṟkāli eḍukkiṟēṉ* — **I take a chair.**

In the family, and next door

Kannada	ಕುರ್ಚಿ (*kurci*)
Telugu	కుర్చీ (*kurcī*)
Malayalam	കസേര (*kasēra*)
Hindi (neighbour)	कुर्सी (*kursī*)

The letters in this word

நா + ற் + கா + லி. Every piece is one you have handled.

ந is the dental *n*, first of Tamil's three n-letters, wearing the long *ā* sign ா. ற் is the hard r of *a*ṟ*ai* under a **puḷḷi**, the dot that switches off the built-in vowel. கா is க with that same long *ā*. லி is ல with the *i* sign ி, the first vowel sign you learned, on the way to spelling நன்றி.

Now what does **not** happen at ற்கா. Two consonants meet, and Tamil keeps them as two letters with a dot between, rather than fusing them into a stacked shape as the scripts to the north do. That refusal is why a word this long stays readable one piece at a time.

The word, taken apart — its roots and family

The word is a compound, and both halves are yours:

the piece	what it is
நால் *nāl*	"four" — the form four takes in compounds
கால் *kāl*	"leg, foot; a support"

Four plus **leg**: a chair is a four-legged thing, said out loud. English cannot do that with *chair*, which travels through French and Latin to a Greek word for "seat" without ever showing a leg.

The seam is audible. நான்கு (*nā*ṉ*ku*) is the counting word; in a compound four appears as நால், and before க that ல் hardens to ற். Hence நாற்காலி, and hence நாற்பது (*nā*ṟ*padu*), "forty." Malayalam builds the chair from the same two pieces: നാൽക്കാലി.

Both halves are inherited Dravidian. Nothing in this chapter was borrowed.

Your turn

Say these aloud:

- the seam — "nāṉku … nāl … kāl … nāṟkāli"
- "nāṉ nāṟkāli eḍukkiṟēṉ" — I take a chair
- the arrival, in order — "vīḍu, kadavu, aṟai, nāṟkāli"
- the Kannada front-swap on the first of them — "vīḍu … bīḍu"

Before you move on

Take *nāṟkāli* apart, then walk somebody into your house four nouns deep. (நால், "four," plus கால், "leg"; *vīḍu, kadavu, aṟai, nāṟkāli.*) What does the dot in ற் do, and what does Tamil refuse to do at that join? (**Switches off the built-in vowel**; Tamil **does not stack** the two consonants.) Which of this chapter's words was borrowed? (**None.**)

Chapter 36

What You Are Offered

Modes: 👁 **eyes** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can ask for தேநீர், பால் or உணவு in Tamil, say என் தவறு with no verb in it, find நீர் inside both தண்ணீர் and தேநீர், and state which of this chapter's words was borrowed and which the dictionaries cannot account for.
>
> *Repair a wrong order —* மன்னிக்கவும், என் தவறு *— and account for the chapter honestly:* பால் *and* உண் *inherited,* தேநீர் *half a loan through a Malay port,* சாப்பிடு *with no entry in the Dravidian dictionary at all, and* மன்னி *native where the neighbours took Sanskrit kṣamā.*

36.1 தேநீர் (tēnīr) — "tea," half of it already yours

Nāṟkāli, and what its halves mean. (Four, and leg.) You are in the *aṟai* with the chair, and the next thing in a Tamil house is this.

You'll want to know: தேநீர்

தேநீர் — *tēnīr* — **tea**

The second half is yours from the water lesson: நீர் (*nīr*), "water," the plain older word inside தண்ணீர் (*taṇṇīr*) — *taṇ*, "cool," plus *nīr*. So தேநீர் is, literally, **tea water**.

தேநீர், தயவுசெய்து. — *tēnīr, tayavuseytu* — **Tea, please.**

In speech you will also hear plain டீ (*ṭī*), straight from English *tea*. தேநீர் is the fuller word — a sign, a menu, a formal host.

English	tea

The letters in this word

தே is த with the *ē* sign ே, which stands in front of its consonant. நீ is ந with the long *ī* sign; ர் is ர shut by a puḷḷi — the soft r, not the hard ற.

Two words beside it are worth reading. நன்றி is ந + ன் + றி, what you say when the tea arrives. In தயவுசெய்து, செய் is *ce* plus ய் shut by that same dot before து.

The word, taken apart — its roots and family

நீர் is inherited and very old. தே is not Tamil at all: it is the combining form of தேய் (*tēy*), borrowed from Malay **teh**, which took it from the Hokkien of the southern Chinese coast, where the leaf is *tê*. The world's words for tea come in two shapes, decided by **how the tea reached each language**. The southern Chinese coast carried *te*: Dutch *thee*, and through Dutch, English *tea* and French *thé* — and by the Malay ports, Tamil's தே. The overland routes carried *cha*: Persian and Hindi *chāy*, Russian *chay*. Portuguese says **chá** despite being a sea power, because its traders worked out of Macau. Where the ship docked decided the word.

Tamil then did what the European *te*-languages did not: rather than take the loan whole, it welded it to நீர் — a word that has travelled outward as well, since English **mulligatawny** is Tamil மிளகுத்தண்ணீர், "pepper water."

Weigh that against the rice word. அரிசி *may* stand behind English *rice* through Greek, and the dictionaries hedge. The tea routes are documented. **Different histories, different confidence.**

Your turn

Say these aloud:

- the shared half — "nīr … taṇṇīr … tēnīr"
- "tēnīr, tayavuseytu" — tea, please
- the two routes — "te … cha"
- the pepper water in an English soup — "miḷagut taṇṇīr"

Before you move on

Name the second half of *tēnīr* and the word that shares it, then ask for tea politely. (**நீர்**, inside **தண்ணீர்**; *tēnīr, tayavuseytu*.) Why do some languages say *te* and others *cha*, and which is better established — the tea split or *arisi*-to-*rice*? (**The route the tea travelled**; and **the tea split**.)

36.2 பால் (pāl) — "milk," and a p that becomes an h next door

Tēnīr. Which half is borrowed, and which is the old Tamil word for water? (*Tē* is the traveller; *nīr* is Tamil's own.) Here is what goes into it.

You'll want to know: பால்

பால் — *pāl* — **milk**

One syllable, one long *ā*, a final **ல்** with no vowel after it. Say it short and closed: *pāl*, never *pāla*.

பால் தேநீர் — *pāl tēnīr* — **milk tea**

With **தண்ணீர்** (*taṇṇīr*, cool water) already in hand, you can now name what a Tamil household is likely to put in front of a guest.

In the family, and next door

	word	**same root**
Kannada	ಹಾಲು (*hālu*)	yes
Telugu	పాలు (*pālu*)	yes
Malayalam	പാൽ (*pāl*)	yes
Hindi (neighbour)	दूध (*dūdh*)	
English	milk	

The letters in this word

பா is ப with the long *ā* sign ◌ா. Then ல்: ல with the **puḷḷi**, the dot that removes the built-in *a* and leaves a bare consonant.

That dot is the whole reason the word ends where it does. Without it, பால would be *pāla*, two syllables. A single dot carries the difference between a word and a non-word.

The word, taken apart — its roots and family

பால் is inherited Dravidian, and its relatives are close:

the cousin	**language**
പാൽ *pāl*	Malayalam
పాలు *pālu*	Telugu
ಹಾಲು *hālu*	Kannada, modern

Kannada has changed the front of the word once more, this time **p** into **h** — the textbook example of the best-known sound change in the family. **Old Kannada said *pālu***, exactly as Tamil does; the *p-* began turning into *h-* around the tenth century and the change had run through the whole vocabulary by the fourteenth.

Put it beside the change you met at the house. Tamil **v**, Kannada **b**, in *vīḍu* / *bīḍu*. Tamil **p**, Kannada **h**, in *pāl* / *hālu*. Both are regular correspondences at the front of a word, and between them they let you recognise a Kannada word as a relative rather than a stranger. Telugu and Malayalam did neither: they keep the *p*, as Tamil does.

Your turn

Say these aloud:

- "pāl" — stopped by the dot, not *pāla*
- "pāl tēnīr" — milk tea

- the two front-swaps together — "vīḍu, bīḍu … pāl, hālu"
- what you can be offered — "taṇṇīr, tēnīr, pāl"

Before you move on

Say "milk tea," then say what the dot on ல் is doing and what the word would be without it. (*Pāl tēnīr*; it **removes the built-in vowel**, and without it, *pāla.*) What does Kannada put at the front instead of *p*, and is it a one-off? (**h** — *hālu*; **regular**, from the tenth century to the fourteenth.) Name the other Kannada front-swap. (**v** to **b** — *vīḍu*, *bīḍu.*)

36.3 உணவு (uṇavu) — "food," from the verb underneath it

Pāl — milk — and the Kannada shape of it. (*Hālu.*) Drink is settled. Now the word for everything else on the plate.

You'll want to know: உணவு

உணவு — *uṇavu* — **food**

The general word: food as a category, not a dish. It covers the rice words you have — அரிசி (*arisi*), the raw grain, and சாதம் (*sātam*), the cooked meal — and all that is served beside them.

உணவு, தயவுசெய்து. — *uṇavu, tayavuseytu* — **Food, please.**

Note the register. உணவு is the careful, written word — a menu, a sign. Around a family table people say சாப்பாடு (*sāppāḍu*).

In the family, and next door

	word
Malayalam	ഭക്ഷണം (*bhakṣaṇam*)
English	food

The letters in this word

உ is a standing vowel — a full letter, not a sign. Then ண, then வு, which is வ with the *u* sign underneath. ண is the retroflex n you first wrote alongside ம, and the letter inside தண்ணீர்.

The letters in this word

Curl the tip of your tongue **back** to the roof of your mouth and release into the vowel. That is ண, and *uṇavu* gives it a clean run because the letter sits between two vowels. Contrast the ன of நன்றி and the ந of நீர், both made near the teeth.

The word, taken apart — its roots and family

உணவு is உண் (*uṇ*), "to eat," with a noun-forming ending. Food is literally *the eating*. Tamil has two eating verbs, of different ages:

the verb	**where it lives**
உண் *uṇ*	old, inherited, literary now
சாப்பிடு *sāppiḍu*	the everyday spoken verb

உண் is a bare inherited root, and the Dravidian dictionary lists *uṇavu* inside its entry.

சாப்பிடு is where the ground softens, so hold Chapter 32's earlier account loosely. You were shown *sāppu*, "food," plus இடு (*iḍu*), "to put." The இடு is visible in the spelling; the first half is the problem. The great Tamil lexicon records no plain word *sāppu* meaning "food," and the Dravidian etymological dictionary has **no entry for this verb at all**. It is not Sanskrit — Telugu and Malayalam have their own forms — but its origin is open. The word you would use at a table has the weaker paperwork.

Your turn

Say these aloud:

- the root and the noun — "uṇ … uṇavu"
- the retroflex, tongue curled back — "uṇavu"
- the documented one, then the everyday one — "uṇ … sāppiḍu"
- raw grain, then cooked meal — "arisi … sātam"

Before you move on

What verb is *uṇavu* built on, and where does your tongue go for ண? (உண்; **curled back**.) Which eating verb would you use at a table, and how sure is anyone where it came from? (சாப்பிடு — **not at all**: the Dravidian dictionary has no entry.) Give the raw grain and the cooked meal. (*Arisi*; *sātam*.)

36.4 உணவு — the same vowel, twice, two ways

You have the ◌ sign — the *u* that hangs off a consonant, as in ரு. But a word that *starts* on *u* has no consonant to hang it from, and by now you know what Tamil does about that.

Script you'll notice: உ

உ is the standing letter for short *u*. It is the rule you met with ஆ in ஆம், working again: a vowel that opens a word is written as a **full letter**, never as a sign.

உ	the letter — opens a word
◌	the sign — rides a consonant

The word you already say holds both. That is the whole lesson.

Read it; do not draw it yet. உ has no entry in this book's script data, so it gets no stroke order here.

Script you'll notice: build the word

piece		
உ	*u*	independent — the word opens on a vowel
ண	*ṇa*, the retroflex *n*	first met beside ம
வு	*vu* — வ with the ◌ sign	வ was your first letter

உ · ண · வு → உணவு

Three pieces, and the first and last are the same vowel doing its two jobs: once standing on its own, once hanging off வ. The page keeps them apart so your eye can.

Your turn

- *Read it:* உ — then உணவு
- *Say it:* "uṇavu" — "food"
- *Contrast:* உ and வு — the letter that opens, the sign that rides
- *Contrast:* ஆம் and உணவு — the same opening rule, two vowels apart

Before you move on

Read உணவு. Why does it open with உ rather than the ◌ sign? (**The word starts on a vowel** — there is nothing for a sign to hang on.) Where else in the same word does that vowel appear, and in which form? (**On** வு, as the ◌ sign.) Which earlier word set this rule? (ஆம்.) Next: the word for a mistake.

36.5 தவறு (tava̲ru) — "a mistake," and the rest of the apology

The chapter back: *tēnīr*, *pāl*, *uṇavu*. Suppose one arrives and it is not what you asked for. You have "sorry," but not the word for what went wrong.

You'll want to know: தவறு

தவறு — *tava̲ru* — **a mistake, an error, a fault**

With என் (*e̲n*), "my," and no verb — Tamil needs none:

மன்னிக்கவும், என் தவறு. பால் இல்லை, தேநீர்.

ma̲n̲nikkavum, e̲n tava̲ru. pāl illai, tēnīr.

Sorry, my mistake. Not milk — tea.

மன்னிக்கவும் is the careful, written-leaning apology; in speech many Tamil speakers simply say *sorry*, in English. என் தவறு suits either.

In the family, and next door

	word
Telugu	తప్పు (*tappu*)
English	a mistake

The letters in this word

த + வ + று. The last piece is ற, the hard r of *a*r̲*ai*, with the *u* sign — made at the ridge behind the teeth, tongue flat, not curled.

The apology in front of it does something this word does not. மன்னிக்கவும் has ன்னி: the alveolar ன switched off by a dot, then written a second time with the *i* sign. Tamil doubles a consonant by **repeating the letter with a dot on the first**, never by inventing a joined shape — the க்க of வணக்கம் over.

The word, taken apart — its roots and family

தவறு is inherited Dravidian, a verb and a noun in one shape: "to slip, to fail," and "a slip, a mistake." The dictionary files it beside தப்பு (*tappu*); its cousins are everywhere.

Now the chapter in a line. மன்னிக்கவும் was the showpiece: Tamil kept its own மன்னி where Kannada, Telugu and Malayalam reached for Sanskrit **kṣamā**. தவறு is inherited too, and so is உண் inside *uṇavu*, and பால். But தேநீர் is half a loan from a Malay port, and சாதம் was flagged as Sanskrit-influenced when you met it.

So the honest statement is not "Tamil does not borrow." It is that **Tamil borrows without evicting**: the inherited word stays, and the loan takes a different job or register.

Your turn

Say these aloud:

- "en̲ tava̲ru" — my mistake, with no verb in it
- the whole repair — "ma̲n̲nikkavum, en̲ tava̲ru"
- the two words for a mistake — "tava̲ru … tappu"

- the borrowed one among this chapter's words — "tēnīr"

Before you move on

Apologise, name the fault, and say why there is no word for "is" in it. (*Maṉṉikkavum, eṉ tavaṟu*; **Tamil needs none**.) How does Tamil write a doubled consonant, as in **ன்னி** and **க்க**? (**The letter a second time**, dot on the first.) Which apology verb is native where the neighbours took Sanskrit, and does that make Tamil a language that never borrows? (**மன்னி**, against **kṣamā**; **no** — it **borrows without evicting**.)

Chapter 37

Your Town, Your Friend

Modes: 👁 **eyes** (5) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can ask உங்கள் ஊர் என்ன? and introduce someone with இவர் என் நண்பர், choose between நண்பன், நண்பி and நண்பர், run Tamil's இ / அ / எ pointing series, and hear ண் voice the ப that follows it.
>
> *Say* இவர் என் நண்பர் *with no verb in it, pick the ending by respect rather than by habit, name the -ūr inside Tanjore and Bengaḷūru, and state what Tamil forces you to decide for a sibling that it does not force for a friend.*

37.1 ஊர் (ūr) — "town," and the question Tamil asks early

> *En̲ tavaṟu* — my mistake, a word that is a verb and a noun at once. Then the general word for food. (*Uṇavu.*) Now back to meeting somebody.

You'll want to know: ஊர்

ஊர் — *ūr* — **town, village; the place you are from**

That last sense matters most. **உங்கள் ஊர்** is your **native place**, where your family is from, which may be somewhere you have never lived.

உங்கள் ஊர் என்ன — *uṅgaḷ ūr en̲n̲a* — **What is your town**

It lands early in a Tamil conversation and is not nosiness — the slot English fills with "what do you do.

In the family, and next door

	word	same root
Kannada	ಊರು (*ūru*)	yes
Telugu	పట్టణం (*paṭṭaṇaṁ*)	
Malayalam	ഊര് (*ūrŭ*)	yes
English	town, village	

The letters in this word

ஊ is a standing vowel — long *ū*, partner of the உ that opens *uṇavu*. ர் is ர, the soft r, shut by a puḷḷi. Hold the vowel: *ūr*, not *ur*. Vowel length is part of a word's identity here.

Grammar Lens: the two registers, side by side

You met this choice on the age question:

the question	who you say it to
உன் ஊர் என்ன *uṉ ūr eṉṉa*	a friend, a child, a peer
உங்கள் ஊர் என்ன *uṅgaḷ ūr eṉṉa*	a stranger, an elder, anyone senior

Both are possessive plus noun plus question word, with **no verb** — the shape you learned for உன் வயசு என்ன. Only the possessive changes, and with it the social temperature. When unsure, use உங்கள்.

The word, taken apart — its roots and family

ஊர் is inherited Dravidian, and welded into city names you know in English:

the English name	what it is
Tanjore	Tamil தஞ்சாவூர் *Tañjāvūr*
Vellore	Tamil வேலூர் *Vēlūr*
Bangalore	Kannada ಬೆಂಗಳೂರು *Bengaḷūru*

Every one of those *-ore* endings is this word: the British ear turned *-ūr* into *-ore*, and the cities have taken their own names back.

Two exactnesses. Bangalore is a **Kannada** town, so its *-ūru* is Kannada's form of the inherited word — the family's, not Tamil's alone. And the *first* halves are not all settled; *Vēl-* in Vellore is argued over. The ending is the certain part.
Weigh that against the rice word. அரிசி *may* stand behind English *rice* through Greek, and the dictionaries hedge. Nobody hedges about *-ūr*.

Your turn

Say these aloud:

- the long vowel — "ūr," not "ur"
- to a stranger — "uṅgaḷ ūr eṉṉa"
- to a friend — "uṉ ūr eṉṉa"
- the ending inside the map — "Tañjāvūr … Vēlūr … Bengaḷūru"

Before you move on

Ask a stranger where they are from, then a friend, and say what ஊர் means beyond "town." (*Uṅgaḷ ūr eṉṉa*; *uṉ ūr eṉṉa*; **your native place**.) Which earlier question has this shape, and is *-ore* in Tanjore really this word? (உன் வயசு என்ன; **yes**.) How sure are we there, next to *arisi* and *rice*? (**Much surer.**)

37.2 நண்பன் (naṇbaṉ) — "friend," with the ending doing the work

A stranger's native place, then the ending inside Tanjore. (*Uṅgaḷ ūr eṉṉa*; *-ūr*.) Now the person you would introduce.

You'll want to know: நண்பன்

நண்பன் — *naṇbaṉ* — **friend** (a man)

Tamil will not let you say a bare "friend" any more than a bare "brother." The stem is நண்ப-; the ending decides.

the form	who it is
நண்பன் *naṇbaṉ*	a male friend
நண்பி *naṇbi*	a female friend
நண்பர் *naṇbar*	a friend spoken of with respect

The **-அர்** is the respectful plural that turns நீ into நீங்கள், applied to a person.

This is a different axis from the family words. அண்ணன் and தம்பி split brothers by **age**; the friend words split by **sex**, நண்பர் by **respect**.

The letters in this word

ந + ண்ண + ப + ன் — every one of Tamil's n-letters inside one word. ந opens it, dental, at the teeth. ண்ண is retroflex, tongue curled back, closed by a puḷḷi. ன் ends it, the alveolar n from நன்றி. The writing lesson gave them to you one at a time; here they arrive together.

The letters in this word

The letter after ண்ண is ப, named *pa*. This book writes *naṇ**b**aṉ* because of the நன்றி rule: a nasal in front of a stop **voices it**. A Tamil reader supplies the voicing, as an English reader supplies the *sh* in *sugar*.

The word, taken apart — its roots and family

Behind நண்பன் is நண்பு (*naṇbu*), "friendship, closeness," which belongs to the root family of நண்ணு (*naṇṇu*), "**to draw near**." A friend, in Tamil's own accounting, is someone who came close.

Be precise. DEDR 3588 files *naṇbu* and *naṇbaṉ* in the same entry as *naṇṇu*; the Tamil lexicon prefers **நள்-**, making them siblings rather than parent and child. They differ on the line of descent, not on the household.

Set it beside அப்பா and அம்மா, not built out of anything — the repeated-syllable shape children produce for parents worldwide. நண்பன் is assembled, from a root you can point at.

Your turn

Say these aloud:

- the three endings — "naṇban̲, naṇbi, naṇbar"
- the voicing after the nasal — "nan̲̲ri … naṇban̲"
- the root it came from — "naṇṇu, to draw near"
- the family words that split on age instead — "aṇṇan̲, tambi"

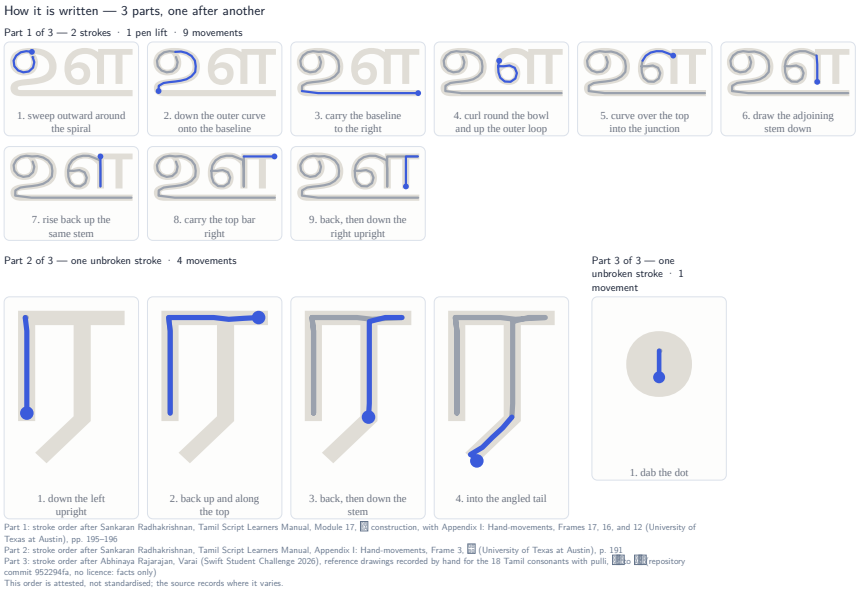

Before you move on

Give the friend-word for a woman, a man, and someone you respect. (*Naṇbi*; *naṇban̲*; *naṇbar*.) Which axis do the friend words split on, and which do the brother words? (**Sex and respect**; **age**.) Why is ப heard as *b*, and are அப்பா and அம்மா built from a root the way *naṇban̲* is? (**A nasal voices the stop after it**; **no**.)

37.3 ஊர் — the long partner

உ opened உணவு last chapter. Tamil writes its long vowels as separate letters from the short ones, so *ū* gets a letter of its own.

Script you'll notice: உள

How உளர் *is written, part by part, stroke by stroke*

உள is the standing letter for long *ū*, and it is the long partner of உ — the fourth short-and-long pair the strand has handed you, after அ/ஆ, ி/ீ and ெ/ே.

உ	short *u*
உள	long *ū*

Read it. The strip writes உள, ர and the puḷḷi in turn, numbered movement by movement. Its source for உள builds the letter as the page suggests: உ first, then the ள form written over it.

Script you'll notice: build the word

piece		
உள	*ū*	independent — the word opens on a vowel
ர்	bare *r* — ர under a puḷḷi	ர from சரி

உள · ர் → உளர்

Two pieces, and both were waiting for you. உளர் is the word for your own town, and holding it against உணவு shows the length doing real work: change the vowel and you change the word.

Your turn

- *Read it:* உள — then உளர்
- *Say it:* "ūr" — "town"
- *Contrast:* உ and உள — short and long, two letters
- *Read it:* உணவு and உளர் together — the pair, side by side

Before you move on

Read உளர். Which letter is உள's short partner, and where did you read it? (உ, opening உணவு.) Why is the vowel a full letter here rather than a sign? (**The word starts on it**.) What is the dot on ர் doing? (**Removing the built-in *a***.) Next: pointing someone out politely.

37.4 இவர் (ivar) — "this person," and Tamil's pointing system

Naṇbaṉ, *naṇbi*, *naṇbar* — and the root behind them. (*Naṇṇu*, to draw near.) You have the word for a friend, but cannot point at one.

You'll want to know: இவர்

இவர் — *ivar* — **this person** (near me, spoken of respectfully)

Not "he" and not "she": இவர் is what you say about a person standing here whom you are treating with respect, and it does not commit you to their sex. It is built on இவன் (*ivaṉ*) and இவள் (*ivaḷ*), with the same -அர் that gave you நண்பர்.

One caution about speech: இவர் is heard mostly of men, and இவங்க (*ivaṅga*) does the same respectful job for a woman.

The letters in this word

இ + வ + ர். இ is the standing vowel *i* — the letter, not the ி sign that hangs on a consonant. வ is the *va* opening வணக்கம் and வீடு. ர் is the soft r with a pulḷi.

A word this short is almost all arc. Recall the usual explanation for that roundness: Tamil was scratched into palm leaf, and a straight stroke along the grain can split the leaf. Hold it as the writing lesson asked — **the standard account, not a settled fact**, since the earliest Tamil writing was cut into stone and is angular. What survives is the useful part: **the tool leaves fingerprints on the letters**.

Grammar Lens: near, far, and which

இவர் is one cell of a system inherited from Dravidian (DEDR 410), and the system is a single letter at the front:

the front letter	what it does
இ-	points **near** — this one, here
அ-	points **away** — that one, there
எ-	**asks** — which one

So இவர் is "this person"; the other two fronts give "that" and "which person." You have been using one front already: என்ன (*enn̲a*), "what," is the எ- of asking.

Two honest notes. எ- is the **question**, not a third distance. And Old Tamil had a genuine third distance, உ-, for something visible but far off; modern Tamil has retired it.

Your turn

Say these aloud:

- the three fronts — "i- … a- … e-"
- the row they build — "ivar, avar, evar"
- the question word you already had — "enn̲a"
- the respectful ending on both — "naṉbar … ivar"

Before you move on

What do இ-, அ- and எ- do at the front of a word, and which question word you already knew is built on எ-? (**Near**; **away**; **asks** — and என்ன.) Does இவர் tell you whether the person is a man or a woman? (**No** — it marks **respect**; spoken Tamil leans இவங்க for a woman.) How firmly should you hold the palm-leaf explanation for the curves? (As **the standard account, not a settled fact**.)

37.5 அவர் (avar) — the far half of a table you already have

Two words from a few chapters back. *Ninai* does which two English jobs? (**Think** and **remember** — *ninaivu* is memory.) And is *eḻudu*, to write, filed under *eḻu*, to rise? (**No** — the dictionary keeps them as two separate entries.)

Say the word for *this person*, the respectful one.

Now say which front letter points **near** and which points **away**. You were given both. **The lesson before this one filled in only the near half.**

You'll want to know: அவர்

அவர் — *avar* — **that person** (away from you, spoken of respectfully)

One letter is the whole change. இவர் becomes அவர், and *this person here* becomes *that person there* — or, far more often, plain **he** or **she** about somebody who is not in the room.

Like இவர், it does not commit you to their sex, and like இவர் it carries respect. The caution is the same one the earlier lesson gave: அவர் is heard mostly of men, and அவங்க (*avaṅga*) does the same respectful job for a woman in speech.

The word, taken apart — its roots and family

அவர் (*avar*) is native Dravidian: the far base *a-* with the respectful *-ar* (DEDR 1). Malayalam and Kannada have *avar* too.

Grammar Lens: the column that was empty

	near	far
a person, respectfully	இவர்	அவர்

The pointing system arrived a long way back, and it arrived as a **rule about a front letter** with only the near column filled in. A reader could say *this person* and could say what அ- would mean, and had no அ- word to say.

That is the ordinary way a gap survives: the pattern gets taught, the pattern is correct, and nobody notices that half of what it predicts was never handed over.

Filling it costs one letter, and from here அவர் is the word you reach for whenever you talk about somebody who is not present — which is most of the talking anybody does.

Your turn

Say these aloud:

- அவர்
- the near partner of it
- which single letter is the difference
- whether அவர் tells you the person is a man or a woman (it does not)

Before you move on

What does அவர் mean? (*That person*, respectfully — or plain *he* or *she* about somebody elsewhere.) Which front letter does it carry, and what does that letter do? (அ-, which points away.)

37.6 இவர் என் நண்பர் — "this is my friend"

Ivar, avar, evar — near, away, the question. Then *naṇban̲, naṇbi, naṇbar*. Everything this lesson needs is in your mouth; what is left is the order.

You'll want to know: the introduction

இவர் என் நண்பர். — *ivar eṉ naṇbar* — **This is my friend.**

Three words, all inherited from Dravidian, and **not one of them is a verb**. Tamil links two nouns by setting them beside each other, as in என் பெயர் **...** and என் தவறு.

The pieces in order: இவர், the person here; என், my; நண்பர், friend-with-respect. Then stop.

The whole meeting:

— வணக்கம். இவர் என் நண்பர்.

— வணக்கம். உங்கள் ஊர் என்ன.

The letters in this word

என் is எ with ன், the alveolar n dotted shut. நண்பர் opens on dental ந, turns on retroflex ண், closes on ர். So one line makes you produce ன் and ண் within a breath of each other — one at the ridge, the other with the tongue curled back. Hear that difference and the three-way n is no longer theory.

Why it's said this way

நண்பர் rather than நண்பன் is a decision, not a default.

- இவர் என் நண்பன். — a male friend, plainly stated; warm among peers.
- இவர் என் நண்பி. — a female friend, the matching plain form.
- இவர் என் நண்பர். — the respectful ending; safe with anyone, and right when either party is older or senior.

If unsure, take நண்பர். Over-respect is invisible; under-respect is not. Notice how differently Tamil makes you think from one word to the next. For a **sibling** it forces **age**: there is no bare "brother" — you must choose அண்ணன் or தம்பி, அக்கா or தங்கை, and say whether they are older or younger than you before you can say anything at all. For a **friend** it forces **sex or respect**. For **parents**, nothing: அப்பா and அம்மா came into the language whole. Tamil rarely lets you be vague about a relationship.

Your turn

Say these aloud:

- the introduction — “ivar eṉ naṇbar”
- the same line to a peer about a male friend — “ivar eṉ naṇbaṉ”
- the greeting and the question around it — “vaṇakkam … uṅgaḷ ūr eṉṉa”
- what a sibling word forces you to decide — “aṇṇaṉ, older; tambi, younger”

Before you move on

Introduce a friend respectfully, and say how many verbs the sentence has. (*Ivar eṉ naṇbar*; **none**.) What does a sibling word force you to decide that a friend word does not? (**Whether they are older or younger** — *aṇṇaṉ* against *tambi*.) Which friend ending is safe when unsure, and what does இ- tell your listener? (நண்பர்; that the person is **near**.)

Chapter 38

Keeping Well, and Leaving

Modes: 👁 **eyes** (3) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 4 lessons.

> ***By the end of this chapter:*** I can ask உங்கள் உடம்பு எப்படி இருக்கு?, recognise சுகமா? and place it as the Sanskrit-derived option beside native நலம், say விடை பெறுகிறேன், and show that விடு, வீடு and விடை are one root while ஊர் and நண்பன் are not.
>
> *Close the visit with* நன்றி. விடை பெறுகிறேன்.*, put* விடு*,* வீடு *and* விடை *in one dictionary entry, refuse the second* விடை *that means 'bull' and came from Sanskrit, and refuse to join* ஊர் *and* நண்பன் *to the pattern just because they are nearby.*

38.1 உடம்பு (uḍambu) — "body," and how Tamil asks after your health

> Introduce a friend respectfully and name the ending. (*Ivar en̲ naṇbar* — the respectful **-அர்**.) Next you would ask how they are.

You'll want to know: உடம்பு

> **உடம்பு** — *uḍambu* — **body**

The whole of it, not a part. You have **தலை** (*talai*) and **கை** (*kai*) already; this is what they belong to, and the word inside the question Tamil speakers actually ask:

> உங்கள் உடம்பு எப்படி இருக்கு — *uṅgaḷ uḍambu eppaḍi irukku* — **how is your body**, that is, **how are you keeping**

Every piece is yours: உங்கள், எப்படி, and இருக்கு from இரு. What is new is that the health question hangs on a **noun** rather than on you.

Tamil has a second way to ask it, through உணவு — the noun standing on உண், "to eat." Asking whether somebody has eaten is asking whether they are all right.

In the family, and next door

	word
Telugu	ఒళ్ళు (*oḷḷu*)
English	body

The letters in this word

உ + ட + ம் + பு: the standing vowel *u*, ட, then ம் — ம shut by the puḷḷi you have used since வணக்கம் — and பு. ம was one of the first letters you formed with a pen, alongside retroflex ண.

The letters in this word

The letters say *u-ṭa-m-pu*; your mouth says *u**ḍ**amb**u*. ட sits between vowels, so it softens — the *paḍi* rule. ப follows the nasal ம், so it voices — the *naṉ̲ṟi* rule that also made *naṇbaṉ̲*. Two rules, one short word, neither written down.

The word, taken apart — its roots and family

Tamil has another word for the body, உடல் (*uḍal*), and DEDR 586 does not treat them as rivals: உடல், உடம்பு and உடலம் sit in the **same entry**, with Kannada's ಒಡಲು beside them. Usage has divided them: உடல் leans literary, உடம்பு is what you say aloud about someone unwell.

Grammar Lens: where the person goes in a health question

Two shapes Tamil uses to ask about a state:

the question	where the person sits
உங்கள் உடம்பு எப்படி இருக்கு	as a **possessor**
உனக்கு எத்தனை வயது ஆகிறது	in the **dative**

The formal age question does not make you the subject at all — "**to you**, how many years are becoming." The body question makes உடம்பு the subject.

Your turn

Say these aloud:

- the two softenings — "uṭampu … uḍambu"
- the question — "uṅgaḷ uḍambu eppaḍi irukku"
- the parts, the whole, and the two forms of one root — "talai, kai … uḍambu … uḍal"

Before you move on

Ask someone respectfully how they are keeping, through the body, and name the two sound rules inside *uḍambu*. (*Uṅgaḷ uḍambu eppaḍi irukku*; ட softens **between vowels**, ப voices **after a nasal**.) Are உடல் and உடம்பு different words, and where does the person sit in the formal age question? (**No**, same entry; **in the dative**.)

38.2 சுகம் (sugam) — "ease," the word Tamil did borrow

Health through the body, and the other body-word in its entry. (*Uṅgaḷ uḍambu eppaḍi irukku*; *uḍal*.) A second answer came from abroad.

You'll want to know: சுகம்

சுகம் — *sugam* — **wellbeing, ease, comfort**

The க is doing its old trick: the letter is *ka*, but between vowels it comes out **g**. *Su-**g**-am*, not *su-ka-m*.

சுகமா — *sugamā* — **keeping well**

It is **not** the ordinary Tamil "how are you," which is **நல்லா இருக்கீங்களா**. **சுகமா** is warmer and more Sanskritic, and which you hear depends on somebody's **ஊர்** — the native place whose name so often ends in *-ūr*.

In the family, and next door

	word
Telugu	**క్షేమం** (*kṣēmam*)
English	wellbeing, ease

The letters in this word

சு + **க** + **ம்**: **ச** with the *u* sign, a bare **க**, **ம** closed by the puḷḷi. Nothing is doubled — hold that against **மன்னிக்கவும்**, where **ன்னி** has **ன** dotted shut and written a second time, and **க்க** does the same to **க**.

Grammar Lens: where the dative is required

சுகமா has no dative in it, and a family of Tamil states demands one: **எனக்குத் தமிழ் தெரியும்**, "to me, Tamil is known." Put a noun there and the shapes part:

the phrase	**what happened**
நான் to **எனக்கு**	the pronoun **changes its body**
நண்பர் to **நண்பருக்கு**	the noun just **takes -உக்கு**

So **நண்பருக்குத் தமிழ் தெரியும்**, and the formal age question does the same: **உனக்கு எத்தனை வயது ஆகிறது**. **சுகமா** does not: knowing and ageing come *to* a person; being well is what a person **is**.

The word, taken apart — its roots and family

சுகம் is Sanskrit **सुख** (*sukha*), "ease" — the apology lesson in reverse. There, **மன்னிக்கவும்** stood on Tamil's own **மன்னி** while the neighbours built their "sorry" on Sanskrit **kṣamā**. Here Tamil borrowed *sukha* and **kept** நலம் as the everyday word; Malayalam took the same loan, **സുഖം**, as its ordinary greeting.

The old parse of *sukha* is *su-* "good" plus *kha* "aperture" — a chariot's axle-hole. **Treat that as contested**: the standard Sanskrit dictionary hedges it with "said to be," and offers *su-stha*.

Your turn

Say these aloud:

- the softened க — "sugam," not "sukam"
- the state that needs a dative — "naṇbarukkut tamiḻ teriyum"
- the state that does not, and the word kept beside it — "sugamā … nalam"

Before you move on

Why is க heard as *g*, and what did the noun do that நான் does not? (**Between vowels**; it **takes -உக்கு**, while நான் becomes எனக்கு.) Which word did Tamil borrow, which did it keep, and how firm is the "good axle-hole" story? (சுகம்; நலம்; **contested**.)

38.3 விடை (viḍai) — "leave," and the root under the house

Sugam — which language it came from, and which Tamil word stayed beside it. (Sanskrit; நலம்.) You came through the door, took the நாற்காலி — four legs, counted out — were given tea, said என் தவறு when the wrong cup arrived, and introduced a friend. One thing is left.

You'll want to know: விடை

விடை — *viḍai* — **leave; permission to depart**

Not the act of going — you have போய் வருகிறேன் for that — but the **leave itself**, taken with பெறு (*peṟu*), "to obtain":

நன்றி. விடை பெறுகிறேன். — *naṉṟi. viḍai peṟugiṟēṉ.* — **Thank you. I take my leave.**

It is **formal and slightly literary**; leaving a friend's house you would say போய் வருகிறேன்.

The தயவுசெய்து you learned for asking has a family across the Dravidian languages, all built on the same *daya*, "kindness," plus a light verb. Leaving is not.

The letters in this word

வி + டை. வி is வ with the ி sign — the first vowel sign you learned, which made நன்றி possible. டை is ட with the *ai* sign ை, which wraps around the front.

நன்றி stands beside it above, so read it once more: ந + ன் + றி — dental n, alveolar n dotted shut, hard ற with that same ி. And பெறுகிறேன் has a க between vowels, so it softens.

The word, taken apart — its roots and family

விடை is inherited Dravidian, and belongs to விடு (*viḍu*), "to let go." Leave is what you are *let go* with.

Now the first word of these lessons. வீடு, "house," is filed by the Dravidian dictionary in the **same entry as** விடு — and விடை is in it too:

the word	**what it is**
விடு *viḍu*	to let go, to release
வீடு *vīḍu*	the house — and, in the old sense, final release
விடை *viḍai*	leave to depart

You walked in through வீடு and walk out through விடை, one word in different clothes. Kannada's ಬೀಡು, the same house with its *b*-, sits on that root as well.

Two cautions, because a neat pattern is when to slow down. A second விடை means "bull," a Sanskrit borrowing from *vṛṣa*; and ஊர் — the settlement inside Tanjore — and நண்பன் are outside this root entirely.

Your turn

Say these aloud:

- the departure — "na̲n̲ri. viḍai pe̲rugi̲rē̲n̲."

- the one root, three ways — "viḍu … vīḍu … viḍai"
- the two that do not join it — "ūr … naṇbaṉ"

Before you move on

Take your leave formally, thanks in front of it, and name the earlier word that shares this root. (*Naṉri. viḍai peṟugiṟēṉ.*; வீடு, from விடு, "to let go.") Do ஊர் and நண்பன் belong to that root? (**No** — a settlement and a closeness; not everything joins up.)

38.4 மூன்று — the fourth corner of the u-family

Three corners of one family are already yours: உ and ஊ, the letters that open a word, and ◌ு, the short sign that rides a consonant. One corner is missing, and you can guess what it does.

Script you'll notice: the ◌ூ sign

◌ூ is the sign for long *ū* — the long partner of ◌ு, exactly as ஊ is the long partner of உ. Both members of each pair, in both jobs:

	opens a word	**rides a consonant**
short *u*	உ	◌ு
long *ū*	ஊ	◌ூ

ம + ◌ூ → மூ, said *mū*.

The four corners are a pattern, not the whole system. Short **a** is the vowel with no sign at all: the data says a consonant carries a built-in *a* until a mark replaces it, which is why க needs nothing to be *ka*. Nor do signs all sit in one place — the ◌ை you met in இல்லை is written to the LEFT of its consonant, which the data does say; where ◌ு and ◌ூ sit is this lesson's own description, since the data has no entry for either.

Read it; do not draw it yet. None of உ, ஊ, ◌ு or ◌ூ has an entry in this book's script data, so none of them gets a stroke order, and the pairing above is what the page shows rather than something the data states.

Script you'll notice: build the word

piece		
மூ	*mū* — ம with the ீ sign	ம from வணக்கம்
ன்	bare *n̲* — ன under a puḷḷi	the alveolar *n*
று	*r̲u* — ற, the hard *r*, with the ு sign	ற from நன்றி

மூ · ன் · று → மூன்று

Three pieces, one new sign. மூன்று is "three" — a word you have counted with since chapter 7, and now one you can read. It joins இரண்டு, நான்கு, ஆறு, எட்டு and பத்து, whose letters the strand has already given you; ஐந்து and ஏழு still wait on letters this book has not taught, and ஒன்று and ஒன்பது wait on one it is about to.

Your turn

- *Read it:* மூ — then மூன்று
- *Say it:* "mūn̲r̲u" — "three"
- *Contrast:* று and மூ — the short sign and the long one, both riding
- *Contrast:* ஊர் and மூன்று — long *ū* standing, then long *ū* riding

Before you move on

Read மூன்று. Which sign is ீ's short partner, and which letter is its standing form? (ு, and ஊ.) Name the four corners of that family. (உ ஊ standing, ு ீ riding.) What is the dot on ன் doing? (**Removing the built-in *a***.) Next: asking for what you want.

Chapter 39

Asking for What You Want

Modes: 👁 **eyes** (3) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 4 lessons.

> ***By the end of this chapter:*** I can say எனக்குத் … வேண்டும் with myself in the dative and no subject at all, decline with வேண்டாம் rather than இல்லை, ask a price with எவ்வளவு and say why age took எத்தனை instead, put ஒரு in front of a noun where ஒன்று cannot go, and read ஒ in both shapes of "one".
>
> *Order one tea end to end — ask* தேநீர் எவ்வளவு*?, say* ஒரு தேநீர் வேண்டும்*, decline the second with* வேண்டாம் *— and say why* ஒன்று *cannot stand in front of the noun.*

39.1 வேண்டும் (vēṇḍum) — "I want," with no I in it

Say "I know Tamil" and name what is missing. (*Enakkut tamiḻ teriyum* — **no subject**; knowing happens **to** you.) You have met that shape with தெரியும், புரிகிறது and பிடிக்கும். Here it is on the verb that asks for things.

You'll want to know: வேண்டும்

வேண்டும் — *vēṇḍum* — **is wanted**, that is, **I want / I need**

எனக்குத் தண்ணீர் வேண்டும் — *enakkut taṇṇīr vēṇḍum* — **to me, water is wanted**

English makes wanting something you do. Tamil does not: the thing wanted is the subject, and you sit in the **dative** — எனக்கு, the irregular one whose pronoun changes body before the suffix lands. Swap it and you change who wants it, with nothing else touched: உங்களுக்குத் தண்ணீர் வேண்டும் — the joining த் survives the swap, because it is the **dative** that licenses it. Compare நான் தமிழ் பேசுகிறேன்: same hard த in front, no dative behind, no doubling.

In the family, and next door

	word
Kannada	ನನಗೆ ಚಹಾ ಬೇಕು (*nanage cahā bēku*)
Hindi (neighbour)	चाहना (*chāhnā*)
English	want, need

The word, taken apart — its roots and family

வேண்டும் (*vēṇḍum*) is native Dravidian, from the verb *vēṇṭu*, "to want" (DEDR 5528). Malayalam *vēṇam* and Kannada *bēku* say "it must" in the same way.

The letters in this word

வே + ண் + டு + ம்: வ with the ே of பேசு, retroflex ண under a puḷḷi, ட from எப்படி with the ு of இருக்கிறீர்கள், and ம under a puḷḷi — a four-piece word the strand owes you nothing for.

The letters in this word

The letters say *vē-ṇ-ṭu-m*; your mouth says *vēṇḍum*. ட follows the nasal ண், so it voices — the நன்றி rule, as in *naṇbaṉ*.

Grammar Lens: the negative comes from somewhere else

You have negated with இல்லை since chapter 1. This verb refuses it.

I want it	வேண்டும்
I don't want it	வேண்டாம்

Not *vēṇḍum illai*. Tamil supplies a **separate negative word** on the same வேண்ட- stem. வேண்டாம் declines politely; இல்லை is understood, but sounds translated.

Your turn

- *Say it:* "enakkut taṇṇīr vēṇḍum" — and hear that no *I* is doing anything
- *Read it:* தண்ணீர் — the word from the rice-and-water pair, unchanged
- *Say it:* yours, then theirs — "enakkut taṇṇīr vēṇḍum" … "uṅgaḷukkut taṇṇīr vēṇḍum"
- *Read it:* வேண்டும் — four pieces, no new letters

Before you move on

Ask for water, and say where you sit in it. (*Enakkut taṇṇīr vēṇḍum*; **in the dative**.) Why not இல்லை to decline? (வேண்டாம் — a **separate negative word**.) Why does ட sound like *ḍ*? (A **nasal** in front.) Next: how to ask what it costs.

39.2 எவ்வளவு (evvaḷavu) — "how much," and the question it is not

Ask for water, with yourself in the right case. (*Enakkut taṇṇīr vēṇḍum.*) Now you need the other half of any transaction: what it costs.

You'll want to know: எவ்வளவு

எவ்வளவு — *evvaḷavu* — **how much**

தேநீர் எவ்வளவு? — *tēnīr evvaḷavu?* — **how much is the tea?**

It opens with the **எ-** that starts every Tamil question word you have met — எப்படி, எத்தனை, என்ன, எவர். That does not run the other way — என், எனக்கு and எட்டு open with it too — but no question word you have met starts anywhere else. Both parts, *e-* and *aḷavu*, "measure", are Dravidian.

In the family, and next door

	word
Hindi (neighbour)	कितना (*kitnā*)
English	how much

Grammar Lens: measure or count

English has two phrases for this too, and lets you slide between them. Tamil does not: the choice is lexical, and the line falls in the same place:

	asks about	**example**
எத்தனை	things you count, one by one	எத்தனை வயது — how many years
எவ்வளவு	quantity, extent, price	தேநீர் எவ்வளவு — how much is the tea

You already used எத்தனை for age, because years are counted. Money is not counted that way — you ask எவ்வளவு for a price even when the answer comes back as a number of rupees.
The test is not whether an answer has digits in it. It is whether the language treats the thing as a **heap** or as a **row**.

The letters in this word

எ + வ் + வ + ள + வு: the standing எ from என், then வ shut by a puḷḷi and வ again, the retroflex ள from நீங்கள், and வ a third time carrying the ு sign.

Three வs in a five-piece word. The doubled வ்வ at the front is what makes it sound clipped rather than drawled.

Your turn

- *Say it:* "tēnīr evvaḷavu?" — then answer yourself with a number
- *Contrast:* "ettanai vayathu" and "tēnīr evvaḷavu" — counted, measured
- *Read it:* எவ்வளவு — find all three வ
- *Read it:* க உ ங சு ரு — then answer *evvaḷavu?* by pointing at one

Before you move on

Ask what the tea costs. (*Tēnīr evvaḷavu?*) Which question word did age take, and why is price different? (எத்தனை — years are **counted**; price asks about **quantity**.) What do all these question words share at the front? (எ-.) Next: how Tamil says "one" when it is not counting.

39.3 ஒரு (oru) — "one," when it is not counting

Ask what the tea costs, then ask for it. (*Tēnīr evvaḷavu? … Enakku … vēṇḍum.*) One word is missing from the middle of that: how many.

You'll want to know: ஒரு

ஒரு — *oru* — **a, one**

ஒரு தேநீர் வேண்டும் — *oru tēnīr vēṇḍum* — **one tea, please**

You learned ஒன்று in chapter 7 as the number one. ஒரு is the same word in the shape it takes when it leans on a noun. Tamil will not let you say *on̲ṟu tēnīr*.

The word, taken apart — its roots and family

ஒரு (*oru*) is native Dravidian. DEDR 990 lists Malayalam *oru* and Kannada *or*, also used before a noun.

Grammar Lens: the counting form and the leaning form

	shape	where it stands
the number itself	ஒன்று	alone — counting, answering "how many"
in front of a noun	ஒரு	ஒரு தேநீர், ஒரு நாள்

Other numbers have paired shapes of their own. This book does not set out to list them — meet ஒரு here, and expect the pattern rather

than a rule.
This is also how Tamil manages without the word "a." There is no article in the language; ஒரு does that work when you want it done, and nothing does it when you do not. தேநீர் வேண்டும் is perfectly good — it just does not specify one.

The letters in this word

ஒ + ரு: a standing vowel, then ர — one of the two *r*-letters, from சரி — carrying the ◌ு sign.

ஒ is one of three standing vowels the book still owes you; ஏ and ஐ are the others, and they are still outstanding. ஒ goes first because it opens both ஒரு and ஒன்று, and the next lesson pays it.

Your turn

Order something, start to finish.

- *Say it:* "tēnīr evvaḷavu?"
- *Say it:* "oru tēnīr vēṇḍum"
- *Say it:* decline a second one — "vēṇḍām"
- *Contrast:* "onṟu" alone, "oru tēnīr" in front of a noun
- *Recall:* say *ūr*
- *Read it:* நண்பன்
- *Recall:* say *ivar*

Before you move on

Order one tea and refuse a second. (*Oru tēnīr vēṇḍum … vēṇḍām.*) Why not *onṟu tēnīr*? (ஒன்று is the **counting** shape; in front of a noun the word **leans** and becomes ஒரு.) Does Tamil have a word for "a"? (**No** — ஒரு does that work when you want it.) Next: the letter both shapes begin with.

39.4 ஒன்று — the letter under both shapes of "one"

You have just used ஒரு in front of a noun and ஒன்று on its own. Both begin with the same letter — one this book has printed since chapter 7 and the writing strand has never once opened up.

Script you'll notice: ஒ

ஒ — *o* — a standing vowel: the form that opens a word, rather than a sign that rides a consonant

It joins the standing vowels you already read: அ ஆ இ உ ஊ எ. Those seven do not exhaust Tamil's twelve — this book teaches the ones its own words need. ஒ goes first of the three because it opens the most words in this book: ஒரு, ஒன்று, and ஒன்பது, which chapter 7 showed you carrying the same ஒன்- at its front.

Read it; do not draw it yet. ஒ has no entry in this book's script data, so it gets no stroke order, and nothing here describes how the pen moves.

Script you'll notice: build the word

piece		
ஒ	*o*	this lesson
ன்	bare *n̲* — ன under a pul̲l̲i	the alveolar *n*
று	*r̲u* — ற with the ு sign	ற from நன்றி

ஒ · ன் · று → ஒன்று

The last two pieces are the ones you built மூன்று from, in the same order. Three and one differ only in what stands in front of ன்று.

Script you'll notice: the same letter, the shorter word

ஒ + ரு → ஒரு

Two pieces, and you can read the form that leans on a noun as well as the form that counts. ஒரு தேநீர் is now a line you can order aloud and read off a board.

Your turn

- *Read it:* ஒ — then ஒரு — then ஒன்று
- *Contrast:* ஒன்று and மூன்று — same ன்று, and மூ carries the ூ sign where ஒ stands alone
- *Say it:* "oru … onru" — the leaning shape, then the counting one

Before you move on

Read ஒன்று, then ஒரு. What do ஒன்று and மூன்று share, and where do they differ? (They share ன்று at the end; they differ in the piece that opens them.) What is the dot on ன் doing? (**Removing the built-in *a***.)

Chapter 40

Pointing, and Asking

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can point at something in Tamil and ask who or where it is — and I can say what the six words have in common.
>
> *Say the near word, the far word and the question word in a row, and name the part that changed.*

40.1 இது (idu) — this one — the thing near me

You can already name things. This is how you POINT at them.

You'll want to know: இது

இது — *idu* — this one — the thing near me.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner, the far one, comes in the next lesson. The two of them differ by one sound at the front — **i-** for near — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

In the family, and next door

	word	same root
Kannada	ಇದು (*idu*)	yes
Telugu	ఇది (*idi*)	yes
Malayalam	ഇത് (*itŭ*)	yes
Hindi (neighbour)	यह (*yah*)	
English	this one	

The word, taken apart — its roots and family

இது (*idu*) is native Dravidian: the near base *i-* (DEDR 410). Malayalam has *itu* and Kannada *idu*.

Your turn

- *Say it:* "இது" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *uḍambu*

Before you move on

What is *idu*? (this one — the thing near me.) What sound does it start with, and does that sound mean near, far, or a question? (**i-** — near.)

40.2 அது (adu) — that one — the thing over there

You can already name things. This is how you POINT at them.

You'll want to know: அது

அது — *adu* — that one — the thing over there.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner is இது *idu*, which you have just met. The two of them differ by one sound at the front — **a-** for far — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

In the family, and next door

	word	same root
Kannada	ಅದು (*adu*)	yes
Telugu	అది (*adi*)	yes
Malayalam	അത് (*atŭ*)	yes
Hindi (neighbour)	वह (*vah*)	
English	that one	

The word, taken apart — its roots and family

அது (*adu*) is native Dravidian: the far base *a-* (DEDR 1). Malayalam has *atu* and Kannada *adu*.

Your turn

Say these aloud:

- "அது" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *adu*? (that one — the thing over there.) What sound does it start with, and does that sound mean near, far, or a question? (**a-** — far.)

40.3 இங்கே (iṅgē) — here — where I am

You can already name things. This is how you POINT at them.

You'll want to know: இங்கே

இங்கே — *iṅgē* — here — where I am.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner, the far one, comes in the next lesson. The two of them differ by one sound at the front — **i-** for near — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

In the family, and next door

	word
Kannada	ಇಲ್ಲಿ (*illi*)
Telugu	ఇక్కడ (*ikkaḍa*)
Malayalam	ഇവിടെ (*iviṭe*)
Hindi (neighbour)	यहाँ (*yahā̃*)
English	here

The word, taken apart — its roots and family

இங்கே (*iṅgē*) is native Dravidian: the near base *i-* with a place ending. DEDR 410 lists it under the same base as "this".

Your turn

- *Say it:* "இங்கே" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *sugam*
- *Read it:* எவ்வளவு

Before you move on

What is *iṅgē*? (here — where I am.) What sound does it start with, and does that sound mean near, far, or a question? (**i-** — near.)

40.4 அங்கே (aṅgē) — there — where I am not

You can already name things. This is how you POINT at them.

You'll want to know: அங்கே

அங்கே — *aṅgē* — there — where I am not.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner is இங்கே *iṅgē*, which you have just met. The two of them differ by one sound at the front — **a-** for far — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

In the family, and next door

	word
Kannada	ಅಲ್ಲಿ (*alli*)
Telugu	అక్కడ (*akkaḍa*)
Malayalam	അവിടെ (*aviṭe*)
Hindi (neighbour)	वहाँ (*vahā̃*)
English	there

The word, taken apart — its roots and family

அங்கே (*aṅgē*) is native Dravidian: the far base *a-* with a place ending. DEDR 1 lists it under the same base as "that".

Your turn

Say these aloud:

- "அங்கே" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *aṅgē*? (there — where I am not.) What sound does it start with, and does that sound mean near, far, or a question? (**a-** — far.)

40.5 யார் (yār) — who? — asking about a person

You can already name things. This is how you ASK about them.

You'll want to know: யார்

யார் — *yār* — who? — asking about a person.

Say it with an asking voice. It points at no one: it asks your listener to name the person.

yār opens with **yā-**, not with the **i-** of near or the **a-** of far that the four words before it share. It is the one word in this chapter outside that pattern, so learn it as itself: the asking word for people.

In the family, and next door

	word	**same root**
Kannada	ಯಾರು (*yāru*)	yes
Telugu	ఎవరు (*evaru*)	yes
Malayalam	ആര് (*ārŭ*)	yes
Hindi (neighbour)	कौन (*kaun*)	
English	who?	

The word, taken apart — its roots and family

யார் (*yār*) is native Dravidian, on the question base *yā-* (DEDR 5151). Malayalam has *yār* and *ār*, and Kannada *yār*.

Your turn

- *Say it:* "யார்" three times, asking about a different person each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *viḍai*
- *Read it:* ஒரு

Before you move on

What is *yār*? (who? — asking about a person.) What sound does it start with: the i- of near, the a- of far, or neither? (**Neither** — **yā-**; it asks about a person.)

40.6 எங்கே (eṅgē) — where? — asking about a place

You can already name things. This is how you ASK about them.

You'll want to know: எங்கே

எங்கே — *eṅgē* — where? — asking about a place.

Say it with an asking voice. It points at no place: it asks your listener to point one out.

Its partners are **இங்கே** *iṅgē* and **அங்கே** *aṅgē*, which you have already met. The three differ by one sound at the front — **e-** for ask — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

In the family, and next door

	word
Kannada	ಎಲ್ಲಿ (*elli*)
Telugu	ఎక్కడ (*ekkaḍa*)
Malayalam	എവിടെ (*eviṭe*)
Hindi (neighbour)	कहाँ (*kahā̃*)
English	where?

The word, taken apart — its roots and family

எங்கே (*eṅgē*) is native Dravidian: the question base *e-* with a place ending (DEDR 5151).

Your turn

Say these aloud:

- "**எங்கே**" three times, asking about a different place each time
- it once with a word you already know after it

Before you move on

What is *eṅgē*? (where? — asking about a place.) What sound does it start with, and does that sound mean near, far, or a question? (**e-** — ask.)

40.7 i- / a- / e- — six words, one machine

Say the six words from this chapter out loud, in order. Listen to how they begin.

Grammar lens: one slot changes

Five of these six words are **three beginnings**, reused; only the person question stands apart.

meaning	**word**
near	இங்கே *iṅgē*
far	அங்கே *aṅgē*
question	எங்கே *eṅgē*

Tamil shows the system at its cleanest: இங்கே, அங்கே, எங்கே differ in one letter.
Change the front, and the meaning walks from **near** to **far** to **a question**. Nothing else in the word moves.
The same three beginnings run the thing-words too: இது *idu* and அது *adu* start exactly like the first two rows. This chapter did not teach you the matching question word for things — that one arrives later, and when it does you will already know what it has to start with. This is worth more than the six words are. When you meet a new word in this family later, you will not have to be taught all three of it — you will be taught one and work out the others.

