Preface

This book teaches Telugu one word at a time, and it teaches each word by taking it apart. It is written for someone starting from zero — who may not read a single Telugu letter — so the script is taught *inside the word lessons themselves*: each word introduces exactly the letters it needs, so you learn to read నమస్కారం *and* learn that it means "greetings" in the same few minutes. There is no alphabet drill to sit through first. (A reader who already reads Telugu simply skims the "letters in this word" notes.)

Telugu — famous as "the Italian of the East" for its open, vowel-final music — is one of the four literary **Dravidian** languages, a family entirely separate from the Indo-European one that gave us English, Latin, and Sanskrit. Like its sister Kannada, and unlike Tamil, it borrowed *heavily* from Sanskrit; so "hello" is the Sanskrit నమస్కారం (*namaskāram*), yet "yes" and "okay" are the native అవును (*avunu*) and సరే (*sarē*). Telugu also shows the family is no monolith: where its sisters say "no" with a word from the root *il-*, Telugu goes its own way with లేదు (*lēdu*). Each lesson sets the word beside its cousins across the family — English always, and Sanskrit, Hindi, and the other Dravidian languages where they illuminate — every form supplied in full, so no prior knowledge of any of them is assumed.

How to use this book

Every numbered section is one word, or one small phrase, and takes a few minutes — the length of a queue, an errand, or the walk to the bus. Read them in order the first time through: each section stands on the ones before it, and nothing is used before it has been taught. After that the book becomes reference, and you can open it anywhere.

Say the Telugu out loud wherever you can. The prompts under *Your turn* are written to be spoken, and saying a word is most of what makes it stay. The questions under *Before you move on* carry their own answers in brackets: cover them, answer from memory, then look.

Nothing here is gated behind the alphabet. Each lesson introduces exactly the letters and sounds its own word needs, so you are reading real words from the first page rather than drilling a chart. The whole script is gathered in a reference at the back of the book — somewhere to look things up when you are curious, never a chapter to sit through first.

Chapter 1

Greetings

Modes: 👁 **eyes** (6) ✓ **pen** (6) 🚗 **Hands-free start:** the first of 12 lessons.

> ***By the end of this chapter:*** I can greet someone in Telugu, recognize the reply, and choose an appropriate response.
>
> *The greetings and the words that oil a first conversation — and, taught through them, how to read the Telugu script and how Telugu sits inside the Dravidian family. Each word introduces the letters it needs, so you learn to read it and understand it at once:* నమస్కారం · ధన్యవాదములు · అవును · లేదు · సరే.

1.1 Namaskāram — "greetings," a making of a bow

> Meet your first Telugu word. Say **namaskāram**: "hello" or "greetings." Then meet three of its letters, one small piece at a time.

The letters in this word

Telugu runs **left to right**. A consonant normally carries a built-in **a**.

- న · మ · ర = *na* · *ma* · *ra* — three of the word's letters, each with its built-in *a*.

That is enough for a first lesson. The rest of the word — a *ka* with a long-$\bar{a}$ sign, an *s* stacked under it, and a final nasal dot — arrives over this chapter, and you will see the whole written word near the chapter's end.

The word, taken apart — its roots and family

Namaskāram came from Sanskrit **namas** ("a bow") + **kāra** ("a making," from *kṛ*, "to do"): literally **"the making of a bow."** Telugu added its own final sound. Tamil instead kept its native greeting, *vaṇakkam*.

Across the family — the same idea, six ways:

Language	"Hello"	Source
Telugu	*namaskāram*	Sanskrit
Kannada	*namaskāra*	Sanskrit — the same word
Malayalam	*namaskāram*	Sanskrit — the same word
Hindi	*namaste*	Sanskrit — the same *namas*
Tamil	*vaṇakkam*	**native Dravidian**
English	*hello*	Germanic

Four of the six borrowed the Sanskrit bow. **Tamil alone kept its own word** — the first sign that "Dravidian family" does not mean "same vocabulary."

CDIAL 6960 lists Sanskrit *namaskāra*, "adoration", and CDIAL 6958 *namas*, "a bow, adoration".

Why it's said this way

With palms together and a small bow, *namaskāram* works as **hello or goodbye**. It is respectful without being stiff.

The letters in this word

Telugu reads **left to right**, and every consonant carries a built-in "a" (many under a little check-mark hat, the *talakaṭṭu*): న *na*, మ *ma*, ర *ra*. Say the five beats slowly: *na-ma-s-kā-ramṁ*. The *s* has no vowel of its own and leans straight into *kā*; the final *ṁ* is a soft nasal hum.

Your turn

- *Say it:* na · ma · s · kā · ramṁ → "namaskāram"
- *Say it:* na · ma · ra

- *Read it:* న · మ · ర
- *Say it:* "namaskāram" — you are offering respect
- *Write it:* trace న with a finger, then copy it once

Before you move on

Read it: న · మ · ర (*na · ma · ra.*) What does *namaskāram* mean? ("Greetings.") What does the whole word literally mean? ("The making of a bow.")

1.2 Dhanyavādamulu — "thank you," utterances of "worthy"

Another Sanskrit loan — and a first look at a Telugu *ending*, the plural that turns "a thanks" into "thanks."

The letters in this word

(Skim if you read Telugu.) Three of its letters today:

- ధ = "dha" — an **aspirated** *d* (a puff of breath after it).
- వ = "va."
- ద = "da" — a plain *d*, with no puff. Set it beside ధ and compare.

The rest — a stacked *nya*, a long *ā*, and the ending *-mulu* — arrives over this chapter, and the whole written word appears near its end.

The word, taken apart — its roots and family

The core is **Sanskrit**: **dhanya** ("worthy, blessed," from *dhana*, "wealth"; CDIAL 6727a) + **vāda** ("a saying," root *vad*, "to speak"; CDIAL 11507) = "an utterance of '[you are] worthy.'" Telugu then adds its own **plural ending -mulu**, so *dhanyavāda-mulu* is literally **"worthy-sayings,"** thanks in the plural of courtesy. (You'll also hear the shorter *dhanyavādālu.*) The Sanskrit stem is the same one inside Hindi *dhanyavād* and Kannada *dhanyavāda.*

Across the family — the same idea, five ways:

Language	"Thanks"	Note
Telugu	*dhanyavādamulu*	**Sanskrit** stem + Telugu plural
Kannada	*dhanyavāda* (ಧನ್ಯವಾದ)	Sanskrit — same stem
Hindi	*dhanyavād* (धन्यवाद)	Sanskrit — same stem
Tamil	*naṉṟi* (நன்றி)	**native** ("goodness")
Malayalam	*nandi* (നന്ദി)	**native** — Tamil's cousin

Telugu, Kannada, and Hindi share the Sanskrit stem; Tamil and Malayalam keep the native *naṉṟi / nandi*.

Grammar Lens: Telugu builds words by gluing endings on

-mulu is your first taste of how Telugu (like all Dravidian languages) works: it is **agglutinative** — it stacks meaning by gluing endings onto a stem, one after another, rather than using separate little words. Here a plural rides on a borrowed Sanskrit noun. Later endings will mark case ("to," "from," "with") the same way. Bank the idea: in Telugu, grammar is mostly **suffixes**.

The letters in this word

New: ధ *dha*, an aspirated *d* with a puff of breath, beside plain ద *da*. Say the six beats: *dha-nya-vā-da-mu-lu*. In *nya* the *n* has no vowel of its own; it glides straight into *ya*.

Your turn

Say these aloud:

- dha · nya · vā · da · mu · lu → "dhanyavādamulu"
- the pieces — Sanskrit *dhanya-vāda* + Telugu plural *-mulu*
- the shorter everyday form, "dhanyavādālu"

Before you move on

Which carries the puff of breath, ధ or ద? (ధ, *dha.*) What is Sanskrit in *dhanyavādamulu*, and what is Telugu? (*dhanya-vāda* is Sanskrit; the plural *-mulu* is Telugu.) What does "agglutinative" mean for how Telugu builds words? (It glues endings onto a stem.)

1.3 ము — one character, and it is in the first word of the book

Say the greeting this book opened with. Then say the word for thank you. You have both of them in your mouth already.

Script you'll notice: ము

ము — *ma.*

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *m*, it is **ma**.

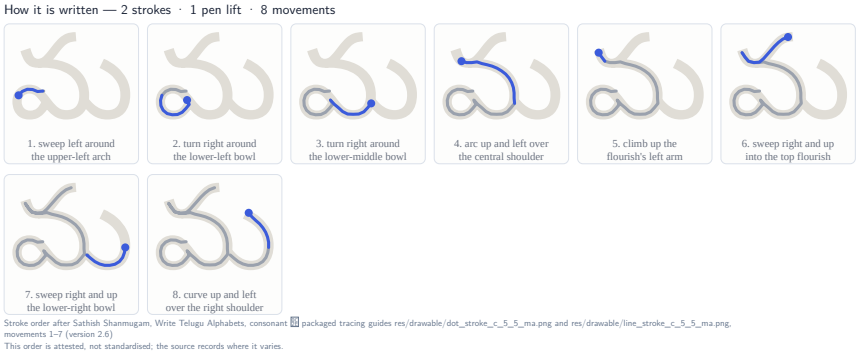
Both of the words you said a moment ago carry it:

- *namaskāram* — hello / greetings ("a making of a bow")
- *dhanyavādamulu* — thank you ("utterances of 'worthy'"), in its tail ములు *-mulu*: ము is మ with the *u* sign hooked on, and లు is ల *la* with the same sign.

Their whole written forms come near this chapter's end.

This is the character the book uses more than any other. It sits in the second syllable of the very first word you were taught, and it will be in front of you on nearly every page from here on.

Writing: ము — seven calm movements



How ము *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 sweeps left around the upper-left arch. Movements 2 and 3 turn right around the two lower bowls. Movement 4 rises around the central shoulder. Keep the pen down: movement 5 climbs a short way up the flourish's left arm, and movement 6 sweeps up into the flourish above. Lift once. Movement 7 turns around the lower-right bowl, and without lifting, movement 8 rises around the outer-right shoulder. The strip gives the short climb a panel of its own, so the seven movements are numbered as eight.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, so keep the seven clear movements instead of rushing their joins.

Your turn

- *Look:* at the three shapes you met in the greeting, and find ము among them

  న · ము · ర

- *Trace it:* ము three times, saying *ma* as you finish each one
- *Say it:* which syllable of *namaskāram* ము carries (the second, *ma*)

Before you move on

Which character is this — మ? What sound does it carry? (***ma***.) Name the two words in this chapter that contain it. (*namaskāram* and *dhanyavādamulu* — once each.)

1.4 ధ — the character the thank-you word opens with

Before the new one: మ — what sound does it carry?

This one is at the very front of the word for thank you, where your eye lands first.

Script you'll notice: ధ

ధ — *dha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *dh*, it is **dha**.

- *dhanyavādamulu* — thank you ("utterances of 'worthy'")

One word so far, and it is the one this character opens. The *dh* is a single sound made at the teeth with a puff of breath after it, not the English *th* of *this*. More words with ధ arrive as the book goes on; this is where the shape gets into your eye.

Writing: ధ — six deliberate movements

How ధ is written, stroke by stroke

Watch the numbered filmstrip once before your pen moves. Movements 1–4 build the round body in four short curves: upper left, lower left, lower right, then upper right. The pen stays down from one curve to the next. Movement 5 climbs a short way up the flourish's left arm, and movement 6 curls up through the top flourish. Lift once, for movement 7, the short lower stem. The strip gives the short climb a panel of its own, so the six movements are numbered as seven.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, so keep the body and flourish as one unbroken run and make the single lift before the stem.

Your turn

- *Look:* at the three shapes you met in the thank-you word, and find ధ

  ధ · వ · ద

- *Trace it:* ధ three times, saying *dha* as you finish each one

- *Look:* at ధ and ద side by side and say which one carries the puff of breath

Before you move on

Which character is this — ధ? What sound does it carry? (***dha***.)
Where in the thank-you word does it sit? (At the front.)

1.5 క — one character, met inside words you already say

Rounded, curvy letters, most crowned with a small tick or check-mark headstroke; no continuous top line. This is the first one.

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: క

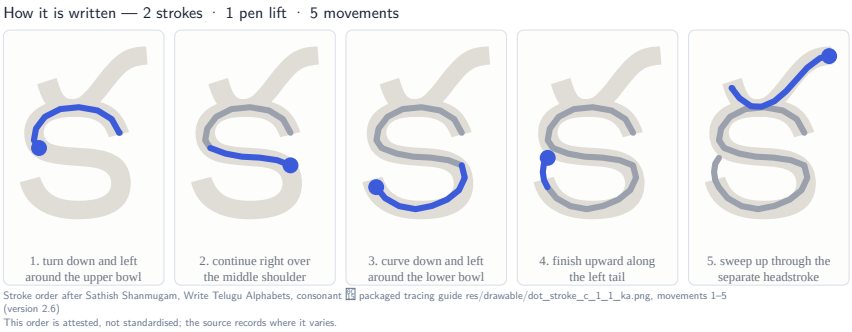
క — *ka*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *k*, it is **ka**.

You already say this one, and it has క inside it:

- *namaskāram* — hello / greetings ("a making of a bow"), where it opens the syllable *kā*. In front of it the word stacks an *s* — స *sa* with its vowel stripped by the mark ◌్ — onto ka: స్క *ska*.

Writing: క — follow the numbered strip



How క *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write **క** yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the letters you have met so far, and find **క** among them

  న · **మ** · **ర** · **క** · **ధ** · **వ** · **ద**

- *Trace it:* **క** three times, saying *ka* as you finish each one
- *Say it:* which syllable of *namaskāram* **క** begins (*kā*)

Before you move on

Which character is this — **క**? What sound does it carry? (***ka***.) Name one word you already say that contains it.

1.6 అవును (avunu) — "yes"

> After two Sanskrit loans, a **native Telugu** word: the plain "yes."

The letters in this word

(Skim if you read Telugu.)

- **అ** = **"a"** — an **independent vowel** (the word starts with a vowel, so it gets a full letter, not a hooked-on sign).
- **వు** = "vu" — **వ** (va) with the **"u" vowel sign**.
- **ను** = "nu" — **న** (na) with the "u" sign.

Left to right: **అ** · **వు** · **ను** = *a-vu-nu* →

అవును = **avunu** = "yes."

The word, taken apart — its roots and family

అవును (*avunu*) is the everyday **"yes / it is so,"** a native Telugu word. It comes from *avu*, the verb of being (DEDR 333) — literally "it is" — which is why the next lesson's "no" (*kādu*, "is not") is its exact mirror. DEDR compares Sanskrit *ām*, "yes".

Grammar Lens: yes and no as "it is" / "it is not"

Telugu's yes/no pair are really little **statements of being**: *avunu* ("it is [so]") and *kādu* ("it is not"). This is a very Dravidian instinct — answer by asserting or denying existence, rather than with a bare particle. You'll also hear a "yes" come back as the question's own verb, echoed (*vaccānu*, "I came," for "did you come?"). Bank *avunu* as the simple word.

The letters in this word

అ is the **independent vowel** "a" (word-initial). **వు** is *vu*, **ను** is *nu* (each a consonant with the "u" sign). *Read it:* **అ · వు · ను** → *avunu*

Your turn

Say these aloud:

- a · vu · nu → "avunu"
- why **అ** is a full letter here (the word starts with the vowel)
- "avunu" — "yes, it is so"

Before you move on

Read it: **అవును** Native Telugu or Sanskrit loan? (Native.) At root, what kind of statement is a Telugu "yes"? (An assertion of being — "it is [so]," mirrored by *kādu*, "it is not.")

1.7 అ — the vowel you have been saying since the first page

Before the new one: **క** — what sound does it carry? Say it out loud.

You said *ka*, not *k*. Hold on to that vowel at the end.

Script you'll notice: అ

అ — *a*.

It is an **independent vowel** — a vowel that is a letter in its own right, not a mark hung on a consonant.

Every consonant lesson so far has told you the same thing: a consonant in this script is never bare, it comes with an *a* already inside it. **అ is that vowel, standing on its own.**

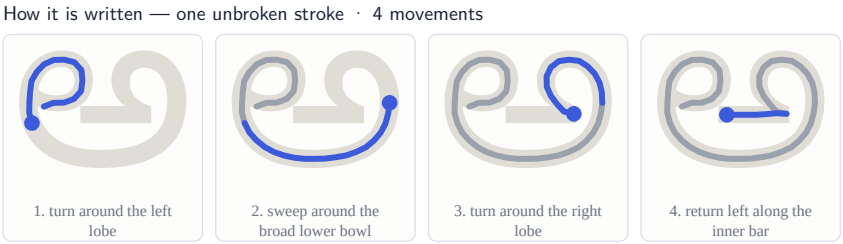
Here is what makes it the odd one out. Most vowels in Telugu have two forms — a letter, and a mark that rides on a consonant. This vowel has a letter and **no mark at all**, because a consonant with nothing hanging off it is already carrying it. The absence is the writing.

So Telugu reaches for అ in one situation: when the vowel opens a word and has no consonant in front of it to sit inside.

- అవును *avunu* — yes

That word begins on today's character. Everything after it is consonants with their own vowels attached.

Writing: అ — follow the numbered strip



How అ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write అ yourself — slowly, and larger than it is printed.

The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the word below and put a finger on అ at its front

  అవును

- *Trace it:* అ three times, saying *a* as you finish each one
- *Say it:* క, then అ — the same vowel, once tucked inside a consonant and once out on its own

Before you move on

Which character is this — అ? What sound does it carry? (***a***.) Why does this vowel have no mark to hang on a consonant? (**Because a consonant with no mark on it is already carrying it**.) Which word from this chapter begins with it? (అవును.)

1.8 ా — one character, met inside words you already say

Before the new one: క — what does it do?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ా

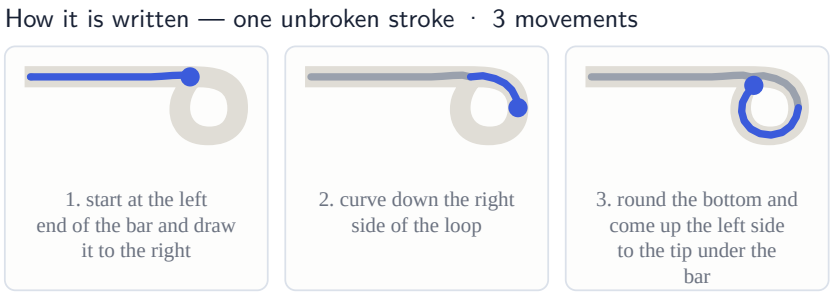
ా — *ā*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ā*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ా somewhere inside it:

- *namaskāram* — hello / greetings, where it turns క *ka* into కా *kā*
- *dhanyavādamulu* — thank you, where it turns వ *va* into వా *vā*

Writing: ా — follow the numbered strip



Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Telugu recognizer, class 52 (ా aa sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ా is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ా yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these, and find ా in the ones that have it

  క · కా · వ · వా · అవును

- *Trace it:* ా three times, saying *ā* as you finish each one
- *Say it:* కా and వా — *kā*, *vā*

Before you move on

Which character is this — ా? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ā* on; takes the built-in *a* off.**) Name one word you already say that contains it.

1.9 లేదు (lēdu) — "no," where Telugu only looks different from its sisters

The partner of *avunu* — and a small surprise. Tamil, Kannada, and Malayalam all say "no" with a word built on *il-* (*illai / illa*). Telugu says *lēdu*, which looks nothing like them, yet comes from the same root.

The letters in this word

(Skim if you read Telugu.)

- **లే** = "lē" — **ల** (la) with the **long-"ē" vowel sign**.
- **దు** = "du" — **ద** (da) with the "u" sign.

Left to right: **లే** · **దు** = *lē-du* →

లేదు = lēdu

The word, taken apart — its roots and family

లేదు (*lēdu*) means **"there is not, it is absent."** It is native Dravidian. Its *lē-*, "be not", looks unlike the *il-* of Tamil and Kannada, but DEDR 2559 files them in one entry. Telugu also has **కాదు** (*kādu*), "it is **not** [that]" — so Telugu splits "no" into two:

- **lēdu** — denies **existence** ("there isn't"): *pustakam lēdu*, "there is no book."
- **kādu** — denies **identity** ("it isn't [that]"): *idi pustakam kādu*, "this is not a book."

Across the family — the same idea, five ways:

Language	"No / isn't"	Note
Telugu	*lēdu / kādu* (**లేదు / కాదు**)	native; *lē-* is filed with *il-* (DEDR 2559)
Tamil	*illai* (இல்லை)	native, root *il-*
Kannada	*illa* (ಇಲ್ಲ)	native, root *il-*
Malayalam	*illa* (ഇല്ല)	native, root *il-*
Hindi	*nahīṁ* (नहीं)	Indo-European (unrelated)

Telugu's *lē-* looks least like the others, yet DEDR files it with *il-*. *Kādu* comes from another verb, *agu*, "to be" (DEDR 333).

Grammar Lens: two "no"s, existence vs. identity

English leans on one flat "no." Telugu — carefully — keeps **two negatives**: *lēdu* for "there isn't / doesn't exist," *kādu* for "is not [the thing you said]." Choosing between them is choosing *what* you're denying. (This two-way negative is a Dravidian trait; Tamil has an echo of it too, but Telugu draws the line most sharply.)

The letters in this word

లే is *lē* (**ల** *la* with the long-"ē" sign); **దు** is *du*. *Read it:* **లే** · **దు** → *lēdu*

Your turn

Say these aloud:

- lē · du → "lēdu"
- the pair — *avunu* ("yes") / *lēdu* ("no")
- the two no's — *pustakam lēdu* ("no book") vs. *idi pustakam kādu* ("this isn't a book")

Before you move on

Read it: **లేదు** What does it deny — existence or identity? (Existence — "there isn't"; *kādu* denies identity.) How does Telugu's "no" differ from Tamil's and Kannada's? (Only in shape: DEDR files *lē-* with their *il-*.)

1.10 సరే (sarē) — "okay," the shared word in Telugu dress

The easy middle between "yes" and "no": "okay, alright, fine." It's the same word you'd meet as *sari* in Tamil and Kannada — Telugu just rounds it off to *sarē*.

The letters in this word

(Skim if you read Telugu.)

- స = "sa."
- రే = "rē" — ర (ra) with the **long-"ē" vowel sign** (the same sign you met on *lē* in *lēdu*).

Left to right: స · రే = *sa-rē* →

సరే = **sarē** = "okay / alright."

The word, taken apart — its roots and family

సరే (*sarē*) means "correct, right → okay, agreed" — the verbal nod of Telugu. It is the same word as Kannada ಸರಿ and Tamil சரி (*sari*), worn to *sarē* in Telugu. Say it once to agree; say *sarē sarē* to mean "yes yes, fine, enough." Its origin is uncertain: DEDR has no entry, and it is usually traced to Sanskrit *sadṛśa*, "like, equal" (CDIAL 13120).

Grammar Lens: one shared word, three scripts

sari / sarē is a clean demonstration of how much the sisters share: one word, one meaning, dressed in three different scripts — Tamil, Kannada, Telugu. Spotting a shared word in three scripts is the quickest way to feel the relationship.

The letters in this word

స is *sa*; రే is *rē* (ర *ra* with the long-"ē" sign you just met on *lē*). *Read it:* స · రే → *sarē*

Your turn

Say these aloud:

- sa · rē → "sarē"
- the everyday triple — *avunu* (yes) · *lēdu* (no) · *sarē* (okay)
- "sarē sarē" — "alright, alright"

Before you move on

Read it: సరే What does it mean, and what is its Tamil/Kannada twin? ("Okay, agreed"; *sari*.) Which vowel sign does *rē* share with *lēdu*? (The long-"ē" sign.)

1.11 ే — one character, met inside words you already say

Before the new one: ా — what does it do?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ే

ే — *ē*.

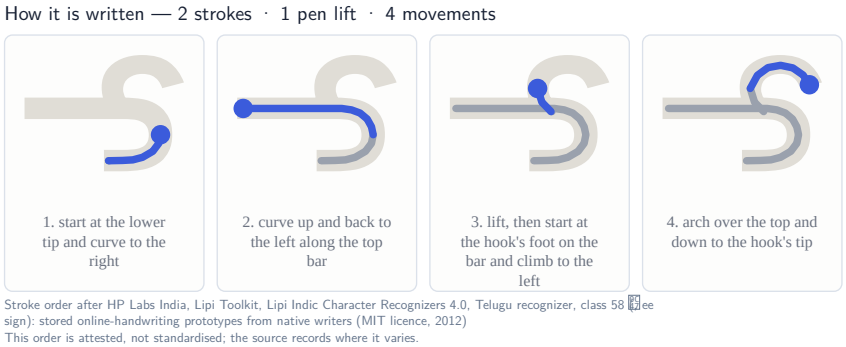
It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ē*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ే somewhere inside it:

- లేదు *lēdu* — no / there isn't (lēdu)
- సరే *sarē* — okay / alright (sarē)

The chapter's two long words appear whole below for the first time: నమస్కారం and ధన్యవాదములు. Their last new pieces are small: the dot ం, a final nasal, and య *ya*, stacked under న by the same *virama* ్ you saw in స్క: న్య.

Writing: ే — follow the numbered strip



How ే is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ే yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ే in the ones that have it

  లేదు · సరే · నమస్కారం · ధన్యవాదములు

- *Trace it:* ే three times, saying *ē* as you finish each one
- *Look:* back at any page of this chapter and find ే once more

Before you move on

Which character is this — ే? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ē* on; takes the built-in *a* off.**) Name one word you already say that contains it.

1.12 Chapter 1 — a five-word recap

Five words, and a first handful of Telugu letters read straight off the page. Let's gather only what you have already learned and make it feel easy.

The exchange — read them back

Sound each out, left to right, before checking:

Read	Meaning	Origin
నమస్కారం *namaskāram*	hello / greetings	Sanskrit
ధన్యవాదములు *dhanyavādamulu*	thank you	Sanskrit stem + Telugu plural
అవును *avunu*	yes	native
లేదు *lēdu*	no / there isn't	native (*lē-*, filed with *il-*)
సరే *sarē*	okay	uncertain (= *sari*)

The letters that did it: consonants carry a built-in **"a"** (many under the little *talakaṭṭu* hat); a **vowel sign** swaps that vowel (ా ā, ు u, ే ē); a **virama** lets a consonant **stack below** the next as a conjunct (స్క); a dot **anusvāra** (ం) adds a final nasal; and a word-initial vowel gets a **full letter** (అ).

The now-familiar pattern: the two **greeting/politeness** words are Sanskrit; *avunu* and *lēdu* are native, and *lēdu* only looks unlike its sisters' *il-*; *sarē*'s origin is uncertain.

Why it's said this way

Telugu has a warm departure exchange built around going and coming back. It belongs in the later chapter where you learn those actions one at a time. For now, repeating the greeting is enough when you part.

Your turn

Say these aloud:

- all five — namaskāram · dhanyavādamulu · avunu · lēdu · sarē
- greet and thank — "namaskāram!" … "dhanyavādamulu."

Before you move on

Read all five aloud. Which two are Sanskrit, which two native? (Sanskrit: *namaskāram*, *dhanyavādamulu*. Native: *avunu*, *lēdu*; *sarē* is uncertain.) How does Telugu's "no" differ from its sisters'? (Only in shape — DEDR files *lē-* with their *il-*.) Which word means "okay"? (*sarē*.)

Next chapter starts introducing yourself, one short possession form at a time.

Chapter 2

Introducing Yourself

Modes: **voice** (4) **eyes** (4) **pen** (10) **Hands-free start:** the first of 18 lessons.

> ***By the end of this chapter:*** I can introduce myself in Telugu, give my name, and understand the other person's name.
>
> *A first real exchange — give your name, ask for someone else's, say you are glad to meet them. Built the same way as the greetings: each piece taken apart, its letters and its root, then assembled.* నా పేరు అరుణ్. */* మీ పేరు ఏమిటి*?*

2.1 పేరు (pēru) — "name," the native Dravidian word

"Name" — native Dravidian, even in Sanskrit-loving Telugu.

The letters in this word

(Skim if you read Telugu.) ప (pa) + ే (the *ē*-sign) → పే (pē); రు (ru). Read పే · రు → **pēru**.

The word, taken apart — its roots and family

పేరు (*pēru*, "name") is **native Dravidian** (DEDR 4410), from Proto-Dravidian ***pēr** — the same word as Tamil *peyar* and Malayalam *pēr*, and a cousin of Kannada *hesaru* (which softened *p* → *h*). It is *not* Sanskrit *nāma* (Hindi *nām*, English *name*). Even Telugu — the most Sanskritised of the Dravidian tongues — kept its

home-grown word for "name."

Across the family — the same idea, six ways:

Language	"Name"	Source
Telugu	**పేరు** *pēru*	**native Dravidian** (*pēr)
Tamil	*peyar*	the *same* Dravidian root
Malayalam	*pēr*	the *same* Dravidian root
Kannada	*hesaru*	Dravidian (*pesar, *p* → *h*)
Hindi	*nām*	Sanskrit (Indo-European)
English	*name*	Indo-European

Four Dravidian tongues, one inherited word — even Kannada's *hesaru*, once you know the old *p* went soft. Only the last two rows come from somewhere else.

The letters in this word

ప (*pa*) + ే (the *ē*-sign) → పే (pē); రు (*ru*). *Read it:* పే · రు → *pēru*

Your turn

Say these aloud:

- "pēru"
- its Dravidian cousins — *pēru* / *peyar* / *pēr*

Before you move on

Is పేరు native or a Sanskrit loan, and what Tamil word is its twin? (Native Dravidian, **pēr*; Tamil *peyar*.)

2.2 న — one character, met inside words you already say

Before the new one: ే — what does it do?

> One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: న

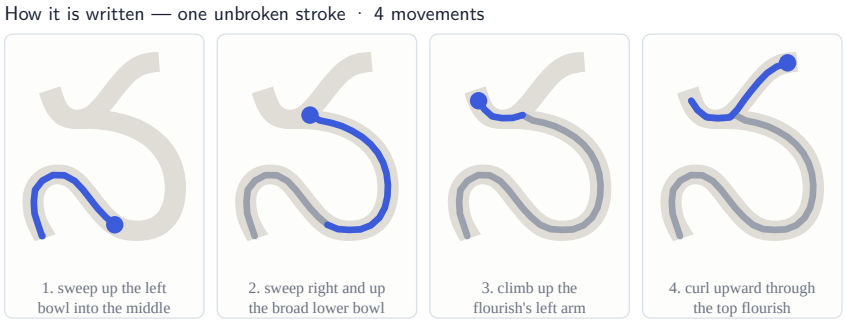
న — *na*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *n*, it is **na**.

You already say these, and every one of them has **న** somewhere inside it:

- **నమస్కారం** *namaskāram* — hello / greetings (namaskāram — "a making of a bow")
- **ధన్యవాదములు** *dhanyavādamulu* — thank you (dhanyavādamulu — "utterances of 'worthy'")
- **అవును** *avunu* — yes (avunu)

Writing: న — three gentle sweeps



How **న** *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 sweeps up around the left bowl and into the middle. Without lifting, movement 2 travels right around the broad lower bowl and rises along its outer edge. Keep the pen down: movement 3 climbs a short way up the flourish's left arm, and movement 4 curls up through the small flourish above. The strip gives that short climb a panel of its own, so the three sweeps are numbered as four.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, but nearly all native writers draw న as one unbroken stroke, so let the three sweeps run into each other without lifting.

Your turn

- *Look:* at these words, and find న in the ones that have it

  నమస్కారం · ధన్యవాదములు · లేదు

- *Trace it:* న three times, saying *na* as you finish each one
- *Look:* back at any page of this chapter and find న once more

Before you move on

Which character is this — న? What sound does it carry? (***na***.)
Name one word you already say that contains it.

2.3 నా (nā) — "my"

"My" — native Dravidian, no European cousin.

The letters in this word

(Skim if you read Telugu.) న (na) + ా (long *ā*) → నా (*nā*).

The word, taken apart — its roots and family

నా (*nā*) means "my." It belongs to Telugu's native Dravidian first-person family, not to the Indo-European family behind English *I/ my*. You will meet the related word for "I" in its own lesson; today you only need *nā*.
DEDR 5160 lists Telugu *nēnu*, "I", with its oblique stems *nan-* and *nā-*, beside Tamil *nāṉ*.

The letters in this word

న (*na*) + ా (long ā) → నా (*nā*).

Your turn

Say these aloud:

- "nā"
- *nā* once with its meaning, "my"

Before you move on

What does నా mean? ("My.") Is it native Dravidian or an Indo-European loan? (Native Dravidian.)

2.4 ు — one character, met inside words you already say

Before the new one: న — what does it do? And one from further back: క?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ు

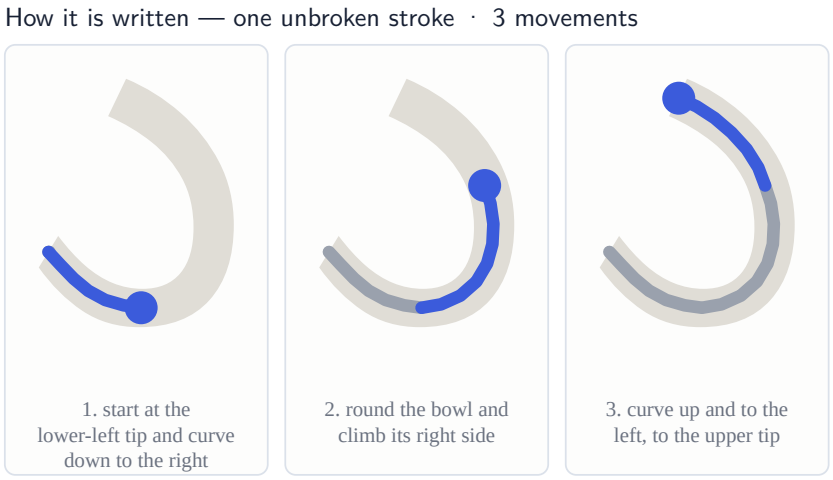
ు — *u*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *u*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ు somewhere inside it:

- ధన్యవాదములు *dhanyavādamulu* — thank you (dhanyavādamulu — "utterances of 'worthy'")
- అవును *avunu* — yes (avunu)
- లేదు *lēdu* — no / there isn't (lēdu)
- పేరు *pēru* — name

Writing: ు — follow the numbered strip



Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Telugu recognizer, class 55 (U+0C41, u sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ు is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ు yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ు in the ones that have it

  ధన్యవాదములు · అవును · నమస్కారం

- *Trace it:* ు three times, saying *u* as you finish each one
- *Look:* back at any page of this chapter and find ు once more

Before you move on

Which character is this — ు? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *u* on; takes the built-in *a* off.**) Name one word you already say that contains it.

2.5 నా పేరు ... (nā pēru ...) — "my name is...," with no "is"

Assemble the two atoms — and note, as in Tamil and Kannada, no word for "is."

The word, taken apart — its roots and family

- nā (my) + pēru (name) + your name.

  నా పేరు ... = "my name ..." → **"my name is..."**

Nā pēru Arun. → "My name is Arun."
Both words are native Dravidian: *nā* (DEDR 5160) and *pēru* (DEDR 4410).

Grammar Lens: the zero copula

There is **no verb**. Telugu sets "my name" beside "Arun" and lets the "is" be understood — the **zero copula** of the Dravidian family. *Nā pēru Arun* = literally "my name Arun."

Your turn

Say these aloud:

- "nā pēru ..." with your name
- notice — no word for "is"

Before you move on

Give your name in Telugu. (*Nā pēru ....*) What does Telugu leave out that English needs? (The verb "is" — zero copula.)

2.6 ౧ — the Telugu numeral for 1

> Before the new one: ౯ — what does it do? And one from further back: ౿?
>
> One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౧

Telugu writes its numbers twice. The digits you already use — 1, 2, 3 — are everywhere in modern Telugu, on price tags and phone screens. Beside them the language keeps **its own ten numerals**, and they have never gone away: they number the pages of Telugu books, they date the almanac, and they are painted on buses and doorplates.

౧ is **one**.

You do not need a Telugu word for it yet. A numeral is read as a quantity, not as a sound, which is why this ladder can start here: the shape can be learned months before the word for it arrives.

Writing: ౧ — copy what you see

Put your pen on ౧ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౧

- *Trace it:* ౧ three times, saying "1" as you finish each one
- *Look:* for ౧ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౧? What amount does it stand for? (౧ and 1 mean the same thing.)

2.7 నువ్వు / మీరు (nuvvu / mīru) — "you," familiar and respectful

"You" — respect made the same way as Tamil, Kannada, and French.

The letters in this word

(Skim if you read Telugu.) **నువ్వు** (*nuvvu*); **మీరు** (*mīru*) = **మీ** (mī) + **రు** (ru).

The word, taken apart — its roots and family

నువ్వు (*nuvvu*, familiar "you") traces to Proto-Dravidian ***nīn** — the same native root as Tamil *nī* and Kannada *nīnu* (DEDR 3684, which spells the Telugu *nīvu*). **మీరు** (*mīru*) is the respectful/plural "you" (DEDR 3688).

Grammar Lens: respect by the plural

nuvvu (familiar) vs. *mīru* (respectful, and literally plural) — the same politeness-by-plural as Tamil *nīṅgaḷ*, Kannada *nīvu*, and French *vous*. For a first meeting, **mīru**.

The letters in this word

నువ్వు (*nuvvu*); **మీరు** (*mīru*, **మీ** *mī* + **రు** *ru*).

Your turn

- *Say it:* "nuvvu" (familiar), "mīru" (respectful)

Before you move on

How does Telugu make "you" respectful, and which languages share the trick? (By the plural — *mīru*; Tamil *nīṅgaḷ*, Kannada *nīvu*,

French *vous*.)

2.8 ్ — one character, met inside words you already say

Before the new one: ∩ — what amount does it stand for? And one from further back: ే?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ్

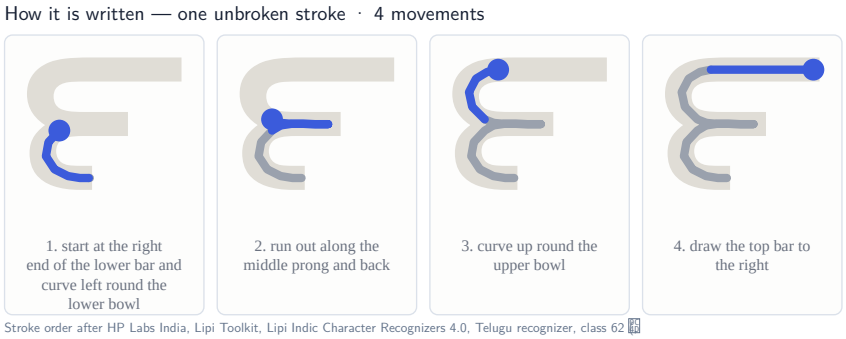
్ — *no sound of its own — it takes one away.*

It is a **vowel-killer**. Every consonant in this script arrives with an *a* already inside it — that is what an abugida is. This mark takes the *a* back, leaving the bare consonant. It is how the script writes two consonants in a row.

You already say these, and every one of them has ్ somewhere inside it:

- నమస్కారం *namaskāram* — hello / greetings (namaskāram — "a making of a bow")
- ధన్యవాదములు *dhanyavādamulu* — thank you (dhanyavādamulu — "utterances of 'worthy'")
- నువ్వు / మీరు *nuvvu / mīru* — you (familiar / respectful)

Writing: ్ — follow the numbered strip



How ్ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ్ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ్ in the ones that have it

  నమస్కారం · ధన్యవాదములు · అవును

- *Trace it:* ్ three times, and each time say what it does: **it kills the built-in *a***

- *Look:* back at any page of this chapter and find ్ once more

Before you move on

Which character is this — ్? What does it do to the consonant it sits on? (**Takes away the built-in *a*.**) Name one word you already say that contains it.

2.9 ఏమిటి (ēmiṭi) — "what"

The last piece of the question: "what."

The letters in this word

(Skim if you read Telugu.) ఏ (independent long *ē*) + మి (mi) + టి (*ṭi*, retroflex) → **ēmiṭi**.

The word, taken apart — its roots and family

ఏమిటి (*ēmiṭi*, "what") is native Dravidian, on the interrogative stem ***yā-/*e-** — the same Dravidian question-root as Tamil *eṉṉa* and Kannada *ēnu*, heading Telugu's question family: *ēmiṭi* (what), *evaru* (who), *ekkaḍa* (where), *enduku* (why).
DEDR 5151 lists Telugu *ēmi*, "what", beside Tamil *eṉṉa* and Kannada *ēn*.

The letters in this word

ఏ (independent long ē) + మి (*mi*) + టి (*ṭi*, retroflex) → *ēmiṭi*.

Your turn

Say these aloud:

- "ēmiṭi"
- the question family — ēmiṭi, evaru, ekkaḍa

Before you move on

What Dravidian stem heads **ఏమిటి** and the other Telugu question-words? (**yā-/*e-*, same as Tamil *eṉṉa*, Kannada *ēnu*.)

2.10 ట — the curled t, in the question from this chapter

Say the word for *what*. Listen to the consonant in the middle and notice where your tongue goes for it.

Script you'll notice: ట

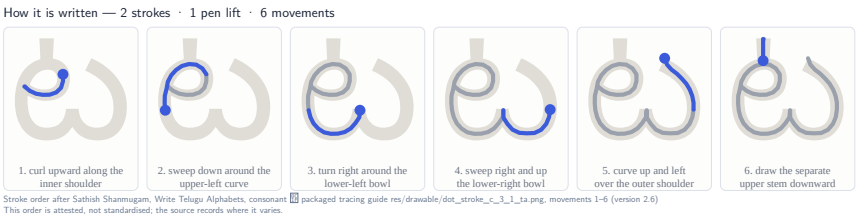
ట — *ṭa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṭ*, it is **ṭa**.

- ఏమిటి *ēmiṭi* — what (ēmiṭi)

The tongue curls back to the roof of the mouth for this one. English has a single *t* and lets the mouth decide where to put it; Telugu has two, and they are different letters. The dot under the *ṭ* in the romanization is the only warning you get there — on the page the two shapes are nothing alike, which is easier.

Writing: ట — six deliberate movements



How ట *is written, stroke by stroke*

Follow the filmstrip slowly. Movement 1 curls up the inner shoulder. Movements 2–5 travel around the broad outer body in four sections. Finish with movement 6, the separate short stem above.

This is one attested school-style order. Telugu handwriting varies, so keep the six directions clear and let the rounded shape grow from them.

Your turn

- *Look:* at the word below and find ట in it

  ఏమిటి

- *Trace it:* ట once, following all six numbered movements
- *Copy:* ట twice without tracing, saying *ṭa* as you finish each one
- *Say it:* where your tongue goes for it, against where it goes for a plain *t*

- *Look:* back at the greeting chapter and find ము and ధ once each

Before you move on

Which character is this — టు? What sound does it carry? (***ṭa***.)
Which word from this chapter contains it? (ఏమిటి.)

2.11 ఏ — the sign you know, as a letter

Two from before: ే — what does it do to the consonant it sits on? And అ — why does that one need no mark?

Today the two ideas meet.

Script you'll notice: ఏ

ఏ — *ē*.

It is an **independent vowel** — a vowel that is a letter in its own right, not a mark hung on a consonant.

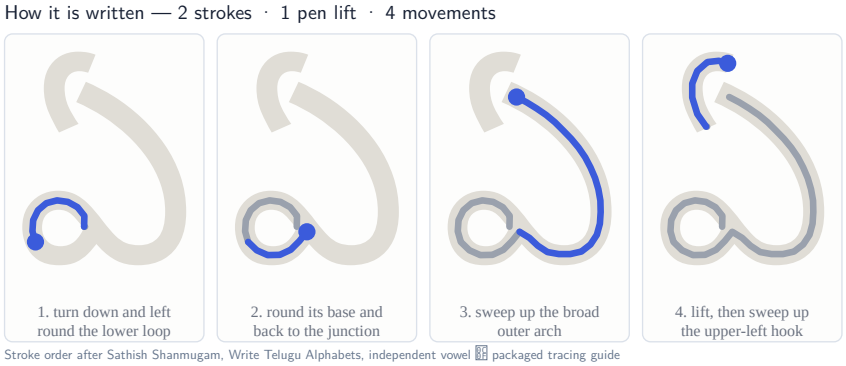
You have read ే, the long-*ē* sign, since the first chapter. It rides on a consonant and needs one to exist. **ఏ is that same vowel with nothing in front of it.**

This is the pattern behind every vowel in the script. A vowel has two written forms — a sign for when a consonant carries it, a letter for when the vowel opens the word. అ was the odd one out because its sign is the absence of any sign at all; ఏ is the ordinary case, and from here you can expect the pair everywhere.

- ఏమిటి *ēmiṭi* — what?

The question word you have been saying opens on today's letter, and the *i* inside it is carried by a sign. One word, both forms.

Writing: ఏ — follow the numbered strip



How ఏ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఏ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the word below and find ఏ at its front

  ఏమిటి

- *Trace it:* ఏ three times, saying *ē* as you finish each one
- *Say it:* which form of a vowel goes at the front of a word, the sign or the letter

Before you move on

Which character is this — ఏ? What sound does it carry? (*ē*.) When does Telugu write the letter ఏ rather than the sign ే? (**When the**

vowel has no consonant in front of it.) And which vowel met so far has a letter but no sign? (అ.)

2.12 ౨ — the Telugu numeral for 2

Before the new one: ◌ౕ — what does it do? And one from further back: ఽ?

One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౨

౨ is **two**.

Two numerals now, and that is enough for the first real reading skill: telling them apart. A digit is never met alone on a page — it is met in a row of other digits, and the work is picking the one you want out of the row.

Writing: ౨ — copy what you see

Put your pen on ౨ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ∩ · ౨

- *Trace it:* ౨ three times, saying "2" as you finish each one
- *Look:* for ౨ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౨? What amount does it stand for? (౨ is 2, and ౧ beside it is 1.)

2.13 మీ పేరు ఏమిటి? (mī pēru ēmiṭi?) — "what's your name?"

Assemble the question — your + name + what — still no "is."

The word, taken apart — its roots and family

- **మీ** (*mī*, "your") = the possessive of *mīru* ("you," respectful).

  మీ పేరు ఏమిటి? = literally "**your name what?**" = "what's your name?"

Three Dravidian words (DEDR 3688, 4410, 5151), **no verb** — the zero copula holds for questions too.

Grammar Lens: answer, and the familiar version

Answer with the sentence you built: **Nā pēru Arun.** The familiar "your" is *nī* (from *nuvvu*): *nī pēru ēmiṭi?*

Your turn

Say these aloud:

- "mī pēru ēmiṭi?"
- ask, then answer — "mī pēru ēmiṭi?" / "nā pēru …"

Before you move on

What does **మీ పేరు ఏమిటి?** literally say, and what's missing vs. English? ("Your name what?"; no "is" — zero copula.)

2.14 ి — one character, met inside words you already say

Before the new one: ౨ — what amount does it stand for? And one from further back: ు?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ి

ి — *i*.

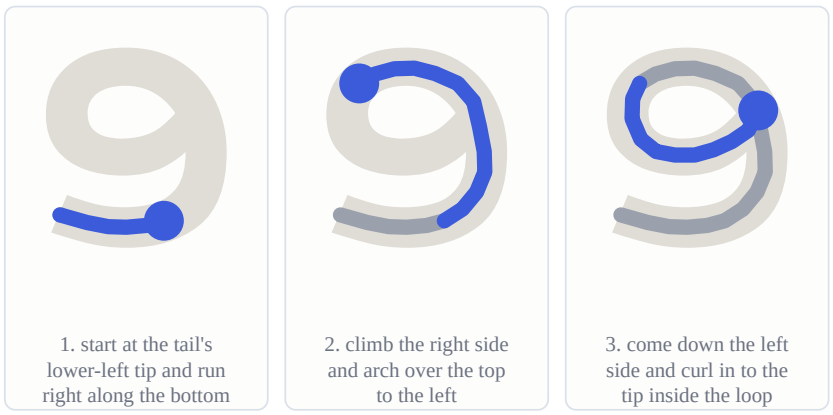
It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *i*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ి somewhere inside it:

- **మీ పేరు ఏమిటి?** *mī pēru ēmiṭi?* — what is your name?
- **ఏమిటి** *ēmiṭi* — what

Writing: ి — follow the numbered strip

How it is written — one unbroken stroke · 3 movements



Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Telugu recognizer, class 53 (ి sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ి is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ి yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ి in the ones that have it

  ఏమిటి · మీ పేరు ఏమిటి? · నమస్కారం

- *Trace it:* ి three times, saying *i* as you finish each one
- *Look:* back at any page of this chapter and find ి once more

Before you move on

Which character is this — ి? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *i* on; takes the built-in *a* off.**) Name one word you already say that contains it.

2.15 సంతోషం (santōṣam) — "joy," and "pleased to meet you"

The warm close — and, as in Kannada, a Sanskrit word.

You'll want to know: the full phrase

The full form is **మిమ్మల్ని కలిసినందుకు సంతోషం** (*mimmalni kalisinanduku santōṣam*) — "joy at having met you."

The word, taken apart — its roots and family

సంతోషం (*santōṣam*, "joy, gladness") is **Sanskrit** — *sam-* ("fully") + *toṣa* ("satisfaction") — the *same* loan Kannada uses (*santōṣa*). Both reach for Sanskrit where Tamil keeps its native *magiḻcci*. Telugu — the

most Sanskritised of the four Dravidian tongues — does so most readily of all.
CDIAL 12895 lists Sanskrit *santoṣa*, "satisfaction".

Your turn

Say these aloud:

- "santōṣam"
- the split — Telugu/Kannada *santōṣa(m)* (Sanskrit) vs. Tamil *magiḻcci* (native)

Before you move on

Is సంతోషం native or borrowed, and what does the contrast with Tamil show? (Sanskrit; Telugu borrows Sanskrit — here for "pleased" — where Tamil keeps native *magiḻcci*.)

2.16 ో— a sign, not a letter

Before the new one: ి — what does it do to the consonant it sits on?

This one does the same job with a different vowel.

Script you'll notice: ో

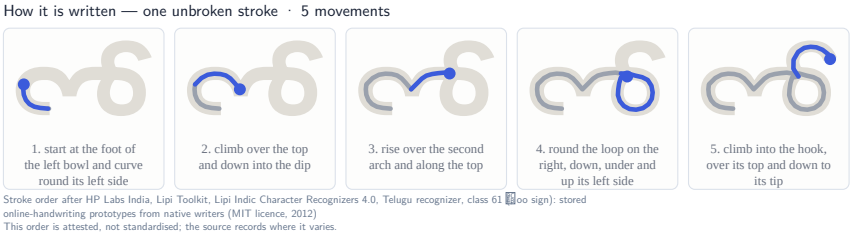
ో — *ō*.

It is a **sign**, not a letter. A Telugu consonant arrives with an *a* already inside it, and a sign is how you swap that *a* for something else. On its own it says nothing; hung on a consonant it turns that consonant's vowel into a long *ō*.

- సంతోషం *santōṣam* — happiness, gladness (santōṣam — "a being well pleased")

Look at the middle of that word: the త carries the sign, and *ta* becomes *tō*.

Writing: ో— follow the numbered strip



How ో is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ో yourself — slowly, and larger than it is printed. Then write it again attached to a consonant, the way it actually appears.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the word below and find the consonant carrying ో

  సంతోషం

- *Trace it:* ోthree times, saying *ō* as you finish each one
- *Say it:* what the sign does to the consonant underneath it
- *Look:* at ఏమిటి again and name the curled letter in it

Before you move on

Is ోa letter or a sign? (A sign.) What does it do? (It swaps the consonant's built-in *a* for a long *ō*.) Can it stand on its own? (No.)

2.17 ◌ం — one character, met inside words you already say

> Before the new one: ◌ి — what does it do? And one from further back: ∩?
>
> One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ◌ం

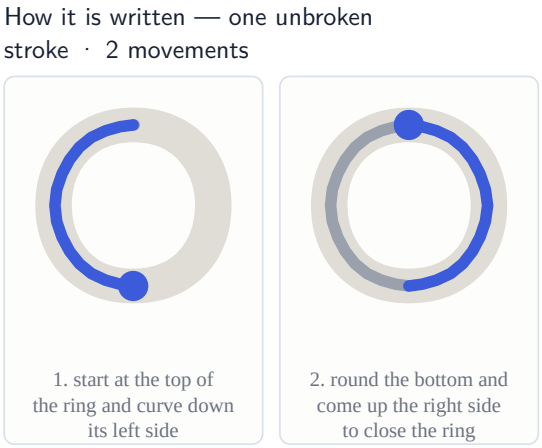
◌ం — *a nasal, ridden on the syllable before it.*

It is a **nasal**, written as a mark rather than as a letter. It rides on the syllable before it and turns the end of it nasal.

You already say these, and every one of them has ◌ం somewhere inside it:

- సంతోషం — joy / pleased to meet you
- నమస్కారం *namaskāram* — hello / greetings (namaskāram — "a making of a bow")

Writing: ం — follow the numbered strip



How ం is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ం yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ం in the ones that have it

  నమస్కారం · సంతోషం · ధన్యవాదములు

- *Trace it:* ం three times, humming the nasal at the end of the syllable as you finish each one

- *Look:* back at any page of this chapter and find ం once more

Before you move on

Which character is this — ◌ం? What does it add to the syllable before it? (**A nasal.**) Name one word you already say that contains it.

2.18 Chapter 2 — the introduction, whole

No new words. Everything you have met in this chapter, said once through as the exchange it was always for.

The exchange — the dialogue

Telugu	**English**
నా పేరు మీరా. (*nā pēru Mira*)	My name is Mira.
మీ పేరు ఏమిటి? (*mī pēru ēmiṭi*)	What's your name?
నా పేరు అను. (*nā pēru Anu*)	My name is Anu.
సంతోషం. (*santōṣam*)	Pleased to meet you.

Every atom traced:

- **pēru** ← Dravidian **pēr* (*not name*; twin of Tamil *peyar*)
- **nā** ← *nēnu* ("I")
- **ēmiṭi** ← Dravidian question-stem **yā-/*e-*
- **santōṣam** ← **Sanskrit** (Telugu borrows for "pleased"; Tamil keeps native *magiḻcci*)

The Telugu habit: the **zero copula** (no "is").

Your turn

Say these aloud:

- the whole exchange, both voices
- your own introduction — "nā pēru …"
- ask it back — "mī pēru ēmiṭi?"

Before you move on

Give your name, ask someone else's, say you're pleased. (*Nā pēru …. / Mī pēru ēmiṭi? / Santōṣam.*) Which word is Sanskrit, not native? (*santōṣam.*)
Next chapter: *elā unnāru?* ("how are you?") and answering with *bāgunnānu* — the responding cycle.

Chapter 3

How Are You?

Modes: **voice** (1) **eyes** (5) **pen** (6) **Hands-free start:** the first of 12 lessons.

> ***By the end of this chapter:*** I can ask how someone is in Telugu, answer naturally, and return the question.
>
> *After the name comes the exchange everyone actually has — and, for the first time, a Telugu verb "to be."* మీరు ఎలా ఉన్నారు*? /* నేను బాగున్నాను*,* ధన్యవాదములు*.*

3.1 ఎలా (elā) — "how," another of the e-questions

You met ఏమిటి (*ēmiṭi*, "what") in Chapter 2. Here is its sibling — and, like all of Telugu's question-words, it begins with **e-**.

The letters in this word

(Skim if you read Telugu.) ఎ (independent short *e*) + లా (*lā*, *la* + the long-*ā* sign) → ఎలా (*elā*).

The word, taken apart — its roots and family

ఎలా (*elā*, "how") is native Dravidian (DEDR 5151), on the interrogative base ఎ- (*e-*) you already met in *ēmiṭi*. Telugu gathers nearly all its questions under this **e-**: *ēmiṭi* (what), *elā* (how), *evaru* (who), *ekkaḍa* (where), *eppuḍu* (when), *enduku* (why). It is the same Dravidian question-root that heads Tamil's *eppaḍi* and Kannada's *ēnu*

— a family older than the Sanskrit words that Telugu otherwise borrows so freely.

The letters in this word

ఎ (independent short *e*) + ల (*lā*) → ఎల (*elā*).

Your turn

Say these aloud:

- "elā"
- the e- question family — *ēmiṭi, elā, evaru, ekkaḍa, eppuḍu*

Before you move on

What base do Telugu's question-words share, and which cousins head their own? (The interrogative *e-*; Tamil's *eppaḍi*, Kannada's *ēnu*.)

3.2 ౩ — the Telugu numeral for 3

Before the new one: ◌ొ — what does it do? And one from further back: ◌ీ?

One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౩

౩ is **three**.

Three of the ten. Read the row below left to right and say the values out loud in your own language — **one, two, three**. Saying the value rather than a Telugu word is not a shortcut around the language; it is what a numeral is for.

Writing: ౩ — copy what you see

Put your pen on ౩ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౧ · ౨ · ౩

- *Trace it:* ౩ three times, saying "3" as you finish each one
- *Look:* for ౩ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౩? What amount does it stand for? (౩ is 3.)

3.3 మీరు ఎలా ఉన్నారు? (mīru elā unnāru?)

The everyday "how are you?" — and the verb "to be" that carries it.

The letters in this word

The new word is **ఉన్నారు** (*unnāru*, "you are/exist"): from the verb *uṇḍu* ("to be, to exist, to stay") + the respectful-you ending **-ారు** (*-āru*). Note the doubled **న్న** (*nn*).

The word, taken apart — its roots and family

మీరు ఎలా ఉన్నారు? = **మీరు** (*mīru*, "you," respectful) + **ఎలా** (*elā*, "how") + **ఉన్నారు** (*unnāru*, "are") — "you how are?", the verb **last**, as in every Telugu sentence. The verb is *uṇḍu*, "to be / to exist / to stay" — native Dravidian (DEDR 697), and the workhorse behind "how are you," "I'm well," and (you'll see in Chapter 5) "I live."

Grammar Lens: the verb carries "you"

The ending **-ారు** (*-āru*) already means "you (respectful)," so *mīru* can be dropped: *elā unnāru?* is a complete "how are you?" To a friend (*nuvvu*), the ending changes: **నువ్వు ఎలా ఉన్నావు?** (*nuvvu elā unnāvu?* — *-āvu* for the familiar "you"). Match the "you" to the verb-ending, as Telugu always does.

Your turn

Say these aloud:

- the respectful question — *mīru elā unnāru?*
- the familiar version — *nuvvu elā unnāvu?*
- the verb and its meaning (*uṇḍu* — "to be / exist / stay")

Before you move on

What verb powers "how are you?", and how does the ending change for a friend? (*Uṇḍu*, "to be"; *-āru* → *-āvu* for the familiar *nuvvu*.)

3.4 ఉ — one character, met inside words you already say

Before the new one: ౩ — what amount does it stand for? And one from further back: ఎ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ఉ

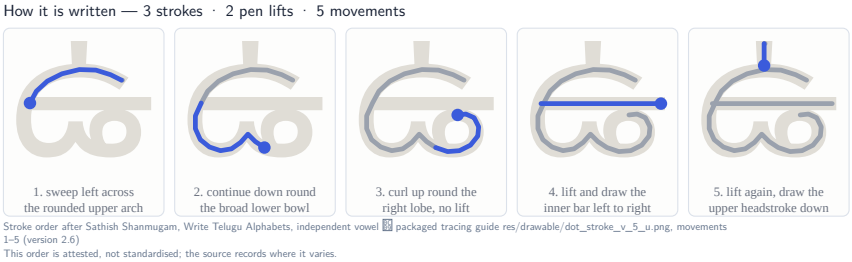
ఉ — *u*.

It is an **independent vowel** — the shape the vowel *u* takes when a word begins with it, rather than the sign it becomes inside a word.

You met it on the page before this one, standing at the front of a word:

- **మీరు ఎలా ఉన్నారు?** — how are you? (respectful)

Writing: ఉ — follow the numbered strip



How ఉ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఉ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ఉ in the ones that have it

  మీరు ఎలా ఉన్నారు? · నమస్కారం

- *Trace it:* ఉ three times, saying *u* as you finish each one
- *Look:* back at any page of this chapter and find ఉ once more

Before you move on

Which character is this — ఉ? What sound does it carry? (***u***.)
Name one word you already say that contains it.

3.5 నేను (nēnu) — “I,” the Dravidian first person

> To answer “how are you?” you first need “I.” In Chapter 2 you learned *nā* (“my”); here is its owner.

The letters in this word

నే (*nē*, *na* + long-*ē* sign) + ను (*nu*) → నేను (*nēnu*).

The word, taken apart — its roots and family

నేను (*nēnu*, "I") ← Proto-Dravidian ***yāṉ / *nēn** — native, and (unlike Hindi's *maiṁ*, cousin of English *me*) **not** related to the European "I/me" family. Its possessive is the నా (*nā*, "my") you already met: *nēnu* "I," *nā* "my." For all that Telugu borrows Sanskrit vocabulary elsewhere, its most basic pronouns stayed Dravidian to the core — the grammar's foundations never changed hands.
DEDR 5160 lists Telugu *ēnu* and *nēnu* with Tamil *yāṉ*, *nāṉ* and Kannada *nān*.

Grammar Lens: "I" you can drop

Telugu verbs carry the person in their ending — *unnānu* already means "**I** am" — so *nēnu* is often left out. You still learn it first, because the answer to *elā unnāru?* begins with it.

The letters in this word

నే (*nē*) + ను (*nu*) → నేను (*nēnu*).

Your turn

Say these aloud:

- "nēnu"
- the pair — *nēnu* (I), *nā* (my)
- is it related to English *me*? (No — native Dravidian)

Before you move on

What is *nēnu*'s possessive, and is Telugu's "I" cousin to English *me*? (*Nā*, "my"; no — it is native Dravidian, unlike the borrowed Sanskrit nouns around it.)

3.6 ౪ — the Telugu numeral for 4

Before the new one: ౘ — what does it do? And one from further back: ౩?

One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౪

౪ is **four**.

From here the row is deliberately shuffled. A digit you can only read in counting order is a digit you cannot read; the test is whether you know it when it turns up out of sequence.

Writing: ౪ — copy what you see

Put your pen on ౪ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౪ · ౨ · ౩ · ∩

- *Trace it:* ౪ three times, saying "4" as you finish each one
- *Look:* for ౪ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౪? What amount does it stand for? (౪ is 4.)
One more, from much earlier: ౬ — what does it do?

3.7 బాగా (bāgā) — "well," and how to answer

The word that answers "how are you?" — and one Telugu says all the time.

The letters in this word

బా (*bā*, *ba* + long *ā*) + **గా** (*gā*, *ga* + long *ā*) → **బాగా** (*bāgā*).

The word, taken apart — its roots and family

బాగా (*bāgā*, "well, nicely, very") comes from **బాగు** (*bāgu*, "goodness, well-being"), a Dravidian word (DEDR 5332). It is the everyday "well/good/very much": *bāgā undi* ("it's good"), *bāgā ceppāru* ("well said"). To answer "how are you," fuse it with the *uṇḍu* verb:

> **నేను బాగున్నాను** (*nēnu bāgunnānu*) — "**I am well**" (*bāgā* + *unnānu*, "I am," run together).

The whole exchange:

> — *mīru elā unnāru?* ("How are you?") — *nēnu bāgunnānu, dhanyavādamulu.* ("I'm well, thank you.")

The letters in this word

బా (*bā*) + **గా** (*gā*) → **బాగా** (*bāgā*).

Your turn

Say these aloud:

- "bāgā"
- the full reply — *nēnu bāgunnānu*
- add thanks (from Chapter 1) — *dhanyavādamulu*

Before you move on

Give the full reply to *mīru elā unnāru?*. (*Nēnu bāgunnānu* — *bāgā* "well" fused with *unnānu* "I am.")

3.8 బ — the letter your answer starts with

> Say how you are. Then say the one word inside that answer that means "well." It starts on your two lips, closed and then opened.

Script you'll notice: బ

బ — *ba*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *b*, it is **ba**.

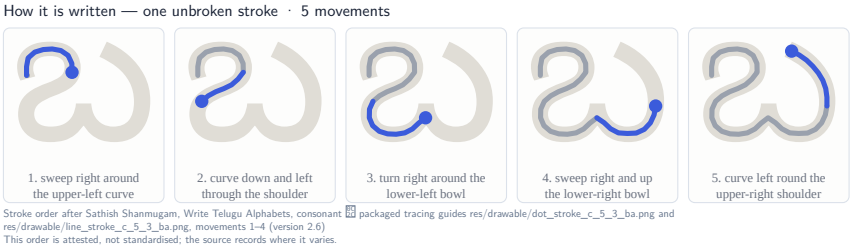
The word from the warm-up opens with it:

- **బాగా** *bāgā* — well, fine
- **బాగున్నాను** *bāgunnānu* — I am well

Both start with **బ** carrying the long-*ā* sign you have been reading since the greeting. The shape underneath that sign is today's character.

Telugu gives *b* a letter of its own, and Tamil does not. Tamil writes one letter, **ப**, for the sound at the front of *pattu* ("ten") and for the sound in the middle of **தம்பி** *tambi* ("younger brother"), and lets the place in the word decide which one you say. Telugu, Kannada and Hindi each keep **బ** / **ಬ** / **ब** apart from their *p* letter and spell the difference out. That is one of the sharpest splits between the two halves of this family, and you are meeting it on a page from chapter three.

Writing: బ — four calm movements



How **బ** *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 rises around the upper-left curve. Without lifting, movement 2 curves down

through the shoulder that joins it to the lower-left bowl, and movement 3 turns around that bowl. Movement 4 sweeps right and rises around the lower-right bowl, and movement 5 curves left around the upper-right shoulder. The strip gives the short joining curve a panel of its own, so the four movements are numbered as five.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, but nearly every native writer draws బ as one unbroken stroke, so keep the pen on the paper from the first curve to the last.

Your turn

- *Look:* at these two words, and find బ at the front of each

  బాగా · బాగున్నాను

- *Trace it:* బ three times, saying *ba* as you finish each one
- *Say it:* whether the mark leaning on బ in both words is the same one

Before you move on

Which character is this — బ? What sound does it carry? (***ba***.) Which word in this chapter begins with it? (బాగా — and its longer answer form బాగున్నాను.) Does Tamil have a separate letter for this sound? (**No** — it writes ப and lets the place in the word decide.)

3.9 ర — one character, met inside words you already say

Before the new one: ళ — what amount does it stand for? And one from further back: ◌ం?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ర

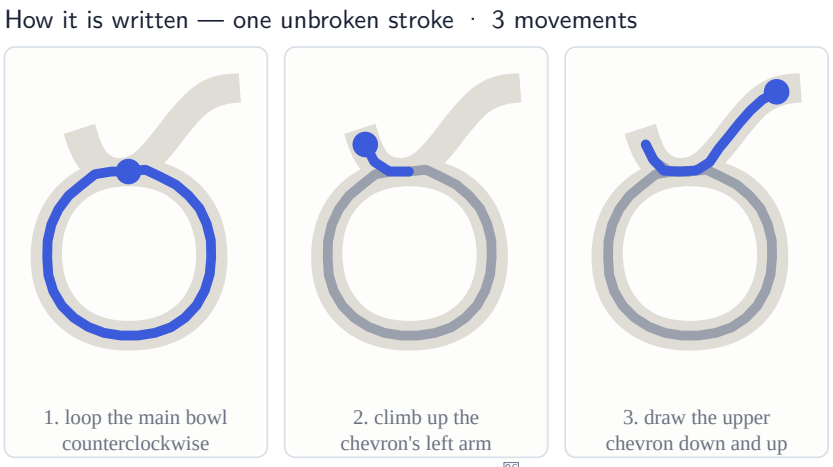
ర — *ra*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *r*, it is **ra**.

You already say these, and every one of them has ర somewhere inside it:

- నమస్కారం *namaskāram* — hello / greetings (namaskāram — “a making of a bow”)
- సరే *sarē* — okay / alright (sarē)
- పేరు *pēru* — name
- నువ్వు / మీరు *nuvvu* / *mīru* — you (familiar / respectful)

Writing: ర — two calm movements



How ర is written, stroke by stroke

Watch the numbered filmstrip once before your pen moves. Movement 1 loops counterclockwise around the main bowl. Without lifting, movement 2 climbs a short way up the chevron’s left arm, and movement 3 travels down and up through the upper chevron, from left to right. The strip gives that short climb a panel of its own, so the two movements are numbered as three.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, but most native writers draw ర as one unbroken stroke, so keep the pen on the paper from the bowl to the end of the chevron.

Your turn

- *Look:* at these words, and find **ర** in the ones that have it

  నమస్కారం · సరే · ధన్యవాదములు

- *Trace it:* **ర** three times, saying *ra* as you finish each one
- *Look:* back at any page of this chapter and find **ర** once more

Before you move on

Which character is this — **ర**? What sound does it carry? (***ra***.)
Name one word you already say that contains it.
One more, from much earlier: ◌ా — what does it do?

3.10 పరవాలేదు (paravālēdu) — "no problem"

When someone thanks you — or apologises — this is the easy, gracious reply, and it is built on a word you met in Chapter 1.

The letters in this word

Two joined words: **పరవా** (*paravā*, "care, concern") + **లేదు** (*lēdu*, "there is not") → **పరవాలేదు** (*paravālēdu*).

The word, taken apart — its roots and family

పరవాలేదు literally means "**there is no concern**" — *paravā* ("care, concern", from Persian *parvā* through Hindustani) + **లేదు** (*lēdu*, "is-not / there-is-not"), the Chapter-1 negative. It serves as "it's okay / no worries / never mind / you're welcome." The key atom, **లేదు** (*lēdu*), looks unlike the *illa(i)* of Tamil, Kannada, and Malayalam, but DEDR 2559 files them in one entry — so Tamil's "no problem" is *paravāyillai*, and Telugu's is *paravālēdu*: the same borrowed *paravā* on each language's own "not."

Grammar Lens: లేదు, Telugu's "is-not"

Lēdu negates existence: *ḍabbu lēdu* ("there's no money"), *ēmī lēdu* ("it's nothing"). It is the negative twin of **ఉంది** (*undi*, "there is") and of the *uṇḍu* verb behind "how are you." Learn *undi* / *lēdu* together —

"there is" and "there is not."

Your turn

Say these aloud:

- "paravālēdu"
- what it literally means ("there is no concern")
- the Telugu "is-not" that sets it apart from Tamil (*lēdu*, vs. Tamil *illai*)

Before you move on

What does *paravālēdu* literally say, and how does its "not" differ from Tamil's? ("There is no harm"; Telugu uses *lēdu* where Tamil/Kannada/Malayalam use *illa(i)*.)

3.11 ౫ — the Telugu numeral for 5

Before the new one: ౬ — what does it do? And one from further back: ౩?

One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౫

౫ is **five**.

Half the set. Everything the book has shown you so far is on the row below, in no order at all.

Writing: ౫ — copy what you see

Put your pen on ౫ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not

written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౫ · ౩ · ౧ · ౪ · ౯

- *Trace it:* ౫ three times, saying "5" as you finish each one
- *Look:* for ౫ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౫? What amount does it stand for? (౫ is 5.)
One more, from much earlier: ీ — what does it do?

3.12 Chapter 3 — The how-are-you exchange

No new words. The whole responding cycle, from atoms you now own.

The exchange

Read it: the whole cycle off the page first — Telugu, then the sound, then the sense

Telugu		**English**
మీరు ఎలా ఉన్నారు?	*mīru elā unnāru*	How are you?
నేను బాగున్నాను, ధన్యవాదములు.	*nēnu bāgunnānu, dhanyavādamulu*	I'm well, thank you.
పరవాలేదు.	*paravālēdu*	No problem / you're welcome.

A few of these characters have not had their own lesson yet. They are here to be **recognised**, not decoded — the romanization beside each line is what you read from. The letters catch up in the chapters ahead.

Say these aloud:

- "How are you?" (respectful) — *mīru elā unnāru?*
- "I'm well, thank you." — *nēnu bāgunnānu, dhanyavādamulu.*
- "No problem / you're welcome." — *paravālēdu.*
- the familiar version of the question — *nuvvu elā unnāvu?*

What you've built — the atoms

Say these aloud:

- the e- question-word for "how" (*elā*)
- "I" and the verb "to be" (*nēnu*, *uṇḍu*)
- the "there is / there is not" pair (*undi* / *lēdu*)

The word, taken apart — its roots and family

Roots you now carry:

- *elā* ← the interrogative *e-* (native Dravidian, like Tamil *eppaḍi*)
- *nēnu* ← Proto-Dravidian (unrelated to English *me*); possessive *nā*
- *bāgā* ← *bāgu* "goodness"; *nēnu bāgunnānu* "I'm well"
- *lēdu* — Telugu's "is-not," where its sisters use *illa(i)*

Before you move on

A stranger asks *mīru elā unnāru?* — give a full, polite reply, and answer their thanks. (*Nēnu bāgunnānu, dhanyavādamulu* — and to thanks, *paravālēdu.*)

Chapter 4

Farewells

Modes: **voice** (2) **eyes** (4) **pen** (4) **Hands-free start:** the first of 10 lessons.

> ***By the end of this chapter:*** I can end a Telugu conversation politely and choose a farewell that fits the situation.
>
> *Telugu, like every Dravidian language, does not say a plain "goodbye." It promises to return:* వెళ్ళి వస్తాను *— "having gone, I come back."*

4.1 డప్పు (ḍappu) — a drum

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: డప్పు

డప్పు — *ḍappu* — "a drum".

Say it: *ḍappu*. *Look:* at its shape as you say it. The next lesson takes one piece of it, డ, and writes it on its own.

The word, taken apart — its roots and family

The origin of డప్పు (*ḍappu*) is uncertain. Neither DEDR nor CDIAL lists it. Both have drum words of a similar shape, but neither is a sure source: DEDR 3082 lists Telugu *tappeṭa*, "a kind of drum", and CDIAL 5531 lists Gujarati *ḍaph* under Sanskrit *ḍamaru*, "drum", a word CDIAL takes as imitating the sound, perhaps from Munda.

Your turn

Say these aloud:

- *ḍappu*
- *ḍappu*, and what it means

Before you move on

What is "a drum"? (డప్పు, *ḍappu*.)

4.2 డ — one character, met inside words you already say

Before the new one: ౩ — what amount does it stand for? And one from further back: ఊ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: డ

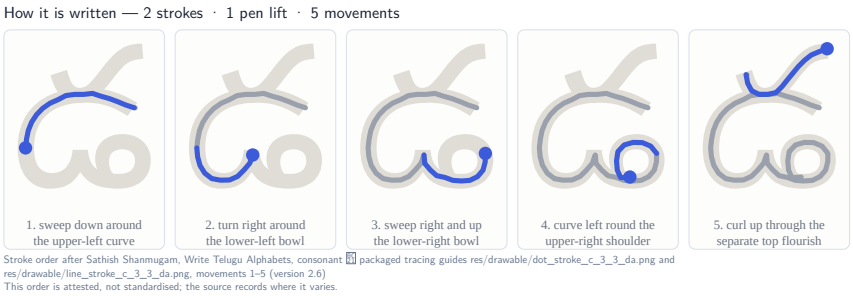
డ — *ḍa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ḍ*, it is **ḍa**.

You met it on an earlier page, in the middle of a word you already say:

- **మీరు ఎలా ఉన్నారు?** — how are you? (respectful)

Writing: డ — five deliberate movements



How డ is written, stroke by stroke

Follow the filmstrip slowly. Movement 1 sweeps down around the upper-left curve. Movement 2 turns right around the lower-left bowl. Without lifting, movement 3 sweeps right and upward around the lower-right bowl, and movement 4 curves left around the upper-right shoulder. Lift once; movement 5 finishes with the separate top flourish.

This is one attested school-style order. Telugu handwriting varies, so keep the five movements distinct, with the round body as one unbroken run, and let the round shape grow from them.

Your turn

- *Look:* at these words, and find డ in the ones that have it

  మీరు ఎలా ఉన్నారు? · నమస్కారం

- *Trace it:* డ three times, saying *ḍa* as you finish each one
- *Look:* back at any page of this chapter and find డ once more

Before you move on

Which character is this — డ? What sound does it carry? (***ḍa***.)
Name one word you already say that contains it.
One more, from much earlier: న — what does it do?

4.3 వెళ్ళు (veḷḷu) — "go," and vaccu (come)

Two everyday verbs — and together they make the Telugu goodbye.

The letters in this word

వె (*ve*) + ళ్ళు (*ḷḷu*, a doubled retroflex ళ *ḷ*) → వెళ్ళు (*veḷḷu*). Its partner: *vaccu* ("come") with a doubled *cc*.

The word, taken apart — its roots and family

వెళ్ళు (*veḷḷu*, "to go") and *vaccu* ("to come") are native Dravidian verbs (DEDR 5393, 5270). As commands they are whole words: *veḷḷu!* ("go!"), *rā!* ("come!"). You need both, because Telugu — like every

Dravidian language — does not say a plain "goodbye." It says "I go, and I **come back**."

The letters in this word

వె (*ve*) + ళ్ళు (*ḷḷu*, doubled retroflex ళ *ḷ*) → వెళ్ళు. Its partner is *vaccu* ("come").

Your turn

Say these aloud:

- "veḷḷu" (go) and "vaccu" (come)
- why you need both to say goodbye (Telugu's farewell is "I'll go and come back")

Before you move on

What do *veḷḷu* and *vaccu* mean, and why will you need them both to part? ("Go" and "come"; the Telugu goodbye is "I'll go and come back.")

4.4 ౬ — the Telugu numeral for 6

Before the new one: ఢ — what does it do? And one from further back: ఴ?

One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౬

౬ is **six**.

Six is where the second half begins, and where a warning belongs: **౬ is not the 6 you write, and it is not an E**. It is its own character, and the only way it becomes readable is by meeting it often enough that the resemblance stops mattering.

Writing: ౬ — copy what you see

Put your pen on ౬ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౬ · ౨ · ౩

- *Trace it:* ౬ three times, saying "6" as you finish each one
- *Look:* for ౬ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౬? What amount does it stand for? (౬ is 6.)
One more, from much earlier: ు — what does it do?

4.5 వెళ్ళి వస్తాను (veḷḷi vastānu) — "I'll go and come back"

The everyday Telugu goodbye — a promise, not a parting.

The letters in this word

వెళ్ళి (*veḷḷi*, "having gone") is *veḷḷu* + the "-i" that means "having …d." వస్తాను (*vastānu*, "I come/will come") is from *vaccu* ("come") + "I."

The word, taken apart — its roots and family

వెళ్ళి వస్తాను = **వెళ్ళి** (*veḷḷi*, "having gone") + **వస్తాను** (*vastānu*, "I come") — literally "**having gone, I come [back]**," i.e. "I'll go and come back." A Telugu speaker never signs off with a bare "I'm leaving" — that sounds final. Instead they promise return. It is the same "go-and-come-back" farewell you meet across the Dravidian south (Tamil *pōy varugiṟēṉ*, Kannada *hōgi baruttēne*, Malayalam *pōyi varāṁ*) and echoing into the Indo-Aryan tracks (Bengali *āshi*). The warm reply is **వెళ్ళి రండి** (*veḷḷi raṇḍi*, "go and come [back]").

Across the family — the same idea, five ways:

Language	"go and come back" (goodbye)
Telugu	*veḷḷi vastānu*
Tamil	*pōy varugiṟēṉ*
Kannada	*hōgi baruttēne*
Malayalam	*pōyi varāṁ*
Bengali (Indo-Aryan)	*āshi* ("I come")

The whole south — and, in Bengali, well beyond it — prefers a promise of return to a blunt farewell. The languages are not all related; the habit travelled anyway.

Both verbs are native Dravidian: *veḷḷu* (DEDR 5393) and *vaccu* (DEDR 5270).

Grammar Lens: the "having …d" participle

Veḷḷi is Telugu's way of chaining actions: "having gone, (then) I come." Like its sisters, Telugu strings verbs with one in the participle form and the last one fully conjugated.

Your turn

Say these aloud:

- the goodbye — *veḷḷi vastānu*
- its literal meaning ("having gone, I come" → "I'll come back")
- the warm reply — *veḷḷi raṇḍi*

Before you move on

What does the Telugu goodbye literally promise, and how do you answer? ("I'll go and come back"; reply *veḷḷi raṇḍi*, "go and come back".)

4.6 రేపు కలుద్దాం (rēpu kaluddām) — "see you tomorrow"

A goodbye with a date on it.

The letters in this word

రే (*rē*) + పు (*pu*) → రేపు (*rēpu*). కలుద్దాం (*kaluddām*) = *kalu* ("meet") + *-ddām* ("let's").

The word, taken apart — its roots and family

రేపు (*rēpu*, "tomorrow") is native Dravidian (DEDR 916). కలుద్దాం (*kaluddām*, "let's meet") is from కలు (*kalu*, "to meet, to join"; DEDR 1299, which compares Sanskrit *kalka*, "a paste") — so the phrase is "**tomorrow, let's meet**," the Telugu "see you tomorrow." The **-దాం** (*-ddām*) ending is Telugu's "let's _____" — a first-person-plural invitation: *veḷḷddām* ("let's go"), *tindām* ("let's eat").

The letters in this word

రే (*rē*) + పు (*pu*) → రేపు. కలుద్దాం (*kaluḍḍām*) = *kalu* ("meet") + *-ḍḍām* ("let's").

Your turn

Say these aloud:

- "rēpu kaluddām"
- "tomorrow" and "to meet" (*rēpu*, *kalu*)
- the "let's _____" ending (*-ddām*)

Before you move on

What are the two pieces of *rēpu kaluddām*, and what does *-ddām* mean? (*Rēpu* "tomorrow" + *kalu* "meet"; *-ddām* = "let's _____.")

4.7 ప — one character, met inside words you already say

Before the new one: ౬ — what amount does it stand for? And one from further back: ర?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ప

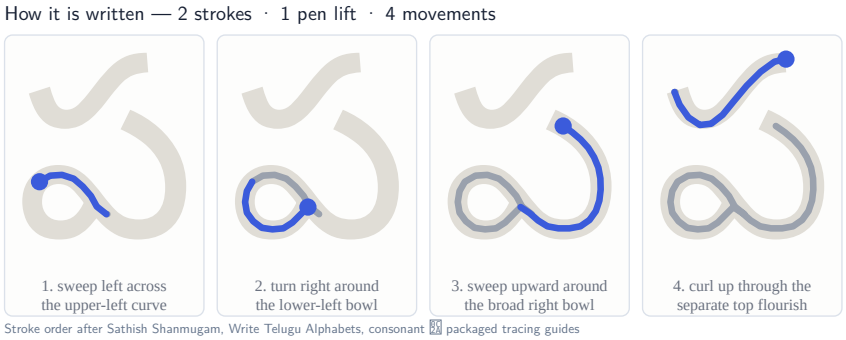
ప — *pa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *p*, it is **pa**.

You already say these, and every one of them has ప somewhere inside it:

- పేరు *pēru* — name
- పరవాలేదు *paravālēdu* — it's okay / no problem / you're welcome
- రేపు కలుద్దాం *rēpu kaluddām* — see you tomorrow

Writing: ప — four calm curves



How ప *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 sweeps left across the upper part of the small bowl. Without lifting, movement 2 turns around its lower half, and movement 3 carries on round the broad bowl on the right. Lift once, for movement 4, the small rising flourish above.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, so keep the four clear movements, with the body as one unbroken run and the single lift before the flourish.

Your turn

- *Look:* at these words, and find ప in the ones that have it

  పేరు · పరవాలేదు · నమస్కారం

- *Trace it:* ప three times, saying *pa* as you finish each one
- *Look:* back at any page of this chapter and find ప once more

Before you move on

Which character is this — ప? What sound does it carry? (***pa***.)
Name one word you already say that contains it.
One more, from much earlier: ౧ — what amount does it stand for?

4.8 మళ్ళీ కలుద్దాం (maḷḷī kaluddām) — "we'll meet again"

The open-ended, warm goodbye — no date, just a promise.

The letters in this word

మళ్ళీ (*maḷḷī*): note the doubled retroflex **ళ్ళ** (*ḷḷ*), the same sound as in *veḷḷu*. **కలుద్దాం** (*kaluddām*, "let's meet") you just learned.

The word, taken apart — its roots and family

మళ్ళీ కలుద్దాం = **మళ్ళీ** (*maḷḷī*, "again") + **కలుద్దాం** (*kaluddām*, "let's meet") — "**we'll meet again**." Both words are native Dravidian: *maḷḷī* ("again," from *maral*, "to return"; DEDR 4761) and *kalu* ("to meet"; DEDR 1299, which compares Sanskrit *kalka*, "a paste"). Where Tamil's "we'll meet again" (*mīṇḍum sandippōm*) reaches for the Sanskrit loan *sandi* to say "meet," Telugu keeps the native *kalu*.

Your turn

Say these aloud:

- "maḷḷī kaluddām"
- "again" and "let's meet" (*maḷḷī*, *kaluddām*)

Before you move on

What does the phrase mean, and which Dravidian verb does Telugu use for "meet" here? ("We'll meet again"; the native *kalu* — where Tamil used the Sanskrit loan *sandi*.)

4.9 ౭ — the Telugu numeral for 7

Before the new one: **౫** — what does it do? And one from further back: **౩**?

One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౭

౭ is **seven**.

౬ and ౭ sit next to each other in value and are easy to swap on a first reading. Look at the pair below until you can say which is which without counting up to it.

Writing: ౭ — copy what you see

Put your pen on ౭ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౭ · ౬ · ౮

- *Trace it:* ౭ three times, saying "7" as you finish each one
- *Look:* for ౭ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౭? What amount does it stand for? (౭ is 7, ౬ is 6.)
One more, from much earlier: ◌ౕ — what does it do?

4.10 Chapter 4 — The farewells

> No new words. Three ways to part — none of them a blunt "goodbye."

The exchange — the farewells

All three, side by side — none of them a blunt "goodbye":

Telugu		English
—	*veḷḷi vastānu*	I'll go and come back. (the goodbye)
—	*veḷḷi raṇḍi*	Go and come back. (the reply)
రేపు కలుద్దాం.	*rēpu kaluddām*	See you tomorrow.
—	*maḷḷī kaluddām*	We'll meet again.

Three of these stay in romanization for now: their doubled *ḷ* and their *e*-sign have not had their own lessons yet, and a line you cannot decode is not a line to read from. The letters catch up in the chapters ahead.

