Every one of them came out with *ll-*. So *planta*, which still has its *pl-* intact, did not come down that road. Corominas states the inference outright: **el tratamiento de *pl-* indica que ha de ser cultismo** — the treatment of the *pl-* shows it has to be a word taken from writing. The mouth-worn twin is not hypothetical: **llanta**, which in the *Partidas* meant a vegetable. One Latin word, two routes, two shapes — the spoken one bent, the written one preserved.
Careful with that twin: *llanta* is really two words — the cabbage-plant one from *planta*, and a wheel rim from elsewhere. Corominas separates them.
One question stays open, and it is the sense used here. How *planta* came to name a **storey** is not settled: Corominas declines to decide — **no está bastante estudiado el problema** — leaving Italian and a home-grown development both open.

la primera planta — the first floor.

What you've built

You can say which floor of a building you mean: *la planta*. And you can read a surviving *pl-* as a fingerprint of a word that came in through writing.

Your turn

Say these aloud:

- *la planta*
- *la primera planta*
- *la sala está en la primera planta*

Before you move on

What shape did *plēnum*, *plūvia* and *plicāre* come out in? (*Lleno*, *lluvia*, *llegar* — the *pl-* arrived as *ll-*.) So what does the surviving *pl-* of *planta* tell you? (That it was not worn down by speech; it was lifted out of written Latin.)

390.4 el ascensor — an old word waiting for its machine

Say *the living room*, then *the first floor*. (*La sala*; *la primera planta*.)

What to know first

- subir — what it does.
- la escalera — what people used before it.

Sounds you'll need

- *as-cen-SOR*, three beats with the weight on the last. The *c* before *e* is soft, so the middle beat begins with an *s* sound and the written *sc* comes out as one clean hiss. The final *r* is a single tap. → pronunciation reference

The word, taken apart — and its English cousins

el ascensor — the elevator.
It takes apart cleanly. Latin **ascēnsor** is an agent noun — a *-tor* word, the one who does the thing — built on **ascendere**. And *ascendere* is **ad-**, "to, up to," plus **scandere**, "to climb." So the whole word says: *the one who ascends*. Nothing about cables, cars or shafts is in there.
The Romans had the word for eighteen centuries before anyone had the machine, and it is worth seeing what they used it for. In the Vulgate, at Exodus 15, the **ascensor** is a **horseman** — the rider, the one gone up onto the horse. That is who an ascender was.
So the form and the meaning came by different roads, and the meaning has a date. French **ascenseur** existed in the early sixteenth century and meant a rider too. The sense we want — *an apparatus that serves to go up* — is recorded by the CNRTL for the first time in **1867**.
Spanish *ascensor* is therefore ancient in shape and modern in what it points at: a Latin word handed a nineteenth-century job.
The English family is large and regular. From *ascendere*: **ascend**, **ascent**, **ascension**. From the *scandere* underneath it: **descend**, **transcend**, and **scansion** — climbing along the beats of a line of verse.
One that is not family, however much it looks it: **scandal**. That comes

from Greek *skandalon* and has no share in this.

¿Dónde está el ascensor? — Where is the elevator?

What you've built

You can ask for the elevator: *el ascensor*. And you can tell an old form from a young meaning wearing it.

Your turn

Say these aloud:

- *el ascensor*
- *¿dónde está el ascensor?*
- *subo a la primera planta en el ascensor*

Before you move on

Who was an *ascēnsor* in the Vulgate? (A horseman — the one gone up onto the horse.) When does the machine sense first appear? (In French, in 1867.)

390.5 la piscina — one Latin fish, two Spanish roads

Say *the first floor*, then *where is the elevator?*. (*La primera planta*; *¿dónde está el ascensor?*)

What to know first

- el agua — what fills it.
- el pescado — the fish you eat, built on the same *piscis*.

Sounds you'll need

- *pis-CI-na*, three beats with the weight on the middle one. The *c* before *i* is soft, so that beat is *see* across the Americas and *thee*

across much of Spain. Both *i*s are tight and bright, never sliding toward an *uh*. → pronunciation reference

The word, taken apart — and its English cousins

la piscina — a swimming pool.
Latin **piscīna** is **piscis**, a fish, with the ending **-īna** on it.
The cleanest thing here is a pair. That same Latin root reached Spanish twice, by two roads, and the two arrivals look nothing alike:

- **pez** — inherited, carried down by mouth, worn short;
- **piscina** — taken out of writing, its shape kept whole.

One root, two routes. (*Piscīna* has a worn-down double of its own, **pecina**.)
Now a warning about the gloss, because the tempting move is wrong. *Piscina* does not mean "fishpond" in Spanish, and Spanish did not stretch it from fish to swimmers. That stretch had already happened in Rome. Lewis and Short mark the bathing sense as a post-Augustan transfer, and it turns up in Pliny, Seneca and Martial. Spanish borrowed the word with that meaning already attached.
English holds the root twice: **fish** is the inherited cousin of *piscis*, the Latin *p* answering a Germanic *f*. Borrowed straight from Latin: **Pisces**, **piscine**, **piscatorial**.
Before you travel: Mexico often says **alberca**, the Río de la Plata **pileta** — not variants but separate words, *alberca* from Arabic *al-birka*, *pileta* Romance.

What you've built

You can name five parts of a building: *la terraza*, *la sala*, *la planta*, *el ascensor*, *la piscina*.

Your turn

Say these aloud:

- *la piscina*
- *la piscina y el ascensor*

Now all five together. Name each part of the building, then say one thing about it.

Say these aloud:

- *la terraza — la terraza es pequeña*
- *la sala — la sala es grande*
- *la planta — vivo en la primera planta*
- *el ascensor — el ascensor sube*
- *la piscina — la piscina está abajo*

Before you move on

Which of *pez* and *piscina* came down by mouth? (*Pez.*) Did Spanish turn a fishpond into a swimming pool? (No — the Romans had already done it; the swimming sense came with the word.)

Chapter 391

Five Words for Eating Out

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say el menú, el camarero, el postre, el supermercado and el euro, and name five things I meet when I eat out.
>
> *Complete ES-C391-euro: name five things I meet when I eat out, and say one thing about each.*

391.1 el menú — one Latin word, three Spanish arrivals

Say *the elevator*, then *the swimming pool*. (*El ascensor*; *la piscina*.)

What to know first

- la carta — the other thing a restaurant hands you.
- el restaurante — where both arrive.

Sounds you'll need

- *me-NÚ*, two beats with the weight on the second. The written accent is there to say so; without it the eye would fall on the first beat instead. The *u* is a tight *oo*, held short, and the *n* is a plain *n*. → pronunciation reference

The word, taken apart — and its English cousins

el menú — the meal a kitchen has already decided on, written out. Spanish took the word from French **menu**, and in French it was a describing word before it was anything else: small, detailed, fine-grained. A *menu* list was a list broken down small. Behind the French sits Latin **minūtus**, made small, from **minuere**, to lessen.
The stress is the proof, and it is the kind of proof you can hear. Spanish says *me-NÚ*, weight on the last beat, exactly where French puts it. A word carried down out of Latin by mouth would not have landed there.
That is worth pressing, because *minūtus* reached Spanish twice more, by two other roads:

- **menudo** — carried down by mouth, worn short, everyday;
- **minuto** — lifted out of writing, its Latin shape kept whole;
- **menú** — handed over by French, keeping the French weight on the end.

Three words, three shapes, one Latin word. English holds the same root in **minute**, **diminish**, **minor**, **minus** and **mince**, and borrowed the list itself in 1837 as **menu**.
Now the warning, which will cost you a meal if you skip it. In Spain, *el menú* normally names the fixed set meal — the **menú del día**, one price, the courses chosen by the kitchen. The list you order freely from is **la carta**. Ask for *el menú* expecting the second, and the first is what arrives.

What you've built

You can name what the kitchen has already decided on: *el menú*.

Your turn

Say these aloud:

- *el menú*
- *el menú del día*

Now three in a row: *el ascensor*, *la piscina*, *el menú*.

Before you move on

Which of *menudo*, *minuto* and *menú* came in through French? (*Menú* — the final stress is the tell.) In Spain, which one is the fixed meal of the day, *el menú* or *la carta*? (*El menú.*)

391.2 el camarero — the servant of a room, at your table

Say *the swimming pool*, then *the set meal of the day.* (*La piscina*; *el menú del día.*)

What to know first

- el restaurante — where you will say it.
- el cuarto — a room, which is where this word started.

Sounds you'll need

- *ca-ma-RE-ro*, four beats with the weight on the third. The *c* before *a* is a hard *k*. Both *r*s are single quick taps of the tongue tip, nothing rolled. Both *a*s are wide open and equal, the unstressed one no fainter than the other. → pronunciation reference

The word, taken apart — and its English cousins

el camarero — the person who takes your order and brings your food. Underneath it sits **cámara**, a room. That goes back to Greek **kamára**, a vault or vaulted chamber, which Latin took as **camera**. One small thing in the shape is worth catching. Spanish has *cámara*, with an **a** in the middle — matching the everyday Latin **camara**, not the classical **camera** with its **e**. The word came up through speech, not off the page. Corominas finds *cámara* in Spanish already in the *Cid*.

English has that room twice over: **chamber** and **camera** are one Latin word arriving by two routes, and **bicameral**, a state with two chambers, keeps the plain sense.

Now the part where care is owed, because the sources split and neither

is careless:

- Wiktionary derives *camarero* from Medieval Latin **camarārius**;
- Corominas keeps it at home — Spanish *cámara* with the ending **-ero** on it, dated 1206.

Both roads end at exactly the word Spanish has. There is no crack of sound or spelling between them to prise apart, so the honest answer is not one of the two — it is that they cannot be told apart.
Two near-misses to refuse. English **chamberlain** looks like a cousin and is not: it is *camera* with a Germanic ending instead of the Spanish one, built alongside *camarero* rather than before it. And **camarón**, a shrimp, has nothing to do with any of this — different Latin word, *cammarus*.
One more honesty. When and how the servant of a chamber became the person who brings your dinner is not something the sources record. You will see confident centuries quoted for it; none is offered here.

What you've built

You can name the person who serves you: *el camarero*.

Your turn

Say these aloud:

- *el camarero*
- *el camarero trae el menú*

Now three in a row: *la piscina*, *el menú*, *el camarero*.

Before you move on

What did *cámara* name before anything else? (A room — and before that, a vault.) Can anyone say whether *camarero* was made inside Spanish or borrowed from Medieval Latin? (No. Both roads arrive at the same word.)

391.3 el postre — a word cut out of the middle of a phrase

Say *the set meal of the day*, then *the waiter*. (*El menú del día*; *el camarero.*)

What to know first

- dulce — what it usually is.
- la fruta — what it often was.

Sounds you'll need

- *POS-tre*, two beats with the weight on the first. The *s* stays a clean hiss and never buzzes into a *z*. The *t* is made with the tongue against the back of the teeth, drier than an English *t*, and the *r* behind it is one quick tap. → pronunciation reference

The word, taken apart — and its English cousins

el postre — dessert; the last thing brought to the table.
The family is Latin **post**, after, with **posterus**, following, and **postrēmus**, last, standing behind it. That much is firm. Almost nothing after it is, and this is a word where you should be told so. Corominas, who is the careful one here, does not make *postre* something Spanish inherited. He makes it something Spanish **cut out of a phrase it already had**:

- **a la postre** — in the end, finally;
- then **fruta de postre** — the fruit that comes at the end;
- then *postre* standing alone as the dish itself, documented in 1561.

That is why the word looks like a fragment. It is one. It was carved out of the middle of a fixed expression and left to stand up by itself. And he does not stop hedging there. The *postrero* underneath *a la postre* he calls *más dudosa* — more doubtful — offering only that it **probably** arose from a crossing of *postremo* with the words that meant much the same thing: *cabero*, *trasero*, *derradero*. Probably. He says no more, and neither will this page.

You will meet tidier accounts of *postre* than this, printed with no hedge at all. Refuse them. The neatest of them rests on a Latin expression that no source attests — reverse-engineered so that it produces the dessert, which is the one thing it was built to produce.
The English relatives are **posterior**, **posterity** and plain **post-**. The best of them is **preposterous**: *prae*, before, plus *posterus*, after. It means back-to-front because it says back-to-front. English **poster** is no relation whatever.

What you've built

You can name the last course of the meal: *el postre*.

Your turn

Say these aloud:

- *el postre*
- *el postre es dulce*

Now three in a row: *el menú*, *el camarero*, *el postre*.

Before you move on

Which phrase was *postre* cut out of? (*A la postre*, finally — then *fruta de postre*, and then the dish on its own.) Is *postre* any relation to English *poster*? (None at all.)

391.4 el supermercado — an English shop, rebuilt out of Spanish parts

Say *the waiter*, then *the dessert is sweet*. (*El camarero*; *el postre es dulce*.)

What to know first

- el mercado — the half you already have.
- la tienda — the smaller shop beside it.

Sounds you'll need

- *su-per-mer-CA-do*, five beats with the weight on the fourth. The opening *s* is a clean hiss. Both *r*s are quick taps, not rolls. The *c* before *a* is a hard *k*, and the *d* of *-ado* is barely closed at all — the tongue brushes the teeth, nearer the *th* of English *this* than a full *d*. → pronunciation reference

The word, taken apart — and its English cousins

el supermercado — a supermarket.

The two halves of this word are separated by roughly two thousand years, and that gap is the whole lesson.

The back half is ancient and came in by mouth. Latin **mercātus** was a trading, from **mercārī**, to trade, from **merx, mercis**, wares. Centuries of speech wore it down into **mercado**, and nobody sat down to make it. English took the same root by other doors: **market**, **merchant**, **mercantile**, **merchandise**, **commerce**, and the name **Mercury**.

The front half is younger than most people's grandparents. American English coined **supermarket** in 1933 — and Spanish did not take the English word. It translated it, piece against piece: *super* onto *super*, *market* onto *mercado*. A word built that way has a name. It is a **calque**: the foreign pattern crosses the border while the foreign sounds stay home.

Set the two ways in beside each other. A borrowed word arrives with its foreignness showing, and you can often hear where it came from. A calque arrives invisible — Spanish material throughout, Spanish stress, nothing to hear — and you would never guess it had been abroad unless someone told you.

One caution, because this move gets over-used. *Supermercado* really is a calque, and a dictionary says so, which is why it can be stated flatly here. The same tidy story gets told about *aeropuerto* — air plus port, copied straight from English — and there the claim is not actually supported by the sources. A word that **looks** assembled has not thereby been shown to be assembled.

What you've built

You can name where the food comes from before it reaches the table: *el supermercado*.

Your turn

Say these aloud:

- *el supermercado*
- *el supermercado está cerca*

Now three in a row: *el camarero*, *el postre*, *el supermercado*.

Before you move on

Which half of *supermercado* was carried down by mouth from Latin? (*Mercado*.) What does calling the word a calque claim about it? (Its parts were translated one for one instead of borrowed — an English pattern in Spanish material.)

391.5 el euro — a coin cut out of a longer word

Say *the dessert*, then *the supermarket is nearby*. (*El postre*; *el supermercado está cerca*.)

What to know first

- el dinero — money in general.
- la moneda — the coin in your hand.

Sounds you'll need

- *EU-ro*, two beats with the weight on the first. The *e* and the *u* run together inside that one beat, both still audible, an *eh* sliding into an *oo* in the time of a single vowel. The *r* is one tap; the final *o* stays round and full. → pronunciation reference

The word, taken apart — and its English cousins

el euro — the currency.
The Academy's dictionary has two entries at *euro*, not one — and not the same word.
The first is Latin **eurus**, from Greek **euros** — a poetic name for one of the cardinal winds. The second is the money. Four shared letters, nothing else.
This matters, because the wind is the tempting answer: old, Greek, the better story, and sitting in the dictionary looking like an ancestor. Any account of the currency that opens "from the Greek" has changed the subject to weather.
The money is plainer than that. It is a longer word cut short — and the Academy cuts it from **europeo**, not from *Europa*. A small divergence from the usual telling, worth keeping: it is what the dictionary prints — the describing word clipped, not the name of the continent.
The name itself was settled at the European Council in Madrid, in December 1995.
Who first thought of it is where the record thins. The coinage is widely attributed to **Germain Pirlot**, a Belgian teacher, in a letter written that year. Hold that as an attribution rather than a fact: Wiktionary itself calls it *the official story*, the priority rests on Pirlot's own statement that he knew of nobody proposing it earlier, and etymonline names no coiner whatever. Somebody wrote the word down first; whether it was him is not settled.

What you've built

You can name five things you meet when you eat out: *el menú*, *el camarero*, *el postre*, *el supermercado*, *el euro*.

Your turn

Say these aloud:

- *el euro*
- *pago con euros*

Now all five together. Name each thing, then say one thing about it. Say these aloud:

- *el menú — el menú está en la mesa*
- *el camarero — el camarero trae el agua*
- *el postre — el postre es dulce*
- *el supermercado — el supermercado está cerca*
- *el euro — pago con euros*

Before you move on

Where does the Academy's dictionary take the currency's name from? (From *europeo*, clipped short — not from the Greek wind, a separate entry and a separate word.) Is Germain Pirlot documented as the coiner? (No — it is an attribution, and one reference names nobody at all.)

Chapter 392

Five Words for a Journey

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say el aeropuerto, las vacaciones, el destino, el pasajero and agosto, and name five things about a journey.
>
> *Complete ES-C392-agosto: name five things about a journey, and say one thing about each.*

392.1 el aeropuerto — a harbour with air for a sea

Say *the supermarket*, then *the euro*. (*El supermercado*; *el euro*.)

What to know first

- el aire — the first half, standing on its own.
- el puerto — the second half, standing on its own.

Sounds you'll need

- *a-e-ro-PUER-to*, five beats with the weight on the fourth. The opening *a* and *e* are two clean vowels in a row, each with its own beat; *ue* runs together into a quick *weh*; the single *r* is a light tap; and the *p* carries no puff of breath behind it. → pronunciation reference

The word, taken apart — and its English cousins

el aeropuerto — "the airport."
Two pieces, both visible. Greek **aēr** was air, and it is the *aero-* of **aerial** and **aerobic**. Latin **portus** was a harbour, and it sits inside English **port** and **portal** — and, more quietly, inside **opportunity**, which is *ob portum*, the wind standing toward the harbour. A favourable wind was your opportunity.
So the picture to keep: a harbour is where things arrive out of the sea. An *aeropuerto* is a harbour whose sea is the air.
Now the part worth being careful about, because the easy answer is not available. The word looks exactly like English *airport*, piece for piece, and that resemblance settles nothing at all. Put *air* beside *harbour* in any European language of the 1920s and you get the same two-part word without anybody copying anybody. That is not speculation — it is documented next door: French **aéroport** is first attested in 1922, and CNRTL derives it inside French, from *aéro-* plus *port*, rather than out of English.
What can be said honestly is this. *Aeropuerto* belongs to a pan-European habit of early-aviation compounding, and whether Spanish took it from English, took it from French, or built it at home is not known. Structural likeness is the one piece of evidence that cannot decide the question, since every hypothesis predicts it.

What you've built

You can name where a journey begins: *el aeropuerto.*

Your turn

Say these aloud:

- *el aeropuerto*
- *un aeropuerto grande*
- *estamos en el aeropuerto*

Before you move on

What are the two pieces of *aeropuerto*? (Greek *aēr*, air, and Latin *portus*, a harbour.) And does the word's shape prove Spanish copied

English *airport*? (No — air plus harbour gives that shape in several languages independently, and French built *aéroport* at home in 1922; the route into Spanish is open.)

392.2 las vacaciones — weeks with the duty taken out

Say *the airport*, then *the euro*. (*El aeropuerto*; *el euro*.)

What to know first

- el viaje — what you take during them.
- la semana — how they get counted.

Sounds you'll need

- *va-ca-CIO-nes*, four beats with the weight on the third. The *v* is a soft *b*, the same sound the letter *b* would give. The *ci* is an *s* across the Americas and a *th* across much of Spain, and *io* runs together into a single beat. The final *s* stays clear and hissed. → pronunciation reference

The word, taken apart — and its English cousins

las vacaciones — "the holidays, the vacation." Spanish says it in the plural. The singular *vacación* survives mainly in old talk about an office standing empty.

Latin **vacāre** was to be empty, to stand free of an obligation. Out of it came **vacātiō**: exemption, release from a duty. English carries that root several times over — **vacant**, **vacate**, **vacuum**, **evacuate**, and **vacation** itself.

The step from *emptiness* to *August by the sea* looks like a leap, and it is not a guessed one. The mid-fifteenth-century English sense of *vacation* was a formal suspension of activity, as of schools and law courts. An empty term. An empty docket. Then, later, empty weeks belonging to you.

This word came into Spanish through a book rather than through a mouth, and it left two fingerprints. The *c* between the vowels is still

there, unworn. And the Latin ending arrived as **-ción**. Compare the same ending after centuries of speech: Latin *ratiōnem* came out as **razón**. One ending, two roads — *razón* walked, *vacaciones* was carried. One trap, and it is the likeliest one in this chapter. **Vaca**, the cow, has nothing to do with any of this. That word is Latin **vacca**, with a doubled *c*, and the resemblance to the *vac-* of *vacaciones* is pure accident. Cows are not empty; they are unrelated.

estar de vacaciones — to be away on holiday.

What you've built

You can name the weeks you leave for: *las vacaciones*.

Your turn

Say these aloud:

- *las vacaciones*
- *estoy de vacaciones*
- *en el aeropuerto, de vacaciones*

Before you move on

What did *vacāre* mean? (To be empty, to stand free of a duty.) And is *vacaciones* a relative of *vaca*, the cow? (No — the cow is Latin *vacca*, and the likeness is an accident.)

392.3 el destino — one word doing three jobs

Say *the airport*, then *the holidays*. (*El aeropuerto*; *las vacaciones*.)

What to know first

- estar — the standing verb from the same Latin root.
- la ciudad — one thing a *destino* can be.

Sounds you'll need

- *des-TI-no*, three beats with the weight on the middle one. The *i* is the *ee* of *see*, never the *i* of *sit*. The *t* is dental, tongue on the back of the teeth and no puff after it. Note too that *st* sits happily inside the word, where a Spanish word opening on those two letters puts an *e* in front first: *estar*, *estudiante*. → pronunciation reference

The word, taken apart — and its English cousins

el destino — the destination. And two more things besides.
Latin **dēstināre** was *dē-* plus an element belonging to **stāre**, to stand: to make firm, to fix a thing in place. Spanish took the verb **destinar** straight off the written page, and the dates say so plainly. Corominas finds *destinar* no earlier than the fifteenth century, and *destino* first in Garcilaso, between 1503 and 1536. A word surfacing that late has not been rubbing along in people's mouths since Rome; it was read into the language.
English got the same Latin: **destiny**, **destination**, **destine**, and the lovely **obstinate**, someone standing firmly in the way. Further back still, plain **stand** and **stable** are cousins.
Here is the most useful thing in the lesson, and it is a false friend three ways over. English *destination* means one thing. Spanish *destino* means three:

- **fate** — *el destino quiso otra cosa*, fate wanted something else;
- **the end of a journey** — *nuestro destino es Madrid*;
- **a job posting**, a duty station, which the Academy glosses with the single word *empleo* — *un destino en el extranjero* is work abroad, not a holiday.

So when you hear *su destino es la capital*, the sentence has two readings, and only context tells you whether the person is flying there or has been assigned there. Fixing a plane's endpoint and fixing an officer's post are the same act of *dēstināre*: putting something firmly where it will be.

What you've built

You can name where the journey ends: *el destino*.

Your turn

Say these aloud:

- *el destino*
- *nuestro destino*
- *un destino de vacaciones*

Before you move on

What did *dēstināre* mean? (To make firm, to fix a thing in place.) And name the third sense of *destino*, the one English *destination* has no room for. (A job posting or duty station — the Academy's *empleo*. Fate is the other.)

392.4 el pasajero — an adjective that was given a seat

Say *the holidays*, then *the destination*. (*Las vacaciones*; *el destino*.)

What to know first

- el pasaporte — the same *pasar*, at the gate.
- billete — what this person is holding.

Sounds you'll need

- *pa-sa-JE-ro*, four beats with the weight on the third. The *j* is a rough throat sound, further back than English *h*. The single *r* between vowels is a light tap rather than a roll, and both *s* stay clear and hissed. → pronunciation reference

The word, taken apart — and its English cousins

el pasajero — "the passenger." Built in three moves, each one visible. **Pasar**, to pass, goes back through Vulgar Latin **passāre** to Latin **passus**, a step — the stride of a marching legion. Add *-aje* and you get **pasaje**, a passing, a crossing, a fare. Add *-ero*, the ending for the person who deals in a thing, and you get *pasajero*: the one making the crossing.

The middle piece has a passport of its own. **-aje** came in from Old French **-age** and Occitan **-atge**, and it lives in Spanish beside its inherited twin **-azgo**, the ending the language grew at home. So *pasaje* is not a purely native build: Latin stem, borrowed ending, arriving early — Corominas has *pasaje* by 1309 and *pasajero* by Nebrija.

Two traps, and both repay the attention.

The first is what kind of word this is. The Academy's opening sense is not the person at all: *que pasa presto o dura poco* — passing quickly, lasting little. Fleeting. *Un dolor pasajero* is a pain that goes away. Even the traveller senses are filed as that same adjective, doing duty as a noun. A passenger, in Spanish, is a *passing one* who has been made into a person.

The second is a letter. English **passenger** carries an *n* that was never in the word — *passager* picked it up in the early fifteenth century, in company with **messenger**, **harbinger** and **scavenger**, which all did the same thing. Etymonline's account of why is honest and short: it was done "for no apparent reason except that people liked to say it that way." Spanish never caught the habit. *Pasajero*, never *pasanjero*. English keeps the rest of the family in **passage**, **pass**, **pace** and **compass**.

What you've built

You can name who is travelling: *el pasajero*.

Your turn

Say these aloud:

- *el pasajero*
- *los pasajeros*
- *el pasajero y su destino*

Before you move on

What is the Academy's first sense of *pasajero*? (Fleeting, short-lived — an adjective; the passenger is that adjective made into a noun.) And which letter does English *passenger* carry that Spanish never had? (The *n*.)

392.5 agosto — an emperor with a vowel missing

Say *the destination*, then *the passenger*. (*El destino*; *el pasajero*.)

What to know first

- los meses — the list this one belongs to.
- el calor — what the month brings with it.

Sounds you'll need

- *a-GOS-to*, three beats with the weight on the middle one. The *g* is hard, as in English *go*. The *s* stays clear. The *t* is dental, tongue against the back of the teeth, with no puff of breath after it. → pronunciation reference

The word, taken apart — and its English cousins

agosto — "August."
Latin **Augustus**, the emperor; the month had an older name and was renamed in his honour. This word travelled by mouth, not by book, and it carries the mileage on it in two places.
The first is the stressed vowel. *Augustus* had a *u* there; *agosto* has an **o** — what a word gets from centuries of being spoken. Set beside it the twin that came the other way: Spanish also has **augusto**, the adjective, majestic or lofty, lifted straight off the Latin page, and it still has its *au* and its *u*, both untouched. One Latin word, two Spanish descendants: *agosto* out of the mouth, *augusto* out of the book.
The second is a genuine puzzle. The opening *au* should not have come out as *a*. Look at what happened to its neighbours:

- Latin *causa* gave Spanish **cosa**;

- Latin *taurum* gave Spanish **toro**.

On that showing, *Augustus* ought to have produced *ogosto*. It did not, because Spanish never started from *Augustus*. It started from **agustus**, a Vulgar Latin form attested from the mid-to-late first century CE, in which the *au* had already given way to *a* under the pull of the *u* in the next syllable. Catalan and Occitan **agost** point back to that same starting line, and Corominas dates the Spanish word to 1192.
One thing stays open. What the name *Augustus* meant to begin with is disputed — consecrated by the augurs, perhaps; or built on *augeo*, to increase. Two respectable answers, and no settled verdict between them.

What you've built

Five words and a journey: *el aeropuerto*, *las vacaciones*, *el destino*, *el pasajero*, *agosto*.

Your turn

Name five things about a journey, and say one thing about each.
Say these aloud:

- *el aeropuerto — el aeropuerto es grande*
- *las vacaciones — estoy de vacaciones*
- *el destino — mi destino es la ciudad*
- *el pasajero — el pasajero tiene su billete*
- *agosto — en agosto hace calor*

Before you move on

Which Spanish word kept the *au* and the *u* of *augustus*? (*Augusto*, the adjective — the copy that came off the page.) And why does *agosto* not begin like *cosa* and *toro*? (Because Spanish started from the attested Vulgar Latin *agustus*, whose *au* had already become *a*.)

Chapter 393

Five Things a Form Asks For

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can say el ordenador, internet, el correo electrónico, la dirección and la nacionalidad, and name five things I need to fill in a form online.
>
> *Complete ES-C393-nacionalidad: name five things I need to fill in a form online, and say one thing about each.*

393.1 el ordenador — the word stayed, the meaning arrived

Say *the passenger*, then *August.* (*El pasajero*; *agosto.*)

What to know first

- escribir — what you do at one.
- la oficina — where you will most often see one.

Sounds you'll need

- *or-de-na-DOR*, four beats with the weight on the last. Both *d*s are soft, closer to the *th* of English *this* than to a hard *d*, because a vowel runs into each of them. The two *r*s are single taps, not rolls. → pronunciation reference

The word, taken apart — and its English cousins

el ordenador — a computer.
Latin **ōrdinātor** was an agent noun — a *-tor* word, the one who does the thing — built on **ōrdināre**, and behind that on **ōrdō, ōrdinem**: a rank, a row, things put in their proper places. So the word says *the one who puts in order*, and English carries the same Latin in **ordain**, **ordinal**, **order**, **coordinate** and **subordinate**.
Now the careful part, because two different things happened at two different times and running them together is the mistake.

- The **word** *ordenador*, "one who orders or arranges", is old in Spanish and came down from that Latin.
- The **computing sense** was taken from French **ordinateur**.

Spanish already owned the shape and imported only the meaning. Nothing was borrowed letter by letter, and nothing was translated piece by piece; a sense moved across and settled into a word that was standing there waiting.
The French side has two dates, both defensible, so say which one you mean. The coinage appears in a **letter of 16 April 1955**, written for IBM France, who thought *calculateur* too narrow for the machine. The CNRTL dates the computing sense to **1956** — the first use actually recorded.
One caution before you take it travelling. The Academy's dictionary marks the computing sense **Esp.**, for Spain. Across much of Latin America the machine goes by *computadora* or *computador*, so *ordenador* names it in Madrid and marks you as speaking Peninsular Spanish in Lima.

el ordenador nuevo — the new computer.

What you've built

You can name the machine you fill forms in on: *el ordenador*. And you can tell a borrowed word from a borrowed meaning.

Your turn

Say these aloud:

- *el ordenador*
- *un ordenador nuevo*
- *el pasajero tiene un ordenador*

Before you move on

What did *ōrdinātor* name in Latin? (The one who puts things in order.) And which of the two — the word or the machine sense — came from French? (The machine sense; the word was already Spanish.)

393.2 internet — the same letters, a different beat

Say *August*, then *the computer*. (*Agosto*; *el ordenador*.)

What to know first

- el ordenador — what you reach it from.
- el teléfono — the other thing you reach it from.

Sounds you'll need

- *in-ter-NET*, three beats with the weight on the last. The *t*s are dental, the tongue touching the back of the top teeth rather than the ridge behind them. The *r* is one tap. → pronunciation reference

The word, taken apart — and its English cousins

internet — the internet.
It came into Spanish out of English with nothing changed on the page. The English word is a hybrid, and the two halves come from opposite ends of Europe:

- **inter-** is Latin **inter**, "between" — the same piece inside *international* and *intervene*;
- **net** is Germanic, Old English **nett**, a mesh of knotted cord.

A Latin prefix welded to a Germanic noun, in a coinage of the last century.
The page is unchanged; the sound is not, and this is the thing worth carrying away. English puts the weight at the front: *ÍN-ter-net*. Spanish puts it at the back: **in-ter-NET**. The Academy's *Diccionario panhispánico de dudas* spells this out. An English speaker who keeps the English beat will be understood and will sound foreign for exactly one syllable's worth of reason.
The same dictionary is candid about the article, which is unsettled. Both *el internet* and *la internet* are recorded, and the **feminine is the more frequent** of the two — the pull coming from *red*, the Spanish word for a net, which is feminine. So the word is drifting toward the gender of its own translation.
Two more things it records. Written with a capital when it names the one global network; written small when the word works as an ordinary noun. And the shape resists two temptations: no *internete* with a vowel tacked on to make it comfortable, and no tilde anywhere on it.

todo está en internet — it is all on the internet.

What you've built

You can say *internet* with the Spanish beat, and you know why the article wobbles.

Your turn

Say these aloud:

- *internet*
- *el ordenador tiene internet*
- *en agosto no tengo internet*

Before you move on

Which syllable carries the weight in Spanish? (The last: *in-ter-NET*.) And which article does the Academy record as the more frequent, and why? (The feminine, pulled there by *red*, which is feminine.)

393.3 el correo electrónico — the messenger who only looks like a runner

Say *the computer*, then *the internet*. (*El ordenador*; *internet*.)

What to know first

- la carta — what it replaced.
- internet — what it travels over.

Sounds you'll need

- *co-RRE-o e-lec-TRÓ-ni-co*. The *rr* is rolled, held longer than a single tap. Every *c* here comes out as a hard *k*, each standing before an *o* or a consonant. *Correo* takes its weight on the middle beat; the written accent marks where *electrónico* takes its own. → pronunciation reference

The word, taken apart — and its English cousins

el correo electrónico — email.
Correo sits one letter from **correr**, "to run", and a messenger runs, so the story writes itself. The story is wrong, and that is the point of this word.
The Academy's dictionary gives the road. Spanish **correo** comes from Catalan **correu**, and Catalan took it from Old French **corlieu**, "a messenger" — a compound of a verb meaning *to run* plus **lieu**, "place". Catalan then reshaped it under the pull of its own *córrer*.
So Latin **currere**, "to run", really is the ancestor of that first element. But *correo* was not built in Spanish out of *correr*, and part of the resemblance is a later tidying-up rather than descent. Right about the ancestor, wrong about the route.
Now the best thing in the word. That same Old French *courlieu* gave English a bird: the **curlew**. Etymonline says the bird's name imitates its cry — and that it was "apparently assimilated with *corliu*, 'runner, messenger'". Two unrelated ancestries, a call heard on a marsh and a word for a courier, walked into Old French and came out wearing one shape.
From *currere*, English keeps **current**, **courier**, **course**, **corridor**, **occur** and **excursion**.

The second half is far younger. *Electrónico* is *electrón* plus *-ico*, and *electrón* goes back to Ancient Greek **ēlektron**, "amber". A modern international scientific word, passed between languages rather than handed down inside one.
Put the halves together and you have a loan translation of English *electronic mail*, element for element. The Academy recommends the full form and turns down *correo-e*.
One ambiguity to expect: *correo* alone now carries the email sense in ordinary speech, so it can mean the post or the inbox.

What you've built

You can name the thing a form asks for: *el correo electrónico*.

Your turn

Say these aloud:

- *el correo electrónico*
- *mi correo electrónico*
- *leo el correo electrónico en el ordenador*

Before you move on

Did *correo* grow out of *correr*? (No — it came through Catalan *correu* from Old French *corlieu*, a messenger, and *córrer* only reshaped it afterwards.) Which English bird shares that word? (The curlew.)

393.4 la dirección — the word for where you live

Say *the internet*, then *email*. (*Internet*; *el correo electrónico*.)

What to know first

- la calle — the first line of one.
- el número — the second line of one.

Sounds you'll need

- *di-rec-CIÓN*, three beats with the weight on the last, where the written accent puts it. The double *cc* is two different sounds in a row: a hard *k*, then a soft *c* before the *i*, an *s* across the Americas and a *th* across much of Spain. The *r* is a single tap. → pronunciation reference

The word, taken apart — and its English cousins

la dirección — an address.
Behind it is Latin **dīrēctiō, dīrēctiōnem**. What is worth seeing is that this word did not come down to Spanish through everyday speech; it was lifted out of written Latin, later and deliberately. You do not have to take that on trust, because Spanish kept both outcomes side by side, twice over.
Look at what happened to Latin **dīrēctus**:

- **derecho** — "right, straight";
- **directo** — "direct".

And at what happened to Latin **ratiōnem**:

- **razón** — "reason";
- **ración** — "a ration, a portion".

Each pair is one Latin word arriving twice. In each pair, one member has been handled by generations of speakers and shows it, and the other still looks close to the Latin it was copied from. Now put our word beside them. Where *derecho* melted its Latin *c* away into *-ch-*, *dirección* still shows that *c*. And it ends **-ción**, as *ración* does, rather than **-zón**, as *razón* does. It stands with the copies, not with the worn ones.
The real trap here is the meaning. Spanish **dirección** covers three things:

- the **address** where you live or receive post;
- the **management** or leadership of a company or a school;
- **direction**, the way something points.

English *direction* has only the third. A Spaniard who *trabaja en la dirección* works in management, not in a compass. On a form, the first sense is the one being asked for.
English holds the same Latin in **direction**, **direct**, **dress**, **address** and **redress**.

¿Cuál es tu dirección? — What is your address?

What you've built

You can give the line of a form that asks where you live: *la dirección.*

Your turn

Say these aloud:

- *la dirección*
- *mi dirección y mi correo electrónico*
- *busco la dirección en internet*

Before you move on

Which of *derecho* and *directo* does *dirección* resemble, and which of *razón* and *ración*? (*Directo*, and *ración.*) What does *dirección* mean on a form? (The address where you live.)

393.5 la nacionalidad — a word built at home on a borrowed floor

Say *email*, then *the address.* (*El correo electrónico*; *la dirección.*)

What to know first

- el país — what it names you by.
- el apellido — the line above it on the form.

Sounds you'll need

- *na-cio-na-li-DAD*, five beats with the weight on the last. The *c* before *i* is soft — an *s* across the Americas, a *th* across much of Spain — and *cio* is one beat, the *i* gliding into the *o*. Both *d*s are soft, the final one barely there. → pronunciation reference

The word, taken apart — and its English cousins

la nacionalidad — nationality.
Assembled in Spanish rather than imported: *nacional* plus **-idad**, the ending that turns a description into the quality itself.
The borrowing sits one floor down, in **nación**. That came from Latin **nātiō, nātiōnem**: *a birth*, then *the place of birth*, then *a people*.
Corominas dates *nación* to the **fifteenth century** — late, and lateness is the tell for a word taken from books rather than speakers.
Set it beside **razón**, "reason", which came down the long way, through mouths. Both Latin ancestors ended alike; the two Spanish words do not. *Razón* has been worn smooth. *Nación* still has its Latin face on.
There is a limit to what can be claimed for the modern political sense. Etymonline notes that English *nationality* is "in some usages perhaps from French *nationalité*", and nineteenth-century French influence on the Spanish sense is plausible — and unsettled. Hold it loosely at the top, firmly at the root.
English relatives run wide: **nation**, **native**, **nature**, **innate**, and further back **genus** and **genesis**.
One more sense exists. In Spain, *nacionalidad* also names an autonomous community whose statute recognises a special historical and cultural identity.

¿Cuál es tu nacionalidad? — What is your nationality?

What you've built

You can fill in a form online end to end: the machine, the network, the address that reaches you, the address you live at, and where you are from.

Your turn

Name the five things you need to fill in a form online, and say one thing about each.

Say these aloud:

- *el ordenador — el ordenador es nuevo*
- *internet — el ordenador tiene internet*
- *el correo electrónico — mi correo electrónico es corto*
- *la dirección — mi dirección está en esta calle*
- *la nacionalidad — mi nacionalidad está en el pasaporte*

Before you move on

Was *nacionalidad* borrowed, or built? (Built in Spanish, from *nacional* plus *-idad*; the borrowing is *nación* underneath it.) And which word shows the other road out of Latin? (*Razón* — worn down by speech, where *nación* was copied from the page.)

Chapter 394

Five Places and Things in a Week

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can say la universidad, el trabajo, la actividad, la guitarra and el médico, and name five places I go or things I do in a week.
>
> *Complete ES-C394-medico: name five places I go or things I do in a week, and say one thing about each.*

394.1 la universidad — a body of people, before it was a place

Say *the address*, then *the nationality.* (*La dirección*; *La nacionalidad.*)

What to know first

- el estudiante — who the word was named after.
- la escuela — the other place you go to learn.

Sounds you'll need

- *u-ni-ver-si-DAD*, five beats with the weight on the last. The opening *u* is *oo*, not the English *you-*. The *v* comes out as a *b*. The *s* stays a clean hiss, and the final *d* is soft, nearer the *th* of *the*. → pronunciation reference

The word, taken apart — and its English cousins

la universidad — "university."
Latin **ūniversitās** — and the meaning to hold onto is not the one the shape tempts you into. In Roman and medieval law a *ūniversitās* was a **body of people**: a corporation, a guild, a company treated as one thing. A trade guild was a *universitas*. So was a town council.
A medieval university got its name the same way — after the people in it, not after the breadth of what they studied. On the exact phrase the references part company. Corominas shortens it from *universitas scholarium*, the guild of students. Etymonline gives *universitas magistrorum et scholarium*, of masters and students. Take the shape and leave the sentence: what got named was an association of its members.
The pieces: **ūnus**, one, plus **versus**, the turned form of **vertere**, to turn. *Ūniversus* is *turned into one*, many things faced the same way. English holds that in **universe** and **universal**; *vertere* alone hands over **verse**, **version**, **convert**, **reverse**, **divorce** and **vertigo**.
Two dates carry the argument better than any reasoning could.

- **1490**, Alfonso de Palencia — the earliest Spanish *universidad* on record. It means **totality**, the whole of a thing. No school in sight.
- **1505** — the school sense appears, and cannot stand on its own. What was written is *universidad de estudio*, a *universidad* **of study**.

That second date is the tell. A word already meaning "the whole of knowledge" would have needed no such help.

What you've built

You can name where you study: *la universidad*.

Your turn

Say these aloud:

- *la universidad*
- *estudio en la universidad*

- *la universidad es grande*

Before you move on

What kind of thing was a Latin *ūniversitās*? (A body of people — a corporation or guild, held together as one.) And what did the first Spanish *universidad*, in 1490, mean? (Totality. The school sense came fifteen years later, needing the phrase *universidad de estudio* to say so.)

394.2 el trabajo — a word with an asterisk in the middle of it

Say *the nationality*, then *the university*. (*La nacionalidad*; *La universidad*.)

What to know first

- trabajar — the doing word this is cut from.
- la semana — the stretch you measure it in.

Sounds you'll need

- *tra-BA-jo*, three beats with the weight on the middle one. The *r* is one quick tap of the tongue, not the English glide. The *b* between vowels is soft, the lips never quite closing. The *j* is the throaty *jota*, scraped at the back. → pronunciation reference

The word, taken apart — and its English cousins

el trabajo — "work"; also "a job", and a piece of work you hand in. Corominas dates it in Spanish to **1212**. Behind it sits Vulgar Latin **tripaliāre**, "to torture", on Late Latin **tripalium**, an instrument of torture. Told properly it has an asterisk in the middle, and the asterisk is where the honesty lives.

The instrument is real. *Tripalium* is on record, spelled **trepalium**, in the Councils of Auxerre and Mâcon. The Auxerre canon of **578** forbids a priest or deacon to stand *ad trepalium, ubi rei torquentur* — at the *trepalium*, where the accused are tortured. Somebody wrote that down because it stood in a real place.

***Tripaliāre* is not.** The form that would mean "to torture with one" carries an asterisk in the Academy's dictionary and in Corominas alike: reconstructed backwards from its descendants, because no surviving text holds it. Two claims, two grades of evidence, worth keeping apart. What saves the story from being a good line is that the middle of it is documented too:

- Old Spanish *trabajo* — **suffering, pain**;
- Old Spanish *trabajarse* — **to strive**;
- the **labour** sense — only from the **fourteenth century**;
- and the Academy today still carries a sense *penalidad, molestia, tormento.*

Torture, suffering, striving, work. Nobody had to guess a link.
One step further up goes soft. *Tripalium* from **tripalis**, "having three stakes", is called darkly suggestive with its exact notion obscure.
Hedge the three stakes; the descent of *trabajo* itself stands.
And refuse the moral. None of this says how Spanish speakers feel about Monday. English **travail** is the same word, **travel** its doublet, and nobody calls a holiday agony.

What you've built

You can name what you do for a living: *el trabajo.*

Your turn

Say these aloud:

- *el trabajo*
- *voy al trabajo*
- *el trabajo y la universidad*

Before you move on

Which part of the story is attested and which is reconstructed?
(*Trepalium* is written down in a canon of 578; **tripaliāre** carries an

asterisk in both the Academy and Corominas.) And what did *trabajo* mean in Old Spanish? (Suffering, pain — the work sense only from the fourteenth century.)

394.3 la actividad — the cluster that never wore down

Say *the university*, then *the work*. (*La universidad*; *El trabajo*.)

What to know first

- hacer — what you do with one.
- la clase — where you will meet the word most often.

Sounds you'll need

- *ac-ti-vi-DAD*, four beats with the weight on the last. The *c* is a hard *k*, and it lands — *k* and *t* back to back. The *t* is dental, tongue against the teeth rather than the ridge behind them. The *v* comes out as a *b*, and the final *d* is soft. → pronunciation reference

The word, taken apart — and its English cousins

la actividad — "activity": something you do, and the state of being at it.
Latin **agere** was to drive, to set in motion, to do. From it **āctīvus**, and from that **āctīvitās**. English carries the root in **activity**, **active**, **act**, **agent**, **agile**, **exact** and **agenda**.
Now the part worth stopping on, because the word wears its own history on the outside. Put these three beside each other and look at the middle:

- *factum* → **hecho**
- *lactem* → **leche**
- *āctīvitās* → **actividad**

Two of those went down through mouths for centuries and came out with their *-ct-* rubbed into a *-ch-*. The third still has both letters, and

you can still hear both of them land. It did not travel that road; it was lifted off a written page long after the wearing had stopped.
Do not try to argue the same thing from the *-dad* ending — it proves nothing. Words that did come down by mouth arrive at *-dad* as well: *bonitātem* gives **bondad**. The ending is silent about which road a word took. The cluster is the witness.
Two cautions about the Latin, and neither is small.
āctīvitās is not Cicero's word. It is Medieval Latin, coined by the Scholastics for their own arguments. Writing it out with Classical macrons, as above, flatters it into an age it never had.
And the last stretch is dark. Whether Spanish took *actividad* straight off the Latin page or through French *activité* is unverified. The root is certain, the arrival is not.

What you've built

You can name a thing you do with your time: *la actividad.*

Your turn

Say these aloud:

- *la actividad*
- *una actividad nueva*
- *hago una actividad*

Before you move on

What happened to the *-ct-* of *factum* and *lactem*, and what happened to the one in *activ-*? (The first two wore down to *-ch-* in *hecho* and *leche*; *activ-* kept both letters, because it came off the page.) Does the *-dad* ending help you tell? (No — *bonitātem* reaches *bondad* by mouth.)

394.4 la guitarra — one Greek word, three disputed roads

Say *the work*, then *the activity.* (*El trabajo*; *La actividad.*)

What to know first

- tocar — what you do to one.
- la cuerda — what it is strung with.

Sounds you'll need

- *gui-TA-rra*, three beats with the weight on the middle one. The *gu* before an *i* is a hard *g* and nothing more — *ghee*, not *gwee*; the *u* sits there to keep the *g* hard and is not pronounced. The *t* is dental. The *rr* is rolled, held a moment longer than a tap. → pronunciation reference

The word, taken apart — and its English cousins

la guitarra — "guitar."
It starts in Ancient Greek: **kithára**, *kithára*, a stringed instrument — not this one, but an ancestor of the idea. Its first documented Spanish use is in Juan Ruiz, and it is a fine entrance: he already needs two kinds side by side, *guitarra morisca* and *guitarra latina*.
Between the Greek and the Spanish, the references stop agreeing. This is one of those words where the honest answer is the disagreement itself.

- **The Academy's dictionary** takes it from an **Arabic** form, and that from an **Aramaic** one, and that from the Greek.
- **Corominas** has the Arabic form coming **straight from Greek** — no Aramaic step at all; that step is the Academy's addition. And he places the borrowing **in the East, not by way of Spain**: *el vocablo no pasó de Europa a los árabes por España*. His evidence sits inside the word — the Greek accentuation survives, and so does the hard *k* at the front.
- **Etymonline** routes it through **French** and Latin **cithara** with **no Arabic step whatever**, and adds the sting: the Arabic word may itself have come *from* Spanish or Greek, the relationship often being stated the other way round.

That last one does not only doubt the route. It doubts which direction the word was travelling.

So hold the Greek and let the middle stay open. What nobody argues about is the family that came out the far end. English **guitar**, **cithara**, **zither**, **cittern** and **gittern** are one Greek word wearing five coats, and Spanish keeps **cítara** and **cítola** standing beside *guitarra*.

What you've built

You can name the instrument: *la guitarra*.

Your turn

Say these aloud:

- *la guitarra*
- *toco la guitarra*
- *tocar la guitarra es una actividad*

Before you move on

Which part of the *guitarra* story is settled and which is not? (The Greek *kithára* is settled; the road after it is disputed — the Academy through Arabic and Aramaic, Corominas through Arabic with no Aramaic, and etymonline through French with no Arabic at all, doubting even the direction.) What does the *u* in *gui-* do? (Keeps the *g* hard. It is not pronounced.)

394.5 el médico — three beats that never wore down

Say *the activity*, then *the guitar*. (*La actividad*; *La guitarra*.)

What to know first

- el hospital — where you find one.
- la cita — what you make to see one.

Sounds you'll need

- *MÉ-di-co*, three beats with the weight right back on the first, which is what the written mark over the *e* is there to do. The *d* between vowels is soft, nearer the *th* of *the*. The *c* is a hard *k*. → pronunciation reference

The word, taken apart — and its English cousins

el médico — "doctor": the person, and the profession.
Latin **medicus**, a physician, from **medeor**, to heal. English holds the family in **medic**, **medical**, **medicine** and **remedy**.
What is interesting about *médico* is how little happened to it. Count what survived: three beats, all present; a *d* still between its vowels; a *c* still landing as a hard stop. Nothing worn off anywhere.
Set it against a word that did go down through mouths. Catalan inherited the same *medicus* by ordinary descent and came out with **metge** — middle beat gone, the hard *c* softened. Occitan **mètge** and archaic French **mège** show the same wear. *Médico* has none of it: lifted off a written page instead, late and intact.
An older root sits behind *medeor*, independently supported by **modus**, **moderate** and **meditate**. Take care with it: glossing that root as "measure" and then offering a doctor's judgement as proof argues in a circle. The conclusion was smuggled into the gloss.
One thing to hear rather than be told. These three aloud, one after another:

- **médico**
- **medico**
- **medicó**

Same letters, three different words: the doctor, then *I medicate*, then *he medicated*. Nothing changed but where the weight landed — and the written mark moved with it.
Médico does double duty: it names the person, and describes what belongs to the profession — *un centro médico*, a medical centre.

What you've built

You can name the doctor: *el médico*. And with it, five places you go or things you do in a week.

Your turn

Say these aloud:

- *el médico*
- *voy al médico*

Now all five together. Name five places you go or things you do in a week, and say one thing about each.

Say these aloud:

- *la universidad — estudio en la universidad*
- *el trabajo — voy al trabajo*
- *la actividad — hago una actividad nueva*
- *la guitarra — toco la guitarra*
- *el médico — tengo una cita con el médico*

Before you move on

What does Catalan *metge* show that *médico* does not? (Wear — a lost middle beat and a softened *c*; *médico* came off the page intact.) And what separates *médico*, *medico* and *medicó*? (Only where the weight lands.)

Chapter 395

Five Everyday Actions

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say entrar, volver, llegar, perder and necesitar, and name five everyday actions.
>
> *Complete ES-C395-necesitar: name five everyday actions, and say one thing about each.*

395.1 entrar — the vowel that tells you how the word travelled

Say *the guitar*, then *the doctor*. (*La guitarra*; *el médico*.)

What to know first

- la puerta — what you go through.
- la entrada — the noun standing beside this verb.
- salir — the other direction.

Sounds you'll need

- *en-TRAR*, two beats with the weight on the second. Both *r*'s are one quick tap of the tongue, not the long English *r*. → pronunciation reference

The word, taken apart — and its English cousins

entrar — "to go in."
Latin **intrāre**, "to go into," built on **intrā**, "within."
The mark worth keeping is the first vowel. Latin's short **i** came down to Spanish as **e**, so *intrāre* surfaced as **entrar**. That happened to words carried in the mouth, generation to generation, with nobody consulting a page.
Set it against a word that *was* consulted from a page. The prefix **intra-** turns up in Spanish with its Latin *i* intact — *intravenoso*, *intramuros* — because it was lifted out of written Latin long afterwards and had no journey to change it. Same Latin *intrā*, two different routes, two different vowels.
English took the verb the long way round too, through Old French, and got **enter** — with the same lowered vowel. Beside it sit **entrance**, and the bookish **interior**, which kept its *i* for the same reason *intravenoso* did.
One thing English will not hand over: the grammar. English says *enter the room* with nothing in between. Spanish puts a small word there.

- *entrar* ***en*** *la habitación* — across Spain;
- *entrar* ***a*** *la habitación* — across much of Latin America.

Neither is the careless one. The verb points at a direction; the little word attaches the place.

What you've built

You can now name the action: *entrar*. And you can read an initial *entr-* as the fingerprint of a word that came through speech.

Your turn

Say these aloud:

- *entrar*
- *entrar en la casa*
- *la puerta*

Before you move on

What became of the short *i* of Latin *intrāre*? (It dropped to *e*.) So why does *intravenoso* still show an *i*? (It came out of written Latin long after the change had finished.)

395.2 volver — the o that breaks in two

Say *the doctor*, then *to go in*. (*El médico*; *entrar*.)

What to know first

- la vuelta — the noun that came out of this verb.
- la puerta — the same *o*, the same break.
- volar — the near neighbour that is not a relative.

Sounds you'll need

- *bol-BER*, two beats with the weight on the second. Both *v*'s are the soft Spanish *b*; the *ue* of *vuelvo* is a quick *weh*. → pronunciation reference

The word, taken apart — and its English cousins

volver — "to return."
Latin **volvere** meant "to roll," on a very old root meaning "to turn." English borrowed the Latin verb several times over and kept the rolling in every one: **revolve**, **involve**, **evolve**, a **volume** (a rolled scroll), a **vault** (a rolled arch).
Now listen to what happens when the stress lands on that *o*:

- *vuelvo*, *vuelves*, *vuelve* — the *o* has broken into *ue*.

That break reaches words carried down by mouth and leaves alone the ones lifted off a page. *Volumen* and *revolución* came out of books; their *o* sits still. The same break already sits in *puerta*, from Latin *porta*.
The spelling has a wrinkle. Old Spanish wrote the verb **bolver**, with a *b*, and that was the honest spelling for what people said. The modern *v* is a later respelling aimed back at Latin *volvere* — a change of ink, not of sound.

Three things to keep apart:

- **revolver**, "to stir," really is *re-* plus this verb, and it breaks the same way: *revuelvo*.
- **revólver**, the firearm, is a separate word, borrowed from English in modern times. The stress has moved and an accent is written on it; that is the tell.
- **volver a** followed by another verb means doing that thing over — *vuelvo a entrar*, "I go in again." No piece has been added to *volver*. The pattern is an idiom, not a build.

And *volar*, "to fly," is a stranger. Close in shape, unrelated in descent.

What you've built

You can now name the action: *volver*. And you can hear a broken *o* as the sound of a word that never went through a book.

Your turn

Say these aloud:

- *volver*
- *vuelvo*
- *entrar y volver*

Before you move on

What does the *o* do when the stress lands on it? (It breaks into *ue* — *vuelvo*.) And is *revólver*, the firearm, this same word? (No — a modern borrowing from English, with its stress moved and an accent written on it.)

395.3 llegar — a ship brought to shore

Say *to go in*, then *to return*. (*Entrar*; *volver*.)

What to know first

- el barco — where the meaning began.
- lleno — the same *ll-* out of the same *pl-*.
- entrar — what you do after arriving.

Sounds you'll need

- *ye-GAR*, two beats with the weight on the second. The *ll* is the *y* of *yes* across most of the Spanish-speaking world; the *g* is hard, as in *go*. → pronunciation reference

The word, taken apart — and its English cousins

llegar — "to arrive."
Take the secure half first: the **form**. Corominas gives the etymon as Latin **plicāre**, which he treats as a back-formation from the compound *applicāre*.
The sound history holds it up. Latin words beginning **pl-** came into Spanish with **ll-** and into Portuguese with **ch-**:

- **lleno** / *cheio*;
- **lluvia** / *chuva*;
- **llorar** / *chorar*;
- **llegar** / *chegar*.

Now the unsteady half: the **meaning**. Corominas does not bridge it with sails. His bridge is a sailors' phrase the most classical authors used constantly — **applicāre nāvem**, "to bring a ship to shore," *frecuentísimo*, he calls it. The chain runs: to dock, then to arrive by sea, then to arrive anywhere.
He also declines to close the case, allowing in his own entry that there were **probably several semantic origins at once**. The form is settled; the story about the meaning is a probability, offered as one.
Two things to refuse.
The first is the tale you will meet everywhere: *plicāre* meant "to fold," sailors folded their sails on arriving, so folding became arriving. No source argues it. It assumes arrival in order to explain arrival.

The second is a footnote that has escaped into the world. Both Wiktionaries give *applicāre* as the etymon and hang Corominas's name on it. His entry gives *plicāre* as the etymon and *applicāre* only as the source of the sense. The name has travelled further than the claim it belongs to.
In fairness, the competing account is not empty: Spanish **allegar** and Portuguese **achegar** are exactly what *applicāre* should have produced, and both exist. The paper trail is early too — *aplekare* stands in the tenth-century Glosas Silenses, and *llegar* is already in the Cid.
English takes the same root by the borrowed route: **apply**, **imply**, **employ**, **deploy**, **pliant**.

What you've built

You can now name the action: *llegar*. And you have watched a citation outrun the claim it came from.

Your turn

Say these aloud:

- *llegar*
- *llegar a la casa*
- *llegar y entrar*

Before you move on

What did *applicāre nāvem* mean? (To bring a ship to shore.) And what does a Spanish *ll-* at the front of a word often answer to in Portuguese? (*ch-* — *lleno* beside *cheio*, *llegar* beside *chegar*.)

395.4 perder — a second half nobody has settled

Say *to return*, then *to arrive*. (*Volver*; *llegar*.)

What to know first

- la llave — the thing most often lost.

- buscar — what you do afterwards.
- perdón — the look-alike with a different build.