Your turn

- *Say it:* the near word, then the far word, then the question word
- *Say it:* them again for place, not for things
- *Notice:* the part that did NOT change

Before you move on

Which beginning means near? (**i-**) Far? (**a-**) And which one turns the word into a question? (**e-**)

Chapter 41

Describing Things

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can point at something in Tamil and ask who or where it is — and I can say what the six words have in common.
>
> *Say the near word, the far word and the question word in a row, and name the part that changed.*

41.1 பெரிய (periya) — big

You can already name things. This is how you DESCRIBE them.

You'll want to know: பெரிய

பெரிய — *periya* — big.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

In the family, and next door

	word
Kannada	ದೊಡ್ಡ (*doḍḍa*)
Telugu	పెద్ద (*pedda*)
Malayalam	വലിയ (*valiya*)
Hindi (neighbour)	बड़ा (*baṛā*)
English	big

The word, taken apart — its roots and family

பெரிய (*periya*) is native Dravidian. DEDR 4411 lists Malayalam *periya* and Kannada *pēr*.

Your turn

- *Say it:* "பெரிய" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *vēṇḍum*
- *Read it:* இது
- *Recall:* say *adu*

Before you move on

What is *periya*? (**big**.) Where does it go — before the word it describes, or after? (**Before.**)

41.2 சிறிய (siṟiya) — small

You can already name things. This is how you DESCRIBE them.

You'll want to know: சிறிய

சிறிய — *siṟiya* — small.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met பெரிய *periya* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

சிறிய (*siṟiya*) is native Dravidian. DEDR 1594 lists Malayalam *ciṟṟu*, Kannada *kiṟu* and Telugu *ciṟu*.

Your turn

- *Say it:* "சிறிய" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Read it:* எவ்வளவு
- *Recall:* say *iṅgē*

Before you move on

What is *siṟiya*? (**small**.) Where does it go — before the word it describes, or after? (**Before.**)

41.3 நல்ல (nalla) — good

You can already name things. This is how you DESCRIBE them.

You'll want to know: நல்ல

நல்ல — *nalla* — good.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met சிறிய *siṟiya* a moment ago. Put them side by side and nothing about either one changes.

Telugu	మంచి (*manci*)	
Malayalam	നല്ല (*nalla*)	yes
Hindi (neighbour)	अच्छा (*acchā*)	
English	good	

The word, taken apart — its roots and family

நல்ல (*nalla*) is native Dravidian. DEDR 3610 lists Malayalam *nal* and Kannada *nal*, "goodness". It is the same *nal* that is inside *naṉṟi*, "thank you".

Your turn

- *Say it:* "நல்ல" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *aṅgē*

Before you move on

What is *nalla*? (**good**.) Where does it go — before the word it describes, or after? (**Before.**)

41.4 புதிய (pudiya) — new

You can already name things. This is how you DESCRIBE them.

You'll want to know: புதிய

புதிய — *pudiya* — new.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met நல்ல *nalla* a moment ago. Put them side by side and nothing about either one changes.

புதிய (*pudiya*) is native Dravidian. DEDR 4275 lists Malayalam *putu* and Kannada *hosa*.

Your turn

- *Say it:* "புதிய" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Read it:* ஒரு
- *Recall:* say *yār*

Before you move on

41.5 பழைய (paḻaiya) — old — of a thing, not of a person

You can already name things. This is how you DESCRIBE them.

You'll want to know: பழைய

பழைய — *paḻaiya* — old — of a thing, not of a person.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

பழைய (*paḻaiya*) is native Dravidian. DEDR 3999 lists Malayalam *paḻa*, Kannada *paḻa* and Telugu *prā-*.

Your turn

- *Say it:* "பழைய" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *eṅgē*

Before you move on

What is *paḻaiya*? (**old — of a thing, not of a person.**) Where does it go — before the word it describes, or after? (**Before.**)

41.6 before the noun, unchanged — five words, one rule

Say the five words from this chapter out loud, then say each one in front of a noun you already know.

Grammar lens: where an adjective goes

You did not learn five separate words. You learned **where an adjective goes**, and five words that go there.

meaning	word
big	பெரிய *periya*
small	சிறிய *si̱riya*
good	நல்ல *nalla*

Every one of them ends in -a and none of them ever changes.
This is worth more than the five words are. Every noun you already know — your name, the house, the water, the day — can now take any of them in front, and every adjective you meet from here goes in the same place.

Your turn

- *Say it:* each of the five in front of a noun you already know
- *Say it:* two of them with the same noun, one after the other
- *Notice:* whether the adjective changed shape when the noun did

Before you move on

Where does an adjective go in this language? (**In front of the noun.**) Does it change shape to match the noun? (unchanged.)

Chapter 42

More Everyday Verbs

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can tell someone to come, sit, read and give in Tamil.
>
> *Complete TA-C42-give and say all four verbs in order.*

42.1 வா (vā) — come

A short run of everyday verbs, one at a time.

You'll want to know: வா

வா (*vā*) — "come".

You met it beside its partner *varu-*; here it opens the run. One syllable, and a complete sentence: the first thing said at a doorway. It is the bare command, with nothing added, and the old warning still holds: the tense endings attach to *varu-*, not to *vā*.

In the family, and next door

	word	same root
Telugu	రా (*rā*)	
Malayalam	വരുക (*varuka*)	yes
Hindi (neighbour)	आना (*ānā*)	
English	come	

The word, taken apart — its roots and family

வா (*vā*) is native Dravidian. DEDR 5270 lists Malayalam *varuka*, Kannada *bā* and Telugu *rā*.

What you've built

One more everyday action. Three follow, and each reuses the ones before.

Your turn

Say these aloud:

- *vā*
- it once more, slowly

Before you move on

What does வா mean? ("come".) Say it once more.

42.2 உட்கார் (uṭkār) — sit

Before the new one: what did *vā* mean?

You'll want to know: உட்கார்

உட்கார் (*uṭkār*) — "sit".

Built from *uḷ*, 'inside', and *kār* — to settle oneself in. Tamil often builds a verb from a place-word plus an action this way.

In the family, and next door

	word
Kannada	ಕುಳಿತುಕೋ (*kuḷitukō*)
Telugu	కూర్చో (*kūrcō*)
Hindi (neighbour)	बैठना (*baiṭhnā*)
English	sit

The word, taken apart — its roots and family

உட்கார் (*uṭkār*) looks like a compound whose first part is *uḷ*, "inside", the native word for being within (DEDR 698), and it is usually taken that way. But DEDR has no entry for the verb itself, and the second part is not clear, so its origin is uncertain.

What you've built

One more everyday action. Three follow, and each reuses the ones before.

Your turn

Say these aloud:

- *uṭkār*
- it once more, slowly
- it after *vā*, so the two sit together

Before you move on

What does உட்கார் mean? ("sit".) Say it once more.

42.3 படி (paṭi) — read

Before the new one: what did *uṭkār* mean?

You'll want to know: படி

படி (*paṭi*) — "read".

Also 'to study'. The same word covers reading a page and studying a subject, so a student *paṭikkiṟār* whether they are holding a book or not.

In the family, and next door

	word
Kannada	ಓದು (*ōdu*)
Telugu	చదువు (*caduvu*)
Malayalam	വായിക്കുക (*vāyikkuka*)
Hindi (neighbour)	पढ़ना (*paṛhnā*)
English	read

The word, taken apart — its roots and family

The origin of படி (*paṭi*) is the open question met in an earlier lesson: Tamil's own dictionaries list it as native, while others connect it to Sanskrit *paṭh*, "to recite". Tamil has no aspirated consonants, so a borrowed *paṭh* would arrive as *paṭi* either way.

What you've built

One more everyday action. Three follow, and each reuses the ones before.

Your turn

Say these aloud:

- *paṭi*
- it once more, slowly
- it after *uṭkār*, so the two sit together

Before you move on

What does படி mean? ("read".) Say it once more.

42.4 கொடு (koṭu) — give

Before the new one: what did *paṭi* mean?

You'll want to know: கொடு

கொடு (*koṭu*) — "give".

The everyday 'give'. Tamil distinguishes giving away from giving toward the speaker; this is the giving-away one.

In the family, and next door

	word	**same root**
Kannada	ಕೊಡು (*koḍu*)	yes
Telugu	ఇవ్వు (*ivvu*)	
Malayalam	തരൂ (*tarū*)	
Hindi (neighbour)	देना (*denā*)	
English	give	

The word, taken apart — its roots and family

கொடு (*koṭu*) is native Dravidian. DEDR 2053 lists Malayalam *koṭukka* and Kannada *koḍu*.

What you've built

That closes the run: four more actions, each met on its own.

Your turn

Say these aloud:

- *koṭu*
- it once more, slowly
- it after *paṭi*, so the two sit together

Before you move on

What does கொடு mean? ("give".) Say it once more.

Chapter 43

The Household

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name a child, a son, a daughter and the family in Tamil.
>
> *Complete TA-C43-family and say all four words in order.*

43.1 குழந்தை (kuḻandai) — child

Before the new one: what did *koṭu* mean?

You'll want to know: குழந்தை

குழந்தை (*kuḻandai*) — "child".

Take it apart and the stem is *kuḻa-*, 'young, tender', closed off into a noun by *-ndai*. The same stem stands behind *kuḻavi*, 'infant'. Nothing in the word says boy or girl: it names the age, not the sex.

In the family, and next door

	word
Malayalam	കുട്ടി (*kuṭṭi*)
English	child

The word, taken apart — its roots and family

குழந்தை (*kuḻandai*) is native Dravidian. DEDR 2149 files it with words for young and tender things: Malayalam *koḻuntu*, "tender twig", and Telugu *koḍuku*, "son". The entry compares Sanskrit *kuḍaka*,

"child" (CDIAL 3245).

What you've built

The first of four words for the people in a house. Three follow, and each reuses the ones before.

Your turn

- *Say it: kuḻandai*
- *Say it:* it once more, slowly
- *Say it:* it after *koṭu*, so the two sit together
- *Recall:* say *periya*
- *Read it:* சிறிய

Before you move on

What does குழந்தை mean? ("child".) Say it once more.

43.2 மகன் (makaṉ) — son

Before the new one: what did *kuḻandai* mean?

You'll want to know: மகன்

மகன் (*makaṉ*) — "son".

The stem is *maka-*, an old Dravidian word for offspring, and *-aṉ* is the ending Tamil puts on a male person — the same *-aṉ* already sitting on *naṇbaṉ*, 'friend'. So the word assembles in front of you: offspring, then male.

In the family, and next door

	word	same root
Kannada	ಮಗ (*maga*)	yes
Telugu	కొడుకు (*koḍuku*)	
Malayalam	മകൻ (*makan*)	yes
Hindi (neighbour)	बेटा (*beṭā*)	
English	son	

The word, taken apart — its roots and family

மகன் (*makaṉ*) is native Dravidian. DEDR 4616 lists Malayalam *makan*, Kannada *maga* and Telugu *maga*, "male".

What you've built

A second word for the house, and an ending you had already met elsewhere.

Your turn

- *Say it: makaṉ*
- *Say it:* it once more, slowly
- *Say it:* it after *kuḻandai*, so the two sit together
- *Read it:* நல்ல

Before you move on

What does மகன் mean? ("son".) Say it once more.

43.3 மகள் (makaḷ) — daughter

Before the new one: what did *makaṉ* mean?

You'll want to know: மகள்

மகள் (*makaḷ*) — "daughter".

The same *maka-* stem as the last lesson, with *-aḷ* where that word had *-aṉ*: one ending marks a woman, the other a man. The sibling words you met earlier needed four separate forms to split brother from sister by age; here a single stem does the work of two. Malayalam's *makan* and *makaḷ* match Tamil almost letter for letter.

In the family, and next door

	word	same root
Kannada	ಮಗಳು (*magaḷu*)	yes
Telugu	కూతురు (*kūturu*)	
Malayalam	മകൾ (*makaḷ*)	yes
Hindi (neighbour)	बेटी (*beṭī*)	
English	daughter	

The word, taken apart — its roots and family

மகள் (*makaḷ*) is native Dravidian. DEDR 4616 lists Malayalam *mōḷ*. It is the feminine of the same word as *makaṉ*, "son". The entry compares Sanskrit (lexicons) *mālikā*, "daughter".

What you've built

One stem, two endings, two people. One more word closes the chapter.

Your turn

- *Say it: makaḷ*
- *Say it:* it once more, slowly
- *Say it:* it after *makaṉ*, and hear only the ending move
- *Recall:* say *pudiya*

Before you move on

What does மகள் mean? ("daughter".) Say it once more.

43.4 குடும்பம் (kuṭumbam) — family

Before the new one: what did *makaḷ* mean?

You'll want to know: குடும்பம்

குடும்பம் (*kuṭumbam*) — "family".

The collective word the family lesson never needed, because அப்பா, அம்மா and the four sibling words each named one particular person. It comes from Sanskrit *kuṭumba*, 'household' — which Sanskrit itself appears

to have taken from a Dravidian source before handing it back — and the *-am* on the end is what Tamil gives such borrowings.

In the family, and next door

	word	**same root**
Kannada	ಕುಟುಂಬ (*kuṭumba*)	yes
Telugu	కుటుంబం (*kuṭumbaṁ*)	yes
Malayalam	കുടുംബം (*kuṭumbaṁ*)	yes
Hindi (neighbour)	परिवार (*parivār*)	
English	family	

What you've built

That closes the run: child, son, daughter, and the word for all of them together.

Your turn

- *Say it: kuṭumbam*
- *Say it:* it once more, slowly
- *Say it:* it after *makaḷ*, so the two sit together
- *Read it:* பழைய

Before you move on

What does குடும்பம் mean? ("family".) Say it once more.

Chapter 44

Things You Ask For

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five everyday things I might ask somebody for in Tamil, and say which of them Tamil has held all along and which arrived from elsewhere.
>
> *Complete TA-C44-book and say all five words in order.*

44.1 பழம் (pa̲lam) — a fruit

> Before the new run of words: what did *makaḷ* mean, and what did *kuṭumbam* mean?

You'll want to know: பழம்

பழம் (*pa̲lam*) — "a fruit".

Underneath it is a root about ripening. Proto-Dravidian ***pa̲l***, 'to ripen, to grow old', handed this family both a fruit and an age, and Tamil kept the pair close enough to hear: *pa̲laiya*, the "old" from the run of describing words, is that same root wearing a different ending. Ripe and old are one idea seen twice.

Malayalam says പഴം, very nearly the identical word — the ordinary state of affairs between the two closest sisters. Telugu went to పండు (*paṇḍu*) and Kannada to ಹಣ್ಣು (*haṇṇu*), and the Kannada form has lost its opening *p-* to a shift Tamil sat out entirely.

The ழ in the middle is the letter this book has already spent a writing lesson on, the one only these two sisters still write.

In the family, and next door

	word	same root
Kannada	ಹಣ್ಣು (*haṇṇu*)	yes
Telugu	పండు (*paṇḍu*)	yes
Malayalam	പഴം (*pa̲lam*)	yes
Hindi (neighbour)	फल (*phal*)	
English	a fruit	

What you've built

The first of five things you might ask somebody for.

Your turn

- *Say it: pa̲lam*
- *Say it:* it once more, slowly
- *Say it: pa̲lam*, then *tayavu seytu pa̲lam koṭuṅgaḷ* — "please give a fruit"
- *Recall:* say *vā*

Before you move on

What does பழம் mean? ("a fruit".) Say it once more.

44.2 துணி (tuṇi) — cloth

Before the new one: what did *pa̲lam* mean?

You'll want to know: துணி

துணி (*tuṇi*) — "cloth".

One shape, two jobs. *tuṇi* is the cloth you wear or wipe your hands on, and *tuṇi* is also 'to dare, to resolve'. Nothing joins them but sound, and the sentence around them settles which is meant — the ordinary way a language carries two words in one skin.

Malayalam keeps തുണി unchanged. Telugu and Kannada reach for something else here, so this is one of the places where the two closest sisters agree and the other two go their own way.

In the family, and next door

	word	same root
Kannada	ಬಟ್ಟೆ (*baṭṭe*)	
Telugu	బట్ట (*baṭṭa*)	
Malayalam	തുണി (*tuṇi*)	yes
Hindi (neighbour)	कपड़ा (*kapṛā*)	
English	cloth	

The word, taken apart — its roots and family

துணி (*tuṇi*) is native Dravidian. DEDR 3307 lists Malayalam *tuṇi*.

What you've built

Two: something to eat and something to wear.

Your turn

- *Say it: tuṇi*
- *Say it:* it once more, slowly
- *Say it: pa̲lam*, then *tuṇi*, so the two sit together
- *Read it:* உட்கார்
- *Recall:* say *ku̲landai*

Before you move on

What does துணி mean? ("cloth".) Say it once more.

44.3 விளக்கு (viḷakku) — a lamp

Before the new one: what did *tuṇi* mean?

You'll want to know: விளக்கு

விளக்கு (*viḷakku*) — "a lamp".

It stands on *viḷaṅgu*, 'to shine, to be clear', so the lamp is named for what it does rather than for what it is made of.

The same stem gives *viḷakkam*, 'clarity', and *viḷakku* on its own can mean 'to make something plain'. A lamp and an explanation are the same word in Tamil, which is a better picture of teaching than most languages get for free.

A Tamil house lights one at dusk, at the doorway, and the word turns up wherever that habit does.

In the family, and next door

	word	same root
Kannada	ದೀಪ (*dīpa*)	
Telugu	దీపం (*dīpaṁ*)	
Malayalam	വിളക്ക് (*viḷakkŭ*)	yes
Hindi (neighbour)	दीया (*dīyā*)	
English	a lamp	

The word, taken apart — its roots and family

விளக்கு (*viḷakku*) is native Dravidian, from the verb *viḷakku*, "to make clear, to brighten". DEDR 5496 files it among words for white and shining, with Malayalam *viḷakku*, "lamp", and *veḷiccam*, "light".

What you've built

Three, and the third one shines.

Your turn

- *Say it: viḷakku*
- *Say it:* it once more, slowly
- *Say it: tuṇi*, then *viḷakku*, and hear the doubled letter in the second
- *Recall:* say *paṭi*
- *Read it:* மகன்

Before you move on

What does விளக்கு mean? ("a lamp".) Say it once more.

44.4 உப்பு (uppu) — salt

Before the new one: what did *viḷakku* mean?

You'll want to know: உப்பு

உப்பு (*uppu*) — "salt".

Proto-Dravidian ***upp-***, and none of the four sisters did much to it: Malayalam ഉപ്പ്, Telugu ఉప్పు, Kannada ಉಪ್ಪು. Set them beside உப்பு and you are looking at one word in four hands.

A word that stable is usually a word nobody could do without. Salt is also how Tamil talks about savour in general — food with no *uppu* in it is food with nothing in it at all.

In the family, and next door

	word	same root
Kannada	ಉಪ್ಪು (*uppu*)	yes
Telugu	ఉప్పు (*uppu*)	yes
Malayalam	ഉപ്പ് (*uppŭ*)	yes
Hindi (neighbour)	नमक (*namak*)	
English	salt	

What you've built

Four, and this one has not changed in a very long time.

Your turn

- *Say it: uppu*
- *Say it:* it once more, slowly
- *Say it: viḷakku*, then *uppu*, and let the second one stop short
- *Read it:* கொடு
- *Recall:* say *makaḷ*

Before you move on

What does உப்பு mean? ("salt".) Say it once more.

44.5 புத்தகம் (puttakam) — a book

Before the new one: what did *uppu* mean?

You'll want to know: புத்தகம்

புத்தகம் (*puttakam*) — "a book".

Sanskrit *pustaka*, taken in whole, with the *-am* Tamil puts on the end of such arrivals — the same *-am* already sitting on *kuṭumbam*. Malayalam **പുസ്തകം**, Telugu **పుస్తకం** and Kannada **ಪುಸ್ತಕ** are the same borrowing, so the four agree here for a different reason than they agree about salt: not descent, but a shared debt.

Tamil kept its own word alongside. **நூல்** (*nūl*) is a thread, and thread is what bound palm leaves into a book before there was paper; the same *nūl* still names a written work. The borrowed word and the inherited one divide the job between them rather than fighting over it.

In the family, and next door

	word	same root
Kannada	**ಪುಸ್ತಕ** (*pustaka*)	yes
Telugu	**పుస్తకం** (*pustakaṁ*)	yes
Malayalam	**പുസ്തകം** (*pustakaṁ*)	yes
Hindi (neighbour)	**किताब** (*kitāb*)	
English	a book	

What you've built

Five, and the run is closed: a fruit, cloth, a lamp, salt, a book.

Your turn

Say these aloud:

- *puttakam*
- it once more, slowly
- all five in order — *pa̲lam*, *tuṇi*, *viḷakku*, *uppu*, *puttakam*

Before you move on

What does **புத்தகம்** mean? ("a book".) Say it once more.

Chapter 45

More of the Body

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five more parts of the body in Tamil, and point to the sound changes that separate them from their Malayalam, Telugu and Kannada cousins.
>
> *Complete TA-C45-stomach and say all five words in order.*

45.1 கண் (kaṇ) — an eye

> Before the new run of words: what did *uppu* mean, and what did *puttakam* mean?

You'll want to know: கண்

கண் (*kaṇ*) — "an eye".

Proto-Dravidian ***kaṇ**, held almost still everywhere it went: Malayalam **കണ്ണ്**, Telugu **కన్ను**, Kannada **ಕಣ್ಣು**. Tamil's is the shortest of the four, one syllable and done.

It reaches well past the face. A *kaṇ* is the joint on a stalk of sugarcane and the mesh of a net — wherever a thing has an opening or a knot, Tamil is willing to call it an eye.

talai and *kai*, the head and the hand, came earlier. The face gets its own turn now, one piece at a time.

In the family, and next door

	word	same root
Kannada	ಕಣ್ಣು (*kaṇṇu*)	yes
Telugu	కన్ను (*kannu*)	yes
Malayalam	കണ്ണ് (*kaṇṇŭ*)	yes
Hindi (neighbour)	आँख (*āṁkh*)	
English	an eye	

What you've built

The first of five more parts of the body.

Your turn

- *Say it: kaṇ*
- *Say it:* it once more, slowly
- *Say it: kaṇ*, then *talai*, so the part and the whole sit together
- *Recall:* say *kuḻandai*
- *Read it:* பழம்

Before you move on

What does கண் mean? ("an eye".) Say it once more.

45.2 காது (kādu) — an ear

Before the new one: what did *kaṇ* mean?

You'll want to know: காது

காது (*kādu*) — "an ear".

Here it is Tamil that stands apart. *kādu* is the ear a Tamil speaker has, and the other three sisters built their everyday word on a different root altogether: Malayalam ചെവി, Telugu చెవి, Kannada ಕಿವಿ.

Tamil owns that root as well. செவி (*sevi*) names the same organ and is kept for poetry and formal speech — so the word the sisters use over breakfast is the one Tamil holds back for its high register. Two words, one ear, and the occasion decides which.

In the family, and next door

	word
Kannada	ಕಿವಿ (*kivi*)
Telugu	చెవి (*cevi*)
Malayalam	ചെവി (*cevi*)
Hindi (neighbour)	कान (*kān*)
English	an ear

The word, taken apart — its roots and family

காது (*kādu*) is native Dravidian. DEDR 1448 lists Malayalam *kātu*.

What you've built

Two: an eye and an ear.

Your turn

- *Say it: kādu*
- *Say it:* it once more, slowly
- *Say it: kaṇ*, then *kādu*, and hear the long *ā* arrive in the second
- *Read it:* மகன்
- *Recall:* say *tuṇi*

Before you move on

What does காது mean? ("an ear".) Say it once more.

45.3 மூக்கு (mūkku) — a nose

Before the new one: what did *kādu* mean?

You'll want to know: மூக்கு

மூக்கு (*mūkku*) — "a nose".

Another word the family barely touched: Malayalam മൂക്ക്, Telugu ముక్కు, Kannada ಮೂಗು. Only the ending moves.

mūkku also names the point of a thing — the prow of a boat, the tip of a pen. Whatever sticks out in front is the nose of it.

In the family, and next door

	word	same root
Kannada	ಮೂಗು (*mūgu*)	yes
Telugu	ముక్కు (*mukku*)	yes
Malayalam	മൂക്ക് (*mūkkŭ*)	yes
Hindi (neighbour)	नाक (*nāk*)	
English	a nose	

The word, taken apart — its roots and family

மூக்கு (*mūkku*) is native Dravidian. DEDR 5024 lists Malayalam *mūkku*, Kannada *mūgu* and Telugu *mukku*.

What you've built

Three, and all three are on the face.

Your turn

- *Say it: mūkku*
- *Say it:* it once more, slowly
- *Say it: kādu*, then *mūkku*, and let the second start long
- *Recall:* say *makaḷ*
- *Read it:* விளக்கு

Before you move on

What does மூக்கு mean? ("a nose".) Say it once more.

45.4 பல் (pal) — a tooth

Before the new one: what did *mūkku* mean?

You'll want to know: பல்

பல் (*pal*) — "a tooth".

Proto-Dravidian ***pal***, and the sisters pulled it three ways. Malayalam പല്ല്, Kannada ಹಲ್ಲು, Telugu పన్ను. Kannada is the odd one again, with the same *p-* to *h-* shift the fruit-word showed; Telugu turned the *l* into an *n*. Tamil stops the word dead on its *l* and adds nothing.

In everyday speech it often comes out *pallu*, with the *l* doubled — which is exactly the shape Malayalam and Kannada put on the page.

In the family, and next door

	word	same root
Kannada	ಹಲ್ಲು (*hallu*)	yes
Telugu	పన్ను (*pannu*)	yes
Malayalam	പല്ല് (*pallŭ*)	yes
Hindi (neighbour)	दाँत (*danta*)	
English	a tooth	

What you've built

Four, and the first one you can bite with.

Your turn

- *Say it: pal*
- *Say it:* it once more, slowly
- *Say it: mūkku*, then *pal*, and cut the second one short
- *Read it:* குடும்பம்
- *Recall:* say *uppu*

Before you move on

What does பல் mean? ("a tooth".) Say it once more.

45.5 வயிறு (vayi̲ru) — the stomach

Before the new one: what did *pal* mean?

You'll want to know: വയിറു

വയിറു (*vayiṟu*) — "the stomach".

The റ in the middle is the hard *ṟ* this book met at *aṟai*, 'a room' — not the soft *r* of *peyar*. Malayalam says **വയറ്**, the same word; Telugu and Kannada went elsewhere entirely for this one.

Where an English speaker says they are hungry, Tamil is happy to talk about the *vayiṟu* and leave the person out of it: the belly is what is empty, and you merely own it. That is the same habit behind *uṅgaḷ uḍambu eppaḍi irukku*, where the health question hangs on the body rather than on you.

In the family, and next door

	word	same root
Kannada	**ಹೊಟ್ಟೆ** (*hoṭṭe*)	
Telugu	**కడుపు** (*kaḍupu*)	
Malayalam	**വയറ്** (*vayaṟŭ*)	yes
Hindi (neighbour)	**पेट** (*peṭ*)	
English	the stomach	

The word, taken apart — its roots and family

വയിറു (*vayiṟu*) is native Dravidian. DEDR 5259 lists Malayalam *vayaṟu* and Kannada *basaṟ*.

What you've built

That closes the run: an eye, an ear, a nose, a tooth, and what holds the food.

Your turn

Say these aloud:

- *vayiṟu*
- it once more, slowly
- all five in order — *kaṇ*, *kādu*, *mūkku*, *pal*, *vayiṟu*

Before you move on

What does **വയിറു** mean? ("the stomach".) Say it once more.

Who Somebody Is

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what somebody's work is in Tamil, and recognise the endings that mark a man, a woman and respect.
>
> *Complete TA-C46-guest and say all five words in order.*

46.1 ஆசிரியர் (āsiriyar) — a teacher

Before the new run of words: what did *pal* mean, and what did *vayi̲ru* mean?

You'll want to know: ஆசிரியர்

ஆசிரியர் (*āsiriyar*) — "a teacher".

Sanskrit *ācārya*, one who teaches by how they behave, arriving in Tamil with *-ar* on the end — the respectful ending already met on *ivar* and *naṇbar*. So the word is polite before it is anything else: there is no way to say it that does not show regard.

Tamil keeps the older and plainer **ஆசான்** (*āsā̲n*) beside it, and that one is what a student of an art calls a master.

In the family, and next door

	word
Kannada	ಶಿಕ್ಷಕ (*śikṣaka*)
Telugu	గురువు (*guruvu*)

What you've built

The first of five ways to say who somebody is.

Your turn

- *Say it:* *āsiriyar*
- *Say it:* it once more, slowly
- *Say it:* *āsiriyar*, then *naṇbar*, and hear the same ending on both
- *Recall:* say *pa̲lam*
- *Read it:* கண்

Before you move on

What does ஆசிரியர் mean? ("a teacher".) Say it once more.

46.2 மாணவன் (māṇava̲n) — a student

Before the new one: what did *āsiriyar* mean?

You'll want to know: மாணவன்

மாணவன் (*māṇava̲n*) — "a student".

Sanskrit *māṇava*, 'a young person', with the *-a̲n* Tamil puts on a male — the same *-a̲n* as *maka̲n* and *naṇba̲n*.

Change the ending and the person changes with it: *māṇavi* is a girl studying, *māṇavar* is said with respect or of more than one. One stem, three endings, and you already had all three.

In the family, and next door

	word
Kannada	ವಿದ್ಯಾರ್ಥಿ (*vidyārthi*)
Telugu	విద్యార్థి (*vidyārthi*)
Malayalam	വിദ്യാർത്ഥി (*vidyārtthi*)

English	a student

What you've built

Two: the one who teaches and the one who is taught.

Your turn

- *Say it: māṇavaṉ*
- *Say it:* it once more, slowly
- *Say it: āsiriyar*, then *māṇavaṉ*, so the pair sit together
- *Read it:* துணி
- *Recall:* say *kādu*

Before you move on

What does மாணவன் mean? ("a student".) Say it once more.

46.3 மருத்துவர் (maruttuvar) — a doctor

Before the new one: what did *māṇavaṉ* mean?

You'll want to know: மருத்துவர்

மருத்துவர் (*maruttuvar*) — "a doctor".

This one is Tamil's own. It stands on மருந்து (*marundu*), 'medicine', and takes the same respectful *-ar*: the person who deals in medicine.

Beside it sits *vaittiyar*, from Sanskrit *vaidya*, doing the same work with borrowed material. Where a language has both, it usually has a preference, and modern Tamil leans on *maruttuvar* — the signboard on the hospital says so.

In the family, and next door

	word
Kannada	ವೈದ್ಯ (*vaidya*)
Telugu	వైద్యుడు (*vaidyuḍu*)
Malayalam	വൈദ്യൻ (*vaidyan*)
Hindi (neighbour)	डाक्टर (*ḍākṭar*)
English	a doctor

What you've built

Three, and the third one you hope to need rarely.

Your turn

- *Say it: maruttuvar*
- *Say it:* it once more, slowly
- *Say it: māṇavaṉ*, then *maruttuvar*, and hear the ending change
- *Recall:* say *viḷakku*
- *Read it:* மூக்கு

Before you move on

What does மருத்துவர் mean? ("a doctor".) Say it once more.

46.4 விவசாயி (vivasāyi) — a farmer

Before the new one: what did *maruttuvar* mean?

You'll want to know: விவசாயி

விவசாயி (*vivasāyi*) — "a farmer".

The ending is *-i*, which Tamil hangs on somebody by their work rather than by their sex, so the one word covers a man and a woman alike.

The stem is borrowed. The inherited word is உழவன் (*uḻavaṉ*), built straight on *uḻu*, 'to plough', and it carries an older weight — Tamil poetry praises the *uḻavaṉ*, while a form at an office asks for the *vivasāyi*. Two words, one occupation, two registers.

In the family, and next door

	word
Kannada	ರೈತ (*raita*)
Telugu	రైతు (*raitu*)
Malayalam	കർഷകൻ (*karṣakan*)
Hindi (neighbour)	किसान (*kisān*)
English	a farmer

The word, taken apart — its roots and family

விவசாயி (*vivasāyi*) is built on *vivasāyam*, "farming", a loan from Sanskrit *vyavasāya*, "effort, undertaking", with *-i* for the person who does it. In Tamil the word narrowed from any undertaking to the work of the fields.

What you've built

Four, and the fourth one feeds the other three.

Your turn

- *Say it: vivasāyi*
- *Say it:* it once more, slowly
- *Say it: maruttuvar*, then *vivasāyi*, and let the second end on *-i*
- *Read it:* உப்பு
- *Recall:* say *pal*

Before you move on

What does விவசாயி mean? ("a farmer".) Say it once more.

46.5 விருந்தாளி (viruntāḷi) — a guest

Before the new one: what did *vivasāyi* mean?

You'll want to know: விருந்தாளி

விருந்தாளி (*viruntāḷi*) — "a guest".

Take it apart and the guest is named after the meal. The first half is *virundu*, a feast laid on for somebody; the second is *āḷi*, from *āḷ*, 'a person'. A guest, in Tamil, is the person a feast is for — the obligation is inside the word, not added to it afterwards.

There is an older form too, *viruntiṉar*, carrying the *-ar* you now know well. Both say the same thing: somebody has arrived, and there will be food.

In the family, and next door

	word
Kannada	**ಅತಿಥಿ** (*atithi*)
Telugu	**అతిథి** (*atithi*)
Malayalam	**അതിഥി** (*atithi*)
Hindi (neighbour)	**मेहमान** (*mehmān*)
English	a guest

The word, taken apart — its roots and family

விருந்தாளி (*viruntāḷi*) is native: *viruntu*, "feast, guest" (DEDR 5415; Malayalam *virunnu*), and *āḷ*, "person". The guest is the one the feast is for.

What you've built

That closes the run: a teacher, a student, a doctor, a farmer, a guest.

Your turn

- *Say it:* *viruntāḷi*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *āsiriyar*, *māṇavaṉ*, *maruttuvar*, *vivasāyi*, *viruntāḷi*

What does **விருந்தாளி** mean? (“a guest”.) Say it once more.

Chapter 47

Short Replies

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can answer with five short replies in Tamil, from a flat agreement to a hedge.
>
> *Complete TA-C47-just-so and say all five words in order.*

47.1 உண்மை (uṇmai) — the truth

> Before the new run of words: what did *vivasāyi* mean, and what did *viruntāḷi* mean?

You'll want to know: உண்மை

உண்மை (*uṇmai*) — "the truth".

It is built out of *uḷ*, 'to be, to exist', and the *-mai* Tamil adds to turn a quality into something you can name. The truth, then, is is-ness: what is the case.

As a reply it stands on its own. Somebody tells you something surprising and *uṇmai* means "true" — and *uṇmaiyā?*, with the question fixed to the end, means "really?".

The word, taken apart — its roots and family

உண்மை (*uṇmai*) is native Dravidian. DEDR 697 lists Malayalam *uḷ*, "to be there". It is the noun of *uḷ*, "to be, to exist": the truth is what is.

What you've built

The first of five short replies.

Your turn

- *Say it: uṇmai*
- *Say it:* it once more, slowly
- *Say it: uṇmai*, then *sari*, so the two agreements sit together
- *Recall:* say *kaṇ*
- *Read it:* ஆசிரியர்

Before you move on

What does **உண்மை** mean? ("the truth".) Say it once more.

47.2 போதும் (pōdum) — that is enough

Before the new one: what did *uṇmai* mean?

You'll want to know: போதும்

போதும் (*pōdum*) — "that is enough".

It grows out of *pōdu*, 'to suffice', and it is the polite full stop of a Tamil meal: your host is serving, your plate is filling, and *pōdum* stops it without giving offence. Said twice — *pōdum pōdum* — it means you are serious.

It has nothing to do with *pō*, 'to go', though the two look alike at a glance. Different roots, similar clothes.

In the family, and next door

	word
Telugu	సరిపోతుంది (*saripōtundi*)
English	that is enough

The word, taken apart — its roots and family

போதும் (*pōdum*) is native Dravidian. DEDR 4594 lists Malayalam *pōruka*, "to suffice".

What you've built

Two: agreeing, and calling a halt.

Your turn

- *Say it: pōdum*
- *Say it:* it once more, slowly
- *Say it: uṇmai*, then *pōdum*, and let the second land firmly
- *Read it:* காது
- *Recall:* say *māṇavaṉ*

Before you move on

What does போதும் mean? ("that is enough".) Say it once more.

47.3 நிச்சயமாக (niccayamāka) — certainly

Before the new one: what did *pōdum* mean?

You'll want to know: நிச்சயமாக

நிச்சயமாக (*niccayamāka*) — "certainly".

Sanskrit *niścaya*, 'a settled thing', plus -*āka*, the ending Tamil adds when a word is to describe how something is done. *niccayam* on its own is the certainty; *niccayamāka* is doing the thing certainly.

That same -*āka* is inside *nalamāka*, from the answer about being well, so the shape is already in your ear.

Malayalam	തീർച്ചയായും (*tīrccayāyum*)
Hindi (neighbour)	ज़रूर (*zarūr*)
English	certainly

What you've built

Three, and the third leaves no room for doubt.

Your turn

- *Say it: niccayamāka*
- *Say it:* it once more, slowly
- *Say it: pōdum*, then *niccayamāka*, and feel how much longer the second is
- *Recall:* say *mūkku*
- *Read it:* மருத்துவர்

Before you move on

What does நிச்சயமாக mean? ("certainly".) Say it once more.

47.4 ஒருவேளை (oruvēḷai) — perhaps

Before the new one: what did *niccayamāka* mean?

You'll want to know: ஒருவேளை

ஒருவேளை (*oruvēḷai*) — "perhaps".

Two pieces welded together: *oru*, 'one', which you have, and *vēḷai*, 'an occasion, a time', which you have not. One occasion out of the several that could happen — which is exactly the claim "perhaps" makes.

Tamil builds its hedge out of counting. English does the same trick with "maybe", which is a "may" and a "be" pushed against each other until they stuck.

In the family, and next door

	word
Kannada	ಬಹುಶಃ (*bahuśaḥ*)
Telugu	ఏమో (*ēmō*)
Malayalam	ഒരുപക്ഷേ (*orupakṣē*)
Hindi (neighbour)	शायद (*śāyad*)
English	perhaps

The word, taken apart — its roots and family

ஒருவேளை (*oruvēḷai*) is "one time, at one moment": *oru*, "one", native (DEDR 990), and *vēḷai*, "time", a loan from Sanskrit *velā*, "limit, time" (CDIAL 12115). CDIAL adds that *velā* itself probably came from Dravidian.

What you've built

Four, and the fourth one steps back from the other three.

Your turn

- *Say it: oruvēḷai*
- *Say it:* it once more, slowly
- *Say it: niccayamāka*, then *oruvēḷai*, and hear the certainty drain out
- *Read it:* பல்
- *Recall:* say *vivasāyi*

Before you move on

What does ஒருவேளை mean? ("perhaps".) Say it once more.

47.5 அப்படியே (appaḍiyē) — just so

Before the new one: what did *oruvēḷai* mean?

You'll want to know: அப்படியே

அப்படியே (*appaḍiyē*) — "just so".

The front of it is the far pointer *a-* from *adu* and *aṅgē*; *appaḍi* is 'in that manner'; and the *-ē* on the end is how Tamil presses down on a word. In that manner, precisely.

Move the pointer and the whole set follows: *ippaḍi*, 'like this', and *eppaḍi*, 'how' — which you have been saying since you first asked somebody how they were. One pattern, three words, and only the front letter moves.

In the family, and next door

	word
Telugu	అలాగే (*alāgē*)
English	just so

The word, taken apart — its roots and family

அப்படியே (*appaḍiyē*) is native: the far base *a-* (DEDR 1, which lists *appaṭi*, "thus") with *paṭi*, "manner", and the stressing *-ē*: "in just that way".

What you've built

That closes the run: true, enough, certainly, perhaps, just so.

Your turn

- *Say it:* *appaḍiyē*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *uṇmai*, *pōdum*, *niccayamāka*, *oruvēḷai*, *appaḍiyē*
- *Recall:* say *vayi̱ru*
- *Read it:* விருந்தாளி

Before you move on

What does அப்படியே mean? ("just so".) Say it once more.

Setting Out

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that it is time, that I have a journey, and that I am setting out in Tamil.
>
> *Complete TA-C48-set-out and say all five words in order.*

48.1 இப்போது (ippōdu) — now

> Before the new run of words: what did *oruvēḷai* mean, and what did *appaḍiyē* mean?

You'll want to know: இப்போது

இப்போது (*ippōdu*) — "now".

The same pattern as the word that closed the run before, wearing the near pointer instead of the far one: *i-* and *pōdu*, 'a time'. This time. And *appōdu* is that time, then.

In speech it usually shortens to *ippō*, the way English lets "going to" collapse into "gonna". The full form is what you write; the short one is what you hear.

In the family, and next door

	word	same root
Kannada	ಈಗ (*īga*)	
Telugu	ఇప్పుడు (*ippuḍu*)	yes
Malayalam	ഇപ്പോൾ (*ippōḷ*)	yes
Hindi (neighbour)	अब (*ab*)	
English	now	

The word, taken apart — its roots and family

இப்போது (*ippōdu*) is native: the near base *i-* (DEDR 410) and *pōtu*, "time" (DEDR 4559; Malayalam *pōtu*). "This time" is "now".

What you've built

The first of five words for going.

Your turn

- *Say it: ippōdu*
- *Say it:* it once more, slowly
- *Say it: appaḍiyē*, then *ippōdu*, and hear the pointer swap ends
- *Recall:* say *āsiriyar*
- *Read it:* உண்மை

Before you move on

What does இப்போது mean? ("now".) Say it once more.

48.2 நேரம் (nēram) — time

Before the new one: what did *ippōdu* mean?

You'll want to know: நேரம்

நேரம் (*nēram*) — "time".

Not the hour on the clock — that is *maṇi*, which you already have — but time as a quantity of it: whether there is any, whether this is the right one, whether it has run out.

nēram āccu is how a Tamil speaker says the moment has come, and it is very often the sentence that ends a visit. Nobody has to be rude about leaving if the clock can be blamed.

In the family, and next door

	word
Malayalam	സമയം (*samayam*)
English	time

The word, taken apart — its roots and family

நேரம் (*nēram*) is native Dravidian. DEDR 3774 lists Malayalam *nēram*.

What you've built

Two: this moment, and the stuff moments are made of.

Your turn

- *Say it: nēram*
- *Say it:* it once more, slowly
- *Say it: ippōdu*, then *nēram*, so the two sit together
- *Read it:* மாணவன்
- *Recall:* say *pōdum*

Before you move on

What does நேரம் mean? ("time".) Say it once more.

48.3 பயணம் (payaṇam) — a journey

Before the new one: what did *nēram* mean?

You'll want to know: பயணம்

பயணம் (*payaṇam*) — "a journey".

Beside it Tamil also keeps *pirayāṇam*, straight from Sanskrit *prayāṇa*, and the pair divides the work the way *nalam* and *sugam* did: the shorter word is the everyday one, the longer is what goes into writing.

Somebody travelling is a *payaṇi*, with the same *-i* ending that made the farmer out of his field.

In the family, and next door

	word	same root
Kannada	ಪ್ರಯಾಣ (*prayāṇa*)	yes
Telugu	ప్రయాణం (*prayāṇaṁ*)	yes
Malayalam	യാത്ര (*yātra*)	
Hindi (neighbour)	सफ़र (*safar*)	
English	a journey	

What you've built

Three, and the third one takes you somewhere.

Your turn

- *Say it: payaṇam*
- *Say it:* it once more, slowly
- *Say it: nēram*, then *payaṇam*, and hear both endings agree
- *Recall:* say *maruttuvar*
- *Read it:* நிச்சயமாக

Before you move on

What does பயணம் mean? ("a journey".) Say it once more.

48.4 பிறகு (piṟaku) — afterwards

Before the new one: what did *payaṇam* mean?

You'll want to know: பிறகு

பிறகு (*piṟaku*) — "afterwards".

Underneath it is *piṉ*, 'behind'. What sits behind you in space becomes what comes after you in time, and Tamil made that move so long ago that nobody hears it any more. English did the same thing with "before", which began as a word about the front of things.

As a way of parting it is gentle and slightly vague: *piṟaku pārkkalām*, "we'll see each other later", promises nothing and closes the conversation kindly.

In the family, and next door

	word
Kannada	ಆಮೇಲೆ (*āmēle*)
English	afterwards

The word, taken apart — its roots and family

பிறகு (*piṟaku*) is native Dravidian. DEDR 4205 lists Malayalam *pin*, Kannada *pin* and Telugu *piṟu*. The entry lists *piṟaku* among the words built on *piṉ*, "behind, after".

What you've built

Four, and the fourth one puts off the parting.

Your turn

- *Say it: piṟaku*
- *Say it:* it once more, slowly
- *Say it: payaṇam*, then *piṟaku*, and let the hard *ṟ* land in the second
- *Read it:* விவசாயி
- *Recall:* say *oruvēḷai*

Before you move on

What does பிறகு mean? ("afterwards".) Say it once more.

48.5 புறப்படு (puṟappaḍu) — to set out

Before the new one: what did *piṟaku* mean?

You'll want to know: புறப்படு

புறப்படு (*puṟappaḍu*) — "to set out".

Two pieces, both still visible. *puṟam* is the outside, and *paḍu* is the all-purpose ending Tamil uses when something happens to you. To *puṟappaḍu* is to come to be outside — which is what leaving a house actually consists of.

nāṉ puṟappaḍugiṟēṉ announces your departure with none of the weight of *pōy varugiṟēṉ*. It is what you say at the door with your bag already in your hand.

In the family, and next door

	word	same root
Kannada	ಹೊರಡು (*horaḍu*)	yes
Telugu	బయలుదేరు (*bayaludēru*)	
Malayalam	പുറപ്പെടുക (*puṟappeṭuka*)	yes
Hindi (neighbour)	निकलना (*nikalnā*)	
English	to set out	

The word, taken apart — its roots and family

புறப்படு (*puṟappaḍu*) is native: *puṟam*, "outside" (DEDR 4333; Malayalam *puṟam*), and *paṭu*, "to become" (DEDR 3853). To set out is "to get outside".

What you've built

That closes the run: now, time, a journey, afterwards, and getting up to go.

Your turn

- *Say it:* *puṟappaḍu*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *ippōdu*, *nēram*, *payaṇam*, *piṟaku*, *puṟappaḍu*

What does புறப்படு mean? (“to set out”.) Say it once more.

Chapter 49

Courtesy

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can thank somebody warmly in Tamil, show respect, and wish them well.
>
> *Complete TA-C49-many-thanks and say all five words in order.*

49.1 அன்பு (aṉbu) — affection

Before the new run of words: what did *piṟaku* mean, and what did *puṟappaḍu* mean?

You'll want to know: அன்பு

அன்பு (*aṉbu*) — "affection".

This is the warm, ordinary love — for a family, for a friend, for a place. *kādal* is the other kind, the one the poems are about, and Tamil keeps the two apart where English makes one word do both.

A letter opens *aṉbuḷḷa*, "dear", which is literally 'having affection'. Put the endings you know on the stem and you get *aṉbaṉ* and *aṉbar*, somebody who loves — the same two endings, doing the same work, on new material.

The word, taken apart — its roots and family

அன்பு (*aṉbu*) is native Dravidian. DEDR 330 lists Malayalam *anpu* and Kannada *aṇpu*, "friendship".

What you've built

The first of five courtesies.

Your turn

- *Say it: aṉbu*
- *Say it:* it once more, slowly
- *Say it: aṉbu*, then *aṉbuḷḷa*, and hear the stem stay put
- *Recall:* say *uṇmai*
- *Read it:* இப்போது

Before you move on

What does அன்பு mean? ("affection".) Say it once more.

49.2 மரியாதை (mariyādai) — respect

Before the new one: what did *aṉbu* mean?

You'll want to know: மரியாதை

மரியாதை (*mariyādai*) — "respect".

Sanskrit *maryādā*, which started life as a boundary mark — the line at the edge of a field. Respect, in that picture, is knowing where the line runs and not stepping over it.

Tamil shows it in its endings as much as in its words. You have been doing it since *nīṅgaḷ*, where the ending meant for many is aimed at one person on purpose: *mariyādai* built out of shape rather than out of vocabulary.

In the family, and next door

	word
Kannada	ಗೌರವ (*gaurava*)
Telugu	గౌరవం (*gauravaṁ*)
Malayalam	ബഹുമാനം (*bahumānaṁ*)
Hindi (neighbour)	आदर (*ādar*)
English	respect

What you've built

Two: what you feel, and what you show.

Your turn

- *Say it: mariyādai*
- *Say it:* it once more, slowly
- *Say it: aṉbu*, then *mariyādai*, so the warm one and the formal one sit together
- *Read it:* போதும்
- *Recall:* say *nēram*

Before you move on

What does மரியாதை mean? ("respect".) Say it once more.

49.3 சந்தோஷம் (santōṣam) — gladness

Before the new one: what did *mariyādai* mean?

You'll want to know: சந்தோஷம்

சந்தோஷம் (*santōṣam*) — "gladness".

Sanskrit *santoṣa*, 'contentment', sitting beside the native *magiḻcci* you met when somebody was pleased to see you. Both are in daily use and neither has driven the other out — the same arrangement as *nalam* and *sugam*.

santōṣam is what you reach for when you accept an invitation. On its own, in reply, it means "gladly".

What you've built

Three, and the third one is an answer as much as a feeling.

Your turn

- *Say it: santōṣam*
- *Say it:* it once more, slowly
- *Say it: mariyādai*, then *santōṣam*, and let the second one lift
- *Recall:* say *niccayamāka*
- *Read it:* பயணம்

Before you move on

What does சந்தோஷம் mean? ("gladness".) Say it once more.

49.4 வாழ்த்து (vāḻttu) — a good wish

Before the new one: what did *santōṣam* mean?

You'll want to know: வாழ்த்து

வாழ்த்து (*vāḻttu*) — "a good wish".

Straight off *vāḻ*, 'to live, to flourish', which you had early. To give somebody a *vāḻttu* is to wish them a life — not luck, not success, but the thing itself.

vāḻttukkaḷ is what a Tamil speaker says where English says "congratulations", and it is the kinder sentence of the two: flourishing, offered in the plural, rather than a nod at what you managed to pull off.

The word, taken apart — its roots and family

வாழ்த்து (*vāḻttu*) is native Dravidian. DEDR 5372 lists Malayalam *vāḻttuka*, "to bless". It is the noun of *vāḻ*, "to live": a good wish says "may you live well".

What you've built

Four, and the fourth one is given rather than felt.

Your turn

- *Say it: vāḻttu*
- *Say it:* it once more, slowly
- *Say it: santōṣam*, then *vāḻttu*, and feel the ழ glide in the second
- *Read it:* ஒருவேளை
- *Recall:* say *piṟaku*

Before you move on

What does வாழ்த்து mean? ("a good wish".) Say it once more.

49.5 மிக்க நன்றி (mikka naṉṟi) — thank you very much

Before the new one: what did *vāḻttu* mean?

You'll want to know: மிக்க நன்றி

மிக்க நன்றி (*mikka naṉṟi*) — "thank you very much".

naṉṟi has been with you since the very beginning. *mikka* is the new piece in front of it: from *migu*, 'to exceed', so it means abundant, more than the usual measure.

Tamil does not raise its voice to be warm. It puts *mikka* at the front and leaves everything else exactly where it was. Set this beside *tayavu seytu* and *maṉṉikkavum* and the courtesy kit is complete.

The word, taken apart — its roots and family

மிக்க நன்றி (*mikka naṉṟi*) is two native words: *mikka*, "great, much", from *miku*, "to exceed" (DEDR 4838; Malayalam *mikka*), and *naṉṟi*, "goodness" (DEDR 3610).

What you've built

That closes the run: affection, respect, gladness, a good wish, and thanks with weight behind it.

Your turn

- *Say it: mikka na<u>n</u><u>r</u>i*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *a<u>n</u>bu*, *mariyādai*, *santōṣam*, *vā<u>l</u>ttu*, *mikka na<u>n</u><u>r</u>i*
- *Recall:* say *appaḍiyē*
- *Read it:* புறப்படு

Before you move on

What does மிக்க நன்றி mean? (“thank you very much”.) Say it once more.

Chapter 50

At the Doorway

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the five things a guest meets at a Tamil doorway, and welcome them.
>
> *Complete TA-C50-welcome and say all five words in order.*

50.1 வாசல் (vāsal) — a doorway

> Before the new run of words: what did *vāḻttu* mean, and what did *mikka naṉṟi* mean?

You'll want to know: வாசல்

வாசல் (*vāsal*) — "a doorway".

Tamil separates the opening from the thing that shuts it. *kadavu*, which you have, is the door itself — the plank on its hinges. *vāsal* is the doorway: the gap, the step, and the strip of ground in front of it.

Almost everything that happens when a guest arrives happens at the *vāsal* rather than inside it, which is why the word carries more than architecture.

The word, taken apart — its roots and family

வாசல் (*vāsal*) is native Dravidian. DEDR 5354 lists Malayalam *vātil*, Kannada *bāgil* and Telugu *vākili*. The entry lists *vāyil* and *vācal* side by side.

What you've built

The first of five things a guest meets at a Tamil door.

Your turn

- *Say it:* *vāsal*
- *Say it:* it once more, slowly
- *Say it:* *kadavu*, then *vāsal*, so the door and its opening sit together
- *Recall:* say *ippōdu*
- *Read it:* அன்பு

Before you move on

What does வாசல் mean? ("a doorway".) Say it once more.

50.2 கோலம் (kōlam) — the design at a doorway

Before the new one: what did *vāsal* mean?

You'll want to know: கோலம்

கோலம் (*kōlam*) — "the design at a doorway".

Rice flour, drawn freehand on the ground each morning, usually by the woman of the house and usually before the sun is up. It is decoration and welcome at once — and because the flour feeds ants and birds, it is a small daily gift to whatever comes past.

The older sense of the word is 'form, appearance, the shape a thing takes'. A *kōlam* is the shape the house puts on to receive the day.

The word, taken apart — its roots and family

கோலம் (*kōlam*) is native Dravidian. DEDR 2240 lists Malayalam *kōlam*, "form, figure" and Kannada *kōla*, "ornament". The word first meant beauty, form and shape, and the drawing at the door is one of its senses.

What you've built

Two: the doorway, and what is drawn in front of it.

Your turn

- *Say it: kōlam*
- *Say it:* it once more, slowly
- *Say it: vāsal*, then *kōlam*, and let the long *ō* open the second
- *Read it:* நேரம்
- *Recall:* say *mariyādai*

Before you move on

What does கோலம் mean? ("the design at a doorway".) Say it once more.

50.3 மலர் (malar) — a flower

Before the new one: what did *kōlam* mean?

You'll want to know: மலர்

மலர் (*malar*) — "a flower".

The everyday word is *pū*, short and plain. *malar* is its fuller partner, the one that goes into names and poems and careful speech.

It also says what a flower does: *malar* means 'to open, to blossom'. One shape names the act and the result of it, and Tamil saw no reason to invent a second word for the second thing.

In the family, and next door

	word
Telugu	పువ్వు (*puvvu*)
Malayalam	പൂവ് (*pūvŭ*)
Hindi (neighbour)	फूल (*phūl*)
English	a flower

The word, taken apart — its roots and family

மலர் (*malar*) is native Dravidian. DEDR 4739 lists Malayalam *malar* and Kannada *malar*. It is also a verb, *malar*, "to open as a flower, to bloom".

What you've built

Three, and the third one arrives in somebody's hand.

Your turn

- *Say it: malar*
- *Say it:* it once more, slowly
- *Say it: kōlam*, then *malar*, and hear the soft *r* close the second
- *Recall:* say *payaṇam*
- *Read it:* சந்தோஷம்

Before you move on

What does மலர் mean? ("a flower".) Say it once more.

50.4 வெற்றிலை (ve̲r̲rilai) — betel leaf

Before the new one: what did *malar* mean?

You'll want to know: வெற்றிலை

வெற்றிலை (*ve̲r̲rilai*) — "betel leaf".

The end of the word is plain once you have the pieces: *-ilai* is *ilai*, 'a leaf'.

Betel leaf and areca nut, handed over together, are how a Tamil household says the visit mattered and the guest is owed something — at a wedding, at a farewell, at anything that counts. The leaf costs almost nothing and means a great deal, which is the usual arrangement for the things a culture puts at its centre.

The word, taken apart — its roots and family

வெற்றிலை (*ve̱r̲rilai*) is native Dravidian. DEDR 5515 lists Malayalam *ve̱r̲r̲-ila*. The second half is the native word for "leaf".

What you've built

Four, and the fourth is the one you are sent home with.

Your turn

- *Say it: ve̱r̲rilai*
- *Say it:* it once more, slowly
- *Say it: malar*, then *ve̱r̲rilai*, and let the hard *r̲* double in the second
- *Read it:* பிறகு
- *Recall:* say *vā̱lttu*

Before you move on

What does வெற்றிலை mean? ("betel leaf".) Say it once more.

50.5 வரவேற்பு (varavē̱rpu) — a welcome

Before the new one: what did *ve̱r̲rilai* mean?

You'll want to know: வரவேற்பு

வரவேற்பு (*varavē̱rpu*) — "a welcome".

Two pieces you can almost hear coming apart. *vara* is the coming, from *vā*, the word for 'come' you already have; *ē̱rpu* is the accepting, from *ē̱r̲r̲u*, 'to receive'. A welcome, in Tamil, is the acceptance of somebody's arrival, and the word says that and nothing more.

varavē̱rkire̱n is "I welcome you". At the *vāsal*, over the *kōlam*, with a *malar* and a *ve̱r̲rilai* in hand, it is the last thing left to say at a door — and it sets you back down exactly where this book began, at a door, with *vaṇakkam*.

In the family, and next door

	word
Kannada	ಸ್ವಾಗತ (*svāgata*)
Telugu	స్వాగతం (*svāgatam*)
Malayalam	സ്വാഗതം (*svāgatam*)
English	a welcome

The word, taken apart — its roots and family

வரவேற்பு (*varavēr̲pu*) is native: *varavu*, "coming", from *varu*, "to come" (DEDR 5270), and *ēr̲pu*, "receiving", from *ēl*, "to receive, to welcome" (DEDR 905). A welcome is "receiving someone's coming".

What you've built

That closes the run: a doorway, a design, a flower, a leaf, and the word for taking somebody in.

Your turn

- *Say it:* *varavēr̲pu*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *vāsal*, *kōlam*, *malar*, *ver̲r̲ilai*, *varavēr̲pu*
- *Recall:* say *pur̲appaḍu*
- *Read it:* மிக்க நன்றி

Before you move on

What does வரவேற்பு mean? ("a welcome".) Say it once more.

Overhead

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the sky, the sun, the moon, the stars and a cloud in Tamil.
>
> *Complete TA-C51-cloud and say all five words in order.*

51.1 ஆகாயம் (ākāyam) — the sky

Before the new run of words: what did *veṟṟilai* mean, and what did *varavēṟpu* mean?

You'll want to know: ஆகாயம்

ஆகாயம் (*ākāyam*) — "the sky".

Sanskrit *ākāśa*, the open lit space. Malayalam and Telugu both keep the *ś* their letters can write and say *ākāśaṁ*. Tamil has no letter for that sound, so the word arrives softened, with a ய standing where the *ś* was, and settles as **ஆகாயம்**.

Tamil's own inherited word for the same overhead space is *vāṉ*, which you have already met inside *vāṉilai*, the weather — the standing of the sky. **ஆகாயம்** took the wider and emptier sense: not the weather over your head but the space itself.

In the family, and next door

	word	same root
Kannada	ಆಕಾಶ (*ākāśa*)	yes
Telugu	ఆకాశం (*ākāśaṁ*)	yes
Malayalam	ആകാശം (*ākāśaṁ*)	yes
Hindi (neighbour)	आसमान (*āsmān*)	
English	the sky	

What you've built

The first of five things above you.