Say these aloud:

- the everyday goodbye — *veḷḷi vastānu* ("I'll go and come back")
- the warm reply — *veḷḷi raṇḍi* ("go and come back")
- "see you tomorrow" — *rēpu kaluddām*
- "we'll meet again" — *maḷḷī kaluddām*

What you've built — the atoms

Say these aloud:

- the two verbs (*veḷḷu* go, *vaccu* come)
- "tomorrow," "again," "let's meet" (*rēpu*, *maḷḷī*, *kaluddām*)
- the "let's _____" ending (*-ddām*)

The word, taken apart — its roots and family

Roots you now carry:

- *veḷḷi vastānu* — "having gone, I come"; the Dravidian promise-of-return goodbye
- *rēpu* "tomorrow" + *kalu* "meet" (native, where Tamil borrowed *sandi*)
- *maḷḷī* ← *maral* "to return"

Before you move on

Why does Telugu never say a plain "I'm leaving," and what does its everyday goodbye promise instead? (It sounds too final; *veḷḷi vastānu* promises "I'll go and come back.")

Chapter 5

The First Verbs

Modes: **voice** (2) **eyes** (4) **pen** (9) **Hands-free start:** the first of 15 lessons.

> ***By the end of this chapter:*** I can build short present-tense Telugu sentences with the chapter's first verbs.
>
> *Until now, "to be" and "to be-not." Now verbs that act, and Telugu's sentences begin to move:* **నేను తెలుగు మాట్లాడతాను** *— stem + tense + person, stacked.*

5.1 మాట్లాడు (māṭlāḍu) — "to speak," your first full verb

So far, "to be." Here is a verb that *does* something — and it shows how Telugu builds "I do X."

The letters in this word

మా (*mā*) + **ట్లా** (*ṭlā*) + **డు** (*ḍu*) → **మాట్లాడు** (*māṭlāḍu*).

The word, taken apart — its roots and family

మాట్లాడు (*māṭlāḍu*, "to speak, to talk") is native Dravidian, built on **మాట** (*māṭa*, "word, speech"; DEDR 4834). To say "**I speak**," Telugu adds a two-part ending to the stem — tense + person:

> *māṭlāḍ-* (speak) + *-t-* (present/future) + *-ānu* ("I") → **మాట్లాడతాను** (*māṭlāḍatānu*), "I speak / I will speak."

The -ాను (*-ānu*) ending *is* "I," so *nēnu* is rarely needed. Change the ending, change the person: *māṭlāḍtāḍu* (he), *māṭlāḍtundi* (she/it), *māṭlāḍtāru* (they / you-respectful).

Grammar Lens: stem + tense + person

Every Telugu verb is built this way — a stem, a tense-marker, a person-ending, stacked and glued. Learn the pattern once and every verb follows it. (Telugu, like Tamil, marks no gender in the first person: *māṭlāḍatānu* is the same for a man or a woman.)

The letters in this word

మా (*mā*) + ట్లా (*ṭlā*) + డు (*ḍu*) → మాట్లాడు.

Your turn

Say these aloud:

- "māṭlāḍu" (speak)
- "I speak" — *māṭlāḍatānu*
- the word "speech" inside it (*māṭa*)

Before you move on

Build "I speak" from *māṭlāḍu*, and name the noun it's built on. (*Māṭlāḍatānu*; *māṭa*, "word / speech.")

5.2 త — one character, met inside words you already say

Before the new one: ౭ — what amount does it stand for? And one from further back: డ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: త

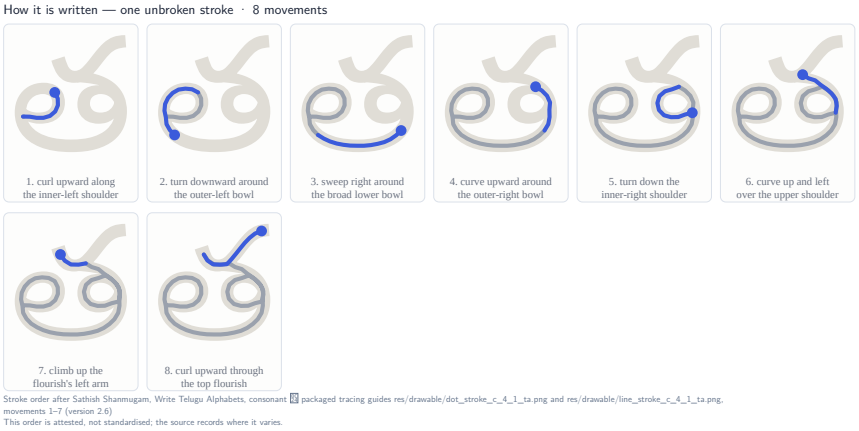
త — *ta*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *t*, it is **ta**.

You already say these, and every one of them has **త** somewhere inside it:

- **సంతోషం** — joy / pleased to meet you
- **వెళ్ళి వస్తాను** *veḷḷi vastānu* — goodbye (lit. "I'll go and come back")

Writing: త — observe, then trace



How **త** *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. The whole letter is one pen-down run. Movements 1–6 carry it round the body: curl up inside the left shoulder, turn down around the left bowl, sweep right around the broad bottom, curve up around the right bowl, turn down inside it, then curve left across the upper shoulder. Keep the pen on the paper. Movement 7 climbs a short way up the flourish's left arm, and movement 8 sweeps up through the top flourish.

Trace the same route slowly. The numbers divide one long connected line into manageable turns; they do not ask you to lift. Writers differ on this letter: about half of native writers draw it without a lift, and nearly as many lift once before the flourish. This route keeps the pen down from start to finish.

Your turn

- *Look:* at these words, and find **త** in the ones that have it

  సంతోషం · వెళ్ళి వస్తాను · నమస్కారం

- *Trace it:* **త** three times, saying *ta* as you finish each one
- *Look:* back at any page of this chapter and find **త** once more

Before you move on

Which character is this — **త**? What sound does it carry? (***ta***.)
Name one word you already say that contains it.
One more, from much earlier: ౨ — what amount does it stand for?

5.3 త — copy it where it lives

Find **త** inside **సంతోషం** — *santōṣaṁ* — and put your finger on it.

Writing — guided copy

How **త** *is written, stroke by stroke*

The model stays on the page. Copy **త** once on its own, then copy it a second time **with the letter that follows it in the word**, keeping the two the same size and the same distance apart as the printed pair.

That second copy is the whole lesson. A letter traced alone teaches your hand one shape; a letter copied beside its neighbour teaches it where the shape has to stop, and a hand that has only ever drawn letters alone writes them too large and too far apart the first time it writes a word.

Look back at the model as often as you want. Nothing is hidden today.

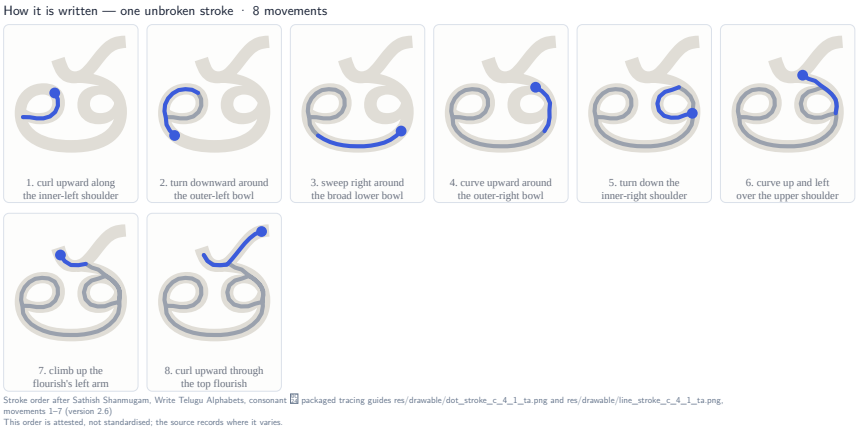
Before you move on

Hold your two copies next to the printed word. Is the gap you left the same one the book left? That gap is not spacing — it is the difference between two letters and one word.

5.4 త — write it with the model covered

Look at **త** once and say *ta*. Then cover it, and every other **త** on the page.

Writing — delayed copy



How **త** *is written, stroke by stroke*

With the model covered, wait ten seconds, then write **త** once from memory.

Ten seconds is not long and is not meant to be. It is long enough that your hand cannot be tracing a shape it can still see, and short enough that a letter you met a minute ago is still there to be found.

Only after the letter is finished, uncover the model and compare. Repair **one** thing — the first that differs — and leave the rest.

Before you move on

The thing to look at is not whether your letter is beautiful. It is whether it is the **same letter**, and in this script that usually comes down to one curve closing where the model's closes, or staying open where the model's stays open. A hand drawing from memory rounds off what it is unsure about.

5.5 త — the letter from the sound

Cover every త on the page. Nothing to copy and nothing to uncover.

Writing — dictation

Say *ta* aloud, or play it, and write the letter that carries it. Once.

This is a different job from the last lesson even though the letter is the same. A delayed copy asks your hand to remember a shape. Dictation asks it to turn a **sound** into a shape, which is the thing writing is actually for, and the two do not always arrive together.

Before you move on

Uncover the model and compare — and then notice what you were asked to write.
Not *t*. **ta**. The vowel is already inside the letter and nobody wrote it, which is the fact about this script that the first three lessons showed you and this one makes you act on. Hearing *ta* and writing one shape is the whole difference between an alphabet and what you are learning.

5.6 ౮ — the Telugu numeral for 8

Before the new one: త — what does it do? And one from further back: ౬?

One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౮

౮ is **eight**.

Eight of ten. Read the row below and say each value aloud before moving on — the pause matters more than the speed.

Writing: ౮ — copy what you see

Put your pen on ౮ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౮ · ౩ · ౨ · ౦

- *Trace it:* ౮ three times, saying "8" as you finish each one
- *Look:* for ౮ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౮? What amount does it stand for? (౮ is 8.)
One more, from much earlier: ◌ి — what does it do?

5.7 నేను తెలుగు మాట్లాడతాను (nēnu telugu māṭlāḍatānu) — "I speak Telugu"

Your first full, moving sentence — and it names one of India's most musical languages.

The letters in this word

తెలుగు (*telugu*): **తె** (*te*) + **లు** (*lu*) + **గు** (*gu*).

The word, taken apart — its roots and family

నేను తెలుగు మాట్లాడతాను = **నేను** (*nēnu*, "I") + **తెలుగు** (*telugu*, "Telugu," the object) + **మాట్లాడతాను** (*māṭlāḍatānu*, "speak") — "**I Telugu speak**," the verb last as always. The name **తెలుగు** (*telugu*) is native (DEDR 3426), of debated origin (often linked to *tenugu*, and to the land *Trilinga*); its vowel-rich sound and habit of ending most words in a vowel earned it the old nickname "the Italian of the East." It is the language of the *Kāvya* poets and, today, of some eighty million speakers.

Grammar Lens: no gender on "I speak"

Māṭlāḍatānu is the same whether a man or a woman says it — Telugu, like Tamil, marks **no gender in the first or second person** (only the third: *-āḍu* he, *-undi* she/it). This is unlike Hindi, where even "I speak" changes for the speaker's gender (*boltā/boltī*).

Your turn

Say these aloud:

- "nēnu telugu māṭlāḍatānu"
- the old nickname for Telugu and why ("the Italian of the East" — vowel-rich, most words end in a vowel)
- does "I speak" change for a man vs. a woman? (No — no 1st-person gender)

Before you move on

Say "I speak Telugu," and give Telugu's old nickname. (*Nēnu telugu māṭlāḍatānu*; "the Italian of the East.")

5.8 స — one character, met inside words you already say

Before the new one: ఠ — what amount does it stand for? And one from further back: ప?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: స

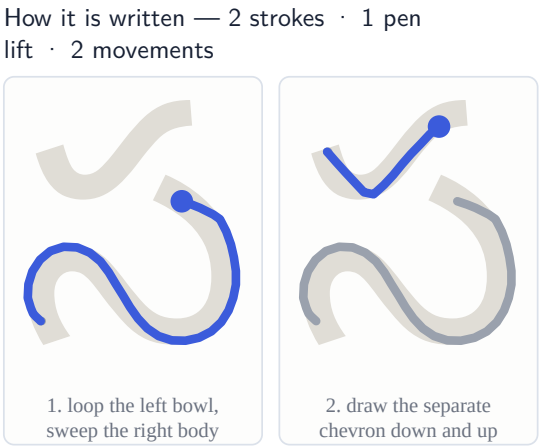
స — *sa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *s*, it is **sa**.

You already say these, and every one of them has స somewhere inside it:

- నమస్కారం *namaskāram* — hello / greetings (namaskāram — "a making of a bow")
- సరే *sarē* — okay / alright (sarē)
- వెళ్ళి వస్తాను *veḷḷi vastānu* — goodbye (lit. "I'll go and come back")

Writing: స — two calm movements



How స *is written, stroke by stroke*

Watch the guide once before your hand moves. స arrives in **two calm movements**, with one lift between them:

1. Loop around the left bowl, then keep sweeping around the broad right body.
2. Lift once, then draw down and up through the separate chevron above.

Trace the filmstrip slowly. Let the long first movement settle before you lift for the small upper mark. Then copy the whole shape once without rushing.

Your turn

- *Look:* at these words, and find స in the ones that have it

  నమస్కారం · సరే · ధన్యవాదములు

- *Trace it:* స three times, saying *sa* as you finish each one

- *Look:* back at any page of this chapter and find స once more

Before you move on

Which character is this — స? What sound does it carry? (***sa***.)
Name one word you already say that contains it.
One more, from much earlier: ◌ం — what does it do?

5.9 ష — the second of the s letters

Before the new one: స — what sound does it carry, and which word from chapter two opens with it?

That word carries a second s-shape as well, further along. Today's character is the second one.

Script you'll notice: ష

ష — *ṣa*.

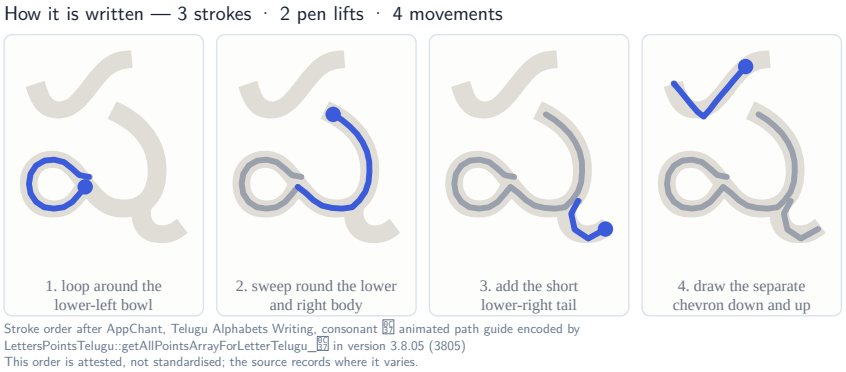
It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṣ*, it is **ṣa**.

- సంతోషం *santōṣam* — joy; and the way you say you are pleased to meet somebody (santōṣam — "gladness")

Look at that word end to end. It opens on స and closes on ష, with the *o* sign between them. **Two different s-shapes inside one short word**, and until now you could read the first and not the second.

Your tongue makes them in two different places. For స the tip touches the ridge behind your teeth. For ష it curls back along the roof of your mouth, the same backward curl you already make for ట. The romanization marks the difference with one dot under the letter — *s* against *ṣ* — which is easy to miss in print and impossible to miss on the page, where they are two unlike shapes.

Writing: ష — four calm movements



How ష is written, stroke by stroke

Watch the guide once before your hand moves. ష arrives in **four calm movements**, with two lifts:

1. Loop around the small bowl at the lower left.
2. Without lifting, sweep around the broad lower and right body.
3. Lift, then add the short tail at the lower right.
4. Lift once more, then draw down and up through the separate chevron above.

Trace the filmstrip slowly. Let the bowl and body run on as one stroke, and lift only before the tail and before the chevron. Then write స beside ష and notice how different the two silhouettes feel.

Your turn

- *Look:* at the word below and put a finger on each of its two s-shapes in turn

  సంతోషం

- *Trace it:* ష three times, saying *ṣa* as you finish each one
- *Say it:* which of the two has your tongue curled back

Before you move on

Which character is this — ష? What sound does it carry? (*ṣa*.) Which end of సంతోషం does it sit at? (**The far end** — స opens the word, ష closes it.) Which other letter puts your tongue in the same curled place? (ట.)

5.10 ఉండు (uṇḍu) — "to be, to stay, to live"

You have already used this verb — in "how are you." Now meet it in its own right, and use it to say where you live.

The letters in this word

ఉ (independent *u*) + ◌ండు (*ṇḍu*, with the retroflex cluster ◌ండ) → ఉండు (*uṇḍu*).

The word, taken apart — its roots and family

ఉండు (*uṇḍu*, "to be, to exist, to stay, to live") is native Dravidian and does an enormous amount of work. It is the verb behind Chapter 3's *unnāru* ("you are") and *bāgunnānu* ("I'm well") — and it also means "to reside": *nēnu Hyderābādlō uṇṭānu* ("I live in Hyderabad"). One verb covers "be," "stay," and "live."
DEDR 697 lists Telugu *uṇḍu*, "to be, exist, live", with Tamil *uḷ*, "to be", and *uṇṭu*, "there is", and Kannada *uḷ*.

Grammar Lens: "in" comes after the noun

Hyderābādlō = *Hyderabad* + **-లో** (*-lō*, "in"). The little word for "in" is glued to the **end** of the noun — Telugu uses **post**positions (really, case-suffixes) where English uses prepositions. "Hyderabad-in I stay," the verb last.

Your turn

Say these aloud:

- "uṇḍu"
- "I live in Hyderabad" — *nēnu Hyderābādlō uṇṭānu*

- where "in" (*-lō*) sits — glued to the end of the noun

Before you move on

Name three things the one verb *uṇḍu* can mean, and say where "in" goes. ("To be / to stay / to live"; *-lō* "in" attaches to the **end** of the noun.)

5.11 హంస (haṃsa) — a swan

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: హంస

హంస — *haṃsa* — "a swan".

Say it: *haṃsa*. *Look:* at its shape as you say it. The next lesson takes one piece of it, **హ**, and writes it on its own.

The word, taken apart — its roots and family

హంస (*haṃsa*) is Sanskrit *haṃsa*, taken over whole as a learned loan, a tatsama (CDIAL 13937). CDIAL glosses the Sanskrit word "goose"; Telugu uses it for the swan.

Your turn

Say these aloud:

- *haṃsa*
- *haṃsa*, and what it means

Before you move on

What is "a swan"? (**హంస**, *haṃsa*.)

5.12 హ — one character, met inside words you already say

Before the new one: స — what does it do? And one from further back: ౭?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: హ

హ — *ha*.

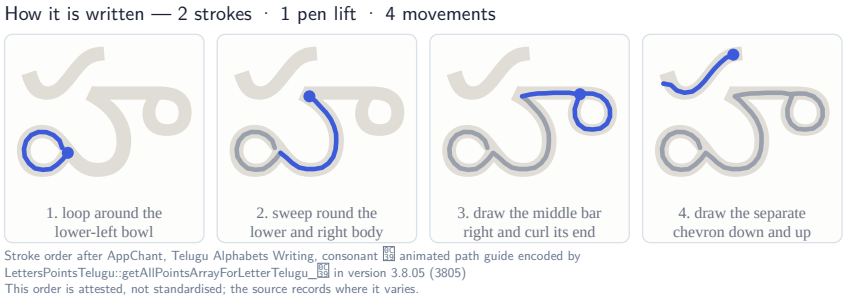
It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *h*, it is **ha**.

You met it on the page before this one, at the front of a place name:

- హైదరాబాద్ *Hyderābād* — the city from the sentence about where you live

Look at where that word came from. *Hyderābād* reached Telugu through Persian and Urdu, and that is the pattern: in the words this book has given you so far, హ sits almost entirely on borrowings — from Persian, from Urdu, from Sanskrit. It is a letter you will meet again on the very next page, in a word for help that came in from Sanskrit.

Writing: హ — four calm movements



How హ *is written, stroke by stroke*

Watch the guide once before your hand moves. హ arrives in **four calm movements**, with one lift, before the last:

1. Loop around the small bowl at the lower left.
2. Without lifting, sweep around the broad lower and right body.
3. Without lifting, draw right across the middle bar and curl around its far end.
4. Lift once, then draw down and up through the separate chevron above.

Trace the filmstrip slowly. Let the first three movements run on as one stroke and lift only for the chevron, then copy the whole shape once without rushing.

Your turn

- *Look:* at these words, and find హ in the ones that have it

  హైదరాబాద్ · నమస్కారం

- *Trace it:* హ three times, saying *ha* as you finish each one
- *Look:* back at any page of this chapter and find హ once more

Before you move on

Which character is this — హ? What sound does it carry? (***ha.***)
Name one word you already say that contains it.
One more, from much earlier: ౩ — what amount does it stand for?

5.13 పని చేయు (pani cēyu) — "to work"

The last verb of the chapter — and, like Hindi's *karnā* and Tamil's *sey*, it is a "do" verb that builds a hundred others.

The letters in this word

పని (*pani*, "work"): ప (*pa*) + ని (*ni*). చేయు (*cēyu*, "do"): చే (*cē*) + యు (*yu*).

The word, taken apart — its roots and family

చేయు (*cēyu*, "to do, to make") is a core native Dravidian verb (DEDR 1957), and Telugu — like Hindi with *karnā* and Tamil with *sey* — builds compound verbs by putting a noun in front of it:

- **పని చేయు** (*pani cēyu*) = "work-do" = "**to work**" (*pani*, "work", DEDR 3884)
- **వంట చేయు** (*vaṇṭa cēyu*) = "to cook"
- **సహాయం చేయు** (*sahāyaṁ cēyu*) = "to help" (*sahāyaṁ* ← Sanskrit)

So "I work" is **నేను పని చేస్తాను** (*nēnu pani cēstānu*) — *cēy-* + tense + "I." Master *cēyu* and a whole grammar of "do-verbs" opens up — and notice *sahāyaṁ cēyu* ("to help") pairs a **Sanskrit** noun with the **native** *cēyu*: Telugu's two vocabularies working together in a single verb.

Grammar Lens: noun + చేయు = a new verb

This "noun + *cēyu*" pattern is the exact twin of Hindi's "noun + *karnā*" and Tamil's "noun + *sey*." Three languages — two of them from unrelated families — all hit on the same trick: an all-purpose "do" verb with nouns bolted on.

Your turn

Say these aloud:

- "pani cēyu" (to work)
- "I work" — *nēnu pani cēstānu*
- the Hindi and Tamil twins of this trick (*karnā*, *sey*)

Before you move on

How does Telugu turn "work" into "to work," and what verbs work the same way in Hindi and Tamil? (*Pani* + *cēyu* = "work-do"; Hindi *karnā*, Tamil *sey*.)

5.14 ౯ — the Telugu numeral for 9

> Before the new one: మా — what does it do? And one from further back: తి?
>
> One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౯

౯ is **nine**.

That is nine of the ten, and the last one is the one that makes the rest useful.

Writing: ౯ — copy what you see

Put your pen on ౯ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౯ · ౮ · ౬ · ౩ · ౫

- *Trace it:* ౯ three times, saying "9" as you finish each one
- *Look:* for ౯ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౯? What amount does it stand for? (౯ is 9.)
One more, from much earlier: ఉ — what does it do?

5.15 Chapter 5 — The first verbs

No new words. Three verbs, one engine — build real sentences about yourself.

Your turn: build the sentences

Three sentences about yourself. *Read it:* each off the page before you say it

Telugu		English
నేను తెలుగు మాట్లాడతాను.	*nēnu telugu māṭlāḍatānu*	I speak Telugu.
నేను హైదరాబాద్లో ఉంటాను.	*nēnu Hyderābādlō uṇṭānu*	I live in Hyderabad.
—	*nēnu pani cēstānu*	I work.

One of these stays in romanization for now: its *c* has not had its own lesson yet, and a line you cannot decode is not a line to read from. The others are read straight off the page; the romanization is there to check against.

Say these aloud:

- "I speak Telugu" — *nēnu telugu māṭlāḍatānu*
- "I live in Hyderabad" — *nēnu Hyderābādlō uṇṭānu*
- "I work" — *nēnu pani cēstānu*
- "he speaks" vs. "she speaks" — *māṭlāḍtāḍu* / *māṭlāḍtundi*

What you've built — the engine

Say these aloud:

- the three stacked pieces of every Telugu verb (stem + tense + person)
- the ending that means "I" (*-ānu*)
- where Telugu marks gender — and where it doesn't (3rd person only)

The word, taken apart — its roots and family

Roots you now carry:

- *māṭlāḍu* "to speak" ← *māṭa* "word"
- *uṇḍu* "to be / stay / live"; *-lō* "in" attaches to the noun's end
- *cēyu* "to do" → *pani cēyu* "to work" (the twin of Hindi's *karnā*, Tamil's *sey*)
- *telugu* — "the Italian of the East," vowel-rich

Before you move on

In one breath, say your language, your city, and your work in Telugu. (*Nēnu telugu māṭlāḍatānu. Nēnu … lō uṇṭānu. Nēnu pani cēstānu.*)

Chapter 6

Case Endings and Dative Subjects

Modes: **voice** (3) **pen** (2) **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can say that I know Telugu the way Telugu itself says it — "to me Telugu comes," with no subject and the dative -ku.
>
> *Say* నాకు తెలుగు వచ్చు *against* నేను తెలుగు మాట్లాడతాను*, then line up the four Dravidian datives -ku · -ukku · -ge · -ikku.*

6.1 -కు (-ku) — "to, for"

Your first **case ending**. English puts "to" in **front** as its own word. Telugu sticks it on the **back** — and that difference is the biggest structural fact about the language.

You'll want to know: Adding it on

word	+ -ku	meaning
పేరు *pēru* — name	పేరుకు *pēru**ku***	to/for the name
పని *pani* — work	పనికి *pani**ki***	for work

Notice the suffix appears as **-కు** *-ku* or **-కి** *-ki* depending on the vowel before it. Same suffix, adjusted to fit — the seam still shows.

And with "I", which changes its body first:

నేను *nēnu* ("I") → నాకు *nāku* ("to me")

Nēnu becomes *nā-* before the ending. Nouns don't do this; they just take the suffix.

Grammar Lens: Why this matters

	Telugu -ku	**a Latin ending like -īs**
pins down the case?	**yes** — dative, always	**no** — *-īs* is dative **or** ablative
carries number?	**no** — a separate suffix does	yes — plural, baked in
carries declension class?	**no**	yes — 1st/2nd only
is there a seam?	**yes**: *pēru* + *ku*	no — one fused lump

Telugu **stacks**: each suffix means one thing and sits in a fixed order, so you can point at every piece of a long word. Latin **fuses** — *-īs* is case *and* plural *and* declension, indivisible, and it doesn't even settle *which* case. Telugu's *-ku* is never ambiguous.
That's what "**agglutinative**" means, and it's why Telugu words grow long without growing hard: they are **built**, not memorised.

Your turn

Say these aloud:

- "*pēru … pēruku*"
- "*nēnu … nāku*" — "I" … "to me"
- "*paniki*" — "for work," from Ch. 5's పని
- the principle — "one suffix, one meaning, visible seam"

Before you move on

What does **-కు** mean? ("**To**" or "**for**.") Where does it go? (**On the end** of the noun.) What is "to me"? (**నాకు** *nāku* — *nēnu* shrinks to *nā-* first.) Why does it sometimes appear as **-కి**? (It **adjusts to the preceding vowel** — same suffix.) How does that differ from Latin? (Latin **fuses** case+number+declension into one ending — and *-īs* doesn't even fix *which* case; Telugu's carries **one** meaning, unambiguously, with the **seam visible**.) Next: the sentence where Telugu leaves out the subject entirely.

6.2 ౦ — the Telugu numeral for 0

> Before the new one: ౯ — what amount does it stand for? And one from further back: ౮?
>
> One numeral this time, and it is read the way every numeral is read: as an amount.

Script you'll notice: ౦

౦ is **zero**, and it closes the set.

It is a ring, and you have seen that ring before: ◌ం, the sunna, is drawn the same way. On the page the difference is where it sits — the sunna rides after a letter inside a word, the zero stands in a row of numerals. Context, not shape, tells you which one you are looking at.

With ౦ in hand the other nine become worth something, because Telugu numerals use **place value exactly the way your own digits do**. ౧ then ౦ is ten. ౨ then ౦ is twenty. Three digits make hundreds. Nothing new has to be learned for that — the system is one you already own, wearing different characters.

Writing: ౦ — copy what you see

Put your pen on ౦ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at this row and say the value of each numeral in it, left to right

  ౧౦ · ౨౦ · ౯౯ · ౧౦౦

- *Trace it:* ౦ three times, saying "0" as you finish each one
- *Look:* for ౦ on any page of a Telugu book, calendar or doorplate you can find

Before you move on

Which numeral is this — ౦? What amount does it stand for? (౦ is 0, and ౧౦ is ten.)
One more, from much earlier: ౯ — what amount does it stand for?

6.3 య — one character, met inside words you already say

Before the new one: ౦ — what amount does it stand for? And one from further back: స?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: య

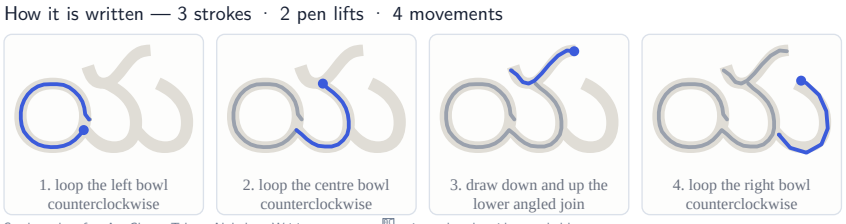
య — *ya*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *y*, it is **ya**.

You already say these, and every one of them has య somewhere inside it:

- ధన్యవాదములు *dhanyavādamulu* — thank you (dhanyavādamulu — "utterances of 'worthy'")
- పని చేయు *pani cēyu* — to work (lit. "work-do")

Writing: య — four calm movements



How య *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 loops counterclockwise around the left bowl, and without lifting, movement 2 makes the centre bowl in the same direction. Lift, then movement 3 travels down and up through the lower angled join. Lift once more; movement 4 loops around the right bowl. That is two pen lifts in all.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, so keep the four clear movements instead of rushing their joins.

Your turn

- *Look:* at these words, and find య in the ones that have it

  ధన్యవాదములు · నమస్కారం

- *Trace it:* య three times, saying *ya* as you finish each one
- *Look:* back at any page of this chapter and find య once more

Before you move on

Which character is this — య? What sound does it carry? (***ya***.)
Name one word you already say that contains it.
One more, from much earlier: ర — what does it do?

6.4 నాకు తెలుగు వచ్చు — "I know Telugu"

Chapter 5 taught you how to say "**I** speak Telugu." Now say "I **know** Telugu." Telugu won't let you use *nēnu* — and the verb it uses instead will surprise you.

You'll want to know: The sentence

నాకు తెలుగు వచ్చు. *nāku telugu vaccu.* literally: "**to-me** Telugu **comes**."

piece	
నాకు *nāku*	"to me" — the dative from the last lesson
తెలుగు *telugu*	Telugu (Ch. 5)
వచ్చు *vaccu*	"**comes**" — the very verb you learned in Ch. 4

Two things at once. **You are not the subject** — *nēnu* is gone, moved into the dative, and what's left unmarked is *telugu*. And the verb is literally "**to come**": a language you know is a thing that **comes to you**.

Grammar Lens: Why: things that happen *to* you

Telugu sorts experiences from actions. Speaking is something you **do**, so Ch. 5 used *nēnu*. But knowing, liking, wanting, being hungry — these **arrive** at you. Telugu marks that by putting the person in the **dative**.

English frames it as	**Telugu frames it as**
I **know** Telugu	Telugu **comes to me**
I **like** it	it is pleasing **to me**
I **am** cold	cold is **to me**

English keeps one fossil of exactly this: "**methinks**" — *me* is a dative, "it seems **to me**." Telugu made it the rule.

The word, taken apart — its roots and family

language	**"I know [the language]"**	**the dative**
Telugu	*nāku telugu vaccu*	**-ku**
Tamil	*enakku tamiḻ teriyum*	**-ukku**
Kannada	*nanage kannaḍa gottu*	**-ge**
Malayalam	*enikku malayāḷam aṟiyām*	**-ikku**

One construction across four languages, with four suffixes that are the **same suffix** — *-ku / -ukku / -ge / -ikku*. Native Dravidian bones, like *vaccu*, "comes" (DEDR 5270) — as *blanc/bianco/branco* were for Romance.

Your turn

Say these aloud:

- "*nāku telugu vaccu*"
- the contrast — "*nēnu telugu māṭlāḍatānu*" (I speak) … "*nāku telugu vaccu*" (comes to me)
- the literal — "to-me Telugu comes"

- the four cousins — "*-ku* · *-ukku* · *-ge* · *-ikku*"

Before you move on

What does **నాకు తెలుగు వచ్చు** literally say? ("**To-me** Telugu **comes**.") Which verb is doing the work, and where did you meet it? (**వచ్చు** "to come" — Chapter 4.) What has English got that Telugu hasn't? (A nominative "**I**" — *nēnu* is replaced by the dative *nāku*.) Why the dative? (Knowing **happens to** you.) Which English word keeps the same idea? (**Methinks**.)

6.5 The opening five, again — three jobs

From memory: the word that opens a conversation, and the word that closes a piece of business.

You'll want to know: sort them by the job, not by the order they arrived

This far on, the question is no longer *what does each word mean* but *which one do I reach for*. Three jobs cover all five:

job	the word
open or close the whole exchange	**నమస్కారం** *namaskāram*
answer a question	**అవును** *avunu* · **లేదు** *lēdu*
close one turn and move on	**సరే** *sarē* · **ధన్యవాదములు** *dhanyavādamulu*

The second row is the one to feel: **అవును** and **లేదు** are the two ways a Telugu answer can go.

What you've built — what each word was carrying

Each of the five arrived with a point attached. Recall the point, not the sentence it came in:

- **నమస్కారం** — hello **and** goodbye in one word, respectful without being stiff.
- **ధన్యవాదములు** — its *-mulu* is an ending glued to a stem, which is how Telugu does most of its grammar.
- **అవును** — a small statement of being, "it is so," not a bare

particle.

- **లేదు** — one of **two** negatives: *lēdu* denies that a thing is there, **కాదు** *kādu* that it is the thing you named.
- **సరే** — one Dravidian word wearing three scripts.

Your turn: choose, then say

Say these aloud:

- someone asks whether you speak Telugu — one word back
- someone asks whether the tea is there — deny that it is
- the word for thanks, all five syllables, unhurried
- hello, then goodbye — the same word both times

Before you move on

Which word does both hello and goodbye? (**నమస్కారం**.) Which two negatives does Telugu keep apart? (**లేదు**, *not there*; **కాదు**, *not that*.) What is the *-mulu* an example of? (**An ending glued onto a stem**.) Which of the five would a Kannada speaker know on sight? (**సరే**.)

Chapter 7

Numbers One to Ten

Modes: **voice** (1) **eyes** (2) **pen** (5) **Hands-free start:** the first of 8 lessons.

> ***By the end of this chapter:*** I can count from one to ten in Telugu, including the numbers that wander furthest from their Dravidian cousins.
>
> *Count* ఒకటి *through* పది*, say the two Telugu builds fresh — enimidi and tommidi — and hear seven's three fates in ēlu, ēḷu and ēḍu.*

7.1 ఒకటి, రెండు, మూడు, నాలుగు, ఐదు — one to five

> All five are old Dravidian friends, but the very first one wears Telugu's own shape.

You'll want to know: The five

numeral	word	said
౧ (1)	ఒకటి	*okaṭi*
౨ (2)	రెండు	*reṇḍu*
౩ (3)	మూడు	*mūḍu*
౪ (4)	నాలుగు	*nālugu*
౫ (5)	ఐదు	*aidu*

The symbols ౧ ౨ ౩ ౪ ౫ are Telugu's own digits.

The word, taken apart — its roots and family

One is where Telugu looks least like the family. Its cousins sound alike — Tamil *onṟu*, Kannada *ondu*, Malayalam *onnu* — but Telugu says **okaṭi**, built differently on the same root: DEDR 990 files them together. It's the number to memorise fresh rather than reason across from Tamil.

From two onward, the family closes ranks again:

	Tamil	Telugu
2	*iraṇṭu*	**reṇḍu**
3	*mūṉṟu*	**mūḍu**
4	*nāṉku*	**nālugu**
5	*aintu*	**aidu**

Reṇḍu has simply dropped the opening vowel of *iraṇṭu*; *mūḍu* is *mūṉṟu* with its cluster smoothed to a single **ḍ**. Same numbers, a Telugu polish.

Script you'll notice: A Telugu shape to notice

Nearly every Telugu word here ends in **-u** (*reṇḍu, mūḍu, nālugu*) — the language's strong preference for open, vowel-final syllables. Even where Tamil ends hard, Telugu tends to round the word off with a vowel.

Your turn

Say these aloud:

- "okaṭi, reṇḍu, mūḍu, nālugu, aidu"
- the odd shape — "okaṭi", beside the onṟu/ondu/onnu of its cousins
- the family — "iraṇṭu → reṇḍu", the opening vowel dropped

Before you move on

Count to five in Telugu. (*Okaṭi, reṇḍu, mūḍu, nālugu, aidu.*) Which number does Telugu shape unlike the rest of the family, and what do the others say? (**One** — Telugu *okaṭi* vs *onṟu / ondu / onnu.*) How does *reṇḍu* relate to Tamil *iraṇṭu*? (The opening vowel was dropped.) What vowel do most Telugu words here end in? (**-u**.) Next: six to ten.

7.2 ఐ — one letter for a vowel that moves

Before the new one: ఏ — what sound, and where in a word does Telugu use the letter rather than the sign?

Count to five out loud. The last number opens on today's character.

Script you'll notice: ఐ

ఐ — *ai*.

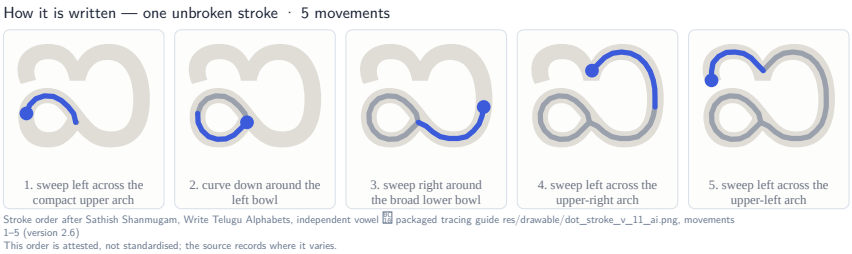
It is an **independent vowel** — a vowel that is a letter in its own right, not a mark hung on a consonant.

- ఐదు *aidu* — five

Say *aidu* slowly and listen to the opening. Your mouth does not hold one position: it starts low and slides up toward *i*. Two sounds in one movement, which is what the romanization's two letters are trying to show.

Telugu writes that whole movement with one character. English needs a digraph or a silent letter for the same job — *aisle*, *height*, *my* — and picks a different trick each time. Here the slide has a shape of its own, and it looks nothing like the ఏ you met a chapter ago even though the romanizations share a letter.

Writing: ఐ — follow the numbered strip



How ఐ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఐ yourself, slowly and larger than it is printed, with ఏ beside it, and look at the two.

The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the number below and find ఐ at its front

  ఐదు

- *Trace it:* ఐ three times, saying *ai* as you finish each one
- *Say it:* *ēmiṭi* and *aidu* one after the other, and say which opening moves

Before you move on

Which character is this — ఐ? What sound does it carry? (***ai***.) Which number begins with it? (ఐదు.) Does your mouth hold one position for it or two? (**Two** — it slides.)

7.3 ూ — one character, met inside words you already say

Before the new one: యు — what does it do? And one from further back: హూ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ూ

ూ — *ū*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

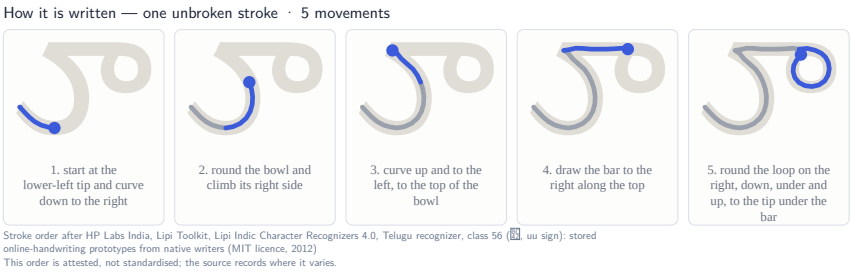
You already know its short partner. ు puts a quick *u* on a consonant; ూ puts a **held** one on it — the same vowel, kept twice as long. Telugu counts that length as the difference between two different words, so the two signs are two different characters and not two ways of writing one.

Say *mu*, then say *mū* and let the vowel run on. That extra length is all the second mark is asking for.

You already say this one, and the held vowel is sitting in the middle of it:

- మూడు *mūḍu* — three, from the numbers you counted out

Writing: ూ — follow the numbered strip



How ూ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ూ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two, and say which one holds its vowel and which one does not

  మూడు · రెండు

- *Trace it:* ూ three times, saying *ū* and holding it as you finish each one

- *Look:* back at any page of this chapter and find ూ once more

Before you move on

Which character is this — ూ? What vowel does it put on the consonant it attaches to, and how is it different from ు? (**A held *ū*; ు is the short one.**)
One more, from much earlier: ౩ — what amount does it stand for?

7.4 ఆరు, ఏడు, ఎనిమిది, తొమ్మిది, పది — six to ten

The top of the count is where Telugu is least like its cousins — two of these you simply learn on their own.

You'll want to know: The five

numeral	word	said
౬ (6)	ఆరు	*āru*
౭ (7)	ఏడు	*ēḍu*
౮ (8)	ఎనిమిది	*enimidi*
౯ (9)	తొమ్మిది	*tommidi*
౧౦ (10)	పది	*padi*

The word, taken apart — its roots and family

Six is an easy cousin (Tamil *āṟu* → Telugu *āru*). **Seven** is more interesting: Tamil *ēḻu* carries the rare **ழ** (the *zh* of *Tamil*); Kannada hardened it to **ళ** (*ēẓu*); **Telugu went further still** and turned it into a plain **డ** — *ēḍu*. One inherited sound, three fates across the three scripts.

The word, taken apart — its roots and family

Here Telugu strays furthest from its cousins —

number	Tamil / Malayalam	Telugu
8	*eṭṭu* / *eṭṭu*	**enimidi**
9	*oṉpatu* / *onpatu*	**tommidi**

You can't reach *enimidi* and *tommidi* from Tamil by regular sound-change the way you can *reṇḍu* from *iraṇṭu*. *Enimidi* shares the ancient *eṇ-* root behind *eṭṭu* (DEDR 784) but has drifted too far to

derive; *tommidi* matches not *oṉpatu* but old Tamil *toṇṭu*, "nine" (DEDR 3532). So unlike 2–7, learn these two **fresh**.
Ten comes partly back into the fold — Telugu *padi* is a worn-down relative of the *pat-* in Tamil *pattu* (and the *-patu* hiding inside *tommidi* and Tamil *oṉpatu*, "one-to-ten").

Your turn

Say these aloud:

- "āru, ēḍu, enimidi, tommidi, padi"
- seven's three fates — "Tamil ēḻu, Kannada ēḷu, Telugu ēḍu"
- the two you learn fresh — "enimidi, tommidi"

Before you move on

Count six to ten in Telugu. (*Āru, ēḍu, enimidi, tommidi, padi.*) What became of Tamil's ḻ (in *ēḻu*) by the time it reached Telugu *ēḍu*? (It hardened all the way to **ḍ**.) Which two numbers can't you derive from Tamil by regular correspondence? (**Eight and nine** — learn *enimidi, tommidi* fresh.) How does *padi* relate to Tamil *pattu*? (A worn-down relative of the same *pat-* "ten".)

7.5 ొ— the short one of the pair

Before the new one: ా — is it a letter or a sign, and what does it do?

Count from six to ten out loud. One of those numbers needs today's sign.

Script you'll notice: ొ

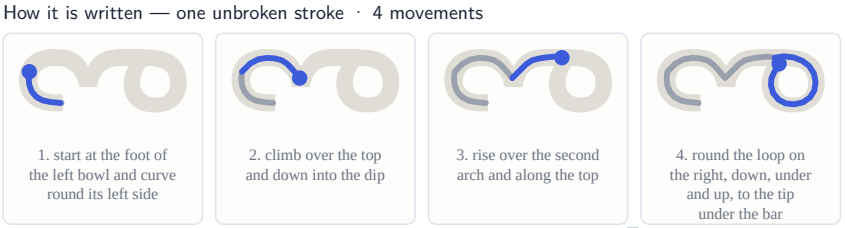
ొ — *o*.

It is a **sign**, like the long ో you have already met, and it carries the **short** *o* where that one carries the long *ō*.

- తొమ్మిది *tommidi* — nine (tommidi)

Telugu keeps short and long vowels apart as separate signs, and the difference changes words. English writes one *o* and leaves the length to the ear; here the page tells you, which is one less thing to guess at.

Writing: ొ— follow the numbered strip



How ొis written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ొ yourself — slowly, and larger than it is printed. Then write it attached to a consonant, the way it actually appears.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the number below and find the consonant carrying ొ

  తొమ్మిది

- *Trace it:* ొthree times, saying *o* as you finish each one
- *Say it:* which of ొand ోis the long one
- *Look:* at సంతోషం and find the long one riding its consonant

Before you move on

Is ొa letter or a sign? (A sign.) Which number from this chapter uses it? (**తొమ్మిది**, nine.) Which of the two *o* signs is longer? (ో)

7.6 ఒ — the sign from a page ago, standing alone

A page ago you met ొ, the short-*o* sign, inside **తొమ్మిది**. Say that number.

Now count from one. The first number opens on the same vowel, and it has no consonant to hang the sign on.

Script you'll notice: ఒ

ఒ — *o*.

It is an **independent vowel** — a vowel that is a letter in its own right, not a mark hung on a consonant.

- **ఒకటి** *okaṭi* — one

This is the clearest pair you will get. ొ and **ఒ** are the same vowel: the first rides on a consonant, the second stands where no consonant does. You met the sign one lesson ago inside *tommidi*; here is the letter, at the front of *okaṭi*, in the same chapter and the same list of numbers.

Hold the two next to each other and the whole system is visible in one line:

the vowel is carried	**the vowel starts the word**
తొమ్మిది — the sign ొrides on **త**	**ఒకటి** — the letter **ఒ** stands alone

Writing: ఒ — follow the numbered strip

Stroke order after Sathish Shanmugam, Write Telugu Alphabets, independent vowel 12 packaged tracing guide res/drawable/dot_stroke_v_12_o.png, movements 1–3 (version 2.6)
This order is attested, not standardised; the source records where it varies.

How ఒ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఒ yourself, slowly and larger than it is printed, with ొbeside it, and look at the two.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two numbers and say which one carries the letter ఒ and which the sign ొ

  ఒకటి · తొమ్మిది

- *Trace it:* ఒ three times, saying *o* as you finish each one
- *Say it:* the numbers one to five, and name the one that opens on a vowel letter

Before you move on

Which character is this — ఒ? What sound does it carry? (*o*.) Which number begins with it? (ఒకటి.) And what is the difference between ఒ and ొ? (**None in the sound** — one stands alone, the other rides on a consonant.)

7.7 ఆ — the long one, beside the short one that needs no sign

Two from the first chapter: అ, and the sign ా. Say what each of them does.

Today's character is the missing corner of that square.

Script you'll notice: ఆ

ఆ — *ā*.

It is an **independent vowel** — a vowel that is a letter in its own right, not a mark hung on a consonant.

- ఆరు *āru* — six

With this one the *a* vowels are complete, and they make a square worth drawing:

	short	**long**
carried by a consonant	nothing at all	ా
starting a word	అ	ఆ

Three of those four cells you have had since chapter one. **The top-left cell is the one that surprises people**: short *a* on a consonant is written with no mark, which is why క is *ka* and not *k*. Every other cell gets a shape.

Look at the two letters side by side — అ and ఆ. The long one is the short one with a stroke added on the right, and that stroke has the same shape as the sign ా. Length shows up on the page as *more ink*, in both columns of the square.

Writing: ఆ — follow the numbered strip

How it is written — one unbroken stroke · 3 movements

This order is attested, not standardised; the source records where it varies.

How ఆ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఆ yourself, slowly and larger than it is printed, with అ beside it, and find the difference.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two words and say which opens on అ and which on ఆ

  అవును · ఆరు

- *Trace it:* ఆ three times, saying *ā* as you finish each one
- *Say it: avunu* and *āru*, holding the opening vowel of the second one longer

Before you move on

Which character is this — ఆ? What sound does it carry? (*ā*.) Which number begins with it? (ఆరు.) Which cell of the square has no shape in it at all? (**Short *a* carried by a consonant** — the consonant alone says it.)

7.8 The name exchange again — built from four pieces

Two words, from memory: the one for *name*, and the one for *my*.

You'll want to know: four pieces, and everything they build

The question you learned and its answer are made of the same four pieces:

piece	
పేరు *pēru*	name
నా *nā* · మీ *mī*	my · your
ఏమిటి *ēmiṭi*	what?
నువ్వు *nuvvu* · మీరు *mīru*	you, close · you, respectful

Two side by side give the answer, **నా పేరు ...** The respectful one in front and the question word behind give the question, **మీ పేరు ఏమిటి?**

Grammar Lens: the two things the name exchange was really teaching

Two points sit under those four pieces:

- **No word for *is*.** *Nā pēru Arun* is "my name Arun," and the link stays unsaid in every sentence of this shape.
- **Respect rides on the plural.** మీరు is a plural doing the work of politeness — the move Tamil *nīṅgaḷ* and French *vous* also make.

The familiar *your* goes with the familiar *you*: **నీ పేరు ఏమిటి?**

Script: three letters that open numbers

ఒ · ఐ · ఆ

Three vowel letters come back with the counting. Each opens a number you now say, and each is a whole letter rather than a sign for one reason: nothing is carrying the vowel.

letter	the number it opens
ఒ *o*	ఒకటి — one
ఐ *ai*	ఐదు — five
ఆ *ā*	ఆరు — six

Your turn: the exchange, both ways

Say these aloud:

- ask a stranger their name, then answer with your own — no "is"
- the one word for "pleased to meet you"
- the same question to a child — one letter of *mī* changes

Before you move on

Which word does నా పేరు **...** leave out? (**Is**.) Which *you* goes to a stranger, and what is it really? (మీరు — a plural doing politeness.) One word for "pleased to meet you"? (సంతోషం.) Which three numbers open on a whole vowel letter? (ఒకటి · ఐదు · ఆరు.)

Chapter 8

Please

Modes: **voice** (1) **eyes** (1) **pen** (1) **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can say please in Telugu, and use the polite -aṇḍi verb ending speakers actually reach for.
>
> *Build* **దయచేసి** *out of daya ("compassion") + cēsi ("having done"), then make the everyday polite request instead:* **కూర్చోండి**, *"please sit."*

8.1 దయచేసి (dayacēsi) — please (having done compassion)

Telugu's "please" carries a whole small sentence inside it: "having **done** (me) a compassion."

You'll want to know: The word

దయచేసి = **please**, literally "**having done kindness / compassion**." Two pieces:

- **దయ** (*daya*) = **compassion, kindness, grace** — from Sanskrit **daya**.
- **చేసి** (*cēsi*) = "**having done**," from the verb **చేయు** (*cēyu*) "to do."

So *dayacēsi* is *having done (a) kindness* — you ask by crediting the listener with the grace you hope they'll show.

It is the twin of **Tamil** *tayavu seytu* ("**do** the kindness") — both use a "do" verb — and cousins with **Kannada** *dayaviṭṭu* ("having **placed** compassion"). Further off, **Arabic** *min faḍlik* ("from your **grace**") and **Hindi** *kṛpayā* (from *kṛpā*, "**compassion**") ask in the very same spirit.

The word, taken apart — its roots and family

daya + a light verb, four ways:

- Telugu దయచేసి *daya**cēsi*** — compassion + **having done**
- Tamil தயவுசெய்து *tayavu **seytu*** — kindness + **do**
- Kannada ದಯವಿಟ್ಟು *daya**viṭṭu*** — compassion + **having placed**
- Malayalam ദയവായി *daya**vāyi*** — compassion + **as / having become**

Script you'll notice: Sound & structure point

The middle syllable చే is *ca* wearing the **long-ē** sign **-ే** (the counterpart of the short-e sign **-ె**), giving *cē*; then సి is *sa* + the *i* sign (**-ి**). Telugu marks a vowel's length and quality by the little sign riding on the consonant — the consonant stays put, the vowel-sign changes the tune.

Your turn

Say these aloud:

- "daya" — compassion — then "cēsi," having done
- the whole word — "dayacēsi" = please
- the two pieces again, slowly — "daya" then "cēsi"

Before you move on

What is the Telugu word for please? (దయచేసి *dayacēsi*.) What do its pieces mean? ("**Compassion**" *daya* + "**having done**" *cēsi*.) Which cousins ask the same way? (**Tamil, Kannada, Malayalam** with *daya* — plus **Arabic** *faḍl*, **Hindi** *kṛpā*.) Which sign sits on the middle syllable? (**The long-ē sign -ే**, making చ into చే.)

8.2 -ండి (-aṇḍi) — where Telugu actually keeps "please"

> You now have దయచేసి for *please*. Now the honest part: most of the time, a Telugu speaker asking politely does not say it.

You'll want to know: The ending does the work

Telugu politeness rides on the **respectful command ending -ండి** (*-aṇḍi*). It is not a separate word you add — it is a **tail on the verb**, and it is already "please."

respectful form	
కూర్చోండి *kūrcōṇḍi*	please sit
చెప్పండి *ceppaṇḍi*	please tell me

Each of these is a verb with **-ండి** on the end, and each is already polite — no extra word required. There is a shorter form of every one of them, used with a friend or a child; you will meet those verbs properly later, so take the -ండి forms as wholes for now. The short form is not rude, it is *close*, and using it with a stranger is the mistake. Leaving out దయచేసి is not.

Why it's said this way

The standalone దయచేసి is **formal or emphatic**. It is not the everyday "please" — it is the one you reach for to *warm a request further*, on top of an ending that is already polite:

- కూర్చోండి — please sit. Complete, polite, ordinary.
- దయచేసి కూర్చోండి — *do* please sit. Warmer, more insistent, more formal.

So the two stack. What they do not do is substitute: దయచేసి in front of the *short* form reads as oddly as "kindly sit down, mate."
English keeps politeness in a word you add; Telugu keeps it in the shape of the verb. A learner hunting for a word to translate *please* will reach for దయచేసి far too often and still sound abrupt — because the abruptness was never in the missing word. It was in the ending.

Your turn

Say these aloud:

- "kūrcōṇḍi" — that ending is already "please sit"
- "ceppaṇḍi" — please tell me
- both words together, warmer — "dayacēsi kūrcōṇḍi"

Before you move on

What carries "please" in ordinary Telugu speech? (**The ending -ండి** *-aṇḍi*, on the verb.) Is **కూర్చోండి** already polite without **దయచేసి**? (**Yes** — the ending is the politeness.) When do you add **దయచేసి**? (To make a request **warmer or more formal**, on top of -ండి.) What is wrong with putting **దయచేసి** in front of the short form? (The **short** ending undercuts the polite word.)

8.3 చ — one character, met inside words you already say

Before the new one: ◌ా — what does it do? And one from further back: ౯?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: చ

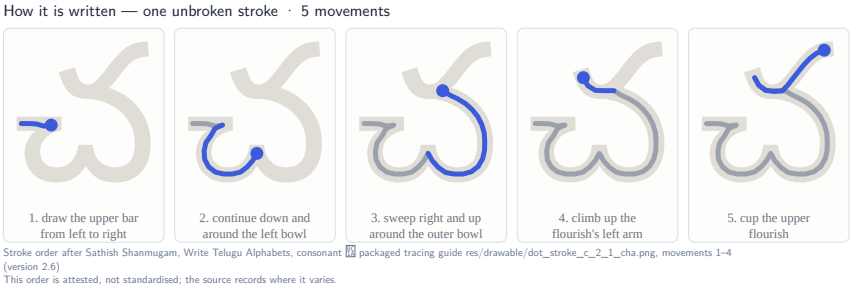
చ — *ca*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *c*, it is **ca**.

You already say these, and every one of them has **చ** somewhere inside it:

- **పని చేయు** *pani cēyu* — to work (lit. "work-do")
- **నాకు తెలుగు వచ్చు** *nāku telugu vaccu* — 'I know Telugu'
- **దయచేసి** *dayacēsi* — please (dayacēsi

Writing: చ — follow the numbered strip



How **చ** *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write **చ** yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find **చ** in the ones that have it

  దయచేసి · నమస్కారం

- *Trace it:* **చ** three times, saying *ca* as you finish each one
- *Look:* back at any page of this chapter and find **చ** once more

Before you move on

Which character is this — **చ**? What sound does it carry? (***ca***.)
Name one word you already say that contains it.
One more, from much earlier: **డ** — what does it do?

Chapter 9

Sorry

Modes: 🚗 **voice** (2) 👁 **eyes** (1) ✎ **pen** (1) 🚗 **Hands-free start:** the first 2 of 4 lessons.

> ***By the end of this chapter:*** I can apologise in Telugu and ask someone to forgive me, using the same respectful ending.
>
> *Say* **క్షమించండి**, *unpack it as kṣamiñcu plus the respectful -aṇḍi already met in kūrcōṇḍi, and trace it to Sanskrit kṣamā.*

9.1 క్షమించండి — sorry

You already know **దయచేసి** and its respectful **-ండి** ending (*kūrcōṇḍi*, "please sit"). Telugu's "sorry" hands you that very ending again, riding a brand-new verb.

The word, taken apart — its roots and family

- **క్షమా** (*kṣamā*) = "**forgiveness, patience**" — the Sanskrit noun, borrowed whole.
- **-ించు** (*-iñcu*) = a **verb-making suffix**: *kṣamā* + *-iñcu* → **క్షమించు** (*kṣamiñcu*), "**to forgive**." (The same pattern gives *prārambhiñcu*, "to begin," from Sanskrit *prārambha*.)
- **-ండి** (*-aṇḍi*) = the **respectful imperative** ending — exactly the one you already met on *kūrcōṇḍi* "please sit" and *ceppaṇḍi* "please tell me."

So **క్షమించండి** is "**please forgive**" — the same polite mold you already

know, filled with a new verb.

The word, taken apart — its roots and family

- Telugu క్షమించండి *kṣamiñ**caṇḍi*** — Sanskrit *kṣamā* + **-iñcu** (verb) + **-aṇḍi** (imperative)
- Kannada ಕ್ಷಮಿಸಿ *kṣami**si*** — Sanskrit *kṣamā* + **-isu** (verb) + **-i** (imperative)
- Malayalam ക്ഷമിക്കണം *kṣami**kkaṇaṁ*** — Sanskrit *kṣama* + **-ikkuka** (verb) + **-aṇaṁ** (necessitative)
- Tamil மன்னிக்கவும் *maṉṉi**kkavum*** — its **own** native root *maṉṉi*, not Sanskrit at all

Why it's said this way

క్షమించండి is a real, everyday "sorry / please forgive me" — not stiffly formal — though in quick, casual exchanges Telugu speakers just as often reach for the borrowed English **"sorry."**

Your turn

Say these aloud:

- "kṣamā" — the Sanskrit noun, forgiveness
- the verb — "kṣamiñcu," to forgive — then "kṣamiñcaṇḍi," please forgive
- the ending you already know — "-aṇḍi," same as kūrcōṇḍi

Before you move on

What is క్షమించండి built from? (**Sanskrit kṣamā** + the verb-making suffix **-iñcu** + the respectful ending **-aṇḍi**, which you already met on *kūrcōṇḍi*.) Which cousins also verb-ify *kṣamā*, and which doesn't? (**Kannada and Malayalam** do too; **Tamil** uses its own root *maṉṉi*.) What's the casual alternative? (**Borrowed English "sorry."**)

9.2 ఇటుక (iṭuka) — a brick

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ఇటుక

ఇటుక — *iṭuka* — "a brick".

Say it: *iṭuka*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ఇ, and writes it on its own.

The word, taken apart — its roots and family

ఇటుక (*iṭuka*) is usually traced to Sanskrit *iṣṭakā*, "brick", reshaped to Telugu sounds: a tadbhava. CDIAL 1600 lists the Sanskrit word with Prakrit *iṭṭagā*, which has already lost the *ṣ*; it does not list the Telugu.

Your turn

Say these aloud:

- *iṭuka*
- *iṭuka*, and what it means

Before you move on

What is "a brick"? (**ఇటుక**, *iṭuka*.)

9.3 ఇ — one character, met inside words you already say

Before the new one: చ — what does it do? And one from further back: ం?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ఇ

ఇ — *i*.

It is an **independent vowel** — a vowel that is a letter in its own right, not a mark hung on a consonant.

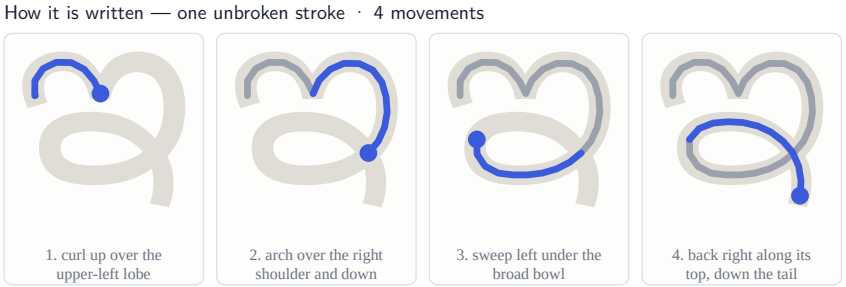
This is the pair that makes Telugu writing click. You already read ి, the *i* sign: it rides on a consonant and needs one to exist. ఇ is the same vowel with nothing in front of it, and that is exactly when Telugu reaches for it — at the front of a word, or on a piece of a word quoted on its own.

Every vowel in this script has both forms. Meeting the pair once is worth more than meeting either alone, because from here on you can predict the rule: **sign after a consonant, letter when the vowel starts.**

You met it on the page before this one, on a suffix quoted by itself:

- **-ఇంచు** *-incu* — the ending that turns a borrowed noun into a Telugu verb

Writing: ఇ — follow the numbered strip



How ఇ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఇ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two, and say which one carries the letter ఇ and which carries the sign ి

  -ఇంచు · ఏమిటి

- *Trace it:* ఇ three times, saying *i* as you finish each one
- *Look:* back at any page of this chapter and find ఇ once more

Before you move on

Which character is this — ఇ? When does Telugu write the letter ఇ rather than the sign ి? (**When the vowel has no consonant in front of it.**)
One more, from much earlier: ౬ — what amount does it stand for?

9.4 How are you, again — and the word that answers క్షమించండి

Someone has said క్షమించండి to you. One word back — the one that tells them it does not matter. You have had it since the greetings.

You'll want to know: పరవాలేదు does three jobs at once

పరవాలేదు *paravālēdu* covers all of these in ordinary speech:

what English says	
it's okay	after an apology
no problem	after a request
you're welcome	after thanks

Look at its tail. **-లేదు** is the *lēdu* you already carry, the negative of existence, and *paravā* is the bother — so the word is **"there is no bother."** That is why one word answers an apology, a request and a thank-you alike.

Grammar Lens: the ending is already carrying the person

That question and its answer hide the same point:

- మీరు ఎలా ఉన్నారు? — **-ారు** already means *you, respectful*, so

ఎలా ఉన్నారు? is a whole question on its own.

- నేను బాగున్నాను — -ాను already means *I*, so నేను can drop too.

To someone close the ending moves with the pronoun: నువ్వు ఎలా ఉన్నావు?

Script: బ, the letter your answer starts with

బ

బాగా and బాగున్నాను both open on బ *ba* under the long-ā sign. Telugu keeps *b* apart from its *p* letter; Tamil writes one shape for both and lets the position decide.

Your turn: the whole small exchange

Say these aloud:

- ask a stranger how they are, then drop the pronoun and ask again
- answer that you are well
- apologise, then thank someone — and give the same one-word reply to both

Before you move on

What hides inside పరవాలేదు? (లేదు — "no bother.") Which three English replies does it cover? (**It's okay · no problem · you're welcome**.) Why can మీరు and నేను drop out? (**The ending already names the person.**) Which letter opens your answer? (బ.)

Chapter 10

Days of the Week

Modes: **voice** (2) **eyes** (1) **pen** (2) **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can name any day of the week in Telugu, including the Sunday that is counted rather than named for a planet.
>
> *Run Somavāram through Śanivāram, then name Sunday* **ఆదివారం***, "the first day" — positional like Arabic's numbered days, not planetary.*

10.1 సోమవారం to ఆదివారం — Telugu's week, with a twist on Sunday

Like Kannada, Telugu's week runs on Sanskrit deity-names — but its Sunday breaks the "planet" pattern entirely, in a way even Kannada's doesn't.

The word, taken apart — its roots and family

Telugu	deity/planet	day
సోమవారం (*Somavāram*)	**Moon** (Soma)	Monday
మంగళవారం (*Maṅgaḷavāram*)	**Mars** (Maṅgala)	Tuesday
బుధవారం (*Budhavāram*)	**Mercury** (Budha)	Wednesday
గురువారం (*Guruvāram*)	**Jupiter** (Guru/ Bṛhaspati)	Thursday
శుక్రవారం (*Śukravāram*)	**Venus** (Śukra)	Friday
శనివారం (*Śanivāram*)	**Saturn** (Śani)	Saturday
ఆదివారం (*Ādivāram*)	— not a planet at all	Sunday

Why it's said this way

Five days match the familiar planet-deity pattern — but ఆదివారం (*Ādivāram*) doesn't name the Sun at all. ఆది (*ādi*) is Sanskrit for "**the beginning, the first**." So Telugu's Sunday literally means "**the first day**" — a **positional** name, like Arabic's numbered weekdays, sitting right next to six planet-names that don't work that way. Even within one single week, a language can mix completely different naming strategies.

Your turn

Say these aloud:

- "Somavāram, Maṅgaḷavāram, Budhavāram, Guruvāram, Śukravāram, Śanivāram" — Monday through Saturday
- the odd one — "Ādivāram" — not a planet, "the first day"
- the parallel — like Arabic's numbered days, one Telugu day is positional too

Before you move on

What does **ఆదివారం** literally mean, and is it a planet-name? (**"The first day"** — **ādi** "beginning" — **not** a planet-name, unlike the other six.) What ending do the other six Telugu weekdays share? (**-వారం** *-vāram*, Sanskrit "day," each paired with a planet-deity.)

10.2 శ — the third s, and the last one

You have two s-shapes already: **స**, and the curled one you met beside it. Say which of the two puts your tongue further back.

Two of the day names from this chapter carry a third one.

Script you'll notice: శ

శ — *śa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ś*, it is **śa**.

- **శుక్రవారం** *śukravāram* — Friday
- **శనివారం** *śanivāram* — Saturday

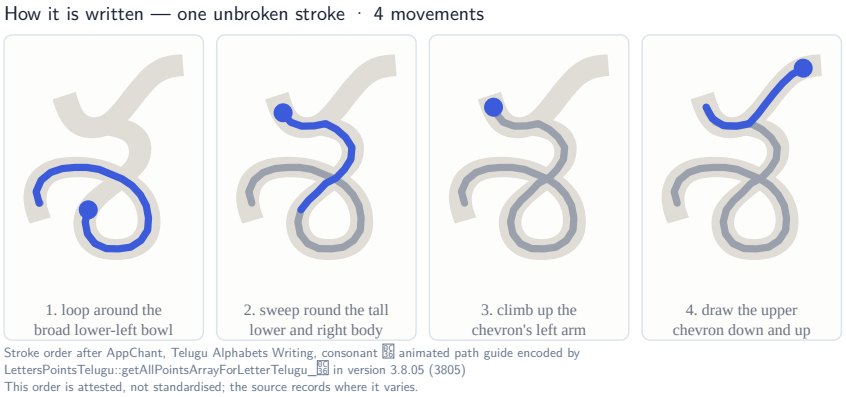
Both open on today's character. **The two ends of the week you have been reciting begin with a letter you could not yet read.**

Now you have the whole set:

letter	romanized	where the tongue goes
స	*sa*	tip behind the teeth
ష	*ṣa*	curled back along the roof
శ	*śa*	flat against the front of the roof

Telugu, Kannada and Hindi keep all three apart on the page. Tamil's own alphabet has none of them and adds borrowed shapes for Sanskrit words — same family, opposite decision.

Writing: శ — three calm movements



How శ *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 loops around the broad lower-left bowl. Without lifting, movement 2 sweeps around the tall lower and right body. Keep the pen down: movement 3 climbs a short way up the chevron's left arm, and movement 4 draws the chevron down and up. The strip gives that short climb a panel of its own, so the three movements are numbered as four.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, but nearly all native writers draw శ as one unbroken stroke, so keep the pen on the paper until the chevron is finished. Then write స and ష beside it.

Your turn

- *Look:* at the two day names below and find శ at the front of each

  శుక్రవారం · శనివారం

- *Trace it:* శ three times, saying *śa* as you finish each one
- *Look:* at సంతోషం and say which two of the three s letters are in it

Before you move on

Which character is this — శ? What sound does it carry? (***śa***.)
Which two days of the week begin with it? (శుక్రవారం and శనివారం.)

How many separate s letters does Telugu print? (**Three** — స, ష, శ.)

10.3 ల — one character, met inside words you already say

Before the new one: ఇ — what does it do? And one from further back: య?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ల

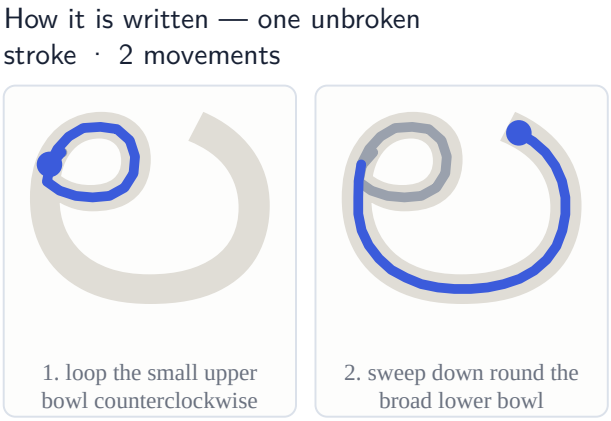
ల — *la*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *l*, it is **la**.

You already say these, and every one of them has ల somewhere inside it:

- ధన్యవాదములు *dhanyavādamulu* — thank you (dhanyavādamulu — "utterances of 'worthy'")
- లేదు *lēdu* — no / there isn't (lēdu)
- పరవాలేదు *paravālēdu* — it's okay / no problem / you're welcome
- రేపు కలుద్దాం *rēpu kaluddām* — see you tomorrow

Writing: ల — two calm movements



How ల *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 loops counterclockwise around the small upper bowl. Without lifting, movement 2 sweeps on down the left side and around the broad lower bowl.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, but almost every native writer draws ల as one unbroken stroke, so let the small bowl flow straight into the large one.

Your turn

- *Look:* at these words, and find ల in the ones that have it

  ధన్యవాదములు · లేదు · నమస్కారం

- *Trace it:* ల three times, saying *la* as you finish each one
- *Look:* back at any page of this chapter and find ల once more

Before you move on

Which character is this — **ల**? What sound does it carry? (***la***.)
Name one word you already say that contains it.
One more, from much earlier: **ప** — what does it do?

10.4 ఐదు అచ్చులు — five vowel letters, from cold

Close the lessons before this one. Say the word for yes and the number six, and name the character each of them opens on.

Script: the five, and the one question behind them

అ · ఆ · ఏ · ఐ · ఒ

Five letters, and **every one of them is on the page for the same reason**: a vowel turned up at the front of a word with no consonant to sit inside.

letter	sound	the word it opens
అ	*a*	**అవును** — yes
ఆ	*ā*	**ఆరు** — six
ఏ	*ē*	**ఏమిటి** — what?
ఐ	*ai*	**ఐదు** — five
ఒ	*o*	**ఒకటి** — one

Look down the right-hand column. **Three of the five open a number you can already count with, and the other two open two of the commonest words in the book.** None of these is an exotic letter kept for later; they were on your pages from chapter one, and only now do you have the shapes for them.

The question to ask of any vowel in Telugu is the same each time: *is a consonant carrying it?* If yes, a sign. If no, a letter.

Your turn

- *Look:* at these words and name the vowel letter each one begins with

  ఒకటి · ఆరు · అవును · ఏమిటి

- *Say it:* which two of the five are the short and long pair

- *Say it:* which one of the five is a vowel your mouth has to move through
- *Trace it:* each of the five once, saying its sound

Before you move on

Which of the five opens the number one? (ఒ.) Which opens the number five? (ఐ.) Which pair differs only in length? (అ and ఆ.) And what has to be true of a vowel before Telugu writes it as a letter? (**Nothing is carrying it** — no consonant in front.)

10.5 The three goodbyes again, now that you can name the day

From memory: the ordinary Telugu goodbye. Then say what it means word for word, which is not "goodbye" at all.

You'll want to know: none of the three says "goodbye"

You have three ways to leave, and every one of them promises a return:

what you say	**what it says**
వెళ్ళి వస్తాను *veḷḷi vastānu*	having gone, I come
రేపు కలుద్దాం *rēpu kaluddām*	tomorrow, let us meet
మళ్ళీ కలుద్దాం *maḷḷī kaluddām*	again, let us meet

Telugu has no comfortable word for a plain, final parting. The polite thing is to name the return, and the three above are three sizes of it — the next hour, the next day, some day.

Grammar Lens: the "having ...ed" link

వెళ్ళి is not a finished verb — it is *having gone*, waiting for a second verb to complete it. Telugu chains actions this way: every verb but the last takes the *having …ed* shape, and the last one carries the person and the time.
వెళ్ళి వస్తాను = *having gone* + *I come*. The **-తాను** at the end is the same "I" ending you met on మాట్లాడతాను.

Your turn: pick the right size of return

Say these aloud:

- leaving a shop you will pass again this week
- leaving a class that meets again tomorrow
- leaving someone you may not see for a year
- the plain verb for *to go*, then the *having gone* form

Before you move on

What do all three farewells have in common? (**Each one promises a return.**) What does **వెళ్ళి వస్తాను** say literally? (**Having gone, I come.**) Which part of it carries the "I"? (**The -తాను ending.**) And which of the three would you use with someone you see tomorrow? (**రేపు కలుద్దాం.**)

Chapter 11

Four Core Colours

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can name four basic colours in Telugu — black, white, red, and blue.
>
> *Say* నలుపు, తెలుపు, ఎరుపు *— Telugu's own three — then* నీలం, *blue, which Telugu borrowed rather than inherited.*

11.1 నలుపు, తెలుపు, ఎరుపు, నీలం — the pattern completes itself

By now the shape should feel familiar: native colors for black, white, and red — and one shared Sanskrit word for blue. Telugu confirms it a fourth time.

You'll want to know: Three native colors

- **నలుపు** (*nalupu*) = "**black**" — native Dravidian.
- **తెలుపు** (*telupu*) = "**white**" — native Dravidian.
- **ఎరుపు** (*erupu*) = "**red**" — native Dravidian.

The word, taken apart — its roots and family

నీలం (*nīlam*) = "**blue**" — the identical Sanskrit **నీల** (*nīla*) loan that also sits in Tamil (*nīlam*), Malayalam (*nīla*), Kannada (*nīli*), and Hindi (*nīlā*). Four Dravidian languages plus Hindi, all independently

keeping their own native black/white/red, and all reaching for the **exact same** borrowed word the moment it comes to blue.

Your turn

Say these aloud:

- "nalupu, telupu, erupu" — black, white, red
- "nīlam" — blue, the word the four Dravidian languages and Hindi all share
- the whole pattern, one more time — native, native, native, **borrowed**

Before you move on

What's the pattern across Tamil, Malayalam, Kannada, and Telugu's basic colors? (**Black, white, and red are native Dravidian words in every one of them; blue is a shared Sanskrit loan (nīla) in every one of them.**)

11.2 ే — one character, met inside words you already say

Before the new one: ల — what does it do? And one from further back: ా?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ే

ే — *e*.

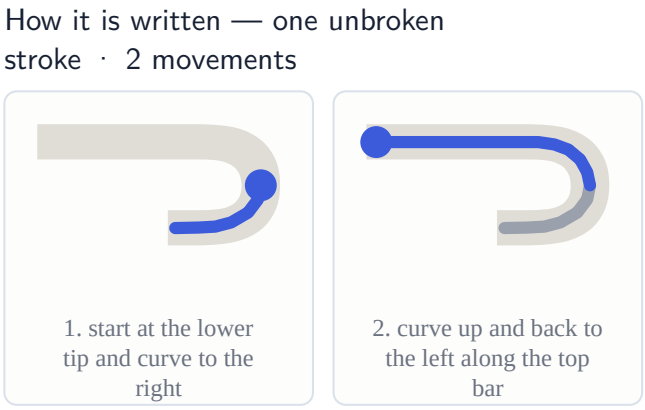
It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *e*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ే somewhere inside it:

- వెళ్ళు *veḷḷu* — to go (and వచ్చు, to come)

- వెళ్ళి వస్తాను *veḷḷi vastānu* — goodbye (lit. “I’ll go and come back”)
- నాకు తెలుగు వచ్చు *nāku telugu vaccu* — ’I know Telugu’
- ఒకటి రెండు మూడు నాలుగు ఐదు *okaṭi reṇḍu mūḍu nālugu aidu* — one to five

Writing: ె — follow the numbered strip



Stroke order after HP Labs India, Lipi Toolkit, Lipi Indic Character Recognizers 4.0, Telugu recognizer, class 57 (ె e sign): stored online-handwriting prototypes from native writers (MIT licence, 2012)
This order is attested, not standardised; the source records where it varies.

How ె is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ె yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ె in the ones that have it

వెళ్ళు · నమస్కారం

- *Trace it:* ే three times, saying *e* as you finish each one
- *Look:* back at any page of this chapter and find ే once more

Before you move on

Which character is this — ే? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *e* on; takes the built-in *a* off.**) Name one word you already say that contains it.
One more, from much earlier: ౭ — what amount does it stand for?

Chapter 12

Family

Modes: **voice** (1) **eyes** (1) **pen** (1) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can name my parents and my brothers and sisters in Telugu, choosing the right word for older or younger.
>
> *Name* నాన్న *and* అమ్మ*, then the four age-graded siblings* అన్న · తమ్ముడు · అక్క · చెల్లి*, with* చెల్లి *being Telugu's own.*

12.1 నాన్న, అమ్మ, and four sibling words — Telugu's own twist

Telugu also sorts siblings by relative age. Its words for "father" and "younger sister," though, go their own way.

You'll want to know: Parents — one matches, one is Telugu's own

- నాన్న (*nānna*) = "**father**" — **Telugu's own word**, unlike Tamil/Kannada's *appā/appa*.
- అమ్మ (*amma*) = "**mother**" — matches Tamil/Kannada's *ammā/amma* closely.

The word, taken apart — its roots and family

Telugu	meaning	compare Tamil/ Kannada
అన్న (*anna*)	**older** brother	*aṇṇaṉ/aṇṇa* — near match
తమ్ముడు (*tammuḍu*)	**younger** brother	*tambi/tamma* — near match
అక్క (*akka*)	**older** sister	*akkā/akka* — near match
చెల్లి (*celli*)	**younger** sister	*tangai/tangi* — **Telugu's own word here**

So the *system* — four words, split by relative age rather than just gender — is shared across Tamil, Kannada, and Telugu. But the exact words aren't identical everywhere: Telugu keeps its own నాన్న for father and చెల్లి for "younger sister," even while three of the six words line up closely with its cousins. All four sibling words are native Dravidian: *anna*, *tammuḍu* and *akka* share entries with their cousins (DEDR 131, 3085, 23), and DEDR 2783 files *celli* with *celi*, "female companion".

Your turn

Say these aloud:

- "nānna, amma" — father, mother
- "anna, tammuḍu" — older/younger brother
- "akka, celli" — older/younger sister — celli is Telugu's own

Before you move on

Which two Telugu family words are its own, rather than matching Tamil/Kannada? (నాన్న *nānna*, "father," and చెల్లి *celli*, "younger sister.") Does Telugu still split siblings by age the same way? (**Yes** — the four-way age-before-gender system is shared across the whole Dravidian family, even where the exact words differ.)

12.2 ద — one character, met inside words you already say

Before the new one: ై — what does it do? And one from further back: చ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ద

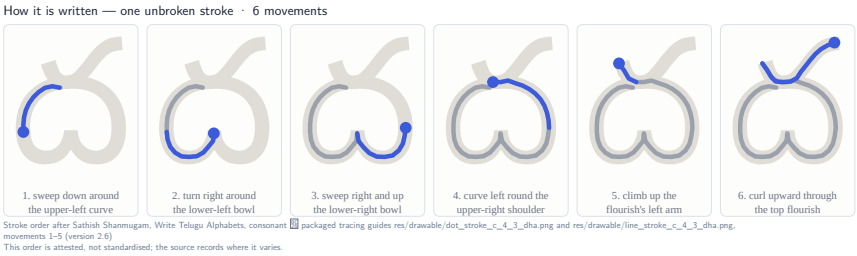
ద — *da*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *d*, it is **da**.

You already say these, and every one of them has ద somewhere inside it:

- ధన్యవాదములు *dhanyavādamulu* — thank you (dhanyavādamulu — "utterances of 'worthy'")
- లేదు *lēdu* — no / there isn't (lēdu)
- పరవాలేదు *paravālēdu* — it's okay / no problem / you're welcome
- రేపు కలుద్దాం *rēpu kaluddām* — see you tomorrow

Writing: ద — five deliberate movements



How ద *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movements 1–4 build the round body in four short curves: upper left, lower left, lower right, then upper right. The pen stays down from one curve to the next.

Movement 5 climbs a short way back up the flourish's left arm, and movement 6 curls up through the top flourish. The strip gives that short climb a panel of its own, so the five movements are numbered as six.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, but most native writers draw **ద** as one unbroken stroke, so keep the pen on the paper from the first curve to the end of the flourish.

Your turn

- *Look:* at these words, and find **ద** in the ones that have it

  ధన్యవాదములు · లేదు · నమస్కారం

- *Trace it:* **ద** three times, saying *da* as you finish each one
- *Look:* back at any page of this chapter and find **ద** once more

Before you move on

Which character is this — **ద**? What sound does it carry? (***da***.)
Name one word you already say that contains it.
One more, from much earlier: **త** — what does it do?

12.3 The first three verbs again — one engine, and its negative

The first three plain verbs, in any order: *to speak*, *to stay*, *to work*. Say them before reading on.

You'll want to know: the three verbs, side by side

plain verb	the "I" form
మాట్లాడు *māṭlāḍu* — speak	మాట్లాడతాను *māṭlāḍatānu*
ఉండు *uṇḍu* — be, stay, live	ఉంటాను *uṇṭānu*
పని చేయు *pani cēyu* — work	పని చేస్తాను *pani cēstānu*

Read the right-hand column downwards and listen to the last three sounds of each. **-ాను** every time. Three different verbs, one ending, and it is the ending that means *I*.

Grammar Lens: stem, then time, then person

Every Telugu verb you meet from here is built in that order: the **stem** says what happens, the next piece says **when**, the last piece says **who**. It is the same gluing-on you met on the end of ధన్యవాదములు, applied to actions rather than nouns.
Because the *who* sits at the end, నేను is optional — and because the *when* sits in the middle, changing the time never disturbs the person.

What you've built — ఉండు and its negative

ఉండు is the verb of *being there*, and Telugu keeps a dedicated word for its denial: లేదు, *there is not*. Learn the two as a pair rather than as a verb and a stray word.
That pairing is what makes పరవాలేదు readable rather than memorised: *paravā* is the bother, **-లేదు** says there is none. A word you took whole when you learned to answer *how are you* turns out to be a sentence built on this verb.

Your turn

Say these aloud:

- I speak Telugu — then drop the pronoun and say it again
- where you live, using the *stay* verb
- that you work
- someone apologises for being late — give the one-word reply

Before you move on

What ending do all three "I" forms share? (**-ాను**.) In what order does a Telugu verb stack its pieces? (**Stem, then time, then person**.) Which word denies ఉండు? (లేదు.) And what is పరవాలేదు made of? (*Paravā*, the bother, plus **-లేదు** — there is none.)

Chapter 13

Head and Hand

Modes: 🚗 **voice** (1) ↙ **pen** (1) 🚗 **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can name the head and the hand in Telugu.
>
> *Say* **తల***, plainly matching its cousins, and* **చెయ్యి** *— the same Dravidian root as kai, reshaped by sound change past easy recognition.*

13.1 తల, చెయ్యి — head and hand

> Head matches its cousins plainly. Hand looks, at first glance, like Telugu went its own way — but look closer, and it's the same word after all, just heavily reshaped.

You'll want to know: The words

- **తల** (*tala*) = "**head**" — native Dravidian, matching Tamil *talai*, Malayalam *thala*, and Kannada *tale* closely and plainly.
- **చెయ్యి** (*ceyyi*) = "**hand**" — also native Dravidian, and **the very same root** as Tamil/Malayalam/Kannada's *kai*: Proto-Dravidian ***kay-***. Telugu's own regular sound change turned that ancient **k-** into **c-**, and reshaped the rest of the word alongside it — so *ceyyi* only *looks* unrelated to *kai*. It's a cognate in disguise, not a different word.

So all four Dravidian languages actually **agree** on both "head" and "hand" at the root level — Telugu's hand-word has simply drifted further in sound than its cousins have, thanks to a sound change that reshaped many Telugu words the same way.

Your turn

Say these aloud:

- "tala" — head, matching its cousins plainly
- "ceyyi" — hand, the SAME root as kai, reshaped by sound change
- the lesson — looks different, is actually the same word

Before you move on

Does Telugu's word for "head" match its cousins? (**Yes** — *tala*, like Tamil/Malayalam/Kannada.) Is its word for "hand," *ceyyi*, truly a different word from *kai*? (**No** — it's the **same Proto-Dravidian root** *kay-*, reshaped by Telugu's own regular k→c sound change — a cognate in disguise, not an unrelated word.)

13.2 వ — one character, met inside words you already say

Before the new one: ద — what does it do? And one from further back: ఇ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: వ

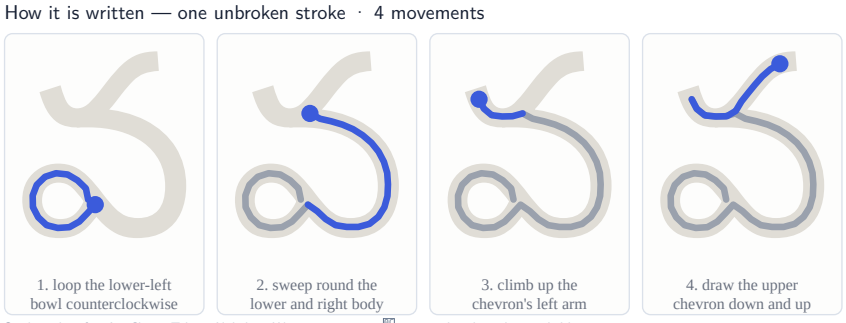
వ — *va*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *v*, it is **va**.