Sounds you'll need

- *per-DER*, two beats with the weight on the second. Both *r*'s are one tap; the *d* is soft, with the tongue against the teeth rather than behind them. → pronunciation reference

The word, taken apart — and its English cousins

perder — "to lose."
Latin **perdere**, "to destroy, to lose," carried down by mouth. Its *-dere* ending came out as *-der* along the regular road, and you can hear the stressed vowel do the familiar thing: *pierdo*, *pierdes*, *pierde* — the *e* has broken into *ie*, the same kind of break you heard in *vuelvo*.
English holds the clean cognate in **perdition** — destruction, loss, total and final.
The front half of the Latin word is not in doubt: **per-**, "through, thoroughly," the piece that pushes a verb to its limit.
The back half is where careful sources part company, and this is the point of the lesson.

- Etymonline reads it as **dare**, "to give" — losing as giving something away completely.
- Wiktionary and de Vaan read it as a **separate element meaning "to put"**, descended from a different old root, the one that also stands behind English *do*.

The two ancient roots are close enough in shape that Wiktionary itself warns they are not always easy to tell apart. So the honest description of *perdere* is: **per-** plus a verbal element whose identity is disputed. Anyone who hands you "per- plus give" flat, with no hedge, has skipped a live argument.
One trap that catches learners. *Perder* and **perdón** look like a matched pair and are not one. *Perdón* rests on *per-* plus **dōnāre**, and *dōnāre* really does come from the "give" root. Same prefix, different second half, and the second half is the whole question.

What you've built

You can now name the action: *perder*. And you have a case where good dictionaries split, and the accurate answer is to name the split.

Your turn

Say these aloud:

- *perder*
- *pierdo la llave*
- *llegar y perder*

Before you move on

What is the front half of *perdere*, and how much of the back half is settled? (*Per-*, "thoroughly"; the back half is disputed — "to give" or a separate element meaning "to put.") Is *perdón* the same build? (No — *per-* plus *dōnāre*, which does rest on the "give" root.)

395.5 necesitar — the word that came in through a book

Say *to arrive*, then *to lose*. (*Llegar*; *perder*.)

What to know first

- necesario — the adjective standing beside it.
- la ayuda — what you most often need.

Sounds you'll need

- *ne-se-si-TAR*, four beats with the weight on the last. The *c* before *e* is a soft *s* across the Americas and a *th* across much of Spain. → pronunciation reference

The word, taken apart — and its English cousins

necesitar — "to need."
This verb arrived by a different door from the others. Medieval Latin had **necessitō**; Spanish took it over from writing, and it is on record here by the seventeenth century — read in late off a page, not handed down mouth to mouth from the Romans. French *nécessiter* is attested a good deal earlier, but no source claims the Spanish came through French, so that stays unsaid.
English draws on the same family: **necessary**, **necessity**, **necessitate**.
Now the interesting part, which is a lesson in reading dictionaries. Inside Latin **necesse**, the two easiest sources answer without blinking. Both parse it as *ne-* plus an element meaning "yielded" or "backing away" — hence the tidy gloss, "that from which there is no yielding." Baldi, writing in 2013, takes that apart. *Necessus*, he says, **has resisted definitive analysis**. The *nec* plus *esse* account is a popular etymology with obvious shortcomings. And the particular *cessus* form the tidy parse leans on does not turn up until the late Imperial period — far too late to be of any value.
Notice how the tidy gloss argues, too: it reads "yielding" out of a reconstructed piece, then offers the word's own sense of the unavoidable back as proof. The conclusion sat in the premise.
So: the **ne-** is secure, and the rest is open. That is the whole of what can be said, and saying it beats borrowing someone else's confidence.
One construction note: this verb takes its object plain — *necesito ayuda*, "I need help." (*Necesitar de* survives in archaic and literary writing.)

What you've built

Five everyday actions: *entrar*, *volver*, *llegar*, *perder*, *necesitar*. And a habit — when a source sounds surer than its evidence, keep the hedge.

Your turn

Name all five actions, one after another, and add one thing you know about each.

Say these aloud:

- *entrar* — and where you go in

- *volver* — and what the *o* does under stress
- *llegar* — and what Portuguese puts at the front instead
- *perder* — and what you lost
- *necesitar* — and what you need

Before you move on

Did *necesitar* come down in speech or in from writing? (In from writing — Medieval Latin *necessitō*, in Spanish by the seventeenth century.) Which piece of *necesse* is secure? (The *ne-*; the second element has resisted definitive analysis.)

Chapter 396

Five More Everyday Actions

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can say aprender, cocinar, preferir, funcionar and reparar, and name five everyday actions.
>
> *Complete ES-C396-reparar: name five everyday actions, and say one thing about each.*

396.1 aprender — the hand closes on it

Say *to lose*, then *to need*. (*Perder*; *necesitar*.)

What to know first

- estudiar — the work you put in.
- la escuela — the building it happens in.

Sounds you'll need

- *a-pren-DER*, three beats with the weight on the last. The *pr* runs together with nothing between the two letters, and each *r* is a light tap of the tongue rather than the English glide. → pronunciation reference

The word, taken apart — and its English cousins

aprender — "to learn."
Latin **apprehendere** meant to seize: *ad-*, toward, plus **prehendere**,

to grasp. Speech wore it down long before Spanish existed — the *-he-* in the middle fell out, leaving **apprēndere**, and the doubled *pp* thinned to one. Those two small losses are the fingerprints of a word that came down a road.

Then Latin handed Spanish the very same verb a second time, copied off a page this time, and the copy landed intact: **aprehender**. Its *-he-* is still sitting there, and that untouched cluster is what tells you which route the word took.

Two arrivals, two jobs, and swapping them is a real error. Police **aprehenden** a suspect. Students **aprenden** a language. The bookish twin kept the seizing; the worn one kept only the metaphor.

And that metaphor is worth defending, because it is not guesswork. Medieval Latin already had the verb meaning to learn — the sense is written down, not inferred from the root by someone who liked the picture. English carries that very sense in **apprentice**, a person who takes hold of a trade.

The plainer English relatives keep the grip: **apprehend**, to seize a person or a meaning; **comprehend**, to take hold of something whole; **prehensile**, of a tail that grasps a branch; and **prey**, the thing seized.

What you've built

You can now name the action: *aprender*. And you can read a preserved *-he-* as a sign that a word arrived off a page rather than down a road.

Your turn

Say these aloud:

- *aprender*
- *necesito aprender*
- *aprender en la escuela*

Before you move on

What did *apprehendere* mean in Latin? (To seize, to grasp.) Which of *aprender* and *aprehender* would a police report reach for, and what marks it as the copy off the page? (*Aprehender* — it kept the *-he-* whole, and it kept the seizing.)

396.2 cocinar — one Latin word, two kitchens

Say *to need*, then *to learn*. (*Necesitar*; *aprender*.)

What to know first

- la comida — what comes out of it.
- la casa — where the room is.

Sounds you'll need

- *co-ci-NAR*, three beats with the weight on the last. One word, both values of the letter *c*: a hard *k* in front of the *o*, and in front of the *i* a soft one — an *s* across the Americas, a *th* across much of Spain. → pronunciation reference

The word, taken apart — and its English cousins

cocinar — "to cook."
The verb is young and the room is old. Underneath it sits **cocina**, the kitchen, which is Latin **coquīna**, from **coquere**, to cook. Corominas finds *cocina* in Spanish by the year 947 and puts no mark against it — no suggestion it was lifted out of a book. It came down by mouth, like the food.
The *qu* of *coquīna* had a *w*-colour in it, and Latin lost that colour in front of a back vowel. What is left is the plain *c* of *cocina*.
Now the fact worth carrying away. English **kitchen** is that same Latin noun. Germanic speakers borrowed it early, out of an everyday Latin form reconstructed as *cocina*, and Old English wrote it **cycene**; English mouths turned that into *kitchen*. Spanish, meanwhile, kept the room close to its Latin shape. Two peoples took one word in opposite directions and neither can hear the other in it. **Cook** is the same family — Old English *coc*, from Latin **coquus** — and **cuisine** is the same room once more, come round by way of French.
One caution about the verb, and one about the neighbours.
Cocer and **cocinar** are not swaps for one another. *Cocer* is the old inherited verb for a particular process, boiling or baking a thing. *Cocinar* is the newer one built on the room, and it covers the whole activity.
And *coco*, *cocaína* and *cochino* have nothing to do with any of this.

They merely start the same way.

What you've built

You can now name the action: *cocinar*. And you know one Latin noun that reached English and Spanish by separate roads and surfaced as *kitchen* in one and *cocina* in the other.

Your turn

Say these aloud:

- *cocinar*
- *aprender a cocinar*
- *necesito cocinar hoy*

Before you move on

Which English word is *cocina* in other clothes? (*Kitchen* — Old English *cycene*, borrowed early from Vulgar Latin.) And which of *cocer* and *cocinar* names the general activity? (*Cocinar*; *cocer* names a process, boiling or baking.)

396.3 preferir — a verb Spanish never inherited

Say *to learn*, then *to cook*. (*Aprender*; *cocinar*.)

What to know first

- gustar — the neighbour that says what pleases you.
- elegir — the neighbour that acts on it.

Sounds you'll need

- *pre-fe-RIR*, three beats with the weight on the last. The *pr* runs together with nothing between the letters, and each *r* is a light tap. Said of yourself, the middle beat comes out differently: *pre-FYE-ro*. → pronunciation reference

The word, taken apart — and its English cousins

preferir — "to prefer."
Latin **praeferre** is *prae-*, in front, plus **ferre**, to carry. To carry one thing in front of another is to put it first, and putting a thing first is what preferring has been ever since.
This verb came out of a book, and for once the evidence is airtight. Latin *ferre* was irregular — one of the ragged verbs every Latin student meets — and Spanish inherited nothing from it. Not one verb. Yet Spanish has a shelf of them: *preferir*, *referir*, *transferir*, *conferir*, *diferir*. A family with no ancestor in the language is a family of imports, and the tell is that they arrived as a set and were all handed to the same *-ir* class on the way in. *Preferir* is first documented in 1490, in Alfonso de Palencia.
Now set its forms side by side and watch the middle beat:

- **preferir** — the bare verb;
- **prefiero** — what I do;
- **prefieres** — what you do.

That *e* turning into *ie* is worth a thought rather than a label. An inherited sound change is out of the question here: it would have run its course centuries before 1490, and there was no Spanish *ferre* for it to run on. The *ie* must have come from somewhere else — most plausibly the newcomer falling in with native verbs already built that way, *sentir* and *siento* among them. That is reasoning, though, not a finding: no source consulted here states it. Hold it loosely.
The English relatives are **prefer** and **preference**. Behind them, *ferre* is the same ancient root as English **bear**, which is why **refer**, **transfer**, **differ**, **suffer** and **fertile** belong to the household.

What you've built

You can now say what you prefer: *preferir*. And you can treat a whole set of verbs landing together in one class as evidence of where they came from.

Your turn

Say these aloud:

- *preferir*
- *prefiero cocinar*
- *prefiero aprender en casa*

Before you move on

Why is *preferir* certain to be a borrowing? (Latin *ferre* left Spanish no inherited verb at all, and the whole *-ferir* set arrived together in one class.) And is the *ie* of *prefiero* an inherited sound change? (No — and the account offered here, falling in with *sentir* and *siento*, is reasoning rather than a finding.)

396.4 funcionar — the machine works, the doctor does not

Say *to cook*, then *to prefer*. (*Cocinar*; *preferir*.)

What to know first

- el teléfono — a thing that does this or fails to.
- trabajar — the word for people, kept separate.

Sounds you'll need

- *fun-cio-NAR*, three beats with the weight on the last. The *cio* is one glide and not two beats: a soft *c* before the *i*, then straight out into the *o*. → pronunciation reference

The word, taken apart — and its English cousins

funcionar — "to work," said of a thing rather than a person. Underneath it is **función**, and under that Latin **fūnctiō**, accusative **fūnctiōnem** — a carrying-out, the discharging of a duty — from the verb **fungī**, to perform. A Roman's *fūnctiō* was an office done properly. A Spanish machine's *función* is the job it exists to do, and *funcionar* is that job actually getting done.
Look at the *-ct-* that Latin wrote in the middle of *fūnctiōnem*, because it is a passport stamp. Latin clusters of that shape, carried down by

mouth, come out of Spanish as *ch*:

- *factum* → **hecho**;
- *noctem* → **noche**.

Had *fūnctiōnem* walked that same road, Spanish would be saying something like *fuchón* today. It says *función*. The cluster survived because the word never made the journey — it was copied out of written Latin long after the mouths had finished their work.

One claim to hold at arm's length. You will meet the assertion that *funcionar* came into Spanish from French *fonctionner*, a nineteenth-century import. It may have. Neither route consulted for this lesson mentions French at all, and nothing here could test it, so it stays a claim rather than a fact. French mediation *is* documented for the English word — but that is a different language's history, and it settles nothing about this one.

The trap is a live one. **El coche funciona** — the car works. **El médico trabaja** — the doctor works. *El médico funciona* is wrong, and English hides the difference by using one verb for both.

English holds the same Latin in **function**, in **defunct**, and in **perfunctory**.

What you've built

You can now say that a thing works: *funcionar*. And you can read an untouched Latin cluster as proof that a word came off a page.

Your turn

Say these aloud:

- *funcionar*
- *el teléfono funciona*
- *prefiero cocinar en casa*

Before you move on

What would *fūnctiōnem* look like had it come down by mouth? (Something like *fuchón* — that cluster gives *ch*, as in *hecho* and *noche*.) And can you say *el médico funciona*? (No. A machine *funciona*; a person *trabaja*.)

396.5 reparar — the word that cannot say where it has been

Say *to prefer*, then *to work*, of a machine. (*Preferir*; *funcionar*.)

What to know first

- romper — what happens first.
- la harina — a word whose sounds do name its road.

Sounds you'll need

- *re-pa-RAR*, three beats with the weight on the last. The opening *r* is a full roll; the two inside are light taps. The *p* carries no puff of air. → pronunciation reference

The word, taken apart — and its English cousins

reparar — "to repair."
Latin **reparāre** is *re-*, back or anew, plus **parāre**, to make ready: to make ready once more. The mending sense is already classical — to restore, to put back in order. That much is settled.
How the word reached Spanish is not. Wiktionary tags it inherited from Old Spanish, then adds, in the same entry, that it is possibly a borrowing, and points at Corominas. Two verdicts, one entry.
That is honesty, not sloppiness, and here is why.
A word usually wears its road on its face: *harina* lost an *f* coming down, *noche* turned a Latin cluster into *ch*, and a word copied off a page skipped both. The sounds testify.
Run *reparar* through that test and nothing happens. *Re-* comes out *re-* either way. *Par-* has no cluster to simplify, no *f* to lose, no vowel a sound change could reach. The *-ar* is where Latin *-āre* lands on both

roads. No segment would differ by route.
So phonology is silent, and the weight falls entirely on dates and manuscripts. One dictionary can call it inherited and another hedge, neither of them careless. A word can be perfectly well understood and still refuse to say where it has been.
Its commonest modern use is *reparar en* something, to notice it; how the verb travelled from mending to noticing is not accounted for here.
English has two unrelated **repair**s: the one that mends is *reparāre*; the *repair* of *repair to the drawing room* is Late Latin *repatriāre*, to return to one's country. **Prepare**, **apparatus** and **parade** are true relatives.

What you've built

You can now name five everyday actions, this one included: *reparar*. And you have met a word whose sounds cannot settle its history.

Your turn

Say these aloud:

- *reparar*
- *reparo el teléfono*

Now all five together. Name five everyday actions, and say one thing about each.

Say these aloud:

- *aprender — aprendo en la escuela*
- *cocinar — cocino en casa*
- *preferir — prefiero el arroz*
- *funcionar — el teléfono funciona*
- *reparar — reparo la puerta*

Before you move on

Why can the sounds of *reparar* not settle its history? (No segment of *re-par-ar* would differ on the two roads, so phonology has nothing

to give.) And which English *repair* is this word? (The one that mends; the one meaning to betake oneself is *repatriāre*.)

Chapter 397

Five Words for Weighing One Thing Against Another

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 2 of 5 lessons.

By the end of this chapter: I can say barato, caro, gratis, mayor and menor, and say how one thing compares with another.

Complete ES-C397-menor: weigh one thing against another, and say why.

397.1 barato — a price that started out as a shady deal

Say *to work, to run*, then *to repair*. (*Funcionar*; *reparar*.)

What to know first

- el precio — what this word is about.
- el dinero — what you hand over.
- comprar — what you are doing when the price matters.

Sounds you'll need

- *ba-RA-to*, three beats with the weight on the middle one. The *r* is one quick tap, and the *b* between two vowels is soft — lips close only halfway. → pronunciation reference

The word, taken apart — and its English cousins

barato — "cheap."
Behind it sits an old verb, **baratar**, "to trade, to haggle, to do a deal." The Academy's dictionary gives that verb four words: *de origen incierto* — of uncertain origin. Corominas adds what can be added and no more: the verb turns up across Spanish, French and Italian alike, and is *probably pre-Roman, and perhaps Celtic.* That is where the trail stops, and this lesson stops there too.
What is *not* uncertain is the direction the meaning came from. Corominas is explicit that *barato* in the sense "low-priced" was born attached to the idea of a **shady bargain** — cheap because of the circumstances of the deal, not because of anything measurable about the thing. The price was a comment on the dealing.
English has a word from the same guess, reached from the same direction: **barter**. Old French *barater* meant "to barter, to cheat, to haggle," and the dictionaries that hunt its origin land on the same Celtic hypothesis Corominas lands on. So *barato* and *barter* are relatives at the level of the family — not a line anyone has traced end to end, which is why this says *family* and not *ancestor*.
One story you will meet and should not repeat: that *barato* comes from Greek *prattein*, "to do business," carried by Greek merchants. Corominas rejects it on the sounds alone, and there were no Greek merchants in medieval Spain to carry it. It is tidy, it is everywhere, and it is not true.

- *un hotel barato* — a cheap hotel;
- *muy barato* — very cheap.

What you've built

You can now price a thing low: *barato*. And you have met a word whose origin the best dictionary in the language declines to give — which is itself worth seeing.

Your turn

Say these aloud:

- *barato*

- *un hotel barato*
- *muy barato*

Before you move on

What did *baratar* mean? (*To trade, to haggle.*) And what does the dictionary say about where it came from? (*That it is uncertain* — probably pre-Roman, perhaps Celtic.)

397.2 caro — the word English keeps saying as "dear"

Say *to repair*, then *cheap*. (*Reparar*; *barato*.)

What to know first

- barato — the other end of the same scale.
- la cara — a different word you already own. Hold on to it.
- cero — and this one too.

Sounds you'll need

- *CA-ro*, two beats with the weight on the first. The *c* before *a* is a hard *k*, and the *r* is one tap. → pronunciation reference

The word, taken apart — and its English cousins

caro — "expensive."
Latin **cārus** meant *beloved* — and it also meant *costly*. Both, from the start. Nothing had to move.
English does the same thing today and nobody notices. *My dear friend. That coat is a bit dear.* One word, both jobs, exactly as in Spanish — and this is a coincidence of habit, not of ancestry: English *dear* is a Germanic word and is not related to *cārus* at all. Spanish keeps both jobs too, and *caro amigo* is still readable, though it now sounds bookish.
Three ordinary English words *are* from *cārus*, all of them arriving through Romance:

- **charity** — from *cāritās*, "costliness, esteem, affection";
- **cherish** — from Old French *chierir*;
- **caress** — through Italian *carezza*, whose Spanish sibling is *caricia*.

Now the two words that look like this one and are not this one.
La cara is a face. *Cara* is also what *caro* becomes before a feminine noun. So the same four letters do two unrelated jobs, and what tells you which is what comes **before** it:

- *la cara* — the face; a noun with *la* in front;
- *una casa cara* — an expensive house; *cara* sitting after the thing it describes.

And *cero* is not this word either. *Cero* is the number nought. One vowel apart, and it is the only vowel doing any work:

- *caro* — expensive;
- *cero* — zero.

Say the pair aloud twice and the *a* stops being optional.
Finally, one trap from the dictionary shelf. Latin has a second *caro* — *caro, carnis*, "flesh" — which gives Spanish *carne* and English *carnival*. Same spelling in an index, different word entirely.

What you've built

You can now price a thing high: *caro*. And you can keep *caro*, *cara* and *cero* apart by what stands in front of them and by one vowel.

Your turn

Say these aloud:

- *caro*
- *una casa cara*

- *barato, caro*

Before you move on

Which two things did Latin *cārus* mean at once? (*Beloved*, and *costly.*) In *la cara*, what tells you this is a face and not a price? (*La* — it is a noun here.)

397.3 gratis — a Latin word that never unpacked

Say *cheap*, then *expensive.* (*Barato*; *caro.*)

What to know first

- gracias — the word this one is built out of.
- el precio — what *gratis* says there isn't one of.
- pagar — what you do not do.

Sounds you'll need

- *GRA-tis*, two beats with the weight on the first. The *g* is hard, the *r* is one tap, and the final *s* is clear. → pronunciation reference

The word, taken apart — and its English cousins

gratis — "free of charge."
You already own the root. *Gracias* is **grātia**, "favour, thanks." And *gratis* is the same noun in a case form — Latin **grātiīs**, squeezed down to **grātīs** — which the Romans used to mean **"for thanks."**
That is the whole idea. You are not paying money for it. You are paying in gratitude.
Look at what that history left behind. *Barato* and *caro* bend to fit the noun they sit beside:

- *un hotel barato*, *una casa cara*;

and *gratis* does not:

- *un café* ***gratis***, *una entrada* ***gratis***.

It arrived in Spanish as a finished Latin word rather than growing up inside the language, so it never learned the endings. The same fossil is sitting in English, which borrowed *gratis* in the 1400s and left it alone in exactly the same way.
The rest of the family is large and mostly English:

- **grace**, **gracious**, **grateful**, **gratitude**;
- **gratuity** — a tip, money given for thanks;
- **gratuitous** — which still does both jobs, meaning *free of charge* and also *uncalled-for*, because both are "given for nothing."

(Grammarians file grātiīs *as dative-or-ablative, since Latin ran the two together in the plural; it is read as ablative here.)*

What you've built

You can now say a thing costs nothing: *gratis*. And you can hear it as *gracias* wearing a Latin ending — which is why it never changes shape.

Your turn

Say these aloud:

- *gratis*
- *un café gratis*
- *una entrada gratis*

Before you move on

What does *gratis* literally say you are paying with? (*Thanks* — it is *gracias* in a Latin case form.) So why is there no *gratisa*? (It came in as a finished Latin word and never took Spanish endings.)

397.4 mayor — the greater one, and the man at the town hall

Say *expensive*, then *free of charge*. (*Caro*; *gratis*.)

What to know first

- grande — the plain word this one is the step above.
- el hermano, la hermana — who you will use it about.

Sounds you'll need

- *ma-YOR*, two beats with the weight on the second. The *y* is the same sound Spanish writes with *ll*, and the final *r* is one tap. → pronunciation reference

The word, taken apart — and its English cousins

mayor — "bigger," "older."
Latin **maior** is the comparative of **magnus**, "great." Not *bigger* as a separate word — *great*, with the comparison built in. *Greater.*
Spanish runs it two ways, and the exam will want both:

- *mi hermano* ***mayor*** — my **older** brother;
- *personas* ***mayores*** — **older** people;
- *la plaza* ***mayor*** — the **main** square, the greater one.

English carries the same Latin word twice. **Major** is the obvious one. The other is **mayor** — the head of a town, who is, quite literally, *the greater man.* Beside them sit **majority**, **majesty**, and the wider *magnus* family: **magnify**, **magnificent**, **maximum**.
And here is the part worth keeping. English put that word to work at the town hall. Spanish did not. The Spanish official is **el alcalde** — from Arabic *al-qāḍī*, "the judge." Two languages inherited one Latin word, and only one of them handed it the job.
One story to leave alone: that the month **mayo** is *maior* as well, named for the elders. Dictionaries derive *Maius* from the goddess **Maia**, and the elders-and-youngers tale is an old guess repeated ever since. *Mayo* and *mayor* are not the same word, whatever the four shared letters suggest.

What you've built

You can now say a thing is bigger, or a person older: *mayor.* And you know one job English gives it that Spanish gives to an Arabic word

instead.

Your turn

Say these aloud:

- *mayor*
- *mi hermano mayor*
- *personas mayores*

Before you move on

Mayor is the comparative of which Latin word? (*Magnus*, "great" — so it means *greater*.) What does Spanish call the mayor of a town, and where is that word from? (*El alcalde*, from Arabic *al-qāḍī*, "the judge.")

397.5 menor — and the minister Latin built to face the master

Say *free of charge*, then *bigger, older*. (*Gratis*; *mayor*.)

What to know first

- mayor — the one this answers.
- pequeño — the plain word it steps above.
- menos — you own this already. Keep it close; it is not this word.

Sounds you'll need

- *me-NOR*, two beats with the weight on the second. The final *r* is one tap. → pronunciation reference

The word, taken apart — and its English cousins

menor — "smaller," "younger."
Latin **minor** is the partner of **minus**, which you already have. *Minus* is the neuter; *minor* is the one you use of people and things.

- *mi hermana* ***menor*** — my **younger** sister;
- ***menor*** *de edad* — under age, a minor.

Now hold it against the word you already own. *Menos* and *menor* are one letter apart at the end, and that letter is the whole difference:

- ***menos*** — *less*, the amount. *Menos dinero.*
- ***menor*** — *smaller, younger*, said of a thing or a person. *Mi hermana menor.*

Same root, two jobs. Say them as a pair — *menos, menor* — and the ending starts doing the work.
Now the shape of the pair with *mayor*. *Menor* serves as the step above *pequeño*, and *mayor* as the step above *grande* — but neither is built from the word it serves. Latin took them from somewhere else entirely, the way English reaches for *better* instead of *gooder*.
And Latin did something deliberate with this root. **Minister** is **minus** plus the ending *-ter* — and it was made that way *to stand opposite* **magister**, which is **magis** ("more") plus the same *-ter*. The lesser one and the greater one, built as a matched pair. English holds both: **minister** and **master**.
The rest of the family is everywhere once you look: **minus**, **minute** (both the small kind and the sixty-second kind), **diminish**, **minimum**, **mince**, and **menu** — a *small* list.

What you've built

You can now say a thing is smaller, or a person younger: *menor*. You have five words for weighing one thing against another — *barato*, *caro*, *gratis*, *mayor*, *menor* — and you can keep *menor* apart from *menos* by its last letter.

Your turn

Say these aloud:

- *menor*
- *mi hermana menor*

- *menos, menor*
- *barato, caro, gratis, mayor, menor*

Before you move on

Which of *menos* and *menor* would you use for *my younger sister*? (*Menor — mi hermana menor.*) And which two English words did Latin build as a deliberate pair from *minus* and *magis*? (*Minister* and *master*.)

Chapter 398

Five Words for What a Thing Is Worth

Modes: **voice** (3) **eyes** (2) **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can say importante, interesante, favorito, fácil and difícil, and say what I think of something.
>
> *Complete ES-C398-dificil: say what you think of five things, and why.*

398.1 importante — what a thing carries in with it

Say *bigger, older*, then *smaller, younger.* (*Mayor*; *menor.*)

What to know first

- la puerta — the same *port-* you are about to meet.
- el precio — one thing that can matter.

Sounds you'll need

- *im-por-TAN-te*, four beats with the weight on the third. Every vowel stays short and clean — none of them slides. → pronunciation reference

The word, taken apart — and its English cousins

importante — "important."
Take it apart and it is *importar* with an *-ante* on the end. And *importar* is Latin **importāre**: **in-** + **portāre**, "to **carry in**."
That is all it meant in Latin. Bring in. Introduce. Bring about. A Roman who said *importat* was talking about cargo, not significance.
So where did *mattering* come from? Later, and not from Rome. The sense grew up inside the Romance languages after Latin, and the dictionaries that follow the trail point at **Italian** as the place it started. Spanish and French both have it; Latin did not. This is one of the cases where the modern meaning is younger than the word by a thousand years.
English kept both jobs in one word, which is the clearest way to see it:

- *to* ***import*** *goods* — to carry them in;
- *the* ***import*** *of his remarks* — their weight, what they bring in with them.

Same word, both senses, sitting in an English dictionary right now.
The *portāre* family is large and you will recognise all of it: **portable**, **porter**, **transport**, **export**, **report**, **deport**.

- *Es muy* ***importante****.* — It is very important.
- *No* ***importa****.* — It does not matter.

What you've built

You can now say a thing matters: *importante*. And you know that the mattering is the new part — the old part is nothing but carrying something in.

Your turn

Say these aloud:

- *importante*
- *es muy importante*
- *no importa*

Before you move on

What did Latin *importāre* mean? (*To carry in* — nothing about mattering.) Which English word still does both jobs at once? (*Import.*)

398.2 interesante — what stands between you and it

Say *smaller, younger*, then *important.* (*Menor*; *importante.*)

What to know first

- importante — its neighbour, built the same way.
- el dinero — you will need it for the second half of this.

Sounds you'll need

- *in-te-re-SAN-te*, five beats with the weight on the fourth. Every *e* is the same short, flat vowel — none of them drifts toward English *uh.* → pronunciation reference

The word, taken apart — and its English cousins

interesante — "interesting."
Underneath is Latin **interesse**: **inter** ("between") + **esse** ("to be"). *To be between.*
The step from there to *interesting* is short. What stands **between** you and something else is what concerns you, what you have a stake in. Spanish keeps the plain verb — *interesar*, "to interest" — and the noun *interés.*
And now the good part, which is about money.
Medieval canon law forbade charging for a loan; that was usury. But it permitted a lender to recover what he had *lost by not having his money* — and lawyers named that **id quod interest**: "that which is between." The difference between where the lender stood and where he would have stood.
The prohibition is long gone. The name stayed. Every time a bank

quotes you an **interest** rate, it is using a Latin lawyer's phrase for a gap.
Spanish holds the same double:

- *un libro* ***interesante*** — an interesting book;
- *el* ***interés*** *del banco* — the bank's interest.

The *esse* half turns up in English too, in **essence** and **present** — the verb *to be*, dressed differently each time.

What you've built

You can now say a thing holds your attention: *interesante*. And you know why a bank's charge and your curiosity are the same word.

Your turn

Say these aloud:

- *interesante*
- *un libro interesante*
- *muy interesante*

Before you move on

What do *inter* and *esse* mean apart? (*Between*, and *to be*.) What were medieval lenders allowed to recover, since they could not charge for a loan? (*Id quod interest* — the difference, "that which is between.")

398.3 favorito — an ending that only looks like a little word

Say *important*, then *interesting*. (*Importante*; *interesante*.)

What to know first

- la casa — and the *casita* you can make from it. Hold that ending.
- el color — what you will use this word about.

Sounds you'll need

- *fa-vo-RI-to*, four beats with the weight on the third. The *v* is the same soft sound as Spanish *b*, made with both lips. → pronunciation reference

The word, taken apart — and its English cousins

favorito — "favourite."
The root is easy. **Favor** is Latin **favēre**, "to be well disposed toward, to look kindly on." English has **favour**, **favourable**, and — from the same verb — the **fan**, who is a *favourer* of a team.
Now look at the ending, because it is a trap.
You have met *-ito* before. It is the ending that turns *casa* into *casita*, a little house. Seeing *favor* + *-ito*, a reader who has learned that ending will read "a little favour."
It is not that ending.
Favorito was borrowed whole from Italian **favorito** — and in Italian, that is the **past participle** of the verb *favorire*. It means **"favoured."** The *-ito* was already on the word when Spanish took it; nobody in Spanish added it. Two endings that look identical, doing entirely different work, and only the word's history tells them apart.
English took the very same Italian word by the same road, through French, in the 1500s — so **favourite** and *favorito* are the same borrowing twice over.

- *mi color* ***favorito*** — my favourite colour;
- *mi comida* ***favorita*** — my favourite food.

What you've built

You can now name the one you like best: *favorito*. And you have seen two identical endings that mean different things — one Spanish and small, one Italian and participial.

Your turn

Say these aloud:

- *favorito*
- *mi color favorito*
- *mi comida favorita*

Before you move on

Does the *-ito* of *favorito* mean "little"? (*No* — it is an Italian past participle meaning *favoured*, and it arrived already attached.) What does Latin *favēre* mean? (*To look kindly on.*)

398.4 fácil — not "light", but "doable"

Say *interesting*, then *favourite*. (*Interesante*; *favorito.*)

What to know first

- hacer — you already own this. It is about to turn out to be the same word.

Sounds you'll need

- *FÁ-cil*, two beats with the weight on the first — and the written accent is there to tell you so. The *c* before *i* is soft. → pronunciation reference

The word, taken apart — and its English cousins

fácil — "easy."
Latin **facilis** is **facere**, "to do," with an ending that means *-able*.
So the word does not say *light*. It does not say *gentle*. It says **doable**. That is a sharper idea than "easy," and a kinder one: a thing is *fácil* because you can do it.
And you have met *facere* already. It is *hacer*.
Look at the two side by side:

- ***hacer*** — carried in the mouth for centuries. The *f* fell away to

an *h* that nobody pronounces, and the middle softened out entirely.

- ***fácil*** — lifted off a Latin page long afterwards, by people reading. It still shows the *f* and the *c*, because it had no journey in which to lose them.

One Latin verb, two arrivals, and the spelling of each records how it travelled.
The bookish end of the family is all in English: **facile**, **facility**, **faculty**. And a *facility* is exactly what the Latin says — a thing that makes something **doable**.

- *Es muy* ***fácil.*** — It is very easy.
- *un examen* ***fácil*** — an easy exam.

What you've built

You can now say a thing gives no trouble: *fácil*. And you can hear *hacer* inside it — the same verb, arriving twice by two different roads.

Your turn

Say these aloud:

- *fácil*
- *es muy fácil*
- *hacer, fácil*

Before you move on

What does *facilis* say a thing is, literally? (*Doable* — *facere* plus an *-able* ending.) Which verb you already know is the same Latin word? (*Hacer.*)

398.5 difícil — the word English had to build backwards

Say *favourite*, then *easy.* (*Favorito*; *fácil.*)

What to know first

- fácil — this word is that word with a *no* on the front.

Sounds you'll need

- *di-FÍ-cil*, three beats with the weight on the middle one, which the written accent marks. Both *c* and the second *i* stay soft and short. → pronunciation reference

The word, taken apart — and its English cousins

difícil — "difficult."
You already have the whole word. Latin **difficilis** is **dis-** — the prefix that undoes things — stuck on **facilis**.
Not doable.
That is the entire construction, and it is worth saying aloud in that order: *facilis*, doable; *difficilis*, not doable. Latin doubled the letter when *dis-* ran into that *f*, which is why the Latin has *-ff-*, and Spanish later settled back to one.
The strange half of this story is English, not Spanish.
English did not borrow *difficult* as an adjective. It borrowed the **noun** first — **difficulty**, from Latin *difficultās* — and then, about a century later, writers cut the adjective *back out of it*. **Difficult** is a word made by trimming a longer word that was already there.
So Spanish holds the plain inherited shape, and English holds one that had to be reverse-engineered. When you say *difícil*, you are saying the older, simpler thing.

- *Es* ***difícil***. — It is difficult.
- *un examen* ***difícil*** — a hard exam.

What you've built

You can now say a thing gives trouble: *difícil*. You have five words for saying what you think of something — *importante*, *interesante*, *favorito*, *fácil*, *difícil* — and you can build the last one out of the one before it.

Your turn

Say these aloud:

- *difícil*
- *fácil, difícil*
- *un examen difícil*
- *importante, interesante, favorito, fácil, difícil*

Before you move on

Take *difícil* apart. (*Dis-* plus *facilis* — "not doable.") Which came into English first, *difficult* or *difficulty*? (*Difficulty* — the adjective was cut out of the noun afterwards.)

Chapter 399

Two Words for How Something Looks

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can say bonito and guapo, and say how something or someone looks.
>
> *Complete ES-C399-guapo: say how two things look, and say which you prefer.*

399.1 bonito — the same word made small twice

Say *easy*, then *difficult*. (*Fácil*; *difícil*.)

What to know first

- buenos / buenas — the good you already own.
- favorito — whose *-ito* was a false friend. This one is the real thing.

Sounds you'll need

- *bo-NI-to*, three beats with the weight on the middle. The *b* between vowels is soft — lips barely meet. → pronunciation reference

The word, taken apart — and its English cousins

bonito — "pretty," "nice."
It is **bueno** with **-ito** on the end. And this time — unlike *favorito* two lessons back — the ending really *is* the Spanish diminutive, the one that turns *casa* into *casita*. Something like *nicely good*.
Latin had already done exactly this, with exactly this root.
Latin **bellus**, "pretty," looks like a simple word. It is not. It is a worn-down form of an older **duenelos**, which was built on the same **bonus** — *good* — with a small-and-fond ending on it. *Bellus* was a diminutive that had forgotten it was one.
So the sequence runs:

- **bonus**, "good";
- Latin shrinks it fondly → **bellus**, "pretty" → Spanish *bello*, and English **beauty**, **beautiful**, **embellish**;
- Spanish, centuries later, reaches for *bueno* and shrinks it fondly again → **bonito**.

One root, the same move made twice, a thousand years apart, in two languages.
A note on the fish: *el bonito* is also a tuna, and the dictionaries do not agree that it is this word. Treat it as a separate entry rather than a pretty fish.

- *un pueblo* ***bonito*** — a pretty village;
- *¡Qué* ***bonito***! — How lovely!

What you've built

You can now call a thing pretty: *bonito*. And you can tell a real *-ito* from the borrowed one in *favorito*.

Your turn

Say these aloud:

- *bonito*
- *un pueblo bonito*

- *¡Qué bonito!*

Before you move on

What two pieces make *bonito*? (*Bueno* plus the diminutive *-ito*.) And what was Latin *bellus*, before it meant "pretty"? (*A diminutive of the same bonus* — good, made small.)

399.2 guapo — the word the dictionaries argue about

Say *difficult*, then *pretty*. (*Difícil*; *bonito*.)

What to know first

- bonito — said of things. This one is said of people.
- feo — the opposite, and you have met it already.

Sounds you'll need

- *GUA-po*, two beats with the weight on the first. The *u* after *g* is pronounced here — *gwa*, one slide, not two beats. → pronunciation reference

The word, taken apart — and its English cousins

guapo — "good-looking," "handsome."
Every other word in this chapter has an answer. This one does not, and that is what it is here to show you.
The Academy's account. The *Diccionario de la lengua española* sends *guapo* to Latin **vappa** — wine that has gone flat — which Romans also used of a man who had gone the same way: a **good-for-nothing**. The road offered is *good-for-nothing → swaggerer, bully → handsome.*
Corominas does not accept it. In the standard etymological dictionary of Spanish, that sense-history is argued against — the steps do not join up well enough to carry the word.
So: two standard authorities, one ordinary everyday adjective, no agreement. The DLE prints its derivation as a flat single line with no hedge, and a reader who saw only that line would never know there

was a question.
What is not in doubt is the recent end of the story. In Spanish, *guapo* meant **bold, swaggering, showy** before it meant *good-looking* — you can still hear that older sense in *un guapo* for a tough or a braggart. The handsome meaning is the youngest thing about the word.

- *un chico* ***guapo*** — a good-looking boy;
- *una chica* ***guapa*** — a good-looking girl;
- *¡Qué* ***guapa*** *estás!* — You look lovely!

What you've built

You can now say how something looks — *bonito* for a thing, *guapo* for a person, and *feo* for either — and say which you prefer. And you have met a word where the two dictionaries you would reach for disagree, which is a normal condition for a word rather than a failure of the lesson.

Your turn

Say these aloud:

- *guapo*
- *un chico guapo*
- *una chica guapa*
- *bonito, guapo, feo*

Before you move on

What does the Academy derive *guapo* from, and who disagrees? (*Latin vappa, flat wine* — and *Corominas* argues against it.) Which sense of *guapo* is older, *bold* or *good-looking*? (*Bold.*)

Chapter 400

Five Words for Making a Journey

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say el tren, el vuelo, el aparcamiento, el abono and la playa, and use them to plan a journey.
>
> *Complete ES-C400-playa: choose transport, name its practical details, and say where the journey ends.*

400.1 el tren — a line drawn along

> Say both words from the last chapter for *good-looking*. (*Bonito; guapo.*)

What to know first

- el coche — another way to travel on land.
- la estación — where this one waits.

Sounds you'll need

- *TREN*, one compact beat. Tap the *r* once and finish with *n*. Keep that ending audible: **tren** is a train; **tres** is three. → pronunciation reference

The word, taken apart — and its English cousins

el tren — "the train."
Spanish borrowed the word from French **train**. The French noun

belongs to **traîner**, "to draw, drag, or pull along." Before rails, the central picture was already a line of connected things following one another because the front one pulled the rest. A railway made that old picture literal in iron.
English borrowed the same French noun. That is why a railway *train*, a bridal *train*, and a *train of thought* all keep the same shape: one thing following another in a connected line.
Now make the contrast the lesson, because the mock requires this word and the book already owns its near-neighbour:

- **el tren** — the train;
- **tres trenes** — three trains.

The last sound carries the distinction: *-n* against *-s*. Do not guess from context when your ear can learn the difference directly.

What you've built

You can name rail transport and keep *tren* separate from *tres*.

Your turn

Say these aloud:

- *el tren*
- *tres trenes*
- *voy en tren*

Before you move on

What did French *traîner* mean? (*To draw or drag along.*) What single sound separates *tren* from *tres*? (*Final n versus final s.*)

400.2 el vuelo — the journey made by flying

Say *the train*, then recall both recent words for *good-looking*. (*El tren; bonito; guapo.*)

What to know first

- el aeropuerto — where a flight begins.
- el destino — where it is going.

Sounds you'll need

- *VUE-lo*, two beats, with *ue* joined into one quick *weh*. Spanish *v* and *b* belong to the same sound pattern: after a pause the lips meet, while between vowels they usually soften. → pronunciation reference

The word, taken apart — and its English cousins

el vuelo — "the flight."
The noun sits beside **volar**, "to fly," from Latin **volāre**. The oldest meaning is the act of flying. Travel language narrows it neatly: the dictionary's third sense is the route an aeroplane covers, with or without stops, between its point of origin and its destination.
That definition gives you a useful frame rather than an isolated label:

- **el vuelo sale del aeropuerto** — the flight leaves the airport;
- **el destino del vuelo** — the flight's destination.

English **volatile** belongs to the same Latin family. Before it meant chemically quick to evaporate or emotionally changeable, it described what could fly away. The common picture is movement into the air.

What you've built

You can name the air journey itself: *el vuelo*.

Your turn

Say these aloud:

- *el vuelo*
- *el destino del vuelo*
- *el tren o el vuelo*

Before you move on

Which verb stands behind *vuelo*? (*Volar*, to fly.) In travel, what does *vuelo* name? (*The route an aeroplane covers from origin to destination.*)

400.3 el aparcamiento — the place built from a verb

Say *the flight.* (*El vuelo.*)

What to know first

- el coche — what goes here.
- el parque — the word inside the verb.

Sounds you'll need

- *a-par-ca-MIEN-to*, five beats, with the weight on *mien.* The *c* before *a* is hard, and *ie* stays together in one beat. → pronunciation reference

The word, taken apart — and its English cousins

el aparcamiento — "parking" or "the car park."
The pieces are transparent once you see them. **Aparcar** is "to park," and **-miento** turns an action into its result or place. So *aparcamiento* can be the act of parking or the place set aside for it.
The tempting origin story is wrong in a useful way. Spanish *aparcar* was not lifted directly from English **park** when cars arrived. The Academy derives it from Spanish **parque**. The verb first meant placing vehicles or equipment in a designated park or camp; the modern car sense grew from that Spanish family.
You will also see **parking** on signs, and across the Americas **estacionamiento**, **parqueadero**, and **parqueo** are common. This lesson teaches *aparcamiento* because that is the exam's form, not because it is the only Spanish word in use.

What you've built

You can ask about the place for a car: *el aparcamiento*.

Your turn

Say these aloud:

- *el aparcamiento*
- *el aparcamiento del hotel*
- *el coche está en el aparcamiento*

Before you move on

What are the two pieces of *aparcamiento*? (*Aparcar* plus *-miento*.) Where does the Academy derive *aparcar* from? (*Spanish parque*, not a direct borrowing of English *park*.)

400.4 el abono — a right you can carry

Say *the car park*. (*El aparcamiento*.)

What to know first

- el metro — one service a pass can cover.
- el euro — how its price may be shown.

Sounds you'll need

- *a-BO-no*, three beats, weighted in the middle. The *b* between vowels is soft: the lips approach without a hard burst. → pronunciation reference

The word, taken apart — and its English cousins

el abono — "the pass," "the season ticket," or "the subscription." The dictionary keeps two nouns spelled **abono** apart. One belongs to *abonar* in the sense of paying or improving soil, so it can mean a payment or fertilizer. The other belongs to **abonarse**, "to subscribe."

It names the right a subscriber acquires and the document or set of tickets that proves that right. EtymDB 2.1 traces *abonar* to Latin *bonus*, "good", for the soil sense, and records nothing for the other. Travel uses the second word:

- **un abono de transporte** — a public-transport pass;
- **un abono mensual** — a monthly pass.

Context is doing real work. At a metro ticket machine, *abono* is not compost; in a garden shop, it probably is. One spelling can hold two histories, and the noun beside it tells you which one you have.

What you've built

You can name a pass that buys repeated use of a service: *el abono*.

Your turn

Say these aloud:

- *el abono*
- *un abono mensual*
- *un abono de transporte*

Before you move on

What does a travel *abono* prove? (*A subscriber's right to use a service.*) What other everyday meaning shares the spelling? (*Fertilizer.*)

400.5 la playa — the flat shore at the journey's end

Name the four travel words so far. (*El tren, el vuelo, el aparcamiento, el abono.*)

What to know first

- el mar — the water beside it.
- las vacaciones — when the mock sends you there.

Sounds you'll need

- *PLA-ya*, two beats, weighted first. Finish with the consonant sound in English *yes*. That keeps it apart from **plaza**, whose final consonant is *th* in most of Spain and *s* across most of the Americas. → pronunciation reference

The word, taken apart — and its English cousins

la playa — "the beach."
It comes from Late Latin **plagia**, a flat stretch of shore. The dictionary's first definition keeps both pieces: the edge of the sea or a large river, formed by sand on a surface that is nearly level.
Across parts of South America the old flat-open-ground idea widened beyond the water. A **playa de estacionamiento** can be an open parking area. That is not a new unrelated word; it is the same flat expanse put to another use.
Now keep the required contrast visible:

- **la playa** — the beach;
- **la plaza** — the square.

The words differ at one place, and that place matters. Do not drop either word; say the pair until the ending decides it before context has to rescue you.

What you've built

You can name a beach as a destination and distinguish it from a town square.

Your turn

Say these aloud:

- *la playa*

- *la playa, la plaza*
- *voy a la playa en tren*

Before you move on

What did Late Latin *plagia* name? (*A flat stretch of shore.*) Which sound separates *playa* from *plaza*? (*Y from z or s.*) Then name the whole travel set. (*El tren, el vuelo, el aparcamiento, el abono, la playa.*)

Chapter 401

Four Words for Following Directions

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say la avenida, seguir, recto and cambiar, and use them to follow or change a route.
>
> *Complete ES-C401-cambiar: follow an avenue, continue straight, and change route or transport.*

401.1 seguir — follow what comes next

Say train, flight, and beach. (*El tren, el vuelo, la playa.*)

What to know first

- ir — to go.
- continuar — another way to say to continue.

Sounds you'll need

- *se-GUIR*, two beats, weighted last. In *gui*, the written *u* is silent and keeps the *g* hard: say *geer*, not *goo-eer*. → pronunciation reference

The word, taken apart — and its English cousins

seguir — "to follow" or "to continue."
It comes through Vulgar Latin **sequīre** from Latin **sequī**, "to follow," reshaped with the ending of **īre**, "to go." English **sequence** is a set in which one thing follows another; a **consequence** follows from a cause. Those words keep the same old motion.
In directions, **seguir** tells you to keep to the route:

- **seguir la avenida** — follow the avenue;
- **seguir** — continue.

What you've built

You can tell someone to follow a named road or continue moving.

Your turn

Say these aloud:

- *seguir*
- *seguir la avenida*
- *seguir en tren*
- *después del vuelo, seguir a la playa*

Before you move on

Say *follow the avenue.* (*Seguir la avenida.*) What is the old idea shared with English *sequence*? (*One thing follows another.*)

401.2 cambiar — leave one route and take another

Name the flight, parking area, pass, and beach. (*El vuelo, el aparcamiento, el abono, la playa.*)

What to know first

- el cambio — the related noun, a change or exchange.
- el destino — what may stay fixed when the route changes.

Sounds you'll need

- *cam-BIAR*, two beats, weighted last. Keep *mb* together as you move into the final *iar*. → pronunciation reference

The word, taken apart — and its English cousins

cambiar — "to change" or "to exchange."
It comes from Latin **cambiāre**, which the Academy identifies as a word of Gaulish origin. Its exchange sense makes the core visible: leave one thing and take another. On a journey that may mean another train, route, or destination.

- **cambiar de tren** — change trains;
- **cambiar de dirección** — change direction;
- **cambiar el destino** — change the destination.

English **change** reached its present form by a different Romance route, but it belongs to this same old family of exchange.

What you've built

You can follow an avenue, continue straight, and say when the journey changes.

Your turn

Say these aloud:

- *cambiar*
- *cambiar de tren*
- *seguir recto por la avenida*
- *con el abono, cambiar después del vuelo*

- *cambiar la ruta del aparcamiento a la playa*

Before you move on

Give the whole direction set: avenue, follow, straight, change. (*La avenida, seguir, recto, cambiar.*) What older action sits inside *cambiar*? (*Exchanging one thing for another.*)

401.3 la avenida — the road by which you come

Say *the train*, *the travel pass*, and *the beach*. (*El tren, el abono, la playa.*)

What to know first

- la calle — any street; an *avenida* is usually broader.
- venir — to come, the idea that helps anchor this road.

Sounds you'll need

- *a-ve-NI-da*, four even vowels with the weight on *ni*. The written *v* has the same Spanish sound as *b*; do not give it the English *v*. → pronunciation reference

The word, taken apart — and its English cousins

la avenida — "the avenue," usually a broad street.
The Academy derives **avenida** from Spanish **avenir**. The older noun could name something that came in force — especially a river's sudden rise — and also a road that leads, or lets people come, to a particular place. The modern broad city street grew from that road sense.
Keep the scale contrast:

- **la calle** — the general word for a street;
- **la avenida** — usually a broad street, sometimes tree-lined.

What you've built

You can name the broad street that begins a set of directions.

Your turn

Say these aloud:

- *la avenida*
- *la avenida y la calle*
- *seguir y cambiar por la avenida*
- *voy en tren a la avenida*
- *tengo un abono y voy a la playa*

Before you move on

Which word names a broad street, and which verb lies behind its history? (*La avenida*; *avenir*.)

401.4 recto — keep the line straight

Name the beach and parking. (*La playa, el aparcamiento.*)

What to know first

- seguir — the action this direction modifies.
- derecha — right; a turn rather than a straight line.

Sounds you'll need

- *REC-to*, two beats, weighted first. The pair in the middle is *k*-*t*.
- Keep **recto/resto** apart: *REC-to* has *k*; *RES-to* has *s*. → pronunciation reference

The word, taken apart — and its English cousins

recto — "straight."
It comes from Latin **rectus**, also "straight." English **rectilinear** keeps the straight-line meaning, and every **rectangle** is built from straight sides and right angles.
For a route, put it after the action:

- **seguir recto** — continue straight.

Do not let the exam's near-neighbour replace it:

- **recto** — straight;
- **resto** — the rest, the remainder.

What you've built

You can combine an action and a quality into the direction *seguir recto*.

Your turn

Say these aloud:

- *recto*
- *recto, resto*
- *seguir recto por la avenida*
- *cambiar y después seguir recto*
- *seguir recto al aparcamiento y después a la playa*

Before you move on

Say *continue straight.* (*Seguir recto.*) Which consonant keeps *recto* apart from *resto*? (*K rather than s.*)

401.5 route recall one — hear the chain, then rebuild it

Give the four-word chain from a broad road to a changed route. (*La avenida, seguir, recto, cambiar.*)

What you've built

You are on **la avenida**. The instruction is **seguir recto**. Then the route changes: **cambiar de dirección**. Say those three steps again without the English prompts.

Your turn

Say these aloud:

- *la avenida*
- *seguir recto*
- *cambiar de dirección*

Before you move on

Say the route in one line. (*Seguir recto por la avenida y después cambiar de dirección.*)

401.6 route recall two — rebuild it from the change

Start with *change*, then say *avenue*, *follow*, and *straight*. (*Cambiar, la avenida, seguir, recto.*)

What you've built

Someone says **cambiar**. Ask which road: **¿Qué avenida?** Then recover the instruction **seguir recto**. The same four words now survive a different cue.

Your turn

Say these aloud:

- *cambiar*
- *¿Qué avenida?*
- *seguir recto*
- *cambiar y seguir recto por la avenida*

Before you move on

Without looking back, name and use all four direction words. (*La avenida; seguir recto; cambiar de dirección.*)

Chapter 402

Five Words in a Clothes Shop

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can name a shirt, T-shirt, size and cap, and ask or say what something costs.
>
> *Complete ES-C402-gorro: identify four clothes-shop words and ask what an item costs.*

402.1 costar — when the price stands settled

Say *the euro* and *the price*. (*El euro, el precio.*)

What to know first

- el precio — the number this verb asks about.
- el euro — one unit the answer can use.

Sounds you'll need

- *cos-TAR*: keep the first *s* clear. **Costar** differs from **contar** only in that middle consonant: *cos-tar*, not *con-tar*.

The word, taken apart — and its English cousins

costar — "to cost."
It descends from Latin **constare**, "to stand together" and then "to be settled or established." A settled price is what an item **costs**. English **cost** reached the same Latin family through French.

Use the third-person question for one item: **¿Cuánto cuesta?** — "How much does it cost?" The answer can be **Cuesta diez euros**.

Your turn

Say these aloud:

- *costar*
- *¿Cuánto cuesta?*
- *Cuesta diez euros.*

Before you move on

Ask how much it costs. (*¿Cuánto cuesta?*)
Source: Diccionario de la lengua española: costar.

402.2 la camisa — a garment with a long family

Ask how much it costs. (*¿Cuánto cuesta?*)

Sounds you'll need

- *ca-MI-sa*: three open syllables, with the weight on *mi*.

The word, taken apart — and its English cousins

la camisa — "the shirt."
Spanish continues Late Latin **camisia**, a garment worn close to the body. English **chemise** and **camisole** travelled by another route from the same old garment word, so their opening sound changed while Spanish kept *camisa*.
In the shop: **¿Cuánto cuesta la camisa?**

Your turn

Say these aloud:

- *la camisa*
- *¿Cuánto cuesta la camisa?*
- *La camisa cuesta diez euros.*

Before you move on

Name the shirt, then ask its cost. (*La camisa. ¿Cuánto cuesta?*)
Source: Diccionario de la lengua española: camisa.

402.3 la camiseta — the smaller shirt

Say *the shirt* and ask what it costs. (*La camisa. ¿Cuánto cuesta?*)

Sounds you'll need

- *ca-mi-SE-ta*: keep all four vowels; the stress moves to *se*.

The word, taken apart — and its English cousins

la camiseta — "the T-shirt."
The build is visible: **camisa** plus **-eta**, a suffix that can make something smaller. The lighter, smaller shirt became the ordinary T-shirt. Keep the two shop labels distinct: **camisa** for a shirt, **camiseta** for a T-shirt. *Camisa* ← Late Latin *camisia*, "shirt", which EtymDB 2.1 traces further back to Germanic.

Your turn

Say these aloud:

- *la camisa*
- *la camiseta*
- *¿Cuánto cuesta la camiseta?*

Before you move on

Give the two garment words, larger category first. (*La camisa, la camiseta.*)
Source: Diccionario de la lengua española: camiseta.

402.4 la talla — the cut that became a size

Name a shirt and a T-shirt. (*Una camisa, una camiseta.*)

Sounds you'll need

- *TA-ya* for most speakers: the written **ll** commonly has the same sound as **y**. → pronunciation reference

The word, taken apart — and its English cousins

la talla — "the size," especially a clothing size.
The noun belongs to **tallar**, "to cut or shape." A garment is cut to a measure, and that cut becomes its **talla**. In a shop, **¿Qué talla?** asks "What size?" Both go back to Latin *talea*, "a cutting"; EtymDB 2.1 routes *talla* through French *taille*.

Your turn

Say these aloud:

- *la talla*
- *¿Qué talla?*
- *¿Qué talla tiene la camiseta?*
- *¿Cuánto cuesta la camisa?*

Before you move on

Ask "What size?" (*¿Qué talla?*)
Source: Diccionario de la lengua española: talla.

402.5 el gorro — the cap with no invented origin

Ask the size of the T-shirt, then ask its cost. (*¿Qué talla tiene la camiseta? ¿Cuánto cuesta?*)

Sounds you'll need

- *GO-rro*: hold the rolled **rr** clear. Contrast **gorro**, with *rr*, and **gordo**, with *rd*. The new word does not contain a *d*.

The word, taken apart — and its English cousins

el gorro — "the brimless cap," often round or close-fitting.
There is no secure etymology to turn into a story here. The Academy marks the origin of **gorra** as uncertain and derives **gorro** from it. Learn the shape instead: a **gorra** normally has a peak; a **gorro** is round or brimless. They are not masculine and feminine forms of one object.

Your turn

Say these aloud:

- *el gorro*
- *gorro, no gordo*
- *¿Qué talla tiene el gorro?*
- *¿Cuánto cuesta el gorro?*

Before you move on

Name the brimless cap and ask its cost. (*El gorro. ¿Cuánto cuesta?*)
Sources: DLE: gorro and DLE: gorra.

402.6 shopping recall one — rebuild the counter exchange

Give the five-word chain. (*Costar, la camisa, la camiseta, la talla, el gorro.*)

What you've built

You can distinguish **camisa** from **camiseta**, ask **¿Qué talla?**, name **el gorro**, and ask **¿Cuánto cuesta?**

Your turn

Say these aloud:

- *la camisa y la camiseta*
- *¿Qué talla?*
- *el gorro*
- *¿Cuánto cuesta?*

Before you move on

Ask the size and cost of the T-shirt. (*¿Qué talla tiene la camiseta? ¿Cuánto cuesta?*)

402.7 shopping recall two — choose, size, and price

Without looking back, name the four shop nouns. (*La camisa, la camiseta, la talla, el gorro.*)

Your turn

Say these aloud:

- *Busco una camiseta.*
- *¿Qué talla?*
- *También busco un gorro.*
- *¿Cuánto cuesta?*

Before you move on

Build a two-question shop exchange using a garment, its size, and its price. (*Busco una camiseta. ¿Qué talla? ¿Cuánto cuesta?*)

Chapter 403

Chicken, Vegetables and Paella

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name chicken, vegetables and paella in a menu, market or family-kitchen context.
>
> *Retrieve the three food words across the menu, supermarket and family-kitchen scenes.*

403.1 el pollo — chicken, not dust

Say *the meat.* (*La carne.*)

Sounds you'll need

- *PO-yo* for most speakers: written **ll** commonly has the sound of English *y*. Keep the final vowel round and clear.