Your turn

- *Say it:* *ākāyam*
- *Say it:* it once more, slowly
- *Say it:* *vaṇakkam*, then *ākāyam*, as you would greet somebody out of doors
- *Recall:* say *aṉbu*
- *Read it:* வாசல்

Before you move on

What does ஆகாயம் mean? ("the sky".) Say it once more.

51.2 சூரியன் (sūriyaṉ) — the sun

Before the new one: what did *ākāyam* mean?

You'll want to know: சூரியன்

சூரியன் (*sūriyaṉ*) — "the sun".

Sanskrit *sūrya*, and the three sisters differ only in what they hang on the end of it. Telugu makes సూర్యుడు (*sūryuḍu*), Malayalam *sūryan*, Tamil சூரியன். The ending is the part each language owns; the sun is shared.

Tamil's inherited sun is *ñāyiṟu*, the word standing behind the name of the first day of the week you already count through. It stepped back into the calendar and into poetry and left the daily sun to சூரியன்.

In the family, and next door

	word	same root
Kannada	ಸೂರ್ಯ (*sūrya*)	yes
Telugu	సూర్యుడు (*sūryuḍu*)	yes
Malayalam	സൂര്യൻ (*sūryan*)	yes

English	the sun	

What you've built

Two: the space, and the thing that lights it.

Your turn

- *Say it: sūriyaṉ*
- *Say it:* it once more, slowly
- *Say it: ākāyam*, then *sūriyaṉ*, the sky first and then what is in it
- *Read it:* மரியாதை
- *Recall:* say *kōlam*

Before you move on

What does சூரியன் mean? ("the sun".) Say it once more.

51.3 நிலா (nilā) — the moon

Before the new one: what did *sūriyaṉ* mean?

You'll want to know: நிலா

நிலா (*nilā*) — "the moon".

Where both sisters took the Sanskrit moon — *candran* in Malayalam, *candruḍu* in Telugu — Tamil's everyday moon is its own. நிலா is inherited, and it is the moon as light rather than as a body: *nilā* is what lies on a courtyard at night, the moonlight and the moon in one word. Tamil has *cantiraṉ* as well, from the same Sanskrit its sisters took, and saves it for almanacs and for verse.

Let the ஆ at the end run long. It is the length that makes the word.

In the family, and next door

	word
Kannada	ಚಂದ್ರ (*candra*)
Telugu	చంద్రుడు (*candruḍu*)
Malayalam	ചന്ദ്രൻ (*candran*)
Hindi (neighbour)	चाँद (*chā̃d*)
English	the moon

The word, taken apart — its roots and family

நிலா (*nilā*) is native Dravidian. DEDR 3754 lists Malayalam *nilā* and Telugu *nela*. The entry glosses it "moonlight, moon".

What you've built

Three: the space, the day light, and the night one.

Your turn

- *Say it: nilā*
- *Say it:* it once more, slowly
- *Say it: sūriyan̲*, then *nilā*, and let the second one end long
- *Recall:* say *santōṣam*
- *Read it:* மலர்

Before you move on

What does நிலா mean? ("the moon".) Say it once more.

51.4 விண்மீன் (viṇmīn̲) — a star

Before the new one: what did *nilā* mean?

You'll want to know: விண்மீன்

விண்மீன் (*viṇmīṉ*) — "a star".

Two pieces, and they come apart cleanly. *viṇ* is the sky as height, the open air above; *mīṉ* is a fish, and from the oldest Tamil poetry onward it is a star as well. A star, in Tamil, is a fish in the sky — a shoal of small bright things moving in something you cannot walk on.

The sisters went other ways. Malayalam takes the Sanskrit **നക്ഷത്രം** (*nakṣatraṁ*); Telugu says **చుక్క** (*cukka*), which is also its word for a dot.

In the family, and next door

	word
Kannada	**ಚುಕ್ಕಿ** (*cukki*)
Telugu	**చుక్క** (*cukka*)
Malayalam	**നക്ഷത്രം** (*nakṣatraṁ*)
Hindi (neighbour)	**तारा** (*tārā*)
English	a star

The word, taken apart — its roots and family

விண்மீன் (*viṇmīṉ*) is native: *viṇ*, "sky" (DEDR 5396; Malayalam *viṇṇu*), and *mīṉ*, "star", from the family of words for flashing and shining (DEDR 4876). A star is "the shining one of the sky".

What you've built

Four, and this one is a picture rather than a name.

Your turn

- *Say it: viṇmīṉ*
- *Say it:* it once more, slowly
- *Say it: nilā*, then *viṇmīṉ*, the big light and then the small ones
- *Read it:* **வாழ்த்து**
- *Recall:* say *verrilai*

Before you move on

What does **விண்மீன்** mean? ("a star".) Say it once more.

51.5 மேகம் (mēkam) — a cloud

Before the new one: what did *viṇmīṉ* mean?

You'll want to know: மேகம்

மேகம் (*mēkam*) — "a cloud".

Sanskrit *megha*, taken in whole. Tamil has inherited cloud-words too — *mukil* and *kār*, both still alive in names and in verse — but **மேகம்** is the one doing the daily work.

Telugu did not borrow here at all: its cloud is *mabbu*, its own. Which words a language takes and which it keeps is rarely tidy. On the sky the two of them borrowed together; on the cloud they part.

In the family, and next door

	word
Kannada	**ಮೋಡ** (*mōḍa*)
Telugu	**మబ్బు** (*mabbu*)
Hindi (neighbour)	**बादल** (*bādal*)
English	a cloud

What you've built

That is the whole sky: the space, the sun, the moon, the small lights, and the thing that hides them.

Your turn

- *Say it:* *mēkam*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *ākāyam*, *sūriyaṉ*, *nilā*, *viṇmīṉ*, *mēkam*
- *Recall:* say *mikka naṉṟi*
- *Read it:* **வரவேற்பு**

Before you move on

What does **மேகம்** mean? ("a cloud".) Say it once more.

Chapter 52

A Tree

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a tree, its branch, its new shoot, its root and its seed in Tamil.
>
> *Complete TA-C52-seed and say all five words in order.*

52.1 மரம் (maram) — a tree

> Before the new run of words: what did *viṇmīṉ* mean, and what did *mēkam* mean?

You'll want to know: மரம்

மரம் (*maram*) — "a tree".

Proto-Dravidian ***mar-**, and Malayalam did not lay a finger on it: മരം, the same word letter for letter. Telugu went somewhere else entirely, to చెట్టు (*ceṭṭu*) — the ordinary arrangement in this family, where the two closest sisters agree and the third has its own.

maram is the tree standing and the timber cut out of it. A carpenter works in *maram*; so does a forest.

In the family, and next door

	word	same root
Kannada	ಮರ (*mara*)	yes
Telugu	చెట్టు (*ceṭṭu*)	
Malayalam	മരം (*maraṁ*)	yes
Hindi (neighbour)	पेड़ (*peṛ*)	
English	a tree	

What you've built

The first of five pieces of one tree.

Your turn

- *Say it: maram*
- *Say it:* it once more, slowly
- *Say it: mēkam*, then *maram*, the cloud and what stands under it
- *Recall:* say *vāsal*
- *Read it:* ஆகாயம்

Before you move on

What does மரம் mean? ("a tree".) Say it once more.

52.2 கிளை (kiḷai) — a branch

Before the new one: what did *maram* mean?

You'll want to know: கிளை

கிளை (*kiḷai*) — "a branch".

Both sisters reach for a word of a different shape here — Malayalam *kompŭ*, Telugu *komma* — where Tamil says **கிளை**.

And a **கிளை** is not only what grows off a tree. A family has them: the branch of a house, the people who come off one trunk. When Tamil calls somebody your *kiḷai*, it is the tree word doing the work, and a bank branch is a *kiḷai* too.

In the family, and next door

	word
Kannada	**ಕೊಂಬೆ** (*kombe*)
Telugu	**కొమ్మ** (*komma*)
Malayalam	**കൊമ്പ്** (*kompŭ*)
English	a branch

The word, taken apart — its roots and family

கிளை (*kiḷai*) is native Dravidian. DEDR 1583 lists Malayalam *kiḷa*, "bud, sprout". The entry gathers words for rising and shooting up: a branch is what shoots out.

What you've built

Two: the trunk, and what comes off it.

Your turn

- *Say it: kiḷai*
- *Say it:* it once more, slowly
- *Say it: maram*, then *kiḷai*, the tree and then what comes off it
- *Read it:* கோலம்
- *Recall:* say *sūriyaṉ*

Before you move on

What does கிளை mean? ("a branch".) Say it once more.

52.3 தளிர் (taḷir) — a tender shoot

Before the new one: what did *kiḷai* mean?

You'll want to know: தளிர்

தளிர் (*taḷir*) — "a tender shoot".

The new growth at the end of a branch: the pale soft leaf before it hardens and goes green. Tamil keeps a word of its own for it rather than calling it a small leaf, which tells you how much attention the thing has had.

taḷirkka is what a tree does after the first rains. Tamil says it of people as well — somebody who has been ill and is picking up again has *taḷirttu*, put out new growth.

The word, taken apart — its roots and family

தளிர் (*taḷir*) is native Dravidian. DEDR 3131 lists Malayalam *taḷir* and Kannada *taḷi*, "to sprout".

What you've built

Three: the tree, the branch, and the newest thing on it.

Your turn

- *Say it: taḷir*
- *Say it:* it once more, slowly
- *Say it: kiḷai*, then *taḷir*, the branch and the new thing on the end of it
- *Recall:* say *malar*
- *Read it:* நிலா

Before you move on

What does தளிர் mean? ("a tender shoot".) Say it once more.

52.4 வேர் (vēr) — a root

Before the new one: what did *taḷir* mean?

You'll want to know: வேர்

வேர் (*vēr*) — "a root".

One word in three hands. Malayalam വേര് (*vēruŭ*), Telugu వేరు (*vēru*), Tamil வேர். Set them beside each other and there is nothing left to choose between them.

It is the root of a plant and the bottom of anything else: a tooth has a வேர், and so does a word.

In the family, and next door

	word	same root
Kannada	ಬೇರು (*bēru*)	yes
Telugu	వేరు (*vēru*)	yes
Malayalam	വേര് (*vēruṟ*)	yes
Hindi (neighbour)	जड़ (*jaṛ*)	
English	a root	

The word, taken apart — its roots and family

வேர் (*vēr*) is native Dravidian. DEDR 5535 lists Malayalam *vēr* and Kannada *bēr*.

What you've built

Four: everything above ground, and now the part under it.

Your turn

- *Say it: vēr*
- *Say it:* it once more, slowly
- *Say it: taḷir*, then *vēr*, the top of the tree and the bottom of it
- *Read it:* வெற்றிலை
- *Recall:* say *viṇmīṉ*

Before you move on

What does வேர் mean? ("a root".) Say it once more.

52.5 விதை (vitai) — a seed

Before the new one: what did *vēr* mean?

You'll want to know: விதை

விதை (*vitai*) — "a seed".

Malayalam വിത്ത് (*vittŭ*) and Telugu విత్తనం (*vittanam*) are the same root wearing different endings, and Tamil keeps a *vittu* of its own beside விதை.

விதை is the seed and the sowing of it at once: *vitaikka* is to sow. The thing and what you do with it share one shape, which saves Tamil a word.

In the family, and next door

	word	same root
Kannada	ಬೀಜ (*bīja*)	
Telugu	విత్తనం (*vittanam*)	yes
Malayalam	വിത്ത് (*vittŭ*)	yes
Hindi (neighbour)	बीज (*bīj*)	
English	a seed	

The word, taken apart — its roots and family

விதை (*vitai*) is native Dravidian. DEDR 5401 lists Malayalam *vittu*, Kannada *bittu* and Telugu *vittu*. The verb *vitai* means "to sow".

What you've built

A whole tree, from the seed under it to the softest thing on the end of a branch.

Your turn

- *Say it: vitai*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *maram*, *kiḷai*, *taḷir*, *vēr*, *vitai*
- *Recall:* say *varavēr̲pu*
- *Read it:* மேகம்

Before you move on

What does விதை mean? ("a seed".) Say it once more.

Chapter 53

The Land

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a river, a hill, a paddy field, a path and a village in Tamil.
>
> *Complete TA-C53-village and say all five words in order.*

53.1 நதி (nadi) — a river

> Before the new run of words: what did *vēr* mean, and what did *vitai* mean?

You'll want to know: நதி

நதி (*nadi*) — "a river".

Sanskrit *nadī*, and Telugu prints it identically: నది. Malayalam did not take it for the everyday river and says പുഴ (*puḻa*) instead, which is its own.

Tamil's inherited river is ஆறு — the same shape as the six you already count with. Which of the two is meant comes out of what sits around it, and நதி is the one that leaves no room for doubt.

In the family, and next door

	word	same root
Kannada	ನದಿ (*nadi*)	yes
Telugu	నది (*nadi*)	yes
Malayalam	പുഴ (*puḻa*)	
Hindi (neighbour)	नदी (*nadī*)	yes
English	a river	

What you've built

The first of five things in a stretch of country.

Your turn

- *Say it: nadi*
- *Say it:* it once more, slowly
- *Say it: vitai*, then *nadi*, the seed and the water that reaches it
- *Recall:* say *ākāyam*
- *Read it:* மரம்

Before you move on

What does நதி mean? ("a river".) Say it once more.

53.2 மலை (malai) — a hill

Before the new one: what did *nadi* mean?

You'll want to know: மலை

மலை (*malai*) — "a hill".

Proto-Dravidian, and it covers a hill and a mountain both — Tamil does not split them the way English does. Telugu keeps a small hill of its own, గుట్ట (*guṭṭa*).

You have been reading this word all along without being told. The name *Malayāḷam* begins with it: the language of the hill country, named for its hills.

In the family, and next door

	word
Kannada	ಬೆಟ್ಟ (*beṭṭa*)
Telugu	గుట్ట (*guṭṭa*)
English	a hill

What you've built

Two: the water, and what it comes down from.

Your turn

- *Say it: malai*
- *Say it:* it once more, slowly
- *Say it: nadi*, then *malai*, the water and the high ground behind it
- *Read it:* சூரியன்
- *Recall:* say *kiḷai*

Before you move on

What does மலை mean? ("a hill".) Say it once more.

53.3 വയൽ (vayal) — a paddy field

Before the new one: what did *malai* mean?

You'll want to know: വയൽ

വയൽ (*vayal*) — "a paddy field".

A wet field: the flooded one that grows rice, not a dry one. Malayalam writes വയൽ and means the same thing by it.

The dry field is a *kollai*, a different word altogether, and the split earns its keep. A farmer telling you which of the two he has is telling you what he can grow on it and when.

In the family, and next door

	word	same root
Kannada	ಹೊಲ (*hola*)	
Telugu	పొలం (*polaṁ*)	
Malayalam	വയൽ (*vayal*)	yes
Hindi (neighbour)	खेत (*khet*)	
English	a paddy field	

The word, taken apart — its roots and family

வயல் (*vayal*) is native Dravidian. DEDR 5258 lists Malayalam *vayal* and Kannada *bayal*.

What you've built

Three: high ground, and now the flat wet ground under it.

Your turn

- *Say it: vayal*
- *Say it:* it once more, slowly
- *Say it: malai*, then *vayal*, the high ground and the flat
- *Recall:* say *nilā*
- *Read it:* தளிர்

Before you move on

What does வயல் mean? ("a paddy field".) Say it once more.

53.4 பாதை (pātai) — a path

Before the new one: what did *vayal* mean?

You'll want to know: பாதை

பாதை (*pātai*) — "a path".

Something you can put your foot on: a track worn into the ground, a lane, a road.

Tamil has *vaḻi* as well, and the two overlap less than they look as though they should. *vaḻi* is the way — the route, the means, the manner of going about something. பாதை stays physical. Malayalam's everyday path-word is വഴി, the same one; Telugu's is *bāṭa*.

In the family, and next door

	word	same root
Telugu	బాట (*bāṭa*)	yes
English	a path	

The word, taken apart — its roots and family

பாதை (*pātai*) is probably a loan from Sanskrit *patha*, "path" (CDIAL 7743), with the Tamil *-ai* ending. DEDR has no native entry for it.

What you've built

Four: three places, and now something joining them.

Your turn

- *Say it: pātai*
- *Say it:* it once more, slowly
- *Say it: vayal*, then *pātai*, the field and the way to it
- *Read it:* விண்மீன்
- *Recall:* say *vēr*

Before you move on

What does பாதை mean? ("a path".) Say it once more.

53.5 கிராமம் (kirāmam) — a village

Before the new one: what did *pātai* mean?

You'll want to know: கிராமம்

கிராமம் (*kirāmam*) — "a village".

Sanskrit *grāma*, and Telugu takes it whole: గ్రామం. Tamil does not begin a word on two held-together sounds, so it let a vowel into the middle of the cluster and the word came out *ki-rā-mam*.

You already have *ūr* for the place you belong to. *ūr* is yours — your town, the one you name when somebody asks where you are from. கிராமம் is the word on the form and on the signboard at the edge of the road.

In the family, and next door

	word	**same root**
Kannada	ಹಳ್ಳಿ (*haḷḷi*)	
Telugu	గ్రామం (*grāmaṁ*)	yes
Malayalam	ഗ്രാമം (*grāmaṁ*)	yes
Hindi (neighbour)	गाँव (*gā̃v*)	
English	a village	

What you've built

Water, high ground, a wet field, a way across it, and the place at the end of the way.

Your turn

- *Say it:* *kirāmam*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *nadi*, *malai*, *vayal*, *pātai*, *kirāmam*
- *Recall:* say *mēkam*
- *Read it:* விதை

Before you move on

What does கிராமம் mean? ("a village".) Say it once more.

Chapter 54

Things in the House

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the mat, basket, knife, bowl and box a Tamil house sets out for a guest.
>
> *Complete TA-C54-box and say all five words in order.*

54.1 பாய் (pāy) — a mat

> Before the new run of words: what did *pātai* mean, and what did *kirāmam* mean?

You'll want to know: பாய்

பாய் (*pāy*) — "a mat".

The woven mat that is unrolled to sleep on and unrolled again for a guest to sit on. Malayalam says **പായ** (*pāya*) and Telugu **చాప** (*cāpa*).

பாய் is also 'to leap'. Nothing joins the two but the sound, and what sits around the word settles which is meant — the same one-shape-two-jobs arrangement *tuṇi* already showed you.

In the family, and next door

	word	same root
Kannada	**ಚಾಪೆ** (*cāpe*)	
Telugu	**చాప** (*cāpa*)	
Malayalam	**പായ** (*pāya*)	yes
English	a mat	

The word, taken apart — its roots and family

பாய் (*pāy*) is native Dravidian (DEDR 4088). The entry's verb *pāy* means "to spread", and the noun is "spreading, a mat, a sail": a mat is the thing spread out.

What you've built

The first of five things a house puts in front of you.

Your turn

- *Say it: pāy*
- *Say it:* it once more, slowly
- *Say it: kirāmam*, then *pāy*, the village and what is unrolled for you in it
- *Recall:* say *maram*
- *Read it:* நதி

Before you move on

What does பாய் mean? ("a mat".) Say it once more.

54.2 கூடை (kūṭai) — a basket

Before the new one: what did *pāy* mean?

You'll want to know: கூடை

கூடை (*kūṭai*) — "a basket".

Woven, usually of palm leaf or split bamboo. Malayalam's basket is *koṭṭa* and Telugu's is *buṭṭa*; Tamil's is கூடை.

It is the word for the basket a vendor sets down in front of you on the pavement, and for the one that goes up onto a head to be carried home.

In the family, and next door

	word
Kannada	ಬುಟ್ಟಿ (*buṭṭi*)
Telugu	బుట్ట (*buṭṭa*)
Malayalam	കൊട്ട (*koṭṭa*)
Hindi (neighbour)	टोकरी (*ṭokrī*)
English	a basket

The word, taken apart — its roots and family

கூடை (*kūṭai*) is native Dravidian. DEDR 1884 lists Malayalam *kūṭa*, Kannada *gūḍe* and Telugu *gūḍa*.

What you've built

Two: something to sit on, and something to carry in.

Your turn

- *Say it: kūṭai*
- *Say it:* it once more, slowly
- *Say it: pāy*, then *kūṭai*, and let the long ஊ open the second
- *Read it:* கிளை
- *Recall:* say *malai*

Before you move on

What does கூடை mean? ("a basket".) Say it once more.

54.3 கத்தி (katti) — a knife

Before the new one: what did *kūṭai* mean?

You'll want to know: கத்தி

கத்தி (*katti*) — "a knife".

Three sisters and one word. Malayalam കത്തി, Telugu కత్తి, Tamil கத்தி. Not merely close — the same word three times, which happens with things every household has had for as long as there have been households.

The doubled த in the middle carries the whole difficulty. Hold it: *ka-t-ti*, with the tongue staying where it is between the two.

In the family, and next door

	word	same root
Kannada	ಚಾಕು (*cāku*)	
Telugu	కత్తి (*katti*)	yes
Malayalam	കത്തി (*katti*)	yes
Hindi (neighbour)	छुरी (*churī*)	
English	a knife	

The word, taken apart — its roots and family

கத்தி (*katti*) is native Dravidian. DEDR 1204 lists Malayalam *katti*, Kannada *katti* and Telugu *katti*.

What you've built

Three, and this one is shared right across the family.

Your turn

- *Say it: katti*
- *Say it:* it once more, slowly
- *Say it: kūṭai*, then *katti*, and hold the doubled த
- *Recall:* say *taḷir*
- *Read it:* வயல்

Before you move on

What does கத்தி mean? ("a knife".) Say it once more.

54.4 கிண்ணம் (kiṇṇam) — a bowl

Before the new one: what did *katti* mean?

You'll want to know: கிண்ணம்

கிண்ணம் (*kiṇṇam*) — "a bowl".

The small round one that holds a helping, rather than the pot the food was cooked in. Telugu's గిన్నె (*ginne*) is close enough to hear the same word underneath.

Malayalam reaches past both and takes the Sanskrit പാത്രം (*pātram*), a vessel of any sort. Tamil has that one as well and keeps it general; **கிண்ணம்** stays small.

The word, taken apart — its roots and family

கிண்ணம் (*kiṇṇam*) is native Dravidian. DEDR 1543 lists Malayalam *kiṇṇam* and Telugu *ginne*.

What you've built

Four: to sit on, to carry in, to cut with, and to eat from.

Your turn

- *Say it: kiṇṇam*
- *Say it:* it once more, slowly
- *Say it: katti*, then *kiṇṇam*, and let the ண double this time
- *Read it:* வேர்
- *Recall:* say *pātai*

Before you move on

What does **கிண்ணம்** mean? ("a bowl".) Say it once more.

54.5 பெட்டி (peṭṭi) — a box

Before the new one: what did *kiṇṇam* mean?

You'll want to know: பெட்டி

பெட்டி (*peṭṭi*) — "a box".

Malayalam പെട്ടി, Telugu పెట్టె, Tamil பெட்டி — the family agrees again, down to the doubled ட in the middle. Two words in one short run where all three sisters say the same thing is worth noticing.

A பெட்டி is a box of any size: the tin trunk clothes live in, a matchbox, and the carriage of a train, which Tamil calls a *rayil peṭṭi*.

In the family, and next door

	word	same root
Kannada	ಪೆಟ್ಟಿಗೆ (*peṭṭige*)	yes
Telugu	పెట్టె (*peṭṭe*)	yes
Malayalam	പെട്ടി (*peṭṭi*)	yes
Hindi (neighbour)	डिब्बा (*ḍibbā*)	
English	a box	

The word, taken apart — its roots and family

பெட்டி (*peṭṭi*) is native Dravidian. DEDR 4388 lists Malayalam *peṭṭi*, Kannada *peṭṭi* and Telugu *peṭṭe*. The entry compares Sanskrit *peṭaka*, "box" (CDIAL 8164).

What you've built

Five things a house sets out: something to sit on, to carry in, to cut with, to eat from, and to keep it all in.

Your turn

- *Say it:* *peṭṭi*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *pāy*, *kūṭai*, *katti*, *kiṇṇam*, *peṭṭi*
- *Recall:* say *vitai*
- *Read it:* கிராமம்

Before you move on

What does பெட்டி mean? ("a box".) Say it once more.

Chapter 55

The Rest of You

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name my neck, my back, a lip, a nail and a bone in Tamil.
>
> *Complete TA-C55-bone and say all five words in order.*

55.1 கழுத்து (kaḻuttu) — the neck

> Before the new run of words: what did *kiṇṇam* mean, and what did *peṭṭi* mean?

You'll want to know: கழுத்து

கழுத்து (*kaḻuttu*) — "the neck".

Malayalam **കഴുത്ത്** (*kaḻuttŭ*) is the same word, ഴ and all — that letter again, the one only these two sisters still write. Telugu went its own way here, to **మెడ** (*meḍa*).

It is the neck outside and the throat inside, both in one word. A garland goes round the **கழுத்து**, and so does the thread tied at a wedding.

In the family, and next door

	word	same root
Kannada	**ಕುತ್ತಿಗೆ** (*kuttige*)	
Telugu	**మెడ** (*meḍa*)	
Malayalam	**കഴുത്ത്** (*kaḻuttŭ*)	yes
Hindi (neighbour)	**गर्दन** (*gardan*)	
English	the neck	

The word, taken apart — its roots and family

கழுத்து (*kaḻuttu*) is native Dravidian. DEDR 1366 lists Malayalam *kaḻuttu* and Kannada *kattu*. The entry compares Sanskrit *kaṇṭha*, "neck" (CDIAL 2680).

What you've built

The first of five more pieces of you.

Your turn

- *Say it: kaḻuttu*
- *Say it:* it once more, slowly
- *Say it: peṭṭi*, then *kaḻuttu*, and hold the ழ in the middle
- *Recall:* say *nadi*
- *Read it:* பாய்

Before you move on

What does கழுத்து mean? ("the neck".) Say it once more.

55.2 முதுகு (mutuku) — the back

Before the new one: what did *kaḻuttu* mean?

You'll want to know: முதுகு

முதுகு (*mutuku*) — "the back".

Malayalam has മുതുക് (*mutukŭ*), letter for letter until the last one. Telugu takes వీపు (*vīpu*) and shares nothing with either.

To show somebody your முதுகு is to turn away from them, in Tamil much as in English — and the phrase is meant as unkindly in one language as in the other.

In the family, and next door

	word	same root
Kannada	ಬೆನ್ನು (*bennu*)	
Telugu	వీపు (*vīpu*)	
Malayalam	മുതുക് (*mutukŭ*)	yes
Hindi (neighbour)	पीठ (*pīṭh*)	
English	the back	

The word, taken apart — its roots and family

முதுகு (*mutuku*) is native Dravidian. DEDR 4955 lists Malayalam *mutuku*.

What you've built

Two: what a garland goes round, and what you turn on somebody.

Your turn

- *Say it: mutuku*
- *Say it:* it once more, slowly
- *Say it: kaluttu*, then *mutuku*, the top of you and the length below it
- *Read it:* மலை
- *Recall:* say *kūṭai*

Before you move on

What does முதுகு mean? ("the back".) Say it once more.

55.3 உதடு (utaṭu) — a lip

Before the new one: what did *mutuku* mean?

You'll want to know: உதடு

உதடு (*utaṭu*) — "a lip".

This is where the family stops agreeing. Malayalam says ചുണ്ട് (*cuṇṭŭ*), Telugu పెదవి (*pedavi*), Tamil உதடு — three words with nothing in common

but the thing they name. It happens: a part of the body every language has a name for is not therefore a part every language named at the same time.

The ட in the middle is the one made with the tongue curled back. Keep it curled and the word comes out right.

In the family, and next door

	word	same root
Kannada	ತುಟಿ (*tuṭi*)	yes
Telugu	పెదవి (*pedavi*)	
Malayalam	ചുണ്ട് (*cuṇṭŭ*)	
Hindi (neighbour)	होंठ (*hoṇṭh*)	
English	a lip	

The word, taken apart — its roots and family

உதடு (*utaṭu*) is native Dravidian. DEDR 606 lists Malayalam *utaṭu* and Kannada *odaḍu*.

What you've built

Three, and this one the three sisters worked out separately.

Your turn

- *Say it: utaṭu*
- *Say it:* it once more, slowly
- *Say it: mutuku*, then *utaṭu*, and curl the tongue back for the ட
- *Recall:* say *vayal*
- *Read it:* கத்தி

Before you move on

What does உதடு mean? ("a lip".) Say it once more.

55.4 நகம் (nakam) — a nail

Before the new one: what did *utaṭu* mean?

You'll want to know: நகம்

நகம் (*nakam*) — "a nail".

The nail on a finger and the claw on an animal, in one word. Malayalam writes നഖം (*nakham*), with a breathed letter in the middle that Tamil's own set does not carry, so Tamil prints it plain: நகம். The two words are heard as one and written as two.

Telugu holds on to something else entirely, గోరు (*gōru*).

In the family, and next door

	word	same root
Kannada	ಮೊಳೆ (*moḷe*)	
Telugu	మేకు (*mēku*)	
Malayalam	നഖം (*nakham*)	yes
Hindi (neighbour)	कील (*kīl*)	
English	a nail	

The word, taken apart — its roots and family

நகம் (*nakam*) is a loan from Sanskrit *nakha*, "nail, claw" (CDIAL 6914).

What you've built

Four: neck, back, lip, and the hard thing on the end of a finger.

Your turn

- *Say it: nakam*
- *Say it:* it once more, slowly
- *Say it: utaṭu*, then *nakam*, the softest part of you and the hardest
- *Read it:* பாதை
- *Recall:* say *kiṇṇam*

Before you move on

What does நகம் mean? ("a nail".) Say it once more.

55.5 எலும்பு (elumbu) — a bone

Before the new one: what did *nakam* mean?

You'll want to know: எலும்பு

எலும்பு (*elumbu*) — "a bone".

Malayalam എല്ല് (*ellŭ*) and Telugu ఎముక (*emuka*) sit either side of Tamil's எலும்பு: the same opening, and then three different amounts of word after it.

elumbum tōlum — "bone and skin" — is what Tamil says of somebody who has gone very thin. English says the same two things in the other order.

In the family, and next door

	word	same root
Kannada	ಮೂಳೆ (*mūḷe*)	
Telugu	ఎముక (*emuka*)	
Malayalam	എല്ല് (*ellŭ*)	yes
English	a bone	

The word, taken apart — its roots and family

எலும்பு (*elumbu*) is native Dravidian. DEDR 839 lists Malayalam *elumpu*, Kannada *elubu* and Telugu *emuka*. The entry compares Sanskrit *eḍūka*, "a monument holding bones".

What you've built

Five more of you: neck, back, lip, nail, and what holds the whole lot up.

Your turn

- *Say it:* *elumbu*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *kaḻuttu*, *mutuku*, *utaṭu*, *nakam*, *elumbu*
- *Recall:* say *kirāmam*
- *Read it:* பெட்டி

Before you move on

What does எலும்பு mean? (“a bone”.) Say it once more.

Chapter 56

How Much

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say how much I want in Tamil, from a little to a lot, and turn an offer down politely.
>
> *Complete TA-C56-let-it-be and say all five words in order.*

56.1 சிறிது (siṟitu) — a little

Before the new run of words: what did *nakam* mean, and what did *elumbu* mean?

You'll want to know: சிறிது

சிறிது (*siṟitu*) — "a little".

You already have *siṟiya*, "small". **சிறிது** is the same root turned into an amount: not a small thing but a small quantity of something. Held a dish and asked how much, you say *siṟitu* and you get a little.

Tamil has a *koñcam* as well, which is the one you will hear across a table, and which Telugu shares as *koñcem*. **சிறிது** is the more formal of the two, and the one you would write down.

In the family, and next door

	word
Kannada	**ಸ್ವಲ್ಪ** (*svalpa*)
Telugu	**కొంచెం** (*koñcem*)
Malayalam	**കുറച്ച്** (*kuṟaccŭ*)
English	a little

The word, taken apart — its roots and family

சிறிது (*si̱ritu*) is native Dravidian (DEDR 1594). It is the noun of *si̱riya*, "small": "that which is small".

What you've built

The first of five answers to "how much?".

Your turn

- *Say it: si̱ritu*
- *Say it:* it once more, slowly
- *Say it: elumbu*, then *si̱ritu*, and keep the second one short
- *Recall:* say *pāy*
- *Read it:* கழுத்து

Before you move on

What does சிறிது mean? ("a little".) Say it once more.

56.2 நிறைய (ni̱raiya) — a lot

Before the new one: what did *si̱ritu* mean?

You'll want to know: நிறைய

நிறைய (*ni̱raiya*) — "a lot".

The other end of the same question. நிறைய is built on *ni̱rai*, to fill, so a lot in Tamil is a fullness: as much as the thing will hold and no argument about it.

Telugu says ఎక్కువ (*ekkuva*) and builds it out of nothing to do with filling — a reminder that two languages can land on the same everyday answer by two quite different routes.

In the family, and next door

	word
Malayalam	ഒരുപാട് (*orupāṭŭ*)
Hindi (neighbour)	ज़्यादा (*zyādā*)
English	a lot

The word, taken apart — its roots and family

நிறைய (*niṟaiya*) is native Dravidian. DEDR 3682 lists Malayalam *niṟa*, "fullness" and Kannada *neṟe*, "to become full". It comes from *niṟai*, "to become full".

What you've built

Two, and they are opposite ends of one question.

Your turn

- *Say it: niṟaiya*
- *Say it:* it once more, slowly
- *Say it: siṟitu*, then *niṟaiya*, the little and the lot
- *Read it:* கூடை
- *Recall:* say *mutuku*

Before you move on

What does நிறைய mean? ("a lot".) Say it once more.

56.3 குறைவு (kuṟaivu) — a shortage, less than there should be

Before the new one: what did *niṟaiya* mean?

You'll want to know: குறைவு

குறைவு (*kuṟaivu*) — "a shortage, less than there should be".

kuṟai is to fall short, and குறைவு is the falling-short itself. That makes it a narrower word than the English "less": it does not merely compare two

amounts, it says one of them did not come up to the mark. There is a small complaint folded inside it.

Telugu's word for the same ground is తక్కువ (*takkuva*).

The word, taken apart — its roots and family

குறைவு (*kuṟaivu*) is native Dravidian. DEDR 1851 lists Malayalam *kuṟu*, "short, little" and Kannada *kuṟu*, "smallness".

What you've built

Three: a little, a lot, and not as much as there ought to be.

Your turn

- *Say it: kuṟaivu*
- *Say it:* it once more, slowly
- *Say it: niṟaiya*, then *kuṟaivu*, plenty and then not enough
- *Recall:* say *katti*
- *Read it:* உதடு

Before you move on

What does குறைவு mean? ("a shortage, less than there should be".) Say it once more.

56.4 தேவையில்லை (tēvaiyillai) — there is no need

Before the new one: what did *kuṟaivu* mean?

You'll want to know: தேவையில்லை

தேவையில்லை (*tēvaiyillai*) — "there is no need".

Two pieces, and the second one has been yours since the early writing lessons: *tēvai* is a need, *illai* is the no you learned to put on paper. Together they are how Tamil turns something down without turning the person down.

A flat *illai* refuses the thing. தேவையில்லை says there is no call for it, which leaves everybody their footing. Telugu does the same work in one shorter piece, వద్దు (*vaddu*).

The word, taken apart — its roots and family

தேவையில்லை (*tēvaiyillai*) is two native words: *tēvai*, "need" (DEDR 3469; Malayalam *tēva*), and *illai*, "there is not" (DEDR 2559).

What you've built

Four, and this one is the polite way out.

Your turn

- *Say it: tēvaiyillai*
- *Say it:* it once more, slowly
- *Say it: kuṟaivu*, then *tēvaiyillai*, and let the whole of the second run as one word
- *Read it:* கிண்ணம்
- *Recall:* say *nakam*

Before you move on

What does தேவையில்லை mean? ("there is no need".) Say it once more.

56.5 ஆகட்டும் (ākaṭṭum) — let it be so

Before the new one: what did *tēvaiyillai* mean?

You'll want to know: ஆகட்டும்

ஆகட்டும் (*ākaṭṭum*) — "let it be so".

āku is to become, to come about. ஆகட்டும் is "let it come about" — what you say when somebody proposes something and you are content to let it happen. It agrees without promising to do anything.

The *ām* you have been saying for yes is that same *āku* worn down by a great deal of use, which is why the two sit so alike in the mouth. Telugu's nearest of these is అలాగే (*alāgē*), "just so, alright then".

The word, taken apart — its roots and family

ஆகட்டும் (*ākaṭṭum*) is native Dravidian. DEDR 333 lists Malayalam *ākuka*. It is the native verb "to become" with the ending that says "let it".

What you've built

Five answers to an offer: a little, a lot, not enough, no need, and yes — let it happen.

Your turn

- *Say it:* *ākaṭṭum*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *si̱ritu*, *ni̱raiya*, *ku̱raivu*, *tēvaiyillai*, *ākaṭṭum*
- *Recall:* say *peṭṭi*
- *Read it:* எலும்பு

Before you move on

What does ஆகட்டும் mean? ("let it be so".) Say it once more.

Chapter 57

Wind and Fire

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the wind, sand, mud, smoke and an ember in Tamil.
>
> *Complete TA-C57-ember and say all five words in order.*

57.1 காற்று (kāṟṟu) — the wind

> Before the new run of words: what did *tēvaiyillai* mean, and what did *ākaṭṭum* mean?

You'll want to know: காற்று

காற்று (*kāṟṟu*) — "the wind".

Malayalam കാറ്റ് (*kāṟṟŭ*) is the same word with its ending worn shorter. Telugu takes గాలి (*gāli*), which covers air as much as wind.

Tamil's word covers both too: the breeze coming through a doorway and the air inside a tyre are one word. What English splits into wind and air, Tamil leaves whole and lets the sentence decide.

In the family, and next door

	word	same root
Kannada	ಗಾಳಿ (*gāḷi*)	
Telugu	గాలి (*gāli*)	
Malayalam	കാറ്റ് (*kāṟṟŭ*)	yes
Hindi (neighbour)	हवा (*havā*)	
English	the wind	

The word, taken apart — its roots and family

காற்று (*kāṟṟu*) is native Dravidian. DEDR 1481 lists Malayalam *kāṟṟu*.

What you've built

The first of five things you can point at outdoors.

Your turn

- *Say it:* *kāṟṟu*
- *Say it:* it once more, slowly
- *Say it:* *ākaṭṭum*, then *kāṟṟu*, and let the doubled ற hold
- *Recall:* say *kaluttu*
- *Read it:* சிறிது

Before you move on

What does காற்று mean? ("the wind".) Say it once more.

57.2 மணல் (maṇal) — sand

Before the new one: what did *kāṟṟu* mean?

You'll want to know: மணல்

மணல் (*maṇal*) — "sand".

Malayalam മണൽ (*maṇal*), letter for letter and sound for sound. Telugu goes somewhere else, to *isuka*.

The ண is the one made with the tongue curled back — the same letter you have just been doubling in *kiṇṇam*. Here there is only one of them, so touch it once and move on.

In the family, and next door

	word	same root
Kannada	ಮರಳು (*maraḷu*)	yes
Telugu	ఇసుక (*isuka*)	
Malayalam	മണൽ (*maṇal*)	yes
Hindi (neighbour)	रेत (*ret*)	
English	sand	

The word, taken apart — its roots and family

மணல் (*maṇal*) is native Dravidian. DEDR 4666 lists Malayalam *maṇal*. The entry sets it beside the native word for earth and soil.

What you've built

Two: what moves, and one of the things it moves.

Your turn

- *Say it: maṇal*
- *Say it:* it once more, slowly
- *Say it: kāṟṟu*, then *maṇal*, the wind and what it carries
- *Read it:* முதுகு
- *Recall:* say *niṟaiya*

Before you move on

What does மணல் mean? ("sand".) Say it once more.

57.3 சேறு (sēṟu) — mud

Before the new one: what did *maṇal* mean?

You'll want to know: சேறு

சேறு (*sēṟu*) — "mud".

Wet earth churned up: the mud of a paddy field after rain, not dust and not clay. Here the three sisters go three ways — Malayalam *ceḷi*, Telugu *burada*, Tamil சேறு.

Tamil keeps *cakati* as well, for the thicker and dirtier kind. சேறு is the working mud, the sort somebody walks into on purpose with a plough behind him.

In the family, and next door

	word	same root
Kannada	ಕೆಸರು (*kesaru*)	yes
Telugu	బురద (*burada*)	
Malayalam	ചെളി (*ceḷi*)	
English	mud	

The word, taken apart — its roots and family

சேறு (*sēṟu*) is native Dravidian. DEDR 2020 lists Malayalam *cēṟu* and Kannada *kesaṟ*. The entry compares Sanskrit *kedāra*, "a field under water" (CDIAL 3463).

What you've built

Three: air, dry ground, and wet ground.

Your turn

- *Say it: sēṟu*
- *Say it:* it once more, slowly
- *Say it: maṇal*, then *sēṟu*, dry ground and wet
- *Recall:* say *utaṭu*
- *Read it:* குறைவு

Before you move on

What does சேறு mean? ("mud".) Say it once more.

57.4 புகை (pukai) — smoke

Before the new one: what did *sēṟu* mean?

You'll want to know: புகை

புகை (*pukai*) — "smoke".

Malayalam പുക (*puka*) is the same word one step shorter. Tamil's ends in the *-ai* that so many of its everyday things end in: *kiḷai*, *kūṭai*, *vitai*, and now this one.

புகை is the smoke and also what somebody does over a cigarette. And when trains reached the Tamil country they were called *pukaivaṇṭi*, the smoke vehicle, which is still what a great many people call them.

In the family, and next door

	word	same root
Malayalam	പുക (*puka*)	yes
English	smoke	

The word, taken apart — its roots and family

புகை (*pukai*) is native Dravidian. DEDR 4240 lists Malayalam *puka*, Kannada *poge* and Telugu *poga*.

What you've built

Four, and this one you can only see because of what it comes off.

Your turn

- *Say it: pukai*
- *Say it:* it once more, slowly
- *Say it: sēṟu*, then *pukai*, and let the *-ai* open at the end
- *Read it:* நகம்
- *Recall:* say *tēvaiyillai*

Before you move on

What does புகை mean? ("smoke".) Say it once more.

57.5 கனல் (kaṉal) — an ember

Before the new one: what did *pukai* mean?

You'll want to know: கனல்

கனல் (*kaṉal*) — "an ember".

The live coal under the ash: fire with no flame on it. Malayalam has the word unchanged, **കനൽ** (*kanal*). Telugu's **నిప్పు** (*nippu*) covers this and open fire together.

It is the word Tamil reaches for when it means heat held rather than heat let go. A *kaṉal* in somebody's eye is anger they are keeping to themselves, and everyone in the room can tell.

In the family, and next door

	word	same root
Malayalam	**കനൽ** (*kanal*)	yes
English	an ember	

The word, taken apart — its roots and family

கனல் (*kaṉal*) is native Dravidian. DEDR 1406 lists Malayalam *kanal*, "live coals" and Kannada *kanal*, "to glow". The entry compares Sanskrit *kanala*, "shining".

What you've built

Wind, sand, mud, smoke, and the coal under the ash.

Your turn

- *Say it:* *kaṉal*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *kāṟṟu*, *maṇal*, *sēṟu*, *pukai*, *kaṉal*
- *Recall:* say *elumbu*
- *Read it:* **ஆகட்டும்**

Before you move on

What does **கனல்** mean? ("an ember".) Say it once more.

Chapter 58

Around the Yard

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a cow, a goat, a hen, a crow and a bird in Tamil.
>
> *Complete TA-C58-bird and say all five words in order.*

58.1 பசு (pasu) — a cow

> Before the new one: what did *pukai* mean, and what did *kaṉal* mean?

You'll want to know: பசு

பசு (*pasu*) — "a cow".

The animal a Tamil household is built around. Kannada says ಹಸು (*hasu*): the same word, with the *p*-for-*h* trade Kannada makes right through its old words — the one this book pointed out when the numbers were lined up side by side. Tamil keeps the *p*.

It belongs to a விவசாயி before it belongs to anybody, and in a கிராமம் it stands tied in the yard rather than shut in a shed, near enough to the வாசல் that you step around it going in.

In the family, and next door

	word	same root
Kannada	ಹಸು (*hasu*)	yes
Telugu	ఆవు (*āvu*)	
Malayalam	പശു (*paśu*)	yes
Hindi (neighbour)	गाय (*gāy*)	
English	a cow	

The word, taken apart — its roots and family

பசு (*pasu*) is a loan from Sanskrit *paśu*, "domestic animal" (CDIAL 7984). Tamil narrowed it to the cow.

What you've built

The first of five animals.

Your turn

- *Say it: pasu*
- *Say it:* it once more, slowly
- *Say it: pasu*, then *kirāmam*, and put the one inside the other
- *Recall:* say *si̱ritu*
- *Read it:* காற்று

Before you move on

What does பசு mean? ("a cow".) Say it once more.

58.2 ஆடு (āṭu) — a goat

Before the new one: what did *pasu* mean?

You'll want to know: ஆடு

ஆடு (*āṭu*) — "a goat".

Smaller, cheaper, and kept by houses with no land for a பசு. It eats what it finds and needs nobody to cut for it.

Start it long — ஆ, held — and put the ட of கூடை in the middle. That keeps it clear of அது, which starts short and is a different word entirely. Kannada parts company here and says ಮೇಕೆ (*mēke*).

In the family, and next door

	word	same root
Kannada	ಮೇಕೆ (*mēke*)	
Telugu	మేక (*mēka*)	
Malayalam	ആട് (*āṭŭ*)	yes
Hindi (neighbour)	बकरी (*bakrī*)	
English	a goat	

The word, taken apart — its roots and family

ஆடு (*āṭu*) is native Dravidian. DEDR 5152 lists Malayalam *āṭu* and Kannada *āḍu*. The entry compares Sanskrit *eḍa*, "a kind of sheep" (CDIAL 2512).

What you've built

Two.

Your turn

- *Say it: āṭu*
- *Say it:* it once more, slowly
- *Say it: pasu*, then *āṭu*, and say which one a house keeps when it has no land
- *Read it:* நிறைய
- *Recall:* say *maṇal*

Before you move on

What does ஆடு mean? ("a goat".) Say it once more.

58.3 கோழி (kō̲li) — a hen

Before the new one: what did *āṭu* mean?

You'll want to know: கோழி

கோழி (*kōḻi*) — "a hen".

Hen or cock alike; the word does not split them, and where the difference matters a second word goes in front. Kannada **ಕೋಳಿ** (*kōḷi*) and Telugu **కోడి** (*kōḍi*) are the same word three ways, and the middle letter is where they separate: Tamil's **ழ**, Kannada's **ಳ**, Telugu's **డ**.

It is the clock of a **கிராமம்**. A **கோழி** has a house awake well before anybody there needs to know the **மணி**.

In the family, and next door

	word	same root
Kannada	**ಕೋಳಿ** (*kōḷi*)	yes
Telugu	**కోడి** (*kōḍi*)	yes
Malayalam	**കോഴി** (*kōḻi*)	yes
Hindi (neighbour)	**मुर्गी** (*murgī*)	
English	a hen	

The word, taken apart — its roots and family

கோழி (*kōḻi*) is native Dravidian. DEDR 2248 lists Malayalam *kōḻi*, Kannada *kōḷi* and Telugu *kōḍi*.

What you've built

Three.

Your turn

- *Say it: kōḻi*
- *Say it:* it once more, slowly
- *Say it: kōḻi*, then *maṇi*, and say which one comes first in the morning
- *Recall:* say *kuṟaivu*
- *Read it:* **சேறு**

Before you move on

What does **கோழி** mean? ("a hen".) Say it once more.

58.4 காக்கை (kākkai) — a crow

Before the new one: what did *kōḻi* mean?

You'll want to know: காக்கை

காக்கை (*kākkai*) — "a crow".

Named off the noise it makes, and the sisters landed on the same trick from the same starting point: Kannada **ಕಾಗೆ** (*kāge*). Say it once and you have the etymology.

Of everything with wings around a Tamil house this is the one the house deals with daily. **சாதம்** set out on the **வாசல்** step is put there for the **காக்கை**, and it comes down within the minute.

In the family, and next door

	word	same root
Kannada	**ಕಾಗೆ** (*kāge*)	yes
Telugu	**కాకి** (*kāki*)	yes
Malayalam	**കാക്ക** (*kākka*)	yes
Hindi (neighbour)	**कौआ** (*kauā*)	
English	a crow	

The word, taken apart — its roots and family

காக்கை (*kākkai*) is native Dravidian. DEDR 1425 lists Malayalam *kākka*, Kannada *kāge* and Telugu *kāki*. The word imitates the bird's call, and the entry gives the cry too. It compares Sanskrit *kāka*, "crow", and notes that some forms may be borrowed back from Indo-Aryan.

What you've built

Four.

Your turn

- *Say it: kākkai*
- *Say it:* it once more, slowly
- *Say it: kākkai*, then *kōḻi*, and say which one is kept and which one turns up

- *Read it:* தேவையில்லை
- *Recall:* say *pukai*

Before you move on

What does காக்கை mean? ("a crow".) Say it once more.

58.5 பறவை (paṟavai) — a bird

Before the new one: what did *kākkai* mean?

You'll want to know: பறவை

பறவை (*paṟavai*) — "a bird".

The wide word. Whatever flies is a பறவை, the கோழி and the காக்கை taken in along with everything that was never given a name of its own.

Here the three go three ways: Kannada ಹಕ್ಕಿ (*hakki*), Telugu పక్షి (*pakṣi*) off the Sanskrit, and Tamil's own பறவை. The ற in the middle is the hard one, the same ற standing in ஆறு.

In the family, and next door

	word
Kannada	ಹಕ್ಕಿ (*hakki*)
Telugu	పక్షి (*pakṣi*)
Malayalam	പക്ഷി (*pakṣi*)
Hindi (neighbour)	चिड़िया (*chiṛiyā*)
English	a bird

The word, taken apart — its roots and family

பறவை (*paṟavai*) is native Dravidian. DEDR 4020 lists Malayalam *paṟava*. It comes from *paṟa*, "to fly": a bird is "the flyer".

What you've built

Five, and the run is closed: a cow, a goat, a hen, a crow, and the word for everything that flies.

Your turn

- *Say it:* *pa̲ravai*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *pasu*, *āṭu*, *kō̲li*, *kākkai*, *pa̲ravai*
- *Recall:* say *ākaṭṭum*
- *Read it:* கனல்

Before you move on

What does பறவை mean? (“a bird”.) Say it once more.

Chapter 59

In the Kitchen

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name curd, ghee, oil, jaggery and sugar in Tamil.
>
> *Complete TA-C59-sugar and say all five words in order.*

59.1 தயிர் (tayir) — curd

Before the new one: what did *kākkai* mean, and what did *paṟavai* mean?

You'll want to know: தயிர்

தயிர் (*tayir*) — "curd".

Set **பால்**, soured overnight in a covered pot. It is what a Tamil meal finishes on, turned through the last of the **சாதம்**, and it is the thing a hot afternoon is survived with.

The sisters do not agree here at all: Kannada **ಮೊಸರು** (*mosaru*), Telugu **పెరుగు** (*perugu*), Tamil **தயிர்**. Three households, three words, one pot.

In the family, and next door

	word	same root
Kannada	**ಮೊಸರು** (*mosaru*)	
Telugu	**పెరుగు** (*perugu*)	
Malayalam	**തൈര്** (*tairŭ*)	yes
English	curd	

The word, taken apart — its roots and family

தயிர் (*tayir*) is listed in DEDR 3088 with Malayalam *tayir*. The entry asks, with a question mark, whether it comes from Sanskrit *takra*, "buttermilk", so its origin is not settled.

What you've built

The first of five kitchen words.

Your turn

- *Say it: tayir*
- *Say it:* it once more, slowly
- *Say it: tayir*, then *sādam*, and say which one goes on top of the other
- *Recall:* say *kāṟṟu*
- *Read it:* பசு

Before you move on

What does தயிர் mean? ("curd".) Say it once more.

59.2 நெய் (ney) — ghee

Before the new one: what did *tayir* mean?

You'll want to know: நெய்

நெய் (*ney*) — "ghee".

Butter cooked down until the water has gone and only the fat and the smell are left. Short, old, and Tamil's own. Telugu keeps it as నెయ్యి (*neyyi*); Kannada walked off to ತುಪ್ಪ (*tuppa*).

A spoon of it goes over hot சாதம் at the start of a meal on a day that matters, which is most of what it does.

In the family, and next door

	word	same root
Kannada	ತುಪ್ಪ (*tuppa*)	
Telugu	నెయ్యి (*neyyi*)	yes
Hindi (neighbour)	घी (*ghī*)	
English	ghee	

The word, taken apart — its roots and family

நெய் (*ney*) is native Dravidian. DEDR 3746 lists Malayalam *ney*, Kannada *ney* and Telugu *neyyi*.

What you've built

Two.

Your turn

- *Say it: ney*
- *Say it:* it once more, slowly
- *Say it: tayir*, then *ney*, and say which one ends a meal and which one opens it
- *Read it:* மணல்
- *Recall:* say *āṭu*

Before you move on

What does நெய் mean? ("ghee".) Say it once more.

59.3 எண்ணெய் (eṇṇey) — oil

Before the new one: what did *ney* mean?

You'll want to know: எண்ணெய்

எண்ணெய் (*eṇṇey*) — "oil".

The end of it is நெய், standing there unchanged. The front piece is an old name for the sesame seed, so the whole thing began as sesame-fat — and then it widened until it covered every oil a kitchen has, sesame or not.

Kannada kept the same word as ಎಣ್ಣೆ (*eṇṇe*); Telugu went to నూనె (*nūne*). The doubled ண் in the middle is the one made with the tongue curled back, held twice as long.

In the family, and next door

	word	same root
Kannada	ಎಣ್ಣೆ (*eṇṇe*)	yes
Telugu	నూనె (*nūne*)	
Malayalam	എണ്ണ (*eṇṇa*)	yes
Hindi (neighbour)	तेल (*tel*)	
English	oil	

The word, taken apart — its roots and family

எண்ணெய் (*eṇṇey*) is native: *eḷ*, "sesame", and *ney*, "ghee, oil". DEDR 854 lists it as "gingelly oil", with Malayalam *eṇṇa* and Kannada *eṇṇe*, "oil". Oil was first sesame oil.

What you've built

Three, and the third is built out of the second.

Your turn

- *Say it: eṇṇey*
- *Say it:* it once more, slowly
- *Say it: ney*, then *eṇṇey*, and hear the first one still sitting inside the second
- *Recall:* say *sēṟu*
- *Read it:* கோழி

Before you move on

What does எண்ணெய் mean? ("oil".) Say it once more.

59.4 வெல்லம் (vellam) — jaggery

Before the new one: what did *eṇṇey* mean?

You'll want to know: வெல்லம்

வெல்லம் (*vellam*) — "jaggery".

Cane juice boiled down and left alone — no bleaching, no crystals — and sold as a dark heavy lump you break a piece off. Kannada has the same word as **ಬೆಲ್ಲ** (*bella*), with *v* softened to *b*.

In an older Tamil kitchen sweetness meant this before it meant anything white, and **வெல்லம்** still goes into the food that has to taste the way it used to.

In the family, and next door

	word	same root
Kannada	**ಬೆಲ್ಲ** (*bella*)	yes
Malayalam	**ശർക്കര** (*śarkkara*)	
English	jaggery	

The word, taken apart — its roots and family

வெல்லம் (*vellam*) is native Dravidian. DEDR 5494 lists Malayalam *vellam*, Kannada *bella* and Telugu *bellamu*.

What you've built

Four.

Your turn

- *Say it: vellam*
- *Say it:* it once more, slowly
- *Say it: vellam*, then *ney*, and say which of the two a sweet needs
- *Read it:* **புகை**
- *Recall:* say *kākkai*

Before you move on

What does **வெல்லம்** mean? ("jaggery".) Say it once more.

59.5 சர்க்கரை (sarkkarai) — sugar

Before the new one: what did *vellam* mean?

You'll want to know: சர்க்கரை

சர்க்கரை (*sarkkarai*) — "sugar".

The refined white kind, beside **வெல்லம்** rather than in place of it. Kannada **ಸಕ್ಕರೆ** (*sakkare*), Telugu **చక్కెర** (*cakkera*): one word, lightly redressed three times.

It has travelled further than any other word in this run. Sanskrit *śarkarā* went out through Arabic, Greek and Latin and came back into English as *sugar*, so **சர்க்கரை** and the English word are one word wearing different clothes.

In the family, and next door

	word	same root
Kannada	**ಸಕ್ಕರೆ** (*sakkare*)	yes
Telugu	**చక్కెర** (*cakkera*)	yes
Malayalam	**പഞ്ചസാര** (*pañcasāra*)	
Hindi (neighbour)	**चीनी** (*chīnī*)	
English	sugar	

What you've built

Five, and the run is closed: curd, ghee, oil, jaggery, and sugar.

Your turn

- *Say it: sarkkarai*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *tayir*, *ney*, *eṇṇey*, *vellam*, *sarkkarai*
- *Recall:* say *kaṉal*
- *Read it:* **பறவை**

Before you move on

What does **சர்க்கரை** mean? ("sugar".) Say it once more.

Chapter 60

Things People Make

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a needle, a rope, an umbrella, a broom and a comb in Tamil.
>
> *Complete TA-C60-comb and say all five words in order.*

60.1 ஊசி (ūsi) — a needle

> Before the new one: what did *vellam* mean, and what did *sarkkarai* mean?

You'll want to know: ஊசி

ஊசி (*ūsi*) — "a needle".

The sewing needle, and whatever else is that shape. It is the tool **துணி** is repaired with, which is most of what **துணி** asks for.

Kannada **ಸೂಜಿ** (*sūji*) and Telugu **సూది** (*sūdi*) hold on to a sound at the front that Tamil let go of, so Tamil's is the shortest of the three. Open it on a long **ஊ**.

In the family, and next door

	word	same root
Kannada	**ಸೂಜಿ** (*sūji*)	
Telugu	**సూది** (*sūdi*)	
Malayalam	**സൂചി** (*sūci*)	
Hindi (neighbour)	**सूई** (*sūī*)	yes
English	a needle	

The word, taken apart — its roots and family

ஊசி (*ūsi*) is a loan from Sanskrit *sūcī*, "needle" (CDIAL 13551). Tamil dropped the first *s-*.

What you've built

The first of five made things.

Your turn

- *Say it:* *ūsi*
- *Say it:* it once more, slowly
- *Say it:* *ūsi*, then *tuṇi*, and say which one repairs the other
- *Recall:* say *pasu*
- *Read it:* தயிர்

Before you move on

What does **ஊசி** mean? ("a needle".) Say it once more.

60.2 கயிறு (kayiṟu) — a rope

Before the new one: what did *ūsi* mean?

You'll want to know: கயிறு

கயிறு (*kayiṟu*) — "a rope".

Twisted up out of coconut fibre, which is what a coast with that many palms was going to make rope out of. Thin ones tie a bundle; thick ones draw water.

The ற at the end is the hard one — the same ற standing in **ஆறு** and in **பறவை**. A **பசு** in a yard is at the end of a **கயிறு**, which is the commonest place to meet the word.

In the family, and next door

	word	same root
Kannada	ಹಗ್ಗ (*hagga*)	
Telugu	తాడు (*tāḍu*)	
Malayalam	കയർ (*kayaṟ*)	yes
Hindi (neighbour)	रस्सी (*rassī*)	
English	a rope	

The word, taken apart — its roots and family

கயிறு (*kayiṟu*) is native Dravidian. DEDR 1254 lists Malayalam *kayaṟu* and Telugu *cēru*, "string".

What you've built

Two.

Your turn

- *Say it: kayiṟu*
- *Say it:* it once more, slowly
- *Say it: kayiṟu*, then *pasu*, and say which one holds the other
- *Read it:* ஆடு
- *Recall:* say *ney*

Before you move on

What does கயிறு mean? ("a rope".) Say it once more.