You already say these, and every one of them has వ somewhere inside it:

- ధన్యవాదములు *dhanyavādamulu* — thank you (dhanyavādamulu — "utterances of 'worthy'")
- అవును *avunu* — yes (avunu)
- నువ్వు / మీరు *nuvvu / mīru* — you (familiar / respectful)
- పరవాలేదు *paravālēdu* — it's okay / no problem / you're welcome

Writing: వ — three calm movements



How వ *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 loops counterclockwise around the small lower-left bowl. Without lifting, movement 2 sweeps around the broad lower and right body. Keep the pen down: movement 3 climbs a short way up the chevron's left arm, and movement 4 draws the chevron down and up. The strip gives that short climb a panel of its own, so the three movements are numbered as four.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, but most native writers draw వ as one unbroken stroke, so keep the pen on the paper until the chevron is finished.

Your turn

  ధన్యవాదములు · అవును · నమస్కారం

- *Trace it:* వ three times, saying *va* as you finish each one
- *Look:* back at any page of this chapter and find వ once more

Chapter 14

Seasons

Modes: 🚗 **voice** (1) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can name the four seasons in Telugu, including the rains that anchor the year.
>
> *Say* వేసవి *(cousin of Kannada's bēsige),* వానాకాలం *and* శీతాకాలం *from native roots, then the doubly-Sanskrit* వసంత ఋతువు.

14.1 వసంత ఋతువు, వేసవి, వానాకాలం, శీతాకాలం — the pattern completes itself

Telugu closes out the Dravidian season words the same way Kannada did: native words for summer/rain/cold, and a spring-word borrowed twice over from Sanskrit.

You'll want to know: The words

Telugu	meaning	source
వసంత ఋతువు (*vasanta ṛtuvu*)	"spring"	both *vasanta* and ఋతువు *ṛtuvu* ("season") are Sanskrit, like Kannada's pair
వేసవి (*vēsavi*)	"summer"	native Dravidian — cousin of Kannada's *bēsige*
వానాకాలం (*vānākālam*)	"rainy season"	వాన *vāna* ("rain," native) + *kālam* ("time," itself Sanskrit-derived but long assimilated)
శీతాకాలం (*śītākālam*)	"winter/cold season"	*śīta* ("cold") leans Sanskrit-flavored here, unlike Tamil/ Kannada's fully native cold-words

Why it's said this way

Telugu's *vēsavi* and Kannada's *bēsige* are close enough in shape to be genuine cousins — the same native Dravidian summer-word wearing two languages' sound changes. And once again, it's వానాకాలం (*vānākālam*, the rains) that actually organizes Andhra/Telangana's agricultural year, not a clean four-way Western split — the same honest point its neighbours make.

Your turn

Say these aloud:

- "vēsavi" — summer, cousin of Kannada's bēsige
- "vānākālam" — the rains, the real central season
- "śītākālam" — the cold season
- the double Sanskrit loan — "vasanta ṛtuvu," like Kannada

Before you move on

What's the relationship between Telugu's *vēsavi* and Kannada's *bēsige*? (**Cousins** — the same native Dravidian summer-word.) Which Dravidian languages borrow BOTH halves of their spring-word from Sanskrit (the season-name AND the word for "season" itself)? (**Kannada and Telugu** — *vasanta ṛtu(vu)* — unlike Tamil/Malayalam's single *vasantham* loan plus the long-assimilated *kaalam*.)

Water and Rice

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can ask for water in Telugu and tell raw rice apart from cooked rice.
>
> *Say* నీళ్ళు *— matching Tamil and Kannada — then separate* బియ్యం*, Telugu's own word for raw rice, from* అన్నం*, the cooked rice on the plate.*

15.1 నీళ్ళు, బియ్యం, అన్నం — water and rice

Water closes out 3-against-1 against Malayalam. Rice, though, turns out to have its own twist here.

The word, taken apart — its roots and family

నీళ్ళు (*nīḷḷu*) = "**water**" — matching Tamil's *nīr* and Kannada's *nīru*. Malayalam's *veḷḷam* is the odd one out among all four Dravidian languages for water, not Telugu. *Nīḷḷu*, *nīr* and *nīru* are one native Dravidian word (DEDR 3690).

The word, taken apart — its roots and family

- బియ్యం (*biyyam*) = "**rice**" (raw grain) — **not** the shared *ari/arisi/akki* found in Malayalam, Tamil, and Kannada. DEDR lists it among its words taken from Indo-Aryan (DEDR App. 60), under Sanskrit *bīja*, "seed" (CDIAL 9250): seed became husked rice.

- అన్నం (*annam*) = "**cooked rice**" (the meal) — matching Kannada's *anna* closely, both from Sanskrit *anna*, "food, cooked rice" (CDIAL 395).

So the pattern flips between water and rice: for **water**, Telugu joins the majority (Tamil/Kannada) against Malayalam; for **raw rice**, Telugu is itself the odd one out against the other three.

Your turn

Say these aloud:

- "nīḷḷu" — water, matching Tamil/Kannada
- "biyyam" — raw rice, once Sanskrit "seed"
- "annam" — cooked rice, matching Kannada's anna

Before you move on

Which language is the odd one out for water, and which for raw rice? (**Malayalam** is the odd one out for water (*veḷḷam*); **Telugu** is the odd one out for raw rice (*biyyam*, unlike the shared *ari/arisi/akki* elsewhere).)

15.2 ◌ీ — one character, met inside words you already say

Before the new one: ర — what does it do? And one from further back: ◌ి?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ◌ీ

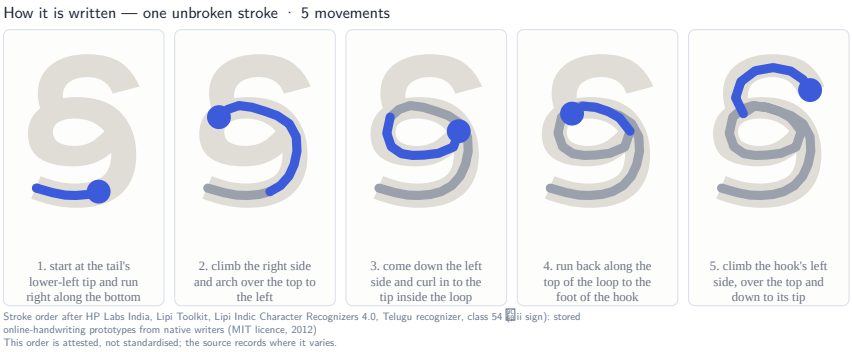
◌ీ — *ī*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ī*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ◌ీ somewhere inside it:

- నువ్వు / మీరు *nuvvu / mīru* — you (familiar / respectful)
- మీ పేరు ఏమిటి? — what's your name?
- మీరు ఎలా ఉన్నారు? — how are you? (respectful)
- మళ్ళీ కలుద్దాం *maḷḷī kaluddām* — we'll meet again

Writing: ీ — follow the numbered strip



How ీ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ీ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find ీ in the ones that have it

  నమస్కారం

- *Trace it:* ీ three times, saying *ī* as you finish each one
- *Look:* back at any page of this chapter and find ీ once more

Before you move on

Which character is this — ి? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ī* on; takes the built-in *a* off.**) Name one word you already say that contains it.
One more, from much earlier: మ — what does it do?

Chapter 16

The Traditional Months

Modes: **voice** (1) **pen** (2) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can name the twelve traditional Telugu months and say when Ugadi, the new year, falls.
>
> *Recite Caitraṁ through Phālguṇaṁ, place Ugadi at Chaitra Śuddha Pādyami, and note the family split: Telugu and Kannada share Hindi's calendar, Tamil and Malayalam do not.*

16.1 Caitraṁ to Phālguṇaṁ — completing the split

> The pattern across all four Dravidian languages is now complete: Telugu, like Kannada, shares its calendar with Hindi rather than building its own.

You'll want to know: The twelve months

The year runs in three four-month groups:

- *Caitraṁ, Vaiśākhaṁ, Jyēṣṭhaṁ, Āṣāḍhaṁ.*
- *Śrāvaṇaṁ, Bhādrapadaṁ, Āśvayujaṁ, Kārtīkaṁ.*
- *Mārgaśiraṁ, Puṣyaṁ, Māghaṁ, Phālguṇaṁ.*

Seven of them you can also see written today: **చైత్రం, శ్రావణం, భాద్రపదం, ఆశ్వయుజం, కార్తీకం, మార్గశిరం, పుష్యం**. Three shapes in them are new: **ణ** *ṇa*

in *Śrāvaṇaṁ*, ಭ *bha* in *Bhādrapadaṁ*, and ಜ *ja* in *Āśvayujaṁ*. The other five months each wait for a short lesson of their own, which spells the month beside its one rare shape.

The word, taken apart — its roots and family

This closes out a genuine, clean split across the four Dravidian languages: **Tamil** and **Malayalam** each built their **own** solar calendar (nakshatra-named and zodiac-named, respectively) — while **Kannada** and **Telugu** instead share the **same pan-Indian Sanskritic lunisolar calendar** as Hindi's Vikram Samvat. Telugu's New Year, **Ugadi**, falls on the very same day as Kannada's — *Chaitra Śuddha Pādyami*, the first day of Chaitra's bright fortnight. The month names themselves are Sanskrit: *Caitraṁ* is *caitra*, the month whose full moon stands in the asterism Citrā (CDIAL 4915), and the others are named the same way.

Your turn

Say these aloud:

- the twelve — "Caitraṁ, Vaiśākhaṁ, Jyēṣṭhaṁ, Āṣāḍhaṁ, Śrāvaṇaṁ, Bhādrapadaṁ, Āśvayujaṁ, Kārtīkaṁ, Mārgaśiraṁ, Puṣyaṁ, Māghaṁ, Phālguṇaṁ"
- "Ugadi — Chaitra Śuddha Pādyami"
- the whole family split — Tamil/Malayalam their own; Kannada/Telugu shared with Hindi

Before you move on

How does the four-language Dravidian calendar picture split? (**Tamil and Malayalam** each have their **own** solar calendar; **Kannada and Telugu** share the **same pan-Indian lunisolar calendar** as Hindi.) What is Telugu's New Year, and when does it fall? (**Ugadi**, on *Chaitra Śuddha Pādyami* — the same day as Kannada's Ugadi.)

16.2 ై — one character, met inside words you already say

Before the new one: ్ — what does it do? And one from further back: ద?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ై

ై — *ai*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it. Replaces, not adds — the *a* is gone.

This one is a **diphthong** — two vowels run together into one sound, *a* gliding into *i*. Say *ai* as in English *aisle* and you have it.

Look at what it is made of. You already read ి, the short *e* sign; ై is that mark with a second stroke added above it. The month names you just learned carry it twice.

You already say these, and both have ై inside them:

- చైత్రం *Caitraṁ* — the first of the twelve months
- వైశాఖం *Vaiśākhaṁ* — the second

Writing: ై — copy what you see

Put your pen on ై and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these three, and find the two that carry ై

చైత్రం · వైశాఖం · వెళ్ళు

- *Trace it:* ై three times, saying *ai* as you finish each one
- *Look:* back at any page of this chapter and find ై once more

Before you move on

Which character is this — ై? What vowel does it put on the consonant it attaches to? (***ai*, two vowels glided into one.**) One more, from much earlier: ౯ — what amount does it stand for?

16.3 ఖ — one character, met inside words you already say

Before the new one: ై — what does it do? And one from further back: వ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ఖ

ఖ — *kha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *kh*, it is **kha**.

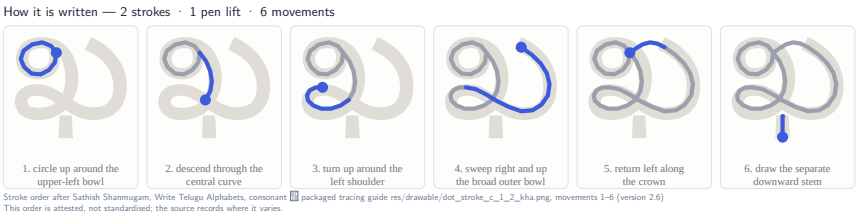
The very first character this book asked you to trace was క, *ka*. This is that letter with **a puff of breath after it**. The mouth does not move: the back of the tongue lands in the same place. What changes is that the breath is let out before the vowel starts.

Say *ka*, then say it again and push a small hiss of air out behind it. Telugu writes those as two different letters because it hears them as two different letters — and once you know this pair you can expect the others, because most of the consonants in this alphabet come with a breathed partner.

You already say this one, and the breathed letter is inside it:

- వైశాఖం *Vaiśākhaṁ* — the second of the twelve months

Writing: ఖ — follow the numbered strip



How ఖ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఖ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two, and say which one has ఖ and which has క

  వైశాఖం · నమస్కారం

- *Trace it:* ఖ three times, saying *kha* and letting the breath out as you finish each one

- *Look:* back at any page of this chapter and find ఖ once more

Before you move on

Which character is this — ఖ? What sound does it carry, and how is it different from క? (***kha*** — the same mouth, with a puff of breath let out after it.)
One more, from much earlier: ౦ — what amount does it stand for?

Chapter 17

Noon and Midnight

Modes: **voice** (1) **eyes** (2) **pen** (3) **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can say noon and midnight in Telugu and explain why one is "middle" and the other "half."
>
> *Say* మధ్యాహ్నం *and* అర్ధరాత్రి*, then separate madhya ("middle") from ardha ("half") — two different Sanskrit roots where Kannada uses one.*

17.1 మధ్యాహ్నం, అర్ధరాత్రి — the same noon word, a different midnight word

Telugu and Kannada share the exact same Sanskrit word for noon — but then quietly part ways on midnight.

The word, taken apart — its roots and family

మధ్యాహ్నం (*madhyāhnam*) = "**noon, midday**" — the same Sanskrit *tatsama* compound as Kannada's *madhyāhna*: మధ్య (*madhya*, "**middle**") + అహ్న (*ahna*, "**day**"), plus Telugu's own **-ం** (*anusvāra*) ending. Same root, same meaning, same everyday register in both languages.

The word, taken apart — its roots and family

అర్ధరాత్రి (*ardharātri*) = "**midnight**" — but here Telugu reaches for a **different** Sanskrit root: అర్ధ (*ardha*, "**half**"), not *madhya* ("middle").

Paired with రాత్రి (*rātri*, "**night**"), it literally means "**half-night**" — structurally the same shape as Hindi's colloquial *ādhī rāt* ("half night") and Latin's transparent *media nox* pattern, but built from Sanskrit's own dedicated "half" word rather than "middle."

Grammar Lens: Be honest: two different "middle-ish" ideas, side by side

Don't assume *madhya* and *ardha* are the same word wearing different clothes — they're genuinely **separate Sanskrit roots** ("middle" vs. "half") that happen to land on the same meaning here, the way English "midday" and "half the day gone" would both point at noon without sharing a root. Telugu's noon word keeps Kannada's "middle" logic; its midnight word switches to "half" logic instead.

Your turn

Say these aloud:

- "madhyāhnam" — noon, same root as Kannada
- "ardharātri" — midnight, literally "half-night"
- the contrast — "madhya" (middle) for noon, "ardha" (half) for midnight — two different Sanskrit roots

Before you move on

Does Telugu's noon word match Kannada's? (**Yes** — both *madhyāhna(m)*, from *madhya*, "middle.") Does Telugu's midnight word use the same root? (**No** — *ardharātri* uses **ardha**, "half," a different Sanskrit root.) What does *ardharātri* literally mean? ("**Half-night**" — the same shape as Hindi's *ādhī rāt*.)

17.2 ఘ — one character, met inside words you already say

Before the new one: ఖ — what does it do? And one from further back: గ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ఘ

ఘ — *gha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *gh*, it is **gha**.

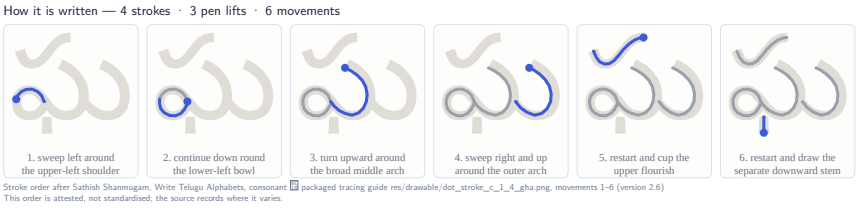
The same trick as last time, one row down. గ is *ga*; ఘ is *ga* with the breath let out behind it.

That is now two breathed pairs — క/ఖ and గ/ఘ — and they behave identically. When you meet a Telugu letter you do not know, it is worth asking first whether it is a letter you *do* know wearing extra breath.

You already say this one, and the breathed letter is inside it:

- మాఘం *Māghaṁ* — the eleventh of the twelve months

Writing: ఘ — follow the numbered strip



How ఘ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఘ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two, and say which one has ఘ and which has గ

  మాఘం · బాగా

- *Trace it:* ఘ three times, saying *gha* and letting the breath out as you finish each one

- *Look:* back at any page of this chapter and find ఘ once more

Before you move on

Which character is this — ఘ? What sound does it carry, and which plain letter is it built on? (***gha***, built on గ.)
One more, from much earlier: య — what does it do?

17.3 ఠ — the curled t, with the breath let out

Before the new one: ట — what sound does it carry, and where does your tongue go for it?

Today's character is that one with a puff of air after it.

Script you'll notice: ఠ

ఠ — *ṭha*.

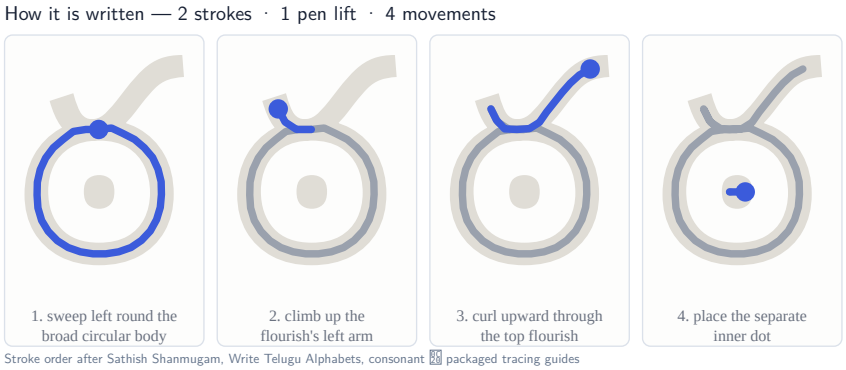
It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṭh*, it is **ṭha**.

- జ్యేష్ఠం *jyēṣṭham* — Jyeshtha, the third month of the year (jyēṣṭham — "the eldest")

ట and ఠ are the same tongue position with and without the breath, the pair this script marks and English does not. The romanization writes them *ṭ* and *ṭha*, which is a difference of two letters for a difference you can hear; on the page they are two separate shapes, and that is the more reliable signal.

This one is rare. It is worth a page because a month name needs it, and a reader who meets an unfamiliar shape in a familiar list has no way to tell whether the word or the printing is at fault.

Writing: ఠ — three deliberate movements



How ఠ is written, stroke by stroke

Follow the filmstrip slowly. Movement 1 sweeps around the broad circular body. Without lifting, movement 2 climbs a short way up the flourish's left arm, and movement 3 curls upward through the top flourish. Lift once, and finish by placing the inner dot as movement 4. The strip gives the short climb a panel of its own, so the three movements are numbered as four. Then write ట beside it and look at the two.

This is one attested school-style order. Telugu handwriting varies, so keep the body and flourish as one unbroken run, make the single lift before the dot, and let the round shape grow from them.

Your turn

- *Look:* at the month name below and find ఠ near its end

  జ్యేష్ఠం

- *Trace it:* ఠ once, following all four numbered movements on the strip
- *Copy:* ఠ twice without tracing, saying *ṭha* as you finish each one
- *Say it:* which of ట and ఠ has the breath after it

Before you move on

Which character is this — ఠ? What sound does it carry? (***ṭha***.) What is the only difference between it and ట? (The breath after it.)

17.4 ఆరు అక్షరాలు — six characters, from cold

Close the lessons before this one. Say the greeting and the thank-you word, and name the character each of them carries that you met most recently.

Script: the six, side by side

మ · ధ · ట · ◌ో · ◌ొ · ఠ

Four are letters and two are signs. **A letter can stand where a word begins; a sign has to hang on a letter**, and telling which is which is the first question to ask of an unfamiliar shape.

letters	signs
మ ధ ట ఠ	◌ో ◌ొ

Your turn

- *Look:* at these words and name every character in them you have been taught

  నమస్కారం · ధన్యవాదములు · ఏమిటి · తొమ్మిది

- *Say it:* which of the six is the one you have seen most often
- *Say it:* which two of the six cannot start a word
- *Trace it:* each of the four letters once, saying its sound

Before you move on

Which two of the six are signs rather than letters? (◌ో and ◌ొ) Which pair is one tongue position with and without the breath? (ట and ఠ.) Which of the two *o* signs is the long one? (◌ో)

17.5 ఫ — ప, with the breath let out

A page ago you met **ట** and **ఠ** — one tongue position, with and without a puff of air after it. Say both.

Now say **ప**. Today's character does to **ప** what **ఠ** did to **ట**.

Script you'll notice: ఫ

ఫ — *pha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ph*, it is **pha**.

- **ఫాల్గుణం** *phālguṇam* — Phalguna, the twelfth month of the year

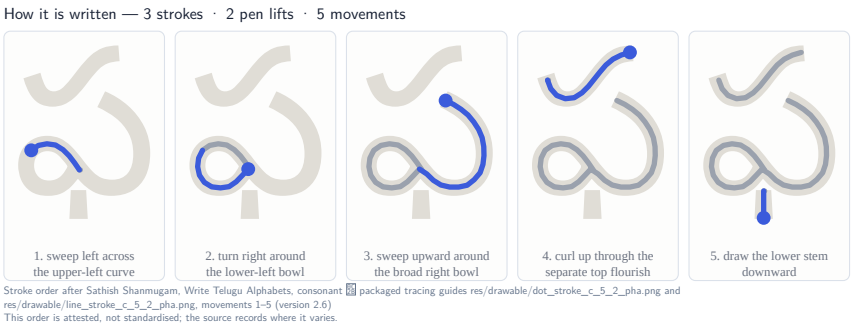
Hold a hand in front of your mouth. Say **ప**: the air stays put. Say **ఫ**: the air comes out. That puff is the whole difference, and Telugu gives it a shape of its own rather than leaving you to guess from the neighbours.

no breath	**breath**
ట	ఠ
ప	ఫ

Read the romanization carefully here: *ph* is one sound with air behind it, not the *f* that the same two English letters make in *phone*. Two letters on the romanized line, one character on the Telugu line, one puff in the mouth.

This character is rare on these pages. It earns a lesson because the last of the twelve months needs it, and an unfamiliar shape inside a list you already know by heart leaves a reader unable to tell whether the word or the printing is at fault.

Writing: ఫ — five calm movements



How ఫ *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 sweeps left across the upper part of the small bowl. Without lifting, movement 2 turns around its lower half, and movement 3 carries on round the broad bowl on the right. Lift for movement 4, the small rising flourish above, then lift once more and draw movement 5, the short straight stem below.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, so keep the five clear movements, with the body as one unbroken run and a lift before the flourish and before the stem.

Your turn

- *Look:* at the month name below and find ఫ at its front

  ఫాల్గుణం

- *Trace it:* ఫ three times, saying *pha* as you finish each one
- *Say it:* ప and ఫ one after the other with a hand in front of your mouth

Before you move on

Which character is this — ఫ? What sound does it carry? (***pha***.) Which month begins with it? (ఫాల్గుణం.) Name the other pair in this book that differs only by the breath. (ట and ఠ.)

17.6 నాలుగు అక్షరాలు — four characters, from cold

> Close the lessons before this one. Say how you are, and say the two days at the end of the week. Name the character each of those answers starts on.

Script: the four, and what each one stands next to

బ · ష · శ · ఫ

Not one of these four arrived on its own. Each stands beside a character you had already been reading for chapters, and what it adds is a single change you can hear:

already yours	new	what changed
ప *pa*	బ *ba*	the voice switched on
ప *pa*	ఫ *pha*	a puff of air came after it
స *sa*	ష *ṣa*	the tongue curled back
స *sa*	శ *śa*	the tongue went flat against the front of the roof

Two of the four hang off ప and two off స. A reader who holds those two anchors in mind has four fewer shapes to memorise cold, because each of the four is one adjustment away from something already known.

Your turn

- *Look:* at these words and name every character in them you have been taught

  బాగా · సంతోషం · శనివారం · ఫాల్గుణం

- *Say it:* which of the four you have seen most often on these pages
- *Say it:* which two of the four are s-sounds
- *Trace it:* each of the four once, saying its sound

Before you move on

Which of the four differs from ప by a puff of air? (ఫ.) Which differs from ప by the voice alone? (బ.) Which of ష and శ has the tongue curled back? (ష.) And how many s letters does Telugu print in all, counting the one you had before these two? (**Three**.)

Chapter 18

Telling Time

Modes: **voice** (1) **eyes** (1) **pen** (2) **Hands-free start:** the first of 4 lessons.

> ***By the end of this chapter:*** I can tell someone the time on the hour in Telugu, in the singular and the plural.
>
> *Say* గంట *— hour, and also "bell" — then* ఒక గంట *for one o'clock and* రెండు గంటలు *for two, taking the plural -lu.*

18.1 గంట — matching Kannada and Hindi's "bell" word exactly

> Telugu completes a clean three-way match: Hindi, Kannada, and now Telugu all use the same Sanskrit "bell" word for "hour."

You'll want to know: గంట — bell AND hour, a third time

గంట (*ganṭa*) = "**hour**" — and, exactly like Hindi's *ghanṭā* and Kannada's *gaṇṭe*, it means "**bell, clapper**" just as commonly, from the same Sanskrit घण्टा (*ghaṇṭā*). Same word, same bell-strikes-the-hour logic, three languages in a row.

Why it's said this way

So on this concept, the split isn't "Hindi vs. all four Dravidian languages" — **Hindi, Kannada, and Telugu** all share the Sanskrit *ghaṇṭā* ("bell") root. **Tamil** most likely goes its own way with a native

Dravidian word instead (though even specialists don't call this fully settled). **Malayalam** is the genuinely surprising one: its cognate word, *mani*, is ALSO Sanskrit-derived per its own dictionaries — just from a **different** Sanskrit word, *maṇi* ("gem"), not *ghaṇṭā*. So three of these four languages likely trace their hour-word to Sanskrit, just not all to the *same* Sanskrit word — worth remembering that a Sanskrit/native split isn't fixed per language, and isn't always a clean binary either.

Grammar Lens: telling the time

ఒక గంట. — "One o'clock." (*oka ganṭa*, "one hour/bell")
రెండు గంటలు. — "Two o'clock." (*reṇḍu ganṭalu* — *ganṭa* takes its plural form, *ganṭalu*, once the count passes one)

Notice Telugu's *ganṭa* pluralizes to *ganṭalu* for "two o'clock" onward — a small grammatical wrinkle Kannada's *gaṇṭe* didn't show you.

Your turn

Say these aloud:

- "ganṭa" — hour, also "bell"
- "oka ganṭa" — one o'clock
- "reṇḍu ganṭalu" — two o'clock, plural *ganṭalu*

Before you move on

What Sanskrit word do **గంట**, Kannada's *gaṇṭe*, and Hindi's *ghaṇṭā* all share? (**घण्टा**, *ghaṇṭā*, "bell.") Which Dravidian language most likely does NOT use this Sanskrit word for "hour"? (**Tamil** — most likely a native Dravidian word instead.) Does Malayalam's cognate word skip Sanskrit entirely too? (**No** — it's Sanskrit-derived too, per its own dictionaries, just from a *different* Sanskrit word, *maṇi*, "gem.") What happens to *ganṭa* for "two o'clock"? (It **pluralizes** to *ganṭalu*.)

18.2 ళ — one character, met inside words you already say

Before the new one: ఘు — what does it do? And one from further back: ◌ృ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ళ

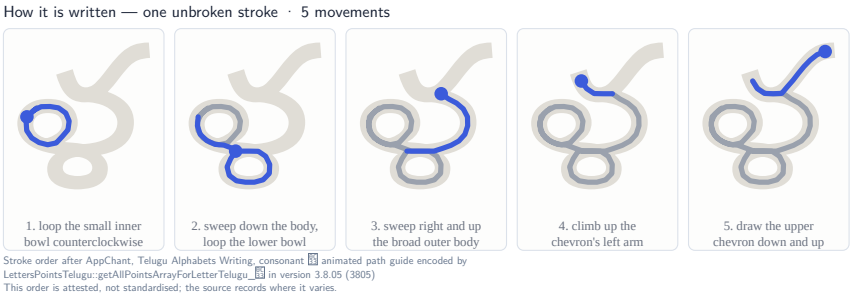
ళ — *ḷa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *l*, it is **ḷa**.

You already say these, and every one of them has ళ somewhere inside it:

- వెళ్ళు *veḷḷu* — to go (and వచ్చు, to come)
- వెళ్ళి వస్తాను *veḷḷi vastānu* — goodbye (lit. "I'll go and come back")
- మళ్ళీ కలుద్దాం *maḷḷī kaluddām* — we'll meet again
- సోమవారం మంగళవారం బుధవారం గురువారం శుక్రవారం శనివారం ఆదివారం — the seven weekdays

Writing: ళ — four calm movements



How ళ is written, stroke by stroke

Watch the guide once before your hand moves. ళ arrives in **four calm movements**, all in one unbroken stroke:

1. Loop counterclockwise around the small inner bowl.

2. Without lifting, sweep down around the broad left body and loop the lower bowl.
3. Without lifting, sweep right and up around the broad outer body.
4. Climb a short way up the chevron's left arm, then draw down and up through the chevron above.

The strip gives the short climb in movement 4 a panel of its own, so it numbers five panels for these four movements. Trace the filmstrip slowly, keeping the pen on the paper until the chevron is finished, then copy the whole shape once without rushing.

Your turn

- *Look:* at these words, and find ళ in the ones that have it

  వెళ్ళు · నమస్కారం

- *Trace it:* ళ three times, saying *ḷa* as you finish each one
- *Look:* back at any page of this chapter and find ళ once more

Before you move on

Which character is this — ళ? What sound does it carry? (***ḷa***.)
Name one word you already say that contains it.
One more, from much earlier: ా — what does it do?

18.3 ఢ — one character, met inside words you already say

Before the new one: ళ — what does it do? And one from further back: ై?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ఢ

ఢ — *ḍha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ḍh*, it is **ḍha**.

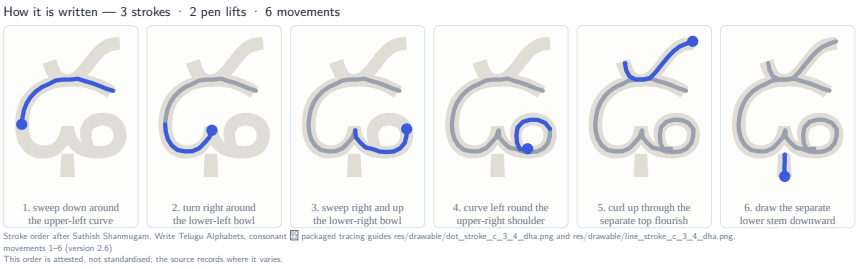
The third breathed pair, and this one asks for two things at once. డ is *ḍa*, the *d* made with the tongue curled back to the roof of the mouth. ఢ is that letter with the breath let out after it.

So the curl stays and the breath is added. The dot under the romanized *ḍ* marks the curl; the *h* beside it marks the breath. Both marks, both jobs.

You already say this one, and the breathed letter is inside it:

- ఆషాఢం *Āṣāḍhaṁ* — the fourth of the twelve months

Writing: ఢ — six deliberate movements



How ఢ is written, stroke by stroke

Follow the filmstrip slowly. Movement 1 sweeps down around the upper-left curve. Movement 2 turns right around the lower-left bowl. Without lifting, movement 3 sweeps right and upward around the lower-right bowl, and movement 4 curves left around the upper-right shoulder. Lift; movement 5 draws the separate top flourish. Lift once more; movement 6 finishes with the separate lower stem.

This is one attested school-style order. Telugu handwriting varies, so keep the six movements distinct, with the round body as one unbroken run, and let the round shape grow from them.

Your turn

- *Look:* at these two, and say which one has ఢ and which has డ

  ఆషాఢం · ఉండు

- *Trace it:* ఢ three times, saying *ḍha* with the tongue curled back as you finish each one
- *Look:* back at any page of this chapter and find ఢ once more

Before you move on

Which character is this — ఢ? What sound does it carry, and which plain letter is it built on? (***ḍha***, built on డ — the curled-back *d*, with breath added.)
One more, from much earlier: చ — what does it do?

18.4 శ · ఫ — two letters, one reason

> Without looking back: name the two days of the week that open on the same letter, and say which letter it is.

Script: both are here to keep a difference visible

శ · ఫ

These two arrived chapters apart and for the same reason. Each is the shape Telugu spends so that a difference you can hear is a difference you can see.

letter	what it splits off
శ *śa*	a third s, beside స and its curled neighbour
ఫ *pha*	ప with the breath let out after it

A script that skipped either one would still be readable — the reader would work the sound out from the word. Telugu declines to make the reader do that.

Your turn

- *Look:* at శుక్రవారం and శనివారం, and put a finger on the shared letter
- *Say it:* ప, then ఫ
- *Feel:* which one moves a hand held in front of your mouth
- *Trace it:* each of the two once, saying its sound

Before you move on

Which letter opens both Friday and Saturday? (శ.) What does ఫ do to ప? (**Lets the breath out after it.**) And what do the two letters have in common? (**Each exists so a heard difference is also a written one.**)

Chapter 19

Asking Someone's Age

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can ask someone how old they are in Telugu and give my own age in return.
>
> *Ask* నీ వయసెంత *? and answer* నా వయసు ఇరవై *— a complete verbless exchange about age.*

19.1 నీ వయసెంత? — matching Kannada's simple possessive exactly

Telugu matches Kannada closely here — same Sanskrit word, same verbless grammar, just fused together by ordinary Telugu vowel sandhi.

The word, taken apart — its roots and family

వయస్సు (*vayasu*) = "**age**" — the exact same Sanskrit वयस् (*vayas*, "age, vigor, strength," PIE cousin of Latin **vīs**) that Kannada also carries.

Grammar Lens: fused by sandhi, still verbless

నీ వయసెంత? — "How old are you?" — literally "**your age how-much**?" (*nī vayas-enta?* — from *nī vayasu* + *enta*, "how much," fused by regular vowel sandhi into *vayasenta.*)
నా వయస్సు పది. — "I am ten years old." — literally "**my age** [is] **ten**." (*nā vayasu padi.*)

Same shape as Kannada: a plain possessive ("your/my age") sitting next to the number, **no verb at all**. The only wrinkle is surface-level: everyday spoken Telugu often **fuses** *vayasu* + *enta* into one word, *vayasenta*, the same kind of vowel sandhi you'd see fusing any two Telugu words in fast speech — the underlying grammar is identical to Kannada's, just written closer together.

Your turn

Say these aloud:

- "vayasu" — age
- "nī vayasenta?" — how old are you?
- "nā vayasu padi" — I am ten, "my age [is] ten"

Before you move on

Is Telugu's వయస్సు the same Sanskrit word as Kannada's *vayassu*? (**Yes** — both from *vayas*, PIE cousin of Latin *vīs*.) What happens to *vayasu* + *enta* in "*nī vayasenta*?"? (They **fuse** by ordinary vowel sandhi.) Does Telugu use a verb to state age, like Kannada? (**No** — same verbless possessive shape.)

Chapter 20

Numbers 11–20 and Weather

Modes: 🚘 **voice** (2) 🚘 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can say what the weather is doing in Telugu and count past ten up to twenty.
>
> *Say* **వాతావరణం** *— a pure Sanskrit vāta + āvaraṇa, "the covering of air" — and report the weather with* **వర్షం పడుతోంది**, *"rain is falling."*

20.1 పదకొండు, ఇరవై — the same pattern, worn down one step further

You just watched Kannada's twenty split cleanly into "two" + "ten." Telugu most likely comes from the exact same pattern — but centuries of extra erosion have worn it past the point of being visible today.

The word, taken apart — its roots and family

Telugu's teens echo **పది** (*padi*, "**ten**") plus each digit — **పదకొండు** (*padakoṇḍu*, 11), **పన్నెండు** (*panneṇḍu*, 12), and onward through **పందొమ్మిది** (*paṅdommidi*, 19) — the same "digit + ten-echo" compounding Kannada builds.

The word, taken apart — its roots and family

ఇరవై (*iravai*, "**twenty**") most likely continues the **same** pan-Dravidian pattern as Kannada's *ippattu* — an old ***iru-**/***renḍu** ("two") root fused with an old "ten" root — but here's the honest difference:

centuries of sound change have worn *iravai* down far enough that it no longer visibly splits into "two" and "ten" on the surface, the way Kannada's *ippattu* still does today. Telugu's own word for "two," రెండు (*renḍu*), doesn't obviously show up inside *iravai* anymore — treat this as the most likely comparative-Dravidian account rather than a transparent, easily re-derivable compound.

Your turn

Say these aloud:

- "padakoṇḍu, panneṇḍu" — 11, 12
- "padi" — ten
- "iravai" — twenty, most likely the same "two-tens" idea as Kannada, just worn down further

Before you move on

How are Telugu's teens built? (పది (ten) + a digit, compounded.) Does ఇరవై visibly split into "two" + "ten" today, the way Kannada's *ippattu* does? (**No** — it most likely continues the same pan-Dravidian pattern, but erosion has worn away the visible split.) What's Telugu's word for "two"? (రెండు, *renḍu*.)

20.2 వాతావరణం — "the covering of air," pure Sanskrit this time

Kannada's weather word mixed a Persian loan with a Sanskrit one. Telugu's is different again — a single, unmixed Sanskrit compound.

The word, taken apart — its roots and family

వాతావరణం (*vātāvaraṇam*) = "**weather, atmosphere**" — built entirely from Sanskrit:

- వాత (*vāta*, "**wind, air**") — the same Sanskrit root behind వాయువు (*vāyuvu*, "wind," and the wind-god Vāyu).

- **ఆవరణ** (*āvaraṇa*, "**covering, layer, enclosure**").

So *vātāvaraṇam* literally means "**the covering of air**" — the layer of air surrounding everything, i.e., the atmosphere/weather. Unlike Kannada's *havāmāna* (Persian *hava* + Sanskrit *māna*), **both** pieces here are Sanskrit — no Perso-Arabic loan involved at all.

Grammar Lens: వర్షం పడుతోంది — "rain is falling"

వర్షం పడుతోంది. — "It's raining." — literally "**rain is falling**." (*varṣaṁ paḍutōndi.*) — **వర్షం** (*varṣaṁ*, "rain") is the same Sanskrit root, *varṣā*, you'll see again in the Dravidian arc.

Your turn

Say these aloud:

- "vātāvaraṇam" — weather, "the covering of air"
- "vāta" — wind/air, "āvaraṇa" — covering
- "varṣaṁ paḍutōndi" — it's raining, "rain is falling"

Before you move on

What are the two Sanskrit pieces of **వాతావరణం**, and what does the whole word literally mean? (**వాత**, "air," + **ఆవరణ**, "covering" — "**the covering of air**.") Is either piece a Persian/Arabic loan, like part of Kannada's word? (**No** — both pieces are Sanskrit.) What word does Telugu use for "rain"? (**వర్షం**, *varṣaṁ*.)

Chapter 21

Dog and Cat

Modes: 🚗 **voice** (1) ↙ **pen** (1) 🚗 **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can name a dog and a cat in Telugu.
>
> *Say* కుక్క*, which genuinely breaks from the family's shared naayi root, and* పిల్లి*, most likely the Dravidian source behind Hindi's billī.*

21.1 కుక్క, పిల్లి — the odd one out, and the word that most likely closes the loop

Kannada just gave you a rock-solid native dog-word. Telugu breaks from that pattern — but its cat-word may be the single most important word in this whole arc.

The word, taken apart — its roots and family

కుక్క (*kukka*, "**dog**") does **not** clearly continue the same నాయి-family root shared by Kannada, Malayalam, and Tamil. Its origin is honestly debated: some linguists propose it's **onomatopoeic**, imitating the sound of a bark; others propose a borrowing from **Sanskrit** कुक्कुर (*kukkura*, itself a similarly-shaped word for dog). Neither is settled — but either way, Telugu's everyday dog-word genuinely doesn't match its closest cousins.

The word, taken apart — its roots and family

పిల్లి (*pilli*, "**cat**") is a real, documented **Proto-Dravidian** root, ****pillV*** — with cognates surviving as **rarer, alternate** words for cat

in both Tamil and Kannada. Here's why this word matters for the **whole** arc: Sanskrit's word for cat, बिडाल (*biḍāla*) — the word behind Hindi's बिल्ली (*billī*), which you met as "most likely" borrowed from Dravidian, without a confirmed specific source — most likely traces back to **this exact root**. So Telugu's everyday word for "cat" is most likely the closest living relative of the very word Sanskrit borrowed, tying together Latin's *cattus*/Arabic's *qiṭṭ* story on one side and Hindi's *billī* story on the other, all in one word.

Your turn

Say these aloud:

- "kukka" — dog, genuinely different from its Dravidian cousins
- "pilli" — cat, most likely the source behind Hindi's billī

Before you move on

Does కుక్క continue the same root as Kannada's *nāyi*? (**No** — genuinely different, debated between onomatopoeia and a Sanskrit loan.) What is పిల్లి most likely the source of? (**Sanskrit's** बिडाल, *biḍāla* — and so Hindi's बिल्ली, *billī*.)

21.2 ఎ — one character, met inside words you already say

Before the new one: ఢ — what does it do? And one from further back: ఖ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ఎ

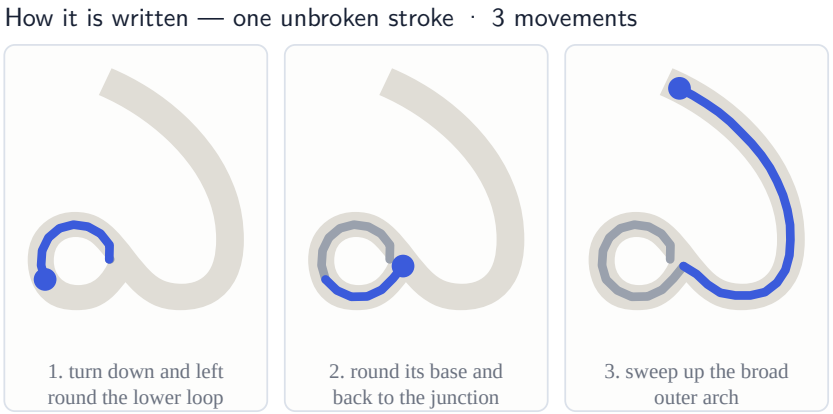
ఎ — *e*.

It is an **independent vowel** — the shape the vowel *e* takes when a word begins with it, rather than the sign it becomes inside a word.

You already say these, and every one of them has ఎ somewhere inside it:

- ఎలా — how
- మీరు ఎలా ఉన్నారు? — how are you? (respectful)
- ఆరు ఏడు ఎనిమిది తొమ్మిది పది — six to ten
- నలుపు తెలుపు ఎరుపు నీలం — black, white, red, blue

Writing: ఎ — follow the numbered strip



Stroke order after Sathish Shanmugam, Write Telugu Alphabets, independent vowel packaged tracing guide res/drawable/dot_stroke_v_9_e.png, movements 1–3 (version 2.6)
This order is attested, not standardised; the source records where it varies.

How ఎ *is written, stroke by stroke*

Use **one unbroken stroke**. Start at the central junction. Turn down and left around the compact lower loop, then continue around its base until you return to that junction. Without lifting, sweep on from the junction through the broad outer arch, climbing to the high left tip.

That is three numbered movements: **1–3 stay joined; the pen does not leave the paper**. The order follows Sathish Shanmugam's *Write Telugu Alphabets* tracing guide and is fitted here to the printed Noto Sans Telugu shape; the single unbroken stroke follows how most native writers draw ఎ. Telugu schools do vary in how they teach the hand, so learn this as one sourced order rather than the only possible way anyone writes ఎ.

Your turn

- *Look:* at these words, and find ఎ in the ones that have it

ఎలా · నమస్కారం

- *Trace it:* ఎ three times — lower loop, then on without lifting through the broad outer arch — saying *e* as you finish each one
- *Look:* back at any page of this chapter and find ఎ once more

Before you move on

Which character is this — ఎ? What sound does it carry? (*e.*) Name one word you already say that contains it.
One more, from much earlier: ఇ — what does it do?

Chapter 22

Green and Yellow

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can name green and yellow in Telugu, on top of the four colours I already had.
>
> *Say* పచ్చ *and* పసుపు *and show they are doublets of one Proto-Dravidian *pac- root — where Kannada's yellow broke away as a Sanskrit loan.*

22.1 పచ్చ, పసుపు — two colors, one Dravidian root

In Kannada, green stayed native but yellow got borrowed from Sanskrit. Telugu tells a tighter story: its green word and its yellow word turn out to be **doublets of the same root**, wearing two different faces.

The word, taken apart — its roots and family

పచ్చ (**pacca**, "**green**") comes from **Proto-Dravidian **pac-*** — the same root already behind Tamil's பச்சை (*paccai*) and Kannada's ಹಸಿರು (*hasiru*, via Old Kannada *pasir*). No surprise here; this is the same pan-Dravidian green family from the last lesson.

The word, taken apart — its roots and family

పసుపు (**pasupu**, "**yellow, turmeric**") is, remarkably, **also** a direct descendant of that **same** Proto-Dravidian ****pac-*** root — a true **doublet** of *pacca* itself, not a separate borrowing the way Kannada's

haḷadi was. Tamil even keeps a matching cognate, பசுப்பு (*pacuppu*), sitting alongside its own *paccai*. So where Kannada split green and yellow into two unrelated families (native Dravidian vs. a Sanskrit turmeric-loan), Telugu kept **both** colors inside the same native word-family — *pacca* and *pasupu* are, at root, doublets of the same word, one settling on "green" and the other on "yellow, turmeric-colored."

Your turn

Say these aloud:

- "పచ్చ" — green, from Proto-Dravidian *pac-*
- "పసుపు" — yellow/turmeric, a true doublet of pacca, same root
- the contrast with Kannada — Telugu kept both colors in one native family; Kannada's yellow broke away as a Sanskrit loan

Before you move on

Are పచ్చ and పసుపు two unrelated words, or doublets of the same root? (**Doublets** — both from Proto-Dravidian **pac-*.) Does Telugu's yellow word follow the same pattern as Kannada's *haḷadi* (a Sanskrit loan)? (**No** — Telugu kept its yellow word native, unlike Kannada.) What Tamil word is *pasupu*'s direct cognate? (பசுப்பு, *pacuppu*.)

Chapter 23

Day

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can say "day" in Telugu and choose between the everyday Persian loan and its formal Sanskrit alternate.
>
> *Say* రోజు*, a genuine Persian loan from rōz, and set it against the formal* దినము *— the mirror image of Kannada's plain dina.*

23.1 రోజు (rōju) — "day," a genuine Persian surprise

You might expect Telugu's word for "day" to be Sanskrit, like Kannada's *dina*, or native Dravidian. It's neither — it's Persian.

The word, taken apart — its roots and family

రోజు (**rōju**) — "**day**" — is Telugu's everyday, ordinary word for "a day." Here's the real surprise: it's **borrowed from Classical Persian** روز (*rōz*) — the same root, ultimately, as the Persian day names hiding in words like "Nowruz" ("new day"). Persian *rōz* itself traces to a Proto-Indo-European root, ****lewk-*** ("**bright**") — a **completely different** PIE root from the ****dyew-*** family behind Latin's *diēs*, Hindi's *din*, and Kannada's *dina*. Both roots independently mean something like "shining, bright" — but they are **not** cousins; this is convergent meaning, not shared ancestry.

Why it's said this way

Telugu also has దినము (**dinamu**) — the same Sanskrit **tatsama** word as Kannada's *dina*. But here's the honest twist: unlike Kannada, where *dina* is the plain, everyday word, Telugu's దినము is the more **formal, literary** alternate — *rōju* does the everyday work instead. Telugu's formal/everyday split runs the **opposite direction** from Kannada's.

Your turn

Say these aloud:

- "rōju" — "day," a genuine Persian loanword
- the honest surprise — from Persian rōz, PIE *lewk-, NOT the same root as diēs/din/dina*
- the reversed pattern — dinamu is Telugu's FORMAL word, unlike Kannada's plain dina

Before you move on

What language does Telugu's everyday రోజు (*rōju*) come from? (**Persian** — *rōz*.) Is Persian *rōz*'s PIE root the same as Latin *diēs*/ Hindi *din*/Kannada *dina*'s root? (**No** — a completely different PIE root, **lewk-*, "bright," vs. **dyew-* — related in meaning, not in ancestry.) Is Telugu's Sanskrit word, దినము (*dinamu*), the everyday word or the formal one? (**The formal one** — the opposite of Kannada, where *dina* is plain and everyday.)

23.2 ఐ — one character, met inside words you already say

Before the new one: ఎ — what does it do? And one from further back: ఘు?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ణ

ణ — *ṇa*.

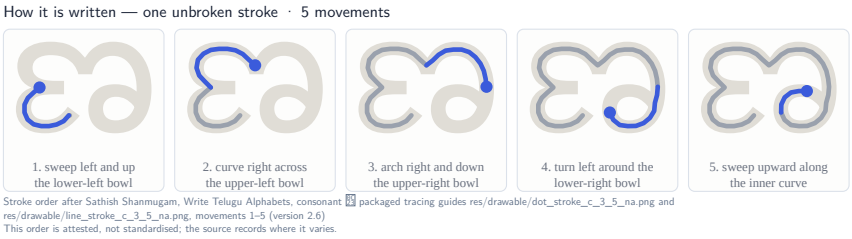
It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṇ*, it is **ṇa**.

There is a second *n* in this alphabet, and you met it long ago: **న**, the *na* of *nēnu* and *namaskāram*. For **న** the tongue touches the back of the teeth. For **ణ** it curls back and touches the roof of the mouth. Telugu hears the two as different letters and writes them as different letters — the same split you have already seen between **ల** and **ళ**, and between **ద** and **డ**. The dot under the romanized *ṇ* is how this book marks the curled-back one.

You already say these, and every one of them has **ణ** somewhere inside it:

- **వాతావరణం** *vātāvaraṇam* — weather
- **శ్రావణం** *Śrāvaṇaṁ* — the fifth of the twelve months
- **ఫాల్గుణం** *Phālguṇaṁ* — the twelfth

Writing: ణ — five deliberate movements



How **ణ** *is written, stroke by stroke*

Follow the filmstrip slowly. Movement 1 sweeps left and upward around the lower-left bowl. Movement 2 curves right across the upper-left bowl. Movement 3 arches right and downward over the upper-right bowl. Movement 4 turns left around the lower-right bowl. Movement 5 finishes along the inner curve.

This is one attested school-style order. Telugu handwriting varies, so keep the five movements distinct and let the paired round shapes grow from them.

Your turn

- *Look:* at these two, and say which one has ణ and which has న

  వాతావరణం · నమస్కారం

- *Trace it:* ణ three times, saying *ṇa* as you finish each one
- *Look:* back at any page of this chapter and find ణ once more

Before you move on

Which character is this — ణ? What sound does it carry, and where is the tongue for it? (***ṇa***, with the tongue curled back to the roof of the mouth — not న, which touches the teeth.) Name one word you already say that contains it.
One more, from much earlier: ల — what does it do?

Chapter 24

Night

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

By the end of this chapter: I can say "night" in Telugu and recognise it inside the midnight word I already knew.

Say రాత్రి*, find it again inside* అర్ధరాత్రి*, and note the three native words — rēyi, māpu, irulu — it pushed aside.*

24.1 రాత్రి (rātri) — "night," this time matching the expected pattern

Last lesson's *rōju* broke every expectation. This one is more straightforward — but still worth checking honestly, not assuming.

The word, taken apart — its roots and family

రాత్రి (**rātri**) — "**night**" — is a Sanskrit **tatsama** word, already hiding inside అర్ధరాత్రి (*ardharātri*, "midnight," Chapter 17). Unlike *rōju*'s Persian surprise, *rātri* really **is** Telugu's ordinary, everyday word for "night" — matching Kannada's own pattern this time, not breaking it.

The word, taken apart — its roots and family

Telugu **does** have native words here — but be honest: it's a **messier** picture than Kannada's clean two-word story, not a tidy mirror of it.

- రేయి (**rēyi**) — attested in older Telugu literature; most sources

treat it as inherited Dravidian, though some grammars instead link it to *rātri* itself, so its native status is less than fully settled.

- మాపు (**māpu**) — its **primary** sense is actually "**evening, dusk**" (as in రేపుమాపు, "morning and evening"), with "night" only a secondary, extended sense — not a clean synonym for *rātri*.
- ఇరులు (**irulu**) — a genuine cognate of Kannada's ಇರುಳು (*iruḷu*), but its primary modern sense is "**darkness**," archaic even in that use.

All three have been effectively pushed aside by the Sanskrit loan — but unlike Kannada's single native competitor, Telugu's "native" side is split across three words in three different, overlapping senses.

Your turn

Say these aloud:

- "rātri" — "night," already met inside ardharātri
- rēyi, māpu, irulu — three native words, three overlapping senses, all pushed aside
- the contrast with last lesson — day broke the pattern, night matches it

Before you move on

Where have you already met రాత్రి before this lesson? (అర్ధరాత్రి, *ardharātri*, "midnight.") Does *rātri* follow the same "Sanskrit-as-everyday" pattern as Kannada's *rātri*, or does it break the pattern the way *rōju* did for "day"? (**It matches** — *rātri* really is Telugu's everyday word.) Does Telugu's native-word story cleanly mirror Kannada's single-word *iruḷu*? (**No** — it's messier: three words, రేయి/మాపు/ఇరులు, in three overlapping senses, not one clean replacement.)

24.2 జ — one character, met inside words you already say

Before the new one: ణ — what does it do? And one from further back: ళ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: జ

జ — *ja*.

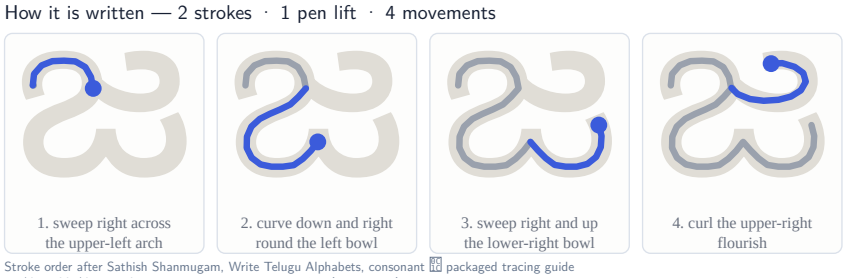
It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *j*, it is **ja**.

You already say these, and every one of them has జ somewhere inside it:

- రోజు *rōju* — day, the word that came in from Persian
- జ్యేష్ఠం *Jyēṣṭhaṁ* — the third of the twelve months
- ఆశ్వయుజం *Āśvayujaṁ* — the seventh

Rōju is worth a second look. Its first letter is the ర you traced inside *namaskāram*. Its last is జు — this new letter carrying the *u* sign you met early on. The vowel sign in the middle is one this book has not stopped on yet, so the word is not wholly yours on the page. Two of its three pieces are, and that is new today.

Writing: జ — follow the numbered strip



Stroke order after Sathish Shanmugam, Write Telugu Alphabets, consonant packaged tracing guide res/drawable/dot_stroke_c_2_3_ja.png, movements 1–4 (version 2.6)
This order is attested, not standardised; the source records where it varies.

How **జ** *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write **జ** yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these words, and find **జ** in the ones that have it

  రోజు · **నమస్కారం**

- *Trace it:* **జ** three times, saying *ja* as you finish each one
- *Look:* back at any page of this chapter and find **జ** once more

Before you move on

Which character is this — **జ**? What sound does it carry? (***ja***.)
Read **రోజు** aloud, letter by letter, and then as one word.
One more, from much earlier: ◌ే — what does it do?

Chapter 25

Good Night

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

By the end of this chapter: I can wish someone good night in Telugu.

Say **శుభ రాత్రి** *— "auspicious night" — pairing the* **రాత్రి** *already learned with śubha, while knowing many speakers code-switch to English here.*

25.1 శుభ రాత్రి (śubha rātri) — the standard translation, honestly checked against real speech

You have both pieces already: *rātri* from last lesson, and one more Sanskrit word. But this lesson's honest twist is about who actually says the result out loud.

The word, taken apart — its roots and family

శుభ రాత్రి (**śubha rātri**) — "**good night**" — literally "**auspicious night**." Both pieces are Sanskrit **tatsama**: **రాత్రి** (*rātri*, "night," already met) plus **శుభ** (*śubha*, "**auspicious**," from root **śubh**, "to be beautiful," ultimately PIE ****ḱewbʰ-***).

Why it's said this way

Here's a genuinely interesting wrinkle, hedged appropriately: some sources describe modern Telugu speakers, especially casually, often **code- switching to English** "**good night**" rather than saying **శుభ**

రాత్రి aloud — treating it more as the standard written/dictionary translation than an everyday spoken phrase. Be careful with this claim, though: the evidence for it comes mainly from informal language-learning blogs and forum posts, not rigorous sociolinguistic sources, and the same "code-switch to English for casual farewells" pattern plausibly shows up across other South Asian languages too — it isn't clearly something unique to Telugu, just something the available sources happened to mention for Telugu specifically. Either way, *śubha rātri* itself is perfectly correct and understood Telugu, whatever its actual spoken frequency turns out to be.

Your turn

Say these aloud:

- "śubha rātri" — "good night," literally "auspicious night"
- śubha's own root — śubh, "to be beautiful" → "auspicious"
- the honest twist — the standard translation, but many speakers code-switch to English instead

Before you move on

What does శుభ రాత్రి literally mean? ("**Auspicious night**.") Is *śubha rātri* actually the phrase most Telugu speakers say aloud for "good night"? (**Often not** — many code-switch to English "good night" in casual speech; *śubha rātri* is the standard written/ formal translation.) Does this mean *śubha rātri* is wrong or ungrammatical? (**No** — perfectly correct, just less commonly spoken than expected.)

25.2 భ — one character, met inside words you already say

Before the new one: ఐ — what does it do? And one from further back: ఢ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: భ

భ — *bha*.

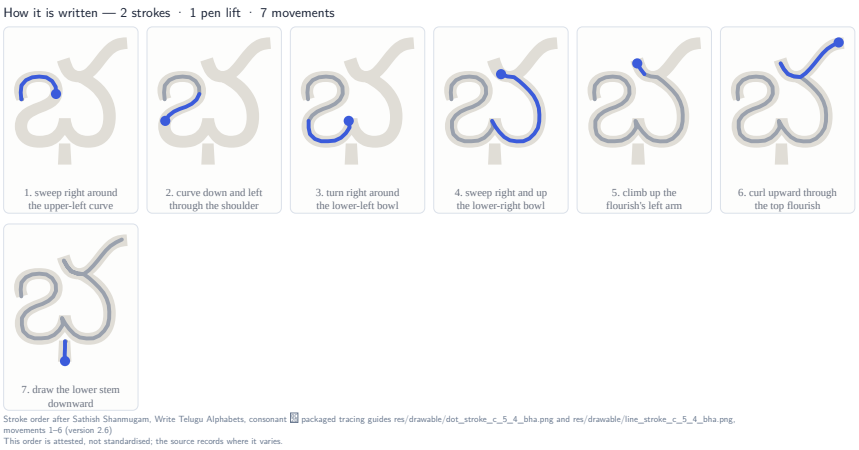
It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *bh*, it is **bha**.

Say **బ** (*ba*), then say it again and let a puff of breath out on top of it. That second thing is **భ**. By now the pattern should arrive before the letter does: you have met **క/ఖ**, **గ/ఘ** and **డ/ఢ**, and this is the fourth pair of the same kind. The *h* in the romanization *bha* is that puff, not a separate sound.

You already say these, and every one of them has **భ** somewhere inside it:

- **శుభ రాత్రి** *śubha rātri* — good night, from the chapter before this one
- **భాద్రపదం** *Bhādrapadaṁ* — the sixth of the twelve months
- **ప్రారంభించు** *prārambhiñcu* — to begin

Writing: భ — six calm movements



How **భ** *is written, stroke by stroke*

Watch the numbered filmstrip once before your pen moves. Movement 1 rises around the upper-left curve; movement 2 comes down and left through its inner shoulder. Movement 3 turns around the lower-left bowl. Movement 4 rises around the broad lower-right bowl. Keep the pen down: movement 5 climbs a short way up the flourish's left arm, and movement 6 curls up through the flourish above. Lift once, then draw movement 7, the short

straight stem below. The strip gives the short climb a panel of its own, so the six movements are numbered as seven.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, so keep the six clear movements instead of rushing their joins.

Your turn

- *Look:* at these words, and find భ in the ones that have it

  శుభ రాత్రి · నమస్కారం

- *Say it:* *ba*, then *bha*, and hear the breath arrive
- *Trace it:* భ three times, saying *bha* as you finish each one

Before you move on

Which character is this — భ? What does it carry that బ does not? (***bha*** — the same *b* with a puff of breath after it.) Name one word you already say that contains it.
One more, from much earlier: ద — what does it do?

Chapter 26

Morning

Modes: **voice** (1) **pen** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can say "morning" in Telugu with the same word that sits inside the morning greeting.
>
> *Say* **ఉదయం**, *Telugu's broadest morning word, note the real native competitors poddu and vēkuva, and see that Kannada splits this job across two unrelated words.*

26.1 ఉదయం (udayam) — the same Sanskrit root, a different job than in Kannada

Last lesson's **రోజు** was a genuine Persian surprise. This lesson's word for "morning" goes the other way — straight Sanskrit, doing double duty in a way its Kannada cousin doesn't.

The word, taken apart — its roots and family

ఉదయం (**udayam**) — "**morning**" — is a Sanskrit **tatsama**: from **ఉదయ** (*udaya*, "**rise, appearance**") plus Telugu's own **-ము** (*-mu*) nominal suffix. This is Telugu's most common, general everyday word for "morning" — but be honest: it doesn't have the field entirely to itself. **పొద్దు/పొద్దున** (*poddu/podduna*) is genuine **Proto-Dravidian** vocabulary — cognate with Tamil **pozhudu** and Kannada **hottu** — and does real everyday work too ("**పొద్దున్నే లేచాను**," "I woke up in the morning"). **వేకువ** (*vēkuva*, "dawn, early morning") is labeled **colloquial**, not archaic or purely poetic. **ఉదయం** is the broadest, most

general word — but not an uncontested one.

Why it's said this way

Here's the honest cross-language twist. Kannada also has this **exact** Sanskrit root, **ಉದಯ** (*udaya*) — but only inside its **greeting**, **ಶುಭೋದಯ** (*śubhōdaya*, "good morning"). Kannada's actual everyday **noun** for "morning" is a completely unrelated **native** word, **ಬೆಳಗ್ಗೆ** (*beḷagge*, "the shining"). Telugu doesn't split the job that way: **ఉదయం** covers both the everyday noun AND, inside the good-morning greeting, the greeting root — one word, doing what Kannada spreads across two unrelated ones. And unlike **రోజు** (last lesson's genuine Persian surprise for "day"), Telugu's morning word holds no such twist — straightforwardly Sanskrit, start to finish.

Your turn

Say these aloud:

- "udayam" — "morning," Sanskrit tatsama, the broadest word, though poddu/podduna and vēkuva are real native alternatives too
- the cross-language twist — Kannada's **ಉದಯ** root only shows up in ITS greeting; Telugu uses **ఉదయం** for both the noun and the greeting
- the contrast with **రోజు** — no Persian surprise here, just straightforward Sanskrit

Before you move on

Is **ఉదయం** the ONLY word Telugu speakers use for "morning"? (**No** — it's the broadest, most common one, but **పొద్దు**/**పొద్దున** and **వేకువ**, both genuinely native, do real everyday work too.) Does Kannada's everyday morning-noun share **ಉದಯಂ**'s root? (**No** — Kannada's **ಬೆಳಗ್ಗೆ** is native; the shared root, udaya, shows up only inside Kannada's GREETING, **ಶುಭೋದಯ**.) Does **ఉదయం** hold a surprise the way **రోజు** did? (**No** — straightforwardly Sanskrit throughout.)

26.2 ఋ — one character, met inside a word you already say

Before the new one: భ — what does it do? And one from further back: ఎ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ఋ

ఋ — *ṛ*.

It is an **independent vowel** — the shape a vowel takes when a word begins with it, rather than the sign it becomes inside a word. You have met that pairing twice already, at ఉ and at ఎ.

What makes this one worth a page of its own is what the vowel is. It is an *r* doing a vowel's work: a whole syllable with no other vowel in it, the way English lets *l* carry the second half of *bottle*. Telugu took the letter from Sanskrit along with the words that need it, and modern speakers give it the sound *ru*.

You already say this one, and it has ఋ at the front of its second word:

- వసంత ఋతువు *vasanta ṛtuvu* — the spring season

ఋ is one of the rarest letters in the alphabet: outside Sanskrit borrowings it has almost nowhere to appear. Meeting it once, on a word you can already say, is enough for now.

Writing: ఋ — follow the numbered strip

How ఋ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ఋ yourself — slowly, and larger than it is printed.

The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two, and say which one opens with ఋ

  ఋతువు · ఉదయం

- *Trace it:* ఋ three times, saying *ṛ* as you finish each one

- *Say it: vasanta ṛtuvu*, and name the letter its second word starts with

Before you move on

Which character is this — ఋ? What kind of thing is it — a consonant, a vowel sign, or an independent vowel? (**An independent vowel**, sounded *ru.*) Name the word you already say that contains it.
One more, from much earlier: వ — what does it do?

Chapter 27

Evening

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can say "evening" in Telugu.
>
> *Say* **సాయంత్రం**, *from sāyam plus a time-suffix, and follow its PIE *seh₁- root across to Latin sērus, French soir and Italian sera.*

27.1 సాయంత్రం (sāyantram) — a distant cousin of French "soir"

This lesson's word for "evening" reaches back to a PIE root that also surfaces — in a completely different language, on a completely different continent's language family.

The word, taken apart — its roots and family

సాయంత్రం (**sāyantram**) — "**evening**" — is a Sanskrit **tatsama**: from **సాయం** (*sāyam*, "**in the evening**") plus a Sanskrit **-tana** suffix that turns time-adverbs into adjectives — the same suffix pattern behind Sanskrit **divātana** ("of the day") and **sanātana** ("eternal, lasting").

The word, taken apart — its roots and family

Here's the striking part, checked directly against primary sources rather than assumed: **సాయం** itself traces to **Proto-Indo-European **seh₁-*** ("**long, lasting**") — and this is **explicitly** documented as "distantly related to **Latin sērus**" ("late"), itself confirmed independently to trace to the very same **seh₁-* root (via Proto-Italic

sēros*). *sērus* is worth a closer look: it's the Latin root well attested as the source of **French soir and **Italian sera** — French and Italian's own everyday "evening" words. That makes సాయంత్రం and **soir**/**sera** genuine distant cognates — one route through Sanskrit tatsama borrowing into Telugu, one route through centuries of Vulgar Latin erosion into French and Italian, both ultimately the same Proto-Indo-European idea of something "long, lasting" stretching into "late in the day."

Your turn

Say these aloud:

- "sāyantram" — "evening," sāyam + the -tana time-suffix
- the deep root — PIE *seh₁-, "long, lasting"*
- the cross-family cognate — the same root behind French soir and Italian sera, via Latin sērus

Before you move on

What is సాయంత్రం built from? (సాయం, "in the evening," + a Sanskrit "-tana" time-adjective suffix.) What PIE root does సాయం trace to? (****seh₁-***, "long, lasting.") What two Romance words are genuine distant cognates of సాయంత్రం, and through which Latin word? (**French soir and Italian sera** — both through Latin **sērus**, "late," which traces to the same **seh₁-* root.)

Chapter 28

Afternoon

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can use Telugu's noon word to talk about the afternoon, and reach for the classical term when I need to be precise.
>
> *Reuse* మధ్యాహ్నం *for the stretch between noon and evening, then contrast it with* అపరాహ్నం*, the more formal, more precise later-afternoon word.*

28.1 మధ్యాహ్నం — the same "noon" word, now also "afternoon"

You already know మధ్యాహ్నం means "noon" — precisely, "middle of the day." This lesson's honest twist: the word doesn't stay that precise in modern use.

Why it's said this way

మధ్యాహ్నం (**madhyāhnam**) is the exact word from Chapter 17, still literally "middle" + "day" — but a source fetched directly (not just a search summary) confirms it now covers "**the time between noon and evening**" in modern usage — a genuine widened sense, not just the precise midday instant its etymology points to. This mirrors Hindi's दोपहर (clearly, well- confirmed widened from "noon" to "afternoon") and, more thinly Kannada's own మధ్యాహ్న (a hedged, single-source impression of the same kind of stretch).

The word, taken apart — its roots and family

Telugu also has అపరాహ్నం (**aparāhnam**), a tatsama from the same classical **five-part Sanskrit day division** already found behind Kannada's ಅಪರಾಹ್ನ — *prāta/udaya* (sunrise), *saṅgava*, *madhyāhna* (noon), *aparāhna* ("later afternoon" specifically), *sāyāhna* (evening). Be honest about the sourcing here, echoing the same hedge already applied to Kannada's *aparāhna*: thin, informal evidence — a native-speaker forum discussion, general dictionary usage notes — points toward మధ్యాహ్నం **winning colloquially**, with అపరాహ్నం staying the more **formally precise** term. Real, but not corpus-linguistics-grade sourcing — treat it the same cautious way Kannada's own equivalent finding was treated, not as fully settled.

Your turn

Say these aloud:

- "madhyāhnam" — the same word from Chapter 17, "middle of the day"
- the confirmed widening — now also covers "the time between noon and evening"
- "aparāhnam" — the more precise classical word for later afternoon, staying the more formal term per thin but real evidence

Before you move on

Is మధ్యాహ్నం a new word, or the same one from Chapter 17? (**The same word** — "middle" + "day.") Does modern usage confirm మధ్యాహ్నం covers only the exact instant of noon? (**No** — a directly-fetched source confirms it now covers "the time between noon and evening" too.) Is it confirmed whether అపరాహ్నం or widened మధ్యాహ్నం is more common today? (**Thin but real evidence** points to మధ్యాహ్నం winning colloquially, అపరాహ్నం staying formally precise — not fully settled, but not silent either.)

Chapter 29

Good Morning

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can wish someone good morning in Telugu.
>
> *Say* **శుభోదయం** *— śubha +* **ఉదయం** *— and weigh the single low-authority claim that it is out of trend against* **నమస్కారం**, *the safer everyday bet.*

29.1 శుభోదయం (śubhōdayam) — a claim worth real skepticism, not a settled fact

You already have **ఉదయం**. This lesson's honest twist is about a dramatic-sounding claim — and about being skeptical of it, even though it came from a source fetched directly.

The word, taken apart — its roots and family

శుభోదయం (**śubhōdayam**) — "**good morning**" — is built from **శుభ** ("good") plus **ఉదయం** (already met, Chapter 26). Grammatically and etymologically, this is the straightforward, traditional Telugu "good morning."

Why it's said this way

Here's the twist, and the honesty this time cuts against the source itself: one directly-fetched page describes **శుభోదయం** as **out of trend**, displaced by **English** "good morning," with children taught the

English phrase from **preschool**. That's a vivid, quotable claim — but "fetched directly" doesn't make a source authoritative. This is the **same genre** of Telugu/Kannada/Hindi-learning content blog already found **overstated** for Hindi's सुप्रभात and Kannada's own **ಶುಭೋದಯ** (a single uncredentialed listicle, no sociolinguistic methodology, no citations) — treat this claim the same skeptical way, not as settled. Genuinely worth separating from that dramatic claim: **సుప్రభాతం** (*suprabhātam*) also exists — built on **ప్రభాత** (*prabhāta*), a **completely different** Sanskrit root from **ఉదయ** (*udaya*). This is **not** the same root behind Kannada's **ಶುಭೋದಯ**, which itself uses *udaya* — don't conflate the two Sanskrit "morning" roots. A third option, **ప్రొద్దుటి వందనాలు** ("morning greetings," built on **పొద్దు**, Chapter 26's genuine native competitor to **ఉదయం**), also exists but isn't confirmed common either. **నమస్కారం** is the safer bet for everyday use — matching the same **నమస్కార/नमस्ते** pattern already found doing the real everyday work for both Kannada and Hindi.

Your turn

Say these aloud:

- "śubhōdayam" — "good morning," śubha + udayam
- the honest twist — one low-authority source claims it's out of trend, displaced by English; treat with real skepticism
- **నమస్కారం** — the safer everyday-greeting bet

Before you move on

What is **ಶುಭೋದಯಂ** built from? (**ಶುಭ** + **ಉದಯಂ**.) Is the claim that **ಶುಭೋದಯಂ** has been displaced by English a confirmed, well-sourced fact? (**No** — it comes from one low-authority content-blog source, the same genre already found overstated for Hindi/Kannada; treat it skeptically, not as settled.) Does **సుప్రభాతం** share **ఉదయం**'s root, or Kannada's **ಶುಭೋದಯ**'s root? (**Neither** — its own root, **ప్రభాత**/ prabhāta, is a genuinely different Sanskrit word.)

Chapter 30

Good Evening

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can wish someone good evening in Telugu.
>
> *Say* **శుభ సాయంత్రం**, *backed by two independent sources as genuinely common in both formal and casual speech, with* **నమస్కారం** *as an alternative rather than a replacement.*

30.1 శుభ సాయంత్రం (śubha sāyantram) — a claim that actually holds up on checking

Last lesson's morning greeting rested on one dramatic, shaky source. This one is different — and the difference itself is worth noticing.

The word, taken apart — its roots and family

శుభ సాయంత్రం (**śubha sāyantram**) — "**good evening**" — pairs **శుభ** ("good") with **సాయంత్రం** (already met, Chapter 27 — the word whose PIE root, *seh₁-, turned out to be a genuine distant cognate of Latin's* sērus*, and so of French* ***soir*** *and Italian* ***sera****).*

Why it's said this way

Here's the honest contrast worth drawing explicitly: last lesson's **శుభోదయం** rested on **one** dramatic, low-authority source claiming it had been displaced by English entirely. This time, **two** independently

fetched sources — not just search-engine summaries — **agree**: **శుభ సాయంత్రం** is genuinely, commonly used, in **both** formal and informal contexts, appropriate for greeting people after work or arriving at an evening gathering. Neither source flags it as archaic or displaced. This doesn't mean these sources are beyond question — they're still the same general genre of language-learning content that has needed hedging before — but **being independently cross-corroborated** is a real, meaningful difference in evidence quality from a single dramatic claim, and it's worth being just as honest about a claim holding up as about one that doesn't. **నమస్కారం**, as before, remains a genuine time-independent alternative — but nothing here suggests it has **displaced** this greeting the way English reportedly displaced **శుభోదయం**.

Your turn

Say these aloud:

- "śubha sāyantram" — "good evening," śubha + sāyantram
- the honest contrast — this claim is cross-corroborated by two sources, unlike last lesson's single dramatic one
- **నమస్కారం** — a time-independent alternative, not a replacement here

Before you move on

What word does **శుభ సాయంత్రం** pair with, and what's that word's own striking cross-language story? (**సాయంత్రం** — a genuine distant PIE cognate of Latin sērus/French soir/Italian sera.) Is the "genuinely commonly used" claim for **శుభ సాయంత్రం** as thinly sourced as **శుభోదయం**'s "displaced by English" claim was? (**No** — two independent sources agree here, versus one dramatic claim last lesson — a real difference in evidence quality.)

Chapter 31

Good Afternoon

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can wish someone good afternoon in Telugu and judge whether it fits the setting I am in.
>
> *Say* **శుభ మధ్యాహ్నం** *where the setting is formal or workplace-timed, and fall back on* **నమస్కారం**, *the time-independent everyday greeting.*

31.1 శుభ మధ్యాహ్నం (śubha madhyāhnam) — good afternoon

> You already know **శుభ** from the morning and evening greetings and **మధ్యాహ్నం** from the parts-of-day lessons. Put them together.

You'll want to know: శుభ + మధ్యాహ్నం

శుభ మధ్యాహ్నం (**śubha madhyāhnam**) means "**good afternoon**." The second word originally centres on "midday" or "noon," but you learned in Chapter 28 that modern use widens it into the stretch between noon and evening.

Telugu could instead have built the phrase on **అపరాహ్నం** (*aparāhnam*), the more classically precise word for later afternoon. It did not. Kannada made the same choice in **ಶುಭ ಮಧ್ಯಾಹ್ನ** (*śubha madhyāhna*): both languages chose the everyday "noon, widened" word from two available classical terms.

The word, taken apart — its roots and family

శుభ (*śubha*) is Sanskrit *śubha*, "bright, auspicious, good" (CDIAL 12532), and **మధ్యాహ్నం** (*madhyāhnam*) is Sanskrit *madhyāhna*, "midday" (CDIAL 9818), with the Telugu noun ending *-m*: both are taken over whole.

Your turn

Say these aloud:

- "śubha madhyāhnam" — "good afternoon," śubha + madhyāhnam
- the word choice — built on **మధ్యాహ్నం**, not **అపరాహ్నం**, matching Kannada's exact same choice
- Kannada **ಶುಭ ಮಧ್ಯಾಹ್ನ** — the same word-building choice

Before you move on

Is **శుభ మధ్యాహ్నం** built on **మధ్యాహ్నం** or **అపరాహ్నం**? (**మధ్యాహ్నం** — the "noon, widened" word.) Which sister language made the same choice? (**Kannada**, in **ಶುಭ ಮಧ್ಯಾಹ್ನ**.)

31.2 శుభ మధ్యాహ్నం — register and evidence

You can now build **శుభ మధ్యాహ్నం**. The next question is when it sounds natural—and how strongly the available evidence answers that question.

Why it's said this way

Two independently fetched language-learning sources confirm that **శుభ మధ్యాహ్నం** is a real, correctly formed greeting for **formal or workplace** use around noon and early afternoon.
Keep the claims separate, though. Talkpal explicitly ranks the greeting as **less common** in everyday conversation than morning or evening greetings. Preply independently supports its timing and formal register, but does not make that frequency comparison. So there are two sources for "real and formal," but only one for "less common." A second source must not be counted as evidence for a claim it never

made.

Why it's said this way

- **శుభోదయం** — the morning lesson found one low-authority claim of displacement by English; treat that dramatic claim skeptically.
- **శుభ సాయంత్రం** — two sources supported common formal and informal use.
- **శుభ మధ్యాహ్నం** — real and workplace-timed, with narrower support for its lower everyday frequency.

The three phrases do not need one uniform usage story. For a time-independent everyday greeting, **నమస్కారం** remains the safer choice.

Your turn

Say these aloud:

- the two-source claim — real, formal, and workplace-timed
- the one-source claim — less common than morning or evening
- **నమస్కారం** — the time-independent everyday alternative

Before you move on

Do both sources rank **శుభ మధ్యాహ్నం** as less common? (**No.** Both support its formal use; only Talkpal makes the frequency comparison.) What is the safer all-day greeting? (**నమస్కారం**.)

Chapter 32

The Core Verbs

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can build a Telugu verb as stem plus tense plus person, say why one form covers both "I go" and "I will go", give a polite command with -aṇḍi, and explain why **ఉండు** has to borrow its negative and **తెలుసు** has no person at all.
>
> *Say* **నాకు తెలుసు***, name the three slots that built uṇṭānu, veḷtānu and cūstānu, separate it from Chapter 6's* **నాకు తెలుగు వచ్చు** *— fact against skill — and recall that* **ఉండు** *switches to lē- to be negated.*

32.1 ఉండు (uṇḍu) — "to be," and the negative that is a different verb

> Thirty-one chapters of words. Now the engine room. Telugu glues a verb together one piece at a time, seams showing, and this first verb carries the machine.

You'll want to know: ఉండు

> **ఉండు** — *uṇḍu* — **to be, to exist, to stay**

Chapter 5 met it as "to live somewhere." Here it is the verb-machine itself: **ఉండ్-** (the stem) + **-త-** (tense) + **-ాను** ("I") → **ఉంటాను** (*uṇṭānu*), "I stay, I will be."

One form is already in your mouth: **ఉన్నాను** (*unnānu*), "I am — right now," the shape hiding inside *bāgunnānu* and *mīru elā unnāru?*

The sisters' everyday "be" is another verb: Tamil இரு (*iru*), Kannada ಇರು (*iru*), Malayalam ഇരിക്കുക (*irikkuka*). Yet *uṇḍu* is Dravidian too: DEDR 697 files it with Tamil *uḷ*, "to be", and *uṇṭu*, "there is".

The letters in this word

ఉ is the standing vowel *u*. ◌ండు is the retroflex cluster *ṇḍ* with the *u* sign — tongue tip curled back, then released. Both shapes are familiar from Chapter 5.

Grammar Lens: Telugu's "be" cannot be made negative

There is no negative of *uṇḍu*. To say something is **not** there, Telugu drops the verb and picks up a second one, లే- (*lē-*) — the root behind Chapter 1's *lēdu*. It takes the very same person-endings:

who	is	is not
I	*unnānu*	*lēnu*
he	*unnāḍu*	*lēḍu*
it	*undi*	*lēdu*

So *lēdu* was never a bare word for "no." It is the **it**-form of a full verb, and you can now run it through its persons.

Tamil negates *iru* with இல்லை (*illai*), Kannada with ಇಲ್ಲ (*illa*), Malayalam with ഇല്ല (*illa*) — one shared root, *il-*. Telugu's *lē-* looks different, but DEDR 2559 files it with *il-*.

Your turn

Say these aloud:

- "uṇḍu" — be, exist, stay
- the three pieces in order — "uṇḍ … ta … ānu" → "uṇṭānu"
- the pair you must switch verbs for — "unnānu … lēnu"
- the three sisters' one verb — "iru … iru … irikkuka"

Before you move on

What are the three pieces of *uṇṭānu*? (**Stem, tense, person** — *uṇḍ-*, *-ta-*, *-ānu*.) How do you say "I am not there"? (లేను, *lēnu* — a different verb entirely.) So what kind of word is *lēdu*? (**The it-form**

of the negative verb *lē-*.) Which root do the other three sisters use, and does Telugu? (***il-***; Telugu too, as *lē-*.) Next: the same machine, tense piece swapped.

32.2 వెళ్ళు (veḷḷu) — "to go," and a tense Telugu refuses to split

You have the three pieces — stem, tense, person. Change only the middle one. That is the whole of Telugu tense, and it has one setting fewer than you would expect.

You'll want to know: వెళ్ళు

వెళ్ళు — *veḷḷu* — **to go**

Chapter 4 gave it to you as a bare command, *veḷḷu!*, "go!" Threaded up it is **వెళ్తాను** (*veḷtānu*), and its past is **వెళ్ళాను** (*veḷḷānu*), "I went."

Telugu keeps a second go-verb beside it. The family's inherited word for going is ***pō-***, and Telugu has it as **పోవు** (*pōvu*), **పోతాను** (*pōtānu*) — the same verb as Tamil **போ** (*pō*), Malayalam **പോകുക** (*pōkuka*) and Kannada **ಹೋಗು** (*hōgu*). So Telugu did not lose the family's word; it gave the everyday job to *veḷḷu*, which is Dravidian too: DEDR 5393 files it with Tamil *viṭu*, "to leave".

The letters in this word

వె is *va* with the short-*e* sign. **ళ్ళు** is the retroflex **ళ** (*ḷ*) doubled and held — *veḷ-ḷu*, a real catch in the middle. The same doubling is in *nīḷḷu*, Chapter 15's water.

Grammar Lens: one piece for "I go" and "I will go"

when	Telugu	the middle piece
now, or later	*veḷtānu*	*-ta-*
already	*veḷḷānu*	*-ā-*
this minute	*veḷtunnānu*	*-tunnā-*

Be honest about the first row: **వెళ్తాను** means "I go" **and** "I will go." Telugu does not separate habit from future — one piece does both,

and context decides. Tamil keeps them apart (*pōgiṟēṉ* against *pōvēṉ*); Telugu merged them.
Having merged them, Telugu needed a way to say "right this minute," and built one out of last lesson's verb. **వెళ్తున్నాను** (*veḷtunnānu*) is *veḷ-* plus **ఉన్నా-**, the very *unnānu* that means "I am," welded on: literally "going-am-I." The be-verb did not stay a word. It became a piece of every other verb.

Your turn

Say these aloud:

- "veḷḷu" — go — then "veḷtānu"
- the two meanings of one form — "I go" and "I will go"
- the three times — "veḷtānu … veḷḷānu … veḷtunnānu"
- the be-verb hiding in the third — "unnānu … veḷtunnānu"

Before you move on

How many things does *veḷtānu* mean? (**Two** — "I go" and "I will go"; Telugu merges habit and future.) What is glued inside *veḷtunnānu*? (**ఉన్నా-**, the be-verb — "going-am-I.") Does Telugu have the family's old go-root at all? (**Yes** — *pōvu*, cousin of *pō*, *pōkuka*, *hōgu*; *veḷḷu* just took the everyday work.) Next: a verb you call by one shape and build on another.

32.3 రా (rā) — "come!", and the stem it is not built on

Veḷḷu threads its pieces on without a fuss: the word you call it by is the word you build on. Its partner refuses — and the goodbye you learned in Chapter 4 has been hiding the reason.

You'll want to know: రా

రా — *rā* — **come!**

One syllable: ర (*ra*) with the long-*ā* sign. It is a whole command on its own, the plainest thing one Telugu speaker can say to another.

Every sister has this verb, and every sister's command-shape drifted somewhere different: Tamil வா (*vā*), Kannada ಬಾ (*bā*), Malayalam വരുക (*varuka*), Telugu రా (*rā*). A *v*, a *b*, an *r* — one old Dravidian come-word, worn three ways, not three separate verbs. DEDR 5270 files Telugu *vaccu* and *rā-* with Tamil *varu*: the verb is Dravidian.