The word, taken apart — and its English cousins

el pollo — "the chicken," especially chicken as food.
Latin **pullus** meant a young animal. Spanish **pollo** comes from that word. Keep it distinct from **polvo**, "dust," which comes from unrelated Latin **pulvis**. The useful listening contrast is only **pollo / polvo**: the first has *-ll-*, the second has *-lv-*.

Your turn

Say these aloud:

- *el pollo*
- *pollo, no polvo*
- *carne de pollo*

Before you move on

Say *the chicken*, then contrast it with *dust*. (*El pollo; pollo, no polvo.*)
Sources: DLE: pollo and DLE: polvo.

403.2 la verdura — the green growth that became vegetables

Name chicken and fruit. (*El pollo, la fruta.*)

Sounds you'll need

- *ver-DU-ra*: tap the single **r** once; the stress falls on **du**.

The word, taken apart — and its English cousins

la verdura — "the vegetables" or "the greens."
The word is built on **verde**, from Latin **viridis**, "green." The food sense grew from green plant growth. But **verde** cannot be reduced to a colour in every context: Spanish can also use it of an indecent or erotic joke, and the dictionary records a marked secondary sense of **verdura**. Here the context is plainly food.

Your turn

Say these aloud:

- *la verdura*
- *fruta y verdura*
- *pollo con verdura*

Before you move on

Give the supermarket pair: fruit and vegetables. (*Fruta y verdura.*)
Sources: DLE: verdura and DLE: verde.

403.3 la paella — the pan that named the dish

Say *to cook* and *the vegetables.* (*Cocinar, la verdura.*)

Sounds you'll need

- *pa-E-ya* for most speakers: keep three clear beats, with the stress on **e**.

The word, taken apart — and its English cousins

la paella — "paella," the Valencian rice dish.
The dish took the name of its pan. Valencian **paella** came through Old French **paele** from Latin **patella**, a small pan or dish. Catalan also has native **padella**; the different middle consonant is evidence that **paella** made the French detour rather than wearing down inside Catalan.

Your turn

Say these aloud:

- *la paella*
- *cocinar paella*
- *paella con pollo y verdura*

Before you move on

Say that your mother cooks paella. (*Mi madre cocina paella.*)
Source: DLE: paella.

403.4 food recall one — rebuild the meal

Give the three new food words. (*El pollo, la verdura, la paella.*)

What you've built

You can name chicken and vegetables, distinguish **pollo** from **polvo**, and name the dish whose pan supplied its name.

Your turn

Say these aloud:

- *pollo, no polvo*
- *fruta y verdura*
- *la paella*

Before you move on

Name a dish with chicken and vegetables. (*Paella con pollo y verdura.*)

403.5 food recall two — menu, market, kitchen

Say *chicken*, *vegetables*, *paella*. (*Pollo, verdura, paella.*)

Your turn

Say these aloud:

- *pollo con patatas*
- *frutas y verduras frescas*
- *mi madre cocina paella*

Before you move on

Rebuild all three scenes: the menu food, the supermarket section, and the family dish. (*Pollo; fruta y verdura; paella.*)

Chapter 404

Wi-Fi, Mobile Phones and Films

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can identify Wi-Fi, a mobile phone and a film, and ask someone to turn a phone off.
>
> *Retrieve the four media words across hotel, phone and cinema scenes.*

404.1 apagar — make the active thing quiet

Say *the telephone.* (*El teléfono.*)

Sounds you'll need

- *a-pa-GAR*: keep all three **a** sounds clear and stress the final syllable.

The word, taken apart — and its English cousins

apagar — "to turn off" a device or light, and "to put out" a fire. It continues Latin **pacāre**, "to calm or pacify." The meaning moved from making something quiet to stopping its light, fire or activity. In the cinema, **apagar el teléfono** means "to turn off the phone."

Your turn

Say these aloud:

- *apagar*

- *apagar el teléfono*
- *por favor, apagar el teléfono*

Before you move on

Say *to turn off.* (*Apagar.*)
Source: DLE: apagar.

404.2 el wifi — the connection with a deliberately catchy name

Say *internet.* (*Internet.*)

Sounds you'll need

- In much of the Spanish-speaking world you will hear *WEE-fee.* **El wifi** is widely used; **la wifi** also occurs in parts of the Spanish-speaking world.

The word, taken apart — and its English cousins

el wifi — "the Wi-Fi" or "Wi-Fi."
Spanish borrowed it from English *Wi-Fi.* The name was coined to sound like **Hi-Fi**. The phrase **Wireless Fidelity** was attached afterward as marketing by the industry alliance and was later dropped. That history is why treating the phrase as the name's simple original expansion is misleading, while pretending the Alliance never used it also goes too far.

Your turn

Say these aloud:

- *el wifi*
- *¿Hay wifi?*
- *wifi gratis*

Before you move on

Ask whether there is Wi-Fi. (*¿Hay wifi?*)
Sources: DLE: wifi and Phil Belanger's account of the naming.

404.3 el móvil — the phone named for moving

Say *the telephone* and *Wi-Fi*. (*El teléfono, el wifi.*)

Sounds you'll need

- *MO-vil*: the written accent keeps the stress on **mó**.

The word, taken apart — and its English cousins

el móvil — "the mobile phone," especially in Spain. Across much of Latin America, **el celular** is more usual.
Latin **mōbilis** meant "movable." Spanish **teléfono móvil** is literally a mobile telephone; **el móvil** leaves the noun unstated because the movable device is understood.

Your turn

Say these aloud:

- *el móvil*
- *el teléfono móvil*
- *apagar el móvil*

Before you move on

Say *turn off the mobile phone*. (*Apagar el móvil.*)
Source: DLE: móvil.

404.4 la película — from a thin skin to a film

Say *the cinema* and *to begin*. (*El cine, empezar.*)

Sounds you'll need

- *pe-LEE-ku-la*: the written accent keeps the stress on **lí**.

The word, taken apart — and its English cousins

la película — "the film" or "the movie."
Latin **pellicula** meant a little skin, a diminutive of **pellis**, "skin." A thin photographic layer, and then the strip coated with it, carried the word into cinema. The material's name became the movie's name.

Your turn

Say these aloud:

- *la película*
- *el cine y la película*
- *la película empieza*

Before you move on

Say *the film begins.* (*La película empieza.*)
Source: DLE: película.

404.5 media recall one — connection, device, film

Give the four new words. (*Apagar, el wifi, el móvil, la película.*)

Your turn

Say these aloud:

- *¿Hay wifi?*
- *apagar el móvil*
- *la película empieza*

Before you move on

Ask about the connection, then name what starts at the cinema. (*¿Hay wifi? La película empieza.*)

404.6 media recall two — hotel and cinema

Say *Wi-Fi, mobile phone, film.* (*Wifi, móvil, película.*)

Your turn

Say these aloud:

- *el wifi es gratis*
- *apaguen sus teléfonos móviles*
- *la película empieza en cinco minutos*

Before you move on

Rebuild the hotel fact and cinema announcement. (*El wifi es gratis; apaguen sus teléfonos móviles; la película empieza.*)

Chapter 405

Photography, Photos and Permission

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can distinguish a photo from photography and understand whether taking photographs is permitted.
>
> *Retrieve the three image words across an ID form and a public sign.*

405.1 la fotografía — writing with light

Say *to make or do* and *the room.* (*Hacer, la sala.*)

Sounds you'll need

- *fo-to-gra-FEE-a*: the written accent keeps **í** and **a** in separate syllables.

The word, taken apart — and its English cousins

la fotografía means both "photography" and "a photograph." Its international parts come from Greek **phôs, phōtós**, "light," and **graphía**, "writing or description." A photograph is, quite literally, writing with light.
Spanish commonly says **hacer fotografías**, "to take photographs." The verb is the familiar **hacer**: Spanish pictures the activity as making photographs.

Your turn

Say these aloud:

- *la fotografía*
- *hacer fotografías*
- *hacer fotografías en la sala*

Before you move on

Say *to take photographs.* (*Hacer fotografías.*)
Sources: DLE: fotografía and DLE: foto-.

405.2 la foto — the short word keeps the long word's gender

Say *the photograph* and *the passport.* (*La fotografía, el pasaporte.*)

The word, taken apart — and its English cousins

la foto is the everyday short form of **la fotografía**. It ends in **-o**, but it remains feminine because the full word is feminine: **la foto**, never *el foto* for an ordinary photograph. *Fotografía* is a learned word built from two Greek roots, "light" and "writing".
The two forms overlap, but the short one is especially natural for a physical photo or an ID picture: **una foto y el pasaporte**.

Your turn

Say these aloud:

- *la foto*
- *una foto*
- *una foto y el pasaporte*
- *la foto, la fotografía*

Before you move on

Say *a photo and the passport.* (*Una foto y el pasaporte.*)
Source: DLE: foto.

405.3 permitir — let something pass through

Say *to take photographs in the room.* (*Hacer fotografías en la sala.*)

Sounds you'll need

- *per-mi-TEER*: keep the two **r** sounds light and stress the final syllable.

The word, taken apart — and its English cousins

permitir means "to permit" or "to allow." It continues Latin **permittere**, "to let through," built from **per-**, "through," and **mittere**, "to send or let go." English *permit* belongs to the same family.
On a public sign, **está permitido** means "it is permitted," while **no está permitido** means "it is not permitted." Treat that whole sign formula as one useful chunk here.

Your turn

Say these aloud:

- *permitir*
- *está permitido*
- *no está permitido*
- *no está permitido hacer fotografías en la sala*

Before you move on

Say *it is not permitted to take photographs.* (*No está permitido hacer fotografías.*)
Source: DLE: permitir.

405.4 images recall one — ID photo and public sign

Give the three new words. (*La fotografía, la foto, permitir.*)

Your turn

Say these aloud:

- *una foto y el pasaporte*
- *hacer fotografías*
- *no está permitido*

Before you move on

Give the ID phrase, then the sign phrase. (*Una foto y el pasaporte. No está permitido.*)

405.5 images recall two — from the form to the museum

Contrast the short and full image words, then say *to permit.* (*La foto, la fotografía, permitir.*)

Your turn

Say these aloud:

- *una foto y el pasaporte*
- *hacer fotografías en la sala*
- *no está permitido hacer fotografías en la sala*

Before you move on

Retrieve both scenes without notes. (*Una foto y el pasaporte. No está permitido hacer fotografías en la sala.*)

Chapter 406

Clients, Documents and Data

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can understand a basic form and say that a client fills in a document with data.
>
> *Retrieve the five form-and-document words in one practical instruction.*

406.1 el cliente, la cliente — the person on the other side of the counter

Say *the shop.* (*La tienda.*) Now name the person who buys there: **el cliente** or **la cliente**.

The word, taken apart — and its English cousins

Cliente comes from Latin **cliens**, a person connected to and protected by a patron. The relationship changed over time. In modern Spanish, a **cliente** is a customer of a shop or a client who uses a professional service.
The word itself can stay the same for a man or a woman; the article does the work: **el cliente**, **la cliente**. You may also meet **clienta** for a woman.

Grammar Lens: meaning in a scene

Picture a counter. One person works for the shop; the other asks for a product or service. That second person is **el cliente** or **la cliente**.

- **el cliente de la tienda** — the shop's customer
- **la cliente necesita ayuda** — the customer needs help

Your turn

Say these aloud:

- *el cliente*
- *la cliente*
- *el cliente de la tienda*

Before you move on

What is the customer or client? (*El cliente; la cliente.*)
Source: DLE: cliente.

406.2 el documento — a paper that shows or proves

Say *the passport* and *the paper*. (*El pasaporte, el papel.*) A passport is one kind of **documento**.

The word, taken apart — and its English cousins

El documento comes from Latin **documentum**, something that gives evidence or instruction. Its deeper verb is **docēre**, "to teach." English **document**, **doctor**, **doctrine** and **docent** belong to the same family: each points to showing, teaching or establishing something. A **papel** is the material. A **documento** is the meaningful record on it — or the digital equivalent. A passport is both a small book and an official **documento**.

Grammar Lens: useful combinations

- **el documento de identidad** — the identity document
- **el pasaporte es un documento** — the passport is a document
- **necesito el documento** — I need the document

Your turn

Say these aloud:

- *el documento*
- *el documento de identidad*
- *el pasaporte es un documento*

Before you move on

What written record can serve as proof? (*El documento.*)
Source: DLE: documento.

406.3 el dato — one thing given as information

A form may ask for your name and address: *el nombre, la dirección.* Each answer is **un dato**.

The word, taken apart — and its English cousins

Dato comes straight from Latin **datum**, "something given." English kept **datum** for one item and **data** for several; Spanish made the everyday noun **el dato**, plural **los datos**.
A name, address or telephone number can each be **un dato**. Together they are **los datos personales**, personal details.

Grammar Lens: one or several

- **un dato** — one piece of information
- **los datos** — the information / details
- **nombre y dirección: dos datos** — name and address: two details

Your turn

Say these aloud:

- *un dato*
- *los datos*

- *los datos personales*

Before you move on

One piece of information? (*Un dato.*) Several details? (*Los datos.*)
Source: DLE: dato.

406.4 el impreso — a form waiting for your data

> Say *the document*, *the data* and *the paper*. (*El documento, los datos, el papel.*) Put blank spaces on that paper and you have **el impreso**.

The word, taken apart — and its English cousins

Impreso is the irregular past participle of **imprimir**, "to print," from Latin **impressus**, "pressed into." Printing once meant pressing inked type onto paper. English **impress** preserves the same image.
As a noun, **el impreso** can mean a printed sheet, especially a form with blank spaces for a procedure. In much of the Spanish-speaking world you will also hear **el formulario**. Here the exam-derived word is **impreso**.

Grammar Lens: a form has two sides

The **impreso** supplies the labels; you supply **los datos**:

- **Nombre:** Ana
- **Dirección:** Calle Sol, 4

Your turn

Say these aloud:

- *el impreso*
- *los datos del impreso*
- *el documento y el impreso*

Before you move on

What printed sheet waits for your details? (*El impreso.*) What do you put in it? (*Los datos.*)
Source: DLE: impreso.

406.5 rellenar — fill the blanks with what they need

Say *the form*, *the data* and *full*. (*El impreso, los datos, lleno.*)
The action that connects them is **rellenar**.

The word, taken apart — and its English cousins

Rellenar shows its construction on the surface: **re-** + **llenar**, "to fill." Its broad sense is to fill something again or completely. In an office, it has the practical meaning "to fill in" or "to fill out." *Llenar* belongs with *lleno*, "full", inherited from Latin *plēnus*, with *pl-* turned to *ll-*. The DLE gives the form sense precisely: putting the necessary data into blank spaces in forms or documents. That is why the noun chain from this chapter ends in an action:

rellenar el impreso con los datos

Grammar Lens: a regular -ar action

You already know the regular **-ar** machine:

- **relleno el impreso** — I fill in the form
- **rellena el impreso** — he/she fills in the form; fill in the form

The noun **relleno** can also mean a filling, but the sentence and article tell you what job the form is doing.

Your turn

Say these aloud:

- *rellenar*

- *rellenar el impreso*
- *rellenar el impreso con los datos*

Before you move on

Say *to fill in the form with the data.* (*Rellenar el impreso con los datos.*)
Source: DLE: rellenar.

406.6 documents recall one — build the form scene

Give the five new forms. (*El cliente, el documento, el dato, el impreso, rellenar.*)

Your turn

Say these aloud:

- *el cliente y el documento*
- *los datos del cliente*
- *rellenar el impreso*
- *rellenar el impreso con los datos*

Before you move on

Who has the details, what sheet receives them, and what is the action? (*El cliente; el impreso; rellenar.*)

406.7 documents recall two — one complete instruction

Rebuild the chain without looking: person, record, information, printed form, action. (*Cliente, documento, dato, impreso, rellenar.*)

Your turn

Say these aloud:

- *el documento del cliente*
- *los datos: nombre y dirección*
- *el cliente rellena el impreso*
- *el cliente rellena el impreso con los datos*

Before you move on

Say the whole office sentence. (*El cliente rellena el impreso con los datos.*) Then name the record it creates. (*El documento.*)

Chapter 407

Middle, Below, Outside and Beside

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can place something in the middle, underneath, outside or beside a reference point.
>
> *Use four location frames without translating.*

407.1 en medio — in the middle

Recall **la puerta**, the door. Now place it at the centre: **la puerta está en medio**.

The word, taken apart — and its English cousins

Medio comes from Latin **medius**, "middle." English kept the same root in **median**, **medium** and **intermediate**. Spanish uses **en medio** for a position between the edges or between two things.

Grammar Lens: the frame en medio de

Say **en medio** when the reference is understood. Add **de** before the thing that frames the middle: **en medio de la puerta**, in the middle of the door.

Your turn

Say these aloud:

- *en medio*

- *en medio de la puerta*
- *la puerta está en medio*

Before you move on

In the middle? (*En medio.*)
Source: DLE: medio.

407.2 debajo — underneath

Recall **la mesa**. Something lower than the tabletop can be **debajo de la mesa**.

The word, taken apart — and its English cousins

The history is visible: **de + bajo**. **Bajo** is low; **debajo** names the lower position. The DLE defines it as a place below another higher one. *Bajo* ← Late Latin *bassus*, "low" (EtymDB 2.1), and *de* ← Latin *dē*.

Grammar Lens: debajo de

Before a reference object, use **debajo de**: **debajo de la mesa**. With no object stated, **está debajo** is complete.

Your turn

Say these aloud:

- *debajo*
- *debajo de la mesa*
- *está debajo*

Before you move on

Underneath? (*Debajo.*) Under the table? (*Debajo de la mesa.*)
Source: DLE: debajo.

407.3 fuera — outside

Recall **la casa**. Inside it is one location; beyond it is **fuera**, outside.

The word, taken apart — and its English cousins

Fuera comes from Latin **foras**, "outward." The core picture is crossing the boundary and standing beyond it. The opening **fue-** is one syllable: say FWE-ra, not fu-E-ra.

Grammar Lens: fuera and fuera de

Está fuera means it is outside. Add **de** for the boundary: **fuera de la casa**, outside the house.

Your turn

Say these aloud:

- *fuera*
- *está fuera*
- *fuera de la casa*

Before you move on

Outside? (*Fuera.*)
Source: DLE: fuera.

407.4 el lado — the side

A door has a left edge and a right edge. Each edge belongs to **un lado**, a side.

The word, taken apart — and its English cousins

Lado continues Latin **latus**, "side." English **lateral** is the learned cousin: a lateral movement goes toward one side.

Grammar Lens: al lado de

The useful location frame is **al lado de**, beside or next to: **al lado de la puerta**. The **al** is **a + el**, literally "at the side of."

Your turn

Say these aloud:

- *el lado*
- *al lado*
- *al lado de la puerta*

Before you move on

The side? (*El lado.*) Beside the door? (*Al lado de la puerta.*)
Source: DLE: lado.

407.5 location recall one — place four points

Give the four locations. (*En medio, debajo, fuera, el lado.*)

Your turn

Say these aloud:

- *en medio de la puerta*
- *debajo de la mesa*
- *fuera de la casa*
- *al lado de la puerta*

Before you move on

Middle, below, outside, side? (*Medio, debajo, fuera, lado.*)

407.6 location recall two — complete the map

Complete each frame: **en** _____ **de**, _____ **de**, _____ **de**, **al** _____ **de**. (*Medio, debajo, fuera, lado.*)

Your turn

Say these aloud:

- *en medio*
- *debajo*
- *fuera*
- *al lado*

Before you move on

Place an object in four different relations without translating. (*En medio de, debajo de, fuera de, al lado de.*)

Chapter 408

Doctor, Pills and Tiredness

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can identify a doctor, a medicinal tablet and the state of being tired.
>
> *Retrieve three health words across appointment, medicine and state messages.*

408.1 el doctor / la doctora — the teacher-word at the clinic

Recall **el médico**, the physician. Spanish has another word you will hear when making an appointment: **el doctor** or **la doctora**.

The word, taken apart — and its English cousins

Medieval Latin **doctor** meant "teacher," from **docēre**, "to teach." English kept the same academic word. Spanish also uses **doctor** for a physician and as a form of address. That does not erase the older academic meaning: context tells you whether the doctor holds a doctorate or is treating a patient.

Grammar Lens: name the person

The ending follows the person: **el doctor**, **la doctora**. To ask for an appointment, use the frame **pedir cita con el doctor**. **Médico** remains the more specific profession-word; **doctor** is the word the

mock message uses.

Your turn

Say these aloud:

- *el doctor*
- *la doctora*
- *una cita con el doctor*

Before you move on

Doctor? (*El doctor; la doctora.*)
Source: DLE: doctor.

408.2 la pastilla — a small formed portion

You have an appointment with **el doctor**. The next message names what you take: **la pastilla**.

The word, taken apart — and its English cousins

Pastilla looks like **pasta** plus the small-form ending **-illa**, but it comes from Latin *pastillus*, a little loaf or lozenge (EtymDB 2.1, Lewis & Short). The older physical idea survives in a bar of soap or a mint. In the clinic, **una pastilla** is a small medicinal tablet.
Do not overtranslate the shape. In this health frame, **pastilla** means the pill or tablet, not pasta to eat.

Your turn

Say these aloud:

- *la pastilla*
- *una pastilla*
- *el doctor y la pastilla*

Before you move on

Pill or tablet? (*La pastilla.*)
Sources: EtymDB 2.1 (Fourrier & Sagot 2020), *pastilla* ← Latin *pastillus*; Lewis & Short, *pastillus*, a diminutive of *pānis*.

408.3 health recall one — person, medicine, state

Give the person, the medicine and the state. (*El doctor, la pastilla, cansado.*)

Your turn

Say these aloud:

- *una cita con el doctor*
- *una pastilla*
- *estoy cansado*

Before you move on

Doctor, pill, tired? (*Doctor, pastilla, cansado.*)

408.4 health recall two — close the three messages

Complete the three cues: cita con el _____; una _____; estoy _____. (*Doctor, pastilla, cansado.*)

Your turn

Say these aloud:

- *el doctor*
- *la pastilla*
- *estoy cansado*

Before you move on

Retrieve all three without translating. (*Doctor, pastilla, cansado.*)

Chapter 409

Finish, Prepare and Plan the Weekend

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

By the end of this chapter: I can understand five common words used to finish, prepare and book a simple plan.

Retrieve five planning words across work, food, weekend and hotel messages.

409.1 terminar — reach the boundary

Recall **el trabajo**, the work. Now add the action that brings it to its endpoint: **terminar**, "to finish" or "to end."

The word, taken apart — and its English cousins

Latin **terminā̆re** meant to set a boundary or bring something to an end. Its base was **terminus**, a boundary. English **term**, **terminal** and **terminate** keep the same boundary picture. Spanish **terminar** is the everyday verb: **terminar el trabajo**, finish the work.

Grammar Lens: the regular -ar frame

For "I finish," remove **-ar** and add **-o**: **termino**. After another verb, keep the infinitive: **quiero terminar**. Hear the difference between a plan and a completed statement: **quiero terminar / termino**.

Your turn

Say these aloud:

- *terminar*
- *terminar el trabajo*
- *quiero terminar*

Before you move on

To finish? (*Terminar.*)
Source: DLE: terminar.

409.2 preparar — make ready beforehand

Recall **el postre**, dessert. Before it is served, someone has to make it ready: **preparar un postre**, "to prepare a dessert." You can **terminar** a task; first you may need to **preparar** its parts.

The word, taken apart — and its English cousins

Latin **praeparāre** joined **prae**, "before," to **parāre**, "make ready." Spanish **preparar** and English **prepare** preserve that family almost unchanged. The older verb **parar** is visible inside, but do not translate the modern compound as "pre-stop": use the whole word, "prepare."

Grammar Lens: prepare a thing or prepare to act

Use a noun directly: **preparar un postre**. Before another action, Spanish can use **prepararse para**; this lesson keeps the simpler A1 object frame.

Your turn

Say these aloud:

- *preparar*
- *preparar un postre*
- *me gusta preparar postres*

Before you move on

To prepare? (*Preparar.*)
Source: DLE: preparar.

409.3 el fin de semana — the week's end

Spanish builds "weekend" as a transparent phrase: **el fin de semana**, literally "the end of the week." It gives a time for a plan: **voy a preparar el postre este fin de semana**.

The word, taken apart — and its English cousins

Fin continues Latin **fīnis**, "boundary" or "end." **Semana** continues Late Latin **septimāna**, the seven-day period. The little **de** joins them: **fin de semana**. Learn the three words as one planning block.

Grammar Lens: one weekend, many weekends

For one, say **el fin de semana**. In the plural, only the first noun changes: **los fines de semana**. For a regular habit, **trabajo los fines de semana**; for one upcoming period, **este fin de semana**.

Your turn

Say these aloud:

- *el fin de semana*
- *este fin de semana*
- *los fines de semana*

Before you move on

The weekend? (*El fin de semana.*)
Sources: DLE: fin; DLE: semana.

409.4 reservar — set it aside

You have chosen **el fin de semana**. To book a room for it, use **reservar**: **reservar una habitación**.

The word, taken apart — and its English cousins

Latin **reservāre** meant "keep back" or "preserve." That image still works: a hotel sets a room aside for you. English **reserve** is a close relative. Keep the history at that safe level; resemblance to **servir** is not a reason to invent a separate family story.

Grammar Lens: book a thing for people

The thing follows directly: **reservar una habitación**. Add the people with **para**: **para dos personas**. Together: **quiero reservar una habitación para dos personas**.

Your turn

Say these aloud:

- *reservar*
- *reservar una habitación*
- *para dos personas*

Before you move on

To reserve or book? (*Reservar.*)
Source: DLE: reservar.

409.5 incluir — close it inside the whole

You can **reservar** a room. Now ask what comes inside the price: **¿Incluye el desayuno?**, "Does it include breakfast?"

The word, taken apart — and its English cousins

Spanish borrowed **incluir** from Latin **inclūdere**, literally "close in": **in**, "in," plus **claudere**, "close." English **include**, **exclude** and **conclude** share the same learned family. Something included is enclosed inside the whole.

Grammar Lens: the useful third-person form

The infinitive is **incluir**, but hotel messages often use **incluye**: **el precio incluye el desayuno**. In a question, keep the same form and lift the intonation: **¿Incluye el desayuno?**

Your turn

Say these aloud:

- *incluir*
- *incluye el desayuno*
- *el precio incluye el desayuno*

Before you move on

To include? (*Incluir.*) Does it include breakfast? (*¿Incluye el desayuno?*)
Source: DLE: incluir.

409.6 planning recall one — work, food, weekend, hotel

Give the five planning blocks. (*Terminar, preparar, fin de semana, reservar, incluir.*)

Your turn

Say these aloud:

- *terminar el trabajo*
- *preparar postres*
- *este fin de semana*
- *reservar una habitación*
- *incluye el desayuno*

Before you move on

Finish, prepare, weekend, reserve, include? (*Terminar, preparar, fin de semana, reservar, incluir.*)

409.7 planning recall two — complete the message

Complete each short message from meaning, not from the first letter.

Your turn

- "I finish at one." *Say it: Termino a la una.*
- "I like preparing desserts." *Say it: Me gusta preparar postres.*
- "I work on weekends." *Say it: Trabajo los fines de semana.*
- "I want to book a room." *Say it: Quiero reservar una habitación.*
- "The price includes breakfast." *Say it: El precio incluye el desayuno.*

Before you move on

Say the five planning blocks once more. (*Terminar, preparar, fin de semana, reservar, incluir.*)

Chapter 410

Academy, French, Student and Exam

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

By the end of this chapter: I can identify an academy, French, a student and an exam in simple education messages.

Retrieve four education words across course, identity and assessment messages.

410.1 la academia — from a place-name to a place of learning

Recall **estudiante**, a student. A student may learn at **la academia**, an academy or teaching centre.

The word, taken apart — and its English cousins

Spanish **academia** came through Latin **academia** from Greek **Akadēmía**, the place-name associated with Plato's school. English **academy** belongs to the same travelled family. In an A1 message, **una academia de idiomas** is a language school, not necessarily a university institution.

Grammar Lens: what kind of academy?

Use **de** to name the subject: **una academia de idiomas**. The noun is feminine: **la academia**, **una academia**.

Your turn

Say these aloud:

- *la academia*
- *una academia de idiomas*
- *soy estudiante en una academia*

Before you move on

Academy or teaching centre? (*La academia.*)
Source: DLE: academia.

410.2 francés / francesa — language and person

At **una academia de idiomas**, one possible subject is **francés**, French.

The word, taken apart — and its English cousins

Spanish **francés** came from French **français**. The language name is the masculine singular form: **hablo francés**. For people and adjectives, the ending agrees: **un estudiante francés**, **una estudiante francesa**.

Grammar Lens: the accent comes and goes

The final stress of **francés** needs its written accent. Adding **-a** moves the natural stress: **francesa**, with no accent mark. The plural follows the same pattern: **franceses, francesas**.

Your turn

Say these aloud:

- *francés*
- *una academia de francés*
- *una estudiante francesa*

Before you move on

French? (*Francés.*) A French woman or feminine adjective? (*Francesa.*)
Source: DLE: francés.

410.3 el examen — a weighing of what you know

A student of French may take **un examen de francés**, a French exam.

The word, taken apart — and its English cousins

Spanish **examen** is Latin **exāmen**, a weighing or examination. English **exam** and **examination** are learned relatives. The old weighing image is a useful memory hook: an exam weighs what has been learned.

Grammar Lens: singular and plural stress

The singular is **el examen**, with no written accent because the stress falls naturally on **-xa-**. The plural is **los exámenes**; the accent appears to keep that stress when another syllable is added.

Your turn

Say these aloud:

- *el examen*
- *un examen de francés*
- *los exámenes*

Before you move on

Exam? (*El examen.*) Exams? (*Los exámenes.*)
Source: DLE: examen.

410.4 education recall one — place, subject, learner, assessment

Give the place, subject, learner and assessment. (*Academia, francés, estudiante, examen.*)

Your turn

Say these aloud:

- *una academia de idiomas*
- *hablo francés*
- *soy estudiante*
- *un examen de francés*

Before you move on

Academy, French, student, exam? (*Academia, francés, estudiante, examen.*)

410.5 education recall two — complete the message

Complete each education message from meaning.

Your turn

- "It is a language academy." *Say it: Es una academia de idiomas.*
- "I speak French." *Say it: Hablo francés.*
- "I am a student." *Say it: Soy estudiante.*
- "The exam is difficult." *Say it: El examen es difícil.*

Before you move on

Say the four education words once more. (*Academia, francés, estudiante, examen.*)

Chapter 411

Ice Cream

Modes: 🚗 **voice** (3) 🚗 **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can identify and order ice cream in a simple café conversation.
>
> *Retrieve ice cream across identification and café-order messages.*

411.1 el helado — something frozen becomes a treat

Recall **el hielo**, ice. Its cold family leads to **el helado**, ice cream.

The word, taken apart — and its English cousins

Helado is the participle of **helar** (← Latin *gelāre*), to freeze: its first sense is "frozen." Used as a noun with **el**, it names ice cream. **Hielo**, **helar** and **helado** all continue the Latin cold-family already met in the ice lesson. The silent **h** links their modern spelling even though it makes no sound.

Grammar Lens: thing or description?

With an article, **el helado** is the food. After a noun, **helado / helada** can describe something frozen: **agua helada**. For the mock café message, listen for the noun **un helado**.

Your turn

Say these aloud:

- *el helado*
- *un helado de chocolate*
- *quiero un helado*

Before you move on

Ice cream? (*El helado.*) One chocolate ice cream? (*Un helado de chocolate.*)
Source: DLE: helado.

411.2 helado recall one — choose the frozen treat

Say "ice cream." (*Helado.*)

Your turn

- *Say it: un helado*
- *Say it: un helado de chocolate*
- "I want an ice cream." *Say it: Quiero un helado.*

Before you move on

What frozen treat begins with a silent **h**? (*El helado.*)

411.3 helado recall two — complete the café exchange

Listen for the food after **un**: **un helado**.

Your turn

- "What would you like?" — "A chocolate ice cream." *Say it: ¿Qué quieres? — Un helado de chocolate.*
- "I would like an ice cream, please." *Say it: Quiero un helado, por favor.*

Before you move on

Give the café answer once more. (*Un helado de chocolate.*)

Chapter 412

Gym and Sport

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can identify a gym and understand a simple message about doing sport.
>
> *Retrieve gym and sport across opening-hours and after-work messages.*

412.1 el gimnasio — the long form behind gym

English shortens **gymnasium** to **gym**. Spanish keeps more of the old word: **el gimnasio**.

The word, taken apart — and its English cousins

Spanish **gimnasio** came through Latin **gymnasium** from Greek **gymnásion**, a place for exercise and training. English **gymnasium** is the same travelled word, and **gym** is its clipped form. Spanish spelling turns the learned **gy-** into **gi-**, pronounced with the strong Spanish **g** sound heard before **i**.

Grammar Lens: naming the place

The noun is masculine: **el gimnasio**, **un gimnasio**. Opening-hours signs often place the name first: **Gimnasio Atlas — abierto de 7 a 23 h**.

Your turn

Say these aloud:

- *el gimnasio*
- *un gimnasio*
- *el gimnasio está abierto*

Before you move on

Gym? (*El gimnasio.*)
Source: DLE: gimnasio.

412.2 el deporte — recreation that became sport

Recall the place for exercise: **el gimnasio**. What you may do there is **deporte**, sport.

The word, taken apart — and its English cousins

Deporte belongs to an older **deportar** family that once meant recreation or amusement. English **sport** hides a useful cousin: it is the shortened form of **disport**, which came through French from the same Latin **deportāre** family. The histories narrowed toward organised physical activity.

Grammar Lens: hacer deporte

Spanish commonly says **hacer deporte**, literally "to do sport," for taking exercise. No article is needed in that general expression. Compare **el deporte es importante**, where the noun is the subject and keeps **el**.

Your turn

Say these aloud:

- *el deporte*
- *hacer deporte*
- *hacer deporte en el gimnasio*

Before you move on

To do sport? (*Hacer deporte.*)
Source: DLE: deporte.

412.3 fitness recall one — place and activity

Give the place and the activity. (*Gimnasio, deporte.*)

Your turn

Say these aloud:

- *el gimnasio*
- *hacer deporte*
- *hacer deporte en el gimnasio*

Before you move on

Gym, sport? (*Gimnasio, deporte.*)

412.4 fitness recall two — choose from the opening hours

A place open until 23 h suits someone active after work.

Your turn

- "The gym is open until eleven." *Say it: El gimnasio está abierto hasta las once.*
- "Marta wants to do sport after work." *Say it: Marta quiere hacer deporte después del trabajo.*

Before you move on

Which place matches **hacer deporte por la noche**? (*El gimnasio.*)

Chapter 413

Music and Concert

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can identify music and a concert in a simple night-out announcement.
>
> *Retrieve music and concert across preference and event messages.*

413.1 la música — another art of the Muses

Recall **el museo**, a place whose name once meant a seat of the Muses. Their art also gives Spanish **la música**.

The word, taken apart — and its English cousins

Greek **mousikḗ**, the art of the Muses, travelled into Latin **mūsica** and then Spanish **música**. English **music** followed the same road through French. The root is already anchored in **museo**, so this lesson extends that family rather than assigning it a second owner.

Grammar Lens: the written accent

The stress falls on the first beat: **MÚ-si-ca**. Spanish writes the accent because that antepenultimate stress must always be marked. The noun is feminine: **la música**, **música clásica**.

Your turn

Say these aloud:

- *la música*
- *música clásica*
- *me gusta la música*

Before you move on

Music? (*La música.*) Classical music? (*Música clásica.*)
Source: DLE: música.

413.2 el concierto — music brought together

Recall **la música**. A scheduled event where people perform music is **el concierto**.

The word, taken apart — and its English cousins

Concierto belongs to **concertar**, to bring things into agreement, from Latin **concertāre**. Italian and French helped the musical event-sense travel, and English **concert** is a close relative. Think of performers bringing their parts together.

Grammar Lens: concert of what?

Use **de** to name the kind: **un concierto de música clásica**. The event is masculine: **el concierto**, **un concierto**.

Your turn

Say these aloud:

- *el concierto*
- *un concierto de música*
- *un concierto de música clásica*

Before you move on

Concert? (*El concierto.*)
Source: DLE: concierto.

413.3 music recall one — preference and event

Give the art and the event. (*Música, concierto.*)

Your turn

Say these aloud:

- *me gusta la música*
- *un concierto*
- *un concierto de música clásica*

Before you move on

Music, concert? (*Música, concierto.*)

413.4 music recall two — choose the Saturday-night event

Someone likes music and wants to go out on Saturday night.

Your turn

- "Jorge likes music." *Say it: A Jorge le gusta la música.*
- "There is a classical music concert on Saturday." *Say it: Hay un concierto de música clásica el sábado.*

Before you move on

Which event matches the Saturday-night plan? (*El concierto de música clásica.*)

Chapter 414

Sign Up at Reception

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

By the end of this chapter: I can understand where and when to sign up for a class.

Retrieve sign up and reception in a simple class notice.

414.1 apuntarse — put your name on the list

Recall **el punto**, a point or item. Spanish builds **apuntar** from that family, and **apuntarse** can mean to put your own name down: to sign up.

The word, taken apart — and its English cousins

The base **punto** goes back to Latin **punctum**, a mark made by a prick. To **apuntar** is to note or point something; with **se**, **apuntarse** often means to add oneself to a list. The root is already anchored in **punto**, so this lesson extends that family.

Grammar Lens: who signs up?

The pronoun changes with the person: **me apunto** for "I sign up" and **apuntarse** after another verb, as in **hay que apuntarse**, "one must sign up." Use **a** for the activity: **apuntarse a una clase**.

Your turn

Say these aloud:

- *apuntarse*
- *me apunto a la clase*
- *hay que apuntarse antes*

Before you move on

To sign up? (*Apuntarse.*) One must sign up beforehand? (*Hay que apuntarse antes.*)
Source: DLE: apuntar.

414.2 la recepción — the place that receives you

Recall **apuntarse**, to put your name on a list. At a sports centre, the list may be kept at **la recepción**, the reception desk.

The word, taken apart — and its English cousins

Latin **receptio** meant a receiving. Spanish **recepción** and English **reception** belong to the same family. The place receives visitors, questions and sign-up requests.

Grammar Lens: place after en

Use **en la recepción** for "at the reception desk." The written accent marks the final stress: re-cep-**CIÓN**. A useful notice says **Hay que apuntarse en la recepción**.

Your turn

Say these aloud:

- *la recepción*
- *en la recepción*
- *hay que apuntarse en la recepción*

Before you move on

Reception desk? (*La recepción.*) At reception? (*En la recepción.*)
Source: DLE: recepción.

414.3 sign-up recall one — action and place

Give the action and the place. (*Apuntarse, recepción.*)

Your turn

Say these aloud:

- *apuntarse a una clase*
- *en la recepción*
- *hay que apuntarse en la recepción*

Before you move on

Sign up, reception? (*Apuntarse, recepción.*)

414.4 sign-up recall two — read the class notice

A yoga class has limited places. The notice tells visitors what to do before class and where to do it.

Your turn

- "One must sign up beforehand." *Say it: Hay que apuntarse antes.*
- "One must sign up at reception." *Say it: Hay que apuntarse en la recepción.*

Before you move on

What must a visitor do before the class? (*Apuntarse en la recepción.*)

Chapter 415

A Package Abroad

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can identify a package being sent abroad in a simple post-office message.
>
> *Retrieve package and abroad in a short post-office instruction.*

415.1 el paquete — a bundle packed for travel

Recall **el impreso**, the form you fill in. At a post office, the form may travel with **el paquete**, the package or parcel.

The word, taken apart — and its English cousins

Spanish borrowed **paquete** through French **paquet**, a small bundle. English **packet** travelled from the same word, and **pack** is a close family clue. Picture several things packed together into one parcel.

Grammar Lens: what happens to the package?

The noun is masculine: **el paquete**, **un paquete**. Use **enviar** for the action: **enviar el paquete**, to send the package.

Your turn

Say these aloud:

- *el paquete*

- *un paquete*
- *enviar el paquete*

Before you move on

Package? (*El paquete.*) To send the package? (*Enviar el paquete.*)
Source: DLE: paquete.

415.2 el extranjero — the world outside one's country

Recall **el paquete**. If it crosses a national border, you can send it **al extranjero**, abroad.

The word, taken apart — and its English cousins

The family reaches back to Latin **extraneus**, "from outside." It travelled through Romance in several directions; English **strange** and **stranger** are distant relatives. Spanish **extranjero** can name a foreign person, but **el extranjero** in the frame **al extranjero** means abroad.

Grammar Lens: a + el

Spanish contracts **a** + **el** to **al**: **enviar el paquete al extranjero**. The place frame, not a person's nationality, is the useful meaning here.

Your turn

Say these aloud:

- *el extranjero*
- *al extranjero*
- *enviar el paquete al extranjero*

Before you move on

Abroad? (*Al extranjero.*)
Source: DLE: extranjero.

415.3 package recall one — parcel and destination

Give the parcel and the destination. (*Paquete, al extranjero.*)

Your turn

Say these aloud:

- *el paquete*
- *al extranjero*
- *enviar el paquete al extranjero*

Before you move on

Package, abroad? (*Paquete, al extranjero.*)

415.4 package recall two — hear the post-office message

A post-office worker explains which form a customer needs for an international parcel.

Your turn

- "Send the package abroad." *Say it: Enviar el paquete al extranjero.*
- "To send the package abroad, you need to fill in this form." *Say it: Para enviar el paquete al extranjero, necesita rellenar este impreso.*

Before you move on

Which place does that message belong to? (*Una oficina de correos.*)

Chapter 416

Stay in May

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can understand the month and length of a simple hotel stay.
>
> *Retrieve stay and May in a short hotel booking exchange.*

416.1 quedarse — come to rest and stay

Recall **una habitación**, a room. A traveller who keeps that room for several nights is going to **quedarse**, to stay.

The word, taken apart — and its English cousins

Spanish **quedar** reaches back to Latin **quietāre**, to make quiet or bring to rest. The **se** turns the action toward the person: **quedarse** is to remain or stay. Think of a traveller coming to rest in one place.

Grammar Lens: say who stays

The pronoun changes with the person: **me quedo** means "I stay," while the infinitive follows another verb in **quiero quedarme**, "I want to stay." A duration can follow directly: **quedarse tres noches**.

Your turn

Say these aloud:

- *quedarse*

- *me quedo tres noches*
- *quiero quedarme tres noches*

Before you move on

To stay? (*Quedarse.*) I am staying three nights? (*Me quedo tres noches.*)
Source: DLE: quedar.

416.2 mayo — Maia's month

Recall the months and **quedarse**, to stay. The hotel dates in this chapter fall in **mayo**, May.

The word, taken apart — and its English cousins

Spanish **mayo** continues Latin **Maius**, the Roman month associated with **Maia**. English **May** preserves the same name. Keep it separate from **mayor**, "bigger" or "older": their similar spelling does not make them the same word.

Grammar Lens: dates use de

Spanish links a day to its month with **de**: **el quince de mayo**, the fifteenth of May. A range uses **del ... al ...**: **del quince al dieciocho de mayo**. The month name stays lowercase.

Your turn

Say these aloud:

- *mayo*
- *el quince de mayo*
- *quedarse tres noches en mayo*

Before you move on

May? (*Mayo.*) The fifteenth of May? (*El quince de mayo.*)
Source: DLE: mayo.

416.3 stay recall one — duration and month

Give the action and the month. (*Quedarse, mayo.*)

Your turn

Say these aloud:

- *quedarse*
- *mayo*
- *quedarse tres noches en mayo*

Before you move on

Stay, May? (*Quedarse, mayo.*)

416.4 stay recall two — hear the hotel dates

A hotel guest gives arrival and departure dates, then confirms the number of nights.

Your turn

- "I want to stay three nights." *Say it: Quiero quedarme tres noches.*
- "From the fifteenth to the eighteenth of May." *Say it: Del quince al dieciocho de mayo.*

Before you move on

How many nights, and in which month? (*Tres noches, en mayo.*)

Chapter 417

An Adult Swimming Course

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can understand a simple notice for an adult swimming course.
>
> *Retrieve course, swim, and adult in a short class notice.*

417.1 el curso — a path of learning

Recall **aprender**, to learn. A planned path for learning something is **un curso**, a course or class.

The word, taken apart — and its English cousins

Latin **cursus** meant a running or a course, from **currere**, to run. English **course** keeps the same idea of a route, while **current** is something running onward. A learning course is a route followed from lesson to lesson.

Grammar Lens: name the subject

The noun is masculine: **el curso**, **un curso**. Use **de** to name its subject: **un curso de natación**, a swimming course.

Your turn

Say these aloud:

- *el curso*

- *un curso*
- *un curso de natación*

Before you move on

Course? (*El curso.*) A swimming course? (*Un curso de natación.*)
Source: DLE: curso.

417.2 nadar — move through the water

Recall **la piscina** and **un curso**. What might a course at a pool teach? **Nadar**, to swim.

The word, taken apart — and its English cousins

Spanish **nadar** continues Latin **natāre**, to swim. English keeps the root in **natatorium**, a building with a swimming pool. The infinitive ends in **-ar**, like many familiar action words.

Grammar Lens: learn to swim

After **aprender**, Spanish uses **a** before another verb: **aprender a nadar**, to learn to swim. The related noun is **la natación**, swimming, as in **curso de natación**.

Your turn

Say these aloud:

- *nadar*
- *aprender a nadar*
- *un curso de natación*

Before you move on

To swim? (*Nadar.*) To learn to swim? (*Aprender a nadar.*)
Source: DLE: nadar.

417.3 adulto, adulta — fully grown

Recall **un curso** and **nadar**. If this class is for grown-ups, the notice says **para adultos**, for adults.

The word, taken apart — and its English cousins

Latin **adultus** meant grown up, from **adolescere**, to grow. English **adult** is the same word with its ending shortened. Spanish keeps the ending and matches gender and number: **adulto**, **adulta**, **adultos**, **adultas**.

Grammar Lens: say who it is for

Use **para** for the intended group: **un curso de natación para adultos**. The plural **adultos** can describe a mixed group or a group of men.

Your turn

Say these aloud:

- *adulto, adulta*
- *para adultos*
- *un curso de natación para adultos*

Before you move on

Adult? (*Adulto, adulta.*) For adults? (*Para adultos.*)
Source: DLE: adulto.

417.4 swimming recall one — course, action, learner

Give the class, the action, and the learner. (*Curso, nadar, adulto.*)

Your turn

Say these aloud:

- *un curso*
- *aprender a nadar*
- *para adultos*

Before you move on

Course, swim, adults? (*Curso, nadar, adultos.*)

417.5 swimming recall two — read the class notice

A municipal pool advertises evening lessons for grown learners.

Your turn

- "Here you can learn to swim." *Say it: Aquí puede aprender a nadar.*
- "Swimming course for adults." *Say it: Curso de natación para adultos.*

Before you move on

What is offered, and for whom? (*Un curso de natación para adultos.*)

Chapter 418

Writing — Four Lines That Hold Together

Modes: ✓ **pen** (1) **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can write four connected lines to a named reader about what I did yesterday, using y to add and porque to give a reason, so that a line depends on the one before it.
>
> *Complete ES-W02-cuatro-lineas-ayer: four lines to one named reader, at least one joined with y and at least one with porque, then cover line one and check line two still needs it.*

418.1 Four lines to one person — where the second needs the first

> The last writing lesson asked for lines that were **correct**. This one asks for lines that **hold together**, which is a different thing and a harder one.
>
> Pick one person who will read this. A real one. You will need them in a moment.

What to know first

Connected writing is not **longer** writing. Four short lines can be connected, and one long line can fail to be.

What makes writing connected is that a sentence stops standing on its own — line two is about line one, and a reader who skipped line one would not follow it.

Spanish gives you exactly two words for that at this point, and they do opposite jobs. **y** adds one thing to another. **porque** puts one thing *under* another and says it is the reason.

That is the whole difference between a list and a paragraph. A list can be read in any order. A paragraph cannot.

Writing — connected composition

Write **four lines** about yesterday, addressed to the person you picked. Greet them, tell them two things you did, and close.

At least one line must use **y**, and at least one must use **porque**.

A worked example, from words you already hold:

> Hola. Ayer fui a la tienda y comí pan. Hablé con mi amiga porque tuve tiempo. Hasta luego.

Now write your own four. Do not copy the example — it is there to show the **shape**, and its second and third lines are the only ones doing the work.

Before you move on

Cover your first line and read the second on its own. Does it still make sense without the first?

If it does, you wrote a **list**. That is not a failure — it is the stage you were at one lesson ago — but go back and make one line depend on another before you stop.

And read it as the person you named would. Writing for a reader you can picture is the part that makes this a real task rather than an exercise, and it is the part the exam will keep asking for at every level above this one.

Chapter 419

Dancing, and the Article You Drop

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can say that I like dancing, dropping the article before the infinitive that I keep before the noun.
>
> *Say both halves in one breath: me gusta la musica y me gusta bailar, and notice that la was said once and not twice.*

419.1 bailar — and the verb that needs no article

You have met *me gusta* ***la*** *música*, which keeps an article English throws away. Hold that thought — this lesson is the case where the rule switches off.

What to know first

- música — the noun this verb belongs with, and the article rule this lesson contrasts against.

Sounds you'll need

- `diphthong-ai` — **ai** is one syllable, *bai-*, close to English *bye*. → reference
- `b-soft` — the **b** is softer than an English *b*; the lips barely close.
- `r-tap` — the final **r** is a single flick of the tongue, not a growl.

The word, taken apart — and its English cousins

bailar — "to dance." An *-ar* infinitive, the most ordinary shape a Spanish verb can have.
Root: Late Latin **ballare**, "to dance," probably from Greek *ballízein*; Spanish took it through Occitan *balar*. This root travelled further into English than almost any other on this page:

- a **ball** — the *dancing* kind. A ballroom is a room for *ballare*.
- **ball**et — through Italian *balletto*, "a little dance."
- **ball**ad — Provençal *balada*, originally a **song you danced to**. That is why a ballad tells a story in verses: the verses were danced.

And now the trap worth knowing, because it looks like the strongest member of the family and is not:

> A **ball** you *throw* is not related. That one is Germanic. English has two unrelated words spelled *ball*, and only the one you dance at comes from *ballare*.

Grammar Lens: where the article rule switches off

Put the two halves of this chapter side by side:

> *Me gusta* ***la*** *música.* — I like music. **Article.** *Me gusta bailar.* — I like dancing. **No article.**

This is not an exception to memorise; it follows from what *gustar* does. It needs a subject, and an infinitive is already one — *bailar* means "to dance," a whole action named. A **noun** needs its article to be spoken of in general; a **verb** does not, because naming it is what the infinitive is for.
So: if what pleases you is a thing, it takes *el* or *la*. If what pleases you is an action, the bare infinitive is the whole answer.

Your turn

Say these aloud:

- "bailar" — one flick of the tongue on the final *r*
- "me gusta bailar" — I like dancing, with no article
- "me gusta la música y me gusta bailar" — both halves, and notice you said *la* once and not twice

Before you move on

Why does *me gusta la música* take *la* while *me gusta bailar* takes nothing? (A noun needs its article to mean the thing in general; an infinitive already names the action.) Which English *ball* comes from this root — the dance or the thing you throw? (The dance.)

Chapter 420

Theatre, Exhibition, Circus

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the theatre, an exhibition and the circus, and say what each word is actually named after: the audience, a putting-out, and the shape of the floor.
>
> *Propose an outing to each of the five places, choosing al or a la without stopping to think, because the -cion ending already told you which one is feminine.*

420.1 el teatro — a place for looking, and the word theory came from it

You can already name *el cine*. Say it, then say the building people went to for two thousand years before there was any such thing.

What to know first

- el cine — the other place you go to watch something, and the one whose name is barely a century old.

Sounds you'll need

- `stress-penultimate` — *te-A-tro*, stress on the second of three. → reference
- `r-tap` — the **r** is one flick of the tongue, not a growl.

The word, taken apart — and its English cousins

el teatro — "the theatre." Latin *theatrum*, from Greek **théatron**, "a place for viewing," built on *theáomai*, "to behold."
The Greeks named the building after **what the audience does**, not after what happens on the stage. A theatre is a looking-place.
Now the payoff. That same *theá-* gives Greek *theōría* — "a viewing, a contemplation" — which arrives in English as **theory**:

- **theat**re, amphi**theat**re — the looking-place.
- **theor**y, **theor**etical — what you see when you look hard at something.

A theory and a theatre are the same idea twice: **someone standing back and watching.** Spanish keeps both, *teatro* and *teoría*, and they have never stopped being cousins.

Grammar Lens: two names, two ages

Set the two buildings beside each other:

place	named after	age of the word
el teatro	what the audience does — viewing	ancient Greek
el cine	what the machine does — writing movement	about 1900

Both are masculine and both take *el*. One is among the oldest words in this book and one is among the newest, and you learned them a chapter apart.

Your turn

Say these aloud:

- "el teatro" — *te-A-tro*
- "el cine y el teatro" — both places, both masculine
- which English word for an idea comes from the same root as *teatro* (theory)

Before you move on

What did the Greeks name the theatre after — the stage, or the audience? (The audience: *théatron* is a place for viewing.) What everyday English word for an explanation shares that root? (*Theory.*)

420.2 la exposición — a putting-out

You have *el museo*. A museum holds its collection all year. Say the word for the thing a museum puts on for three months and then takes down.

What to know first

- el museo — the building. This lesson is the event inside it.

Sounds you'll need

- `accent-acute` — the accent is on the last syllable: *ex-po-si-CIÓN.* → reference
- `ci-th-s` — the **c** before **i** is the soft one.

The word, taken apart — and its English cousins

la exposición — "the exhibition." Latin *expositio*: **ex-** ("out") plus **ponere** ("to place"). An exhibition is literally **a putting-out**. *ponere* is one of the most productive verbs Latin ever handed on. Once you see it, it is everywhere:

- ex**pos**e, ex**pos**ition — placed out.
- com**pos**e — placed together. de**pos**it — placed down.
- **pos**ition, post**pone**, com**pon**ent, op**pon**ent.

Spanish has the verb itself, *poner*, "to put" — so *exposición* is transparent to a Spanish speaker in a way that *exhibition* is not to an English one.

Grammar Lens: the ending that tells you the gender

Nouns ending in **-ción** are feminine, without exception worth worrying about.

la exposición, *la habitación*, *la nación*. The ending comes from Latin *-tio*, which was feminine, and Spanish kept the gender along with the sound.
That makes **-ción** one of the few endings you can trust on sight — most noun gender has to be learned with the word, and this one does not.

Your turn

Say these aloud:

- "la exposición" — accent on the last syllable
- "el museo y la exposición" — the building and the event
- which article a noun ending in *-ción* takes, and why (*la* — the ending is feminine, from Latin *-tio*)

Before you move on

What are the two Latin pieces inside *exposición*, and what do they add up to? (*ex-* "out" plus *ponere* "to place" — a putting-out.)
What gender does **-ción** guarantee? (Feminine.)

420.3 el circo — the ring, and the two c's in one word

Circo has two **c**'s and they are not the same sound. Before reading on, say the word and listen to which one is soft.

Sounds you'll need

- `ci-th-s` — the first **c**, before **i**, is soft. → reference
- `c-hard` — the second **c**, before **o**, is hard, as in *cat*.
- `stress-penultimate` — *CIR-co*.

One word, one letter, two jobs. The vowel that follows decides, every time.

The word, taken apart — and its English cousins

el circo — "the circus." Latin *circus*, "a ring," borrowed from Greek *kírkos*. The Romans' *Circus Maximus* was a ring you raced around; the tent came much later and kept the shape and the name.
The family is large and all of it is round:

- **circ**le, **circ**uit, **circ**ular, **circ**umference.
- **circ**a — "around" a date.
- Spanish *cerca* ("near") and *cercar* ("to surround") come from the same ring.

So a circus is not named for clowns or animals. It is named for **the shape of the floor**.

Grammar Lens: the rule you can see inside one word

Most words make you check the letter against the vowel that follows it. *Circo* does the checking for you, because it contains both cases:

letter	followed by	sound
cir-	i	soft
-**c**o	o	hard

Keep this word as your reference. Whenever you are unsure how a **c** should sound, say *circo* and listen to which half matches.

Your turn

Say these aloud:

- "el circo" — soft, then hard
- "el teatro y el circo" — both masculine
- what the word is actually named after (the ring — the shape of the floor)

Before you move on

Which **c** in *circo* is soft and why? (The first — it is followed by **i**.) What does the Latin *circus* mean, and which English words keep it? (A ring: circle, circuit, circa.)

420.4 cinco lugares — five places, sorted by what their names describe

Name the five places you can now go to. Say them out loud before reading the list.

Grammar Lens: what each name is actually about

Every one of these buildings is named after something different, and once you sort them that way they stop being a list to memorise:

place	named after	the thing itself
el teatro	the audience	a looking-place
el cine	the machine	a movement-writer
el museo	the Muses	a seat of the arts
la exposición	the act	a putting-out
el circo	the floor	a ring

Two are named for **people** (the audience, the Muses), one for a **machine**, one for an **action**, and one for a **shape**. Not one of them is named for the art that happens inside it.

Your turn

Say these aloud:

- the four masculine ones with *el* (teatro, cine, museo, circo)
- which of the five you would go to in order to *bailar*, and notice that none of them is the obvious answer — the verb needs no place at all
- the one feminine one with *la*, and why (*la exposición* — the **-ción** ending)
- which two are named after people (*el teatro*, *el museo*)

Before you move on

Which of the five is named after the shape of its floor? (*El circo.*) Which is named after what the audience does? (*El teatro.*) Which one is an event rather than a building? (*La exposición.*)

420.5 ¿Vamos al teatro o al circo? — the five places in a real question

A place you can name is not yet a place you can propose. Ask a friend whether they want to go to the theatre or the circus, out loud, before reading on.

Grammar Lens: al and a la, doing the gender work for you

Proposing an outing needs *a* ("to") in front of the place, and the article comes along:

> *¿Vamos* ***al*** *teatro?* — masculine, so *a + el* squeezes into **al**.
> *¿Vamos* ***a la*** *exposición?* — feminine, so the two words stay apart.

Four of your five places take **al**. Only *la exposición* takes **a la**, and you can predict which without remembering, because **-ción** told you the gender when you met the word.

Read this

Every word here is one you have met:

> —¿Vamos al cine? —No. Vamos al teatro. —¿Y el sábado? —El sábado, a la exposición del museo. Y el domingo, al circo. —¿Y después del circo? —Después, a bailar.

Four places, one short exchange, and the only thing you had to decide each time was **al** or **a la**.
The last line is the exception that proves it. *Bailar* is a verb, not a place, so it takes plain **a** and no article at all — the same reason *me gusta bailar* needed none.

Your turn

Say these aloud:

- "¿Vamos al teatro?" — with the opening question mark heard as a rise from the start
- "¿Vamos a la exposición?" — two words, because the noun is feminine
- propose the circus, then the museum, in the same shape

Before you move on

Which of your five places is the only one that takes *a la*, and how did you know before you had to think about it? (*La exposición* — the **-ción** ending is feminine.) Say the other four with *al*.