60.3 குடை (kuṭai) — an umbrella

Before the new one: what did *kayiṟu* mean?

You'll want to know: குடை

குடை (*kuṭai*) — "an umbrella".

Against மழை and against the சூரியன் equally, and in Tamil country the second job is the larger one. It is carried in a month with no rain in it without anybody thinking that odd.

Kannada ಕೊಡೆ (*koḍe*) is the same word. It ends on the ை you already put on கூடை and on விதை.

In the family, and next door

	word	same root
Kannada	ಕೊಡೆ (*koḍe*)	
Telugu	గొడుగు (*goḍugu*)	
Malayalam	കുട (*kuṭa*)	yes
Hindi (neighbour)	छाता (*chātā*)	
English	an umbrella	

The word, taken apart — its roots and family

குடை (*kuṭai*) is native Dravidian. DEDR 1663 lists Malayalam *kuṭa*, Kannada *koḍe* and Telugu *goḍugu*. The entry compares Sanskrit (lexicons) *utkūṭa*, "umbrella".

What you've built

Three.

Your turn

- *Say it: kuṭai*
- *Say it:* it once more, slowly
- *Say it: kuṭai*, then *maḻai*, and say which one you take out for the other
- *Recall:* say *kōḻi*
- *Read it:* எண்ணெய்

Before you move on

What does குடை mean? ("an umbrella".) Say it once more.

60.4 துடைப்பம் (tuṭaippam) — a broom

Before the new one: what did *kuṭai* mean?

You'll want to know: துடைப்பம்

துடைப்பம் (*tuṭaippam*) — "a broom".

Coconut ribs bound at one end, held short, swung low. It is the first thing that touches a **வாசல்** in the morning: the ground is swept, then wetted, and only then does the **கோலம்** go down on it.

Three houses, three words again — Kannada **ಪೊರಕೆ** (*porake*), Telugu **చీపురు** (*cīpuru*), Tamil **துடைப்பம்**. The doubled **ப்ப** in the middle is the one you have been holding since **பெட்டி** taught you to hold a letter twice.

In the family, and next door

	word
Kannada	**ಪೊರಕೆ** (*porake*)
Telugu	**చీపురు** (*cīpuru*)
Malayalam	**ചൂല്** (*cūlŭ*)
Hindi (neighbour)	**झाड़ू** (*jhāṛū*)
English	a broom

The word, taken apart — its roots and family

துடைப்பம் (*tuṭaippam*) is native Dravidian. DEDR 3301 lists Malayalam *tuṭeppam*. It comes from *tuṭai*, "to wipe, to sweep".

What you've built

Four.

Your turn

- *Say it: tuṭaippam*
- *Say it:* it once more, slowly
- *Say it: tuṭaippam*, then *kōlam*, and say which one comes first
- *Read it:* **காக்கை**
- *Recall:* say *vellam*

Before you move on

What does **துடைப்பம்** mean? ("a broom".) Say it once more.

60.5 சீப்பு (sīppu) — a comb

Before the new one: what did *tuṭaippam* mean?

You'll want to know: சீப்பு

சீப்பு (*sīppu*) — "a comb".

A comb, and nothing borrowed about it. The ீ at the front is held long, and then the doubled ப்ப comes again, so it lands in the same shape as துடைப்பம் and பெட்டி.

A சீப்பு and a மலர் are what go into hair on a morning that is being made something of, and the two turn up in the same sentence often enough to be worth learning together.

In the family, and next door

	word	same root
Kannada	ಬಾಚಣಿಗೆ (*bācaṇige*)	
Telugu	దువ్వెన (*duvvena*)	
Malayalam	ചീപ്പ് (*cīppŭ*)	yes
Hindi (neighbour)	कंघी (*kaṅghī*)	
English	a comb	

The word, taken apart — its roots and family

சீப்பு (*sīppu*) is native Dravidian. DEDR 1610 lists Malayalam *cīppi* and Telugu *cīpu*.

What you've built

Five, and the run is closed: a needle, a rope, an umbrella, a broom, and a comb.

Your turn

- *Say it:* *sīppu*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *ūsi*, *kayiṟu*, *kuṭai*, *tuṭaippam*, *sīppu*
- *Recall:* say *paṟavai*
- *Read it:* சர்க்கரை

Before you move on

What does சீப்பு mean? (“a comb”.) Say it once more.

Chapter 61

How the Body Feels

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say I am hungry, thirsty, sleepy, feverish or in pain in Tamil.
>
> *Complete TA-C61-pain and say all five words in order.*

61.1 ಬಸಿ (pasi) — hunger

> Before the new one: what did *tuṭaippam* mean, and what did *sīppu* mean?

You'll want to know: ಬಸಿ

ಬಸಿ (*pasi*) — "hunger".

Hunger as a thing that arrives, rather than something you are. Kannada makes it ಹಸಿವು (*hasivu*) — the *p* traded for *h* one more time, exactly as it was between ಬಸು and ಹಸು. Telugu went elsewhere, to ఆకలి (*ākali*).

Set ಬಸಿ beside ಬಸು and only the last mark separates them: one ends on the ಿ, the other on the ು. They are not related, and the difference is worth practising until it stops needing thought.

In the family, and next door

	word	same root
Kannada	ಹಸಿವು (*hasivu*)	yes
Telugu	ఆకలి (*ākali*)	
Malayalam	വിശപ്പ് (*viśappŭ*)	
Hindi (neighbour)	भूख (*bhūkh*)	
English	hunger	

The word, taken apart — its roots and family

பசி (*pasi*) is native Dravidian. DEDR 3825 lists Malayalam *pai* and Kannada *pasi*.

What you've built

The first of five feelings.

Your turn

- *Say it: pasi*
- *Say it:* it once more, slowly
- *Say it: pasu*, then *pasi*, and hold the two endings apart
- *Recall:* say *tayir*
- *Read it:* ஊசி

Before you move on

What does பசி mean? ("hunger".) Say it once more.

61.2 தாகம் (tākam) — thirst

Before the new one: what did *pasi* mean?

You'll want to know: தாகம்

தாகம் (*tākam*) — "thirst".

Thirst. Sanskrit-descended, unlike பசி beside it, and taken in whole with the *-am* Tamil hangs on such arrivals — the same *-am* already sitting on புத்தகம்.

It is answered with தண்ணீர் and with nothing else in particular, and a Tamil house offers the தண்ணீர் before it is asked for.

In the family, and next door

	word
Kannada	ಬಾಯಾರಿಕೆ (*bāyārike*)
Telugu	దాహం (*dāhaṁ*)
Malayalam	ദാഹം (*dāhaṁ*)
Hindi (neighbour)	प्यास (*pyās*)
English	thirst

The word, taken apart — its roots and family

தாகம் (*tākam*) is a loan from Sanskrit *dāha*, "burning, fever" (CDIAL 6321). The burning in the throat became Tamil's word for thirst.

What you've built

Two.

Your turn

- *Say it: tākam*
- *Say it:* it once more, slowly
- *Say it: pasi*, then *tākam*, and say what each of the two is answered with
- *Read it:* நெய்
- *Recall:* say *kayiṟu*

Before you move on

What does தாகம் mean? ("thirst".) Say it once more.

61.3 தூக்கம் (tūkkam) — sleep

Before the new one: what did *tākam* mean?

You'll want to know: தூக்கம்

தூக்கம் (*tūkkam*) — "sleep".

Sleep as a state — the sleep you get, lose, or need more of. Kannada ನಿದ್ದೆ (*nidde*) and Telugu నిద్ర (*nidra*) both took the Sanskrit word; Tamil kept its own and stayed out of it.

Open it on a long **ஊ**, the same long **ஊ** that opens **ஊசி**, and then hold the **க்க** twice.

In the family, and next door

	word
Kannada	ನಿದ್ದೆ (*nidde*)
Telugu	నిద్ర (*nidra*)
Hindi (neighbour)	नींद (*nīnd*)
English	sleep

The word, taken apart — its roots and family

தூக்கம் (*tūkkam*) is native Dravidian. DEDR 3376 lists Malayalam *tūṅṅuka*, "to hang, be drowsy". It comes from *tūṅku*, "to hang, to droop, to sleep": sleep is the head drooping.

What you've built

Three.

Your turn

- *Say it: tūkkam*
- *Say it:* it once more, slowly
- *Say it: tūkkam*, then *ūsi*, and hear the same long vowel open both
- *Recall:* say *eṇṇey*
- *Read it:* **குடை**

Before you move on

What does **தூக்கம்** mean? ("sleep".) Say it once more.

61.4 காய்ச்சல் (kāyccal) — a fever

Before the new one: what did *tūkkam* mean?

You'll want to know: காய்ச்சல்

காய்ச்சல் (*kāyccal*) — "a fever".

The body running hot. Tamil built the word on its own idea of heating rather than importing one, which is why it looks nothing like Kannada's **ಜ್ವರ** (*jvara*), taken straight from the Sanskrit.

It is the first thing anybody tells a **மருத்துவர்**, and it is said flatly, the way you would report weather.

In the family, and next door

	word
Kannada	**ಜ್ವರ** (*jvara*)
Telugu	**జ్వరం** (*jvaram*)
Malayalam	**പനി** (*pani*)
Hindi (neighbour)	**बुख़ार** (*bukhār*)
English	a fever

What you've built

Four.

Your turn

- *Say it: kāyccal*
- *Say it:* it once more, slowly
- *Say it: kāyccal*, then *maruttuvar*, and say which one you take to the other
- *Read it:* **வெல்லம்**
- *Recall:* say *tuṭaippam*

Before you move on

What does **காய்ச்சல்** mean? ("a fever".) Say it once more.

61.5 வலி (vali) — pain

Before the new one: what did *kāyccal* mean?

You'll want to know: வலி

வலி (*vali*) — "pain".

Pain, plainly: the ache itself, wherever it sits. Kannada says **ನೋವು** (*nōvu*). Put it with what you already have for the body and it does its work at once — a **வலி** in the **முதுகு**, a **வலி** in the **பல்**.

Keep it away from *va̲li*, the way or the route, which came up beside **பாதை**. **வலி** takes the plain **ல**; *va̲li* takes the **ழ** you learned to curl the tongue back for. Two letters English would spell alike, and Tamil holds them apart.

In the family, and next door

	word
Kannada	**ನೋವು** (*nōvu*)
Telugu	**నొప్పి** (*noppi*)
Malayalam	**വേദന** (*vēdana*)
Hindi (neighbour)	**दर्द** (*dard*)
English	pain

The word, taken apart — its roots and family

வலி (*vali*) is native Dravidian. DEDR 5281 lists Malayalam *valayuka*, "to be distressed".

What you've built

Five, and the run is closed: hunger, thirst, sleep, a fever, and pain.

Your turn

- *Say it: vali*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *pasi*, *tākam*, *tūkkam*, *kāyccal*, *vali*
- *Recall:* say *sarkkarai*
- *Read it:* **சீப்பு**

Before you move on

What does **வலி** mean? ("pain".) Say it once more.

Chapter 62

Only and Still

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say only, still, soon, at once and first of all in Tamil.
>
> *Complete TA-C62-first-of-all and say all five words in order.*

62.1 மட்டும் (maṭṭum) — only

Before the new one: what did *kāyccal* mean, and what did *vali* mean?

You'll want to know: மட்டும்

மட்டும் (*maṭṭum*) — "only".

This and nothing beside it. Where English puts *only* in front of the thing it limits, Tamil hangs மட்டும் on the end of it: தண்ணீர் மட்டும் — water, and nothing else.

Telugu does the same job with మాత్రమే (*mātramē*). The doubled ట్ట in the middle is the one held twice, as in ஆகட்டும்.

In the family, and next door

	word
Telugu	మాత్రమే (*mātramē*)
Malayalam	മാത്രം (*mātraṁ*)
English	only

The word, taken apart — its roots and family

மட்டும் (*maṭṭum*) is native, from the family of *maṭṭam*, "measure, limit, extent" (DEDR 4660): "only" is "up to the limit". DEDR does not list *maṭṭum* itself, so the link is the usual reading rather than a recorded one.

What you've built

The first of five.

Your turn

- *Say it: maṭṭum*
- *Say it:* it once more, slowly
- *Say it: maṭṭum*, then *taṉṉīr*, and put them in the Tamil order
- *Recall:* say *ūsi*
- *Read it:* பசி

Before you move on

What does மட்டும் mean? ("only".) Say it once more.

62.2 இன்னும் (in̲n̲um) — still, yet

Before the new one: what did *maṭṭum* mean?

You'll want to know: இன்னும்

இன்னும் (*in̲n̲um*) — "still, yet".

For something that has not finished, and for a bit more of it: இன்னும் சிறிது, a little more still. Kannada ಇನ್ನೂ (*innū*) is the same word; Telugu says ఇంకా (*iṅkā*).

The ன் doubled in the middle is the soft one — the alveolar ன, not the curled ண you have in கிண்ணம். Tamil keeps three of these apart and this word wants the middle one twice.

In the family, and next door

	word	same root
Kannada	ಇನ್ನೂ (*innū*)	yes
Telugu	ఇంకా (*iṅkā*)	yes
English	still, yet	

The word, taken apart — its roots and family

இன்னும் (*iṉṉum*) is native Dravidian (DEDR 410). The entry lists *iṉṉum*, "still, yet, more", among the words built on the near base *i-*.

What you've built

Two.

Your turn

- *Say it: iṉṉum*
- *Say it:* it once more, slowly
- *Say it: iṉṉum*, then *siṟitu*, and say the two together
- *Read it:* கயிறு
- *Recall:* say *tākam*

Before you move on

What does இன்னும் mean? ("still, yet".) Say it once more.

62.3 சீக்கிரம் (sīkkiram) — soon

Before the new one: what did *iṉṉum* mean?

You'll want to know: சீக்கிரம்

சீக்கிரம் (*sīkkiram*) — "soon".

Soon, and quickly — Tamil lets one word carry nearness in நேரம் and speed of doing together, and which one is meant comes out of the sentence around it.

Set it against பிறகு and the pair covers the whole span: சீக்கிரம் is the near end, பிறகு the loose one that promises nothing. Kannada says ಬೇಗ (*bēga*).

In the family, and next door

	word
Kannada	ಬೇಗ (*bēga*)
Malayalam	ഉടനെ (*uṭane*)
English	soon

The word, taken apart — its roots and family

சீக்கிரம் (*sīkkiram*) is a loan from Sanskrit *śīghra*, "quick" (CDIAL 12484).

What you've built

Three.

Your turn

- *Say it: sīkkiram*
- *Say it:* it once more, slowly
- *Say it: sīkkiram*, then *piṟaku*, and say which of the two commits you
- *Recall:* say *kuṭai*
- *Read it:* தூக்கம்

Before you move on

What does சீக்கிரம் mean? ("soon".) Say it once more.

62.4 உடனே (uṭaṉē) — at once

Before the new one: what did *sīkkiram* mean?

You'll want to know: உடனே

உடனே (*uṭaṉē*) — "at once".

Tighter than **சீக்கிரம்**: not soon but now, with nothing allowed in between. It is the word that answers an instruction you intend to obey.

Say it ending long, on the **ே**. That final length is doing the work — it is what makes the word press rather than merely inform.

The word, taken apart — its roots and family

உடனே (*uṭaṉē*) is native Dravidian. DEDR 945 lists Malayalam *uṭan*, "at once". The entry glosses *uṭaṉ* "together with, immediately after, at once", and *-ē* stresses it.

What you've built

Four, and the fourth pushes harder than the third.

Your turn

- *Say it:* *uṭaṉē*
- *Say it:* it once more, slowly
- *Say it:* *sīkkiram*, then *uṭaṉē*, and say which one leaves you no room
- *Read it:* **துடைப்பம்**
- *Recall:* say *kāyccal*

Before you move on

What does **உடனே** mean? ("at once".) Say it once more.

62.5 முதலில் (mutalil) — first of all

Before the new one: what did *uṭaṉē* mean?

You'll want to know: முதலில்

முதலில் (*mutalil*) — "first of all".

Before anything else. It puts an order on things that had none: **முதலில் தண்ணீர்**, **பிறகு சாதம்** — water to begin with, and the rice after.

With this one you can lay out a sequence end to end: முதலில், then உடனே or சீக்கிரம் for what follows fast, then பிறகு for what can wait.

The word, taken apart — its roots and family

முதலில் (*mutalil*) is native: *mutal*, "beginning, first" (DEDR 4950), with the locative *-il*, "in": "in the first place".

What you've built

Five, and the run is closed: only, still, soon, at once, and first of all.

Your turn

- *Say it: mutalil*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *maṭṭum*, *iṉṉum*, *sīkkiram*, *uṭaṉē*, *mutalil*
- *Recall:* say *sīppu*
- *Read it:* வலி

Before you move on

What does முதலில் mean? ("first of all".) Say it once more.

Chapter 63

Asking Well

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a request, permission, hesitancy, trust and humility in Tamil.
>
> *Complete TA-C63-humility and say all five words in order.*

63.1 வேண்டுகோள் (vēṇḍukōḷ) — a request

> Before the new one: what did *uṭaṉē* mean, and what did *mutalil* mean?

You'll want to know: வேண்டுகோள்

வேண்டுகோள் (*vēṇḍukōḷ*) — "a request".

A request as a thing you make and hand over, rather than the asking itself. It stands beside **வேண்டும்**, which you already have, and you can hear that word at the front of it.

Kannada **ವಿನಂತಿ** (*vinanti*) and Telugu **మనవి** (*manavi*) both went their own way. A **வேண்டுகோள்** is what **தயவுசெய்து** is put in front of when the asking has to be formal.

In the family, and next door

English	a request

The word, taken apart — its roots and family

வேண்டுகோள் (*vēṇḍukōḷ*) is native: *vēṇṭu*, "to want, to ask for" (DEDR 5528), and *kōḷ*, a noun from *koḷ*, "to take, to hold" (DEDR 2151). A request is "a wanting put forward".

What you've built

The first of five.

Your turn

- *Say it: vēṇḍukōḷ*
- *Say it:* it once more, slowly
- *Say it: vēṇḍukōḷ*, then *tayavu seytu*, and say which one dresses the other
- *Recall:* say *pasi*
- *Read it:* மட்டும்

Before you move on

What does வேண்டுகோள் mean? ("a request".) Say it once more.

63.2 அனுமதி (aṉumati) — permission

Before the new one: what did *vēṇḍukōḷ* mean?

You'll want to know: அனுமதி

அனுமதி (*aṉumati*) — "permission".

Permission to do a thing — asked for, given, refused. Here all three sisters took the same Sanskrit word and did not even change its shape: Kannada ಅನುಮತಿ (*anumati*), Telugu అనుమతి (*anumati*), Tamil அனுமதி.

Hold it apart from விடை, which you already have. விடை is permission to go, taken formally at a door. அனுமதி is the wider one and covers everything else you might be allowed.

In the family, and next door

	word	same root
Kannada	ಅನುಮತಿ (*anumati*)	yes
Telugu	అనుమతి (*anumati*)	yes
Malayalam	അനുവാദം (*anuvādam*)	
Hindi (neighbour)	अनुमति (*anumati*)	yes
English	permission	

The word, taken apart — its roots and family

அனுமதி (*a̲numati*) is a well-established loan from Sanskrit *anumati*, "assent, permission".

What you've built

Two.

Your turn

- *Say it: a̲numati*
- *Say it:* it once more, slowly
- *Say it: a̲numati*, then *viḍai*, and say which of the two is only about leaving
- *Read it:* தாகம்
- *Recall:* say *i̲n̲num*

Before you move on

What does அனுமதி mean? ("permission".) Say it once more.

63.3 தயக்கம் (tayakkam) — hesitancy

Before the new one: what did *a̲numati* mean?

You'll want to know: தயக்கம்

தயக்கம் (*tayakkam*) — "hesitancy".

The holding back before you ask: the half-step not taken, the sentence begun and dropped. Kannada carries the same idea in **ಸಂಕೋಚ** (*saṅkōca*).

The **தயவு** inside **தயவுசெய்து** opens the same way and is a different word — that one is kindness given, this one is a foot kept back. Tamil puts them next to each other and expects you to hear the difference.

In the family, and next door

	word
Kannada	**ಸಂಕೋಚ** (*saṅkōca*)
English	hesitancy

The word, taken apart — its roots and family

தயக்கம் (*tayakkam*) is the noun of *tayaṅku*, "to hesitate". It looks native, but DEDR has no entry for it, so its origin is uncertain. DEDR 3454 has a near neighbour, *tiyaṅku*, "to be confused", without linking the two.

What you've built

Three.

Your turn

- *Say it: tayakkam*
- *Say it:* it once more, slowly
- *Say it: tayakkam*, then *tayavu seytu*, and say which one is a giving
- *Recall:* say *tūkkam*
- *Read it:* **சீக்கிரம்**

Before you move on

What does **தயக்கம்** mean? ("hesitancy".) Say it once more.

63.4 நம்பிக்கை (nambikkai) — trust

Before the new one: what did *tayakkam* mean?

You'll want to know: நம்பிக்கை

நம்பிக்கை (*nambikkai*) — "trust".

Trust, and the confidence that comes with it. All three are off the same old stem: Kannada **ನಂಬಿಕೆ** (*nambike*), Telugu **నమ్మకం** (*nammakaṁ*), Tamil **நம்பிக்கை**.

A **விருந்தாளி** is given this before anything else is given, which is the whole of what a Tamil house means by hospitality.

In the family, and next door

	word	same root
Kannada	**ನಂಬಿಕೆ** (*nambike*)	yes
Telugu	**నమ్మకం** (*nammakaṁ*)	yes
Malayalam	**വിശ്വാസം** (*viśvāsaṁ*)	
Hindi (neighbour)	**भरोसा** (*bharosā*)	
English	trust	

The word, taken apart — its roots and family

நம்பிக்கை (*nambikkai*) is native Dravidian. DEDR 3600 lists Malayalam *nampuka*, Kannada *nambu* and Telugu *nammu*. It is the noun of *nampu*, "to trust".

What you've built

Four.

Your turn

- *Say it: nambikkai*
- *Say it:* it once more, slowly
- *Say it: nambikkai*, then *viruntāḷi*, and say who is given which
- *Read it:* **காய்ச்சல்**
- *Recall:* say *uṭaṉē*

Before you move on

What does **நம்பிக்கை** mean? ("trust".) Say it once more.

63.5 பணிவு (paṇivu) — humility

Before the new one: what did *nambikkai* mean?

You'll want to know: பணிவு

பணிவு (*paṇivu*) — "humility".

The bending: humility, deference, a manner rather than an act. Set it against மரியாதை, which you already have — மரியாதை is respect paid outward to somebody, பணிவு is the carriage you keep in yourself.

Telugu's మర్యాద (*maryāda*) is the same word as your மரியாதை, which makes the pair easy to keep straight across the two.

The word, taken apart — its roots and family

பணிவு (*paṇivu*) is native Dravidian. DEDR 3888 lists Malayalam *paṇiyuka*, "to bow, salute". It is the noun of *paṇi*, "to be low, to bow".

What you've built

Five, and the run is closed: a request, permission, hesitancy, trust, and humility.

Your turn

- *Say it:* *paṇivu*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *vēṇḍukōḷ*, *aṉumati*, *tayakkam*, *nambikkai*, *paṇivu*
- *Recall:* say *vali*
- *Read it:* முதலில்

Before you move on

What does பணிவு mean? ("humility".) Say it once more.

Chapter 64

The Harvest

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name paddy, grass, a standing crop, a threshing floor and the harvest in Tamil.
>
> *Complete TA-C64-harvest and say all five words in order.*

64.1 நெல் (nel) — paddy

> Before the new one: what did *nambikkai* mean, and what did *paṇivu* mean?

You'll want to know: நெல்

நெல் (*nel*) — "paddy".

Rice still in its husk — standing in the வயல், cut, carried, stored, but not yet அரிசி. The two words do not trade places: நெல் goes into the field and அரிசி comes out of the kitchen, and the husking is the border between them.

Kannada ಭತ್ತ (*bhatta*) and Telugu వరి (*vari*) each have their own word for it, so this is one the three do not share.

In the family, and next door

	word
Kannada	ಭತ್ತ (*bhatta*)
Telugu	వరి (*vari*)
English	paddy

The word, taken apart — its roots and family

நெல் (*nel*) is native Dravidian. DEDR 3753 lists Malayalam *nel* and Kannada *nel*.

What you've built

The first of five field words.

Your turn

- *Say it: nel*
- *Say it:* it once more, slowly
- *Say it: nel*, then *arisi*, and say which one the husk is still on
- *Recall:* say *maṭṭum*
- *Read it:* வேண்டுகோள்

Before you move on

What does நெல் mean? ("paddy".) Say it once more.

64.2 புல் (pul) — grass

Before the new one: what did *nel* mean?

You'll want to know: புல்

புல் (*pul*) — "grass".

Grass, of the kind cut and carried home. Kannada makes it ಹುಲ್ಲು (*hullu*) — the *p*-for-*h* trade a third time, and by now you can guess a Kannada word before you meet it. Telugu went elsewhere, to గడ్డి (*gaḍḍi*).

புல் and பல் sit one mark apart, and the mark is the whole difference: keep the உ round and low and the word stays grass. A பசு and an ஆடு are put out for புல்.

In the family, and next door

	word	same root
Kannada	ಹುಲ್ಲು (*hullu*)	yes
Telugu	గడ్డి (*gaḍḍi*)	
Malayalam	പുല്ല് (*pullŭ*)	yes
Hindi (neighbour)	घास (*ghās*)	
English	grass	

The word, taken apart — its roots and family

புல் (*pul*) is native Dravidian. DEDR 4300 lists Malayalam *pul*, Kannada *pul* and Telugu *pullu*.

What you've built

Two.

Your turn

- *Say it: pul*
- *Say it:* it once more, slowly
- *Say it: pul*, then *pal*, and hold the two vowels apart
- *Read it:* இன்னும்
- *Recall:* say *a̲numati*

Before you move on

What does புல் mean? ("grass".) Say it once more.

64.3 பயிர் (payir) — a standing crop

Before the new one: what did *pul* mean?

You'll want to know: பயிர்

பயிர் (*payir*) — "a standing crop".

What is growing in the வயல் at this moment, green and still rooted. It is not the வயல், which stays there when nothing is on it, and it is not the நெல் in the sack, which has stopped growing.

So the run has three separate things now where English leans on one word: the ground, the standing green, and the grain. Kannada calls the standing green ಬೆಳೆ (*beḷe*).

In the family, and next door

	word
Kannada	ಬೆಳೆ (*beḷe*)
Hindi (neighbour)	फ़सल (*fasal*)
English	a standing crop

The word, taken apart — its roots and family

பயிர் (*payir*) is native Dravidian. DEDR 3821 lists Malayalam *payir*, "green corn". The entry gathers words for green and fresh: a crop is what grows green.

What you've built

Three, and the three are carefully apart.

Your turn

- *Say it: payir*
- *Say it:* it once more, slowly
- *Say it: vayal*, then *payir*, then *nel*, in that order
- *Recall:* say *sīkkiram*
- *Read it:* தயக்கம்

Before you move on

What does பயிர் mean? ("a standing crop".) Say it once more.

64.4 களம் (kaḷam) — a threshing floor

Before the new one: what did *payir* mean?

You'll want to know: களம்

களம் (*kaḷam*) — "a threshing floor".

The beaten flat ground at the edge of a village where cut **நெல்** is spread, trodden and winnowed. Telugu has the same word as **కళ్లం** (*kallaṁ*), which makes it old.

It is not **காலம்**, the season word you already have. This one is short at the front and takes the **ள**; **காலம்** opens long and takes the **ல**. One mark and one letter, and they are unrelated.

In the family, and next door

	word	same root
Telugu	**కళ్లం** (*kallaṁ*)	yes
English	a threshing floor	

The word, taken apart — its roots and family

களம் (*kaḷam*) is native Dravidian. DEDR 1376 lists Malayalam *kaḷam* and Kannada *kaḷa*. The entry compares Sanskrit *khala*, "threshing floor" (CDIAL 3834).

What you've built

Four.

Your turn

- *Say it: kaḷam*
- *Say it:* it once more, slowly
- *Say it: kaḷam*, then *nel*, and say what is brought to which
- *Read it:* **உடனே**
- *Recall:* say *nambikkai*

Before you move on

What does **களம்** mean? ("a threshing floor".) Say it once more.

64.5 அறுவடை (aṟuvaṭai) — the harvest

Before the new one: what did *kaḷam* mean?

You'll want to know: அறுவடை

அறுவடை (*aṟuvaṭai*) — "the harvest".

The cutting and the gathering together, and the stretch of the year named after them. Kannada ಸುಗ್ಗಿ (*suggi*) and Telugu పంట (*paṇṭa*) each named the same weeks their own way.

The front of it is the reaping, not the ஆறு you counted with: this one opens short on அ and takes the hard ற straight away, where six opens long on ஆ. Close together on the page, far apart in the mouth.

In the family, and next door

	word
Kannada	ಸುಗ್ಗಿ (*suggi*)
Telugu	పంట (*paṇṭa*)
Malayalam	കൊയ്ത്ത് (*koyttŭ*)
English	the harvest

The word, taken apart — its roots and family

அறுவடை (*aṟuvaṭai*) is native Dravidian. DEDR 315 lists Malayalam *aṟukka*, "to cut". The entry lists *aṟuvaṭai* under *aṟu*, "to cut": the harvest is the cutting.

What you've built

Five, and the run is closed: paddy, grass, a standing crop, a threshing floor, and the harvest.

Your turn

- *Say it:* *aṟuvaṭai*
- *Say it:* it once more, slowly
- *Say it:* all five in order — *nel*, *pul*, *payir*, *kaḷam*, *aṟuvaṭai*
- *Recall:* say *mutalil*
- *Read it:* பணிவு

Before you move on

What does அறுவடை mean? (“the harvest”.) Say it once more.

Chapter 65

Doing, and Undoing

Modes: **voice** (6) **pen** (1) **Hands-free start:** the first 2 of 7 lessons.

> ***By the end of this chapter:*** I can say drink, walk, stop, open and close in Tamil, and name the action that undoes each one.
>
> *Complete TA-C65-doing-recall and produce each of the five doings from the act that undoes it, out of order.*

65.1 குடி (kuḍi) — drink

Before the new one: what did *aṟuvaḍai* mean?

You'll want to know: குடி

குடி (*kuḍi*) — "drink".

You already have சாப்பிடு (*sāppiḍu*) for what you chew. குடி is what you do to a liquid, and Tamil keeps the two apart the way English does: rice is சாப்பிடு, தண்ணீர் is குடி.

Say what is being drunk, and say it in front of the verb: தண்ணீர் குடி (*taṇṇīr kuḍi*), தேநீர் குடி (*tēnīr kuḍi*), பால் குடி (*pāl kuḍi*). Naming the liquid is not decoration. On its own, without anything in front of it, குடி is also the everyday noun for the drinking *habit* — a man described as being given to குடி is being described as a drinker. So a speaker who wants the plain, ordinary sense puts the drink in the sentence, and there is nothing left to misread.

Across the family: Kannada uses ಕುಡಿ (*kuḍi*) and Malayalam കുടിക്കുക (*kuṭikkuka*) — the same word, worn a little differently. Telugu reached for something else entirely and drinks with త్రాగు (*trāgu*).

In the family, and next door

	word	same root
Kannada	ಕುಡಿ (*kuḍi*)	yes
English	drink	

The word, taken apart — its roots and family

குடி (*kuḍi*) is native Dravidian. DEDR 1654 lists Malayalam *kuṭi* and Kannada *kuḍi*, and compares Sanskrit *kuṭī*, "liquor".

What you've built

The first of five everyday doings, and the one that completes the pair you had half of.

Your turn

- *Say it: kuḍi*
- *Say it: taṇṇīr kuḍi* — "drink water"
- *Say it: tēnīr kuḍi*, then *pāl kuḍi*
- *Say it:* which of *sāppiḍu* and *kuḍi* takes *sādam*, and which takes *taṇṇīr*
- *Recall:* say *vēṇḍukōḷ*
- *Read it:* நெல்

Before you move on

What does குடி mean? ("drink".) And what does a speaker put in front of it, every time? (The drink itself.)

65.2 நட (naḍa) — walk

What did *kuḍi* mean, and what does a speaker name in front of it?

You'll want to know: நட

நட (*naḍa*) — "walk".

You have போ (*pō*) for going. போ says nothing about how — by bus, by train, on foot. நட names the feet. Where போ leaves the manner open, நட fills it in, so the two sit side by side rather than competing: *pō* to leave, *naḍa* to leave on foot.

One neighbour worth hearing apart. You have met நடு (*naṭu*, "middle"), inside the words for midday and midnight. நட and நடு differ by the little ு hook at the end and by nothing else, and they are two separate words: one is an action, one is a position.

Across the family: this one all four sisters kept. Kannada ನಡೆ (*naḍe*), Telugu నడుచు (*naḍucu*), Malayalam നടക്കുക (*naṭakkuka*) — and Tamil நட. Where the drinking word split Telugu off, the walking word holds the family together.

The word, taken apart — its roots and family

நட (*naḍa*) is native Dravidian. DEDR 3582 lists Malayalam *naṭakka*, Kannada *naḍe* and Telugu *naḍa*.

What you've built

Two doings. One of them fills in what the other leaves open.

Your turn

- *Say it: naḍa*
- *Say it: pō*, then *naḍa*, and say which one names the feet
- *Say it: naḍa*, then *naṭu*, and hear the hook arrive
- *Say it: kuḍi*, then *naḍa*
- *Read it:* அனுமதி
- *Recall:* say *pul*

Before you move on

What does நட mean? ("walk".) Which of போ and நட tells you the feet were doing it? (நட.)

65.3 குடி — a word with nothing new in it

> Two lessons ago you learned to say *kuḍi*, and a walking word came between. Now look at it on the page.

Script you'll notice: nothing new

Every lesson in this strand so far has arrived carrying a letter you had not met. This one arrives carrying none. All four pieces of குடி are already yours, and the work is putting them together.

piece		
கு	*ku* — க with the ு sign	க from the very first writing lesson; the ு hook from *uṇavu*
டி	*ḍi* — ட with the ி sign	ட from *eppaḍi*; the ி sign from *naṉṟi*

கு · டி → குடி

Two letters, two signs riding them, and a word you have been saying since the drinking lesson. Nothing here is a new shape; the only new thing is that these four now sit together.

Script you'll notice: the letter you can hear moving

ட is the letter this book writes as *ḍ* here and as *ṭ* elsewhere, because Tamil does not mark the difference on the page — the position in the word decides it. Inside எப்படி you say *eppaḍi*, and inside குடி you say *kuḍi*: in both, ட sits between vowels and softens. The same shape, read by where it stands.

Your turn

- *Read it:* கு — then டி — then குடி
- *Contrast:* குடி and எப்படி — find the ட in each
- *Say it: kuḍi*, and name the drink you would put in front of it

Before you move on

Read குடி. How many letters carry a vowel sign in it? (Both of them.) What decides whether ட comes out *ṭ* or *ḍ*? (Where it stands in the word.)

65.4 நிறுத்து (niṟuttu) — stop

Read it: குடி off the page once

Then: what did *naḍa* mean?

You'll want to know: நிறுத்து

நிறுத்து (*niṟuttu*) — "stop".

This is what undoes நட. Feet moving is *naḍa*; நிறுத்து**!** called across a street brings them to a halt, and it is the word for stopping a bus, a song, a clock or an argument as readily as a person.

It is a long word for a short act, and it comes apart. Inside it is the standing-family that gave you நிலை (*nilai*, "a state, a standing") — the piece you already met welded into வானிலை (*vāṉilai*, "weather"), the sky's *standing*. Where நிலை names the state, நிறுத்து is the making of it: bring the thing to a stand. The weather word and the stopping word are cousins, and knowing that is why *niṟuttu* has somewhere to sit in your memory rather than four syllables to survive on.

Across the family: Kannada ನಿಲ್ಲಿಸು (*nillisu*) and Malayalam നിർത്തുക (*nirttuka*) are built the same way, from the same standing-verb.

The word, taken apart — its roots and family

நிறுத்து (*niṟuttu*) is native Dravidian. DEDR 3675 lists Malayalam *niṟuttuka*, "to make to stand". It is the causative of *nil*, "to stand": to stop something is "to make it stand".

What you've built

Three doings, and the first pair that undoes itself: *naḍa* against *niṟuttu*.

Your turn

- *Say it: niṟuttu*
- *Say it: naḍa*, then *niṟuttu* — moving, then halted
- *Say it: niṟuttu* the way you would call it across a street
- *Say it: vāṉilai*, and name the piece of it this verb is related to
- *Recall:* say *tayakkam*
- *Read it:* பயிர்

Before you move on

What does நிறுத்து mean? ("stop".) Which everyday word already carried its family? (வானிலை — the sky's *standing*.)

65.5 திற (tiṟa) — open

What did *niṟuttu* mean, and which walking word does it undo?

You'll want to know: திற

திற (*tiṟa*) — "open".

You have கதவு (*kadavu*), the door. திற is what you do to it. The ற in the middle is the hard, tapped *ṟ* you first met in நன்றி (*naṉṟi*) — the same letter, in a word where nothing hides it.

Tamil joins a verb to the thing it acts on with an ending this chapter does not open yet, so hold *kadavu* and *tiṟa* as two words you can say in sequence rather than a sentence you can build. The pair is worth having early even without the joint: a door and the act of opening it are two of the first things anyone needs at somebody else's house.

Across the family, one old word in four shapes: Kannada has తೆರೆ (*tere*), Telugu has తెరుచు (*terucu*), and Malayalam has തുറക്കുക (*tuṟakkuka*). Tamil's keeps the tapped ற the others softened away.

The word, taken apart — its roots and family

திற (*tiṟa*) is native Dravidian. DEDR 3259 lists Malayalam *tuṟakka*, Kannada *teṟa*, "an opening" and Telugu *teṟa*.

What you've built

Four doings, and a verb that belongs to a noun you already carry.

Your turn

- *Say it: tiṟa*
- *Say it: kadavu*, then *tiṟa* — the thing, then the act
- *Say it: naṉṟi*, then *tiṟa*, and hear the same ற twice
- *Say it: niṟuttu*, then *tiṟa*
- *Read it:* நம்பிக்கை
- *Recall:* say *kaḷam*

Before you move on

What does திற mean? ("open".) Which door word does it go with? (கதவு.)

65.6 மூடு (mūḍu) — close

What did *tiṟa* mean, and which noun does it belong beside?

You'll want to know: மூடு

மூடு (*mūḍu*) — "close", "shut".

The verb that undoes திற. A கதவு you have opened is a கதவு you can மூடு, and the two travel together the way *naḍa* and *niṟuttu* do.

The long ூ at its front is the same sign you read in மூன்று (*mūṉṟu*, "three"). Two words, one sign, no relation between their meanings — worth noticing so the shape stops being a surprise.

Across the family, this one did not travel. Kannada shuts a door with ಮುಚ್ಚು (*muccu*), Telugu with మూయు (*mūyu*), and Malayalam with അടയ്ക്കുക (*aṭaykkuka*). Four sisters, three different words — after two verbs the family held in common, a reminder that the sharing is real but never guaranteed.

The word, taken apart — its roots and family

மூடு (*mūḍu*) is native Dravidian. DEDR 5034 lists Malayalam *mūṭuka*, "to cover".

What you've built

Five everyday doings, in pairs: *sāppiḍu* with *kuḍi*, *naḍa* with *niṟuttu*, *tiṟa* with *mūḍu*. Each one arrived beside the act that undoes it, which is the cheapest way there is to hold two words instead of one.

Your turn

- *Say it:* *mūḍu*
- *Say it:* *tiṟa*, then *mūḍu*
- *Say it:* all five in order — *kuḍi*, *naḍa*, *niṟuttu*, *tiṟa*, *mūḍu*
- *Say it:* for each of *naḍa* and *tiṟa*, the word that undoes it
- *Say it:* *taṇṇīr kuḍi*, then *kadavu*, then *mūḍu*
- *Read it:* குடி — the one word of the five you have spelled out
- *Recall:* say *paṇivu*
- *Read it:* அறுவடை

Before you move on

Say the five doings in order. Which two of them make a pair with a door? (திற and மூடு.) Which drink word did you put in front of குடி? (*taṇṇīr*, or *tēnīr*, or *pāl*.)

65.7 The five doings, retrieved

Reach back one chapter first: what did *kaḷam* mean, and what did *aṟuvaḍai* mean? Nothing new arrives in this lesson.

Your turn — retrieve, do not recite

Say these aloud:

- the word for drinking, and a drink to put in front of it
- the word for walking, and then the word that stops it
- what you do to a **கதவு**, and then the act that undoes that
- all five, in the order you met them
- all five again, fastest you can hold them

Your turn — the pairs, out of order

Each prompt names one half. Say the other.

- *mūḍu* → (*tiṟa*)
- *naḍa* → (*niṟuttu*)
- *sāppiḍu* → (*kuḍi*)
- *niṟuttu* → (*naḍa*)
- *tiṟa* → (*mūḍu*)
- *Read it:* **குடி**, then say what goes in front of it

Before you move on

Which of the five has no partner among the other four, and where does its partner live instead? (**குடி** — its partner is **சாப்பிடு**, from the eating lesson.)

Chapter 66

Which Way

Modes: **voice** (7) **pen** (1) **Hands-free start:** the first 2 of 8 lessons.

> ***By the end of this chapter:*** I can say up, down, inside, outside, right and left in Tamil, and put each one in front of a verb or a noun I already know.
>
> *Complete TA-C66-whichway-recall and produce each of the six directions from its opposite, then sort all six by the ending they take.*

66.1 மேலே (mēlē) — up, above

One word back from last chapter first: what did *mūḍu* mean?

You'll want to know: மேலே

மேலே (*mēlē*) — "up, above".

It sits in front of the verb, where every Tamil adverb sits: மேலே பார் (*mēlē pār*) — "look up". You already have பார் from the seeing lesson, so this is one new word buying you a whole instruction.

Underneath it is மேல் (*mēl*), the bare word for "the top", a native Dravidian positional word. Kannada says ಮೇಲೆ (*mēle*) for the same idea, and it is the same word, worn the same way.

The word, taken apart — its roots and family

மேலே (*mēlē*) is native Dravidian. DEDR 5086 lists Malayalam *mē*, "over". The entry lists *mēl*, "that which is over or above", and -*ē* turns it into "up there".

Why it's said this way

Listen to the end of the word, and then say the two pointing words you already have. இங்கே (*iṅgē*, "here") and அங்கே (*aṅgē*, "there") end the same way. That **-ஏ** is Tamil's way of turning a bare place-word into "**at** that place, **to** that place" — and மேல் plus **-ஏ** is மேலே, "at the top, upward".
So this is not a new machine. It is a machine you already own, running on a new word.

Your turn

- *Say it: mēlē*
- *Say it: mēlē pār* — "look up"
- *Say it: iṅgē, aṅgē, mēlē* — three words, one ending
- *Recall:* say *nel*
- *Read it:* குடி

Before you move on

What does மேலே mean? ("Up, above".) What two pointing words end the same way, and what does that ending do? (இங்கே and அங்கே — the **-ஏ** makes a place-word mean "at, or to, that place".)

66.2 கீழே (kīḻē) — down, below

Say the word for "up", and the instruction you built with it.

You'll want to know: கீழே

கீழே (*kīḻē*) — "down, below". The other half of the pair, and built by the same two pieces: **கீழ்** (*kīḻ*, "the bottom") plus the **-ஏ** you met one lesson ago.

கீழே பார் (*kīḻē pār*) — "look down". Same slot, same verb, opposite direction.

The word, taken apart — its roots and family

கீழே (*kīḻē*) is native Dravidian. DEDR 1619 lists Malayalam *kīḻ*, "place below".

The letters in this word

The middle of this word is **ழ** (*ḻ*), the retroflex glide you first met inside **மகிழ்ச்சி** and again in **தமிழ்** itself. Curl the tongue back and let the air pass beside it; it is not an English *l* and it is not an English *r*. The vowel in front of it is **long**: *kīḻ*, not *kiḻ*. Tamil separates words by vowel length, so the length is doing work here, not decoration.

Your turn

- *Say it: kīḻē* — feel the **ழ**
- *Say it: mēlē pār*, then *kīḻē pār*
- *Say it:* both bare words, *mēl* and *kīḻ*, then both with the ending
- *Read it:* **புல்**
- *Recall:* say *naḍa*

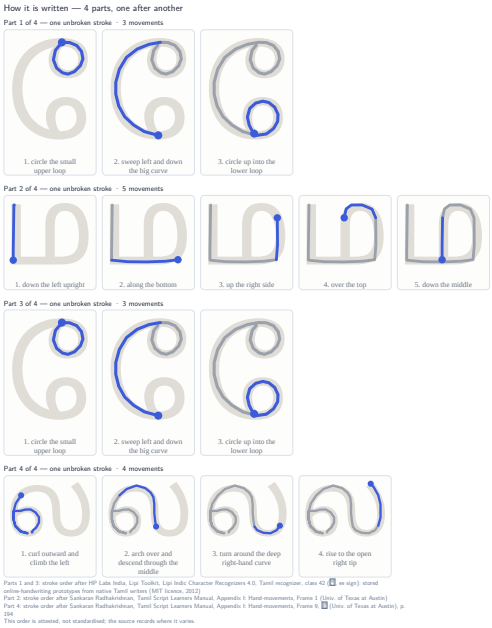

Before you move on

What does **கீழே** mean, and what two pieces build it? ("Down, below" — **கீழ்** plus **-ஏ**.) Which rare Tamil letter sits in the middle of it? (**ழ**, the same one in *tamiḻ*.)

66.3 மேலே — the same sign twice

Two lessons ago you learned to say *mēlē*, and *kīḻē* came between. Now look at it on the page.

Script you'll notice: two letters, one sign, used twice

How மேலே *is written, part by part, stroke by stroke*

Like குடி before it, மேலே brings no new shape. It brings something better: the same vowel sign riding two different letters, one after the other.

piece		
மே	*mē* — ம with the ே sign	ம from the letter-*ma* lesson; the ே sign from the vowel-sign lesson, and again inside *pēsu*
லே	*lē* — ல with the ே sign	ல from the letter-*la* lesson; the **same** ே again

மே · லே → மேலே

Read it once as two beats. Both beats are long, and both are long for the same reason: the ே hook in front of each letter.

Script you'll notice: the hook goes in front, the sound comes after

The ே sits to the **left** of the letter it belongs to, and is said **after** it. மே is written hook-then-ம and read *mē*. That is not a quirk of this word — it is how this sign has always worked, and மேலே shows it twice in a row so you can watch the eye do it.

Your turn

- *Read it:* மே — then லே — then மேலே
- *Point to:* the ே in each of the two beats
- *Read it:* மேலே, then say the instruction you built from it

Before you move on

Read மேலே. How many times does the ே appear, and on which side of its letter does it sit? (**Twice**; on the **left**, though it is said after.)

66.4 உள்ளே (uḷḷē) — inside

Say the opposite of மேலே. *Read it:* மேலே off the page

You'll want to know: உள்ளே

உள்ளே (*uḷḷē*) — "inside, in".

The same shape a third time: உள் (*uḷ*, "the inside") plus the **-ஏ** that turns a place-word into a place you can go to.

And now it earns its keep. உள்ளே வா (*uḷḷē vā*) — "**come in**." That is what a Tamil household says at the door, and you have had வா since the coming-and-going lesson. One new word, and you can answer a doorway.

In the family, and next door

	word
Telugu	లోపల (*lōpala*)
Malayalam	അകത്ത് (*akattŭ*)
English	inside, in

The word, taken apart — its roots and family

உள்ளே (*uḷḷē*) is native Dravidian. DEDR 698 lists Malayalam *uḷḷu*, "inside".

Why it's said this way

Written out, உள் ends in the retroflex ள், and the ending brings a second one: உள் + ஏ → உள்ளே, with ள்ளே doubled in the middle. Hold it a beat longer than a single ள, the way you already hold the *kk* in வணக்கம்.
You have met that doubling before without being told it was the same thing: வெள்ளை (*veḷḷai*, "white") carries it too.

Your turn

- *Say it:* *uḷḷē* — hold the doubled ள
- *Say it:* *uḷḷē vā* — "come in"
- *Say it:* *mēlē*, *kīḻē*, *uḷḷē* — three place-words, one ending
- *Recall:* say *payir*
- *Read it:* நிறுத்து

Before you move on

What does உள்ளே mean, and what do you say at a door with it? ("Inside" — உள்ளே வா, "come in".) What happens to the ள when the ending arrives? (It **doubles**.)

66.5 வெளியே (veḷiyē) — outside

What do you say at a door to bring someone in?

You'll want to know: வெளியே

வெளியே (*veḷiyē*) — "outside, out". The answer to உள்ளே, and the fourth word built the same way: வெளி (*veḷi*, "the open, the outside") plus -ஏ.

வெளியே போ (*veḷiyē pō*) — "go out". Put it beside உள்ளே வா and you have a matched pair of instructions, each one an old verb with a new word in front of it.

In the family, and next door

	word
Kannada	ಹೊರಗೆ (*horage*)
Telugu	బయట (*bayaṭa*)
English	outside, out

The word, taken apart — its roots and family

வெளியே (*veḷiyē*) is native Dravidian. DEDR 5498 lists Malayalam *veḷi*, "outside". The entry glosses *veḷi* "outside, open space".

Why it's said this way

உள் ends in a consonant, so -ஏ doubled it. வெளி ends in a vowel, and two vowels cannot sit against each other, so Tamil slides a ய் (*y*) between them: வெளி + ஏ → வெளியே.
Tamil grammar has a name for that sliding letter: உடம்படுமெய் (*uḍambaḍumey*), the "body-joining consonant". Its whole job is to stand between two vowels that would otherwise meet, and it is either ய் or வ். Once you know it is there, you stop hearing வெளியே as a word with a strange extra letter and start hearing it as வெளி with an ending on it.

Your turn

- *Say it: veḷiyē*
- *Say it: uḷḷē vā*, then *veḷiyē pō*
- *Say it:* the bare pair — *uḷ* and *veḷi* — then both with the ending
- *Read it:* களம்
- *Recall:* say *tiṟa*

Before you move on

What two instructions does this pair give you at a door? (உள்ளே வா, "come in", and வெளியே போ, "go out".) Why is there a ய inside வெளியே and not inside உள்ளே? (வெளி ends in a **vowel**, so a ய slides in to keep two vowels apart.)

66.6 வலது (valadu) — the right side

Say the pair you can use at a door.

You'll want to know: வலது

வலது (*valadu*) — "the right side, the right-hand one".

It does not take the **-ஏ** ending, because it is not that kind of word. It goes straight in front of a noun: வலது கை (*valadu kai*) — "the right hand". You have had கை since the head-and-hand lesson, so again the new word is the only new thing.

Why it's said this way

Listen to how it ends, and say the two pointing words again — this time the pair that names things rather than places. இது (*idu*, "this one") and அது (*adu*, "that one") end in the same **-து**. That ending means "**the one that is**" — so வலது is, quite literally, "the right one".

Two endings from the same stretch of the book, and now you can hear the machine from both sides: **-ஏ** makes a **place** you can move to, **-து** makes a **thing** you can point at.

> Tamil's word for the right side sits close to வலி (*vali*), "strength" — the strong hand naming the side, a link many languages make (English gets *dexterity* from the Latin for "right"). Take that as the usual account rather than a settled derivation.

Your turn

- *Say it: valadu*
- *Say it: valadu kai* — "the right hand"

- *Say it: idu, adu, valadu* — three words, one ending
- *Recall:* say *aṟuvaṭai*
- *Read it:* மூடு

Before you move on

What does வலது mean, and what does it not take that மேலே does? ("The right side"; it takes **no -ஏ**.) Which two pointing words share its ending? (இது and அது.)

66.7 இடது (iḍadu) — the left side

Which hand is the வலது கை? Say which: right or left.

You'll want to know: இடது

இடது (*iḍadu*) — "the left side, the left-hand one". The last of the six, and it behaves exactly like வலது: no -ஏ, straight in front of the noun. இடது கை (*iḍadu kai*) — "the left hand".

Both hands, in two words you can now hold up and check against each other.

The word, taken apart — its roots and family

இடது (*iḍadu*) is native Dravidian. DEDR 449 lists Malayalam *iṭam* and Kannada *eḍa*. The entry gives *iṭam*, "left side", and compares Indo-Aryan **ḍāva*, "left" (CDIAL 5539), which CDIAL counts as non-Aryan.

Why it's said this way

Written out, இடது carries ட between two vowels — and you learned in the reading lesson for குடி that a ட in that position softens. So the book writes this word *iḍadu*, not *iṭadu*, for the same reason it writes *kuḍi* and *eppaḍi*. One letter, read by where it stands.

> Tamil's word for the left side looks a great deal like இடம் (*iḍam*), "place, room" — and dictionaries do connect them. Treat that as the usual account rather than a settled fact; it is the kind of link that is easy to see and hard to prove.

Your turn

Say these aloud:

- *iḍadu*
- *valadu kai*, then *iḍadu kai* — and say *right* or *left* after each
- all four of the **-ஏ** words, then both of the **-து** words

Before you move on

What does இடது mean? ("The left side".) Why is its ட read as a soft *ḍ*? (Because it sits **between two vowels**, the same rule as in *kuḍi*.)

66.8 The six directions, retrieved

> Reach back one chapter first: what did *tiṟa* mean, and what did *mūḍu* mean? Nothing new arrives in this lesson.

Your turn — retrieve, do not recite

Say these aloud:

- the word for "up", and the instruction that sends the eyes there
- the word for "down", and the same instruction pointed the other way
- what you call at a door to bring someone in
- all four of the **-ஏ** words, in the order you met them
- all four again, fastest you can hold them

Your turn — the pairs, out of order

Each prompt names one half. Say the other.

- *kīḻē* → (*mēlē*)
- *veḷiyē* → (*uḷḷē*)
- *iḍadu* → (*valadu*)

- *uḷḷē vā* → (*veḷiyē pō*)
- *mēlē pār* → (*kīḻē pār*)
- *Read it:* மேலே, then say the verb that goes after it

Your turn — sort the six

Two endings, and every word in this chapter takes one of them.

- *Sort:* which four take **-ஏ**, and which two take **-து**
- *Say it:* why the four go in front of a **verb** and the two go in front of a **noun**
- *Say it:* வலது கை, then இடது கை, saying *right* or *left* after each

Before you move on

Which two of the six never take **-ஏ**, and what do they take instead? (வலது and இடது — the **-து** of இது and அது.)

Chapter 67

What You Wear

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can name a shirt, a veshti, a sari, sandals and a cap in Tamil, and run the five from the head down to the floor.
>
> *Complete TA-C67-cap and say all five words of the chapter in order.*

67.1 சட்டை (saṭṭai) — a shirt

> Before the new one: one word back from last chapter: what did *iḍadu* mean?

You'll want to know: சட்டை

சட்டை (*saṭṭai*) — "a shirt".

The ordinary word for a shirt — the thing that goes over the top half of you, in a shop or on a washing line.

You already own துணி (*tuṇi*), cloth. The two are one step apart: துணி is the material, and சட்டை is the thing cut and sewn out of it. Ask for துணி and you get a length of fabric; ask for a சட்டை and you get a garment.

Say the middle hard. The doubled ட்ட in சட்டை is the same doubled ட you already hear in பெட்டி (*peṭṭi*), a box — and it is what keeps this word *saṭṭai* rather than a softer *saḍai*.

In the family, and next door

	word
Kannada	ಅಂಗಿ (*aṅgi*)
Telugu	చొక్కా (*cokkā*)
Malayalam	ഷർട്ട് (*ṣarṭṭŭ*)
Hindi (neighbour)	कमीज़ (*kamīz*)
English	a shirt

The word, taken apart — its roots and family

சட்டை (*saṭṭai*) is native Dravidian. DEDR 2310 lists Malayalam *caṭṭa*, Kannada *caṭṭe* and Telugu *caṭṭa*.

What you've built

The first of five things you can wear.

Your turn

- *Say it: saṭṭai*
- *Say it: tuṇi*, then *saṭṭai* — and say which one is still just cloth
- *Recall:* say *valadu*, then say *iḍadu*, then say *saṭṭai*
- *Recall:* say *mēlē*
- *Read it:* கீழே

Before you move on

Say it once more, holding the doubled ட.

67.2 வேட்டி (vēṭṭi) — a veshti, the cloth a man wraps at the waist

Before the new one: what did *saṭṭai* mean?

You'll want to know: வேட்டி

வேட்டி (*vēṭṭi*) — "a veshti, the cloth a man wraps at the waist".

Not a sewn garment at all. A வேட்டி is a single uncut length of துணி, wrapped round the waist and tucked — which is why the cloth word sits so close behind it.

English borrowed the northern word *dhoti* for the same idea. In Tamil Nadu the word you will hear, and the word to say, is வேட்டி.

Its middle is the doubled ட you met one lesson ago in சட்டை, riding a long ே this time.

The word, taken apart — its roots and family

வேட்டி (*vēṭṭi*) is probably from Sanskrit *veṣṭ-*, "to wrap": CDIAL 12130 gives *veṣṭa*, "band, enclosure", and its family. A veshti is the cloth wrapped round.

What you've built

Two garments, and the same doubled consonant in both.

Your turn

- *Say it: vēṭṭi*
- *Say it: saṭṭai*, then *vēṭṭi* — and say which one was never cut
- *Recall:* say *iḍadu*, then say *saṭṭai*, then say *vēṭṭi*
- *Read it:* உள்ளே

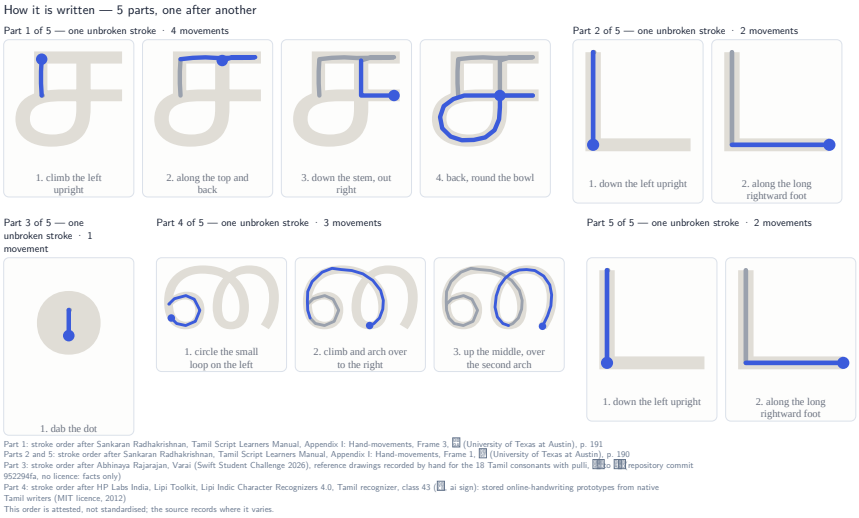

Before you move on

Which of the two is one uncut length of cloth? (வேட்டி.)

67.3 சட்டை — what a doubled letter looks like

Before the page: you have said *saṭṭai* and *vēṭṭi* aloud. Now look at the first one on the page.

Script you'll notice: சட்டை — what a doubled letter looks like

How சட்டை is written, part by part, stroke by stroke

சட்டை brings no new shape. It brings a familiar one used twice in a row, which is worth watching once slowly.

piece		
ச	*sa*	the letter on its own, with its own built-in *a*
ட்	the ட with a புள்ளி on top	the dot that takes the vowel away, so nothing is said after it
டை	*ṭai*	the same ட again, this time with the ை sign

ச · ட் · டை → சட்டை

The dot in the middle is doing the whole job. Without it you would have ச-ட-டை, three open beats. With it, the first ட closes and leans on the second, and the word comes out hard in the middle: *saṭṭai*.