Grammar Lens: the word you call it by is not the word you build on

Try to thread endings onto *rā-* and you get nothing anyone says. They attach to వచ్చు (*vaccu*) instead, which appears as *vast-* once the tense piece arrives:

- వస్తాను (*vastānu*) — "I come, I will come"
- వచ్చాను (*vaccānu*) — "I came"
- వస్తున్నాను (*vastunnānu*) — "I am coming right now"

The third one is last lesson's trick again: the be-verb *unnā-* welded onto the stem. Learn this verb as a pair, then — ***rā***, and ***vaccu-***. Telugu is not odd here; Tamil pairs *vā* with *varu-* and Kannada pairs *bā* with *baru-*, and the building-stems stayed far closer to each other than the commands did.
You have said *vastānu* already. Chapter 4's farewell వెళ్ళి వస్తాను (*veḷḷi vastānu*) — "I'll go and come back" — is *veḷḷu* and *vaccu* standing side by side, and that second word is exactly the form above. Chapter 6 used the bare stem too, in *nāku telugu vaccu*.

Your turn

Say these aloud:

- the command — "rā!"
- the pair to learn together — "rā … vaccu-"
- "vastānu … vaccānu … vastunnānu"
- the farewell you now understand — "veḷḷi vastānu"

Before you move on

Which shape do the endings attach to for "come"? (**వచ్చు**, *vaccu-*, never *rā-*.) Say "I will come." (*Vastānu.*) Which two verbs are standing in *veḷḷi vastānu*? (**వెళ్ళు** and **వచ్చు** — go, and come back.) Are Tamil *vā*, Kannada *bā* and Telugu *rā* three different verbs? (**No** — one old come-word, reshaped three ways.) Next: a verb Telugu kept where Tamil replaced it.

32.4 తిను (tinu) — "to eat," the root Telugu kept

Three verbs in, and every one has been Telugu's own choice. This one is the opposite: the oldest eat-word the family has, still doing plain everyday work.

You'll want to know: తిను

తిను — *tinu* — **to eat**

తి is the dental *ta* with the *i* sign; **ను** is *nu*, the same shape that ends *nēnu*. Threaded up: **తింటాను** (*tiṇṭānu*), "I eat, I will eat," and **తిన్నాను** (*tinnānu*), "I ate."

The inherited Dravidian root is ***tiṉ-***, and the family kept it: Kannada **ತಿನ್ನು** (*tinnu*), Malayalam **തിന്നുക** (*tinnuka*), Tamil **தின்** (*tiṉ*). But Tamil narrowed its own to chewing and snacking and put an assembled compound, **சாப்பிடு** (*sāppiḍu*), in the everyday slot. Telugu did no such thing. *Tinu* is still simply the word.

The word, taken apart — its roots and family

Build a noun straight off the root and you get **తిండి** (*tiṇḍi*) — "food, grub." Native, transparent, and blunt: it is what you feed people, not what you invite them to.

For the invitation Telugu reaches across to Sanskrit: **భోజనం** (*bhōjanaṁ*, "a meal") and **ఆహారం** (*āhāraṁ*, "food"). Both are **tatsama** loans, taken in whole, and both outrank *tiṇḍi* in politeness without displacing it.

That is Telugu's Sanskrit habit in miniature, and it is worth naming plainly. The verbs at the centre of living — be, go, come, eat — stayed Dravidian. The formal and ceremonial vocabulary layered on top came

from Sanskrit. You met the same split in Chapter 1, where the greeting *namaskāram* is Sanskrit while *avunu* and *lēdu* are native. Telugu borrowed far more of that top layer than Tamil ever did; it did not borrow the floor.

Your turn

Say these aloud:

- "tinu" — eat — then "tiṇṭānu … tinnānu"
- the root the whole family kept — "tinu … tinnu … tinnuka"
- the native noun — "tiṇḍi" — blunt and everyday
- the four verbs so far — "uṇṭānu … veḷtānu … vastānu … tiṇṭānu"

Before you move on

Did Telugu keep the inherited eat-root? (**Yes** — *tinu*, plain and everyday, where Tamil demoted *tiṉ* and built *sāppiḍu*.) Which word for food is native, and where does the polite one come from? (తిండి *tiṇḍi* is native and blunt; the polite one is borrowed from Sanskrit.) What is the pattern? (**Native verbs at the core, Sanskrit vocabulary layered on top** — as with *avunu* against *namaskāram*.) Next: a verb, and the polite ending that fits every verb in this chapter.

32.5 చూడు (cūḍu) — "to see," and the polite ending that fits every verb

Four bare commands so far — *uṇḍu*, *veḷḷu*, *rā*, *tinu* — and every one is blunt. This verb brings the ending that makes them polite.

You'll want to know: చూడు

చూడు — *cūḍu* — **to see, to look**

Threaded up: చూస్తాను (*cūstānu*), "I see, I will see," and చూశాను (*cūśānu*), "I saw."

Here the sisters scatter completely. Tamil says பார் (*pār*), Kannada ನೋಡು (*nōḍu*), Malayalam കാണുക (*kāṇuka*), Telugu చూడు (*cūḍu*). Four languages, four different everyday verbs. Telugu's is Dravidian: DEDR 2735 lists it as *cūcu*, "to see".

And yet the family's oldest seeing-root is right there in all four, sitting in a noun you can point at, "eye" — Tamil கண் (*kaṇ*), Kannada ಕಣ್ಣು (*kaṇṇu*), Malayalam കണ്ണ് (*kaṇṇ*), and Telugu's own eye-word, which comes later in this book. Telugu still builds on it: కనిపించు (*kanipiñcu*), "to appear, to be visible." Four everyday verbs, one shared eye.

The letters in this word

చూ is చ (*ca*) with the **long-ū** sign — the drawn-out partner of the short *u* ending every verb in this chapter. Hold it: *cū*, not *cu*. డు is retroflex *ḍa* with that short *u*.

Grammar Lens: -అండి, the respectful command, on any stem

Chapter 8 gave you కూర్చోండి (*kūrcōṇḍi*), "please sit." Chapter 9 gave you క్షమించండి (*kṣamiñcaṇḍi*), "forgive me." That shared **-అండి** (*-aṇḍi*) is not baked into those two words. It is a slot, and every verb in this chapter can fill it:

- చూడండి (*cūḍaṇḍi*) — please look
- రండి (*raṇḍi*) — please come
- తినండి (*tinaṇḍi*) — please eat
- వెళ్ళండి (*veḷḷaṇḍi*) — please go

Bare stem for a child or a close friend; stem plus *-aṇḍi* for everyone else. The respect is built the way Chapter 2 built it: *mīru* is a plural standing in for one person, and *-aṇḍi* is that plural now sitting on the verb.

Your turn

Say these aloud:

- "cūḍu" — see, look — then "cūstānu"

- the four sisters' four verbs — "cūḍu … pār … nōḍu … kāṇuka"
- the eye the sisters share — "kaṇ … kaṇṇu … kaṇṇ"
- all four polite commands — "cūḍaṇḍi … raṇḍi … tinaṇḍi … veḷḷaṇḍi"

Before you move on

Do the four sisters share an everyday verb for seeing? (**No** — *cūḍu*, *pār*, *nōḍu*, *kāṇuka*, all different.) What do they share instead? (**The eye** — *kaṇ*, *kaṇṇu*, *kaṇṇ*.) Make "please eat" and "please come." (*Tinaṇḍi*; *raṇḍi*.) Where have you met that politeness before? (**In మీరు** — a plural used for one person, now on the verb.) Next: a verb with no room for a person at all.

32.6 తెలుసు (telusu) — "to know," the verb with no room for a person

Five verbs, and every one ended on -*ānu*, the piece that means "I." The last verb of the chapter has no such piece — and Chapter 6 already handed you the sentence it makes.

You'll want to know: తెలుసు

తెలుసు — *telusu* — **it is known**

Not "to know" in the English sense. It comes from **తెలియు** (*teliyu*), "to become clear, to be apparent" — a thing *telusu*-es to you the way a shape resolves out of fog. Its negative is **తెలియదు** (*teliyadu*), "it is not known."

The verb is Dravidian: DEDR 3433 files *teliyu* with Tamil *teḷi*, "to become clear". Tamil's everyday match is **தெரி** (*teri*); Kannada and Malayalam use *gottu* and *a̲riyām*. All four build the sentence the same way.

Grammar Lens: no person on the verb, so the person moves

నాకు తెలుసు. — *nāku telusu* — "I know."

తెలుసు never changes shape. Only the little dative word in front of it moves:

the knower	**the sentence**
I	*nāku telusu*
you	*nīku telusu*
he	*ataniki telusu*

Five verbs put the person in the last piece, which is why *nēnu* could be dropped. Here there is no such piece, so the dative word is the one thing you **cannot** drop. Telugu treats knowing as something that **happens to** you, not something you do — and Tamil builds it identically, *enakkut teriyum*.

Now the distinction Chapter 6 could not yet draw. **నాకు తెలుగు వచ్చు** uses *vaccu*, "comes" — Telugu **comes to** you, and that is a **skill**, a language you can actually use. **నాకు తెలుసు** is a **fact** you hold. Two dative sentences, two verbs, two kinds of knowing.

Your turn

Say these aloud:

- "telusu" — it is known — from "teliyu", to become clear
- "nāku telusu" — I know
- three knowers, one verb — "nāku … nīku … ataniki telusu"
- the five that carried the person — "uṇṭānu, veḷtānu, vastānu, tiṇṭānu, cūstānu"

Before you move on

What does *telusu* mean underneath "know"? (**It is clear, it is apparent** — from *teliyu*.) Which piece is missing from it? (**The person** — so the knower sits in the dative instead.) Say "I know." (*Nāku telusu*.) What is the difference from *nāku telugu vaccu*? (***Vaccu* marks a skill**, *telusu* marks a fact.) Name the three slots one last time, with a verb in them. (**Stem, tense, person** — *veḷ* + *-ta-* + *-ānu*.) And what has no negative of its own? (**ఉండు** — Telugu switches to *lē-*.)

Chapter 33

Four Verbs of the Mind

Modes: 👁 **eyes** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can say I think, I understand, I read and I write in Telugu with the same three slots, build the -కో ending that hands an action back to its doer, say "I understood" with no నేను in it, and tell this chapter's native verbs from the Sanskrit words layered beside them.
>
> *Say* నేను తెలుగు రాస్తాను*, run the chapter's four verbs in the present, count them up from* ఆరు *to* పది*, take* వ్రాయు *back to the Dravidian line-drawing root behind Tamil* வரை *and Kannada* ಬರೆ*, and name which of the four words came from Sanskrit.*

33.1 అనుకో (anukō) — "to think," which is saying it to yourself

> *Nāku telusu* — "I know" — and that verb had no room for a person. This one takes the person back, and carries a second verb on its end.

You'll want to know: అనుకో

> **అనుకో** — *anukō* — **to think; to suppose**

Threaded up: అనుకుంటాను (*anukuṇṭānu*), "I think," and అనుకున్నాను (*anukunnānu*), "I thought." That **-ుంటాను** is the ending you already made in తింటాను (*tiṇṭānu*): stem, tense, then the -*ānu* that means "I."

The letters in this word

అ is the standing vowel *a*, used when a word begins on that sound. ను is *na* with the *u* sign, the shape that ends *nēnu*. కో is క (*ka*) with the long-*ō* sign: hold it, *kō*.

Grammar Lens: -కో, the ending that hands the verb back

కొను (*konu*) is a verb of its own — "to take, to get." Bolted onto the back of another verb it stops being a word and becomes an ending, **-కొను**, worn down to **-కో** in speech. What it adds is small and everywhere: *do the thing, and keep it.*
So అను ("say") plus **-కో** is **say it, and keep it** — say it to nobody but yourself.

The word, taken apart — its roots and family

అను (*anu*), "to say," is Proto-Dravidian ****aHn-***, and every sister kept it: Tamil என் (*eṉ*), Kannada అన్ನು (*annu*), Malayalam എന്നുക (*ennuka*).
Beside it Telugu keeps a borrowed thinker: ఆలోచించు (*ālōciñcu*), "to consider" — ఆలోచిస్తాను (*ālōcistānu*). Its Sanskrit noun ఆలోచన (*ālōcana*) is glossed two ways at once: "reflecting" **and** "seeing." Sanskrit made thinking a kind of looking, as English did in *reflect*.
The split Chapter 32 named over *tiṇḍi* and *bhōjanam* holds: plain verb native, formal word Sanskrit.

Your turn

Say these aloud:

- the two pieces, then the word — "anu … kō … anukō"
- "anukuṇṭānu", I think — then "anukunnānu", I thought
- the ending you already had — "tiṇṭānu … anukuṇṭānu"
- the family's say-verb — "anu … eṉ … annu … ennuka"
- native and borrowed — "anukuṇṭānu … ālōcistānu"

Before you move on

What are the two pieces of *anukō*, and what does the second do? (**అను** "say" plus **-కో**, which hands the action back to the doer.) Say "I think," and name the verb ending the same way. (*Anukuṇṭānu*; **తిను**.) Which sisters keep the say-verb, and what is *ālōcana* glossed as? (**All three**; "**reflecting**" and "**seeing**".) Which think-word is borrowed? (**ఆలోచించు** — as *bhōjanaṁ* was beside *tiṇḍi*.)

33.2 అర్థం చేసుకో (arthaṁ cēsukō) — "to understand," making the meaning yours

Anukuṇṭānu — I think — and the **-కో** on its back meant *and keep it*. That ending now arrives on a verb you have owned since Chapter 5.

You'll want to know: అర్థం చేసుకో

అర్థం చేసుకో — *arthaṁ cēsukō* — **to understand**

Three pieces, all already yours: **అర్థం** (*arthaṁ*, "meaning"), **చేయు** (*cēyu*, "to do"), and the **-కో** of the last lesson. Word for word it says **make the meaning your own**.

నేను అర్థం చేసుకుంటాను. — *nēnu arthaṁ cēsukuṇṭānu* — "I understand."

The letters in this word

ర్థ is a **conjunct** — **ర** (*ra*) stacked above **థ** (*tha*), one block for two consonants with no vowel between. **ం** is the **anusvāra** that closes *namaskāram*, and **చే** opens *cēyu*.

Grammar Lens: the other way to say it, with no "I" in it

నాకు అర్థమైంది. — *nāku arthamaindi* — "I understood." Literally: "**to me it became meaning**."

Three dative sentences now, and one design:

the sentence	what it says
nāku telugu vaccu	Telugu **comes** to me
nāku telusu	it **is clear** to me
nāku arthamaindi	it **became meaning** to me

No *nēnu* in any of them: the person sits in the dative because understanding, like knowing, arrives. Both shapes are good Telugu and do not feel alike — *nēnu arthaṁ cēsukuṇṭānu* is work you did, *nāku arthamaindi* is a thing that landed.

The word, taken apart — its roots and family

అర్థం is Sanskrit **अर्थ** (*artha*), and Telugu took the whole of it: **అర్థము** means "**meaning**" and "**money, wealth**" in one entry — which is why Kauṭilya's manual of statecraft is the *Arthaśāstra*. Its opposite: **అపార్థం** (*apārthaṁ*), "a meaning taken wrong."
Now the seam. Chapter 20's **వాతావరణం** was Sanskrit throughout — *vāta* plus *āvaraṇa*. This is not that. Only the noun crossed over; the doing is Telugu's own *cēyu* wearing Telugu's own *-kō*.

Your turn

Say these aloud:

- the three pieces — "arthaṁ … cēyu … kō"
- "nēnu arthaṁ cēsukuṇṭānu" — I understand
- the three dative sentences — "nāku telugu vaccu … nāku telusu … nāku arthamaindi"
- the two verbs built with -kō — "anukuṇṭānu … arthaṁ cēsukuṇṭānu"
- "arthaṁ … apārthaṁ"

Before you move on

Take *arthaṁ cēsukō* apart and give the literal sense. (**Meaning + do + for yourself**.) Say "I understood" without *nēnu*, then name the other two sentences built that way. (*Nāku arthamaindi*; *nāku telugu vaccu*, *nāku telusu*.) Why is the person in the dative?

(**Understanding arrives at you**.) What two things does *arthaṁ* mean, and how is this compound unlike *vātāvaraṇam*? (**Meaning** and **wealth**; *vātāvaraṇam* is **Sanskrit throughout**, here only the noun is.)

33.3 థ — one character, met inside words you already say

Before the new one: ఋ — what does it do? And one from further back: ణ?

One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: థ

థ — *tha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *th*, it is **tha**.

The *h* in *tha* is a puff of breath — the fifth pair of that kind, after క/ఖ, గ/ఘ, డ/ఢ and బ/భ. The plain letter here is త. Say *ta*, then say it again and let the breath out after it: that is థ.

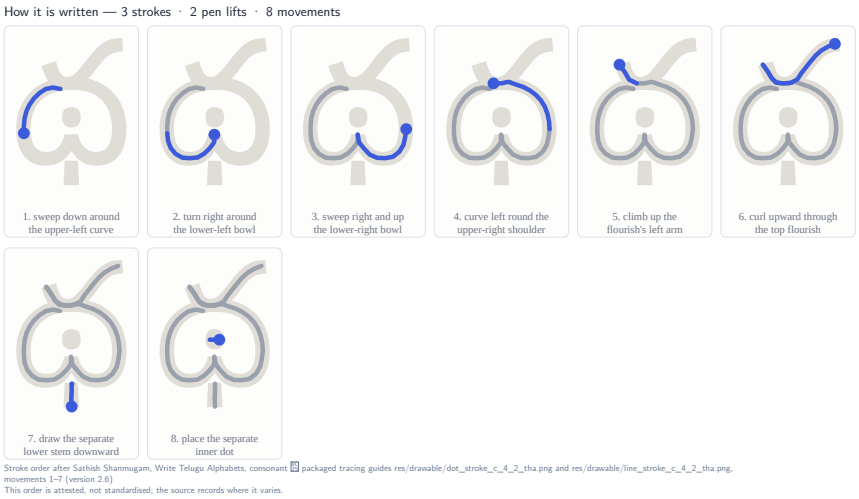
It is not the *th* of English *this* or *thin*. The tongue stays where it goes for త, against the back of the teeth; only the breath is added.

You already say these, and both have థ inside them:

- అర్థం *arthaṁ* — meaning, the word inside *arthaṁ cēsukō*
- అపార్థం *apārthaṁ* — a misunderstanding, meaning gone wrong

In both, థ carries ర stacked on top of it — the ర్థ block you met when you learned to understand things.

Writing: థ — seven deliberate movements



How థ is written, stroke by stroke

Watch the numbered filmstrip once before your pen moves. Movements 1–4 build the round body in four short curves: upper left, lower left, lower right, then upper right. The pen stays down from one curve to the next. Movement 5 climbs a short way up the flourish's left arm, and movement 6 curls up through the top flourish. Lift for movement 7, the short lower stem, and lift once more for movement 8, the dot inside. The strip gives the short climb a panel of its own, so the seven movements are numbered as eight.

Trace the same route slowly. This is one attested school-style order fitted to the printed shape here; Telugu handwriting varies, so keep the body and flourish as one unbroken run, lifting only before the stem and the dot.

Your turn

- *Look:* at these two, and say which one has థ and which has త

  అర్థం · తెలుగు

- *Say it:* *ta*, then *tha*, and hear the breath arrive

- *Trace it:* థ three times, saying *tha* as you finish each one

Before you move on

Which character is this — థ? What does it carry that త does not? (***tha*** — the same *t* with a puff of breath after it, and not the English *th*.)
One more, from much earlier: గ — what does it do?

33.4 చదువు (caduvu) — "to read," which is also "an education"

Nāku arthamaindi — it became meaning to me. Say it once. Now the verb for the work that gets you there.

You'll want to know: చదువు

చదువు — *caduvu* — **to read; to study**

నేను తెలుగు చదువుతాను. — *nēnu telugu caduvutānu* — "I read Telugu."

Telugu does not split reading from studying, and it builds no separate noun either: చదువు unchanged is "**education, studies**" — what a family means when it says a child's *caduvu* is going well.

The sisters scatter here as completely as they did over seeing: Tamil படி (*paḍi*), Kannada ಓದು (*ōdu*), Malayalam വായിക്കുക (*vāyikkuka*), Telugu చదువు. Four different everyday verbs for one act. DEDR 2327 lists *caduvu* with a query, in an entry that compares Sanskrit *catura*, "clever".

The letters in this word

చ is *ca*, the letter that opens *cūḍu*. దు is ద (*da*) with the *u* sign, and వు is వ (*va*) with the same sign. Three light syllables, each ending in that short *u*.

Grammar Lens: one stem, three middle vowels

when	Telugu
now, or later	*caduvutānu*
already	*cadivānu*
asked politely	*cadavaṇḍi*

cadu-, *cadi-*, *cada-*. The middle vowel moves, and nothing else does.

Chapter 32 gave you the harsh version of this with రా: there the word you call the verb by was not the word the endings attach to, and they went to *vaccu-* instead. This is the mild version — one stem, three vowels, plainly the same word.
The respectful **-అండి** arrives exactly as it did on *cūḍaṇḍi*: **చదవండి** (*cadavaṇḍi*), "please read." The ending never changes; only the stem in front of it does.

Your turn

Say these aloud:

- "nēnu telugu caduvutānu" — I read Telugu
- the three middle vowels — "caduvutānu … cadivānu … cadavaṇḍi"
- the two polite commands — "cūḍaṇḍi … cadavaṇḍi"
- the four sisters' four verbs — "caduvu … paḍi … ōdu … vāyikkuka"
- the chapter so far — "anukuṇṭānu, arthaṁ cēsukuṇṭānu, caduvutānu"

Before you move on

What two English verbs does *caduvu* cover, and what is its noun? (**Read** and **study**; the **same word** — an education.) Say "I read Telugu," then "please read." (*Nēnu telugu caduvutānu*; *cadavaṇḍi*.) What moves between *caduvutānu*, *cadivānu* and *cadavaṇḍi*, and which verb warned you about a second stem? (**The middle vowel**; రా, whose endings went to *vaccu-*.) Do the four sisters share a read-verb? (**No** — *caduvu*, *paḍi*, *ōdu*, *vāyikkuka*.)

33.5 రాయు (rāyu) — "to write," which began as drawing a line

Caduvutānu, *cadivānu*, *cadavaṇḍi* — one stem, three middle vowels. The chapter's last verb is the other half of that one.

You'll want to know: రాయు

రాయు — *rāyu* — **to write**

నేను తెలుగు రాస్తాను. — *nēnu telugu rāstānu* — "I write Telugu."

The past is **రాశాను** (*rāśānu*). Dictionaries often print the headword as **వ్రాయు** (*vrāyu*): not a different verb, just the older spelling, with a *v* gone quiet in speech.

The letters in this word

రా is **ర** (*ra*) — Chapter 32's whole command *rā* — with the long-*ā* sign, and **యు** is **య** (*ya*) with the *u* sign. In **వ్రాయు** a **వ** is stacked in front.

The word, taken apart — its roots and family

That silent *v* is the evidence. **వ్రాయు** goes back to a Dravidian ****warV-***, "to draw a line," and the sisters kept the *v* Telugu buried: Tamil **வரை** (*varai*), Malayalam **വരയ്ക്കുക** (*varaykkuka*), Kannada **ಬರೆ** (*bare*) with a *b*. Every one still means **draw** as readily as **write**.
Telugu's noun keeps the shape: **రాత** (*rāta*), "handwriting" — and, in speech, what is written for you.
One honest note: Tamil's everyday write-verb is **எழுது** (*e̱lutu*), not *varai*. The sisters share the root without agreeing which word does the daily work — the picture *caduvu* left you with.

Grammar Lens: ten verbs, and one machine

Chapter 32 handed you **ఆరు** (*āru*) verbs. Four more makes **పది** (*padi*), ten — and not one needed a new machine. Stem, tense, person: the three slots were already yours. That is what agglutination buys.
What they added is a shape and a habit. The shape is **-క్కో**, which hands the action back to its doer. The habit is Telugu's oldest: *caduvu*, *rāyu* and *anu* are native, while *ālōcana* and *artham*, laid on top, are Sanskrit — *tiṇḍi* beside *bhōjanam*, one chapter on.

Your turn

Say these aloud:

- "nēnu telugu rāstānu" — then "rāśānu"

- the spellings and the sisters — "rāyu … vrāyu … varai … bare"
- the chapter's four — "anukuṇṭānu, arthaṁ cēsukuṇṭānu, caduvutānu, rāstānu"
- the count — "āru", then "padi"
- two dative sentences — "nāku telusu … nāku arthamaindi"

Before you move on

Say "I write Telugu," name the older spelling, and say what the root meant first. (*Nēnu telugu rāstānu*; వ్రాయు; **to draw a line** — Tamil *varai*, Kannada *bare*.) Run this chapter's four verbs, then count them with Chapter 32's. (*Anukuṇṭānu, arthaṁ cēsukuṇṭānu, caduvutānu, rāstānu*; **padi** — *āru* plus four.) What does **-కో** do, and which two carry it? (**Hands the action back to the doer**; *anukō*, *arthaṁ cēsukō*.) Which words here are Sanskrit? (అర్థం and *ālōcana*, with the plain verbs native — *tiṇḍi* against *bhōjanaṁ*.)

Chapter 34

Four Verbs Between People

Modes: 👁 **eyes** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say I take, I ask and I help in Telugu, say **నాకు తెలుగు ఇష్టం** knowing there is no verb in it, place it beside the three other dative sentences I have built, and name the branch of Dravidian Telugu actually belongs to.
>
> *Say* **నాకు తెలుగు ఇష్టం** *and unpack it as "to me, Telugu, a liking" with no verb at all; line it up against* **నాకు తెలుగు వచ్చు**, **నాకు తెలుసు** *and* **నాకు అర్థమైంది**; *choose between the native* **నచ్చు** *and* **ఇష్టపడు**, *whose* **పడు** *is the falling of* **వర్షం పడుతోంది**; *and trace* **ఇష్టం** *to the Indo-European root behind English ask.*

34.1 తీసుకో (tīsukō) — "to take," the third verb you do for yourself

> The last four verbs happened inside your head; these four happen between you and somebody else. Say *caduvutānu* and *rāstānu*, and name what *vrāyu*'s root first meant.

You'll want to know: తీసుకో

తీసుకో — *tīsukō* — **to take**

Underneath it is **తీయు** (*tīyu*), "to pull out," and then the **-కో** you have met twice: pull it out, **and keep it**.

తీసుకుంటాను (*tīsukuṇṭānu*), "I take"; **తీసుకున్నాను** (*tīsukunnānu*), "I took" — *tiṇṭānu*'s ending on a different stem. Two whole sentences, from Chapter 15:

నేను నీళ్ళు తీసుకుంటాను. — *nēnu nīḷḷu tīsukuṇṭānu* — "I take water."

నేను బియ్యం తీసుకుంటాను. — *nēnu biyyaṁ tīsukuṇṭānu* — "I take rice."

The letters in this word

తీ is the dental **త** (*ta*) with the long-*ī* sign — *tinu*'s letter, held longer. **సు** is **స** (*sa*) plus *u*; **కో** is *anukō*'s *kō*.

Grammar Lens: three verbs, one ending

the verb	what the -కో adds
anukō	say it — **to yourself**
arthaṁ cēsukō	make the meaning — **yours**
tīsukō	pull it out — **for yourself**

The respectful **-అండి** goes on this one too: **తీసుకోండి** (*tīsukōṇḍi*), "please take" — what a Telugu host says while pushing a dish towards you.

The word, taken apart — its roots and family

కొను (*konu*) is still a verb on its own: "to take, to get, to buy." Its cousins are exact — Tamil **கொள்** (*koḷ*) and Malayalam **കൊള്ളുക** (*koḷḷuka*), both "to hold, to take."

What those two did with it is the good part: they welded it onto the backs of other verbs as an ending, with the very meaning Telugu gives it. So the shape you learned two lessons ago is not a Telugu quirk. It is Dravidian machinery, and *tīsukō* is the verb it started from.

Your turn

Say these aloud:

- "tīyu … kō" → "tīsukō"
- "nēnu nīḷḷu tīsukuṇṭānu" — then with "biyyaṁ", rice
- the three with the ending — "anukō … arthaṁ cēsukō … tīsukō"
- what a host says — "tīsukōṇḍi"
- the cousins — "konu … koḷ … koḷḷuka"

Before you move on

Take *tīsukō* apart, say "I take water," and name the other two verbs with that ending. (తీయు plus **-కో**; *nēnu nīḷḷu tīsukuṇṭānu*; *anukō* and *arthaṁ cēsukō*.) Which verb did the ending come from, and which sisters have it? (కొను; **Tamil** *koḷ*, **Malayalam** *koḷḷuka* — both use it as an ending too.) How do you offer someone food? (తీసుకోండి.)

34.2 అడుగు (aḍugu) — "to ask," and the branch Telugu really sits on

Tīsukuṇṭānu — and its ending belonged to the whole family. This next verb belongs to almost nobody.

You'll want to know: అడుగు

అడుగు — *aḍugu* — **to ask; to request**

అడుగుతాను (*aḍugutānu*), "I ask"; **అడిగాను** (*aḍigānu*), "I asked"; **అడగండి** (*aḍagaṇḍi*), "please ask." *aḍu-*, *aḍi-*, *aḍa-*: the middle vowel wanders as *caduvu*'s did, and the polite **-అండి** rides on unbothered.

One warning: Telugu has a **second** అడుగు, "a foot, a step" — same spelling, different root, nothing to do with asking.

The letters in this word

అ is the standing vowel *a*, as in *anukō*; డు is the retroflex డ (*ḍa*) plus *u*, the *ḍu* ending *cūḍu*; గు is గ (*ga*) plus *u*.

The word, taken apart — its roots and family

The four literary sisters share no ask-verb: Tamil கேள் (*kēḷ*) and Kannada ಕೇಳು (*kēḷu*), which also mean "hear"; Malayalam ചോദിക്കുക (*cōdikkuka*); and Telugu అడుగు, which keeps hearing separate in వినుట (*vinu*). The Dravidian dictionary's firmest match for *aḍugu* is in none of them: it is **Parji** *aḍ-*, a small language of central India.

That is the clue to something worth naming outright. **Telugu is not in the same branch as Tamil, Kannada and Malayalam.** Those three are **South Dravidian**; Telugu heads **South-Central**

Dravidian, with Gondi, Konda, Kui, Kuvi, Pengo and Manda. That is why so many everyday Telugu words look unlike the sisters' — *lēdu*, *uṇḍu*, *enimidi*, *tommidi* — even when DEDR files them with Tamil *il-*, *uṇṭu*, *eṭṭu* and old *toṇṭu*.

The word, taken apart — its roots and family

For the noun Telugu reaches for Sanskrit: ప్రశ్న (*praśna*), "a question," from प्रच्छ् (*prach*) — an Indo-European root, and the root of Latin *precārī*, which English took as **pray**. Native verb, borrowed noun: *tiṇḍi* and *bhōjanam*, a third time.

Your turn

Say these aloud:

- the three vowels — "aḍugutānu … aḍigānu … aḍagaṇḍi"
- the same wobble — "caduvutānu … cadivānu … cadavaṇḍi"
- four sisters, four verbs — "aḍugu … kēḷ … kēḷu … cōdikkuka"
- Telugu's own branch — "Gondi, Konda, Kui"
- words it explains — "lēdu … uṇḍu … enimidi, tommidi"
- the borrowed noun and its cousin — "praśna … pray"

Before you move on

Say "I ask," "I asked," "please ask," and name the other verb that wanders its middle vowel. (*Aḍugutānu, aḍigānu, aḍagaṇḍi*; చదువు.) Do the four literary sisters share an ask-verb? (**No** — *aḍugu*, *kēḷ*, *kēḷu*, *cōdikkuka*.) Which branch is Telugu on, who is on it, and name two things that explains. (**South-Central Dravidian**, with Gondi, Konda and Kui; why ***lēdu***, ***uṇḍu***, ***enimidi*** and ***tommidi*** look unlike their Tamil cousins.) Where is *praśna* from? (**Sanskrit**, from the root behind English **pray**.)

34.3 సహాయం చేయు (sahāyaṁ cēyu) — "to help," which is a going-together

Aḍagaṇḍi — please ask. Say it, and name where *praśna* came from. The verb that answers is one Chapter 5 walked past.

You'll want to know: సహాయం చేయు

సహాయం చేయు — *sahāyaṁ cēyu* — **to help**

Chapter 5 listed it once, as an example of what *cēyu* does with a noun in front. Take it properly now.

నేను మీకు సహాయం చేస్తాను. — *nēnu mīku sahāyaṁ cēstānu* — "I help you."

The person helped goes in the **dative**: *mīku*, "to you," Chapter 6's **-కు** at ordinary work. Politely: **సహాయం చేయండి** (*sahāyaṁ cēyaṇḍi*). Speech shortens the noun to **సాయం** (*sāyaṁ*).

The letters in this word

స is *sa*; **హా** is **హ** (*ha*) with the long-*ā* sign; **యం** is **య** (*ya*) closed by the **anusvāra**.

The word, taken apart — its roots and family

సహాయం is Sanskrit **सहाय** (*sahāya*), and it comes apart cleanly: **सह** (*saha*), "with," plus **आय** (*āya*), "a going." A helper is **one who goes with you**. Both halves are Indo-European — *saha* is the "one, together" root behind **same** and **similar**, and *āya* is the go-root Latin carries as *īre*, which English took whole in **exit** and **transit**.
The build is Chapter 8's: a borrowed noun in front of the native **చేయు**, as **దయచేసి** was made from *daya*. Kannada and Malayalam borrowed *sahāya* too; **Tamil did not**, keeping its own **உதவி** (*udavi*) — yet for *please* all four reached for *daya*. Borrowing happens **word by word**.

Why it's said this way

Dictionaries record **సహాయం** and **సాయం** side by side, *sāyaṁ* the shorter and more casual. What no source consulted here states is that *sāyaṁ* is a worn-down *sahāyaṁ*. It seems obvious. Obvious is not a citation.

Chapter 31 drew the same line over a greeting: two sources for "real and formal," one for "less common," kept apart.

Your turn

Say these aloud:

- "nēnu mīku sahāyaṁ cēstānu" — I help you
- shorter, then polite — "sāyaṁ cēstānu … sahāyaṁ cēyaṇḍi"
- the halves — "saha … āya" — then "exit … transit"
- two nouns, one verb — "daya cēsi … sahāyaṁ cēyu"
- the sister that kept its own — "udavi"
- the chapter — "tīsukuṇṭānu, aḍugutānu, sahāyaṁ cēstānu"

Before you move on

Say "I help you," name the case the helped person takes, and take *sahāya* apart. (*Nēnu mīku sahāyaṁ cēstānu*; the **dative -కు**; **सह** "with" plus **आय** "a going" — **exit** and **transit** carry the go-half.) Which other word is built on *cēyu* that way, and which sister kept its own? (**దయచేసి**; **Tamil**, with *udavi*.) What may you *not* say about *sāyaṁ*? (**That it comes from *sahāyaṁ*** — that derivation is not sourced here.)

34.4 నాకు తెలుగు ఇష్టం — "I like Telugu," with no verb in it

Sahāyaṁ cēstānu — a going with somebody. Say it, then *tīsukuṇṭānu*. This last sentence has no verb.

You'll want to know: The sentence

నాకు తెలుగు ఇష్టం. *nāku telugu iṣṭaṁ.* — "**to me** — Telugu — **a liking**."

ఇష్టం is a **noun**: "a liking, a wish," and Telugu supplies no *is*, having never needed one. Only the front piece moves — *nāku*, *nīku*, *ataniki*. తెలుసు behaved so too: there the verb had no room for a person; here there is no verb.

The letters in this word

ఇ is the standing vowel *i*; ష్ట is the conjunct ష (*ṣa*) over ట (*ṭa*).

Grammar Lens: the fourth dative sentence, and two ways round it

Four sentences, one idea: *nāku telugu vaccu*, a **skill**; *nāku telusu*, a **fact**; *nāku arthamaindi*, a meaning that **landed**; *nāku telugu iṣṭaṁ*, a **taste**. Chapter 6's dative subject was no curiosity: it is how Telugu files what happens **to** you.
A native verb does it too — నచ్చు (*naccu*), "to be pleasing": నాకు తెలుగు నచ్చింది (*nāku telugu naccindi*). Tamil நச்சு and Kannada ನಚ್ಚು are the same verb: *iṣṭaṁ* displaced nothing.
One shape takes an ordinary subject: ఇష్టపడు (*iṣṭapaḍu*), నేను ఇష్టపడతాను — *iṣṭaṁ* plus పడు (*paḍu*), "to fall," Chapter 20's verb in వర్షం పడుతోంది. Liking is something you **fall into**.

The word, taken apart — its roots and family

ఇష్టం is Sanskrit इष्ट (*iṣṭa*), "desired," from इष् (*iṣ*) — an Indo-European root whose English descendant is **ask**. So this chapter carried two asking-roots, not one: *prach* behind *pray*, *iṣ* behind *ask*. Telugu's అడుగు is cousin to neither: its relatives are Gondi and Kui.
Spanish *me gusta*, Italian *mi piace*, Hindi *mujhe pasand hai*, Bengali *āmār bhālo lāge*, Tamil *eṉakkut tamiḻ piḍikkum* — and now *nāku telugu iṣṭaṁ*. **Six languages, three unrelated families, one design**, with Chapter 6's Dravidian seam showing: **-ku**, **-ukku**, **-ge**, **-ikku**.

Your turn

Say these aloud:

- "nāku telugu iṣṭaṁ" — "to me, Telugu, a liking"
- three likers — "nāku … nīku … ataniki telugu iṣṭaṁ"

- the four datives — “vaccu … telusu … arthamaindi … iṣṭaṁ”
- native, then falling — “naccindi … iṣṭapaḍatānu”
- the chapter — “tīsukuṇṭānu, aḍugutānu, cēstānu, iṣṭaṁ”
- the endings — “-ku · -ukku · -ge · -ikku”

Before you move on

Say “I like Telugu,” say how many verbs it holds, and name the four datives. (*Nāku telugu iṣṭaṁ*; **none**; *vaccu* a **skill**, *telusu* a **fact**, *arthamaindi* a **landing**, *iṣṭaṁ* a **taste**.) Which native verb does the same job, and what hides inside *iṣṭapaḍu*? (**నచ్చు**; **పడు**, the falling of *varṣaṁ paḍutōndi*.) Which English word is *iṣṭaṁ*’s cousin, and is it *praśna*’s? (**Ask**; **no**, that is **pray** — and **six** languages in **three** families build liking so.)

Chapter 35

Family and Friends

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can name my family as a group in Telugu and name a friend, and say which of the two words is a Sanskrit loan and which is Telugu's own native word.
>
> *Say* ఇది నా కుటుంబం *and* ఇతను నా స్నేహితుడు*, trace* కుటుంబం *and* స్నేహితుడు *back to Sanskrit, and set* స్నేహితుడు *beside the native, DEDR-attested* నేస్తం*.*

35.1 కుటుంబం (kuṭumbaṁ) — "family," the word the household words never needed

> *Nāku telugu iṣṭaṁ* closed the last chapter on a sentence built from nothing but nouns. This chapter opens on the plainest nouns of all: the words for the people you would actually say that sentence to.

You'll want to know: కుటుంబం

> **కుటుంబం** — *kuṭumbaṁ* — **family**
>
> **నా కుటుంబం** — *nā kuṭumbaṁ* — "my family"

నా, "my," has been yours since one of the very first words you learned.

The word, taken apart — its roots and family

కుటుంబం is Sanskrit कुटुम्ब (*kuṭumba*), "family, household," carried into Telugu whole — the same kind of tatsama loan as నమస్కారం and సంతోషం.
Your earlier family-words lesson gave you six words: నాన్న, అమ్మ, and the four age-graded siblings అన్న/తమ్ముడు, అక్క/చెల్లి. Every one is native Dravidian, and not one of them means "family" — each names a single specific person. Telugu never inherited a plain word for the group itself, so when it needed one, it reached for Sanskrit. The people came first, and stayed native; the collective came later, and came borrowed — the same split you already met between *tinu* and *bhōjanaṁ*.

Your turn

Say these aloud:

- "nā kuṭumbaṁ" — my family
- the six named people, then the borrowed group word — "nānna, amma, anna, tammuḍu, akka, celli … kuṭumbaṁ"
- "nāku telugu iṣṭaṁ" — once more, no verb in it

Before you move on

Say "my family." (*Nā kuṭumbaṁ.*) Is *kuṭumbaṁ* native Dravidian or a loan? (**A Sanskrit loan**, like *namaskāram* and *santōṣam.*) Name the six family words from that earlier lesson. (*Nānna, amma, anna, tammuḍu, akka, celli.*) Which of those six means "family" as a group? (**None of them** — that's exactly the gap *kuṭumbaṁ* fills.)

35.2 స్నేహితుడు (snēhituḍu) — "friend," and the native word beside it

Kuṭumbaṁ named the people you're related to. This word names the people you choose.

You'll want to know: స్నేహితుడు

స్నేహితుడు — *snēhituḍu* — **friend** (male; స్నేహితురాలు, *snēhiturālu*, for a female friend)

ఇతను నా స్నేహితుడు. — *itanu nā snēhituḍu.* — "This is my friend."

The word, taken apart — its roots and family

స్నేహితుడు is built on Sanskrit स्नेह (*sneha*), "affection, love" — the same kind of tatsama loan as *kuṭumbaṁ* itself, plus a Telugu agentive ending. Telugu also has a **native** word for friendship: నేస్తం (*nēstaṁ*), catalogued in the Dravidian Etymological Dictionary alongside the related forms *neyyamu*, *neyyami*, and *neyyari* — all clustered around friendship, love, and tenderness. *Nēstaṁ* is real and still heard, but the everyday choice for "friend" is the borrowed one, *snēhituḍu* — the same pattern already found with *sahāyaṁ cēyu*, where the everyday verb is built on a Sanskrit noun too.

Your turn

Say these aloud:

- "itanu nā snēhituḍu" — this is my friend
- the borrowed word and the native one — "snēhituḍu … nēstaṁ"
- family, then friend — "kuṭumbaṁ … snēhituḍu"

Before you move on

Say "this is my friend." (*Itanu nā snēhituḍu.*) Is *snēhituḍu* native or borrowed? (**A Sanskrit loan**, from *sneha*, "affection.") What is Telugu's own native word for friendship, and is it the everyday choice? (నేస్తం, *nēstaṁ* — real, but **not** the everyday choice; that's the borrowed word.)

Chapter 36

Son and Daughter, Two Different Roots

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can say son and daughter in Telugu, and show that they trace to two different Proto-Dravidian roots rather than one shared root.
>
> *Line up* కొడుకు *and* కూతురు *against their two separate Proto-Dravidian roots, trace* కొడుకు*'s own root sideways to* కోడలు *("daughter-in-law"), and trace* కూతురు*'s root across the family to Kannada's word for infant.*

36.1 కొడుకు (koḍuku) — "son," and the unexpected word it shares a root with

Kuṭumbaṁ, family; *snēhituḍu*, friend. Now the two words for your own children — and Telugu does not build them the tidy way you might expect.

You'll want to know: కొడుకు

కొడుకు — *koḍuku* — **son**

వాడి కొడుకు వయసెంత? — *vāḍi koḍuku vayasenta?* — "How old is his son?" — the verbless age question you already know, asked about someone else's child.

The word, taken apart — its roots and family

కొడుకు is inherited from Proto-Dravidian ***kōẓ-**, "young, tender." You might expect "daughter," Telugu's other child-word, to share that same root with a different ending — that is exactly the shape Kannada's *magu/maga/ magalu* takes. Telugu does not do that. The very same ***kōẓ-** root instead gives Telugu **కోడలు** (*kōḍalu*), "**daughter-in-law**" — the woman a son marries, not the daughter a parent has. So *koḍuku* and *kōḍalu* are true cognates, one root apart; *koḍuku* and *kūturu* — son and daughter — are not related to each other at all. The next lesson takes up *kūturu*'s own, separate root.

Your turn

Say these aloud:

- "koḍuku" — son
- "vāḍi koḍuku vayasenta?" — how old is his son?
- the unexpected cognate — "koḍuku … kōḍalu" — son, daughter-in-law
- three words for people — "kuṭumbaṁ … snēhituḍu … koḍuku"

Before you move on

Say "son." (*Koḍuku.*) What Proto-Dravidian root does it come from, and what other Telugu word shares that exact root? (***kōẓ-**, "young, tender" — shared with **కోడలు**, "daughter-in-law," not with "daughter" itself.) Ask "how old is his son?" (*Vāḍi koḍuku vayasenta?*)

36.2 కూతురు (kūturu) — "daughter," on a root all its own

Koḍuku's root turned up again inside a completely different Telugu word. This word's root does something even less expected: it turns up inside a different **language**.

You'll want to know: కూతురు

కూతురు — *kūturu* — **daughter**

నా కూతురు. — *nā kūturu.* — "My daughter."

The word, taken apart — its roots and family

కూతురు is inherited from Proto-Dravidian ***kūnttu** — a root with **no connection** to *koḍuku*'s ***kōẓ-**. Telugu's two child-words are not a matched pair; they are two separate inheritances that happen to sit side by side in the same sentence.
Kūturu's cousin is not in Telugu at all. Kannada **కూసు** (*kūsu*), "**infant, maiden**," answers to the very same root. So the word a Telugu speaker uses for "my daughter" and the word a Kannada speaker uses for "the baby" are, underneath, one and the same — a reminder that a cognate does not have to keep the same *sense* as it crosses a language boundary, only the same root.

Your turn

Say these aloud:

- "nā kūturu" — my daughter
- son, then daughter — "koḍuku … kūturu" — two unrelated roots
- the cross-language cousin — "kūturu … kūsu" — daughter, infant
- friend, son, daughter — "snēhituḍu … koḍuku … kūturu"

Before you move on

Say "my daughter." (*Nā kūturu.*) Does *kūturu* share a root with *koḍuku*? (**No** — two separate Proto-Dravidian roots.) What word in another Dravidian language answers to *kūturu*'s own root, and what does it mean there? (**Kannada కూసు** *kūsu*, "**infant, maiden**.")

Chapter 37

Four Words on the Face

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name my eye, ear, nose and mouth in Telugu, and say which three the family agrees on and which one Telugu's word does not obviously match.
>
> *Name* కన్ను, చెవి, ముక్కు *and* నోరు*; close the loop Chapter 32 left open on* కన్ను*; and say why* నోరు*, unlike the other three, shows no visible trace of the shared vāy root Tamil, Malayalam and Kannada all carry.*

37.1 కన్ను (kannu) — "eye," a word you've already met once

One from much earlier first. Tamil says *ēḻu* for seven, with its rare *ḻ*. What did Telugu turn that sound into? (A plain **ఢ** — *ēḍu*.)

Head and hand, taught earlier, gave you your first two body words. This chapter gives you four more — starting with one this book has secretly used before.

You'll want to know: కన్ను

కన్ను — *kannu* — **eye**

నా కన్ను. — *nā kannu.* — "My eye."

Three body words now, with two from that earlier lesson: *tala*, *ceyyi*, *kannu* — and *koḍuku*, "son," still fresh, one lesson back.

The word, taken apart — its roots and family

కన్ను already appeared earlier, inside the *cūḍu* lesson's own etymology note for చూడు — as proof that Tamil *pār*, Kannada *nōḍu*, Malayalam *kāṇuka*, and Telugu *cūḍu*, four completely unrelated everyday see-verbs, all sit beside the very same ancient eye-word: Telugu *kannu*, Tamil *kaṇ*, Kannada *kaṇṇu*, Malayalam *kaṇṇ*. That chapter named the word without ever teaching it. This lesson closes the loop.
Like *tala* ("head") and *ceyyi* ("hand," a cognate reshaped almost past recognition) before it, *kannu* is native Dravidian, and here the whole family agrees on it plainly — no reshaping required.

Your turn

Say these aloud:

- "nā kannu" — my eye
- the four sisters' shared eye — "kannu … kaṇ … kaṇṇu … kaṇṇ"
- three body words — "tala … ceyyi … kannu"
- son, daughter, eye — "koḍuku … kūturu … kannu"

Before you move on

Say "my eye." (*Nā kannu.*) Which earlier lesson already used this exact word, and what did it prove? (**The *cūḍu* lesson's** etymology note — that all four Dravidian sisters share one eye-root behind four unrelated see-verbs.) Name the two body words from that earlier lesson. (తల, *tala*, and చెయ్యి, *ceyyi*.)

37.2 చెవి (cevi) — "ear," matching Tamil almost letter for letter

Kannu matched its cousins closely but not exactly. This word matches even more closely.

You'll want to know: చెవి

చెవి — *cevi* — **ear**

నా చెవి. — *nā cevi.* — "My ear."

The word, taken apart — its roots and family

చెవి is native Dravidian, and it answers Tamil **செவி** (*cevi*) almost syllable for syllable — a plainer, closer match than *kannu* found with Tamil *kaṇ* just one lesson ago. Two body words in a row, both native, both recognizably the same family — but "close cousin" is not "identical twin": each word drifts by its own amount, and *cevi* simply happened to drift less.

Your turn

Say these aloud:

- "nā cevi" — my ear
- the near-match — "cevi … cevi"
- eye, then ear — "kannu … cevi"
- daughter, then ear — "kūturu … cevi"

Before you move on

Say "my ear." (*Nā cevi.*) Which Dravidian cousin's word for ear matches *cevi* most closely? (**Tamil** *cevi* — almost syllable for syllable.) Did *kannu* match its cousins that closely? (**Not quite** — one vowel apart from Tamil's *kaṇ*.)

37.3 ముక్కు (mukku) — "nose," an inherited word with a second word's fingerprints on it

Eye and ear both descend cleanly from their Proto-Dravidian roots. This word descends too — but not quite cleanly.

You'll want to know: ముక్కు

ముక్కు — *mukku* — **nose**

నా ముక్కు. — *nā mukku.* — "My nose."

The word, taken apart — its roots and family

ముక్కు descends from Proto-Dravidian ***mūnk(k)u**, and it is a real cognate of Kannada *mūgu*, Malayalam *mūkkŭ*, and Tamil *mūkku*. But comparative Dravidian scholarship flags Telugu's own reflex as **irregular**: the consonant in the middle of the word is probably not a clean, regular descendant of **mūnk(k)u* alone. It looks contaminated by a separate Dravidian root, ***mok-**, "face" — as if two related words leaned on each other and left a mark. *Cevi* showed a word that drifted very little; *mukku* shows one that drifted in a specific, traceable way, nudged by its neighbour.

Your turn

Say these aloud:

- "nā mukku" — my nose
- the cousins — "mukku … mūgu … mūkkŭ … mūkku"
- three body words so far — "kannu … cevi … mukku"

Before you move on

Say "my nose." (*Nā mukku.*) Is *mukku* a regular or an irregular reflex of its Proto-Dravidian root? (**Irregular** — likely contaminated by the separate root **mok-*, "face.") Which two body words so far were plain, regular matches with their cousins? (కన్ను and చెవి.)

37.4 నోరు (nōru) — "mouth," the word that breaks the chapter's pattern

Eye, ear, nose — three native words, three visible matches with the family, one plainer than the next. The fourth face word does not keep that streak going.

You'll want to know: నోరు

నోరు — *nōru* — **mouth**

నా నోరు. — *nā nōru.* — "My mouth."

Four body words done: *kannu*, *cevi*, *mukku*, *nōru*.

The word, taken apart — its roots and family

Tamil and Malayalam both say **வாய்/vāyi** (*vāy*), "mouth," and Kannada's **ಬಾಯಿ** (*bāyi*) answers it through a regular sound law that turns a Tamil word-initial *v-* into Kannada *b-*. Three sisters, one shared root, one visible law.
నోరు does not obviously belong to that set. It shows no trace of *vāy*, and no source consulted here states what its own deeper Proto-Dravidian root actually is — so nothing is invented for it, the same discipline applied earlier to *veḷḷu*'s own unresolved history. After three straight matches — *kannu* plain, *cevi* nearly exact, *mukku* traceably contaminated but still clearly related — *nōru* is the one face word where this book cannot show you the family resemblance, only note honestly that it is not there to show.

Your turn

Say these aloud:

- "nā nōru" — my mouth
- the shared root Telugu sits outside of — "vāy … bāyi … nōru"
- all four face words — "kannu … cevi … mukku … nōru"

Before you move on

Name all four face words. (**కన్ను, చెవి, ముక్కు, నోరు**.) Which three Dravidian sisters share one root and one sound law for "mouth," and does Telugu's word visibly belong with them? (**Tamil, Malayalam, and Kannada**, on *vāy*; **no** — *nōru* shows no trace of it, and its own root is not confirmed by any source consulted here.)

Chapter 38

The Heart, Two Ways

Modes: **voice** (1) **eyes** (1) **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can name my heart in Telugu two ways, the everyday native word and the literary Sanskrit loan, and trace the Sanskrit one to the same Proto-Indo-European root as the English word heart.
>
> *Say* నా గుండె *and* నా హృదయం నీది, *set the everyday native word beside the literary Sanskrit loan, and trace* హృదయం *to the same PIE root as English heart, Latin cor and Greek kardía.*

38.1 గుండె (guṇḍe) — "heart," the everyday native word

Four face words done, one of them an honest gap. This chapter gives you a fifth body word — and then, unusually, a second word for the very same thing.

You'll want to know: గుండె

గుండె — *guṇḍe* — **heart**

నా గుండె. — *nā guṇḍe.* — "My heart."

The word, taken apart — its roots and family

గుండె is inherited from Proto-Dravidian ***kuṇṭV**, and it is cognate with Kannada's own native heart-word, **గుండిగే** (*guṇḍige*) — plainly

the same root, wearing a different Telugu and Kannada shape. *Guṇḍe* is the plain, physical, everyday word: the organ beating in your chest. The next lesson gives Telugu's *other* word for heart — not a synonym so much as a different register entirely.

Your turn

Say these aloud:

- "nā guṇḍe" — my heart
- the Kannada cognate — "guṇḍe … guṇḍige"
- five body words — "kannu … cevi … mukku … nōru … guṇḍe"

Before you move on

Say "my heart." (*Nā guṇḍe.*) Is *guṇḍe* native or borrowed? (**Native Dravidian**, from Proto-Dravidian **kuṇṭV.*) Which language carries a matching native heart-word? (**Kannada**, *guṇḍige.*)

38.2 హృదయం (hṛdayaṁ) — "heart," and a genuine cousin of the English word

Guṇḍe is the heart beating in your chest. This word is the heart Telugu reaches for in a poem, a speech, or a love letter.

You'll want to know: హృదయం

హృదయం — *hṛdayaṁ* — **heart** (literary, emotional register)

నా హృదయం నీది. — *nā hṛdayaṁ nīdi.* — "My heart is yours."

The letters in this word

హృ is హ (*ha*) carrying the **vocalic-r vowel sign** ృ — the *dependent* form of the same vowel taught earlier as the *independent* letter ఋ, standing alone at the front of ఋతువు. Same vowel, two shapes: one when it opens a word, another when it rides on a consonant. దయం closes with the familiar అనుస్వార ం.

The word, taken apart — its roots and family

హృదయం is Sanskrit **हृदय**, built on **हृद्** (*hṛd*), "heart." That Sanskrit root and the English word **heart** are not a coincidence of sound — both descend from the same reconstructed Proto-Indo-European root, ***ḱērd-**. Latin's **cor** (genitive *cordis*, the source of English *cordial* and *courage*) and Greek's **kardía** (behind *cardiac*) come from that exact same root. Four languages, one ancient word.
Telugu keeps *hṛdayaṁ* beside native *guṇḍe* the same way it keeps Sanskrit *bhōjanaṁ* beside native *tiṇḍi*: the plain, physical word stays Dravidian; the word for ceremony, poetry, and feeling is layered on top from Sanskrit.

Your turn

Say these aloud:

- "nā hṛdayaṁ nīdi" — my heart is yours
- the four cousins — "hṛd … heart … cor … kardía"
- native, then literary — "guṇḍe … hṛdayaṁ"
- all six body words now — "kannu … cevi … mukku … nōru … guṇḍe … hṛdayaṁ"

Before you move on

Say "my heart is yours." (*Nā hṛdayaṁ nīdi.*) Is *hṛdayaṁ* a real Indo-European cousin of English "heart," or just a coincidence of sound? (**A real cousin** — both from PIE **ḱērd-*, alongside Latin *cor* and Greek *kardía*.) Which is the everyday, physical word for heart, and which is literary? (**గుండె** everyday; **హృదయం** literary.)

Chapter 39

Tea and Milk, Two Roads

Modes: 🚗 **voice** (2) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can politely ask for tea or milk in Telugu, and say which word travelled by sea and which one three Dravidian cousins share under one regular sound law.
>
> *Ask* **దయచేసి టీ** *and* **దయచేసి పాలు**, *follow* **టీ** *along its sea route through Hokkien and Malay against the overland chai route, then place* **పాలు** *beside Tamil and Malayalam's matching pāl against Kannada's own p-to-h shift.*

39.1 దయచేసి టీ (dayacēsi ṭī) — "tea, please," a word that sailed rather than walked

> Two ways to say heart, done. **దయచేసి** — please, taught earlier — is about to earn its keep again, in front of the drink you'd politely ask for first.

You'll want to know: టీ

టీ — *ṭī* — **tea**

దయచేసి టీ. — *dayacēsi ṭī.* — "Tea, please."

Day to day, Telugu politeness usually rides on the **-అండి** verb ending already named as the everyday carrier — but a bare request for a drink, with no verb at all, is exactly where **దయచేసి** itself does the work instead.

The word, taken apart — its roots and family

టీ is a direct loan from English **tea**. English's own word traces to **Hokkien** (Southern Min Chinese) **tê**, carried west by Dutch and English sea trade through **Malay** *teh* and into Europe — the **sea** route.
That is the opposite road from the word most of Telugu's neighbours use. Hindi, Kannada, and Marathi all say some form of **chai**, which travelled **overland**: Mandarin **chá**, into Persian چای (*chāy*), and from Persian into North and South India alike. One drink, two Chinese dialects, two trade routes, two families of words — and Telugu's coastal contact with English trade left it holding the sea-word, **ṭī**, where its landlocked neighbours picked up the land-word instead.

Your turn

Say these aloud:

- "dayacēsi ṭī" — tea, please
- the sea route — "tê … teh … tea … ṭī"
- the land route it is not — "chá … chāy … chai"

Before you move on

Say "tea, please." (*Dayacēsi ṭī.*) Did *ṭī* travel by land or by sea, and through which languages? (**By sea** — Hokkien *tê*, Malay *teh*, English *tea.*) Which word, common in Hindi, Kannada, and Marathi, took the overland road instead, and through which languages? (**Chai** — Mandarin *chá*, Persian *chāy.*)

39.2 పాలు (pālu) — "milk," where Kannada is the odd one out, not Telugu

Ṭī showed Telugu going its own way against most of its neighbours. This word shows the opposite: Telugu sits with the majority, and one cousin stands alone.

You'll want to know: పాలు

పాలు — *pālu* — **milk**

దయచేసి పాలు. — *dayacēsi pālu.* — "Milk, please."

The word, taken apart — its roots and family

పాలు descends, unchanged, from Proto-Dravidian ***pāl** — matching Tamil பால் (*pāl*) and Malayalam പാൽ (*pāl*) exactly. Kannada alone says ಹಾಲು (*hālu*), because Kannada carries a **regular sound law** that turns a word-initial Dravidian *p-* into *h-*: the same law that turns Tamil பத்து (*pattu*, "ten") into Kannada ಹತ್ತು (*hattu*). Telugu, Tamil, and Malayalam all keep the original *p-*; only Kannada shifted it.
So the pattern this chapter has been building — Telugu sometimes matching its neighbours, sometimes standing apart — flips one more time: here it is **Kannada** standing apart, not Telugu.

Your turn

Say these aloud:

- "dayacēsi pālu" — milk, please
- the three that match — "pālu … pāl … pāl"
- the one that shifted — "pālu … hālu"
- tea, then milk — "ṭī … pālu"

Before you move on

Say "milk, please." (*Dayacēsi pālu.*) Which three Dravidian languages keep the original *p-* in "milk," and which one shifts it to *h-*? (**Telugu, Tamil, and Malayalam** keep *p-*; **Kannada** alone shifts to *h-*, *hālu.*) Name one other word pair that shows the same Kannada sound law. (**Tamil pattu, Kannada hattu** — "ten.")

39.3 ◌ృ — one character, met inside a word you already say

Before the new one: థ — what does it do? And one from further back: జ?

> One character this time — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ృ

ృ — *ṛ*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ṛ*. Replaces, not adds — the *a* is gone.

This is the second shape of a vowel you already traced whole. Back at the seasons you met ఋ, the independent letter that opens ఋతువు. When the same vowel has to ride on a consonant instead of opening a word, it sheds that standing shape and becomes this mark. One vowel, two shapes, chosen by where in the word it falls — exactly the arrangement you know from ఉ and ు, and from ఎ and ె.

You already say this one:

- హృదయం *hṛdayaṁ* — heart, the word for poems rather than for chests

Take it apart: హ, the letter from the borrowings, carrying ృ. Not *ha* any more, and not *hru* with a vowel added — the built-in *a* has been swapped out, and what is left is **hṛ**.

Writing: ృ — copy what you see

Put your pen on ృ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these two, and say which one carries the sign and which carries the standing letter

  హృదయం · ఋతువు

- *Trace it:* ృ three times, saying *ṛ* as you finish each one
- *Look:* at హ్మా, and name its two pieces

Before you move on

Which character is this — ృ? What vowel does it put on the consonant it attaches to, and what does it take off? (**Puts *ṛ* on; takes the built-in *a* off.**) Which standing letter is its partner? (ఋ.)
One more, from much earlier: ్ — what does it do?

Chapter 40

A Meal

Modes: **voice** (1) **eyes** (1) **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can say I am having a meal in Telugu, using the word an earlier chapter already used and never explained.
>
> *Say* భోజనం చేద్దాం, *explain* భోజనం *against everyday* తిండి *the way Chapter 32 first set them side by side, and apologise for a late meal with Chapter 9's* క్షమించండి.

40.1 భోజనం (bhōjanaṁ) — "a meal," a word this book named before it ever taught it

> Tea, then milk. This chapter's last word is not a drink — it is the meal you would sit down to with both.

You'll want to know: భోజనం

> **భోజనం** — *bhōjanaṁ* — **a meal**
>
> **భోజనం చేద్దాం.** — *bhōjanaṁ cēddāṁ.* — "Let's eat" (literally, "let's do a meal").

The *tinu* lesson already used this exact word, in passing, as the polite counterpart of native **తిండి** — without ever teaching it properly. This lesson finally does.

The word, taken apart — its roots and family

భోజనం is Sanskrit **भोजन**, built on **भुज्** (*bhuj*), "to enjoy, to partake of, to eat." It sits above native **తిండి** the same way **దయచేసి** sits above the everyday **-అండి** ending: a formal Sanskrit layer over a plain Dravidian floor. **కన్ను**, "eye," was a word this book had already used once, unglossed, inside an etymology note — this lesson does the very same thing for **భోజనం**, which was named earlier without ever being taught. If a meal runs late, Telugu reaches for the apology word taught earlier: **భోజనం ఆలస్యం అయింది, క్షమించండి** — "the meal is late, sorry" — the same respectful **-అండి** ending that first met you on **దయచేసి**'s own everyday alternative.

Your turn

Say these aloud:

- "bhōjanaṁ cēddāṁ" — let's eat
- native, then borrowed — "tiṇḍi … bhōjanaṁ"
- the apology — "bhōjanaṁ ālasyaṁ ayindi, kṣamiñcaṇḍi"
- the chapter — "ṭī … pālu … bhōjanaṁ"

Before you move on

Say "let's eat." (*Bhōjanaṁ cēddāṁ.*) Which earlier lesson already used *bhōjanaṁ*, without teaching it as its own word? (**The *tinu* lesson.**) Apologise for a late meal, using the word you learned earlier. (*Bhōjanaṁ ālasyaṁ ayindi, kṣamiñcaṇḍi.*)

40.2 The table words, second pass — and how to ask for them

Three words, from memory and without the page: tea, milk, and the word for a meal.

You'll want to know: three words, three different journeys

The three sit together on a table and came from three different places:

word	where it came from
టీ *ṭī*	borrowed, and by sea rather than by the overland road
పాలు *pālu*	the family's own — the whole Dravidian group shares it
భోజనం *bhōjanaṁ*	Sanskrit, and formal in tone because of it

భోజనం is the one to weigh. It is not the everyday word for food; it is the polite noun for **a meal**, the sit-down kind, and its tone is the reason it belongs beside *please* rather than beside a shopping list.

Grammar Lens: two ways to put "please" on a request

Asking for any of the three uses what దయచేసి and the -ండి ending settled:

- The -ండి ending on the verb is where ordinary Telugu keeps *please*. A request with it is already polite.
- దయచేసి is the extra warmth on top — formal, or emphatic, and not the everyday word English speakers expect it to be.

So దయచేసి టీ is a warm, slightly formal ask, and the same request made with a -ండి verb and no దయచేసి is the ordinary polite one. Neither is rude.

Your turn: ask for each

Say these aloud:

- tea, please — the two-word form you learned with it
- the same ask with milk in place of tea
- the word for a meal, and notice it sounds more formal than the other two
- which of the three a host would offer you first

Before you move on

Which of the three words is the family's own? (పాలు.) Which arrived from Sanskrit, and what does that do to its tone? (భోజనం — it makes it **formal**.) Where does everyday Telugu keep *please*? (**In the -ండి ending on the verb.**) And what is దయచేసి for? (**Extra warmth, or formality, on top of an ending that is already polite.**)

Chapter 41

Pointing, and Asking

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can point at something in Telugu and ask who or where it is — and I can say what the six words have in common.
>
> *Say the near word, the far word and the question word in a row, and name the part that changed.*

41.1 ఇది (idi) — this one — the thing near me

You can already name things. This is how you POINT at them.

You'll want to know: ఇది

ఇది — *idi* — this one — the thing near me.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner, the far one, comes in the next lesson. The two of them differ by one sound at the front — **i-** for near — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

ఇది (*idi*) is native Dravidian, one word with Tamil *itu* and Kannada *idu* (DEDR 410). It is built on the near-pointing base *i-*, "this".

Your turn

Say these aloud:

- "ඉදි" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *idi*? (this one — the thing near me.) What sound does it start with, and does that sound mean near, far, or a question? (**i-** — near.)

41.2 අදි (adi) — that one — the thing over there

You can already name things. This is how you POINT at them.

You'll want to know: අදි

අදි — *adi* — that one — the thing over there.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner is **ඉදි** *idi*, which you have just met. The two of them differ by one sound at the front — **a-** for far — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

අදි (*adi*) is native Dravidian, one word with Tamil *atu* and Kannada *adu* (DEDR 1). It is built on the far-pointing base *a-*, "that".

Your turn

Say these aloud:

- "අදි" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *adi*? (that one — the thing over there.) What sound does it start with, and does that sound mean near, far, or a question? (**a-** — far.)

41.3 ఇక్కడ (ikkaḍa) — here — where I am

You can already name things. This is how you POINT at them.

You'll want to know: ఇక్కడ

ఇక్కడ — *ikkaḍa* — here — where I am.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner, the far one, comes in the next lesson. The two of them differ by one sound at the front — **i-** for near — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

ఇక్కడ (*ikkaḍa*) is native Dravidian, built on the near-pointing base *i-*, "this". DEDR 410 lists *ikkaḍa*, "this place, here", itself.

Your turn

Say these aloud:

- "**ఇక్కడ**" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *ikkaḍa*? (here — where I am.) What sound does it start with, and does that sound mean near, far, or a question? (**i-** — near.)

41.4 అక్కడ (akkaḍa) — there — where I am not

You can already name things. This is how you POINT at them.

You'll want to know: అక్కడ

అక్కడ — *akkaḍa* — there — where I am not.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner is **ఇక్కడ** *ikkaḍa*, which you have just met. The two of them differ by one sound at the front — **a-** for far — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

అక్కడ (*akkaḍa*) is native Dravidian, built on the far-pointing base *a-*, "that". DEDR 1 lists *akkaḍa*, "that place, there", itself.

Your turn

Say these aloud:

- "**అక్కడ**" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *akkaḍa*? (there — where I am not.) What sound does it start with, and does that sound mean near, far, or a question? (**a-** — far.)

41.5 ఎవరు (evaru) — who? — asking about a person

You can already name things. This is how you ASK about them.

You'll want to know: ఎవరు

ఎవరు — *evaru* — who? — asking about a person.

Say it with an asking voice. It points at no one: it asks your listener to name the person.

Its partner, the question word for place, comes in the next lesson, and it opens with the same **e-**. That is the pattern: the near words you know open with **i-** (**ఇది** *idi*, **ఇక్కడ** *ikkaḍa*), the far ones with **a-** (**అది** *adi*, **అక్కడ** *akkaḍa*), and the asking words with **e-**. The last lesson of this chapter lays it out.

The word, taken apart — its roots and family

ఎవరు (*evaru*) is native Dravidian, built on the question base *e-*. DEDR 5151 lists *evaru*, "who", itself, with Tamil *yār*, "who".

Your turn

Say these aloud:

- "**ఎవరు**" three times, asking about a different person each time
- it once with a word you already know after it

Before you move on

What is *evaru*? (who? — asking about a person.) What sound does it start with, and does that sound mean near, far, or a question? (**e-** — ask.)

41.6 ఎక్కడ (ekkaḍa) — where? — asking about a place

You can already name things. This is how you ASK about them.

You'll want to know: ఎక్కడ

ఎక్కడ — *ekkaḍa* — where? — asking about a place.

Say it with an asking voice. It points at no place: it asks your listener to point one out.

Its partner is ఎవరు *evaru*, which you have just met: both open with **e-**, the asking sound. Its other partners, ఇక్కడ *ikkaḍa* and అక్కడ *akkaḍa*, differ from it only at the front. That is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

ఎక్కడ (*ekkaḍa*) is native Dravidian, built on the question base *e-*. DEDR 5151 lists *ekkaḍa*, "where", itself, with Tamil *eṅku*, "where".

Your turn

Say these aloud:

- "ఎక్కడ" three times, asking about a different place each time
- it once with a word you already know after it

Before you move on

What is *ekkaḍa*? (where? — asking about a place.) What sound does it start with, and does that sound mean near, far, or a question? (**e-** — ask.)

41.7 i- / a- / e- — six words, one machine

Say the six words from this chapter out loud, in order. Listen to how they begin.

Grammar lens: one slot changes

You did not learn six words. You learned **three beginnings** and reused them.

meaning	**word**
near	ఇక్కడ *ikkaḍa*
far	అక్కడ *akkaḍa*
question	ఎక్కడ *ekkaḍa*

Telugu keeps the whole tail identical: ఇక్కడ, అక్కడ, ఎక్కడ — only the first vowel moves.
Change the front, and the meaning walks from **near** to **far** to **a**

question. Nothing else in the word moves.
The same three beginnings run the thing-words too: **ඉදි** *idi* and **අදි** *adi* start exactly like the first two rows. This chapter did not teach you the matching question word for things — that one arrives later, and when it does you will already know what it has to start with.
This is worth more than the six words are. When you meet a new word in this family later, you will not have to be taught all three of it — you will be taught one and work out the others.

Your turn

- *Say it:* the near word, then the far word, then the question word
- *Say it:* them again for place, not for things
- *Notice:* the part that did NOT change

Before you move on

Which beginning means near? (**i-**) Far? (**a-**) And which one turns the word into a question? (**e-**)

Chapter 42

Describing Things

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can point at something in Telugu and ask who or where it is — and I can say what the six words have in common.
>
> *Say the near word, the far word and the question word in a row, and name the part that changed.*

42.1 పెద్ద (pedda) — big

> You can already name things. This is how you DESCRIBE them.

You'll want to know: పెద్ద

పెద్ద — *pedda* — big.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

పెద్ద (*pedda*) is native Dravidian, from the root for "great". DEDR 4411 lists *pedda*, "big, great, elder", itself, with Tamil *periya*, "large", and Kannada *pēr*, "great".

Your turn

Say these aloud:

- "పెద్ద" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *pedda*? (**big**.) Where does it go — before the word it describes, or after? (**Before.**)

42.2 చిన్న (cinna) — small

You can already name things. This is how you DESCRIBE them.

You'll want to know: చిన్న

చిన్న — *cinna* — small.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met **పెద్ద** *pedda* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

చిన్న (*cinna*) is native Dravidian, one word with Tamil *ciṉṉa*, Kannada *ciṇṇa* and Malayalam *cinna* (DEDR 2594).

Your turn

Say these aloud:

- "చిన్న" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *cinna*? (**small**.) Where does it go — before the word it describes, or after? (**Before.**)

42.3 మంచి (manci) — good

You can already name things. This is how you DESCRIBE them.

You'll want to know: మంచి

మంచి — *manci* — good.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met **చిన్న** *cinna* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

The origin of **మంచి** (*manci*) is uncertain. Neither DEDR nor CDIAL records it.

Your turn

Say these aloud:

- "**మంచి**" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *manci*? (**good**.) Where does it go — before the word it describes, or after? (**Before.**)

42.4 కొత్త (kotta) — new

You can already name things. This is how you DESCRIBE them.

You'll want to know: కొత్త

కొత్త — *kotta* — new.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met **మంచి** *manci* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

కొత్త (*kotta*) is native Dravidian. DEDR 2149 lists it as *krotta*, "new, fresh", beside Tamil *koḻuntu*, "tender shoot", and Kannada *koḍa*, "tenderness". DEDR compares Sanskrit *koraka*, "bud" (CDIAL 3527), which CDIAL itself takes from Dravidian.

Your turn

Say these aloud:

- "**కొత్త**" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *kotta*? (**new**.) Where does it go — before the word it describes, or after? (**Before.**)

42.5 పాత (pāta) — old — of a thing, not of a person

You can already name things. This is how you DESCRIBE them.

You'll want to know: పాత

పాత — *pāta* — old — of a thing, not of a person.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met **కొత్త** *kotta* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

పాత (*pāta*) is native Dravidian, one word with Tamil *paḻa* and Kannada *paḻe* (DEDR 3999). DEDR lists Telugu *pāta*, "old, worn out".

Your turn

Say these aloud:

- "**పాత**" three times, picturing something different each time
- it once with a word you already know after it

Before you move on

What is *pāta*? (**old — of a thing, not of a person.**) Where does it go — before the word it describes, or after? (**Before.**)

42.6 before the noun, unchanged — five words, one rule

Say the five words from this chapter out loud, then say each one in front of a noun you already know.

Grammar lens: where an adjective goes

You did not learn five separate words. You learned **where an adjective goes**, and five words that go there.

meaning	word
big	పెద్ద *pedda*
small	చిన్న *cinna*
good	మంచి *manci*

They sit in front of the noun and stay exactly as they are.
This is worth more than the five words are. Every noun you already know — your name, the house, the water, the day — can now take any of them in front, and every adjective you meet from here goes in the same place.

Your turn

- *Say it:* each of the five in front of a noun you already know
- *Say it:* two of them with the same noun, one after the other
- *Notice:* whether the adjective changed shape when the noun did

Before you move on

Where does an adjective go in this language? (**In front of the noun.**) Does it change shape to match the noun? (unchanged.)

Chapter 43

More Everyday Verbs

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can tell someone to come, sit, stand and give in Telugu.
>
> *Complete TE-C43-give and say all four verbs in order.*

43.1 రా (rā) — come

A short run of everyday verbs, one at a time.

You'll want to know: రా

రా (*rā*) — "come".

You met it beside its partner *vaccu-*; here it opens the run. The bare command, and one of the shortest words in the language: a single syllable that is a complete sentence. The old warning still holds: the tense endings attach to *vaccu-*, not to *rā*.

The word, taken apart — its roots and family

రా (*rā*) is native Dravidian: the command form of the verb DEDR 5270 lists as *vaccu*, "to come", one word with Tamil *varu* (command *vā*) and Kannada *bar* (command *bā*).

What you've built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

Say these aloud:

- *rā*
- it again, to someone standing in a doorway

Before you move on

What does రా mean? ("come".) Say it once more.

43.2 కూర్చో (kūrcō) — sit

Before the new one: what did *rā* mean?

You'll want to know: కూర్చో

కూర్చో (*kūrcō*) — "sit".

A command you will hear on entering any home, usually before anything else is said.

The word, taken apart — its roots and family

కూర్చో (*kūrcō*) is native Dravidian, the command form of *kūrcuṇḍu*, "to sit", which DEDR 1900 lists with Kannada *kūr*, "to sit down".

What you've built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

Say these aloud:

- *kūrcō*
- it again, to someone standing in a doorway
- it after *rā*, so the two sit together

Before you move on

What does కూర్చో mean? ("sit".) Say it once more.

43.3 నిల్చో (nilcō) — stand

Before the new one: what did *kūrcō* mean?

You'll want to know: నిల్చో

నిల్చో (*nilcō*) — "stand".

Its pair. Telugu, like the other Dravidian languages, makes the bare stem do the work of a command with nothing added.

The word, taken apart — its roots and family

నిల్చో (*nilcō*) is native Dravidian, the command form of *nilucu*, "to stand", one word with Tamil *nil* and Kannada *nillu* (DEDR 3675).

What you've built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

Say these aloud:

- *nilcō*
- it again, to someone standing in a doorway
- it after *kūrcō*, so the two sit together

Before you move on

What does నిల్చో mean? ("stand".) Say it once more.

43.4 ఇవ్వు (ivvu) — give

Before the new one: what did *nilcō* mean?

You'll want to know: ఇవ్వు

ఇవ్వు (*ivvu*) — "give".

The everyday 'give'. Softening it is done with a separate politeness word rather than by changing the verb.

The word, taken apart — its roots and family

ఇవ్వు (*ivvu*) is native Dravidian. DEDR 2598 lists the Telugu verb *iccu*, "to give", with the stem *ivv-*, beside Tamil *ī* and Kannada *ī*, "to give".

What you've built

One more everyday action. That closes the run: four everyday actions, each met on its own.

Your turn

Say these aloud:

- *ivvu*
- it again, to someone standing in a doorway
- it after *nilcō*, so the two sit together

Before you move on

What does ఇవ్వు mean? ("give".) Say it once more.

Chapter 44

Verbs of Seeing and Saying

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can tell someone to look, listen, speak and write in Telugu.
>
> *Complete TE-C44-write and say all four verbs in order.*

44.1 చూడు (cūḍu) — look

Four verbs for taking things in and putting them out, one at a time.

You'll want to know: చూడు

చూడు (*cūḍu*) — "look".

You met it earlier as "to see, to look"; here it opens the run. It also stretches to 'to look after', the same three meanings Kannada packs into *nōḍu*, although the two verbs themselves are not related.

The word, taken apart — its roots and family

చూడు (*cūḍu*) is native Dravidian. DEDR 2735 lists the Telugu verb *cūcu*, "to see, look at", with the stem *cūḍ-*, beside Kannada *cūpu*, "sight".

What you've built

One more. Three follow, and each reuses the ones before.

Your turn

Say these aloud:

- *cūḍu*
- it once more, slowly

Before you move on

What does **చూడు** mean? ("look".) Say it once more.

44.2 ఆలకించు (ālakiñcu) — listen

Before the new one: what did *cūḍu* mean?

You'll want to know: ఆలకించు

ఆలకించు (*ālakiñcu*) — "listen".

'Listen attentively' — a step above simply hearing. Telugu keeps listening and asking separate, where Kannada merges them into one stem.

The word, taken apart — its roots and family

ఆలకించు (*ālakiñcu*) is native Dravidian, one word with Kannada *ālisu* (DEDR 383). DEDR lists Telugu *ālakincu*, "to hear, listen".

What you've built

One more. Three follow, and each reuses the ones before.

Your turn

Say these aloud:

- *ālakiñcu*
- it once more, slowly
- it after *cūḍu*, so the two sit together

Before you move on

What does **ఆలకించు** mean? (“listen”.) Say it once more.

44.3 మాట్లాడు (māṭlāḍu) — speak

Before the new one: what did *ālakiñcu* mean?

You’ll want to know: మాట్లాడు

మాట్లాడు (*māṭlāḍu*) — “speak”.

From *māṭa*, ’word’, plus *āḍu*, ’to play’ — the same construction as Kannada’s *mātāḍu*, built from the same two pieces.

The word, taken apart — its roots and family

మాట్లాడు (*māṭlāḍu*) is native Dravidian: *māṭa*, “word”, and *āḍu*, “to play, move”. DEDR 4834 lists *māṭa* and *māṭal-āḍu*, “to speak”, with Kannada *mātu*, “word”; *āḍu* is DEDR 347.

What you’ve built

One more. Three follow, and each reuses the ones before.

Your turn

Say these aloud:

- *māṭlāḍu*
- it once more, slowly
- it after *ālakiñcu*, so the two sit together

Before you move on

What does **మాట్లాడు** mean? (“speak”.) Say it once more.

44.4 రాయి (rāyi) — write

Before the new one: what did *māṭlāḍu* mean?

You'll want to know: రాయి

రాయి (*rāyi*) — "write".

The everyday 'write'. Telugu and Kannada both kept the inherited Dravidian stem here rather than borrowing one.

The word, taken apart — its roots and family

రాయి (*rāyi*) is native Dravidian. DEDR 5263 lists Telugu *vrāyu* and *rāyu*, "to write", with Tamil *vari* and Kannada *bare*, "to write". DEDR compares, with a query, Prakrit *rajju*, "a writer".

What you've built

That closes the run: look, listen, speak, write.

Your turn

Say these aloud:

- *rāyi*
- it once more, slowly
- it after *māṭlāḍu*, so the two sit together

Before you move on

What does రాయి mean? ("write".) Say it once more.

Chapter 45

Grandparents, and the Married Pair

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name four more family and people words in this language.
>
> *Complete TE-C45-wife and say all four words in order.*

45.1 తాత (tāta) — grandfather

Before the new one: what did *rāyi* mean?

You'll want to know: తాత

తాత (*tāta*) — "grandfather".

It has the same small, repeatable shape as the *nānna* and *amma* you met in the family lesson. Sanskrit carries a *tāta* too, meaning 'father' or simply 'dear one'; Telugu moved the word up a generation. Children use it for any kindly old man, not only their own grandfather.

The word, taken apart — its roots and family

DEDR 3160 lists **తాత** (*tāta*) as Dravidian, one word with Tamil *tāttā* and Kannada *tāta*, "grandfather". DEDR compares Sanskrit *tāta*, "father" (CDIAL 5754).

What you've built

The first of four family words. Three follow, and each reuses the ones before.

Your turn

Say these aloud:

- *tāta*
- it once more, slowly
- it after *rāyi*, so the two sit together

Before you move on

What does **తాత** mean? ("grandfather".) Say it once more.

45.2 అమ్మమ్మ (ammamma) — grandmother, the mother's mother

Before the new one: what did *tāta* mean?

You'll want to know: అమ్మమ్మ

అమ్మమ్మ (*ammamma*) — "grandmother", and specifically your mother's mother.

Say it slowly and you can hear what it is made of: *amma* twice over, mother of mother. Telugu keeps the two grandmothers apart, and the father's mother is *nāyanamma*, assembled the same way on *nāyana*, 'father'. Nothing here is borrowed; every piece came from the family lesson.

The word, taken apart — its roots and family

అమ్మమ్మ (*ammamma*) is *amma*, "mother", twice over. *Amma* is native Dravidian, one word with Tamil *ammā* and Kannada *amma* (DEDR 183). DEDR compares Sanskrit *ambā*, "mother" (CDIAL 574).

What you've built

Two of four, and a word you could have decoded before you were taught it.

Your turn

Say these aloud:

- *ammamma*
- it once more, slowly, hearing the two halves
- it after *tāta*, so the two sit together

Before you move on

What does అమ్మమ్మ mean? ("grandmother", the mother's mother.) Say it once more.

45.3 భర్త (bharta) — husband

Before the new one: what did *ammamma* mean?

You'll want to know: భర్త

భర్త (*bharta*) — "husband".

Sanskrit, and it opens cleanly: the root *bhṛ*, 'to bear, to carry, to support', plus the ending that names the one who does it. So the word says 'the one who supports'. That root is old enough to have relatives far outside India — Latin *fero*, 'I carry', and English *bear* both continue it.

CDIAL 9402 lists Sanskrit *bhartṛ*, "husband, bearer".

What you've built

Three of four. The last word comes from the very same root.

Your turn

Say these aloud:

- *bharta*

- it once more, slowly
- it after *ammamma*, so the two sit together

Before you move on

What does భర్త mean? ("husband".) Say it once more.

45.4 భార్య (bhārya) — wife

Before the new one: what did *bharta* mean?

You'll want to know: భార్య

భార్య (*bhārya*) — "wife".

The same root *bhṛ* as the last word, with a different ending: 'she who is to be supported'. Two words, one root, and between them a picture of the household as Sanskrit's grammarians framed it rather than as anyone lives in it now. That is worth hearing plainly, because the shape of the pair is the reason it is easy to remember.

The word, taken apart — its roots and family

భార్య (*bhārya*) is Sanskrit *bhāryā*, "wife", taken over whole as a learned loan, a tatsama, with the final -*ā* shortened (CDIAL 9471).

What you've built

That closes the run: grandfather, grandmother, husband, wife.

Your turn

Say these aloud:

- *bhārya*
- it once more, slowly
- it after *bharta*, and name the root they share

Before you move on

What does భార్య mean? (“wife”.) Say it once more.

Chapter 46

Things You Ask For

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five everyday things I might ask someone for in Telugu, and say which of them Telugu has always had and which arrived from elsewhere.
>
> *Complete TE-C46-book and demonstrate the chapter promise.*

46.1 పండు (paṇḍu) — a fruit

Before the new run of words: what did *bhārya* mean?

You'll want to know: పండు

పండు (*paṇḍu*) — "a fruit".

పండు is also a verb: *to ripen.* The fruit is named for what happened to it — the ripened thing — and Telugu never troubled to invent a second noun. Say *paṇḍu* of a mango on the table and you mean the fruit; say it of the tree's crop and you mean it is coming ripe.

Kannada writes the same inherited word **ಹಣ್ಣು** (*haṇṇu*). That *p-* at the front turning into *h-* is a regular Kannada sound law, and it has already turned up once, on **పాలు** beside **ಹಾಲು**. Watch for it again.

The word, taken apart — its roots and family

పండు (*paṇḍu*) is native Dravidian, one word with Tamil *paḻu*, "to ripen", and Kannada *paṇṇu*, "ripe fruit" (DEDR 4004). DEDR lists the Telugu as both "to ripen" and "fruit". DEDR compares Sanskrit

phala, “fruit” (CDIAL 9051).

What you’ve built

The first of five things you might ask someone for.