Chapter 421

The Actor and the Actress

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name the actor and the actress, say why the feminine is actriz rather than actora, and ask who is in a film rather than only what the film is.
>
> *Ask who is in the film and answer with a person rather than a thing, choosing the article from the person's gender and not from the word's ending.*

421.1 el actor — the one who does, which is all the word has ever meant

You can name *el teatro* and *la película*. Say both. Now say the one thing neither of them can do without, and that you have never been given a word for.

What to know first

- el teatro — the looking-place, where this person works in front of you.
- la película — the film, where this person works on a strip of plastic instead.

Sounds you'll need

- `stress-final` — *ac-TOR*, stress on the last syllable. English says *AC-tor* and Spanish says the opposite end. Moving it is the whole difference between sounding Spanish and sounding foreign here. → reference
- `r-tap` — the final **r** is one flick of the tongue, not the English curl.

The word, taken apart — and its English cousins

el actor — "the actor." Latin **actor**, from the verb **agere**, "to drive, to do, to set in motion."
Latin built agent nouns with **-tor**: take a verb, add *-tor*, and you get *the one who does it*. The pattern is still visible in dozens of English words that were borrowed whole:

Latin verb	meaning	the one who does it
agere	to do	**actor**
docere	to teach	doctor
dirigere	to direct	director
inspicere	to look into	inspector

So *actor* is not a theatre word at all. It is **doer**, and Latin used it for anyone who acted in any sense — an agent, a driver of cattle, a man pleading a case in court. The stage borrowed a perfectly ordinary word and kept it.
Agere is still visible all over English, and it never stopped meaning "do": an **agent** is someone doing something on your behalf, an **agenda** is literally *things that must be done*, and an **action** is a doing.

Grammar Lens: the two workplaces

The same person, two places you already have words for:

where	what is watched	live?
el teatro	the actor	yes
el cine	la película	no

El actor is masculine and takes *el*. That is the easy half. The other half — what to call a woman who does the same work — is the next

lesson, and Spanish answers it with an ending that almost nothing else in the language uses.

Your turn

Say these aloud:

- "el actor" — *ac-TOR*, stress at the end
- "el actor del teatro" — the actor from the theatre
- which English word meaning "things to be done" comes from the same Latin verb (*agenda*)

Before you move on

What did Latin *agere* mean? (To do, to drive.) So what does the *-tor* ending add? (The one who does it.) Where does the stress fall in *actor* in Spanish? (On the last syllable: *ac-TOR*.)

421.2 la actriz — the ending that did not follow the usual rule

You have *el actor*. Say it. Now guess the feminine before reading on, and expect to be wrong — the obvious guess is not what Spanish does here.

What to know first

- el actor — the doer, from *agere*, with the Latin agent-noun ending *-tor*.

Sounds you'll need

- `stress-final` — *ac-TRIZ*, stress on the last syllable, like *actor*. → reference
- `r-tap` — the **r** in *-triz* is a single tap, and it sits between two consonants, which is where it is easiest to over-roll.

The word, taken apart — and its English cousins

la actriz — "the actress." Not *la actora*, which is what the ordinary Spanish habit of swapping **-o** for **-a** would have produced.
Latin had its own feminine for *-tor* nouns: **-trix**. *Actor* / **actrix**. Spanish took that pair from Latin, turned the Latin **-x** into **-z**, and kept it.
The ending is nearly extinct; the few *-triz* words left fit in one table:

masculine	feminine	meaning
el actor	la **actriz**	the actor
el emperador	la empera**triz**	the emperor
el institutor	la institu**triz**	the governess

English kept the same Latin ending in **aviatrix** and **dominatrix**; **matrix** only looks like one, built on *mater*, "mother".
Everywhere else in Spanish, the feminine of a person-noun is the ordinary swap: *el camarero* / *la camarera*. **-triz** is the exception, and *actriz* is the one you will meet most.

Grammar Lens: two words, one root, three endings

Everything on this row came out of one Latin verb:

word	ending	what the ending does
acto	—	the deed itself
el **act**or	-or	the man who does it
la **act**riz	-riz	the woman who does it

Strip the endings and the same three letters are left standing: **act-**.
The root does the meaning; the ending only says *who*.
Note the article changes with the person, not with the building: *el actor del teatro*, *la actriz del teatro*. The theatre stays masculine either way.

Your turn

Say these aloud:

- "la actriz" — *ac-TRIZ*, stress at the end

- "el actor y la actriz" — and hear that only the article and the ending moved
- "la actriz del teatro"
- the feminine of *emperador*, using the same ending (*emperatriz*)

Before you move on

Why is it not *la actora*? (Spanish took the Latin feminine *actrix* from Latin, rather than applying its own **-o** to **-a** swap.) Which English words keep the same ending? (*Aviatrix*, *dominatrix*.) Which syllable is stressed in both *actor* and *actriz*? (The last.)

421.3 la escena completa — two places, one thing, two people

Name the two people from the last two lessons, with their articles, before going further.

Grammar Lens: places, things and people take different endings

Five words, and the gender of each is decided by a different kind of evidence:

word	article	what decides it
el teatro	el	the **-o** ending of a place-word
el cine	el	inherited with the shortened word
la película	la	the **-a** ending of a thing-word
el actor	el	the person is male
la actriz	la	the person is female

That is the useful split. For a **place** or a **thing**, the ending tells you the article and the world has no say in it. For a **person**, the world decides and the ending follows.

So *la película* is feminine for a reason that has nothing to do with anyone being female, while *la actriz* is feminine for exactly that reason.

Read this

Read it: the scene aloud
Every word in it has appeared before:

> El actor está en el teatro. La actriz está en el cine. La película es de la actriz.

Three short sentences, five known words, no new grammar.

Your turn

Say these aloud:

- the two places with *el* (*el teatro*, *el cine*)
- the thing with *la* (*la película*)
- the two people, each with its own article (*el actor*, *la actriz*)
- which of the five is feminine because a person is female, and which is feminine only because of its ending

Before you move on

Which two of the five change their article according to who is being talked about? (*El actor* and *la actriz*.) Which three never change? (*El teatro*, *el cine*, *la película*.)

421.4 ¿Quién está en la película? — the question the two new words were for

Say *el actor* and *la actriz* once each. You are about to use both inside a question rather than on their own.

Grammar Lens: naming a person answers a different question

Two question words you already have, pointed at the same film:

question	what it asks for	answer from this chapter
¿Qué es?	a thing	*Es una película.*
¿Quién está en la película?	a person	*El actor.* / *La actriz.*

Qué wants the thing word. *Quién* wants the person word. Until this chapter you could answer only the first of the two about anything on a screen or a stage, because the corpus had named the film and never named anyone in it.

Read this

— ¿Vamos al cine? — Sí. ¿Qué película es? — Es la película de la actriz. — ¿Y el actor? — El actor está en el teatro.

Note the inverted marks opening each question, and that *de la actriz* is how Spanish says *the actress's*.

Your turn

Say these aloud:

- "¿Quién está en la película?" and then answer it with each of the two people in turn
- "la película del actor" and "la película de la actriz", and hear where *de + el* contracts and where it cannot
- where each of the two people is, using *el teatro* and *el cine*

Before you move on

Which question word asks for a person rather than a thing? (*Quién*.) What happens to *de el* in *la película del actor*? (It contracts to *del*.) Why does *de la actriz* not contract? (The contraction exists only for *de + el*.)

Chapter 422

The Web Page

Modes: **voice** (1) **eyes** (2) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can name a web page, say why it is feminine and why web never takes a plural -s, and read the line a form prints without its article.
>
> *Read the bare noun on a printed form and say the same thing aloud with its article, which is the difference between how a reading paper and a listening paper present the identical word.*

422.1 la página web — a two-thousand-year-old word doing a thirty-year-old job

> Say *internet* and *el ordenador*. You have the network and you have the machine. Say what is missing: the thing on the screen itself.
>
> *Write it:* two lines about yesterday where the second needs the first, joined by *y*: *Ayer fui a la tienda y comí pan.*

What to know first

- internet — the network itself.
- el ordenador — the machine, named in Spanish for what it *orders* rather than what it counts.
- el correo electrónico — the other thing that travels over the network.

Sounds you'll need

- `stress-antepenultimate` — *PÁ-gi-na*, stress on the third syllable from the end, which is exactly what the written accent is there to tell you. → reference
- `g-soft` — the **g** in *página* comes before **i**, so it is the throaty sound, not the **g** of *gato*.

The word, taken apart — and its English cousins

la página web — "the web page." Two words from two thousand years apart: one taken from Latin books, one from English.
Página is Latin **pagina**, from **pangere**, "to fasten, to fix in place." A Roman *pagina* was a page; Festus, a Roman scholar, explained the name by the lines of verse **fastened** into it (Lewis & Short).

word	what got fastened
página	writing, into a frame
pacto (a pact)	two parties, into an agreement
paz (peace)	the same, after a war

Web is English, taken whole. Spanish did not translate it.

Grammar Lens: which half carries the gender

name	article	what the second word is
el correo electrónico	**el**	an adjective, and it agrees with *correo*
la página web	**la**	a noun bolted on, and it never moves

The first word is the real noun and it decides everything. *Web* is a borrowed noun in an adjective's chair, so it never changes: *dos páginas web*, with no **-s** on *web*.

Your turn

Say these aloud:

- "la página web" — *PÁ-gi-na web*

- "la página web está en internet"
- "dos páginas web" — and stop yourself before adding an **-s** to *web*
- which Spanish word for peace comes from the same root as *página* (*paz*)

Before you move on

What did Latin *pangere* mean? (To fasten, to fix in place.) Why is *página web* feminine? (*Página* is the head noun and it ends in **-a**.) What happens to *web* in the plural? (Nothing — it stays *web*.)

422.2 cuatro palabras de internet — four words, four different ways in

Name the four things you can now talk about on a screen. Say them with their articles before reading the table.

Grammar Lens: borrowed, translated, or built

English named all four of these things first. Spanish did something different with each one, and that is the pattern worth carrying away:

Spanish	English source	what Spanish did
internet	internet	took it whole
el ordenador	computer	**refused** it and used a French word instead
el correo electrónico	e-mail	translated both halves
la página web	web page	translated one half and kept the other

Four things, four strategies, and no rule decided which. *Ordenador* is the interesting one: Spain went to French *ordinateur*, "the thing that puts in order," rather than to the Latin *computare*, "to count." A machine that orders is a different idea about what the machine is for than a machine that counts.

Read this

Read aloud. Nothing here is new:

> El ordenador está en internet. La página web está en el ordenador. El correo electrónico también.

Your turn

Say these aloud:

- the three that take *el* (*el ordenador*, *el correo electrónico*, and the network word, which takes no article at all)
- the one that takes *la* (*la página web*)
- which of the four Spanish refused to borrow (*el ordenador*)
- "la página web y el correo electrónico"

Before you move on

Which of the four words is entirely Spanish in both halves? (*El correo electrónico.*) Which came from French rather than English? (*El ordenador.*) Which keeps an English word inside it? (*La página web.*)

422.3 ¿Cuál es la página web? — the question a form actually asks you

Say *la página web* and *el correo electrónico* one after the other. Both are things a form will ask you for.

Grammar Lens: the line on a form is the bare noun

A printed form drops the article; a person speaking puts it back:

on the form	**spoken aloud**
Correo electrónico:	¿Cuál es **el** correo electrónico?
Página web:	¿Cuál es **la** página web?

This is worth noticing because a reading paper shows you the left-hand column and a listening paper plays you the right-hand one. The same

word looks bare in one and dressed in the other.

Read this

Formulario Nombre: Correo electrónico: Página web:

Three lines, no articles, and you can now read every one of them.

Your turn

Say these aloud:

- "¿Cuál es la página web?"
- "¿Cuál es el correo electrónico?" and hear the article change while the question word does not
- "la página web está en el ordenador"

Before you move on

Why does a form print *Página web:* without *la*? (A form label is the bare noun; the article belongs to speech.) Which article does it take when you say it aloud? (*La.*)

Chapter 423

Character, Not Mood

Modes: **voice** (7) **eyes** (1) **Hands-free start:** the first 6 of 8 lessons.

> ***By the end of this chapter:*** I can describe what a person is like rather than how they feel today, using eight settled-character adjectives and predicting from the spelling alone which of them change ending for a woman.
>
> *Answer the question how is he or she, using es for settled character and letting only the adjectives that can agree do so.*

423.1 antipático — the opposite made by fastening four letters on the front

> Say *simpático*. Now say what you would expect its opposite to look like, before reading on. This is one of the times the obvious guess is right.
>
> *Write it:* one line with *porque* before the new words — *Hablé con mi amiga porque tuve tiempo.* — then one of your own

What to know first

- simpático — likeable, and a false friend: it does not mean *sympathetic*.

Sounds you'll need

- `accent-acute` — *an-ti-PÁ-ti-co*: the written accent sits where the stress does, and adding *anti-* does not move it. → reference
- `t-dental` — both **t** sounds are made with the tongue on the teeth, with no puff of air after them.

The word, taken apart — and its English cousins

antipático — "unpleasant, disagreeable." Take *simpático* and put Greek **anti-**, "against, opposite," on the front.
The two Greek prefixes underneath are a pair, and seeing them together makes both words transparent:

prefix	**Greek meaning**	**with *-pático***
sym-	together with	feeling **with** you
anti-	against	feeling **against** you

The *-patí-* in the middle is *páthos*, "feeling, suffering" — the same piece inside English **sympathy**, **empathy** and **pathetic**.
So *simpático* and *antipático* are literally *feeling-with* and *feeling-against*. Spanish uses them for people who are pleasant and unpleasant to be around, which is a fair everyday translation of the same idea.
Anti- is doing exactly the job you already know it does in English: **anti**biotic, **anti**septic, **Ant**arctic — against life, against rot, opposite the Bear.

What you've built

Both words end in **-o** and both change ending to match the person:

	masculine	**feminine**
pleasant	simpátic**o**	simpátic**a**
unpleasant	antipátic**o**	antipátic**a**

The prefix never moves and never agrees. Only the last letter does the work.

Your turn

Say these aloud:

- "antipático" — five syllables, stress on *PÁ*

- "simpático y antipático" one after the other
- both in the feminine (*simpática*, *antipática*)
- which Greek word for feeling is buried in the middle of both (*páthos*)

Before you move on

What does *anti-* mean? (Against.) What does the *-patí-* in the middle mean? (Feeling.) Does the written accent move when the prefix is added? (No — it stays on *PÁ*.)

423.2 inteligente — picking between things, which is all intelligence ever was

Say *alegre*. Notice it ends in **-e** and never changes for a man or a woman. The word in this lesson does the same thing.

What to know first

- alegre — cheerful, and the first **-e** adjective you met that refuses to agree.

Sounds you'll need

- `g-soft` — the **g** in *-gente* comes before **e**, so it is the throaty sound. *In-te-li-JEN-te*, not *gen* as in English. → reference
- `stress-penultimate` — stress on *JEN*, the second syllable from the end, and the word carries no written accent because that is already the default.

The word, taken apart — and its English cousins

inteligente — "intelligent." Latin **intellegere**, which is two pieces:

- **inter** — between
- **legere** — to gather, to pick out, and later to read

To be intelligent is to **pick between**. Not to know a great deal; to choose well among the things in front of you. The Romans named the ability after the sorting, not after the store of facts.

Legere is one of the most productive verbs Latin ever handed over, and every one of these is the same act of picking:

word	**what is picked**
select	chosen out (*se-* apart + *legere*)
collect	picked together
elect	picked out of a group
legible	able to be picked out by eye
lecture	a reading aloud

Spanish has them too: *seleccionar*, *colección*, *elegir*, *legible*, *lectura*.

What you've built

Two shapes of adjective, side by side:

ending	**masculine**	**feminine**
-o	antipátic**o**	antipátic**a**
-e	inteligente	inteligente

An **-o** adjective has two forms. An **-e** adjective has one. That is the whole distinction, and it saves you from ever inventing *inteligenta*.

Your turn

Say these aloud:

- "inteligente" — *in-te-li-JEN-te*, with the throaty **g**
- "alegre e inteligente" — two **-e** adjectives, neither agreeing
- "antipático e inteligente" — and hear only the first one able to change
- which English word for choosing a leader comes from *legere* (*elect*)

Before you move on

What two Latin pieces are inside *inteligente*? (*Inter*, between, and *legere*, to pick out.) Does it change for a woman? (No — it ends in **-e**.)

423.3 trabajador — the same ending as actor, four hundred years further along

Say *trabajar*. Say *el actor*. One is a verb and one is a person, and this lesson turns the first into the second using the ending the second already showed you.

What to know first

- trabajar — to work, and a word with a violent past you have already been told about.
- el actor — the doer, built with Latin **-tor**.

Sounds you'll need

- `stress-final` — *tra-ba-ja-DOR*, stress on the last syllable, exactly as in *actor*. → reference
- `b-soft` — the **b** between vowels is soft, with the lips nearly but not quite touching.

The word, taken apart — and its English cousins

trabajador — "hard-working." Take *trabajar*, drop the **-ar**, add **-dor**. That ending is the Latin **-tor** from *actor*, worn down by centuries of Spanish mouths. Latin *-tor* became Spanish *-dor* between vowels, and Spanish then used it on its own verbs to build new words the Romans never had:

verb	meaning	the one who does it
trabajar	to work	trabaja**dor**
jugar	to play	juga**dor**
hablar	to speak	habla**dor**
ganar	to win	gana**dor**

Actor was borrowed from Latin whole and kept the old **-tor**. *Trabajador* was built inside Spanish and got the modern **-dor**. Same ending, two different ages, and the pair tells you which words came in through books and which grew at home.

Here is the piece that surprises people: *trabajador* is **both a noun and an adjective**. *Un trabajador* is a worker. *Es trabajador* means he

is hard-working. The word does not change; only the sentence around it does.

What you've built

A third shape of adjective, and it is not the **-o** one:

adjective	masculine	feminine
antipático	antipático	antipátic**a**
inteligente	inteligente	inteligente
trabajador	trabajador	trabajador**a**

An adjective ending in a consonant normally refuses to agree. **-dor** is one of the exceptions that does: it adds **-a** and nothing else. *Una mujer trabajadora.*

Your turn

Say these aloud:

- "trabajador" — *tra-ba-ja-DOR*, stress at the end
- "trabajadora", the feminine
- "el actor es trabajador" — the borrowed ending and the home-grown one in a single sentence
- the person-word built from *jugar* the same way (*jugador*)

Before you move on

What did Latin **-tor** become in home-grown Spanish words? (**-dor**.)
Which of *actor* and *trabajador* came in through books? (*Actor.*)
What is the feminine of *trabajador*? (*Trabajadora.*)

423.4 serio — the opposite of cheerful, and a word about gravity

Say *alegre*. This lesson gives you the other end of that same scale.

What to know first

- alegre — cheerful, the word printed on sheet music as *allegro*.

Sounds you'll need

- `stress-penultimate` — *SE-rio*: **-io** is a single syllable here, so the stress lands on *SE*. → reference
- `r-tap` — one flick, between two vowels, which is the easiest place in Spanish to get it right.

The word, taken apart — and its English cousins

serio — "serious, earnest." Latin **serius**, "grave, earnest" (Lewis & Short) — a word of uncertain origin, which Lewis & Short tentatively ties to *severus*, "severe".
Every language seems to reach for weight when it wants to talk about gravity of manner, and English does it three separate times without noticing:

- a **grave** matter — Latin *gravis*, heavy
- a **weighty** decision
- a matter of some **gravity**

Spanish does the same with *grave*. The metaphor is so worn that nobody hears it any more: a grave person is a person who is **hard to lift**.
One warning worth having. English *serious* has drifted toward meaning *bad* — *a serious accident*. Spanish *serio* stayed with the manner: a *persona seria* is earnest and reliable, not damaged. For the bad kind Spanish uses *grave*.

What you've built

Two words for mood and manner, at opposite ends and in different shapes:

ending	masculine	feminine
-e (cheerful)	alegre	alegre
-o (serious)	seri**o**	seri**a**

You now have both ends of the scale, and each one demonstrates a different agreement rule.

Your turn

Say these aloud:

- "serio" — *SE-rio*, two syllables
- "seria", the feminine
- "alegre y serio" — the pair, one agreeing and one not
- "trabajador y serio" — two consonant-ending and **-o**-ending adjectives together

Before you move on

What did Latin *serius* mean? (Grave, earnest.) Does Spanish *serio* mean *grave* in the sense of a bad accident? (No — that is *grave*.) How many syllables is *serio*? (Two: *SE-rio*.)

423.5 tímido — fear, and the verb for putting it into somebody

Say *serio*. A serious person and a shy person look similar from the outside and are nothing alike inside. This lesson names the second one.

What to know first

- serio — earnest, from Latin for *weighty*.

Sounds you'll need

- `accent-acute` — *TÍ-mi-do*: the accent marks the stress on the third syllable from the end, which Spanish always writes out. → reference
- `t-dental` — tongue against the teeth, no puff of air. An English *t* here is the single clearest giveaway of an English speaker.

The word, taken apart — and its English cousins

tímido — "shy, timid." Latin **timidus**, from the verb **timere**, "to fear."

Timere built a small family, and English took all of it:

word	**literally**
timid	inclined to fear
timorous	full of fear
intimidate	to put fear **into** someone

That last one is the useful one. *In-* means *into*. To **intimidate** somebody is to place the fear inside them — the exact fear that *tímido* names. The shy person and the bully are described with the same Latin root, from opposite ends.

Spanish keeps the whole family too: *tímido*, *temer* (to fear), *intimidar*.

A note on what the word does **not** say. *Tímido* describes how a person meets strangers, not whether they are frightened at this moment. For being afraid right now, Spanish says *tener miedo*. This is settled character, which is the whole point of the chapter.

What you've built

Three **-o** adjectives now, all agreeing the same way:

masculine	**feminine**
antipático	antipática
serio	seria
tímido	tímida

Two of the three carry a written accent, and in both cases the accent stays exactly where it was when the ending changes: *tímido* → *tímida*.

Your turn

Say these aloud:

- "tímido" — *TÍ-mi-do*, stress on the first of three
- "tímida", and notice the accent has not moved
- "serio y tímido"
- which English verb means to put fear into someone (*intimidate*)

Before you move on

What does Latin *timere* mean? (To fear.) What does the *in-* of *intimidate* add? (Into — putting the fear into someone.) Does *tímido* mean frightened right now? (No — that is *tener miedo*.)

423.6 sociable — a companion, an ending, and the strangest word in English sport

Say *tímido*. Now say the opposite kind of person, and expect the word to look almost exactly like its English twin.

What to know first

- tímido — shy, from Latin for fear.

Sounds you'll need

- `stress-penultimate` — *so-CIA-ble*, stress on the second syllable from the end and no written accent, because that is the default. → reference
- `b-soft` — the **b** is soft, between a vowel and an **l**.

The word, taken apart — and its English cousins

sociable — "sociable, outgoing." Latin **socius**, "a companion, an ally, a sharer," plus **-able**, "able to be, inclined to."
Socius is one of those roots that turns out to be everywhere:

word	the companion in it
society	the whole body of companions
associate	to make someone a companion
social	to do with companions

And then there is the one nobody expects. English *association football* was shortened by Oxford students, who liked adding **-er** to clipped words, into **soccer** — from *assoc*. The most ordinary word in world sport has *socius* sitting inside it, meaning nothing more than *companion*.
Spanish has the family too: *la sociedad*, *social*, *el socio* — which is a

business partner or a club member, and is *socius* almost unchanged after two thousand years.

What you've built

The six character words of this chapter sort into three agreement shapes, and now you have seen all three:

shape	example	feminine
-o	tímido	tímida
-e	inteligente	inteligente
-able	sociable	sociable

-able behaves like **-e**: one form for everyone. A *hombre sociable* and a *mujer sociable*, spelled identically.

Your turn

Say these aloud:

- "sociable" — *so-CIA-ble*
- "tímido y sociable" — the two ends of the same trait
- "inteligente y sociable" — both invariable
- which English sport hides *socius* in its name (*soccer*)

Before you move on

What did Latin *socius* mean? (A companion or ally.) Does *sociable* change for a woman? (No — **-able** has one form.) Which everyday Spanish word for a club member is *socius* barely changed? (*El socio.*)

423.7 ocho palabras de carácter — eight words, three endings, two pairs

Name as many of the eight as you can before reading the table. Aim for six.

Grammar Lens: the ending decides whether the word can move

All eight, sorted by what their last letters allow:

word	meaning	feminine
simpático	likeable	simpática
antipático	unpleasant	antipática
serio	earnest	seria
tímido	shy	tímida
trabajador	hard-working	trabajadora
alegre	cheerful	alegre
inteligente	clever	inteligente
sociable	outgoing	sociable

Read the third column against the first. Where the two differ, the word moves for a woman; where they are identical, it does not. Five move and three do not, and you can predict which from the spelling alone: a word ending in **-o** changes, a word ending in **-e** does not, and **-dor** is the consonant ending that changes anyway.

Grammar Lens: two of them are matched opposites

Four of the eight come in pairs, which halves what there is to remember:

one end	other end	what the pair measures
simpático	antipático	how you are to be around
tímido	sociable	how you meet strangers
alegre	serio	how you carry yourself

Three scales, six words. *Inteligente* and *trabajador* stand alone.

Your turn

Say these aloud:

- the five that change, in their feminine forms
- the three that do not change

- each pair as an opposite — *simpático, antipático*; *tímido, sociable*; *alegre, serio*
- the two that have no partner (*inteligente*, *trabajador*)

Before you move on

Which consonant ending agrees anyway? (**-dor**, as in *trabajadora.*) Which two of the eight are not one half of a pair? (*Inteligente* and *trabajador.*)

423.8 ¿Cómo es? — the question these eight words exist to answer

Say *inteligente* and *trabajador*. Two words a reference letter cannot do without, and you have had neither until now.

Grammar Lens: es for character, está for the moment

Spanish has two verbs where English has one, and character is the clean half of the split:

verb	what it reports	example
es	settled character	*Es tímido.* — He is a shy person.
está	how someone is right now	*Está alegre.* — He is cheerful today.

All eight of these adjectives are about settled character, so all eight take **es**. That is what makes them exam adjectives rather than mood adjectives: a question asking *¿Cómo es tu hermano?* wants the lasting answer.

Alegre is the one that can honestly go either way — *es alegre* is a cheerful person, *está alegre* is a person having a good day.

Read this

Read it: the lines below aloud
Every word has been taught:

> — ¿Cómo es tu hermana? — Es simpática e inteligente. Es un poco tímida, pero es muy trabajadora. — ¿Y tu

hermano? — No es antipático, pero es muy serio.

Two things to catch. *Y* becomes **e** before a word starting with the *i* sound — *simpática* ***e*** *inteligente* — because *y inteligente* would blur into one vowel. And every adjective describing *hermana* has taken its **-a**, while the ones that cannot change have stayed put.

Your turn

Say these aloud:

- "¿Cómo es?" and answer it with three of the eight
- the same three describing a woman, changing only the ones that can change
- "es simpática e inteligente" and hear why it is not *y*
- one sentence about somebody you know, using *es* and two adjectives

Before you move on

Which of the two verbs does settled character take? (*Es.*) Why does *y* become *e* before *inteligente*? (The following word begins with the *i* sound, and the two vowels would run together.) Which of the eight can honestly take either verb? (*Alegre.*)

Chapter 424

The Marks Themselves

Modes: **voice** (9) **eyes** (1) **Hands-free start:** the first 8 of 10 lessons.

By the end of this chapter: I can name eight Spanish punctuation marks, say what each one does to a sentence, and write a short note that uses six of them correctly.

Write a short note that opens with a colon after the name, lists three things without a comma before the final y, carries an aside in parentheses and an address abbreviated with a slash.

424.1 el punto — the mark you have read ten thousand times and never been told about

Think of the small dot that ends a written sentence — the mark that has closed every sentence of this book without once being named. Say what it is called in Spanish before going on.

The word, taken apart — and its English cousins

el punto — "the full stop," or in American English, the period. Spanish gives the same mark a different name according to what follows it, and those names appear in exam instructions, so they are worth having:

what comes next	name	what it closes
another sentence, same paragraph	**punto y seguido**	a sentence
a new paragraph	**punto y aparte**	a paragraph
nothing	**punto final**	the whole text

The mark on the page is identical in all three. What changes is the size of the thing being finished — a sentence, a block, or a text. *Seguido* means "continued," *aparte* means "separate," and *final* means what it looks like.

Punto is Latin *punctum*, "a prick", from *pungere*, "to pierce": a dot is a prick of the pen.

Grammar Lens: spacing, and the one place the mark is left off

Two mechanical habits that a written paper is marked on:

habit	correct	wrong
spacing	no space before the point, one space after it: `Hola. Adiós.`	a space before the point, and none after it: `Hola .Adiós.`
after a title	no point: `Mi familia`	a point after the title: `Mi familia.`

A **title or a heading takes no point at all** — which is why every heading in this book ends bare.

Your turn

Say these aloud:

- "el punto"
- which of the three names a point gets when a new paragraph follows (*punto y aparte*)
- whether the title of your exam answer should end in a point (no)

Before you move on

What is the difference on the page between *punto y seguido* and *punto y aparte*? (Nothing — the mark is the same; what follows it

differs.) Where does the space go? (After the point, not before.)

424.2 la coma — where Spanish and English disagree about lists

Say *el punto*. This mark is its smaller relative: it divides without finishing.

The word, taken apart — and its English cousins

la coma — "the comma." From Greek *kómma*, "a piece cut off," which is what a comma does to a sentence.
In a list, the items are divided by commas — and **in front of the final *y*, Spanish writes no comma**:

> Tengo un hermano, una hermana **y** un perro.

English allows *a brother, a sister, and a dog*. Spanish does not put a comma there. This is one of the few orthographic points where a habit carried from English is visible to a marker.

Grammar Lens: when y becomes e, and o becomes u

The joining word itself changes shape to avoid two identical vowel sounds colliding:

written	becomes	before a word starting with
y	**e**	*i-* or *hi-*
o	**u**	*o-* or *ho-*

- padres **e** hijos — parents and children
- siete **u** ocho — seven or eight

You met this already without being told its name: *simpática* ***e*** *inteligente* in the character chapter changed for exactly this reason.

Your turn

Say these aloud:

- "la coma"
- a list of three things, and stop yourself before putting a comma in front of the *y*
- "padres e hijos", and why it is not *y hijos*
- "siete u ocho", and why it is not *o ocho*

Before you move on

Does Spanish put a comma before the final *y* of a list? (No.) What does *y* become before *hijos*? (*E.*) What does *o* become before *ocho*? (*U.*)

424.3 los dos puntos — a plural name, and the mark that opens a letter

Say *la coma*. The next mark also introduces a list — but it stands in front of the list rather than inside it.

The word, taken apart — and its English cousins

los dos puntos — "the colon." Spanish names it for what it looks like: **two points**, and the name is plural, so it takes *los* and a plural verb. Its main job is to **announce** what follows:

> Tengo tres colores favoritos: rojo, azul y verde.

The colon promises a list; the commas then divide it; and there is still no comma before the final *y*.
Dos is Latin *duos*, "two", and *punto* is Latin *punctum*, "a prick".

Grammar Lens: the letter opening, where English disagrees

This is the exam-relevant half, because a written paper often asks for a note or a message:

language	opening
Spanish	Querido Juan**:**
English	Dear John**,**

Spanish puts **dos puntos** after the greeting of a letter, an email or a note. English puts a comma. A Spanish reader notices the comma immediately, the way an English reader notices a colon.
After it, the text begins on the next line, and it begins with a **capital**.

Your turn

Say these aloud:

- "los dos puntos", with *los*, because the name is plural
- a sentence that announces a list of three things and then gives it
- how you would open a note to a friend called Ana (*Querida Ana:*)

Before you move on

Why is the name plural? (There are two points in the mark.) What goes after *Querido Juan* in Spanish? (A colon, where English uses a comma.)

424.4 la raya — you have been reading this mark for chapters

Every printed conversation you have read in this book opened its lines with a long horizontal mark. Name what it was doing there, before going on.

The word, taken apart — and its English cousins

la raya — "the dash." A *raya* is a line or a stripe, and it is longer than the hyphen, which is a different mark with a different job.
In printed Spanish dialogue, a **raya opens each turn of speech**, and nobody is named:

— ¿Cómo estás? — Bien, gracias. ¿Y tú? — Muy bien.

Three turns, two speakers, no *he said* and no quotation marks. The reader tracks who is talking by alternation alone.
Raya is usually traced to Latin *radius*, "a rod, a ray".

Grammar Lens: what replaces the quotation marks

Set the two traditions side by side, because a reading paper prints the Spanish one and an English-trained eye looks for the wrong thing:

	English	**Spanish**
opens a turn	"Hello,"	— Hola.
names the speaker	he said	often nobody
new speaker	new paragraph	new paragraph

An English reader hunting for quotation marks in a Spanish story finds none and concludes there is no dialogue. There is; it is marked with **la raya**.

Your turn

Say these aloud:

- "la raya"
- how a reader knows who is speaking when nobody is named (the turns alternate)
- what an English reader is looking for that will not be there (quotation marks)

Before you move on

What opens a turn of speech in printed Spanish? (*La raya.*) How many speakers are named in a typical exchange? (Often none.)

424.5 las comillas — three shapes, and the preferred one points outward

The last lesson said a Spanish dialogue carries no quotation marks. So Spanish does have them — they are for something else. This lesson says what.

The word, taken apart — and its English cousins

las comillas — "quotation marks." Plural, like *los dos puntos*, because they come as a pair.
Spanish uses three shapes and puts them in an order of preference:

shape	name	when
« »	comillas latinas, or angulares	preferred in printed Spanish
" "	comillas inglesas	inside a quotation already in « »
' '	comillas simples	inside that again

The outermost pair is the angular one. Nesting works from the outside in, so the English-looking pair appears **inside** the Spanish-looking one, rather than first.
Comillas is *coma*, "comma", with the small-ending *-illa*: little commas.
Coma is borrowed from Latin *comma*, itself from Greek (EtymDB 2.1).

Grammar Lens: what they are actually for

Since **la raya** already handles dialogue, the marks are free for other work, and the one an A1 paper shows is the **foreign word**:

> El camarero trajo un «sandwich».

A word borrowed and not yet naturalised is set apart from the sentence around it. Spanish also uses them for a title inside a text, and for a word being talked about rather than used.
The name is a diminutive of **coma**: a *comilla* is a small comma, which is what the mark once looked like.

Your turn

Say these aloud:

- "las comillas", plural, with *las*
- which shape a printed Spanish text reaches for first (« »)
- what the name is a small version of (*coma*)

Before you move on

Which pair does printed Spanish prefer? (The angular « ».) Why are they not needed for dialogue? (*La raya* marks the turns instead.)

424.6 los paréntesis — a putting-in-beside

Say *las comillas*. The next mark also sets something apart from the sentence — but what it sets apart is an aside rather than a quotation.

The word, taken apart — and its English cousins

los paréntesis — "the parentheses," the curved pair.
The word is Greek and it describes the job precisely: **para-** beside, **en-** in, **thesis** a putting. A *paránthesis* is *a putting-in-beside* — a remark placed next to the sentence rather than inside its grammar.

> Mi hermana (la mayor) vive en Madrid.

Remove what is between them and the sentence still stands: *Mi hermana vive en Madrid.* That is the test for whether the mark is the right one.

Grammar Lens: spacing, and where the point goes

	correct	**wrong**
spacing	`casa (grande) blanca`	`casa ( grande ) blanca`
with a point	`... en Madrid.`	`... en Madrid).` inside

No space on the inside of either curve. And when a parenthesis closes at the end of a sentence, the point goes **outside** it — the aside finishes first, then the sentence does.

Your turn

Say these aloud:

- "los paréntesis"

- what the three Greek pieces mean (beside, in, a putting)
- the test for whether an aside belongs in them (remove it, and see whether the sentence still stands)

Before you move on

What does the Greek word literally describe? (A putting-in-beside.) Where does the full stop go at the end of a sentence that closes with a parenthesis? (Outside it.)

424.7 el guion — the short one, and why it is not la raya

Say *la raya*. This lesson gives you a mark that looks like a small version of it and does something completely different.

The word, taken apart — and its English cousins

el guion — "the hyphen."
The two marks are easy to confuse on a page and easy to keep apart once you know what each is for:

mark	length	job
la raya	long	opens a turn of speech
el guion	short	**joins** two words into one

Its everyday A1 use is in names:

- **Ana-María** — a compound forename
- **Sánchez-Pérez** — a compound surname, often a married name or a double family name

A form asking for *apellidos* may come back with a hyphen in it, and the hyphen is telling you the two halves are one name rather than two. *Guion* is built on *guía*, "a guide", and it also names the banner carried at the head of a procession.

Grammar Lens: the word changed its own spelling

This one is a small piece of history you will see both ways in print:

spelling	status
guión	the older form, with a written accent
guion	the current recommendation

The Academy reclassified *guion* as a one-syllable word in 2010, and a one-syllable word carries no written accent. Older books print *guión* and are not wrong for their date. Both will appear in front of you.

Your turn

Say these aloud:

- "el guion"
- the difference between what *la raya* does and what *el guion* does
- a compound surname with a hyphen in it

Before you move on

Which of the two marks opens a line of dialogue? (*La raya*, the long one.) Why does the current spelling *guion* carry no accent? (It is counted as one syllable.)

424.8 la barra — a choice, a street, and a speed limit

Say *el guion*, the mark that joins. This one separates — and what it separates are usually alternatives.

The word, taken apart — and its English cousins

la barra — "the slash." A *barra* is a bar or a rod, named for its shape. Three jobs, all of which turn up on an A1 reading paper:

use	example	reading
alternatives	y/o	and, or both
abbreviation	c/ Mayor	*calle* Mayor
per	km/h	kilometres per hour

The middle one is the useful surprise: **c/** on a Spanish address is *calle*, the street. An envelope, a form or a shop sign will print it that way, and it is unreadable if nobody has told you.
Barra goes back to a spoken Latin **barra*, "a bar", whose own origin is unknown — the same word as English *bar*.

Grammar Lens: the mark that means "per"

In a measurement, *la barra* is read aloud as **por**:

50 km/h — *cincuenta kilómetros por hora*

It is not silent and it is not spelled out. A listening paper that reads a speed limit aloud gives you *por* where the page shows a slash.
No spaces around it in any of these uses.

Your turn

Say these aloud:

- "la barra"
- what **c/** stands for on an address (*calle*)
- "50 km/h" the way it is read aloud

Before you move on

What does **c/** abbreviate? (*Calle.*) What word replaces the slash when a measurement is read aloud? (*Por.*)

424.9 ocho signos — sorted by what each one does to a sentence

Name as many of the eight marks as you can, in Spanish, before reading the table. Aim for five.

Grammar Lens: divide, join, or set apart

Eight marks, and every one of them is doing one of three jobs:

mark	name	job
.	el punto	divides — a sentence, a paragraph, a text
,	la coma	divides — inside a sentence
:	los dos puntos	divides — and announces what follows
—	la raya	sets apart — a turn of speech
« »	las comillas	sets apart — a quoted or foreign word
( )	los paréntesis	sets apart — an aside
-	el guion	**joins** — two words into one name
/	la barra	divides — alternatives, or *per*

Seven divide or set apart. **El guion** is the only one of the eight that joins, which is the cleanest way to keep it from being confused with the mark it most resembles.

Grammar Lens: the three with plural names

name	why plural
los dos puntos	two points in the mark
las comillas	they come as a pair
los paréntesis	so do these

Each of the three is one mark to an English speaker and a plural noun in Spanish, so each takes *los* or *las* and a plural verb.

Your turn

Say these aloud:

- the three with plural names, with their articles

- the one that joins rather than divides (*el guion*)
- the one that opens a line of dialogue (*la raya*)
- the one Spanish leaves out in front of the final *y* of a list (*la coma*)

Before you move on

Which of the eight joins? (*El guion.*) Which two are both horizontal lines with different lengths and different jobs? (*La raya* and *el guion.*) Which one is read aloud as *por*? (*La barra.*)

424.10 una nota con todos los signos — the marks doing their jobs at once

Say how a Spanish note opens after the name, and say whether a list of three takes a comma before its *y*.

Read this

Read it: this note and count the marks
Every word in it has been taught:

> Querida Ana:
>
> Mañana voy al teatro con mi hermana (la mayor). Vamos a ver una película, una exposición y un concierto. Mi dirección es c/ Mayor, 5.
>
> Un abrazo, Marta

Six of the eight marks are at work: the colon after the name, commas inside the list with none before the *y*, a parenthesis around the aside, a slash in the address, and points closing the sentences.

Read this

And the two the note had no use for, doing their own jobs:

> — ¿Vamos al cine? — Sí. Traigo un «sandwich».

The first line opens with **la raya** because it is a turn of speech. The borrowed word sits inside **las comillas** because it is not naturalised.

Your turn

Say these aloud:

- the mark that opens the note after *Querida Ana*
- the list of three from the note, and stop before the *y* without putting a comma there
- what **c/** is short for
- which mark would open the note if it were a line of dialogue instead
- what a hyphen in *Sánchez-Pérez* is telling you (that the two halves are one name)

Before you move on

Where does the point go when a sentence ends with a parenthesis? (Outside it.) Which mark marks the foreign word, and which marks the turn of speech? (*Las comillas* and *la raya*.)

Chapter 425

The Letters Themselves

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can name every letter of the Spanish alphabet, spell a name aloud over a telephone, tell b from v when somebody asks, and say where a word may and may not be broken.
>
> *Spell a surname aloud letter by letter, say that a vowel carries its accent, and settle the b-or-v question the way a Spanish speaker does.*

425.1 el abecedario — twenty-seven letters, and one that English does not have

The last chapter gave you the marks that go between the letters. This chapter is about the letters themselves — which you have been reading for four hundred chapters and have never been asked to name.

The word, taken apart — and its English cousins

el abecedario — "the alphabet."
Listen to the name: **a-be-ce-de**. It is the first four letters, read aloud and glued together. Spanish also says **el alfabeto**, from the Greek *alpha* and *beta* doing the identical trick in another language.
The Spanish alphabet has **twenty-seven** letters: the twenty-six of English, plus **ñ**.

Grammar Lens: the letters, and what each is called

Knowing the shapes is not enough. To spell a name over a telephone you need the **names**, and most of them are not what an English speaker would guess:

The names are not a list to memorise. A letter is named by **putting a vowel beside its sound**, and there are only three patterns.

The five vowels are called by their own sound, and that is the whole rule for them: *a, e, i, o, u*.

Most consonants take an -e after:

letter	**name**
b, c, d	be, ce, de
g, p, t	ge, pe, te
v, y	uve, ye

Five take an e- before instead:

letter	**name**
f, l	efe, ele
m, n	eme, ene
s	ese

And the leftovers have names of their own, which are the ones to learn deliberately:

letter	**name**
h	hache
j	jota
k	ka
q	cu
r	erre
w	uve doble
x	equis
z	zeta
ñ	eñe

Nine irregular names out of twenty-seven letters is a small thing to carry.

Your turn

Say these aloud:

- “el abecedario”, and hear the four letters inside the word

- how many letters Spanish has (twenty-seven)
- the one Spanish has and English does not (*eñe*)
- the names of the letters in your own first name

Before you move on

Where does the word *abecedario* come from? (The first four letters said aloud.) What is **h** called? (*Hache.*) What is **j** called? (*Jota.*)

425.2 be larga o be corta — the letters that needed a second name

Say the names of **b** and **v**. Now say the two letters out loud as sounds, and notice the problem you have created.

The word, taken apart — and its English cousins

In Spanish, **b** and **v** are pronounced **identically**. There is no *v* sound in the language at all.
That is fine while you are speaking and a catastrophe while you are spelling. So Spanish grew extra names whose whole job is to tell the two apart:

letter	plain name	the disambiguating names
b	be	**be larga**, be alta, be grande
v	uve	**ve corta**, ve baja, ve chica

Larga and *alta* describe the tall stem of **b**; *corta* and *baja* describe the short **v**. A Spanish speaker dictating an address will reach for these without thinking, and a listening paper will play them.

Grammar Lens: the other letters with two names

letter	names
w	uve doble, doble ve, doble u
y	ye, i griega
z	zeta, ceta

Y is the interesting one. *I griega* means "Greek i" — the letter arrived from Greek *upsilon* and Spanish named it after where it came from, while calling the ordinary **i** *i latina* when it needs the contrast. The Academy now recommends **ye**, and both are in use.

Your turn

Say these aloud:

- *be larga* and *ve corta*, and say which letter each one is
- why Spanish needed the second names at all
- the two names for **y**
- what *i griega* literally means, and why

Before you move on

Do **b** and **v** sound different in Spanish? (No — they are identical.) So what are *be larga* and *ve corta* for? (Telling the two apart when spelling aloud.) What does *i griega* mean? (Greek i.)

425.3 las cinco vocales — five letters, five sounds, and no exceptions

Name the five vowels in Spanish. You have been saying them since the first chapter without being told they were a closed set.

The word, taken apart — and its English cousins

las cinco vocales — "the five vowels": **a, e, i, o, u**.
Vocal is from Latin *vox*, "voice" — a vowel is the part of a word you can actually sing. The same root gives *voz*, *vocabulario* and English

vocal.
Here is the part that makes Spanish kind to a reader: **each of the five has one sound, and it keeps it.** English *a* is different in *cat*, *car*, *cake* and *about*. Spanish *a* is the same in every word that has ever been written.

Grammar Lens: the two marks a vowel can carry

Only vowels take marks in Spanish, and there are exactly two:

mark	name	what it does
á é í ó ú	la tilde, el acento	marks which syllable is stressed
ü	la diéresis	makes a silent **u** speak

La tilde never changes the sound of the vowel — it only says *stress this one*. That is why it can tell two identical words apart: *el* is *the*, *él* is *he*; *si* is *if*, *sí* is *yes*.
La diéresis appears on **ü** and nowhere else. In *guerra* the **u** is silent; in *pingüino* the two dots say *pronounce me*. Two dots, one job.
Note the vocabulary trap: Spanish *tilde* means the **accent mark**. The squiggle over **ñ** is *la virgulilla*, and English calls that one the tilde. The two languages use the word for different marks.

Your turn

Say these aloud:

- the five vowels in order
- the difference between *el* and *él*, and what the mark is doing
- *pingüino*, and say what the two dots are for
- how many sounds Spanish **a** has (one)

Before you move on

What does *la tilde* do to the sound of a vowel? (Nothing — it marks stress.) Which letter carries *la diéresis*? (Only **ü**.) In Spanish, is *tilde* the mark on **ñ**? (No — that is *la virgulilla*.)

425.4 los dígrafos — two letters, one sound, and a change made in 1994

Say *chico*, *llave* and *perro*. Each of those has two identical or paired letters doing a single job. Name how many sounds the doubled part makes.

The word, taken apart — and its English cousins

un dígrafo — "a digraph": **two letters that spell one sound.** Greek *di-* two + *graphē* writing. Spanish has five:

digraph	example	one sound
ch	chico	as in English *church*
ll	llave	a *y* sound for most speakers
rr	perro	the long rolled r
gu	guerra	a hard **g**, with the **u** silent
qu	queso	a **k**, with the **u** silent

The last two are the ones that catch a reader out. In *guerra* and *queso* the **u** is **not pronounced**. It is there to keep the **g** and **c** hard in front of **e** and **i** — which is exactly why *pingüino* needs the two dots to cancel the silence.

Grammar Lens: the 1994 change, and why a dictionary moved

Ch and **ll** used to be letters of the alphabet in their own right, with their own names (*che*, *elle*) and their own sections in a dictionary. *Chico* came after every word beginning with **c**, not inside them. In 1994 they stopped being separate letters. A dictionary printed before then and one printed after put the same word in a different place:

word	before 1994	after
chico	its own **ch** section	under **c**
llave	its own **ll** section	under **l**

They are still digraphs and still spell one sound. What changed is only how they are **filed**. If you use an older Spanish dictionary and cannot find a word, this is usually why.

Your turn

Say these aloud:

- the five digraphs
- *guerra* and *queso*, and say what the **u** is doing in each (nothing audible — it keeps the first letter hard)
- where you would look up *chico* in a dictionary printed today
- why *pingüino* needs the two dots

Before you move on

How many sounds does a digraph spell? (One.) Is the **u** of *queso* pronounced? (No.) What happened to **ch** and **ll** in 1994? (They stopped being separate letters of the alphabet and are filed under **c** and **l**.)

425.5 la sílaba — what you may break, and what you may not

Say *chico* slowly, in pieces. Say where you would break it if the line ran out — and note that the answer cannot be between the **c** and the **h**.

The word, taken apart — and its English cousins

la sílaba — "the syllable." Greek *syllabḗ*, "a taking together" — letters taken together into one beat.
When a word will not fit at the end of a line, Spanish breaks it **between syllables** and marks the break with *el guion*. What matters for a written paper is which groups may **never** be split:

never split	**because**
ch, ll, rr, gu, qu	each is one sound
a consonant + l or r	*bl, br, cl, cr, pl, pr, tr…* hold together
a diphthong	two vowels in one beat stay in it

So *chi-co*, never *c-hico*. *Ha-blar*, never *hab-lar*. *Pe-rro*, never *per-ro*.

Grammar Lens: words Spanish spells two ways

A small set of words has two accepted spellings, and an exam will not mark either wrong:

both accepted	
sicología	psicología
setiembre	septiembre
quiosco	kiosco

The pattern is a **simplified** form beside the older one that keeps a consonant cluster the language stopped pronouncing. Spanish spelling follows the mouth more closely than English does, so when a cluster goes quiet the spelling is eventually allowed to follow.
One last rule a form actually tests: **a number written in figures is never split across a line.** *2026* stays whole.

Your turn

Say these aloud:

- where *hablar* may be broken (*ha-blar*)
- why *chico* cannot be broken between **c** and **h**
- two accepted spellings of the word for September
- whether a year in figures may be split (no)

Before you move on

What does Greek *syllabḗ* mean? (A taking together.) May *br* be split? (No.) Is *sicología* a spelling mistake? (No — both spellings are accepted.)

425.6 veintisiete letras — the whole set, sorted three ways

Say how many letters Spanish has, and name the one English lacks.

Grammar Lens: what you now know about each group

group	the useful fact
the five vowels	one sound each, and it never varies
most consonants	named by adding **-e**, or **e-** in front
nine consonants	have names of their own to learn
five digraphs	two letters, one sound

And the marks, which only vowels take:

mark	on	job
la tilde	any vowel	marks the stressed syllable
la diéresis	only **ü**	makes a silent **u** speak

Grammar Lens: the three things that stop a line break

A break may fall between syllables but never inside:

- a **digraph** — *chi-co*, not *c-hico*
- a consonant plus **l** or **r** — *ha-blar*, not *hab-lar*
- a **diphthong**, or a number in figures

Those three cover nearly everything a written paper can test, and all three come from one idea: **do not break what is said in one beat.**

Your turn

Say these aloud:

- the nine letters with names of their own
- the five digraphs
- the two names for **b** and the two for **v**, and why they exist
- three places a line may not be broken

Before you move on

Why does Spanish need *be larga* and *ve corta*? (**B** and **v** sound identical.) How many sounds does a digraph spell? (One.) What single idea governs where a line may break? (Do not break what is said in one beat.)

425.7 ¿Cómo se escribe? — the task the letter names are for

Somebody on a telephone asks how your surname is written. Spell it aloud in Spanish before reading on.

Grammar Lens: the question, and what it is not

question	what it asks for
¿Cómo se escribe?	how it is **written** — spell it
¿Cómo se dice?	how it is **said** — the word itself

A form-filling exchange uses the first. An exam's listening paper uses it to dictate a name at you letter by letter, which is the one situation where knowing *hache* and *jota* and *equis* is the difference between hearing a name and writing it.

Read this

Read it: this exchange aloud

> — ¿Cómo se escribe su apellido? — Vázquez. Uve, a con tilde, zeta, cu, u, e, zeta. — ¿Uve o be? — Uve. Ve corta.

The last two turns are the reason the second names exist. The listener could not tell **b** from **v** by ear, asked, and got an answer that settles it.

Your turn

Say these aloud:

- "¿Cómo se escribe?"
- your own first name, letter by letter, in Spanish

- how you would say that a letter carries a written accent (*con tilde*)
- how you would settle it if somebody could not tell your **b** from a **v**
- where your surname would break if it ran off the end of a line, and name one group inside it that may not be split

Before you move on

Which question asks for a spelling rather than a word? (*¿Cómo se escribe?*) How do you say that a vowel carries its accent mark? (*Con tilde.*)

Chapter 426

Capitals, Short Forms And Symbols

Modes: **voice** (5) **eyes** (3) **Hands-free start:** the first 3 of 8 lessons.

By the end of this chapter: I can keep days, months, languages and nationalities lower-case the way Spanish does, tell an abbreviation from an initialism from a symbol by whether it takes a point, and read a filled-in form line by line.

Read a completed personal-details form, saying each short form aloud in full and explaining why each lower-case word is lower-case.

426.1 las mayúsculas — and the four things Spanish refuses to capitalise

Write it: today's day and month in English, then the same two in Spanish

Go on to find out what you almost certainly got wrong.

The word, taken apart — and its English cousins

la mayúscula — "the capital letter." **La minúscula** is the small one. Latin *maiusculus*, "somewhat larger," and *minusculus*, "somewhat smaller" — the two names describe nothing but size.
Spanish capitalises where you expect: the first word of a sentence, and proper names — people, cities, countries, rivers.

Grammar Lens: the four that English capitalises and Spanish does not

This is the highest-value fact in the chapter, because an English-trained hand gets all four wrong and the marker sees every one:

	English	Spanish
days	Monday	**lunes**
months	January	**enero**
languages	Spanish	**español**
nationalities	I am Spanish	soy **español**

Add religions and titles: *católico*, and *el rey*, *el presidente*, *doctor* — all lower-case in running text.

The idea underneath is consistent. Spanish capitalises a **name**, not a **category**. *España* is a name; *español* is a description of a kind of person, and a description is an ordinary adjective.

Grammar Lens: the title of a book or a film

English	*One Hundred Years of Solitude*
Spanish	*Cien años de soledad*

Only the first word takes a capital. English capitalises most words in a title; Spanish treats a title as an ordinary sentence with a capital at the front.

Your turn

Say these aloud:

- today's day and month in Spanish, both lower-case
- "soy español" and hear that the nationality is not capitalised
- the single rule underneath all four (a name is capitalised, a category is not)
- how many words of a Spanish book title take a capital (one)

Before you move on

Does Spanish capitalise *lunes*? (No.) Does it capitalise *España*? (Yes.) What is the difference? (A name takes a capital; a category does not.)

426.2 la minúscula inicial — the capital that depends on what stands beside it

Say the principle from the last lesson: a name takes a capital, a category does not. This lesson gives you a case where the same word takes a capital in one sentence and not in another.

The word, taken apart — and its English cousins

Many Spanish surnames contain a small word: **de**, **del**, **la**, **las**. Whether it is capitalised depends on **what stands in front of it**:

written	**form**
with the first name	Pedro **de** la Cruz
without it	el señor **De** la Cruz

With the forename present, the small word is lower-case. Standing alone at the head of the name, it takes the capital.

Inicial is Latin *initialis*, "at the beginning" (Lewis & Short), from *initium*, "a beginning".

Grammar Lens: why the rule has that shape

It is not arbitrary. **De** originally meant *from* — *Pedro de la Cruz* was Pedro **from** the Cross, a description of where he came from rather than a name. A description does not take a capital, which is the rule from the last lesson exactly.

Once the forename is gone, *De la Cruz* has become the whole name, and a name takes a capital.

This appears on forms. A field asking for *apellidos* alone is the second row; a field with *nombre y apellidos* together is the first.

Your turn

Say these aloud:

- "Pedro de la Cruz", and say which word is lower-case
- the same surname without the forename, and say what changed
- what *de* originally meant, and why that explains the rule

Before you move on

Is it *Pedro De la Cruz* or *Pedro de la Cruz*? (Lower-case *de*, because the forename is there.) And with no forename? (*De la Cruz*, capital.)

426.3 las abreviaturas — the short forms a letter opens with

You know that **c/** on an address is *calle*. Say it. That slash was your first abbreviation; this lesson gives you the rest of the set.

The word, taken apart — and its English cousins

una abreviatura — "an abbreviation": a word written short, and **always closed with a point**.
The forms of address are the ones an A1 paper prints:

short	**full**	
Sr.	señor	Mr
Sra.	señora	Mrs
Srta.	señorita	Miss
D.	don	a courtesy title before a first name
Dña.	doña	its feminine
Dr.	doctor	

The point is not decoration. **Sr** without it is an error, because the point is what marks the word as shortened.
Abreviatura is Late Latin *abbreviatura*, from *brevis*, "short".

Grammar Lens: don and señor are not the same word

The distinction is one an English speaker has no equivalent for:

	goes before	example
señor	the **surname**	el Sr. García
don	the **first name**	D. Pedro

Don Pedro is respectful and warm; *Señor García* is respectful and formal. Putting them the wrong way round — *don García* — sounds wrong to a Spanish ear in the way *Mr. Peter* does to an English one. Two more an address prints, both of which you can now read: **c/** for *calle* and **n.º** for *número*.

Your turn

Say these aloud:

- the abbreviations for *señor*, *señora* and *señorita*
- what must never be left off the end of an abbreviation (the point)
- which of *don* and *señor* goes with a first name
- what **c/** and **n.º** stand for

Before you move on

What closes every abbreviation? (A point.) Which goes before a first name, *don* or *señor*? (*Don.*) What is *Dña.* short for? (*Doña.*)

426.4 las letras voladitas — the little letters that sit above the line

Say the abbreviation for *señora*. Now say what you would write for *señorita* if you wanted the raised form, and read on.

The word, taken apart — and its English cousins

las letras voladitas — "the flown letters," raised above the line. Spanish uses exactly two of them, º and ª, and which one you use is decided by gender.
Their commonest job is the **ordinal indicator**:

written	read
1.º	primero
1.ª	primera
2.º	segundo
n.º	número

English writes *1st* and *2nd*, changing the ending with the number. Spanish writes the same raised letter every time and changes it only for **gender**: º for a masculine word, ª for a feminine one.
Voladita is built on *volar*, "to fly", Latin *volare*, with the small-ending *-ita*.

Grammar Lens: the point goes before the raised letter

correct	wrong
1.º	1º
Sr.ª	Srª

The Academy's recommendation puts the **point first and the raised letter after**, because the point is the abbreviation mark and the raised letter is the ending. You will see the pointless form printed everywhere; the one with the point is the one to write.
A warning about the shape. º is a raised letter **o**, not a degree sign, even though the two look nearly identical. A temperature uses the degree sign; an ordinal uses the letter.

Your turn

Say these aloud:

- 1.º and 1.ª, and say what decides between them
- where the point goes relative to the raised letter
- what **n.º** stands for
- the difference between the raised º and a degree sign

Before you move on

What decides between º and ª? (The gender of the word.) Does the point come before or after the raised letter? (Before.) Is º a degree sign? (No — it is a raised letter o.)

