

Persian, Step by Step, Root by Root

A gentle, etymology-driven introduction to Iranian Persian

Adhithya Rajasekaran

Starter edition — sixteen short lessons in four cumulative chapters.

Companion practice lessons live alongside this book at
code/learning/human-languages/persian/lessons/

Copyright © Adhithya Rajasekaran. Licensed under Creative Commons
Attribution-ShareAlike 4.0 International (CC BY-SA 4.0). Persian is set in
Noto Naskh Arabic (SIL Open Font License).

How to use this starter edition

Begin with no assumed Persian. Each section takes one small expression, teaches only the letters and grammar needed for it, connects it to words you may already know, and ends with a short retrieval prompt. Read the Persian from right to left, but do not memorize an alphabet before you meet useful language.

This volume teaches contemporary Iranian Persian. Romanization remains beside the script in this starter edition and will fade gradually. Formal written and colloquial Iranian forms will be labelled when they diverge; Dari and Tajik are related future tracks, not silent substitutes.

Persian vocabulary has several historical layers. Some everyday words are inherited Iranian forms; many others came through Arabic and now follow Persian pronunciation and grammar. The point of etymology here is practical: it makes a word easier to remember without replacing its present meaning or use.

Chapter 1

Greetings and responses

This chapter builds one miniature exchange in dependency order: greet, thank, answer yes, answer no. Four short expressions are enough to establish the direction of the script, joining, one non-joining letter, omitted short vowels, and the contrast between borrowed and inherited vocabulary. Companion lessons: FA-C01-*.md.

1.1 سلام (*salâm*) — hello through peace

Read only what this expression needs

Persian runs **right to left**. Read سلام from its right edge: س *s*, ل *l*, ا long *â*, م *m*. Most letters join inside a word. The tall ا is a non-joiner on its left side, so the final م begins a new stroke group. No other letters are required yet.

Where the expression came from

Salâm means “hello” and evokes peace. Persian borrowed it from Arabic, whose consonant family **s-l-m** carries ideas of peace, safety, and wholeness. Hebrew *shalom* belongs to the same older Semitic family. The word is borrowed history and completely ordinary modern Persian at once.

Use it now

Say سلام to one person or a group. It is a neutral, friendly greeting. Hear it, answer with the same word, and resist adding any grammar yet.

One-minute checkpoint

Read سلام from right to left. Which letter carries the long *â*? Point to ل, cover the romanization, and say *salâm* once.

1.2 ممنون (*mamnun*) — thank you**Read only what this expression needs**

Reuse final م from سلام, now at the right edge where reading begins. The visible sequence is م *m*, م *m*, ن *n*, و long *u*, ن *n*. Persian usually omits short vowels, so the first *a* is learned with the whole word. Here و carries the long *u*.

Where the expression came from

Persian received *mamnun* from Arabic. It describes someone as grateful or obliged and belongs to the Arabic **m–n–n** family associated with favor or kindness. In current Persian conversation, the whole word is simply a useful “thanks.”

Use it now

Build the smallest exchange: A says سلام; B answers سلام; A adds ممنون. Treat each expression as one social move.

One-minute checkpoint

Which visible letter carries long *u* in ممنون? Point to و, then say *salâm* — *mamnun* without looking.

1.3 بله (*bale*) — yes**Read only what this expression needs**

Read three letters: ب *b*, ل *l*, ه *h*. The short *a* and *e* are supplied by the reader rather than written as separate letters. The final ه remains visible even though careful speech ends with a light vowel-like sound rather than a forceful English *h*.

Use it now

Bale is a standard polite affirmative. A more casual answer exists, but one reliable “yes” is enough now: *bale*, *mamnun* — yes, thank you.

One-minute checkpoint

Cover *bale*. Read بله; name the two short vowels that the writing leaves implicit; answer “yes” once.

1.4 نه (*na*) — no, and an inherited bridge**Read only what this expression needs**

You already know final ه from بله and ن from ممنون. Put ن on the right and read نه: *n* plus an unwritten short *a*.

Where the expression came from

Unlike the two Arabic loans at the start of this chapter, Persian *na* continues an old Indo-Iranian negative family. Related forms occur across Iranian and Indo-Aryan languages. This is the first bridge from Persian toward Hindi and Urdu: not an instruction to learn those forms now, just a reason the tiny word may feel familiar later.

Use it now

Contrast only the answer: بله *bale* — yes; نه *na* — no. Ask yourself a harmless yes/no question and answer it both ways.

One-minute checkpoint

Without looking back, produce the four-step chain: hello, thank you, yes, no. Then read سلام, ممنون, بله, نه in the same order.

Chapter 2

Give your name

The first chapter supplied social moves. This one adds a single sentence and a single grammar idea: Persian's linking vowel, *ezafe*. Companion lesson: FA-C02-esm-e-man.md.