Your turn

Say these aloud:

- *paṇḍu*
- it once more, slowly
- *paṇḍu*, then *dayacēsi paṇḍu ivvaṇḍi* — “please give a fruit”

Before you move on

What does పండు mean? (“a fruit”.) Say it once more.

46.2 బట్ట (baṭṭa) — cloth

Before the new one: what did *paṇḍu* mean?

You’ll want to know: బట్ట

బట్ట (*baṭṭa*) — “cloth”.

బట్ట is the plain word for cloth: the bolt on the shelf, the washing on the line, the rag in your hand.

Sanskrit has *paṭṭa*, “a strip of cloth, a bandage”, and here the borrowing may have run the unusual way — into Sanskrit from a non-Aryan source, rather than the other direction this book has shown so often. The same strip reached English by a different road: Hindi *paṭṭī*, a wrapping, is the soldier’s *puttee*.

The word, taken apart — its roots and family

The origin of **బట్ట** (*baṭṭa*) is uncertain, and DEDR does not list it. It is often set beside Sanskrit *paṭṭa*, “cloth, woven silk”, which CDIAL 7700 itself thinks probably came from a non-Aryan source, without naming which.

What you've built

Two: a fruit and a cloth.

Your turn

Say these aloud:

- *baṭṭa*
- it once more, slowly
- *paṇḍu*, then *baṭṭa*, and ask for each one with *dayacēsi*

Before you move on

What does **బట్ట** mean? ("cloth".) Say it once more.

46.3 దీపం (dīpaṁ) — a lamp

Before the new one: what did *baṭṭa* mean?

You'll want to know: దీపం

దీపం (*dīpaṁ*) — "a lamp".

దీపం is the small clay lamp with oil and a wick. Its Sanskrit root *dīp* means "to blaze", so the word names the burning rather than the vessel.

Put **దీప** together with a word meaning "a row" and you get *dīpāvaḷi*, "a row of lamps" — the festival English spells Diwali. The ending is the tatsama neuter **-ం**, the same shape already carried by **హృదయం** and **భోజనం**.

CDIAL 6348 lists Sanskrit *dīpa*, "lamp".

What you've built

Three: a fruit, a cloth, a lamp.

Your turn

Say these aloud:

- *dīpaṁ*

- it once more, slowly
- all three, then name the one that came in from Sanskrit

Before you move on

What does దీపం mean? ("a lamp".) Say it once more.

46.4 ఉప్పు (uppu) — salt

Before the new one: what did *dīpaṁ* mean?

You'll want to know: ఉప్పు

ఉప్పు (*uppu*) — "salt".

Proto-Dravidian had ***uppu**, and the whole family kept it almost untouched: Tamil உப்பு, Kannada ಉಪ್ಪು, Malayalam ഉപ്പ്. A word this ordinary gives nobody a reason to replace it.

Notice the doubled ప్ప in the middle. Telugu likes a consonant twice inside a short word — కుక్క, పిల్లి, కన్ను all do it — and the doubling is not decoration: it is the difference between one word and another.

DEDR 2674 lists Telugu *uppu*, "salt", with Tamil *uppu*, Kannada *uppu* and Malayalam *uppu*.

What you've built

Four. Three of them inherited, one borrowed.

Your turn

Say these aloud:

- *uppu*
- it once more, slowly
- all four in order, then say which one has not changed in three thousand years

Before you move on

What does ఉప్పు mean? ("salt".) Say it once more.

46.5 పుస్తకం (pustakaṁ) — a book

Before the new one: what did *uppu* mean?

You'll want to know: పుస్తకం

పుస్తకం (*pustakaṁ*) — "a book".

Sanskrit *pustaka* is the source, but the trail behind it leaves India altogether. Middle Persian *post* meant "hide, skin" — the thing written on before paper.

So the Telugu word for a book carries an animal skin folded up inside it, and it arrived by the same north-western road as రోజు, which turned out to be Persian too. Two of these five walked in from outside; three were always here.

CDIAL 8413 takes Sanskrit *pustaka* from Iranian, comparing Sogdian *pwstk*, "book", and Persian *pōst*, "skin".

What you've built

Five things you might ask for: a fruit, a cloth, a lamp, salt, a book.

Your turn

Say these aloud:

- *pustakaṁ*
- it once more, slowly
- all five in order, then sort them into the inherited and the borrowed

Before you move on

What does పుస్తకం mean? ("a book".) Say it once more.

Chapter 47

The Leg and the Tooth

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five more parts of the body in Telugu, and say which of them held their old shape and which wore down past recognition.
>
> *Complete TE-C47-stomach and demonstrate the chapter promise.*

47.1 కాలు (kālu) — leg, foot

> Before the new run: what did *pustakam* mean, and what did *uppu* mean?

You'll want to know: కాలు

కాలు (*kālu*) — "leg, foot".

Proto-Dravidian ***kāl**, and every sister kept it nearly whole: Tamil **கால்**, Kannada **ಕಾಲು**, Malayalam **കാൽ**.

Set that beside **చెయ్యి**, the hand-word, which wore down so far that its family resemblance is hard to see at all. Two body-words of the same age; one held its shape and one did not, and nothing about the meaning predicts which.

కాలు covers the whole limb, foot and leg together. When precision is wanted, Sanskrit's **పాదం** names the foot alone.

DEDR 1479 lists Telugu *kālu*, "leg, foot", with Tamil *kāl* and Kannada *kāl*.

What you've built

The first of five more body words.

Your turn

Say these aloud:

- *kālu*
- it once more, slowly
- *kālu*, then *tala*, so the top and the bottom sit together

Before you move on

What does కాలు mean? ("leg, foot".) Say it once more.

47.2 పన్ను (pannu) — a tooth

Before the new one: what did *kālu* mean?

You'll want to know: పన్ను

పన్ను (*pannu*) — "a tooth".

Proto-Dravidian ***pal**. Tamil kept பல்; Kannada has ಹಲ್ಲು, with that *p-* to *h-* law working again exactly where the last chapter said to watch for it. Telugu took a third road: DEDR 3986 lists *palu*, *pallu*, with the plural *paṇḍlu*, and explains *pannu* as built back from that plural.

An honest warning: పన్ను is also the word for a tax. Nothing joins the tooth to the tax but an accident of sound. Telugu has a fair number of these pairs, and context is the only fix — which is what context is for.

What you've built

Two: a leg and a tooth.

Your turn

Say these aloud:

- *pannu*

- it once more, slowly
- *kālu*, then *pannu*, and say which of the two also names something you pay

Before you move on

What does **పన్ను** mean? (“a tooth”.) Say it once more.

47.3 జుట్టు (juṭṭu) — hair (of the head)

Before the new one: what did *pannu* mean?

You’ll want to know: జుట్టు

జుట్టు (*juṭṭu*) — “hair (of the head)”.

జుట్టు is the hair on a head taken as one thing — the mass, not the strand. For a single hair Telugu reaches for a different noun, **వెంట్రుక**.

English leans on number for the same distinction — “a hair” against “hair” — while Telugu simply reaches for a different noun. **జుట్టు** also names the knot or tuft tied at the back of the head, which is most likely where the word started.

The word, taken apart — its roots and family

DEDR 2655 lists **జుట్టు** (*juṭṭu*) as Dravidian, one word with Tamil *cuṭṭi*, “tuft of hair”, and Kannada *juṭṭu*. DEDR compares Sanskrit *jūṭa*, “twisted hair” (CDIAL 5258), and notes that some words in the entry may be loans from Indo-Aryan.

What you’ve built

Three: a leg, a tooth, hair.

Your turn

Say these aloud:

- *juṭṭu*
- it once more, slowly
- *juṭṭu*, then *tala*, and say which one sits on the other

Before you move on

What does **జుట్టు** mean? ("hair (of the head)".) Say it once more.

47.4 వేలు (vēlu) — a finger

Before the new one: what did *juṭṭu* mean?

You'll want to know: వేలు

వేలు (*vēlu*) — "a finger".

Proto-Dravidian ***viral**. Tamil kept **விரல்** entire; Kannada has **ಬೆರಳು**; Telugu dropped the *-r-* and came out with **వేలు**. On the page the three look barely related, and they are the same word.

It is still working inside compounds: **బొటనవేలు**, the thumb, is the stubby one of the set.

DEDR 5409 lists Telugu *vēlu* and *vrēlu*, "finger, toe", with Tamil *viral* and Kannada *beraḷ*.

What you've built

Four. Note that **చెయ్యి** and **వేలు** are separate roots — Telugu does not build the finger out of the hand.

Your turn

Say these aloud:

- *vēlu*
- it once more, slowly
- *vēlu*, then *ceyyi*, and say which one has five of the other

Before you move on

What does **వేలు** mean? ("a finger".) Say it once more.

47.5 కడుపు (kaḍupu) — the stomach, the belly

Before the new one: what did *vēlu* mean?

You'll want to know: కడుపు

కడుపు (*kaḍupu*) — "the stomach, the belly".

కడుపు is the unfussy everyday word, and it carries the commonest way of saying you have eaten enough: *kaḍupu niṇḍindi*, "the stomach has filled".

It also says, gently and without ever being explicit, that a woman is expecting. Sanskrit's **ఉదరం** exists in Telugu and stays where the clinical register lives.

The word, taken apart — its roots and family

The origin of **కడుపు** (*kaḍupu*) is uncertain. Neither DEDR nor CDIAL records it.

What you've built

Five more body words: a leg, a tooth, hair, a finger, a belly. With **తల**, **చెయ్యి**, **కన్ను**, **ముక్కు**, **నోరు** and **చెవి** behind them, you can point at most of a person.

Your turn

Say these aloud:

- *kaḍupu*
- it once more, slowly
- all five in order, then add *tala* and *ceyyi* and say the seven as one list

Before you move on

What does **కడుపు** mean? ("the stomach, the belly".) Say it once more.

Chapter 48

Naming Who Someone Is

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can say what someone's role is in Telugu — teacher, student, doctor, farmer, guest — and name the root that two of those words share.
>
> *Complete TE-C48-guest and demonstrate the chapter promise.*

48.1 గురువు (guruvu) — a teacher

Before the new run: what did *kaḍupu* mean, and what did *vēlu* mean?

You'll want to know: గురువు

గురువు (*guruvu*) — "a teacher".

Sanskrit *guru* means "heavy". The teacher is the weighty one — the one whose word carries weight — and Telugu added its own **-వు** to make **గురువు**.

You have already said the word without being told. **గురువారం**, Thursday, is Guru's day: the guru there is Jupiter, the heaviest wanderer the naked eye can find and the teacher of the gods. Latin named the same weekday for Jove, which is the same planet under another name.

CDIAL 4209 lists Sanskrit *guru*, "heavy".

What you've built

The first of five roles.

Your turn

- *Say it: guruvu*
- *Say it:* it once more, slowly
- *Say it: guruvu*, then *guruvāraṁ*, and say what the two have in common
- *Recall:* say *paṇḍu*
- *Read it:* కాలు, then say what it means

Before you move on

What does గురువు mean? ("a teacher".) Say it once more.

48.2 విద్యార్థి (vidyārthi) — a student

Before the new one: what did *guruvu* mean?

You'll want to know: విద్యార్థి

విద్యార్థి (*vidyārthi*) — "a student".

Two Sanskrit pieces welded: *vidyā*, knowledge, and *arthin*, one who seeks. A student is a knowledge-seeker, and the word says so on its face.

vidyā grows from the root *vid*, "to know" — the same ancient root behind English *wit* and *wisdom*, and behind Latin *vidēre*, "to see". Knowing and seeing were one word long before either language existed.

CDIAL 11741 lists Sanskrit *vidyā*, "knowledge", and CDIAL 640 *arthin*, "desiring".

What you've built

Two: a teacher and a student.

Your turn

- *Say it: vidyārthi*
- *Say it:* it once more, slowly

- *Say it: guruvu*, then *vidyārthi*, and say which one seeks and which one weighs
- *Read it:* బట్ట
- *Recall:* say *pannu*

Before you move on

What does విద్యార్థి mean? ("a student".) Say it once more.

48.3 వైద్యుడు (vaidyuḍu) — a doctor, a physician

Before the new one: what did *vidyārthi* mean?

You'll want to know: వైద్యుడు

వైద్యుడు (*vaidyuḍu*) — "a doctor, a physician".

Look at the middle of it. *vaidya* is built on the very *vid* sitting inside విద్యార్థి: a physician is one versed in the knowledge, the knowledge in question being आयुर्वेद, the science of long life.

The ending -ుడు is not Sanskrit's but Telugu's own, marking a masculine person — the same -ుడు already carried by స్నేహితుడు.

The word, taken apart — its roots and family

వైద్యుడు (*vaidyuḍu*) is Sanskrit *vaidya*, "learned; physician", taken over whole as a learned loan, a tatsama, with the Telugu ending *-uḍu* (CDIAL 12140).

What you've built

Three roles, and two of them share a root.

Your turn

- *Say it: vaidyuḍu*
- *Say it:* it once more, slowly
- *Say it: vidyārthi*, then *vaidyuḍu*, and name the syllable they share

- *Recall:* say *dīpaṁ*, then read జూట్టు and say what it means

Before you move on

What does వైద్యుడు mean? (“a doctor, a physician”.) Say it once more.

48.4 రైతు (raitu) — a farmer

Before the new one: what did *vaidyuḍu* mean?

You’ll want to know: రైతు

రైతు (*raitu*) — “a farmer”.

రైతు came the long way round. Arabic *raᶜiyyah* meant a flock, then the people a ruler answers for. Persian and Urdu carried it into India as *raᶜīyat*, the subject, the tenant; the revenue clerks of the Deccan wrote it on their rolls; and Telugu kept it for the person who works the land.

That is a second arrival from the north-west, after రోజు (*rōju*) and పుస్తకం. The words that travel are the words that follow paperwork and trade.

What you’ve built

Four.

Your turn

- *Say it: raitu*
- *Say it:* it once more, slowly
- *Say it: raitu*, then *rōju*, and say what road the two have in common
- *Read it:* ఉప్పు
- *Recall:* say *vēlu*

Before you move on

What does రైతు mean? (“a farmer”.) Say it once more.

48.5 అతిథి (atithi) — a guest

Before the new one: what did *raitu* mean?

You'll want to know: అతిథి

అతిథి (*atithi*) — "a guest".

a-tithi — "one without a *tithi*", without a date on the calendar. The guest is defined by not being expected.

The old formula **అతిథి దేవో భవ**, "let the guest be a god to you", is built on exactly that: you cannot prepare for a god who arrives unannounced, so you keep the house ready instead. What a Telugu house actually does when the **అతిథి** arrives has a chapter of its own, at the end of this book.

The word, taken apart — its roots and family

అతిథి (*atithi*) is Sanskrit *atithi*, "guest", taken over whole as a learned loan, a tatsama. Its reading as *a-tithi*, "without a date", is a traditional explanation; where the Sanskrit word itself comes from is not settled.

What you've built

Five roles: a teacher, a student, a doctor, a farmer, a guest.

Your turn

- *Say it: atithi*
- *Say it:* it once more, slowly
- *Say it:* all five, then say *nā pēru* and your own name, and ask *mīru evaru?*
- *Recall:* say *pustakaṁ*
- *Read it:* **కడుపు**, then say what it means

Before you move on

What does **అతిథి** mean? ("a guest".) Say it once more.

Chapter 49

Answering With More Than Yes

Modes: **voice** (3) **eyes** (2) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can answer in Telugu with more than yes and no — true, enough, certainly, perhaps, just so — and see the three-vowel grid running under అది, ఇక్కడ and ఎలా.
>
> *Complete TE-C49-alright and demonstrate the chapter promise.*

49.1 నిజం (nijaṁ) — true; the truth

Before the new run: what did *atithi* mean?

You'll want to know: నిజం

నిజం (*nijaṁ*) — "true; the truth".

Sanskrit *nija* meant "one's own, innate" — what belongs to a thing by its nature. Telugu moved it one step: what belongs to a thing by nature is what is really so, and **నిజం** became the truth.

Alone it answers a doubt: *nijaṁ*, "true". With a question on the end it becomes perhaps the commonest interjection in the language: *nijamā?*, "really?"

CDIAL 7181 lists Sanskrit *nija*, "innate, one's own".

What you've built

The first of five answers that are neither **అవును** nor **లేదు**.

Your turn

- *Say it: nijaṁ*
- *Say it:* it once more, slowly
- *Say it: nijaṁ*, then *nijamā?*, and say which one asks
- *Recall:* say *kālu*
- *Read it:* గురువు, then say what it means

Before you move on

What does నిజం mean? ("true; the truth".) Say it once more.

49.2 చాలు (cālu) — enough, that will do

Before the new one: what did *nijaṁ* mean?

You'll want to know: చాలు

చాలు (*cālu*) — "enough, that will do".

చాలు is a verb — "it suffices" — used as a complete answer. Held over a glass being filled it stops the pouring; said of an argument it ends it.

చాలా, the everyday word for "very" and "a lot", is the same root wearing a different ending. Sufficiency and abundance sit one letter apart, which is a fair account of how the two ideas are related anywhere.

The word, taken apart — its roots and family

చాలు (*cālu*) is native Dravidian, one word with Tamil *cāl* and Kannada *sālu* (DEDR 2470). DEDR lists Telugu *cālu*, "to be enough", and *cāla*, "abundant".

What you've built

Two.

Your turn

- *Say it: cālu*

- *Say it:* it once more, slowly
- *Say it: cālu*, then *nijam*, and say which one you would use to stop someone pouring
- *Read it:* పన్ను
- *Recall:* say *vidyārthi*

Before you move on

What does చాలు mean? ("enough, that will do".) Say it once more.

49.3 తప్పకుండా (tappakuṇḍā) — certainly, without fail

Before the new one: what did *cālu* mean?

You'll want to know: తప్పకుండా

తప్పకుండా (*tappakuṇḍā*) — "certainly, without fail".

Take it apart: **తప్పు** + **-కుండా** → **తప్పకుండా**. The first piece means "to miss, to slip, to go wrong"; the second is the ending meaning "without doing". So **తప్పకుండా** is *without missing*.

The ending is worth having on its own, because it attaches to any verb stem: *ceppakuṇḍā*, without telling; *tinakuṇḍā*, without eating. One suffix, and every verb you own gains a negative.

The word, taken apart — its roots and family

తప్పకుండా (*tappakuṇḍā*) is native Dravidian: *tappu*, "to miss, to fail", which DEDR 3071 lists with Tamil *tappu*, "to err", and Kannada *tappu*, "to slip", followed by the ending *-kuṇḍā*, "without".

What you've built

Three.

Your turn

- *Say it: tappakuṇḍā*

- *Say it:* it once more, slowly
- *Say it: tappakuṇḍā*, then *cālu*, and say which one is a promise
- *Recall:* say *juṭṭu*
- *Read it:* వైద్యుడు, then say what it means

Before you move on

What does తప్పకుండా mean? ("certainly, without fail".) Say it once more.

49.4 ఏమో (ēmō) — perhaps, who knows

Before the new one: what did *tappakuṇḍā* mean?

You'll want to know: ఏమో

ఏమో (*ēmō*) — "perhaps, who knows".

ఏమో is a shrug made into a word: perhaps, it may be so, who knows.

Look at the front of it and you will find the questioning **ఏ-** that already stands in **ఏమిటి**, "what". **ఏమో** is that question with the asking taken out and only the uncertainty left behind.

It also hangs on the end of a whole sentence, where English would need a separate clause: *vastāḍēmō*, "he may come". A language with a settled, unembarrassed word for not knowing is telling you something about its manners.

The word, taken apart — its roots and family

ఏమో (*ēmō*) is native Dravidian: *ēmi*, "what", which DEDR 5151 lists on the question base *e-*, with the doubting ending *-ō*.

What you've built

Four.

Your turn

- *Say it: ēmō*

- *Say it:* it once more, slowly
- *Say it:* *ēmō*, then *tappakuṇḍā*, and say which one commits you
- *Recall:* read **వేలు**, then say *raitu*

Before you move on

What does **ఏమో** mean? (“perhaps, who knows”.) Say it once more.

49.5 అలాగే (alāgē) — just so, alright then

Before the new one: what did *ēmō* mean?

You’ll want to know: అలాగే

అలాగే (*alāgē*) — “just so, alright then”.

అలా means “in that way”; **-గే** is the small emphatic tail that makes it “just so”. **అలాగే** is the yes you give to an instruction — not “that is correct” but “it shall be as you said”.

Now look at the front of it. **అ-** points far, and already carries **అది**, “that one”, and **అక్కడ**, “there”. **ఇ-** points near: **ఇది**, **ఇక్కడ**, and so **ఇలా**, “in this way”. **ఎ-** asks: **ఎక్కడ**, **ఎలా**. Three vowels, one grid, and **అలాగే** is simply the far corner of it with an ending stuck on.

The word, taken apart — its roots and family

అలాగే (*alāgē*) is native Dravidian: *alā*, “in that way”, built on the far-pointing base *a-* (DEDR 1), with the emphatic tail *-gē*.

What you’ve built

Five answers, and a three-way grid you can now see running under **అది**, **ఇక్కడ** and **ఎలా**.

Your turn

- *Say it:* *alāgē*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say *alāgē* as a reply to *dayacēsi kūrcō*

- *Recall:* say *kaḍupu*, then read అతిథి and say what it means

Before you move on

What does అలాగే mean? (“just so, alright then”.) Say it once more.

Chapter 50

Taking Your Leave

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can take my leave in Telugu the way a Telugu speaker actually does, and say why the flat "I am going" is the one thing never said at a door.
>
> *Complete TE-C50-farewell and demonstrate the chapter promise.*

50.1 ఇప్పుడు (ippuḍu) — now

Before the new run: what did *alāgē* mean?

You'll want to know: ఇప్పుడు

ఇప్పుడు (*ippuḍu*) — "now".

The grid from the last chapter has a time row, and this is its near corner. **-ప్పుడు** is the time-piece; put a pointing vowel in front of it and the word makes itself.

ఇప్పుడు is "this time" — now. **అప్పుడు** is "that time" — then. **ఎప్పుడు** is "which time" — when? You already owned the vowels; the row costs you one word.

The word, taken apart — its roots and family

ఇప్పుడు (*ippuḍu*) is native Dravidian: the near-pointing *i-*, "this", and *-ppuḍu*, "time". DEDR 410 lists *ippuḍu*, "this time, now", and DEDR 4559 sets it beside *poddu*, "time, sun", with Tamil *po̲lutu*, "time".

What you've built

Now — and a shape that gives you two more words for free.

Your turn

- *Say it: ippuḍu*
- *Say it:* it once more, slowly
- *Say it: ippuḍu*, then *ippuḍu veḷḷu* — "go now"
- *Recall:* say *guruvu*
- *Read it:* **నిజం**, then say what it means

Before you move on

What does **ఇప్పుడు** mean? ("now".) Say it once more.

50.2 ఎల్లుండి (elluṇḍi) — the day after tomorrow

Before the new one: what did *ippuḍu* mean?

You'll want to know: ఎల్లుండి

ఎల్లుండి (*elluṇḍi*) — "the day after tomorrow".

One settled noun for the day after tomorrow. English needs four words and still sounds unsure of itself; Telugu, like its sisters, simply has the word.

There is an older tomorrow hiding at the front of it. **ఎల్లి** once meant tomorrow, and though **రేపు** took that job in everyday speech, **ఎల్లి** is still in service inside **ఎల్లుండి**, doing its old work one day further out.

The word, taken apart — its roots and family

ఎల్లుండి (*elluṇḍi*) is native Dravidian. DEDR 845 lists Telugu *elli*, "tomorrow", and *elluṇḍi*, "the day after tomorrow", itself.

What you've built

Two: now, and the day after tomorrow.

Your turn

- *Say it: elluṇḍi*
- *Say it:* it once more, slowly
- *Say it: ippuḍu*, then *elluṇḍi*, and say which one is further off
- *Read it:* విద్యార్థి
- *Recall:* say *cālu*

Before you move on

What does ఎల్లుండి mean? ("the day after tomorrow".) Say it once more.

50.3 ప్రయాణం (prayāṇaṁ) — a journey

Before the new one: what did *elluṇḍi* mean?

You'll want to know: ప్రయాణం

ప్రయాణం (*prayāṇaṁ*) — "a journey".

Sanskrit *pra-yāṇa*: the root *yā*, "to go", with *pra-*, "forth". A journey is a going-forth, and the word is transparent to anyone holding the pieces.

The ending is the -ం you have now sorted three times: the tatsama neuter, as on దీపం, హృదయం and భోజనం. When a Telugu noun ends in -ం and names an abstraction, Sanskrit is usually behind it.

CDIAL 8732 lists Sanskrit *prayāṇa*, "setting out, journey".

What you've built

Three.

Your turn

- *Say it: prayāṇaṁ*
- *Say it:* it once more, slowly
- *Say it: prayāṇaṁ*, then *dīpaṁ*, and name the ending they share
- *Recall:* say *vaidyuḍu*

- *Read it:* తప్పకుండా, then say what it means

Before you move on

What does ప్రయాణం mean? ("a journey".) Say it once more.

50.4 బయలుదేరు (bayaludēru) — to set out, to start off

Before the new one: what did *prayāṇaṁ* mean?

You'll want to know: బయలుదేరు

బయలుదేరు (*bayaludēru*) — "to set out, to start off".

Native, and a picture rather than an abstraction. **బయలు** is open ground, the outside, and the verb **దేరు** follows it: to set out is to come out into the open.

Set it beside **ప్రయాణం** (*prayāṇaṁ*) and you have two languages building the same idea from opposite ends: Sanskrit from the going, Telugu from the doorstep.

The word, taken apart — its roots and family

The first piece of **బయలుదేరు** (*bayaludēru*) is native Dravidian: *bayalu*, which DEDR 3940 lists as "outside, exterior" and DEDR 5258 as "open space, plain", with Tamil *vayal*, "open space". DEDR does not settle the second piece.

What you've built

Four.

Your turn

- *Say it: bayaludēru*
- *Say it:* it once more, slowly
- *Say it: bayaludēru*, then *prayāṇaṁ*, and say which of the two is inherited
- *Read it:* రైతు

- *Recall:* say *ēmō*

Before you move on

What does **బయలుదేరు** mean? ("to set out, to start off".) Say it once more.

50.5 వెళ్ళొస్తాను (veḷḷostānu) — I'll go and come back — the everyday goodbye

Before the new one: what did *bayaludēru* mean?

You'll want to know: వెళ్ళొస్తాను

వెళ్ళొస్తాను (*veḷḷostānu*) — "I'll go and come back — the everyday goodbye".

Two verbs you already have, welded at the seam: **వెళ్ళి**, "having gone", and **వస్తాను**, "I will come". **వెళ్ళొస్తాను** is *I'll go and come back*, and it is what is said at the door.

What is not said is the flat "I am going". Leaving without the returning half is what is said of the dead, and the rule holds right across the South. The politeness here is not decoration laid over the grammar; it is the grammar. The reply comes back in the same shape: **వెళ్ళి రండి** — "go, and come".

The word, taken apart — its roots and family

వెళ్ళొస్తాను (*veḷḷostānu*) is two native Dravidian verbs run together: *veḷḷi*, "having gone" (DEDR 5393), and *vastānu*, "I will come", from *vaccu* (DEDR 5270).

What you've built

Five: **ఇప్పుడు**, **ఎల్లుండి**, **ప్రయాణం**, **బయలుదేరు**, and a goodbye that refuses to be one.

Your turn

- *Say it: veḷḷostānu*
- *Say it:* it once more, slowly
- *Say it: veḷḷostānu*, then the reply *veḷḷi raṇḍi*, and say why neither half stands alone

- *Recall:* say *atithi*
- *Read it:* అలాగే, then say what it means

Before you move on

What does వెళ్ళొస్తాను mean? ("I'll go and come back — the everyday goodbye".) Say it once more.

Chapter 51

Courtesy Words

Modes: **voice** (5) **eyes** (1) **pen** (3) **Hands-free start:** the first of 9 lessons.

> ***By the end of this chapter:*** I can be polite in Telugu beyond thank you — gratitude, a good turn, respect, a blessing, a salutation — and name the piece that two of those words share.
>
> *Complete TE-C51-salutation and demonstrate the chapter promise.*

51.1 కృతజ్ఞత (kṛtajñata) — gratitude

Before the new run: what did *veḷḷostānu* mean?

You'll want to know: కృతజ్ఞత

కృతజ్ఞత (*kṛtajñata*) — "gratitude".

kṛta, "done", plus *jña*, "knowing": knowing what was done for you. That is the whole of gratitude in two Sanskrit syllables, and Telugu took it entire.

Set it beside **ధన్యవాదములు**, the thank-you from the first pages of this book, which is "utterances of 'worthy'". One word thanks by calling the giver worthy. The other thanks by admitting the debt is remembered. They are not the same gesture, and Telugu keeps both.

The word, taken apart — its roots and family

కృతజ్ఞత (*kṛtajñata*) is Sanskrit *kṛtajñatā*, "gratitude", from *kṛtajña*, "knowing what has been done", taken over as a learned loan, a tatsama, with the final -*ā* shortened.

What you've built

A second word for thanks, with a different picture inside it.

Your turn

- *Say it: kṛtajñata*
- *Say it:* it once more, slowly
- *Say it: kṛtajñata*, then *dhanyavādamulu*, and say which one remembers a debt
- *Recall:* say *nijaṁ*
- *Read it:* ఇప్పుడు, then say what it means

Before you move on

What does కృతజ్ఞత mean? ("gratitude".) Say it once more.

51.2 ఞ — one character, met inside a word you already say

Before the new one: ృ — what does it do? And one from further back: భ?

One character this time — and you have been saying it since the page before this one, without knowing which mark on the page it was.

Script you'll notice: ఞ

ఞ — *ña.*

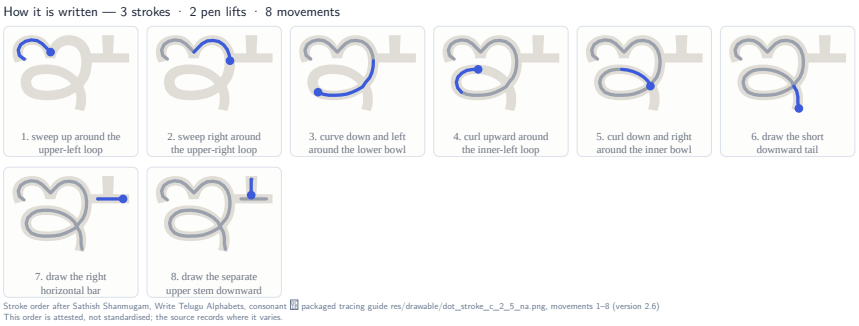
It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ñ*, it is **ña**.

It is a nasal, made where య is made — the middle of the tongue against the roof of the mouth, the sound in the middle of Spanish *señor*. In modern Telugu you will almost never meet it standing on its own. Where it lives is inside one stacked block, and you met that block a moment ago:

- కృతజ్ఞత *kṛtajñata* — gratitude

The block is జ్ఞ: జ with ఞ stacked under it, joined by the virama. Telugu does not say that block the way its two letters would suggest. Spelled *jña*, it comes out of the mouth closer to **gnya** — so *kṛtajñata* is heard as *kṛtagnyata*. Both facts are true at once, and this is one of the places where Telugu's spelling remembers Sanskrit while Telugu's mouth has moved on.

Writing: ఞ — eight deliberate movements



How ఞ is written, stroke by stroke

Follow the filmstrip slowly. Movements 1 and 2 trace the two upper loops. Movements 3–6 build the lower bowl, its inner turns and the short tail. Draw the right bar as movement 7, then finish with the separate upper stem as movement 8.

This is one attested school-style order. Telugu handwriting varies, so keep the eight directions clear and let the rounded shape grow from them.

Your turn

- *Look:* at కృతజ్ఞత, and find the block that has ఞ under it

  కృతజ్ఞత · ధన్యవాదములు

- *Trace it:* ఞ once, following all eight numbered movements
- *Copy:* ఞ twice without tracing, saying *ña* as you finish each one
- *Say it: kṛtajñata* the way it is said — *kṛtagnyata*

Before you move on

Which character is this — ఞ? Which letter does it usually sit under, and what does that pair sound like? (**Under జ, in the block జ్ఞ, said *gnya*.**)
One more, from much earlier: ై — what does it do?

51.3 మేలు (mēlu) — a good turn, a benefit

Before the new one: what did *kṛtajñata* mean?

You'll want to know: మేలు

మేలు (*mēlu*) — "a good turn, a benefit".

Inherited, and short. **మేల్** meant "above"; the good is what is above. From it Telugu draws **మేలు**, a benefit or a good turn done to someone, and also the plain comparative sense of "better".

So *idi mēlu* says "this one is higher" and lets the height do the judging — which is what English does too, in *superior*, without anyone noticing any more.

The word, taken apart — its roots and family

మేలు (*mēlu*) is native Dravidian, one word with Tamil *mē* and Kannada *mē* (DEDR 5086). DEDR lists Telugu *mēlu*, "good, advantage, better".

What you've built

Two.

Your turn

- *Say it: mēlu*
- *Say it:* it once more, slowly
- *Say it: mēlu*, then *manci*, and say which one is a thing done and which is a quality
- *Read it:* చాలు

- *Recall:* say *elluṇḍi*

Before you move on

What does **మేలు** mean? ("a good turn, a benefit".) Say it once more.

51.4 గౌరవం (gauravaṁ) — respect

Before the new one: what did *mēlu* mean?

You'll want to know: గౌరవం

గౌరవం (*gauravaṁ*) — "respect".

gaurava is the abstract noun of *guru* — the very word met one chapter ago as the teacher. Respect is weightiness: to hold someone in **గౌరవం** is to grant that what they say has mass.

Telugu marks the same idea in its grammar as well as its vocabulary. **మీరు** rather than **నువ్వు**, and the **-అండి** hung on the end of a verb, are **గౌరవం** turned into endings. A language can be polite in its words or in its shapes, and this one does both.

The word, taken apart — its roots and family

గౌరవం (*gauravaṁ*) is Sanskrit *gaurava*, "weight; venerableness", taken over whole as a learned loan, a tatsama, with the Telugu noun ending *-ṁ* (CDIAL 4346).

What you've built

Three, and one of them is a word you already knew wearing a different suit.

Your turn

- *Say it: gauravaṁ*
- *Say it:* it once more, slowly
- *Say it: gauravaṁ*, then *guruvu*, and name the syllable they share
- *Recall:* say *tappakuṇḍā*

- *Read it:* ప్రయాణం, then say what it means

Before you move on

What does గౌరవం mean? ("respect".) Say it once more.

51.5 ౌ— one character, met inside a word you already say

Before the new one: ఈ — what does it do? And one from further back: ము?

One character this time — and you have been saying it since the page before this one, without knowing which mark on the page it was.

Script you'll notice: ౌ

ౌ — *au*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *au*. Replaces, not adds — the *a* is gone.

Au is one vowel that moves while you hold it: it starts where *a* starts and slides toward *u*, the way the middle of English *now* does. Say it as one sound, not as two.

You already say this one:

- గౌరవం *gauravaṁ* — respect

Take it apart: గ, the letter you traced long before this, carrying ౌ. Not *ga* any more — **gau**. Then ర, వ, and the anusvāra ం that has been closing words since *namaskāram*. Every piece of *gauravaṁ* now has a name, and this mark was the last one missing.

Writing: ౌ— copy what you see

Put your pen on ౌand follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing,

taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these two, and say which one carries ౌ

  గౌరవం · గురువు

- *Say it: ga*, then *gau*, and hear the vowel move
- *Trace it:* ౌthree times, saying *au* as you finish each one

Before you move on

Which character is this — ౌ? What vowel does it put on the consonant it attaches to, and what does it take off? (**Puts *au* on; takes the built-in *a* off.**) Name the word you already say that contains it.
One more, from much earlier: ఖ — what does it do?

51.6 ఆశీర్వాదం (āśīrvādaṁ) — a blessing

Before the new one: what did *gauravaṁ* mean?

You'll want to know: ఆశీర్వాదం

ఆశీర్వాదం (*āśīrvādaṁ*) — "a blessing".

āśīs, a wish or a prayer, plus *vāda*, an utterance: a blessing is a wish said out loud.

The ceremony behind it is still in daily use. You bend and touch an elder's feet, and what comes back is **ఆశీర్వాదం** — a hand on the head — at a birthday, before an examination, at a wedding, and at every departure.

Notice *vāda* sitting there. It is the same piece inside **ధన్యవాదములు**, "utterances of 'worthy'". Twice now this language has counted a thing said as a thing given.

The word, taken apart — its roots and family

ఆశీర్వాదం (*āśīrvādaṁ*) is Sanskrit *āśīrvāda*, "blessing", taken over whole as a learned loan, a tatsama: *āśis*, "wish, blessing" (CDIAL 1457), and *vāda*, "utterance" (CDIAL 11507).

What you've built

Four courtesy words, and two of them are utterances by name.

Your turn

- *Say it:* *āśīrvādaṁ*
- *Say it:* it once more, slowly
- *Say it:* *āśīrvādaṁ*, then *dhanyavādamulu*, and name the piece they share
- *Read it:* ఏమో
- *Recall:* say *bayaludēru*

Before you move on

What does ఆశీర్వాదం mean? ("a blessing".) Say it once more.

51.7 ఇ · ొ— the two you were saying before you could see them

Cover the two words this chapter taught for *gratitude* and for *respect*. From memory, say which character sits inside each one.

Script: a letter you rarely see alone, and a sign that replaces what it lands on

ఇ · ొ

These two are opposites in how they behave, which is the thing worth holding:

character	how it behaves
ఞ *ña*	a consonant, almost never standing alone — it lives stacked under జ
◌ౌ *au*	a vowel sign, never standing alone — it replaces the *a* inside a consonant

In కృతజ్ఞత the stack జ్ఞ is spelled *jña* and comes out of the mouth closer to *gnya*. In గౌరవం the గ stops being *ga* the moment the sign lands on it and becomes *gau*.

One is a shape you will hardly ever see by itself; the other changes a shape you see constantly. Neither adds a sound beside the letter — one hides inside a block, the other overwrites what was already there.

Your turn

- *Look:* at కృతజ్ఞత and find the two-letter stack
- *Look:* at గౌరవం and name the letter underneath the sign
- *Say it: ga*, then *gau* — one sound sliding, not two sounds in a row
- *Trace it:* the stack once, and the sign once

Before you move on

Where does ఞ live in modern Telugu? (**Stacked under జ**, as జ్ఞ.) How is that stack spelled, and how is it said? (**Spelled *jña*, said closer to *gnya*.**) What does ◌ౌ do to the letter it lands on? (**Replaces the *a* inside it with *au*.**) And which word of this chapter carries each? (కృతజ్ఞత and గౌరవం.)

51.8 దండం (daṇḍaṁ) — a salutation, "my respects"

Before the new one: what did *āśīrvādaṁ* mean?

You'll want to know: దండం

దండం (*daṇḍaṁ*) — "a salutation, "my respects"".

దండం is what you say with the palms together — my respects — offered to an elder, a temple, a photograph on the wall. Children are taught to say it long before anyone explains it.

Sanskrit *daṇḍa* is a staff, a stick. The full form of the gesture, *daṇḍa-praṇāma*, is the prostration where the body lies down straight as a staff. Telugu kept the word and let the body straighten most of the way up.

Hold on to **దండ**; a word of the same shape comes back in the next chapter carrying flowers.

CDIAL 6128 lists Sanskrit *daṇḍa*, "stick, staff", which it thinks probably non-Aryan; the greeting is usually explained through *daṇḍa-praṇāma*, the full prostration.

What you've built

Five courtesy words: **కృతజ్ఞత**, **మేలు**, **గౌరవం**, **ఆశీర్వాదం**, **దండం**. Thanks, a good turn, respect, a blessing, and the greeting you make with your hands.

Your turn

- *Say it:* *daṇḍaṁ*
- *Say it:* it once more, slowly
- *Say it:* *daṇḍaṁ*, then *namaskāraṁ*, and say which one you would give a grandparent
- *Recall:* say *alāgē*
- *Read it:* **వెళ్ళొస్తాను**, then say what it means

Before you move on

What does **దండం** mean? ("a salutation, "my respects"".) Say it once more.

51.9 ఇ · ొ — from the sound, with nothing to copy

Cover both courtesy words and the page before this one.
Nothing to copy and nothing to uncover.

Writing — dictation

Say *gau* aloud and write it: the letter ಗ, then the sign that makes it *gau*. Once.

Then say *gnya* aloud and write the block it is spelled with. This is the harder of the two, because your ear is being asked for one thing and your hand for another — the mouth says *gnya* and the page wants ಜ್ಞ.

Before you move on

Uncover the two words and compare. Then notice what each of the two asked of you. The sign was a matter of hearing one sliding vowel and putting one mark in the right place. The stack was not a matter of hearing at all — the sound your mouth makes and the letters the page keeps have drifted apart, and only the spelling remembers where the word came from.

Chapter 52

Welcoming a Guest

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the five things a Telugu welcome puts between the street and the guest, from the mark on the ground to the garland.
>
> *Complete TE-C52-garland and demonstrate the chapter promise.*

52.1 తలుపు (talupu) — a door

> Before the last run: what did *daṇḍaṁ* mean, and what did *gauravaṁ* mean?

You'll want to know: తలుపు

తలుపు (*talupu*) — "a door".

తలుపు is the leaf: the panel that swings and shuts. The opening it fills is a different word — **వాకిలి** in everyday speech, **ద్వారం** in the formal Sanskrit register. Telugu keeps the hole and the thing that fills it apart, which English manages only when it is being careful.

తలుపు is inherited. That **ద్వారం** sits beside it doing no daily work is the usual arrangement here: the old word carries the load, the borrowed one keeps the ceremony.

The word, taken apart — its roots and family

తలుపు (*talupu*) is native Dravidian. DEDR 3123 lists *talupu*, "door", in an entry with Tamil *taḷ*, "to hinder, obstruct", and Kannada *taḷ*,

"impediment".

What you've built

The first of five things standing between the street and a guest.

Your turn

- *Say it: talupu*
- *Say it:* it once more, slowly
- *Say it: talupu*, then *ikkaḍa talupu undi* — "there is a door here"
- *Recall:* say *ippuḍu*
- *Read it:* కృతజ్ఞత, then say what it means

Before you move on

What does తలుపు mean? ("a door".) Say it once more.

52.2 కుర్చీ (kurcī) — a chair

Before the new one: what did *talupu* mean?

You'll want to know: కుర్చీ

కుర్చీ (*kurcī*) — "a chair".

Arabic *kursī* is a seat, a throne — the word standing in the Qur'ān's Throne Verse. Persian took it, Urdu carried it across the Deccan, and Telugu has కుర్చీ.

The word came because the thing came. A house welcoming a guest before the chair arrived offered a పీట, a low wooden plank set on the floor, and many still do. Borrowed furniture brings borrowed nouns with it.

One trap: కుర్చీ and కూర్చో, "sit", look like a pair and are not. The verb is inherited, the noun is Arabic, and the resemblance is an accident. Sound alone never proves a relation.

What you've built

Two: a door and a chair.

Your turn

- *Say it: kurcī*
- *Say it:* it once more, slowly
- *Say it: kurcī*, then *kūrcō*, and say why the two are not related
- *Read it:* ఎల్లుండి
- *Recall:* say *mēlu*

Before you move on

What does కుర్చీ mean? ("a chair".) Say it once more.

52.3 ముగ్గు (muggu) — the rice-flour design drawn at the doorstep

Before the new one: what did *kurcī* mean?

You'll want to know: ముగ్గు

ముగ్గు (*muggu*) — "the rice-flour design drawn at the doorstep".

ముగ్గు is the design put on the ground outside the door, in rice flour, before the sun is up. It is walked over all day and drawn again the next morning.

The flour is the point. It is laid where ants and birds will find it, so the welcome begins by feeding something smaller than a guest. Tamil calls the same act கோலம், Kannada ರಂಗೋಲಿ. The word is local; the practice is not.

The word, taken apart — its roots and family

The origin of ముగ్గు (*muggu*) is uncertain. DEDR lists no word of this shape in this sense, and CDIAL has nothing for it.

What you've built

Three: the door, the chair, and the mark on the ground in front of both.

Your turn

- *Say it: muggu*
- *Say it:* it once more, slowly
- *Say it: muggu*, then *talupu*, and say which one is outside the other
- *Recall:* say *prayāṇaṁ*
- *Read it:* గౌరవం, then say what it means

Before you move on

What does ముగ్గు mean? ("the rice-flour design drawn at the doorstep".) Say it once more.

52.4 పువ్వు (puvvu) — a flower

Before the new one: what did *muggu* mean?

You'll want to know: పువ్వు

పువ్వు (*puvvu*) — "a flower".

Proto-Dravidian ***pū**, and the family kept it: Tamil பூ, Malayalam പൂ, Kannada ಹೂವು.

There is that *p-* to *h-* once more on the Kannada side — the third time in this book, after పాలు beside ಹಾಲು and పండు beside ಹಣ್ಣು. A sound law you have watched work three times has stopped being a claim; it is a pattern you can predict with, and predicting is the only test a sound law ever gets.

The plural stem is పూల-, which is about to matter.

DEDR 4345 lists Telugu *pū*, *pūvu* and *puvvu*, "flower", with Tamil *pū* and Kannada *pūvu*. DEDR compares, with a query, Sanskrit *puṣpa*, "flower" (CDIAL 8303).

What you've built

Four.

Your turn

- *Say it: puvvu*
- *Say it:* it once more, slowly
- *Say it: puvvu*, then *paṇḍu*, and say what the two share at the front
- *Read it:* బయలుదేరు
- *Recall:* say *āśīrvādaṁ*

Before you move on

What does పువ్వు mean? ("a flower".) Say it once more.

52.5 పూలదండ (pūladaṇḍa) — a flower garland

Before the new one: what did *puvvu* mean?

You'll want to know: పూలదండ

పూలదండ (*pūladaṇḍa*) — "a flower garland".

పూల, flowers, and దండ, a garland. It looks like the దండ of దండం, the salutation, one chapter back, but this one is Dravidian: DEDR 3060 lists it with Kannada *daṇḍe*, "garland, wreath". A పూలదండ is a garland of flowers, strung.

So the greeting and the garland only sound alike. You say దండం with your hands; you put పూలదండ round a neck.

And that closes the welcome: the ముగ్గు on the ground, the తలుపు opened, the కుర్చీ offered, and a పూలదండ of పువ్వులు for the అతిథి who sent no word ahead.

What you've built

Five: తలుపు, కుర్చీ, ముగ్గు, పువ్వు, పూలదండ. A guest can now be met at the door and seated.

Your turn

- *Say it: pūladaṇḍa*
- *Say it:* it once more, slowly

- *Say it:* all five in order, then say *namaskāraṁ* as you would at the door to an *atithi*
- *Recall:* say *veḷḷostānu*
- *Read it:* దండం, then say what it means

Before you move on

What does పూలదండ mean? (“a flower garland”.) Say it once more.

Chapter 53

The Sky

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five things overhead in Telugu, and say which of them Telugu borrowed and which it has always had.
>
> *Complete TE-C53-cloud and demonstrate the chapter promise.*

53.1 ఆకాశం (ākāśaṁ) — the sky

Before the new one: what did *pūladaṇḍa* mean?

You'll want to know: ఆకాశం

ఆకాశం (*ākāśaṁ*) — "the sky".

ఆకాశం came from Sanskrit *ākāśa*, built on a piece meaning "to shine, to be seen". So the sky is named for being the open, lit place where a thing can be visible at all, rather than for being a lid over the world.

Telugu also holds an inherited word for the same overhead space, **నింగి**, which owes Sanskrit nothing. The two sit side by side: **ఆకాశం** does the ordinary work and turns up in newspapers and weather talk, while **నింగి** keeps to songs and poetry. A borrowed word taking the daily shift and leaving the old one the ceremony is an arrangement you have watched before, with the door.

ākāśa travelled, too. Traders carried it east, and Malay and Indonesian still say *angkasa* for the sky.

CDIAL 1008 lists Sanskrit *ākāśa*, "sky".

What you've built

The space that the rest of this chapter hangs in.

Your turn

- *Say it:* *ākāśaṁ*
- *Say it:* it once more, slowly
- *Say it:* *ākāśaṁ*, then *namaskāraṁ*, as you would greet somebody outdoors
- *Recall:* say *kṛtajñata*
- *Read it:* **తలుపు**, then say what it means

Before you move on

What does **ఆకాశం** mean? ("the sky".) Say it once more.

53.2 సూర్యుడు (sūryuḍu) — the sun

Before the new one: what did *ākāśaṁ* mean?

You'll want to know: సూర్యుడు

సూర్యుడు (*sūryuḍu*) — "the sun".

Sanskrit *sūrya* is the sun. Telugu took the word and hung **-డు** on the end, the ending it puts on a man's name and on the words for men doing work — the same **-డు** that stands at the end of **రైతు**'s formal cousin and of **వైద్యుడు**.

That ending is doing something real here. **సూర్యుడు** is the sun as a person: the one who drives, who is greeted, who is asked for things. Telugu has a plainer inherited word for the thing in the sky, **పొద్దు**, which you already have, and **పొద్దు** is what you use to say the sun came up.

So one language keeps two suns: **పొద్దు** for the light, **సూర్యుడు** for the god.

CDIAL 13574 lists Sanskrit *sūrya*, "sun".

What you've built

Two: the sky, and the brightest thing in it.

Your turn

- *Say it: sūryuḍu*
- *Say it:* it once more, slowly
- *Say it: sūryuḍu*, then *poddu*, and say which one of them can be prayed to
- *Read it:* మేలు
- *Recall:* say *kurcī*

Before you move on

What does సూర్యుడు mean? ("the sun".) Say it once more.

53.3 చంద్రుడు (candruḍu) — the moon

Before the new one: what did *sūryuḍu* mean?

You'll want to know: చంద్రుడు

చంద్రుడు (*candruḍu*) — "the moon".

Sanskrit *candra* means "shining, bright", and it carries the same **-డు** that సూర్యుడు carries. Two borrowed lights, and Telugu made people of both.

The inherited word here is **నెల**, which you already have as the word for a month. One shape for the moon and for the stretch of time it measures — the moon is the oldest calendar there is, and Telugu keeps that fact inside a single word.

candra went a long way west as well. It shares an ancestor with the Latin piece that gives English *candle* and *incandescent*: a very old root for burning white.

CDIAL 4661 lists Sanskrit *candra*, "shining; moon".

What you've built

Three, and two of them named as people.

Your turn

- *Say it: candruḍu*
- *Say it:* it once more, slowly
- *Say it: candruḍu*, then *sūryuḍu*, and say what the two share at the end
- *Recall:* say *gauravaṁ*
- *Read it:* ముగ్గు, then say what it means

Before you move on

What does చంద్రుడు mean? ("the moon".) Say it once more.

53.4 చుక్క (cukka) — a star; a dot

Before the new one: what did *candruḍu* mean?

You'll want to know: చుక్క

చుక్క (*cukka*) — "a star; a dot".

చుక్క is inherited, and it means a star and a dot and a drop of liquid, all with one shape. Anything small and round and separate is a చుక్క.

That is why it matters for the ముగ్గు. The design at the doorstep is laid out first as a grid of చుక్కలు, dots of rice flour set at even spacing, and the lines are then drawn around and between them. A woman who says she is putting down చుక్కలు in the morning is not talking about the sky.

The borrowed word for a star is నక్షత్రం, and it is what an astrologer uses. చుక్క is what a child points at.

The word, taken apart — its roots and family

చుక్క (*cukka*) is native Dravidian, one word with Kannada *cukke*, "small mark, dot" (DEDR 2646). DEDR notes that Tamil *cukkai*, "star", is a loan from Telugu.

What you've built

Four.

Your turn

- *Say it: cukka*
- *Say it:* it once more, slowly
- *Say it: cukka*, then *muggu*, and say how the two are connected on the ground
- *Read it:* ఆశీర్వాదం
- *Recall:* say *puvvu*

Before you move on

What does చుక్క mean? ("a star; a dot".) Say it once more.

53.5 మబ్బు (mabbu) — a cloud

Before the new one: what did *cukka* mean?

You'll want to know: మబ్బు

మబ్బు (*mabbu*) — "a cloud".

మబ్బు is inherited and quite plain: the grey thing between you and the సూర్యుడు.

It stretched, the way weather words do. మబ్బు also describes a dull, heavy, half-asleep feeling, and a person who is slow to catch on. English went the same way with *cloudy* and *foggy*, from opposite ends of the earth and with no contact at all. When two unrelated languages reach for the same picture, the picture is doing the work rather than the borrowing.

With that, the sky is furnished.

The word, taken apart — its roots and family

మబ్బు (*mabbu*) is native Dravidian, one word with Tamil *mappu* and Kannada *mabbu* (DEDR 4728). DEDR also lists Telugu *mrabbu*, "cloud".

What you've built

Five: ఆకాశం, సూర్యుడు, చంద్రుడు, చుక్క, మబ్బు. You can now say what is overhead.

Your turn

- *Say it: mabbu*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say which two of them end the same way
- *Recall:* say *daṇḍaṁ*
- *Read it:* పూలదండ, then say what it means

Before you move on

What does మబ్బు mean? (“a cloud”.) Say it once more.

Chapter 54

The Tree

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a tree and its parts in Telugu, from the seed it started as to the branch at the top.
>
> *Complete TE-C54-seedling and demonstrate the chapter promise.*

54.1 చెట్టు (ceṭṭu) — a tree

Before the new one: what did *mabbu* mean?

You'll want to know: చెట్టు

చెట్టు (*ceṭṭu*) — "a tree".

చెట్టు is inherited and old. The Dravidian family kept the shape but shuffled the meaning: Tamil's *ceṭi* is a bush or a shrub, a small woody thing, while Telugu raised the same word to the full-grown tree and left the bush to other words.

A meaning that moves up or down the scale like that is the commonest kind of drift there is. The word holds its place in the family; what it points at slides.

మ్రాను is another Telugu word for a tree, older-sounding and now mostly literary. **చెట్టు** is what anybody says.

The word, taken apart — its roots and family

చెట్టు (*ceṭṭu*) is native Dravidian, one word with Tamil *ceṭi*, Kannada *ceṭṭu* and Malayalam *ceṭi* (DEDR 1941). DEDR glosses the Tamil

word “shrub, bush”.

What you’ve built

The thing the rest of this chapter is made of.

Your turn

- *Say it: ceṭṭu*
- *Say it:* it once more, slowly
- *Say it: ceṭṭu*, then *puvvu*, and say which one grows on the other
- *Recall:* say *talupu*
- *Read it:* **ఆకాశం**, then say what it means

Before you move on

What does **చెట్టు** mean? (“a tree”.) Say it once more.

54.2 కొమ్మ (komma) — a branch

Before the new one: what did *ceṭṭu* mean?

You’ll want to know: కొమ్మ

కొమ్మ (*komma*) — “a branch”.

కొమ్మ is the branch, the arm the **చెట్టు** puts out sideways.

It stands very close to **కొమ్ము**, the horn of an animal, and the closeness is not an accident: both are the thing that grows out and forks. A tree wearing horns is a fair description of a tree in winter.

కొమ్మ turns up in old poetry meaning a young woman, by way of the slenderness of a branch. That sense has gone quiet, but it is why the word looks odd inside a love poem.

The word, taken apart — its roots and family

కొమ్మ (*komma*) is native Dravidian, one word with Tamil *kompu*, Kannada *kombu* and Malayalam *kompu* (DEDR 2115). DEDR lists Telugu *kommu*, “horn”, and *komma*, “branch”, together.

What you've built

Two: the tree and what it puts out.

Your turn

- *Say it: komma*
- *Say it:* it once more, slowly
- *Say it: komma*, then *ceṭṭu*, and say which is part of which
- *Read it:* కుర్చీ
- *Recall:* say *sūryuḍu*

Before you move on

What does కొమ్మ mean? ("a branch".) Say it once more.

54.3 వేరు (vēru) — a root

Before the new one: what did *komma* mean?

You'll want to know: వేరు

వేరు (*vēru*) — "a root".

వేరు is the root under the **చెట్టు**. It also means "separate, apart, other" — **వేరు** as an answer means "that is a different thing".

One shape, two jobs, and they are not far apart when you think about what a root does: it is the part that is set aside, buried, kept out of the daylight and out of the reckoning.

Telugu is comfortable letting a word carry a solid thing and an abstract idea at once. You had one working two jobs a moment ago, with **చుక్క**.

The word, taken apart — its roots and family

వేరు (*vēru*) is native Dravidian, one word with Tamil *vēr*, Kannada *bēru* and Malayalam *vēr* (DEDR 5535). The **వేరు** that means "different" is another word, DEDR 5548.

What you've built

Three: what is up, what is out, and what is under.

Your turn

- *Say it:* *vēru*
- *Say it:* it once more, slowly
- *Say it:* *vēru*, then *komma*, and say which end of the **చెట్టు** each one is at
- *Recall:* say *muggu*
- *Read it:* **చంద్రుడు**, then say what it means

Before you move on

What does **వేరు** mean? ("a root".) Say it once more.

54.4 విత్తనం (vittanaṁ) — a seed

Before the new one: what did *vēru* mean?

You'll want to know: విత్తనం

విత్తనం (*vittanaṁ*) — "a seed".

విత్తనం is the seed, and it is built on **విత్తు**, "to sow". The word for the thing comes out of the word for the act, which is the ordinary direction of travel: people had been sowing for a long time before anybody needed a name for what they held.

Sanskrit's *bīja* was borrowed in as *bījaṁ*, and it does the abstract work — the seed of an idea, the germ of a quarrel. **విత్తనం** stays in the sack.

The whole chapter is inside this word. A **విత్తనం** becomes a **చెట్టు** with a **వేరు** below and a **కొమ్మ** above.

The word, taken apart — its roots and family

విత్తనం (*vittanaṁ*) is native Dravidian, one word with Tamil *vittu*, Kannada *bittu* and Malayalam *vittu* (DEDR 5401). DEDR lists Telugu *vittu*, "to sow; seed", and *vittanamu*, "seed".

What you've built

Four.

Your turn

- *Say it: vittanaṁ*
- *Say it:* it once more, slowly
- *Say it: vittanaṁ*, then *ceṭṭu*, and say which one comes first
- *Read it:* పువ్వు
- *Recall:* say *cukka*

Before you move on

What does **విత్తనం** mean? ("a seed".) Say it once more.

54.5 మొక్క (mokka) — a young plant

Before the new one: what did *vittanaṁ* mean?

You'll want to know: మొక్క

మొక్క (*mokka*) — "a young plant".

మొక్క is what the **విత్తనం** becomes before it earns the name **చెట్టు**: a seedling, a sapling, anything small and green and rooted.

The line between **మొక్క** and **చెట్టు** is about woodiness rather than height. A tomato plant stays a **మొక్క** at any size, because it stays soft. A **చెట్టు** has bark.

Do not tie it to **మొక్కు**, "to bow, to make a vow", which sounds close. Telugu has a good many pairs like that, and a resemblance on its own settles nothing.

The word, taken apart — its roots and family

మొక్క (*mokka*) is native Dravidian. DEDR 4997 lists Telugu *mokka*, "young plant, shoot, sprout", beside *molaka* and *mōka*, "sprout", with Tamil *muḷai*, "to sprout".

What you've built

Five: చెట్టు, కొమ్మ, వేరు, విత్తనం, మొక్క. A tree, its parts, and its beginning.

Your turn

- *Say it: mokka*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say them again as a life story, starting with the seed
- *Recall:* say *pūladaṇḍa*
- *Read it:* మబ్బు, then say what it means

Before you move on

What does మొక్క mean? ("a young plant".) Say it once more.

Chapter 55

River and Road

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the water, the ground and the road around a Telugu village, and ask my way with them.
>
> *Complete TE-C55-path and demonstrate the chapter promise.*

55.1 నది (nadi) — a river

Before the new one: what did *mokka* mean?

You'll want to know: నది

నది (*nadi*) — "a river".

Sanskrit *nadī* is the river, and it is built on a piece meaning "to sound, to roar". A river is named for the noise it makes, which tells you the people who named it were listening for water before they could see it.

Telugu clipped the long final vowel and says **నది**. The inherited Telugu word is **ఏరు**, a stream, and it survives in place names up and down the country long after it stopped being said on its own.

నది is the word you want when asking a stranger which way the water is.

CDIAL 6943 lists Sanskrit *nadī*, "river".

What you've built

The first thing you would ask the way to.

Your turn

- *Say it: nadi*
- *Say it:* it once more, slowly
- *Say it: nadi*, then *dayacēsi*, and put the two together as a question
- *Recall:* say *ākāśaṁ*
- *Read it:* **చెట్టు**, then say what it means

Before you move on

What does **నది** mean? ("a river".) Say it once more.

55.2 చెరువు (ceruvu) — a village tank, a reservoir

Before the new one: what did *nadi* mean?

You'll want to know: చెరువు

చెరువు (*ceruvu*) — "a village tank, a reservoir".

A **చెరువు** is not a natural lake. It is a dug and banked tank that catches the rain and holds it through the dry months, and a great many Telugu villages were laid out around one before they were laid out around anything else.

So the word carries an argument about how the country was settled: the **నది** is where the water goes, the **చెరువు** is where it was made to stay. Kings had them dug and put their names on the bunds, and the names are still there.

Indian English calls this a "tank", which is why the translation can sound strange until you have stood on the bund of one.

The word, taken apart — its roots and family

చెరువు (*ceruvu*) is native Dravidian. DEDR 1980 lists *ceruvu*, "artificial lake, tank", beside *ceṟa*, "prison, confinement", in an entry with Tamil *ceṟi*, "to be close, crowded".

What you've built

Two waters: one that moves, one that was kept.

Your turn

- *Say it: ceruvu*
- *Say it:* it once more, slowly
- *Say it: ceruvu*, then *nadi*, and say which one people made
- *Read it:* సూర్యుడు
- *Recall:* say *komma*

Before you move on

What does చెరువు mean? ("a village tank, a reservoir".) Say it once more.

55.3 గుట్ట (guṭṭa) — a low hill

Before the new one: what did *ceruvu* mean?

You'll want to know: గుట్ట

గుట్ట (*guṭṭa*) — "a low hill".

గుట్ట is inherited, and it means the small rocky rise that the Deccan is covered in — a heap of boulders rather than a peak. It also means a heap of anything: a గుట్ట of grain, a గుట్ట of clothes.

That double sense is honest about the landscape. These hills look piled rather than pushed up, and a speaker naming one is naming a pile.

The borrowed పర్వతం is the big mountain, the one in a poem. Nobody calls the rise behind their village a పర్వతం.

The word, taken apart — its roots and family

గుట్ట (*guṭṭa*) is native Dravidian, one word with Tamil *kuṇṭu* and Kannada *guḍḍa* (DEDR 1682). DEDR lists Telugu *guṭṭa*, "hill, hillock, heap".

What you've built

Three: water that moves, water that stays, and ground that stands up.

Your turn

- *Say it: guṭṭa*
- *Say it:* it once more, slowly
- *Say it: guṭṭa*, then *ceruvu*, and say which of the two you would climb
- *Recall:* say *candruḍu*
- *Read it:* వేరు, then say what it means

Before you move on

What does గుట్ట mean? ("a low hill".) Say it once more.

55.4 గ్రామం (grāmaṁ) — a village

Before the new one: what did *guṭṭa* mean?

You'll want to know: గ్రామం

గ్రామం (*grāmaṁ*) — "a village".

Sanskrit *grāma* began as the word for a moving band of people, a travelling group, and settled into meaning the place they settled in. The word sat down when the people did.

Telugu's own word is *ūru*, and it is the one used in speech: it is in half the place names on the map and it is what you say to a neighbour. గ్రామం is the official register — the word on a form, in a land record, on a signboard.

So a Telugu speaker holds two villages, one for the revenue office and one for home.

CDIAL 4368 lists Sanskrit *grāma*, "troop, village".

What you've built

Four.

Your turn

- *Say it: grāmaṁ*
- *Say it:* it once more, slowly

- *Say it: grāmaṁ*, then *ceruvu*, and say which one a village is built around
- *Read it:* చుక్క
- *Recall:* say *vittanaṁ*

Before you move on

What does గ్రామం mean? ("a village".) Say it once more.

55.5 బాట (bāṭa) — a path, a way

Before the new one: what did *grāmaṁ* mean?

You'll want to know: బాట

బాట (*bāṭa*) — "a path, a way".

బాట is the plain word for a way, a track, the line worn by feet going the same way twice. **దారి** does much the same work; **బాట** is the more physical of the two, the ground itself.

It goes abstract as easily as English "path" does. **బాట పట్టు** is to take up a way of living, and a person can be on somebody else's **బాట**.

You can now ask your way properly: **దయచేసి**, which **గ్రామం**, which **బాట**, which side the **నది** is on.

The word, taken apart — its roots and family

Where **బాట** (*bāṭa*) comes from is not settled, and DEDR does not list it. It matches the northern word for a path, Hindi *bāṭ* and Oriya *bāṭa*, which CDIAL 11366 traces to Sanskrit *vartman*, "track, path", so it may be a loan from the north.

What you've built

Five: **నది**, **చెరువు**, **గుట్ట**, **గ్రామం**, **బాట**. Enough to be given directions with.

Your turn

- *Say it: bāṭa*

- *Say it:* it once more, slowly
- *Say it:* all five in order, then ask a stranger the way to the **నది** using *dayacēsi*
- *Recall:* say *mabbu*
- *Read it:* **మొక్క**, then say what it means

Before you move on

What does **బాట** mean? (“a path, a way”.) Say it once more.

Chapter 56

In the House

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five ordinary things inside a Telugu house and thank somebody for handing me one.
>
> *Complete TE-C56-box and demonstrate the chapter promise.*

56.1 చాప (cāpa) — a mat

Before the new one: what did *bāṭa* mean?

You'll want to know: చాప

చాప (*cāpa*) — "a mat".

A **చాప** is woven from palm leaf or reed, rolled up against a wall by day and unrolled to sit or sleep on.

It belongs beside the **కుర్చీ** you already have. Where the chair is a borrowed thing with a borrowed name, the **చాప** is old and the word is inherited, and a house that has both will often put the **చాప** down for the people who are comfortable on the floor and keep the **కుర్చీ** for the guest who is not.

Offering somebody a **చాప** is an invitation to stay a while. It is a slower gesture than pointing at a chair.

The word, taken apart — its roots and family

చాప (*cāpa*) is native Dravidian, one word with Tamil *cāppai*, "mat of grass or rushes", and Kannada *cāpe*, "mat" (DEDR 2452).

What you've built

The first thing a floor gets.

Your turn

- *Say it:* *cāpa*
- *Say it:* it once more, slowly
- *Say it:* *cāpa*, then *kurcī*, and say which of the two gets rolled up
- *Recall:* say *ceṭṭu*
- *Read it:* నది, then say what it means

Before you move on

What does చాప mean? ("a mat".) Say it once more.

56.2 బుట్ట (buṭṭa) — a basket

Before the new one: what did *cāpa* mean?

You'll want to know: బుట్ట

బుట్ట (*buṭṭa*) — "a basket".

బుట్ట is inherited: the woven basket that carries vegetables home, holds flowers for the morning, and sits on a head on the way to market.

Weaving words tend to be old, and they tend to stay put while the trade words move around them. A **బుట్ట** and a **చాప** come off the same hands and the same palm leaf, which is why the two words feel like family even though they are not.

పూల బుట్ట is the flower basket — **పువ్వు**'s **పూల**- shape doing its work again.

The word, taken apart — its roots and family

బుట్ట (*buṭṭa*) is native Dravidian, one word with Kannada *buṭṭi* (DEDR 4263). DEDR lists Telugu *buṭṭa* and *buṭṭi*, "basket", with Tamil *puṭṭil*, "basket".

What you've built

Two: something to sit on, something to carry with.

Your turn

- *Say it: buṭṭa*
- *Say it:* it once more, slowly
- *Say it: buṭṭa*, then *cāpa*, and say what the two are made of
- *Read it:* కొమ్మ
- *Recall:* say *ceruvu*

Before you move on

What does బుట్ట mean? ("a basket".) Say it once more.

56.3 కత్తి (katti) — a knife

Before the new one: what did *buṭṭa* mean?

You'll want to know: కత్తి

కత్తి (*katti*) — "a knife".

కత్తి is the knife and, in older use, the sword. Size did not divide them; the blade did.

It is inherited, and it is spread right across the family — Tamil, Kannada and Malayalam all have a word of the same shape for a cutting blade. Tools that a household could make for itself keep their names for a very long time.

కత్తి also does the work English gives to "sharp" when talking about people: కత్తిలాంటి is knife-like, said of somebody quick.

The word, taken apart — its roots and family

కత్తి (*katti*) is native Dravidian, one word with Tamil *katti*, Kannada *katti* and Malayalam *katti* (DEDR 1204).

What you've built

Three.

Your turn

- *Say it: katti*
- *Say it:* it once more, slowly
- *Say it: katti*, then *buṭṭa*, and say which one you would cut a పండు with
- *Recall:* say *vēru*
- *Read it:* గుట్ట, then say what it means

Before you move on

What does కత్తి mean? ("a knife".) Say it once more.

56.4 గిన్నె (ginne) — a cooking vessel, a bowl

Before the new one: what did *katti* mean?

You'll want to know: గిన్నె

గిన్నె (*ginne*) — "a cooking vessel, a bowl".

గిన్నె is the round metal vessel that food is cooked and served in — the everyday one, brass or steel, with no lid worth mentioning.

Telugu splits its containers finely. A గిన్నె is not a కుండ, the fired clay pot, and it is not a పళ్ళెం, the flat plate. English pushes all three towards "pot" and "dish" and loses the difference between what holds heat, what holds water and what holds a meal.

When a kitchen has a name for each shape, the names are telling you which shapes the kitchen actually uses.

The word, taken apart — its roots and family

గిన్నె (*ginne*) is native Dravidian, one word with Tamil *kiṇṇam* and Malayalam *kiṇṇam* (DEDR 1543). DEDR lists Telugu *ginniya* and *ginne*, "cup, bowl".

What you've built

Four.

Your turn

- *Say it: ginne*
- *Say it:* it once more, slowly
- *Say it: ginne*, then *katti*, and say which one goes on the fire
- *Read it:* విత్తనం
- *Recall:* say *grāmaṁ*

Before you move on

What does గిన్నె mean? ("a cooking vessel, a bowl".) Say it once more.

56.5 పెట్టె (peṭṭe) — a box

Before the new one: what did *ginne* mean?

You'll want to know: పెట్టె

పెట్టె (*peṭṭe*) — "a box".

పెట్టె looks as if it comes out of పెట్టు, "to put" — the box as the put-place — but DEDR keeps the two words apart.

Then the railways arrived and పెట్టె picked up a second job — a railway carriage is a పెట్టె, a box that people are put in. A word for putting things away ended up on the side of a train.

The house is furnished now: a చాప on the floor, a బుట్ట by the door, a కత్తి and a గిన్నె in the kitchen, and a పెట్టె for what is not needed today.

The word, taken apart — its roots and family

పెట్టె (*peṭṭe*) is native Dravidian, one word with Tamil *peṭṭi* and Kannada *peṭṭi*, "box" (DEDR 4388). DEDR compares Sanskrit *peṭaka*, "box" (CDIAL 8164), a word CDIAL calls non-Aryan.

What you've built

Five: చాప, బుట్ట, కత్తి, గిన్నె, పెట్టె. You can name what a room holds, and say ధన్యవాదాలు when one is handed to you.

Your turn

- *Say it: peṭṭe*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then take one from somebody and say *dhanyavādālu*
- *Recall:* say *mokka*
- *Read it:* బాట, then say what it means

Before you move on

What does పెట్టె mean? (“a box”.) Say it once more.

Chapter 57

More of the Body

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five more parts of the body in Telugu and say which one hurts.
>
> *Complete TE-C57-bone and demonstrate the chapter promise.*

57.1 మెడ (meḍa) — the neck

Before the new one: what did *peṭṭe* mean?

You'll want to know: మెడ

మెడ (*meḍa*) — "the neck".

మెడ is inherited and short, which is what you expect of a body word: the parts people point at got their names early and kept them.

It is where a **పూలదండ** goes, so you already had the place before you had the word.

మెడ వంచు, to bend the neck, is to give in. The gesture and the phrase mean the same thing in a great many languages, because the gesture came first.

The word, taken apart — its roots and family

మెడ (*meḍa*) is native Dravidian, one word with Tamil *miṭaṟu*, "neck, throat", and Kannada *meṭre*, "throat" (DEDR 4847). DEDR compares Prakrit *maḍa*, "neck".

What you've built

The place a garland already went.

Your turn

- *Say it:* *meḍa*
- *Say it:* it once more, slowly
- *Say it:* *meḍa*, then *pūladaṇḍa*, and put one on the other
- *Recall:* say *nadi*
- *Read it:* చాప, then say what it means

Before you move on

What does మెడ mean? ("the neck".) Say it once more.

57.2 వీపు (vīpu) — the back

Before the new one: what did *meḍa* mean?

You'll want to know: వీపు

వీపు (*vīpu*) — "the back".

వీపు is the back — the flat of it, the part you carry a load on and a child rides on.

It sits with the other inherited body words you have: **కాలు**, **పన్ను**, **వేలు**, and now **మెడ** above it. The head is a different matter, since Telugu leans on borrowed words in the higher registers there, but the trunk and the limbs are almost entirely old stock.

That pattern is worth noticing. The words a language borrows tend to be for things it acquired; the body was not acquired.

The word, taken apart — its roots and family

వీపు (*vīpu*) is native Dravidian. DEDR 5455 lists the Telugu word for "the back" in an entry with Kota and Kolami words for the backbone.

What you've built

Two more, both of them old.

Your turn

- *Say it:* *vīpu*
- *Say it:* it once more, slowly
- *Say it:* *vīpu*, then *meḍa*, and say which is above the other
- *Read it:* చెరువు
- *Recall:* say *buṭṭa*

Before you move on

What does వీపు mean? ("the back".) Say it once more.

57.3 పెదవి (pedavi) — a lip

Before the new one: what did *vīpu* mean?

You'll want to know: పెదవి

పెదవి (*pedavi*) — "a lip".

పెదవి is the lip. Telugu keeps it separate from నోరు, the mouth as an opening, which you already have: the పెదవి is the rim, the నోరు is the hole.

పెదవి విరుచు — to twist the lip — is the Telugu way of saying somebody sneered. The face does the talking, and the language just reports it.

It is the part that shapes the sounds you have been making all along. Every ప in this book has been made with two పెదవులు.

The word, taken apart — its roots and family

పెదవి (*pedavi*) is native Dravidian, one word with Kolami *pedave*, "lip" (DEDR 4400). DEDR lists no Tamil or Kannada match.

What you've built

Three.

Your turn

- *Say it: pedavi*
- *Say it:* it once more, slowly
- *Say it: pedavi*, then say *puvvu* slowly and notice what your పెదవులు do at the start
- *Recall:* say *guṭṭa*
- *Read it:* కత్తి, then say what it means

Before you move on

What does పెదవి mean? ("a lip".) Say it once more.

57.4 గోరు (gōru) — a fingernail, a claw

Before the new one: what did *pedavi* mean?

You'll want to know: గోరు

గోరు (*gōru*) — "a fingernail, a claw".

గోరు is the nail on a finger and the claw on an animal, with no line drawn between them. One word for the hard thing at the end of the digit, whoever it belongs to.

It goes on the end of వేలు, which you already have. వేలి గోరు is the fingernail said in full, when the plain word would be unclear.

గోరువెచ్చని, "nail-warm", is the Telugu word for lukewarm water — the temperature you test by dipping a fingertip. A measurement made with the body, before there were thermometers.

The word, taken apart — its roots and family

గోరు (*gōru*) is native Dravidian, one word with Tamil *ukir* and Kannada *ugur*, "nail, claw" (DEDR 561). The Telugu form has a *g-* in front, like its Gondi and Kui cousins.

What you've built

Four.

Your turn

- *Say it: gōru*
- *Say it:* it once more, slowly
- *Say it: gōru*, then *vēlu*, and say which one grows out of the other
- *Read it:* గ్రామం
- *Recall:* say *ginne*

Before you move on

What does గోరు mean? (“a fingernail, a claw”.) Say it once more.

57.5 ఎముక (emuka) — a bone

Before the new one: what did *gōru* mean?

You’ll want to know: ఎముక

ఎముక (*emuka*) — “a bone”.

ఎముక is the bone, inherited, and it covers the whole family of them.

It carries the same weight English gives it: **ఎముకలు విరిగేలా**, “until the bones break”, is how you describe work that took everything a body had. The bone stands for the last thing left when the rest is gone.

That closes the body words. **మెడ**, **వీపు**, **పెదవి**, **గోరు** and **ఎముక** join **కాలు**, **పన్ను**, **వేలు** and the rest, and between them you can tell a doctor where it hurts.

The word, taken apart — its roots and family

ఎముక (*emuka*) is native Dravidian, one word with Tamil *elumpu* and Kannada *elubu*, “bone” (DEDR 839). DEDR compares Sanskrit *eḍūka*, “a monument holding bones”.

What you’ve built

Five: **మెడ**, **వీపు**, **పెదవి**, **గోరు**, **ఎముక**. Enough to answer a **వైద్యుడు** with.

Your turn

- *Say it:* *emuka*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then name your **మెడ** and say *nāku noppi*
- *Recall:* say *bāṭa*
- *Read it:* **పెట్టె**, then say what it means

Before you move on

What does **ఎముక** mean? (“a bone”.) Say it once more.

Chapter 58

More Short Replies

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say how much I want, refuse politely, and close a conversation in Telugu.
>
> *Complete TE-C58-thats-all and demonstrate the chapter promise.*

58.1 కొంచెం (koñcem) — a little, a bit

Before the new one: what did *emuka* mean?

You'll want to know: కొంచెం

కొంచెం (*koñcem*) — "a little, a bit".

కొంచెం is "a little", and it does far more work in Telugu than its size suggests. It softens whatever comes after it.

Ask for something plainly and you are demanding; put **కొంచెం** in front and you are asking. **కొంచెం నీళ్ళు** is a request for water that leaves the other person room. The word is a quantity in the dictionary and a manner in the mouth.

Telugu shares this habit with a good many languages. English does it with "just" and "a bit", and both of those have stopped measuring anything too.

The word, taken apart — its roots and family

కొంచెం (*koñcem*) is native Dravidian, one word with Tamil *koñcam* and Kannada *koñca* (DEDR 2041). DEDR lists Telugu *koncemu*, "a little,

a few”.

What you’ve built

A word that makes the next one polite.

Your turn

- *Say it: koñcem*
- *Say it:* it once more, slowly
- *Say it: koñcem*, then *koñcem pālu*, and hear how much softer it is than *pālu* alone
- *Recall:* say *cāpa*
- *Read it:* **మెడ**, then say what it means

Before you move on

What does **కొంచెం** mean? (“a little, a bit”.) Say it once more.

58.2 ఎక్కువ (ekkuva) — more, a great deal

Before the new one: what did *koñcem* mean?

You’ll want to know: ఎక్కువ

ఎక్కువ (*ekkuva*) — “more, a great deal”.

ఎక్కువ is built on **ఎక్కు**, “to climb, to go up”. The quantity is a movement: more is what has gone up.

Set it against **కొంచెం**, which you had a moment ago, and you have the two ends of a plate of food. **కొంచెం** is what you say when you would like the serving to stop; **ఎక్కువ** is what you say when it was too much.

It doubles as “too much” without changing shape, so tone and face carry the difference. **ఎక్కువ మాట్లాడు** can be praise or a complaint depending on how it is said.

The word, taken apart — its roots and family

ఎక్కువ (*ekkuva*) is native Dravidian, built on *ekku*, "to rise, increase". DEDR 768 lists *ekku* and *ekkuva*, "excess, more", itself, with Kannada *ekke*, "superiority".

What you've built

Two: a little, and a lot.

Your turn

- *Say it: ekkuva*
- *Say it:* it once more, slowly
- *Say it: ekkuva*, then *koñcem*, and say them as a pair
- *Read it:* బుట్ట
- *Recall:* say *vīpu*

Before you move on

What does ఎక్కువ mean? ("more, a great deal".) Say it once more.

58.3 తక్కువ (takkuva) — less, too little

Before the new one: what did *ekkuva* mean?

You'll want to know: తక్కువ

తక్కువ (*takkuva*) — "less, too little".

తక్కువ is built on తక్కు, "to fall short", exactly the way ఎక్కువ is built on climbing. Two words, one shape of construction, opposite directions.

A matched pair like this is worth holding on to, because it lets you guess. Once the -కువ ending on both has registered, you can meet a Telugu word for the first time and have some idea what it is doing.

తక్కువ చేసి మాట్లాడు, to speak somebody less, is to belittle them. The arithmetic goes straight into the manners.

The word, taken apart — its roots and family

తక్కువ (*takkuva*) is native Dravidian. DEDR 3178 lists *takkuva*, "less, deficient", with *taggu*, "to decrease", in an entry with Tamil *tāḻ*, "to be low", and Kannada *tāḻ*, "being low".

What you've built

Three, and two of them are a pair.

Your turn

- *Say it: takkuva*
- *Say it:* it once more, slowly
- *Say it: takkuva*, then *ekkuva*, and say which one climbs
- *Recall:* say *katti*
- *Read it:* **పెదవి**, then say what it means

Before you move on

What does **తక్కువ** mean? ("less, too little".) Say it once more.

58.4 వద్దు (vaddu) — no, I don't want it

Before the new one: what did *takkuva* mean?

You'll want to know: వద్దు

వద్దు (*vaddu*) — "no, I don't want it".

వద్దు is the refusal of a thing offered. It is not the same as **కాదు**, which denies that something is so; **వద్దు** turns down an offer.

It answers **కావాలి**, "I want it", and the two of them run every meal in a Telugu house. A hand over the plate and **వద్దు** is a complete sentence.

It softens the moment you put **కొంచెం**'s cousin in front of it, or the **-అండి** ending on the end: **వద్దండి** is the same refusal with the door left open.

The word, taken apart — its roots and family

వద్దు (*vaddu*) is native Dravidian. DEDR 1006 lists *valadu* and *vaddu*, "it is not wanted", under the verb *valacu*, "to wish, desire", with Tamil *ollu*, "to agree", and Kannada *ol*, "to like".

What you've built

Four.

Your turn

- *Say it: vaddu*
- *Say it:* it once more, slowly
- *Say it: vaddu*, then *vaddaṇḍi*, and say which one you would use with a stranger
- *Read it:* గిన్నె
- *Recall:* say *gōru*

Before you move on

What does వద్దు mean? ("no, I don't want it".) Say it once more.

58.5 అంతే (antē) — that's all; that's just it

Before the new one: what did *vaddu* mean?

You'll want to know: అంతే

అంతే (*antē*) — "that's all; that's just it".

అంతే is అంత, "that much", with a small -ఏ on the end that means "just, exactly". So the word says "exactly that much" — and it ends a list, a story or an argument.

It has a second life as agreement. Somebody explains why a thing went wrong and you say అంతే: that is precisely it, nothing further to add. The same word closes a sale and closes a discussion.

It is a good word to leave a chapter on. కొంచెం, ఎక్కువ, తక్కువ, వద్దు — and then అంతే.

The word, taken apart — its roots and family

అంతే (*antē*) is native Dravidian: *anta*, "so much", on the far-pointing base *a-* (DEDR 1), with the emphatic *-ē*, "only".

What you've built

Five: **కొంచెం**, **ఎక్కువ**, **తక్కువ**, **వద్దు**, **అంతే**. You can now say how much, and when to stop.

Your turn

- *Say it: antē*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then refuse a second helping with *vaddu*, *antē*
- *Recall:* say *peṭṭe*
- *Read it:* **ఎముక**, then say what it means

Before you move on

What does **అంతే** mean? ("that's all; that's just it".) Say it once more.

Chapter 59

Weather and Ground

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the weather and what is underfoot in Telugu, and use it as a reason to go home.
>
> *Complete TE-C59-fire and demonstrate the chapter promise.*

59.1 గాలి (gāli) — wind, air

Before the new one: what did *antē* mean?

You'll want to know: గాలి

గాలి (*gāli*) — "wind, air".

గాలి is inherited, and it covers both the wind that blows and the air that is simply there. Telugu does not split them.

It reaches further than weather. **గాలి** is breath, and it is rumour — **గాలి వార్త** is a story with nothing holding it up, blown in from somewhere. Air, breath and hearsay under one word is a chain a great many languages make, and it usually starts with breathing.

A **గాలి** getting up in the evening is the ordinary reason given for cutting a visit short.

The word, taken apart — its roots and family

గాలి (*gāli*) is native Dravidian, one word with Kannada *gāḷi* (DEDR 1499). DEDR lists Telugu *gāli*, "wind, air".

What you've built

The first reason to start saying goodbye.

Your turn

- *Say it:* *gāli*
- *Say it:* it once more, slowly
- *Say it:* *gāli*, then *veḷḷostānu*, and use the one as a reason for the other
- *Recall:* say *meḍa*
- *Read it:* కొంచెం, then say what it means

Before you move on

What does గాలి mean? ("wind, air".) Say it once more.

59.2 మంచు (mañcu) — mist, dew, snow

Before the new one: what did *gāli* mean?

You'll want to know: మంచు

మంచు (*mañcu*) — "mist, dew, snow".

మంచు is the cold wet thing in the air: mist on a winter morning, dew on the ground, and snow where there is any. One word for all three states, which suits a country that meets the third of them rarely.

This is worth sitting with. A language draws its lines where its speakers need them. Telugu splits its cooking vessels three ways and lumps mist, dew and snow together; a language spoken where snow falls would do the opposite.

మంచు కురుస్తోంది is "it is misting" on the coast and "it is snowing" in the hills, with no change to the word.

The word, taken apart — its roots and family

మంచు (*mañcu*) is native Dravidian, one word with Tamil *mañcu*, Kannada *mañju* and Malayalam *mañño* (DEDR 4641).

What you've built

Two: what moves, and what settles.

Your turn

- *Say it: mañcu*
- *Say it:* it once more, slowly
- *Say it: mañcu*, then *gāli*, and say which of the two you can see
- *Read it:* **వీపు**
- *Recall:* say *ekkuva*

Before you move on

What does **మంచు** mean? ("mist, dew, snow".) Say it once more.

59.3 ఇసుక (isuka) — sand

Before the new one: what did *mañcu* mean?

You'll want to know: ఇసుక

ఇసుక (*isuka*) — "sand".

ఇసుక is inherited and unremarkable, and that is the point: it is the ground beside every **నది** in the Telugu country.

The sand of a riverbed is where cattle are watered, where lorries come at night to dig, and where a village argument about who owns the river tends to start. A plain word can carry a lot of local weather.