426.5 las siglas — no points, and a plural made by doubling

Say the rule you learned for abbreviations: every one ends in a point. This lesson gives you a kind of short form where that rule is reversed.

The word, taken apart — and its English cousins

una sigla — a set of initials standing for a name. *ONU*, *DNI*, *RENFE*. Unlike an abbreviation, **a sigla takes no points at all**:

correct	**wrong**
DNI	D.N.I.
ONU	O.N.U.

The two you will actually meet on a form are **DNI** — *Documento Nacional de Identidad*, the Spanish identity card — and **UE**, the European Union.

Sigla is Late Latin *sigla*, "abbreviations" (Lewis & Short), a plural taken as one word.

Grammar Lens: the plural, which is the strange part

A sigla does **not** take an **-s** in writing. It is made plural by **doubling its letters**, with a space in the middle:

singular	**plural**	**meaning**
EU	**EE. UU.**	the United States
CC	**CC. OO.**	a trade union confederation

EE. UU. is *Estados Unidos* — two words, so two doubled letters. Said aloud it is the full name; the doubling exists only on the page.

One more distinction the names record. A **sigla** is spelled out letter by letter (*DNI* is *de-ene-i*). An **acrónimo** is said as a word (*RENFE*,

ONU). Which one a set of initials becomes depends on nothing but whether the result is pronounceable.

Your turn

Say these aloud:

- **DNI**, spelled out with the letter names you learned
- whether a sigla takes points (no)
- how *Estados Unidos* is written short (*EE. UU.*)
- the difference between a *sigla* and an *acrónimo*

Before you move on

Does a sigla end in a point? (No — an abbreviation does, a sigla does not.) How is a sigla made plural in writing? (By doubling its letters.) What does **DNI** stand for? (*Documento Nacional de Identidad*.)

426.6 los símbolos — the third kind of short form, and the one with no point

An abbreviation ends in a point and a sigla does not. Say both rules. This lesson adds a third kind, and it sides with the sigla.

The word, taken apart — and its English cousins

un símbolo — a fixed sign for a unit, a currency or a direction. It is **international, unchanging, and takes no point**.

symbol	meaning
€	the euro
km	kilometre
kg	kilogram
h	hour

km is never *km.* and never *kms*. A symbol has no plural and no point, because it is not a shortened Spanish word — it is the same sign in

every language.
You have already read one in use: **km/h**, which you learned to say aloud as *kilómetros por hora*.
Símbolo is Latin *symbolus*, "a sign, a token" (Lewis & Short), from Greek *symbolon*.

Grammar Lens: the compass, and where the euro goes

The four points of the compass have symbols that match their Spanish names, and one does not match the English:

symbol	Spanish	English
N	norte	north
S	sur	south
E	este	east
O	**oeste**	west (**W**)

A Spanish map prints **O** where an English map prints **W**. On a reading paper that is a trap worth having seen once.
And the currency: Spanish writes the amount first and the symbol after, with a space — **20 €**, not *€20*. English does the reverse.

Your turn

Say these aloud:

- whether a symbol takes a point (no)
- the four compass letters in Spanish, and the one that differs from English
- "20 €" the way Spanish writes it, and say what English would do instead
- the plural of *km* (there is none)

Before you move on

Which of the three short forms takes a point — abbreviation, sigla or symbol? (Only the abbreviation.) Which compass letter differs between Spanish and English? (**O** for *oeste*, where English writes **W**.) Where does the euro sign go? (After the amount.)

426.7 tres formas cortas — and the point tells you which is which

Name the three kinds of short form before reading on, and say which one takes a point.

Grammar Lens: one test separates all three

kind	example	point?
abreviatura	Sr., Dña., n.º	**yes**
sigla	DNI, ONU, UE	no
símbolo	€, km, N	no

The reason is worth more than the table. An **abreviatura** is a Spanish word cut short, and the point marks the cut. A **sigla** is not a cut word but a set of initials. A **símbolo** is not Spanish at all — it is an international sign that happens to appear in a Spanish sentence. Only something that was cut needs a mark showing where.

Grammar Lens: the capitals, gathered

lower-case in Spanish	capitalised
lunes, enero	España, Madrid
español, católico	Pedro, García
el rey, el doctor	De la Cruz, with no forename

One idea covers the whole left column: **a category is not a name.** Days, months, languages, nationalities, religions and titles all describe a kind of thing rather than naming a particular one.
And the raised letters: º for a masculine word, ª for a feminine one, with the point **before** — 1.º, 1.ª, Sr.ª.

Your turn

Say these aloud:

- the three kinds of short form, and which takes a point
- four things Spanish leaves lower-case that English capitalises
- why an abbreviation needs a point and a symbol does not

- 1.ª, and say what the raised letter is agreeing with

Before you move on

Which of the three takes a point, and why? (The abbreviation — the point marks where the word was cut.) What single idea keeps *lunes* and *español* lower-case? (They are categories, not names.)

426.8 un formulario completo — where all of it actually turns up

Say what **DNI** stands for, and say whether it takes points.

Read this

Read this form. Every short form in it has been taught:

> **Datos personales** Nombre y apellidos: Pedro de la Cruz DNI: 12345678-A Dirección: c/ Mayor, n.º 5, 1.º Teléfono: 600 123 456 Correo electrónico: Nacionalidad: español

Six things to notice, and every one is a rule rather than a detail: *de la Cruz* is lower-case because the forename is present; **DNI** carries no points; **c/** is the street and **n.º** the number; **1.º** is the floor, with the point before the raised letter; and **español** is lower-case because a nationality is a category.

Grammar Lens: the same data spoken aloud

A form prints the short forms; a person says them in full:

on the form	said aloud
c/ Mayor	calle Mayor
n.º 5	número cinco
1.º	primero

A reading paper gives you the left column and a listening paper the right, which is why both have to be learned.

Your turn

Say these aloud:

- the address line of the form, aloud and in full
- your own nationality, and keep it lower-case
- **DNI**, letter by letter, using the Spanish letter names
- why *de* is small in *Pedro de la Cruz*

Before you move on

Why is *español* lower-case on the form? (A nationality is a category, not a name.) How is **1.º** read aloud? (*Primero.*) Where does the point go in **n.º**? (Before the raised letter.)

Chapter 427

People Named By What They Do

Modes: **voice** (7) **eyes** (1) **Hands-free start:** the first 6 of 8 lessons.

> ***By the end of this chapter:*** I can name five professions and the company somebody works for, take any profession word apart to see how it was built, and answer a question about my work without putting an article where Spanish leaves one out.
>
> *Answer the question about what somebody does for a living, naming the profession with no article and the company with one.*

427.1 el vendedor — the ending you already have, doing its real job

Say *vender*. Say *trabajador*. You have the verb and you have the ending. Put them together before reading on.

The word, taken apart — and its English cousins

el vendedor — "the seller, the shop assistant."
Take *vender*, drop the **-er**, add **-dor**. That is the whole operation, and you met the ending as an adjective in the character chapter. Here it does what it was built for: **making a person out of an action.**

verb	the one who does it
trabajar	el trabaja**dor**
vender	el vende**dor**
jugar	el juga**dor**
ganar	el gana**dor**

The ending is **productive**, which is the property worth having. You are not learning a word; you are learning a machine that turns any verb you know into the person who does it.
Vender is Latin *vendere*, "to sell".

Grammar Lens: where the ending puts the stress

Every **-dor** noun stresses its last syllable: *vende-DOR*, *trabaja-DOR*, *juga-DOR*. None of them carries a written accent, because a word ending in **-r** is stressed on the last syllable by default and the accent marks only departures from the default.
The feminine adds **-a** and nothing else: *la vendedora*, *la trabajadora*.

Your turn

Say these aloud:

- "el vendedor" — *vende-DOR*
- the feminine form
- the two steps that build it from *vender*
- the person-word for somebody who plays, built the same way

Before you move on

What does the **-dor** ending do to a verb? (Makes a person out of it.) Why does *vendedor* carry no written accent? (A word ending in **-r** is stressed on the last syllable anyway.)

427.2 el comprador — the other side of the counter

Say *el vendedor*. Say *comprar*. Build the person who does the second thing, using the machine from the first.

The word, taken apart — and its English cousins

el comprador — "the buyer."
Comprar minus **-ar**, plus **-dor**. No new rule, which is the point of

teaching the pair together: one ending buys both halves of a transaction.

side	verb	person
sells	vender	el vendedor
buys	comprar	el comprador

Comprar is Latin *comparare*, "to procure", worn down in speech; *vender* is Latin *vendere*, "to sell".

Grammar Lens: the pair that names an economy

These two words are how a form, a contract or a news item names the parties to a sale. They are not shop vocabulary — *el vendedor* in a shop is the assistant, but *vendedor* and *comprador* together are the **roles**, the way English says *seller* and *buyer* rather than *shopkeeper* and *customer*.
That distinction is why the source lists them under commerce rather than under shopping, and why knowing *comprar* was not enough to cover it.

Your turn

Say these aloud:

- "el comprador" — *compra-DOR*
- the pair, seller then buyer
- both in the feminine
- which of the two you are when you hand over the money

Before you move on

What two steps build *comprador* from *comprar*? (Drop the **-ar**, add **-dor**.) Are *vendedor* and *comprador* shop words or role words? (Roles — the two parties to a sale.)

427.3 el policía — where the article changes the meaning

Say *el comprador* and *la compradora*, where the article follows the person. The word in this lesson does something different, and it is worth noticing.

The word, taken apart — and its English cousins

el policía — "the police officer." Greek **pólis**, "the city," through Latin *politia*, "the administration of a state."
The root is unusually productive, and every word on it is about the city:

word	the city in it
política	the running of the city
metró**polis**	the mother-city
policía	the keeping of the city's order

So a police officer is named after **the city**, not after policing. The institution came first and the person was named from it.

Grammar Lens: the article does the distinguishing

This is the fact a reading paper can test, and it catches people:

	meaning
el policía	a police officer, a man
la policía	the police **force** — or a woman officer

The word does not change. **The article carries the whole difference**, and *la policía* is ambiguous between the force and a female officer in a way that only context settles.
Compare it with the **-dor** pair from the last two lessons, where the ending moved and the article merely followed. Here the ending is fixed at **-ía** and the article is doing all the work.

Your turn

Say these aloud:

- "el policía" — *po-li-CÍ-a*, four syllables

- what *la policía* means, and why it has two readings
- which Greek word is inside it, and what it meant
- how this differs from *el vendedor / la vendedora*

Before you move on

What does Greek *pólis* mean? (The city.) What is the difference between *el policía* and *la policía*? (The first is an officer; the second is the force, or a woman officer.)

427.4 el bombero — named after the pump, not the fire

Say *el policía*. The other emergency service has a name built a different way again — and it is named after a piece of equipment.

The word, taken apart — and its English cousins

el bombero — "the firefighter."
From **la bomba**, which in Spanish means **a pump** as well as a bomb. A *bombero* is the person who works the pump.
English names the same person after what they fight: *fire*-fighter, *fire*-man. Spanish names them after what they carry. Two languages looking at the same person and choosing opposite halves of the scene.
The **-ero** ending is the third person-making ending in this chapter, and it attaches to **things** rather than to verbs:

thing	**the person who works with it**
la bomba — the pump	el bomb**ero**
el pan — bread	el pan**adero**
la carta — the letter	el cart**ero**

So Spanish has **-dor** for *the one who does the action* and **-ero** for *the one who works with the thing.*
Bomba is usually taken to imitate the sound of a boom, through Latin *bombus*, "a booming noise", from Greek (EtymDB 2.1).

Grammar Lens: three endings, three logics

ending	built from	example
-dor	a verb	vendedor
-ero	a thing	bombero
-ía	an institution	policía

None of the three is guessable from the meaning; all three are readable once you know which is which. That is the honest position: you cannot predict which ending a profession takes, but you can take any profession apart.

Your turn

Say these aloud:

- "el bombero" — *bom-BE-ro*
- what *la bomba* means besides a bomb
- the feminine form (*la bombera*)
- the difference between what **-dor** and **-ero** attach to

Before you move on

What is a *bombero* named after? (The pump.) What does **-ero** attach to, as against **-dor**? (A thing, where **-dor** attaches to a verb.)

427.5 el abogado — somebody called to your side

Say *el bombero*, named after his pump. The next profession is named after something nobody carries: a summons.

The word, taken apart — and its English cousins

el abogado — "the lawyer."
Latin **advocatus**: **ad-** to + **vocatus**, "called." Literally **one called to your side** — in a Roman court, the friend you summoned to speak for you.
English borrowed the same word twice and kept both:

word	the calling in it
advocate	one called to your side
vocation	a calling, in the older sense
convoke	to call together

Vocare, "to call," is the root under all of them, and it is the same root as *voz*, the voice.
Spanish wore *advocatus* down to *abogado* while English kept the Latin shape intact, which is the ordinary difference between a word that was **inherited** and a word that was **borrowed** — the same distinction *actor* and *trabajador* demonstrated.

Grammar Lens: the profession without a visible ending

profession	how the word was made
vendedor	Spanish added **-dor** to a Spanish verb
bombero	Spanish added **-ero** to a Spanish noun
abogado	Latin made it, and Spanish inherited it whole

Abogado has no ending you can remove to find a Spanish verb, because it was never built in Spanish. It arrived finished.
The feminine is the ordinary swap: *la abogada*.

Your turn

Say these aloud:

- "el abogado" — *a-bo-GA-do*
- the feminine form
- what the two Latin pieces mean (to, and called)
- which English word is the same Latin word kept whole (*advocate*)

Before you move on

What did *advocatus* literally mean? (One called to your side.) Can you find a Spanish verb inside *abogado*? (No — it was inherited whole from Latin rather than built in Spanish.)

427.6 la empresa — a thing taken on

Say *el vendedor* and *el comprador*. You can name both parties to a sale. Say where the seller works, and notice you have no word for it.

The word, taken apart — and its English cousins

la empresa — "the company, the firm."
Spanish took it from Italian **impresa**, built on Latin **in-** + **prehendere**, "to take hold of." An *empresa* is literally **a thing taken on** — an undertaking.
English took the same idea from French **enterprise**, *entre-* + *prendre*: a different prefix on the same verb, built to the same plan.
The difference is what each language did with it afterwards. English *enterprise* mostly means the **venture**; Spanish *empresa* means both the venture **and the firm that carries it out**. For an A1 form asking where you work, *empresa* is the everyday word — it is what English calls *the company*.
Prehendere is generous, and two of its descendants are already useful to you: *aprender*, to learn, is to **take hold of** something; and *sorprender*, to surprise, is to take somebody from above.

Grammar Lens: a workplace rather than a worker

The chapter has named five people by what they do. **La empresa** is the one word in it that names a **place and an organisation** instead:

word	**what it names**
el vendedor	a person
el abogado	a person
la empresa	the organisation they work for

That is why a form has two separate lines, *profesión* and *empresa*, and why answering one does not answer the other.

Your turn

Say these aloud:

- "la empresa" — *em-PRE-sa*
- what the two Latin pieces mean (in, and take hold of)
- the English cousin, and the one difference in what it covers
- which verb for learning comes from the same root (*aprender*)

Before you move on

What does *empresa* literally describe? (A thing taken on.) Does it mean the venture or the firm? (Both — where English *enterprise* mostly means only the venture.)

427.7 cinco personas y un lugar — sorted by how each name was built

Name as many of the six as you can before reading the table.

Grammar Lens: four ways to name a person

word	built from
el vendedor	the verb *vender*, plus **-dor**
el comprador	the verb *comprar*, plus **-dor**
el bombero	the noun *bomba*, plus **-ero**
el policía	the institution, *la policía*
el abogado	nothing in Spanish — inherited whole from Latin

Four different methods for five words, which is the honest summary: Spanish does not have one way of naming a profession. What it has is a small set of methods, and knowing them lets you **take a profession apart** even when you could not have predicted it.

The **-dor** pair is the only one that is productive for you: give it any verb you know and it gives you back the person — which is how *trabajar* gave *trabajador* in the character chapter, before you had any use for the ending.

Grammar Lens: which ones change, and how

masculine	feminine
el vendedor	la vendedora
el bombero	la bombera
el abogado	la abogada
el policía	**la policía** — and the word also means the force

Three behave ordinarily. **Policía** is the exception worth remembering, because the article is carrying a distinction no ending marks.
And **la empresa** is not a person at all — it is where several of these people work, which is why a form asks for it on its own line.

Your turn

Say these aloud:

- the two built with **-dor**, and the verb inside each
- the one built with **-ero**, and the thing inside it
- the one whose article changes the meaning, and both readings
- the one that is not a person

Before you move on

Which of the endings can you apply to a new verb yourself? (**-dor**.) Which word's meaning is decided by its article? (*Policía*.) Which of the six is not a person? (*La empresa*.)

427.8 ¿A qué se dedica? — the question about work

Say *el abogado* and *la empresa*. One answers what somebody does and one answers where. A conversation about work needs both.

Grammar Lens: naming a profession takes no article

This is the one grammatical trap in the answer, and English speakers fall into it every time:

correct	Soy abogado.
wrong	Soy **un** abogado.

English says *I am* ***a*** *lawyer*. Spanish drops the article when the sentence states nothing but the profession, because the bare noun is working as a description rather than picking out one individual. The article comes back as soon as you add anything to it: *Soy* ***un*** *abogado trabajador* — "I am a hard-working lawyer." Adding the adjective turns the description into a particular kind of thing, and a particular thing takes an article.

Read this

Read it: the lines below aloud
Every word has been taught:

> — ¿A qué se dedica? — Soy abogado. Trabajo en una empresa grande. — ¿Y su hermana? — Es policía. Mi hermano es bombero.

Three professions, no article on any of them, and *una empresa* taking one because it is a thing rather than a description.

Your turn

Say these aloud:

- "¿A qué se dedica?"
- "Soy abogado", and stop yourself before putting *un* in
- the same sentence with an adjective added, where the article returns
- your own answer, with the profession and the company

Before you move on

Why is it *Soy abogado* and not *Soy un abogado*? (A bare profession is a description, and a description takes no article.) When does the article come back? (As soon as an adjective is added.)

Chapter 428

Five Last Pieces

Modes: **voice** (6) **eyes** (1) **Hands-free start:** the first 5 of 7 lessons.

By the end of this chapter: I can read an e-mail address aloud with every symbol named, congratulate somebody, raise a glass, answer a sneeze, and name a creature I do not have the word for.

Read an invitation with an address on it, saying each symbol by name, and answer it with the right word at each moment of the evening.

428.1 la arroba — Spanish has a word where English has a noise

Say *el correo electrónico*. Now try to say your e-mail address aloud in Spanish, and stop at the symbol in the middle.

The word, taken apart — and its English cousins

la arroba — the **@** sign.
English calls it *at*, which is a preposition pressed into service. Spanish has a **noun** for it, and the noun is much older than e-mail.
An *arroba* was a unit of weight — about eleven and a half kilos — from Arabic **ar-rub^{c}**, "the quarter," because it was a quarter of a *quintal*. Merchants wrote it with a looped **a**, and that shorthand is the symbol on your keyboard.
So when a Spanish speaker reads out an address, they are naming a **medieval unit of weight**:

ana **arroba** ejemplo punto example

You have the other two pieces already: **punto** for the dot, from the punctuation chapter, and **guion** if the address carries one.

Grammar Lens: reading an address aloud

symbol	said aloud
@	arroba
.	punto
-	guion

A listening paper dictates an address using exactly these words, and the whole task is unreadable without the first one. Note that the symbol is **feminine**: *la arroba*, because the unit of weight was.

Your turn

Say these aloud:

- "la arroba"
- what an *arroba* was before it was a symbol
- your own e-mail address aloud, in Spanish
- the three symbols and their Spanish names

Before you move on

What was an *arroba* originally? (A unit of weight, a quarter of a *quintal*.) Which article does it take? (*La*.) What does a Spanish speaker say where an English speaker says "at"? (*Arroba*.)

428.2 el guion bajo — the hyphen that sits on the floor

Say *el guion*, the short mark that joins. Say *la arroba*. One symbol remains before an address can be read out complete.

The word, taken apart — and its English cousins

el guion bajo — the underscore, **_**.
The name is transparent and worth admiring for it: *guion* is the hyphen you already know, and **bajo** means *low*. It is the **low hyphen** — the same mark, dropped to the baseline.
English names it *under-score*, from the typewriter habit of scoring a line *under* text to underline it. Spanish names it by where it sits relative to the mark it resembles. Two languages, two entirely reasonable descriptions of the same key.
Bajo is Late Latin *bassus*, "low".

Grammar Lens: the address, complete

Every symbol an e-mail address can contain now has a Spanish name:

symbol	**said aloud**
@	arroba
.	punto
-	guion
_	guion bajo

ana_lopez **arroba** ejemplo **punto** example

Say that aloud and you have completed the task the source calls *dictating an e-mail address*. It needed four words, three of which you already had.
A real Spanish address usually ends in **punto es**, for the country. The addresses printed here end in *example* because that ending is reserved for teaching and can never belong to anybody.

Your turn

Say these aloud:

- "el guion bajo", and say what *bajo* is telling you
- the four symbol names in order
- the address above, aloud and complete
- the difference between *guion* and *guion bajo* on the page

Before you move on

What does *bajo* mean? (Low.) So what is a *guion bajo*? (A low hyphen — the underscore.) How many of the four address symbols did you already have before this chapter? (Three.)

428.3 ¡Felicidades! — the word you say, not the word you describe with

Say *el guion bajo*. The symbols are finished; what follows is what you say to people. Say *feliz*, then try to congratulate somebody with it — and notice the adjective will not do it.

The word, taken apart — and its English cousins

¡Felicidades! — "congratulations."
It is *felicidad*, "happiness," in the **plural** — literally *happinesses*. Spanish wishes several at once, which is what a congratulation is: not a description of a state but a handful of good wishes thrown at somebody.
The relationship to *feliz* is visible: *feliz* → *felicidad* → *felicidades*. An adjective, the noun made from it, and that noun pluralised into an act. *Felicidad* is Latin *felicitas*, from *felix*, "happy".

Grammar Lens: which one on which occasion

Spanish has two congratulation words and they are not interchangeable:

word	**for**
¡Felicidades!	a birthday, a saint's day, a wedding — an **occasion**
¡Felicitaciones!	an exam passed, a job won — an **achievement**

Felicidades is the one an A1 paper wants, because A1 life is birthdays rather than promotions. In much of Latin America *felicitaciones* is the commoner of the two; in Spain *felicidades* covers nearly everything. And note the marks: an exclamation in Spanish opens with **¡** and closes with **!**, the same doubling you learned for questions.

Your turn

Say these aloud:

- "¡Felicidades!"
- the singular noun it is built from (*felicidad*)
- the adjective under that (*feliz*)
- which of the two congratulation words fits a birthday

Before you move on

What does *¡Felicidades!* literally say? (*Happinesses* — several at once.) Which word suits an achievement rather than an occasion? (*¡Felicitaciones!*)

428.4 ¡Salud! — a noun doing a job

Say *la salud*, health. Say *¡Felicidades!* You have one noun that describes and one that acts. This lesson turns the first into the second.

The word, taken apart — and its English cousins

¡Salud! — "cheers," raising a glass.
It is the same word you already have, with no article and an exclamation around it. Stripped of *la*, it stops describing a condition and becomes a **wish**: *health to you.*
That is what almost every toast in Europe is. English *cheers* wishes cheerfulness; Irish *sláinte* is literally *health*; and *¡Salud!* is the Spanish member of the same family. Raising a glass is wishing somebody well, and most languages say so plainly.
Salud is Latin *salus*, *salutem*, "health".

Grammar Lens: the same word, two occasions

¡Salud! does a second job that catches English speakers out:

when	what it means
raising a glass	cheers
after somebody sneezes	bless you

English uses two unrelated expressions for those. Spanish uses one word for both, and the reason is the same in each case: **you are wishing the person health**, whether because they are about to drink or because they have sneezed.
Some speakers say *¡Jesús!* after a sneeze instead, and in a formal toast you may hear the fuller *¡A tu salud!* — "to your health." The bare word covers both occasions and is never wrong.

Your turn

Say these aloud:

- "¡Salud!" with no article
- the two occasions it fits
- *la salud* and *¡Salud!* one after the other, and name the difference
- which one you would use at a birthday alongside *¡Felicidades!*

Before you move on

What is the difference on the page between the noun and the toast? (The article — the toast drops it.) What are the two occasions for *¡Salud!*? (Raising a glass, and after a sneeze.)

428.5 el animal — a thing with breath in it

Say *¡Salud!* — a word you already had, put to a new use. Now name three creatures you can say in Spanish, and try to say the word that covers all three at once.

The word, taken apart — and its English cousins

el animal — "the animal."
Latin **animal**, from **anima**, "breath, soul." An animal is literally **a thing that has breath in it** — which is how Latin drew the line

between the living and the not-living, at the lungs.
Anima is generous, and every word on it is about that breath:

word	**the breath in it**
animal	a thing that breathes
ánimo	spirit, courage
des**anim**ado	discouraged — the breath gone out
re**anim**ar	to revive — to put the breath back

English took the same root for **animate**, **unanimous** (of one *anima*, one mind) and **magnanimous** (of a great one).

Grammar Lens: the word that covers the others

This is a **superordinate** — a word one level up from the ones it covers. The corpus has taught particular creatures for hundreds of chapters without ever teaching the category they belong to.
That gap matters more than it looks. A superordinate is what lets you talk about something you cannot name: *un animal grande* works when you do not know the word for the creature in front of you, and a reading paper will use it exactly that way, in a notice or a sign that must cover every creature at once.
The stress is on the last syllable — *a-ni-MAL* — and there is no written accent, because a word ending in **-l** is stressed there by default.

Your turn

Say these aloud:

- "el animal" — *a-ni-MAL*
- what *anima* meant, and where Latin drew the line
- "un animal grande", and say when you would need it
- which English word means "of one mind" and hides the same root

Before you move on

What does *anima* mean? (Breath, soul.) Why does *animal* carry no written accent? (A word ending in **-l** is stressed on the last syllable anyway.) What is a superordinate for? (Talking about a thing you cannot name.)

428.6 cinco piezas sueltas — five things that finish five different jobs

Name the five before reading the table. They have less in common than usual, which is the point.

Grammar Lens: what each one completes

word	finishes
la arroba	reading an address aloud
el guion bajo	the same
¡Felicidades!	congratulating somebody
¡Salud!	raising a glass, and answering a sneeze
el animal	naming a creature you cannot name

The address needed only these two: *punto* and *guion* were already yours from the punctuation chapter.
Each was the **last missing piece** of something the corpus could otherwise nearly do. That is what makes them worth a chapter together despite having nothing else in common: the address needed two more words, the social phrases were absent although the adjectives behind them were taught, and a dozen creatures had no category.

Grammar Lens: two of them are nouns doing other work

word	as a noun	as an act
salud	health	cheers, bless you
felicidad	happiness	—
felicidades	—	congratulations

¡Salud! drops its article and becomes a wish. **¡Felicidades!** takes a plural and becomes an act. Neither is a new word in the ordinary sense; both are an existing word put to a different use, which is why the adjectives behind them were never enough on their own.

Your turn

Say these aloud:

- the two symbol names, and the two you already had
- the two things you say to people, and the occasion for each
- what a superordinate is for
- what happens to *salud* when it loses its article

Before you move on

Which two of the five are existing words put to a new use? (*Salud* and *felicidades*.) What was an *arroba* before it was a symbol? (A unit of weight.)

428.7 una invitación — reading it, and answering it

Say the two things you would say at a birthday. One congratulates and one raises a glass.

Read this

Read it: this invitation aloud, saying every symbol by name

> **Cumpleaños de Ana** Sábado, a las ocho. Confirma en ana_lopez arroba ejemplo punto example

The address line is written in words here because that is how it is **said**. On a screen it would read *ana_lopez@ejemplo.example*, and saying it aloud requires the four names: *guion bajo*, *arroba*, *punto*, and the letters themselves.
A real Spanish address would end *punto es*; this one ends in the

reserved teaching word instead, so that nobody is written to by accident.

Grammar Lens: answering it

moment	**what you say**
arriving	¡Felicidades!
the first glass	¡Salud!
somebody sneezes	¡Salud!

Two words cover the whole evening, and one of them covers two of the three moments.
If the invitation had been to a farm rather than a flat, you would also have the word for whatever was in the field: *un animal*.

Your turn

Say these aloud:

- the address line aloud, every symbol by name
- what you say on arriving, and what you say at the first glass
- the same word again, this time because somebody sneezed
- your own e-mail address aloud in Spanish

Before you move on

How many symbol names does reading an address aloud need? (Four.) Which of the two social words covers two different moments? (*¡Salud!*)

Chapter 429

The Instituto, And What A Mark Is Called

Modes: **voice** (3) **eyes** (4) **Hands-free start:** the first 2 of 7 lessons.

By the end of this chapter: I can name the school a Spanish teenager goes to, read a report card, say what mark I got, and say whether I passed or failed.

Read a three-row report card from a Spanish secondary school, say which subjects passed and which hangs, and answer the spoken version of the same question.

429.1 el instituto — the building between the two you already know

You can say *la escuela* and *la universidad*. A Spanish fifteen-year-old goes to neither. Where do they go?

You'll want to know: el instituto

el instituto — the secondary school, for students of about twelve to eighteen.

On a sign it is often shortened to **IES** — *Instituto de Educación Secundaria*.

The word, taken apart — and its English cousins

Latin **instituere** — *in-* plus **statuere**, "to set up, to stand a thing upright." An **institutum** was **something that had been set up**: a custom, an arrangement, a foundation. A Spanish *instituto* is a **thing that was established**, and the school sense is one narrow use of a very wide word.
Statuere is behind a crowd of words you can already half-read: *estatua*, *estado*, *estatura*, *constituir*. Every one of them is about **standing**.

Grammar Lens: the false friend, and the ladder it breaks

English *institute* names a research body — the Institute of Physics. Spanish *instituto* can mean that too, but its everyday sense is **the school**, and that is the one a reading paper uses.
The three buildings in order:

age	building
about 6 to 12	la escuela
about 12 to 18	el instituto
after 18	la universidad

Without the middle rung the ladder has a gap in exactly the years an exam candidate is most likely to be asked about.
The stress is *ins-ti-TU-to*, on the second-last syllable, and no accent is written because a word ending in a vowel is stressed there by default.

Your turn

Say these aloud:

- "el instituto" — *ins-ti-TU-to*
- the three buildings in order of age
- what the letters *IES* stand for
- what *statuere* meant, and one Spanish word that still shows it

Before you move on

Where does a fifteen-year-old go? (*Al instituto.*) What does English *institute* name instead? (A research body.) What was an *institutum*

in Latin? (Something that had been set up.)

429.2 la nota — a mark, in the oldest sense of the word

You can say *el examen*. Now try to say what you got for it, and notice you have the event and not the result.

You'll want to know: la nota

la nota — the mark, the grade.

¿Qué nota tienes? — "What mark did you get?" In Spain the answer is a number **out of ten**, and five is where passing begins.

The word, taken apart — and its English cousins

Latin **nota** meant **a mark scratched onto something** — a sign cut into wax, wood or skin so it could be told apart later.
Every modern sense grew out of that one scratch:

word	**the mark in it**
nota	the mark a teacher puts on your work
notar	to notice — to catch the mark
notable	worth marking

English *note*, *notice*, *notable* and *notorious* are the same word arriving by a different road.
So the grade sense is not a metaphor. **It is the literal one**, and a written note — a mark made on paper to be read later — is the extension.

Grammar Lens: one word, two senses, and how to tell them apart

You have met *nota* before, on a message left for somebody. Both senses are live, and what sorts them is the company the word keeps:

what stands nearby	which sense
examen, *clase*, a number	the mark
dejar, *escribir*, a person	the message

Sacar buena nota is the set phrase for doing well — literally "to take out a good mark," the way you take out anything you have earned.

Your turn

Say these aloud:

- "la nota" — the mark
- "¿Qué nota tienes?"
- what a Latin *nota* physically was
- the phrase for doing well in an exam (*sacar buena nota*)

Before you move on

Out of how many is a Spanish school mark? (Ten.) Which sense of *nota* came first, the mark or the message? (The mark — Latin *nota* was a scratch.) What tells the two senses apart in a sentence? (The words standing next to it.)

429.3 la calificación — the word the paper uses when the person would say *nota*

Say *nota*. Now imagine it printed at the top of an official column on a school document, and expect a longer word.

You'll want to know: la calificación

la calificación — the grade, in its formal dress.

Spoken between students it is *nota*. Printed on a report, a transcript or a form, it is **calificación**, and the two name the same thing.

The word, taken apart — and its English cousins

Medieval Latin **qualificare**, built from **qualis** ("of what kind") plus **facere** ("to make"). To *calificar* is **to say what kind a thing is**. That is a startlingly honest description of what a grade does. A number out of ten is a claim about the **kind** of work in front of the reader, which is why the formal word for it is built from the question *of what kind?*

English took the same compound as **qualify**, and kept the other half of the sense: to *qualify* a statement is to say what kind of statement it is.

Grammar Lens: where the accent sits, and why

Calificación ends in **-n**, which by default pulls the stress to the second-last syllable — *ca-li-fi-CA-cion*. The stress is on the last one, so an accent has to be written: **-ción**.

Every Spanish word ending in **-ción** works this way, and you have met dozens:

word	**stressed syllable**
calificación	-ción
educación	-ción
información	-ción

In the plural the accent disappears — *calificaciones* — because adding a syllable puts the stress where the default would have put it anyway.

Your turn

Say these aloud:

- "la calificación" — *ca-li-fi-ca-CIÓN*
- which of *nota* and *calificación* you would hear in a corridor
- what *qualis* meant, and what a grade therefore claims
- the plural, and say why it loses its accent

Before you move on

What question is hiding inside *calificación*? (*Of what kind?*) Where does its accent go, and where does it go in the plural? (On *-ción*;

the plural drops it.) Which English word is the same compound? (*Qualify.*)

429.4 aprobar — to pass, and who is really doing the approving

You can name the exam and the mark. Say what you did with the exam when the mark was a five or better.

You'll want to know: aprobar

aprobar — to pass, as in to pass an exam.
He aprobado el examen. — "I have passed the exam."
The mark that does it is a **five out of ten** and upward.

The word, taken apart — and its English cousins

Latin **approbare** — *ad-* ("towards") plus **probare**, "to test something and find it good."
Look at the direction that gives you. English says *I passed the exam*, with the student doing the acting and the exam standing still. The Latin behind *aprobar* says something closer to **the examiner tested the work and found it good** — the judgement travels the other way. *Probare* is a generous root, and you can read its family off the page:

word	what it tests
probar	to try, to taste, to test
prueba	a test, a piece of evidence
a**prob**ar	to test and find good

English *probe*, *proof*, *prove* and *approve* all come from the same verb.

Grammar Lens: the vowel that breaks in the middle

Aprobar is one of the verbs whose **o** splits into **ue** when the stress lands on it:

form	stem
yo apr**ue**bo	stressed
nosotros apr**o**bamos	unstressed

You have seen this before in *poder* and *contar*. The rule has not

changed: the stem breaks where the stress falls and stays whole where it does not.

Your turn

Say these aloud:

- "aprobar" — to pass
- "He aprobado el examen"
- the *yo* form, and hear where the stem breaks
- what *probare* meant, and which direction the judgement travels
- the formal word a report prints for the number you got

Before you move on

What mark passes? (Five out of ten.) What did *probare* mean? (To test and find good.) What happens to the **o** in *yo apruebo*? (It breaks into **ue**, because the stress lands on it.)

429.5 suspender — to fail, and the picture the word is holding

You can say *aprobar*. Guess its opposite, and then go on to see what the Spanish word is actually picturing.

You'll want to know: suspender

suspender — to fail, as in to fail an exam or a subject.

He suspendido el examen. — "I have failed the exam." A mark below **five** does it.

The word, taken apart — and its English cousins

Latin **suspendere** — *sub-* ("beneath") plus **pendere**, "to hang." To suspend a thing is to leave it **hanging**.
That is not a dead metaphor here. A failed subject in Spain is **not finished**: it hangs over the student until a resit in a later term. There

is even a word for one — *una asignatura pendiente*, "a hanging subject" — which people also use for anything in life they have been putting off. **Pendere** built a shelf of words that all hang:

word	what hangs
pendiente	a slope, an earring, a thing outstanding
de**pend**er	to hang from something else
pensar	to weigh a thing in the mind

English *pendant*, *pending*, *suspense* and *depend* hang from the same nail.

Grammar Lens: the English false friend, and the Spanish one

English *suspend* keeps only the harsher senses — a suspended player, a suspended sentence. The school sense does not survive the crossing, so an English speaker reading *he suspendido* will hear something far more dramatic than what happened.

The pair, side by side:

mark	verb
five or above	aprobar
below five	suspender

Both verbs take the exam as their object, so the exam is what is passed or failed, rather than the student.

Your turn

Say these aloud:

- "suspender" — to fail
- "He suspendido el examen"
- the pair, with the mark that decides each
- what *una asignatura pendiente* is, and what it means outside school

Before you move on

What does *pendere* mean? (To hang.) What is *una asignatura pendiente*? (A subject left hanging, and by extension anything

outstanding.) Which mark divides *aprobar* from *suspender*? (Five.)

429.6 el curso entero — one school year, in five words

Name the building and the thing a teacher writes on your work, before you look at the table.

Grammar Lens: the year, in order

what happens	the word
you go to the building	el instituto
you sit in the room	la clase
you sit the thing	el examen
a number comes back	la nota
the document prints it	la calificación
five or above	aprobar
below five	suspender

Two of those seven were already yours. The chapter added the other five, and with them the track can follow a school year from the door to the report.

Grammar Lens: two words for one number

where you meet it	which word
a friend asking in a corridor	la nota
a column heading on a document	la calificación

Same number, two registers. A reading paper prints the formal one; a listening paper says the short one.

Grammar Lens: three Latin pictures

word	the picture under it
nota	a scratch cut into a surface
aprobar	a thing tested and found good
suspender	a thing left hanging

The third one is still literally true in Spain, where a failed subject hangs over a student until the resit.

Your turn

Say these aloud:

- the three school buildings by the age that goes to each
- the two words for the number, and where each one appears
- the two verbs, and the mark that divides them
- the picture hiding inside *suspender*

Before you move on

Which word heads a column on a report? (*Calificación.*) Which verb is the Latin for *found good*? (*Aprobar.*) Which building takes a fifteen-year-old? (*El instituto.*)

429.7 Synthesis — reading a report card

Say the two words for a mark. One of them is about to appear as a column heading.

Read this

IES Ejemplo Boletín de calificaciones

clase	calificación
Matemáticas	7
Historia	4
Inglés	9

Three rows, and everything in them is now readable. **IES** is the school. **Calificación** heads the column because this is a printed document. The numbers are out of ten.

A real letterhead carries the centre's own name after those three letters — usually a poet, a scientist or a place. **Ejemplo** stands in for it here, so nothing on this page points at a school somebody actually attends. What you read off a real document is the same three things: the **IES**,

the heading, and the column.

How to answer

Two of the three rows passed and one did not. Say which verb goes with each:

> *He aprobado Matemáticas e Inglés. He suspendido Historia.*

The history row is the one that hangs. The student will carry it into the next term as **una asignatura pendiente**, and the family will ask about it in exactly those words.

The exchange

> *— ¿Qué notas has sacado? — He aprobado casi todo. Historia no.*

The question uses **notas** because it is spoken. The answer names the one that did not pass, which is what the question is really asking about.

Your turn

Say these aloud:

- what *IES* at the top of the document stands for
- which subjects passed, using the right verb
- which subject hangs, and the phrase for it
- the spoken version of the question, and answer it about the 4

Before you move on

Which word heads the column on the printed report? (*Calificación.*) What happened to Historia? (*Suspendida* — it hangs.) What is the spoken word for the same number? (*La nota.*)

Chapter 430

The Wardrobe, And The Word For Having No Work

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say that somebody is out of work, read a clothes-shop price list, and name the three garments the corpus was missing.
>
> *Read a sale board with three garments and three prices, say which is cheapest and what you would buy, and answer whether you are working.*

430.1 estar en paro — the halt, rather than the missing job

> You can say *el trabajo*. Try to say that somebody has none, and notice English reaches for a word built on *employ* that Spanish does not use in conversation.

You'll want to know: estar en paro

estar en paro — to be unemployed, to be out of work.
Mi hermano está en paro. — "My brother is out of work."
El paro on its own is both the state and the benefit paid during it.

The word, taken apart — and its English cousins

El paro is built straight off **parar**, "to stop" — so it is a **stoppage**. Spanish names the situation after **the halt**, where English names it after the missing employment.

The verb has a startling history. Latin **parare** meant **to make ready** — the root inside *preparar* and *reparar*. The sense travelled in steps: *to get ready* became *to stand ready*, and *to stand ready* became **to stand still**.

word	**where on the journey**
pre**para**r	to make ready beforehand
parar	to stand still
el **paro**	the standing still itself

So *estar en paro* is, underneath, **being in the halt**.

Grammar Lens: which verb, and which country

It takes **estar** rather than **ser**, because it names a situation rather than a person, and situations change.

where	**the everyday word**
Spain	el paro
much of Latin America	el desempleo

Desempleo is the formal word everywhere, and the one a newspaper prints. A person in Spain talking about their own life says **paro**.

The pair a form will ask you to choose between is short: *tengo trabajo* against *estoy en paro*.

Your turn

Say these aloud:

- "estar en paro" — to be out of work
- "Mi hermano está en paro"
- the two halves of the pair — having work, and being in the halt
- what *parare* meant in Latin, and the two steps to *stop*

Before you move on

Which verb does *en paro* take, *ser* or *estar*? (**Estar** — it is a situation.) What does *el paro* literally name? (The stoppage.) Which word would a newspaper print instead? (*El desempleo.*)

430.2 los vaqueros — trousers named after the man who wore them

You can say *el pantalón* for trousers in general. Name the one kind of trousers almost everybody in the room is wearing, and see whether you have a word for it.

You'll want to know: los vaqueros

los vaqueros — jeans.

Always plural, the way *pantalones* is, because the garment has two legs.

The word, taken apart — and its English cousins

La vaca is a cow, from Latin **vacca**. A **vaquero** is the man who looks after them — a cowherd, and in the Americas a **cowboy**.

Jeans arrived in Spain as the trousers those men wore, and Spanish named them after **the wearer** rather than the cloth. English went the other way: *jeans* comes from **Genoa**, the Italian port whose hard cotton the trousers were cut from, and *denim* from *de Nîmes*, the French town. Three languages, three different things noticed about the same garment.

Some regions say **los tejanos** instead — "the Texans" — which is the same thought arriving from a different direction.

Grammar Lens: garments that come in pairs

garment	usual number
los vaqueros	plural
los pantalones	plural
la camisa	singular

Anything with two legs tends to arrive plural. Spanish tolerates *el pantalón* in the singular, and does **not** do the same for *vaqueros* — you

will hear the plural every time.
The **v** and the **b** sound alike in Spanish, so *vaquero* opens with the same soft sound as *bueno*. Spelling keeps the Latin **v**; the mouth stopped distinguishing them centuries ago.

Your turn

Say these aloud:

- "los vaqueros" — jeans
- what a *vaquero* is when it is a person
- which garments Spanish keeps plural, and why
- where English *jeans* and *denim* come from

Before you move on

What animal is hiding in *vaqueros*? (*La vaca*, the cow.) What did English name the same trousers after? (Two cities — Genoa and Nîmes.) Would you say *el vaquero* for the garment? (No — the garment is plural.)

430.3 el jersey — an island, worn

You can say *la camisa*. Name what you put **over** it when the weather turns, and see whether the word is there.

You'll want to know: el jersey

el jersey — the jumper, the pullover, the sweater.

Said the Spanish way: *jer-SÉI*, with the **j** as the throaty *jota* you already have from *jamón*.

The word, taken apart — and its English cousins

Jersey is an island in the Channel, between England and France. Its knitters were famous, and the heavy woollen garment they made took the island's name in English. Spanish borrowed the English word entire, island and all.

That makes it one of a small set of Spanish clothing words that name a **place** rather than a shape or a material:

garment	**the place**
el jersey	a Channel island
los tejanos	Texas
la chaqueta	a French peasant named Jacques

Latin America mostly says **el suéter** instead — also English, borrowed a different way, and spelled to fit Spanish.

Grammar Lens: what a borrowed word has to learn

A word taken from another language still has to obey the accent rules of this one. *Jersey* is stressed on its last syllable, and a word ending in **-y** takes no written accent, so the singular is bare.
The plural is where it shows:

number	**form**
singular	el jersey
plural	los jerséis

The **y** turns into an **i**, the ending becomes **-s**, and now an accent is needed to hold the stress where it was. Spanish did not leave the word foreign; it made it follow the rules.

Your turn

Say these aloud:

- "el jersey" — *jer-SÉI*
- the plural, and hear where the accent has to appear
- what Jersey is, before it was a garment
- the word much of Latin America uses instead

Before you move on

What is a *jersey*, before it is clothing? (An island in the Channel.) What is the plural? (*Los jerséis* — with a written accent.) Why does the accent appear only in the plural? (The ending changes, so the stress needs holding.)

430.4 el bolso — a hide, a purse, and one vowel that changes the object

You have clothes and now a jumper. Name the thing carried **beside** the clothes rather than worn, and see whether you have it.

You'll want to know: el bolso

el bolso — the handbag.

Not a shopping bag and not a pocket. A *bolso* is the bag carried on the arm or shoulder, and a shop will file it under accessories beside the shoes.

The word, taken apart — and its English cousins

Greek **byrsa** meant **a hide, a piece of worked leather**. Latin took it as **bursa**, and because a leather pouch is what money was carried in, the word came to mean **purse**.

From that one pouch:

word	what it kept
el bolso	the bag on your arm
el bolsillo	the little one sewn into your clothes
la bolsa	the bag, and the stock exchange

English got **bursar**, **reimburse** and **purse** from the same leather. The stock-exchange sense is the strangest and the best attested: traders in fifteenth-century Bruges met at the house of a family called **Van der Buerse**, and the name of the meeting place became the name of the market everywhere.

Grammar Lens: the vowel that picks the object

Bolso and **bolsa** are one letter apart and name different things:

word	what it is
el bolso	a handbag
la bolsa	a bag, a carrier bag, the stock exchange

Ask for *una bolsa* in a shop and you get something to carry the shopping home in. Ask for *un bolso* and you are shown the leather

goods.
This is a pattern worth knowing rather than a single oddity: Spanish sometimes uses the **-o / -a** pair to separate two related objects rather than two genders of one. You have already met *el pantalón* keeping its own shape for the same kind of reason.

Your turn

Say these aloud:

- "el bolso" — the handbag
- what *una bolsa* would get you in a shop instead
- what *byrsa* meant, and what it was used to carry
- the word for the small one sewn into your clothes

Before you move on

Which of *bolso* and *bolsa* is the handbag? (*El bolso.*) What did the Greek word name? (A hide.) What else does *la bolsa* mean? (The stock exchange — after a family's house in Bruges.)

430.5 cuatro que cierran dos listas — four words, two finished lists

Say the two halves of the work pair — having it, and not having it — before you read on.

Grammar Lens: the wardrobe, complete

garment	already yours
el pantalón	yes
la falda	yes
la camisa	yes
el zapato	yes
los vaqueros	new
el jersey	new
el bolso	new

Four were taught across earlier chapters and three arrived here. The list an exam works from is now covered end to end, which is what the three were for.

Grammar Lens: each one's own trap

word	what to watch
estar en paro	takes *estar*, and *paro* means the halt
los vaqueros	plural every time
el jersey	plural *jerséis*, with a written accent
el bolso	*la bolsa* is a different object

Grammar Lens: where each word came from

word	named after
el paro	the stopping
los vaqueros	the cowherd
el jersey	an island
el bolso	a leather hide

Three of the four are named after something other than themselves — a person, a place, a material. That is a habit worth noticing, because it is how a reader guesses at a word they have not met.

Your turn

Say these aloud:

- the seven garments, running through the whole wardrobe
- the plural of *jersey*
- the difference between *el bolso* and *la bolsa*
- which verb goes with *en paro*, and why

Before you move on

Which garment is always plural? (*Los vaqueros.*) Which word changes object when you change its last vowel? (*Bolso* against *bolsa.*) What does *el paro* name? (The halt.)

430.6 Synthesis — a shop window and a sentence about yourself

Name the three garments this chapter added, before they appear in a price list.

Read this

ROPA — REBAJAS

artículo	**precio**
vaqueros	25 €
jerséis	18 €
bolsos	30 €

Every line is readable, and one of them is teaching you something: the middle row is a **plural**, and the accent on *jerséis* is exactly where the singular did not need one.

How to answer

Say what is cheapest, what is dearest, and what you would buy:

Los jerséis son los más baratos. Quiero unos vaqueros.

Note *unos vaqueros* rather than *un vaquero.* A pair of trousers is a plural thing, so the article is plural too.

The exchange

The other half of the chapter, in the two lines a form or an interview wants:

— ¿Trabajas? — No, estoy en paro.

Estoy, not *soy*. Being out of work is a situation, and Spanish keeps situations away from *ser*. The same answer in the positive is *sí, tengo trabajo* — the noun you have had since the professions chapter, finally with a negative to stand against.

Your turn

Say these aloud:

- the three prices with their garments
- which row carries a written accent, and where the singular has none
- "Quiero unos vaqueros", and say why the article is plural
- both answers to *¿Trabajas?*

Before you move on

Which verb answers *¿Trabajas?* in the negative? (*Estoy — estoy en paro.*) Which word in the price list gained an accent in the plural? (*Jerséis.*) Why *unos vaqueros* rather than *un*? (The garment is plural.)

Chapter 431

El Pedido Y La Devolución

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can talk about an order that has arrived late, say who the shop blames, ask to return it and understand what I am being charged.
>
> *Read the notice or advert this chapter's words exist for, then say the same thing back.*

431.1 el pedido — what you asked for

> You can say *comprar* and *la tienda*. Now say the **thing itself** — the parcel that has not arrived yet — and see whether you have a word for it.

You'll want to know: el pedido

el pedido — the order.

Not the act of ordering: the **thing ordered**. The box on its way to you, the line on the restaurant's docket, the number you quote on the phone.

The word, taken apart — and its English cousins

el pedido is the past participle of **pedir**, to ask for, used as a noun. *Pedir* ← Latin *petere*, "to seek" (EtymDB 2.1). What was asked for. Spanish does this constantly, and once you see it you will see it everywhere:

verb	the noun made from it
pedir	el pedido
llamar	la llamada
entrar	la entrada

You already hold **la entrada** for a ticket. It is *the entered thing* by the same move. A participle that hardens into a noun is one of the cheapest ways this language makes new words, and it costs you no new ending.

Your turn

Say these aloud:

- *el pedido*
- I bought it in the shop, and the order has not arrived
- which verb *el pedido* was made from

Before you move on

The order? (**el pedido**.) From which verb? (**pedir**.) Does it mean the asking or the thing asked for? (**The thing.**)

431.2 devolver — to turn it back

Say *el pedido*. Say *pagar*. The order came, you paid, and it is the wrong size. Say what you do next.

You'll want to know: devolver

devolver — to give back, to return a thing.

A thing, not a place. You *devolver* a jumper, a book, a borrowed charger. For going back somewhere yourself, Spanish uses **volver** on its own.

The word, taken apart — and its English cousins

de- back, plus **volver**, to turn. To turn a thing back. *Volver* ← Latin *volvere*, "to roll, to turn" (EtymDB 2.1).
That is the whole word, and it tells you the grammar too: **devolver**

turns exactly like **volver**, which you already say. The **o** becomes **ue** when the stress lands on it:

form	
yo devuelvo	I give back
nosotros devolvemos	we give back

The stress moves off the **o** in *devolvemos*, and the **ue** goes with it. This is the same pattern as *poder / puedo* and *dormir / duermo*; learning it once buys you a whole family of verbs.

Grammar Lens: the two ways back

you mean	**you say**
I return the order	devuelvo el pedido
I return home	vuelvo a casa

English uses *return* for both and lets context sort it out. Spanish splits them, and the split is not a nuisance — it is the prefix doing exactly what it says.

Your turn

Say these aloud:

- *devolver*
- I want to return the order
- I paid and now I am returning it
- the difference between *devuelvo* and *vuelvo*

Before you move on

To give a thing back? (**devolver**.) And to go back yourself? (**volver**.) What does the **de-** add? (**Back.**)

431.3 el retraso — put further behind

Say *el pedido*. Say *devolver*. The order is not late enough to return yet — it is only late. Say that.

You'll want to know: el retraso

el retraso — the delay.

con retraso — late, running behind. That is the phrase you will hear on a platform: *el tren sale con veinte minutos de retraso.*

The word, taken apart — and its English cousins

re- again, plus **tras**, behind. Something put further behind than it should be.

tras is worth a moment on its own, because it is hiding in words you will meet all week:

word	**the behind in it**
detrás	behind, in place
atrasar	to put back
el retraso	the being-behind

Spanish also has **tardar**, to take time, from a different Latin word for *slow*. Two families, one idea, and a speaker picks whichever fits: a train *lleva retraso*, a journey *tarda* two hours.

Your turn

Say these aloud:

- *el retraso*
- the order is arriving late
- the train leaves with twenty minutes' delay

Before you move on

The delay? (**el retraso**.) Running late? (**con retraso**.) What does **tras** mean on its own? (**Behind.**)

431.4 el proveedor — the one further up the line

Say *la tienda.* Say *el retraso.* The shop says the delay is not their fault. Whose, then?

You'll want to know: el proveedor

el proveedor — the supplier.

The company that supplies the shop. You rarely deal with one; you hear about one when something has gone wrong: *un problema con nuestro proveedor.*

The word, taken apart — and its English cousins

proveer, to provide, plus **-dor**, the ending that makes a doer.
That ending is worth more to you than this one word, because it is completely regular and it turns verbs you already hold into people and machines:

verb	the doer
proveer	el proveedor
trabajar	el trabajador
vender	el vendedor

Once you notice **-dor**, a long unfamiliar noun often decomposes into a verb you know plus *the one who does it.* That is a reading strategy, not a word.
Proveer is Latin *providere*, "to see ahead, to provide", worn down in speech.

Your turn

Say these aloud:

- *el proveedor*
- there is a problem with the supplier
- the doer-word made from *trabajar*

Before you move on

The supplier? (**el proveedor**.) What does **-dor** add? (**The one who does it.**) From which verb? (**proveer**.)

431.5 cobrar — the other end of paying

Say *pagar*. Say *el dinero*. You have had both a long time. Now say what the **shop** does, from its own side of the counter.

You'll want to know: cobrar

cobrar — to charge somebody, to collect money, to get paid.

One verb for all three, and which one it means depends on who is speaking.

The word, taken apart — and its English cousins

cobrar is a shortening of *recobrar*, "to recover", which is Latin *recuperare*, "to get back" (Lewis & Short) — inherited: the *-p-* became *-b-*. To be paid is to get your money back.

Grammar Lens: who is on each end

pagar and **cobrar** are the same transaction from opposite sides:

who	**verb**
the customer	paga
the shop	cobra

So *me cobraron treinta euros* — they charged me thirty. And *cobro el viernes* — I get paid on Friday, said by somebody with a job. English needs three different verbs (*charge*, *collect*, *get paid*) where Spanish holds one, and the one holds because the money is always moving **toward** the speaker.

That is also why **no se cobra nada** on a shop notice means nothing will be charged to you.

Your turn

Say these aloud:

- *cobrar*
- I pay and the shop charges
- they charged me thirty euros
- I get paid on Friday

Before you move on

The customer does what? (**paga**.) And the shop? (**cobra**.) What does *no se cobra nada* tell you? (**You will not be charged.**)

431.6 (pedido, devolver, retraso, proveedor, cobrar) — from cold

From memory alone, say *the order*, *to give back* and *the delay*.

Grammar Lens: three of the five were built, not learned

word	made from	by
el pedido	pedir	a participle used as a noun
el proveedor	proveer	the doer-ending **-dor**
devolver	volver	the prefix **de-**, back

Three of this chapter's five words are a piece you already had plus one move. Do not read a rule into it — plenty of Spanish words are simple and whole. What is worth carrying is the habit of **looking** for the join before deciding a long word is new.

What you've built

You could buy things and pay for them, and you could not say what happens when it goes wrong. *Comprar*, *pagar*, *la tienda* and *el dinero* have been yours for a long time, and between them they cover only the half of a transaction where everybody is content.
This chapter adds the other half: the thing itself (**el pedido**), it arriving late (**el retraso**), whose fault the shop says that is (**el proveedor**), sending it back (**devolver**) and what you are or are not charged (**cobrar**).

Your turn

Say these aloud:

- all five words
- which three were built from a piece you already had
- the customer pays and the shop ...
- the order is arriving late and I want to return it

Before you move on

To give a thing back? (**devolver**.) The one who supplies the shop? (**el proveedor**.) The shop's side of *pagar*? (**cobrar**.)

431.7 (una reclamación) — the whole transaction, gone wrong

You are about to read a real notice of the kind a shop sends. Before you do, say *el pedido* and *el retraso* once each.

Your turn

Read it: the notice once without stopping, then answer

> Estimado cliente: su **pedido** número 3182 sufrirá un **retraso** de tres días por un problema con nuestro **proveedor**. No se le **cobrará** el envío.

Say these aloud:

- how many days late it is
- whose problem the shop says it is
- whether you will be charged for delivery

What you've built

Now the other direction. Say aloud, as if on the telephone:
Say these aloud:

- my order is arriving with a delay of three days
- I paid on Monday and nobody has charged me for the delivery
- if it does not arrive this week I want to return it

Four sentences ago you could not have said any of that. The transaction you could describe stopped at the moment of paying; it now runs all the way to the complaint.

Before you move on

Your order? (**mi pedido**.) With a delay? (**con retraso**.) And if you want to send it back? (**devolver**.)

Chapter 432

La Casa Por Dentro

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can name the machines and fittings a building notice talks about, and read a notice about the water being cut off.
>
> *Read the notice or advert this chapter's words exist for, then say the same thing back.*

432.1 la lavadora — the thing that washes

> Say *lavar*. Say *el proveedor*. You met the doer-ending one chapter ago. Put it on *lavar* and guess before you are told.

You'll want to know: la lavadora

la lavadora — the washing machine.

If you guessed it, that is the point of the last chapter arriving before this one.

The word, taken apart — and its English cousins

lavar plus **-dora**. The same ending as **el proveedor**, in its feminine form, and it does the same job — except that here the doer is a machine rather than a person.

verb	the doer
lavar	la lavadora
secar	la secadora
calcular	la calculadora

Spanish names most household machines this way, so **-dora** is worth more to you than any single appliance. A machine that does something is usually that something plus this ending, and you can often reach the word without having met it.
Lavar is Latin *lavare*, "to wash".