Your turn

- *Read it:* ச — then ட் — then டை

- *Point to:* the புள்ளி, and say what it takes away
- *Read it:* சட்டை, then say what it means
- *Recall:* say *saṭṭai*, then say *vēṭṭi*, then read சட்டை

Before you move on

Read சட்டை. Which mark makes the middle hard? (The புள்ளி on the first ட.)

67.4 புடவை (puḍavai) — a sari

Before the new one, say what சட்டை means. *Read it:* சட்டை once

You'll want to know: புடவை

புடவை (*puḍavai*) — "a sari".

The everyday Tamil word for the draped cloth a woman wears.

English took **sari** in from the north. Tamil's own word is புடவை, and it is the one that works in a Tamil shop: say புடவை and you will be shown exactly what you asked for.

It ends in the ை you have now met three times over — in தலை (*talai*), the head, and twice inside சட்டை.

In the family, and next door

	word
Kannada	ಸೀರೆ (*sīre*)
Telugu	చీర (*cīra*)
Malayalam	സാരി (*sāri*)
Hindi (neighbour)	साड़ी (*sāṛī*)
English	a sari

The word, taken apart — its roots and family

புடவை (*puḍavai*) is native Dravidian. DEDR 4256 lists Malayalam *puṭava* and Kannada *puṭṭige*. The entry compares Sanskrit *phuṭṭikā*, "a kind of cloth".

What you've built

Three garments, and a Tamil word English never borrowed.

Your turn

- *Say it: puḍavai*
- *Say it: talai, saṭṭai, puḍavai* — three words, one ending
- *Recall:* say *vēṭṭi*
- *Read it:* சட்டை
- *Recall:* say *puḍavai*
- *Recall:* say *veḷiyē*

Before you move on

Which ending do தலை, சட்டை and புடவை share? (The ை.)

67.5 செருப்பு (seruppu) — a sandal, footwear

Before the new one: what did *puḍavai* mean?

You'll want to know: செருப்பு

செருப்பு (*seruppu*) — "a sandal, footwear".

Footwear — and in Tamil it is really a doorway word.

செருப்பு comes off at the வாசல் (*vāsal*) before anyone steps உள்ளே. So the thing you have just named is the one thing that stays வெளியே: three words from earlier chapters, and this one is the reason they get used every day.

In the family, and next door

	word	same root
Malayalam	ചെരുപ്പ് (*ceruppŭ*)	yes
Hindi (neighbour)	चप्पल (*cappal*)	
English	a sandal, footwear	

The word, taken apart — its roots and family

செருப்பு (*seruppu*) is native Dravidian. DEDR 1963 lists Malayalam *cerippu*, Kannada *kera* and Telugu *ceppu*.

What you've built

Four, and the run has reached the floor.

Your turn

- *Say it: seruppu*
- *Say it: seruppu*, then *vāsal* — and say which side of the door each one is on
- *Read it:* சட்டை
- *Recall:* say *puḍavai*, then say *seruppu*
- *Read it:* வலது

Before you move on

Where does the செருப்பு stay — உள்ளே or வெளியே? (வெளியே.)

67.6 தொப்பி (toppi) — a cap, a hat

Before the new one: what did *seruppu* mean, and what did *puḍavai* mean?

You'll want to know: தொப்பி

தொப்பி (*toppi*) — "a cap, a hat".

The last of the five, and the highest one: a தொப்பி sits மேலே, on the தலை.

Its ொ is the short o sign you met long before this chapter, and its doubled ப்ப works exactly like the doubled ட you took apart in சட்டை — a புள்ளி closing the first letter onto the second.

With this one the run has both ends: தொப்பி at the top, செருப்பு at the floor.

In the family, and next door

	word	same root
Kannada	ಟೋಪಿ (*ṭōpi*)	yes
Telugu	టోపీ (*ṭōpī*)	yes
Malayalam	തൊപ്പി (*toppi*)	yes
Hindi (neighbour)	टोपी (*ṭopī*)	yes
English	a cap, a hat	

The word, taken apart — its roots and family

தொப்பி (*toppi*) is a loan from Hindustani *ṭopī*, "cap". CDIAL 5481 sets the North Indian forms under *ṭōppa*, "hat, covering", whose own origin is unclear.

What you've built

Five things to wear, top to bottom.

Your turn

- *Say it: toppi*
- *Say it:* all five from the head down — *toppi*, *saṭṭai*, *vēṭṭi*, *puḍavai*, *seruppu*
- *Recall:* say *puḍavai*, then say *seruppu*, then say *toppi*
- *Recall:* say *iḍadu*

Before you move on

Which of the five sits highest, and which stays வெளியே? (தொப்பி; செருப்பு.)

Chapter 68

At the Shop

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can name a shop, a price, money, buying and a bag in Tamil, and ask what something costs.
>
> *Complete TA-C68-bag and say all five words of the chapter in order.*

68.1 கடை (kaḍai) — a shop

Before the new one: what did *toppi* mean?

You'll want to know: கடை

கடை (*kaḍai*) — "a shop".

Any shop at all: the tea shop, the cloth shop, the one at the end of the street. Tamil does not split the word by what is sold — a **கடை** is a **கடை**, and what is inside it is said separately.

It ends in the same **ை** as **தலை** and **சட்டை**, and it is where every garment of the last chapter came from.

In the family, and next door

	word	same root
Kannada	**ಅಂಗಡಿ** (*aṅgaḍi*)	
Telugu	**అంగడి** (*aṅgaḍi*)

English	a shop	

The word, taken apart — its roots and family

கடை (*kaḍai*) is native Dravidian. DEDR 1142 lists Malayalam *kaṭa*, "market".

What you've built

The place the next four words happen in.

Your turn

- *Say it: kaḍai*
- *Say it: kaḍai*, then name one thing from last chapter you would go there for
- *Recall:* say *seruppu*, then say *toppi*, then say *kaḍai*
- *Recall:* say *mēlē*
- *Read it:* கீழே
- *Recall:* say *saṭṭai*

Before you move on

Say it once more.

68.2 விலை (vilai) — a price

Before the new one: what did *kaḍai* mean?

You'll want to know: விலை

விலை (*vilai*) — "a price".

The number the shopkeeper says back to you.

This one word turns a question you already own into a whole sentence. You have எவ்வளவு (*evvaḷavu*), "how much". Put them together and you have விலை எவ்வளவு? — "the price, how much?"

Notice what is not there: no verb, and no word for "is". Tamil names the thing, then asks about it, and stops.

In the family, and next door

	word	same root
Kannada	ಬೆಲೆ (*bele*)	yes
Telugu	ధర (*dhara*)	
Hindi (neighbour)	दाम (*dām*)	
English	a price	

The word, taken apart — its roots and family

விலை (*vilai*) is native Dravidian. DEDR 5421 lists Malayalam *vila* and Kannada *bele*. It belongs with the native verb "to sell".

What you've built

Two words, and a question you can already ask.

Your turn

- *Say it: vilai*
- *Say it: vilai evvaḷavu?*
- *Say it: kaḍai*, then *vilai*, then the whole question
- *Recall:* say *toppi*, then say *kaḍai*, then say *vilai*
- *Read it:* உள்ளே
- *Recall:* say *vēṭṭi*

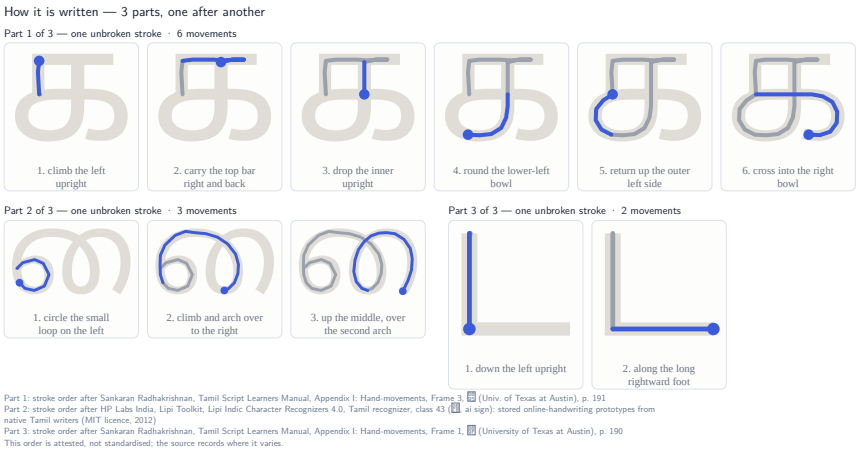

Before you move on

How do you ask what something costs? (விலை எவ்வளவு?)

68.3 கடை — a sign that wraps the letter

Before the page: you can already say *kaḍai* and *vilai*. Now read the first one.

Script you'll notice: கடை — a sign that wraps the letter

How கடை *is written, part by part, stroke by stroke*

கடை is as short as a Tamil word gets: two letters, one sign, nothing new.

piece		
க	*ka*	the letter with its own built-in *a*
டை	*ṭai*	ட with the ை sign, the same one you read at the end of சட்டை

க · டை → கடை

Look at where the ை sits. It is drawn to the **left** of its letter but said **after** it, which is the habit you first met on the ே of மேலே. Two signs now, both hanging in front of the letter they belong to.

And notice what the same two letters do without the sign: கடு, கடி and கடை are three different words with the same skeleton. In Tamil the sign is not decoration.

Your turn

- *Read it:* க — then டை — then கடை
- *Point to:* the ை, and say which side of its letter it is drawn on

- *Read it:* சட்டை, then கடை, and find the ending they share
- *Recall:* say *kaḍai*, then say *vilai*, then read கடை

Before you move on

Read கடை. On which side of ட is the ை drawn, and when is it said? (Drawn on the **left**; said **after**.)

68.4 பணம் (paṇam) — money

Before the new one, say what கடை means. *Read it:* கடை

You'll want to know: பணம்

பணம் (*paṇam*) — "money".

Money, in the plain everyday sense — what is in your hand, not what is in a bank.

The ண in the middle is the curled-back one, the same ண you have been saying since வணக்கம் on the very first page. And it closes with ம், the ending that finishes so many Tamil nouns: வணக்கம், தூக்கம், and now பணம்.

In the family, and next door

	word
Telugu	డబ్బు (*ḍabbu*)
Hindi (neighbour)	पैसा (*paisā*)
English	money

The word, taken apart — its roots and family

பணம் (*paṇam*) is a loan from Sanskrit *paṇa*, "a coin" (CDIAL 7715).

What you've built

Three: the shop, the price, and what you pay it with.

Your turn

- *Say it: paṇam*

- *Say it:* *vaṇakkam*, then *paṇam* — and say what the two have in common
- *Recall:* say *vilai*
- *Read it:* கடை
- *Recall:* say *paṇam*
- *Recall:* say *veḷiyē*
- *Read it:* புடவை

Before you move on

What does பணம் mean? (“Money”.)

68.5 வாங்கு (vāṅgu) — to buy, to get

Before the new one: what did *paṇam* mean?

You’ll want to know: வாங்கு

வாங்கு (*vāṅgu*) — “to buy, to get”.

The verb that makes a shop work.

It is also the ordinary Tamil verb for **receiving**. Buying something and being handed something are the same act here, and one word covers both — so வாங்கு is as useful at a doorway as at a counter.

Set it against கொடு (*koṭu*), “give”, which you already have. One hand out, one hand in, and the pair covers most of what happens over a counter.

In the family, and next door

	word	same root
Malayalam	വാങ്ങുക (*vāṅṅuka*)	yes
Hindi (neighbour)	ख़रीदना (*kharīdnā*)	
English	to buy, to get	

The word, taken apart — its roots and family

வாங்கு (*vāṅgu*) is native Dravidian. DEDR 5336 lists Malayalam *vāṅṅuka*, “to take, receive”.

What you've built

Four, and now something can change hands.

Your turn

- *Say it: vāṅgu*
- *Say it: koṭu*, then *vāṅgu* — and say which way each hand is moving
- *Read it:* கடை
- *Recall:* say *paṇam*, then say *vāṅgu*
- *Read it:* வலது
- *Recall:* say *seruppu*

Before you move on

What two jobs does வாங்கு do? (**Buying**, and **receiving**.)

68.6 பை (pai) — a bag

Before the new one: what did *vāṅgu* mean, and what did *paṇam* mean?

You'll want to know: பை

பை (*pai*) — "a bag".

One of the shortest words in this book: ப with the ை sign, and that is all of it.

A பை is what everything you வாங்கு goes into. It is the last piece of the shop, and the one you carry home.

Five words now stand in a row you can walk through in order: the கடை you go to, the விலை you ask for, the பணம் you hand over, the வாங்கு that does it, and the பை it all leaves in.

In the family, and next door

	word
Kannada	ಚೀಲ (*cīla*)
Telugu	సంచి (*sañci*)
Malayalam	ബാഗ് (*bāgŭ*)
Hindi (neighbour)	थैला (*thailā*)
English	a bag

The word, taken apart — its roots and family

பை (*pai*) is native Dravidian. DEDR 4450 lists Malayalam *pai*.

What you've built

Five, and the shop is closed.

Your turn

- *Say it: pai*
- *Say it:* all five in the order they happen — *kaḍai*, *vilai*, *paṇam*, *vāṅgu*, *pai*
- *Recall:* say *paṇam*, then say *vāṅgu*, then say *pai*
- *Recall:* say *iḍadu*
- *Read it:* தொப்பி

Before you move on

What does பை mean, and which sign is on it? ("A bag"; the ை.)

Chapter 69

Getting There

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can name a vehicle, a bus, a train, a road and a station in Tamil.
>
> *Complete TA-C69-station and say all five words of the chapter in order.*

69.1 வண்டி (vaṇḍi) — a vehicle, a cart

Before the new one: what did *pai* mean?

You'll want to know: வண்டி

வண்டி (*vaṇḍi*) — "a vehicle, a cart".

The general word for a thing with wheels. A bullock cart is a **வண்டி**; so is a bicycle, and so is a car. Tamil starts here and adds a word in front when it needs to be exact.

In the middle sits **ண்ட** — the curled-back **ண** closed by a **புள்ளி** and leaning on **ட**. That pair is one of the most common shapes in the language, and you will now start seeing it everywhere.

In the family, and next door

	word	**same root**
Malayalam	**വണ്ടി** (*vaṇṭi*)	yes
Hindi (neighbour)	**गाड़ी** (*gāṛī*)	
English	a vehicle, a cart	

The word, taken apart — its roots and family

வண்டி (*vaṇḍi*) is filed in DEDR's appendix of Indo-Aryan loans (DEDR App. 50), beside Malayalam *vaṇṭi*, Kannada *baṇḍi* and Telugu *baṇḍi*. The entry traces it to Sanskrit *bhāṇḍa*, "goods, wares": the cart was the thing that carried them.

What you've built

The word the rest of this chapter is built on.

Your turn

- *Say it: vaṇḍi*
- *Say it:* it once more, curling the tongue back for the ண
- *Recall:* say *vāṅgu*, then say *pai*, then say *vaṇḍi*
- *Recall:* say *saṭṭai*
- *Read it:* கடை

Before you move on

What does வண்டி mean? ("A vehicle, a cart".)

69.2 பேருந்து (pērundu) — a bus

Before the new one: what did *vaṇḍi* mean?

You'll want to know: பேருந்து

பேருந்து (*pērundu*) — "a bus".

A made word, and you can take it apart. பேர்- is the big-word பெரு, and உந்து is "to push along". A big pushed thing.

This is the printed and announced word: it is what stands on the board at the stop and in the newspaper. In the street you will also hear the English "bus" said plainly, and both are understood — but only one of them is written on the board you have to read.

In the family, and next door

	word
Kannada	ಬಸ್ (*bas*)
Telugu	బస్సు (*bassu*)
Malayalam	ബസ് (*bas*)
English	a bus

The word, taken apart — its roots and family

பேருந்து (*pērundu*) is a modern Tamil coinage from native parts: *pēr*, "big" (DEDR 4411), and *untu*, a word for a motor vehicle, from the verb *untu*, "to push, to drive" (DEDR 625). A bus is "the big vehicle".

What you've built

Two, and one of them you can take apart.

Your turn

- *Say it: pērundu*
- *Say it:* the two pieces, then the whole word
- *Recall:* say *pai*, then say *vaṇḍi*, then say *pērundu*
- *Read it:* வேட்டி
- *Recall:* say *vilai*

Before you move on

What are the two pieces inside பேருந்து? ("**Big**", and "**push along**".)

69.3 வண்டி — a dot joining two letters

Before the page: you can say *vaṇḍi* and *pērundu*. Now look at the first one on the page.

Script you'll notice: வண்டி — a dot joining two letters

வண்டி brings no new shape either. What it brings is the **புள்ளி** doing its job **between** two different letters, where **சட்டை** showed it between two of the same one.

piece		
வ	*va*	the letter with its built-in *a*
ண்	ண with a புள்ளி	closed — nothing said after it
டி	*ḍi*	ட with the ி sign

வ · ண் · டி → வண்டி

Read the middle two as one movement rather than two beats. That is what the **புள்ளி** is asking for: **ண்** has no vowel of its own left, so it has nowhere to go except onto the letter after it.

Your turn

- *Read it:* **வ** — then **ண்** — then **டி**
- *Point to:* the **புள்ளி**, and say which letter it has emptied
- *Read it:* **சட்டை**, then **வண்டி** — the same dot, two different jobs
- *Recall:* say *vaṇḍi*, then say *pērundu*, then read **வண்டி**

Before you move on

Read **வண்டி**. What has the **புள்ளி** done to the **ண**? (Taken its vowel away, so it leans on the **ட**.)

69.4 ரயில் (rayil) — a train

Before the new one, say what **வண்டி** means. *Read it:* **வண்டி**

You'll want to know: ரயில்

ரயில் (*rayil*) — "a train".

A borrowed word, and it wears the borrowing openly: English "rail", written straight out in Tamil letters.

There is a clue in the very first letter. Tamil words do not normally **begin** with ர, so a word that starts that way has almost always come in from somewhere else. You now have a small test you can run on a word before anyone tells you where it is from.

In the family, and next door

	word	same root
Kannada	ರೈಲು (*railu*)	yes
Telugu	రైలు (*railu*)	yes
Hindi (neighbour)	ट्रेन (*ṭren*)	
English	a train	

The word, taken apart — its roots and family

ரயில் (*rayil*) is a loan from English *rail*, as in *railway*.

What you've built

Three, and one of them is a visitor.

Your turn

- *Say it: rayil*
- *Say it: vaṇḍi*, then *rayil* — and say which one is Tamil's own
- *Recall:* say *pērundu*
- *Read it:* வண்டி
- *Recall:* say *rayil*
- *Recall:* say *puḍavai*
- *Read it:* பணம்

Before you move on

What does the ர at the front tell you about ரயில்? (That it is a **borrowed** word.)

69.5 சாலை (sālai) — a road

Before the new one: what did *rayil* mean?

You'll want to know: சாலை

சாலை (*sālai*) — "a road".

A made road, wide enough for a வண்டி to go down.

Set it beside பாதை (*pātai*), the path you already have. A பாதை is walked; a சாலை is driven. The difference is not size so much as what it was made for.

Both end in the same ை, which by now you have read four times.

In the family, and next door

	word
Kannada	ರಸ್ತೆ (*rastē*)
Telugu	రోడ్డు (*rōḍḍu*)
Hindi (neighbour)	सड़क (*saṛak*)
English	a road

The word, taken apart — its roots and family

சாலை (*sālai*) is native Dravidian. DEDR 2471 lists Malayalam *cāl*, "track, furrow". The entry lists *cālai*, "street, road", beside *cāl*, "furrow, track".

What you've built

Four, and the vehicles have somewhere to run.

Your turn

- *Say it: sālai*
- *Say it: pātai*, then *sālai* — and say which one you drive down

- *Read it:* வண்டி
- *Recall:* say *rayil*, then say *sālai*
- *Read it:* செருப்பு
- *Recall:* say *vāṅgu*

Before you move on

What is the difference between a பாதை and a சாலை? (One is **walked**; one is **driven**.)

69.6 நிலையம் (nilaiyam) — a station

Before the new one: what did *sālai* mean, and what did *rayil* mean?

You'll want to know: நிலையம்

நிலையம் (*nilaiyam*) — "a station".

The place where the vehicle stands still.

Inside it is நிலை (*nilai*) — "standing, state" — and you have met that piece before without being told. It is sitting inside வானிலை (*vāṉilai*), the weather, which is literally the sky's *state*. One small piece, two words that could hardly be further apart.

That is worth more than the word itself: Tamil builds long words out of short ones you already own, and from here on you can start looking for the pieces.

In the family, and next door

	word	**same root**
Kannada	ನಿಲ್ದಾಣ (*nildāṇa*)	yes
Telugu	స్టేషన్ (*sṭēṣan*)	
Malayalam	സ്റ്റേഷൻ (*sṟṟēṣan*)	
Hindi (neighbour)	स्टेशन (*sṭeshan*)	
English	a station	

The word, taken apart — its roots and family

நிலையம் (*nilaiyam*) is a modern use of a native word: *nilai*, "standing, place", from *nil*, "to stand" (DEDR 3675). A station is where things stand and stop.

What you've built

Five, and the chapter runs end to end.

Your turn

- *Say it:* *nilaiyam*
- *Say it:* *vāṉilai*, then *nilaiyam*, and name the piece they share
- *Say it:* all five — *vaṇḍi*, *pērundu*, *rayil*, *sālai*, *nilaiyam*
- *Recall:* say *rayil*, then say *sālai*, then say *nilaiyam*
- *Recall:* say *toppi*
- *Read it:* பை

Before you move on

Which piece do வானிலை and நிலையம் share, and what does it mean? (நிலை — "standing, state".)

Chapter 70

The Room You Are In

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can name a table, a bed, a wall, the floor and a roof in Tamil, and place each one against a direction I already know.
>
> *Complete TA-C70-roof and say all five words of the chapter in order.*

70.1 மேசை (mēsai) — a table

Before the new one: what did *nilaiyam* mean?

You'll want to know: மேசை

மேசை (*mēsai*) — "a table".

The table you eat at, or write at.

Put it beside **நாற்காலி** (*nāṟkāli*), the chair you already have — the word you could take apart into "four" and "leg". A **மேசை** and a **நாற்காலி** are the pair a room is furnished with, and now you can name both.

Its two signs are old friends: the **ே** in front of **ம**, and the **ை** at the end.

In the family, and next door

	word	same root
Kannada	**ಮೇಜು** (*mēju*)	yes
Telugu	**టేబుల్** (*ṭēbul*)	
Hindi (neighbour)	**मेज़** (*mez*)	yes
English	a table	

The word, taken apart — its roots and family

மேசை (*mēsai*) is a loan from Portuguese *mesa*, "table".

What you've built

The first thing in the room.

Your turn

- *Say it: mēsai*
- *Say it: nāṟkāli*, then *mēsai* — the pair, in the order you sit down to them
- *Recall:* say *sālai*, then say *nilaiyam*, then say *mēsai*
- *Recall:* say *kaḍai*
- *Read it:* வண்டி

Before you move on

What does மேசை mean? ("A table".)

70.2 கட்டில் (kaṭṭil) — a bed

Before the new one: what did *mēsai* mean?

You'll want to know: கட்டில்

கட்டில் (*kaṭṭil*) — "a bed".

A bed — and in Tamil it is named as a **made thing**: a frame with cords or webbing tied across it.

You already have தூக்கம் (*tūkkam*), sleep. The pair is easy to hold: the தூக்கம் happens on the கட்டில்.

Its middle is the doubled ட்ட you took apart in சட்டை, and it closes on ல் — a letter with the vowel taken off, exactly like the ண் in வண்டி, except that here there is nothing after it to lean on.

In the family, and next door

	word
Kannada	ಮಂಚ (*mañca*)
Telugu	మంచం (*mañcaṁ*)
English	a bed

The word, taken apart — its roots and family

கட்டில் (*kaṭṭil*) is native Dravidian. DEDR 1145 lists Malayalam *kaṭṭil* and Telugu *kaṭli*, "litter". The entry compares Sanskrit *khaṭvā*, "cot" (CDIAL 3781).

What you've built

Two, and you can now name where you sleep.

Your turn

- *Say it: kaṭṭil*
- *Say it: tūkkam*, then *kaṭṭil* — the thing and the place
- *Recall:* say *nilaiyam*, then say *mēsai*, then say *kaṭṭil*
- *Read it:* விலை
- *Recall:* say *pērundu*

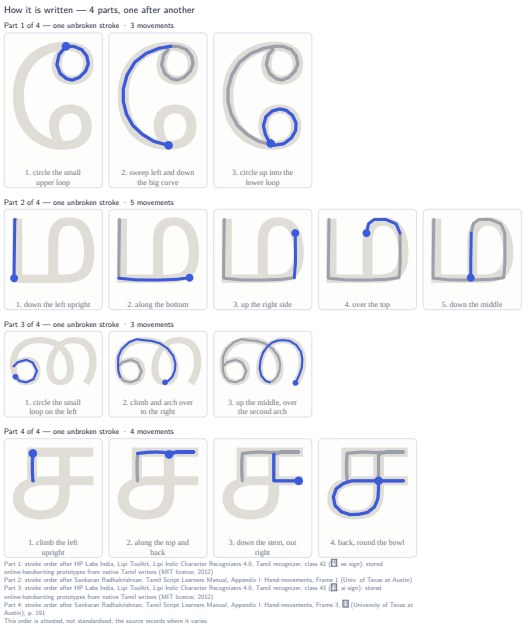

Before you move on

Where does the தூக்கம் happen? (On the கட்டில்.)

70.3 மேசை — two front-hanging signs in one word

Before the page: you can say *mēsai* and *kaṭṭil*. Now read the first one.

Script you'll notice: மேசை — two front-hanging signs in one word

How மேசை *is written, part by part, stroke by stroke*

மேசை is the first word you have read that carries a front-hanging sign on **each** of its two letters.

piece		
மே	*mē*	ம with the ே sign, the one you read twice in மேலே
சை	*sai*	ச with the ை sign, the one you read at the end of சட்டை and கடை

மே · சை → மேசை

Both signs are drawn to the **left** of their letter and said **after** it. So the eye moves left-to-right across four marks while the mouth says only two beats, and the order of the two is not the order they were printed in. Read it slowly once and let that happen on purpose.

Your turn

- *Read it:* மே — then சை — then மேசை
- *Point to:* both signs, and say which side of their letters they sit on
- *Read it:* மேலே, then மேசை, and find the sign they share
- *Recall:* say *mēsai*, then say *kaṭṭil*, then read மேசை

Before you move on

Read மேசை. How many signs does it carry, and are they said before or after their letters? (**Two**; **after**.)

70.4 சுவர் (suvar) — a wall

Before the new one, say what மேசை means. *Read it:* மேசை

You'll want to know: சுவர்

சுவர் (*suvar*) — "a wall".

The wall of a room or a house.

It is short and it is bare — two letters and a closing ர், no vowel signs hanging off the front of anything. Words shaped this plainly are usually old ones, and this is one of them.

It is also the surface that makes உள்ளே and வெளியே mean anything: a சுவர் is what there is an inside and an outside of.

In the family, and next door

	word
Telugu	గోడ (*gōḍa*)
Malayalam	ഭിത്തി (*bhitti*)
Hindi (neighbour)	दीवार (*dīvār*)
English	a wall

The word, taken apart — its roots and family

சுவர் (*suvar*) is native Dravidian. DEDR 1975 lists Malayalam *cuvar* and Kannada *kēr*.

What you've built

Three, and the room has an edge.

Your turn

- *Say it: suvar*
- *Say it: suvar*, then *uḷḷē* and *veḷiyē* — the wall, and its two sides
- *Recall:* say *kaṭṭil*
- *Read it:* மேசை
- *Recall:* say *suvar*
- *Recall:* say *paṇam*
- *Read it:* ரயில்

Before you move on

What does சுவர் mean? ("A wall".)

70.5 தரை (tarai) — the floor

Before the new one: what did *suvar* mean?

You'll want to know: தரை

தரை (*tarai*) — "the floor".

The floor — and also the ground outside. Tamil does not need two words for it; what is under your feet is தரை wherever you are standing.

This is where the கோலம் (*kōlam*) is drawn each morning, just inside the வாசல். Both of those words are already yours, and this is the one that was missing to put them in a place.

It ends in the ை again — the fifth word in three chapters to do so.

The word, taken apart — its roots and family

தரை (*tarai*) is usually traced to Sanskrit *dharā*, "the earth" (CDIAL 6748). DEDR has no native entry for it.

What you've built

Four, and the room has a bottom.

Your turn

- *Say it: tarai*
- *Say it: kōlam*, then *vāsal*, then *tarai* — and say where the design is drawn
- *Read it:* மேசை
- *Recall:* say *suvar*, then say *tarai*
- *Read it:* வாங்கு
- *Recall:* say *sālai*

Before you move on

Where is the கோலம் drawn? (On the தரை.)

70.6 கூரை (kūrai) — a roof

Before the new one: what did *tarai* mean, and what did *suvar* mean?

You'll want to know: கூரை

கூரை (*kūrai*) — "a roof".

The roof over you.

With தரை under your feet and கூரை over your head, the room has both ends — and you already have the two words for the space between them: மேலே and கீழே. Picture the கூரை up above, the தரை down below, and every word in that sentence is one you have been taught.

Its ூ is the long u sign, and it ends, like தரை, in ை.

In the family, and next door

	word	**same root**
Telugu	కప్పు (*kappu*)	
Malayalam	മേൽക്കൂര (*mēlkkūra*)	yes
Hindi (neighbour)	छत (*chat*)	
English	a roof	

The word, taken apart — its roots and family

கூரை (*kūrai*) is native Dravidian. DEDR 1904 lists Malayalam *kūra*, "hut, thatch".

What you've built

Five: a table, a bed, a wall, a floor and a roof.

Your turn

- *Say it:* *kūrai*
- *Say it:* *mēlē*, then *kūrai*; *kīḻē*, then *tarai*
- *Say it:* all five — *mēsai*, *kaṭṭil*, *suvar*, *tarai*, *kūrai*
- *Recall:* say *suvar*, then say *tarai*, then say *kūrai*
- *Recall:* say *pai*
- *Read it:* நிலையம்

Before you move on

Which of the five is மேலே, and which is கீழே? (கூரை; தரை.)

Chapter 71

Through the Day

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can say get up, sleep, run, wash and play in Tamil, and read the letter ஓ.
>
> *Complete TA-C71-play and say all five words of the chapter in order.*

71.1 எழு (eḻu) — to get up, to rise

Before the new one: what did *kūrai* mean?

You'll want to know: எழு

எழு (*eḻu*) — "to get up, to rise".

The first verb of the morning: to get up, off the கட்டில் you named last chapter. It is also what the sun does.

Be careful with it, because you have met these two letters before with one more on the end. எழுது (*eḻudu*) is "to write". எழு is "to rise". The Dravidian etymological dictionary does not connect them: it files them as two separate entries. What matters is that they are two different verbs, they are one letter apart, and swapping them changes what you said.

In the family, and next door

	word	same root
Telugu	లేచు (*lēcu*)	
Malayalam	എഴുന്നേൽക്കുക (*eḻunnēlkkuka*)	yes
Hindi (neighbour)	उठना (*uṭhnā*)	
English	to get up, to rise	

The word, taken apart — its roots and family

எழு (*e̱lu*) is native Dravidian. DEDR 851 lists Malayalam *e̱luka* and Kannada *e̱l*.

What you've built

The first of five things a day is made of.

Your turn

- *Say it:* *e̱lu*
- *Say it:* *e̱lu*, then *e̱ludu* — and say which one is "write"
- *Recall:* say *tarai*, then say *kūrai*, then say *e̱lu*
- *Recall:* say *vaṇḍi*
- *Read it:* மேசை

Before you move on

What does எழு mean, and which longer verb starts the same way? ("To get up"; எழுது.)

71.2 தூங்கு (tūṅgu) — to sleep

Before the new one: what did *e̱lu* mean?

You'll want to know: தூங்கு

தூங்கு (*tūṅgu*) — "to sleep".

The other end of the day — and the verb behind a noun you already own.

தூக்கம் (*tūkkam*) is sleep, the thing. தூங்கு is sleeping, the doing. Tamil makes that pair again and again, and once you can hear it you get two words for the price of one: the noun தூக்கம் sits still, and the verb தூங்கு does something.

Its ங்க is the same nasal-plus-க you say inside வாங்கு.

In the family, and next door

	word
Kannada	ಮಲಗು (*malagu*)
Telugu	నిద్రపో (*nidrapō*)
Malayalam	ഉറങ്ങുക (*uṟaṅṅuka*)
Hindi (neighbour)	सोना (*sonā*)
English	to sleep

The word, taken apart — its roots and family

தூங்கு (*tūṅgu*) is native Dravidian. DEDR 3376 lists Malayalam *tūṅṅuka* and Kannada *tūgu*. The verb first meant "to hang, to droop": sleep is the head drooping.

What you've built

Two verbs, and the day has both ends.

Your turn

- *Say it: tūṅgu*
- *Say it: tūkkam*, then *tūṅgu* — the thing, then the doing
- *Say it: vāṅgu*, then *tūṅgu*, and find the sound they share
- *Recall:* say *kūrai*, then say *e̱lu*, then say *tūṅgu*
- *Read it:* பேருந்து
- *Recall:* say *kaṭṭil*

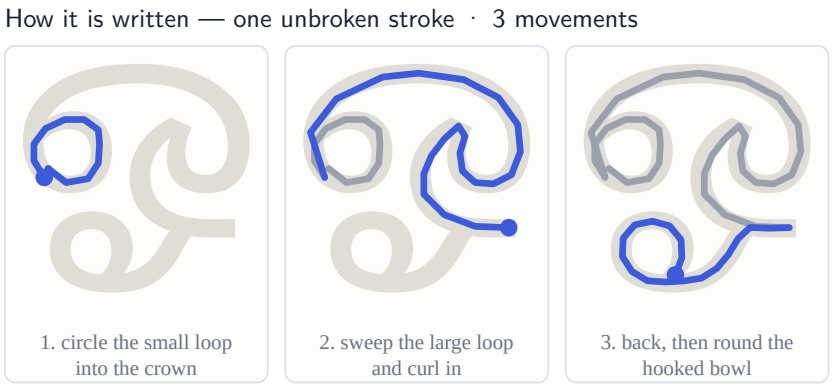

Before you move on

Which is the verb and which is the noun — தூங்கு or தூக்கம்? (தூங்கு is the verb.)

71.3 ஓ — the letter behind a sign you already read

Before the page: before the new shape: which letter did உ turn out to be the free-standing half of?

Script you'll notice: ஓ — the letter behind a sign you already read

Stroke order after Sankaran Radhakrishnan, Tamil Script Learners Manual, Module 15, 🔗, with Appendix I: Hand-movements, Frame 15 (University of Texas at Austin), p. 196
This order is attested, not standardised; the source records where it varies.

How ஓ is written, stroke by stroke

ஓ — *ō*.

You have been reading its **sign**, ோ, for a long time: it is the hook on போ (*pō*), "go", and it is in கோலம் too. This is the other half of the same vowel — the **independent** shape, used when a word *begins* with the sound.

That is the Tamil pattern you already know from உ, met once more. Every vowel has two bodies: a free-standing letter for the front of a word, and a sign for inside one.

The next lesson opens with this letter, which is why it arrives here and not later.

Your turn

- *Look:* at these two, and say which is the letter and which is the sign

  ஓ · ோ

- *Trace it:* ஓ three times, saying *ō* as you finish each one
- *Read it:* போ — and point at the sign of this same vowel inside it
- *Recall:* say *e̱lu*, then say *tūṅgu*, then name the letter ஓ

Before you move on

Which character is this — ஓ? Where does the letter go, and where does the sign ோ go? (**Letter** at the start of a word; **sign** on a consonant inside one.)

71.4 ஓடு (ōḍu) — to run

Before the new one: what did *tūṅgu* mean, and which letter did you meet after it?

You'll want to know: ஓடு

ஓடு (*ōḍu*) — "to run".

"To run" — and the first word in this book that **begins** with the letter you met one lesson ago.

It is not only for people. Water runs, and so does a வண்டி on a சாலை: Tamil uses this same verb for all three, where English would want "flow" for one of them.

Two letters, one sign, and you can read every part of it.

In the family, and next door

	word	same root
Kannada	ಓಡು (*ōḍu*)	yes

The word, taken apart — its roots and family

ஓடு (*ōḍu*) is native Dravidian. DEDR 1041 lists Malayalam *ōṭuka*, Kannada *ōḍu* and Telugu *ōḍu*.

What you've built

Three, and something is moving.

Your turn

- *Say it: ōḍu*

- *Read it:* ஓடு, and point at the letter you learned last lesson
- *Say it:* *ōḍu*, then name two things other than a person that can do it
- *Recall:* say *tūṅgu*, then name the letter ஓ, then say *ōḍu*
- *Recall:* say *rayil*
- *Read it:* சுவர்

Before you move on

Say what ஓடு means. ("To run".) *Read it:* ஓடு

71.5 கழுவு (kaḻuvu) — to wash

Before the new one: what did *ōḍu* mean?

You'll want to know: கழுவு

கழுவு (*kaḻuvu*) — "to wash".

To wash: hands, a கிண்ணம், the தரை.

It carries ழ, the curled glide that Tamil kept and named itself with — the ழ at the end of தமிழ். You have met it inside எழுது and at the front of கீழே, and here it sits between two *u* sounds, which is the hardest place to hear it and the best place to practise it.

In the family, and next door

The word, taken apart — its roots and family

கழுவு (*kaḻuvu*) is native Dravidian. DEDR 1369 lists Malayalam *kaḻukuka* and Telugu *kaḍugu*.

What you've built

Four, and the day has some housework in it.

Your turn

- *Say it: kaḻuvu*
- *Say it: tamiḻ*, then *kaḻuvu* — the same letter, twice
- *Say it: kaḻuvu*, then name one thing in this book you could wash
- *Recall:* name the letter ஓ, then say *ōḍu*, then say *kaḻuvu*
- *Read it:* சாலை
- *Recall:* say *tarai*

Before you move on

Which letter is in the middle of கழுவு, and where else have you met it? (ழ — in தமிழ் and எழுது.)

71.6 விளையாடு (viḷaiyāḍu) — to play

Before the new one: what did *kaḻuvu* mean, and what did *ōḍu* mean?

You'll want to know: விளையாடு

விளையாடு (*viḷaiyāḍu*) — "to play".

The longest word in this chapter, and it is two words welded together.

The back half is ஆடு, which on its own means "to move, to sway, to play". And you already know a completely different ஆடு: the goat, from the animal chapter. Same letters, same sound, two unrelated words — Tamil lets them share the spelling and lets the sentence sort it out.

That is the last thing this chapter teaches, and it is bigger than the word: a long Tamil word usually has a short one you already own hiding at one end of it.

In the family, and next door

	word
Kannada	ಆಡು (*āḍu*)
Malayalam	കളിക്കുക (*kaḷikkuka*)
Hindi (neighbour)	बजाना (*bajānā*)
English	to play

The word, taken apart — its roots and family

விளையாடு (*viḷaiyāḍu*) is native Dravidian. DEDR 5438 lists Malayalam *viḷay-āṭuka*. The second half is *āṭu*, "to move, to dance". DEDR compares, with a query, Sanskrit *vilāsa*, "play".

What you've built

Five verbs — get up, sleep, run, wash, play — and one new letter.

Your turn

- *Say it:* *viḷaiyāḍu*
- *Say it:* *āḍu* on its own, and name the two things it can mean
- *Say it:* all five — *e̱lu*, *tūṅgu*, *ōḍu*, *ka̱luvu*, *viḷaiyāḍu*
- *Recall:* say *ōḍu*, then say *ka̱luvu*, then say *viḷaiyāḍu*
- *Recall:* say *nilaiyam*
- *Read it:* கூரை

Before you move on

What word is hiding at the end of விளையாடு, and what else does it mean? (ஆடு — and it is also the **goat**.)

Chapter 72

How It Feels

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can name anger, fear and sorrow in Tamil, and say to laugh and to cry.
>
> *Complete TA-C72-cry and say all five words of the chapter in order.*

72.1 கோபம் (kōpam) — anger

Before the new one: what did *viḷaiyāḍu* mean?

You'll want to know: கோபம்

கோபம் (*kōpam*) — "anger".

Anger — the ordinary everyday word for it, not a literary one.

You can read all of it already, and one part of it you only just learned: **கோ** is **க** with the **ோ** sign, the sign whose free-standing letter **ஓ** you met last chapter.

It ends in **ம்**, like **வணக்கம்**, **தூக்கம்** and **பணம்** before it. That ending is now four words deep, and it is a good bet for a Tamil noun.

In the family, and next door

	word	same root
Kannada	ಕೋಪ (*kōpa*)	yes
Telugu	కోపం (*kōpaṁ*)	yes
Malayalam	ദേഷ്യം (*dēṣyaṁ*)	
Hindi (neighbour)	गुस्सा (*gussā*)	
English	anger	

The word, taken apart — its roots and family

கோபம் (*kōpam*) is a loan from Sanskrit *kopa*, "anger" (CDIAL 3516).

What you've built

The first of five feelings.

Your turn

- *Say it: kōpam*
- *Read it:* கோபம், and point at the sign of the letter you met last chapter
- *Say it: paṇam*, then *kōpam*, and name the ending they share
- *Recall:* say *kaḻuvu*, then say *viḷaiyāḍu*, then say *kōpam*
- *Recall:* say *mēsai*
- *Read it:* எழு

Before you move on

What does கோபம் mean, and which sign is on its first letter? ("Anger"; the கோ.)

72.2 பயம் (payam) — fear

Before the new one: what did *kōpam* mean?

You'll want to know: பயம்

பயம் (*payam*) — "fear".

Fear.

Three letters and not one vowel sign anywhere: ப, ய, and ம with a புள்ளி. Every letter is carrying its own built-in *a*, which is the plainest a Tamil word can possibly be written.

It ends in the same ம் as கோபம், which is not a coincidence — Tamil keeps a whole shelf of feeling-nouns with that ending.

In the family, and next door

	word	same root
Kannada	ಭಯ (*bhaya*)	yes
Telugu	భయం (*bhayaṁ*)	yes
Malayalam	പേടി (*pēṭi*)	
Hindi (neighbour)	डर (*ḍar*)	
English	fear	

The word, taken apart — its roots and family

பயம் (*payam*) is a loan from Sanskrit *bhaya*, "fear, peril" (CDIAL 9390). Tamil wrote the *bh* as a plain *p*.

What you've built

Two, and both of them end the same way.

Your turn

- *Say it: payam*
- *Say it: kōpam*, then *payam* — and say what both endings have in common
- *Recall:* say *viḷaiyāḍu*, then say *kōpam*, then say *payam*
- *Read it:* கட்டில்
- *Recall:* say *tūṅgu*

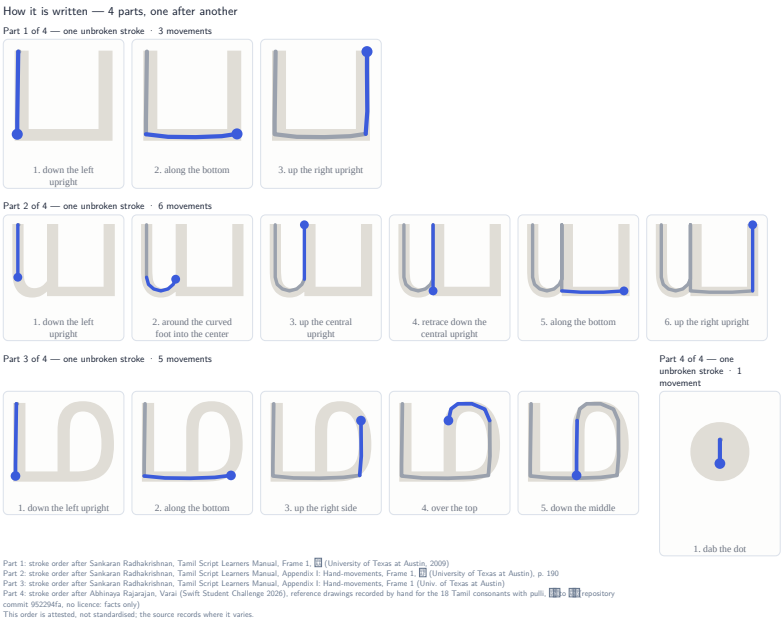

Before you move on

How many vowel signs does பயம் carry? (**None** — every letter keeps its built-in *a*.)

72.3 பயம் — a word with no vowel signs

Before the page: you can say *kōpam* and *payam*. Now read the second one.

Script you'll notice: பயம் — a word with no vowel signs

How பயம் *is written, part by part, stroke by stroke*

Every word you have read so far carried at least one sign. பயம் carries none, and that makes it the clearest possible demonstration of what a bare Tamil letter is worth.

piece		
ப	*pa*	no sign — the letter's own built-in *a* is the vowel
ய	*ya*	the same again
ம்	*m*	ம with a புள்ளி, so no vowel at all

ப · ய · ம் → பயம்

So a Tamil consonant is never really silent by default. It says *a* unless something stops it, and the only thing that stops it is the dot. Read the word once and hear the two *a* sounds you were never told about.

Your turn

- *Read it:* ப — then ய — then ம்
- *Point to:* the one mark in the whole word, and say what it does
- *Read it:* பயம், then கடை, and say which one needed a sign
- *Recall:* say *kōpam*, then say *payam*, then read பயம்

Before you move on

Read பயம். Which vowel do ப and ய carry, and why is none written? (***a*** — it is built into the letter.)

72.4 வருத்தம் (varuttam) — sorrow, regret

Before the new one, say what பயம் means. *Read it:* பயம்

You'll want to know: வருத்தம்

வருத்தம் (*varuttam*) — "sorrow, regret".

One word for both kinds of sorry: sad **about** something, and sorry **for** something.

This is the word that finishes an apology in ordinary speech. You already have தவறு (*tavaṟu*), the mistake, and மன்னிக்கவும் (*maṉṉikkavum*), which asks formally to be forgiven. வருத்தம் sits between them: it names the feeling rather than making the request, and it is the one you can say to a friend without sounding like a letter.

Its middle is a doubled த்த, the same closing-and-leaning you read in சட்டை and வண்டி.

In the family, and next door

	word
Telugu	బాధ (*bādha*)
Hindi (neighbour)	दुख (*dukh*)
English	sorrow, regret

The word, taken apart — its roots and family

வருத்தம் (*varuttam*) is native Dravidian. DEDR 5272 lists Malayalam *varuttam*, "trouble, affliction". It is the noun of *varuntu*,

"to suffer, to grieve".

What you've built

Three feelings, and one of them is an apology.

Your turn

- *Say it: varuttam*
- *Say it: tava_ru*, then *varuttam* — the mistake, then the feeling about it
- *Say it: man_nikkavum*, then *varuttam*, and say which is the formal one
- *Recall:* say *payam*
- *Read it:* பயம்
- *Recall:* say *varuttam*
- *Recall:* say *suvar*
- *Read it:* ஓடு

Before you move on

Which of the two would you say to a friend — மன்னிக்கவும் or வருத்தம்? (வருத்தம்.)

72.5 சிரி (siri) — to laugh

Before the new one: what did *varuttam* mean?

You'll want to know: சிரி

சிரி (*siri*) — "to laugh".

To laugh.

Two letters, both wearing the same ி sign — ச and ர, each with the short *i*. Words that repeat a sign like that are easy to read and easy to say, and this is a good one to read aloud before you meet its opposite.

After three nouns, this is a verb: something a person **does**, not something they have.

In the family, and next door

	word
Malayalam	ചിരിക്കുക (*cirikkuka*)
Hindi (neighbour)	हँसना (*hãsnā*)
English	to laugh

The word, taken apart — its roots and family

சிரி (*siri*) is native Dravidian. DEDR 1562 lists Malayalam *cirikka* and Kannada *kiri*, "to grin".

What you've built

Four, and the feelings start doing something.

Your turn

- *Say it: siri*
- *Read it:* சிரி, and point at the sign that appears twice
- *Say it: kōpam*, then *siri* — and say which one is a verb
- *Read it:* பயம்
- *Recall:* say *varuttam*, then say *siri*
- *Read it:* தரை
- *Recall:* say *kaluvu*

Before you move on

What does சிரி mean, and which sign does it carry twice? ("To laugh"; the ◌ி.)

72.6 அழு (a̲lu) — to cry

Before the new one: what did *siri* mean, and what did *payam* mean?

You'll want to know: அழு

அழு (*a̲lu*) — "to cry".

To cry — the mirror of the verb before it, and just as short.

It opens on அ, the free-standing letter, because the word begins with that vowel: the same pattern you saw when ஓ opened ஓடு. And in the middle is ழ again, the third time you have met it after தமிழ் and கழுவு.

Five feelings now: three you can have — கோபம், பயம், வருத்தம் — and two you can do, சிரி and அழு.

In the family, and next door

	word	same root
Kannada	ಅಳು (*aḷu*)	yes
Telugu	ఏడ్చు (*ēḍcu*)	
Malayalam	കരയുക (*karayuka*)	
Hindi (neighbour)	रोना (*ronā*)	
English	to cry	

The word, taken apart — its roots and family

அழு (*a̲lu*) is native Dravidian. DEDR 282 lists Malayalam *a̲luka* and Kannada *a̲l*.

What you've built

Five: three nouns and two verbs.

Your turn

- *Say it:* *a̲lu*
- *Say it:* *siri*, then *a̲lu* — the pair, one after the other
- *Say it:* all five — *kōpam*, *payam*, *varuttam*, *siri*, *a̲lu*
- *Recall:* say *varuttam*, then say *siri*, then say *a̲lu*
- *Recall:* say *kūrai*
- *Read it:* விளையாடு

Before you move on

Which three of the five are things you **have**, and which two are things you **do**? (**கோபம்**, **பயம்**, **வருத்தம்**; **சிரி**, **அழு**.)

Chapter 73

Today, Yesterday, and the Year

Modes: **voice** (5) **pen** (1) **Hands-free start:** the first 2 of 6 lessons.

> ***By the end of this chapter:*** I can say today, yesterday and before in Tamil, and name a month and a year.
>
> *Complete TA-C73-year and say all five words of the chapter in order.*

73.1 இன்று (in̲ṟu) — today

Before the new one: what did *a̲lu* mean?

You'll want to know: இன்று

இன்று (*in̲ṟu*) — "today".

"Today".

You already have நாள் (*nāḷ*), the day itself, and நாளை (*nāḷai*), tomorrow. இன்று is the day you are standing in, and it completes the middle of that little set.

This is the careful, written form, and it is the one printed on a page. In fast speech you will also hear இன்னைக்கு (*in̲n̲aikku*) for the same thing — worth recognising, but இன்று is the one to say.

In the family, and next door

	word	same root
Kannada	ಇವತ್ತು (*ivattu*)	
Telugu	ఇవాళ (*ivāḷa*)	
Malayalam	ഇന്ന് (*innŭ*)	yes
Hindi (neighbour)	आज (*āj*)	
English	today	

The word, taken apart — its roots and family

இன்று (*in̲ru*) is native Dravidian. DEDR 410 lists Malayalam *innu*. It is the near base *i-*: "this day".

What you've built

The day you are standing in.

Your turn

- *Say it:* *in̲ru*
- *Say it:* *nāḷ*, then *in̲ru*, then *nāḷai*
- *Recall:* say *siri*, then say *a̲lu*, then say *in̲ru*
- *Recall:* say *e̲lu*
- *Read it:* கோபம்

Before you move on

What does இன்று mean, and which word already gave you "tomorrow"? ("Today"; நாளை.)

73.2 நேற்று (nēr̲r̲u) — yesterday

Before the new one: what did *in̲ru* mean?

You'll want to know: நேற்று

நேற்று (*nēr̲r̲u*) — "yesterday".

"Yesterday" — the third corner of the same triangle: நேற்று, இன்று, நாளை.

The middle is a doubled ற்ற, the hard r held long, and it is the sound that most often catches a new speaker out. Say it slowly: the first ற has a புள்ளி and no vowel, so it leans straight onto the second.

With three words you can now place any day against the one you are in.

In the family, and next door

	word
Telugu	నిన్న (*ninna*)
Malayalam	ഇന്നലെ (*innale*)
English	yesterday

The word, taken apart — its roots and family

நேற்று (*nēṟṟu*) is native. DEDR 3758 gives the older Tamil forms *nerunal* and *nerunaṟṟu*, "yesterday", with Kannada *ninne* and Telugu *ninna*. Modern *nēṟṟu* is most likely the shortened form.

What you've built

Two, and the days on either side of today are named.

Your turn

- *Say it:* *nēṟṟu*
- *Say it:* *nēṟṟu*, *iṉṟu*, *nāḷai* — the three, in order
- *Say it:* *nēṟṟu* once more, holding the doubled ற
- *Recall:* say *alu*, then say *iṉṟu*, then say *nēṟṟu*
- *Read it:* தூங்கு
- *Recall:* say *payam*

Before you move on

Say the three days in order, starting with yesterday. (நேற்று, இன்று, நாளை.)

73.3 இன்று — a word that opens on a vowel

Before the page: you can say *iṉṟu* and *nēṟṟu*. Now read the first one.

Script you'll notice: இன்று — a word that opens on a vowel

இன்று puts together two things you have read separately: a word that **begins** with an independent vowel, and a புள்ளி making one consonant lean on the next.

piece		
இ	*i*	the free-standing letter, because the word opens on the vowel
ன்	*n̲*	ன with a புள்ளி — no vowel of its own
று	*r̲u*	ற with the ு sign

இ · ன் · று → இன்று

This is why the letters ஓ and உ were taught on their own. A vowel at the **front** of a word cannot be a sign — there is nothing for it to sit on — so Tamil keeps a separate shape for exactly this job, and இன்று is that shape doing it.

Your turn

- *Read it:* இ — then ன் — then று
- *Point to:* the letter that could only ever be a free-standing one, and say why
- *Read it:* இன்று, then ஓடு — two words that open on a vowel
- *Recall:* say *in̲r̲u*, then say *nēr̲r̲u*, then read இன்று

Before you move on

Read இன்று. Why is the first shape a letter and not a sign? (Because the word **begins** with the vowel, so there is no consonant for a sign to sit on.)

73.4 முன்பு (mun̲bu) — before, earlier

Before the new one, say what இன்று means. *Read it:* இன்று

You'll want to know: முன்பு

முன்பு (*mu̲nbu*) — "before, earlier".

"Before" — the general one, for anything earlier than the moment you are standing in.

You already have பிறகு (*pi̲raku*), "afterwards". முன்பு is its opposite, and between them the two put events in order without your needing a single verb tense to do it.

The ன் in its middle is closed by a புள்ளி and leans on the ப after it — the same joint you read a moment ago inside இன்று.

In the family, and next door

	word	same root
Telugu	ముందు (*mundu*)	yes
Malayalam	മുൻപ് (*munpŭ*)	yes
English	before, earlier	

The word, taken apart — its roots and family

முன்பு (*mu̲nbu*) is native Dravidian. DEDR 5020 lists Malayalam *mun*, Kannada *mun* and Telugu *muni*, "first, former".

What you've built

Before and after, and a day on each side of today.

Your turn

- *Say it:* *mu̲nbu*
- *Say it:* *pi̲raku*, then *mu̲nbu* — the two directions in time
- *Say it:* *nēr̲r̲u*, then *mu̲nbu* — one is a day, one is any earlier moment
- *Recall:* say *nēr̲r̲u*
- *Read it:* இன்று
- *Recall:* say *mu̲nbu*
- *Recall:* say *ōḍu*
- *Read it:* வருத்தம்

Before you move on

Which word is the opposite of பிறகு? (முன்பு.)

73.5 மாதம் (mādam) — a month

Before the new one: what did *muṉbu* mean?

You'll want to know: மாதம்

மாதம் (*mādam*) — "a month".

A month.

You already know twelve of them by name — the Tamil months you met in their own chapter. This is the word for the unit itself, the one you need to say "one month" rather than to name a particular one.

And another ம் ending — like கோபம், பயம் and பணம் before it — on a word whose middle vowel is the long ◌ா.

In the family, and next door

	word	same root
Malayalam	മാസം (*māsaṁ*)	yes
English	a month	

The word, taken apart — its roots and family

மாதம் (*mādam*) is a loan from Sanskrit *māsa*, "moon, month" (CDIAL 10104). Tamil wrote the *s* as *t*.

What you've built

Above the day: the month.

Your turn

- *Say it: mādam*
- *Say it: nāḷ*, then *mādam* — smaller, then bigger
- *Read it:* இன்று
- *Recall:* say *muṉbu*, then say *mādam*

- *Read it:* கழுவு
- *Recall:* say *siri*

Before you move on

What does மாதம் mean? (“A month”.)

73.6 ஆண்டு (āṇḍu) — a year

Before the new one: what did *mādam* mean, and what did *muṉbu* mean?

You’ll want to know: ஆண்டு

ஆண்டு (*āṇḍu*) — “a year”.

A year — and it is the unit hiding inside a question you can already ask.

When you ask about someone’s வயது (*vayathu*), their age, what is being counted is ஆண்டு. The question was yours a long time ago; this is the word for what the answer is made of.

It opens on the free-standing ஆ, because the word begins with that vowel — the same reason இன்று opens on இ. In the middle is the ண்ட you first read in வண்டி.

Three sizes now, each holding the one before it: நாள், மாதம், ஆண்டு.

In the family, and next door

	word
Telugu	సంవత్సరం (*saṁvatsaraṁ*)
Malayalam	വർഷം (*varṣaṁ*)
English	a year

The word, taken apart — its roots and family

ஆண்டு (*āṇḍu*) is native Dravidian. DEDR 5153 lists Malayalam *āṇṭu* and Kannada *ēḍu*.

What you’ve built

Five: today, yesterday, and the three units above the day.

Your turn

- *Say it:* *āṇḍu*
- *Say it:* *vayathu*, then *āṇḍu* — the question, and what the answer counts
- *Say it:* the three sizes in order — *nāḷ*, *mādam*, *āṇḍu*
- *Recall:* say *muṉbu*, then say *mādam*, then say *āṇḍu*
- *Recall:* say *viḷaiyāḍu*
- *Read it:* அழு

Before you move on

What is counted when someone answers about their வயது? (ஆண்டு — years.)

Chapter 74

And, and Also

Modes: 🚗 **voice** (3) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 4 lessons.

> ***By the end of this chapter:*** I can join two things with -um, say that one more thing applies too, and deny both at once.
>
> *Complete TA-C74-neither and say a two-item list, then the same list denied.*

74.1 -உம் ... -உம் — how Tamil says "and"

Before the new one: what did *mādam* mean, and what did *āṇḍu* mean?

Grammar lens: no word goes between them

-உம் ... -உம் (*-um … -um*) — "both … and".
English drops a word *between* two things. Tamil puts an ending on **each** of them and leaves the space between them empty.
பால் (*pāl*) is milk. தேநீர் (*tēnīr*) is tea. Milk and tea:

பாலும் தேநீரும் — *pālum tēnīrum*

Both words are still there, in the same order, and nothing new sits between them. Each one has grown a tail instead.
The tail is always **-உம்**, and it lands on every item in the list — the last one included. Two things, two tails.

you have	you say
பால், தேநீர்	பாலும் தேநீரும்
மேசை, கட்டில்	மேசையும் கட்டிலும்

மேசை ends in a vowel, so a light ய் slides in before the ending: மேசையும்.

What you've built

The first thing so far that joins two words you already had.

Your turn

- *Say it: pālum tēnīrum*
- *Say it: mēsaiyum kaṭṭilum*
- *Count:* how many tails a list of two carries
- *Recall:* say *mādam*, then say *āṇḍu*, then join the two — *mādamum āṇḍum*
- *Return to:* say *nēṟṟu*, *kuṭai* and *tarai* — three distances back — then join two of them with -உம்

Before you move on

Where does Tamil keep its "and"? (**On the end of every item, as -உம் — never between them.**)

74.2 -உம் on its own — "also", "too"

Say milk and tea in Tamil. How many -உம் endings did that take?