2.1 اسم من ... است (*esm-e man ... ast*) — my name is ...

Read the Persian phrase from right to left while keeping its spoken word order:

اسم من سارا است
esm-e man Sârâ ast — My name is Sara.

Read only what this expression needs

The phrase reuses more than it appears to. In اسم *esm*, you already recognize ا, س, and م. In من *man*, both letters came from ممنون. The final word است *ast* begins with familiar ا and س; only ت *t* is new. Short vowels remain mostly implicit.

Use it now

Assemble four pieces:

1. اسم *esm* — name;
2. a spoken *-e* — the linker called **ezafe**;
3. من *man* — I/me, interpreted here as the owner;
4. your name, followed by است *ast* — is.

Only one reusable pattern is due: **noun + -e + owner**. Do not expand it into a table of possessive grammar yet.

Where the expression came from

The sentence displays two historical layers side by side. *Esm* is an Arabic loan related to Arabic *ism*. *Man* and *ast* belong to Persian's inherited Iranian core. Borrowed nouns and inherited grammar now work together as one Persian sentence.

One-minute checkpoint

What links *esm* to *man*? Say the normally unwritten *-e*. Then replace Sara with your own name and produce the full careful sentence once.

What is deliberately deferred

Everyday speech often shortens the final copula, and Persian has familiar and polite ways to ask another person's name. Those are later lessons. Keeping the full است visible here lets a new reader account for every part before conversational reductions begin.

Chapter 3

Ask and Answer Names

This chapter is generated from the canonical micro-lessons used by Language Ladder. Each section stays independently resumable and preserves the authored prerequisite order.

3.1 شما / تو — two relationships inside “you”

Warm-up. [PAUSE 2s] Say **esm-e man ... ast** with your own name. To turn that sentence around, you next need a safe word for the other person.

The two words

Persian	read	use
شما	<i>shomâ</i>	one person respectfully, or more than one person
تو	<i>to</i>	one familiar person

In شما, meet ش *sh*; its three dots distinguish it from س *s*. Final ا carries long *â*. In تو, و has its *o* value rather than the long *u* it had in ممنون. Learn the sound from the whole word.

Grammar Lens: begin respectfully

Persian uses plural **shomâ** for respectful singular address, much as Russian uses *vy* and French uses *vous*. Use **shomâ** with an unfamiliar adult or in a first meeting. Use **to** after the relationship is familiar. English once made a similar distinction but now uses *you* for both.

The word, taken apart — and its English cousins

Persian **to** belongs to the ancient Indo-European familiar-“you” family: English **thou**, Latin *tū*, and Sanskrit *tvam* are relatives. The word is old; the social choice carried by it is current.

Guided Practice

- [YOU SAY: a new adult — **shomâ**]
- [YOU SAY: a close friend — **to**]
- [YOU SAY: the old family — **to, thou, tū, tvam**]

Wrap-up recall

Which form is safest when the relationship is new? (**Shomâ**.) Which is the relative of English *thou*? (**To**.)
Source: Persian Online: Pronouns.

3.2 چیست — “what is?” in one joined word

Warm-up. [PAUSE 2s] Which “you” is safe for a new adult? (شما, *shomâ*.) Now add the question engine that will follow “your name.”

You’ll want to know first — چیست

چیست — *chist* — **what is?**

Read from the right: چ *ch*, ی long *i*, س *s*, ت *t*. چ is one of Persian’s four additions to the Arabic alphabet: it uses the same base shape as چ, with three dots below. Meet only this joined form now.

Grammar Lens: two words compressed

chist is the careful fusion of **chi** “what” and **ast** “is.” The opening vowel of *ast* disappears when the pieces join:

chi + ast → **chist**

You already know full **ast** from *esm-e man ... ast*. This lesson changes no copula rule; it gives one high-frequency fused question form.

Guided Practice

- [YOU SAY: **chi** + **ast** → **chist**]
- [YOU READ: چیست from چ to ت]
- [YOU SAY: **chist?** — “what is?”]

Wrap-up recall

What two pieces make **chist**? (**Chi** + **ast**.) Which new Persian letter opens it? (چ, *ch*, with three dots below.)

3.3 چیست؟ شما اسم — ask a name respectfully

Warm-up. [PAUSE 2s] Give the three ready pieces: **esm-e** “name-of,” **shomâ** respectful “you,” and **chist** “what is?”

The exchange

چيست؟ شما اسم — *esm-e shomâ chist?* — **What is your name?**

The Persian order is transparent once the pieces are known:

name + **-e** + you + what-is?

The spoken ezafe turns **esm-e shomâ** into “your name.” **Chist** stays at the end. No new agreement or verb table is hiding here.

Script: the question mark

Persian ends a written question with ؟. Its curve faces the opposite way from English ?, matching the right-to-left line. Read the sentence from its right edge; meet the punctuation at the far left.