Your turn

Say these aloud:

- *la lavadora*
- the verb it was built from
- what a machine for drying would be called

Before you move on

The washing machine? (**la lavadora**.) The ending? (**-dora**.) Where did you meet it first? (**On the supplier.**)

432.2 el contador — the thing that counts

Say *contar*. Say *la lavadora*. Do the same move again: the ending on the verb, and say what the machine must be.

You'll want to know: el contador

el contador — the meter. The box that counts your water, your gas, your electricity.

contar carries two senses you already hold — to count, and to tell a story. The meter takes the counting one.

The word, taken apart — and its English cousins

Twice in two lessons the same ending has handed you a word. That is worth pausing on, because it is the difference between a vocabulary you memorise and one you can extend.

you know	you can reach
lavar	la lavadora
contar	el contador

el contador del agua is the phrase you will actually meet, on notices about somebody coming to read it. Note the gender: this one is masculine where the washing machine was feminine, and nothing about the ending decides that — the machine takes whatever gender its own word already had.
Contar is Latin *computare*, "to reckon".

Your turn

Say these aloud:

- *el contador*
- the water meter
- the two things *contar* can mean

Before you move on

The meter? (**el contador**.) Built from? (**contar**.) And the washing machine? (**la lavadora**.)

432.3 la estantería — a place full of shelves

Say *el contador*. That ending has now served you twice. Here is a different one, and it does a different job.

You'll want to know: la estantería

la estantería — the shelving, the bookcase, the shelf unit.
A single shelf is **el estante**. The **-ería** makes it the whole structure.

The word, taken apart — and its English cousins

-ería does not make a doer. It makes a **place or collection** of the thing:

the thing	**the place or collection**
el estante	la estantería
el pan	la panadería
el libro	la librería

That is why so many shop names end this way: a *panadería* is where the bread is, a *librería* where the books are. Meeting the ending once tells you what a shop sells before you have read the sign properly. Two endings, two different jobs: **-dor** gives you who or what does it, **-ería** gives you where it is kept.
Estante is an old form of *estar*, "standing": a shelf is what stands against the wall. *Estar* is Latin *stare*, "to stand".

Your turn

Say these aloud:

- *la estantería*
- one shelf, then the whole unit
- where you would buy bread, using the ending

Before you move on

The shelving? (**la estantería**.) One shelf? (**el estante**.) What does **-ería** add? (**The place or collection.**)

432.4 la tubería — all the pipes together

Say *la estantería*. Say *el agua*. A **tubo** is a pipe. Say what a *tubería* must be before reading on.

You'll want to know: la tubería

la tubería — the pipework, the plumbing, the run of pipes.

el tubo is one pipe. The ending collects them, exactly as it collected the shelves.

The word, taken apart — and its English cousins

Third time for an ending in two chapters, and the second time for this one:

one	**the collection**
el estante	la estantería
el tubo	la tubería

This is the word in the notice that says the water is being cut off: *reparar una tubería*. The repair is to the **run of pipes**, not to one length of tube, and the word chooses itself accordingly.
If you are keeping count, you have now reached four words in this chapter and three of them you could have guessed from a piece you already had.
Tubo is Latin *tubus*, "a pipe".

Your turn

Say these aloud:

- *la tubería*
- one pipe, then all of them
- they are repairing a pipe and cutting off the water

Before you move on

The pipework? (**la tubería**.) One pipe? (**el tubo**.) Which other word this chapter used the same ending? (**la estantería**.)

432.5 el sofá — the one you could not guess

Say *la silla*. You can name one seat. Name the long soft one that three people share.

You'll want to know: el sofá

el sofá — the sofa.

Stressed on the last syllable, *so-FÁ*, and the written accent is there to say so.

The word, taken apart — and its English cousins

This one was not built from anything you hold. Four words in this chapter came apart into a piece plus an ending; this one did not, and pretending otherwise would waste your time.

It came into Spanish through French *sofa*, from Arabic *ṣuffa*, a raised, cushioned bench along a wall. A word taken from another language tends to arrive **whole** like this rather than as pieces you can recombine. So the honest lesson of the chapter is two-sided:

when a word comes apart	when it does not
look for the ending first	learn it whole, and move on

Knowing which kind you are looking at is the skill. Trying to decompose *sofá* would cost you minutes and teach you nothing.

Your turn

Say these aloud:

- *el sofá*
- a chair, then a sofa
- which syllable takes the stress

Before you move on

The sofa? (**el sofá**.) Could you have built it from a piece you had? (**No.**) Where did it come from? (**Arabic, through French.**)

432.6 (lavadora, contador, estantería, tubería, sofá) — from cold

From memory alone, say *the washing machine*, *the meter* and *the sofa*.

Grammar Lens: two endings and one exception

word	built from
la lavadora	lavar + **-dora**
el contador	contar + **-dor**
la estantería	estante + **-ería**
la tubería	tubo + **-ería**
el sofá	nothing — borrowed whole

Four of five came apart. Do not read a rule into it — the next five household words might all be whole. What this chapter is for is the **question**, asked before you reach for a dictionary: *is there a piece in here I already have?*
The two endings answer different questions. **-dor** and **-dora** name the one that does it. **-ería** names where the thing is kept or collected.

What you've built

You could name a house and a chair, and almost nothing inside either. *La casa*, *la silla* and *el agua* have been yours for a long time. What was missing was everything a notice on a door actually talks about: the meter somebody comes to read, the pipework they are repairing, the machine that broke.
You now hold the vocabulary of the **building**, not only of the home.

Your turn

Say these aloud:

- all five words
- which one you could not have built
- the two endings and what each one does
- they are repairing the pipework and reading the water meter

Before you move on

The shelving? (**la estantería**.) The pipework? (**la tubería**.) And the one that came in whole? (**el sofá**.)

432.7 (un aviso a los vecinos) — the notice on the door

Say *la tubería* and *el agua*. You are about to read the notice those two words exist for.

Your turn

Read it: the notice once straight through, then answer

> **AVISO A LOS VECINOS** El martes cortaremos el **agua** entre las nueve y las dos para reparar una **tubería** del garaje. El miércoles vendrán a leer los **contadores**.

Say these aloud:

- what happens on Tuesday and for how long
- what is being repaired
- what happens the following day

What you've built

Now say these aloud, as if telling somebody who has not read the notice:
Say these aloud:

- on Tuesday there is no water in the morning
- they are repairing a pipe in the garage
- I cannot put the washing machine on until the afternoon
- so I am reading on the sofa until they finish

A notice like this one is where a beginner's Spanish usually stops. Every word in it is ordinary and none of it is in a textbook dialogue. You can read it now, and you could not two chapters ago.

Before you move on

What are they repairing? (**una tubería**.) What are they coming to read? (**los contadores**.) What can you not use that morning? (**la lavadora**.)

Chapter 433

El Edificio Y Sus Normas

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read the notices in a block of flats, say where to leave a key, and say where something is in relation to something else.
>
> *Read the notice or advert this chapter's words exist for, then say the same thing back.*

433.1 el portal — the big door, and the space behind it

> Say *la puerta*. Say *el edificio*. Between the street and the stairs of a Spanish block there is a space you have no word for. Here it is.

You'll want to know: el portal

el portal — the street door of a block of flats, and the hall behind it.

One word covers both the door and the space. *Te espero en el portal* means downstairs, inside, out of the rain.

The word, taken apart — and its English cousins

puerta plus **-al**, an ending that makes a bigger or more general thing of the noun it lands on.

the thing	the larger thing
la puerta	el portal
la rama	el ramal

English has no single word here, which is why translations reach for *doorway*, *entrance*, *lobby* or *hallway* and none quite fits. When a Spanish word has no clean English partner, learning the **situation** beats learning a gloss: the portal is where you buzz, where the post boxes are, and where you wait.
Puerta is Latin *porta*, "a gate". In *portal* the stress falls elsewhere, so the *o* never opened into *ue*.

Your turn

Say these aloud:

- *el portal*
- the door, then the entrance hall
- I will wait for you in the portal

Before you move on

The street door of a block? (**el portal**.) Which word is inside it? (**puerta**.) Does it name the door or the hall? (**Both.**)

433.2 la portera — the person of the portal

> Say *el portal*. Say *el vecino*. There is somebody who is neither a neighbour nor a stranger, and who is in the portal most mornings.

You'll want to know: la portera

la portera — the concierge, the caretaker. **el portero** if a man.

She cleans the stairs, takes in parcels, knows who is away, and is the person a notice tells you to leave a key with.

The word, taken apart — and its English cousins

portal and **portera** share **puerta**, and the ending **-ero / -era** makes the **person associated with** a thing:

the thing	**the person**
la puerta	la portera
el pan	el panadero
el zapato	el zapatero

You met **-ería** for the place and **-dor** for the doer. This is the third: **-ero** for the person whose job is that thing. Three endings, three different questions, and all of them turn nouns you have into words you have not met.

el portero also means the goalkeeper. The one who guards the gate, in both cases.

Portero is an old word: Latin *portarius*, "a door-keeper" (Lewis & Short), from *porta*, "a gate", with the *-arius* that became *-ero*.

Your turn

Say these aloud:

- *la portera*
- leave the key with the concierge
- the person who works with bread, using the ending

Before you move on

The concierge? (**la portera**.) What does **-ero** name? (**The person whose job it is.**) What else is *el portero*? (**The goalkeeper.**)

433.3 el garaje — spelled to be said

> Say *el coche*. Say *la portera*. Now name the floor below the portal where the cars live.

You'll want to know: el garaje

el garaje — the garage, the underground car park of a building.

Said *ga-RA-je*, with the **j** as the throaty *jota*.

The word, taken apart — and its English cousins

French **garage** came into Spanish and was **respelled**. French writes the sound at the end with *-ge*; Spanish has no such spelling, so it wrote what it heard with the letter it uses for that sound: **j**.

language	**spelling**
French	garage
Spanish	garaje

That habit is worth more than the word. Spanish borrows freely but **respells to its own rules**, which is why *fútbol*, *champú* and *chófer* look the way they do. A borrowed word you meet in Spanish has usually been made to spell itself the Spanish way, so read it aloud by Spanish rules and the original often appears.

Your turn

Say these aloud:

- *el garaje*
- the car is in the garage
- why it is not spelled the French way

Before you move on

The garage? (**el garaje**.) Which language did it come from? (**French**.) What did Spanish change? (**The spelling.**)

433.4 la norma — what is written on the wall

Say *el portal*. Say *el garaje*. Both have a list on the wall. Name what that list is called.

You'll want to know: la norma

la norma — the rule. **las normas** — the rules, the regulations.

You meet it in the plural almost always, as a heading: *NORMAS DE USO*, *NORMAS DE PRÉSTAMO*.

The word, taken apart — and its English cousins

Latin **norma** was a carpenter's square — the tool for checking a right angle. A thing that matched it was *correct*; a thing that did not was off. The word travelled from the tool to the standard itself, and from there into every European language.
That history explains a family you can now read at sight:

word	**what it holds**
la norma	the standard
normal	matching the standard
enorme	out of the square, huge

enorme is the one worth noticing. *E-* out of, plus *norma*: outside the square. Something enormous is something that will not fit the measure.

Your turn

Say these aloud:

- *las normas*
- the rules of the building
- what *enorme* has to do with *norma*

Before you move on

The rules? (**las normas**.) What was a Latin *norma*? (**A carpenter's square**.) And *enorme*? (**Outside the square.**)

433.5 junto — together, or beside

Say *la calle*. You can put a thing **in** a street. Say that two people did something **together** and see whether you have the word.

You'll want to know: junto

juntos — together. **junto a** — next to, beside.
Same word, two jobs, and the little **a** is what separates them.

The word, taken apart — and its English cousins

junto ← Latin *iunctus*, "joined", the participle of *iungere*, "to join" — inherited: the *-nct-* became *-nt-*.

Grammar Lens: the a decides

you say	it means
cenamos juntos	we had dinner together
junto a la puerta	next to the door

Without **a**, it describes the people and agrees with them: *juntos*, *juntas*. With **a**, it stops describing anybody and becomes a position — and then it stops agreeing, staying **junto** whatever follows.
That is a small thing to watch, and it is the sort of small thing a reader trips on: *las cajas, juntas* is a comment about the boxes; *junto a las cajas* is where you are standing.

Your turn

Say these aloud:

- we went together
- next to the portal
- which of the two agrees with the people

Before you move on

Together? (**juntos**.) Next to? (**junto a**.) Which one changes for gender? (**The one without *a*.**)

433.6 (portal, portera, garaje, norma, junto) — from cold

From memory alone, say *the entrance hall*, *the concierge* and *the garage*.

Grammar Lens: three endings, three questions

ending	the question it answers
-dor	who or what does it?
-ería	where is it kept?
-ero	whose job is it?

All three land on **puerta** or a word like it and hand you a noun you never learned. Do not read a rule into it — many words have no ending at all, and *el garaje* and *la norma* in this very chapter came in whole from elsewhere.

What these three chapters have built is a **habit**: before treating a long word as new, look for a piece you already hold.

What you've built

You could describe a home. You could not describe a building. *La casa*, *la puerta* and *el vecino* were yours; the hall, the person who cleans it, the car park beneath it and the list of rules on its wall were not.

Those four are where written Spanish actually meets a resident — on a notice, in a message from an administrator, in an instruction about a key. And **junto a** is the small word that lets you say where any of it is.

Your turn

Say these aloud:

- all five words
- leave the key with the concierge, next to the door
- the rules of the garage
- the three endings and what each asks

Before you move on

The concierge? (**la portera**.) The rules? (**las normas**.) Next to? (**junto a**.)

433.7 (dejar una llave) — read it, then do what it says

Say *la portera* and *el contador*. Both appear in the notice you are about to read, and the notice asks you to do something.

Your turn

Read it: the notice once straight through, then answer

> **NORMAS DEL PORTAL** El jueves vendrán a leer los **contadores** entre las nueve y las dos. Es necesario que haya alguien en casa. Quien no pueda estar debe dejar una llave a la **portera**.

Say these aloud:

- what day they are coming and what for
- what you must do if you cannot be at home
- who you leave the key with

What you've built

Now produce it yourself. Say aloud:
Say these aloud:

- I cannot be at home on Thursday
- I am leaving the key with the concierge
- my car is in the garage, next to the door

This is the level's real test, and it is not a conversation. A2 asks you to read a short official notice and act on it correctly. Three chapters ago the words for the notice did not exist for you; the grammar never changed.

Before you move on

Who do you leave the key with? (**la portera**.) Where do you wait? (**en el portal**.) What is the heading on the wall? (**NORMAS**.)

Chapter 434

El Taller Y La Máquina

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say that a device has stopped working, what part is missing, where it has gone to be repaired and what I am being charged.
>
> *Read the notice or advert this chapter's words exist for, then say the same thing back.*

434.1 el taller — where things get mended

> Say *el coche*. Say *el trabajo*. The car has stopped working. Name the place it goes.

You'll want to know: el taller

el taller — the workshop, the garage in the sense of *repair shop*.

Careful with that English word: **el garaje** is where you park; **el taller** is where it gets fixed. English uses *garage* for both and Spanish does not.

The word, taken apart — and its English cousins

el taller also means a **workshop** in the other sense — a short practical class. *Un taller de cocina*, *un taller de reparación de bicicletas.*

the phrase	what it is
llevar el coche al taller	the repair shop
un taller de cocina	a hands-on class

The two meanings share a core that English keeps as well: a place where people work with their hands, rather than sit and listen. If a notice offers you a *taller*, expect to do something, not to watch. *Taller* came from French *atelier*, "a workshop", in Old French a place where wood was worked.

Your turn

Say these aloud:

- *el taller*
- I am taking the car to the workshop
- the difference between *el taller* and *el garaje*

Before you move on

Where the car is repaired? (**el taller**.) Where it is parked? (**el garaje**.) What else can a *taller* be? (**A hands-on class**.)

434.2 la máquina — the word above the others

Say *la lavadora*. Say *el ordenador*. You can name particular machines. Name the **kind**.

You'll want to know: la máquina

la máquina — the machine.

Stressed on the first syllable, *MÁ-qui-na*, and the written accent marks it.

The word, taken apart — and its English cousins

Notice what **el ordenador** is: *ordenar* plus the doer-ending, the thing that orders. Spanish named the computer after what it **does**, where English named it after **counting**.

language	the computer is
Spanish	the orderer
English	the counter

la máquina sits above all of these as the general term, and it is the word you need for the ones with no special name: *la máquina de hacer pan*, *la máquina del billete*. When you do not know an appliance's name, *la máquina de* plus what it does will be understood every time. *Máquina* is Latin *machina*, from Greek *mēchanē*, "a device" (Lewis & Short) — a learned word: speech would have worn away its middle vowel.

Your turn

Say these aloud:

- *la máquina*
- the washing machine is a machine
- the machine for making bread

Before you move on

The machine? (**la máquina**.) What does *ordenador* literally name? (**The one that orders**.) Which syllable is stressed in *máquina*? (**The first**.)

434.3 la pieza — the part that is missing

Say *la máquina* and *el taller*. The machine is in the workshop and one small thing is wrong with it. Name that thing.

You'll want to know: la pieza

la pieza — the part, the piece, the component.

Falta una pieza — a part is missing. *Era una pieza pequeña* — it was a small part. Both are what a repair shop says to you.

The word, taken apart — and its English cousins

la pieza is wider than English *part*. It also names a **room** in some regions, and a **piece of music** almost everywhere.

the phrase	what it means
una pieza de la lavadora	a component
una pieza de Mozart	a piece of music

A word that covers several English words is not being vague. It is naming something English happens to split: *a discrete thing that belongs to a larger whole*. Hold that idea and all three uses follow from it.

Pieza goes back to Gaulish **pettia*, "a piece", taken into spoken Latin — the same word as French *pièce* and English *piece*.

Your turn

Say these aloud:

- *la pieza*
- a part is missing
- it was a small part

Before you move on

The part? (**la pieza**.) A part is missing? (**Falta una pieza**.) What else can a *pieza* be? (**A piece of music**.)

434.4 la batería — the ending that is not one

Say *la tubería*. You learned that **-ería** collects. Here is a word that ends the same way. Guess what it collects, then go on.

You'll want to know: la batería

la batería — the battery. The one in a car, a phone, a torch.

It also names a **drum kit**, which is the same idea of *a set of things acting together*.

The word, taken apart — and its English cousins

Here the guess fails, and it is worth knowing why.
There is no Spanish word *bate* that *batería* collects. The word arrived

whole from French **batterie**, where it had been built from *battre*, to beat — a battery of guns, a set of things striking together.

word	**where the building happened**
la tubería	in Spanish, from *tubo*
la estantería	in Spanish, from *estante*
la batería	in French, from *battre*

So the resemblance is real but it is **borrowed**, not made here. That is the honest shape of the rule you have been building for three chapters: look for the join, and accept that sometimes the join happened in another language and the pieces never entered this one.
A guess that fails costs you nothing. Not guessing costs you every word you could have read.

Your turn

Say these aloud:

- *la batería*
- the car battery
- why *tubería* comes apart and *batería* does not

Before you move on

The battery? (**la batería**.) Is there a Spanish word *bate* under it? (**No**.) Where was it built? (**In French**.)

434.5 el cargador — the one that loads

Say *el móvil*. Say *la batería*. The battery is empty. Name the thing you plug in — and try the ending before you are told.

You'll want to know: el cargador

el cargador — the charger.
cargar — to load, to charge. **cargar el móvil** is to charge the phone.

The word, taken apart — and its English cousins

Fourth time for **-dor**, and by now it should arrive before the lesson does:

verb	**the doer**
proveer	el proveedor
lavar	la lavadora
contar	el contador
cargar	el cargador

cargar is worth more than the charger. It means *to load*, and it reaches much further than electricity: *cargar el coche* is to load the car, *la carga* is the load itself, and *no se cobra* from earlier meets it in *hacerse cargo de* — to take charge of something.
The same verb also turns up wherever a shop charges you, which is why **cobrar** and **cargar** feel adjacent without being the same word. *Cargar* is Late Latin *carricare*, "to load a cart", from *carrus*, "a cart".

Your turn

Say these aloud:

- *el cargador*
- I have to charge the phone
- the battery is empty and I have no charger
- all four doer-words you now hold

Before you move on

The charger? (**el cargador**.) The verb? (**cargar**.) What does it mean beyond electricity? (**To load**.)

434.6 (taller, máquina, pieza, batería, cargador) — from cold

From memory alone, say *the workshop*, *the machine* and *the charger*.

Grammar Lens: the guess, and the one that failed

word	comes apart?
el cargador	yes — cargar + **-dor**
la batería	no — built in French, not here

Four chapters have now handed you **-dor**, **-ería** and **-ero**, and *batería* is the first word that wore an ending and did not come apart. Do not read that as a warning against guessing. A guess that fails costs nothing; not guessing costs every word you could have read without help.

el taller and **el garaje** are the pair to keep straight: English calls both *garage*, Spanish does not. You park in one and your car is repaired in the other.

What you've built

You could name machines and could not say anything about one that had stopped. *La lavadora* and *el ordenador* were yours; the place they go, the general word for the kind, the part that is missing, the battery that is flat and the charger you lent somebody were not. That is most of what a person actually says about a device — and almost none of it is in a beginner's dialogue, because beginners' dialogues are about things that work.

Your turn

Say these aloud:

- all five words
- the battery is flat and I have no charger
- the car is at the workshop because a part is missing
- which of the five did not come apart

Before you move on

The part? (**la pieza**.) Where the car is repaired? (**el taller**.) The charger? (**el cargador**.)

434.7 (una avería) — the message the shop leaves you

Say *la pieza* and *la lavadora*. The message you are about to hear contains both.

Your turn

Read it: the message once, as though hearing it on the telephone, then answer

> Buenas tardes, llamo del **taller**. Su **lavadora** ya está reparada: era una **pieza** pequeña, así que no le vamos a **cobrar** la mano de obra. Podemos llevársela el miércoles por la mañana.

Say these aloud:

- what was wrong with it
- whether you are being charged for the labour
- when they can bring it

What you've built

Now the other direction. Say aloud, as if leaving the message yourself: Say these aloud:

- the machine does not work and I think a part is missing
- I am taking it to the workshop on Monday
- I have lent my charger and I need it back

Four chapters ago none of this was sayable, and the grammar has not changed once. Every sentence above uses tenses you already had. What was missing was never structure — it was the nouns that ordinary life is actually about.

Before you move on

Who is calling? (**el taller**.) What was wrong? (**una pieza pequeña**.) What do you need back? (**el cargador**.)

Chapter 435

Los Papeles Del Trabajo

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read a job advert, say what experience I have, and say what I must send and bring.
>
> *Read the notice or advert this chapter's words exist for, then say the same thing back.*

435.1 el currículum — a word that stayed Latin

> Say *el trabajo*. Say *el papel*. A job advert asks you to send one particular piece of paper. Name it.

You'll want to know: el currículum

el currículum — the CV, the résumé.

The full form is **currículum vítae**, and in speech people usually say only **el currículum**, or shorten it further to **el currí**.

The word, taken apart — and its English cousins

Latin **curriculum** meant *a running*, a lap of a track — from *currere*, to run. *Currículum vítae* is **the running of a life**.
Spanish kept the Latin **-um** ending instead of reshaping it, which marks the word as a formal borrowing rather than an inherited one:

inherited from Latin	borrowed from Latin
la puerta	el currículum
el agua	el álbum

An inherited word has been worn down by centuries of speech; a borrowed one was lifted from a book and still looks like it. That ending is the giveaway, and it tells you the register before you know the meaning: a word ending **-um** in Spanish is almost always formal, technical or administrative.
The same *currere* is under **el curso** and **la carrera**, both of which are also runnings.

Your turn

Say these aloud:

- *el currículum*
- send your CV
- what *currículum vítae* means literally

Before you move on

The CV? (**el currículum**.) What does the Latin mean? (**The running of a life**.) What does the **-um** ending tell you? (**It was borrowed, not inherited.**)

435.2 la documentación — the papers, as one thing

Say *el currículum*. Say *el papel*. The garage asked you to bring something more than one sheet. Name it.

You'll want to know: la documentación

la documentación — the paperwork, the documents, your papers.

Singular in form and plural in meaning: one word for **the whole set**. *Traiga la documentación* asks for all of it, not one sheet.

The word, taken apart — and its English cousins

documentar plus **-ción**, the ending that turns an action into a thing:

verb	**the thing**
documentar	la documentación
reparar	la reparación
informar	la información

Fourth ending in five chapters, and the most productive of the lot. Almost any Spanish verb in **-ar** can take it, and English usually has the twin in **-tion** — so **-ción** words are the cheapest reading you will ever get.

One thing to watch: they are **always feminine**, whatever the verb, and the plural drops the accent — *la reparación*, *las reparaciones*.

Documentar is built on *documento*, Latin *documentum*, "a lesson, a proof", from *docere*, "to teach".

Your turn

Say these aloud:

- *la documentación*
- bring the paperwork and your CV
- the noun made from *reparar*

Before you move on

The paperwork? (**la documentación**.) What does **-ción** do? (**Turns an action into a thing**.) What gender are they? (**Feminine**.)

435.3 la experiencia — the word you can already read

Say *la documentación*. Say *la empresa*. An advert wants one more thing from you before the papers. Say it and check your guess below.

You'll want to know: la experiencia

la experiencia — experience.

experiencia previa is the set phrase every job advert uses: *se valora experiencia previa*, *imprescindible experiencia previa*.

The word, taken apart — and its English cousins

You did not need this lesson to read the word, and that is worth noticing rather than passing over.

Spanish	English
la experiencia	experience
la diferencia	difference
la paciencia	patience

-encia and English **-ence** are the same ending, taken by both from Latin. Hundreds of words pair this way, and the pairing almost never misleads.

So the real content of this lesson is a **licence**: when a long Spanish noun ends in **-ción**, **-encia**, **-idad** or **-mente**, try the English twin first. You will be right far more often than wrong, and the cost of being wrong is a moment.

That is not true of short words, where the false friends live — *embarazada* does not mean embarrassed, and *éxito* is not exit. The long formal endings are the safe ones.

Experiencia is Latin *experientia*, "a trial, a proof" (Lewis & Short), from *experiri*, "to try".

Your turn

Say these aloud:

- *la experiencia*
- previous experience is essential
- two more words ending in *-encia*

Before you move on

Experience? (**la experiencia**.) Which endings can you usually trust? (**-ción, -encia, -idad, -mente**.) Which words are risky?

(**Short ones.**)

435.4 previo — before this one

Say *la experiencia*. The advert wants a particular kind of it — the kind you got somewhere else, earlier. Name that kind.

You'll want to know: previo

previo / previa — previous, prior, earlier.

experiencia previa — previous experience. **sin previo aviso** — without prior warning, which is the other place you will meet it.

The word, taken apart — and its English cousins

pre- before, plus **-vio** from *via*, way. What lies on the way **before**. The position is worth watching, because Spanish adjectives usually follow the noun and this one does both:

phrase	where it sits
experiencia previa	after
sin previo aviso	before

Sin previo aviso is a fixed phrase and keeps the older order. Fixed phrases preserve arrangements that ordinary speech has left behind, which is why they so often look like exceptions — they are the older rule, kept whole.

Previo is Latin *praevius*, "going before" (Lewis & Short), taken from books.

Your turn

Say these aloud:

- *previo*
- previous experience is essential
- without prior warning

Before you move on

Previous? (**previo**.) Previous experience? (**experiencia previa**.) Without warning? (**sin previo aviso**.)

435.5 jubilado — the participle that became a person

Say *el pedido*. Say *el trabajo*. You learned that a participle can harden into a noun. Here it hardens into a **person**.

You'll want to know: jubilado

jubilado / jubilada — retired, and also *a retired person*.
jubilarse — to retire. *Se jubila en marzo* — she retires in March.

The word, taken apart — and its English cousins

Same move as **el pedido**, one chapter apart:

verb	participle	used as
pedir	pedido	a thing
jubilar	jubilado	a person

A Spanish participle can stand as an adjective *or* a noun with no further change, which is why *un jubilado* needs no word for *person* in it. **And the root is not what you would expect.** Latin *iubilare* meant to **shout for joy** — it is the same word under *jubilant*. The sense of retiring came later, by way of the **jubilee**, a year of release from work and debt.

Your turn

Say these aloud:

- *jubilado*
- a retired neighbour
- she retires in March
- the other participle-turned-noun you hold

Before you move on

Retired? (**jubilado**.) To retire? (**jubilarse**.) What did the Latin root mean? (**To shout for joy**.)

435.6 (currículum, documentación, experiencia, previo, jubilado) — from cold

From memory alone, say *the CV*, *the paperwork* and *retired*.

Grammar Lens: the endings that read themselves

ending	what it does	example
-ción	action becomes a thing	la documentación
-encia	pairs with English *-ence*	la experiencia
participle	becomes a thing or a person	jubilado

The participle row is the one to keep: **el pedido** in the first chapter of this run was a thing, **jubilado** here is a person, and neither needed an extra word to become one.

Five chapters have now handed you **-dor**, **-ería**, **-ero**, **-ción** and **-encia**. Do not read that as a rule that every word yields — *el currículum* in this very chapter kept a Latin ending and yields nothing. The habit is to look, not to expect.

What you've built

You could say you had a job, and nothing about getting one. *El trabajo*, *la empresa* and *trabajar* were yours; the CV you send, the papers you bring, the experience an advert demands and the word for somebody who has stopped working were not.

A job advert is four lines long and uses all five. That is the shape of A2 reading: short, ordinary, administrative, and impossible without exactly these nouns.

Your turn

Say these aloud:

- all five words
- previous experience is essential
- send your CV and bring the paperwork
- which one kept a Latin ending

Before you move on

The CV? (**el currículum**.) Previous experience? (**experiencia previa**.) Retired? (**jubilado**.)

435.7 (un anuncio de trabajo) — four lines, five new words

Say *experiencia previa*. The advert you are about to read turns on that phrase.

Your turn

Read it: the advert once straight through, then answer

> **SE BUSCA DEPENDIENTE/A** Tienda del centro. Imprescindible **experiencia previa** de al menos un año. Enviar **currículum** y traer la **documentación** el día de la entrevista.

Say these aloud:

- how much experience they want
- what you have to send
- what you have to bring, and when

What you've built

Now produce it. Say aloud:
Say these aloud:

- I have two years of previous experience
- I am sending my CV today
- my neighbour is retired and does not work now

Five chapters, twenty-five words, and no new grammar at all. Everything you said a moment ago uses tenses you held before this run started. What was missing was the vocabulary an ordinary week is made of — orders, buildings, machines, paperwork — and none of it appears in a beginner's dialogue, because beginners' dialogues are about holidays and hobbies.

Before you move on

What do you send? (**el currículum**.) What do you bring? (**la documentación**.) What is essential? (**experiencia previa**.)

Chapter 436

Gente Y Trato

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can talk about colleagues and groups, offer an alternative, and say who lent, collected or returned a thing.
>
> *Read the notice or advert this chapter's words exist for, then say the same thing back.*

436.1 el compañero — you already know where this comes from

> Say *el pan*. When you learned it you were told what *com-* plus *pānis* makes. Say that word now, before reading on.

You'll want to know: el compañero

el compañero / la compañera — the colleague, the classmate, the companion.

You were given the etymology long ago and never the word. The bread lesson told you it means *one you share bread with*; this lesson hands you the word to use.

The word, taken apart — and its English cousins

com- with, plus **pan**, bread, plus **-ero**, the person-ending you met on *la portera*. Three pieces you already hold, and not one of them new. What is worth adding is how wide the word runs in practice:

phrase	who it means
un compañero de trabajo	a colleague
un compañero de clase	a classmate
mi compañero	a partner, depending on context

On its own, **mi compañero** is ambiguous between a work partner and a life partner, and Spanish speakers disambiguate with *de trabajo*, *de piso*, *de clase* when it matters. That ambiguity is not sloppiness; the word never promised more than *the one I share things with.*
Its base is the old *compaña*, "company", spoken Latin **compania*: *com-* and *panis*, "bread".

Your turn

Say these aloud:

- *el compañero*
- a colleague from work
- the three pieces the word is made of

Before you move on

The colleague? (**el compañero**.) What is hiding in the middle of it? (**pan**.) How do you make it mean *classmate*? (**de clase**.)

436.2 el grupo — the unit things get organised into

Say *la clase*. Say *el compañero*. A course splits its people into smaller sets. Name a set.

You'll want to know: el grupo

el grupo — the group.

cambiar de grupo — to switch groups. **el grupo de los martes** — the Tuesday group.

The word, taken apart — and its English cousins

This one does not come apart. It arrived whole, borrowed from Italian *gruppo*, and there is no Spanish piece inside it to recognise.
That is the second thing this run has taught you about long-versus-short words:

kind of word	what to do
long and formal	look for the ending
short and plain	learn it whole

el grupo is short and plain, so there is nothing to unfold. Spending time hunting for a join in a five-letter noun is the opposite of the habit — the habit is to look **once**, cheaply, and move on when nothing is there.
Where it matters most for you is administrative: courses, trips, exams and sports are all divided into *grupos*, and the DELE pass rule itself is written in terms of two of them.

Your turn

Say these aloud:

- *el grupo*
- I have changed groups
- the Tuesday group is too advanced for me

Before you move on

The group? (**el grupo**.) Does it come apart? (**No** — it arrived whole.) To switch groups? (**cambiar de grupo**.)

436.3 ofrecer — to carry it toward somebody

Say *ayudar*. Say *cobrar*. The restaurant has no table on Friday. Say what it does next instead of refusing outright.

You'll want to know: ofrecer

ofrecer — to offer.

Le puedo ofrecer el jueves — I can offer you Thursday. It is the polite move between *no* and nothing.

The word, taken apart — and its English cousins

ob- toward, plus **ferre**, to carry. To carry a thing toward somebody. That *ferre* is one of the most productive roots in the language, and once you see it you will read words you have never met:

word	**what is carried**
ofrecer	toward you
transferir	across
referir	back

Watch the spelling in the yo form. *Ofrecer* takes a **z** before the *o*: *ofrezco*, not *ofreco*. Every verb ending **-cer** after a vowel does the same — *conocer / conozco*, *parecer / parezco* — so learning this one buys the pattern for a large family.
Ofrecer is spoken Latin **offerescere*, built on Latin *offerre*, "to offer".

Your turn

Say these aloud:

- *ofrecer*
- I can offer you Thursday
- the yo form, with its z

Before you move on

To offer? (**ofrecer**.) The yo form? (**ofrezco**.) What do the two pieces mean? (**To carry toward**.)

436.4 prestar — the move that devolver undoes

Say *devolver*. Say *el cargador*. You can already say you gave the charger back. Say how it reached you in the first place.

You'll want to know: prestar

prestar — to lend.

Te presto el cargador — I lend you the charger. And then, later, *te lo devuelvo.*

The word, taken apart — and its English cousins

prestar ← Latin *praestare*, "to stand in front; to supply" (Lewis & Short): *prae-*, "in front", and *stare*, "to stand". To lend is to put a thing forward for someone.

Grammar Lens: which way is it moving

English has one word doing two opposite jobs — people say *borrow* and *lend* and then muddle them. Spanish keeps the giver's side and marks the receiver's with a preposition:

Spanish	English
te presto el libro	I lend you the book
pedir prestado un libro	to borrow a book

So **prestar** is always the **lender** speaking. To be the borrower you say *pedir prestado* — literally *to ask for it lent*, which uses the *pedir* under **el pedido** from four chapters ago.

The three verbs now sit in a cycle you can say end to end: **prestar** hands it over, the other person has it, **devolver** brings it back.

Your turn

Say these aloud:

- *prestar*
- I lend you my charger
- I lent it to him and he has not given it back
- how to say it from the borrower's side

Before you move on

To lend? (**prestar**.) To borrow? (**pedir prestado**.) And to give it back? (**devolver**.)

436.5 recoger — to gather it back up

Say *el pedido*. Say *el taller*. The order is ready and the car is repaired. Say what you go and do at both.

You'll want to know: recoger

recoger — to collect, to pick up, to fetch, to tidy away.

Vengo a recoger unas fotos — I have come to collect some photos. *Recojo a los niños del colegio* — I pick the children up from school.

The word, taken apart — and its English cousins

re- back, plus **coger**, to take. To take back up what is there.
One Spanish verb covers what English splits four ways, and the split is arbitrary in English rather than meaningful:

what you recoger	English wants
un pedido	collect
a los niños	pick up
la mesa	clear
la ropa tendida	bring in

Hold the Spanish idea — *gather back up* — and all four fall out of it. Trying to remember four English translations is four times the work for less accuracy.
Watch the spelling: *recojo* with a **j** in the yo form, because *ge* would be said differently from *go*. The sound stays put and the letter moves, which is the reverse of what English spelling usually does to you.
Recoger is Latin *recolligere*, "to gather up again" (Lewis & Short); *coger* is *colligere*, "to gather".

Your turn

Say these aloud:

- *recoger*
- I have come to collect the order
- I pick the children up at five
- the yo form, with its j

Before you move on

To collect? (**recoger**.) The yo form? (**recojo**.) What do the two pieces mean? (**To take back up**.)

436.6 (compañero, grupo, ofrecer, prestar, recoger) — from cold

From memory alone, say *the colleague*, *to lend* and *to collect*.

Grammar Lens: the cycle is now complete

step	verb
I hand it over	**presto**
you go and get it	**recoges**
you give it back	**devuelves**

Six chapters ago you could buy a thing and pay for it. You can now describe its whole life: ordered, delayed, collected, lent, returned. **prestar** is the lender's verb only. The borrower says **pedir prestado**, which contains the *pedir* under **el pedido** from the first chapter of this run — so the cycle closes on the word it opened with.

What you've built

Two of these you could have guessed and did not need to be told. compañero was fully explained when you learned *pan*, years of pages ago in book time — *com-* plus *pānis*, one you share bread with — and all this chapter did was hand you the word the story was about. **ofrecer** unfolds into *carry toward*.
The other three are plainer, and that is the honest proportion: some words open, some do not, and the only way to know is to try.

Your turn

Say these aloud:

- all five words
- I lent my colleague the charger and he has not given it back

- I can offer you Thursday
- I have come to collect the order

Before you move on

To lend? (**prestar**.) To collect? (**recoger**.) What is hiding inside *compañero*? (**pan**.)

436.7 (un aviso del curso) — read it as the person it is for

Say *el grupo* and *recoger*. Both are in the notice you are about to read.

Your turn

Read it: the notice once straight through, then answer

> **CURSO DE COCINA — AVISO** El **grupo** de los martes está completo. Podemos **ofrecer** plaza en el de los jueves. Los materiales se **recogen** en recepción el primer día.

Say these aloud:

- which group is full
- what they can offer instead
- where and when you collect the materials

What you've built

Now produce it. Say aloud:
Say these aloud:

- I have changed to the Thursday group
- a colleague from work lent me the book
- I will collect the materials on the first day

Notice what kind of text this is. It is not a conversation, not a

story and not a dialogue between two friends in a café. It is an administrative notice addressed to somebody who has to act on it — and that is what the A2 reading paper is mostly made of.

Before you move on

Which group is full? (**el de los martes**.) What do they offer? (**plaza el jueves**.) What do you do with the materials? (**recogerlos en recepción**.)

Chapter 437

Decidir, Coincidir, Equivocarse

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can decide between two dates, say that one clashes, admit a mistake, say how long something takes, and name the evening meal.
>
> *Read the notice or message this chapter's words exist for, then say the same thing back.*

437.1 decidir — to cut the question off

> Say *ofrecer*. The shop has offered you Thursday or Saturday. Say what you now have to do.

You'll want to know: decidir

decidir — to decide. **decidirse** — to make up your mind.

Usted decide — you decide. It is what a notice says when it has finished offering and the choice is yours.

The word, taken apart — and its English cousins

de- off, plus **-cidir** from Latin *caedere*, to cut. To **cut the question off**.

The same *caedere* is under a family that all involve cutting something away:

word	what is cut
decidir	the question
preciso	cut exactly to size
conciso	cut short

decidir and **decidirse** are not the same. *Decido el menú* is choosing a thing; *me decido* is the inner moment when you stop hesitating. Spanish marks that difference with the reflexive, where English leans on *decide* versus *make up my mind*.

Your turn

Say these aloud:

- *decidir*
- they offered me Thursday and I have to decide
- the difference between *decido* and *me decido*

Before you move on

To decide? (**decidir**.) To make up your mind? (**decidirse**.) What does the Latin piece mean? (**To cut**.)

437.2 coincidir — to fall on the same day

> Say *el grupo*. Say *decidir*. The Tuesday group meets at the hour you already have something else. Name that problem.

You'll want to know: coincidir

coincidir — to coincide, and in everyday use **to clash**.

Me coincide con el trabajo — it clashes with work. That is the ordinary reason somebody gives for not taking a place.

The word, taken apart — and its English cousins

co- together, plus **incidir**, "to fall upon", from Latin *cadere*, "to fall" — things falling together. It only looks like *decidir*, whose root is *caedere*, "to cut".

Your English eye can read it without help, and that is the point worth taking:

Spanish	**English**
coincidir	coincide
decidir	decide
dividir	divide

But the everyday meaning has drifted. English *coincide* is neutral or lucky; Spanish **coincidir**, said about a timetable, is almost always a complaint. The form is transparent and the use is not, which is exactly where a confident reader gets caught.

Your turn

Say these aloud:

- *coincidir*
- it clashes with my work
- the Tuesday group clashes with my class

Before you move on

To clash? (**coincidir**.) What does the *co-* add? (**Together**.) Is it usually good news? (**No** — about a timetable it is a complaint.)

437.3 equivocarse — when two things sound the same

Say *el pedido*. The restaurant has sent two salads instead of a salad and a soup. Say what they did.

You'll want to know: equivocarse

equivocarse — to be mistaken, to get it wrong.

Nos hemos equivocado — we have made a mistake. It is how a shop apologises without naming who is at fault.

The word, taken apart — and its English cousins

Late Latin *aequivocāre* (EtymDB 2.1): **aequus** equal, plus **vox** voice. *Equal voice* — two things that sound the same and get taken for each other.
That is a precise picture of what a mistake is, and the same two pieces give you a word you may already recognise:

word	**the equal voice in it**
equivocarse	to confuse two things
equívoco	ambiguous

It is almost always reflexive. You say *me equivoco*, not *equivoco*, because the error happens **to you** rather than being done to something else. Spanish uses that reflexive for a whole family of things that befall a person — *caerse*, *olvidarse*, *perderse* — and it is worth noticing as a group rather than memorising one at a time.

Your turn

Say these aloud:

- *equivocarse*
- we have made a mistake with the order
- I was wrong
- what the two Latin pieces mean

Before you move on

To get it wrong? (**equivocarse**.) The two pieces? (**Equal voice**.) Which form do you use? (**The reflexive** — *me equivoco*.)

437.4 tardar — how long a thing takes

Say *el retraso*. That lesson mentioned a second word for lateness and did not teach it. Say it if you remember; here it is either way.

You'll want to know: tardar

tardar — to take time, to be long about something.

Tardo una hora — it takes me an hour. *¿Cuánto tarda?* — how long does it take?

The word, taken apart — and its English cousins

tardar ← Latin *tardare*, "to slow down, to delay" (Lewis & Short), from *tardus*, "slow" — the *tardus* behind *la tarde*. *El retraso* is another family, built on *tras*, "behind", Latin *trans*.

Grammar Lens: the delay and the duration

el retraso and **tardar** are not interchangeable, and the difference is worth having exactly:

you mean	**you say**
it is later than promised	lleva retraso
it takes this long	tarda una hora

A journey that **tarda** two hours is not late — two hours is what the journey costs. A train with **retraso** has broken a promise. English blurs both into *late* and *takes*, and a reader who maps one to one will misread a station announcement.

Your turn

Say these aloud:

- *tardar*
- how long does it take?
- it takes an hour and it is not late

Before you move on

To take time? (**tardar**.) Later than promised? (**con retraso**.) Which one is a broken promise? (**retraso**.)

437.5 cenar — the meal as a verb

Say *comer*. You can say you eat. Say that you eat **in the evening**, and notice how many words English needs.

You'll want to know: cenar

cenar — to have dinner, to dine. **la cena** is the meal itself.

Cenamos a las nueve — we have dinner at nine.

The word, taken apart — and its English cousins

Spanish makes a **verb out of each meal**, where English has to say *have* plus a noun:

Spanish verb	English needs
desayunar	to have breakfast
comer	to have lunch
cenar	to have dinner

comer is the trap in that list. You already hold it as *to eat*, and in Spain it also means specifically **to have lunch** — *¿has comido?* at four in the afternoon is asking whether you have had lunch, not whether you have eaten anything at all today.

So the three verbs are a set, and *comer* belongs to it as well as to the general sense.

Cenar is Latin *cenare*, from *cena*, the main meal of the Roman day (Lewis & Short).

Your turn

Say these aloud:

- *cenar*
- we have dinner at nine
- the three meal verbs in order
- dinner takes an hour

Before you move on

To have dinner? (**cenar**.) The meal itself? (**la cena**.) What else can *comer* mean in Spain? (**To have lunch**.)

437.6 (decidir, coincidir, equivocarse, tardar, cenar) — from cold

From memory alone, say all five: *to decide*, *to clash*, *to get it wrong*, *to take time*, *to have dinner*.

Grammar Lens: the reflexive marks what happens to you

plain	reflexive	the difference
decido	me decido	choosing a thing vs making up your mind
equivoco	**me equivoco**	the error befalls you

equivocarse is almost never plain, because a mistake is something that happens **to** a person. The same shape covers *caerse*, *olvidarse* and *perderse* — a family worth noticing together rather than one at a time. **coincidir** takes no reflexive and still points at you: *me coincide* uses the indirect pronoun, not the reflexive, because the clash is reported **to** you rather than done by you.

What you've built

Seven chapters ago you could name things. You can now arrange an evening and say what went wrong with it. You can be offered two dates, decide, say the other one clashes, admit a mistake, say how long something takes and name the meal at the end of it. **tardar** closes a debt: the chapter on delays mentioned it in passing and did not teach it, and a word shown but never given is one a reader half-knows.

Your turn

Say these aloud:

- all five words

- it clashes with work, so I have to decide
- they made a mistake with my order
- it takes an hour and we have dinner at nine

Before you move on

To clash? (**coincidir**.) To get it wrong? (**equivocarse**.) To take time? (**tardar**.) To decide? (**decidir**.) To have dinner? (**cenar**.)

437.7 (cambiar un plan) — read it, then do it yourself

Say *coincidir* and *decidir*. The message you are about to read turns on both.

Your turn

Read it: the message once straight through, then answer

> Hola: al final no puedo el jueves, me **coincide** con el curso. Perdona, me **equivoqué** de semana al apuntarlo. ¿**Cenamos** el viernes? Yo **tardo** media hora en llegar, así que sobre las nueve.

Say these aloud:

- why Thursday is impossible
- what mistake the writer admits
- what is proposed instead, and at what time

What you've built

Now compose the reply. Say aloud:
Say these aloud:

- Friday clashes with my class
- I got the week wrong too
- I take twenty minutes to get there

- let us decide now and have dinner on Saturday

Every sentence there is an ordinary message between two friends, and none of it was sayable seven chapters ago — not because the grammar was missing, but because the verbs were.

Before you move on

It clashes? (**me coincide**.) I got it wrong? (**me equivoqué**.) Shall we have dinner? (**¿cenamos?**)

Chapter 438

El Cuerpo Y El Descanso

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say where I exercise, report an injury the way a clinic expects to hear it, say I have to rest, and close the story by laughing about it.
>
> *Read the notice or message this chapter's words exist for, then say the same thing back.*

438.1 el polideportivo — one roof, many sports

> Say **el deporte** and **el gimnasio**. A gimnasio holds one room of machines. Now picture a building that holds a pool, a court and a running track at once.

You'll want to know: el polideportivo

el polideportivo — the municipal sports centre.

Every town of any size has one, and its sign is the one you read to find out what the pool costs and when the court is free. It is a **deporte** word, so it is masculine: *el polideportivo*, *los polideportivos*.

The word, taken apart — and its English cousins

Three pieces, and the middle one is already yours.

piece	where it comes from
poli-	Greek *polýs*, many
deportiv-	from **deporte**, sport
-o	masculine ending

Many-sport-place. Spanish did not borrow this word from anywhere; it built it, in the twentieth century, out of a Greek prefix and a Latin stem, because town councils needed a name for a thing that did not exist before.

That Greek **poli-** is the same one inside *polígono* and *poliglota*. It is not the *poli-* of *policía*, which is a different Greek word entirely — *pólis*, the city. Two prefixes that look identical and mean nothing like each other.

Your turn

Say these aloud:

- *el polideportivo*
- the difference between a gimnasio and a polideportivo
- what the piece *poli-* is doing in the word

Before you move on

The sports centre? (**El polideportivo**.) What does **poli-** mean? (**Many**.) Which syllable carries the stress? (*-ti-*, the second from last.)

438.2 la natación — the same root, arriving twice

Say **nadar**. Now say **el polideportivo**. The timetable on its door does not list *nadar*; it lists a noun.

You'll want to know: la natación

la natación — swimming, the activity as a named thing.

Hago natación los martes — I swim on Tuesdays. *Un curso de natación* — a swimming course. **nadar** is what your arms do; **la natación** is what the timetable, the club and the medal call it.

The word, taken apart — and its English cousins

nat- from Latin *natāre*, to swim, plus **-ción**, the ending you met on *documentación* for turning an action into a thing.
Latin had the noun ready-made, *natatio*, "a swimming" (Lewis & Short), and Spanish took it from books. The same *natare*, worn down in speech, is *nadar*, "to swim": the *t* became *d*.

Why it's said this way

Here is the part worth slowing down for. **nadar** and **la natación** come from the *same* Latin word, and they do not look alike. That is because they took different roads out of Latin.

the word	**the road it took**
nadar	carried in every mouth, worn smooth
natación	lifted off the page, centuries later

natāre was spoken without a break for a thousand years, and a thousand years of speaking wore the **t** soft into a **d** and dropped a syllable: *natāre* became *nadar*. Then scholars who could read Latin needed a formal noun, went back to the written form, and took *natātiōnem* out intact.
A pair like this is called a **doublet**: one word, two arrivals, both alive. Once you can see them, Spanish is full of them, and the learned twin is nearly always the one on the official sign.

Your turn

Say these aloud:

- *la natación*
- I do swimming at the sports centre
- why *nadar* and *natación* look so different

Before you move on

Swimming, the discipline? (**La natación**.) Which ending makes it a noun? (**-ción**.) Which of the twins was worn down by mouths?

(*Nadar.*)

438.3 torcerse — the ankle that turns the wrong way

Say **la natación**, **el pie** and **el tobillo**. Getting out of the pool, the tiled edge is wet. Name the part of you that is about to go wrong.

You'll want to know: torcerse

torcer — to twist something. **torcerse** — to twist a part of yourself.

Me he torcido el pie — I have twisted my foot. This is the sentence a Spanish doctor's waiting room hears twenty times a week, and it is the one you want ready before you need it.

Spanish does not say *my* foot here. It says **el** pie and lets **me** carry the ownership: *me torcí **el** tobillo*, not *mi tobillo*. When the body part is yours and the verb is reflexive, the possessive is redundant and Spanish drops it.

The word, taken apart — and its English cousins

Latin **torquēre**, to twist. It is one of those roots that stayed busy.

word	the twist in it
torcer	a joint, the wrong way
torcido	crooked, not straight
antorcha	a torch, of twisted rags

English took the same root twice over: **torque**, the twisting force on a shaft, and **torture**, which needs no explanation once you know the root.

Grammar Lens: the stem that breaks

dormir taught you that some verbs split their vowel when the stress lands on it: *dormir* but *duermo*. **torcer** does the same thing.

form	vowel
torcer, torcemos	**o**, unstressed
me tuerzo, se tuerce	**ue**, stressed

What decides it is stress, not person. Wherever the stress falls on the

stem vowel, the **o** breaks into **ue**; wherever the ending pulls the stress away, the **o** holds. That is why *torcemos* keeps its **o** while *tuerce* does not — and why you never have to memorise which forms change.

Your turn

Say these aloud:

- *torcerse*
- I twisted my foot at the swimming class
- *torcemos* and *se tuerce*, and why the vowel differs

Before you move on

To twist your own ankle? (**Torcerse**.) What is the Latin root? (*Torquēre*, to twist.) What happens to the **o** when the stress lands on it? (**It breaks into ue**.)

438.4 descansar — to un-tire yourself

Say **cansado**, the word for a body with nothing left in it. Say **torcerse**. You have twisted your ankle and you are tired. Name what the doctor is about to tell you to do.

You'll want to know: descansar

descansar — to rest.

Tiene que descansar dos días — you have to rest for two days. *Descanse* on a sign at a viewpoint or a clinic is an invitation to sit. The related noun **el descanso** is what a timetable calls a break, and what a football match calls half-time.

The word, taken apart — and its English cousins

des- plus **cansar**, and you already own the second half.
Cansado came from Latin **campsāre**, which was a sailor's word: to turn a ship round a headland. Turning the ship round, over and over, was the hard work that wore a crew out, and the word slid from the manoeuvre to the exhaustion it caused.

des- is the undoing prefix. Put it on **cansar** and you get the reversal:

word	**what it does to the tiredness**
cansar	puts it there
descansar	takes it away

Why it's said this way

English **rest** names a condition you are in. Spanish **descansar** names an action you perform on a condition: you go in and remove the tiredness.
That is not a curiosity, it changes how the word behaves. Because it is a reversal and not a state, it takes a duration the way any action does — *descansé media hora*, I rested for half an hour — where English has to reach for *had a rest* to make *rest* countable.
The prefix is productive, so the move is reusable. **des-** on a verb you already know gives you its undoing, and you can often guess the result before anyone teaches it to you.

Your turn

Say these aloud:

- *descansar*
- I twisted my ankle, so I have to rest
- what **des-** is doing to *cansar*

Before you move on

To rest? (**Descansar**.) What does **des-** do? (**Undoes**.) What was *campsāre* originally about? (**Turning a ship round a headland**.)

438.5 reír — the prefix that is not there

Say **la risa**, the noun for the sound itself. Say **descansar**. You are resting a twisted ankle and the whole thing is faintly ridiculous. Name the verb *risa* belongs to.

You'll want to know: reír

reír — to laugh. **reírse de** — to laugh *at* something.

Nos reímos mucho — we laughed a lot. *No te rías* — do not laugh. And **sonreír**, with *son-* from Latin *sub-*, under: a laugh kept low, which is exactly what a smile is.

The word, taken apart — and its English cousins

Here is the trap, and it is worth setting off deliberately.
reír looks like **re-** plus **ír**. It is neither. There is no prefix and there is no *ir*. The whole word is Latin **rīdēre**, to laugh, arriving in one piece — the *r-e* at the front is nothing more than the first two letters of the root.
You met **batería**, a word that wears an *ending* it never earned. This is the other half of that lesson: a word that wears a *prefix* it never had. Spanish has both kinds, and neither announces itself.

Why it's said this way

The written accent on **reír** is physical evidence, and you can read it. *Rīdēre* had a **d** between its vowels: *ri-d-ere*. Spanish wore intervocalic **d** away in word after word, and when it went here it left the **i** and the **e** standing next to each other with nothing between them.
Two vowels side by side would normally collapse into one syllable. These do not, because they were never together — a consonant used to hold them apart. The accent on the **í** is how Spanish writes down that refusal: *re-ír*, two syllables, the join still visible where the **d** used to be. The family keeps the evidence too: **la risa** lost the same **d**, while **ridículo** was borrowed back from Latin late enough to keep it. One root, one missing consonant, and a word on each side of the loss.

Your turn

Say these aloud:

- *reír*
- we rested and we laughed a lot
- what the accent on the **í** is recording

Before you move on

To laugh? (**Reír**.) Is the **re-** a prefix? (**No — it is part of the root**.) Which consonant fell out and left the accent behind? (**The d**.)

438.6 (polideportivo, natación, torcerse, descansar, reír) — from cold

From memory alone, say all five: *the sports centre*, *swimming*, *to twist your ankle*, *to rest*, *to laugh*.

Grammar Lens: pieces that are real, and pieces that are not

Three of this chapter's words look built. Two of them are.

word	the front piece
polideportivo	real — Greek *polýs*, many
descansar	real — *des-*, the undoing
reír	**not a piece at all**

The test is not how the word looks; it is whether the rest of the word survives without the piece. Take *poli-* off and *deportivo* stands. Take *des-* off and *cansar* stands. Take *re-* off *reír* and nothing is left, which is the proof that it was never a prefix.

Carry that test forward. It is the one move that keeps morphology from turning into guesswork, and it costs you a second per word.

Your turn

Say these aloud:

- I do swimming at the sports centre on Tuesdays
- I twisted my ankle getting out of the pool
- *torcemos* and *se tuerce*, and which one breaks the vowel

What you've built

You can now say where you exercise, what goes wrong there, what you have to do about it, and how you feel about the

whole business. That is a complete small episode, and it is the shape a clinic conversation and a message to a friend both take.
You also have a second doublet. **nadar** and **la natación** are one Latin verb arriving twice, once worn down by mouths and once lifted off the page — and the learned twin is the one on the timetable.

Before you move on

To laugh? (**Reír**.) To rest? (**Descansar**.) The sports centre? (**El polideportivo**.) Which of those three has no prefix? (**Reír**.)

438.7 (una lesión en el polideportivo) — read it, then do it yourself

Say *el polideportivo* and *la natación*. Both are on the notice you are about to read, and one of them is cancelled.

Your turn

Read it: the notice once straight through, then answer

> **AVISO — POLIDEPORTIVO MUNICIPAL** Los cursos de **natación** de la tarde quedan suspendidos del 3 al 10 de octubre por obras en los vestuarios. Las clases de la mañana siguen igual. Para cualquier duda, escriba a avisos@polideportivo.invalid.

Say these aloud:

- which classes are suspended, and for how long
- which classes are not affected
- where to write if you have a question

Why it's said this way

Now a message from a friend who went anyway, on a morning.

> Fui por la mañana y **me torcí** el tobillo saliendo de la piscina. Nada grave: el médico dice que tengo que

> **descansar** tres días. Luego **nos reímos**, porque llevaba veinte años sin caerme en ningún sitio.

Notice what each verb is doing. **Me torcí** puts the injury on the speaker without blaming anyone. **Descansar** is an instruction with a duration attached. **Nos reímos** closes the episode, and that closing move is what a Spanish speaker expects at the end of a small misfortune: name it, size it, laugh it off.
A report that stops after *me torcí el tobillo* sounds like a complaint. The same report with *nos reímos* on the end sounds like a story. Same facts, and the last clause decides which one the listener hears.

Before you move on

Now your turn, out loud. Four sentences: where you went, what you were doing there, what you twisted, and what you have to do now. End it the way the message above ends it.
Write it: the same four sentences
Then check yourself: did you say *me torcí* ***el*** *tobillo* and not *mi tobillo*?

Chapter 439

Andenes Y Cierres

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read the signs that decide where I may walk: a platform number, a shop shut for now, a street severed, and an office that has moved.
>
> *Read the notice or message this chapter's words exist for, then say the same thing back.*

439.1 el andén — where you wait for the train

> Say **el tren**, **la estación** and **la parada**. You are inside the station and the train has not come. Name the strip of concrete you are standing on.