Grammar lens: one tail, not two

Put -உம் on two words and you have joined them. Put it on **one** word and it means something else: *that one too.*
நான் (*nāṉ*) is "I". நான் with the tail:

நானும் — *nāṉum* — "me too"

Somebody says they are going. You say நானும் and you are going with them. One word, one ending, a whole reply.
The same tail on the things around you:

word	with -உம்	it means
நீங்கள்	நீங்களும்	you too
இது	இதுவும்	this one too

இது ends in a vowel, so வ் slides in the way ய் did after மேசை. This is one of the most-used endings in the language, and you have now met both of its jobs.

What you've built

One ending, two jobs: on two words it joins, on one word it adds.

Your turn

- *Say it: nāṉum*
- *Say it: nīṅgaḷum*, then *iduvum*
- *Contrast: pālum tēnīrum* against *pālum* alone — two tails join, one tail adds
- *Recall:* say *āṇḍu*, then say *pālum tēnīrum*, then say *nāṉum*
- *Read it:* இன்று
- *Return to:* say *tuṭaippam* and say *kūrai* — three distances back — then join two of them with -உம்

Before you move on

Someone says they are leaving and you are leaving too. One word. (நானும்.)

74.3 பாலும் — an ending you can now see

Before the page: say *pālum tēnīrum*, then say *nāṉum*.

Script you'll notice: பாலும் — where the tail begins

You have read பால் already. Adding the joining ending changes one thing on the page, and it is worth seeing exactly where.

piece		
பா	*pā*	ப with the long-ா sign
லு	*lu*	ல with the ு sign
ம்	*m*	ம with a புள்ளி

பா · லு · ம் → பாலும்

Look at what happened to the middle. In பால் the ல carried a புள்ளி and had no vowel of its own. The ending brings a உ, the ல takes it, and the புள்ளி moves along to the ம் that arrived with it.

Nothing was inserted between two words. The seam is inside the word.

The same seam in தேநீரும்: ர picks up ு, and ம் closes the word.

Your turn

- *Read it:* பா — then லு — then ம்
- *Read it:* பாலும் தேநீரும்
- *Point to:* the letter that lost its புள்ளி, and say where the புள்ளி went
- *Recall:* say *pālum tēnīrum*, then say *nāṉum*, then read பாலும்
- *Return to:* say *muṉbu*, *sīppu* and *eṉlu* — three distances back — then join two of them with -உம்

Before you move on

Read பாலும். Which letter changed when the ending arrived? (ல — **it took the உ the ending brought.**)

74.4 -உம் ... -உம் இல்லை — neither one nor the other

Say *nāṉum*. *Read it:* பாலும் aloud

Grammar lens: the list stays, the end changes

English swaps the whole join to say the opposite: *both … and* becomes *neither … nor*. Tamil keeps the join it already has and puts இல்லை after it.

> பாலும் தேநீரும் இல்லை — *pālum tēnīrum illai* — "neither milk nor tea"

இல்லை is the very first word of chapter one, the one that means *no, there isn't*. It has been waiting for a list to stand at the end of.
Say the shop has neither:

you say	it means
பாலும் தேநீரும்	milk and tea
பாலும் தேநீரும் இல்லை	neither milk nor tea

One word longer, and the meaning has turned over. Nothing inside the list moved.

What you've built

Four things in this chapter and only one ending: joining, adding, reading the seam, denying the lot.

Your turn

- *Say it: pālum tēnīrum illai*
- *Say it: mēsaiyum kaṭṭilum illai*
- *Turn:* say the list, then say it again with இல்லை on the end
- *Recall:* say *nāṉum*
- *Read it:* பாலும்
- *Recall:* say *pālum tēnīrum illai*
- *Return to:* say *mādam*, *pasi* and *tūṅgu* — three distances back — then join two of them with -உம்

Before you move on

The shop has neither milk nor tea. Say it. (பாலும் தேநீரும் இல்லை.)

Chapter 75

Yes or No

Modes: **voice** (3) **pen** (1) **Hands-free start:** the first 2 of 4 lessons.

> ***By the end of this chapter:*** I can turn any sentence I know into a yes-or-no question, answer one, and ask permission.
>
> *Complete TA-C75-permission and ask to be let in, then grant the same request.*

75.1 -ஆ — the question you can build yourself

Read it: பாலும்

Then say: neither milk nor tea.

Grammar lens: one letter on the end

Every question you have been given so far came ready-made: எப்படி, என்ன, யார், எங்கே, எவ்வளவு. Each one asks about a thing you name in advance.
-ஆ (*-ā*) asks about the whole sentence, and it is yours to attach to anything.
Take a statement. Put **-ஆ** on its last word. It is now a question that wants *yes* or *no*.

statement	question
நீங்கள் நலம் — you are well	நீங்கள் நலமா? — are you well?
இது பால் — this is milk	இது பாலா? — is this milk?
சரி — okay	சரியா? — okay?

Word order does not move. Nothing is added at the front. The ending goes on the **last** word, and the last word is the one being asked about.

What you've built

Every sentence you already own can now be a question.

Your turn

- *Say it: sariyā?*
- *Say it: nīṅgaḷ nalamā?*
- *Turn:* say *idu pāl*, then ask *idu pālā?*
- *Read it:* பாலும்
- *Recall:* say *pālum tēnīrum illai*, then ask *sariyā?*
- *Return to:* say *āṇḍu* and say *tākam* — three distances back
- *Read it:* ஓ
- *Return to:* ask about one of them with -ஆ

Before you move on

Which word in the sentence carries **-ஆ**? (**The last one — and that is the word the question is about.**)

75.2 ஆம், இல்லை — and the answer Tamil likes better

Ask, in Tamil: is this milk? Then say: neither milk nor tea.

Grammar lens: two answers, and a third

You have had ஆம் and இல்லை since chapter one. Now there is something to answer.

இது பாலா? — *idu pālā?*

ஆம். / இல்லை.

Both work, and both are correct. But listen to how Tamil speakers actually reply, because they often reach for neither: they **repeat the word that was asked about**.

இது பாலா? — பால்.

சரியா? — சரி.

The echo is the everyday answer. ஆம் is a shade more formal, and it is the one to use when the question was long and you want to be plain. இல்லை has no echo version. To deny, you say இல்லை.

What you've built

You can ask a yes-or-no question and answer one, in the two shapes a speaker will hear.

Your turn

- *Answer: idu pālā?* — with the echo
- *Answer: idu pālā?* — with இல்லை
- *Ask and answer: sariyā?* — then *sari*
- *Recall:* say *pālum tēnīrum illai*, then ask *nīṅgaḷ nalamā?*, then answer *nalam*
- *Return to:* say *-um … -um*, *tūkkam* and *ōḍu* — three distances back — then ask about one of them with -ஆ

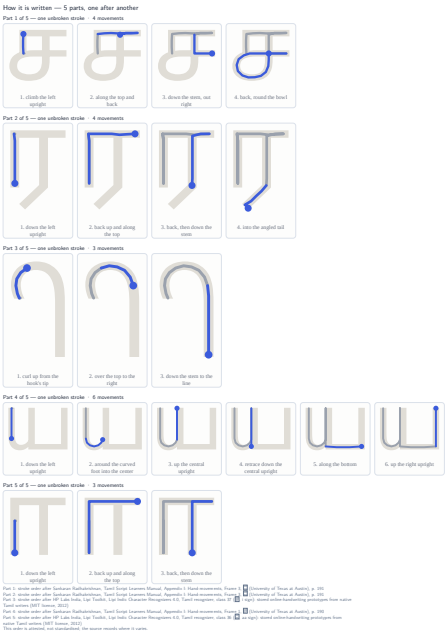

Before you move on

Somebody asks **சரியா?** and you agree. What is the everyday reply? (**சரி** — the echo, not **ஆம்**.)

75.3 சரியா — a question you can see

Before the page: ask *sariyā?*, then give the echo answer.

Script you'll notice: சரியா — the ending is a sign, not a letter

How **சரியா** *is written, part by part, stroke by stroke*

சரி was the third word in this book, and you wrote it in chapter nineteen. The question ending adds one shape to it.

piece		
ச	*ca*	the letter for a whole family of sounds
ரி	*ri*	ர with the ி sign
யா	*yā*	ய with the long ா sign

ச · ரி · யா → சரியா

A ய appeared that was not in சரி. That is the same slide you saw in மேசையும்: சரி ends in a vowel, so a light ய் carries the ending on.

And the ending itself is the sign ா, sitting after ய the way it sits after ப in பா. A question mark closes the line on the page, but the question is already in that sign.

Your turn

- *Read it:* ச — then ரி — then யா
- *Read it:* சரி, then சரியா — a statement, then a question
- *Point to:* the shape that does the asking
- *Recall:* ask *sariyā?*, then answer *sari*, then read சரியா
- *Return to:* say *-um*, *kāyccal* and *kaḻuvu* — three distances back — then ask about one of them with -ஆ

Before you move on

Read சரியா. Which single shape turned it into a question? (**The long ா on the end.**)

75.4 நான் உள்ளே வரலாமா? — may I come in?

Read it: சரியா, then answer it

You'll want to know: வரலாமா?

நான் உள்ளே வரலாமா? (*nāṉ uḷḷē varalāmā?*) — "may I come in?"

Three pieces you have, and one you half-have. **நான்** is "I". **உள்ளே** is "inside", from the six directions. **வா** is "come".

The half-known piece is **-லாம்**. It has been in your goodbye since chapter four: **நாளை பார்க்கலாம்** — "we may see each other tomorrow". On a verb, **-லாம்** means *it is allowed*.

வா becomes **வரலாம்** — "may come". Then chapter seventy-five's ending arrives:

வரலாம் → வரலாமா? — "may I come?"

Permission is a yes-or-no question, so it takes the yes-or-no ending. Nothing new to learn about the asking.

To grant it, you have both answers already:

ஆம், வரலாம். or, at a doorway, plainly: **சரி.**

The word, taken apart — its roots and family

நான் உள்ளே வரலாமா? (*nāṉ uḷḷē varalāmā?*) is all native: *nāṉ*, "I" (DEDR 5160), *uḷḷē*, "inside" (DEDR 698), and *varu*, "to come" (DEDR 5270), with the ending that asks "may I?".

What you've built

A doorway you can stand in and be let through.

Your turn

- *Say it:* *nāṉ uḷḷē varalāmā?*
- *Grant:* *ām, varalām*
- *Grant again:* *sari*
- *Recall:* answer *sariyā?*
- *Read it:* **சரியா**
- *Recall:* ask *varalāmā?*
- *Read it:* **பாலும்**

- *Return to:* say *vali* and say *viḷaiyāḍu* — three distances back — then ask about one of them with -ஆ

Before you move on

You are at a door and want to be let in. Say it. (நான் உள்ளே வரலாமா?)

Chapter 76

But, and Or

Modes: **voice** (2) **eyes** (1) **pen** (1) **Hands-free start:** the first of 4 lessons.

> ***By the end of this chapter:*** I can set one statement against another, offer a choice between two, and take the answer.
>
> *Complete TA-C76-choice and offer two drinks, in the long form and the short one.*

76.1 ஆனால் (āṉāl) — but

> *Read it:* சரியா
>
> Then ask to be let inside.

You'll want to know: ஆனால்

ஆனால் (*āṉāl*) — "but".

Chapter seventy-four joined two **things**. This joins two **statements**, and unlike **-உம்** it is a word of its own, standing between them.

> **தேநீர் வேண்டும், ஆனால் பால் வேண்டாம்.**
>
> *tēnīr vēṇḍum, āṉāl pāl vēṇḍām.*
>
> "I want tea, but I don't want milk."

Both halves are sentences you could already say. ஆனால் sets the second against the first.

The word is built out of ஆகு, "to become": ஆனால் began as "if that is so". A sentence that starts by granting the first half and then turns is exactly what *but* does.

In everyday speech the tail wears down and you will hear ஆனா. It is the same word.

In the family, and next door

	word	same root
Kannada	ಆದರೆ (*ādare*)	yes
Telugu	కానీ (*kānī*)	
Malayalam	എന്നാൽ (*ennāl*)	
Hindi (neighbour)	लेकिन (*lekin*)	
English	but	

The word, taken apart — its roots and family

ஆனால் (*āṉāl*) is native: a form of *ā*, "to become, to be" (DEDR 333), meaning "if it is so". "But" grew out of "be that as it may".

What you've built

Two sentences held together, with the second one pushing back.

Your turn

- *Say it: āṉāl*
- *Say it: tēnīr vēṇḍum, āṉāl pāl vēṇḍām*
- *Build: idu nalla vīḍu, āṉāl siṟiya vīḍu*
- *Read it:* சரியா
- *Recall:* ask *varalāmā?*, then say *āṉāl*
- *Return to:* say *-um … -um illai*, *maṭṭum* and *kōpam* — three distances back — then set two of them against each other with ஆனால்
- *Recall:* say *iṉṟu*
- *Read it:* நேற்று

- *Recall:* say *muṉbu*

Before you move on

What sits between the two halves, and what does the second half do? (ஆனால் — **and the second half turns against the first.**)

76.2 அல்லது (alladu) — or

Ask to be let inside. Then say *but* in Tamil.

You'll want to know: அல்லது

அல்லது (*alladu*) — "or".

Like ஆனால், it is a word of its own and it stands between the two things it offers.

> பால் அல்லது தேநீர்.
>
> *pāl alladu tēnīr.*
>
> "Milk or tea."

Look at the shape of the word. அது is "that one", which you have had since chapter forty; அல்ல is a denial. அல்லது is "it is not that" — and a list that says *this, or if not that* is an offer of a choice.

So Tamil's *and* is an ending, and Tamil's *or* is a small denial. Neither one is the word English would have led you to expect.

It works on two statements as well as two things:

> நீங்கள் வரலாம், அல்லது நான் வருகிறேன்.
>
> "You may come, or I will come."

In the family, and next door

	word
Kannada	ಅಥವಾ (*athavā*)
Telugu	లేదా (*lēdā*)
Hindi (neighbour)	… या … (… *yā* …)
English	or

The word, taken apart — its roots and family

அல்லது (*alladu*) is native: "if it is not that". It is built on *al-*, the native verb of not-being (DEDR 234), which lists *allatu*, "or else".

What you've built

Two joins in two lessons: one that sets things against each other, one that offers a choice.

Your turn

- *Say it: alladu*
- *Say it: pāl alladu tēnīr*
- *Contrast: pālum tēnīrum* against *pāl alladu tēnīr* — both, then either
- *Recall:* ask *varalāmā?*, then say *āṉāl*, then say *alladu*
- *Return to:* say *-ā*, *iṉṉum* and *payam* — three distances back — then offer two of them with அல்லது
- *Recall:* read மாதம், then say *āṇḍu*

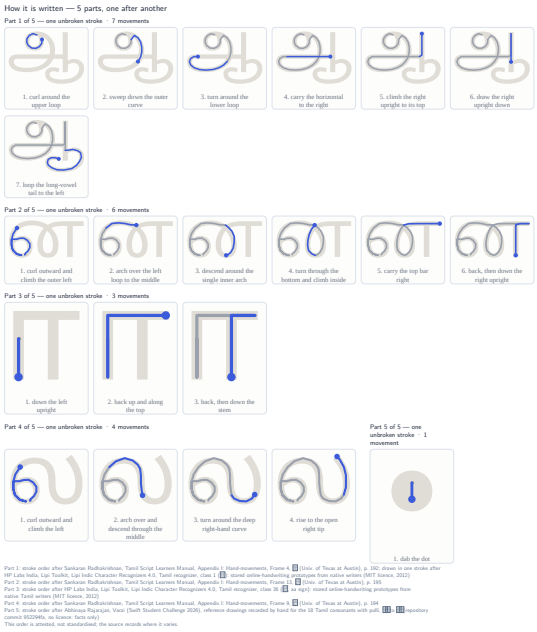

Before you move on

Offer somebody milk or tea. (பால் அல்லது தேநீர்.)

76.3 ஆனால் — three shapes, all of them old

Before the page: say *but*, then say *or*.

Script you'll notice: ஆனால் — the same long sound, written two ways

How ஆனால் *is written, part by part, stroke by stroke*

Read it in three pieces.

piece		
ஆ	*ā*	the free-standing long vowel, because the word opens on it
னா	*n̄ā*	ன with the long ◌ா sign
ல்	*l*	ல with a புள்ளி, so it carries no vowel

ஆ · னா · ல் → ஆனால்

One word, and the long *ā* appears twice in it — first as a whole letter, then as a sign. That is the rule from இன்று and ஆம் shown twice inside a single word: at the front of a word a vowel needs its own shape, and anywhere after a consonant it becomes a mark.

The word ends on a புள்ளி, and that closing ல் is the piece everyday speech drops when it says ஆனா.

Your turn

- *Read it:* ஆ — then னா — then ல்
- *Read it:* ஆனால்
- *Point to:* the two places the long ā is written, and say why they differ
- *Recall:* say *āṉāl*, then say *alladu*, then read ஆனால்
- *Return to:* say *ām / illai*, say *sīkkiram* and read பயம் — three distances back — then offer two of them with அல்லது

Before you move on

Why is the first ā a letter and the second a sign? (**Because the word begins with the first one, and the second sits on ன.**)

76.4 பால் வேண்டுமா, அல்லது தேநீர் வேண்டுமா? — offering a choice

Read it: ஆனால்

Then say *or*.

You'll want to know: two questions, one offer

பால் வேண்டுமா, அல்லது தேநீர் வேண்டுமா? *pāl vēṇḍumā, alladu tēnīr vēṇḍumā?* — "Would you like milk, or would you like tea?"

Every piece is yours. வேண்டும் is "want", from chapter thirty-nine. The **-ஆ** on the end of each half is last chapter's question ending. அல்லது sits between them.

Notice what Tamil does not do: it does not ask one question with two answers in it. It asks **two whole questions** and puts *or* between them. Each half could stand alone.

The shorter form drops the second verb, and a host at a doorway will say it that way:

பால் அல்லது தேநீர்?

Answer it with the echo you learned for any yes-or-no question — name the one you want:

தேநீர்.

The word, taken apart — its roots and family

பால் வேண்டுமா, அல்லது தேநீர் வேண்டுமா? (*pāl vēṇḍumā, alladu tēnīr vēṇḍumā?*) is built from words met before, all native except one: *pāl*, "milk", *vēṇḍum*, "is wanted" (DEDR 5528), and *alladu*, "or" (DEDR 234). The one loan is *tēnīr*: *tē*, the travelling word for tea, on native *nīr*, "water".

What you've built

You can put a choice in front of somebody and take their answer.

Your turn

- *Offer:* *pāl vēṇḍumā, alladu tēnīr vēṇḍumā?*
- *Offer short:* *pāl alladu tēnīr?*
- *Answer:* name one of them
- *Recall:* say *alladu*
- *Read it:* ஆனால்
- *Recall:* make the full offer
- *Read it:* சரியா
- *Return to:* say *uṭaṉē* and say *varuttam* — three distances back — then offer two of them with அல்லது

Before you move on

How many questions does Tamil ask when it offers two things? (**Two — one for each, with அல்லது between.**)

Chapter 77

Saying, and Thinking

Modes: 🚗 **voice** (3) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 4 lessons.

> ***By the end of this chapter:*** I can report what was said and give an opinion, by putting a whole sentence inside another.
>
> *Complete TA-C77-opinion and give an opinion about two different things.*

77.1 சொல் (sol) — to say, to tell

Read it: ஆனால்

Then offer somebody milk or tea.

You'll want to know: சொல்

சொல் (*sol*) — "to say, to tell".

You have been using this verb since chapter eight without being told its name. சொல்லுங்கள் — "please tell me" — is சொல் with the respectful ending you met in the same chapter.

Now it stands on its own, the way போ and வா and சாப்பிடு do.

> சொல் — say it
>
> சொல்லுங்கள் — please say it

சொல் also means *a word*. The same three letters name the thing and the act, and no Tamil speaker finds that odd: a word is what saying produces.

You will need this verb for the next lesson, because Tamil has a particular way of handing somebody else's words to it.

In the family, and next door

	word
Kannada	ಹೇಳು (*hēḷu*)
Malayalam	പറയുക (*paṟayuka*)
English	to say, to tell

The word, taken apart — its roots and family

சொல் (*sol*) is native Dravidian. DEDR 2855 lists Malayalam *colluka* and Kannada *sol*.

What you've built

A verb you have been saying since chapter eight, now yours to use.

Your turn

- *Say it: sol*
- *Say it: sol*, then *solluṅgaḷ* — the bare verb, then the polite one
- *Notice:* the second meaning, *a word*
- *Read it:* ஆனால்
- *Recall:* offer *pāl alladu tēnīr?*, then say *sol*
- *Return to:* say *nāṉ uḷḷē varalāmā?*, *mutalil* and *siri* — three distances back — then quote one of them with என்று

Before you move on

Which word you already knew is this verb wearing a polite ending? (சொல்லுங்கள்.)

77.2 என்று (enṟu) — the end of a quotation

Offer somebody a choice of two drinks. Then say the verb *to say*.

Grammar lens: the quotation carries its own closing word

English opens a quotation with *that* or with a comma. Tamil closes it, with என்று.

> “சரி” என்று சொல்லுங்கள்.
>
> *“sari” en̲r̲u solluṅgaḷ.* — ’Say “okay”.’

The words being reported come first, whole and unchanged. என்று then marks where they end, and the verb of saying comes last, where every Tamil verb goes.

> “பால் வேண்டும்” என்று சொல்லுங்கள்.
>
> ’Say “I want milk”.’

என்று is itself made from an old verb meaning *to say*, so what you are doing is saying that something was said. Two sayings, one sentence — and that is why nothing needs to be added at the front.
Everyday speech shortens it to -ன்னு, stuck straight onto the quotation: *sari-n̲n̲u solluṅgaḷ*. You will hear that far more often than the full word.

What you’ve built

A way to put a whole sentence inside another one.

Your turn

- *Say it: en̲r̲u*
- *Say it: “sari” en̲r̲u solluṅgaḷ*
- *Build: “pāl vēṇḍum” en̲r̲u solluṅgaḷ*
- *Recall:* offer *pāl alladu tēnīr?*, then say *sol*, then say the whole quoted line
- *Return to:* say *ān̲āl*, *vēṇḍukōḷ* and *a̲lu* — three distances back — then quote one of them with என்று

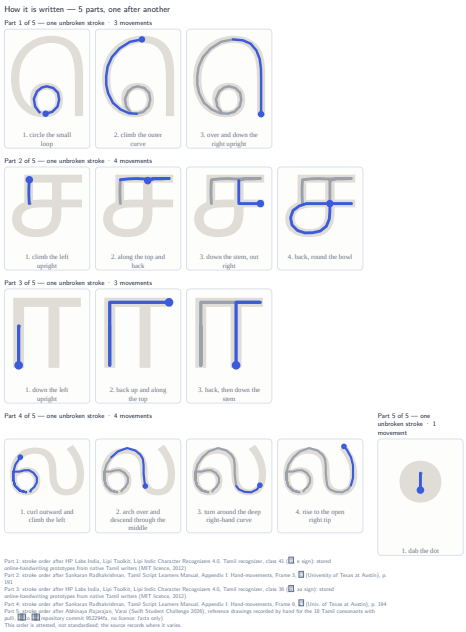

Before you move on

Where does என்று stand — before the quoted words or after them? (**After. It closes them, and the verb follows.**)

77.3 சொல் — a sign on both sides of one letter

Before the page: say the verb *to say*, then close a quotation with என்று.

Script you'll notice: சொல் — two letters, and a sign that surrounds one

How சொல் *is written, part by part, stroke by stroke*

piece		
சொ	*so*	ச with the ொ sign
ல்	*l*	ல with a புள்ளி

சொ · ல் → சொல்

The ொ sign is the one you first met inside சொல்லுங்கள் in chapter eight, and it is unusual: it puts one piece **before** its letter and another **after** it. The letter sits in the middle of its own vowel.

Compare it with ோ in போ, which does the same thing for the long *ō*. Tamil has a small family of signs that wrap around, and both of them are in words you already say.

The word ends the way ஆனால் did, on a ல் carrying a புள்ளி.

Your turn

- *Read it:* சொ — then ல்
- *Read it:* சொல், then போ — two wrapping signs, one short and one long
- *Point to:* the two halves of the ொ sign, and the letter caught between them
- *Recall:* say *sol*, then say *"sari" enṟu solluṅgaḷ*, then read சொல்
- *Return to:* say *alladu*, *aṉumati* and *iṉṟu* — three distances back — then quote one of them with என்று

Before you move on

What is unusual about the ொ sign? (**It wraps around its letter — part before, part after.**)

77.4 ... என்று நினைக்கிறேன் — I think that ...

Read it: சொல்

Then say: 'Say "okay"'

You'll want to know: what என்று hands to நினை

நினை (*ninai*) has been in the book since chapter thirty-three: "to think". Until now it had nothing to think **about**, because a thought is a whole sentence and nothing could carry one.

என்று carries one.

இது நல்ல வீடு என்று நினைக்கிறேன்.

idu nalla vīḍu eṉṟu niṉaikkiṟēṉ.

"I think this is a good house."

The opinion comes first and stands whole — இது நல்ல வீடு, a sentence you could say on its own. என்று closes it. Then the verb, built the way பேசுகிறேன் was in chapter five: நினை, the middle piece for *now*, and -ஏன் for *I*.

Swap the front half for anything you can say:

இது சிறிய கடை என்று நினைக்கிறேன்.

The word, taken apart — its roots and family

... என்று நினைக்கிறேன் (*... eṉṟu niṉaikkiṟēṉ*) is native: *eṉṟu*, "having said", from *eṉ*, "to say" (DEDR 868), and *niṉai*, "to think" (DEDR 3683). "I think that ..." is "saying '...', I think".

What you've built

An opinion, which is the first thing here that is yours rather than a fact.

Your turn

- *Say it: niṉaikkiṟēṉ*
- *Say it: idu nalla vīḍu eṉṟu niṉaikkiṟēṉ*
- *Swap:* put *idu siṟiya kaḍai* in the front half and say the whole thing
- *Recall:* say *"sari" eṉṟu solluṅgaḷ*
- *Read it:* சொல்
- *Recall:* give your opinion
- *Read it:* ஆனால்
- *Return to:* say *tayakkam* and say *nēṟṟu* — three distances back — then quote one of them with என்று

Before you move on

What stands between your opinion and the verb நினைக்கிறேன்? (என்று.)

Chapter 78

Why, and Because

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can ask for a reason and give one, before or after the thing it explains.
>
> *Complete TA-C78-for-the-sake-of and answer one why three different ways.*

78.1 ஏன் (ēn̲) — why

Read it: சொல்

Then say: I think this is a good house.

You'll want to know: ஏன்

ஏன் (*ēn̲*) — "why".

Chapter forty gave you the shape of every Tamil question word: they begin on an **e-**. என்ன, எங்கே, எப்படி, எவ்வளவு. **ஏன்** belongs to the same family, and it is the one that asks for a reason.

It holds a long **ஏ** where the others hold a short **எ**. The family is real; the length is part of this particular member.

On its own it is a whole question:

ஏன்? — "Why?"

Or in front of a sentence:

ஏன் தேநீர் வேண்டும்? — "Why do you want tea?"

This is the first question in the book that cannot be answered by naming a thing. Its answer is a sentence, and the next lesson is the word that lets you give one.

In the family, and next door

	word	same root
Telugu	ఎందుకు (*enduku*)	yes
Malayalam	എന്തുകൊണ്ട് (*entukoṇṭŭ*)	yes
Hindi (neighbour)	क्यों (*kyom̐*)	
English	why	

The word, taken apart — its roots and family

ஏன் (*ēṉ*) is native Dravidian (DEDR 5151). It is built on the native question base *e-*, "what".

What you've built

The sixth member of a question family whose pattern you have known since chapter forty.

Your turn

- *Say it: ēṉ*
- *Say it:* the question words in a row — *eṉṉa, eṅgē, eppaḍi, evvaḷavu, ēṉ*
- *Ask: ēṉ tēnīr vēṇḍum?*
- *Read it:* சொல்
- *Recall:* say *idu nalla vīḍu eṉṟu niṉaikkiṟēṉ*, then ask *ēṉ?*
- *Return to:* say *pāl vēṇḍumā, alladu tēnīr vēṇḍumā?* and say *nambikkai* — three distances back
- *Read it:* இன்று
- *Return to:* ask ஏன் about one of them
- *Recall:* say *āṉāl*

Before you move on

What does every Tamil question word begin with, and what is different about this one? (**An e- — and this one's is long: ஏ.**)

78.2 ஏனென்றால் (ēn̲en̲r̲āl) — because

Give an opinion about a house. Then ask *why*.

You'll want to know: ஏனென்றால்

ஏனென்றால் (*ēn̲en̲r̲āl*) — "because".

It is long, and it is long for a reason you can already read. Take it apart:

piece		
ஏன்	*ēn̲*	why — last lesson
என்றால்	*en̲r̲āl*	if it is said

"If you ask why —". That is the whole word. Tamil answers a *why* by repeating the question and then going on.

என்றால் is the same verb you met one chapter ago in என்று. There it closed a quotation; here it closes a question and turns it into a hinge.

தேநீர் வேண்டும், ஏனென்றால் எனக்குத் தாகம்.

tēnīr vēṇḍum, ēn̲en̲r̲āl enakkut tākam.

"I want tea, because I am thirsty."

The second half is a whole sentence — the dative one from chapter six, *to me, thirst*. ஏனென்றால் joins it on without changing either side.

Everyday speech shortens it to ஏன்னா, the same wearing-down that made ஆனால் into ஆனா.

In the family, and next door

	word
Telugu	ఎందుకంటే (*endukaṇṭē*)
English	because

The word, taken apart — its roots and family

ஏனென்றால் (*ēṉeṉṟāl*) is native: *ēṉ*, "why" (DEDR 5151), and *eṉṟāl*, "if one says", from *eṉ*, "to say" (DEDR 868). "Because" is "if you say why".

What you've built

You can ask for a reason and give one.

Your turn

- *Say it: ēṉeṉṟāl*
- *Say it: tēnīr vēṇḍum, ēṉeṉṟāl enakkut tākam*
- *Split:* say the two halves apart, then join them
- *Recall:* say your opinion of a house, then ask *ēṉ?*, then answer with *ēṉeṉṟāl*
- *Return to:* say *sol*, *paṇivu* and *muṉbu* — three distances back — then ask ஏன் about one of them
- *Read it:* அல்லது
- *Recall:* say *sol*

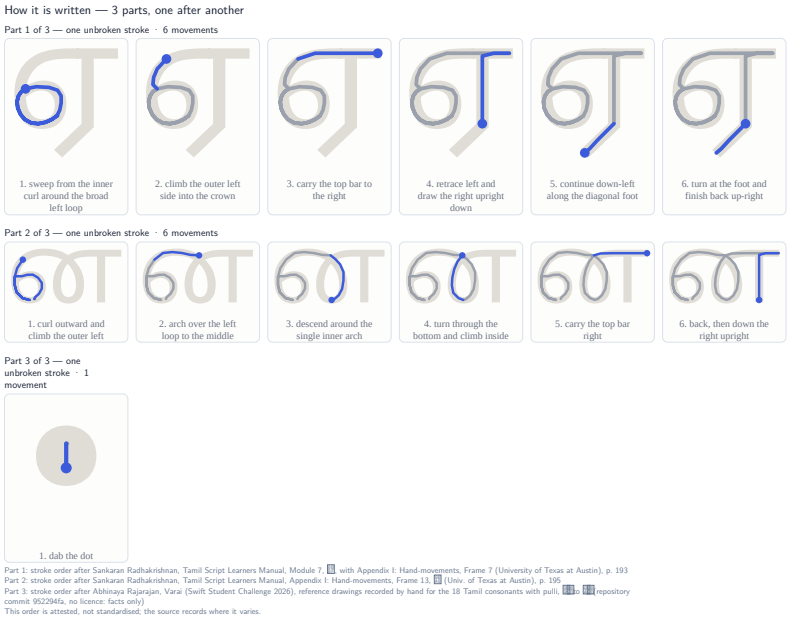

Before you move on

Which question word is hiding at the front of ஏனென்றால்? (ஏன்.)

78.3 ஏன் — the shortest question in the book

Before the page: ask *why*, then answer with *because*.

Script you'll notice: ஏன் — two shapes, and one of them is a whole letter

How ஏன் *is written, part by part, stroke by stroke*

piece		
ஏ	*ē*	the free-standing long e, because the word opens on it
ன்	*n̲*	ன with a புள்ளி

ஏ · ன் → ஏன்

Two shapes. Nothing else in this book is shorter and still a question. Now set it beside the question word you read in chapter twenty-nine:

எப்படி opens on எ · ஏன் opens on ஏ

Same family, different length, and Tamil gives each length its own letter rather than a mark on one shape. That is why both had to be learnt separately, and why a reader who has both can now tell an *eppaḍi* from an *ēn̲* before hearing either.

The closing ன் is the alveolar n you first wrote in chapter seven, the same one that ends நான்.

Your turn

- *Read it:* ஏ — then ன்
- *Read it:* ஏன், then எப்படி — long, then short
- *Point to:* the two letters that hold the two lengths
- *Recall:* ask *ēṉ?*, then answer with *ēṉeṉṟāl*, then read ஏன்
- *Return to:* say *eṉṟu*, *nel* and *mādam* — three distances back — then ask ஏன் about one of them

Before you move on

Read ஏன். How does the page tell it apart from எப்படி? (**A different letter for the long e.**)

78.4 அதனால் (adaṉāl) — because of that, so

Read it: ஏன்

Then say *because*.

You'll want to know: அதனால்

அதனால் (*adaṉāl*) — "because of that", "so".

ஏனென்றால் puts the reason **after** the result. அதனால் puts it **before**, and points back at it.

> எனக்குத் தாகம். அதனால் தேநீர் வேண்டும்.
>
> *enakkut tākam. adaṉāl tēnīr vēṇḍum.*
>
> "I am thirsty. So I want tea."

Same two facts as the last lesson, in the other order. Both are ordinary Tamil, and which one you reach for depends on which half you want to lead with.

The word is அது — "that one", from chapter forty — carrying an ending that means *by*. *By that.* It can only point backwards, which is why it never opens a conversation.

The word, taken apart — its roots and family

அதனால் (*adaṉāl*) is native: *atu*, "that" (DEDR 1), in its joining form *ataṉ-*, with *-āl*, "by": "by that".

What you've built

The reason can now go on either side of the result.

Your turn

- *Say it: adaṉāl*
- *Say it: enakkut tākam. adaṉāl tēnīr vēṇḍum.*
- *Flip:* say the same two facts with *ēṉeṉṟāl* instead
- *Recall:* say *ēṉeṉṟāl*
- *Read it:* ஏன்
- *Recall:* say *adaṉāl*
- *Read it:* சொல்
- *Return to:* say *pul* and say *āṇḍu* — three distances back — then ask ஏன் about one of them

Before you move on

Which of the two joins puts the reason first? (அதனால் — it points back at a reason already given.)

78.5 -க்காக — what a thing is for

Read it: ஏன்

Then say: I am thirsty, so I want tea.

Grammar lens: a reason that is not a sentence

ஏனென்றால் and அதனால் both join a whole sentence. Sometimes the reason is not a sentence at all — it is a person, or a thing.
-க்காக (*-kkāga*) is the ending for that. It grows on the dative -உக்கு

you have had since chapter six.

word	with the ending	it means
உங்கள்	உங்களுக்காக	for you
நண்பன்	நண்பனுக்காக	for a friend

> **உங்களுக்காக தேநீர்.** — *uṅgaḷukkāga tēnīr.* — "Tea for you."

Hear the **-உக்கு** still inside it. Chapter six taught that ending as *to* or *for*; **-க்காக** sharpens it into *for the sake of*, which is purpose rather than direction.
This is the third answer to **ஏன்** in one chapter: a following sentence, a preceding sentence, and now a single word.

What you've built

A whole chapter about reasons: asking for one, giving one after, giving one before, and naming who a thing is for.

Your turn

- *Say it: uṅgaḷukkāga*
- *Say it: uṅgaḷukkāga tēnīr*
- *Build: naṇbaṉukkāga*
- *Answer:* ask *ēṉ?* and answer it three ways — with *ēṉeṉṟāl*, with *adaṉāl*, and with *uṅgaḷukkāga*
- *Return to:* say *payir*, *-um … -um* and *… eṉṟu niṉaikkiṟēṉ* — three distances back — then ask **ஏன்** about one of them

Before you move on

Which older ending is inside **-க்காக**? (**-உக்கு**, the dative from chapter six.)

Chapter 79

When

Modes: 🚗 **voice** (3) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 4 lessons.

> ***By the end of this chapter:*** I can ask when, point at a time already named, and say that two things happen together.
>
> *Complete TA-C79-when-clause and say the three time-words, then a when-clause.*

79.1 எப்போது (eppōdu) — when?

Say *so, therefore.* Then say: tea for you.

You'll want to know: எப்போது

எப்போது (*eppōdu*) — "when?"

You have had **இப்போது**, "now", since chapter forty-eight, and you have had the pattern behind it since chapter forty: **i-** for near, **a-** for far, **e-** for a question.

So this word was already half yours:

word		
இப்போது	*ippōdu*	now — this time
எப்போது	*eppōdu*	when? — which time

The shared piece is **போது**, a word meaning *a time, an occasion.* Change only the front and you have walked from a statement to a question, exactly as **இங்கே** walked to **எங்கே**.

எப்போது வேண்டும்? — "When do you want it?"

In the family, and next door

	word	same root
Kannada	ಯಾವಾಗ (*yāvāga*)	
Telugu	ఎప్పుడు వస్తారు? (*eppuḍu vastāru?*)	
Malayalam	എപ്പോൾ (*eppōḷ*)	yes
English	when?	

The word, taken apart — its roots and family

எப்போது (*eppōdu*) is native: the question base *e-* (DEDR 5151) and *pōtu*, "time" (DEDR 4559). DEDR 5151 lists *eppōtu* itself.

What you've built

The question word for time, and the small word போது that sits inside it.

Your turn

- *Say it: eppōdu*
- *Say it: ippōdu*, then *eppōdu* — the statement, then the question
- *Ask: eppōdu vēṇḍum?*
- *Recall:* say *adaṉāl*, then say *uṅgaḷukkāga*, then ask *eppōdu?*
- *Return to:* say *-um*, *kaḷam* and *ēṉ* — three distances back — then say when one of them happens
- *Recall:* say *sol*

Before you move on

What is the piece these two words share, and what does it mean? (போது — **a time.**)

79.2 அப்போது (appōdu) — then, at that time

Say *for you.* Then ask *when?*

You'll want to know: அப்போது

அப்போது (*appōdu*) — "then, at that time".

The third seat was empty and now it is filled:

இப்போது	*ippōdu*	now
அப்போது	*appōdu*	then
எப்போது	*eppōdu*	when?

Near, far, question — the same three fronts you first met on இங்கே, அங்கே, எங்கே.

Then in Tamil means a time somebody has already named. It looks backwards, the way அதனால் does, and for the same reason: both begin on the **a-** that means *that one, over there*.

> நாளை. அப்போது சொல்லுங்கள். — "Tomorrow. Tell me then."

In the family, and next door

	word
Malayalam	പിന്നെ (*pinne*)
English	then, at that time

The word, taken apart — its roots and family

அப்போது (*appōdu*) is native: the far base *a-* (DEDR 1) and *pōtu*, "time" (DEDR 4559): "that time".

What you've built

A complete set of three, from a pattern you were given nearly forty chapters ago.

Your turn

- *Say it: appōdu*
- *Say it:* all three in order — *ippōdu, appōdu, eppōdu*
- *Notice:* the front that means *that one*, in அப்போது and in அதனால்

- *Recall:* say *uṅgaḷukkāga*, then ask *eppōdu?*, then answer *appōdu*
- *Return to:* say *aṟuvaṭai*
- *Read it:* பாலும்
- *Return to:* say *ēṉeṉṟāl* — three distances back — then say when one of them happens

Before you move on

Why can அப்போது never open a conversation? (**Because *a-* points at a time somebody has already named.**)

79.3 எப்போது — the doubled letter, read across a seam

Before the page: say *now*, *then*, *when?* in that order.

Script you'll notice: எப்போது — one letter, twice, on either side of a புள்ளி

piece		
எ	*e*	the free-standing short e, because the word opens on it
ப்	*p*	ப with a புள்ளி
போ	*pō*	ப with the wrapping ோ sign
து	*du*	த with the ு sign

எ · ப் · போ · து → எப்போது

The middle is the shape you first read in சட்டை: the same letter written twice, the first one wearing a புள்ளி and leaning on the second. Here it is ப, and the doubling is exactly what makes the *pp* you hear.

Read the seam and the word divides itself: எ is the question front from chapter forty, and போது is the time-word. அப்போது is the same page with one letter changed at the start.

Your turn

- *Read it:* எ — then ப் — then போ — then து
- *Read it:* எப்போது, then அப்போது
- *Point to:* the two ப shapes, and say which one carries no vowel
- *Recall:* ask *eppōdu?*, then answer *appōdu*, then read எப்போது
- *Return to:* say *-um … -um illai*, say *kuḍi* and read ஏன் — three distances back — then say when one of them happens

Before you move on

Read எப்போது. Which one letter would you change to read *then* instead? (**The first — எ becomes அ.**)

79.4 -உம் போது — when one thing happens, so does another

Read it: எப்போது

Then say *then, at that time.*

Grammar lens: the time-word does the joining

எப்போது asks about a time. போது on its own can pin one, and when a verb stands in front of it the whole thing becomes *when that happens.*
The verb takes **-உம்** first:

> வா → வரும் → வரும் போது — "at the coming time" — "when [you] come"
>
> நீங்கள் வரும் போது, சொல்லுங்கள்.
>
> *nīṅgaḷ varum pōdu, solluṅgaḷ.* — "When you come, tell me."

Two things happening at once, held together by a word that means *time.* No word for *when* is needed, because போது already is one.
One warning, because it would otherwise mislead you. The **-உம்** here is **not** the joining ending from chapter seventy-four. That one sat on

nouns and meant *and*. This one sits on verbs and marks a happening. Same two letters, two different jobs — and the word in front of them tells you which.
Everyday speech runs it together and clips it, so you will hear *varumbōdu* as one word.

What you've built

The last of this chapter's three: a time you ask about, a time you point at, and a time you build out of a verb.

Your turn

- *Say it: varum pōdu*
- *Say it: nīṅgaḷ varum pōdu, solluṅgaḷ*
- *Separate:* say *pālum* and then *varum* — the same ending, two different jobs
- *Recall:* answer *appōdu*
- *Read it:* எப்போது
- *Recall:* say the whole *varum pōdu* line
- *Return to:* say *-ā*, *naḍa* and *adaṉāl* — three distances back — then say when one of them happens

Before you move on

Two words end in -உம்: பாலும் and வரும். What tells them apart? (**What they sit on — a naming word joins, a doing word marks a happening.**)

Chapter 80

One, the Other, and the Price

Modes: **voice** (3) **pen** (1) **Hands-free start:** the first 2 of 4 lessons.

> ***By the end of this chapter:*** I can tell two things apart, choose between them, and ask what one costs.
>
> *Complete TA-C80-price and run the whole counter exchange, from choosing to asking.*

80.1 மற்றது (ma̲r̲radu) — the other one

> *Read it:* எப்போது
>
> Then say: when you come, tell me.

You'll want to know: மற்றது

மற்றது (*ma̲r̲radu*) — "the other one".

இது and அது name a thing by where it stands: near me, over there. மற்றது names it by what it is not — the one that is *left*, once you have picked one up.

> இது வேண்டும். மற்றது வேண்டாம்.
>
> *idu vēṇḍum. ma̲r̲radu vēṇḍām.* — "I want this one. Not the other."

The tail of the word is அது, the same *that one* that ends அதனால். Tamil builds a surprising amount out of that small word, and once you hear it inside a longer one you can usually guess what the longer one is doing.

The word, taken apart — its roots and family

மற்றது (*maṟṟadu*) is native Dravidian. DEDR 4766 lists Malayalam *maṟṟavan*, "the other (man)" and Kannada *maru*, "other". The entry lists *maṟṟu*, "other", and *-atu* makes it "the other one".

What you've built

A third way to point at a thing, once two of them are on the table.

Your turn

- *Say it: maṟṟadu*
- *Say it: idu vēṇḍum. maṟṟadu vēṇḍām.*
- *Notice:* the அது at the end of மற்றது and at the start of அதனால்
- *Read it:* எப்போது
- *Recall:* say *varum pōdu*, then say *maṟṟadu*
- *Return to:* say *ām / illai*
- *Read it:* குடி
- *Return to:* say *-kkāga* — three distances back — then set two of them against each other, one and the other
- *Recall:* say *ēṉ*
- *Read it:* ஏனென்றால்
- *Recall:* say *adaṉāl*

Before you move on

இது names a thing by where it is. What does மற்றது name it by? (**By being the one left over.**)

80.2 ஒன்று … மற்றது — one here, the other there

Say: when you come, tell me. Then say *the other one*.

Grammar lens: a pair, split across two halves

ஒன்று has been the number *one* since chapter seven. Put மற்றது opposite it and the number stops counting and starts distributing.

> ஒன்று இங்கே, மற்றது அங்கே.
>
> *oṉṟu iṅgē, maṟṟadu aṅgē.* — "One is here, the other is there."

Two halves, no joining word between them, and no verb in either. Tamil sets them side by side and the pairing does the work — the same silence you first met in இவர் என் நண்பர்.
It works with any two facts you can already state:

> ஒன்று பெரிய வீடு, மற்றது சிறிய வீடு.

Chapter seventy-four joined two things into one list. This does the opposite: it takes two things and holds them apart.

What you've built

Both directions now: a way to put two things together, and a way to tell them apart.

Your turn

- *Say it: oṉṟu iṅgē, maṟṟadu aṅgē*
- *Build: oṉṟu periya vīḍu, maṟṟadu siṟiya vīḍu*
- *Contrast: pālum tēnīrum* against *oṉṟu … maṟṟadu* — held together, then held apart
- *Recall:* say *varum pōdu*, then say *maṟṟadu*, then say the whole pair
- *Return to:* say *niṟuttu*

- *Read it:* சரியா
- *Return to:* say *eppōdu* — three distances back — then set two of them against each other, one and the other

Before you move on

How many joining words stand between the two halves? (**None — the pair itself is the join.**)

80.3 மற்றது — a doubling you have read twice before

Before the page: say *one here, the other there.*

Script you'll notice: மற்றது — ற standing on ற

piece		
ம	*ma*	the letter on its own
ற்	*r̲*	ற with a புள்ளி
ற	*r̲a*	ற again, this time carrying its vowel
து	*du*	த with the ◌ு sign

ம · ற் · ற · து → மற்றது

The middle is the doubling you read in சட்டை with ட and in எப்போது with ப. A third letter, the same shape of seam: one wearing a புள்ளி, leaning on its twin.

Once you have seen it three times it stops being a thing to work out. It is a shape.

The last two letters spell து, and the word they close is அது — the *that one* the lesson before pointed out. On the page you can see the whole word being built out of things you have.

Your turn

- *Read it:* ம — then ற் — then ற — then து

- *Read it:* மற்றது, then எப்போது, then சட்டை — three doublings, three letters
- *Point to:* the letter carrying the புள்ளி in each one
- *Recall:* say *maṟṟadu*, then say *oṉṟu iṅgē, maṟṟadu aṅgē*, then read மற்றது
- *Return to:* say *tiṟa*, *nāṉ uḷḷē varalāmā?* and *appōdu* — three distances back — then set two of them against each other, one and the other

Before you move on

Read மற்றது. Which letter is written twice? (ற — **the first one with a புள்ளி.**)

80.4 விலை எவ்வளவு? — how much does it cost?

Read it: மற்றது

Then say: one here, the other there.

You'll want to know: the question the shop is for

விலை எவ்வளவு? (*vilai evvaḷavu?*) — "How much does it cost?"

Both words have been yours for a long time. எவ்வளவு came in chapter thirty-nine and விலை in chapter sixty-eight. Standing side by side they are the question a shop exists for, and until now nothing put them side by side.

No verb, and no word for *is*. Tamil names the thing and asks about it:

விலை எவ்வளவு? — the price, how much?

இது எவ்வளவு? — this one, how much?

Then chapter seventy-five lets you check what you heard, or push back on it:

விலை குறைவா? — *vilai kuṟaivā?* — "Is the price low?"

குறைவு is the shortfall word from chapter fifty-six, and the **-ஆ** on the end is the question ending. Two chapters, one sentence you can say across a counter.

The word, taken apart — its roots and family

விலை எவ்வளவு? (*vilai evvaḷavu?*) is two native words: *vilai*, "price" (DEDR 5421), and *evvaḷavu*, "how much", the question base *e-* with *aḷavu*, "measure" (DEDR 295).

What you've built

A whole shop exchange: choose one of two, ask the price, question the answer.

Your turn

- *Ask: vilai evvaḷavu?*
- *Ask: idu evvaḷavu?*
- *Push back: vilai kuṟaivā?*
- *Recall:* say *oṉṟu iṅgē, maṟṟadu aṅgē*
- *Read it:* மற்றது
- *Recall:* ask the price
- *Return to:* say *mūḍu* and say *āṉāl* — three distances back
- *Read it:* எப்போது
- *Return to:* set two of them against each other, one and the other

Before you move on

How many words does it take to ask a price in Tamil, and how many verbs? (**Two words, and no verb.**)

Chapter 81

Two Tamils

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can say why written Tamil and spoken Tamil differ, and move between them.
>
> *Complete TA-C81-which-tamil and say three joining words in both forms.*

81.1 ஆனால் / ஆனா — the two Tamils

Read it: மற்றது

Then ask a shopkeeper the price.

Grammar lens: one language, two forms, and everybody uses both

Something has been happening quietly in the last eight chapters, and it is time it was said plainly.

Tamil comes in two forms. One is written — in books, on signs, in the news. The other is spoken — at home, in a shop, on a bus. They are not an accent apart. Words differ, and endings differ, and a page of one is not a recording of the other.

Every Tamil speaker uses both and knows which is which. Nobody chooses one and abandons the other.

You have already met three pairs, one per chapter:

written	spoken
ஆனால்	ஆனா
ஏனென்றால்	ஏன்னா
என்று	-ன்னு

That is not a coincidence of these particular words. Joining words are where the split shows most, because they are said constantly and worn down fastest — the same reason an English speaker says *cos* far more often than *because*.
It reaches ordinary words too: இன்று, the written *today*, is இன்னிக்கி in speech.

What you've built

The single most important fact about Tamil, and a reason the last eight chapters gave you two forms of everything.

Your turn

- *Say it:* *āṉāl*, then *āṉā*
- *Say it:* *ēṉeṉṟāl*, then *ēṉṉā*
- *Listen:* for the piece that is dropped each time — a closing consonant
- *Read it:* மற்றது
- *Recall:* ask *vilai evvaḷavu?*, then say both forms of *but*
- *Return to:* say *alladu* and *-um pōdu* — two distances back — then say which of the two Tamils each one belongs to

Before you move on

Does a Tamil speaker pick one of the two forms and keep to it? (**No — everyone uses both, in different places.**)

81.2 என்று / -ன்னு — which one you are being taught

Ask a price. Then say *but* twice — the written way, then the spoken way.

Grammar lens: the headword is the written one, on purpose

In every lesson of this book, the big word at the top is the **written** form, and the spoken clip is named beside it in the text. That choice is worth explaining, because it is not obvious.
The written form is the one on the page you will read, the sign you will pass and the form your dictionary will list. It is also understood everywhere Tamil is spoken, which no single spoken variety is.
And it runs one way. From என்று you can predict -ன்னு; from -ன்னு alone you could not have rebuilt என்று. Learn the longer one and the shorter one comes free.

> “சரி” என்று சொல்லுங்கள். — written
>
> “சரி”ன்னு சொல்லுங்கள். — spoken

Same sentence. The quotation does not move, the verb does not move; the joining word shrinks onto the word in front of it.
So: say either. Expect to **hear** the clipped one nearly always, and read the full one nearly always.

What you’ve built

You know which Tamil is in front of you, and you can get from one to the other.

Your turn

- *Say it: “sari” ennu solluṅgaḷ*
- *Say it: “sari”-nnu solluṅgaḷ*
- *Convert:* take *ēṉeṉṟāl* and say the clip; take *ēṉṉā* and rebuild the full word
- *Read it:* மற்றது
- *Recall:* ask *vilai evvaḷavu?*, then say both forms of the quotation line
- *Return to:* say *mēlē*
- *Read it:* ஆனால்

- *Return to:* say *mar̲r̲adu* — three distances back — then say which of the two Tamils each one belongs to

Before you move on

Why does this book put the written form at the top? (**Because the spoken form follows from it, and not the other way round.**)

Chapter 82

Which One in the Line

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say first to fifth in Tamil, and make an ordinal from any number by adding -aavadhu.
>
> *The five said in order, four of them built by the ending and the fifth a word the learner had been saying since chapter 62 without knowing it was one.*

82.1 முதல் (mutal) — first, and you have had it all along

A new kind of number word starts here, so the recalls come first, at the four growing distances this book measures.

- *Recall:* say *enṟu* and then its spoken *-ṉṉu* — **R1**, one lesson back
- *Recall:* say *oṉṟu … maṟṟadu* — **R2**, five lessons back
- *Recall:* offer a choice with *alladu* — **R3**, twenty lessons back
- *Recall:* say *kīḻē* — **R4**, eighty lessons back

You'll want to know: முதல்

முதல் (*mutal*) — "**first**".

You already know this word. Think of முதலில் (*mutalil*), "first of all", which this book already taught as a way of putting one thing before another:

முதல் + இல் → முதலில்

இல் is the ending that means "in" or "at". Take it off and what is left is **முதல்**, first — and it was standing there in your mouth the whole time, carrying the meaning, without ever being named.

முதல் நாள் (*mutal nāḷ*), the first day. **முதல் பாதை** (*mutal pātai*), the first road.

In the family, and next door

	word
Kannada	**ಮೊದಲನೆಯ** (*modalaneya*)
Telugu	**మొదటి** (*modaṭi*)
Malayalam	**ഒന്നാം** (*onnāṁ*)
Hindi (neighbour)	**पहला** (*pahlā*)
English	first

The word, taken apart — its roots and family

முதல் (*mutal*) is native Dravidian: *mutal*, "beginning, first" (DEDR 4950).

Across the family: the word four languages built on

முதல் is one of the oldest words in this family, and its sisters did four different things with it:

language	**what it did with *mutal***	**its word for "first"**
Tamil	kept the meaning outright	**முதல்** *mutal*
Kannada	built an ordinal on it	**ಮೊದಲನೆಯ** *modalaneya*
Telugu	built an ordinal on it	**మొదటి** *modaṭi*
Malayalam	kept the word, changed the sense to "from"	uses **ഒന്നാം** *onnāṁ* instead

None of the four builds "first" on its own word for **one**, and three of them build it on this word. Tamil is where it still simply *means* first.

Your turn

Say these aloud:

- *mutalil*, then take the *-il* off and say *mutal*
- *mutal nāḷ* — the first day
- *onṟu* is how many, *mutal* is which one

Before you move on

What word is inside முதலில்? (முதல் — first.) Is it built on ஒன்று? (**No** — and neither is Kannada's or Telugu's.)
Sources: learntamil.com, Ordinal Numbers / Dates; Omniglot, Tamil numbers.

82.2 இரண்டாவது (iraṇḍāvadu) — second

- *Recall:* say *mutal*, and say what word it came out of — **R1**
- *Read it:* மற்றது — **R2**
- *Recall:* say *sol* — **R3**
- *Read it:* மேலே — **R4**

You'll want to know: இரண்டாவது

இரண்டாவது (*iraṇḍāvadu*) — "**second**".

இரண்டு answers *how many*. இரண்டாவது answers *which one in the line*.

இரண்டாவது நாள் (*iraṇḍāvadu nāḷ*), the second day. இரண்டாவது கதவு (*iraṇḍāvadu kadavu*), the second door.

In the family, and next door

	word	same root
Kannada	ಎರಡನೆಯ (*eraḍaneya*)	
Telugu	రెండవ (*reṇḍava*)	yes
Malayalam	രണ്ടാം (*raṇṭāṁ*)	
Hindi (neighbour)	दूसरा (*dūsrā*)	
English	second	

The word, taken apart — its roots and family

இரண்டாவது (*iraṇḍāvadu*) is native: *iraṇṭu*, "two" (DEDR 474), with the ordinal ending *-āvatu*. That ending is usually analysed as *ā*,

"to become" (DEDR 333), with *-atu*, "the one": "the one that became two".

Grammar Lens: one ending, and one word that does not take it

cardinal	ordinal
இரண்டு (*iraṇḍu*)	இரண்டாவது (*iraṇḍāvadu*)

Add **-ஆவது** (*-āvadu*) to a number and you have its ordinal. That is the rule, and it works on every number Tamil has.
There is exactly **one** exception in the whole set, and you met it last lesson: you do not say *oṉṟāvadu* for **first**. Tamil reaches for முதல் instead.
So the one word a learner would have to memorise here is the one word this book did not have to teach you.

Your turn

Say these aloud:

- *iraṇḍu*, then *iraṇḍāvadu*
- *mutal*, then *iraṇḍāvadu*
- *iraṇḍāvadu kadavu* — the second door

Before you move on

What do you add to a number to make its ordinal? (**-ஆவது**.)
Which number refuses it? (**One** — that one is முதல்.)
Source: learntamil.com, Ordinal Numbers / Dates.

82.3 முதலாவது (mutalāvadu) — first, taking the ending after all

- *Recall:* say *iraṇḍāvadu*, and say what you added to *iraṇḍu* — **R1**
- *Recall:* ask *vilai evvaḷavu?* — **R2**
- *Recall:* use *eṉṟu* to report what somebody said — **R3**
- *Recall:* say *uḷḷē* — **R4**

You'll want to know: முதலாவது

முதலாவது (*mutalāvadu*) — "**first**", said the long way.

Look at what happened:

முதல் + ஆவது → முதலாவது

The ending is the *same* ending. **முதல்** takes **-ஆவது** exactly as **இரண்டு** did. So the exception is narrower than it looked a lesson ago: *first* does not refuse **-ஆவது** at all. It simply takes it on **முதல்** rather than on **ஒன்று**.

The **stem** is the exception. The **ending** is not.

Both forms are current: **முதல் நாள்** and **முதலாவது நாள்** are both the first day, and **முதல்** is the shorter and commoner of the two in front of a noun.

In the family, and next door

	word
Kannada	**ಮೊದಲನೆಯ** (*modalaneya*)
Telugu	**మొదటి** (*modaṭi*)
Malayalam	**ഒന്നാം** (*onnāṁ*)
Hindi (neighbour)	**पहले** (*pahle*)
English	first, with the ending on it

The word, taken apart — its roots and family

முதலாவது (*mutalāvadu*) is native: *mutal*, "first" (DEDR 4950), with the ordinal ending *-āvatu*, from *ā*, "to become" (DEDR 333).

Your turn

Say these aloud:

- *mutal*, then *mutalāvadu*
- *mutalāvadu, iraṇḍāvadu*
- which part of *mutalāvadu* is the same as in *iraṇḍāvadu*

Before you move on

Which part of முதலாவது is irregular, the stem or the ending? (**The stem** — the ending is the ordinary one.)
Source: learntamil.com, Ordinal Numbers / Dates.