ఇసుకలో నీళ్ళు, water in sand, is what you say about effort that soaks away.

The word, taken apart — its roots and family

ఇసుక (*isuka*) is probably native Dravidian. DEDR does not list the Telugu form, but its entry 575 gathers Kannada *usuku* and *isaka*, the Kannada word for sand, with Kolami and Konda words of the same shape.

What you've built

Three.

Your turn

- *Say it: isuka*
- *Say it:* it once more, slowly
- *Say it: isuka*, then *nadi*, and say where you would find one beside the other
- *Recall:* say *pedavi*
- *Read it:* **తక్కువ**, then say what it means

Before you move on

What does **ఇసుక** mean? ("sand".) Say it once more.

59.4 బురద (burada) — mud

Before the new one: what did *isuka* mean?

You'll want to know: బురద

బురద (*burada*) — "mud".

బురద is mud — what **ఇసుక** becomes when the rain has been at it.

It does the same second job that mud does in English. **బురద చల్లు**, to throw mud, is to slander somebody, and the picture is exact enough that you can guess the phrase before you are told it.

బురద is also the honest reason a visit ends early in the wet months. The **బాట** between the **గ్రామం** and the **నది** turns to it.

The word, taken apart — its roots and family

బురద (*burada*) is native Dravidian, one word with Kannada *burude* (DEDR 4291). DEDR lists Telugu *burada*, "mud".

What you've built

Four.

Your turn

- *Say it: burada*
- *Say it:* it once more, slowly
- *Say it: burada*, then *isuka*, and say what turns one into the other
- *Read it:* గోరు
- *Recall:* say *vaddu*

Before you move on

What does బురద mean? ("mud".) Say it once more.

59.5 నిప్పు (nippu) — fire, a live coal

Before the new one: what did *burada* mean?

You'll want to know: నిప్పు

నిప్పు (*nippu*) — "fire, a live coal".

నిప్పు is inherited, and it is the fire you can point at: the live coal, the burning thing in the hearth. అగ్ని, borrowed from Sanskrit, is fire as an idea and as a god, the one that carries offerings.

So Telugu keeps a working fire and a ceremonial one, in the same way it keeps a పొద్దు and a సూర్యుడు. That split has turned up so often in these chapters that you can start expecting it: the old word does the work, the borrowed one does the ceremony.

నిప్పు is what a house is banked down around at night, and putting it out is the last thing done before sleep. A good place to say వెళ్ళొస్తాను.

DEDR 2929 lists Telugu *nippu*, "fire", with Tamil *neruppu* and Malayalam *nerippu*.

What you've built

Five: గాలి, మంచు, ఇసుక, బురద, నిప్పు. Weather enough to take your leave on.

Your turn

- *Say it: nippu*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say *gāli ekkuva*, and take your leave with *veḷḷostānu*
- *Recall:* say *emuka*
- *Read it:* అంతే, then say what it means

Before you move on

What does నిప్పు mean? (“fire, a live coal”.) Say it once more.

Chapter 60

Animals

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five common animals in Telugu, and greet the house that keeps them.
>
> *Complete TE-C60-bird and demonstrate the chapter promise.*

60.1 గేదె (gēde) — a buffalo

Before the new one: what did *nippu* mean?

You'll want to know: గేదె

గేదె (*gēde*) — "a buffalo".

గేదె is the water buffalo — black, unhurried, and the animal most of the **పాలు** in a Telugu household actually come from. The cow gets the songs; the **గేదె** fills the pot.

The word is inherited, and the animal is so ordinary that arriving at a village house often means being met by one before anybody comes out to say **నమస్కారం**.

A **గేదె** standing in a **చెరువు** with only its nose above the water is the picture the word carries. That is where it spends the hottest part of the day.

The word, taken apart — its roots and family

గేదె (*gēde*) is native Dravidian. DEDR 2000 lists *gēde*, "a she-buffalo", with Konda *geyda* and Kuwi *gedde*; it has no Tamil or Kannada match.

What you've built

The first animal.

Your turn

- *Say it: gēde*
- *Say it:* it once more, slowly
- *Say it: gēde*, then *pālu*, and say which one gives the other
- *Recall:* say *koñcem*
- *Read it:* గాలి, then say what it means

Before you move on

What does గేదె mean? ("a buffalo".) Say it once more.

60.2 మేక (mēka) — a goat

Before the new one: what did *gēde* mean?

You'll want to know: మేక

మేక (*mēka*) — "a goat".

మేక is the goat: small, loud, and kept by households that cannot keep a గేదె. Where the buffalo wants water and grazing, the **మేక** wants almost nothing and will eat what is left.

The word is inherited and it is old. Its shape sits close to the Tamil and Kannada words for the same animal, which is what happens to the names of animals people have kept for a very long time.

A **మేక** will strip a bush bare and move on, which is why a గ్రామం keeps them at its edge rather than in its lanes.

The word, taken apart — its roots and family

మేక (*mēka*) is native Dravidian, one word with Kannada *mēke*, "she-goat" (DEDR 5087). DEDR compares Sanskrit *meka*, "goat", a word known only from lexicons.

What you've built

Two: one for milk, one for anything.

Your turn

- *Say it: mēka*
- *Say it:* it once more, slowly
- *Say it: mēka*, then *gēde*, and say which one wants the చెరువు
- *Read it:* ఎక్కువ
- *Recall:* say *mañcu*

Before you move on

What does మేక mean? ("a goat".) Say it once more.

60.3 కోడి (kōḍi) — a hen

Before the new one: what did *mēka* mean?

You'll want to know: కోడి

కోడి (*kōḍi*) — "a hen".

కోడి is the domestic fowl, hen or cock alike; the word does not divide them, and when the difference matters a second word goes in front.

It is inherited and it is everywhere in the family, close in shape to the Tamil, Kannada and Malayalam words for the same bird — one of those words that travelled with the animal and has not moved since.

The కోడి is also the village clock. It wakes a house before ఉదయం is properly under way, which is why nobody there has ever needed a గంట.

The word, taken apart — its roots and family

కోడి (*kōḍi*) is native Dravidian, one word with Tamil *kōḻi*, Kannada *kōḻi* and Malayalam *kōḻi* (DEDR 2248).

What you've built

Three.

Your turn

- *Say it: kōḍi*
- *Say it:* it once more, slowly
- *Say it: kōḍi*, then *mēka*, and say which one wakes you
- *Recall:* say *takkuva*
- *Read it:* ఇసుక, then say what it means

Before you move on

What does కోడి mean? ("a hen".) Say it once more.

60.4 చీమ (cīma) — an ant

Before the new one: what did *kōḍi* mean?

You'll want to know: చీమ

చీమ (*cīma*) — "an ant".

చీమ is the ant. After a గేదె and a కోడి it is a jump in scale worth making, because the same plain word-making covers whatever lives in a house, however small it is.

The word is inherited. Telugu has a stock comparison about a చీమ carrying many times its own weight, and it is the ordinary way to praise somebody small who works hard.

A line of చీమలు across a floor usually ends at a పండు somebody left out.

The word, taken apart — its roots and family

చీమ (*cīma*) is native Dravidian. DEDR 2623 lists *cīma*, "ant", with Konda and Kuwi *sīma*; it has no Tamil or Kannada match.

What you've built

Four: the biggest and the smallest so far.

Your turn

- *Say it:* *cīma*
- *Say it:* it once more, slowly
- *Say it:* *cīma*, then *gēde*, and say which one is easier to miss
- *Read it:* వద్దు
- *Recall:* say *burada*

Before you move on

What does చీమ mean? (“an ant”.) Say it once more.

60.5 పక్షి (pakṣi) — a bird

Before the new one: what did *cīma* mean?

You’ll want to know: పక్షి

పక్షి (*pakṣi*) — “a bird”.

పక్షి is the general one: any bird at all, the కోడి included. It came in from Sanskrit, and beside it Telugu keeps its own పిట్ట for the small ones about a garden.

That is a split this book has met before — an inherited word doing the everyday work and a borrowed one carrying the wider idea, the same shape as నిప్పు beside అగ్ని. Once you start expecting it, half the vocabulary sorts itself.

Five animals now, from the గేదె at the gate to the చీమ under it, and a నమస్కారం for whoever keeps them.

CDIAL 7636 lists Sanskrit *pakṣin*, “winged; bird”.

What you’ve built

Five: గేదె, మేక, కోడి, చీమ, పక్షి. Enough to greet a house and name what lives in it.

Your turn

- *Say it: pakṣi*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say *namaskāram* to whoever keeps them
- *Recall:* say *antē*
- *Read it:* నిప్పు, then say what it means

Before you move on

What does పక్షి mean? (“a bird”.) Say it once more.

Chapter 61

In the Kitchen

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five everyday things in a Telugu kitchen, and swap names with the person cooking.
>
> *Complete TE-C61-chilli and demonstrate the chapter promise.*

61.1 పెరుగు (perugu) — curd

Before the new one: what did *pakṣi* mean?

You'll want to know: పెరుగు

పెరుగు (*perugu*) — "curd".

పెరుగు is set curd: **పాలు** left overnight with a spoonful of yesterday's **పెరుగు** stirred in. It closes almost every meal in a Telugu house, and a *bhōjanaṁ* without it is thought unfinished.

The word is inherited, and Telugu uses the same shape for what curd does and for what anything does when it grows. Curd is milk that grew.

A **గేదె**'s **పాలు** set thicker than a cow's, which is one reason a village that keeps buffaloes is in no hurry to change.

The word, taken apart — its roots and family

పెరుగు (*perugu*) is native Dravidian, one word with Tamil *peruku*, "curdled milk" (DEDR 4421). The same entry lists the Telugu verb *pēru*, "to curdle".

What you've built

The first thing in the kitchen.

Your turn

- *Say it: perugu*
- *Say it:* it once more, slowly
- *Say it: perugu*, then *pālu*, and say which one comes first
- *Recall:* say *gāli*
- *Read it:* గేదె, then say what it means

Before you move on

What does పెరుగు mean? ("curd".) Say it once more.

61.2 నెయ్యి (neyyi) — ghee

Before the new one: what did *perugu* mean?

You'll want to know: నెయ్యి

నెయ్యి (*neyyi*) — "ghee".

నెయ్యి is clarified butter, and it is what పెరుగు becomes after churning and heating. Three things out of one: పాలు, పెరుగు, నెయ్యి.

The word is inherited and very old. Its root runs across the whole family for the same fat, which suits a food that has been made the same way for longer than any of these languages have been separate.

A spoonful of నెయ్యి over rice is both a taste and a courtesy. It is what a house puts in front of an *atithi* first.

The word, taken apart — its roots and family

నెయ్యి (*neyyi*) is native Dravidian, one word with Tamil *ney* and Kannada *ney* (DEDR 3746).

What you've built

Two, and the second is made out of the first.

Your turn

- *Say it: neyyi*
- *Say it:* it once more, slowly
- *Say it: neyyi*, then *perugu*, and say which one is poured
- *Read it:* మంచు
- *Recall:* say *mēka*

Before you move on

What does నెయ్యి mean? ("ghee".) Say it once more.

61.3 నూనె (nūne) — oil

Before the new one: what did *neyyi* mean?

You'll want to know: నూనె

నూనె (*nūne*) — "oil".

నూనె is oil pressed from seeds — groundnut, sesame, sunflower — and it is what a kitchen cooks with on the days it is not cooking with **నెయ్యి**.

The word is inherited, and Telugu keeps it firmly apart from **నెయ్యి**. One comes from an animal and one comes from a **విత్తనం**, and no cook mixes the two up.

నూనె also works outside the kitchen. It is what goes into a **దీపం**, and a house that has run out of it sits in the dark.

The word, taken apart — its roots and family

నూనె (*nūne*) is native Dravidian. DEDR 3746 lists *nūne*, "oil", and derives it from a reconstructed *nū, "sesame" (DEDR 3720), and *ney*, "ghee, oil".

What you've built

Three.

Your turn

- *Say it: nūne*
- *Say it:* it once more, slowly
- *Say it: nūne*, then *neyyi*, and say which one a దీపం takes
- *Recall:* say *isuka*
- *Read it:* కోడి, then say what it means

Before you move on

What does నూనె mean? ("oil".) Say it once more.

61.4 చక్కెర (cakkera) — sugar

Before the new one: what did *nūne* mean?

You'll want to know: చక్కెర

చక్కెర (*cakkera*) — "sugar".

చక్కెర is sugar, and the word is a traveller. Sanskrit *śarkarā* meant "grit, gravel" — the stuff arrived in grains — and the same word went west through Persian and Arabic and Latin until English got "sugar" out of it. The Telugu shape and the English one are cousins with a very long road between them.

Telugu also keeps బెల్లం, the unrefined block of palm or cane sugar, for everything traditional. చక్కెర is the white refined thing that came later.

A pinch of చక్కెర goes into dishes an English kitchen would leave savoury, and it goes in to round off the salt rather than to make anything sweet.

CDIAL 12338 lists Sanskrit *śarkarā*, "candied sugar", with Prakrit *sakkarā*, "granulated sugar"; Telugu reshaped it, as Prakrit had.

What you've built

Four.

Your turn

- *Say it: cakkera*
- *Say it:* it once more, slowly

- *Say it: cakkera*, then *perugu*, and say which one is stirred into the other
- *Read it:* బురద
- *Recall:* say *cīma*

Before you move on

What does చక్కెర mean? ("sugar".) Say it once more.

61.5 మిరప (mirapa) — a chilli

Before the new one: what did *cakkera* mean?

You'll want to know: మిరప

మిరప (*mirapa*) — "a chilli".

మిరప is the chilli, and it is the newest thing in this kitchen by several thousand years. The plant crossed from the Americas on Portuguese ships and reached the coast about four hundred years ago.

The word is older than the plant it names. It belonged to black pepper first, and when the new pod arrived and took over the job of making food hot, the name went with the job rather than staying with the plant.

Andhra cooking is built on it now, and a kitchen there measures itself by how much మిరప it can carry. Five things, and the person at the stove will ask your పేరు before the meal is over.

The word, taken apart — its roots and family

మిరప (*mirapa*) was first a name for black pepper. It is usually traced to Sanskrit *marica*, "peppercorn" (CDIAL 9875), reshaped to Telugu sounds as a tadbhava, and it passed to the chilli when the chilli arrived. CDIAL itself takes the Sanskrit word from an Austroasiatic language.

What you've built

Five: పెరుగు, నెయ్యి, నూనె, చక్కెర, మిరప. Enough to name what a kitchen holds while somebody asks you your పేరు.

Your turn

- *Say it: mirapa*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say *nā pēru* and your own name
- *Recall:* say *nippu*
- *Read it:* పక్షి, then say what it means

Before you move on

What does మిరప mean? (“a chilli”.) Say it once more.

Chapter 62

Things People Make

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five things a Telugu household makes or keeps, and ask politely for one of them.
>
> *Complete TE-C62-mirror and demonstrate the chapter promise.*

62.1 దారం (dāraṁ) — thread

Before the new one: what did *mirapa* mean?

You'll want to know: దారం

దారం (*dāraṁ*) — "thread".

దారం is thread — spun cotton, fine enough to sew with and strong enough to tie a knot that holds. It is the first thing in this chapter and the smallest.

The word may have come in from the north; the dictionaries do not settle it.

దారం does ceremonial work too. The thread tied round a wrist at a festival is a **దారం**, and once it is on it stays there until it falls off by itself.

DEDR 3167 lists Telugu *dāramu*, "cord, twine", with Tamil *tār*, "cord", and Kannada *dāra*, "thread", and asks, with a query, whether it came from Indo-Aryan, comparing Prakrit *dāra*, "waist-band", and Sanskrit *davara*, "string" (CDIAL 6225).

What you've built

The first thing a house makes for itself.

Your turn

- *Say it: dāraṁ*
- *Say it:* it once more, slowly
- *Say it: dāraṁ*, then *dayacēsi*, and ask for it politely
- *Recall:* say *gēde*
- *Read it:* పెరుగు, then say what it means

Before you move on

What does దారం mean? ("thread".) Say it once more.

62.2 సూది (sūdi) — a needle

Before the new one: what did *dāraṁ* mean?

You'll want to know: సూది

సూది (*sūdi*) — "a needle".

సూది is a needle. It arrived from Sanskrit *sūcī*, and Telugu wore the middle sound down to a *d* — a change the language makes often enough that the two shapes line up easily once you know to expect it.

A సూది is useless without a దారం, and a దారం is only a tangle without a సూది. That is about as neat a pair as this book has come across.

The same word does the వైద్యుడు's work: an injection is a సూది, and somebody at a clinic who uses the word is not talking about mending a బట్ట.

CDIAL 13551 lists Sanskrit *sūcī*, "needle".

What you've built

Two, and neither is much use without the other.

Your turn

- *Say it: sūdi*
- *Say it:* it once more, slowly
- *Say it: sūdi*, then *dāraṁ*, and say which one goes through the other

- *Read it:* మేక
- *Recall:* say *neyyi*

Before you move on

What does సూది mean? (“a needle”.) Say it once more.

62.3 చీపురు (cīpuru) — a broom

Before the new one: what did *sūdi* mean?

You’ll want to know: చీపురు

చీపురు (*cīpuru*) — “a broom”.

చీపురు is the broom: a bundle of coconut-leaf ribs bound tight at one end, used bent at the waist rather than standing upright.

The word is inherited. Sweeping is the first work of the morning in a Telugu house, done before the **ముగ్గు** goes down at the doorstep.

A **చీపురు** is treated with a little care because of that. It is not stood on its bristles, it is not stepped over, and it is not lent out lightly.

The word, taken apart — its roots and family

చీపురు (*cīpuru*) is native Dravidian. DEDR 2599 lists the Telugu word for “a broom” with Tamil *cī*, “to sweep”, and Kannada *cīpari*, “broom”.

What you’ve built

Three, and this one starts the day.

Your turn

- *Say it: cīpuru*
- *Say it:* it once more, slowly
- *Say it: cīpuru*, then *muggu*, and say which one comes first
- *Recall:* say *kōḍi*
- *Read it:* నూనె, then say what it means

Before you move on

What does **చీపురు** mean? (“a broom”.) Say it once more.

62.4 గొడుగు (goḍugu) — an umbrella

Before the new one: what did *cīpuru* mean?

You’ll want to know: గొడుగు

గొడుగు (*goḍugu*) — “an umbrella”.

గొడుగు is an umbrella, and in Telugu it answers the sun as much as the rain — which is the commoner use of it on a hot morning.

The word is inherited. Long before cloth and wire there was a **గొడుగు** of palm leaf, and the ceremonial one held over a deity or over a bride is still made and named the same way.

It settles two things already met: **గాలి** will turn it inside out and **మంచు** will not, so a **గొడుగు** goes out in one kind of weather and stays at home in the other.

The word, taken apart — its roots and family

గొడుగు (*goḍugu*) is native Dravidian, one word with Tamil *kuṭai*, Kannada *koḍe* and Malayalam *kuṭa*, “umbrella” (DEDR 1663). DEDR compares Sanskrit *utkūṭa*, “umbrella”, a word known only from lexicons.

What you’ve built

Four.

Your turn

- *Say it:* *goḍugu*
- *Say it:* it once more, slowly
- *Say it:* *goḍugu*, then *gāli*, and say what one does to the other
- *Read it:* **చీమ**
- *Recall:* say *cakkera*

Before you move on

What does **గొడుగు** mean? ("an umbrella".) Say it once more.

62.5 అద్దం (addaṁ) — a mirror

Before the new one: what did *goḍugu* mean?

You'll want to know: అద్దం

అద్దం (*addaṁ*) — "a mirror".

అద్దం is a mirror. Of the five things here it is the only one a household buys rather than makes, and the only one whose name is probably borrowed — usually traced, through Prakrit *addāa*, to Sanskrit *ādarśa*, "what shows back".

The other four come out of whatever grows nearby: a **దారం** out of cotton, a **చీపురు** out of leaf ribs, a **గొడుగు** out of palm and cane, and a **సూది** out of a scrap of metal from the smith at the edge of the **గ్రామం**. An **అద్దం** needs a factory.

Asking for one is where **దయచేసి** earns its keep. **అద్దం ఇవ్వండి** on its own lands like an instruction; with **దయచేసి** in front it lands like a request.

DEDR 147 lists Telugu *addamu*, "mirror", notes that Tamil *attam* is a loan from Telugu, and compares Prakrit *addāa*, "mirror"; CDIAL 1143 lists Sanskrit *ādarśa*, "mirror".

What you've built

Five: **దారం**, **సూది**, **చీపురు**, **గొడుగు**, **అద్దం**. Enough to ask for what you need with **దయచేసి** in front of it.

Your turn

- *Say it: addaṁ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say *dayacēsi addaṁ ivvaṇḍi*
- *Recall:* say *pakṣi*
- *Read it:* **మిరప**, then say what it means

Before you move on

What does **అద్దం** mean? (“a mirror”.) Say it once more.

Chapter 63

Hunger, Sleep and Health

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say in Telugu that I am hungry, sleepy or unwell, and ask after somebody else's health.
>
> *Complete TE-C63-health and demonstrate the chapter promise.*

63.1 ఆకలి (ākali) — hunger

Before the new one: what did *addaṁ* mean?

You'll want to know: ఆకలి

ఆకలి (*ākali*) — "hunger".

ఆకలి is hunger. Telugu does not say "I am hungry" — it says **నాకు ఆకలి**, "to me, hunger", the same shape as **నాకు తెలుసు** and **నాకు తెలుగు వచ్చు**. Hunger is something that happens to you.

The word is inherited, and it is among the first a child in a Telugu house learns to say — usually loudly, and usually before *bhōjanaṁ* is anywhere near ready.

ఆకలిగా ఉందా? is a real greeting in a house you are close to. It gets asked before **మీరు ఎలా ఉన్నారు**? has a chance.

The word, taken apart — its roots and family

ఆకలి (*ākali*) is native Dravidian. DEDR 2429 lists the Telugu word, "hunger, appetite", with Kui *saki* and Kuwi *hakki*, "hunger"; it has no Tamil or Kannada match.

What you've built

The first thing to say about yourself.

Your turn

- *Say it: ākali*
- *Say it:* it once more, slowly
- *Say it: nāku ākali*, then ask *mīru elā unnāru?*
- *Recall:* say *perugu*
- *Read it:* దారం, then say what it means

Before you move on

What does ఆకలి mean? ("hunger".) Say it once more.

63.2 నిద్ర (nidra) — sleep

Before the new one: what did *ākali* mean?

You'll want to know: నిద్ర

నిద్ర (*nidra*) — "sleep".

నిద్ర is sleep, and it takes the same shape as ఆకలి: నాకు నిద్ర వస్తోంది, "sleep is coming to me". You do not do it; it arrives.

The word came from Sanskrit *nidrā* and settled without changing. Beside it Telugu keeps నిదుర, the softer everyday form, and the two are one word wearing different clothes.

నిద్ర also makes a polite reason for leaving late in the evening, and it works the way గాలి worked earlier. Nobody argues with it.

CDIAL 7200 lists Sanskrit *nidrā*, "sleep".

What you've built

Two, and both of them come to you.

Your turn

- *Say it: nidra*
- *Say it:* it once more, slowly
- *Say it: nidra*, then *ākali*, and say which one you have now
- *Read it:* నెయ్యి
- *Recall:* say *sūdi*

Before you move on

What does నిద్ర mean? ("sleep".) Say it once more.

63.3 దగ్గు (daggu) — a cough

Before the new one: what did *nidra* mean?

You'll want to know: దగ్గు

దగ్గు (*daggu*) — "a cough".

దగ్గు is a cough. It is inherited, and it is a sound turned into a word, which is how a good many of these words start out.

Like **ఆకలి** and **నిద్ర** it comes to you rather than from you: **నాకు దగ్గు**, and nobody needs telling any more than that.

Telugu keeps **దగ్గు** for the whole thing at once — the single cough, the fit of coughing, and the illness sitting behind both — where English reaches for three phrases. A **మంచు** morning in the hills fills a house with it.

The word, taken apart — its roots and family

దగ్గు (*daggu*) is native Dravidian. DEDR 2939 lists *daggu*, "to cough; a cough", with Kolami *dag-*, "to cough"; it has no Tamil or Kannada match.

What you've built

Three.

Your turn

- *Say it: daggu*
- *Say it:* it once more, slowly
- *Say it: daggu*, then *nidra*, and say which one keeps you from the other
- *Recall:* say *nūne*
- *Read it:* చీపురు, then say what it means

Before you move on

What does దగ్గు mean? ("a cough".) Say it once more.

63.4 రోగం (rōgaṁ) — a disease

Before the new one: what did *daggu* mean?

You'll want to know: రోగం

రోగం (*rōgaṁ*) — "a disease".

రోగం is illness in general: not the దగ్గు you have this week, but the thing a వైద్యుడు puts a name to.

It is Sanskrit, from a root about breaking — an illness is something breaking in you — and Telugu took the word whole, the way it took *hṛdayaṁ*.

రోగి is the person who has one. A వైద్యుడు's whole working day is spent between those two words, and so is a good deal of ordinary conversation about relatives.

CDIAL 10829 lists Sanskrit *roga*, "disease".

What you've built

Four.

Your turn

- *Say it: rōgaṁ*
- *Say it:* it once more, slowly
- *Say it: rōgaṁ*, then *daggu*, and say which one is the smaller trouble

- *Read it:* చక్కెర
- *Recall:* say *goḍugu*

Before you move on

What does రోగం mean? (“a disease”.) Say it once more.

63.5 ఆరోగ్యం (ārōgyaṁ) — health

Before the new one: what did *rōgaṁ* mean?

You’ll want to know: ఆరోగ్యం

ఆరోగ్యం (*ārōgyaṁ*) — “health”.

ఆరోగ్యం is health, and it is the word before it with a small piece stuck on the front. The piece means “not”, and రోగ is the illness: health here is what is left when the illness is gone.

That is a real difference in outlook and worth a moment. English health is something to be built up. ఆరోగ్యం is a subtraction.

మీ ఆరోగ్యం ఎలా ఉంది? is what a house asks an *atithi* who has been ill. It is more particular than మీరు ఎలా ఉన్నారు?, and it expects a real answer.

The word, taken apart — its roots and family

ఆరోగ్యం (*ārōgyaṁ*) is Sanskrit *ārogya*, “health”, taken over whole as a learned loan, a tatsama, with the Telugu noun ending *-ṁ* (CDIAL 1330).

What you’ve built

Five: ఆకలి, నిద్ర, దగ్గు, రోగం, ఆరోగ్యం. Enough to say what is wrong and to ask after somebody else.

Your turn

- *Say it:* *ārōgyaṁ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then ask *mī ārōgyaṁ elā undi?*

- *Recall:* say *mirapa*
- *Read it:* అద్దం, then say what it means

Before you move on

What does ఆరోగ్యం mean? (“health”.) Say it once more.

Chapter 64

Words That Join an Answer

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can add to a Telugu answer, limit it, put it in order, or say it is not finished.
>
> *Complete TE-C64-still and demonstrate the chapter promise.*

64.1 కూడా (kūḍā) — also

Before the new one: what did *ārōgyaṁ* mean?

You'll want to know: కూడా

కూడా (*kūḍā*) — "also".

కూడా goes after the thing it is adding, not before it. **నేను కూడా** is "me too"; **పెరుగు కూడా** is "the curd as well".

English can drop "also" almost anywhere in a sentence and let the stress carry the meaning. Telugu puts **కూడా** straight after whatever it includes, and that placement does the work the stress would have done.

It is a small word that softens a great deal. Adding **కూడా** to an answer turns a flat **అవును** into agreement with the person who asked.

The word, taken apart — its roots and family

కూడా (*kūḍā*) is native Dravidian, built on *kūḍu*, "to join, add together", which DEDR 1882 lists with Tamil *kūṭu*, "to come together", and Kannada *kūḍu*, "to join".

What you've built

The first joining word.

Your turn

- *Say it: kūḍā*
- *Say it:* it once more, slowly
- *Say it: nēnu kūḍā*, then *perugu kūḍā*, and say what each one adds
- *Recall:* say *dāraṁi*
- *Read it:* **ఆకలి**, then say what it means

Before you move on

What does **కూడా** mean? ("also".) Say it once more.

64.2 మాత్రమే (mātramē) — only

Before the new one: what did *kūḍā* mean?

You'll want to know: మాత్రమే

మాత్రమే (*mātramē*) — "only".

మాత్రమే is the other half of **కూడా**. Where **కూడా** opens an answer out, **మాత్రమే** shuts it: **పెరుగు మాత్రమే** is "curd and nothing else". It stands in the same place, straight after the thing it is about.

It is built on Sanskrit *mātra*, "a measure" — the same piece English carries in metre and in diameter. Saying **మాత్రమే** is saying "this much and no further".

With a small quantity in front it does polite work. **కొంచెం మాత్రమే**, "only a little", accepts what is offered without taking much of it.

CDIAL 10023 lists Sanskrit *mātrā*, "measure".

What you've built

Two, and they pull opposite ways.

Your turn

- *Say it: mātramē*
- *Say it:* it once more, slowly
- *Say it: perugu kūḍā*, then *perugu mātramē*, and say which one takes more
- *Read it:* సూది
- *Recall:* say *nidra*

Before you move on

What does మాత్రమే mean? ("only".) Say it once more.

64.3 అయితే (ayitē) — in that case

Before the new one: what did *mātramē* mean?

You'll want to know: అయితే

అయితే (*ayitē*) — "in that case".

అయితే picks up what the other person has just said and turns on it: **సరే, అయితే వెళ్ళొస్తాను** — "alright, in that case I'll be off".

It is put together out of the piece Telugu uses for "it happened" plus the little ending that means "if", so what it literally says is "if it is so". English "well then" and "in that case" both land in the same spot.

At the head of an answer, on its own, **అయితే** is one of the most useful things a learner can carry. It buys a moment, and it shows the other person you were listening.

The word, taken apart — its roots and family

అయితే (*ayitē*) is native Dravidian: the "if it is" form of *agu*, "to be, become" (DEDR 333), one word with Tamil *āku* and Kannada *āgu*.

What you've built

Three.

Your turn

- *Say it: ayitē*
- *Say it:* it once more, slowly
- *Say it: sarē*, then *ayitē*, and put the two together
- *Recall:* say *cīpuru*
- *Read it:* దగ్గు, then say what it means

Before you move on

What does అయితే mean? ("in that case".) Say it once more.

64.4 తరువాత (taruvāta) — after that, later

Before the new one: what did *ayitē* mean?

You'll want to know: తరువాత

తరువాత (*taruvāta*) — "after that, later".

తరువాత puts two things in order: *bhōjanaṁ taruvāta*, "after the meal". It goes after the thing it follows, exactly like **కూడా** and **మాత్రమే** before it — a habit worth noticing, because it holds for a great many of these small words.

The word is inherited. Standing alone at the front of a sentence it means "later", and it is the gentle way to put something off: **తరువాత**, not now, and no reason offered.

తరువాత is also how a story gets kept moving. A listener who says it is asking you to go on.

The word, taken apart — its roots and family

తరువాత (*taruvāta*) is native Dravidian. DEDR 3142 lists *taruvāta*, "afterwards, next", itself, with *taruvāyi*, "what follows", in an entry with Tamil *taṟuvāy*, "occasion".

What you've built

Four, and this one is about order.

Your turn

- *Say it: taruvāta*
- *Say it:* it once more, slowly
- *Say it: bhōjanaṁ taruvāta*, then just *taruvāta*, and say how the two differ
- *Read it:* గొడుగు
- *Recall:* say *rōgaṁ*

Before you move on

What does **తరువాత** mean? ("after that, later".) Say it once more.

64.5 ఇంకా (iṅkā) — still, yet

Before the new one: what did *taruvāta* mean?

You'll want to know: ఇంకా

ఇంకా (*iṅkā*) — "still, yet".

ఇంకా says the thing is not finished. **ఇంకా ఉంది** is "there is still some"; **ఇంకా రాలేదు** is "she hasn't come yet".

It is the natural answer to **అంతే**. Where **అంతే** closes a list off, **ఇంకా** says there is more of it coming, and the two make a pair the way **కూడా** and **మాత్రమే** do.

Five small words, and not one of them names a thing. **కూడా**, **మాత్రమే**, **అయితే**, **తరువాత**, **ఇంకా** are what turn a set of separate answers into a conversation.

The word, taken apart — its roots and family

ఇంకా (*iṅkā*) is native Dravidian, on the near-pointing base *i-*. DEDR 410 lists *iṅka*, "hereafter, still, yet", itself.

What you've built

Five: **కూడా**, **మాత్రమే**, **అయితే**, **తరువాత**, **ఇంకా**. Enough to add to an answer, limit it, order it, or keep it open.

Your turn

- *Say it:* *iṅkā*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then answer *antē?* with *iṅkā undi*
- *Recall:* say *addaṁ*
- *Read it:* ఆరోగ్యం, then say what it means

Before you move on

What does ఇంకా mean? (“still, yet”.) Say it once more.

More Good Manners

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can welcome somebody in Telugu, make a request, ask their leave, and thank them.
>
> *Complete TE-C65-trust and demonstrate the chapter promise.*

65.1 స్వాగతం (svāgatam̐) — a welcome

Before the new one: what did *iṅkā* mean?

You'll want to know: స్వాగతం

స్వాగతం (*svāgatam̐*) — "a welcome".

Keep this well apart from **పరవాలేదు**. **పరవాలేదు** is what you say after somebody thanks you. **స్వాగతం** is what you say when they walk in. English hands the one word "welcome" both jobs; Telugu does not.

It is Sanskrit, and it comes apart neatly: *su-* "well" and *āgata* "come" — "well come", which is what the English word is too, arrived by an entirely separate road.

A house says it with the door open and a *gauravam̐* behind it. The **ముగ్గు** at the step is the same sentence without any words in it.

CDIAL 13920 lists Sanskrit *svāgata*, "welcome".

What you've built

The first thing said at a door.

Your turn

- *Say it: svāgataṁ*
- *Say it:* it once more, slowly
- *Say it: svāgataṁ*, then *paravālēdu*, and say which one answers a thank-you
- *Recall:* say *ākali*
- *Read it:* కూడా, then say what it means

Before you move on

What does స్వాగతం mean? ("a welcome".) Say it once more.

65.2 మర్యాద (maryāda) — good manners

Before the new one: what did *svāgataṁ* mean?

You'll want to know: మర్యాద

మర్యాద (*maryāda*) — "good manners".

మర్యాద is the doing half of *gauravaṁ*. Respect is what you feel for somebody; మర్యాద is what you do about it — standing up, offering the కుర్చీ, serving the *atithi* before yourself.

The word is Sanskrit and its first sense was a boundary line. Manners as a line you do not step over is a picture worth keeping hold of.

మర్యాదగా is how it usually reaches a person: మర్యాదగా మాట్లాడు, "speak with manners", which sounds sterner in English than it does in Telugu. It is closer to "be decent about it".

CDIAL 9895 lists Sanskrit *maryādā*, "region, boundary".

What you've built

Two: what you feel and what you do.

Your turn

- *Say it: maryāda*
- *Say it:* it once more, slowly

- *Say it: maryāda*, then *gauravaṁ*, and say which one somebody can watch you doing
- *Read it:* నిద్ర
- *Recall:* say *mātramē*

Before you move on

What does మర్యాద mean? ("good manners".) Say it once more.

65.3 మనవి (manavi) — a polite request

Before the new one: what did *maryāda* mean?

You'll want to know: మనవి

మనవి (*manavi*) — "a polite request".

మనవి is a request made from below — not **దయచేసి** set in front of an instruction, but the whole thing framed as a submission. **ఒక మనవి**, "one request", is said before the request itself arrives.

Where the word came from is not something any source consulted here settles, so nothing is invented for it. What is certain is the register it sits in, and that is the part a learner needs.

A **మనవి** goes to somebody who can say no: an official, an elder, a host. The word does half the softening before you have said what you want.

The word, taken apart — its roots and family

మనవి (*manavi*) is native Dravidian, one word with Tamil *maṉu* and Kannada *manave* (DEDR 4775). DEDR lists Telugu *manavi*, "a respectful request, petition".

What you've built

Three.

Your turn

- *Say it: manavi*
- *Say it:* it once more, slowly

- *Say it: manavi*, then *dayacēsi*, and say which one is the whole request
- *Recall:* say *daggu*
- *Read it:* అయితే, then say what it means

Before you move on

What does మనవి mean? ("a polite request".) Say it once more.

65.4 అనుమతి (anumati) — permission

Before the new one: what did *manavi* mean?

You'll want to know: అనుమతి

అనుమతి (*anumati*) — "permission".

అనుమతి is permission — what a **మనవి** is hoping to be given. **అనుమతి ఇవ్వండి**, "give permission", is the formal shape of it; in a house it usually comes out as a nod.

It is Sanskrit: *anu-* "along with" and *mati* "a mind". Permission is somebody's mind going along with yours, which is a kinder picture than the English word offers.

Asking leave before you go is where it is most used, and it sits naturally in front of **వెళ్ళొస్తాను**. With **అనుమతి** first, leaving stops being something you announce and becomes something you are given.

What you've built

Four.

Your turn

- *Say it: anumati*
- *Say it:* it once more, slowly
- *Say it: anumati*, then *veḷḷostānu*, and take your leave properly
- *Read it:* రోగం
- *Recall:* say *taruvāta*

Before you move on

What does **అనుమతి** mean? ("permission".) Say it once more.

65.5 నమ్మకం (nammakaṁ) — trust

Before the new one: what did *anumati* mean?

You'll want to know: నమ్మకం

నమ్మకం (*nammakaṁ*) — "trust".

నమ్మకం is trust, and it is the one word here that is Telugu's own. It is built on **నమ్ము**, "to believe", with the ending that turns an action into the thing itself.

The four before it are Sanskrit and they are all about form: a welcome, manners, a request, permission. **నమ్మకం** is what the form is for. A house that does all four and is still not trusted has been doing something else.

The word also carries "belief" in the religious sense, and Telugu is content to let one word hold both. Trusting a person and believing a thing are the same act pointed in two directions.

DEDR 3600 lists Telugu *nammu*, "to believe, trust", and *nammakamu*, "trust", with Tamil *nampu* and Kannada *nambu*.

What you've built

Five: **స్వాగతం**, **మర్యాద**, **మనవి**, **అనుమతి**, **నమ్మకం**. Enough to bring somebody in, ask something of them, and say **ధన్యవాదములు** when they agree.

Your turn

- *Say it: nammakaṁ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say *dhanyavādamulu* to whoever gave you the last one
- *Recall:* say *ārōgyaṁ*
- *Read it:* **ఇంకా**, then say what it means

Before you move on

What does **నమ్మకం** mean? (“trust”.) Say it once more.

Chapter 66

The Field

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a Telugu field and what comes off it, and take my leave when the work is done.
>
> *Complete TE-C66-harvest and demonstrate the chapter promise.*

66.1 పొలం (polaṁ) — a field

Before the new one: what did *nammakaṁ* mean?

You'll want to know: పొలం

పొలం (*polaṁ*) — "a field".

పొలం is a field under cultivation — not open ground, but somebody's, with a boundary and a name and a **రైతు** who walks it every morning.

The word is inherited. A **గ్రామం** is measured by its **పొలం** far more than by its houses, and directions in the country are given by whose **పొలం** you pass rather than by any **బాట**.

Going out to the **పొలం** before **ఉదయం** and coming back after **సాయంత్రం** is the shape of the day the rest of this chapter describes.

The word, taken apart — its roots and family

పొలం (*polaṁ*) is native Dravidian, one word with Tamil *pulam* and Kannada *pola* (DEDR 4303). DEDR lists Telugu *polamu*, "field, cultivated land".

What you've built

The ground everything else here stands on.

Your turn

- *Say it: polaṁ*
- *Say it:* it once more, slowly
- *Say it: polaṁ*, then *grāmaṁ*, and say which one feeds the other
- *Recall:* say *kūḍā*
- *Read it:* స్వాగతం, then say what it means

Before you move on

What does పొలం mean? ("a field".) Say it once more.

66.2 వరి (vari) — paddy, rice still in the field

Before the new one: what did *polaṁ* mean?

You'll want to know: వరి

వరి (*vari*) — "paddy", rice while it is still standing.

Telugu counts rice three times over and this is the first of them: వరి in the పొలం, బియ్యం once it is husked, అన్నం once it is cooked. Three words, three states, and none of them will stand in for another.

The word is inherited and it names the plant. English has one word for the lot and has to borrow "paddy" from Malay to get the same distinction; Telugu had it from the start.

A వరి పొలం under water with the seedlings just pushed in is the picture the coast is built on, and what is being pushed in is the మొక్క from earlier in this book.

DEDR 5265 lists Telugu *vari*, "paddy", with Tamil *vari*.

What you've built

Two: the ground and what is standing in it.

Your turn

- *Say it: vari*
- *Say it:* it once more, slowly
- *Say it: vari*, then say which of బియ్యం and అన్నం comes next
- *Read it:* మాత్రమే
- *Recall:* say *maryāda*

Before you move on

What does వరి mean? ("paddy, rice still in the field".) Say it once more.

66.3 గడ్డి (gaḍḍi) — grass

Before the new one: what did *vari* mean?

You'll want to know: గడ్డి

గడ్డి (*gaḍḍi*) — "grass".

గడ్డి is grass, and in a village it mostly means fodder — what gets cut at the edge of the పొలం and carried back for the గేదె and the మేక.

The word is inherited. It covers straw as well, meaning what is left of the వరి once the grain is off, so one word runs all the way from the living plant to the dry stalk stacked beside the house.

గడ్డి does insulting work too. Calling something గడ్డి is calling it worthless, which is what tends to happen to a word that means "the part nobody eats".

The word, taken apart — its roots and family

గడ్డి (*gaḍḍi*) is native Dravidian. DEDR 1158 lists *gaḍḍi*, "grass, straw, hay", with Kolami *gaḍḍi*, "grass", and compares the Sanskrit grass words *kaṭa* and *khaṭa*, known only from lexicons (CDIAL 2630, 3769); CDIAL takes *khaṭa* from Dravidian.

What you've built

Three, and this is what the animals get.

Your turn

- *Say it: gaḍḍi*
- *Say it:* it once more, slowly
- *Say it: gaḍḍi*, then *gēde*, and say which one is carried to the other
- *Recall:* say *ayitē*
- *Read it:* మనవి, then say what it means

Before you move on

What does గడ్డి mean? ("grass".) Say it once more.

66.4 కల్లం (kallaṁ) — a threshing floor

Before the new one: what did *gaḍḍi* mean?

You'll want to know: కల్లం

కల్లం (*kallaṁ*) — "a threshing floor".

కల్లం is the threshing floor: a flat patch of ground beaten hard and swept clean, where the cut వరి is separated from its గడ్డి.

The word is inherited. A కల్లం belongs to the గ్రామం rather than to one house, and the order in which families take their turn on it is settled by custom rather than by asking — the kind of arrangement a village is full of.

It gets swept with a చీపురు before anything is laid down on it, and that sweeping is taken about as seriously as the ముగ్గు at a doorstep.

The word, taken apart — its roots and family

కల్లం (*kallaṁ*) is native Dravidian, one word with Tamil *kaḷam* and Malayalam *kaḷam*, "threshing floor" (DEDR 1376). DEDR compares Sanskrit *khala*, "threshing floor" (CDIAL 3834).

What you've built

Four: where the year's work gets finished.

Your turn

- *Say it: kallaṁ*
- *Say it:* it once more, slowly
- *Say it: kallaṁ*, then *cīpuru*, and say which one is used on the other
- *Read it:* తరువాత
- *Recall:* say *anumati*

Before you move on

What does కల్లం mean? (“a threshing floor”.) Say it once more.

66.5 పంట (paṇṭa) — a harvest

Before the new one: what did *kallaṁ* mean?

You’ll want to know: పంట

పంట (*paṇṭa*) — “a harvest”.

పంట is the harvest — the crop standing and the crop taken in, both at once. It is inherited, and it is what this whole chapter has been walking towards: పొలం, వరి, గడ్డి, కల్లం, and then పంట.

Telugu uses it well outside the field. A good year at anything is a మంచి పంట, and somebody talking about how their children turned out will reach for the word without meaning anything about rice at all.

When the పంట is in and the కల్లం is swept, the day and the season finish together, and there is nothing left to do but say వెళ్ళొస్తాను.

The word, taken apart — its roots and family

పంట (*paṇṭa*) is native Dravidian. DEDR 4004 lists *paṇṭa*, “produce, crop”, under *paṇḍu*, “to ripen”, with Tamil *paḻu*, “to ripen”. DEDR compares Sanskrit *phala*, “fruit” (CDIAL 9051).

What you’ve built

Five: పొలం, వరి, గడ్డి, కల్లం, పంట. A year’s work in five words, and a good place to take your leave.

Your turn

- *Say it: paṇṭa*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then take your leave with *veḷḷostānu*
- *Recall:* say *iṅkā*
- *Read it:* నమ్మకం, then say what it means

Before you move on

What does పంట mean? (“a harvest”.) Say it once more.

Chapter 67

The House Itself

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the parts a Telugu house is built from, and greet the people inside it.
>
> *Complete TE-C67-window and demonstrate the chapter promise.*

67.1 గోడ (gōḍa) — a wall

Before the new one: what did *paṇṭa* mean?

You'll want to know: గోడ

గోడ (*gōḍa*) — "a wall".

గోడ is a wall: the built side of a room. A village house puts up four of them in mud or in brick, and everything after that — the **తలుపు**, the **కుర్చీ** pushed back against one of them — is placed by where they stand.

The word is inherited, and it does the same figurative work English asks of a wall. Somebody who will not listen is a **గోడ**, and a family with nothing hidden has no **గోడ** inside it.

Whitewashing the **గోడ** before a festival is its own small season in a Telugu house. A guest who arrives to a fresh one has been told they were expected, and the right thing to say at that moment is **నమస్కారం**.

The word, taken apart — its roots and family

గోడ (*gōḍa*) is native Dravidian, one word with Kannada *gōḍe*, "wall" (DEDR 2207).

What you've built

One. What a house is measured by before anything is put inside it.

Your turn

- *Say it: gōḍa*
- *Say it:* it once more, slowly
- *Say it: gōḍa*, then *namaskāram*, as though greeting somebody at a freshly painted one
- *Recall:* say *svāgataṁ*
- *Read it:* పొలం, then say what it means

Before you move on

What does గోడ mean? ("a wall".) Say it once more.

67.2 కప్పు (kappu) — a roof

Before the new one: what did *gōḍa* mean?

You'll want to know: కప్పు

కప్పు (*kappu*) — "a roof".

కప్పు is the roof — the thing that covers. It comes from the same stem as the everyday word for covering something over, so a lid on a గిన్నె and the roof over a room are one idea in Telugu.

Village roofs were గడ్డి over beams for centuries and are tile or concrete now. The material changed and the word did not, which is usually a sign of a very old one.

To be under somebody's కప్పు is to be their guest, and it binds the person underneath as much as the person above. నమస్కారం comes first, and everything else follows it.

The word, taken apart — its roots and family

కప్పు (*kappu*) is native Dravidian, from the verb *kappu*, "to cover", one word with Tamil *kappu*, "to overspread", and Kannada *kappu*, "to

cover" (DEDR 1221). DEDR compares Sanskrit *kavaca*, "armour" (CDIAL 2957), which CDIAL takes from Dravidian.

What you've built

Two: గోడ and కప్పు. Sides, and a lid.

Your turn

- *Say it: kappu*
- *Say it:* it once more, slowly
- *Say it: gōḍa*, then *kappu*, and say which one holds up the other
- *Read it:* మర్యాద
- *Recall:* say *vari*

Before you move on

What does కప్పు mean? ("a roof".) Say it once more.

67.3 గడప (gaḍapa) — a threshold

Before the new one: what did *kappu* mean?

You'll want to know: గడప

గడప (*gaḍapa*) — "a threshold".

గడప is the threshold: the raised strip of stone or wood under the తలుపు that you step over on the way in.

It is the most watched piece of a Telugu house. The ముగ్గు is drawn just outside it, water is thrown across it at ఉదయం, and nobody steps on it if they can help it.

Because it marks in from out, గడప also does the work of the word household. Asking whose గడప somebody comes from is asking about their family, not about their doorstep.

The word, taken apart — its roots and family

గడప (*gaḍapa*) is native Dravidian. DEDR 1109 lists *kaḍapa* and *gaḍapa*, "threshold", under *kaḍacu*, "to pass over, cross", with Tamil *kaṭa*, "to pass through".

What you've built

Three. The line you cross to be inside.

Your turn

- *Say it: gaḍapa*
- *Say it:* it once more, slowly
- *Say it: gaḍapa*, then *muggu*, and say which one is drawn beside the other
- *Recall:* say *manavi*
- *Read it:* గడ్డి, then say what it means

Before you move on

What does గడప mean? ("a threshold".) Say it once more.

67.4 మెట్టు (meṭṭu) — a step

Before the new one: what did *gaḍapa* mean?

You'll want to know: మెట్టు

మెట్టు (*meṭṭu*) — "a step".

మెట్టు is a step — one of a flight, cut in stone or built up in mud.

Telugu counts them and remembers them. The steps down to a చెరువు are named in some villages, and a house with a మెట్టు at its గడప is a house standing a little above the street.

The word carries rank as well. A person who has risen has climbed a మెట్టు, which is how a stair turns into a career with nobody explaining it.

The word, taken apart — its roots and family

మెట్టు (*meṭṭu*) is native Dravidian, one word with Kannada *meṭṭu* (DEDR 5057). DEDR lists Telugu *meṭṭu*, "step, stair".

What you've built

Four. Something to climb before you cross.

Your turn

- *Say it: meṭṭu*
- *Say it:* it once more, slowly
- *Say it: meṭṭu*, then *gaḍapa*, in the order your feet meet them
- *Read it:* అనుమతి
- *Recall:* say *kallaṁ*

Before you move on

What does మెట్టు mean? ("a step".) Say it once more.

67.5 కిటికీ (kiṭikī) — a window

Before the new one: what did *meṭṭu* mean?

You'll want to know: కిటికీ

కిటికీ (*kiṭikī*) — "a window".

కిటికీ is a window. It is a borrowing, probably from the north, where Hindi says *khiṛkī*, and it arrived carrying the shape of window it names: a framed opening in a గోడ, rather than the small unglazed gap older houses left for గాలి.

Telugu kept the borrowed word and the older habit side by side. A కిటికీ is opened at ఉదయం, shut against the sun in the middle of the day, and opened again by సాయంత్రం.

A house with a గోడ, a కప్పు, a గడప, a మెట్టు and a కిటికీ is a whole house. Whoever is standing at any one of them is somebody you can greet.

CDIAL 3770 traces Hindi *khiṛkī* and Marathi *khiḍkī* to Sanskrit *khaṭakkikā*, “side door”.

What you’ve built

Five: గోడ, కప్పు, గడప, మెట్టు, కిటికీ. A house you could walk up to and greet.

Your turn

- *Say it: kiṭikī*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *namaskāram* at the last one
- *Recall:* say *nammakaṁ*
- *Read it:* పంట, then say what it means

Before you move on

What does కిటికీ mean? (“a window”.) Say it once more.

68.1 శబ్దం (śabdaṁ) — a sound

Before the new one: what did *kiṭikī* mean?

You'll want to know: శబ్దం

శబ్దం (*śabdaṁ*) — "a sound".

శబ్దం is a sound — any sound at all, from a **తలుపు** closing to thunder over a **పొలం**.

It is Sanskrit, borrowed early and borrowed whole. It covers the smallest noise and the largest with no change: a **చుక్క** of water landing, or the crack that comes before rain.

A room with no **శబ్దం** in it is not called quiet in Telugu so much as empty, and people say exactly that about a house whose children have grown up and gone.

CDIAL 12298 lists Sanskrit *śabda*, "articulate sound, noise".

What you've built

One. The most general thing an ear can take in.

Your turn

- *Say it: śabdaṁ*
- *Say it:* it once more, slowly
- *Say it: śabdaṁ*, then *kiṭikī*, and say which one comes in through the other
- *Recall:* say *polaṁ*
- *Read it:* గోడ, then say what it means

Before you move on

What does శబ్దం mean? ("a sound".) Say it once more.

68.2 గొంతు (gontu) — a voice

Before the new one: what did *śabdaṁ* mean?

You'll want to know: గొంతు

గొంతు (*gontu*) — "a voice".

గొంతు is a voice, and it is also the throat that makes one — the front of the మెడ you already know. Telugu lets the two meanings sit in the single word.

Somebody loud has a big గొంతు and somebody who sings well has a sweet one. A person who speaks up for people who cannot is said to have lent them their గొంతు.

Losing it is ordinary. After a night of దగ్గు a villager will say the గొంతు has gone, and mean the throat and the sound at once.

The word, taken apart — its roots and family

గొంతు (*gontu*) is native Dravidian. DEDR 1718 lists *gontu*, "throat, voice", with *kuttuka*, "throat", beside Kannada *kuttige*, "throat, neck".

What you've built

Two: శబ్దం and గొంతు. Sound in general, and the sound a person makes.

Your turn

- *Say it: gontu*
- *Say it:* it once more, slowly
- *Say it: gontu*, then *śabdaṁ*, and say which one is the wider word
- *Read it:* వరి
- *Recall:* say *kappu*

Before you move on

What does గొంతు mean? ("a voice".) Say it once more.

68.3 పాట (pāṭa) — a song

Before the new one: what did *gontu* mean?

You'll want to know: పాట

పాట (*pāṭa*) — "a song".

పాట is a song. Listen for the middle letter. **పాత**, with a plain letter, is the word for old that you already have; **పాట** is a song. One has the tongue behind the teeth and the other has it curled back.

The word is inherited and it is everywhere: work songs at the **కల్లం**, lullabies, film songs a whole state can hum. A Telugu speaker will name a **పాట** faster than a book.

Anything repeated past patience becomes a **పాట** as an insult, in the way English reaches for the same old song.

The word, taken apart — its roots and family

పాట (*pāṭa*) is native Dravidian, one word with Tamil *pāṭu* and Kannada *pāḍu* (DEDR 4065). DEDR lists Telugu *pāḍu*, "to sing", and *pāṭa*, "song".

What you've built

Three. And a **పాత పాట** is an old song, which is a phrase you have now earned.

Your turn

- *Say it: pāṭa*
- *Say it:* it once more, slowly
- *Say it: pāta*, then *pāṭa*, and hear the one letter between them
- *Recall:* say *gaḍḍi*
- *Read it:* గడప, then say what it means

Before you move on

What does పాట mean? ("a song".) Say it once more.

68.4 అరుపు (arupu) — a shout

Before the new one: what did *pāṭa* mean?

You'll want to know: అరుపు

అరుపు (*arupu*) — "a shout".

అరుపు is a shout: a cry raised on purpose, loud enough to carry the width of a పొలం.

It is inherited, built on the everyday word for shouting, and it is not rude in itself. Calling somebody in from work is an అరుపు, and so is the cry that warns a గ్రామం.

It turns rude only when there is a person on the far end of it. Somebody who was shouted at will say they got an అరుపు, and everybody hears the difference without being told.

The word, taken apart — its roots and family

అరుపు (*arupu*) is native Dravidian. DEDR 319 lists *a̲racu*, "to cry out, shout", and *a̲rapu*, "a cry, shout", with Kannada *a̲racu*, "to cry out", and Tamil *a̲rai*, "to speak, sound".

What you've built

Four. Sound, voice, song, and now sound sent a distance.

Your turn

- *Say it: arupu*
- *Say it:* it once more, slowly
- *Say it: arupu*, then *gontu*, and say which one is louder
- *Read it:* కల్లం
- *Recall:* say *meṭṭu*

Before you move on

What does అరుపు mean? ("a shout".) Say it once more.

68.5 కబురు (kaburu) — a message, news

Before the new one: what did *arupu* mean?

You'll want to know: కబురు

కబురు (*kaburu*) — "a message, news".

కబురు is a message: word sent, or news arriving.

It came into Telugu from Arabic by way of Persian, and it was worn in so long ago that it stopped feeling borrowed. It is the word for what an అరుపు is for — getting something to somebody who is not there.

Sending కబురు is a fixed pair of words in the countryside, and the greeting at the head of a message is part of the message. Names travel this way too: a కబురు usually opens by saying whose it is.

What you've built

Five: శబ్దం, గొంతు, పాట, అరుపు, కబురు. Sound, and the whole way it gets from one person to another.

Your turn

- *Say it: kaburu*
- *Say it:* it once more, slowly

- *Say it:* all five in order, then your own name, as the opening line of a **కబురు**
- *Recall:* say *paṇṭa*
- *Read it:* **కిటికీ**, then say what it means

Before you move on

What does **కబురు** mean? (“a message, news”.) Say it once more.

Tools

> ***By the end of this chapter:*** I can name five Telugu tools and ask politely to borrow one.
>
> *Complete TE-C69-stick and demonstrate the chapter promise.*

69.1 గొడ్డలి (goḍḍali) — an axe

Before the new one: what did *kaburu* mean?

You'll want to know: గొడ్డలి

గొడ్డలి (*goḍḍali*) — "an axe".

గొడ్డలి is an axe — an iron head on a wooden handle, for cutting a చెట్టు down or splitting firewood at the గడప.

The word is inherited and old. Its first piece turns up in other Telugu words about striking, so the name says plainly what the thing does.

Asking for one is the ordinary polite request: దయచేసి, and then the word. The person hands it over handle first, and nobody throws a గొడ్డలి.

The word, taken apart — its roots and family

గొడ్డలి (*goḍḍali*) is listed in DEDR's appendix of words taken from Indo-Aryan (DEDR App. 32), under Sanskrit *kuṭhāra*, "axe" (CDIAL 3244). CDIAL itself thinks *kuṭhāra* probably came from Dravidian, so the word may have gone north and come back. Tamil *kōṭāli* and Kannada *koḍali* are in the same appendix entry.

What you've built

One. Heavy, and handed over rather than thrown.

Your turn

- *Say it: goḍḍali*
- *Say it:* it once more, slowly
- *Say it: dayacēsi*, then *goḍḍali*, in that order
- *Recall:* say *gōḍa*
- *Read it:* శబ్దం, then say what it means

Before you move on

What does గొడ్డలి mean? ("an axe".) Say it once more.

69.2 రంపం (rampaṁ) — a saw

Before the new one: what did *goḍḍali* mean?

You'll want to know: రంపం

రంపం (*rampaṁ*) — "a saw".

రంపం is a saw. Where the **గొడ్డలి** breaks wood apart, the **రంపం** takes it apart along a line.

It is a borrowing, and it came in with the trade rather than ahead of it: the long two-man saw and its name reached the carpenter's shed together.

The noise is half the word. Telugu calls a rasping sound a **రంపం** sound, and somebody who repeats a complaint until you give way is running a **రంపం** over your **చెవి**.

The word, taken apart — its roots and family

రంపం (*rampaṁ*) is listed in DEDR's appendix of words taken from Indo-Aryan (DEDR App. 55), under Prakrit *rampa*, "knife, scraper" (CDIAL 10629), with Tamil *irampam*, "a saw".

What you've built

Two. Both of them cut; only one cuts straight.

Your turn

- *Say it: rampaṁi*
- *Say it:* it once more, slowly
- *Say it: goḍḍali*, then *rampaṁi*, and say which one leaves a straight edge
- *Read it:* కప్పు
- *Recall:* say *gontu*

Before you move on

What does రంపం mean? ("a saw".) Say it once more.

69.3 పార (pāra) — a spade

Before the new one: what did *rampaṁi* mean?

You'll want to know: పార

పార (*pāra*) — "a spade".

పార is a spade — a broad iron blade on a handle, for digging and for shifting బురద or ఇసుక.

It is the tool of the రైతు out of season: clearing a channel, banking up the edge of a పొలం, cutting a way for water to run.

The word is inherited and it stays narrow. It does not stretch into anything figurative at all, which by itself says how firmly it belongs to the ground.

The word, taken apart — its roots and family

పార (*pāra*) is native Dravidian, one word with Tamil *pārai* and Kannada *pāre* (DEDR 4093). DEDR lists Telugu *pāra*, "spade".

What you've built

Three. The first one here you push rather than swing.

Your turn

- *Say it:* *pāra*
- *Say it:* it once more, slowly
- *Say it:* *pāra*, then *rampaṁ*, and say which one you push
- *Recall:* say *gaḍapa*
- *Read it:* పాట, then say what it means

Before you move on

What does పార mean? ("a spade".) Say it once more.

69.4 సుత్తి (sutti) — a hammer

Before the new one: what did *pāra* mean?

You'll want to know: సుత్తి

సుత్తి (*sutti*) — "a hammer".

సుత్తి is a hammer: an iron head on a short handle, for driving things in and for beating things straight.

Telugu turned it into a word about people. Somebody who makes the same point until you give in is doing సుత్తి, and telling them to stop the సుత్తి is telling them to stop going on.

In a city that second sense is now the commoner one, which is worth knowing before somebody uses it about you.

The word, taken apart — its roots and family

సుత్తి (*sutti*) is native Dravidian, one word with Tamil *cutti*, Kannada *suttige* and Malayalam *cutti* (DEDR 2668). DEDR gives the Telugu as *sutte*.

What you've built

Four. The one whose second meaning you are likelier to hear.

Your turn

- *Say it: sutti*
- *Say it:* it once more, slowly
- *Say it: sutti*, then *goḍḍali*, and say which one has a short handle
- *Read it:* మెట్టు
- *Recall:* say *arupu*

Before you move on

What does సుత్తి mean? ("a hammer".) Say it once more.

69.5 కర్ర (karra) — a stick

Before the new one: what did *sutti* mean?

You'll want to know: కర్ర

కర్ర (*karra*) — "a stick".

కర్ర is a stick — a length of wood, cut or picked up, for everything the other four are too particular for.

It is inherited and completely ordinary: a walking stick for a తాత, a herding stick behind a మేక, the handle still waiting for a గొడ్డలి head.

It is also the right thing to ask for first. దయచేసి and a కర్ర costs nobody anything, and by the time you want the సుత్తి you already know how to ask.

The word, taken apart — its roots and family

కర్ర (*karra*) is native Dravidian, one word with Tamil *kaṟal*, "firewood" (DEDR 1389), which gives the older Telugu spelling *kaṟṟa*, "wood, stick". DEDR compares Prakrit *karālī*, "toothstick".

What you've built

Five: గొడ్డలి, రంపం, పార, సుత్తి, కర్ర. Enough to ask for anything in a shed.

Your turn

- *Say it: karra*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *dayacēsi* and the one you would borrow first
- *Recall:* say *kiṭikī*
- *Read it:* కబురు, then say what it means

Before you move on

What does కర్ర mean? ("a stick".) Say it once more.

Chapter 70

Small Creatures

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five small Telugu creatures and answer yes or no about them.
>
> *Complete TE-C70-spider and demonstrate the chapter promise.*

70.1 ఎలుక (eluka) — a mouse, a rat

Before the new one: what did *karra* mean?

You'll want to know: ఎలుక

ఎలుక (*eluka*) — "a mouse, a rat".

ఎలుక is a mouse, and the same word does for a rat. Telugu does not split them the way English does; when the size matters, a word for size is added.

It is inherited. Any house with **బియ్యం** in it has an **ఎలుక** story, and the **పిల్లి** you already know earns its keep here.

Asked whether there is one about, most people say **అవును** before they have thought about it, and **లేదు** only after going to look.

The word, taken apart — its roots and family

ఎలుక (*eluka*) is native Dravidian, one word with Tamil *eli*, Kannada *eli* and Malayalam *eli* (DEDR 833).

What you've built

One. And the first thing anybody asks about a house.

Your turn

- *Say it: eluka*
- *Say it:* it once more, slowly
- *Say it: eluka*, then *avunu*, then *lēdu*
- *Recall:* say *śabdaṁ*
- *Read it:* గొడ్డలి, then say what it means

Before you move on

What does ఎలుక mean? ("a mouse, a rat".) Say it once more.

70.2 కప్ప (kappa) — a frog

Before the new one: what did *eluka* mean?

You'll want to know: కప్ప

కప్ప (*kappa*) — "a frog".

కప్ప is a frog. Set it beside కప్పు, the roof, and you have a pair worth saying twice: one small vowel at the end is the whole difference.

It is inherited and it belongs to the rains. The first కప్ప heard after dark is how a గ్రామం knows the season turned, before anybody looks at a calendar.

Telugu uses it for somebody whose world is small — a కప్ప in a well, which is a picture a dozen unrelated languages reached for on their own.

The word, taken apart — its roots and family

కప్ప (*kappa*) is native Dravidian, one word with Kannada *kappe* (DEDR 1224). DEDR lists Telugu *kappa*, "frog".

What you've built

Two. And the roof is still కప్పు.

Your turn

- *Say it: kappa*
- *Say it:* it once more, slowly
- *Say it: kappu*, then *kappa*, and say which one is the roof
- *Read it:* గొంతు
- *Recall:* say *rampaṁ*

Before you move on

What does కప్ప mean? ("a frog".) Say it once more.

70.3 దోమ (dōma) — a mosquito

Before the new one: what did *kappa* mean?

You'll want to know: దోమ

దోమ (*dōma*) — "a mosquito".

దోమ is a mosquito. The word is inherited, and it is said with feeling.

A దోమ is the reason for the net over a bed, for smoke at dusk, and for half the complaints of a hot సాయంత్రం.

It is also the standard small annoyance. Somebody waving away a threat calls it a దోమ, and somebody who could not sleep blames one.

The word, taken apart — its roots and family

దోమ (*dōma*) is native Dravidian, one word with Kannada *dōme* (DEDR 2991). DEDR lists Telugu *dōma*, "mosquito".

What you've built

Three. The smallest of them and the loudest complaint.

Your turn

- *Say it: dōma*
- *Say it:* it once more, slowly

- *Say it:* *dōma*, then *kappa*, and say which one you hear at night
- *Recall:* say *pāṭa*
- *Read it:* పార, then say what it means

Before you move on

What does దోమ mean? ("a mosquito".) Say it once more.

70.4 ఉడుత (uḍuta) — a squirrel

Before the new one: what did *dōma* mean?

You'll want to know: ఉడుత

ఉడుత (*uḍuta*) — "a squirrel".

ఉడుత is a squirrel — the striped palm squirrel that runs along the top of a గోడ and out onto any కొమ్మ it can reach.

It is inherited. The three stripes down its back carry a story that every Telugu household can tell, and the animal is let alone because of it.

An ఉడుత's help is a set phrase for a small contribution offered honestly. Whoever says it is calling their own share tiny and means to give it anyway.

The word, taken apart — its roots and family

ఉడుత (*uḍuta*) is native Dravidian, one word with Kannada *uḍute* (DEDR 590). DEDR lists Telugu *uḍuta*, "squirrel".

What you've built

Four. The one nobody chases off.

Your turn

- *Say it:* *uḍuta*
- *Say it:* it once more, slowly
- *Say it:* *uḍuta*, then *eluka*, and say which one is welcome
- *Read it:* అరుపు

- *Recall:* say *sutti*

Before you move on

What does **ఉడుత** mean? ("a squirrel".) Say it once more.

70.5 సాలీడు (sālīḍu) — a spider

Before the new one: what did *uḍuta* mean?

You'll want to know: సాలీడు

సాలీడు (*sālīḍu*) — "a spider".

సాలీడు is a spider — the one in the corner where the **గోడ** meets the **కప్పు**.

It is inherited, and it is built on the old Telugu word for a weaver, so the name says what the creature does. The thread a person works with is **దారం**, which you already have.

Ask whether one has been swept out and the answer is a plain **అవును** or **లేదు**, which is where five small creatures have got you.

The word, taken apart — its roots and family

సాలీడు (*sālīḍu*) is native Dravidian. DEDR 2475 lists the same Telugu form as "a weaver", with *sāle*, "the weaver caste", beside Tamil *cāliyaṉ* and Kannada *sāliga*, "weavers". The entry does not list the spider sense: the spider is named as the weaver.

What you've built

Five: **ఎలుక**, **కప్ప**, **దోమ**, **ఉడుత**, **సాలీడు**. Everything small enough to share a house with.

Your turn

- *Say it: sālīḍu*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *avunu* for the ones in your house and *lēdu* for the rest
- *Recall:* say *kaburu*

- *Read it:* కర్ర, then say what it means

Before you move on

What does సాలీడు mean? (“a spider”.) Say it once more.

Chapter 71

The Wider Family

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the family a Telugu marriage adds, and ask after each of them.
>
> *Complete TE-C71-son-in-law and demonstrate the chapter promise.*

71.1 మామ (māma) — an uncle; a father-in-law

Before the new one: what did *sālīḍu* mean?

You'll want to know: మామ

మామ (*māma*) — "an uncle; a father-in-law".

మామ is a mother's brother, and it is also a father-in-law. Telugu keeps one word for both because for a very long time they were often the same man.

That is the whole of it: a man's sister's daughter was the expected match for his son, so the uncle a child grew up with became the father-in-law they married into.

Asking after a **మామ**'s **ఆరోగ్యం** is the first thing said after **నమస్కారం** in a house you have married into.

The word, taken apart — its roots and family

మామ (*māma*) is a Dravidian word, one with Tamil *māmaṉ* and Kannada *māma*, "maternal uncle, father-in-law" (DEDR 4813). DEDR compares Sanskrit *māma*, "uncle", and CDIAL 10055 calls that a

nursery word with similar words in Dravidian.

What you've built

One. And the reason Telugu needs fewer family words than you expect.

Your turn

- *Say it: māma*
- *Say it:* it once more, slowly
- *Say it: māma*, then *ārōgyaṁ*, as one question
- *Recall:* say *goḍḍali*
- *Read it:* **ఎలుక**, then say what it means

Before you move on

What does **మామ** mean? ("an uncle; a father-in-law".) Say it once more.

71.2 అత్త (atta) — an aunt; a mother-in-law

Before the new one: what did *māma* mean?

You'll want to know: అత్త

అత్త (*atta*) — "an aunt; a mother-in-law".

అత్త is the **మామ**'s counterpart: a father's sister, and a mother-in-law.

The same reasoning folds them together. She is the woman a child calls **అత్త** while growing up and the woman they answer to after marrying, and one word covers both lives.

It is inherited and it is among the oldest words in the family. The neighbouring languages all keep something very close to it.

The word, taken apart — its roots and family

అత్త (*atta*) is a Dravidian word, one with Tamil *attai*, "father's sister, mother-in-law", and Kannada *atte*, "mother-in-law" (DEDR 142). DEDR compares Sanskrit *attā*, "mother, elder sister", which CDIAL

222 itself takes from Dravidian.

What you've built

Two: **మామ** and **అత్త**, and they usually arrive as a pair.

Your turn

- *Say it: atta*
- *Say it:* it once more, slowly
- *Say it: māma*, then *atta*, and say which one is the mother-in-law
- *Read it:* **రంపం**
- *Recall:* say *kappa*

Before you move on

What does **అత్త** mean? ("an aunt; a mother-in-law".) Say it once more.

71.3 బావ (bāva) — a brother-in-law; a male cousin

Before the new one: what did *atta* mean?

You'll want to know: బావ

బావ (*bāva*) — "a brother-in-law; a male cousin".

బావ is a sister's husband, a wife's brother, and the **మామ**'s son — the cousin you might have married.

So the word covers a bond that is close, level and a little teasing. Two men who call each other **బావ** can joke in a way an **అన్న** and a **తమ్ముడు** cannot.

City Telugu now uses it for a friend, roughly where English says mate. That irritates some people and has stopped nobody.

The word, taken apart — its roots and family

Where **బావ** (*bāva*) comes from is not settled, and DEDR does not list it. CDIAL 9455 cites Sanskrit *bhāvuka*, "sister's husband", a word of

the drama, beside *bhāma*, which it takes as probably a pet name made from *bhrāṭṛ*, "brother"; the Telugu word may belong with them.

What you've built

Three. The first one standing on level ground with you.

Your turn

- *Say it: bāva*
- *Say it:* it once more, slowly
- *Say it: bāva*, then *māma*, and say which one is older
- *Recall:* say *pāra*
- *Read it:* దోమ, then say what it means

Before you move on

What does బావ mean? ("a brother-in-law; a male cousin".) Say it once more.

71.4 మరదలు (maradalu) — a sister-in-law; a female cousin

Before the new one: what did *bāva* mean?

You'll want to know: మరదలు

మరదలు (*maradalu*) — "a sister-in-law; a female cousin".

మరదలు is the **బావ**'s counterpart on the other side: a wife's younger sister, a younger brother's wife, and the **మామ**'s daughter — the cousin you might have married.

So it carries the same easy, teasing register that **బావ** does. A **బావ** and a **మరదలు** can joke across a room in a way an **అన్న** and a **చెల్లి** cannot, and Telugu films have lived off that for eighty years.

It is inherited, and it belongs to the same reckoning as the rest of this chapter: the person a marriage hands you was very often somebody the family already had a word for.

The word, taken apart — its roots and family

మరదలు (*maradalu*) is native Dravidian. DEDR 4762 lists the Telugu word as "spouse's younger sister, younger brother's wife, younger female cross-cousin", with a matching masculine for the younger brother-in-law.

What you've built

Four. The one who matches **బావ**.

Your turn

- *Say it: maradalu*
- *Say it:* it once more, slowly
- *Say it: bāva*, then *maradalu*, and say which of the two is the woman
- *Read it:* **సుత్తి**
- *Recall:* say *uḍuta*

Before you move on

What does **మరదలు** mean? ("a sister-in-law; a female cousin".) Say it once more.

71.5 అల్లుడు (alluḍu) — a son-in-law

Before the new one: what did *maradalu* mean?

You'll want to know: అల్లుడు

అల్లుడు (*alluḍu*) — "a son-in-law".

అల్లుడు is a daughter's husband — the **మామ**'s word for the young man on the far side of the match.

He is treated as a guest for life. An **అల్లుడు** on a visit is fed first, seated first and asked after first, and the household's own people wait their turn.

Which is what the chapter has been building to: **మామ**, **అత్త**, **బావ**, **మరదలు**, **అల్లుడు**. Ask each of them how they are and you have done the whole visit properly.

The word, taken apart — its roots and family

అల్లుడు (*alluḍu*) is native Dravidian, one word with Kannada *aḷiya*, "son-in-law", and Malayalam *aḷiyan*, "wife's brother" (DEDR 2410).

What you've built

Five: **మామ**, **అత్త**, **బావ**, **మరదలు**, **అల్లుడు**. A marriage's worth of new people to ask after.

Your turn

- *Say it:* *alluḍu*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *ārōgyaṁ*, asking after the last of them
- *Recall:* say *karra*
- *Read it:* **సాలీడు**, then say what it means

Before you move on

What does **అల్లుడు** mean? ("a son-in-law".) Say it once more.

Chapter 72

The Market

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can buy something in a Telugu shop, ask the price, and thank the seller.
>
> *Complete TE-C72-bargain and demonstrate the chapter promise.*

72.1 అంగడి (aṅgaḍi) — a shop

Before the new one: what did *alluḍu* mean?

You'll want to know: అంగడి

అంగడి (*aṅgaḍi*) — "a shop".

అంగడి is a shop — one counter, one family behind it, and everything a **గ్రామం** needs on the shelves.

It is inherited, and it is the older and homelier of the two words available. City Telugu will as often reach for a borrowed word for a store, but the **అంగడి** is the one at the end of the **బాట**.

You are known in an **అంగడి**. Nobody there opens with a price; they open by asking whether your household is well.

The word, taken apart — its roots and family

అంగడి (*aṅgaḍi*) is native Dravidian, one word with Tamil *aṅkāṭi*, "bazaar", and Kannada *aṅgaḍi*, "shop" (DEDR 35). DEDR compares, with a query, Sanskrit *aṅgaṇa*, "courtyard".

What you've built

One. The place the rest of this chapter happens in.

Your turn

- *Say it: aṅgaḍi*
- *Say it:* it once more, slowly
- *Say it: aṅgaḍi*, then *grāmaṁ*, and say which one sits inside the other
- *Recall:* say *eluka*
- *Read it:* మూమ, then say what it means

Before you move on

What does అంగడి mean? ("a shop".) Say it once more.

72.2 డబ్బు (ḍabbu) — money

Before the new one: what did *aṅgaḍi* mean?

You'll want to know: డబ్బు

డబ్బు (*ḍabbu*) — "money".

డబ్బు is money. You have said it once already without being told what it was: డబ్బు లేదు, there is no money, turned up early as an example of how లేదు denies that a thing exists. Here is the word itself.

It is a borrowing, from the name of a small copper coin, and it travelled across the region on the coin's back.

It is blunt and it is not rude. Asking whether somebody has డబ్బు today is an ordinary question in an అంగడి where the account is settled by the month.

The word, taken apart — its roots and family

The origin of డబ్బు (*ḍabbu*) is uncertain. DEDR and CDIAL list words of this shape only in other senses: a drum's noise (DEDR 2947) and a ladle (CDIAL 6206).

What you've built

Two. And one of them you had already used once.

Your turn

- *Say it: ḍabbu*
- *Say it:* it once more, slowly
- *Say it: ḍabbu*, then *lēdu*, as the phrase you already knew
- *Read it:* కప్ప
- *Recall:* say *atta*

Before you move on

What does డబ్బు mean? ("money".) Say it once more.

72.3 ధర (dhara) — a price

Before the new one: what did *ḍabbu* mean?

You'll want to know: ధర

ధర (*dhara*) — "a price".

ధర is a price — what a thing costs, said out loud.

It is Sanskrit, from a sense of what holds a thing up, which is a fair picture of value. Telugu uses it for one thing's price and for prices in general: when people say the ధర has gone up, they mean everything has.

Asking is direct and expected. Nobody in an అంగడి minds the question, and asking before you pick a thing up is politer than asking after.

CDIAL 6740 lists Sanskrit *dhara*, "holding, supporting"; the sense "price" is the one Telugu gives it.

What you've built

Three. The question you are allowed to ask first.

Your turn

- *Say it: dhara*
- *Say it:* it once more, slowly
- *Say it: dhara*, then *ḍabbu*, in the order they come up
- *Recall:* say *dōma*
- *Read it:* **బావ**, then say what it means

Before you move on

What does **ధర** mean? (“a price”.) Say it once more.

72.4 తూకం (tūkaṁ) — weight

Before the new one: what did *dhara* mean?

You’ll want to know: తూకం

తూకం (*tūkaṁ*) — “weight”.

తూకం is weight — what the scales say, and also the act of weighing.

Almost everything in an **అంగడి** is sold by it: **బియ్యం**, **ఉప్పు**, **చక్కెర**, **మిరప**. The **ధర** you are quoted is a **ధర** for a **తూకం**, so the two words travel together.

It carries fairness as well. Somebody who speaks with **తూకం** is somebody whose words are measured, and short **తూకం** is a serious accusation.

The word, taken apart — its roots and family

తూకం (*tūkaṁ*) is probably native Dravidian. DEDR 3376 lists a nasalised Telugu *tūgu*, “to hang, weigh”, and *tūcu*, “to weigh”, with Kannada *tūka*, “weighing, weight”; it does not list *tūkaṁ* itself.

What you’ve built

Four. What the **ధర** is attached to.

Your turn

- *Say it: tūkaṁ*

- *Say it:* it once more, slowly
- *Say it:* *tūkaṁ*, then *dhara*, as one question in a shop
- *Read it:* ఉడుత
- *Recall:* say *maradalu*

Before you move on

What does తూకం mean? (“weight”.) Say it once more.

72.5 బేరం (bēraṁ) — a bargain, haggling

Before the new one: what did *tūkaṁ* mean?

You’ll want to know: బేరం

బేరం (*bēraṁ*) — “a bargain, haggling”.

బేరం is the haggle — the back and forth between the ధర asked and the ధర paid, and also the deal that comes out of it.

It is expected in an open market crowd and out of place in a fixed-price అంగడి, and telling those two apart is most of what a newcomer gets wrong.

However the బేరం ends, it ends with ధన్యవాదములు, and in a small అంగడి it ends with both sides fairly sure they did well out of it.

The word, taken apart — its roots and family

The origin of బేరం (*bēraṁ*) is uncertain. Neither DEDR nor CDIAL records it.

What you’ve built

Five: అంగడి, డబ్బు, ధర, తూకం, బేరం. Enough to buy something and thank the person who sold it.

Your turn

- *Say it:* *bēraṁ*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then close with *dhanyavādamulu*

- *Recall:* say *sālīḍu*
- *Read it:* **అల్లుడు**, then say what it means

Before you move on

What does **బేరం** mean? (“a bargain, haggling”.) Say it once more.

Chapter 73

Tastes

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the tastes of a Telugu meal and take my leave when it is finished.
>
> *Complete TE-C73-astringent and demonstrate the chapter promise.*

73.1 తీపి (tīpi) — sweet, sweetness

Before the new one: what did *bērami* mean?

You'll want to know: తీపి

తీపి (*tīpi*) — "sweet, sweetness".

తీపి is sweetness — the taste, and the quality of anything that has it.

It is inherited. **చక్కెర** gives it in a kitchen and a **పండు** gives it on a **చెట్టు**, and a person described as **తీపి** is being called good company.

Telugu counts its tastes rather than gesturing at them, and **తీపి** is the one every count opens with.

The word, taken apart — its roots and family

తీపి (*tīpi*) is native Dravidian, one word with Tamil *tīm*, "sweet", and Kannada *sīyi*, "sweet" (DEDR 3268), which lists *tīpi* itself. DEDR compares, with a query, Prakrit *tiṇisa*, "honeycomb".

What you've built

One. The taste every count opens with.

Your turn

- *Say it: tīpi*
- *Say it:* it once more, slowly
- *Say it: tīpi*, then *cakkera*, and say which one is the taste
- *Recall:* say *māma*
- *Read it:* అంగడి, then say what it means

Before you move on

What does తీపి mean? ("sweet, sweetness".) Say it once more.

73.2 పులుపు (pulupu) — sour, sourness

Before the new one: what did *tīpi* mean?

You'll want to know: పులుపు

పులుపు (*pulupu*) — "sour, sourness".

పులుపు is sourness — tamarind, lime, పెరుగు left a day too long.

It is inherited and it is not a complaint. A Telugu meal wants పులుపు in it on purpose; the everyday tamarind stew is built around exactly this taste.

Said of a face it means what it means in English, and it is said most often of children who have just been told no.

The word, taken apart — its roots and family

పులుపు (*pulupu*) is native Dravidian, one word with Tamil *puḷi* and Malayalam *puḷikka*, "to be sour" (DEDR 4322), which lists *pulupu*, "sourness", itself.

What you've built

Two: తీపి and పులుపు, and a meal wants both of them.

Your turn

- *Say it: pulupu*
- *Say it:* it once more, slowly
- *Say it: tīpi*, then *pulupu*, and say which one is in curd
- *Read it:* అత్త
- *Recall:* say *ḍabbu*

Before you move on

What does పులుపు mean? ("sour, sourness".) Say it once more.

73.3 చేదు (cēdu) — bitter, bitterness

Before the new one: what did *pulupu* mean?

You'll want to know: చేదు

చేదు (*cēdu*) — "bitter, bitterness".

చేదు is bitterness — neem leaf, some greens, most medicine.

It is inherited, and Telugu does not treat it as a fault. Bitter is eaten deliberately at the opening of the year and at the opening of a meal, on the understanding that it does you good.

It carries over into speech unchanged. **చేదు** news is bad news, and a **చేదు** truth is one you are told anyway.

The word, taken apart — its roots and family

చేదు (*cēdu*) is native Dravidian. DEDR 1249 lists the Telugu word for "bitterness; bitter" with Tamil *kaya*, "to be bitter", and Kannada *kay*, "bitterness". DEDR compares Sanskrit *kaṣāya*, "astringent" (CDIAL 2974), which CDIAL thinks points to a non-Aryan origin.

What you've built

Three. The one eaten on purpose.

Your turn

- *Say it: cēdu*
- *Say it:* it once more, slowly
- *Say it: cēdu*, then *tīpi*, and say which one is eaten first
- *Recall:* say *bāva*
- *Read it:* ధర, then say what it means

Before you move on

What does చేదు mean? ("bitter, bitterness".) Say it once more.

73.4 కారం (kāraṁ) — pungency, heat

Before the new one: what did *cēdu* mean?

You'll want to know: కారం

కారం (*kāraṁ*) — "pungency, heat".

కారం is heat — the bite of మిరప, and by an easy extension the chilli powder itself.

Ask for something with తక్కువ కారం and you will be understood anywhere, though in one or two households you will be heard as having said something mildly insulting.

It is inherited. Do not read it into the end of నమస్కారం, which is a different word altogether, Sanskrit, and means a making.

The word, taken apart — its roots and family

కారం (*kāraṁ*) is native Dravidian, one word with Tamil *kār*, "to be pungent", and Kannada *kāra*, "pungency" (DEDR 1466). DEDR adds that the word was probably influenced by Sanskrit *kṣāra*, "caustic, alkali".

What you've built

Four. And the one you may want తక్కువ of.

Your turn

- *Say it: kāraṁ*
- *Say it:* it once more, slowly
- *Say it: kāraṁ*, then *takkuva* and *kāraṁ* together
- *Read it:* మరదలు
- *Recall:* say *tūkaṁ*

Before you move on

What does కారం mean? ("pungency, heat".) Say it once more.

73.5 వగరు (vagaru) — astringent

Before the new one: what did *kāraṁ* mean?

You'll want to know: వగరు

వగరు (*vagaru*) — "astringent".

వగరు is astringency — the dry, puckering taste of an unripe **పండు**, of raw banana, of **టీ** left to stand.

English has no everyday word for it and Telugu has had one for as long as it has been written down. Once you can name it you begin noticing it, which is most of what a word is for.

With **ఉప్పు**, which you already have, that is the full set a Telugu cook thinks in: **తీపి**, **పులుపు**, **చేదు**, **కారం**, **వగరు** and salt. A meal carrying all of them is finished, and so is the visit — **వెళ్ళొస్తాను**.

The word, taken apart — its roots and family

వగరు (*vagaru*) is native Dravidian. DEDR 2674 lists *ogaru* and *vagaru*, "astringent taste", with Tamil *uvar*, "to taste astringent", and Kannada *ogar*, "an astringent taste".

What you've built

Five: **తీపి**, **పులుపు**, **చేదు**, **కారం**, **వగరు**. The tastes a Telugu meal is built from, and the last of them names what nothing else does.

Your turn

- *Say it: vagaru*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then take your leave with *veḷḷostānu*
- *Recall:* say *alluḍu*
- *Read it:* బేరం, then say what it means

Before you move on

What does వగరు mean? (“astringent”.) Say it once more.

Chapter 74

And, But, Or

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 4 of 5 lessons.

> ***By the end of this chapter:*** I can join two Telugu words or two Telugu clauses, and I can ask why and answer it.
>
> *Complete TE-C74-because and demonstrate the chapter promise.*

74.1 మరియు (mariyu) — and

Before the new one: what did *vagaru* mean?