You'll want to know: el andén

el andén — the platform.

El tren sale del andén 4 — the train leaves from platform 4. Announcements put the number after the word, never before, and they say it fast: *andén cuatro.*

The written accent tells you where to put the weight: **an-DÉN**, on the last syllable. Without it the word would be read *AN-den*, and the stress is the part a listener uses to recognise it.

The word, taken apart — and its English cousins

It does not come apart, and this time that is not a trick. Nobody knows for certain where **andén** comes from.
The tempting guess is **andar**, to walk, because a platform is a place you walk along. Dictionaries do not accept it: the endings do not line up. The usual proposal is Latin *indago*, "an encircling" (EtymDB 2.1), and even that is offered only as a perhaps.
So the honest entry is *origin uncertain*, and that is worth meeting on purpose. Any book that produces an etymology for every word is inventing some of them. Spanish has a few hundred words like this, and the right response is to learn the word and let the history stay open.

Your turn

Say these aloud:

- *el andén*
- the train leaves from platform four
- the difference between *la parada* and *el andén*

Before you move on

The platform? (**El andén**.) Which syllable is stressed? (**The last**.) Where does the word come from? (**Nobody knows for certain**.)

439.2 trasladar — carried across

Say **la oficina**, **el piso** and **el andén**. All three are places a thing or a person can be taken **from** one of and **to** another.

You'll want to know: trasladar

trasladar — to move something or someone from one place to another. **trasladarse** — to move yourself, to relocate.

Han trasladado la oficina al centro — they have moved the office to the centre. *Me traslado a Sevilla en enero* — I am relocating to Seville in January.

This is the formal word, the one on a letter from a bank or a clinic. For moving house among friends you would hear *mudarse*, but the notice on the door will say *trasladado*.

The word, taken apart — and its English cousins

tras- from Latin *trans*, across, plus **-ladar** from *lātus*, carried.

piece	meaning
tras-	across
-lad-	carried

Carried across. English has the same two pieces bolted together in **translate**, which is a text carried across into another language, and in **relate** and **collate**.

Why it's said this way

Lātus is the odd piece, and it is worth a minute.
Latin's verb for carrying was *ferre*. Its past participle was not *ferred* or anything built from *fer-*; it was **lātus**, from a completely different root that had been absorbed into the same verb long before anyone wrote it down. A verb whose forms come from two unrelated stems is called **suppletive**, and English has the famous one: *go* and *went*, where *went* was borrowed whole from *wend*.
So **trasladar** carries a fossil. The *-lad-* in it is the past participle of a Latin verb whose present tense left no trace in the Spanish word at all.

Your turn

Say these aloud:

- *trasladar*
- they have moved the office
- I am relocating to a new flat in January

Before you move on

To move something across? (**Trasladar**.) What do the two pieces mean? (**Across** and **carried**.) Which English word is built from the same two? (**Translate**.)

439.3 cerrado — the word on the glass

> Say **cerrar** and **la puerta**. The office has been **trasladada** and you are standing in front of the old door. Name what the card hanging on it says.

You'll want to know: cerrado

cerrado — closed.

CERRADO POR VACACIONES — closed for holidays. *La piscina está cerrada los lunes* — the pool is closed on Mondays. It agrees like any adjective: *cerrado*, *cerrada*, *cerrados*, *cerradas*, matching the thing that is shut.

It also stretches past doors. *Una curva cerrada* is a tight bend; *un acento cerrado* is a thick accent you struggle to follow. The common thread is **not letting anything through**.

The word, taken apart — and its English cousins

cerrar plus **-ado**, the ending that turns an *-ar* verb into its past participle. Nothing exotic: *hablar* gives *hablado*, *cerrar* gives *cerrado*. Underneath sits Late Latin **serare**, to bolt, from *sera*, the bar across a door, as you met under *cerrar* — not Latin **claudere**, to shut, which is visible instead in **la clausura**, **excluir** and English **closure**, **clause** and **claustrophobia**.

Grammar Lens: two participles, two shapes

abrir gave you **abierto**, which does not follow the pattern. **cerrar** gives **cerrado**, which does. The pair sits on opposite sides of the same shop door, and their shapes do not match.

verb	participle
cerrar	cerrado — regular
abrir	**abierto** — irregular

The regular ones you build; the irregular ones you learn one at a time, and there are only about a dozen that matter. Spanish put the irregularity on the oldest and most-used verbs, which is the usual bargain a language makes: the words you say constantly are the ones that resist tidying.

Your turn

Say these aloud:

- *cerrado*, then *cerrada*
- the office is closed because they have moved it
- *abierto* and *cerrado*, and which one is the irregular shape

Before you move on

Closed? (**Cerrado**.) Feminine? (**Cerrada**.) Is it a regular participle? (**Yes — *-ar* gives *-ado***.)

439.4 cortar — and what a cut road means

Say **corto** and **el cuchillo**. One is a shape, one is a tool, and the same idea is inside both. Name the verb.

You'll want to know: cortar

cortar — to cut.

Corta el pan — cut the bread. *Me he cortado* — I have cut myself. *Se ha cortado la llamada* — the call has dropped, which Spanish sees as a line cut rather than a call lost.

The word, taken apart — and its English cousins

corto and **cortar** are the same Latin word, one taken as a description and one as an action. *Curtus* meant shortened, cut off.

word	**the same idea as**
corto	the result of the cut
cortar	the act of cutting

English keeps *curtus* in **curt**, a reply cut short, and in **curtail**. The scissors in a barber's window and the adjective for a short skirt are relatives.

Why it's said this way

Now the meaning that catches travellers out. On a road or a rail line, **cortado** does not mean damaged. It means **closed**.

VÍA CORTADA POR OBRAS

A **vía cortada** is a line out of service. A **calle cortada** is a street shut to traffic, often for a market or a race, with nothing wrong with it at all.
Set it beside **cerrado**, which you met a moment ago, because the two are not interchangeable. A shop is **cerrado**: someone shut it and will open it again. A road is **cortada**: the through-route has been severed, and you must go round. Spanish picks the verb by *how* the way is blocked, and a sign that says *cortada* is telling you there is no waiting for it to reopen today.

Your turn

Say these aloud:

- *cortar*
- the street is closed for works
- why a shop is *cerrada* but a street is *cortada*

Before you move on

To cut? (**Cortar**.) What does *VÍA CORTADA* mean? (**The line is closed**.) Which adjective you already had comes from the same Latin word? (**Corto**.)

439.5 tirar — the door that says pull

Say **la caja** and **la puerta**. The street was **cortada**, you carried an empty box round the long way, and now you want rid of it. Name what you do with the box.

You'll want to know: tirar

tirar — to throw, and above all **to throw away**.

Tira la caja — throw the box out. *No tires eso* — do not throw that away. *Tirar la basura* is the everyday phrase for taking the rubbish out, and the bin itself is where things **se tiran**.

Why it's said this way

Now the sign, and it surprises every English speaker exactly once.

> **TIRAR** on a door means **PULL**.

The opposite side says **EMPUJAR**, push. A reader who knows *tirar* as *throw* reads the door as an instruction to hurl something, and gets it backwards.

The two senses are one idea seen from each end. **Tirar** is about applying force along a line away from where the thing sits: a box goes out of your hand, and a door comes out of its frame toward you. Spanish did not split the word; English happens to use two.

the sign	what to do
TIRAR	pull
EMPUJAR	push

Read the door before you lean on it. The mistake is harmless and universal, and knowing it in advance saves you making it in a doorway with people behind you.

The word, taken apart — and its English cousins

It does not come apart, and like **el andén** at the start of this chapter its history is unsettled. A Germanic verb meaning to tear, reaching Spanish through the Goths, is the usual suggestion; an origin in the sound of a snapping cord has also been argued. Neither is agreed.

Two words in one chapter with no recoverable history is not unusual. The very common, very short, very old verbs are the ones whose trail goes cold soonest, because they were worn down long before anyone was writing Spanish at all.

Your turn

Say these aloud:

- *tirar*
- throw the box away, the street is closed anyway
- what to do at a door marked *TIRAR*

Before you move on

To throw away? (**Tirar**.) What does *TIRAR* mean on a door? (**Pull**.) And the sign on the other side? (**Empujar**, push.)

439.6 (andén, trasladar, cerrado, cortar, tirar) — from cold

From memory alone, say all five: *the platform*, *to move something across*, *closed*, *to cut*, *to throw away*.

Grammar Lens: three signs that stop you, and they are not the same

English puts *closed* on all three of these. Spanish does not, and the word it picks tells you what to do next.

the sign	what it tells you
CERRADO	shut for now; come back later
CORTADA	the route is severed; go round
TRASLADADO	it is open, somewhere else

A card reading *TRASLADADO* is the one worth recognising fastest, because it is the only one of the three with an address underneath it.

Your turn

Say these aloud:

- the train leaves from platform four
- throw the box away
- what you do at a door marked *TIRAR*, and at one marked *EMPUJAR*

What you've built

You can now read the signs that decide where you are allowed to walk. A station, a shut shop, a severed street and an office that has gone somewhere else are four different pieces of bad news, and you can tell them apart at a glance instead of guessing from context.
You also met the limit of etymology. **el andén** and **tirar** have no recoverable history, and the honest entry for both is *origin uncertain.* Every other word in this chapter and the last came apart; these two did not, and saying otherwise would mean making something up.

Before you move on

To cut? (**Cortar**.) To throw away? (**Tirar**.) Closed, on a shop door? (**Cerrado**.) And on a street? (**Cortada**.)

439.7 (la oficina que se ha mudado) — read it, then do it yourself

Say *el andén* and *cerrado.* You are going to meet four signs in a row, and every one of them is going to send you somewhere else.

Your turn

Read it: all four, then answer

1 — ANDÉN 2. SALIDA A LA CALLE.

2 — CALLE MAYOR CORTADA AL TRÁFICO.

3 — CERRADO DE 14:00 A 16:00.

4 — OFICINA TRASLADADA AL NÚMERO 40.

Say these aloud:

- which sign means the place still exists
- which sign is about a time and not a place
- what sign 2 tells you to do about your route

Why it's said this way

Sign 2 repays a second look. **Cortada al tráfico** names *what* the cut applies to, and that qualifier is doing real work: a street can be cut to cars and still open to feet. Spanish puts the limit of the cut inside the same phrase, where English would need a second sentence to say who is still allowed through.

Sign 4 is the one that saves your afternoon: **trasladada**, agreeing with *oficina*, followed by an address. Compare it with a card that said only *CERRADO* — that one would leave you waiting on a pavement for a door that is never opening again.

And when you finally reach number 40, the glass door will say **TIRAR**. Pull it.

Before you move on

Now your turn, out loud. Five sentences: which platform you came out at, what the street was like, why the first door was no use, where the office went, and what you had to do to the last door.

Write it: the same five sentences

Then check yourself: did you make **cortada** and **trasladada** agree with the words they describe?

Chapter 440

La Fiesta Y El Año

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can be invited to a wedding or a birthday, say I went, say what mood I was in, and tell a notice's "is held" apart from a friend's "we're celebrating".
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

440.1 la boda — the vows, taken as one thing

> Say **la fiesta**, **la iglesia** and **la familia**. One day puts all three in the same place. Name it.

You'll want to know: la boda

la boda — the wedding.

Vamos a una boda el sábado — we are going to a wedding on Saturday. Spanish uses the singular for the event and the plural **las bodas** for an anniversary of it: *las bodas de plata* are a silver wedding, twenty-five years on.

The **b** is soft between vowels — *la BO-da*, with the lips barely closing.

The word, taken apart — and its English cousins

boda looks like one solid piece and is not. It is Latin **vōta**, *the vows* — the plural of **vōtum**, a vow.
A wedding was named for what is said at it, and the name is plural

because more than one vow is spoken. Then Spanish stopped hearing the plural and treated the whole word as a single feminine noun, which is why you can now say *una boda*, one-of-the-vows, without it sounding odd to anybody.
English kept the same root in **vote**, **votive** and **devotion**, all of them about something pledged.

Why it's said this way

This is not a one-off. Latin had a third gender, **neuter**, whose plural ended in **-a**, and Spanish lost that gender entirely. The plurals were left standing with a feminine-looking ending and nothing to belong to, so the language took them as feminine singulars.

Latin, a neuter plural	**Spanish, a feminine singular**
vōta, the vows	**la boda**
folia, the leaves	la hoja
ligna, the firewoods	la leña

Every one of those is a **countable plural read as a single mass or event**, and that is the shape to look for: a Spanish feminine noun naming one thing made of many. It is a third way for a word to hide its pieces — not a false ending, not a false prefix, but a number the language forgot.
`cerrado` in the last chapter came apart the moment you looked. **boda** will not, and no amount of looking at modern Spanish would tell you why.

Your turn

Say these aloud:

- *la boda*
- we are going to a wedding on Saturday
- what *boda* originally meant, and why it was plural

Before you move on

The wedding? (**La boda**.) What was the Latin word? (***Vōta***, the vows.) What number was it? (**Plural**.)

440.2 el cumpleaños — the years you have completed

Say *¿Cuántos años tienes?* Say **el aniversario**. Say **la boda**. One day a year answers the first question, and it is not called an *aniversario*.

You'll want to know: el cumpleaños

el cumpleaños — the birthday.

It ends in **-s** and it is **singular**: *el cumpleaños*, *los cumpleaños*. The word does not change; only the article tells you how many.

¡Feliz cumpleaños! — happy birthday. *Mañana es mi cumpleaños* — tomorrow is my birthday.

The word, taken apart — and its English cousins

Two words fused into one: **cumple** plus **años**.
cumplir is to complete, to fulfil, to carry something through to its end. *Cumplo treinta* — I complete thirty. So a **cumple-años** is the day the years get completed, and the **-s** you can hear is the plural of *años* trapped inside a word that is now singular.
That is why *el cumpleaños* looks plural and is not. It is not an exception to be memorised; it is a sentence that hardened.
Cumplir is Latin *complere*, "to fill up", and *año* is Latin *annus*, "a year".

Why it's said this way

Spanish has two words for the same square on the calendar, and they disagree about what is happening.

the word	what it says is happening
el aniversario	the **year turns**
el cumpleaños	**you complete** years

Aniversario is *annus* plus *vertere*, the year coming round again — the calendar does the work, and you stand still. *Cumpleaños* puts the work on you: the years are something you finish, one at a time, like a task. Spanish keeps both and uses them for different things. A wedding gets an **aniversario** because a date recurs; a person gets a **cumpleaños** because a person is doing the ageing. That is not a rule anyone wrote

down — it is the metaphor inside each word still deciding where it is welcome.

Your turn

Say these aloud:

- *el cumpleaños*, then *los cumpleaños*
- tomorrow is my birthday
- why a wedding has an *aniversario* and a person has a *cumpleaños*

Before you move on

The birthday? (**El cumpleaños**.) Is it plural? (**No — singular, with a plural trapped inside**.) Which two words is it made of? (***Cumple*** and ***años***.)

440.3 celebrar — to make a crowd of it

Say **el cumpleaños**, **la fiesta** and **la música**. You have the day, the party and the sound. Name the verb that puts them together.

You'll want to know: celebrar

celebrar — to celebrate.

Celebramos su cumpleaños en casa — we are celebrating her birthday at home. *Celebrarse* is the form a notice uses: *la reunión se celebra el martes* — the meeting is held on Tuesday.

That second use is worth having early. On an official notice, **celebrarse** does not mean anybody is enjoying themselves; it means the event **takes place**.

The word, taken apart — and its English cousins

Latin **celebrāre**, from **celeber** — *crowded, much-visited, thronged.* A *celeber locus* was a place people went to in numbers. To **celebrate** something was therefore to **make a crowd of it**, and only later to enjoy it. The idea underneath is attendance, not happiness.

English took the same root twice: **celebrate**, and **celebrity** — a person who has a crowd.

Why it's said this way

That original meaning is exactly why a town-hall notice can say *se celebra* for an event nobody would call festive.

what the sign says	what it means
se celebra la fiesta	the party takes place
se celebra la reunión	the meeting takes place

Both are *celebrar*, because both are a gathering. English would need two verbs here, and a reader who knows only the happy sense will misread the second one as a joke.
When you meet **celebrarse** on a notice, read it as **is held**. The crowd is what the word is really about, and a meeting has one.

Your turn

Say these aloud:

- *celebrar*
- we are celebrating my birthday at home
- what *la reunión se celebra el martes* is telling you

Before you move on

To celebrate? (**Celebrar**.) What did *celeber* mean? (**Crowded**.) What does *se celebra* mean on a notice? (**It is held**.)

440.4 disfrutar — to take the fruit of it

Say **la fruta**, **descansar** and **celebrar**. Two of those three share a prefix shape. Hold on to that.

You'll want to know: disfrutar

disfrutar — to enjoy.

Disfruté mucho de la boda — I really enjoyed the wedding. *¡Que disfrutes!* — enjoy yourself, said as you hand somebody a ticket or wave them off.

It usually takes **de**: *disfrutar* ***de*** *algo*. Dropping the *de* is common in speech and still reads as informal in writing.

The word, taken apart — and its English cousins

dis- plus **frut-**, and the second half is **la fruta** you already have. Both come from Latin **frūctus**, which meant *produce, yield, the thing a plant gives you*.

To **disfrutar** something is to **take the fruit of** it — to get the yield. English has the same picture in *to enjoy the fruits of your labour*, which most speakers hear as a metaphor and which Spanish has compressed into one verb.

Why it's said this way

Now the trap, and it corrects the test you learned two chapters ago. **descansar** is **des-** plus *cansar*, and the prefix **undoes**: it takes the tiredness away. It would be natural to read **dis-** in *disfrutar* the same way and land on *to un-fruit*, which would be the opposite of what the word means.

word	**what the prefix does**
descansar	reverses — removes the tiredness
disfrutar	**intensifies — takes the yield fully**

The piece-test still works: take **dis-** off and *frutar* stands, so the join is real. What the test does **not** tell you is what the join *means*. A prefix that usually reverses does not always reverse, and the only way to know is the word's sense, not its shape.

That is the honest limit of taking words apart. It shows you the seams; it does not read them for you.

Your turn

Say these aloud:

- *disfrutar*
- I really enjoyed the wedding we celebrated
- why *dis-* in *disfrutar* is not the *des-* of *descansar*

Before you move on

To enjoy? (**Disfrutar**.) Which preposition follows it? (***De.***) What does the second half mean? (**Fruit, yield**.)

440.5 el humor — the fluid you are in

Say **reír**, **alegre** and **disfrutar**. All three describe a person having a good time. Now name the thing that person is **in**.

You'll want to know: el humor

el humor — mood, and also humour.

Estoy de buen humor — I am in a good mood. *Está de mal humor* — he is in a bad mood. *Tiene mucho sentido del humor* — she has a great sense of humour.

The **h** is silent here as everywhere in Spanish: *el u-MOR*. And note the preposition — Spanish says you are **de** a mood, of it, not *in* it.

The word, taken apart — and its English cousins

Latin **ūmor** meant one thing only: **moisture, a fluid**. English keeps that original sense in **humid**.

Medieval medicine held that a body ran on four fluids, and that whichever one you had most of set your temperament. Your *humour* was literally which liquid you were full of. The theory is long dead, and the word survived it — so when a Spanish speaker says *estar de buen humor*, the sentence still says *to be of a good fluid*, and nobody notices.

Why it's said this way

One Spanish word covers what English splits into **mood** and **humour**, and the split happened in English rather than the join happening in Spanish.

Spanish	English needs
estar de buen humor	to be in a good **mood**
sentido del humor	sense of **humour**

English narrowed *humour* onto the funny sense and borrowed *mood*

from its own older stock to carry the rest. Spanish never divided the work, so *el humor* still holds both — the state you are in, and the thing that makes other people laugh.
That is worth noticing whenever an English pair maps to one Spanish word. The usual cause is not that Spanish is vaguer; it is that English acquired a second word from somewhere and gave it half the job.

Your turn

Say these aloud:

- *el humor*
- I am in a good mood and I enjoyed it a lot
- *sentido del humor*, and what the word first meant

Before you move on

Mood? (**El humor**.) Which preposition goes with it? (***De***.) What did the Latin word mean? (**Moisture**.)

440.6 (boda, cumpleaños, celebrar, disfrutar, humor) — from cold

From memory alone, say all five: *the wedding*, *the birthday*, *to celebrate*, *to enjoy*, *the mood*.

Grammar Lens: three ways a word hides its pieces

You now have a small collection of them, and they fail differently.

the word	what is hidden
boda	a **plural** the language forgot
cumpleaños	a whole **phrase**, fused
disfrutar	a real join whose **meaning** misleads

Boda cannot be recovered from modern Spanish at all — only Latin says why it is one word. *Cumpleaños* can: say it slowly and *cumple* and *años* fall apart in your mouth. *Disfrutar* comes apart cleanly and

then lies about what the prefix is doing.
The piece-test tells you **whether** there is a join. It never tells you what the join means, and *disfrutar* is the word that proves it.

Your turn

Say these aloud:

- we are celebrating my birthday on Saturday
- I am in a good mood
- what *se celebra* means on an official notice

What you've built

You can now be invited to something, say you went, and say how it was. That is the whole social round-trip, and it is what a message from a friend actually contains.
You also have the pair that will keep paying: **celebrarse** on a notice means *is held*, not *is enjoyed*, and **el humor** is one word where English keeps two.

Before you move on

The birthday? (**El cumpleaños**.) The wedding? (**La boda**.) In a good mood? (**De buen humor**.) Which of those two nouns hides a plural? (***Boda*** — *vōta*, the vows.)

440.7 (una invitación y una respuesta) — read it, then do it yourself

Say *la boda* and *celebrar*. The same verb is about to appear twice in front of you, meaning two different things.

Your turn

Read it: both, then answer
1 — un mensaje

¡Hola! El sábado **celebramos** mi **cumpleaños** en casa de mis padres. Nada especial, solo familia y unos amigos. ¿Te apuntas?

2 — un aviso en el portal

La junta de vecinos se **celebrará** el jueves 9 a las 19:00 en el portal. Se ruega puntualidad.

Say these aloud:

- which of the two is something you would enjoy
- what *se celebrará* is telling you in the second one
- where and when each one happens

Why it's said this way

The two uses look identical and are told apart by one thing: whether the verb is reflexive.
Celebramos mi cumpleaños — *we* celebrate, somebody is doing the enjoying. **Se celebrará la junta** — it *gets* held, and no one is named, because a notice does not care who convenes a meeting. The reflexive drains the person out of the sentence, and what is left is the bare fact that the thing takes place.
So the answer to *which of the two would you enjoy* is not a matter of tone. It is in the grammar: the message has a **we**, and the notice does not.
Now answer the message the way a friend would: say yes, say what mood you are in, and say you will enjoy it.

Before you move on

Now your turn, out loud. Four sentences: accept the invitation, say what mood you are in, say you are sure you will enjoy it, and mention one wedding or birthday of your own coming up.
Write it: the same four sentences
Then check yourself: did you use **de** after *humor* and after *disfrutar*?

Chapter 441

El Contrato

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read the four pieces of paper that decide where my money goes: what I agreed to, that I agreed to it, what I owe, and what I owe it on.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

441.1 el contrato — drawn together

> Say **el trabajo** and **el documento**. One document turns a job into an obligation on both sides. Name it.

You'll want to know: el contrato

el contrato — the contract.

Un contrato de trabajo is an employment contract; *un contrato de alquiler* is a tenancy agreement. The verb is **contratar**, to hire or to contract: *me han contratado* — they have hired me.

The word, taken apart — and its English cousins

con- together, plus **-trat-** from Latin **trahere**, to pull or draw.
A contract is **a drawing-together** — two parties pulled into the same agreement. English says the same thing and has stopped hearing it: *contract*, and also *contraction*, which is a muscle drawing itself in.
Trahere is busy in Spanish too. **traer** is to bring, to draw something to

you; **atraer** is to attract; **contraer** is to contract a debt or an illness, the same word as the noun above with its verb ending still on.

Your turn

Say these aloud:

- *el contrato*
- they have hired me, I have an employment contract
- what the two pieces of the word mean

Before you move on

The contract? (**El contrato**.) What does **-trat-** mean? (**To draw, to pull**.) The verb? (**Contratar**.)

441.2 firmar — to make it firm

Say **el nombre**, **escribir** and **el contrato**. Writing your name at the bottom of one of those is not the same act as writing it at the top.

You'll want to know: firmar

firmar — to sign. **la firma** — the signature, and also *a firm* in the business sense.

Firme aquí, por favor — sign here, please. *Sin firmar* — unsigned, the state a form is in when the clerk hands it back to you.

The word, taken apart — and its English cousins

Latin **firmus**, firm, solid, not moving. To **firmar** is **to make firm**. The name at the bottom is not information; it is the act that hardens a piece of paper from a proposal into an obligation. Spanish says that outright, where English borrowed *sign* from *signum*, a mark, and kept only the mark.

the word	what it is built on
firmar	*firmus*, firm
to sign	*signum*, a mark

English has *firmus* too, in **firm**, **affirm** and **confirm** — all of them about making something hold.

Why it's said this way

Look at what the two words in this chapter are doing so far. **Contrato** draws the parties together. **Firmar** makes the result solid. They are two halves of one physical picture: pull the sides in, then set them.

That picture is why **la firma** can also mean a company. A firm is a name that has been made firm — an entity that holds, that you can sign with and be bound by. Spanish did not need a second word for it, and the double meaning is not a coincidence you have to memorise.

Your turn

Say these aloud:

- *firmar*, then *la firma*
- sign the contract here, please
- why a company can be called *una firma*

Before you move on

To sign? (**Firmar**.) The signature? (**La firma**.) What does *firmus* mean? (**Firm, solid**.)

441.3 fijo — nailed down

Say **la empresa** and **firmar**. A company offers you two kinds of contract, and only one of them ends on a date.

You'll want to know: fijo

fijo — fixed, permanent, settled.

Un contrato fijo is a permanent contract, the one a Spanish job advert contrasts with *temporal*. *Un precio fijo* is a fixed price. *Un cliente fijo* is a regular. The verb is **fijar**, to fix or to set: *fijar una fecha* — to set a date.

It agrees: *fijo*, *fija*, *fijos*, *fijas*.

The word, taken apart — and its English cousins

Latin **fīgere**, to drive in, to fasten — the verb for putting a stake in the ground. **Fijo** is its past participle, worn down: *the thing that has been fastened*.

English took the same participle intact as **fix**, and kept the original sense in **transfix**, to pin something through.

So the chapter now has three ways of binding, and they are all physical:

word	the picture
contrato	pulled together
firmar	made solid
fijo	driven in

Why it's said this way

cerrado is a participle you can still feel as one: *cerrar* is right there, and nobody would call *cerrado* a plain adjective.

fijo is a participle too, and nothing about it feels like one. The verb *fijar* exists, but it was built backwards *from* the adjective rather than the other way round, and the form you would expect — *fijado* — also exists and means something narrower.

That is what age does. A participle used constantly enough stops being read as the result of an action and becomes a quality in its own right. **Cerrado** is still at the first stage; **fijo** finished the journey centuries ago.

When you meet a short adjective ending in a bare vowel where a verb also exists — *fijo*, *limpio*, *seco* — it is worth asking which came first. The answer is often not the one the modern shape suggests.

Your turn

Say these aloud:

- *fijo*, then *fija*
- I signed a permanent contract
- what *fijar una fecha* means

Before you move on

Permanent? (**Fijo**.) What did *fīgere* mean? (**To drive in, to fasten**.) The verb built from it? (**Fijar**.)

441.4 la factura — a making, itemised

Say **pagar**, **la cuenta** and **el precio**. In a restaurant you ask for *la cuenta*. For work done on a **contrato**, the paper has a different name.

You'll want to know: la factura

la factura — the invoice, the bill.

La factura de la luz — the electricity bill. *¿Me hace una factura?* — could you make me out an invoice? The verb is **facturar**, to invoice, and also to check in luggage at an airport.

la cuenta is what you ask for at a table; **la factura** is the formal document, with a number on it, that a business issues and a tax office may want to see.

The word, taken apart — and its English cousins

Latin **facere**, to make or do, plus **-tūra**, an ending that names **the thing an action produces**.

verb	**the thing it produces**
facere, to make	**factura**, a making
escribir, to write	escritura, a writing
leer, to read	lectura, a reading

A *factura* is literally **a making** — the itemised account of what was made or done for you. The ending is still productive, so when you meet an unfamiliar noun in **-ura**, look for the verb inside it before you look it up.

Why it's said this way

Facere is one of the two or three hardest-working roots in the language, and you can see it under a lot of words that do not look related. **hacer** is its direct Spanish descendant — *facere* lost its **f** to an **h** the way *filius* became *hijo*. **satisfacer** is *satis* plus *facere*, to make enough. **fácil** is what can be done.

So *la factura* and *hacer* are the same word arriving by different routes: one worn smooth by a thousand years of speech, one lifted off the page by clerks who needed a formal noun. That is the same doublet shape as **nadar** and **la natación** — and, as there, the learned twin is the one on the official paper.

A **precio fijo** and a **factura** belong to the same world: both are things written down so they stop moving.

Your turn

Say these aloud:

- *la factura*
- I have to pay the electricity bill
- the difference between *la cuenta* and *la factura*

Before you move on

The invoice? (**La factura**.) What does the ending **-ura** name? (**The thing an action produces**.) Which everyday verb is its worn-down twin? (**Hacer**.)

441.5 el préstamo — what lending leaves behind

Say **prestar**, **el banco** and **el dinero**. You have the verb for handing something over. Name the thing that exists afterwards.

You'll want to know: el préstamo

el préstamo — the loan.

Pedir un préstamo — to apply for a loan. *Devolver el préstamo* — to pay it back, with the same **devolver** the lending cycle already gave you.

The stress is three syllables from the end — **PRÉS-ta-mo** — and the written accent is what tells you so. Without it the word would be read *pres-TA-mo*.

The word, taken apart — and its English cousins

It is **prestar** with a noun ending, and both go back to Latin **praestāre** — *prae-* in front, plus *stāre*, to stand. To *praestāre* was **to stand out in front of** someone: to furnish, to supply, to put something forward. So a **préstamo** is what has been *put forward*, and English keeps the same idea in **to advance** a sum.
This completes a set you already had. **Prestar** hands it over, **recoger** fetches it, **devolver** brings it back — and now **el préstamo** is the name of the thing while it is out of your hands.

Why it's said this way

Préstamo has a second life worth knowing, because you will meet it in this kind of explanation rather than at a bank.
Un préstamo lingüístico is a **loanword** — a word one language has taken from another. Spanish calls **garaje** and **sofá** *préstamos*, and it uses the borrowing metaphor exactly as English does, down to the fact that nobody gives them back.

the word on the page	what it is a loan of
un préstamo del banco	dinero
un préstamo del francés	una palabra

That is the sense in which **factura** is not a *préstamo* and **garaje** is: *factura* was taken from the Latin that Spanish itself grew out of, which makes it an inheritance claimed late rather than a borrowing from a neighbour.

Your turn

Say these aloud:

- *el préstamo*
- I asked the bank for a loan and I am paying it back
- what *un préstamo del francés* means

Before you move on

The loan? (**El préstamo**.) Which syllable is stressed? (**The third from the end**.) What did *praestāre* mean? (**To stand out in front, to furnish**.)

441.6 (contrato, firmar, fijo, factura, préstamo) — from cold

From memory alone, say all five: *the contract*, *to sign*, *permanent*, *the invoice*, *the loan*.

Grammar Lens: paperwork is a set of physical acts

Nothing in this chapter began as an abstraction. Every one of the three binding words is a thing done with the hands.

word	the act underneath
contrato	pull the two sides together
firmar	make the result solid
fijo	drive it in so it cannot move

Read a Spanish contract with those three in mind and the vocabulary stops looking like jargon. *Contratar*, *firmar*, *fijar* — draw, harden, fasten. The law borrowed its whole vocabulary from carpentry and rope.

Your turn

Say these aloud:

- I signed a permanent contract with the company
- I asked for a loan and I have to pay it back
- could you make me out an invoice

What you've built

You can now read the four pieces of paper that decide where your money goes — what you agreed to, that you agreed to it, what you owe, and what you owe it on. That is the administrative half of

living somewhere, and it is what an A2 reading paper is mostly made of.
You also have two endings that keep paying. **-ura** names the thing an action produces, so *factura*, *escritura* and *lectura* stop being three separate words to learn. And **fijo** showed that a participle used long enough stops feeling like one at all.

Before you move on

The invoice? (**La factura**.) The contract? (**El contrato**.) The loan? (**El préstamo**.) Which everyday verb is *factura*'s worn-down twin? (**Hacer**.)

441.7 (una oferta de trabajo) — read it, then do it yourself

Say *el contrato* and *fijo*. The advert you are about to read uses both, and the second one is the part that matters.

Your turn

Read it: both, then answer

1 — oferta de empleo

Se busca ayudante de cocina. **Contrato fijo** a partir de enero, jornada completa. Se valora experiencia previa. Enviar currículum a empleo@cocinacentral.invalid.

2 — un aviso del banco

Le recordamos que la cuota de su **préstamo** se cargará el día 5. Puede descargar la **factura** del mes en su área privada. Cualquier cambio de cuenta debe comunicarse **firmado**.

Say these aloud:

- what kind of contract the job offers, and from when
- which of the two documents you would have to sign
- what the bank will do on the fifth

Why it's said this way

Notice the last line of the second notice: **debe comunicarse firmado**. There is no *you* in it. **Comunicarse** drains out the person exactly as *celebrarse* did on the notice about the meeting, and **firmado** is the participle doing an adjective's work, the way *cerrado* does on a shop door. The sentence says *any change must be communicated in-a-signed-state*, and names nobody at all.

That impersonal shape is the register of official Spanish, and it is worth recognising rather than translating. When a notice stops naming who must act, it is not being vague — it is saying the obligation attaches to the *document*, not to a particular clerk.

Contrast the job advert: *se busca*, *se valora*, *enviar*. Same move. An advert and a bank notice are written by the same hand.

Before you move on

Now your turn, out loud. Five sentences: say you applied, say what contract you were offered, say you signed it, say you have a loan to pay, and say when the bill arrives.

Write it: the same five sentences

Then check yourself: did **fijo** agree with *contrato*, and did you use **pedir** with *préstamo* rather than *preguntar*?

Chapter 442

La Gestion

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can deal with an institution rather than a person: book the appointment, read what the office wants, track what it sent me, and do it on a screen.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

442.1 la administración — the lesser one, serving

> Say **la oficina**, **el documento** and **servir**. Put the three together and you have named the thing that asks you for papers.

You'll want to know: la administración

la administración — the administration, and in Spain usually **the state**: *la Administración* with a capital letter is officialdom as a whole.

Trabaja en la administración — he works in the public sector. *Trámites con la administración* — dealings with officialdom. The verb is **administrar**, to manage or to administer.

The ending is **-ción**, which you have had since the chapter on paperwork, so the word is *the act of administering* made into a thing.

The word, taken apart — and its English cousins

ad- towards, plus **ministr-** from Latin **minister**, a servant or attendant, plus **-ción**.
And *minister* comes from **minus**, less. A *minister* was **the lesser**

one, the person who serves — which is why the word for a government's most senior officials is built on the word for *less*.
The pair is the point:

Latin word	built on	what it named
minister	*minus*, less	the one who serves
magister	*magis*, more	the one who directs

Magister is where **el maestro** comes from. So *maestro* and *ministro* are the same shape twice over, once on *more* and once on *less*, and Spanish kept both.
You already own the smaller half of that pair outright: **menos** is *minus*, unchanged in meaning and barely changed in sound. The administration is named with the same word you use to say *less*.

Why it's said this way

That etymology is not a curiosity here; it tells you the register. **La administración** is what a notice calls itself when it wants to sound like an institution rather than a person. A letter from it will not say *le pedimos* — it will say *se requiere*, and it will ask for **documentación** rather than papers.
So when you meet the word on a form, expect the impersonal grammar that comes with it. The vocabulary and the sentence shape travel together, and recognising one tells you to expect the other.

Your turn

Say these aloud:

- *la administración*
- she works in an office, in the public sector
- what *minister* originally meant, and what *magister* meant

Before you move on

The administration? (**La administración**.) What does *minus* mean? (**Less**.) And the word built on *more*? (***Magister***, behind *maestro*.)

442.2 el envío — put on the road

Say **enviar** and **la carta**. Say **la administración**. You have the verb for sending. Name the thing that is on its way.

You'll want to know: el envío

el envío — the shipment, the dispatch, the consignment.

Gastos de envío — shipping costs, the line on every order page. *Su envío está en camino* — your parcel is on its way. *El envío se ha retrasado* uses the **retraso** family you already have.

The accent sits on the **í** and breaks it away from the **o**: *en-VÍ-o*, three syllables.

The word, taken apart — and its English cousins

enviar is Latin **inviāre** — **in-** onto, plus **via**, a road.
To send something was **to put it on the road**, and the road is still sitting inside the word. *El envío* is what has been put on it.

word	**the road in it**
enviar	put onto the way
el envío	the thing on the way

English has *via* unchanged as a preposition, and the same *via* is inside **obvious** — *ob viam*, lying in the way, so plain you trip over it.

Why it's said this way

Envío is the second word in two chapters built by putting a plain ending on a verb you already own: *prestar* gave **préstamo**, *enviar* gives **envío**.
That is a pattern worth using deliberately. When you know a Spanish verb and need the noun for its result, the noun very often exists and is short — and you can usually recognise it even when you could not have produced it.
The administración will use the noun where a friend would use the verb. A friend says *te lo envío*; the tracking page says *su envío*. Same event, and the choice of word tells you who is writing.

Your turn

Say these aloud:

- *el envío*
- the shipping costs are not included
- what the word *via* is doing inside *enviar*

Before you move on

The shipment? (**El envío**.) Which Latin word is hidden in it? (***Via***, a road.) How many syllables? (**Three — en-VÍ-o**.)

442.3 concertar — agreeing, by way of a fight

Say **la cita** and **la hora**. Say **el envío**. You know the appointment and you know the time. Name the act of fixing them together.

You'll want to know: concertar

concertar — to arrange, to set up by agreement.

Concertar una cita — to make an appointment. It is the verb a clinic, a bank or a council uses on its website, where a friend would say *quedar*.

It breaks its stem under stress, like *cerrar*: **concierto**, **conciertas**, **concierta**, but *concertamos*.

The word, taken apart — and its English cousins

Say the *yo* form aloud: **concierto**. You have met that word already, and it meant a performance.

el concierto and **yo concierto** are the same word. Both are Latin **concertāre**, and here is the part that surprises people: *concertāre* meant **to contend, to fight it out** — *con-* together plus *certāre*, to compete.

what it became	**how the contest turned into it**
concertar una cita	settle it by thrashing it out
un concierto	voices contending *with* each other

The sense slid from fighting *against* to striving *together*, and both descendants kept a piece of it. A negotiation and an orchestra are the same activity seen from two moods.

Why it's said this way

English has the same pair and hides it every bit as well. A **concert** is the performance; **to concert** an effort, and **in concert with**, are the agreement sense, and **concerted** is what several people fought out in advance.
So *concertar* is not a word to learn cold. You already had **el concierto**, and the only new thing is that the noun has a verb standing behind it.
That is worth doing on purpose whenever a new verb looks like a noun you know. Check whether they are the same word before you treat them as two.

Your turn

Say these aloud:

- *concertar*
- I want to make an appointment for Thursday at nine
- why *concierto* has two meanings

Before you move on

To arrange an appointment? (**Concertar una cita**.) What did *certāre* mean? (**To compete, to fight**.) What is the *yo* form? (**Concierto**.)

442.4 la reunión — made one again

> Say **la sala** and **celebrar**. Say **concertar**. You can fix a time and you know what a notice calls holding an event. Name the event itself.

You'll want to know: la reunión

la reunión — the meeting.

Una reunión de vecinos is a residents' meeting, the one whose notice goes up in the entrance hall. *La sala de reuniones* is the meeting room. The verb is **reunirse**: *nos reunimos el jueves* — we are meeting on Thursday.

The word, taken apart — and its English cousins

re- again, plus **unir** from Latin **ūnus**, one, plus **-ión**.
A *reunión* is **a making-one-again**. The word assumes the people were together before and have scattered, which is why *reunirse* also covers a family gathering and why English **reunion** sounds warmer than **meeting**.
Spanish uses the one word for both. *Una reunión de trabajo* and *una reunión familiar* are the same noun, and only the adjective says which.

Why it's said this way

Put this next to **celebrarse**, which you met on a notice meaning *is held*.

> La reunión de vecinos se **celebrará** el jueves.

Both halves of that sentence are about a crowd. **Celebrar** is built on *celeber*, thronged; **reunión** is built on making people one again. The sentence says, twice over, that people are being brought together — and neither word mentions anybody doing the bringing.
That doubling is ordinary in official Spanish. Once you can hear it, a notice stops being a wall of formal vocabulary and becomes two or three plain ideas said in their dressed-up clothes.

Your turn

Say these aloud:

- *la reunión*
- we are meeting on Thursday in the meeting room
- I want to arrange a meeting

Before you move on

The meeting? (**La reunión**.) Which number is inside it? (***Ūnus***, one.) What does the **re-** add? (**Again**.)

442.5 la pantalla — the thing you put in front of a light

Say **el ordenador** and **el móvil**. Say **la reunión**. Both devices have the same part, and a meeting held remotely happens on it.

You'll want to know: la pantalla

la pantalla — the screen.

La pantalla del ordenador, *la pantalla del móvil*. *Compartir pantalla* — to share your screen. *En pantalla* — on screen. It also still means a lampshade, and a cinema screen: *la gran pantalla* is the big screen.

The **ll** is one sound, not two: *pan-TA-ya*.

Why it's said this way

The oldest sense is the useful one. A *pantalla* was **a shade put in front of a flame** so the light did not hit your eyes directly.
That is one idea, and every later use is the same idea moved:

what it shades	the sense
a candle	the lampshade
a projector's beam	the cinema screen
a lit device	the phone or computer screen

Nothing about a modern screen shades anything, but the word arrived by way of things that did. Spanish did not borrow a new word for the new object; it moved an old one, and the chain is short enough to hold in your head.

The word, taken apart — and its English cousins

It does not come apart, and its history is unsettled. Dictionaries reach for a crossing of two older words and do not commit further; no derivation has carried the field. EtymDB 2.1 records a loan from Catalan *pantalla*, which moves the question back a step.
That makes three now — **el andén**, **tirar** and **la pantalla** — and it is the same honest answer each time. You met the piece-test in the chapter on the sports centre: take a piece off and see whether the rest stands. These words fail that test at the first step, because there is no piece to take off, and no amount of staring at modern Spanish supplies one.

What you *can* do with a word like this is what the block above did: follow the **meanings** instead of the parts. *Pantalla* has no recoverable ancestry and a perfectly clear career, and the career is what makes it memorable.

Your turn

Say these aloud:

- *la pantalla*
- the meeting is on screen, I will share my screen
- what a *pantalla* was before it was a screen

Before you move on

The screen? (**La pantalla**.) What did it mean first? (**A shade in front of a light**.) Does the word come apart? (**No, and its origin is unsettled**.)

442.6 (administración, envío, concertar, reunión, pantalla) — from cold

From memory alone, say all five: *officialdom*, *the shipment*, *to arrange an appointment*, *the meeting*, *the screen*.

Grammar Lens: two routes into a word, and when each one runs out

Four of this chapter's five words come apart cleanly.

word	the part that carries it
administración	*minus*, less — the one who serves
reunión	*ūnus*, one — made one again
pantalla	**nothing; follow the meanings instead**

For **pantalla** the parts route is closed, and a different one is open: a shade in front of a flame, then in front of a projector, then in front of a lit device. One idea moved three times.

Both routes make a word stick. What does not work is insisting on the first when only the second is available, because that is how invented etymologies get made.

Your turn

Say these aloud:

- I want to arrange a meeting for Thursday
- the shipping costs are not included
- *concertar* and *un concierto*, and why they are one word

What you've built

You can now deal with an institution rather than a person — book the appointment, read what the office wants, track what it sent you, and do it on a screen. That is the half of A2 reading that is not about friends.
The register travels with the vocabulary. **La administración** does not write *le pedimos*; it writes *se requiere*. When one of these words appears, expect the impersonal grammar that comes with it.

Before you move on

The meeting? (**La reunión**.) The screen? (**La pantalla**.) Officialdom? (**La administración**.) Which of the three has no recoverable origin? (***Pantalla***.)

442.7 (una cita con la administración) — read it, then do it yourself

Say *la administración* and *concertar*. The page you are about to read uses both, and it never once says *you*.

Your turn

Read it: the page once straight through, then answer
en la web de la administración

> Para **concertar** una cita, seleccione el trámite en la **pantalla** de inicio. Se requiere documentación en vigor. La cita se confirmará por correo. Si no puede acudir, se ruega anular con 24 horas de antelación.

Say these aloud:

- what you have to do first
- what you must bring
- what to do if you cannot come

Why it's said this way

Count the people in that notice. There are none.
Se requiere, **se confirmará**, **se ruega** — three verbs, no subject. The one exception is *seleccione*, an instruction aimed at whoever is reading, and even that is the formal form that avoids saying *tú*.
This is the same **se** you met on *la junta se celebra* and *la oficina ha sido trasladada*: it takes the person out and leaves the obligation attached to the procedure. A public-sector page is written this way from top to bottom, and once you expect it, the sentences get shorter — *se requiere documentación* means no more than *bring your papers*.
The tracking page for your **envío** and the notice about the **reunión** use exactly the same grammar. One register, three settings.

Before you move on

Now your turn, out loud. Five sentences: say you want to make an appointment, say what the screen asked for, say what papers you took, say the meeting was moved, and say your parcel has not come.
Write it: the same five sentences
Then say the first one again the way the website would say it, with no *you* in it at all.

Chapter 443

El Animo

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say what is going on inside me: what hurts, what I care about, what I am struggling to do, and what I wish I had not done.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

443.1 doler — the pain does the acting

> Say **el dolor** and **la cabeza**. You have the noun for pain and the part of you that has it. Name the verb.

You'll want to know: doler

doler — to hurt, to ache.

Me duele la cabeza — I have a headache. *Me duelen los pies* — my feet hurt. *¿Le duele aquí?* — does it hurt here? That last one is what a doctor says, and it is worth having ready before you need it.

Grammar Lens: it is built like gustar

Take *me duele la cabeza* and find the subject. It is not *me*. **La cabeza** is the subject; the head is what does the hurting, and *me* is the person it happens to.
That is the same machine as **gustar**, which you have had since early on.

Spanish	what is the subject
me gusta el pan	**el pan**
me duele la cabeza	**la cabeza**

So the verb agrees with the body part, not with you: *me duele la cabeza* but *me* ***duelen*** *los pies*. Two feet, plural verb. This is the single most common mistake English speakers make with the word, because English puts the person in charge — *I have a headache* — and Spanish does not.
Nothing new is being learned here. You already owned the pattern; this is a second verb that runs on it.

The word, taken apart — and its English cousins

Latin **dolēre**, to hurt. **el dolor** is its noun and you have had it for a long time; **doler** is the verb it was cut from.
The stem breaks under stress, exactly as *dormir* and *torcer* do: *doler*, *dolemos*, but **duele** and **duelen**. Same condition, same result — when the stress lands on the **o**, the **o** opens into **ue**.
English keeps *dolēre* in **condolence**, hurting *with* somebody, and in **doleful**.

Your turn

Say these aloud:

- *doler*
- I have a headache
- my feet hurt — and check which word the verb agreed with

Before you move on

To hurt? (**Doler**.) My feet hurt? (**Me duelen los pies**.) Which verb is it built like? (***Gustar***.)

443.2 interesar — what lies between you and a thing

Say **interesante** and **estudiar**. Say **doler**. You can call a class interesting. Now say that it interests *you*.

You'll want to know: interesar

interesar — to interest, to be of interest to somebody.

Me interesa la clase — the class interests me, I am interested in it. *No me interesa* — I am not interested, which is the ordinary way to decline an offer. **interesarse por** is to take an interest in: *se interesó por mi salud.*

You already had **interesante**. This is the verb the adjective was made from, so the only new thing is what it does in a sentence.

Grammar Lens: the same machine again

Me interesa el curso has the same shape as *me duele la cabeza.*

Spanish	the subject	the person
me duele **la cabeza**	la cabeza	me
me interesa **la clase**	la clase	me

The verb agrees with the thing, not with you — *me interesan **las clases***, plural. Once you have seen the pattern three times (*gustar*, *doler*, *interesar*) it stops being a special case and becomes what this whole family of verbs does.

English turns them the other way round and needs an adjective to do it: *I am interested.* Spanish keeps the thing in charge.

The word, taken apart — and its English cousins

Latin **inter esse** — **inter**, between, plus **esse**, to be. To *interest* somebody was for a thing **to be between** them and something else: to be involved, to be at stake.

That older sense is still in **el interés** on a loan, which is what is at stake in the deal, and in English **interested party** — not a party that is curious, but one with something at stake.

So *interesante* does not mean "makes me curious" at root. It means **standing between**, involved, concerned. The curiosity sense came later and took over.

Your turn

Say these aloud:

- *interesar*
- the class interests me and I want to study it
- *no me interesa*, and why it is a polite refusal

Before you move on

To interest? (**Interesar**.) What do the two Latin pieces mean? (**Between** and **to be**.) Which verbs is it built like? (***Gustar*** and ***doler***.)

443.3 acercarse — making it near

Say **cerca** and **lejos**. Say **interesar**. You can say where something is. Name the act of closing the gap.

You'll want to know: acercarse

acercar — to bring something nearer. **acercarse** — to come closer yourself.

Acércate — come here, come closer. *Me acerqué a la ventana* — I went over to the window. *Se acerca la fecha* — the date is getting close, which a Spanish speaker says about an exam or a deadline the way English says *it's coming up*.

It takes **a**: *acercarse* ***a*** *algo*.

The word, taken apart — and its English cousins

a- plus **cerca** plus the **-ar** ending, and every piece is one you own.

piece	what it does
a-	towards
cerc-	**cerca**, near
-ar	makes it a verb

That is Spanish building a verb out of a preposition, and it does it constantly: *acercar* from *cerca*, *alejar* from *lejos*, *aclarar* from *claro*. The pattern is **a-** plus a word plus **-ar**, meaning *to make it that*. Underneath, *cerca* is Latin **circā**, around — the same root English has

in **circa** on a date and in **circle**. Something near you was something *round about* you.

Why it's said this way

The reflexive is doing real work. **Acercar** something is an act with an object; **acercarse** turns it back on the subject.
But notice the third example above. *Se acerca la fecha* — the date does not move, and nobody moves it. Spanish still uses the reflexive, because what it marks is not *doing it to yourself* so much as **nobody else did it**: the change happened, and the sentence declines to name an agent.
That is the same reflexive you met on *equivocarse*, where the mistake befalls the person. One form, one job: take the doer out.

Your turn

Say these aloud:

- *acercarse*
- come closer, you are too far away
- the date is getting close

Before you move on

To come closer? (**Acercarse**.) Which word is inside it? (***Cerca***.) Which preposition follows? (***A***.)

443.4 concentrarse — gathered to a point

Say **el centro** and **el examen**. Say **acercarse**. The exam is getting close. Name what you have to do with your attention.

You'll want to know: concentrarse

concentrarse — to concentrate.

No me puedo concentrar — I cannot concentrate. *Concéntrate en el examen* — concentrate on the exam. **la concentración** is both the mental state and, in a notice, a gathering of people in a square.

It takes **en**: *concentrarse **en** algo.*

The word, taken apart — and its English cousins

con- together, plus **centr-** from **el centro**, plus the verb ending. To concentrate is **to bring together to a centre**, and the reflexive says you are doing it to yourself.

piece	**what it does**
con-	together
centr-	**el centro**
-arse	to yourself

That is the third verb in this chapter built by putting a prefix and an ending on a word you already owned — *acercarse* on *cerca*, *concentrarse* on *centro*. Look for the bare word inside before you look anything up.

Centro is Latin *centrum*, from Greek *kentron*, the sharp point of a goad, and so the fixed point of a pair of compasses.

Why it's said this way

El centro is not originally about the middle of a town.

Greek **kéntron** was **a goad** — the spike used to drive cattle — and then the fixed point of a pair of compasses, the spike you press into the paper so the other leg can swing round it. Latin took it as *centrum*, and the geometry sense is what survived.

So a centre is, at bottom, **the point that does not move while everything else turns around it**. That is a better picture than "the middle", and it explains *concentrarse*: you are pulling a scattered mind in towards the one fixed point.

English has the same spike in **eccentric** — *ek-*, out of, plus the centre. An eccentric wheel is one whose axle is off the fixed point, and an eccentric person is one whose life turns around a different one.

Your turn

Say these aloud:

- *concentrarse*
- the exam is getting close and I cannot concentrate

- what *kéntron* meant before it meant a centre

Before you move on

To concentrate? (**Concentrarse**.) Which preposition follows it? (***En***.) What was a *kéntron*? (**A goad, then the fixed point of a pair of compasses**.)

443.5 arrepentirse — the verb that is not made of *sentir*

Say **perdón**. Say **equivocarse**. You can admit a mistake and you can ask to be excused for it. Name the feeling that comes in between.

You'll want to know: arrepentirse

arrepentirse — to regret, to be sorry for having done something.

Me arrepiento de haberlo dicho — I regret having said it. *No te vas a arrepentir* — you will not regret it, which is what somebody says to talk you into something.

It takes **de**, and it is always reflexive. There is no plain *arrepentir*.

Equivocarse is the error; **arrepentirse** is what you feel about it afterwards.

The word, taken apart — and its English cousins

Here is the trap, and this chapter has earned it.
arrepentirse looks like **a-** plus **re-** plus **sentir**, with the **s** worn away. It is not. There is no *sentir* in it at all.
The middle is Latin **paenitēre**, to cause regret — the verb behind English **penitent**, **penance** and **repent**. Spanish took *repentirse* and put its familiar **a-** on the front.

what it looks like	what it is
a- + re- + sentir	a- + re- + **paenitēre**

And the trap is doubled, because **it conjugates like *sentir* too**: *me arrepiento*, *te arrepientes*, *se arrepiente*, *nos arrepentimos*. That is the **e→ie** break, exactly as *siento*, *sientes*, *siente*, *sentimos*.
So the form misleads and the behaviour agrees with the form. Both are

accidents of shape: any verb with a stressed **e** in its stem breaks that way, related or not.

Why it's said this way

This is the strongest case yet for the test you have been building. **reír** wore a prefix it never had, and the test caught it: take *re-* off and nothing stands. **arrepentirse** is harder, because if you take *a-* and *re-* off you get *pentir*, which stands on nothing — and the fact that it looks like *sentir* is the only reason you would have thought otherwise. What that means in practice: a resemblance is not evidence. *Concentrarse* really does contain *centro*, and you can check it because *centro* is a word. *Sentir* is a word too, and *arrepentirse* still does not contain it.
The honest position is the one worth keeping — take the word apart where the pieces are real, and when they are not, learn the word and let the history be what it is.

Your turn

Say these aloud:

- *arrepentirse*
- I regret having said it
- why the *-pentir-* is not *sentir*

Before you move on

To regret? (**Arrepentirse**.) Which preposition follows it? (***De***.) Is *sentir* inside it? (**No — *paenitēre* is**.)

443.6 (doler, interesar, acercarse, concentrarse, arrepentirse) — from cold

From memory alone, say all five: *to hurt*, *to interest*, *to come closer*, *to concentrate*, *to regret*.

Grammar Lens: five new words, no new grammar

This chapter taught nothing you did not already have. It handed five words to two machines you owned.

the machine	where you got it	the new words
the thing is the subject	*gustar*	doler, interesar
the reflexive	*equivocarse*	acercarse, concentrarse, arrepentirse

Me duele la cabeza — the head hurts, and the verb agrees with the head. *Me interesan las clases* — plural thing, plural verb. If you can catch yourself about to say *yo duelo*, the machine is working.
That is the whole point of building on what came before, and it is worth noticing when it happens: the fifth verb on a pattern costs almost nothing, where the first one cost a lesson.

Your turn

Say these aloud:

- my head hurts and I cannot concentrate
- I regret having said it
- *me duele* and *me duelen*, and what decides between them

What you've built

You can now say what is going on inside you — what hurts, what you care about, what you are struggling to do and what you wish you had not done. A reading paper asks that constantly, because most short texts about people are about exactly this.
You also have the sharpest case yet of a word that misleads. **Arrepentirse** looks like it is made of *sentir* and behaves like it, and is not related to it at all. A resemblance is not evidence, and the check is whether the piece you think you see is a word in its own right that leaves something standing behind it.

Before you move on

My feet hurt? (**Me duelen los pies**.) To come closer? (**Acercarse**.) To concentrate on something? (**Concentrarse en algo**.)

443.7 (un mensaje antes del examen) — read it, then do it yourself

Say *concentrarse* and *acercarse*. Both are in the message you are about to read, and one of them is about a date rather than a person.

Your turn

Read it: both, then answer

1 — de Marta

Se **acerca** el examen y no me puedo **concentrar** en nada. Llevo dos días con dolor de cabeza: me **duele** por la mañana y se me pasa por la tarde. ¿Tú cómo lo llevas?

2 — la respuesta

Yo igual. Me **arrepiento** de no haber empezado en septiembre. Pero me **interesa** de verdad la asignatura, así que algo se me quedará. Nos vemos el jueves y lo repasamos juntos.

Say these aloud:

- what is making Marta anxious
- when her headache comes and when it goes
- what the second writer regrets, and what she says in spite of it

Why it's said this way

Four of the five verbs in those messages put the writer in the object, not the subject. **Se acerca** el examen, **me duele** la cabeza, **me interesa** la asignatura, **me arrepiento** — in every one, something

else is doing the acting and the writer is on the receiving end.
That is not a coincidence of these two messages. It is how Spanish talks about inner states by default: the feeling arrives, the date approaches, the subject interests. English reaches for *I am* plus an adjective — *I am worried*, *I am interested* — and puts the person in charge of a state they did not choose.
Neither is more accurate. But if you translate your English shape word for word you will produce *estoy interesado en* where a Spanish speaker says *me interesa*, and the sentence will be understood and will not sound like theirs.

Before you move on

Now your turn, out loud. Five sentences about a week before something difficult: say the date is getting close, say what hurts, say you cannot concentrate, say what you regret, and say what still interests you.
Write it: the same five sentences
Then check yourself: did you write *me interesa*, or did you reach for *estoy interesado*?

Chapter 444

La Casa Por Fuera

Modes: **voice** (6) **eyes** (1) **Hands-free start:** the first 6 of 7 lessons.

> ***By the end of this chapter:*** I can report what is wrong with a home and say what I did about it: the heating, the material, the garden, the thing I covered, the trolley I took to the shop.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

444.1 la calefacción — heat, made

> Say **el calor** and **el frío**. It is January and the flat is cold. Name the thing that is not working.

You'll want to know: la calefacción

la calefacción — the heating.

No funciona la calefacción — the heating is not working, which is the sentence a tenant needs first. *Calefacción central* — central heating. *Poner la calefacción* — to put the heating on.