82.4 மூன்றாவது (mūn̲r̲āvadu) — third

- *Recall:* say *mutalāvadu*, and say which part of it is irregular — **R1**
- *Recall:* say *ān̲āl*, then its spoken *ān̲ā* — **R2**
- *Read it:* சொல் — **R3**
- *Recall:* say *veḷiyē* — **R4**

You'll want to know: மூன்றாவது

மூன்றாவது (*mūn̲r̲āvadu*) — "**third**". மூன்று (mūn̲r̲u) takes **-ஆவது**, and nothing else changes.

Three is the number the Dravidian family never quarrelled over — Tamil *mūn̲r̲u*, Malayalam *mūnnŭ*, Kannada *mūru*, Telugu *mūḍu*, all keeping the long **ū** at the front. The ordinal keeps it too, because the ending only touches the end of the word.

மூன்றாவது கதவு (*mūn̲r̲āvadu kadavu*), the third door.

In the family, and next door

	word	same root
Kannada	ಮೂರನೆಯ (*mūraneya*)	yes
Telugu	మూడవ (*mūḍava*)	yes

The word, taken apart — its roots and family

மூன்றாவது (*mūn̲r̲āvadu*) is native: *mūn̲r̲u*, "three" (DEDR 5052; Malayalam *mūnnu*), with the ordinal ending *-āvatu*, from *ā*, "to become" (DEDR 333).

Your turn

Say these aloud:

- *mūn̲r̲u*, then *mūn̲r̲āvadu*
- the ordinal before this one, then *mūn̲r̲āvadu*
- *mūn̲r̲āvadu nāḷ* — the third day

நான்காவது (*nān̲kāvadu*) — "**fourth**". நான்கு (nān̲ku) takes **-ஆவது**, and nothing else changes.

நான்காவது நாற்காலி (*nān̲kāvadu nār̲kāli*), the fourth chair.

நான்காவது (*nāṉkāvadu*) is native: *nāṉku*, "four" (DEDR 3655), with the ordinal ending *-āvatu*, from *ā*, "to become" (DEDR 333).

Your turn

Say these aloud:

- *nāṉku*, then *nāṉkāvadu*
- the ordinal before this one, then *nāṉkāvadu*
- *nāṉkāvadu nāḷ* — the fourth day

Before you move on

Say the fourth, then the third. (நான்காவது, மூன்றாவது.)

You'll want to know: ஐந்தாவது

ஐந்தாவது (*aindāvadu*) — "**fifth**". ஐந்து (aindu) takes **-ஆவது**, and nothing else changes.

That is the first five. Count the work: **four of them were built** from numbers you already count with, and the fifth — முதல் — was a word you had been saying since you learned *mutalil*, without knowing it was a number word.

Nothing in this chapter was a word you had to learn.

இடது பக்கம் முதல் பாதை is now sayable in its useful half: முதல் பாதை, the first road, with இடது for which side of the street.

Chapter 83

All the Way Up, and On a Calendar

Modes: 🚗 **voice** (8) 🚗 **Hands-free start:** all 8 lessons.

> ***By the end of this chapter:*** I can say sixth to eleventh in Tamil, make the ordinal of any number I know, and say a date with the ending a calendar uses.
>
> *Eleven ordinals and two endings retrieved out of order, with three ordinals made for numbers no lesson taught and three dates said with the calendar ending.*

83.1 ஆறாவது (ā̲rāvadu) — sixth

- *Recall:* say *aindāvadu* — **R1**
- *Recall:* say *iraṇḍāvadu* — **R2**
- *Recall:* give a reason with *ēn̲en̲rāl* — **R3**

You'll want to know: ஆறாவது

ஆறாவது (*ā̲rāvadu*) — "**sixth**". ஆறு (ā̲ru) takes **-ஆவது**, and nothing else changes.

Six to ten were a separate lesson from one to five when you learned to count, because the words themselves had to be learned. For ordering they are not a separate anything: the same ending, on the next number.

You'll want to know: ஏழாவது

ஏழாவது (*ēḻāvadu*) — "**seventh**". ஏழு (ēḻu) takes **-ஆவது**, and nothing else changes.

ஏழு carries the curled ள, the sound in the name *Tamiḻ* itself and the one this language shares with Malayalam while Kannada and Telugu hardened it away. Adding the ending does not soften it: ஏழாவது, tongue still curled.

You'll want to know: ஒன்பதாவது

ஒன்பதாவது (*o̲npadāvadu*) — "**ninth**". **ஒன்பது** (o̲npadu) takes **-ஆவது**, and nothing else changes.

ஒன்பது was already a built word when you learned it: an old **ஒன்**, one, in front of **பது**, ten — usually read as one short of ten. The ordinal ending goes on top of that, and none of the machinery underneath reacts to it.

- *pattāvadu nāḷ* — the tenth day

Count the ordinals from one to ten. How many of them were words you had to learn? (**None** — ten of them were built by one ending on numbers you already count with, and முதல் you already had.) Source: learntamil.com, Ordinal Numbers / Dates.

83.6 பதினொன்றாவது (patiṉoṉṟāvadu) — eleventh, and the edge that is not there

- *Recall:* say *pattāvadu* — **R1**
- *Recall:* say *āṟāvadu* — **R2**
- *Recall:* say *appōdu* — **R3**
- *Recall:* say *seruppu* — **R4**

You'll want to know: பதினொன்றாவது

பதினொன்றாவது (*patiṉoṉṟāvadu*) — "**eleventh**".

பதினொன்று was itself a built word: *patiṉ-*, the joining shape of ten, with *oṉṟu* welded on. Now the ordinal ending goes on top of *that*, and the result is a word of three parts, none of which had to be learned as a whole.

In the family, and next door

	word	same root
Kannada	ಹನ್ನೊಂದನೆಯ (*hannondaneya*)	yes
Malayalam	പതിനൊന്നാം (*patinonnāṁ*)	yes
English	eleventh	

The word, taken apart — its roots and family

பதினொன்றாவது (*patiṉoṉṟāvadu*) is native: *patiṉ-*, the joining form of "ten" (DEDR 3918), *oṉṟu*, "one" (DEDR 990), and the ordinal ending *-āvatu*.

Grammar Lens: the ending is a fact about numbers, not about ten

Most books stop an ordinal chapter at *tenth*, and a learner reasonably concludes that those ten words were the set. In Tamil there is no set. **-ஆவது** attaches to a **number**, so every number you learn from here on arrives with its ordinal already made: இருபது gives இருபதாவது (*irupadāvadu*), twentieth, without a lesson.

That is why this book taught the ending in the second lesson of the previous chapter rather than after ten examples. The examples were never the content.

Your turn

Say these aloud:

- *patiṉoṉṟu*, then *patiṉoṉṟāvadu*
- *pattāvadu, patiṉoṉṟāvadu*
- take *irupadu* and make its ordinal yourself

Before you move on

Do you need a lesson for *twentieth*? (**No** — the ending goes on any number.)
Source: learntamil.com, Ordinal Numbers / Dates.

83.7 தேதி (tēdi) — the date, and the ending a calendar uses

- *Recall:* say *patiṉoṉṟāvadu*, and say why *irupadāvadu* needs no lesson — **R1**
- *Recall:* say *ēḻāvadu* — **R2**
- *Read it:* எப்போது — **R3**
- *Recall:* say *toppi* — **R4**

You'll want to know: தேதி

தேதி (*tēdi*) — "**a date**", the day-number on a calendar.

The word, taken apart — its roots and family

தேதி (*tēdi*) is a loan from Sanskrit *tithi*, "a lunar day" (CDIAL 5810).

Grammar Lens: a second ending, for one job

Tamil has a **second** ordinal ending, and it is not a free alternative to the first: **-ஆம்** (*-ām*) is what a **date** takes.

said of a place in a line	said of a date
இரண்டாவது *iraṇṭāvadu*	இரண்டாம் தேதி *iraṇṭām tēdi*
மூன்றாவது *mūṉṟāvadu*	மூன்றாம் தேதி *mūṉṟām tēdi*

Same number, same job in the world, two endings — and the calendar keeps the older, shorter one.
You already have the months. **சித்திரை இரண்டாம் தேதி** (*Chithirai iraṇḍām tēdi*) is the second of Chithirai, and that is a date you can now write down.

Your turn

Say these aloud:

- *iraṇḍāvadu*, then *iraṇḍām tēdi*, and say which one is the date
- *Chithirai iraṇḍām tēdi*
- today's day-number with the ending a calendar uses

Before you move on

Which ending does a date take, **-ஆவது** or **-ஆம்**? (**-ஆம்**.) Say "the third of the month". (**மூன்றாம் தேதி**.)
Sources: learntamil.com, Ordinal Numbers / Dates; Omniglot, Tamil numbers.

83.8 The ordinals, at a distance

- *Recall:* say *iraṇḍām tēdi*, and say which ending a date takes — **R1**
- *Recall:* say *eṭṭāvadu* — **R2**
- *Recall:* build a when-clause with *-um pōdu* — **R3**
- *Recall:* say *kaḍai* — **R4**

Your turn

Eleven ordinals, two endings and one word that was never new. Run it four ways.

1. Say first to eleventh straight through, once slowly and once fast.
2. Hear six of them out of order; say each back and say the one above it.

3. Take three numbers you were **not** taught an ordinal for and make theirs.

4. Say three dates with the month names you already have, using the ending a calendar takes rather than the ordinary one.

Then answer aloud: which of the eleven is not built by the ending on its own number, what is it built on instead, and where in this book did you first say it?

Before you move on

Which word for **first** was already inside a word you knew? (முதல், inside முதலில்.) Which ending does a date take? (-ஆம்.)

Chapter 84

Reading — Words, Lines, and a First Passage

Modes: **eyes** (7) **Hands-free start:** none of the 7 lessons.

> ***By the end of this chapter:*** I can read a Tamil word as shapes rather than sounds, recognise a question by its last word, and hold a whole passage without translating it word by word.
>
> *Thirty words of Tamil with no new word in them, four of whose lines have no verb at all because Tamil needs no word for is.*

84.1 (reading) — six words, counted in shapes

Every word below you have written. Not one is new.

What is new is that nobody says them first.

Read this

வீடு புத்தகம் தண்ணீர் பால் அம்மா அப்பா

Read it: down the list once, without stopping
Read it: the list again, and this time count the shapes in each word rather than the sounds

What to know first

They do not match. Tamil joins a consonant and its vowel into one shape, so வீடு is four sounds and two shapes.

That is the thing a reader has to stop fighting. You learned these words as sounds and wrote them as shapes, and reading asks you to take the shape whole rather than to unpack it back into sounds.

அம்மா and அப்பா are the clearest pair: same length, same rhythm, one shape different in the middle.

Your turn

- *Say it:* the six words down the list, once, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
Does a Tamil word have as many shapes as sounds? (**No** — fewer.)

84.2 (reading) — six lines, and a question that ends where it asks

The last lesson gave you words. These are things you would say.

You have said every one of them.

Read this

வணக்கம். நன்றி. ஆம். இல்லை. உன் பெயர் என்ன? இங்கே.

Read it: the six lines down once, without stopping
Read it: the six lines again, and notice where the question word sits in the fifth line

What to know first

At the end. **உன் பெயர் என்ன?** — *your name what?* English puts the question word first and Tamil puts it last, so a reader does not know a line is a question until the line is over.

That is worth meeting on a page, where you can look again. In speech the intonation gives it away early; in writing only the final word does.

வணக்கம் is a bowing, from the verb to bend — the same idea as namaste and namaskar, except Tamil kept the noun.

Your turn

- *Say it:* the six lines, once, in order, without stopping

Twice through:

Before you move on

When do you find out a Tamil line is a question? (**At its last word.**)
What is வணக்கம், literally? (**A bowing.**)

84.3 (reading) — the first passage

Six words, then six lines. Now twelve of them together.

Thirty words, and not one of them is new.

Read this

வணக்கம். நான் நல்லா இருக்கிறேன். இது என் வீடு. வீடு பெரிய. நான் புத்தகம் படிக்கிறேன். புத்தகம் நல்ல, ஆனால் பெரிய. அம்மா இங்கே. அப்பா அங்கே. தண்ணீர், பால், தேநீர். இன்று நான் படிக்கிறேன். உன் பெயர் என்ன? நன்றி.

Read it: the passage once without stopping; do not translate as you go — let the sentences arrive
Read it: the passage again, and notice which lines have no verb at all

What to know first

Four of them. வீடு பெரிய. அம்மா இங்கே. Tamil does not need a word for *is*, so a noun and what you are saying about it stand side by side and the sentence is finished.

A reader has to accept that a line can end without anything that looks like a verb. English cannot do it; Tamil does it constantly.

The one joiner here is ஆனால். The lesson that taught it also taught ஆனா, the same word as people say it — this passage sits on the written side of that split, which is where reading lives.

This is the first whole passage the book has asked you to hold at once, and it works because everything in it was paid for.

Your turn

- *Say it:* the passage aloud, once, without stopping

Twice through:

Before you move on

How many words in that passage were new? (**None.**)
What does Tamil not need in அம்மா இங்கே? (**A verb.**)

84.4 (twelve consonants, four confusable sets) — sorted by ear, not by date

Read வ, then க, and name each.

Script: the three that are all n

letter	sound	where the tongue goes
ந	*na*	teeth — the soft one
ண	*ṇa*	curled back, on the roof
ன	*n̲a*	the ridge behind the teeth

They arrived one per chapter, pages apart, and no page has put them side by side. That is the whole reason this set is hard: **Tamil hears three different letters where English hears one sound.** The difference is in where the tongue lands, and the shapes carry no hint of it.

Script: two l-letters and two r-letters

pair	letters
the l-sounds	ல *la*, ordinary · ழ the curled one Tamil is named for
the r-sounds	ர *ra*, a tap · ற *r̲a*, harder and further back

ழ deserves the pause. It is the sound in the language's own name, it has no English equivalent, and a reader who met it once, thirty chapters ago, will not place it cold now.

Script: five that stand alone

No confusable twin, no set to belong to: வ *va* · ப *pa* · ம *ma* · க *ka* · ச *ca*.

Each one carries a built-in *a*, as every bare Tamil consonant does. Reading one aloud means saying two things — the consonant and the vowel inside it.

Your turn

Cover the tables.

- *Read it:* ந, ண, ன — and say where the tongue goes for each
- *Read it:* ல, then ழ — and say which one names the language
- *Read it:* ர, then ற — and say which is the harder one
- *Read it:* வ, ப, ம, க, ச — five in a row, no hesitating
- *Say it:* the vowel hiding inside a bare Tamil consonant

Before you move on

How many n-letters does Tamil write, and which of them curls the tongue back? (**Three;** ண.) Which letter gives the language its name?

84.5 (three vowels, five signs, one dot) — the same vowel, standing or hanging

Read அ. Then look at ◌் and say what it does to the letter it sits on.

Script: standing, or hanging

vowel	on its own	hanging on a consonant
long *ā*	ஆ	◌ா
u	உ	◌ு
short *a*	அ	nothing — it is already inside

That table is the whole system. A Tamil vowel gets a **full-size letter** when nothing comes before it, and a **hanging sign** when a consonant does. Short *a* is the exception that proves it: every bare consonant already contains one, so it needs no sign at all.

Script: the three signs with no standing partner here

◌ி *i* · ◌ே *ē* · ◌ோ *ō* — met one per chapter, and each one replaces the built-in *a* of whatever letter it lands on.

Read them as a set and the shapes stop being arbitrary: ◌ே and ◌ோ share the same upward stroke, because ◌ோ is that stroke with a tail. Learning one buys most of the other.

Script: the dot that removes a vowel

Three consonants were never gathered with the rest: ட *ṭa* · த *ta* · ய *ya*. Each carries its built-in *a*, and ◌் takes it away.

So one mark and one letter give you two readings — த is *ta*, த் is a bare *t*. Everything the signs above do is a swap; this is the only one that subtracts.

Your turn

Cover the tables.

- *Read it:* ஆ and ◌ா — and say what the difference between them is
- *Read it:* உ and ◌ு — the same question
- *Read it:* ◌ி, ◌ே, ◌ோ — name each
- *Read it:* ட, த, ய — and say the vowel inside each
- *Say it:* what ◌் does
- *Write it:* அ, the first shape this book ever asked you to copy

Before you move on

When does a Tamil vowel take a full-size letter rather than a hanging sign? (**When no consonant comes before it.**) Which mark subtracts a vowel instead of swapping one?

84.6 (seven words you learned to read before you learned to spell them)

Read சரி, then என். You have said both since the first two chapters.

Read this

word	what it means	what it was really teaching
இல்லை	no, there is not	the **ai** sign, which stands to the LEFT
சரி	fine, all right	ச, one letter for a whole family of sounds
என்	my	a word-initial vowel, reached by a rule you had
பெயர்	name	a second sign that stands to the left of its letter
எப்படி	how	the retroflex ட
இருக்கிறீர்கள்	are you (respectful)	the ◌ீ sign, in a word of eight pieces
தமிழ்	Tamil	ழ, and the name of the language

Every one was a word you could already say. The writing pages never asked you to decode something unfamiliar — they put a known word in front of you and let the shapes attach to a sound you owned.

Script: the signs that sit on the wrong side

Two of the seven carry the same surprise. In இல்லை and in பெயர், a vowel sign is written **before** the consonant it is pronounced after.

That is worth holding because it breaks the habit every reader brings: the order on the page is not the order in the mouth. A Tamil reader takes in the group and then says it.

Script: த and ழ

தமிழ் is two letters worth stopping on. த is the soft dental *t*, the one made against the teeth. ழ is the curled sound with no English partner, and the language wears it in its own name.

Reading the name correctly is the single clearest proof that the script has stopped being decoration.

Your turn

Cover the table and work from the left column only.

- *Read it:* இல்லை, சரி, என் — three in a row
- *Read it:* பெயர், then எப்படி
- *Read it:* இருக்கிறீர்கள் — slowly, group by group
- *Read it:* தமிழ், and name its last letter
- *Say it:* which two of the seven write a vowel sign to the left of its letter

Before you move on

Which letter gives Tamil its name, and which side of its consonant does the **ai** sign sit on? (ழ; the left.) Which of the seven is the longest on the page?

84.7 (உ உள ◌ு ◌ூ — and the two that open o)

Read உணவு, then உளர். Say what the first letter of each is doing differently.

Script: the square the u-family always formed

Four pieces, arriving in four separate chapters, and they were a grid the whole time:

	standing alone	**hanging on a consonant**
short u	உ	◌ு
long ū	உள	◌ூ

உணவு holds both columns of the top row — it opens with the standing உ and closes with the hanging ◌ா, the same vowel wearing two shapes in one word. That word is the argument for the grid, and it is the reason this page exists: no chapter could show the square, because no chapter had all four corners.

Read this

word	means	the piece it brought
உணவு	food	standing உ against hanging ◌ா
ஊர்	town, home place	standing ஊ, the long partner
மூன்று	three	the hanging ◌ென, closing the family
பேசு	speak	the long-e sign ◌ே

Script: o, standing and hanging

ஒன்று ("one") opens with ஒ, the standing short o. போ ("go") carries ◌ோ, the hanging long one — and ◌ொ is the odd shape of the set, because it is built from **two** marks, one placed before its consonant and one after.

So a single vowel can be written on both sides of the letter it belongs to at once. Reading it means taking the whole group in before saying anything.

Your turn

Cover the grid.

- *Say it:* the four corners of the u-square, and which corner each shape is
- *Read it:* உணவு — and point to both u's in it
- *Read it:* ஊர், மூன்று, பேசு
- *Read it:* ஒன்று, then போ
- *Say it:* which sign is built from two marks, and where each mark sits

Before you move on

Which word on this page shows the same vowel standing and hanging at once? (உணவு.) And which sign wraps around its consonant on both sides?

Chapter 85

The People Not Here

Modes: **voice** (3) **eyes** (4) **Hands-free start:** the first of 7 lessons.

> ***By the end of this chapter:*** I can talk about somebody who is not in the room, choosing between the familiar and respectful words, and I can say we in the two ways Tamil requires.

> *From cold: the four third-person and we-words, the front letter that marks distance, and the question each choice answers.*

85.1 அவன் / அவள் — the pair underneath the respectful word

Say the respectful word for a person who is not here. Say whether it tells you anything about their sex. (It does not.)

Today's two words do.

You'll want to know: அவன் and அவள்

அவன் — *avaṉ* — **he** **அவள்** — *avaḷ* — **she**

These are the plain, familiar words, and **அவர்** was built on top of them: the lesson that taught **இவர்** said so in passing, that it comes from **இவன்** and **இவள்** with the same **-அர்** that makes **நண்பர்** out of **நண்பன்**.

So the ending you met on a word for *friend* is the same ending that turns a familiar *he* into a respectful *that person*. **One suffix, three words, and it does the same job in all of them.**

In the family, and next door

	word	same root
Malayalam	അവൻ (*avan*)	yes
English	he and she, the familiar pair the respectful word was built out of	

The word, taken apart — its roots and family

அவன் / அவள் (*avaṉ / avaḷ*) is native: the far base *a-* (DEDR 1) with *-aṉ* for a man and *-aḷ* for a woman. DEDR 1 lists both, with Malayalam *avan* and *avaḷ*.

Grammar Lens: choosing between them

about	you say
a man, familiarly	அவன்
a woman, familiarly	அவள்
either, respectfully	அவர்

The choice is about the relationship, not about the grammar. அவன் and அவள் go with somebody younger, a close friend, a child — the people you would use the familiar நீ with rather than நீங்கள். Reaching for அவன் about a stranger or an elder lands the way the familiar *you* would.

A learner in doubt is safer with அவர். Being a shade too polite passes without comment; the other direction does not.

Your turn

Say these aloud:

- அவன், அவள்
- which of the three words hides the person's sex
- which one you would use about somebody's grandmother
- the ending that அவர் and நண்பர் have in common

Before you move on

Which word is *she*? (அவள்.) Which is *he*? (அவன்.) Which one would you choose if you were unsure of the relationship? (அவர்.)

85.2 அவர்கள் — they, and an ending hiding in a word you already say

Say the polite word for *you*. Look at its last syllable.

You have been carrying a plural ending around since chapter two without being told it was one.

You'll want to know: அவர்கள்

அவர்கள் — *avarkaḷ* — **they**

It is அவர் with **-கள்** on the end, and **-கள்** is Tamil's plural. The same piece is sitting on the end of நீங்கள், which is why that word does double duty as a polite singular *you* and a plain plural *you*.

one	more than one
நீ	நீங்கள்
அவர்	அவர்கள்

The ending you have been pronouncing for eighty chapters turns out to be a word-building piece, and now it builds something for you rather than arriving pre-attached.

In the family, and next door

	word	same root
Malayalam	അവർ (*avar*)	yes
Hindi (neighbour)	वे (*ve*)	
English	they	

The word, taken apart — its roots and family

அவர்கள் (*avarkaḷ*) is native: *avar*, "that person", from the far base *a-* (DEDR 1, which lists *avarkaḷ*), with the plural ending *-kaḷ*.

Grammar Lens: the same double duty

அவர்கள் carries the same ambiguity as நீங்கள். About several people it is plainly *they*; about one person it is a step more respectful still than அவர் — the way some languages use a plural to raise the register.
Context settles which, and context usually settles it easily: a room with three people in it needs no disambiguation.

Your turn

Say these aloud:

- அவர்கள்
- the two pieces it is made of
- the word for polite *you*, and point at the same piece inside it
- what அவர்கள் can mean about a single person

Before you move on

What is Tamil's plural ending? (**-கள்**.) What is அவர்கள் built from? (அவர் plus that ending.) Which other word you already say carries it? (நீங்கள்.)

85.3 நாம் / நாங்கள் — two words for "we", and you have to choose

Say the word for *I*.

Now say *we*. Tamil will ask you a question first, and English never has.

You'll want to know: நாம் and நாங்கள்

நாம் — *nām* — **we**, counting the person you are talking to
நாங்கள் — *nāṅgaḷ* — **we**, not counting them

English has one *we* and hides which it means. Tamil has two and makes you decide every time.

you mean	**you say**
you and me	நாம்
me and them, but not you	நாங்கள்

"Shall we go?" said to a friend is நாம் — the invitation is the point. **"We went yesterday"** said to somebody who stayed behind is நாங்கள், and using நாம் there would tell them they had been present when they were not.

In the family, and next door

	word	**same root**
Malayalam	ഞങ്ങൾ (*ñaṅṅaḷ*)	yes
English	the two words for we	

The word, taken apart — its roots and family

நாம் / நாங்கள் (*nām / nāṅgaḷ*) is native Dravidian. DEDR 3647 lists Malayalam *nām*. The entry lists both *nām*, "we", and *nāṅkaḷ*, "we (not you)".

Grammar Lens: the piece you can already see

நாங்கள் ends in the plural **-கள்** met in the lesson before this one. நாம் does not, and that is a useful shape to hold on to: the shorter word is the one that gathers everybody in.

This distinction has no English equivalent to lean on, so it is worth practising as a question rather than as a pair of words. Before saying *we*, ask whether the person listening is inside it. The answer picks the word for you.

Your turn

Say these aloud:

- நாம், நாங்கள்
- which one you would use to invite a friend somewhere
- which one you would use telling a friend about a trip they missed
- which of the two carries the plural ending

Before you move on

Which *we* includes the listener? (நாம்.) Which leaves them out? (நாங்கள்.) What question do you ask yourself before choosing? (Whether the person listening is inside the *we*.)

85.4 (the people not here) — four words, from cold

Close the four lessons before this one. Say the word for *this person*, the one you have had since chapter thirty-seven.

Grammar Lens: the table, filled in

	near	far
respectfully	இவர்	அவர்
he / she	—	அவன் / அவள்
more than one	—	அவர்கள்

The far column was empty and its pattern had been taught. That is the shape of this chapter: the pointing system arrived long ago, correct and complete as a rule, with only half its cells ever handed over.

Grammar Lens: the question behind each choice

before you say	ask yourself
he or she	how close is this person to me
we	is my listener inside it

Both questions are ones English lets a speaker skip. Tamil asks them every time, and neither has a safe default you can lean on forever — though a learner in doubt about the first is better off one shade too polite.

Your turn

Say these aloud:

- the four words this chapter taught, from memory

- which front letter all but one of them carry
- which *we* invites the listener along
- the plural ending, and two words you know that carry it

Before you move on

Which word is respectful and hides the person's sex? (அவர்.) Which is *they*? (அவர்கள்.) Which *we* leaves the listener out? (நாங்கள்.)

85.5 (வணக்கம், நன்றி, சரி — and the how-are-you)

Greet someone. Then say the one word that means *fine*, *correct*, and *all right* at the same time.

You'll want to know: two facts about Tamil courtesy

Both of the opening words carry a claim the book made once and never returned to.

வணக்கம் is **native**. Neighbouring languages reached for a Sanskrit borrowing for the same bow; Tamil kept its own word and uses it across every setting, formal to casual. That is unusual enough in the region to be worth knowing.

நன்றி is native too — built on the word for *goodness* — and it comes with a pragmatic warning: among people who are close, saying thanks out loud can sound **marked**, a small distance opening where none was wanted. The word is correct; the question is whether the moment calls for it.

Grammar Lens: answering, and how few words it takes

you mean	you say
yes	ஆம்
no	இல்லை
fine, agreed, got it	சரி

சரி is the one that does the most work, because it answers three different questions — *is that right?*, *will you?*, *understood?* — with one

syllable pair and no change.

The exchange — how are you, both sides

- நீங்கள் எப்படி இருக்கிறீர்கள்? — how are you, respectfully
- நலம் — the answer, and the whole reply is *nāṉ nalamāga irukkiṟēṉ*
- எப்படி on its own — *how*, the question word inside it
- பரவாயில்லை — *no problem*, and also the Tamil for *you're welcome*

That last one is the pair worth holding: English keeps *no problem* and *you're welcome* apart, and Tamil hands you one phrase for both.

Your turn

Page covered, both sides out loud.

Say these aloud:

- the greeting, and say whether it is native or borrowed
- yes, no, and the agreeing word
- the whole how-are-you question, respectfully
- the answer, in full
- what you reply when somebody thanks you
- when saying thanks out loud might land badly

Before you move on

Which single Tamil phrase covers both *no problem* and *you're welcome*? (பரவாயில்லை.) And what is the risk of thanking a close friend out loud?

85.6 (உங்கள் பெயர் என்ன?) — four words, and the one that is missing

Say the word for *my*. Then the word for *what*.

Grammar Lens: the sentence with no verb in it

என் பெயர் ... is *my name …*, and there the sentence stops. No word stands where English puts **is**.
That is not an abbreviation or a casual drop. Tamil **does not need a verb to link two things**: put the two nouns side by side and the link is understood. The same silence sits inside the question — **உங்கள் பெயர் என்ன?** is *your name what?*, three words doing what English needs four to do.
Once you have seen it here, you have seen it everywhere it happens.

The exchange — both sides, end to end

move	what you say
ask	உங்கள் பெயர் என்ன?
answer	என் பெயர் ...
close it warmly	மகிழ்ச்சி

மகிழ்ச்சி is worth its own moment: the word is *joy*, and nothing more. It is not a built phrase meaning *pleased to meet you* — it is one noun, offered, and the occasion supplies the rest.

Your turn

Cover the table. Take both parts.

Say these aloud:

- the question, respectfully
- your own answer, with your name in it
- the warm word that closes a first meeting
- what **மகிழ்ச்சி** means on its own
- where English would put a word that Tamil leaves out

Before you move on

How many words does Tamil need for *what is your name?*, and which English word has no Tamil counterpart in it? (**Three; is**.)

85.7 (போய் வருகிறேன் — and the first four verbs)

Say the verb for *go*. Then the verb for *speak*.

Why it's said this way

போய் வருகிறேன் is what a Tamil speaker says on leaving, and it does not mean *goodbye*. It means **I will go and come back**.

what you say	what it literally says
போய் வருகிறேன்	I will go and come back
மீண்டும் சந்திப்போம்	we will meet once more
நாளை பார்க்கலாம்	tomorrow, let us see

Read the right-hand column down and the pattern is unmistakable: **not one of the three names the parting**. Each one names the next meeting instead. A language can decline to have a word for goodbye, and this one does.

Grammar Lens: four verbs, two shapes

போ *go* · பேசு *speak* · வாழ் *live, flourish* — three plain stems. Then வேலை செய், which is not one word but two: *work* plus *do*. That second shape is worth naming, because Tamil uses it constantly. A noun parked in front of செய் makes a verb out of it, which is how the language keeps borrowing things to do without borrowing verbs to do them with.

And நான் தமிழ் பேசுகிறேன் shows what the stem does under pressure: பேசு takes a tense piece and then a person piece, in that order, and the speaker is named at both ends of the sentence.

Your turn

Cover both tables.

Say these aloud:

- all three farewells, and what each one literally promises
- the four verbs
- which of the four is built from a noun plus a doing-word

- *I speak Tamil*, whole
- the two pieces that attach to a stem, in order

Before you move on

What does the everyday Tamil leave-taking literally say? (**I will go and come back**.) And which verb on this page is two words wearing one job?

Chapter 86

The One It Is Done To

Modes: **voice** (3) **eyes** (3) **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can mark the object of a verb with -ai, say me and you as objects, and tell when the ending is compulsory and when it is a choice that means 'the'.
>
> *From cold: the accusative ending and which end of the word it sits on, the two pronoun objects and the changed bodies they stand on, and the one question — is the object a person — that decides whether the ending may be left off.*

86.1 -ஐ — your second case ending

Your first case ending was **-உக்கு**, and what it taught was bigger than its meaning: English puts a word in front, Tamil sticks a piece on the back.

Here is the second piece, and it goes on the same end.

You'll want to know: -ஐ

-ஐ — *-ai* — **marks the one the verb is done to**

A sentence can have two people in it, and something has to say which of them is doing and which is being done to. **English uses position**: *the teacher saw the child* and *the child saw the teacher* are built from the same three words and mean opposite things, and the only signal is the order.

Tamil marks the one being done to, and then the order stops carrying the weight:

நான் அவரை நினைக்கிறேன்

nāṉ ***avarai*** *ninaikkiṟēṉ* — “I think of them”

அவர் became அவரை. Nothing else moved. The verb you already know from the thinking chapter did not change, and *nāṉ* is still optional because the *-ēṉ* on the end is already saying “I”.

The word, taken apart — its roots and family

-ஐ (*-ai*) is the native Dravidian accusative ending. It is a suffix, not a word, so the etymological dictionary gives it no entry of its own; Malayalam marks the same case with *-e*.

Grammar Lens: where the two endings sit

the word	+ ending	what it says
அவர்	அவர்உக்கு → அவருக்கு	to them, for them
அவர்	அவர்ஐ → அவரை	them, as the one it is done to

Two endings, one place to put them, and the noun underneath is the same word both times. **A case ending in Tamil is a seam you can see**, which is the thing the dative chapter said was the biggest structural fact about the language — and this is the second piece of evidence for it rather than a new idea.

Your turn

Say these aloud:

- “avar … avarai”
- “nāṉ avarai ninaikkiṟēṉ”
- which word in that sentence is the one being thought of, and how you can tell
- “avarukku” and “avarai” one after the other, and what each of them does

Before you move on

What does **-ஐ** mark? (**The one the verb is done to**.) Where does it go? (**On the end of the word**, like every Tamil case ending.) What is *avar* as the one it is done to? (***Avarai***.) And what does English use instead of an ending here? (**Position** — which word comes first.)

86.2 என்னை / உன்னை — the body you already changed once

Say "to me". Then say the word for "I" on its own.

They do not look like each other, and the dative chapter told you why: the pronoun changes its body before an ending lands on it.

You'll want to know: என்னை and உன்னை

என்னை — *eṉṉai* — **me**, as the one it is done to **உன்னை** — *uṉṉai* — **you**, as the one it is done to

These cost you nothing new. You changed *nāṉ* into *eṉ-* to build *enakku* chapters ago. That changed body is the same one **-ஐ** lands on:

the word	to / for	the one it is done to
நான் *nāṉ* — I	எனக்கு *enakku*	என்னை *eṉṉai*
நீ *nī* — you	உனக்கு *unakku*	உன்னை *uṉṉai*

Read down the middle column and then down the right one. **The left part of each word never changes once you have it.** Learning the body is the work; the endings are the cheap part, and there are only so many of them.

என்னை நினை

eṉṉai ninai — "think of me"

A bare verb stem is already a command — you met that with *pō!* in the farewell chapter — so this is a whole sentence with no machinery you have not used.

The word, taken apart — its roots and family

என்னை / உன்னை (*en̲n̲ai / un̲n̲ai*) are the native pronouns with the accusative *-ai*: *en̲-*, the joining form of "I" (DEDR 5160), and *un̲-*, the joining form of "you" (DEDR 3684).

Your turn

Say these aloud:

- "enakku … en̲n̲ai"
- "unakku … un̲n̲ai"
- the part of those four words that never changes
- "en̲n̲ai ninai" — think of me

Before you move on

What is *me*, as the one it is done to? (***En̲n̲ai***.) And *to me*? (***Enakku***.) What do those two have in common? (**The changed body *en̲-***.) Which of the two endings would you put on it to say "for you"? (**-உக்கு**, on *un̲-*.)

86.3 தேநீர் / தேநீரை — when the ending is a choice

Say "I think of them". Say which piece of that sentence marks the one being thought of.

Now the part nobody tells you: that piece is not always required.

Grammar Lens: a person must have it, a thing need not

அவரை நினைக்கிறேன் — I think of **them**

தேநீர் வாங்குகிறேன் — I buy tea

தேநீரை வாங்குகிறேன் — I buy **the** tea

On a person the ending is obligatory. Leaving it off does not make a casual sentence; it makes a broken one.

On a thing it is a choice, and the choice carries meaning. Bare தேநீர் is tea in general, the kind of thing you buy. தேநீரை is *that* tea, a particular one already in view. Tamil has no word for *the*, and this is one of the places the job gets done instead.

the object is	**the ending**
a person	required
a thing, in general	usually left off
a thing, a particular one	put on

The word, taken apart — its roots and family

தேநீர் / தேநீரை (*tēnīr / tēnīrai*) is *tēnīr*, "tea", with the accusative *-ai*. *Tēnīr* is the travelling word *tē*, "tea", and native *nīr*, "water" (DEDR 3690; it compares Sanskrit *nīra*).

Across the family: the same line, drawn at the other end

Spanish draws this line too, and a Spanish learner has met it: *veo la casa* ("I see the house") against *veo* ***a*** *María* ("I see María"). A human object gets a marker; a thing does not.
Spanish puts that marker in front of the word as a separate piece. Tamil sticks it on the back. Same distinction between a person and a thing, opposite end of the word — which is the difference the dative chapter opened with, now showing up in a second place.

Your turn

Say these aloud:

- "avarai ninaikkiṟēṉ"
- "tēnīr vāṅgugiṟēṉ" and then "tēnīrai vāṅgugiṟēṉ"
- which of those two is about a particular tea
- which of the three objects could not drop the ending, and why

Before you move on

When is **-ஐ** obligatory? (**When the object is a person**.) What does putting it on a thing add? (**That it is a particular one** — Tamil has no word for *the*.) And where does Spanish put its marker for a human object? (**In front**, as a separate word, where Tamil puts it on the back.)

86.4 (the one it is done to) — from cold

Close the lessons before this one. Say the ending that marks the one a verb is done to, and say which end of the word it goes on.

Grammar Lens: one ending, one question

the object	with the ending	required?
அவர் — that person	அவரை	yes
நான் — I	என்னை	yes
நீ — you	உன்னை	yes
தேநீர் — tea	தேநீரை	only for a particular one

Three of the four rows are people, and people have no choice. The question to ask of an object is not *is this the subject or the object* — the ending answers that — but **is this a person**.

Two things carry over from earlier chapters rather than being new here. The pronouns stand on the changed bodies **en-** and **un-** that the dative built. And the ending sits on the back of the word, which is what your first case ending taught and what separates this language from the one that would put a word in front.

Your turn

Say these aloud:

- the four objects in the table, each with its ending
- “avarai ninaikkirēn” and “ennai ninai”
- which row of the table lets you choose, and what choosing adds

- the two words that share the body en-

Before you move on

What is *them*, as the one it is done to? (***Avarai***.) What is *me*? (***Eṉṉai***.) When may the ending be left off? (**On a thing, when it is not a particular one**.) And what has to be true before it is compulsory? (**The object is a person**.)

86.5 (இவர், விடை, and the two we-words) — one idea in four places

Introduce the person standing beside you as your friend.

Grammar Lens: the two words for we

word	who it covers
நாம்	me, and **you too**
நாங்கள்	me and my people, **but not you**

English has one *we* and leaves the listener guessing. Tamil makes you choose before you open your mouth, and the choice is audible to everyone in the room.
Getting it wrong is not a grammar slip — it either includes somebody you meant to exclude or shuts out somebody standing right there.

You'll want to know: இவர், and the ending that judges

இவர் என் நண்பர் — *this is my friend* — is three words with no verb in the middle, the same silence the name sentence had.

What it adds is a **choice of ending**. நண்பர் carries respect; a plainer ending would not. Introducing someone in Tamil therefore states your regard for them out loud, in front of them, whether or not you meant to say anything about it.

You'll want to know: விடை

விடை is *leave to depart* — a noun for the act of taking your leave, sharing a root with வீடு, the house.

Set it beside the farewells: the everyday one promises a return, and this word names the departure itself. Tamil has both, and it reserves the naming one for the heavier moment.

Your turn

Page covered.

Say these aloud:

- which we-word takes the listener in
- which one shuts them out
- *this is my friend*, respectfully
- what the ending on that last word tells the listener
- the noun for taking your leave, and the house-word it is related to

Before you move on

You are talking to a colleague about a plan the two of you share — which we-word do you reach for? (நாம்.) And which noun names the act of leaving rather than promising a return?

86.6 (the fifteen that came once) — the last page

Read உ, then ப.

What you've built, and what this page does with it

Everything here has come round twice in your reading: once where it was taught, once on a retrieval page in this last stretch. A second pass is where memory starts holding without the book, and the widest gap on offer runs from the opening pages to this one.

Script: three pieces, one of them yours to draw

உ standing · ◌ி hanging · ப a consonant · ஒ standing o · ◌ொ the sign built from two marks.

Read these aloud:

- உ, and say whether it is a letter or a sign
- ி, and say what it replaces
- ஓ and ோ — the same vowel standing, then hanging

Read this

சரி · பெயர் · இருக்கிறீர்கள் · போ · ஒன்று
No glosses this time. Read each one and say what it means before moving on. The long one in the middle is the test: eight pieces, and you have met every piece.

The exchange — five of them, unprompted

The book opened with five, and an examiner opens with the same ones:

1. greet, and answer a thank-you
2. trade names, both sides, closing warmly
3. ask after the person, and reply in full
4. take your leave, promising the next meeting
5. say what you speak, and what you do

Your turn

Page covered.

- *Say it:* exchange 2 above, both sides
- *Say it:* exchange 3 above, both sides
- *Say it:* exchange 1, then exchange 4, back to back
- *Say it:* exchange 5, about yourself
- *Write it:* சரி

Before you move on

Which sign on this page wraps around its consonant on both sides? (𑄢𑄧𑄃𑄬.) And which of the five exchanges would you want one more run at before somebody asks for it cold?

Chapter 87

Not Feeling Well

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say I am tired or weary, have a cold or a cough, and tell someone to rest.
>
> *Complete the last lesson of chapter 87: I can say I am tired or weary, have a cold or a cough, and tell someone to rest.*

87.1 களைப்பு (kaḷaippu) — tiredness

> Before the new one: say the Tamil for hunger, then the Tamil for sleep.

You'll want to know: களைப்பு

களைப்பு (*kaḷaippu*) — "tiredness".

எனக்குக் களைப்பாக இருக்கிறது — "I feel tired", literally "to me it is tired-ly". The person sits in **எனக்கு**, "to me".

In the family, and next door

	word
Kannada	ಆಯಾಸ (*āyāsa*)
Telugu	అలసట (*alasaṭa*)
Malayalam	ക്ഷീണം (*kṣīṇaṁ*)
Hindi (neighbour)	थकान (*thakān*)
English	tiredness

The word, taken apart — its roots and family

களைப்பு (*kaḷaippu*) is the noun of *kaḷai*, "to be weary". It looks native, but DEDR has no entry for this verb (its *kaḷai* means "to weed"), so the origin is uncertain.

What you've built

A first word for how the body feels.

Your turn

- *Say it: kaḷaippu*
- *Say it: kaḷaippu*, once more
- *Say it:* say *eṉakkuk kaḷaippāka irukkiṟatu*
- *Recall:* say the Tamil for hunger, then the Tamil for sleep, then say *kaḷaippu* again

Before you move on

What does களைப்பு mean? ("Tiredness".) Say it once more.

87.2 சளி (caḷi) — a cold, a runny nose

Before the new one: say the Tamil for sleep, then the Tamil for tiredness.

You'll want to know: சளி

சளி (*caḷi*) — "a cold", the kind with a runny nose.

எனக்குச் சளி பிடித்திருக்கிறது — "I have caught a cold", literally "a cold has caught me".

In the family, and next door

	word
Kannada	ಶೀತ (*śīta*)
Malayalam	ജലദോഷം (*jaladōṣaṁ*)
Hindi (neighbour)	ज़ुकाम (*zukām*)
English	a cold, a runny nose

The word, taken apart — its roots and family

சளி (*caḷi*) is native Dravidian. DEDR 2409 lists Malayalam *caḷi*, "mucus".

What you've built

An illness that catches you.

Your turn

- *Say it: caḷi*
- *Say it: caḷi*, once more
- *Say it:* say *eṉakkuc caḷi piṭittirukkiṟatu*
- *Recall:* say the Tamil for sleep, then the Tamil for tiredness, then say *caḷi* again

Before you move on

What does சளி mean? ("A cold, a runny nose".) Say it once more.

87.3 இருமல் (irumal) — a cough

Before the new one: say the Tamil for tiredness, then the Tamil for a cold.

You'll want to know: இருமல்

இருமல் (*irumal*) — "a cough".

இருமல் இருக்கிறது — "there is a cough", the plain way to tell a doctor.

In the family, and next door

	word
Kannada	ಕೆಮ್ಮು (*kemmu*)
Telugu	దగ్గు (*daggu*)
Malayalam	ചുമ (*cuma*)
Hindi (neighbour)	खाँसी (*khā̃sī*)
English	a cough

The word, taken apart — its roots and family

இருமல் (*irumal*) is native Dravidian. DEDR 489 lists Malayalam *irumal*, "a cough". The entry also lists the verb *irumu*, "to cough".

What you've built

A second complaint.

Your turn

- *Say it: irumal*
- *Say it: irumal*, once more
- *Say it:* say *irumal irukkiṟatu*
- *Recall:* say the Tamil for tiredness, then the Tamil for a cold, then say *irumal* again

Before you move on

What does இருமல் mean? ("A cough".) Say it once more.

87.4 சோர்வு (cōrvu) — weariness, fatigue

Before the new one: say the Tamil for a cold, then the Tamil for a cough.

You'll want to know: சோர்வு

சோர்வு (*cōrvu*) — "weariness", the drained feeling after an illness.

களைப்பு is the tiredness of a long day; சோர்வு lasts longer. சோர்வாக இருக்கிறது — "I feel worn out".

In the family, and next door

	word
Kannada	ಸುಸ್ತು (*sustu*)
English	weariness, fatigue

The word, taken apart — its roots and family

சோர்வு (*cōrvu*) is native Dravidian (DEDR 2884). It is the noun of *cōr*, "to grow slack, to droop".

What you've built

Two kinds of tired.

Your turn

- *Say it: cōrvu*
- *Say it: cōrvu*, once more
- *Say it:* say *cōrvāka irukkiṟatu*

98.3 பரிசு (paricu) — a gift, a prize

Before the new one: say the Tamil for congratulations, then the Tamil for an invitation.

You'll want to know: பரிசு

பரிசு (*paricu*) — "a gift", and "a prize".
உங்களுக்கு ஒரு பரிசு — "a gift for you".

In the family, and next door

	word
Kannada	ಉಡುಗೊರೆ (*uḍugore*)
Telugu	బహుమతి (*bahumati*)
Malayalam	സമ്മാനം (*sammānaṁ*)
English	a gift, a prize

The word, taken apart — its roots and family

பரிசு (*paricu*) belongs with *paricil*, "gift, present", in DEDR 3970, beside Malayalam *pariyam*, "a token given to the bride". The entry notes a proposal to derive the family from Sanskrit *sparśa*, "touch"; that is not settled.

What you've built

Something to bring.

Your turn

- *Say it: paricu*
- *Say it: paricu*, once more
- *Say it:* say *uṅkaḷukku oru paricu*
- *Recall:* say the Tamil for congratulations, then the Tamil for an invitation, then say *paricu* again

Before you move on

What does பரிசு mean? ("A gift, a prize".) Say it once more.

98.4 வாருங்கள் (vāruṅkaḷ) — please come (in)

Before the new one: say the Tamil for an invitation, then the Tamil for a gift.

You'll want to know: வாருங்கள்

வாருங்கள் (*vāruṅkaḷ*) — "please come", "come in".

It is the verb **வா**, "come", with the respectful **-ங்கள்**. At the door, it is the welcome.

The word, taken apart — its roots and family

வாருங்கள் (*vāruṅkaḷ*) is native Dravidian. DEDR 5270 lists Malayalam *varuka*. It is *vā*, "come", with the polite ending *-uṅkaḷ*.

What you've built

A welcome at the door.

Your turn

- *Say it: vāruṅkaḷ*
- *Say it: vāruṅkaḷ*, once more

99.1 குடியுங்கள் (kuṭiyuṅkaḷ) — please drink

> Before the new one: say the Tamil for please come in, then the Tamil for please eat.

You'll want to know: குடியுங்கள்

குடியுங்கள் (*kuṭiyuṅkaḷ*) — "please drink".

தண்ணீர் குடியுங்கள் — "please have some water".

Notice தண்ணீர்: it is the thing being drunk, and it carries no **-ஐ**. A thing can do without the ending that a person must have.

The word, taken apart — its roots and family

குடியுங்கள் (*kuṭiyuṅkaḷ*) is native Dravidian. DEDR 1654 lists Malayalam *kuṭi* and Kannada *kuḍi*. It is *kuḍi*, "drink", with the polite ending. DEDR compares Sanskrit *kuṭī*, "liquor".

What you've built

Food, and now drink.

Your turn

99.4 மன்னித்துவிடுங்கள் (maṉṉittuviṭuṅkaḷ) — please forgive me

Before the new one: say the Tamil for a present, then the Tamil for a formal welcome.

You'll want to know: மன்னித்துவிடுங்கள்

மன்னித்துவிடுங்கள் (*maṉṉittuviṭuṅkaḷ*) — "please forgive me".

It is fuller and more earnest than மன்னிக்கவும்: for a real mistake, not a bumped elbow.

The word, taken apart — its roots and family

மன்னித்துவிடுங்கள் (*maṉṉittuviṭuṅkaḷ*) is *maṉṉi*, "to pardon", with *viṭu*, "to let go" (DEDR 5393), and the polite ending. The origin of *maṉṉi* is uncertain: DEDR has no entry for it.

What you've built

A fuller apology.

Your turn

போகலாம் (*pōkalām*) is native Dravidian. DEDR 4572 lists Malayalam *pōka*. It is *pō*, "to go", with *-kalām*, "let us".

What you've built

Late, so let's go.

Your turn

- *Say it:* *pōkalām*
- *Say it:* *pōkalām*, once more
- *Say it:* say *pōkalām*
- *Recall:* say the Tamil for safely, then the Tamil for it has got late, then say *pōkalām* again

Before you move on

What does போகலாம் mean? ("Let's go".) Say it once more.

106.5 விடுமுறை (viṭumuṟai) — a holiday

Before the new one: say the Tamil for it has got late, then the Tamil for let's go.

You'll want to know: விடுமுறை

விடுமுறை (*viṭumuṟai*) — "a holiday", "leave".
இன்று விடுமுறை — "today is a holiday".

In the family, and next door

	word
Kannada	ರಜೆ (*raje*)
Malayalam	അവധി (*avadhi*)
Hindi (neighbour)	छुट्टी (*chuṭṭī*)
English	a holiday

The word, taken apart — its roots and family

விடுமுறை (*viṭumuṟai*) is native: *viṭu*, "to leave, to free" (DEDR 5393), and *muṟai*, "turn, time" (DEDR 5015): "a time of release".

What you've built

Take care, safely, it's late, let's go, a holiday.

Your turn

- *Say it: viṭumuṟai*
- *Say it: viṭumuṟai*, once more
- *Say it:* say *iṉṟu viṭumuṟai*
- *Recall:* say the Tamil for it has got late, then the Tamil for let's go, then say *viṭumuṟai* again

Before you move on

What does விடுமுறை mean? ("A holiday".) Say it once more.

107.1 விடைபெறுகிறேன் (viṭaipe̱rukiṟē̱n) — I take my leave

> Before the new one: say the Tamil for let's go, then the Tamil for a holiday.

You'll want to know: விடைபெறுகிறேன்

விடைபெறுகிறேன் (*viṭaipe̱rukiṟē̱n*) — "I take my leave", literally "I receive leave".

விடை is "leave, permission". The formal goodbye.

The word, taken apart — its roots and family

விடைபெறுகிறேன் (*viṭaipe̱rukiṟē̱n*) is native: *viṭai*, "leave, permission to go" (DEDR 5393), and *pe̱ru*, "to get" (DEDR 4422): "I get my leave".

What you've built

A formal way out of a room.

Your turn

- *Say it: viṭaipeṟukiṟēṉ*
- *Say it: viṭaipeṟukiṟēṉ*, once more
- *Say it:* say *viṭaipeṟukiṟēṉ*
- *Recall:* say the Tamil for let's go, then the Tamil for a holiday, then say *viṭaipeṟukiṟēṉ* again

Before you move on

What does விடைபெறுகிறேன் mean? ("I take my leave".) Say it once more.

107.2 கிளம்பலாமா? (kiḷampalāmā?) — shall we leave?

Before the new one: say the Tamil for a holiday, then the Tamil for I take my leave.

You'll want to know: கிளம்பலாமா?

கிளம்பலாமா? (*kiḷampalāmā?*) — "shall we leave?".
கிளம்பு is "to set out"; **-லாமா** asks "shall we?".

The word, taken apart — its roots and family

கிளம்பலாமா? (*kiḷampalāmā?*) is native Dravidian. DEDR 1583 lists Malayalam *kiḷampuka*, "to rise". The entry lists *kiḷampu*, "to rise, to start up": to leave is to get up and go.

What you've built

A gentle nudge to go.

Your turn

- *Say it: kiḻampalāmā?*
- *Say it: kiḻampalāmā?*, once more
- *Say it:* ask *kiḻampalāmā?*
- *Recall:* say the Tamil for a holiday, then the Tamil for I take my leave, then say *kiḻampalāmā?* again

Before you move on

What does கிளம்பலாமா? mean? ("Shall we leave?".) Say it once more.

107.3 அப்புறம் பார்க்கலாம் (appuṟam pārkkalām) — see you later

Before the new one: say the Tamil for I take my leave, then the Tamil for shall we leave.

You'll want to know: அப்புறம் பார்க்கலாம்

அப்புறம் பார்க்கலாம் (*appuṟam pārkkalām*) — "see you later".

அப்புறம் is "afterwards"; பார்க்கலாம் is "we can see (each other)". To one friend: உன்னை அப்புறம் பார்க்கிறேன் — "I'll see you later", with உன்னை, "you" as the one it is done to.

The word, taken apart — its roots and family

அப்புறம் பார்க்கலாம் (*appuṟam pārkkalām*) is native: *appuṟam*, "after that", from the far base *a-* (DEDR 1) and *puṟam*, "side" (DEDR 4333), and *pārkkalām*, "let us see", from *pār* (DEDR 4091).

What you've built

A casual goodbye.

Your turn

- *Say it: appuṟam pārkkalām*
- *Say it: appuṟam pārkkalām*, once more
- *Say it:* say *appuṟam pārkkalām*
- *Recall:* say the Tamil for I take my leave, then the Tamil for shall we leave, then say *appuṟam pārkkalām* again

Before you move on

What does அப்புறம் பார்க்கலாம் mean? ("See you later".) Say it once more.

107.4 இனிய பயணம் (iṉiya payaṇam) — have a good journey

Before the new one: say the Tamil for shall we leave, then the Tamil for see you later.

You'll want to know: இனிய பயணம்

இனிய பயணம் (*iṉiya payaṇam*) — "have a good journey", literally "a sweet journey".

இனிய is "sweet, pleasant".

In the family, and next door

	word
Hindi (neighbour)	शुभ यात्रा (*śubh yātrā*)
English	have a good journey

The word, taken apart — its roots and family

இனிய பயணம் (*iṉiya payaṇam*) is native *iṉiya*, "sweet, pleasant" (DEDR 530), and *payaṇam*, "journey", from Sanskrit *prayāṇa* (CDIAL 8732).

What you've built

A wish for someone setting off.

Your turn

- *Say it: iṉiya payaṇam*
- *Say it: iṉiya payaṇam*, once more
- *Say it:* say *iṉiya payaṇam!*
- *Recall:* say the Tamil for shall we leave, then the Tamil for see you later, then say *iṉiya payaṇam* again

Before you move on

What does இனிய பயணம் mean? (“Have a good journey”.) Say it once more.

107.5 மீண்டும் வாருங்கள் (mīṇṭum vāruṅkaḷ) — please come again

Before the new one: say the Tamil for see you later, then the Tamil for a good journey.

You’ll want to know: மீண்டும் வாருங்கள்

மீண்டும் வாருங்கள் (*mīṇṭum vāruṅkaḷ*) — “please come again”.
மீண்டும் is “again”, with the welcome வாருங்கள்.

The word, taken apart — its roots and family

மீண்டும் வாருங்கள் (*mīṇṭum vāruṅkaḷ*) is native: *mīṇṭum*, “again”, from *mīḷ*, “to return” (DEDR 4883), and *vā*, “come” (DEDR 5270), with the polite ending.

What you’ve built

Take leave, shall we go, see you, a good journey, come again.

Your turn

- *Say it: mīṇṭum vāruṅkaḷ*
- *Say it: mīṇṭum vāruṅkaḷ*, once more

- *Say it:* say *mīṇṭum vāruṅkaḷ*
- *Recall:* say the Tamil for see you later, then the Tamil for a good journey, then say *mīṇṭum vāruṅkaḷ* again

Before you move on

What does மீண்டும் வாருங்கள் mean? (“Please come again”.) Say it once more.

Chapter 108

Greetings People Actually Say

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

>
> *Complete the last lesson of chapter 108: I can greet someone the way Tamil speakers do day to day: have you eaten, long time, what's new, are you well, how are you.*

108.1 சாப்பிட்டீர்களா? (cāppiṭṭīrkaḷā?) — have you eaten?

> Before the new one: say the Tamil for a good journey, then the Tamil for come again.

You'll want to know: சாப்பிட்டீர்களா?

சாப்பிட்டீர்களா? (*cāppiṭṭīrkaḷā?*) — "have you eaten?".

Around a mealtime it is a greeting and a kindness, built on **சாப்பிடு**, "eat".

In the family, and next door

	word
Kannada	**ಊಟ ಆಯ್ತಾ** (*ūṭa āytā*)
Telugu	**భోంచేశారా?** (*bhōñcēśārā?*)
Hindi (neighbour)	**खाना खाया?** (*khānā khāyā?*)
English	have you eaten?

The word, taken apart — its roots and family

சாப்பிட்டீர்களா? (*cāppiṭṭīrkaḷā?*) is the past of *sāppiḍu*, "to eat" (*sāppu*, "food", with *iḍu*, "to put", DEDR 442), with the question ending *-ā*.

What you've built

A greeting about food.

Your turn

- *Say it: cāppiṭṭīrkaḷā?*
- *Say it: cāppiṭṭīrkaḷā?*, once more
- *Say it:* ask *cāppiṭṭīrkaḷā?*
- *Recall:* say the Tamil for a good journey, then the Tamil for come again, then say *cāppiṭṭīrkaḷā?* again

Before you move on

What does சாப்பிட்டீர்களா? mean? ("Have you eaten?".) Say it once more.

108.2 ரொம்ப நாளாச்சு (rompa nāḷāccu) — it's been a long time

Before the new one: say the Tamil for come again, then the Tamil for have you eaten.

You'll want to know: ரொம்ப நாளாச்சு

ரொம்ப நாளாச்சு (*rompa nāḷāccu*) — "it's been a long time", in everyday speech.

ரொம்ப is spoken "very"; நாள் is "day".

In the family, and next door

	word
Kannada	ತುಂಬಾ ದಿನ ಆಯ್ತು (*tumbā dina āytu*)
Telugu	చాలా రోజులైంది (*cālā rōjulaindi*)
Hindi (neighbour)	बहुत दिन हो गए (*bahut din ho gae*)
English	it's been a long time

The word, taken apart — its roots and family

ரொம்ப நாளாச்சு (*rompa nāḷāccu*) is native: *rompa*, "very", the spoken form of *nirampa*, "fully", from *nira*, "to be full" (DEDR 3672), and *nāḷ*, "day" (DEDR 3656), with *āccu*, "it has become": "it has been many days".

What you've built

A greeting for someone you have not seen.

Your turn

- *Say it: rompa nāḷāccu*
- *Say it: rompa nāḷāccu*, once more
- *Say it:* say *rompa nāḷāccu!*
- *Recall:* say the Tamil for come again, then the Tamil for have you eaten, then say *rompa nāḷāccu* again

Before you move on

What does ரொம்ப நாளாச்சு mean? ("It's been a long time".) Say it once more.

108.3 என்ன விசேஷம்? (enna vicēṣam?) — what's new?

Before the new one: say the Tamil for have you eaten, then the Tamil for it's been a long time.

You'll want to know: என்ன விசேஷம்?

என்ன விசேஷம்? (*ennā vicēṣam?*) — "what's new?", literally "what's special?".