Guided Practice

- [YOU SAY: **esm-e shomâ chist?**]
- [YOU SAY: ask, then answer — **esm-e man ... ast**]
- [YOU POINT: to ؟ at the end of the right-to-left question]

Wrap-up recall

Ask the question once without reading the romanization. Then answer with the careful name frame you already know.

Source: Persian Online: Introducing Yourself.

3.4 خوشوقتم — pleased to meet you

Warm-up. [PAUSE 2s] Ask **esm-e shomâ chist?** and answer **esm-e man ... ast.** One warm response now closes that tiny meeting.

The exchange

خوشوقتم — *khoshvaghtam* — **Pleased to meet you.**

Treat the joined word as one social move first. خ gives *kh*, like the sound in Scottish *loch*. ش gives *sh*. Persian commonly pronounces ق here with the merged *gh/q* sound of contemporary Iranian speech.

The word, taken apart — and its English cousins

- **khosh** — pleasant, happy; inherited Persian vocabulary.
- **vaqt** (pronounced *vaght* here) — time; an Arabic loan fully at home in Persian.
- **-am** — I am, the first-person ending.

So the word builds “pleasant-time-I-am” into the idiomatic feeling “I am pleased.” The history is layered; the expression is ordinary modern Persian.

Guided Practice

- [YOU SAY: **khoshvaghtam** as one smooth response]
- [YOU SAY: the three pieces — **khosh** + **vaqt** + **-am**]
- [YOU SAY: which piece came from Arabic — **vaqt**]

Wrap-up recall

Which response closes the introduction? (**Khoshvaghtam**.) Which three layers can you hear inside it? (**Khosh + vaqt + -am**.)

Source: Persian Online: Introducing Yourself.

3.5 Practice — a complete Persian name exchange

Warm-up. [PAUSE 2s] Recall the four moves without adding anything: greet, ask, answer, acknowledge.

The exchange

A: سلام! — *Salâm!* B: سلام! — *Salâm!* A: چیست؟ شما اسم —
Esm-e shomâ chist? B: است سارا من اسم. — *Esm-e man Sârâ*
ast. A: خوشوقتم. — *Khoshvaghtam.* B: ممنون. — *Mamnun.*

Every line is already known. **Shomâ** keeps the first meeting respectful; the answer returns to **man**. The question mark sits at the left end of the right-to-left question.

Guided Practice

- [YOU SAY: both voices, using your own name]
- [YOU SAY: the exchange again without romanization]
- [YOU SAY: only the three name moves — question, answer, response]

Wrap-up recall

Run the meeting once from **salâm** to **mamnun**. If one line stalls, review that single micro-lesson rather than rereading the whole chapter.

Chapter 4

How Are You?

This chapter is generated from the canonical micro-lessons used by Language Ladder. Each section stays independently resumable and preserves the authored prerequisite order.

4.1 حال — the “state” in a wellbeing question

Warm-up. [PAUSE 2s] Run only the opening of the meeting you know: **salâm** and the name question. The next move asks about the other person’s present state.

You’ll want to know first — one useful word

حال — *hâl* — state, condition

Read from right to left: ح *h* + l long â + ل *l*. The first letter is a breathier *h* than English normally uses; a clear ordinary *h* is a safe beginner approximation. Keep the whole written word attached to its meaning.

The word, taken apart — and its English cousins

Persian borrowed **hâl** from Arabic, then uses it with Persian grammar. You will soon say **hâl-e shomâ**, literally “the state of you.” That **-e** is the same spoken ezafe already learned in **esm-e shomâ**.

Guided Practice

- [YOU SAY: **hâl** — state or condition]
- [YOU READ: حال from right to left]

- [YOU CONNECT: an Arabic-rooted noun inside Persian ezafe grammar]

Wrap-up recall

What does **hâl** name? (A state or condition.) Which familiar linker will attach an owner to it? (Ezafe **-e**.)

Source: Persian Online: Greetings List.

4.2 چطور — “how?” one layer at a time

Warm-up. [PAUSE 2s] Say the Persian noun for a state or condition. (**Hâl**.) Now ask about the manner of that state with one question word.

You’ll want to know first — the question word

چطور؟ — *chetor?* — how? / in what manner?

You already met چ *ch* in چیست. Here it is followed by ط *t*, و *o*, and ر *r*. The short *e* is not written. Learn the sound from the whole word: *che-tor*.

The word, taken apart — and its English cousins

Persian Online takes چطور apart as Persian چه *che*, “what,” plus the Arabic loan طور *tor*, “manner.” The literal picture is “in what manner?” That layered history is useful memory, but **chetor** is one everyday Persian question word now.

Guided Practice

- [YOU SAY: **chetor?** — how?]
- [YOU POINT: to familiar چ at the right edge]
- [YOU REBUILD: **che** “what” + **tor** “manner”]

Wrap-up recall

Which part means “what”? (**Che**.) Which borrowed part means “manner”? (**Tor**.)