You'll want to know: మరియు

మరియు (*mariyu*) — "and".

Telugu's everyday speech often joins two things by simply saying them one after the other, or by hanging a small **-ఉ** on the end of each. **మరియు** is the written, spoken-carefully form, and it is the one a list on a page will use.

Put it between two nouns you already have: **నీళ్ళు మరియు పాలు** — "water and milk".

The word, taken apart — its roots and family

మరియు (*mariyu*) is native Dravidian. DEDR 4766 lists Telugu *ma̲ri*, "and, again, further", with Tamil *ma̲ru* and Kannada *ma̲ru*, "other, next".

What you've built

The first way you have had to put two things in one sentence.

Your turn

- *Say it:* *mariyu*
- *Say it:* *mariyu*, once more
- *Say it:* join two words you know with *mariyu*
- *Recall:* say *dayacēsi*, then say *mariyu*
- *Recall:* say *aṅgaḍi*
- *Read it:* **తీపి**, then say what it means

Before you move on

What does **మరియు** mean? ("and".) Say it once more.

74.2 కానీ (kānī) — but

Before the new one: what did *mariyu* mean?

You'll want to know: కానీ

కానీ (*kānī*) — "but".

కానీ turns a sentence around. Where **మరియు** adds, **కానీ** takes back: it warns the listener that what comes next does not match what came before.

నాకు టీ ఇష్టం, కానీ పాలు వద్దు — "I like tea, but no milk." This one word is what lets you disagree politely instead of only saying **లేదు**.

The word, taken apart — its roots and family

కానీ (*kānī*) is native Dravidian, built on *kā-*, the stem of *agu*, "to be", that also gives *kādu*, "it is not" (DEDR 333).

What you've built

Two clauses, and a way to set the second against the first.

Your turn

- *Say it: kānī*
- *Say it: kānī*, once more
- *Say it:* say something you like, then *kānī*, then something about it you do not
- *Recall:* say *kṣamīncaṇḍi*, then say *kānī*
- *Read it:* డబ్బు
- *Recall:* say *pulupu*

Before you move on

What does కానీ mean? ("but".) Say it once more.

74.3 లేదా (lēdā) — or

Before the new one: what did *kānī* mean?

You'll want to know: లేదా

లేదా (*lēdā*) — "or".

You have met its first half already: **లే-** is the same root behind **లేదు**, "there isn't". **లేదా** is literally the *or-else* of that root — "failing that".

టీ లేదా పాలు? — "tea or milk?" That is the whole of an offered choice, and you can now make one.

The word, taken apart — its roots and family

లేదా (*lēdā*) is native Dravidian, built on *lē-*, "be not", the root of *lēdu*. DEDR 2559 lists *lēka*, "without; or, else", with Tamil *il*.

What you've built

A choice you can put to somebody.

Your turn

- *Say it:* *lēdā*
- *Say it:* *lēdā*, once more
- *Say it:* offer a choice between two drinks you know, using *lēdā*
- *Recall:* say *anukō*, then say *lēdā*
- *Recall:* say *dhara*
- *Read it:* **చేదు**, then say what it means

Before you move on

What does **లేదా** mean? ("or".) Say it once more.

74.4 ఎందుకు (enduku) — why?

Before the new one: what did *lēdā* mean?

You'll want to know: ఎందుకు

ఎందుకు (*enduku*) — "why?".

Another word off the **ఎ-** question row you already know: **ఎక్కడ** "where", **ఎవరు** "who", and now **ఎందుకు** "why". The row keeps its shape and you keep getting the words free.

It goes where its answer goes, not at the front: **మీరు ఎందుకు వెళ్తారు?** — "why do you go?"

The word, taken apart — its roots and family

ఎందుకు (*enduku*) is native Dravidian, built on the question base *e-*. DEDR 5151 lists *enduku*, "why", itself.

What you've built

The question the next word answers.

Your turn

- *Say it:* *enduku*
- *Say it:* *enduku*, once more
- *Say it:* ask *enduku* about something somebody just told you
- *Recall:* say *aḍugu*, then say *enduku*
- *Read it:* తూకం
- *Recall:* say *kāraṁ*

Before you move on

What does ఎందుకు mean? ("why?".) Say it once more.

74.5 ఎందుకంటే (endukaṇṭē) — because

Before the new one: what did *enduku* mean?

You'll want to know: ఎందుకంటే

ఎందుకంటే (*endukaṇṭē*) — "because".

Look at it: it *is* ఎందుకు with అంటే glued on — "if you ask why". Telugu answers the question by repeating it and then continuing, which is the gluing habit of your very first lesson doing real work.

నేను వెళ్తాను, ఎందుకంటే పని ఉంది — "I'll go, because there is work."

The word, taken apart — its roots and family

ఎందుకంటే (*endukaṇṭē*) is native Dravidian: *enduku*, "why" (DEDR 5151), and *aṇṭē*, "if you say", from *anu*, "to say" (DEDR 868).

Grammar Lens: the reason clause comes second

Telugu can put the reason first, as పని ఉంది కాబట్టి నేను వెళ్తాను. With ఎందుకంటే it goes second, after the thing being explained, exactly where English puts it. Use ఎందుకంటే while that ordering is still the one you think in.

What you've built

A reason, attached to the thing it explains.

Your turn

- *Say it:* *endukaṇṭē*
- *Say it:* *endukaṇṭē*, once more
- *Say it:* answer an *enduku* question with *endukaṇṭē* and one word you know
- *Recall:* say *gaṇṭa*, then say *endukaṇṭē*
- *Recall:* say *bēraṁi*, then read **వగరు** and say what it means

Before you move on

What does **ఎందుకంటే** mean? ("because".) Say it once more.

Chapter 75

Today, Yesterday, When

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say today, yesterday and before in Telugu, ask when something happens, and name a year.
>
> *Complete TE-C75-year and demonstrate the chapter promise.*

75.1 ఇవాళ (ivāḷa) — today

Before the new one: what did *endukaṇṭē* mean?

You'll want to know: ఇవాళ

ఇవాళ (*ivāḷa*) — "today".

The farewells gave you **రేపు**, "tomorrow", inside **రేపు కలుద్దాం**. The day you are actually standing in had no name until now.

It begins with the same **ఇ-** as **ఇక్కడ** and **ఇది**: the near one, the one right here. **ఇవాళ** is the near day.

The word, taken apart — its roots and family

ఇవాళ (*ivāḷa*) begins with the near-pointing *i*-, "this", of DEDR 410. DEDR does not list the word itself, and where its second part comes from is not recorded.

What you've built

The day you are in.

Your turn

- *Say it:* *ivāḷa*
- *Say it:* *ivāḷa*, once more
- *Say it:* say *ivāḷa*, then *rēpu*, and say which is nearer
- *Recall:* say *bhōjanaṁ*, then say *ivāḷa*
- *Recall:* say *tīpi*
- *Read it:* **మరియు**, then say what it means

Before you move on

What does **ఇవాళ** mean? (“today”.) Say it once more.

75.2 నిన్న (ninna) — yesterday

Before the new one: what did *ivāḷa* mean?

You’ll want to know: నిన్న

నిన్న (*ninna*) — “yesterday”.

With **ఇవాళ** and **రేపు** you now have the three days every conversation stands on, and **నిన్న** is the only one that looks backward.

It is native Dravidian and short, with the doubled **న్న** you have seen in **ఉన్నాను**.

The word, taken apart — its roots and family

నిన్న (*ninna*) is native Dravidian, one word with Kannada *ninne* and Malayalam *innalē* (DEDR 3758). DEDR lists Telugu *ninna*, “yesterday”.

What you’ve built

Three days: **నిన్న**, **ఇవాళ**, **రేపు**.

Your turn

- *Say it:* *ninna*
- *Say it:* *ninna*, once more
- *Say it:* say the three days in order: *ninna*, *ivāḷa*, *rēpu*
- *Recall:* say *vātāvaraṇam*, then say *ninna*
- *Read it:* పులుపు
- *Recall:* say *kānī*

Before you move on

What does నిన్న mean? ("yesterday".) Say it once more.

75.3 ఎప్పుడు వస్తారు? (eppuḍu vastāru?) — when will you come?

Before the new one: what did *ninna* mean?

You'll want to know: ఎప్పుడు వస్తారు?

ఎప్పుడు వస్తారు? (*eppuḍu vastāru?*) — "when will you come?". The new word in it is **ఎప్పుడు**, "when?".

The last gap in the **ఎ-** question row: **ఎక్కడ** where, **ఎవరు** who, **ఎందుకు** why, and now **ఎప్పుడు** when. The row is complete.

The three days you just learned are its answers, and **మీరు** in front of it makes the question respectful.

The word, taken apart — its roots and family

ఎప్పుడు వస్తారు? (*eppuḍu vastāru?*) is native Dravidian: *eppuḍu*, "what time, when", which DEDR 5151 and 4559 list, with the question base *e-* and the time word *poddu*; and *vastāru*, from *vaccu*, "to come" (DEDR 5270).

What you've built

The question the three days answer.

Your turn

- *Say it:* *eppuḍu*
- *Say it:* *eppuḍu*, once more
- *Say it:* ask *eppuḍu*, then answer it with *ivāḷa*
- *Recall:* say *rātri*, then say *eppuḍu vastāru?*
- *Recall:* say *cēdu*
- *Read it:* లేదా, then say what it means

Before you move on

What does ఎప్పుడు వస్తారు? mean? ("when will you come?".) Say it once more.

75.4 ముందు (mundu) — before, in front

Before the new one: what did *eppuḍu* mean?

You'll want to know: ముందు

ముందు (*mundu*) — "before".

You already have తరువాత, "after that". ముందు is its other half, and until now you could only order events one way.

Like most Telugu relation words it follows its noun: భోజనం ముందు — "before the meal". It also means "in front" in space, which is the same idea pointed at a room instead of a day.

The word, taken apart — its roots and family

ముందు (*mundu*) is native Dravidian, one word with Tamil *mun̲* and Kannada *munnu*, "front, before" (DEDR 5020), which lists *mundu* itself.

What you've built

Both ends of an order: ముందు and తరువాత.

Your turn

- *Say it: mundu*
- *Say it: mundu*, once more
- *Say it:* say *mundu*, then *taruvāta*, and put a meal between them
- *Recall:* say *mariyu*, then *udayam*, then say *mundu*
- *Read it:* కారం
- *Recall:* say *enduku*

Before you move on

What does ముందు mean? ("before, in front".) Say it once more.

75.5 సంవత్సరం (saṁvatsaraṁ) — a year

Before the new one: what did *mundu* mean?

You'll want to know: సంవత్సరం

సంవత్సరం (*saṁvatsaraṁ*) — "a year".

A Sanskrit tatsama, wearing the same -ం ending you have seen on ఉదయం and భోజనం. Telugu also says ఏడు for a year of age, but సంవత్సరం is the plain calendar word.

You now have the hour (గంట), the day (రోజు), the month (నెల) and the year — the whole ladder of Telugu time.

The word, taken apart — its roots and family

సంవత్సరం (*saṁvatsaraṁ*) is Sanskrit *saṁvatsara*, "year", taken over whole as a learned loan, a tatsama, with the Telugu noun ending *-ṁ* (CDIAL 13011).

What you've built

The largest unit of time you can name.

Your turn

- *Say it:* *saṁvatsaraṁ*
- *Say it:* *saṁvatsaraṁ*, once more
- *Say it:* say *gaṇṭa*, then *rōju*, then *saṁvatsaraṁ*, smallest to largest
- *Recall:* say *kānī*, then *sāyantram*, then say *saṁvatsaraṁ*
- *Recall:* say *vagaru*
- *Read it:* **ఎందుకంటే**, then say what it means

Before you move on

What does **సంవత్సరం** mean? (“a year”.) Say it once more.

Chapter 76

Very Good, Very Bad

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something is very good, bad, easy or difficult in Telugu, and make an adjective the whole comment.
>
> *Complete TE-C76-difficult and demonstrate the chapter promise.*

76.1 చాలా మంచి (cālā manci) — very good

Before the new one: what did *samvatsaram* mean?

You'll want to know: చాలా మంచి

చాలా మంచి (*cālā manci*) — "very good". The new word in it is **చాలా**, "very, a lot".

Until now every adjective you had was flat: **పెద్ద** was big and there was no bigger. **చాలా** is the dial.

It stands in front of what it strengthens: **చాలా పెద్ద** "very big", **చాలా కొత్త** "very new". It also works on its own for "a lot", where **కొంచెం** was "a little".

The word, taken apart — its roots and family

చాలా మంచి (*cālā manci*) is *cālā*, "very", which DEDR 2470 lists as *cāla*, "abundant, abundantly", under *cālu*, "to be enough", with Tamil *cāl*; and *manci*, "good", whose origin is uncertain.

What you've built

A degree, on any adjective you have.

Your turn

- *Say it:* *cālā*
- *Say it:* *cālā*, once more
- *Say it:* put *cālā* in front of *manci*, then in front of *pedda*
- *Recall:* say *lēdā*, then *madhyāhnam*, then say *cālā manci*

Before you move on

What does **చాలా మంచి** mean? ("very good".) Say it once more.

76.2 చెడ్డ (ceḍḍa) — bad

Before the new one: what did *cālā* mean?

You'll want to know: చెడ్డ

చెడ్డ (*ceḍḍa*) — "bad".

మంచి, "good", has stood without an opposite ever since the adjectives chapter. **చెడ్డ** is the opposite.

It sits in front of its noun and does not change, exactly as **మంచి** does. Do not reach for **చేదు** from the last chapter: that is *bitter*, a taste, and it does not judge anything.

The word, taken apart — its roots and family

చెడ్డ (*ceḍḍa*) is native Dravidian. DEDR 2760 lists *ceḍu*, "to be rotten", and *ceḍḍa*, "rotten", with Tamil *ceṭṭi*, "bad odour".

What you've built

Both ends of the judgement: **మంచి** and **చెడ్డ**.

Your turn

- *Say it:* *ceḍḍa*
- *Say it:* *ceḍḍa*, once more
- *Say it:* say *manci*, then *ceḍḍa*, then *cālā ceḍḍa*
- *Recall:* say *enduku*, then *śubhōdayam*, then say *ceḍḍa*

Before you move on

What does **చెడ్డ** mean? (“bad”.) Say it once more.

76.3 మంచిది (mancidi) — it is a good one

Before the new one: what did *ceḍḍa* mean?

You’ll want to know: మంచిది

మంచిది (*mancidi*) — “it is a good one”.

You could already say **మంచి పుస్తకం**, “a good book”. You could not yet say that the book *is* good, because a Telugu adjective cannot end a sentence by itself.

Add **-ది** and it becomes a thing: **మంచి** + **ది** = “a good one”. **పుస్తకం మంచిది** — “the book is a good one”, which is how Telugu says “the book is good”.

The word, taken apart — its roots and family

మంచిది (*mancidi*) is *manci*, “good”, with *-di*, “it, the thing”. The origin of *manci* is uncertain: neither DEDR nor CDIAL records it.

Grammar Lens: -ది turns a describing word into a naming word

Telugu will not let a bare adjective be the predicate. **-ది** makes it one — a pronoun-like ending meaning “the one that is”. **మంచిది** “a good one”, **చెడ్డది** “a bad one”, **కొత్తది** “a new one”. For a person the ending is **-వాడు** or **-ఆమె** instead. Learn -ది now and every adjective you already have can finish a sentence.

What you've built

An adjective that can be the whole comment.

Your turn

- *Say it: mancidi*
- *Say it: mancidi*, once more
- *Say it:* say *manci pustakaṁ*, then *pustakaṁ mancidi*
- *Recall:* say *endukaṇṭē*, then *rāyu*, then say *mancidi*

Before you move on

What does **మంచిది** mean? ("it is a good one".) Say it once more.

76.4 సులభం (sulabhaṁ) — easy

Before the new one: what did *mancidi* mean?

You'll want to know: సులభం

సులభం (*sulabhaṁ*) — "easy".

Sanskrit **సు-** ("well") plus **లభ** ("got"): what is easily got. The same **సు-** is the **శు-** of **శుభోదయం**, softened.

తెలుగు సులభం — "Telugu is easy." A **-ం** noun like this needs no **-ది**; it is already a naming word.

CDIAL 13512 lists Sanskrit *sulabha*, "easy".

What you've built

A verdict you can pass on a task.

Your turn

- *Say it: sulabhaṁ*
- *Say it: sulabhaṁ*, once more
- *Say it:* say *telugu sulabhaṁ*, then add *cālā* in front of *sulabhaṁ*

- *Recall:* say *ivāḷa*, then *tīsukō*, then say *sulabhaṁ*

Before you move on

What does సులభం mean? (“easy”.) Say it once more.

76.5 కష్టం (kaṣṭaṁ) — difficult; trouble

Before the new one: what did *sulabhaṁ* mean?

You’ll want to know: కష్టం

కష్టం (*kaṣṭaṁ*) — “difficult”, and also “trouble, hardship”.

The pair to సులభం, and a Sanskrit tatsama shared right across India.

It carries more weight than English “difficult”: కష్టం said alone about someone’s situation means real hardship, not an awkward crossword.

The word, taken apart — its roots and family

కష్టం (*kaṣṭaṁ*) is Sanskrit *kaṣṭa*, “bad, difficult”, taken over whole as a learned loan, a tatsama, with the Telugu noun ending *-ṁ* (CDIAL 2978).

What you’ve built

Both ends of a task: సులభం and కష్టం.

Your turn

- *Say it: kaṣṭaṁ*
- *Say it: kaṣṭaṁ*, once more
- *Say it:* say *sulabhaṁ*, then *kaṣṭaṁ*, then *cālā kaṣṭaṁ*
- *Recall:* say *ninna*, then *kuṭumbaṁ*, then say *kaṣṭaṁ*

Before you move on

What does కష్టం mean? (“difficult; trouble”.) Say it once more.

Chapter 77

Where You Are From

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say which town and country I am from in Telugu, count past twenty, and give my age.
>
> *Complete TE-C77-thirty and demonstrate the chapter promise.*

77.1 నుంచి (nunci) — from

Before the new one: what did *kaṣṭam* mean?

You'll want to know: నుంచి

నుంచి (*nunci*) — "from".

You already have **-కు**, "to", and **-లో**, "in". **నుంచి** is the third of the set and the one an introduction needs.

Like them it follows its noun: **గ్రామం నుంచి** — "from the village".

The word, taken apart — its roots and family

నుంచి (*nunci*) is usually explained as *uṇḍi*, "having been", a form of *uṇḍu*, "to be" (DEDR 697), worn down to a case word. DEDR does not list the postposition itself.

Grammar Lens: the third relation word

Three now sit behind a noun and do three different jobs: **-లో** puts you inside, **-కు** sends you toward, **నుంచి** takes you out of. Telugu has no words in front of nouns at all; everything a preposition would do in

English is done by a piece glued to the back.

What you've built

The direction you came out of.

Your turn

- *Say it: nunci*
- *Say it: nunci*, once more
- *Say it:* say *grāmaṁ nunci*, then *grāmāniki* — out of, and into
- *Recall:* say *eppuḍu vastāru?*, then *snēhituḍu*, then say *nunci*

Before you move on

What does **నుంచి** mean? ("from".) Say it once more.

77.2 పట్టణం (paṭṭaṇaṁ) — a town

Before the new one: what did *nunci* mean?

You'll want to know: పట్టణం

పట్టణం (*paṭṭaṇaṁ*) — "a town".

You already have **గ్రామం**, the village. **పట్టణం** is the larger settlement, the one with the shops and the bargaining in it.

నేను పట్టణం నుంచి — "I am from a town." That sentence needs no verb, exactly like **నా పేరు**.

The word, taken apart — its roots and family

పట్టణం (*paṭṭaṇaṁ*) comes from Sanskrit *paṭṭana*, "town", reshaped to Telugu sounds: a tadbhava (CDIAL 7705). CDIAL itself thinks the Sanskrit word probably came from Dravidian.

What you've built

Somewhere to be from.

Your turn

- *Say it: paṭṭaṇaṁ*
- *Say it: paṭṭaṇaṁ*, once more
- *Say it:* say *grāmaṁ*, then *paṭṭaṇaṁ*, and say which is bigger
- *Recall:* say *mundu*, then *koḍuku*, then say *paṭṭaṇaṁ*

Before you move on

What does **పట్టణం** mean? ("a town".) Say it once more.

77.3 దేశం (dēśaṁ) — a country

Before the new one: what did *paṭṭaṇaṁ* mean?

You'll want to know: దేశం

దేశం (*dēśaṁ*) — "a country".

Sanskrit tatsama, and the same word behind Hindi *desh*. It scales the ladder up once more: **గ్రామం**, **పట్టణం**, **దేశం**.

ఏ దేశం? — "which country?" is a question you will be asked in the first minute of any exam interview.

The word, taken apart — its roots and family

దేశం (*dēśaṁ*) is Sanskrit *deśa*, "region, country", taken over whole as a learned loan, a tatsama, with the Telugu noun ending *-ṁ* (CDIAL 6547).

What you've built

The largest place you can be from.

Your turn

- *Say it: dēśaṁ*
- *Say it: dēśaṁ*, once more
- *Say it:* say *grāmaṁ*, *paṭṭaṇaṁ*, *dēśaṁ*, smallest to largest

- *Recall:* say *saṁvatsaraṁ*, then *kūturu*, then say *dēśaṁ*

Before you move on

What does **దేశం** mean? ("a country".) Say it once more.

77.4 భారతదేశం (Bhāratadēśaṁ) — India

Before the new one: what did *dēśaṁ* mean?

You'll want to know: భారతదేశం

భారతదేశం (*Bhāratadēśaṁ*) — "India".

Your first Telugu proper name, and you can already read half of it: **భారత** plus the **దేశం** you learned a moment ago.

నేను భారతదేశం నుంచి — "I am from India." Swap in the name of wherever you are actually from and the sentence still works.

The word, taken apart — its roots and family

భారతదేశం (*Bhāratadēśaṁ*) is Sanskrit *bhārata*, "of Bharata", the land of the sons of Bharata, and *deśa*, "country" (CDIAL 6547), taken over whole.

What you've built

A place with a name, in a sentence that says you came from it.

Your turn

- *Say it: Bhāratadēśaṁ*
- *Say it: Bhāratadēśaṁ*, once more
- *Say it:* say *nēnu Bhāratadēśaṁ nunci*, then say it with your own country instead
- *Recall:* say *cālā manci*, then *cevi*, then say *Bhāratadēśaṁ*

Before you move on

What does **భారతదేశం** mean? ("India".) Say it once more.

77.5 ముప్పై (muppai) — thirty (and the tens above it)

Before the new one: what did *Bhāratadēśaṁ* mean?

You'll want to know: ముప్పై

ముప్పై (*muppai*) — "thirty".

Your counting stopped at **ఇరవై**, twenty. The tens above it are built the same way, from the units you already know:

ముప్పై 30, **నలభై** 40, **యాభై** 50, **అరవై** 60, **డెబ్భై** 70, **ఎనభై** 80, **తొంభై** 90, **వంద** 100. Every one but **వంద** ends in the same **-ై** twenty does.

The word, taken apart — its roots and family

ముప్పై (*muppai*) is native Dravidian. DEDR 5052 lists *muppai*, "thirty", itself, under *mūḍu*, "three", with Kannada *mū-vattu*, "thirty".

Grammar Lens: an age, at last

You have long been able to ask **నీ వయసెంత?** and unable to answer it, because the numbers stopped at twenty and no word for a year existed. With the tens and with **సంవత్సరం**, the answer is now sayable: **నాకు ముప్పై సంవత్సరాలు** — "I am thirty", literally "to me, thirty years". Note the dative **నాకు**: an age is something that has arrived at you, like every other Telugu experience.

What you've built

Numbers past twenty: an age, a price, a year.

Your turn

- *Say it:* *muppai*
- *Say it:* *muppai*, once more
- *Say it:* count the tens aloud: *iravai*, *muppai*, *nalabhai*
- *Recall:* say *ceḍḍa*, then *kannu*, then say *muppai*

Before you move on

What does ముప్పై mean? (“thirty (and the tens above it)”.) Say it once more.

Chapter 78

Yes or No, and I Do Not Know

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can ask a Telugu yes-or-no question, say I do not know, say I did not understand, and ask whether somebody is there.
>
> *Complete TE-C78-isthere and demonstrate the chapter promise.*

78.1 అవునా (avunā) — is it so?

Before the new one: what did *muppai* mean?

You'll want to know: అవునా

అవునా (*avunā*) — "is it so?".

Every question you have asked so far needed a question *word*. This one needs none: take **అవును**, "yes", and add **-ఆ**.

That **-ఆ** is the whole yes-or-no machine. Hang it on the end of any statement and it becomes a question.

The word, taken apart — its roots and family

అవునా (*avunā*) is *avunu*, "yes", which DEDR 333 lists under *agu*, "to be", with the question ending -*ā*. DEDR compares Sanskrit *ām*, "yes" (CDIAL 1235).

Grammar Lens: -ఆ makes any statement a question

మీరు వెళ్తారు "you go" becomes **మీరు వెళ్తారా?** "do you go?". **తెలుగు కష్టం** becomes **తెలుగు కష్టమా?**. Nothing moves and no word is added: the last vowel lengthens into **ఆ** and the sentence is a question. This is the commonest question type in any listening paper, and it is one ending.

What you've built

A question with no question word in it.

Your turn

- *Say it: avunā*
- *Say it: avunā*, once more
- *Say it:* say *avunu*, then *avunā*, and hear the difference
- *Recall:* say *mancidi*, then *mukku*, then say *avunā*

Before you move on

What does **అవునా** mean? ("is it so?".) Say it once more.

78.2 తెలుసా (telusā) — do you know?

Before the new one: what did *avunā* mean?

You'll want to know: తెలుసా

తెలుసా (*telusā*) — "do you know?".

The first thing you will do with the new ending. You already have **తెలుసు**, "it is known"; add **-ఆ** and you are asking.

మీకు తెలుగు తెలుసా? — "do you know Telugu?" The knower sits in the dative **మీకు**, the way it did when you first met **తెలుసు**.

The word, taken apart — its roots and family

తెలుసా (*telusā*) is *telusu*, "it is known", with the question ending *-ā*. The verb is native Dravidian: DEDR 3433 lists *teliyu*, "to be known", with Tamil *teḷi*, "to become clear".

What you've built

A real question, built from a word you already had.

Your turn

- *Say it: telusā*
- *Say it: telusā*, once more
- *Say it:* ask *mīku telugu telusā?*
- *Recall:* say *sulabhaṁ*, then *nōru*, then say *telusā*

Before you move on

What does **తెలుసా** mean? ("do you know?".) Say it once more.

78.3 నాకు తెలియదు (nāku teliyadu) — I do not know

Before the new one: what did *telusā* mean?

You'll want to know: నాకు తెలియదు

తెలియదు (*teliyadu*) — "it is not known", which is Telugu for "I don't know".

This is the answer to the last word, and it is probably the sentence you will need most often of anything in this book.

It is not **తెలుసు** with **లేదు** after it. Telugu negates an ordinary verb from the inside, with **-అదు** on the stem: **తెలియ-** + **-దు**.

The word, taken apart — its roots and family

నాకు తెలియదు (*nāku teliyadu*) is native Dravidian: *nāku*, "to me", built on *nā-*, the oblique stem of *nēnu* (DEDR 5160), and *teliyadu*, "it is not known", from *teliyu*, "to be known" (DEDR 3433).

Grammar Lens: how Telugu says a verb did not happen

The two negatives of your first lesson, **లేదు** and **కాదు**, deny **existence** and **identity**. An ordinary action is denied differently — with an ending on the verb itself: **వెళ్తాను** "I go" becomes **వెళ్ళను** "I don't go";

వస్తాను becomes **రాను**. The ending carries the negative and no separate word is used. **తెలియదు** is that pattern on **తెలియ-**.

What you've built

The most useful sentence in the chapter.

Your turn

- *Say it: teliyadu*
- *Say it: teliyadu*, once more
- *Say it:* answer *mīku telugu telusā?* with *teliyadu*
- *Recall:* say *kaṣṭaṁ*, then *guṇḍe*, then say *nāku teliyadu*

Before you move on

What does **నాకు తెలియదు** mean? ("I do not know".) Say it once more.

78.4 అర్థం కాలేదు (arthaṁ kālēdu) — I did not understand

Before the new one: what did *teliyadu* mean?

You'll want to know: అర్థం కాలేదు

అర్థం కాలేదు (*arthaṁ kālēdu*) — "I did not understand".

You already have **నాకు అర్థమైంది**, "I understood" — literally "to me it became meaning". This is the same sentence with the becoming denied: **కా-** "become" plus **లేదు**.

Say it, and the person you are talking to will slow down. That is the whole point of a repair phrase.

The word, taken apart — its roots and family

అర్థం కాలేదు (*arthaṁ kālēdu*) is Sanskrit *artha*, "aim, meaning" (CDIAL 638), with *kālēdu*, "did not become", built from two native Dravidian stems: *kā-*, "to become" (DEDR 333), and *lē-*, "be not" (DEDR 2559).

What you've built

A way out of the moment you lose the thread.

Your turn

- *Say it: arthaṁ kālēdu*
- *Say it: arthaṁ kālēdu*, once more
- *Say it:* say *nāku arthamaindi*, then *arthaṁ kālēdu*
- *Recall:* say *nunci*, then *hṛdayaṁ*, then say *arthaṁ kālēdu*

Before you move on

What does **అర్థం కాలేదు** mean? ("I did not understand".) Say it once more.

78.5 ఉన్నారా (unnārā) — is he or she there?

Before the new one: what did *arthaṁ kālēdu* mean?

You'll want to know: ఉన్నారా

ఉన్నారా (*unnārā*) — "is he or she there?".

ఉండు in its respectful **-ఆరు** form, with the new **-ఆ** on the end. Three pieces you already had.

It is what you say at a door or into a telephone: **గురువు ఉన్నారా?** — "is the teacher there?"

The word, taken apart — its roots and family

ఉన్నారా (*unnārā*) is native Dravidian: a form of *uṇḍu*, "to be" (DEDR 697), with the respectful *-āru* and the question ending *-ā*.

What you've built

A question you can ask at somebody's door.

Your turn

- *Say it:* *unnārā*
- *Say it:* *unnārā*, once more
- *Say it:* ask whether the teacher is there
- *Recall:* say *paṭṭaṇaṁ*, then *pālu*, then say *unnārā*

Before you move on

What does ఉన్నారా mean? (“is he or she there?”.) Say it once more.

Chapter 79

He, She, and Whose

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a third person in Telugu, mark a noun as an owner or an object, and address somebody respectfully.
>
> *Complete TE-C79-garu and demonstrate the chapter promise.*

79.1 స్నేహితుడి (snēhituḍi) — the friend's

Before the new one: what did *unnārā* mean?

You'll want to know: స్నేహితుడి

స్నేహితుడి (*snēhituḍi*) — "the friend's".

నా and **నీ** let you own things as *I* and *you*. Nothing let a named person own anything.

A Telugu noun becomes an owner by changing its own ending: **స్నేహితుడు** → **స్నేహితుడి**. **స్నేహితుడి పేరు** — "the friend's name".

The word, taken apart — its roots and family

స్నేహితుడి (*snēhituḍi*) is the possessive of *snēhituḍu*, "friend", from Sanskrit *snehita*, "loved; a friend", which is built on *sneha*, "affection, love" (CDIAL 13802); the endings are Telugu.

Grammar Lens: the noun changes shape before it does a job

Watch the shape of the noun, not just the ending. స్నేహితుడు stands on its own; స్నేహితుడి is the form that owns something. The ending does not land on the dictionary form — the noun leans toward it first, and you have already seen the same lean in నేను becoming నాకు. Look for it in front of -కు and -లో as well.

What you've built

Possession by somebody other than you or me.

Your turn

- *Say it: snēhituḍi*
- *Say it: snēhituḍi*, once more
- *Say it:* say *nā pēru*, then *snēhituḍi pēru*
- *Recall:* say *dēśaṁ*, then *mariyu*, then *cūḍu*, then say *snēhituḍi*

Before you move on

What does స్నేహితుడి mean? ("the friend's".) Say it once more.

79.2 మా (mā) — our (not including you)

Before the new one: what did *snēhituḍi* mean?

You'll want to know: మా

మా (*mā*) — "our", and మన (*mana*) — "our" as well.

Telugu splits a word English does not. మా leaves the listener out: my family, not yours. మన takes the listener in: our country, yours and mine.

మా ఇల్లు is my household. మన దేశం is the country we share. Choosing wrong is the mistake an examiner hears first.

The word, taken apart — its roots and family

మా (*mā*) is native Dravidian: the oblique stem of *mēmu*, "we", which DEDR 5154 lists with *mā-*, and its inclusive partner *mana*, the stem of

manamu (DEDR 3647).

What you've built

Two kinds of *our*, and the difference between them.

Your turn

- *Say it:* *mā*
- *Say it:* *mana*
- *Say it:* say *mā kuṭumbaṁ*, then *mana dēśaṁ*
- *Recall:* say *Bhāratadēśaṁ*, then *kānī*, then *rā*, then say *mā*

Before you move on

What does **మా** mean? ("our (not including you)".) Say it once more.

79.3 అతను (atanu) — he (and ఆమె, she)

Before the new one: what did *mā* and *mana* mean?

You'll want to know: అతను

అతను (*atanu*) — "he", **ఆమె** (*āme*) — "she", **వాళ్ళు** (*vāḷḷu*) — "they".

Until now you could speak about yourself and to one other person. You could not speak *about* anybody, which is half of what an exam asks you to do.

All three start on the **అ-** of **అది** and **అక్కడ**: the far one, the one not here. **అతను** is literally "that man".

The word, taken apart — its roots and family

అతను (*atanu*) is native Dravidian, built on the far-pointing base *a-*, "that": DEDR 1 lists the Telugu words for "that man", and *āme*, "that woman", among them.

Grammar Lens: the third person is where Telugu marks gender

You were told Telugu marks no gender on **I** or **you**, and that is still true. The third person is the exception: **అతను వెళ్తాడు** "he goes" ends in **-ఆడు**, **ఆమె వెళ్తుంది** "she goes" ends in **-ఉంది**, and **వాళ్ళు వెళ్తారు** "they go" takes the same **-ఆరు** you already use for **మీరు**. Three endings, and the verb tells you who without the pronoun.

What you've built

Somebody to talk about.

Your turn

- *Say it: atanu*
- *Say it: āme*
- *Say it:* say *atanu*, *āme*, *vāḷḷu*
- *Recall:* say *muppai*, then *lēdā*, then *caduvu*, then say *atanu*

Before you move on

What does **అతను** mean? ("he (and **ఆమె**, she)".) Say it once more.

79.4 నన్ను (nannu) — me (as the object)

Before the new one: what did *atanu* mean?

You'll want to know: నన్ను

నన్ను (*nannu*) — "me", when I am the one something is done to.

నేను is the *I* that does. **నన్ను** is the *me* that is done to: **అతను నన్ను అడిగాడు** — "he asked me".

The ending is **-ను**, and its partner **-ని** does the same on other nouns: **స్నేహితుడిని అడిగాను**, "I asked the friend".

The word, taken apart — its roots and family

నన్ను (*nannu*) is native Dravidian, built on *nan-*, the oblique stem of *nēnu*, "I" (DEDR 5160), with the object ending *-nu*.

Grammar Lens: people get marked, things usually do not

స్నేహితుడిని చూశాను — "I saw the friend", with **-ని** on the person. పుస్తకం చూశాను — "I saw the book", with nothing on the thing. Telugu marks a human object and leaves an inanimate one bare, which is very close to what Spanish does with its personal *a*. Mark people; leave objects alone.

What you've built

A pronoun on the receiving end.

Your turn

- *Say it: nannu*
- *Say it: nannu*, once more
- *Say it:* say *nēnu*, then *nannu*, and say which one is asked
- *Recall:* say *avunā*, then *enduku*, then *veḷḷu*, then say *nannu*

Before you move on

What does **నన్ను** mean? ("me (as the object)".) Say it once more.

79.5 గారు (gāru) — the respectful suffix on a name

Before the new one: what did *nannu* mean?

You'll want to know: గారు

గారు (*gāru*) — the respect you attach to a name.

It is not a word you say alone. It rides on the end of a name or a role: **రాము గారు**, **గురువు గారు**, **అమ్మ గారు**.

You have had **మీరు** from your first introduction for respect in the pronoun. **గారు** is respect in the *address*, and leaving it off where it belongs is heard as rudeness, not neutrality.

The word, taken apart — its roots and family

The origin of గారు (*gāru*) is uncertain. Neither DEDR nor CDIAL records the honorific.

What you've built

A way to say somebody's name that does not sound blunt.

Your turn

- *Say it:* *gāru*
- *Say it:* *gāru*, once more
- *Say it:* say *guruvu gāru*, then *ammagāru*
- *Recall:* say *telusā*, then *endukaṇṭē*, then *rōju*, then say *gāru*

Before you move on

What does గారు mean? ("the respectful suffix on a name".) Say it once more.

Chapter 80

Wanting, Allowing, Wishing

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

>
> *Complete TE-C80-congratulations and demonstrate the chapter promise.*

80.1 నాకు కావాలి (nāku kāvāli) — I want it

Before the new one: what did *gāru* mean?

You'll want to know: నాకు కావాలి

నాకు కావాలి (*nāku kāvāli*) — "I want it". The new word in it is **కావాలి**, "is wanted".

You already have **వద్దు**, "no, I don't want it", which left you able to refuse a thing and unable to ask for one. **కావాలి** is the missing half.

నాకు టీ కావాలి — "I want tea." The wanter sits in the dative **నాకు**, exactly like the knower of **తెలుసు** and the liker of **ఇష్టం**. It is the same Telugu design a fourth time.

The word, taken apart — its roots and family

నాకు కావాలి (*nāku kāvāli*) is native Dravidian: *nāku*, "to me" (DEDR 5160), and *kāvāli*, "it must become", built on *kā-*, the stem of *agu*, "to be, become" (DEDR 333).

What you've built

A request, and the opposite of **వద్దు**.

Your turn

- *Say it: kāvāli*
- *Say it: kāvāli*, once more
- *Say it:* say *nāku ṭī kāvāli*, then refuse it with *vaddu*
- *Recall:* say *nāku teliyadu*, then *ivāḷa*, then *telusu*, then say *nāku kāvāli*

Before you move on

What does **నాకు కావాలి** mean? ("I want it".) Say it once more.

80.2 అని (ani) — that (reporting what was said or thought)

Before the new one: what did *kāvāli* mean?

You'll want to know: అని

అని (*ani*) — the little word that closes a quotation.

You already have **అనుకో**, "to think", with nothing it could think *about*. **అని** is what attaches a thought or a sentence to the verb.

It comes **after** what is being reported, not before it: **తెలుగు సులభం అని అనుకుంటాను** — "I think that Telugu is easy", literally "Telugu-is-easy *that* I-think".

The word, taken apart — its roots and family

అని (*ani*) is native Dravidian: the "having said" form of *anu*, "to say", which DEDR 868 lists.

Grammar Lens: Telugu quotes forwards, not backwards

English opens with *that* and then reports. Telugu reports and then closes with **అని**. The quoted sentence keeps its own shape completely

— nothing inside it changes — and **అని** is the seam. Every reported thought, every reported question and every reported instruction in Telugu is built this way, so this one syllable opens the whole of indirect speech.

What you've built

A second clause, hanging off a verb of thinking or saying.

Your turn

- *Say it: ani*
- *Say it: ani*, once more
- *Say it:* say *telugu sulabhaṁ ani anukuṇṭānu*
- *Recall:* say *arthaṁ kālēdu*, then *ninna*, then *uṇḍu*, then say *ani*

Before you move on

What does **అని** mean? ("that (reporting what was said or thought)".) Say it once more.

80.3 వెళ్ళవచ్చు (veḷḷavaccu) — you may go

Before the new one: what did *ani* mean?

You'll want to know: వెళ్ళవచ్చు

వచ్చు (*vaccu*) — "may", "is allowed to", and also "can".

It is the same **వచ్చు** you met as "to come", doing a second job: what *comes* to you is what you may do.

వెళ్ళవచ్చు — "you may go". **వెళ్ళవచ్చా?** — "may I go?", with the **-ఆ** of the last chapter. To refuse, the answer is **వద్దు**.

The word, taken apart — its roots and family

వెళ్ళవచ్చు (*veḷḷavaccu*) is native Dravidian: *veḷḷu*, "to go" (DEDR 5393), and *vaccu*, "to come", here "may" (DEDR 5270), which DEDR glosses "to come, happen, be possible".

What you've built

Permission: asking for it, giving it, refusing it.

Your turn

- *Say it:* *vaccu*
- *Say it:* *vaccu*, once more
- *Say it:* ask *veḷḷavaccā?*, then allow it, then refuse it
- *Recall:* say *unnārā*, then *eppuḍu vastāru?*, then *tinu*, then say *veḷḷavaccu*

Before you move on

What does వెళ్ళవచ్చు mean? ("you may go".) Say it once more.

80.4 లోపలికి రండి (lōpaliki raṇḍi) — please come in

Before the new one: what did *vaccu* mean?

You'll want to know: లోపలికి రండి

రండి (*raṇḍi*) — "please come".

రా was the blunt "come" you say to a friend. Add the respectful **-అండి** and it becomes what you say at your own door to anybody.

With స్వాగతం it is the whole of a Telugu welcome: **రండి, స్వాగతం**.

The word, taken apart — its roots and family

లోపలికి రండి (*lōpaliki raṇḍi*) is native Dravidian: *lōpala*, "inside", which DEDR 698 lists, with the ending *-ki*, "to", and *raṇḍi*, "please come", from the verb DEDR 5270 lists as *vaccu*.

What you've built

An invitation, in the register you would actually use it in.

Your turn

- *Say it: raṇḍi*
- *Say it: raṇḍi*, once more
- *Say it:* say *raṇḍi*, then *svāgatam*, then *kūrcōṇḍi*
- *Recall:* say *snēhituḍi*, then *mundu*, then *ivvu*, then say *lōpaliki raṇḍi*

Before you move on

What does **లోపలికి రండి** mean? ("please come in".) Say it once more.

80.5 శుభాకాంక్షలు (śubhākāṅkṣalu) — congratulations, good wishes

Before the new one: what did *raṇḍi* mean?

You'll want to know: శుభాకాంక్షలు

శుభాకాంక్షలు (*śubhākāṅkṣalu*) — "good wishes", which is Telugu for "congratulations".

You have been building it for six chapters without knowing. **శుభ** is the *auspicious* of **శుభోదయం** and **శుభ రాత్రి**; **ఆకాంక్ష** is a wish; **-లు** is the plural ending you met in your very first lesson.

జన్మదిన శుభాకాంక్షలు is "happy birthday". Said alone it covers a wedding, an examination passed, a new house — anything worth marking.

The word, taken apart — its roots and family

శుభాకాంక్షలు (*śubhākāṅkṣalu*) is Sanskrit *śubha*, "auspicious, good" (CDIAL 12532), and *ākāṅkṣā*, "wish, longing", with the Telugu plural ending *-lu*: "good wishes".

What you've built

The last thing this book teaches you to say, and the kindest.

Your turn

- *Say it:* *śubhākāṅkṣalu*
- *Say it:* *śubhākāṅkṣalu*, once more
- *Say it:* say *śubhōdayaṁ*, then *śubhākāṅkṣalu*, and hear the śubha in both
- *Recall:* say *mā*, then *saṁvatsaraṁ*, then *ikkaḍa*, then say *śubhākāṅkṣalu*

Before you move on

What does **శుభాకాంక్షలు** mean? (“congratulations, good wishes”.) Say it once more.

Chapter 81

Counting in Order

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say first to fifth in Telugu, and make an ordinal from any number by dropping its final vowel and adding -va.
>
> *The five said in order, with only modati learned as a word and the other four made by the ending.*

81.1 మొదటి (modaṭi) — first

A new kind of counting starts here, so the recalls come first, at the four growing distances this book measures.

- *Recall:* say *śubhākāṅkṣalu* — **R1**, one lesson back, before it decays
- *Recall:* say *atanu* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *goḍḍali* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *atta* — **R3**, a second word from the same distance
- *Recall:* say *padakoṇḍu and iravai* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *kukka and pilli* — **R4**, a second word from the same distance

You'll want to know: మొదటి

మొదటి (*modaṭi*) — "**first**".

ఒకటి, **రెండు**, **మూడు** answer **how many**. This word answers **which one in the line**, and Telugu keeps a second set of words for that job.

It goes straight in front of what it counts: **మొదటి రోజు** (*modaṭi rōju*), the first day; **మొదటి పుస్తకం** (*modaṭi pustakaṁ*), the first book. Nothing changes on the noun.

The word, taken apart — its roots and family

There is no **ఒకటి** in **మొదటి**, and there was never going to be. It is built on **మొదలు** (*modalu*), "**a beginning**" — so *modaṭi* means "of the beginning", not "one-th". You will also meet the bare **మొదట** (*modaṭa*), "at first".

That is worth noticing because **ఒకటి** already looked least like its cousins: Tamil says *oṉṟu*, Kannada *ondu*, Malayalam *onnu*, and Telugu *okaṭi*, though DEDR 990 files all four in one entry. Now the number **one** turns out to be odd in a second way: Telugu does not build its ordinal on it.

From two upward it is a different story, and the next lesson is where the rule starts.

Your turn

Say these aloud:

- *modaṭi*
- *modaṭi rōju* — the first day
- *okaṭi* is how many, *modaṭi* is which one

Before you move on

What does **మొదటి** mean? (**First** — which one in the line.) What word is it built on? (**మొదలు**, a beginning — **not ఒకటి**.) Say "the first day". (**మొదటి రోజు**.)

81.2 రెండవ (reṇḍava) — second, and the swap behind all the rest

Recalls before the second ordinal, at the four measured distances.

- *Recall:* say *modaṭi* — **R1**, one lesson back, before it decays
- *Recall:* say *nannu* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *rampaṁi* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *bāva* — **R3**, a second word from the same distance
- *Recall:* say *the letter e* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *pacca and pasupu* — **R4**, a second word from the same distance

You'll want to know: రెండవ

రెండవ (*reṇḍava*) — "**second**".
రెండవ రోజు (*reṇḍava rōju*) — the second day.

The word, taken apart — its roots and family

రెండవ (*reṇḍava*) is native Dravidian (DEDR 474), from *reṇḍu*, "two".

Grammar Lens: cardinal, minus its last vowel, plus -వ

Say them together and you can hear the join: రెండు → రెండవ.
Take the number you already have, take its final vowel off, and put **-వ** (*-va*) on the end. That is the whole of it, and it holds for every number from two upward. Nine ordinals for the price of one ending.
Telugu is doing here what the last lesson said it would not do for **one**: *modaṭi* had no number to build on, and every ordinal from here does.
In speech you will also hear రెండో (*reṇḍō*), the same word ending in a long **ō** instead of **-వ**. It is the everyday spoken form; **-వ** is what you will see written.

Your turn

Say these aloud:

- *reṇḍava*
- the swap — *reṇḍu* → *reṇḍava*
- *reṇḍava rōju* — the second day

Before you move on

How is an ordinal made from two upward? (**Take the number, drop its final vowel, add -వ**.) Say the second day. (**రెండవ రోజు**.) And what will you hear instead in speech? (**రెండో**.)

81.3 మూడవ (mūḍava) — third

Recalls first, then the third.

- *Recall:* say *reṇḍava* — **R1**, one lesson back, before it decays
- *Recall:* say *gāru* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *pāra* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *maradalu* — **R3**, a second word from the same distance
- *Recall:* say *the letter ṇa* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *the letter ja* — **R4**, a second word from the same distance

You'll want to know: మూడవ

మూడవ (*mūḍava*) — "**third**".

మూడు → **మూడవ**. The long **ū** stays long; only the ending changes.

మూడవ వారం (*mūḍava vāraṁ*) — the third week.

Two numbers in a row have now taken the same ending, which is what a rule looks like from inside: not a statement, but the second time you were not surprised. The spoken form is **మూడో** (*mūḍō*), exactly as *reṇḍō* was.

The word, taken apart — its roots and family

మూడవ (*mūḍava*) is native Dravidian: *mūḍu*, "three", one word with Tamil *mūṉṟu* (DEDR 5052), with the ordinal ending *-va*.

Your turn

Say these aloud:

- *mūḍava*
- the swap — *mūḍu* → *mūḍava*
- *mūḍava vāraṁ* — the third week

Before you move on

Say the third. (మూడవ.) What happened to the long *ū*? (**Nothing** — only the ending changed.) And the spoken form? (మూడో.)

81.4 నాలుగవ (nālugava) — fourth

Recalls first, then the fourth.

- *Recall:* say *mūḍava* — **R1**, one lesson back, before it decays
- *Recall:* say *nāku kāvāli* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *sutti* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *alluḍu* — **R3**, a second word from the same distance
- *Recall:* say *śubha rātri* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *śubha sāyantram* — **R4**, a second word from the same distance

You'll want to know: నాలుగవ

నాలుగవ (*nālugava*) — "**fourth**".

నాలుగు → **నాలుగవ**. Four syllables, and the swap is the same one: the final **u** goes, **-వ** arrives.

నాలుగవ సంవత్సరం (*nālugava saṁvatsaraṁ*) — the fourth year.

This is the longest of the ten and it is no harder than the shortest, which is the practical point of a regular ending. Once you can count, you can order.

The word, taken apart — its roots and family

నాలుగవ (*nālugava*) is native Dravidian: *nālugu*, "four", one word with Tamil *nālku* (DEDR 3655), with the ordinal ending *-va*.

Your turn

Say these aloud:

- *nālugava*
- the swap — *nālugu* → *nālugava*
- *nālugava saṁvatsaraṁ* — the fourth year

Before you move on

Say the fourth. (**నాలుగవ**.) What is the ending? (**-వ**, after the final vowel goes.) And say "the fourth year". (**నాలుగవ సంవత్సరం**.)

81.5 ఐదవ (aidava) — fifth

Recalls first, then the fifth, which closes the chapter.

- *Recall:* say *nālugava* — **R1**, one lesson back, before it decays
- *Recall:* say *ani* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *karra* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *aṅgaḍi* — **R3**, a second word from the same distance

- *Recall:* say *śubha madhyāhnam* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *when to use śubha madhyāhnam* — **R4**, a second word from the same distance

You'll want to know: ఐదవ

ఐదవ (*aidava*) — "**fifth**".

ఐదు → **ఐదవ**. The opening **ఐ** is untouched — it is a single letter in Telugu, not two — and only the final **u** is traded for **-వ**.

ఐదవ రోజు (*aidava rōju*) — the fifth day.

That is one to five in order. Say *modaṭi, reṇḍava, mūḍava, nālugava, aidava*, and notice that only the first one had to be learned as a word.

The word, taken apart — its roots and family

ఐదవ (*aidava*) is native Dravidian: *aidu*, "five", one word with Tamil *aintu* (DEDR 2826), with the ordinal ending *-va*.

Your turn

Say these aloud:

- *aidava*
- the five in order — *modaṭi, reṇḍava, mūḍava, nālugava, aidava*
- *aidava rōju* — the fifth day

Before you move on

Say the five in order. (***Modaṭi, reṇḍava, mūḍava, nālugava, aidava.***) How many of them had to be learned as separate words? (**One** — *modaṭi.*) And what did the other four need? (**The number, and -వ.**)

Chapter 82

Sixth to Eleventh

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can count in order all the way to tenth in Telugu and beyond it, because the ending that makes an ordinal does not stop at ten.
>
> *The ending taken past ten, which shows it was never a fact about the numbers one to ten but about numbers.*

82.1 ఆరవ (ārava) — sixth

Recalls open the chapter, at the four measured distances.

- *Recall:* say *aidava* — **R1**, one lesson back, before it decays
- *Recall:* say *modaṭi* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *veḷḷavaccu* — **R2**, a second word from the same distance
- *Recall:* say *eluka* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *ḍabbu* — **R3**, a second word from the same distance
- *Recall:* say *arthaṁ cēsukō* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *the letter tha* — **R4**, a second word from the same distance

You'll want to know: ఆరవ

ఆరవ (*āravа*) — "**sixth**".

ఆరు → **ఆరవ**, and this is the shortest ordinal in the ten: three syllables, two of them the number itself.

ఆరవ రోజు (*āravа rōju*) — the sixth day.

The numbers six to ten were the ones the first numbers lesson called Telugu's wandering half, the place where it drifts furthest from Tamil and Kannada. The ordinal ending does not care. Whatever shape the cardinal arrived in, **-వ** goes on it.

DEDR 2485 lists Telugu *āṟu*, "six", with Tamil *āṟu*.

Your turn

Say these aloud:

- *āravа*
- the swap — *āru* → *āravа*
- *āravа rōju* — the sixth day

Before you move on

Say the sixth. (**ఆరవ**.) What was traded for the ending? (**The final *u* of ఆరు**.) And does the ending change for the wandering half of the numbers? (**No** — it is the same **-వ**.)

82.2 ఏడవ (ēḍavа) — seventh

Recalls first, then the seventh.

- *Recall:* say *āravа* — **R1**, one lesson back, before it decays
- *Recall:* say *reṇḍavа* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *lōpaliki raṇḍi* — **R2**, a second word from the same distance
- *Recall:* say *kappa* — **R3**, durable, twenty to sixty lessons back

- *Recall:* say *dhara* — **R3**, a second word from the same distance
- *Recall:* say *sahāyaṁ cēyu* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *nāku telugu iṣṭaṁ* — **R4**, a second word from the same distance

You'll want to know: ఏడవ

ఏడవ (*ēḍava*) — "**seventh**".

ఏడు → **ఏడవ**. Hold the **ē** long — the letter **ఏ** is the long one, and its short partner **ఎ** is a different letter and a different word.

ఏడవ వారం (*ēḍava vāraṁ*) — the seventh week.

Seven weeks is a useful thing to be able to say and a good place to hear that the ordinal is doing work no cardinal can do: **ఏడు వారం** would be seven weeks, a quantity. **ఏడవ వారం** is the seventh one, a position.

The word, taken apart — its roots and family

ఏడవ (*ēḍava*) is native Dravidian: *ēḍu*, "seven", one word with Tamil *ēḻu* (DEDR 910), with the ordinal ending *-va*.

Your turn

Say these aloud:

- *ēḍava*
- the swap — *ēḍu* → *ēḍava*
- *ēḍu vāraṁ* is seven weeks; *ēḍava vāraṁ* is the seventh

Before you move on

Say the seventh. (**ఏడవ**.) Which vowel opens it, the long or the short one? (**The long ఏ**.) And what is the difference between **ఏడు వారం** and **ఏడవ వారం**? (**Seven weeks** against **the seventh week**.)

82.3 ఎనిమిదవ (enimidava) — eighth

Recalls first, then the eighth.

- *Recall:* say *ēḍava* — **R1**, one lesson back, before it decays
- *Recall:* say *mūḍava* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *śubhākāṅkṣalu* — **R2**, a second word from the same distance
- *Recall:* say *dōma* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *tūkaṁ* — **R3**, a second word from the same distance
- *Recall:* say *dayacēsi ṭī* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *the vowel sign ṛ* — **R4**, a second word from the same distance

You'll want to know: ఎనిమిదవ

ఎనిమిదవ (*enimidava*) — "**eighth**".

ఎనిమిది → **ఎనిమిదవ**, and here the vowel that goes is an **i**, not a **u**. Every ordinal so far has traded a final *u*; this one and the next trade a final *i*, because that is what their cardinals happen to end in.

Which is the useful way to hold the rule: it is not "drop the *u*", it is **drop whatever vowel is at the end**. The ending does not know which vowel it replaced.

Note the short **ఎ** at the front, against the long **ఏ** of the last lesson.

The word, taken apart — its roots and family

ఎనిమిదవ (*enimidava*) is native Dravidian: *enimidi*, "eight", filed with Tamil *eṭṭu* (DEDR 784), with the ordinal ending *-va*.

Your turn

Say these aloud:

- *enimidava*

- the swap — *enimidi* → *enimidava*, an *i* this time
- short ఎ here, long ఏ in *ēḍava*

Before you move on

Say the eighth. (ఎనిమిదవ.) Which vowel came off this time? (**An *i***, not a *u*.) And how is the rule best held? (**Drop whatever final vowel is there**.)

82.4 తొమ్మిదవ (tommidava) — ninth

Recalls first, then the ninth.

- *Recall:* say *enimidava* — **R1**, one lesson back, before it decays
- *Recall:* say *nālugava* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *uḍuta* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *bēraṁ* — **R3**, a second word from the same distance
- *Recall:* say *idi* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *adi* — **R4**, a second word from the same distance

You'll want to know: తొమ్మిదవ

తొమ్మిదవ (*tommidava*) — "**ninth**".

తొమ్మిది → **తొమ్మిదవ**. The doubled **మ్మ** in the middle is held, exactly as it is in the cardinal — the ending is added at the far end of the word and touches nothing on its way.

తొమ్మిదవ రోజు (*tommidava rōju*) — the ninth day.

Second *i*-ending in a row, and the same trade. One more and the ten are closed.

The word, taken apart — its roots and family

తొమ్మిదవ (*tommidava*) is native Dravidian: *tommidi*, "nine", which DEDR 3532 files with old Tamil *toṇṭu*, "nine", with the ordinal ending *-va*.

Your turn

Say these aloud:

- *tommidava* — hold the *mm*
- the swap — *tommidi* → *tommidava*
- *tommidava rōju* — the ninth day

Before you move on

Say the ninth. (**తొమ్మిదవ**.) What happens to the doubled *mm*? (**Nothing** — it is held, as in the cardinal.) And which vowel came off? (**The final *i***.)

82.5 పదవ (padava) — tenth

Recalls first, then the tenth, which closes the series.

- *Recall:* say *tommidava* — **R1**, one lesson back, before it decays
- *Recall:* say *aidava* — **R2**, the first real retrieval, five to fifteen lessons back
- *Recall:* say *sālīḍu* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *tīpi* — **R3**, a second word from the same distance
- *Recall:* say *akkaḍa* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *evaru* — **R4**, a second word from the same distance

You'll want to know: పదవ

పదవ (*padava*) — "**tenth**".

పది → **పదవ**. Two syllables become three, and the trade is the same one you have now made nine times.

పదవ సంవత్సరం (*padava saṁvatsaraṁ*) — the tenth year.

That is the ten. Say them in order — *modaṭi, reṇḍava, mūḍava, nālugava, aidava, ārava, ēḍava, enimidava, tommidava, padava* — and count what you actually had to learn: **one word and one ending**. Latin needed ten separate words for the same stretch, and English still does.

The word, taken apart — its roots and family

పదవ (*padava*) is native Dravidian: *padi*, "ten", one word with Tamil *pattu* (DEDR 3918), with the ordinal ending *-va*.

Your turn

Say these aloud:

- *padava*
- the ten in order, *modaṭi* to *padava*
- *padava saṁvatsaraṁ* — the tenth year

Before you move on

Say the ten in order. (***Modaṭi*** through ***padava***.) How much had to be learned as separate words? (**One** — *modaṭi*.) And say "the tenth year". (**పదవ సంవత్సరం**.)

82.6 పదకొండవ (padakoṇḍava) — the ending does not stop at ten

Recalls first, and then the last thing the chapter has to give.

- *Recall:* say *padava* — **R1**, one lesson back, before it decays
- *Recall:* say *ārava* — **R2**, the first real retrieval, five to fifteen lessons back

- *Recall:* say *māma* — **R3**, durable, twenty to sixty lessons back
- *Recall:* say *pulupu* — **R3**, a second word from the same distance
- *Recall:* say *ekkaḍa* — **R4**, recognition at distance, eighty lessons back or more
- *Recall:* say *the i- / a- / e- pattern* — **R4**, a second word from the same distance

Grammar Lens: every number you have, and every one you meet

పదకొండవ (*padakoṇḍava*) — "**eleventh**".
పదకొండు → పదకొండవ. Nothing new: the same final vowel goes, the same **-వ** arrives.
That is the point of this last lesson. The ending was never a fact about the numbers one to ten; it is a fact about **numbers**. Take any Telugu number you know and it works:

number	**ordinal**
పదకొండు (11)	పదకొండవ
ఇరవై (20)	ఇరవయ్యవ

So there is no second list to learn above ten, and no list to learn below it either except the single word **మొదటి**. One irregular word, one ending, and every position on the number line is sayable.

Your turn

Say these aloud:

- *padakoṇḍava*
- the swap on a bigger number — *padakoṇḍu* → *padakoṇḍava*
- *modaṭi* is the only word; *-va* is the rest

Before you move on

Say the eleventh. (**పదకొండవ**.) How many separate ordinal words does Telugu have to be learned? (**One** — *modaṭi*.) And what makes all the others? (**The number, minus its final vowel, plus -వ**.)

Chapter 83

Reading — Words, Lines, and a First Passage

Modes: **eyes** (3) **Hands-free start:** none of the 3 lessons.

By the end of this chapter: I can read a Telugu word downwards as well as along, read a sentence with no word for is, and hold a whole passage about one room without translating it word by word.

Twenty-five words about one room, carried by ఉంది *and* లేదు*, with respect marked in the verb where the teacher gets* ఉన్నారా *and the farmer does not.*

83.1 (reading) — six words, read down as well as along

Every word below you have written. Not one is new.

What is new is that nobody says them first.

Read this

పుస్తకం తలుపు కుర్చీ నది గాలి దీపం

Read down the list once, without stopping.
Again — and look at పుస్తకం and కుర్చీ. Something in each of them sits below the line rather than on it.

What to know first

Telugu stacks a consonant underneath its neighbour instead of putting it alongside. So a word can be two syllables wide and three levels deep.

A reader has to look down a word as well as along it, and that is the habit this list is for. నది and గాలి have nothing below; పుస్తకం has two things.

Six words, and the tall ones are not longer — they are deeper.

Your turn

- *Say it:* the six words down the list, once, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
Which way does a Telugu word grow when it gets complicated? (**Downwards.**)

83.2 (reading) — six lines, and no word for *is*

The last lesson gave you words. These put them into sentences.

Nothing here is new.

Read this

ఇది పుస్తకం. ఇది తలుపు. కుర్చీ ఇక్కడ. పుస్తకం సులభం. నిజం.
ఇవాళ.

Read it: the six lines down once, without stopping
Read it: the six lines again, and search the first four lines for the verb

What to know first

There is none. ఇది పుస్తకం is *this book* with nothing between them, and it is a complete sentence: *this is a book.*

Telugu does not say *is*. Two words placed together are already a statement, and a reader has to stop waiting for the word that joins them.

The last two lines are one word each and still complete. That is the same rule taken as far as it goes.

Your turn

- *Say it:* the six lines, once, in order, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
What joins ఇది and పుస్తకం? (**Nothing** — and that is the sentence.)

83.3 (reading) — the first passage

Six words, then six lines. Now nine of them together, all about one room.

Twenty-five words, and not one of them is new.

Read this

ఇది పుస్తకం. పుస్తకం సులభం. ఇది తలుపు. కుర్చీ ఇక్కడ ఉంది.
దీపం ఇక్కడ ఉంది. గురువు ఇక్కడ ఉన్నారా? రైతు ఇక్కడ లేదు.
రెండవ పుస్తకం ఇక్కడ ఉంది. ఇవాళ చాలా సులభం.

Read it: the passage once without stopping; do not translate as you go — let the sentences arrive
Read it: the passage again, and notice that every line is about the same place

What to know first

That is not a stylistic choice. A language that has not yet taught you a word for *is* can still say ఉంది — *it exists here* — and లేదు — *it does not.* So the first passage a Telugu reader can hold is a room described from one spot: everything is here, or it is not.

ఉన్నారా? is the same word made into a question and made respectful at once, which is why the teacher gets it and the farmer does not. Telugu marks respect in the verb, and you have now read it doing so.

This is the first whole passage the book has asked you to hold at once, and it works because everything in it was paid for.

Your turn

- *Say it:* the passage aloud, once, without stopping

Twice through:

Before you move on

What two words carry the whole passage? (**ఉంది** and **లేదు** — here, and not here.)
Why does the teacher get **ఉన్నారా**? (**Respect lives in the verb.**)

Chapter 84

When You Are Not Well

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that I have a fever, that something hurts, that I am tired or thirsty, and ask someone to rest.

You'll want to know: జ్వరం

జ్వరం (*jvaraṁ*) — "a fever".

Notice the shape. The person sits in the dative **నాకు** and the fever *arrives*, on the same come-verb as **నాకు తెలుగు వచ్చు**. In Telugu an illness is something that comes to you.

The word, taken apart — its roots and family

జ్వరం (*jvaraṁ*) is Sanskrit *jvara*, "fever", taken over whole as a learned loan, a tatsama, with the Telugu noun ending *-ṁ* (CDIAL 5303).

What you've built

Your first word for what is wrong, on the pattern you already use for knowing Telugu.

Your turn

- *Say it: jvaraṁ*

అలసట (*alasaṭa*) is native Dravidian. DEDR 236 lists *alasaṭa*, “weariness”, with *alayu*, “to be tired”, beside Tamil *ala*, “to suffer, be in distress”. DEDR suggests that Sanskrit *alasa*, “lazy, tired”, came from this Dravidian root.

Chapter 150

A Word for Literature — Then the Letter Inside It

Modes: 🚗 **voice** (1) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can say the Telugu word for literature, recognise the rare letter inside it, and write that letter in a source-backed order.
>
> *Take* ఱ *from the already-known word* వాఙ్మయం *and write its five movements in three pen-down runs.*

150.1 వాఙ్మయం (vāṅmayaṁ) — literature, the whole body of expression in words

> You already know పుస్తకం, a book, and you have held a short passage without translating every word. This lesson names the larger body that books and spoken works belong to.

You'll want to know: వాఙ్మయం

వాఙ్మయం — *vāṅmayaṁ* — "literature", or more broadly, expression made of words.

Say it in three gentle pieces: *vāṅ* · *ma* · *yaṁ*. The first piece ends with the velar nasal heard in English *sing*. The spelling keeps that sound as ఙ్ before మ: వా-ఙ్-మ-యం.

The word came through Sanskrit: *vāc* is speech, and *maya* means made of or filled with. A single పుస్తకం is one book; వాఙ్మయం is the world of words that books, speeches, and other verbal works make together.

What you've built

One book, then the wider field it can belong to. The unusual spelling has had a meaning before it becomes a handwriting exercise.

Your turn

- *Say it: vāṅ · ma · yaṁ*, slowly
- *Say it: vāṅmayaṁ*, as one word
- *Read it:* పుస్తకం · వాఙ్మయం — one book, then literature
- *Find:* the small జ్ immediately before మ

Before you move on

What does వాఙ్మయం mean? ("Literature; the wider body of expression in words.") Say it once more.

150.2 ఙ — the quiet letter inside వాఙ్మయం

Say వాఙ్మయం once. What does it mean? ("Literature; the wider body of expression in words.")

Now slow the first two pieces: *vāṅ · ma*. The letter between them is today's whole task.

Script you'll notice: ఙ

ఙ — *ṅa*.

It is the velar nasal: the sound at the end of English *sing*. In వాఙ్మయం, the vowel is suppressed, so జ్ leans into the following మ. The base letter you will write is ఙ.

This is an uncommon letter in modern Telugu words. That is why the book waited until it had given you a real word that needs it.

Writing: ఙ — five small movements

How ఙ is written, stroke by stroke

Follow the filmstrip slowly. Movements 1–3 stay joined: turn around the compact upper-left lobe, continue around the broad lower bowl, then curl up through the right lobe. Lift for the inner horizontal bar. Lift once more for the short downward headstroke.

The numbered route is one attested school-style order; Telugu handwriting can vary. Keep the three pen-down runs clear rather than racing the shape.

Your turn

- *Trace it:* ఙ once, following the five numbered movements
- *Copy:* ఙ twice without tracing
- *Find:* జ్ఞ inside వాఙ్మయం
- *Say it: vāṅmayaṁ* as you finish

Before you move on

Which letter is this — ఙ? What sound does it carry? (*ña.*) Which word gave it to you? (వాఙ్మయం.)

Chapter 151

A Word for Shade — Then Its First Letter

Modes: **voice** (2) **pen** (1) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can say a Telugu word for shade or shadow, recognise its uncommon first letter, and write that letter in a source-backed order.
>
> *Take* ఛ *from the already-known word* ఛాయ *and write its five movements in two pen-down runs.*

151.1 ఛాయ (chāya) — shade, shadow

> *Point to:* the rare ఋ you met in వాఙ్మయం, once
>
> Now imagine the cool patch beneath a tree. This lesson gives that patch a name, using the familiar య at the end and a different uncommon letter at the beginning.

You'll want to know: ఛాయ

ఛాయ — *chāya* — "shade" or "shadow".

Say it in two gentle pieces: *chā* · *ya*. The first sound is an airy **ch**; the second is the familiar య sound. Say the word as ఛా-య.

ఛాయ is a learned word with a wider range than one dark shape. In literary or careful language it can also name a reflected image or a tinge of colour. Keep the first meaning small today: shade or shadow.

The word, taken apart — its roots and family

Chāya is Sanskrit *chāyā*, "shade, shadow, reflection" (CDIAL 5027), with the final *-ā* shortened.

What you've built

A useful image comes before an unfamiliar letter. You can say the whole word before the next lesson asks your hand to take its first shape apart.

Your turn

- *Say it: chā · ya*, slowly
- *Say it: chāya*, as one word
- *Read it:* ఛాయ — shade or shadow
- *Find:* the familiar య at the end

Before you move on

What does ఛాయ mean? ("Shade" or "shadow.") Say it once more.

151.2 ఛ — the airy first letter in ఛాయ

Say ఛాయ once. What does it mean? ("Shade" or "shadow.")

Now slow the first piece: *chā*. The base letter carrying that airy **ch** is today's whole task.

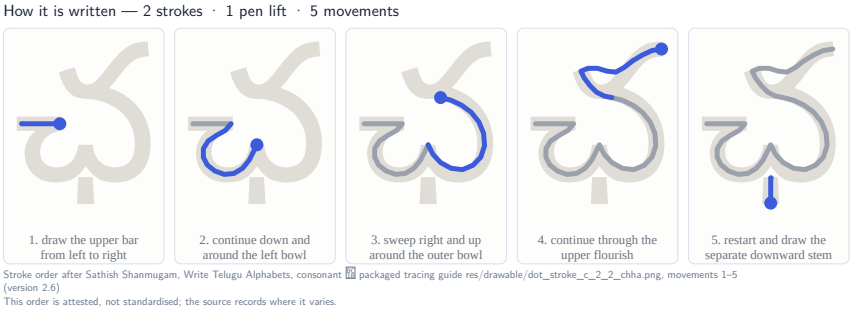
Script you'll notice: ఛ

ఛ — *cha*.

In ఛాయ, the long ా sign turns the base sound into ఛా. Remove that vowel sign and the base letter is ఛ.

This aspirated letter is uncommon in everyday Telugu vocabulary. That is why the book gave you ఛాయ before asking you to practise the shape.

Writing: ఛ — five movements, two runs



How ఛ is written, stroke by stroke

Follow the filmstrip slowly. Movements 1–4 stay joined: draw the short upper bar, turn around the left bowl, sweep around the broad outer bowl, and continue through the upper flourish. Lift once. Movement 5 draws the separate stem downward below the middle.

The numbered route is one attested school-style order; Telugu handwriting can vary. Keep the two pen-down runs distinct and let the long curves stay round.

Your turn

- *Trace it:* ఛ once, following the five numbered movements
- *Copy:* ఛ twice without tracing
- *Build:* ఛ + ◌ా = ఛా
- *Read it:* ఛాయ

Before you move on

Which letter is this — ఛ? What word gave it to you? (ఛాయ.)

151.3 ఛాయ — meaning and shape together

Picture the cool patch beneath a tree. Say the Telugu word for it. (ఛాయ.)

Your turn

Read it: ఛాయ once
Cover: the word
Write it: only its first base letter — ఛ
Check: the uncovered word for two things — the broad curved body and the short separate stem beneath it
Write it: the long ా sign only after the base letter is steady

- *Write it:* ఛ once from memory
- *Build:* ఛ + ా + య = ఛాయ
- *Say it:* "shade or shadow"

Before you move on

What does ఛాయ mean, and which base letter begins it? ("Shade" or "shadow"; ఛ.)

Chapter 152

A Word for a Stream — Then Its First Letter

Modes: **voice** (2) **pen** (1) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can say a Telugu word for a stream, recognise its uncommon first letter, and write that letter in a source-backed order.
>
> *Take* ఝ *from the already-known word* ఝరి *and write its five movements in five pen-down runs.*

152.1 ఝరి (jhari) — a stream

> What did వాఙ్మయం name? ("Literature.") *Find:* the familiar ఠ at the end of today's word — ర carries the short ి sign
>
> Picture a narrow stream moving down a hillside. This lesson gives that stream a name before it asks you to study the uncommon first letter.

You'll want to know: ఝరి

ఝరి — *jhari* — "a stream" or "mountain stream".

Say it in two gentle pieces: *jha* · *ri*. Say the word as ఝ-ఠ. The first sound is a breathy **jh**; the second piece is the familiar ఠ.

ఝరి is an authentic learned or literary word shared with Sanskrit. It is not an everyday word you must force into conversation. Keep its concrete image today: a stream running down a slope.

The word, taken apart — its roots and family

Jhari is Sanskrit *jharī*, "river", which CDIAL 5343 lists beside *jhara*, "waterfall".

What you've built

Meaning comes first. You can recognise and say the whole word before the next lesson asks your hand to take its first shape apart.

Your turn

- *Say it: jha · ri*, slowly
- *Say it: jhari*, as one word
- *Read it:* ఝరి — a stream
- *Find:* the familiar ి at the end

Before you move on

What does ఝరి mean? ("A stream" or "mountain stream.") Say it once more.

152.2 ఝ — the breathy first letter in ఝరి

One gentle look back first: వాఙ్మయం means "literature," and its uncommon letter is ఙ. Point to ఙ without copying it. Today you will keep that shape distinct from a different uncommon letter.

Now say ఝరి once. What does it mean? ("A stream" or "mountain stream.")

Now slow the first piece: *jha*. That breathy **jh** base letter is today's whole task.

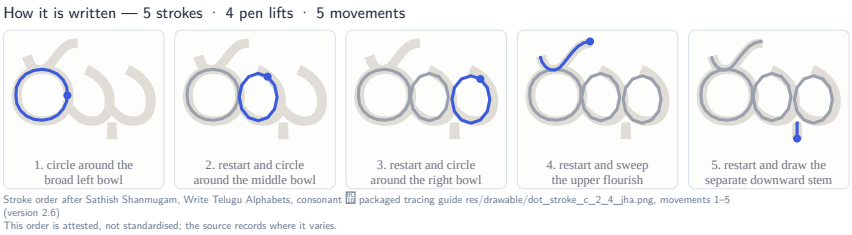
Script you'll notice: ఝ

ఝ — *jha*.

In ఝరి, the first base letter is ఝ. The rest, ి, is already familiar. Read the whole word in two pieces: ఝ-ి.

This aspirated letter is uncommon in everyday Telugu vocabulary. That is why the book gave you the authentic word ఝరి before asking you to practise the shape.

Writing: ఝ — five movements, five runs



How ఝ is written, stroke by stroke

Follow the filmstrip slowly. Movement 1 circles the broad left bowl. Lift. Movement 2 circles the middle bowl. Lift again. Movement 3 circles the right bowl. Movement 4 sweeps through the separate upper flourish. Movement 5 draws the separate stem downward below the middle.

The numbered route is one attested school-style order; Telugu handwriting can vary. Keep all five pen-down runs distinct and let the three bowls stay round.

Your turn

- *Trace it:* ఝ once, following the five numbered movements
- *Copy:* ఝ twice without tracing
- *Build:* ఝ + ి = ఝి
- *Read it:* ఝి

Before you move on

Which letter is this — ఝ? What word gave it to you? (ఝి.)

152.3 ఝి — meaning and shape together

Picture a stream running down a hillside. Say the Telugu word for it. (ఝి.)

Your turn

Read it: ఝరి once

Cover: the word

Write it: the whole word from memory, with only the picture of a stream as your cue

Check: the uncovered model — both the whole word and its first base letter

Write it: a circle round ఝ — then check its three rounded bowls, upper flourish, and separate downward stem, keeping the five pen-down runs distinct

- *Write it:* ఝరి once from the picture cue
- *Circle:* the first base letter ఝ
- *Say it:* "a stream"

Before you move on

Write it: without looking back, the Telugu word for "a stream," then a circle round its first base letter
(ఝరి; the circle goes round ఝ.)

Chapter 315

A connected A2 Telugu message

Modes: ✓ **pen** (1) 🚗 **Hands-free start:** none (1 lesson).

By the end of this chapter: I can plan and write a connected 70–90 word Telugu message in Telugu script for a named reader and practical purpose.

Complete chapter 315 by writing a model-free 70–90 word connected Telugu message for a named reader and practical purpose.

315.1 A connected Telugu message about your familiar day

A connected message is not a pile of vocabulary and not one long sentence. It is a short route for one reader. Before writing, draw eight empty boxes and give them these jobs:

1. reader and greeting;
2. reason for writing;
3. where or when your day begins;
4. two familiar actions;
5. what happens afterwards and a second time anchor;
6. one contrast or reason;
7. one direct question about tomorrow;
8. a close.

Write only one or two English cue words in each box. Do not draft Telugu yet.

Writing — connected composition

There is no Telugu model, sentence bank, word bank, romanization, or copyable answer on this page.

Reader: your friend Sita. **Purpose:** help Sita understand your familiar day and choose a good time to visit you tomorrow.

Write **70–90 words in Telugu script**. Use every planning box. Include at least four familiar actions, two time anchors, one sequence link, one contrast or reason, and one direct question for Sita. Make every detail help with tomorrow's visit. The instructions give content, not sentences: choose only words and forms this book has taught, and connect them yourself.

This first connected attempt is untimed. Put away dictionaries, grammar references, translators, generative assistants, and spell-checkers. Do not copy from an earlier lesson. Ordinary legible Telugu handwriting is enough.

When the whole message exists, count its words once. If it is short, add one useful taught detail to a planning box. If it is long, remove a detail that does not help Sita. Do not replace the message with a memorised model.

Before you move on

Review the same attempt in four separate passes:

1. **Task fulfilment and relevant content** — Sita, the familiar day, tomorrow's visit, and every requested content point are present.
2. **Organisation and cohesion** — the eight jobs form a route rather than a list of disconnected sentences.
3. **Telugu vocabulary and grammar** — every form and connector comes from the taught standard-colloquial Telugu track; a simpler familiar sentence is better than an invented structure.
4. **Telugu-script control** — letter shapes, vowel signs, conjuncts, word boundaries, and punctuation remain readable.

Mark one strength and one next step. Repair only the next step; keep the original attempt so the next 70–90-word message can show real growth.
This is one untimed curriculum practice attempt, **not the complete 30-minute A2 writing paper** and not evidence that

either timed mock has been passed. Closing the machine-measured connected-composition stage does not prove A2 attainment or readiness, learner performance, independent review, standard setting, mock passage, calibration, or human validation.

Chapter 316

Was Doing, Did, Used To

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say what happened in the plain past (veḷḷānu), set the scene with cēstunnappuḍu, and say what used to happen with cadivēvāḍini and uṇḍēdi.
>
> *Complete TE-R316-the-past-three-ways: tell what happened, what was going on and what used to happen, in the plain past, -tunnappuḍu and -ēvāḍini.*

316.1 వెళ్ళాను (veḷḷānu) — the plain past: what happened

> Before the new one: say "I go", or "I will go". (*nēnu veḷtānu.*) Then the last two people you met: the watchman and the milkman. (*kāpalādāru*, *pālavāḍu.*)
>
> **వెళ్తాను** says what happens, or what will. A story has already happened. It needs the past.

You'll want to know: the plain past

> **నిన్న నేను పట్టణానికి వెళ్ళాను.**
>
> *ninna nēnu paṭṭaṇāniki veḷḷānu.* — "Yesterday I went to the town."

వెళ్ళాను is "I went". Where the form you know has **-తా-** (**వెళ్తాను**), the past has **-ఆ-**: **వెళ్ళ** + **ఆను**. The person ending at the end works the way it does in **వెళ్తాను**:

- **నేను వెళ్ళాను** (*nēnu veḷḷānu*) — I went
- **నువ్వు వెళ్ళావు** (*nuvvu veḷḷāvu*) — you went
- **అతను వెళ్ళాడు** (*atanu veḷḷāḍu*) — he went
- **ఆమె వెళ్ళింది** (*āme veḷḷindi*) — she went, and "it went"
- **మేము వెళ్ళాము** (*mēmu veḷḷāmu*) — we went
- **వాళ్ళు వెళ్ళారు** (*vāḷḷu veḷḷāru*) — they went; with **మీరు**, "you went", said with respect

Only "she" and "it" step out of line: **వెళ్ళింది**, with **-ఇంది**.

You'll want to know: the stems that change

Many verbs take the past on their own stem. A **-ఉ-** before the last consonant turns to **-ఇ-**: **చదువు** → **చదివాను** (*cadivānu*), "I read"; **నడుచు** → **నడిచాను** (*naḍicānu*), "I walked".

A few of the commonest verbs change more, and they are worth learning as pairs:

- **వచ్చు** → **వచ్చాను** (*vaccānu*), "I came"
- **చూడు** → **చూశాను** (*cūśānu*), "I saw"; she saw: **చూసింది** (*cūsindi*)
- **చేయు** → **చేశాను** (*cēśānu*), "I did"; she did: **చేసింది** (*cēsindi*)
- **తిను** → **తిన్నాను** (*tinnānu*), "I ate"
- **ఇవ్వు** → **ఇచ్చాను** (*iccānu*), "I gave"

Your turn

Say these aloud:

- "Yesterday I went to the town" — *ninna nēnu paṭṭaṇāniki veḷḷānu*
- "She came in the evening" — *āme sāyantraṁ vaccindi*
- "We drank tea" — *mēmu ṭī tāgāmu*
- "I read a book. After that I had a meal." — *nēnu oka pustakaṁ cadivānu. ā taruvāta bhōjanaṁ cēśānu.*

Before you move on

"I went"? (**వెళ్ళాను.**) "He came"? (**వచ్చాడు.**) "She saw"? (**చూసింది.**) "I ate"? (**తిన్నాను.**) Which person takes **-ఇంది** instead of **-ఆ-**? (**She, and it.**)

316.2 చేస్తున్నప్పుడు (cēstunnappuḍu) — the scene and the event

Say "I am eating now". (*nēnu ippuḍu tiṇṭunnānu.*) Then "I ate". (*tinnānu.*)

The first is going on. The second is done. A told story needs both, one inside the other.

You'll want to know: -తున్నప్పుడు, while it was going on

నేను భోజనం చేస్తున్నప్పుడు ఫోను వచ్చింది.

nēnu bhōjanaṁ cēstunnappuḍu phōnu vaccindi. — "While I was having a meal, a call came."

Take **చేస్తున్నాను**, "I am doing", drop the person ending, and add **అప్పుడు**, "then, at that time": **చేస్తున్న** + **అప్పుడు** → **చేస్తున్నప్పుడు**, "at the time (I) was doing".

That clause is the **scene**. The thing that cut into it is the **event**, in the plain past: **వచ్చింది**. Telugu says a call "came", where English says the phone rang.

మేము నడుస్తున్నప్పుడు అకస్మాత్తుగా వర్షం పడింది.

mēmu naḍustunnappuḍu akasmāttugā varṣaṁ paḍindi. — "We were walking when suddenly it rained."

వర్షం (*varṣaṁ*, "rain") with **పడింది** (*paḍindi*, "fell"): rain "falls" in Telugu.

Grammar Lens: 'was doing' on its own

Telugu needs no separate tense for "was doing". The same form that says "I am reading" says "I was reading" once a past time sets the scene:

నిన్న రాత్రి తొమ్మిది గంటలకు నేను పుస్తకం చదువుతున్నాను.

ninna rātri tommidi gaṇṭalaku nēnu pustakaṁ caduvutunnānu. — "At nine last night I was reading a book."

The past is carried by **నిన్న రాత్రి**, not by the verb. **ఉన్నాను**, the "am" inside **చదువుతున్నాను**, works the same way:

నిన్న నేను ఇంట్లో ఉన్నాను.

ninna nēnu iṇṭlō unnānu. — "Yesterday I was at home."

ఇంట్లో (*iṇṭlō*, "at home") is the **ఇంటి-** of **ఇంటికి** with **-లో**, "in".

Your turn

Say these aloud:

- "While I was having a meal, a call came" — *nēnu bhōjanaṁ cēstunnappuḍu phōnu vaccindi*
- "While the watchman was sleeping, the milkman came" — *kāpalādāru nidrapōtunnappuḍu pālavāḍu vaccāḍu*
- "At nine last night I was reading a book" — *ninna rātri tommidi gaṇṭalaku nēnu pustakaṁ caduvutunnānu*

Before you move on

Which form paints the scene? (**-తున్నప్పుడు**, or **-తున్నాను** with a past time.) Which form drops in the event? (The plain past: **వచ్చింది**, **పడింది**.) "While I was eating"? (**నేను తింటున్నప్పుడు**, *nēnu tiṇṭunnappuḍu.*)

316.3 చదివేవాడిని (cadivēvāḍini) — what used to happen

Say "While I was having a meal, a call came." (*nēnu bhōjanaṁ cēstunnappuḍu phōnu vaccindi.*)

That happened once. Some things happened many times: what you did every day as a child.

You'll want to know: -ఏవాడిని, 'used to'

బాల్యంలో నేను ప్రతి రోజు ఒక కథ చదివేవాడిని.

bālyamilō nēnu prati rōju oka katha cadivēvāḍini. — "In my childhood I used to read a story every day."

చదివేవాడిని is "I used to read", said by a man. A woman says **చదివేదాన్ని** (*cadivēdānni*). Taken apart, it is the **-ఏ** form of the verb (**చదివే**, "who reads") with **వాడు**, "that man", or **దాని**, "that one", and the **-ని** of "I": roughly "I was one who reads".

- **నేను చదివేవాడిని** (*nēnu cadivēvāḍini*) / **చదివేదాన్ని** (*cadivēdānni*) — I used to read
- **అతను చదివేవాడు** (*atanu cadivēvāḍu*) — he used to read
- **ఆమె చదివేది** (*āme cadivēdi*) — she used to read
- **మేము చదివేవాళ్ళం** (*mēmu cadivēvāḷḷam*) — we used to read
- **వాళ్ళు చదివేవాళ్ళు** (*vāḷḷu cadivēvāḷḷu*) — they used to read

The same **-ఏ** sits on any verb: **వెళ్ళేవాడిని**, "I used to go"; **తినేవాడిని**, "I used to eat".