In the family, and next door

	word
Kannada	**ಏನು ಸಮಾಚಾರ** (*ēnu samācāra*)
Telugu	**ఏంటి సంగతి**? (*ēṇṭi saṅgati?*)
English	what's new?

The word, taken apart — its roots and family

என்ன விசேஷம்? (*ennā vicēṣam?*) is native *ennā*, "what" (DEDR 5151), and *vicēṣam*, "news, something special", a well-established loan from Sanskrit *viśeṣa*, "distinction, something particular".

What you've built

A friendly opener.

Your turn

- *Say it:* *ennā vicēṣam?*
- *Say it:* *ennā vicēṣam?*, once more
- *Say it:* ask *ennā vicēṣam?*
- *Recall:* say the Tamil for have you eaten, then the Tamil for it's been a long time, then say *ennā vicēṣam?* again

Before you move on

What does **என்ன விசேஷம்**? mean? ("What's new?".) Say it once more.

108.4 நல்லா இருக்கீங்களா? (nallā irukkīṅkaḷā?) — are you well? (spoken)

Before the new one: say the Tamil for it's been a long time, then the Tamil for what's new.

You'll want to know: நல்லா இருக்கீங்களா?

நல்லா இருக்கீங்களா? (*nallā irukkīṅkaḷā?*) — "are you well?", as people say it.

நல்லா is spoken நன்றாக, "well".

In the family, and next door

	word
Kannada	ಕ್ಷೇಮವೇ (*kṣēmavē*)
Telugu	బాగున్నారా? (*bāgunnārā?*)
English	are you well?

The word, taken apart — its roots and family

நல்லா இருக்கீங்களா? (*nallā irukkīṅkaḷā?*) is native: *nallā*, spoken for *nallāka*, "well", from *nal*, "good" (DEDR 3610), and *iru*, "to be" (DEDR 480).

What you've built

The spoken shape of a question you know.

Your turn

- *Say it: nallā irukkīṅkaḷā?*
- *Say it: nallā irukkīṅkaḷā?*, once more
- *Say it:* ask *nallā irukkīṅkaḷā?*
- *Recall:* say the Tamil for it's been a long time, then the Tamil for what's new, then say *nallā irukkīṅkaḷā?* again

Before you move on

What does நல்லா இருக்கீங்களா? mean? ("Are you well? (spoken)".) Say it once more.

108.5 எப்படி இருக்கீங்க? (eppaṭi irukkīṅka?) — how are you? (spoken)

Before the new one: say the Tamil for what's new, then the Tamil for are you well.

You'll want to know: எப்படி இருக்கீங்க?

எப்படி இருக்கீங்க? (*eppaṭi irukkīṅka?*) — "how are you?", the everyday spoken form.

It is the written **எப்படி இருக்கிறீர்கள்?** worn short in speech.

In the family, and next door

	word
Kannada	ನೀವು ಹೇಗಿದ್ದೀರಾ? (*nīvu hēgiddīrā*)
Telugu	మీరు ఎలా ఉన్నారు? (*mīru elā unnāru?*)
Malayalam	സുഖമാണോ? (*sukhamāṇō?*)
Hindi (neighbour)	आप कैसे हैं? (*āp kaise haiṁ?*)
English	how are you?

The word, taken apart — its roots and family

எப்படி இருக்கீங்க? (*eppaṭi irukkīṅka?*) is native: *eppaṭi*, "how" (DEDR 5151), and *iru*, "to be" (DEDR 480), in its spoken form.

What you've built

Five greetings people actually use.

Your turn

- *Say it: eppaṭi irukkīṅka?*
- *Say it: eppaṭi irukkīṅka?*, once more
- *Say it:* ask *eppaṭi irukkīṅka?*
- *Recall:* say the Tamil for what's new, then the Tamil for are you well, then say *eppaṭi irukkīṅka?* again

Before you move on

What does எப்படி இருக்கீங்க? mean? ("How are you? (spoken)".) Say it once more.

108.6 Hello and goodbye, the everyday way — a second pass

You meet an old friend around lunchtime. Say two things.

Grammar Lens: written and spoken

spoken	written
நல்லா இருக்கீங்க	நன்றாக இருக்கிறீர்கள்

Spoken Tamil wears the written forms short. Both are right; they are for different places.

Your turn

Say these aloud:

- ask a friend how they are, the spoken way; then what's new
- at the door: shall we leave? see you later
- wish a traveller a good journey; ask them to come again
- take your leave formally

Before you move on

I take my leave? (விடைபெறுகிறேன்.) Shall we leave? (கிளம்பலாமா?) See you later? (அப்புறம் பார்க்கலாம்.) A good journey? (இனிய பயணம்.) Come again? (மீண்டும் வாருங்கள்.) Have you eaten? (சாப்பிட்டீர்களா?) Long time? (ரொம்ப நாளாச்சு.) What's new? (என்ன விசேஷம்?) Are you well? (நல்லா இருக்கீங்களா?) How are you? (எப்படி இருக்கீங்க?)

108.7 Leaving well — a second pass

It has got late. Say so, and suggest you all go.

Your turn

Say these aloud:

- tell your host to take care; they tell you to go safely
- say tomorrow is a holiday
- next week, greet the same host: are you well? how are you?

Before you move on

Take care? (பார்த்துக்கொள்ளுங்கள்.) Safely? (பத்திரமாக.) It's late? (நேரமாகிவிட்டது.) Let's go? (போகலாம்.) A holiday? (விடுமுறை.) Are you well? (நல்லா இருக்கீங்களா?) How are you? (எப்படி இருக்கீங்க?)

Letters From Your First Words

Modes: ✓ **pen** (3) 🚗 **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can write the letters i and sa and the vowel sign ai, and find each one in a word I have said since chapter 1.
>
> *Complete the last lesson of chapter 109: I can write the letters i and sa and the vowel sign ai, and find each one in a word I have said since chapter 1.*

109.1 இ — the letter that opens இல்லை

Before the new one: read உ and ஓ aloud, and write each once.

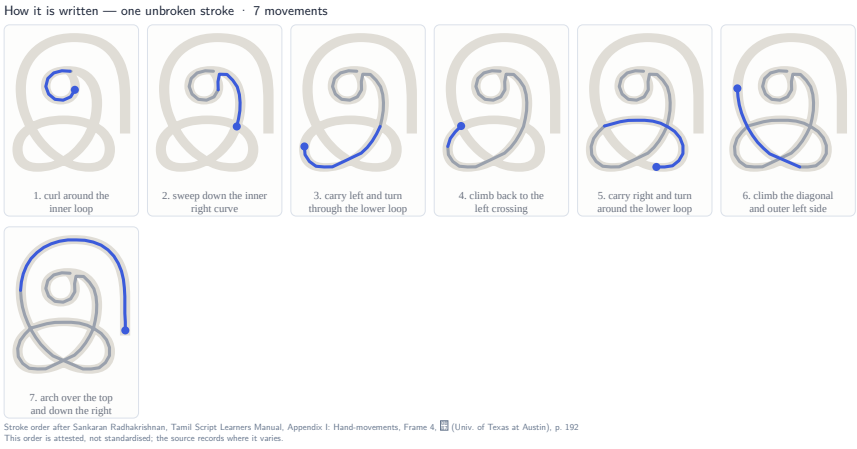

Now say இல்லை (*illai*), "no". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: இ

இ — *i*.

It is the letter at the front of இல்லை (*illai*), "no", one of the first words in this book. You have been writing its **sign**, ி, since நன்றி. This is the **independent** shape of the same vowel: the one a word uses when it *begins* with the sound.

Writing: ஹ

How ஹ is written, stroke by stroke

- **1.** start inside the upper curl and sweep around it
- **2.** without lifting, sweep down the inner right curve
- **3.** without lifting, carry left down the lower diagonal and turn around the lower-left loop
- **4.** without lifting, climb the loop's outer side back to the left crossing
- **5.** without lifting, carry right across the middle and turn around the lower-right loop
- **6.** without lifting, climb the other diagonal back across the middle and on up the outer left side
- **7.** without lifting, arch over the top and down the far right — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested teaching order, not a national standard — Tamil handwriting is taught with school-to-school variation. Source: Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 4, ஹ (Univ. of Texas at Austin), p. 192.

Your turn

- *Look:* at இல்லை and point at இ inside it
- *Trace it:* இ three times, saying *i* as you finish each one
- *Write it:* ஓ, then இ, from memory
- *Read it:* இல்லை aloud once more

Before you move on

Which character is this — இ? (**i**.) Which word did it come from? (இல்லை, *illai*, "no".)

109.2 ை — the sign that ends இல்லை

Before the new one: read ஓ and இ aloud, and write each once.

Now say இல்லை (*illai*), "no". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

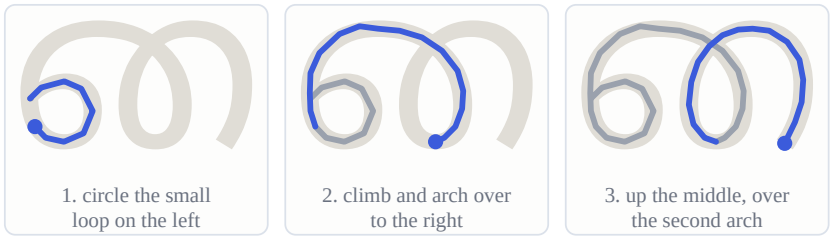

Script you'll notice: ை

ை — *ai*.

It is a **vowel sign**, not a letter. It attaches to a consonant and replaces the built-in *a* with *ai*. Look at the end of இல்லை: the sign sits on the **left** of ல, although you say it after. Tamil writes this sign first and sounds it second.

Writing: ை

How it is written — one unbroken stroke · 3 movements

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Tamil recognizer, class 43 (ஐ, ai sign): stored online-handwriting prototypes from native Tamil writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ை is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ை yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at இல்லை and point at ை inside it
- *Trace it:* ை three times, saying *ai* as you finish each one
- *Write it:* இ, then ை, from memory
- *Read it:* இல்லை aloud once more

Before you move on

Which character is this — ை? (**ai**.) Which word did it come from? (இல்லை, *illai*, "no".)

109.3 ஸ — the letter inside நமஸ்காரம்

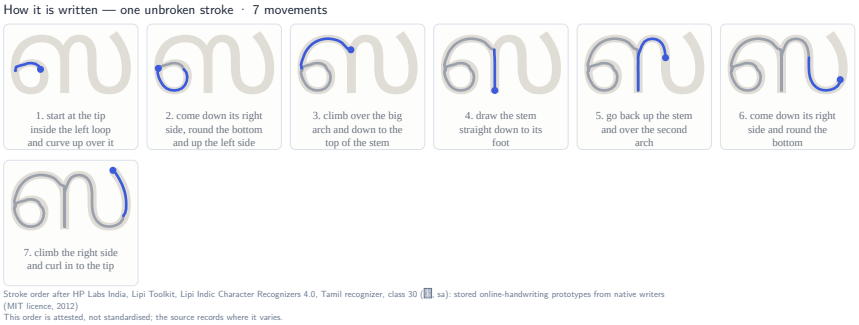

> Before the new one: read இ and ஸை aloud, and write each once.
>
> Now say நமஸ்காரம் (*namaskāram*), "the borrowed bow-word". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ஸ

ஸ — *sa*.

It is inside நமஸ்காரம் (*namaskāram*), the borrowed bow-word you met beside வணக்கம். ஸ is a **Grantha** letter: Tamil added it to write words that came from Sanskrit, so you will see it mostly in borrowed words.

Writing: ஸ

How ஸ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ஸ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

- *Look:* at நமஸ்காரம் and point at ஸ inside it

- *Trace it:* ஸ three times, saying *sa* as you finish each one
- *Write it:* ஸ◌, then ஸ, from memory
- *Read it:* நமஸ்காரம் aloud once more

Before you move on

Which character is this — ஸ? (**sa**.) Which word did it come from? (நமஸ்காரம், *namaskāram*, "the borrowed bow-word".)

Chapter 110

Letters From You and Your Name

Modes: ✓ **pen** (4) 🚗 **Hands-free start:** none of the 4 lessons.

>
> *Complete the last lesson of chapter 110: I can write the letters nga and lla and the vowel signs ii and e, and find each one in niingal or peyar.*

110.1 ங — the nasal before the க in நீங்கள்

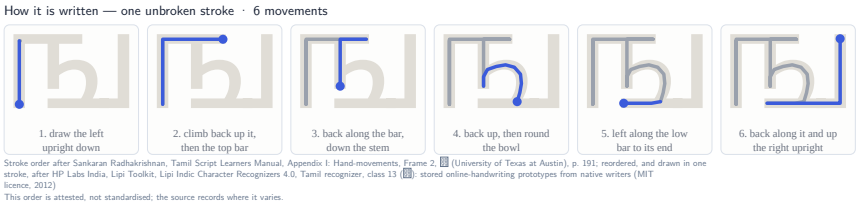

> Before the new one: read னீ and ஸ aloud, and write each once.
>
> Now say நீங்கள் (*nīṅgaḷ*), "you (respectful)". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ங

ங — *ṅa*.

It is the nasal in the middle of நீங்கள் (*nīṅgaḷ*), the respectful "you". Say *nīṅgaḷ* slowly: the *ṅ* is made at the back of the mouth, where *k* is made, which is why ங nearly always stands right before க.

Writing: ஈ

How ஈ is written, stroke by stroke

- **1.** start at the top of the left upright and draw it straight down
- **2.** without lifting, climb back up it and carry the top bar to its right end
- **3.** without lifting, come back along the bar to the inner stem and draw it down to its foot
- **4.** without lifting, go back up the stem and round the bowl down to the low bar
- **5.** without lifting, run left along the low bar to its end
- **6.** without lifting, come back along the low bar and climb the right upright — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Stroke order is one attested order, not a national standard — Tamil handwriting is taught with school-to-school variation. The order and the stroke count follow native writers' pen traces in HP Labs India's LipiTk Tamil recognizer: most of them write ஈ without lifting the pen, and draw its right upright last, upward. Sankaran Radhakrishnan, Tamil Script Learners Manual, Appendix I: Hand-movements, Frame 2, ஈ (University of Texas at Austin), p. 191, draws that upright first, as a separate part.

Your turn

- *Look:* at நீங்கள் and point at ஈ inside it
- *Trace it:* ஈ three times, saying *ṉa* as you finish each one

- *Write it:* ஸ, then ங, from memory
- *Read it:* நீங்கள் aloud once more

Before you move on

Which character is this — ங? (**ṅa**.) Which word did it come from? (நீங்கள், *nīṅgaḷ*, "you (respectful)".)

110.2 ள — the l at the end of நீங்கள்

Before the new one: read ஸ and ங aloud, and write each once.

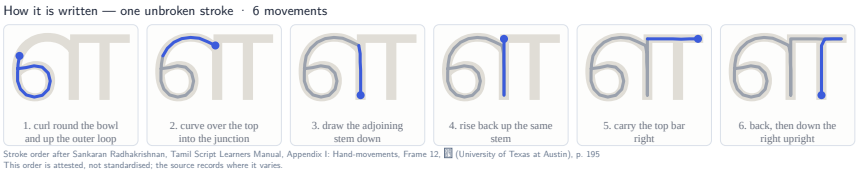

Now say நீங்கள் (*nīṅgaḷ*), "you (respectful)". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ள

ள — *ḷa*.

It closes நீங்கள் (*nīṅgaḷ*). This is the Tamil *l* made with the tongue curled back. You already write ல (*la*) and ழ (*ḻa*); ள is the third *l*, and the dot under the romanization (*ḷ*) is how the book tells them apart.

Writing: ள

How ள *is written, stroke by stroke*

- **1.** start inside the loop, curl round its inner bowl, and climb the large outer loop
- **2.** without lifting, curve over the top and into the junction with the middle upright
- **3.** without lifting, draw the adjoining stem straight down

- **4.** without lifting, rise back up the same stem to the top
- **5.** without lifting, carry the top bar to the right edge
- **6.** without lifting, return along the bar to the right upright and draw it straight down — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Your turn

- *Look:* at நீங்கள் and point at ள inside it
- *Trace it:* ள three times, saying *ḷa* as you finish each one
- *Write it:* ங, then ள, from memory
- *Read it:* நீங்கள் aloud once more

Before you move on

Which character is this — ள? (**ḷa**.) Which word did it come from? (நீங்கள், *nīṅgaḷ*, "you (respectful)".)

110.3 ீ — the long i on நீ

Before the new one: read ங and ள aloud, and write each once.

Now say நீ (*nī*), "you (familiar)". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ீ

ீ — *ī*.

It is the sign on நீ (*nī*), "you". You already write its short partner ி (*i*), the hook from நன்றி. The long sign ீ ends in a curl instead of an open hook. One curl more, one beat longer.

Writing: ீ

How it is written — one unbroken stroke · 3 movements

Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Tamil recognizer, class 38 (ீ ii sign): stored online-handwriting prototypes from native Tamil writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ீ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ீ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at நீ and point at ீ inside it
- *Trace it:* ீ three times, saying *ī* as you finish each one
- *Write it:* னா, then ீ, from memory
- *Read it:* நீ aloud once more

Before you move on

Which character is this — ீ? (ī.) Which word did it come from? (நீ, *nī*, "you (familiar)".)

110.4 ெ — the short e in பெயர்

Before the new one: read ன and ீ aloud, and write each once.

Now say பெயர் (*peyar*), "name". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

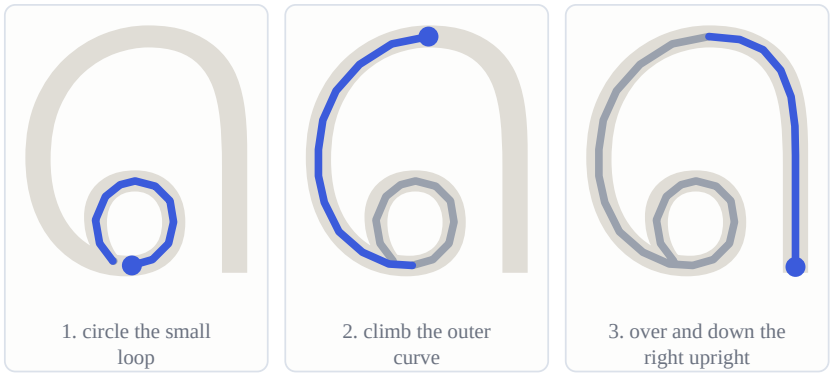

Script you'll notice: ெ

ெ — *e*.

It is the sign on the first syllable of பெயர் (*peyar*), "name". Like னை, it is written on the **left** of its consonant and sounded after it. You already know its long partner ே (*ē*) from பேசு. Put the two side by side and compare the shapes: that difference is the difference between *pe* and *pē*.

Writing: ெ

Chapter 111

Letters From Counting

Modes: ✓ **pen** (3) **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can write the letters ai and ee and the vowel sign uu, and find each one in the numbers I count with.
>
> *Complete the last lesson of chapter 111: I can write the letters ai and ee and the vowel sign uu, and find each one in the numbers I count with.*

111.1 ஐ — the letter that opens ஐந்து

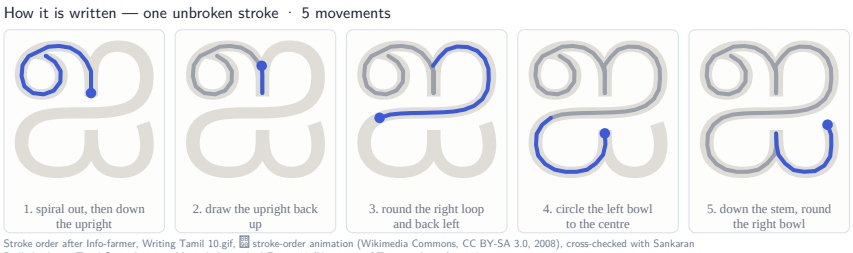

> Before the new one: read ீ and ெ aloud, and write each once.
>
> Now say ஐந்து (*aintu*), "five". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ஐ

ஐ — *ai*.

It opens ஐந்து (*aintu*), "five". You wrote its sign ை two chapters ago, on the end of இல்லை. This is the **independent** shape of the same vowel, for a word that begins with *ai*.

Writing: ஐ

How ஐ is written, stroke by stroke

- **1.** start inside the upper-left spiral, curl outward round it, and run down the central upright to its foot
- **2.** without lifting, draw the central upright back up
- **3.** without lifting, sweep around the upper-right loop and return left across the middle
- **4.** without lifting, circle the lower-left bowl back up to the centre
- **5.** without lifting, come back down the centre stem and circle through the lower-right bowl — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Your turn

- *Look:* at ஐந்து and point at ஐ inside it
- *Trace it:* ஐ three times, saying *ai* as you finish each one
- *Write it:* ◌ை, then ஐ, from memory

- *Read it:* ஐந்து aloud once more

Before you move on

Which character is this — ஐ? (**ai**.) Which word did it come from? (ஐந்து, *aintu*, "five".)

111.2 ூ — the long u on மூன்று

Before the new one: read ி and ஐ aloud, and write each once.

Now say மூன்று (*mūṉṟu*), "three". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ூ

ூ — *ū*.

It is the long *ū* on மூன்று (*mūṉṟu*), "three". Like its short partner ு, which you already write, this sign changes shape with the consonant it joins, so copy it as it sits on மூ, the form you already read.

Writing: ூ

Put your pen on ூ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at மூன்று and point at ூ inside it
- *Trace it:* ூ three times, saying *ū* as you finish each one
- *Write it:* ஐ, then ூ, from memory

- *Read it:* மூன்று aloud once more

Before you move on

Which character is this — ◌ூ? (ū.) Which word did it come from? (மூன்று, *mūn̲ru*, "three".)

111.3 ஏ — the letter that opens ஏழு

Before the new one: read ஐ and ◌ை aloud, and write each once.

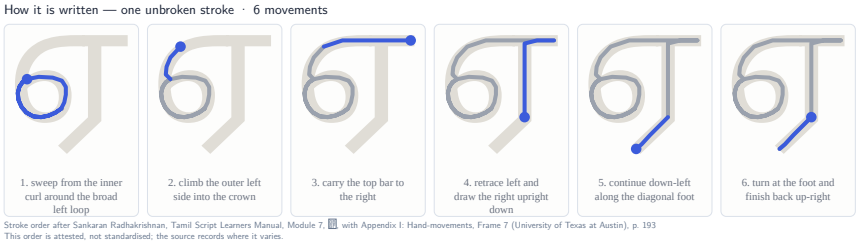

Now say ஏழு (*ēḻu*), "seven". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ஏ

ஏ — *ē*.

It opens ஏழு (*ēḻu*), "seven". You already write its sign ◌ே from பேசு; ஏ is the independent shape of the same long vowel, for the front of a word.

Writing: ஏ

How ஏ *is written, stroke by stroke*

- **1.** start here: sweep from the inner curl around the broad left loop
- **2.** without lifting, climb the outer left side into the crown
- **3.** without lifting, carry the top bar to the right
- **4.** without lifting, retrace left and draw the right upright down
- **5.** without lifting, continue down-left along the diagonal foot

- **6.** without lifting, turn at the foot and finish back up-right — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Which character is this — ஏ? (ē.) Which word did it come from? (ஏழு, *ēḻu*, "seven".)

Chapter 112

Letters From Days, Towns and Gladness

Modes: **eyes** (2) **pen** (4) **Hands-free start:** none of the 6 lessons.

> ***By the end of this chapter:*** I can write the letters nya, uu, o and ssa, and find each one in a word I already say.
>
> *Complete the last lesson of chapter 112: I can write the letters nya, uu, o and ssa, and find each one in a word I already say.*

112.1 ஞ — the letter that opens ஞாயிறு

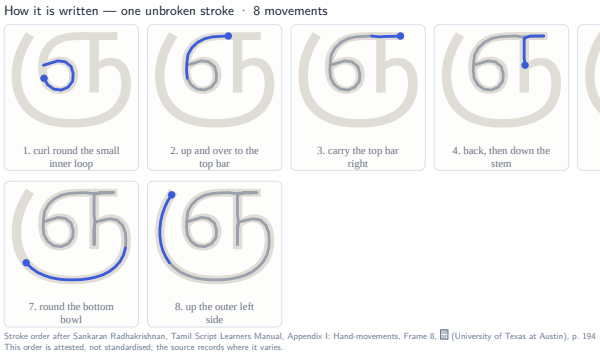

> Before the new one: read ஒ and ர aloud, and write each once.
>
> Now say ஞாயிறு (*ñāyi̱ru*), "Sunday". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ஞ

ஞ — *ña.*

It opens ஞாயிறு (*ñāyi̱ru*), "Sunday", the last day in the week you learned. ஞ is a rare letter: few everyday words use it, and Sunday is the one you will see most.

Writing: ஹ

How ஹ is written, stroke by stroke

- **1.** start inside the compact left body and curl round its small inner loop
- **2.** without lifting, climb its outer left side and curve over into the long top bar
- **3.** without lifting, carry the long top bar straight to the right
- **4.** without lifting, come back along the bar to the central upright and start down it
- **5.** without lifting, descend the central upright to its lower end
- **6.** without lifting, climb back up the upright and sweep around the broad outer-right curve
- **7.** without lifting, continue around the bottom bowl toward the far left
- **8.** without lifting, return up the outer-left side and finish below the top bar — and only now lift

Pen lifts: 0. The pen never leaves the paper.

- *Look:* at ஞாயிறு and point at ஞ inside it
- *Trace it:* ஞ three times, saying *ña* as you finish each one
- *Write it:* ஏ, then ஞ, from memory
- *Read it:* ஞாயிறு aloud once more

Before you move on

Which character is this — ஞ? (**ña**.) Which word did it come from? (ஞாயிறு, *ñāyiṟu*, "Sunday".)

112.2 உள — the letter that opens உளர்

Before the new one: read ஏ and ஞ aloud, and write each once.

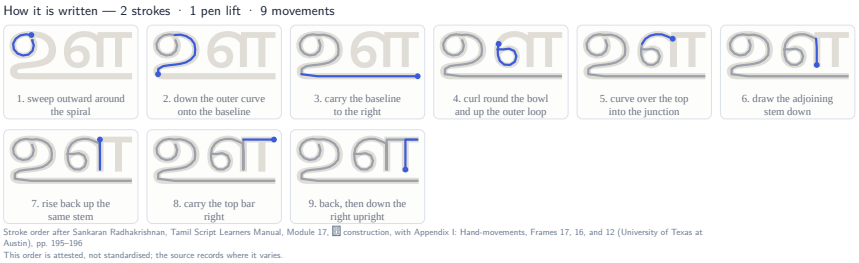

Now say உளர் (*ūr*), "town, home place". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: உள

உள — *ū*.

It opens உளர் (*ūr*), "town", the place a Tamil introduction asks you about. It is built on உ (*u*), which you already write, with a second part added to its right: short vowel, then more pen for the long one.

Writing: உள

How உள *is written, stroke by stroke*

- **1.** write உ first: start inside its compact upper spiral and sweep outward around it
- **2.** without lifting, descend through its broad outer curve and turn left onto the baseline
- **3.** without lifting, carry the long baseline straight to the right — then lift once
- **4.** write ள over that base: start inside its loop, curl round its inner bowl, and climb the outer loop
- **5.** without lifting, curve over the top and into the junction with the middle upright
- **6.** without lifting, draw the adjoining stem straight down
- **7.** without lifting, rise back up the same stem to the top
- **8.** without lifting, carry the top bar to the right edge
- **9.** without lifting, return along the bar to the right upright and draw it straight down — and only now lift

Pen lifts: 1. The pen comes up 1 time and no more.

- *Look:* at உள்ர் and point at உள inside it
- *Trace it:* உள three times, saying *ū* as you finish each one
- *Write it:* ஞ, then உள, from memory
- *Read it:* உள்ர் aloud once more

Before you move on

Which character is this — **ஊ**? (**ū**.) Which word did it come from? (**ஊர்**, *ūr*, "town, home place".)

112.3 ஒ — the letter that opens ஒரு

Before the new one: read ஞ and ஊ aloud, and write each once.

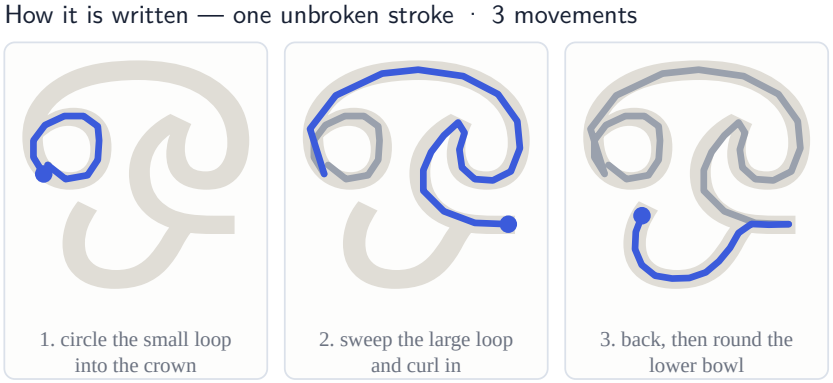

Now say ஒரு (*oru*), "a, one". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ஒ

ஒ — *o*.

It opens ஒரு (*oru*), "a, one", the form ஒன்று takes in front of a noun. You already read its long partner ஓ (*ō*). Put them side by side: the long one carries more at its foot.

Writing: ஒ

Stroke order after Sankaran Radhakrishnan, Tamil Script Learners Manual, Module 14, pp. 92, with Appendix I: Hand-movements, Frame 14 (University of Texas at Austin), p. 195
This order is attested, not standardised; the source records where it varies.

How ஒ is written, stroke by stroke

- **1.** circle the small left loop and climb into the crown

- **2.** without lifting, sweep through the large right loop, curl inward, and run out along the tail
- **3.** without lifting, come back along the tail to the lower bowl, draw it down and around, and return left — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Your turn

- *Look:* at ஒரு and point at ஒ inside it
- *Trace it:* ஒ three times, saying *o* as you finish each one
- *Write it:* உ, then ஒ, from memory
- *Read it:* ஒரு aloud once more

Before you move on

Which character is this — ஒ? (**o**.) Which word did it come from? (ஒரு, *oru*, "a, one".)

112.4 ஷ — the letter inside சந்தோஷம்

Before the new one: read உ and ஒ aloud, and write each once.

Now say சந்தோஷம் (*santōṣam*), "gladness". You have read it for a long time. This lesson takes one character out of it and puts it in your hand.

Script you'll notice: ஷ

ஷ — *ṣa*.

It is inside சந்தோஷம் (*santōṣam*), "gladness". Like ஸ, it is a **Grantha** letter, kept for words Tamil took from Sanskrit.

Writing: ஷ

How ஷ *is written, stroke by stroke*

- **1.** start at the tip inside the small loop and curl clockwise round it
- **2.** without lifting, go on round the bottom and up the outer left side
- **3.** without lifting, arch over the top and come down to the bar
- **4.** without lifting, carry the bar to the right
- **5.** without lifting, go up the bar's right end and back over to the right loop
- **6.** without lifting, go round the loop and down the tail — and only now lift

Pen lifts: 0. The pen never leaves the paper.

Source: Ratnakar Narale, Learn Tamil Through English/Hindi, Reading and Writing Tamil Granthakshars, Third Tamil Granthakshar ஷ, Sanskrit Hindi Research Institute, p. 13. The chart numbers four parts; native writers draw them without lifting the pen (HP Labs India's LipiTk Tamil recognizer: most of its pen traces of ஷ are one stroke).

Your turn

- *Look:* at சந்தோஷம் and point at ஷ inside it
- *Trace it:* ஷ three times, saying *ṣa* as you finish each one
- *Write it:* ஓ, then ஷ, from memory
- *Read it:* சந்தோஷம் aloud once more

Before you move on

Which character is this — ஷ? (**ṣa**.) Which word did it come from? (சந்தோஷம், *santōṣam*, "gladness".)

112.5 (fourteen letters) — Fourteen letters, fourteen words — a first pass

Write the letter that opens இல்லை, then the sign that ends it.

Your turn

letter	sound	the word it came from
இ	*i*	இல்லை *illai*
ை	*ai*	இல்லை *illai*
ஸ	*sa*	நமஸ்காரம் *namaskāram*
ங	*ṅa*	நீங்கள் *nīṅgaḷ*
ள	*ḷa*	நீங்கள் *nīṅgaḷ*

Before you move on

What does மின்விசிறி mean? ("An electric fan".) Say it once more.

135.2 கத்தரிக்கோல் (kattarikkōl) — scissors

Before the new one: say the Tamil for a computer, then the Tamil for an electric fan.

You'll want to know: கத்தரிக்கோல்

கத்தரிக்கோல் — *kattarikkōl* — "scissors".

In the family, and next door

	word	same root
Kannada	ಕತ್ತರಿ (*kattari*)	yes
Telugu	కత్తెర (*katterā*)	yes
Malayalam	കത്രിക (*katrika*)	yes
Hindi (neighbour)	कैंची (*kaĩcī*)	
English	scissors	

The word, taken apart — its roots and family

கத்தரிக்கோல் (*kattarikkōl*) is *kattari*, "scissors", from Sanskrit *kartari*, "scissors, knife" (CDIAL 2858), with native *kōl*, "stick, rod"

(DEDR 2237).

What you've built

One more word for this chapter.

Your turn

- *Say it: kattarikkōl*
- *Say it: kattarikkōl*, once more
- *Say it:* say *kattarikkōl*
- *Recall:* say the Tamil for a computer, then the Tamil for an electric fan, then say *kattarikkōl* again

Before you move on

What does **கத்தரிக்கோல்** mean? ("Scissors".) Say it once more.

135.3 சுத்தியல் (cuttiyal) — a hammer

Before the new one: say the Tamil for an electric fan, then the Tamil for scissors.

You'll want to know: சுத்தியல்

சுத்தியல் — *cuttiyal* — "a hammer".

In the family, and next door

The word, taken apart — its roots and family

சுத்தியல் (*cuttiyal*) is native Dravidian. DEDR 2668 lists Malayalam *cutti* and Kannada *suttige*.

What you've built

One more word for this chapter.

Your turn

- *Say it: cuttiyal*
- *Say it: cuttiyal*, once more
- *Say it:* say *cuttiyal*
- *Recall:* say the Tamil for an electric fan, then the Tamil for scissors, then say *cuttiyal* again

Before you move on

What does சுத்தியல் mean? ("A hammer".) Say it once more.

135.4 ஆணி (āṇi) — a nail (to hammer)

Before the new one: say the Tamil for scissors, then the Tamil for a hammer.

You'll want to know: ஆணி

ஆணி — *āṇi* — "a nail (to hammer)".

In the family, and next door

	word
Kannada	ಮೊಳೆ (*moḷe*)
Telugu	మేకు (*mēku*)
Hindi (neighbour)	कील (*kīl*)
English	a nail

The word, taken apart — its roots and family

ஆணி (*āṇi*) is filed in DEDR's appendix of Indo-Aryan loans (DEDR App. 10), beside Malayalam *āṇi*, "peg", and Kannada *āṇi*, "nail". The source is Sanskrit *āṇi*, "linch-pin".

What you've built

One more word for this chapter.

Your turn

- *Say it:* *āṇi*
- *Say it:* *āṇi*, once more
- *Say it:* say *āṇi*
- *Recall:* say the Tamil for scissors, then the Tamil for a hammer, then say *āṇi* again

You'll want to know: ஏணி

ஏணி — *ēṇi* — "a ladder".

In the family, and next door

	word
Malayalam	കോണി (*kōṇi*)
English	a ladder

The word, taken apart — its roots and family

The origin of ஏணி (*ēṇi*) is uncertain. DEDR has an *ēṇi*, "boundary, edge" (DEDR 886), but not this word for a ladder.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ēṇi*
- *Say it:* *ēṇi*, once more
- *Say it:* say *ēṇi*
- *Recall:* say the Tamil for a hammer, then the Tamil for a nail, then say *ēṇi* again

Before you move on

What does ஏணி mean? ("A ladder".) Say it once more.

Chapter 136

Bottle, Ball, Kite, Doll, Purse

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say a bottle, a ball, a kite, a doll and a purse.
>
> *Complete the last lesson of chapter 136: I can say a bottle, a ball, a kite, a doll and a purse.*

136.1 குப்பி (kuppi) — a bottle

Before the new one: say the Tamil for a nail, then the Tamil for a ladder.

You'll want to know: குப்பி

குப்பி — *kuppi* — "a bottle".

In the family, and next door

	word	same root
Kannada	ಬಾಟಲಿ (*bāṭali*)	
Telugu	బాటిలు (*bāṭilu*)	
Malayalam	കുപ്പി (*kuppi*)	yes
Hindi (neighbour)	बोतल (*botal*)	
English	a bottle	

The word, taken apart — its roots and family

குப்பி (*kuppi*) is probably an Indo-Aryan word for a flask: CDIAL 3402 sets North Indian forms for an oil vessel under *kūpa*, "leather oil vessel", and its variant *kuppa*.

What you've built

One more word for this chapter.

Your turn

- *Say it: kuppi*
- *Say it: kuppi*, once more
- *Say it:* say *kuppi*
- *Recall:* say the Tamil for a nail, then the Tamil for a ladder, then say *kuppi* again

Before you move on

In the family, and next door

	word	same root
Kannada	గాళిపట (*gāḷipaṭa*)	yes
Telugu	గాలిపటం (*gālipaṭaṁ*)	yes
English	a kite	

The word, taken apart — its roots and family

பட்டம் (*paṭṭam*) is probably the same word as *paṭṭam*, "flat piece", which is native (DEDR 3878). DEDR does not list the "kite" sense, so the link is likely rather than proven.

What you've built

One more word for this chapter.

Your turn

- *Say it: paṭṭam*
- *Say it: paṭṭam*, once more
- *Say it:* say *paṭṭam*
- *Recall:* say the Tamil for a bottle, then the Tamil for a ball, then say *paṭṭam* again

149.1 பிரபலமான (pirapalamāṉa) — famous

> Before the new one: say the Tamil for dry, then the Tamil for wet.

You'll want to know: பிரபலமான

பிரபலமான — *pirapalamāṉa* — "famous".

In the family, and next door

	word
Kannada	ಪ್ರಸಿದ್ಧ (*prasiddha*)
Telugu	ప్రసిద్ధ (*prasiddha*)
English	famous

The word, taken apart — its roots and family

பிரபலமான (*pirapalamāṉa*) is a loan from Sanskrit *prabala*, "strong" (CDIAL 8696). Tamil shifted it from "strong" to "widely known", and *-āṉa* makes it a describing word.

What you've built

One more word for this chapter.

Your turn

279.5 வழக்கறிஞர் (vaḻakkaṟiñar) — a lawyer

Before the new one: say the Tamil for a manager, then the Tamil for an engineer.

You'll want to know: வழக்கறிஞர்

வழக்கறிஞர் — *va̲lakka̲ri̲ñar* — "a lawyer".

The word, taken apart — its roots and family

வழக்கறிஞர் (*va̲lakka̲ri̲ñar*) is native: *va̲lakku*, "lawsuit, custom" (DEDR 5292, which lists Malayalam va̲lakku), and *a̲ri̲ñar*, "those who know", from *a̲ri̲*, "to know" (DEDR 314): "one who knows lawsuits".

280.1 அரசு (aracu) — the government

> Before the new one: say the Tamil for an engineer, then the Tamil for a lawyer.

You'll want to know: அரசு

அரசு — *aracu* — "the government".

The word, taken apart — its roots and family

அரசு (*aracu*) is a loan from Sanskrit *rājan*, "king" (CDIAL 10679). DEDR 201 gives this source, and lists Malayalam aracu and Kannada arasu.

What you've built

One more word for this chapter.

280.2 விதி (viti) — a rule

Before the new one: say the Tamil for a lawyer, then the Tamil for the government.

You'll want to know: விதி

விதி — *viti* — "a rule".

The word, taken apart — its roots and family

விதி (*viti*) is a loan from Sanskrit *vidhi*, "rule; fate" (CDIAL 11755).

What you've built

One more word for this chapter.

Your turn

- *Say it: viti*
- *Say it: viti*, once more

280.3 அபராதம் (aparātam) — a fine, a penalty

Before the new one: say the Tamil for the government, then the Tamil for a rule.

You’ll want to know: அபராதம்

அபராதம் — *aparātam* — “a fine, a penalty”.

The word, taken apart — its roots and family

அபராதம் (*aparātam*) is a loan from Sanskrit *aparādha*, “offence” (CDIAL 439).

What you’ve built

One more word for this chapter.

Your turn

- *Say it:* *aparātam*

280.4 புகார் (pukār) — a complaint

Before the new one: say the Tamil for a rule, then the Tamil for a fine.

You'll want to know: புகார்

புகார் — *pukār* — "a complaint".

The word, taken apart — its roots and family

புகார் (*pukār*) is a loan from Hindustani *pukār*, "a call, an outcry", which goes back to Indo-Aryan *pukkār*, "shout" (CDIAL 8246).

What you've built

One more word for this chapter.

Your turn

280.5 வீரர் (vīrar) — an athlete, a sportsperson; a hero, a warrior

Before the new one: say the Tamil for a fine, then the Tamil for a complaint.

You'll want to know: வீரர்

வீரர் — *vīrar* — "an athlete, a sportsperson; a hero, a warrior".

The word, taken apart — its roots and family

வீரர் (*vīrar*) is *vīrar*, "heroes", from Sanskrit *vīra*, "man, hero" (CDIAL 12056), with the respectful plural *-ar*.

What you've built

One more word for this chapter.

Your turn

- *Say it: vīrar*

Chapter 281

A controlled Tamil location question

Modes: ✓ **pen** (1) **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can assemble one familiar Tamil location question from meaning without a visible model.
>
> *Complete chapter 281 by writing one untimed, model-free Tamil location question from meaning.*

281.1 Your first Tamil question from meaning

> Close the earlier lessons. Recall **tea** and the place question **where?** without writing either one yet.

Writing — assemble one familiar question

From meaning alone, write **Where is the tea?** There is no word bank, romanization, or copyable sentence. Choose the two familiar pieces, put them in Tamil order, and add the question mark. This first composition is untimed: finish the attempt before checking the earlier lessons.

Your turn — repair one difference

Check the thing, place question, word boundary, and punctuation separately. Repair the first difference and write the whole question once more from meaning.

Before you move on

What made this composition rather than copying? (**You selected and ordered two known pieces from meaning, with no visible Tamil answer.**)
One controlled line closes this writing rung. It does not prove A1 attainment, readiness, human validation, or completion of the later timed writing task.

Chapter 282

A short timed Tamil writing checkpoint

Modes: ✓ **pen** (1) **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can retrieve six familiar pieces of Tamil writing during one short independent clock.
>
> *Complete chapter 282 by writing six familiar Tamil fields during one three-minute independent attempt.*

282.1 A short Tamil A1 writing checkpoint

This is a short independent attempt, not a model. You will write the answers, and this page will not show you any copyable Tamil answer.

Put away the earlier lessons, word bank, romanization, dictionaries, translators, and spell-checkers. Keep a blank page ready and set a **three-minute timer**. Write in Tamil script. Short, legible answers are enough.

Writing — timed assessment production

One practical form — three minutes

Complete **all six fields in Tamil script** for a neighbourhood language exchange. Write one short answer in every field. Start the timer when you begin the first field; leave any unfinished field as evidence when it rings.

1. Your greeting

2. Your name
3. The language you speak
4. One drink
5. A short question asking where that drink is
6. A closing that promises another meeting

When the three-minute timer rings, **stop**. Record the number of completed fields. An honest short attempt is more useful than a perfect untimed one.

Before you move on

Spend at most one minute looking at this first attempt. Note one field you completed clearly and one field to practise next; do not rewrite the timed answer. Keep the page as evidence.
This checkpoint is **not the complete A1 writing paper**. Tamil's later full paper still needs its task inventory, mocks, rubric, answer key, calibration, and human review. This short curriculum attempt does not establish A1 attainment, readiness, completeness, or human validation.

Chapter 283

A connected A2 Tamil message

Modes: ✓ **pen** (1) 🚗 **Hands-free start:** none (1 lesson).

By the end of this chapter: I can plan and write a connected 70–90 word Tamil message in Tamil script for a named reader and practical purpose.

Complete chapter 283 by writing a model-free 70–90 word connected Tamil message for a named reader and practical purpose.

283.1 A connected Tamil message about your familiar day

A connected message is not a pile of vocabulary and not one long sentence. It is a short route for one reader. Before writing, draw eight empty boxes and give them these jobs:

1. reader and greeting;
2. reason for writing;
3. where or when your day begins;
4. two familiar actions;
5. what happens afterwards and a second time anchor;
6. one contrast or reason;
7. one direct question about tomorrow;
8. a close.

Write only one or two English cue words in each box. Do not draft Tamil yet.

Writing — connected composition

There is no Tamil model, sentence bank, word bank, romanization, or copyable answer on this page.

Reader: your friend Meena. **Purpose:** help Meena understand your familiar day and choose a good time to visit you tomorrow.

Write **70–90 words in Tamil script**. Use every planning box. Include at least four familiar actions, two time anchors, one sequence link, one contrast or reason, and one direct question for Meena. Make every detail help with tomorrow's visit. The instructions give content, not sentences: choose only words and forms this book has taught, and connect them yourself.

This first connected attempt is untimed. Put away dictionaries, grammar references, translators, generative assistants, and spell-checkers. Do not copy from an earlier lesson. Ordinary legible Tamil handwriting is enough.

When the whole message exists, count its words once. If it is short, add one useful taught detail to a planning box. If it is long, remove a detail that does not help Meena. Do not replace the message with a memorised model.

Before you move on

Review the same attempt in four separate passes:

1. **Task fulfilment and relevant content** — Meena, the familiar day, tomorrow's visit, and every requested content point are present.
2. **Organisation and cohesion** — the eight jobs form a route rather than a list of disconnected sentences.
3. **Tamil vocabulary and grammar** — every form and connector comes from the taught standard-colloquial Tamil track; a simpler familiar sentence is better than an invented structure.
4. **Tamil-script control** — letter shapes, vowel signs, conjuncts, word boundaries, and punctuation remain readable.

Mark one strength and one next step. Repair only the next step; keep the original attempt so the next 70–90-word message can show real growth.
This is one untimed curriculum practice attempt, **not the complete 30-minute A2 writing paper** and not evidence that

either timed mock has been passed. Closing the machine-measured connected-composition stage does not prove A2 attainment or readiness, learner performance, independent review, standard setting, mock passage, calibration, or human validation.

The Tamil script — a reference

A **reference**, not a chapter — a place to look things up. You are *not* meant to read this before the lessons: the lessons teach reading through real words, introducing each letter as a word needs it. This page just gathers the system in one spot.

How the Tamil script works (the three facts the lessons teach)

1. **Consonants carry a built-in "a".** க = "ka," ம = "ma," ர = "ra." You never write the short *a* — it's already there.
2. **A vowel sign changes that built-in vowel.** Hooked onto a consonant, it swaps the *a* for another vowel — க ka + ி gives கி ki. The signs are ா = ā (கா = kā) · ி = i (கி = ki) · ீ = ī · ு = u · ூ = ū · ெ = e · ே = ē · ை = ai · ொ = o · ோ = ō · ௌ = au.
3. **A *puḷḷi* (the dot, ்) removes the built-in vowel.** க் = bare "k." A vowel-less consonant then leans into the next (க் + க → க்க, a held "kk").

Independent vowels (word-initial)

When a word *starts* with a vowel, a full vowel letter is used: அ a · ஆ ā · இ i · ஈ ī · உ u · ஊ ū · எ e · ஏ ē · ஐ ai · ஒ o · ஓ ō · ஔ au.

What makes Tamil distinctive

- **Three *n*'s, three *l*'s, two *r*'s.** Tamil *writes* the place of articulation: dental ந / alveolar ன / retroflex ண; ல ள ழ; ர ற.

English fuses each set into one letter and never notices; in Tamil they are distinct and can change meaning.

- **One letter, several sounds.** Tamil marks no voicing or aspiration: க can be *k*, *g*, or *h*; ச can be *s* or *ch* — **position** decides. The alphabet is small; the exact sound is read from context, picked up by ear.
- **No Sanskrit-only letters in the core set.** Classical Tamil gets by with 18 consonants; a handful of *grantha* letters (ஜ ja, ஷ ṣa, ஸ sa, ஹ ha) are added only to spell loanwords.

Tamil in the Dravidian family

Dravidian is a language family entirely separate from Indo-European (English, Latin, Sanskrit). Tamil is its oldest-attested member and the most protective of its native word-stock; its sisters — **Malayalam** (closest), then **Kannada** and **Telugu** — share the grammar and many roots but borrowed far more freely from Sanskrit. The lessons trace, word by word, which Tamil words are home-grown and which the sisters replaced (*vaṇakkam* vs. *namaskāra*; *naṉṟi* vs. *dhanyavāda*).

Introduced in Chapter 211.

இனிமேல் *iṉimēl*
from now on
Introduced in Chapter 159.

இனிய இரவு *iṉiya iravu*
"good night" — fully native Dravidian, "sweet/pleasant night," unlike Hindi, Kannada, Telugu, and Malayalam's shared Sanskrit-descended śubha rātri phrase; Tamil breaks the pattern this arc found in every other language
Introduced in Chapter 25.

இனிய பயணம் *iṉiya payaṇam*
have a good journey
Introduced in Chapter 107.

இன்னொரு முறை *iṉṉoru muṟai*

Introduced in Chapter 273.

இரத்தம் *irattam*
blood
Introduced in Chapter 169.

இரவு *iravu*
"night" — native Dravidian, already used standalone inside "midnight" (naḷḷiravu); a Sanskrit loan alternative, rāttiri, also exists — and per at least one dictionary source, rāttiri may actually be the MORE common word in everyday spoken Tamil, the opposite direction from **நாள்**'s story last lesson
Introduced in Chapter 24.

இரவு உணவு *iravu uṇavu*
dinner
Introduced in Chapter 184.

இரு *iru*
to be, to exist, to stay — and the three-piece machine every Tamil verb is built on

Introduced in Chapter 160.

கலாச்சாரம் *kalāccāram*
culture
Introduced in Chapter 246.

காலை *kālai*
morning (kālai) — Wiktionary itself HEDGES the etymology ("possibly from Sanskrit काल्य/kālya"), not a confirmed Dravidian root; genuinely uncertain, unlike Kannada's confidently-native or Telugu's confidently-Sanskrit morning-words; **பகல்** (already met, TA-C17, "daytime") is Wiktionary's own listed coordinate term; **அதிகாலை** ("early dawn") is a transparent ati-+kālai compound
Introduced in Chapter 26.

காளை *kāḷai*
a bull
Introduced in Chapter 187.

காலை உணவு *kālai uṇavu*
breakfast
Introduced in Chapter 184.

காலை வணக்கம் *kālai vaṇakkam*
good morning (kālai vaṇakkam), literally "morning greetings" — a transparent compound of **காலை** (already met, TA-C26) + **வணக்கம்** (already met, TA-C01, "reverence, homage"); confirmed via TWO independently-fetched sources as the standard, formal greeting, used from sunrise until around 11 AM; NOT a śubha-equivalent construction, breaking the pattern its neighbours share; a WebSearch summary's claim that a Sanskrit-borrowed "suprabhatham" is a casual alternative could NOT be traced to either directly-fetched source and is therefore not asserted here
Introduced in Chapter 29.

கலைஞர் *kalaiñar*
an artist
Introduced in Chapter 253.

களைப்பு *kaḷaippu*
tiredness
Introduced in Chapter 87.

Introduced in Chapter 43.

மலை *malai*
a hill
Introduced in Chapter 53.

மாலை *mālai*
evening (mālai) — a genuine HOMONYM: Wiktionary lists TWO separate etymologies for this exact spelling — "garland/necklace" (possibly a Dravidian word BORROWED INTO Sanskrit as माला/mālā, a reverse-direction loan) and, unrelated, "evening" (compared to **மால்**, Proto-Dravidian *mā*/māl, whose senses include "**கருமை**," darkness); confidently native for the evening sense, unlike TA-C26's uncertain **காலை**, though the exact semantic mechanism ("evening" ← "darkness" specifically) isn't spelled out with full certainty by the source
Introduced in Chapter 27.

மாலை வணக்கம் *mālai vaṇakkam*
good evening (mālai vaṇakkam), literally "evening greetings" — the SAME compositional pattern as TA-C29's kālai vaṇakkam: **மாலை** (already met, TA-C27, "evening") + **வணக்கம்** (already met, TA-C01); confirmed via TWO independently-fetched sources (talkpal.ai, preply.com — same practical-content tier as TA-C29's sources) as real and used from afternoon/late-afternoon through nightfall, one labeling it formal; no śubha-equivalent word here either, consistent with TA-C29's finding, not just assumed to carry over automatically
Introduced in Chapter 30.

Introduced in Chapter 217.

மாணவன் *māṇavaṉ*
a student
Introduced in Chapter 46.

மணி *maṇi*
hour — Tamil's OWN dictionaries treat this as a native Dravidian "bell" word, most likely NOT Kannada/Telugu/Hindi's Sanskrit ghaṇṭā, and a probable homophone trap with an unrelated Sanskrit "gem" word spelled the same way
Introduced in Chapter 18.

மணிக்கட்டு *maṇikkaṭṭu*
a wrist
Introduced in Chapter 142.

மன்னிக்கவும் *maṉṉikkavum*

Introduced in Chapter 234.

நாக்கு *nākku*
the tongue
Introduced in Chapter 132.

நாள் *nāḷ*
"day" — Tamil's everyday, native Dravidian word, already met inside "tomorrow"; unlike Kannada's dina, Telugu's rōju, and Malayalam's divasam, Tamil's plain day-word is NOT a loanword at all — நாள் just is the everyday word, no Sanskrit or Persian substitute doing that job
Introduced in Chapter 23.

நாளை மறுநாள் *nāḷai maṟunāḷ*
the day after tomorrow
Introduced in Chapter 233.

நாளை பார்க்கலாம் *nāḷai pārkkalām*

Introduced in Chapter 37.

நான்காவது *nāṉkāvadu*
fourth — the ending working on a number you already count with
Introduced in Chapter 82.

நண்பகல் நள்ளிரவு *naṇpakal naḷḷiravu*
noon and midnight — NO Sanskrit here at all (unlike Kannada/Telugu); both trace to the same old "middle" root, **நள்** (naḷ), but Tamil ALSO keeps fully transparent synonyms built on **நடு**, the everyday word for "middle"
Introduced in Chapter 17.

நன்றாக *naṉṟāka*
well, fine
Introduced in Chapter 91.

நன்றி *naṉṟi*
thank you (nanri — "goodness, gratitude")

Introduced in Chapter 89.

நடுவில் *naṭuvil*
in the middle
Introduced in Chapter 114.

நாய், பூனை *nāy, pūnai*
dog and cat — நாய் is THE solid, ancient, undisputed Dravidian root behind Kannada/Malayalam's dog-words too, the honest opposite of the tangled dog-words of Spanish, Hindi, and English; பூனை is Tamil's everyday cat-word, one of (at least) three genuinely separate Dravidian cat-word families
Introduced in Chapter 21.

நாய்க்குட்டி *nāykkuṭṭi*
a puppy
Introduced in Chapter 247.

நேசி *nēci*

Afternoon
chapter topic; Chapter 28, p. 219

afternoon (pir̲pakal) — a transparent compound, பின் (pin̲, "after") + நண்பகல்'s own பகல் ("daytime"), with பின் surfacing as பிற்- before ப, a SIMILAR kind of consonant sandhi to the one already taught in TA-C17 (நள்→நண்) — though Wiktionary itself does not discuss the sandhi mechanism, and the two changes move in different phonetic directions (nasal→stop vs. lateral→nasal), so this is the lesson's own analysis, not a sourced claim; Wiktionary-listed formal register; a real, citable overlap worth flagging honestly: Wiktionary's OWN afternoon-word page ALSO lists நடுப்பகல் as a synonym, even though TA-C17 established நடுப்பகல் as a synonym of NOON specifically; also related but distinct: மதியம், a Sanskrit tatsama (from madhya, "middle") meaning "noon," a synonym of நண்பகல் — NOT specifically "afternoon," despite an unverified WebSearch claim that matiyam "originally meant moon," which does not appear anywhere on its actual Wiktionary page and is therefore not asserted here பிற்பகல் (pir̲pakal)

Evening
chapter topic; Chapter 27, p. 213
evening (mālai) — a genuine HOMONYM: Wiktionary lists TWO separate etymologies for this exact spelling — "garland/necklace" (possibly a Dravidian word BORROWED INTO Sanskrit as माला/mālā, a reverse-direction loan) and, unrelated, "evening" (compared to மால், Proto-Dravidian *mā*/māl, whose senses include "கருமை," darkness); confidently native for the evening sense, unlike TA-C26's uncertain காலை, though the exact semantic mechanism ("evening" ← "darkness" specifically) isn't spelled out with full certainty by the source மாலை (mālai)

good நல்ல (nalla)
explicit focus: etymology; Chapter 41, p. 329

Good Afternoon
chapter topic; Chapter 31, p. 231

good afternoon (matiya vaṇakkam), confirmed by two sources for roughly noon to 4 PM, while a third source does not teach a separate afternoon greeting மதிய வணக்கம் (matiya vaṇakkam)
explicit focus: etymology; Chapter 31, p. 231

Good Evening
chapter topic; Chapter 30, p. 227

good evening (mālai vaṇakkam), literally "evening greetings" — the SAME compositional pattern as TA-C29's kālai vaṇakkam: மாலை (already met, TA-C27, "evening") + வணக்கம் (already met, TA-C01); confirmed via TWO independently-fetched sources (talkpal.ai, preply.com — same practical-content tier as TA-C29's sources) as real and used from afternoon/ late-afternoon through nightfall, one labeling it formal; no śubha-equivalent word here either, consistent with TA-C29's finding, not just assumed to carry over automatically மாலை வணக்கம் (mālai vaṇakkam)
explicit focus: etymology, usage and culture; Chapter 30, p. 227
Good Morning
chapter topic; Chapter 29, p. 223
good morning (kālai vaṇakkam), literally "morning greetings" — a transparent compound of காலை (already met, TA-C26) + வணக்கம் (already met, TA-C01, "reverence, homage"); confirmed via TWO independently-fetched sources as the standard, formal greeting, used from sunrise until around 11 AM; NOT a śubha-equivalent construction, breaking the pattern its neighbours share; a WebSearch summary's claim that a Sanskrit-borrowed "suprabhatham" is a casual alternative could NOT be traced to either directly-fetched source and is therefore not asserted here காலை வணக்கம் (kālai vaṇakkam)
explicit focus: etymology, usage and culture; Chapter 29, p. 223
Good Night
chapter topic; Chapter 25, p. 205
"good night" — fully native Dravidian, "sweet/pleasant night," unlike Hindi, Kannada, Telugu, and Malayalam's shared Sanskrit-descended śubha rātri phrase; Tamil breaks the pattern this arc found in every other language இனிய இரவு (iṉiya iravu)
explicit focus: etymology, usage and culture; Chapter 25, p. 205
goodbye (lit. "I'll go and come back") போய் வருகிறேன் (pōy varugiṟēṉ)
explicit focus: grammar, etymology; Chapter 4, p. 35

grass புல் (pul)
explicit focus: etymology; Chapter 64, p. 479
Green and Yellow
chapter topic; Chapter 22, p. 191
green and yellow — paccai is the pan-Dravidian *pac- word already met in Kannada, Telugu, and Malayalam; manjal ("yellow, turmeric") is a separate native Dravidian root, matching Malayalam's mañña/mañña̱l closely — and Tamil dictionaries also record a rarer, less-commonly-used pacuppu ("greenish yellow"), a genuine doublet of paccai itself, echoing Telugu's pattern in miniature* பச்சை, மஞ்சள் (paccai mañcaḷ)
explicit focus: etymology; Chapter 22, p. 191