Source: Persian Online: Interrogatives.

4.3 است؟ چطور شما حال — ask “How are you?” respectfully

Warm-up. [PAUSE 2s] Recall **hâl** “state,” **shomâ** respectful “you,” **chetor** “how,” and careful **ast** “is.” The only assembly move is familiar ezafe.

The exchange

است؟ چطور شما حال — *hâl-e shomâ chetor ast?* — **How are you?**

Build it without translating English word for word:

state + **-e** + respectful-you + how + is?

The unwritten ezafe in **hâl-e shomâ** works exactly like **esm-e shomâ**. Persian asks, literally, “the state of you, in what manner is?”

Grammar Lens: one reliable careful form

This chapter asks you to produce the careful written form with **ast**. Everyday Iranian speech often contracts the end to *چطوره؟ chetore?*; recognize that preview, but keep the uncontracted line until the careful pattern is secure.

Guided Practice

- [YOU SAY: **hâl-e shomâ chetor ast?**]
- [YOU TRACE: **hâl-e shomâ** — state-of-you]
- [YOU CHOOSE: careful production now — final **ast**]

Wrap-up recall

Ask once from memory. What already-known grammar holds **hâl** and **shomâ** together? (Ezafe **-e**.)

Source: Persian Online: Greetings List.

4.4 خوب — “good” and “well”

Warm-up. [PAUSE 2s] Ask **hâl-e shomâ chetor ast?** The smallest positive answer begins with one word.

You’ll want to know first — the answer word

خوب — *khub* — good, well

At the right edge, خ is *kh*, made farther back than English *h*. و carries long *u*, as it did in ممنون; final ب closes the word with *b*. Say it as one beat: *khub*.

The word, taken apart — and its English cousins

Persian’s everyday vocabulary is layered. **Hâl** and the **tor** inside **chetor** came through Arabic; **khub** belongs to the inherited Persian layer. All three are fully ordinary Persian now. History helps memory without ranking one layer as more authentic than another.

Guided Practice

- [YOU SAY: **khub** — good, well]
- [YOU READ: خ + long-*u* و + final ب]
- [YOU CONTRAST: inherited **khub** beside borrowed **hâl**]

Wrap-up recall

Give the answer word once without romanization. Which letter carries its long *u*? (و.)

Source: Persian Online: Greetings List.

4.5 ممنون خوبم، — “I am well, thank you”

Warm-up. [PAUSE 2s] Say **khub** “well,” then the thanks you learned in Chapter 1: **mamnun**. One small ending turns the first word into a full answer.

The exchange

ممنون خوبم. — *Khubam, mamnun.* — **I am well, thank you.**

The new final م is *m*. Attach it directly to خوب: خوب + م → خوبم. Persian script and speech both keep the answer compact.

Grammar Lens: one copula ending, not a table

The attached ending **-am** means “I am” here. Persian Online notes that خوب by itself already means “I am fine”; the separate pronoun **man** is unnecessary. Learn only this useful first-person ending today. The rest of the copula set can arrive one form at a time later.

Guided Practice

- [YOU BUILD: *khub* + **-am** → *khubam*]
- [YOU SAY: *khubam, mamnun*]
- [YOU POINT: to final م carrying “I am”]

Wrap-up recall

What does final **-am** contribute? (“I am.”) Do you need a separate **man** in this answer? (No.)

Sources: Persian Online: Verb “To Be” and Greetings List.

4.6 Practice — a Persian wellbeing exchange

Warm-up. [PAUSE 2s] Recall the two moves only: ask about the other person’s state, then answer “I am well, thank you.”

The exchange

A: سلام! چطور شما حال! *Salâm! Hâl-e shomâ chetor ast?* B: ممنون خوبم. *Khubam, mamnun.*

Every piece is already owned. The question reuses respectful **shomâ**, **ezafe**, and careful **ast**. The answer’s final **-am** carries “I am,” so no new pronoun is hiding between the lines.

Grammar Lens: keep the social choice visible

Use this careful question in a first meeting. You may hear shorter conversational forms, but producing one stable respectful line first prevents script, register, and contraction from arriving as one oversized step.

Guided Practice

- [YOU SAY: both voices with the script visible]
- [YOU SAY: both voices without romanization]
- [YOU SWITCH: ask first, then answer after a pause]

Wrap-up recall

Run the exchange once from **salâm** to **mamnun**. If one side stalls, return to that single micro-lesson rather than rereading the chapter.

Sources for this starter edition

Script descriptions follow the University of Texas at Austin Persian Online writing-system materials; its open grammar and vocabulary resources ground the Chapter 4 wellbeing forms. The companion Markdown lessons are the canonical short-practice source for this edition.