You'll want to know: ఉండేది, 'there used to be'

మా గ్రామంలో ఒక చిన్న అంగడి ఉండేది.

mā grāmamilō oka cinna aṅgaḍi uṇḍēdi. — "There used to be a small shop in our village."

ఉండేది is the same form of **ఉండు**, "to be": "it used to be there". Set it against the present:

ఇప్పుడు అక్కడ ఒక పెద్ద హోటలు ఉంది.

ippuḍu akkaḍa oka pedda hōṭalu undi. — "Now there is a big restaurant there."

A story about the old days leans on **ఉండేది** for the background.

Your turn

Say these aloud:

- "In my childhood I used to read a story every day" — *bālyamilō nēnu prati rōju oka katha cadivēvāḍini*
- "A woman says: I used to go to school every day" — *nēnu prati rōju baḍiki veḷḷēdānni*
- "My grandmother used to cook every evening" — *mā ammamma prati sāyantraṁ vaṇḍēdi*

Before you move on

"I used to go", said by a man? (**వెళ్ళేవాడిని**.) By a woman? (**వెళ్ళేదాన్ని**.) "There used to be"? (**ఉండేది**.) Which vowel marks the habit? (**-ఏ**, as in **చదివే**.)

316.4 Review — the past three ways

Say "Yesterday I went to the town." (*ninna nēnu paṭṭaṇāniki veḷḷānu.*) Then "she saw" and "I ate". (*cūsindi*, *tinnānu.*)

Your turn

Say these aloud:

- We drank tea, and after that we saw a film.
- While I was reading a book, Mother called.
- At nine last night I was at home.
- In my childhood I used to walk to school every day.
- There used to be a small shop in our village. Now there is a big restaurant.
- one thing you were doing yesterday evening, with **-తున్నప్పుడు**, and one thing that cut into it

Before you move on

Which past is the event? (The plain past: **వెళ్ళాను**, **వచ్చింది**.) Which is the scene? (**-తున్నప్పుడు**, or **-తున్నాను** with a past time.) Which is the habit? (**-ఏవాడిని**, **-ఏదాన్ని**.) "There used to be"? (**ఉండేది**.)

> రైలు ఆరు గంటలకు వస్తుంది. ఈలోగా భోజనం చేద్దాం.

railu āru gaṇṭalaku vastundi. īlōgā bhōjanaṁ cēddāṁ. — "The train comes at six. Before then, let's eat."

చేద్దాం, "let's do", has the ending of కలుద్దాం, "let's meet".

ఇంతలో, which you know, and ఈలోగా overlap, and you will hear both. ఇంతలో leans toward "at that very moment": something broke into the middle of a scene. ఈలోగా leans toward the time before something else arrives, and what someone did with it.

Its first letter is one you have not written yet. The next lesson takes it out of this word.

The word, taken apart — its roots and family

ఈలోగా (*īlōgā*) is native Dravidian, and it reads as "within this". ఈ, *ī*, is "this" in front of a noun, on the near-pointing base that also gives ఇక్కడ and ఇప్పుడు (DEDR 410). లోగా, *lōgā*, "within", is listed in DEDR 698, in an older spelling, beside *lō*, the లో of ఇంట్లో and బాల్యంలో.

Your turn

Say these aloud:

- *īlōgā*, slowly, then at speed
- "Mother was cooking. In the meantime I read a book." — *amma vaṇḍutōndi. īlōgā nēnu oka pustakaṁ cadivānu.*
- "The train comes at six. Before then, let's eat." — *railu āru gaṇṭalaku vastundi. īlōgā bhōjanaṁ cēddāṁ.*
- the other word, for 'at that very moment' — *intalō*

Before you move on

What does ఈలోగా mean? (**In the meantime, before then.**) Taken apart? ("This" + "within".) Which word leans toward "at that very moment"? (ఇంతలో, *intalō*.)

317.2 ఈ (ī) — the letter that opens ఈలోగా

> Before the new one: write ఇ and ీ once each, and name them. (Short *i* at the start of a word; long *ī* after a consonant, as in నీళ్ళు.)
>
> Now say ఈలోగా (*īlōgā*), "in the meantime". You met it a moment ago. This lesson takes its first letter out and puts it in your hand.

Script you'll notice: ఈ

ఈ — *ī*, a long *ī* at the start of a word.

After a consonant, long *ī* is the sign ీ: నీళ్ళు, *nīḷḷu*. At the start of a word there is no consonant to carry a sign, so the vowel stands as a letter of its own, ఈ.

ఈ is not ఇ with a mark added: it has a shape of its own. In print it is a round body with a straight bar across it, a short hook rising on the left, a long stroke sweeping up to the right, and a small curl standing beside it on the right.

On its own, ఈ is also a word: "this", in front of a noun. ఈ పుస్తకం is "this book"; ఆ పుస్తకం is "that book".

Writing: ఈ — copy the printed shape

Put your pen beside ఈ and copy it, slowly, and larger than it is printed. Keep the bar straight and the little curl on the right separate from the body.

> This book does not yet say where the pen starts on this shape, or which way it travels. That is taught with real variation from school to school, and it waits here until it can be written down from a source. Copying the printed shape needs no such source, and it puts the shape in your hand in the meantime.

Your turn

- *Find:* ఈ at the start of ఈలోగా
- *Trace it:* ఈ three times, saying *ī* as you finish each one
- *Write it:* ఇ, then ఈ, from memory, naming each
- *Write it:* ఈలోగా, then ఈ పుస్తకం, "this book"

- *Read it:* **ఈలోగా** aloud once more

Before you move on

Which letter is this — **ఈ**? (**ī**, long *ī* at the start of a word.) Which word did it come from? (**ఈలోగా**, *īlōgā*, "in the meantime".) What does **ఈ** mean on its own? (**"This"**, in front of a noun.)

317.3 ఆ తరువాత (ā taruvāta) — first, after that, in the end

Say "after, later" (*taruvāta*) and "before" (*mundu*). Then the word that opened the last lesson, "in the meantime". (*īlōgā*.) Which letter opens it? (**ఈ**, a long *ī*.)

You'll want to know: మొదట ... ఆ తరువాత

మొదట నేను టీ తాగాను. ఆ తరువాత బడికి వెళ్ళాను.

modaṭa nēnu ṭī tāgānu. ā taruvāta baḍiki veḷḷānu. — "First I drank tea. After that I went to school."

మొదట (*modaṭa*, "first, at first") sits beside **మొదటి**, "first", which you know: **మొదటి** goes in front of a noun, **మొదట** opens a sentence. **ఆ తరువాత** is **తరువాత** with **ఆ**, "that", in front: "after that". After a time word **తరువాత** means "after, later":

రెండు రోజుల తరువాత అతను వచ్చాడు.

reṇḍu rōjula taruvāta atanu vaccāḍu. — "Two days later he came."

You'll want to know: చివరికి

చివరికి రాత్రి పది గంటలకు ఇంటికి చేరాను.

civariki rātri padi gaṇṭalaku iṇṭiki cērānu. — "In the end I reached home at ten at night."

చివరికి is **చివర**, "the end", with **-కి**, "to": "to the end", so "finally, in the end". A told story often runs on three posts: **మొదట** … **ఆ తరువాత** … **చివరికి**.

Your turn

Say these aloud:

- "First I drank tea. After that I went to school." — *modaṭa nēnu ṭī tāgānu. ā taruvāta baḍiki veḷḷānu.*
- "Two days later he came" — *reṇḍu rōjula taruvāta atanu vaccāḍu*
- "In the end I reached home at ten at night" — *civariki rātri padi gaṇṭalaku iṇṭiki cērānu*
- yesterday in three steps: first, after that, in the end

Before you move on

"First", opening a sentence? (**మొదట**.) "After that"? (**ఆ తరువాత**.) "In the end"? (**చివరికి**.) What is **-కి** doing in **చివరికి**? (**"To": to the end.**)

317.4 వచ్చి (vacci) — having come, and then

Say "First I drank tea. After that I went to school." (*modaṭa nēnu ṭī tāgānu. ā taruvāta baḍiki veḷḷānu.*)

Two sentences, two full verbs. Telugu can fold them into one.

You'll want to know: the -ఇ form

నేను ఇంటికి వచ్చి భోజనం చేశాను.

nēnu iṇṭiki vacci bhōjanaṁ cēśānu. — "I came home and had a meal."

The first verb ends in **-ఇ** and carries no person: **వచ్చి**, "having come". Only the last verb says who and when. So a chain of **-ఇ** forms runs on to one full verb at the end:

అతను అంగడికి వెళ్ళి, ఒక పుస్తకం కొని, ఇంటికి వచ్చాడు.

atanu aṅgaḍiki veḷḷi, oka pustakaṁ koni, iṇṭiki vaccāḍu. — "He went to the shop, bought a book and came home."

కొని (*koni*, "having bought") is the **-ఇ** form of **కొను**, "to buy". Many of these sit close to the past stem: **వెళ్ళి**, **చదివి**, **తాగి**; and **తిను** → **తిని**, **చూడు** → **చూసి**, **చేయు** → **చేసి**.

You'll want to know: -ఇన తరువాత, after doing

> భోజనం చేసిన తరువాత నేను నిద్రపోయాను.
>
> *bhōjanaṁ cēsina taruvāta nēnu nidrapōyānu.* — "After having the meal, I slept."

చేసిన is "that was done", and before తరువాత it gives "after doing": వచ్చిన తరువాత, "after coming"; చూసిన తరువాత, "after seeing". Where -ఇ ties two actions tightly, -ఇన తరువాత marks a clear step in time.

Your turn

Say these aloud:

- "I came home and had a meal" — *nēnu iṇṭiki vacci bhōjanaṁ cēśānu*
- "He went to the shop, bought a book and came home" — *atanu aṅgaḍiki veḷḷi, oka pustakaṁ koni, iṇṭiki vaccāḍu*
- "After having the meal, I slept" — *bhōjanaṁ cēsina taruvāta nēnu nidrapōyānu*
- one morning of yours as one sentence, with two -ఇ forms and one full verb

Before you move on

"Having come"? (వచ్చి.) "Having eaten"? (తిని.) Which verb in a chain says who and when? (**The last.**) "After seeing"? (చూసిన తరువాత.)

317.5 (reading) — a visit to Grandmother's village

About eighty words, all met before; the few new forms are glossed after it. The writer is a man.

Read this

ఇటీవల నేను మా అమ్మమ్మ గ్రామానికి వెళ్ళాను. మొదట నేను బస్సులో కూర్చున్నాను. బస్సు వెళ్తున్నప్పుడు నేను ఒక పుస్తకం

చదువుతున్నాను. అకస్మాత్తుగా వర్షం పడింది. చివరికి సాయంత్రం గ్రామానికి చేరాను. నేను బస్సు దిగి నెమ్మదిగా నడిచాను.

ఈలోగా అమ్మమ్మ భోజనం వండింది. అమ్మమ్మ నన్ను చూసి నవ్వింది. మేము కలిసి భోజనం చేశాము. భోజనం చేసిన తరువాత మేము టీ తాగాము. ఆ తరువాత అమ్మమ్మ నా బాల్యం గురించి చెప్పింది. బాల్యంలో నేను ప్రతి రోజు అమ్మమ్మతో అంగడికి వెళ్ళేవాడిని. అప్పుడు గ్రామంలో ఒక చిన్న అంగడి మాత్రమే ఉండేది. ఇప్పుడు అక్కడ ఒక పెద్ద హోటలు కూడా ఉంది.

రాత్రి నేను తొమ్మిది గంటలకు నిద్రపోయాను. అది చాలా మంచి రోజు.

Read it once without stopping, then once more, sorting every verb: scene, event, or habit.

Why it's said this way

New forms: **కూర్చున్నాను** (*kūrcunnānu*, "I sat"), **కలిసి** (*kalisi*, "together"), **నన్ను** (*nannu*, "me"), **నవ్వింది** (*navvindi*, "she smiled"), and **-తో**, "with", in **అమ్మమ్మతో**.
The scene is **వెళ్తున్నప్పుడు** and **చదువుతున్నాను**; the habit is **వెళ్ళేవాడిని**; the background is **ఉండేది**. The **ఉంది** of "now" is the present. Every other verb is an event.

Your turn

Say these aloud:

- what the writer was doing when it rained
- what Grandmother did in the meantime
- what the writer used to do every day

Before you move on

Why is **ఉండేది** in the habit form? (The small shop **used to be** there: it is background.)

317.6 Review — a story in order

Say “in the meantime”. (*īlōgā.*)

- *Write it:* its first letter, ఈ, once from memory

Your turn

- *Say it:* First I drank tea. After that I went to the town.
- *Say it:* I came home and had a meal. In the meantime it rained.
- *Say it:* After seeing the film, we went home. In the end we slept.
- *Say it:* from the reading, what the writer was doing on the bus, and what he used to do every day
- *Write it:* ఈలోగా, then ఈ పుస్తకం, “this book”

Before you move on

“First”? (మొదట.) “After that”? (ఆ తరువాత.) “In the end”? (చివరికి.) “Having come”? (వచ్చి.) “In the meantime”? (ఈలోగా, which opens with ఈ.) In the reading, what did Grandmother do in the meantime? (**She cooked a meal.**)

Chapter 318

What I Think, and So

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say what I think, firmly or softly, with ani anukuṇṭunnānu, nā abhiprāyaṁlō and anipistundi, and give a result with kābaṭṭi and andukē.
>
> *Complete TE-R318-opinion-and-result: give an opinion three ways and draw a result from a reason with kābaṭṭi and andukē.*

318.1 అనిపించు (anipiñcu) — to seem, to feel

> Before the new one: say "I came home and had a meal". (*nēnu iṇṭiki vacci bhōjanaṁ cēśānu.*) Then say what ఈ means on its own, in front of a noun. ("This.")

You'll want to know: అనిపించు

అనిపించు — *anipiñcu* — "to seem, to feel (to someone)".

> **మొదట తెలుగు నాకు కష్టంగా అనిపించింది.**
>
> *modaṭa telugu nāku kaṣṭaṅgā anipiñcindi.* — "At first Telugu seemed hard to me."
>
> **ఇప్పుడు అది నాకు సులభంగా అనిపిస్తుంది.**
>
> *ippuḍu adi nāku sulabhaṅgā anipistundi.* — "Now it seems easy to me."

The one who feels sits in the dative, **నాకు**, the way it does in **నాకు తెలుగు వచ్చు**. The verb stays "it": **అనిపిస్తుంది** (*anipistundi*, "it seems"), **అనిపించింది** (*anipiñcindi*, "it seemed"). The quality takes **-గా**: **కష్టంగా**, **సులభంగా**. **నాకు అలా అనిపిస్తుంది** is "that is how it seems to me": **అలా** (*alā*, "like that") is the **అలా** inside **అలాగే**.

The word, taken apart — its roots and family

అనిపించు (*anipiñcu*) is native Dravidian. DEDR 868 lists Telugu *anu*, "to say", and beside it *anipincu*, "to seem, appear, be considered", which it also glosses "to cause to be said". So **నాకు అలా అనిపిస్తుంది** is close to "it gets said to me like that". The same **అను** is inside **అనుకో**, "to think", and **ఎందుకంటే**.

Your turn

Say these aloud:

- *anipiñcu*, slowly, then at speed
- "At first Telugu seemed hard to me" — *modaṭa telugu nāku kaṣṭaṅgā anipiñcindi*
- "Now it seems easy to me" — *ippuḍu adi nāku sulabhaṅgā anipistundi*
- "That is how it seems to me" — *nāku alā anipistundi*

Before you move on

What does **అనిపించు** mean? (**To seem, to feel.**) Where does the one who feels go? (In the dative: **నాకు**.) "It seemed"? (**అనిపించింది**.)

318.2 అని అనుకుంటున్నాను (ani anukuṇṭunnānu) — I think that

Say "to think" (*anukō*) and "an opinion" (*abhiprāyaṁ*). Then "it seems so to me". (*nāku alā anipistundi.*)

You'll want to know: ... అని అనుకుంటున్నాను

తెలుగు కష్టం కాదని నేను అనుకుంటున్నాను.

telugu kaṣṭaṁ kādani nēnu anukuṇṭunnānu. — "I think Telugu is not hard."

The thought comes first, closed by **అని** (*ani*, "saying"); then the verb of thinking. A final **-ఉ** melts into **అని**: **కాదు** + **అని** → **కాదని**; **పడుతుంది** + **అని** → **పడుతుందని**.

రేపు వర్షం పడుతుందని నేను అనుకుంటున్నాను.

rēpu varṣaṁ paḍutundani nēnu anukuṇṭunnānu. — "I think it will rain tomorrow."

అనుకుంటున్నాను is the **-తున్నాను** form of **అనుకో**: "I am thinking (that)", the everyday "I think".

You'll want to know: నా అభిప్రాయంలో

నా అభిప్రాయంలో ఈ హోటలు చాలా మంచిది.

nā abhiprāyaṁlō ī hōṭalu cālā mañcidi. — "In my opinion this restaurant is very good."

నాకు అలా అనిపిస్తుంది.

nāku alā anipistundi. — "That is how it seems to me."

Three ways, from firm to soft. **నా అభిప్రాయంలో** is careful and a little formal. **... అని అనుకుంటున్నాను** is the plain one. **నాకు ... అనిపిస్తుంది** is the softest: a feeling more than a claim. **నా ఉద్దేశంలో**, with the **ఉద్దేశం** you know, is heard too.

Your turn

Say these aloud:

- "I think Telugu is not hard" — *telugu kaṣṭaṁ kādani nēnu anukuṇṭunnānu*
- "I think it will rain tomorrow" — *rēpu varṣaṁ paḍutundani nēnu anukuṇṭunnānu*

- "In my opinion this restaurant is very good" — *nā abhiprāyaṁlō ī hōṭalu cālā mañcidi*
- your own opinion of a film you saw, three ways: firm, plain and soft

Before you move on

Where does the thought go, before or after **అని**? (**Before.**) "Is not" + **అని**? (**కాదని.**) "In my opinion"? (**నా అభిప్రాయంలో.**) Which way is the softest? (**నాకు ... అనిపిస్తుంది.**)

318.3 కాబట్టి (kābaṭṭi) — so: the reason, then the result

Say "therefore" (*anduvalla*), "that is exactly why" (*andukē*) and "because" (*endukaṇṭē*).

You'll want to know: a reason + కాబట్టి

వర్షం పడుతోంది కాబట్టి నేను ఇంట్లో ఉన్నాను.

varṣaṁ paḍutōndi kābaṭṭi nēnu iṇṭlō unnānu. — "It is raining, so I am at home."

బస్సు లేదు కాబట్టి మేము నడిచాము.

bassu lēdu kābaṭṭi mēmu naḍicāmu. — "There was no bus, so we walked."

కాబట్టి follows the reason directly, inside the same sentence; the result comes after it. Read it as "since it is raining, …" or "it is raining, so …". The order is the reverse of **ఎందుకంటే**, where the result comes first and the reason follows.

You'll want to know: అందుకే, a new sentence

నాకు జ్వరం వచ్చింది. అందుకే నేను బడికి వెళ్ళలేదు.

nāku jvaraṁ vaccindi. andukē nēnu baḍiki veḷḷalēdu. — "I had a fever. That is why I did not go to school."

When the reason is a whole sentence, the next sentence opens on **అందుకే**, "that is exactly why", or, more formally, **అందువల్ల**, "therefore".

వెళ్ళలేదు (*veḷḷalēdu*, "did not go") is how a story says "did not": the verb's base with **లేదు**. **చేయలేదు**, "did not do"; **రాలేదు**, "did not come".

Your turn

Say these aloud:

- "It is raining, so I am at home" — *varṣaṁ paḍutōndi kābaṭṭi nēnu iṇṭlō unnānu*
- "There was no bus, so we walked" — *bassu lēdu kābaṭṭi mēmu naḍicāmu*
- "I had a fever. That is why I did not go to school." — *nāku jvaraṁ vaccindi. andukē nēnu baḍiki veḷḷalēdu.*
- one thing you did not do yesterday, and why, with **కాబట్టి**

Before you move on

With **కాబట్టి**, which comes first, the reason or the result? (**The reason.**) With **ఎందుకంటే**? (**The result.**) "Did not come"? (**రాలేదు**.)

318.4 Review — opinion and result

Say "it seemed hard to me". (*nāku kaṣṭaṅgā anipiñcindi.*) Then say "in the meantime". (*īlōgā.*)

- *Write it:* **ఈ**, the first letter of **ఈలోగా**, once

Your turn

Say these aloud:

- I think this book is good.
- In my opinion Telugu is not hard.
- It is raining, so we did not go to the town.

- I had a fever. That is why I stayed at home.
- First we had a meal. After that we went to a film. In the end we came home.
- the reading's trip in two sentences, with -ఇ forms

Before you move on

"I think that …"? (**... అని అనుకుంటున్నాను.**) "In my opinion"? (**నా అభిప్రాయంలో.**) "It seems to me"? (**నాకు ... అనిపిస్తుంది.**) "So", after a reason? (**కాబట్టి.**) "That is why", opening a sentence? (**అందుకే.**)

Chapter 319

Must, Must Not, and Because

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can say what someone must, must not or had better do with -āli, -akūḍadu and -tē mañcidi, and explain why with -aḍaṁ valla, endukaṇṭē and kābaṭṭi.
>
> *Complete TE-R319-advice-and-reasons: give advice and duties, put a reason before or after its result, and read the new letter* ఓ.

319.1 వెళ్ళాలి (veḷḷāli) — must, must not, had better

Say "I want a ticket". (*nāku oka ṭikkeṭṭu kāvāli.*) Then "It is raining, so I am at home." (*varṣaṁ paḍutōndi kābaṭṭi nēnu iṇṭlō unnānu.*)

You'll want to know: -ఆలి, must

నేను ఇప్పుడు వెళ్ళాలి.

nēnu ippuḍu veḷḷāli. — "I must go now."

మీరు ఈ మందు ప్రతి రోజు తీసుకోవాలి.

mīru ī mandu prati rōju tīsukōvāli. — "You should take this medicine every day."

-ఆలి sits on the verb's base: **వెళ్ళు** → **వెళ్ళాలి**, **చేయు** → **చేయాలి**, **తిను** → **తినాలి**, **చదువు** → **చదవాలి**, and **వచ్చు** → **రావాలి**. It does not change for the person: **నేను**, **నువ్వు**, **అతను**, all **వెళ్ళాలి**. It covers both "must" and "should".

You have said this ending for a long time. **కావాలి** is **-ఆలి** on **కా-**, "to become": "it must come to be (mine)", so "it is needed, it is wanted".

You'll want to know: -అకూడదు, must not

జ్వరం ఉన్నప్పుడు బడికి వెళ్ళకూడదు.

jvaraṁ unnappuḍu baḍiki veḷḷakūḍadu. — "When you have a fever, you must not go to school."

ఇప్పుడు కాఫీ తాగకూడదు.

ippuḍu kāphī tāgakūḍadu. — "You must not drink coffee now."

-అకూడదు: **వెళ్ళకూడదు**, **తాగకూడదు**, **చేయకూడదు**. **ఉన్నప్పుడు** (*unnappuḍu*, "when there is") is **ఉన్న** + **అప్పుడు**, built like **-తున్నప్పుడు**.

You'll want to know: -తే మంచిది, had better

మీరు ఆసుపత్రికి వెళ్తే మంచిది.

mīru āsupatriki veḷtē mañcidi. — "You had better go to the hospital."

Word for word, "if you go, it is good": advice, softer than **-ఆలి**. The **-తే**, "if", gets a lesson of its own later in this core; here keep **-తే మంచిది** as one piece.

Your turn

Say these aloud:

- "I must go now" — *nēnu ippuḍu veḷḷāli*
- "You should take this medicine every day" — *mīru ī mandu prati rōju tīsukōvāli*
- "You must not drink coffee now" — *ippuḍu kāphī tāgakūḍadu*
- "You had better go to the hospital" — *mīru āsupatriki veḷtē mañcidi*

Before you move on

"Must come"? (**రావాలి.**) "Must not eat"? (**తినకూడదు.**) "Had better go"? (**వెళ్తే మంచిది.**) Which word you knew already ends in **-ఆలి**? (**కావాలి.**)

319.2 ఓటు (ōṭu) — a vote

Before the new one: say "I must go" and "you must not drink coffee now". (*nēnu veḷḷāli*; *ippuḍu kāphī tāgakūḍadu.*)

You'll want to know: ఓటు

ఓటు — *ōṭu* — "a vote".

ప్రతి ఒక్కరూ ఓటు వేయాలి.

prati okkarū ōṭu vēyāli. — "Everyone must vote."

నేను నిన్న ఓటు వేశాను.

nēnu ninna ōṭu vēśānu. — "I voted yesterday."

A vote is "put": **ఓటు వేయు** (*ōṭu vēyu*, "to cast a vote"), with **వేయు**, "to put". **ప్రతి ఒక్కరూ** (*prati okkarū*, "every single person") is **ప్రతి**, "every", with a word for "one person".

Its first letter, a long *ō* at the start of a word, is one you have not written. The next lesson takes it out of this word.

The word, taken apart — its roots and family

ఓటు (*ōṭu*) is a loan from English *vote*, with the **-ఉ** that Telugu gives most borrowed nouns, as in **బస్సు** and **టిక్కెట్టు**. The English *v* drops away, the vowel stays long, and the English *t* becomes **ట**, as it does in **టిక్కెట్టు**.

Your turn

Say these aloud:

- *ōṭu*, with a long *ō*

- "Everyone must vote" — *prati okkarū ōṭu vēyāli*
- "I voted yesterday" — *nēnu ninna ōṭu vēśānu*

Before you move on

What does ఓటు mean? (**A vote.**) "To cast a vote"? (ఓటు వేయు.) Where does the word come from? (**English *vote.***)

319.3 ఓ (ō) — the letter that opens ఓటు

Before the new one: write ఒ and ో once each, and name them. (Short *o* at the start of a word; long *ō* after a consonant, as in తోలు.)

Now say ఓటు (*ōṭu*), "a vote". This lesson takes its first letter out and puts it in your hand.

Script you'll notice: ఓ

ఓ — *ō*, a long *ō* at the start of a word.

After a consonant, long *ō* is the sign ో. At the start of a word it stands as a letter of its own, ఓ, and it pairs with the short ఒ you know, the way ఏ pairs with ఎ.

In print ఓ is ఒ with a small hooked stroke added at its top, rising and curling over to the right. Say the pair aloud: ఒ *o*, short; ఓ *ō*, held longer.

Writing: ఓ — copy the printed shape

Put your pen beside ఓ and copy it, slowly, and larger than it is printed. Write the body of ఒ first, the way you learned it, then copy the small hook at its top.

This book does not yet say where the pen starts on this shape, or which way it travels. That is taught with real variation from school to school, and it waits here until it can be written down from a source. Copying the printed shape needs no such source, and it puts the shape in your hand in the meantime.

Your turn

- *Find:* ఓ at the start of ఓటు
- *Trace it:* ఓ three times, saying *ō* as you finish each one
- *Write it:* ఒ, then ఓ, from memory, naming each
- *Write it:* ఓటు

Before you move on

Which letter is this — ఓ? (ō, long *ō* at the start of a word.) Which word did it come from? (ఓటు, *ōṭu*, "a vote".) How is it different from ఒ? (**The small hook at its top; the vowel is long.**)

319.4 నడవడం వల్ల (naḍavaḍaṁ valla) — giving the reason

Say "because of" (*valla*). Then say "a vote". (*ōṭu*.) Which letter opens it? (ఓ, a long *ō*.)

You'll want to know: -అడం వల్ల

-అడం turns a verb into a noun, "-ing": **నడవడం**, "walking"; **చదవడం**, "reading"; **తినడం**, "eating"; **రావడం**, "coming". With **వల్ల**, "because of", it gives a reason:

ప్రతి రోజు నడవడం వల్ల ఆరోగ్యం బాగుంటుంది.

prati rōju naḍavaḍaṁ valla ārōgyaṁ bāguṇṭundi. — "Walking every day keeps you healthy."

ఎక్కువ తినడం వల్ల నాకు కడుపు నొప్పి వచ్చింది.

ekkuva tinaḍaṁ valla nāku kaḍupu noppi vaccindi. — "Eating too much gave me a stomach ache."

బాగుంటుంది (*bāguṇṭundi*, "it stays well") is **బాగు**, "good, well", the base of **బాగా**, with **ఉంటుంది**, "it stays", from **ఉండు**.

Grammar Lens: two places for a reason

నేను రాలేదు, ఎందుకంటే నాకు జ్వరం వచ్చింది.

nēnu rālēdu, endukaṇṭē nāku jvaraṁ vaccindi. — "I did not come, because I had a fever."

నాకు జ్వరం వచ్చింది కాబట్టి నేను రాలేదు.

nāku jvaraṁ vaccindi kābaṭṭi nēnu rālēdu. — "I had a fever, so I did not come."

The same two facts. With **ఎందుకంటే** the reason stands after the result, where English puts it. With **కాబట్టి**, or **-అడం వల్ల**, it stands before, and the sentence ends on its main verb, as a Telugu sentence does. Both are everyday Telugu.

Your turn

Say these aloud:

- "Walking every day keeps you healthy" — *prati rōju naḍavaḍaṁ valla ārōgyaṁ bāguṇṭundi*
- "Eating too much gave me a stomach ache" — *ekkuva tinaḍaṁ valla nāku kaḍupu noppi vaccindi*
- "I did not come, because I had a fever" — *nēnu rālēdu, endukaṇṭē nāku jvaraṁ vaccindi*
- "the same, with the reason first" — *nāku jvaraṁ vaccindi kābaṭṭi nēnu rālēdu*
- why everyone must vote, in one sentence of your own

Before you move on

"Reading", as a noun? (**చదవడం**.) "Because of reading"? (**చదవడం వల్ల**.) With which word does the reason come after the result? (**ఎందుకంటే**.)

319.5 Review — advice and reasons

Say “a vote”. (*ōṭu.*)

- *Write it:* ఓ once from memory; then ఈ, from ఈలోగా

Your turn

- *Say it:* You must not go to school today. You had better stay at home.
- *Say it:* I think everyone must vote.
- *Say it:* Because of reading every day, my Telugu is good.
- *Say it:* I did not come, because I had a fever.
- *Say it:* I had a fever. That is why I did not come.
- *Write it:* ఓటు, then ఈ ఓటు, “this vote”

Before you move on

“Must”? (**-ఆలి.**) “Must not”? (**-అకూడదు.**) “Had better”? (**-తే మంచిది.**) “Because of walking”? (**నడవడం వల్ల.**) “A vote”? (**ఓటు**, which opens with **ఓ.**)

Chapter 320

Asking the Way

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can ask where a place is and how to get there, follow directions with sūṭigā, eḍama vaipu and kuḍi vaipu, and talk about my ūru.
>
> *Complete TE-R320-asking-the-way: ask the way, follow and give directions, and read the new letter* ఊ.

320.1 ఊరు (ūru) — a village or town; one's home place

Before the new one: say "a village" (*grāmaṁ*) and "a town" (*paṭṭaṇaṁ*). Then "I must go". (*nēnu veḷḷāli.*)

You'll want to know: ఊరు

ఊరు — *ūru* — "a village or town; one's home place".

> **మీది ఏ ఊరు?**
>
> *mīdi ē ūru?* — "Which town are you from?"
>
> **మా ఊరు చిన్నది, కానీ చాలా బాగుంటుంది.**
>
> *mā ūru cinnadi, kānī cālā bāguṇṭundi.* — "My home town is small, but it is very nice."

మీది (*mīdi*, "yours") and ఏ (*ē*, "which"): "yours is which town?", the usual way to ask where someone comes from.

ఊరు is wider than గ్రామం or పట్టణం: any place where people live, and most of all the one you come from. Before an ending its **-ఉ** turns to **-ఇ**: ఊరికి (*ūriki*, "to the town, home"), ఊరిలో (*ūrilō*, "in the town"). ఊరికి వెళ్తున్నాను on its own means "I am going home, to my own place". Many town names end in it, as నెల్లూరు does.

The word, taken apart — its roots and family

ఊరు (*ūru*) is native Dravidian, one word with Tamil, Malayalam and Kannada *ūr* and Tulu *ūru*, all "village, town" (DEDR 752). It is one of the words the whole family shares.

Your turn

Say these aloud:

- *ūru*, with a long *ū*
- "Which town are you from?" — *mīdi ē ūru?*
- "My home town is small, but it is very nice" — *mā ūru cinnadi, kānī cālā bāguṇṭundi*
- "On holiday I go home to my town" — *selavulō nēnu ūriki veḷtānu*

Before you move on

What does ఊరు mean? (**A village or town; one's home place.**) "To the town, home"? (ఊరికి.) How do you ask where someone comes from? (**మీది ఏ ఊరు?**)

320.2 ఊ (ū) — the letter that opens ఊరు

Before the new one: write ఉ and ◌ూ once each, and name them. (Short *u* at the start of a word; long *ū* after a consonant, as in కూర.) Then write ఈ once.

Now say ఊరు (*ūru*). This lesson takes its first letter out and puts it in your hand.

Script you'll notice: ఊ

ఊ — $\bar{u}$, a long $\bar{u}$ at the start of a word.

After a consonant, long $\bar{u}$ is the sign ూ. At the start of a word it stands as a letter of its own, ఊ, and it pairs with the short ఉ you know.

In print ఊ is built on ఉ: the same round body with the bar across it, and a small curl added on its right, like the curl beside ఈ, with the bar running on into it. Some typefaces also double the short upright stroke on top.

Writing: ఊ — copy the printed shape

Put your pen beside ఊ and copy it, slowly, and larger than it is printed. Write the body of ఉ the way you learned it, then copy the small curl on the right and run the bar into it.

> This book does not yet say where the pen starts on this shape, or which way it travels. That is taught with real variation from school to school, and it waits here until it can be written down from a source. Copying the printed shape needs no such source, and it puts the shape in your hand in the meantime.

Your turn

- *Find:* ఊ at the start of ఊరు
- *Trace it:* ఊ three times, saying $\bar{u}$ as you finish each one
- *Write it:* ఉ, then ఊ, from memory, naming each
- *Write it:* ఊరు, then ఈ ఊరు, "this town"

Before you move on

Which letter is this — ఊ? (**ū**, long $\bar{u}$ at the start of a word.) Which word did it come from? (ఊరు, *ūru*.) How is it different from ఉ? (**The curl on the right; the vowel is long.**)

320.3 సూటిగా (sūṭigā) — straight on, directly

> Before the new one: say "slowly" (*nemmadigā*) and "quickly" (*tvaragā*). Then say "one's home place". (*ūru*.)

You'll want to know: సూటిగా

సూటిగా — *sūṭigā* — "straight on, directly".

> **సూటిగా వెళ్ళండి.**
>
> *sūṭigā veḷḷaṇḍi.* — "Go straight on."
>
> **అతను సూటిగా మాట్లాడతాడు.**
>
> *atanu sūṭigā māṭlāḍatāḍu.* — "He speaks plainly, straight to the point."

Like **నెమ్మదిగా** and **త్వరగా**, it is a word with **-గా** on the end, and it answers "how?". On a road it is "straight on"; about speech it is "straight to the point".

The word, taken apart — its roots and family

సూటిగా (*sūṭigā*) is native Dravidian: **సూటి**, *sūṭi*, "aim", which DEDR 2658 lists with Tamil *cuṭṭu*, "to point out, to aim at", and the adverb ending **-గా**. Going straight is going where you aim.

Your turn

Say these aloud:

- *sūṭigā*
- "Go straight on" — *sūṭigā veḷḷaṇḍi*
- "He speaks plainly, straight to the point" — *atanu sūṭigā māṭlāḍatāḍu*

Before you move on

What does **సూటిగా** mean? (**Straight on, directly.**) Which ending does it share with **నెమ్మదిగా**? (**-గా**.)

320.4 ఎలా వెళ్ళాలి? (elā veḷḷāli?) — asking the way

> Say "where?" (*ekkaḍa*), "how?" (*elā*) and "I must go" (*nēnu veḷḷāli*). Then "go straight on". (*sūṭigā veḷḷaṇḍi.*)

You'll want to know: asking

క్షమించండి, ఆసుపత్రి ఎక్కడ ఉంది?

kṣamiñcaṇḍi, āsupatri ekkaḍa undi? — "Excuse me, where is the hospital?"

ఆసుపత్రికి ఎలా వెళ్ళాలి?

āsupatriki elā veḷḷāli? — "How do I get to the hospital?"

The second is "how must (I) go to …", with the **-ఆలి** of "must".

ఇక్కడి నుంచి దూరమా?

ikkaḍi nuñci dūramā? — "Is it far from here?"

-ఆ at the end makes a yes-or-no question: **దూరం**, "far" → **దూరమా?**, "far?". **ఇక్కడి** is the form **ఇక్కడ** takes before **నుంచి**.

You'll want to know: following the answer

సూటిగా వెళ్ళండి. రెండవ మలుపులో ఎడమ వైపు తిరగండి.

sūṭigā veḷḷaṇḍi. reṇḍava malupulō eḍama vaipu tiragaṇḍi. — "Go straight on. At the second turning, turn left."

ఆసుపత్రి కుడి వైపు ఉంది. దగ్గరే.

āsupatri kuḍi vaipu undi. daggarē. — "The hospital is on the right. It is close."

వైపు (*vaipu*, "side"): **ఎడమ వైపు**, "on the left, to the left"; **కుడి వైపు**, "on the right". **తిరగండి** (*tiragaṇḍi*, "turn") is the polite command of a verb for turning, with the **-అండి** of **క్షమించండి**. **దగ్గరే** (*daggarē*, "close by") is **దగ్గర** with an **-ఏ** that leans on it.

Your turn

Say these aloud:

- "How do I get to the hospital?" — *āsupatriki elā veḷḷāli?*
- "Go straight on. At the second turning, turn left." — *sūṭigā veḷḷaṇḍi. reṇḍava malupulō eḍama vaipu tiragaṇḍi.*
- ask the way to the station, then give the way back: straight on, then right

Before you move on

Ask “how do I get there”, then “is it far”. (ఎలా వెళ్ళాలి; దూరమా.) Then “on the left” and “turn”, politely. (ఎడమ వైపు; తిరగండి.)

320.5 Review — asking the way

Say “one’s home place”, “a vote” and “in the meantime”. (*ūru*, *ōṭu*, *īlōgā*.)

- *Write it:* the first letter of each, ఊ, ఓ and ఈ, once

Your turn

- *Say it:* Which town are you from? My home town is small.
- *Say it:* Excuse me, how do I get to the station?
- *Say it:* Go straight on. At the second turning, turn right. It is close.
- *Say it:* It is far, so you had better take an auto.
- *Write it:* ఊరు, ఓటు, ఈలోగా

Before you move on

“How do I get to the hospital?” (ఆసుపత్రికి ఎలా వెళ్ళాలి?) “Straight on”? (సూటిగా.) “On the right”? (కుడి వైపు.) “One’s home town”? (ఊరు, which opens with ఊ.)

Chapter 321

Tickets, Seats and Trouble

Modes: 🚗 **voice** (5) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 6 lessons.

> ***By the end of this chapter:*** I can buy a ticket, ask for a seat and when a train leaves, and report a missed bus or a lost bag.
>
> *Complete TE-R321-at-the-station: buy a ticket, ask for a seat and a time, report what went wrong, and read the new letter* **ఔ**.

321.1 సీటు (sīṭu) — a seat

> Before the new one: say "a bus" (*bassu*) and "a train" (*railu*). Then ask "how do I get to the station?" (*sṭēṣanuki elā veḷḷāli?*)

You'll want to know: సీటు

సీటు — *sīṭu* — "a seat", on a bus or a train, or in a hall.

> **ఈ సీటు ఖాళీగా ఉందా?**
>
> *ī sīṭu khāḷīgā undā?* — "Is this seat free?"
>
> **నాకు కిటికీ దగ్గర సీటు కావాలి.**
>
> *nāku kiṭikī daggara sīṭu kāvāli.* — "I would like a seat by the window."

ఖాళీగా (*khāḷīgā*, "empty, free") with **ఉందా?**, "is it?": the **-ఆ** question again. Two seats are **రెండు సీట్లు** (*reṇḍu sīṭlu*), the way two tickets are **టికెట్లు**.

The word, taken apart — its roots and family

సీటు (*sīṭu*) is a loan from English *seat*, with the **-ఉ** that Telugu gives most borrowed nouns, as in **బస్సు** and **ఫోను**.

Your turn

Say these aloud:

- *sīṭu*
- "Is this seat free?" — *ī sīṭu khāḷīgā undā?*
- "I would like a seat by the window" — *nāku kiṭikī daggara sīṭu kāvāli*

Before you move on

What does **సీటు** mean? (**A seat.**) "Is this seat free?" (**ఈ సీటు ఖాళీగా ఉందా?**) "Two seats"? (**రెండు సీట్లు.**)

321.2 ఒక టిక్కెట్టు ఇవ్వండి (oka ṭikkeṭṭu ivvaṇḍi) — at the ticket counter

Say "a ticket" (*ṭikkeṭṭu*) and "give", politely (*ivvaṇḍi*). Then "is this seat free?" (*ī sīṭu khāḷīgā undā?*)

You'll want to know: buying a ticket

విజయవాడకి రెండు టిక్కెట్లు ఇవ్వండి.

vijayavāḍaki reṇḍu ṭikkeṭlu ivvaṇḍi. — "Two tickets to Vijayawada, please."

The place takes **-కి**, "to"; the number comes before the ticket; **ఇవ్వండి**, "give", closes the request.

టిక్కెట్టు ధర ఎంత?

ṭikkeṭṭu dhara enta? — "How much is the ticket?"

ఎంత (*enta*, "how much"). For the way back:

నేను రేపు తిరిగి వస్తాను.

nēnu rēpu tirigi vastānu. — "I will come back tomorrow."

తిరిగి, "back", is the one in **తిరిగి ఇవ్వు**, "to give back".

You'll want to know: when does it leave?

రైలు ఎన్ని గంటలకు బయలుదేరుతుంది?

railu enni gaṇṭalaku bayaludērutundi? — "At what time does the train leave?"

ఆరు గంటలకు బయలుదేరుతుంది.

āru gaṇṭalaku bayaludērutundi. — "It leaves at six."

ఎన్ని గంటలకు (*enni gaṇṭalaku*, "at how many o'clock"): times of day take **-కు**, "at": **ఆరు గంటలకు**, "at six".

Your turn

Say these aloud:

- "Two tickets to Vijayawada, please" — *vijayavāḍaki reṇḍu ṭikkeṭlu ivvaṇḍi*
- "How much is the ticket?" — *ṭikkeṭṭu dhara enta?*
- "At what time does the train leave?" — *railu enni gaṇṭalaku bayaludērutundi?*
- buy one ticket to a town you know, ask the time, and say you will come back tomorrow

Before you move on

Ask for two tickets, then ask the price and the time. (**రెండు టిక్కెట్లు ఇవ్వండి**; **టిక్కెట్టు ధర ఎంత**; **ఎన్ని గంటలకు బయలుదేరుతుంది**.)

321.3 ఔషధం (auṣadhaṁ) — a remedy; medication

Before the new one: say "medicine" (*mandu*), "a fever" (*jvaraṁ*) and "a doctor" (*vaidyuḍu*).

You'll want to know: ఔషధం

ఔషధం — *auṣadhaṁ* — "a remedy; medication".

> **ప్రయాణంలో నాకు జ్వరం వచ్చింది. అక్కడ ఒక వైద్యుడు నాకు ఔషధం ఇచ్చాడు.**
>
> *prayāṇaṁlō nāku jvaraṁ vaccindi. akkaḍa oka vaidyuḍu nāku auṣadhaṁ iccāḍu.* — "On the trip I got a fever. A doctor there gave me a remedy."

> **నవ్వు మంచి ఔషధం.**
>
> *navvu mañci auṣadhaṁ.* — "Laughter is a good remedy."

Everyday Telugu says **మందు**. **ఔషధం** is the careful, learned word: you will read it on the signs of chemists' shops (**ఔషధాలు**, "medicines"), on labels, and in sentences about what heals in a wider sense, like the one about laughter.

The word, taken apart — its roots and family

ఔషధం (*auṣadhaṁ*) is borrowed from Sanskrit *auṣadha*, which CDIAL describes as "made of herbs" and as "a herb" (CDIAL 2571), with Telugu's noun ending **-ం**. A remedy was first a plant.

Your turn

Say these aloud:

- *auṣadhaṁ*, the *au* gliding from *a* toward *u*
- "A doctor gave me a remedy" — *oka vaidyuḍu nāku auṣadhaṁ iccāḍu*
- "Laughter is a good remedy" — *navvu mañci auṣadhaṁ*
- the everyday word for medicine, then the learned one

Before you move on

What does **ఔషధం** mean? (**A remedy; medication.**) Which word is the everyday one? (**మందు**.) Where will you read **ఔషధం**? (**On chemists' signs and labels.**)

321.4 ఔ (au) — the letter that opens ఔషధం

> Before the new one: write ఒ and ఓ once each. Then the sign ౌ, which you know from గౌరవం, "respect".
>
> Now say ఔషధం (*auṣadhaṁ*). This lesson takes its first letter out and puts it in your hand.

Script you'll notice: ఔ

ఔ — *au*, at the start of a word: one vowel that glides from *a* toward *u*, the way the middle of English *now* does.

After a consonant, *au* is the sign ౌ: గౌరవం. At the start of a word it stands as a letter of its own, ఔ. Few words open with it, and most of them come from Sanskrit.

In print ఔ is built on the body of ఒ, with a long stroke laid along its top that runs out to the right and ends in a small loop.

Writing: ఔ — copy the printed shape

Put your pen beside ఔ and copy it, slowly, and larger than it is printed. Write the body of ఒ the way you learned it, then copy the long top stroke and its loop.

> This book does not yet say where the pen starts on this shape, or which way it travels. That is taught with real variation from school to school, and it waits here until it can be written down from a source. Copying the printed shape needs no such source, and it puts the shape in your hand in the meantime.

Your turn

- *Find:* ఔ at the start of ఔషధం
- *Trace it:* ఔ three times, saying *au* as you finish each one
- *Write it:* ఒ, ఓ, then ఔ, from memory, naming each
- *Write it:* ఔషధం

Before you move on

Which letter is this — **ఔ**? (**au**, at the start of a word.) Which word did it come from? (**ఔషధం**, *auṣadhami*, "a remedy".) Which sign says *au* after a consonant? (**ౌ**, as in **గౌరవం**.)

321.5 పోయింది (pōyindi) — when something goes wrong

Say "At what time does the train leave?" (*railu enni gaṇṭalaku bayaludērutundi?*) Then say "a remedy". (*auṣadhami.*) Which letter opens it? (**ఔ**, *au.*)

You'll want to know: the bus has gone

అయ్యో! బస్సు వెళ్ళిపోయింది.

ayyō! bassu veḷḷipōyindi. — "Oh no! The bus has gone."

అయ్యో (*ayyō*, "oh no"). **వెళ్ళిపోయింది** is **వెళ్ళి**, "having gone", with **పోయింది**, "went away": gone, and not coming back. Telugu says what the bus did, where English often says "I missed the bus".

నేను బస్సు అందుకోలేకపోయాను.

nēnu bassu andukōlēkapōyānu. — "I could not catch the bus."

అందుకోలేకపోయాను (*andukōlēkapōyānu*, "I could not catch") is **అందుకో**, "to catch", with **-లేకపోయాను**, "I could not".

You'll want to know: it is lost

నా సంచి పోయింది.

nā sañci pōyindi. — "My bag is lost."

పోవు, "to go", says "to be lost" too: the bag "went". Then say what was in it and when it went:

సంచిలో నా ఫోను, నా డబ్బు ఉన్నాయి.

sañcilō nā phōnu, nā ḍabbu unnāyi. — "My phone and my money were in the bag."

నిన్న సాయంత్రం స్టేషనులో పోయింది. నేను పోలీసులకు ఫిర్యాదు ఇవ్వాలి.

ninna sāyantraṁ sṭēṣanulō pōyindi. nēnu pōlīsulaku phiryādu ivvāli. — "It went yesterday evening, at the station. I must make a complaint to the police."

ఉన్నాయి (*unnāyi*, "they are, they were") is the plural of **ఉంది**. A report answers three questions: what, where, when.

Your turn

Say these aloud:

- "Oh no! The bus has gone." — *ayyō! bassu veḷḷipōyindi.*
- "I could not catch the bus" — *nēnu bassu andukōlēkapōyānu*
- "My bag is lost" — *nā sañci pōyindi*
- "My phone and my money were in the bag" — *sañcilō nā phōnu, nā ḍabbu unnāyi*
- report a lost phone: what, where and when, and that you must make a complaint

Before you move on

"The bus has gone"? (**బస్సు వెళ్ళిపోయింది.**) "My bag is lost"? (**నా సంచి పోయింది.**) What three questions does a report answer? (**What, where, when.**)

321.6 Review — at the station

Say "a remedy". (*auṣadhaṁ.*) Then the three words whose first letters came before it. (*ūru*, *ōṭu*, *īlōgā.*)

- *Write it:* **ఔ**, **ఊ**, **ఓ** and **ఈ**, once each from memory

Your turn

- *Say it:* One ticket to my home town, please. At what time does the bus leave?
- *Say it:* Is this seat free? I would like a seat by the window.
- *Say it:* Oh no, the bus has gone. How do I get to the station?
- *Say it:* My bag is lost. My phone was in the bag.
- *Write it:* **ఔషధం**, **ఊరు**, **ఓటు**, **ఈలోగా**

Before you move on

"A seat"? (**సీటు**.) "At what time does it leave?" (**ఎన్ని గంటలకు బయలుదేరుతుంది?**) "It has gone"? (**వెళ్ళిపోయింది**.) "It is lost"? (**పోయింది**.) "A remedy"? (**ఔషధం**, which opens with **ఔ**.)

Chapter 322

Feelings and Hopes

Modes: 🚗 **voice** (4) ↙ **pen** (1) 🚗 **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can say how I feel and how I felt with nāku … -gā undi and anipiñcindi, and what I would like or dream of with -ālani.
>
> *Complete TE-R322-feelings-and-hopes: say how you feel and felt, what you would like and dream of, and read the visarga ◌ఃు.*

322.1 దుఃఖం (duḥkhaṁ) — grief

> Before the new one: say "sorrow, distress" (*bādha*), "comfort, ease" (*sukhaṁ*) and "a story" (*katha*). Then "my bag is lost". (*nā sañci pōyindi.*)

You'll want to know: దుఃఖం

దుఃఖం — *duḥkhaṁ* — "grief".

> **ఆ కథ చదివి నాకు దుఃఖం వచ్చింది.**
>
> *ā katha cadivi nāku duḥkhaṁ vaccindi.* — "Reading that story, I was moved to grief."

బాధ is the everyday hurt and sadness of a bad day. **దుఃఖం** is heavier: grief, the sorrow that brings tears. Like a fever, it "comes" to you: **నాకు దుఃఖం వచ్చింది**.

The mark after **దు** is a breath, *ḥ*. Many speakers let it run into the next sound, close to *dukkhaṁ*. The next lesson is about that mark.

The word, taken apart — its roots and family

దుఃఖం (*duḥkhaṁ*) is borrowed from Sanskrit *duḥkha*, "difficulty, pain" (CDIAL 6375), with Telugu's noun ending -ం. CDIAL notes it was formed after *sukha*, the word you know as సుఖం: the two are a pair, ease and its opposite.

Your turn

Say these aloud:

- *duḥkhaṁ*, with a short breath after *du*
- "Reading that story, I was moved to grief" — *ā katha cadivi nāku duḥkhaṁ vaccindi*
- the everyday word for sadness, then the heavier one
- the pair: *sukhaṁ*, *duḥkhaṁ*

Before you move on

What does దుఃఖం mean? (**Grief.**) How is it different from బాధ? (**It is heavier.**) Which word is its opposite? (సుఖం.)

322.2 ◌ఃు (ḥ) — the visarga inside దుఃఖం

Before the new one: write ◌ం and ఖ once each, and name them. (The sunna, *ṁ*, and *kha*.)

Now say దుఃఖం (*duḥkhaṁ*), "grief". Both of those are in it. This lesson takes out the one mark you have not written and puts it in your hand.

Script you'll notice: ◌ఃు

◌ఃు — the visarga, *ḥ*: a short breath after a vowel. It is two small rings, one above the other, written after its syllable: దు + ◌ఃు → దుఃు, *duḥ*.

Do not confuse it with ◌ం, one ring, which is *ṁ*. The visarga lives in words taken from Sanskrit, and most of them are learned words; దుఃఖం is the one you will meet most.

Writing: ◌ః — copy the printed shape

Write ◌ః yourself, slowly, and larger than it is printed: two small rings the same size, one above the other, both on the right of the syllable they follow.

> This book does not yet say where the pen starts on this shape, or which way it travels. That is taught with real variation from school to school, and it waits here until it can be written down from a source. Copying the printed shape needs no such source, and it puts the shape in your hand in the meantime.

Your turn

- *Find:* ◌ః inside దుఃఖం
- *Trace it:* ◌ః three times, saying *ḥ* as you finish each one
- *Write it:* ◌ం, then ◌ః, from memory, naming each as you finish it
- *Write it:* దుఃఖం

Before you move on

Which mark is this — ◌ః? (**The visarga**, *ḥ*, a breath.) Which word did it come from? (దుఃఖం, *duḥkhaṁ*, "grief".) How is it different from ◌ం? (**Two rings, not one.**)

322.3 నాకు భయంగా ఉంది (nāku bhayaṅgā undi) — how I feel

Say "fear" (*bhayaṁ*), "anger" (*kōpaṁ*) and "happily" (*santōṣaṅgā*). Then say "grief". (*duḥkhaṁ.*) Which mark sits after its first syllable? (◌ః, the visarga, *ḥ.*)

You'll want to know: నాకు ... -గా ఉంది

నాకు చాలా సంతోషంగా ఉంది.

nāku cālā santōṣaṅgā undi. — "I am very happy."

నాకు భయంగా ఉంది.

nāku bhayaṅgā undi. — "I am afraid."

The one who feels is in the dative, **నాకు**, as in **నాకు తెలుగు వచ్చు**. The feeling takes **-గా**, and **ఉంది**, "it is", closes the sentence: "to me, fearfully, it is". So too **నాకు బాధగా ఉంది**, "I feel sad"; **నాకు చలిగా ఉంది**, "I feel cold"; **నాకు ఆకలిగా ఉంది**, "I am hungry".

Some feelings "come" instead, as **దుఃఖం** does:

నాకు కోపం వచ్చింది.

nāku kōpaṁ vaccindi. — "I got angry."

You'll want to know: ... అనిపించింది, I felt

రాత్రి ఒంటరిగా నడుస్తున్నప్పుడు నాకు భయంగా అనిపించింది.

rātri oṇṭarigā naḍustunnappuḍu nāku bhayaṅgā anipiñcindi. — "Walking alone at night, I felt afraid."

For how a moment felt, put the **-గా** feeling before **అనిపించింది**, "it seemed": "to me, fearfully, it seemed". **ఒంటరిగా** (*oṇṭarigā*, "alone"). The scene is the **-తున్నప్పుడు** of a story; the feeling is the event in it.

Your turn

Say these aloud:

- "I am very happy" — *nāku cālā santōṣaṅgā undi*
- "I am afraid" — *nāku bhayaṅgā undi*
- "I got angry" — *nāku kōpaṁ vaccindi*
- "Walking alone at night, I felt afraid" — *rātri oṇṭarigā naḍustunnappuḍu nāku bhayaṅgā anipiñcindi*
- how you felt on your last trip, and when

Before you move on

"I feel sad"? (**నాకు బాధగా ఉంది.**) "I am hungry"? (**నాకు ఆకలిగా ఉంది.**) "I felt afraid"? (**నాకు భయంగా అనిపించింది.**) Which feeling "came"? (**Anger: నాకు కోపం వచ్చింది.**)

322.4 వెళ్ళాలని ఉంది (veḷḷālani undi) — what I would like

Say "I must go" (*nēnu veḷḷāli*) and "I am happy" (*nāku santōṣaṅgā undi*). Then "a dream", "hope" and "a wish". (*kala*, *āśa*, *kōrika*.)

You'll want to know: నాకు ... -ఆలని ఉంది

నాకు తెలుగు బాగా నేర్చుకోవాలని ఉంది.

nāku telugu bāgā nērcukōvālani undi. — "I would like to learn Telugu well."

నాకు మా ఊరికి వెళ్ళాలని ఉంది.

nāku mā ūriki veḷḷālani undi. — "I would like to go to my home town."

Take the **-ఆలి** of "must", add **అని**, "saying": **వెళ్ళాలి** + **అని** → **వెళ్ళాలని**. Then **నాకు ... ఉంది**: "to me there is (the thought) that I must go". The wish sits in the dative, like a feeling.

You'll want to know: my wish, my dream, my hope

తెలుగులో ఒక పుస్తకం రాయాలని నా కోరిక.

telugulō oka pustakaṁ rāyālani nā kōrika. — "My wish is to write a book in Telugu."

వైద్యుడు కావాలని నా కల.

vaidyuḍu kāvālani nā kala. — "My dream is to become a doctor."

ఆ ఉద్యోగం వస్తుందని నా ఆశ.

ā udyōgaṁ vastundani nā āśa. — "My hope is that I will get that job."

The wish comes first, closed by **-ఆలని** or **-అని**; **నా కోరిక**, **నా కల** or **నా ఆశ** comes last. In **కావాలని**, **కా-** has its plain sense, "to become". A job "comes" to you: **ఉద్యోగం వస్తుంది**.

Your turn

Say these aloud:

- "I would like to learn Telugu well" — *nāku telugu bāgā nērcukōvālani undi*
- "I would like to go to my home town" — *nāku mā ūriki veḷḷālani undi*
- "My wish is to write a book in Telugu" — *telugulō oka pustakaṁ rāyālani nā kōrika*
- "My dream is to become a doctor" — *vaidyuḍu kāvālani nā kala*
- one wish and one dream of your own

Before you move on

"I would like to go"? (**నాకు వెళ్ళాలని ఉంది.**) Which two pieces make **-ఆలని**? (**-ఆలి** + **అని.**) "My dream is …"? (**… -ఆలని నా కల.**)

322.5 Review — feelings and hopes

Say "grief", "a remedy" and "one's home place". (*duḥkhaṁ*, *auṣadhaṁ*, *ūru.*)

- *Write it:* ◌ం, **ఔ** and **ఊ**, once each from memory

Your turn

- *Say it:* I am very happy. I would like to go to my home town.
- *Say it:* When the bus went, I felt angry.
- *Say it:* My bag was lost. I felt sad.
- *Say it:* My dream is to write a book. My hope is that I will get that job.
- *Write it:* **దుఃఖం**, **ఔషధం**, **ఊరు**, **ఓటు**, **ఈలోగా**

Before you move on

"I am afraid"? (**నాకు భయంగా ఉంది.**) "I felt happy"? (**నాకు సంతోషంగా అనిపించింది.**) "I would like to learn"? (**నాకు నేర్చుకోవాలని ఉంది.**) "Grief"? (**దుఃఖం**, with the two rings of ◌ఃఁ.)

Chapter 323

Bigger, Best and How Long

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can compare two things with kaṇṭē, pick the best with anniṭikaṇṭē, and say how long with a span and -gā, nuñci and varaku.
>
> *Complete TE-R323-comparing-and-time: compare, pick the best, and say how long something has gone on and since when.*

323.1 కంటే (kaṇṭē) — bigger than, best of all

> Say "big" (*pedda*), "more" (*ekkuva*) and "I like Telugu" (*nāku telugu iṣṭami*). Then "I would like to go to my home town". (*nāku mā ūriki veḷḷālani undi.*)

You'll want to know: X కంటే

> **హైదరాబాదు విజయవాడ కంటే పెద్దది.**
>
> *haidarābādu vijayavāḍa kaṇṭē peddadi.* — "Hyderabad is bigger than Vijayawada."
>
> **నాకు టీ కంటే కాఫీ ఎక్కువ ఇష్టం.**
>
> *nāku ṭī kaṇṭē kāphī ekkuva iṣṭami.* — "I like coffee more than tea."

The thing you measure against comes with **కంటే**, "than", after it; then the quality. The quality does not change: no "bigger", only **పెద్దది** (*peddadi*, "a big one"). **ఎక్కువ**, "more", can stand before it to make the "more" plain.

రైలు బస్సు కంటే వేగంగా వెళ్తుంది.

railu bassu kaṇṭē vēgaṅgā veḷtundi. — "The train goes faster than the bus."

You'll want to know: అన్నిటికంటే, అందరికంటే

మా ఊరిలో ఈ హోటలు అన్నిటికంటే మంచిది.

mā ūrilō ī hōṭalu anniṭikaṇṭē mañcidi. — "In our town this restaurant is the best."

మా ఇంట్లో అమ్మమ్మ అందరికంటే పెద్దది.

mā iṇṭlō ammamma andarikaṇṭē peddadi. — "At home, Grandmother is the eldest."

అన్నిటికంటే is "than all (things)"; **అందరికంటే** is "than everyone", for people. Better than all is the best; bigger than everyone is the eldest.

Your turn

Say these aloud:

- "Hyderabad is bigger than Vijayawada" — *haidarābādu vijayavāḍa kaṇṭē peddadi*
- "I like coffee more than tea" — *nāku ṭī kaṇṭē kāphī ekkuva iṣṭam*
- "The train goes faster than the bus" — *railu bassu kaṇṭē vēgaṅgā veḷtundi*
- "In our town this restaurant is the best" — *mā ūrilō ī hōṭalu anniṭikaṇṭē mañcidi*
- two people you know, compared: who is older, who is the eldest

Before you move on

"Than"? (**కంటే**.) Where does it stand? (**After the thing you measure against.**) "Best of all"? (**అన్నిటికంటే మంచిది**.) "Than everyone"? (**అందరికంటే**.)

323.2 కాలం (kālaṁ) — a span of time

> Before the new one: say "time" (*samayaṁ*). Then the four seasons you learned long ago. (*vasanta ṛtuvu*, *vēsavi*, *vānākālaṁ*, *śītākālaṁ*.)

You'll want to know: కాలం

కాలం — *kālaṁ* — "a span of time; a period, an age".

> **చాలా కాలం తరువాత నేను మా ఊరికి వెళ్ళాను.**
>
> *cālā kālaṁ taruvāta nēnu mā ūriki veḷḷānu.* — "After a long time I went to my home town."

> **మీరు ఇక్కడ ఎంత కాలం ఉంటారు?**
>
> *mīru ikkaḍa enta kālaṁ uṇṭāru?* — "How long will you stay here?"

సమయం is time on the clock: is there time, what time is it. **కాలం** is time as a stretch: how long, a long while, a season. You have said it already without noticing it: **వానాకాలం** is "the rains' time", the rainy season, and **శీతాకాలం** is "the cold time", winter.

The word, taken apart — its roots and family

కాలం (*kālaṁ*) is borrowed from Sanskrit *kāla*, "time" (CDIAL 3084), with Telugu's noun ending **-ం**. The same *kāla* is the first half of **కాలపట్టిక**, "a timetable".

Your turn

Say these aloud:

- *kālaṁ*
- "After a long time I went to my home town" — *cālā kālaṁ taruvāta nēnu mā ūriki veḷḷānu*
- "How long will you stay here?" — *mīru ikkaḍa enta kālaṁ uṇṭāru?*
- the two seasons that end in *kālaṁ*

Before you move on

What does **కాలం** mean? (**A span of time.**) And **సమయం**? (**Time on the clock.**) "How long?" (**ఎంత కాలం?**)

323.3 మూడు సంవత్సరాలుగా (mūḍu saṁvatsarālugā) — how long

Say "a year" (*saṁvatsaraṁ*), "from" (*nuñci*) and "until" (*varaku*). Then "how long?" (*enta kālaṁ?*)

You'll want to know: a span + -గా, 'for ... now'

మూడు సంవత్సరాలుగా నేను తెలుగు నేర్చుకుంటున్నాను.

mūḍu saṁvatsarālugā nēnu telugu nērcukuṇṭunnānu. — "I have been learning Telugu for three years."

రెండు రోజులుగా వర్షం పడుతోంది.

reṇḍu rōjulugā varṣaṁ paḍutōndi. — "It has been raining for two days."

The span takes **-గా**, and the verb stays in the **-తున్న-** form: it began then and is still going on. English says "have been"; Telugu says "am -ing". The plural of **సంవత్సరం** is **సంవత్సరాలు**; of **రోజు**, **రోజులు**.

ఎంత కాలంగా మీరు ఇక్కడ ఉంటున్నారు?

enta kālaṅgā mīru ikkaḍa uṇṭunnāru? — "How long have you been living here?"

A span that is over takes no **-గా**:

నేను మూడు గంటలు నడిచాను.

nēnu mūḍu gaṇṭalu naḍicānu. — "I walked for three hours."

You'll want to know: నుంచి ... వరకు

నేను ఉదయం తొమ్మిది నుంచి సాయంత్రం ఐదు వరకు పని చేస్తాను.

nēnu udayaṁ tommidi nuñci sāyantraṁ aidu varaku pani cēstānu. — "I work from nine in the morning until five in the evening."

నిన్నటి నుంచి నాకు జ్వరం ఉంది.

ninnaṭi nuñci nāku jvaraṁ undi. — "I have had a fever since yesterday."

నుంచి marks where a span starts, **వరకు** where it stops. **నిన్నటి** (*ninnaṭi*, "yesterday's") is the form **నిన్న** takes before an ending: "from yesterday", so "since yesterday".

Your turn

Say these aloud:

- "I have been learning Telugu for three years" — *mūḍu saṁvatsarālugā nēnu telugu nērcukuṇṭunnānu*
- "I walked for three hours" — *nēnu mūḍu gaṇṭalu naḍicānu*
- "I work from nine in the morning until five in the evening" — *nēnu udayaṁ tommidi nuñci sāyantraṁ aidu varaku pani cēstānu*
- how long you have been learning Telugu, and since when

Before you move on

"For two years now"? (**రెండు సంవత్సరాలుగా**.) Which form does the verb keep? (**-తున్న-**, still going on.) "Since yesterday"? (**నిన్నటి నుంచి**.) "Until five"? (**ఐదు వరకు**.)

323.4 Review — comparing and time

Say the five words this core took its letters from. (*īlōgā*, *ōṭu*, *ūru*, *auṣadhaṁ*, *duḥkhaṁ*.) Then say "a span of time". (*kālaṁ*.)

- *Write it:* the five letters, **ఈ**, **ఓ**, **ఊ**, **ఔ**, ◌ఃౖ, once each from memory

Your turn

- *Say it:* My home town is smaller than Hyderabad, but for me it is the best of all.
- *Say it:* I have been living here for two years.
- *Say it:* After a long time I went to the village. I felt very happy.
- *Say it:* I work from morning until evening. I would like to go home.
- *Write it:* ఈలోగా, ఓటు, ఊరు, ఔషధం, దుఃఖం

Before you move on

"Than"? (కంటే.) "The best"? (అన్నిటికంటే మంచిది.) "For three years now"? (మూడు సంవత్సరాలుగా.) "From … until"? (నుంచి ... వరకు.) "How long?" (ఎంత కాలం?)

Chapter 324

If It Rains

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can say what will happen if something happens, with -tē and okavēḷa, and if it does not, with -akapōtē and lēkapōtē.
>
> *Complete TE-R324-if-and-otherwise: make real conditions with -tē, okavēḷa, -akapōtē and lēkapōtē.*

324.1 వస్తే (vastē) — if

> Say "I will go" (*nēnu veḷtānu*) and "you had better go to the hospital" (*mīru āsupatriki veḷtē mañcidi*). Then "in that case" and "if by chance". (*ayitē*, *okavēḷa*.)

You'll want to know: -తే, 'if'

> **నువ్వు వస్తే నేను కూడా వస్తాను.**
>
> *nuvvu vastē nēnu kūḍā vastānu.* — "If you come, I will come too."

Where the form you know ends in **-తాను**, **-తే** takes the place of the ending: **వస్తాను** → **వస్తే**, **వెళ్తాను** → **వెళ్తే**, **చేస్తాను** → **చేస్తే**, **ఉంటాను** → **ఉంటే**, **తింటాను** → **తింటే**. Some verbs put **-ఇతే** on the past stem instead: **చదివితే**, **పడితే**, **అడిగితే**.

It does not change for the person: **నేను వస్తే**, **అతను వస్తే**, **వాళ్ళు వస్తే**. The **-తే మంచిది** of advice was this ending. So is **అయితే**, "in that case": the **-తే** of the verb "to be", "if it is so".

You'll want to know: ఒకవేళ ... -తే

ఒకవేళ వర్షం పడితే, మనం ఇంట్లోనే ఉందాం.

okavēḷa varṣaṁ paḍitē, manaṁ iṇṭlōnē undāṁ. — "If by chance it rains, let's stay at home."

ఒకవేళ in front warns that the condition may well not happen; the **-తే** still does the work. **మనం** (*manaṁ*, "we, you and I") and **ఉందాం** (*undāṁ*, "let's stay"), with the **-దాం** of **కలుద్దాం**. **ఇంట్లోనే** (*iṇṭlōnē*, "right at home") leans on **ఇంట్లో** with an **-ఏ**.

Your turn

Say these aloud:

- "If you come, I will come too" — *nuvvu vastē nēnu kūḍā vastānu*
- "If he eats, I will eat too" — *atanu tiṇṭē nēnu kūḍā tiṇṭānu*
- "If by chance it rains, let's stay at home" — *okavēḷa varṣaṁ paḍitē, manaṁ iṇṭlōnē undāṁ*
- If you read this book, you will like it

Before you move on

"If you go"? (**నువ్వు వెళ్తే**.) "If there is"? (**ఉంటే**.) "If it rains"? (**వర్షం పడితే**.) Which word you knew is already a **-తే** form? (**అయితే**.)

324.2 వర్షం పడితే (varṣaṁ paḍitē) — if it rains, and if not

Say "if you come, I will come too" (*nuvvu vastē nēnu kūḍā vastānu*). Then "otherwise". (*lēkapōtē*.)

You'll want to know: a real condition

రేపు వర్షం పడితే నేను రాను.

rēpu varṣaṁ paḍitē nēnu rānu. — "If it rains tomorrow, I will not come."

సమయం ఉంటే సినిమాకి వెళ్దాం.

samayaṁ uṇṭē sinimāki veḷdāṁ. — "If there is time, let's go to a film."

A real condition is one that may well happen. The main verb is the form you know for what will happen (**వస్తాను**, **వెళ్తాను**), its "not" (**రాను** (*rānu*, "I will not come")), or a suggestion with **-దాం** (**వెళ్దాం** (*veḷdāṁ*, "let's go")).

You'll want to know: -అకపోతే, if not

నువ్వు త్వరగా రాకపోతే, బస్సు వెళ్ళిపోతుంది.

nuvvu tvaragā rākapōtē, bassu veḷḷipōtundi. — "If you do not come quickly, the bus will go."

-అక + పోతే: **రాకపోతే**, "if (you) don't come"; **చేయకపోతే**, "if (you) don't do"; **తినకపోతే**, "if (you) don't eat". **లేకపోతే**, which you know as "otherwise", is the same shape on **లే-**, "not be": "if not".

త్వరగా రా, లేకపోతే బస్సు వెళ్ళిపోతుంది.

tvaragā rā, lēkapōtē bassu veḷḷipōtundi. — "Come quickly, otherwise the bus will go."

Your turn

Say these aloud:

- "If it rains tomorrow, I will not come" — *rēpu varṣaṁ paḍitē nēnu rānu*
- "If there is time, let's go to a film" — *samayaṁ uṇṭē sinimāki veḷdāṁ*
- "If you do not come quickly, the bus will go" — *nuvvu tvaragā rākapōtē, bassu veḷḷipōtundi*
- "Come quickly, otherwise the bus will go" — *tvaragā rā, lēkapōtē bassu veḷḷipōtundi*
- one plan of yours for tomorrow, with an if and an if not

Before you move on

"If it rains"? (**వర్షం పడితే.**) "If you don't come"? (**రాకపోతే.**) "Otherwise"? (**లేకపోతే**, "if not".) "I will not come"? (**రాను.**)

324.3 Review — if, and otherwise

Say "grief", "a remedy", "one's home place", "a vote" and "in the meantime". (*duḥkhaṁ*, *auṣadhaṁ*, *ūru*, *ōṭu*, *vīlōgā.*)

- *Write it:* **దుఃఖం**, **ఔషధం** and **ఊరు** once each, then **ఓ** and **ఈ** on their own

Your turn

Say these aloud:

- If you come to my home town, I will be very happy.
- If it rains tomorrow, we will not go. Otherwise we will go at six.
- If by chance the bus does not come, let's take an auto.
- It has been raining for two days. If it rains tomorrow, I will stay at home.
- If you read this book, you will like it more than that one.

Before you move on

"If"? (**-తే**: **వస్తే**, **ఉంటే**, **పడితే.**) "If by chance"? (**ఒకవేళ ... -తే.**) "If not"? (**-అకపోతే**: **రాకపోతే.**) "Otherwise"? (**లేకపోతే.**)

Chapter 325

It Depends, and What Would Have Been

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can say what something depends on, say what would have happened with -i uṇṭē … -ēvāḍini, and write six connected lines about a trip.
>
> *Complete TE-R325-depends-and-would: say what something depends on and what would have been, after writing six connected lines about a trip.*

325.1 ఆధారపడు (ādhārapaḍu) — to depend, to rely

Before the new one: say "a support, a basis" (*ādhāraṁ*) and "to hurry" (*tondarapaḍu*). Then "if it rains tomorrow, I will not come". (*rēpu varṣaṁ paḍitē nēnu rānu.*)

You'll want to know: ఆధారపడు

ఆధారపడు — *ādhārapaḍu* — "to depend (on), to rely (on)".

> **అమ్మమ్మ నాన్న మీద ఆధారపడుతుంది.**
>
> *ammamma nānna mīda ādhārapaḍutundi.* — "Grandmother depends on Father."

మా ఊరు వర్షం మీద ఆధారపడుతుంది.

mā ūru varṣaṁ mīda ādhārapaḍutundi. — "Our town depends on the rain."

What you depend on takes **మీద** (*mīda*, "on"). The past, "I depended", is **ఆధారపడ్డాను** (*ādhārapaḍḍānu*): **-పడు** makes its past **పడ్డాను**, as **తొందరపడు** makes **తొందరపడ్డాను**.

The word, taken apart — its roots and family

ఆధారపడు (*ādhārapaḍu*) is two pieces. **ఆధారం**, "a support, a basis", which you know, is borrowed from Sanskrit *ādhāra* (CDIAL 1165). **-పడు** is the native verb that DEDR 3853 lists as "to feel, to suffer", and that makes verbs of nouns, as in **తొందరపడు** and **సిగ్గుపడు**. So: "to come to rest on a support".

Your turn

Say these aloud:

- *ādhārapaḍu*
- "Grandmother depends on Father" — *ammamma nānna mīda ādhārapaḍutundi*
- "Our town depends on the rain" — *mā ūru varṣaṁ mīda ādhārapaḍutundi*
- "I depended" — *ādhārapaḍḍānu*

Before you move on

What does **ఆధారపడు** mean? (**To depend, to rely.**) What does the thing you depend on take? (**మీద**, "on".) Which noun is inside it? (**ఆధారం**, "a support".)

325.2 మీద ఆధారపడి ఉంటుంది (mīda ādhārapaḍi uṇṭundi) — it depends

Say "our town depends on the rain" (*mā ūru varṣaṁ mīda ādhārapaḍutundi*). Then "according to". (*prakāraṁ*.)

You'll want to know: ... మీద ఆధారపడి ఉంటుంది

అది వాతావరణం మీద ఆధారపడి ఉంటుంది.

adi vātāvaraṇaṁ mīda ādhārapaḍi uṇṭundi. — "That depends on the weather."

రేపటి ప్రయాణం వర్షం మీద ఆధారపడి ఉంటుంది.

rēpaṭi prayāṇaṁ varṣaṁ mīda ādhārapaḍi uṇṭundi. — "Tomorrow's trip depends on the rain."

ఆధారపడి, the **-ఇ** form, with **ఉంటుంది**, "it stays": "it stays resting on". This is the answer to a question that has no single answer:

అది మీ మీద ఆధారపడి ఉంటుంది.

adi mī mīda ādhārapaḍi uṇṭundi. — "That is up to you."

రేపటి (*rēpaṭi*, "tomorrow's") is **రేపు** before a noun. When the answer comes from a rule or a list, use **ప్రకారం**, "according to":

కాలపట్టిక ప్రకారం రైలు ఆరు గంటలకు వస్తుంది.

kālapaṭṭika prakāraṁ railu āru gaṇṭalaku vastundi. — "According to the timetable, the train comes at six."

Your turn

Say these aloud:

- "That depends on the weather" — *adi vātāvaraṇaṁ mīda ādhārapaḍi uṇṭundi*
- "Tomorrow's trip depends on the rain" — *rēpaṭi prayāṇaṁ varṣaṁ mīda ādhārapaḍi uṇṭundi*
- "That is up to you" — *adi mī mīda ādhārapaḍi uṇṭundi*
- "According to the timetable, the train comes at six" — *kālapaṭṭika prakāraṁ railu āru gaṇṭalaku vastundi*
- 'will you come tomorrow?' — answer: it depends, and say on what, with an if

Before you move on

"It depends on the weather"? (వాతావరణం మీద ఆధారపడి ఉంటుంది.) "Up to you"? (మీ మీద ఆధారపడి ఉంటుంది.) "According to"? (ప్రకారం.)

325.3 ఉండి ఉంటే (uṇḍi uṇṭē) — what would have been

Say "I used to go", as a man and as a woman (*veḷḷēvāḍini*, *veḷḷēdānni*). Then "if there is" (*uṇṭē*) and "having come" (*vacci*).

You'll want to know: -ఇ ఉంటే, 'if ... had'

నా దగ్గర డబ్బు ఉండి ఉంటే, నేను వెళ్ళేవాడిని.

nā daggara ḍabbu uṇḍi uṇṭē, nēnu veḷḷēvāḍini. — "If I had had money, I would have gone."

Two pieces from this core, joined: the **-ఇ** form and **ఉంటే**. **ఉండి ఉంటే**, "if there had been"; **వచ్చి ఉంటే**, "if (you) had come"; **చెప్పి ఉంటే**, "if (you) had told". It looks at something that did not happen. **నా దగ్గర**, "near me", is how Telugu says "I have (it on me)".

You'll want to know: -ఏవాడిని, 'would have'

The main verb is the form of the habit, from the first chapter of this core: **-ఏవాడిని**, **-ఏదాన్ని**. The same form says "used to" and "would have"; the **-ఇ ఉంటే** clause in front tells you which.

నువ్వు ముందే చెప్పి ఉంటే, నేను వచ్చేదాన్ని.

nuvvu mundē ceppi uṇṭē, nēnu vaccēdānni. — "If you had told me earlier, I would have come."

బస్సు సమయానికి వచ్చి ఉంటే, మేము రైలు అందుకునేవాళ్ళం.

bassu samayāniki vacci uṇṭē, mēmu railu andukunēvāḷḷam. — "If the bus had come on time, we would have caught the train."

ముందే (*mundē*, "earlier, beforehand") is **ముందు** with **-ఏ**; **సమయానికి** (*samayāniki*, "on time") is **సమయం** with **-కి**.

Your turn

Say these aloud:

- "If I had had money, I would have gone" — *nā daggara ḍabbu uṇḍi uṇṭē, nēnu veḷḷēvāḍini*
- "A woman says: if you had told me earlier, I would have come" — *nuvvu mundē ceppi uṇṭē, nēnu vaccēdānni*
- "If the bus had come on time, we would have caught the train" — *bassu samayāniki vacci uṇṭē, mēmu railu andukunēvāḷḷami*
- one thing from your last trip that would have gone better, and why

Before you move on

"If (you) had come"? (**వచ్చి ఉంటే**.) "I would have gone"? (**వెళ్ళేవాడిని**, **వెళ్ళేదాన్ని**.) What else does that form say? (**"Used to".**)

325.4 Six lines about a trip

> The last A2 writing task asked for a connected message about a familiar day. This one asks for six lines, and they tell a story: a trip, to your home town or anywhere else.
>
> Pick one reader: a friend, by name.

What to know first

A told story is not a list of events. It has a **scene**, in **-తున్నప్పుడు** or **ఉండేది**. It has **events** in the plain past, kept in order with **మొదట**, **ఆ తరువాత**, **-ఇ** and **చివరికి**. It has at least one **reason**, with **కాబట్టి** or **ఎందుకంటే**, and a **feeling**, with **నాకు ... -గా అనిపించింది**.

A good one ends by looking at what might have been: **... -ఇ ఉంటే, ... -ఏవాడిని** (or **-ఏదాన్ని**).

Writing — connected composition

On paper, in Telugu script, write **six lines** to your reader about a trip, real or invented, one line for each of these:

1. the scene: when it was, and what you were doing as it began, with **-తున్నప్పుడు**;
2. the first thing that happened, with **మొదట**, and a ticket or a seat;
3. what happened next, with **ఆ తరువాత** or an **-ఇ** form, and one thing that went wrong;
4. why, with **కాబట్టి** or **ఎందుకంటే**; and if you like, what someone did **ఈలోగా**;
5. how it ended and how you felt, with **చివరికి** and **నాకు ... -గా అనిపించింది**;
6. one line about what might have been, with **-ఇ ఉంటే ... -ఏవాడిని** or **-ఏదాన్ని**.

There is no model on this page. Use only words you already write. The whole exercise is choosing the right past for each line, and joining them.

Before you move on

Now read your lines as you read the village story earlier in this core. Mark every verb **s** for scene, **e** for event. Line one should be mostly **s**; lines two and three mostly **e**.
Then five spelling checks. A word that starts with long *ī* starts with **ఈ**, not **ఇ**; one with long *ō* starts with **ఓ**, not **ఒ**; one with long *ū* starts with **ఊ**, not **ఉ**. The *au* of **ఔషధం** at the start of a word is the letter **ఔ**. **దుఃఖం** keeps its two rings, ◌ఃఖం.
Last, read line six alone. Does the if-clause end in **-ఇ ఉంటే**, and the main verb in **-ఏవాడిని** or **-ఏదాన్ని**?

325.5 Review — it depends, and what would have been

Say "to depend" (*ādhārapaḍu*) and "that depends on the weather" (*adi vātāvaraṇaṁ mīda ādhārapaḍi uṇṭundi*).

- *Write it:* ◌ఃand **ఔ**, once each

Your turn

Say these aloud:

- Will you come tomorrow? It depends on the rain. If it rains, I will not come.
- According to the timetable, the bus leaves at six. If you do not come quickly, it will go.
- If I had had time, I would have come.
- A woman says: if the bus had come on time, I would have caught the train.
- read your six lines aloud to your reader

Before you move on

"It depends on …"? (**… మీద ఆధారపడి ఉంటుంది.**) "If … had come"? (**వచ్చి ఉంటే.**) "I would have come"? (**వచ్చేవాడిని, వచ్చేదాన్ని.**) "According to"? (**ప్రకారం.**)

The word, taken apart — its roots and family

సాక్షి (*sākṣi*) is borrowed from Sanskrit *sākṣin*, "a witness" (CDIAL 13321). CDIAL takes the Sanskrit word apart as *sa-* "with" and *akṣi* "eye": the witness is the one who was there with his own eyes.

The Telugu script — a reference

A **reference**, not a chapter — a place to look things up. You are *not* meant to read this before the lessons: the lessons teach reading through real words, introducing each letter as a word needs it. This page just gathers the system in one spot.

How the Telugu script works (the three facts the lessons teach)

1. **Consonants carry a built-in "a".** క = "ka," మ = "ma," ర = "ra." (Many wear the *talakaṭṭu*, a small check-mark hat.) You never write the short *a*.
2. **A vowel sign changes that built-in vowel.** Attached to a consonant it gives కా = kā · కి = ki · కీ = kī · కు = ku · కూ = kū · కె = ke · కే = kē · కొ = ko · కో = kō. The signs themselves are ◌ా ā · ◌ి i · ◌ీ ī · ◌ు u · ◌ూ ū · ◌ె e · ◌ే ē · ◌ొ o · ◌ో ō.
3. **A *virama* (◌్) strips the vowel, and the bare consonant *stacks below* the next as a conjunct.** స్ + క → స్క (ska), న్ + య → న్య (nya). A dot **anusvāra** (◌ం) adds a final nasal.

Independent vowels (word-initial)

అ a · ఆ ā · ఇ i · ఈ ī · ఉ u · ఊ ū · ఎ e · ఏ ē · ఐ ai · ఒ o · ఓ ō · ఔ au.

Worth flagging

- **Aspiration is written.** క k / ఖ kh, గ g / ఘ gh, ద d / ధ dh — the "h" is a real puff. Like Kannada and unlike Tamil, Telugu keeps separate letters for the Sanskrit aspirates and voiced stops, because it borrowed so many Sanskrit words.
- **Round, looping forms.** Telugu and Kannada are script-sisters, shaped for palm-leaf writing; the two look far more alike than either does to Tamil.
- **"The Italian of the East."** Telugu words tend to end in vowels, giving the language an open, musical flow.

Telugu in the Dravidian family

Dravidian is a family entirely separate from Indo-European (English, Latin, Sanskrit). Telugu shares grammar and native vocabulary with Tamil, Kannada, and Malayalam — but, like Kannada and unlike Tamil, it borrowed **heavily** from Sanskrit. It also shows the family is not uniform: where its sisters say "no" with a word from the root *il-* (*illai / illa*), Telugu uses *lēdu / kādu*, whose *lē-* DEDR files with *il-* all the same. The lessons trace, word by word, what is home-grown and what is borrowed.

Good Evening
chapter topic; Chapter 30, p. 225
"good evening" (śubha sāyantram) — pairs with సాయంత్రం (TE-C27, the word with the striking Latin sērus/French soir cognate); unlike GREETING-MORNING's single, dramatic "displaced by English" source, TWO independently-fetched sources agree this one is genuinely, commonly used in both formal and casual speech, with నమస్కారం as a time-independent alternative rather than a replacement శుభ సాయంత్రం (śubha sāyantram)

"good morning" (subhodayam) — శుభ + ఉదయం, the traditional phrase; one directly-fetched source (a Telugu-learning blog, the same low-authority genre already found overstated for Hindi/ Kannada) claims it's archaic, displaced by English "good morning" — treat with real skepticism, not as confirmed; నమస్కారం remains a safer everyday-greeting bet regardless శుభోదయం (śubhōdayam)

Good Night