The word, taken apart — and its English cousins

Two pieces, and you own both. The word is borrowed from Latin *calefactiō*, "a heating" (EtymDB 2.1).

piece	where you have it
cale-	*calor*, heat
-facción	*facere*, to make

Heat-making. The second half is the same *facere* that sits under *hacer* and under **la factura**, which you met as *a making*. A *factura* is a making of accounts; a *calefacción* is a making of heat.
English has the pieces too, in **calorie** — a unit of heat — and in the **-faction** of *satisfaction* and *liquefaction*.

Why it's said this way

Notice that Spanish names the *process*, not the *device*.
English **heating** can mean the radiators, the boiler, or the service. Spanish **calefacción** is the making-of-heat, and the hardware has its own words — *el radiador*, *la caldera*. That is why the bill says *calefacción* and the plumber talks about *la caldera*: the two are not the same noun.
So *la factura de la calefacción* is the bill for heat-made, not the bill for a machine. Both words on that line come from *facere*, one making heat and one making the account of it.

Your turn

Say these aloud:

- *la calefacción*
- the heating is not working and I am cold
- what the two pieces of the word mean

Before you move on

The heating? (**La calefacción**.) What does the second half mean? (**To make**.) Which other word you have is built on it? (***La factura***.)

444.2 la madera — the stuff a tree is for

Say **la mesa**, **la silla** and **el árbol**. Two of those are made of the third. Name what they are made of.

You'll want to know: la madera

la madera — wood, as a material.

Una mesa de madera — a wooden table. Spanish says **de madera**, of wood, where English turns the noun into an adjective.

The tree is *el árbol*, the wood you build with is *la madera*, and a wood you walk in is *el bosque* — three words where English stretches one.

The word, taken apart — and its English cousins

madera is Latin **māteria**, and *māteria* meant **timber** before it meant anything else.

Lewis & Short sets it beside **māter**, mother, and one explanation follows from that: a tree's *māteria* was its trunk — the part that puts out the branches, the mothering stock. Only later did Roman philosophers borrow the word for *the stuff a thing is made of* in general.

So the abstract sense came **second**. Matter was named after wood, not the other way round.

Why it's said this way

That one Latin word reached Spanish **twice**, and this is the third pair of its kind you have met.

the word	the road it took
la madera	carried in every mouth, worn down
la materia	lifted off the page by scholars

Māteria spoken for a thousand years became **madera** and kept the concrete sense: the planks. *Māteria* read off the page centuries later came back as **la materia** and kept the abstract one: matter, subject-matter, a school subject.

You have seen the shape before — **nadar** beside **la natación**, **hacer** beside **la factura**, and now **madera** beside **materia**. The worn twin is the everyday one; the learned twin is the one on the timetable, the

bill or the syllabus. When two Spanish words look loosely alike and one is plainer than the other, this is the first thing to suspect.

Your turn

Say these aloud:

- *la madera*
- a wooden table and a wooden chair
- why *madera* and *materia* are the same word

Before you move on

Wood? (**La madera**.) A wooden table? (**Una mesa de madera**.) What did *māteria* mean first? (**Timber**.)

444.3 plantar — to set in the ground

Say **la planta**, **el jardín** and **la tierra**. You have the thing, the place and the ground. Name the act.

You'll want to know: plantar

plantar — to plant.

Plantamos un árbol en el jardín — we planted a tree in the garden. *Plantar cara* is to stand up to somebody, and *dejar plantado* is to stand somebody up — to leave them planted where they were waiting.

The word, taken apart — and its English cousins

plantar is Latin *plantare*, "to plant", from *planta*, the word you met as **la planta**, which has three meanings in Spanish.

the sense	what it names
la planta del pie	the **sole** of the foot
una planta	a growing plant
la primera planta	a storey of a building

Latin **planta** already meant both a cutting set in the ground and the sole of the foot (Lewis & Short), and nobody can say for certain

whether that was one word or two. One old explanation joins them: a cutting was pressed into the soil with the sole. Treat that as a guess. How *planta* reached the storey of a building is not settled either.

Why it's said this way

This is worth holding next to **madera**.
Madera has a story you can follow: a concrete thing (timber) whose name was borrowed upward into an abstraction (matter). *Planta* is the other kind of word: three senses that look unrelated, and the history that would join them is not certain.
Where the history is open, learn the senses side by side and let the story stay a guess. A family you can recover is a gift; a family you invent is a false friend.

Your turn

Say these aloud:

- *plantar*
- we planted a tree in the garden
- the three meanings of *planta*

Before you move on

To plant? (**Plantar**.) What did Latin *planta* mean? (**A cutting, and the sole of the foot**.) What is *la primera planta*? (**The first floor**.)

444.4 cubrir — and the lid that comes off again

> Say **abrir** and **cerrado**. Say **plantar**. You have put a cutting in the ground and the frost is coming. Name what you do to it.

You'll want to know: cubrir

cubrir — to cover.

Cubre la olla — cover the pot. *El seguro no lo cubre* — the insurance does not cover it, which is the sense you will meet on paper rather than in a

kitchen. **el cubierto** is a place setting at table, the knife and fork laid out — what *covers* your place.

Grammar Lens: a third irregular participle

abrir gave you **abierto** and **cerrar** gave you **cerrado**. *Cubrir* follows *abrir*.

verb	**participle**
cerrar	cerrado — regular
abrir	**abierto** — irregular
cubrir	**cubierto** — irregular

Abrir and *cubrir* both end in **-brir**, and both break the same way. That is not a coincidence you have to memorise separately: the handful of irregular participles come in small families, and finding one member gives you the others. *Descubrir* makes **descubierto**, because it is *cubrir* with something on the front.

The word, taken apart — and its English cousins

Latin **cooperīre** — **co-** together, plus **operīre**, to shut or cover over. *Operīre* is itself **ob-** plus a root meaning *to close*, and its opposite, **aperīre**, gave you **abrir**. So *cubrir* and *abrir* are not merely alike in shape; they are two halves of one Latin pair.

And now the prefix that earns its keep:

word	**what des- does**
cubrir	put the cover on
descubrir	**take it off — to discover**

Descansar taught you *des-* as an undoing, and this is the same job done plainly: to *discover* something is to **uncover** it. Compare *disfrutar*, where the prefix did not reverse at all. Same shape, two behaviours, and only the meaning of the whole word tells you which you have.

Your turn

Say these aloud:

- *cubrir*, then *cubierto*
- cover the pot, the frost is coming

- *descubrir*, and what *des-* is doing to it

Before you move on

To cover? (**Cubrir**.) The participle? (**Cubierto** — irregular, like *abierto*.) To discover? (**Descubrir** — to un-cover.)

444.5 el carrito — a small cart, and a very large ending

Say **el supermercado** and **el coche**. Say **cubrir**. You are at the door of the shop with a week's shopping to do. Name what you take.

You'll want to know: el carrito

el carrito — the trolley, the cart.

El carrito de la compra — the shopping trolley. *Un carrito de bebé* — a pushchair. On a website, *añadir al carrito* is **add to basket**, and that is where you will meet the word most often.

The word, taken apart — and its English cousins

carro plus **-ito**.
El carro is a cart, from Latin **carrus**, a wagon — a word Latin itself took from Gaulish, and the same one behind English **car**, **carry** and **cargo**. Add **-ito** and you have a small one.

Grammar Lens: the ending that does more than shrink

-ito and **-ita** attach to almost any noun, and size is only its first job.

word	with -ito	what it adds
un momento	un moment**ito**	*a moment* → *one moment, please*
ahora	ahor**ita**	now → right now, or soon

Momentito is not a shorter moment. The ending softens the request, the way English softens one by adding *a little* or *if you would*. Spanish speakers use it constantly for that, not for measuring.

Two things to watch. **Spelling follows sound**: *poco* becomes *poquito*, because *c* before *i* would go soft and the word must keep its **k**. And the ending has a cousin, **-illo**, which shrinks less kindly — *un librillo* is faintly dismissive where *un librito* is affectionate.
So when a Spanish speaker adds *-ito* to something that is not small, they are usually being warm rather than inaccurate.

Your turn

Say these aloud:

- *el carrito*
- add it to the basket
- *un momentito*, and what the ending is doing there

Before you move on

The trolley? (**El carrito**.) What does **-ito** add besides size? (**Warmth, or softening**.) Why is it *poquito* and not *pocito*? (**To keep the hard k**.)

444.6 (calefacción, madera, plantar, cubrir, carrito) — from cold

From memory alone, say all five: *the heating*, *wood*, *to plant*, *to cover*, *the trolley*.

Grammar Lens: three things a word can do on its way into Spanish

Every word in this chapter came from Latin, and no two arrived the same way.

word	what happened to it
madera	arrived **twice** — and *materia* is the other one
planta	arrived once and **spread** into three meanings
carrito	arrived, then Spanish **built on it**

Madera and *materia* are one word on two roads, the worn twin and the learned twin. *Planta* is one road and one word that kept being reused — sole of the foot, then the cutting pressed in by it, then the floor plan you stand on. *Carrito* is neither: *carro* came in, and the **-ito** on the end is Spanish's own work, added centuries after Latin had finished. Those three cover most of what you will meet. A word arrives twice, or it arrives once and stretches, or it arrives and the language grows something new on it.

Your turn

Say these aloud:

- the heating is not working
- cover the pot before the frost
- a wooden table, and why *madera* and *materia* are one word

What you've built

You can now report what is wrong with a home and say what you did about it — the heating, the material, the garden, the thing you covered, the trolley you took to the shop. Between this and the contract chapter you can hold up most of a tenancy in Spanish.
You also have a third irregular participle. **Cubierto** joins **abierto**, and they break together because they rhyme: the irregulars come in small families, so finding one gives you the rest.

Before you move on

The participle of *cubrir*? (**Cubierto**.) Wood? (**La madera**.) The heating? (**La calefacción**.) Which of those three is a doublet? (***Madera***, with *materia*.)

444.7 (un aviso del casero) — read it, then do it yourself

Say *la calefacción* and *cubrir*. The notice you are about to read uses one of them, and the reply uses the other.

Your turn

Read both, then answer.

1 — un aviso en el portal

Se informa a los vecinos de que la **calefacción** quedará apagada el martes por trabajos en la caldera. Los suelos de **madera** del portal se barnizarán el mismo día. Rogamos no pisar.

2 — un mensaje al casero

Buenos días. La ventana del salón no cierra bien y entra frío. También he **plantado** las macetas que dejó en la terraza, pero habrá que **cubrirlas** si hiela. ¿Puede pasar el técnico esta semana?

Say these aloud:

- what will be off on Tuesday, and why
- what the residents are asked not to do
- the two things the tenant reports, and the one request

Why it's said this way

Look at **cubrirlas** in the second message.
The pronoun is stuck on the **end** of the infinitive: *cubrir* plus *las*, the flowerpots. Spanish attaches the object to an infinitive rather than putting it in front, and does the same to a command — *cúbrelas* — and to a gerund. English never does this, which is why *habrá que cubrirlas* looks like one long word and is two.
The first notice will not do that, because it has no people in it: *se informa*, *se barnizarán*, *rogamos*. It is the impersonal register you met on the council's page, and the contrast between the two texts is the whole point of reading them together. A neighbour writes with

pronouns; a notice writes without.
Even the **-ito** ending belongs to the message and not the notice.
Nobody puts *un momentito* on a formal sign.

Before you move on

Now your turn, out loud and then in writing. Five sentences to a landlord: say the heating is not working, say which room, say what you planted, say you had to cover it, and ask for someone to come. Then check yourself: did you write **cubrirlas** as one word?

Chapter 445

El Puesto

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read a job advert and say what the work asks of me: what it demands, what I am answerable for, what I would be teaching, and when the person I am replacing leaves.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

445.1 jubilarse — the shout at the end of the work

> Say **jubilado** and **el trabajo**. You have the word for the person who has stopped. Name the act of stopping.

You'll want to know: jubilarse

jubilarse — to retire.

Se jubila en marzo — he retires in March. *Me jubilé hace dos años* — I retired two years ago. **la jubilación** is both the act and the pension.

It is reflexive: you retire *yourself*. *Jubilar* without the pronoun is what an employer does to somebody, and it can sound abrupt.

The word, taken apart — and its English cousins

Latin **iubilāre** — **to shout, to whoop for joy**. It was a countryman's word for the noise you make across a field, not a word about work at all.

The connection runs through the **jubilee**, a Hebrew word that Latin spelled to look like *iubilare*: in the older calendar a jubilee year cancelled debts and released people from service, and *jubilar* came to mean *to release from service*. The shout came first and the pension came after.
So **el jubilado** carries the shout in its spelling, but its meaning came through the jubilee year.
English keeps the shout in **jubilant** and **jubilation**, and has no verb for the Spanish sense at all.

Your turn

Say these aloud:

- *jubilarse*
- she retires in March after forty years of work
- what *iubilāre* meant

Before you move on

To retire? (**Jubilarse**.) Is it reflexive? (**Yes**.) What did the Latin verb mean? (**To shout for joy**.)

445.2 la responsabilidad — answerable

Say **el contrato** and **jubilarse**. A contract lists what a job pays and what it asks. Name what it asks.

You'll want to know: la responsabilidad

la responsabilidad — responsibility.

Es una responsabilidad grande — it is a big responsibility. *Bajo mi responsabilidad* — on my own responsibility. The adjective is **responsable**, which is both *responsible* and, in an advert, *the person in charge*: *el responsable de compras*.

Six syllables, stress on the last: *res-pon-sa-bi-li-DAD*.

The word, taken apart — and its English cousins

re- back, plus **spondēre**, to promise, plus the ending **-bilidad** that turns an adjective into a quality.
To be *responsable* is to be **able to promise back** — to answer for what you did. That is the same *spondēre* you already have in a place you would never look for it:

word	**the promise in it**
el esposo	the one who was **promised**
responder	to promise **back**, to answer
la responsabilidad	being answerable

A spouse and a responsibility are the same verb. Latin *spondēre* was the formal word for pledging — a betrothal was a *sponsalia* — and English keeps it in **sponsor**, **respond** and **despondent**, which is what you are when the promise has gone out of you.

Why it's said this way

The long ending is worth a moment, because it is a machine.
-idad (and **-bilidad** after *-ble*) turns an adjective into the abstract noun of its quality, and it is completely regular:

adjective	**quality**
responsable	responsabilidad
posible	posibilidad
fácil	facilidad

English does the same with *-ity*, and the two endings are the same Latin *-itātem*, which is why they line up so neatly. If you know a Spanish adjective in **-ble**, you can usually build its noun without being taught it.
Note the stress: every one of these nouns ends stressed, on the **-dad**.

Your turn

Say these aloud:

- *la responsabilidad*
- it is a big responsibility and he retires in March
- why *esposo* and *responsabilidad* share a root

Before you move on

Responsibility? (**La responsabilidad**.) What does *spondēre* mean? (**To promise**.) Which syllable is stressed? (**The last**.)

445.3 exigente — driving it out of you

Say **difícil** and **fácil**. Say **la responsabilidad**. A job can be hard without anybody being hard on you. Name the word for a boss who is.

You'll want to know: exigente

exigente — demanding, exacting.

Un jefe exigente — a demanding boss. *Es muy exigente consigo mismo* — he is very hard on himself. The verb is **exigir**, to demand: *exigen dos años de experiencia* — they require two years of experience, which is the line you meet in a job advert.

It does not change for gender: *un jefe exigente*, *una jefa exigente*.

The word, taken apart — and its English cousins

ex- out, plus **-igente** from Latin **agere**, to drive.
Exigere was **to drive something out** — originally to drive out a payment, to collect what was owed. An *exigente* boss drives the work out of you, and the picture is the same one the Roman tax collector used.
Agere is one of the great Latin roots, and the words it gave English all keep some sense of driving something forward:

word	what is driven
agenda	the things to be driven through
actor	the one who drives the action
agile	easily driven

Why it's said this way

Difícil and **exigente** are not the same complaint, and a job advert uses them differently.
Difícil is a property of the task: the work is hard. *Exigente* is a

property of whoever is asking: the standard is high. A puzzle is *difícil*; a person is *exigente*. You can have an easy job with a demanding manager, and Spanish requires you to pick which you mean.
The ending **-ente** is doing that work. It comes from a Latin present participle and marks **the one doing the verb** — *exigente* is the one demanding, the way *estudiante* is the one studying and *cliente* is the one leaning on you for service.
So when you meet an unfamiliar word in **-ante** or **-ente**, look for a verb inside it and read the whole as *the one who does that*.

Your turn

Say these aloud:

- *exigente*
- an easy job with a demanding boss
- what the two pieces of *exigir* mean

Before you move on

Demanding? (**Exigente**.) The verb? (**Exigir**.) What does *agere* mean? (**To drive**.)

445.4 enseñar — to put a sign into somebody

Say **aprender** and **la clase**. Say **exigente**. You have the half of the class that receives. Name the half that gives.

You'll want to know: enseñar

enseñar — to teach, and equally **to show**.

Enseña matemáticas — she teaches maths. *¿Me enseñas la foto?* — will you show me the photo? *Me enseñó a conducir* — he taught me to drive, with **a** before the second verb.

One word for both jobs, where English keeps *teach* and *show* apart.

The word, taken apart — and its English cousins

en- in, plus **señ-** from Latin **signum**, a sign or mark.
To *enseñar* is **to mark something into somebody** — to put a sign in them. The Latin was *insignāre*, and once you see it, *teach* and *show* stop being two meanings. Both are **putting a mark where somebody can see it**: on a wall, or in a head.

word	**the sign in it**
la señal	the sign itself
enseñar	to put the sign in
diseñar	to mark it **out** — to design

English took the same *signum* through French into **ensign**, a banner, and into **design**, which is *de-* plus the mark.

Why it's said this way

That one verb covering two English ones is not vagueness; it is a different cut of the same territory, and it goes the other way too. Spanish splits what English joins all the time — *ser* and *estar* for one *to be*, *saber* and *conocer* for one *to know*. Here it joins what English splits. Neither language is being imprecise; they have drawn the lines in different places, and the only reliable way through is to learn where the line is rather than to translate across it.
A practical consequence: if you want *show* specifically and fear being misheard as *teach*, Spanish has **mostrar** — but in speech *enseñar* is far commoner for both, and the context does the work.

Your turn

Say these aloud:

- *enseñar*
- she teaches maths, and I am learning
- will you show me the photo

Before you move on

To teach? (**Enseñar**.) And to show? (**Enseñar** — the same word.) What does *signum* mean? (**A sign, a mark**.)

445.5 repetir — seeking it again

Say **otra vez**. Say **enseñar**. You did not catch what the teacher said. Name what you ask for.

You'll want to know: repetir

repetir — to repeat.

¿Puede repetir, por favor? — could you repeat that, please. This is the single most useful sentence in a language you are still learning, and it is worth saying aloud until it arrives without thinking.

It breaks its stem: **repito**, **repites**, **repite**, but *repetimos* — the **e→i** change, the one *pedir* makes too.

The word, taken apart — and its English cousins

re- again, plus **petere**, to seek or to ask for.
And you have met *petere* before, under a word from a completely different part of life. **El pedido** — the order you place with a shop — is built on *pedir*, and *pedir* is *petere*.

word	**the seeking in it**
pedir, el pedido	to ask for a thing
repetir	to seek it **again**

That is why the two verbs break their stems the same way: *pido*, *pides*, *pide*; *repito*, *repites*, *repite*. They are not merely similar. They are one Latin verb, with and without a prefix, and the shared conjugation is the evidence rather than a coincidence you have to remember.

Why it's said this way

Notice what this chapter has quietly done. **Responsabilidad** shares a root with **el esposo**, a word from family; **repetir** shares one with **el pedido**, a word from shopping. Neither link is visible in modern Spanish, and neither is decoration — both times the shared root predicts something usable: the promise inside *responsable*, and the conjugation of *repetir*.
That is the return on etymology. Not that the stories are charming, but that a root you own tells you how an unfamiliar word will behave before anybody explains it.

Your turn

Say these aloud:

- *¿Puede repetir, por favor?*
- the teacher repeated it and then I understood
- *pido* and *repito*, and why they change the same way

Before you move on

To repeat? (**Repetir**.) The *yo* form? (**Repito**.) Which word you already had shares its root? (***El pedido***, through *pedir*.)

445.6 (jubilarse, responsabilidad, exigente, enseñar, repetir) — from cold

From memory alone, say all five: *to retire*, *responsibility*, *demanding*, *to teach*, *to repeat*.

Grammar Lens: a root you own predicts how a new word behaves

Two of these words turned out to be built on roots you had already, from somewhere else entirely.

new word	the word you already had	what the shared root buys
responsabilidad	**el esposo**	the promise inside *responsable*
repetir	**el pedido**	the **e→i** stem change

Repetir is the sharper of the two. *Pedir* changes *pido*, *pides*, *pide*; *repetir* changes *repito*, *repites*, *repite*. Nobody has to tell you that, because they are one Latin verb with a prefix on one of them. That is the return on etymology here — not that the stories are pleasant, but that a root you own tells you how an unfamiliar word will behave before anybody explains it.

Your turn

Say these aloud:

- could you repeat that, please
- she teaches maths and she is very demanding
- he retires in March

What you've built

You can now read a job advert and say what the work asks of you — what it demands, what you are answerable for, what you would be teaching or shown, and when the person you are replacing is leaving. You also have two endings that keep paying. **-idad** turns an adjective into its quality and is regular, so *posible* gives *posibilidad*. And **-ente** or **-ante** marks *the one doing the verb*, so an unfamiliar word in that shape has a verb inside it worth looking for.

Before you move on

Responsibility? (**La responsabilidad**.) To teach, and to show? (**Enseñar**, for both.) To retire? (**Jubilarse**.)

445.7 (una oferta y una despedida) — read it, then do it yourself

Say *la responsabilidad* and *jubilarse*. The two texts below are about the same desk: one person is leaving it and somebody else is wanted for it.

Your turn

Read it: both, then answer

1 — oferta de empleo

Se busca persona **responsable** para el turno de tarde. Se **exige** experiencia previa y se valorará saber **enseñar** a personal nuevo. Contrato fijo. Interesados, enviar currículum antes del día 30.

2 — una nota en el tablón

> Después de treinta y un años, me **jubilo** el viernes. Ha sido un placer. Dejo el turno en buenas manos. Os espero a todos a las seis en el bar de enfrente.

Say these aloud:

- what the job requires, and what it merely prefers
- how long the second person has worked there
- which of the two texts has a person in it

Why it's said this way

The advert separates two things English often blurs.
Se exige experiencia — it is *required*, and without it you are not eligible. **Se valorará** saber enseñar — it will be *valued*, a point in your favour and nothing more. A reader who treats those as the same sentence either rules themselves out for no reason or applies for something they cannot do.
That distinction is the single most useful thing on the page, and it is carried entirely by the verb.
Notice too that the advert has **no people**: *se busca*, *se exige*, *se valorará*, and even *interesados* is a plural adjective standing in for a noun. The leaving note is the opposite — *me jubilo*, *dejo*, *os espero*, first person throughout. One desk, two registers, and you can now read both.

Before you move on

Now your turn, out loud. Five sentences applying for that job: say you are responsible, say you have the experience they require, say you have taught new staff before, ask them to repeat the closing date, and say you are sorry the other person is retiring.
Write it: the same five sentences
Then check yourself: did you keep **se exige** and **se valorará** apart?

Chapter 446

Mirar Y Moverse

Modes: **voice** (4) **eyes** (3) **Hands-free start:** the first of 7 lessons.

> ***By the end of this chapter:*** I can arrange to go somewhere with somebody and talk about what we watched, keeping ver apart from mirar and mover apart from trasladar.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

446.1 mirar — pointing the eyes on purpose

> Say **mira**, the little word that opens a sentence. Say **ver** and **el ojo**. *Mira* is an order from a verb you have never been given. Name it.

You'll want to know: mirar

mirar — "to look", "to look at", "to watch".

Mírame — "look at me". *Estaba mirando por la ventana* — I was looking out of the window. *Mirar la tele* is to watch television, though *ver la tele* is commoner in Spain.

mira and **mire** — the forms you already use to mean *look…*, *listen…* — are this verb told to somebody, nothing more. You have been giving an order for chapters without knowing which verb it came from.

Grammar Lens: ver and mirar are not interchangeable

English has this split too and hides it, because "see" and "look at" feel like one idea. They are not.

verb	what it describes
ver	the eyes **receive** — it happens to you
mirar	the eyes are **aimed** — you do it

Veo el mar desde aquí — "I can see the sea from here", whether or not I meant to. *Miro el mar* — I am looking at it, deliberately.
So *ver* belongs with *oír* (to hear) and *mirar* with *escuchar* (to listen). The test is whether you chose: if you could have not done it, the verb is *mirar*.

The word, taken apart — and its English cousins

Latin **mīrārī** meant **to wonder at, to be amazed** — not "to look" at all. The looking came from the wondering: you stare at what astonishes you, and after enough centuries the staring is all that is left. The wonder survives in the relatives:

word	the wonder in it
el milagro	a miracle — a thing wondered at
admirar	to admire — to wonder **at**
mirar	to look

English took the same root for **miracle**, **admire**, **marvel** and **mirage** — a thing that astonishes you and is not there.

Your turn

Say these aloud:

- *mirar*
- in Spanish — "I can see the sea from here, and I am looking at it"
- what *mīrārī* meant before it meant looking

Before you move on

"To look at"? (**Mirar**.) Which verb is it, when you say *mira*? (**This one, as an order**.) What did the Latin mean? (**To wonder at**.)

446.2 mover — and the phone that is named after it

Say **el móvil** and **trasladar**. Say **mirar**. Your phone is called *móvil* for a reason. Name the verb inside it.

You'll want to know: mover

mover — to move something. **moverse** — to move yourself.

¿Me ayudas a mover la mesa? — will you help me move the table? *No te muevas* — do not move. *El niño no para de moverse* — the child will not sit still.

The stem breaks under stress, like *doler* and *dormir*: **muevo**, **mueves**, **mueve**, but *movemos*.

The word, taken apart — and its English cousins

Latin **movēre**, to move. **El móvil** is *mōbilis* — **movable** — from the same verb, so a mobile phone is literally *the movable one*.

word	**the movement in it**
mover	to move it
el móvil	the movable thing
el automóvil	the **self**-moving thing

That last one is the whole of *automobile* explained: *auto-* from Greek *autós*, self, on a Latin stem. A car is a thing that moves without being pulled.

Why it's said this way

Mover and **trasladar** are not the same act, and a notice picks carefully.

Mover is physical and local: shift the table, shift your arm. *Trasladar* is institutional and from-somewhere-to-somewhere: the office was moved, the patient was transferred. You *mueves* a chair across a room;

a company *traslada* its headquarters.
Use *mover* for a thing you could push with your hands, and *trasladar* when an address changes. Getting it backwards is not a grammar mistake — it is a register mistake, and it is the kind a reader notices.

Your turn

Say these aloud:

- *mover*, then *muevo*
- will you help me move the table
- why a phone is called *el móvil*

Before you move on

To move something? (**Mover**.) The *yo* form? (**Muevo**.) What does *móvil* mean literally? (**Movable**.)

446.3 acompañar — going as the one who shares bread

Say **el compañero** and recall what it is made of. Say **mover**. Turn the companion into something you do.

You'll want to know: acompañar

acompañar — to go with somebody, to accompany.

Te acompaño — I will come with you, and also *I am here with you* at a funeral. *¿Me acompañas al médico?* — will you come with me to the doctor? *Acompañado de* — accompanied by, on a form or a menu.

It is the ordinary way to offer to come along, and it is warmer than the English *accompany*, which sounds formal.

The word, taken apart — and its English cousins

a- plus **compañ-** plus **-ar**, and the middle is the word you already took apart.
el compañero is built from Latin *com-* together plus *pānis*, bread — **the one you share bread with**. So *acompañar* is **to go along as**

that person, and a Spanish speaker offering *te acompaño* is, at root, offering to share a meal's worth of company.

word	the bread in it
el compañero	the one you share it with
acompañar	to be that person for somebody
el pan	the bread itself

That is the third verb in these chapters built the same way — **a-** plus a word you own plus **-ar**, meaning *to make it that*: *acercar* from *cerca*, *acompañar* from *compañero*.

Why it's said this way

The warmth is not decoration; it decides where the word is used. At a Spanish funeral the standard thing to say is **te acompaño en el sentimiento** — *I accompany you in the feeling.* English has no comfortable equivalent and reaches for *I'm sorry for your loss*, which places the speaker outside the grief. The Spanish places them alongside it.

That is worth knowing before you need it, because it is a fixed phrase and improvising in its place is conspicuous.

Your turn

Say these aloud:

- *acompañar*
- will you come with me to the doctor
- what the bread is doing inside the word

Before you move on

To go with somebody? (**Acompañar**.) Which word is inside it? (***Compañero***.) And what is inside that? (***Pānis***, bread.)

446.4 directo — straight through, and live

Say **recto** and **el tren**. Say **acompañar**. *Recto* is the shape of a line. Name the word for a train that does not stop.

You'll want to know: directo

directo — direct, straight through.

Un tren directo — a through train, no changes. *Un vuelo directo* — a direct flight. *En directo* — **live**, on radio or television, which is the use you will meet most.

Directo also describes a person: *es muy directo* means blunt, and in Spain it is usually a compliment.

The word, taken apart — and its English cousins

di- apart, thoroughly, plus **-recto**, which you already have.
Recto is Latin **rectus**, straightened, ruled — the participle of *regere*, to rule or guide. To *dirigere* was **to set something straight**, to aim it, and *directo* is the result of that aiming.

word	**the straightening in it**
recto	straight
directo	straightened **towards**
dirigir	to direct, to conduct

English keeps *regere* everywhere once you look: **correct** (straightened *with*), **erect** (straightened *up*), **regular** (by the rule), and **rule** itself.

Why it's said this way

En directo is the one to fix, because it is not obvious from the parts. A broadcast *en directo* is going straight from the event to you with nothing in between — no recording, no editing. English calls that **live**, naming the event; Spanish names the **path**. Once you see that, *en directo* stops needing translation: the line is straight.
The opposite is **grabado**, recorded. A Spanish television corner reading *EN DIRECTO* is telling you that what you are watching is happening now.

Your turn

Say these aloud:

- *directo*
- a direct train, no changes
- what *en directo* means on a screen

Before you move on

Direct? (**Directo**.) Live, on television? (**En directo**.) Which word you already had is inside it? (***Recto***.)

446.5 el partido — a side split off

Say **la parte**, **jugar** and **el deporte**. Two teams are a whole divided in two. Name what they are about to play.

You'll want to know: el partido

el partido — the match, the game.

El partido del domingo — Sunday's match. *¿Viste el partido?* — did you see the match? *Jugar un partido* — to play a game.

It is also **the political party**: *el partido socialista*. And *sacar partido de algo* is to make the most of something.

The word, taken apart — and its English cousins

partido is the past participle of **partir**, to divide — and *partir* is **la parte**, which you have.
So *partido* means **divided**, and everything it names is something a whole was split into.

what it names	what was divided
el partido (match)	the players, into two sides
el partido (party)	the electorate, into factions
sacar partido	the advantage, cut out of a situation

One word, no coincidence. A football match and a political party are both *a side that a whole was split into*, and English needs two unrelated words — *match*, from an old sense of *equal*, and *party*, which is the same Latin *pars* arriving through French.

Why it's said this way

Partir has a second life worth having, because it looks like a contradiction.
Partir also means **to leave, to set off** — *el tren parte a las ocho*.

How does *divide* become *depart*?
Because leaving is a division: you separate yourself from the place and the people. English does exactly the same thing and hides it in the Latin — **depart** is *de-* plus the same *partire*, and **a parting** is both a splitting and a goodbye.
So a train that **parte** is cutting itself away from the platform, and a train that is **directo** does not divide the journey at all. The two words in this chapter that describe a train describe opposite things about it.

Your turn

Say these aloud:

- *el partido*
- did you see Sunday's match
- why a political party is also *un partido*

Before you move on

The match? (**El partido**.) What does the word mean literally? (**Divided**.) What else does *partir* mean? (**To leave, to set off**.)

446.6 (mirar, mover, acompañar, directo, partido) — from cold

Close the lessons before this one. Say all five: *to look at*, *to move*, *to go with*, *direct*, *the match*.

Grammar Lens: you owned four of these already

Not one of these five was learned from nothing.

new word	what you already had
mirar	*mira*, the word that opens a sentence
acompañar	*el compañero*, and the bread inside it
directo	*recto*
el partido	*la parte*

Mirar is the sharpest case. You have been saying **mira** for chapters as a way of starting a sentence, without being told it is an order from a verb. Finding the verb behind a fixed phrase you already use is one of the cheapest kinds of vocabulary there is, and it has happened three times now — *interesante* gave *interesar*, *el concierto* gave *concertar*, and *mira* gives *mirar*.
When a new word looks like something you say already, check before you learn it twice.

Your turn

Say these aloud:

- will you help me move the table
- did you see Sunday's match
- will you come with me

What you've built

You can now arrange to go somewhere with somebody and talk about what you watched. That is most of what a short message between friends is for.
You also have two distinctions a reader notices. **Ver** is the eyes receiving and **mirar** is the eyes aimed. **Mover** is a thing you could push with your hands and **trasladar** is an address changing. Both are register rather than grammar, and getting them backwards is the kind of mistake that is understood and still sounds wrong.

Before you move on

Live, on television? (**En directo**.) To look at, on purpose? (**Mirar**.) A match, and a political party? (**Un partido**, for both.)

446.7 (quedar para el partido) — read it, then do it yourself

Say *el partido* and *directo*. Both are in the message below, and one of them is not about a train.

Your turn

Read both, then answer.

1 — de Nacho

¿Vemos el **partido** en mi casa? Lo dan **en directo** a las nueve. Si quieres **te acompaño** desde la estación, que el bus de noche no pasa.

2 — la respuesta

Vale. Llego sobre las ocho y media. **Miro** los horarios y te digo, pero creo que hay un tren **directo**.

Say these aloud:

- where they are watching, and at what time
- what Nacho offers to do, and why
- what the second person is going to check

Why it's said this way

Directo appears twice and means two different things, and nothing but the noun tells you which.
En directo, about the match: nothing between the event and the screen — live. *Un tren directo*: nothing between the two stations — no changes. Both are the same picture, a straight line with nothing interrupting it, applied once to time and once to distance. Spanish did

not need two words because it named the line rather than the thing. Then look at **vemos** and **miro**. *¿Vemos el partido?* — the match arrives at their eyes, and *ver* is right. *Miro los horarios* — she is aiming her eyes at a timetable on purpose, and *mirar* is right. A Spanish speaker would not swap them, and the pair in one short exchange is the clearest test of the distinction you will get.

Before you move on

Now your turn, out loud and then in writing. Five sentences arranging an evening: say you will watch the match, say it is live, offer to go with somebody, say there is a direct train, and say you will look at the times.
Then check yourself: did you use **ver** for the match and **mirar** for the timetable?

Chapter 447

Juzgar

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can follow a clinic from the door to the results: which door when it is serious, what the doctor ordered, what somebody mentioned about it, and how to apologise for dropping the form.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

447.1 el análisis — loosened apart

> Say **la sangre**, **el médico** and **el examen**. The doctor wants to know what is in your blood. Name what he orders.

You'll want to know: el análisis

el análisis — the analysis, and in a clinic **the test**.

Un análisis de sangre — a blood test. *Me han hecho unos análisis* — they have run some tests on me. *Los resultados del análisis* — the test results.

This is the word on the form, and it is worth having before a waiting room rather than during one.

Grammar Lens: a noun that does not change

el análisis and **los análisis** are spelled identically. Only the article tells you how many.
Spanish does this to every noun ending in unstressed **-is**:

one	more than one
el análisis	**los** análisis
la crisis	**las** crisis
el paréntesis	**los** paréntesis

The reason is a rule you can use elsewhere: a word already ending in **s**, when its stress is *not* on the last syllable, takes no plural ending. The same applies to *el lunes / los lunes* and *el paraguas / los paraguas*. Contrast **el examen**, which does change — *los exámenes* — and gains a written accent when it does, because the stress must stay where it was.

The word, taken apart — and its English cousins

Greek **análysis**: **ana-** up, through, plus **lýein**, **to loosen**.
To analyse something is to **loosen it apart** — to undo the knots and see what the pieces are. That is a physical picture, and it is exactly what a blood test does to blood.
The same *lýein* is in **paralysis**, a loosening of the body's control, and in **catalyst**, which loosens a reaction. Its opposite in Greek was *synthesis*, a putting-together — which is what a Spanish lesson's last section is called.

Your turn

Say these aloud:

- *el análisis*, then *los análisis*
- the doctor has ordered a blood test
- what the two Greek pieces mean

Before you move on

A blood test? (**Un análisis de sangre**.) What is the plural? (**Los análisis** — unchanged.) What does *lýein* mean? (**To loosen**.)

447.2 comentar — minding it over, together

Say **pensar**. Say **el análisis**. Thinking is done alone. Name what you do when you think about something out loud, with somebody.

You'll want to know: comentar

comentar — to comment on, and very often no more than **to mention**.

Me comentó que se jubila — he mentioned to me that he is retiring. *¿Lo comentamos mañana?* — shall we talk it over tomorrow? *Sin comentarios* — no comment.

That middle sense is the one to take. In everyday Spanish **comentar** is much closer to *mention* or *talk over* than to the English *comment*, which sounds like a verdict. A Spanish speaker *comenta* things all day without passing judgement on any of them.

The word, taken apart — and its English cousins

Latin **commentari**, to think over: **com-** together, plus the root of **mens**, **mentem** — the **mind**.
To *comentar* is **to mind something over with somebody**. The mind is sitting inside the word, and it is the same root behind **la mente**, **mental**, and the ending **-mente** that turns a Spanish adjective into an adverb: *rápidamente* is, at root, *with a rapid mind*.

word	**the mind in it**
comentar	to turn over together
la mente	the mind itself
rápida**mente**	with a rapid mind

That last row is worth keeping. Every Spanish adverb in **-mente** is a fossil of the word for mind, agreeing in the feminine because *mens* was a feminine noun — which is why it is *rápida*mente and never *rápido*mente.

Your turn

Say these aloud:

- *comentar*
- he mentioned to me that the test results are back

- why every **-mente** adverb takes the feminine adjective

Before you move on

To mention? (**Comentar**.) What is inside the word? (***Mentem***, the mind.) Why *rápidamente* and not *rápidomente*? (***Mens* was feminine**.)

447.3 la urgencia — something pressing on you

Say **la prisa** and **el hospital**. Say **comentar**. Being in a hurry is your own business. Name the kind of hurry a hospital has a door for.

You'll want to know: la urgencia

la urgencia — urgency, an emergency.

Las urgencias, in the plural, is **the emergency department**. The sign over the door of a Spanish hospital says *URGENCIAS*, and *ir a urgencias* is to go to A&E.

The adjective is **urgente**: *es urgente* — it is urgent. On an envelope or an email subject line, *URGENTE* does the same work it does in English.

The word, taken apart — and its English cousins

Latin **urgēre**, **to press, to push hard**. An urgency is something **pressing on you**, and English says the same thing when it calls a matter *pressing*.

And you already have a second Latin word for pressing. **La prisa** is from *premere*, also to press — the root of English *press* itself.

word	**what presses**
la prisa	*premere* — you are pressed for time
la urgencia	*urgēre* — the thing presses on you

The difference is which way the pressure runs. *Tengo prisa* puts it on you: *I* am in a hurry. *Es urgente* puts it on the matter: the thing itself is pushing. You can have *prisa* about something that is not *urgente* at all, and a genuinely *urgente* matter can find you with no *prisa* whatever.

Why it's said this way

The ending is one you have met. **-encia** turns a verb into the state of doing it, the way *experiencia* did in the chapter on paperwork.

verb	**the state**
urgir	la urgencia
existir	la existencia
preferir	la preferencia

So an unfamiliar noun in **-encia** will nearly always be hiding a verb, and the noun names *the condition of that verb happening*. That is two endings now — **-ción** for the act and **-encia** for the state — and between them they cover a large share of the abstract nouns on any Spanish form.

Your turn

Say these aloud:

- *la urgencia*, then *urgente*
- we had to go to A&E
- the difference between *tengo prisa* and *es urgente*

Before you move on

Urgency? (**La urgencia**.) The sign over the hospital door? (**URGENCIAS**.) What does *urgēre* mean? (**To press**.)

447.4 torpe — from shameful to clumsy

> Say **feo**. Say **la urgencia**. *Feo* judges how a thing looks. Name the word that judges how a person moves.

You'll want to know: torpe

torpe — clumsy, awkward, and of a person's mind, slow.

Soy muy torpe con las manos — I am very clumsy with my hands. *Perdona, qué torpe* — sorry, how clumsy of me, which is what you say after knocking something over.

It does not change for gender: *un niño torpe*, *una niña torpe*. The noun is **la torpeza**, clumsiness — and also a blunder: *fue una torpeza decir eso*.

The word, taken apart — and its English cousins

Latin **turpis** meant **ugly, foul, shameful** — a heavy word, used of disgraceful conduct rather than of somebody who drops things. Spanish kept the shape and moved the meaning from **how you look** to **how you act**, and softened it on the way. *Turpis* was an accusation; *torpe* is close to an apology.

the word	what it judges
feo	how a thing **looks**
torpe	how a person **manages**

Both are from Latin words for ugliness — *feo* from *foedus*, *torpe* from *turpis* — and only one of them is still about appearance. English took *turpis* too, in **turpitude**, which kept the original severity and is now used almost nowhere.

Why it's said this way

That softening is the useful part.

Torpe is not an insult in ordinary Spanish. It is what people call themselves after a small mistake, and calling yourself *torpe* is a way of apologising without making the moment larger. Said of somebody else it is mild — closer to *butterfingers* than to any real charge.

A word whose ancestor was severe and whose descendant is gentle is worth noticing, because the direction is not guaranteed. The reverse happens too. If you learn a word from its etymology alone you will pitch it wrong about half the time, so the root tells you where a word **came from** and never how hard it lands today.

Your turn

Say these aloud:

- *torpe*
- sorry, how clumsy of me
- what *turpis* meant, and how hard *torpe* lands now

Before you move on

Clumsy? (**Torpe**.) What did *turpis* mean? (**Ugly, shameful**.) Is *torpe* an insult? (**No — it is nearly an apology**.)

447.5 (análisis, comentar, urgencia, torpe) — from cold

From memory alone, say all four: *the test*, *to mention*, *the emergency*, *clumsy*.

Grammar Lens: what a root tells you, and what it does not

Three of these four are physical acts underneath, and knowing that helps.

word	the act
análisis	loosening the knots apart
urgencia	something pressing on you
torpe	— see below

Análisis and *urgencia* behave the way their roots suggest. **Torpe** does not. *Turpis* meant **shameful**, a heavy accusation, and *torpe* is now what you call yourself after knocking a glass over — nearly an apology. That is the limit, and it is worth stating plainly: **a root tells you where a word came from and never how hard it lands today.** Meanings soften, and they harden too. Etymology is a hook for remembering and a guide to shape; it is not a guide to tone.

Your turn

Say these aloud:

- the doctor ordered a blood test
- he mentioned that it was urgent
- *el análisis* and *los análisis*, and what tells them apart

What you've built

You can now follow a clinic from the door to the results — which door to go to when it is serious, what the doctor has ordered, what somebody mentioned to you about it, and how to apologise for dropping the form.
Two endings close the set you have been collecting. **-encia** names the state of a verb happening, as **-ción** names the act. Between them they cover most of the abstract nouns on a Spanish form, and both have a verb inside worth looking for.
And one plural rule: a noun ending in unstressed **-is** does not change. *El análisis*, *los análisis*; *la crisis*, *las crisis*. Only the article moves.

Before you move on

The emergency department? (**Urgencias**.) A blood test? (**Un análisis de sangre**.) Clumsy? (**Torpe**.)

447.6 (un mensaje desde urgencias) — read it, then do it yourself

Say *urgencias* and *torpe*. One of them is where the writer is, and the other is how she explains getting there.

Your turn

Read it: both, then answer

1 — de Lucía

Estoy en **urgencias**, pero no es grave. Me caí bajando del autobús, soy una **torpe**. Me han hecho un **análisis** y una radiografía y estoy esperando.

2 — la respuesta

¿Quieres que me acerque? Me **comentó** tu hermana que hoy librabas, así que no me pilla lejos. Dime algo cuando tengas los resultados.

Say these aloud:

- where Lucía is, and why
- what has been done to her so far
- what the second person offers, and how she knew

Why it's said this way

Two things in that exchange do more work than they look like.
Pero no es grave, in the first line, before any of the detail. A Spanish message from a hospital almost always leads with the reassurance, because the word *urgencias* lands hard and the writer is defusing it immediately. Putting that clause last would read as burying it.
And **me comentó tu hermana**: not *me dijo*, not *me contó*. *Comentar* is the mildest of the three — it says the sister mentioned it in passing, with no weight on it, which is exactly the right temperature for explaining how you happen to know somebody's day off. Choosing *me dijo* would sound like she was told on purpose.
That is the difference between having the words and using them. Both writers pick the softest option available, twice each, and the message reads as calm because of it.

Before you move on

Now your turn, out loud. Four sentences from a waiting room: say where you are, say it is not serious, say what test they have done, and say somebody mentioned they might come.
Write it: the same four sentences
Then check yourself: did you put the reassurance **before** the detail?

Chapter 448

La mudanza

Modes: **voice** (6) **eyes** (1) **Hands-free start:** the first 6 of 7 lessons.

> ***By the end of this chapter:*** I can hand a flat over and take one on: say when I am moving, call the day hard, and tell somebody which things are out of order and which are actually in pieces.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

448.1 mudarse — changing where you live

Say **la casa** and **el piso**. You are about to leave one of them.

You'll want to know: mudarse

mudarse — to move house.

Me mudo el sábado — I move on Saturday. *Nos mudamos a un piso más grande* — we are moving to a bigger flat. *¿Cuándo te mudas?* — when do you move?

Spanish does not reach for a verb of carrying here. It reaches for a verb of **changing**, and that is the whole idea: you have not transported yourself, you have changed which address is yours.

Grammar Lens: what the -se is doing

There is a plain verb **mudar** underneath, and it means to change something else:

without -se	with -se
la serpiente muda la piel — sheds its skin	*me mudo a Sevilla* — I move
mudar de opinión — change your mind	*se muda de ropa* — changes clothes

On the left the verb reaches out to something: a skin, an opinion. On the right it turns back and lands on the person. Once it lands on you, the thing being changed is understood to be **where you live** — or, in a bedroom, what you are wearing. Context decides between those two, and it decides easily, because nobody packs a lorry to change their shirt.

Note that *mudarse* takes **a** for the destination — *me mudo a Madrid* — the same **a** you already use for going anywhere.

The word, taken apart — and its English cousins

Latin **mutare**, to change. It is a wide family and you can hear it in English: a **mutation** is a change, and a bird in **moult** is changing its feathers — the same picture as the snake.

Spanish keeps the plain sense in *mudar de opinión* and the specialised one in *mudarse*. A word narrowing from "change anything" to "change address" is ordinary: the commonest thing people announce they are changing is where they sleep.

Your turn

Say these aloud:

- I am moving on Saturday
- we are moving to a bigger house
- what *mudar* means without the *-se*

Before you move on

To move house? (**Mudarse**.) Which preposition for the destination? (**A** — *me mudo a Bilbao.*) What Latin verb is inside it? (**Mutare**, to change.)

448.2 la mudanza — the day itself

Say **mudarse** and **la caja**. Forty of the second, one of the first.

You'll want to know: la mudanza

la mudanza — the move: not the decision, the day.

Hacer una mudanza — to do a move. *La empresa de mudanzas* — the removal firm. *El camión de mudanzas* — the removal van. *La mudanza es el día quince* — the move is on the fifteenth.

Spanish says **hacer** a move where English says *do* or *make* one, and it never says *tener*. A mudanza is something you carry out, not something you possess.

Grammar Lens: -anza names the doing

Take a verb, cut the ending, add **-anza**, and you have a noun for the act or the state:

verb	noun
mudar	la mud**anza** — the move
esperar	la esper**anza** — hope
enseñar	la enseñ**anza** — teaching
tardar	la tard**anza** — the delay

All four are feminine, and so is every other **-anza** noun you will meet: *la confianza*, *la semejanza*, *la balanza*. Spot the ending and the article comes free.

La esperanza is worth a second look. From *esperar*, to wait — hope, in Spanish, is named after the waiting rather than after the wanting. The ending took an ordinary verb and produced an abstract noun, and that is exactly what it does to *mudar*, except that a mudanza is not abstract at all: it is boxes.

The word, taken apart — and its English cousins

Latin **mutare**, to change, plus the ending. Old Spanish used *mudanza* for any change at all, including a change of heart, and you still meet that sense in older writing and in song lyrics.

The narrowing went the same way as the verb's. When people say *la mudanza* now, boxes are in the room.

Your turn

Say these aloud:

- the move is on Saturday
- the removal firm is bringing the boxes
- which verb goes with *mudanza*

Before you move on

The move? (**La mudanza**.) The verb? (**Mudarse**.) And the gender that comes with *-anza*? (**Feminine**.)

448.3 duro — hard, and hard going

Say **durante** and **fuerte**. One of them is about how long, the other about how much force.

You'll want to know: duro

duro — hard.

El pan está duro — the bread has gone hard. *Un colchón duro* — a firm mattress. And then, away from things you can press: *un día muy duro* — a hard day. *El trabajo es duro* — the work is heavy going. *No seas tan duro con él* — don't be so hard on him.

A mudanza is the standard example of *un día duro*, and no Spanish speaker would call it *un día fuerte*.

Grammar Lens: duro is not fuerte

The two get confused because English "strong" and "hard" overlap. Spanish keeps them apart by asking a different question about each:

word	the question it answers
fuerte	how much force does it have?
duro	how much does it resist?

Una persona fuerte can lift the boxes. *Una persona dura* will not soften when you ask for a favour. A rock is *duro*; it has no force at all. Wind is *fuerte*; it is not hard in the least.

So when a day is *duro*, the picture is not that the day was powerful. It

is that the day would not give.

The word, taken apart — and its English cousins

Latin **durus**, hard — and from it the verb **durare**, to last.
That derivation repays a moment. What lasts is what resists wearing away, so "hard" and "long-lasting" are one idea seen twice. Spanish kept both halves: *duro* is the resisting, and **durar** — with **durante** inside it — is the lasting. *La mudanza duró todo el día*: the move held out all day.
English took both halves too, from the same place: **durable** and **duration** on one side, **endure** on the other.

Your turn

Say these aloud:

- the bread is hard
- the move was a very hard day
- why *durante* and *duro* are relatives

Before you move on

Hard? (**Duro**.) Which word would you pick for a strong wind? (**Fuerte** — force, not resistance.) What links *duro* to *durar*? (**What resists is what lasts**.)

448.4 estropear / estropeado — it no longer works

Say **torpe** and **romper**. Being the first often leads to the second.

You'll want to know: estropear

estropear — to ruin, to wreck, to put out of action.

He estropeado el móvil — I've wrecked my phone. *La lluvia estropeó la fiesta* — the rain ruined the party. With **-se** it happens by itself: *se ha estropeado la lavadora* — the washing machine has broken down.

And the form you meet most is the adjective:
estropeado — out of order, damaged, spoiled.

Ascensor **estropeado**. Usen las escaleras.

That is a real sign, on a real lift, and it is the reason this word earns its place before the polite ones.

Grammar Lens: estropeado is not roto

Both translate as "broken" and they are not interchangeable:

what you mean	the word
it is in pieces	**roto**
it will not work	**estropeado**

A washing machine full of water that does nothing is **estropeada** and not *rota* — nothing came apart. A plate in two halves is **rota** and calling it *estropeada* would sound like an understatement.
Food takes *estropeado* too: *la fruta se ha estropeado* — the fruit has gone off. Again the test holds. The fruit is not in pieces; it no longer does its job.

The word, taken apart — and its English cousins

Spanish took it from Italian **stroppiare**, to cripple or maim, which goes back to Latin **turpis** — shameful, ugly.
So **estropear** and **torpe** are cousins, and the pair is worth holding side by side. The same Latin word for *shameful* came out of Italian as "wreck a thing" and out of Spanish as "clumsy" — an apology you make over a spilled glass. One branch kept the weight and one branch lost nearly all of it.
The **e-** at the front is Spanish's own doing. Spanish will not open a word with *st-*, so it fits a vowel in front: *stroppiare* became *estropear*, the way *stare* became *estar* and *studiare* became *estudiar*.

Your turn

Say these aloud:

- the lift is out of order
- the washing machine has broken down

- which of *roto* and *estropeado* fits a plate in two halves

Before you move on

Out of order? (**Estropeado**.) The verb? (**Estropear**.) Which word already in your head shares its Latin root? (**Torpe** — both from *turpis*.)

448.5 roto — in pieces

Say **romper** and **la caja**. Now say what happened to the box.

You'll want to know: roto

roto — broken, torn, in pieces.

Un vaso roto — a broken glass. *Los pantalones están rotos* — the trousers are torn. *He roto el plato* — I've broken the plate.

It agrees like any adjective: *roto, rota, rotos, rotas.*

Grammar Lens: the participle that lost its middle

A regular *-er* verb would give *romp-ido*. Spanish says **roto**, and it is one of a small group that behave this way:

verb	the participle you expect	the one Spanish uses
romper	*rompido*	**roto**
escribir	*escribido*	**escrito**
abrir	*abrido*	**abierto**

These short forms are the older ones. They came straight down from Latin participles that were already short, and because the verbs are used so constantly, the regular pattern never got a grip on them. The same thing happens in English, where *wrote* survives beside *worked*. One form covers both jobs: *he roto el plato* after *haber*, and *el plato está roto* as a plain description.

The word, taken apart — and its English cousins

Latin **rumpere**, to burst, with participle **ruptus** — and *ruptus* is what became *roto*.

English borrowed the same participle whole: a **rupture**, an **eruption**,

something **abrupt** that breaks off. Spanish let it wear down into a two-syllable everyday word, and kept *ruptura* alongside for the borrowed, formal sense.
Keep the pair from the lesson before this one in mind. *Roto* is *ruptus*, bursting. *Estropeado* is *turpis*, shameful. Spanish named the two kinds of failure after two different pictures, and the pictures still sort them.

Your turn

Say these aloud:

- a broken glass, then broken trousers
- I have broken the plate
- whether a dead fridge is *roto* or *estropeado*

Before you move on

Broken, in pieces? (**Roto**.) What would the regular participle have been? (*Rompido*.) Name two more verbs with a short participle. (**Escrito**, **abierto**.)

448.6 (mudarse, la mudanza, duro, estropeado, roto) — from cold

From memory alone, say all five: *to move house*, *the move*, *hard*, *out of order*, *in pieces*.

Grammar Lens: two words for broken, one question

This is the one distinction in the chapter that will cost you marks if it goes unsorted. Ask: **did anything come apart?**

the situation	**the word**
lift stuck between floors	**estropeado**
window with a hole in it	**roto**
milk that has gone off	**estropeado**
shoelace snapped	**roto**

Notice the milk. Nothing could come apart in a carton, so *roto* is not

available — and that is the test doing its work on a case where English gives you no help at all, since English would say neither "broken milk" nor "out-of-order milk".

Grammar Lens: where the five came from

Four of the five were built out of things you already had.

new word	**what it was built on**
mudarse	*mudar*, to change
la mudanza	*mudar* plus the *-anza* of *esperanza*
duro	the *dur-* inside *durante*
estropeado	*turpis*, the Latin behind *torpe*

Only **roto** arrived on its own, and even it came with *romper* attached. Five words, one genuinely new root among them. That is what happens once a vocabulary is large enough: new words start arriving as relatives.

Your turn

Say these aloud:

- we are moving on the fifteenth
- the move was a hard day
- which preposition follows *mudarse*

Before you move on

All five again, in Spanish, without looking. Then one sentence using two of them at once.

448.7 (el día de la mudanza) — read it, then do it yourself

Say **la mudanza** and **estropeado**. Both are in the note below, and one of them is doing the work of a warning.

Your turn

A note left on the kitchen counter for whoever moves in next. Read it, then answer.

> Hola. Nos **mudamos** hoy y te dejo unas cosas por escrito.
>
> El timbre está **estropeado** desde enero. El portero dice que lo arregla, pero lleva así medio año, así que llama por teléfono.
>
> En el armario hay un cristal **roto**. Lo he tapado con cartón, pero ten cuidado al abrirlo.
>
> La **mudanza** ha sido **dura** y quedan tres cajas en el trastero. Las recojo el domingo.

Say these aloud:

- which two things in the flat are not in working order
- which of the two came apart, and how you know
- what is still in the storage room, and when it goes

Why it's said this way

The note uses both words for broken within four lines, and each one is the only correct choice.
The doorbell is **estropeado**. Nothing about it is in pieces; it has stopped doing its job, and the fault is invisible. The pane of glass is **roto**, which is why it needed covering with cardboard — there is now a hole where glass used to be. Swap the two words and a Spanish reader would picture a smashed doorbell and a window that mysteriously fails to be a window.
Then look at **nos mudamos hoy**. Present tense, for something happening today, exactly as in English. And **dura**, agreeing with *la mudanza*: the day resisted, all day long.

Before you move on

Now your turn, out loud and then in writing. Leave a note of four lines for the next tenant: say you are moving today, name one thing

that is out of order, name one thing that is broken, and say the move has been hard.
Then check yourself: did each of *roto* and *estropeado* go to the right object, and did *duro* agree with what it describes?

Chapter 449

El taller

Modes: **voice** (5) **eyes** (2) **Hands-free start:** the first 5 of 7 lessons.

> ***By the end of this chapter:*** I can leave a bike at a repair shop and understand the slip that comes back: say which part has failed, ask whether it can be fixed by a given day, and ask somebody to pass me a tool.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

449.1 arreglar — putting it right

Say **reparar** and **estropeado**. One undoes the other.

You'll want to know: arreglar

arreglar — to fix, to mend, to sort out.

¿Me puedes arreglar la bici? — can you fix my bike for me? *Han arreglado el ascensor* — they've fixed the lift. *Ya está arreglado* — it's sorted now.

And beyond machinery: *arreglar los papeles* — sort the paperwork out. *Arreglar una habitación* — tidy a room. *Arreglarse* — get yourself ready to go out.

Grammar Lens: arreglar and reparar

Both mean to fix, and a Spanish speaker reaches for them differently:

word	where it sits
arreglar	everyday speech, and things that are not machines
reparar	the workshop, the invoice, the written notice

He arreglado la silla is what you tell a friend. *Reparación de calzado* is what the shop window says. You can *arreglar* an argument or a haircut; *reparar* neither.
Where the object is a broken machine, the two overlap and either is correct. Take **arreglar** as your default and you will be right far more often.

The word, taken apart — and its English cousins

Break it as **a-rregl-ar**, and the middle is **regla** — a ruler, a rule — from Latin **regula**, the carpenter's straight edge.
So to *arreglar* something is to bring it back to the straight edge: the plank is warped, you true it. You met the same *regula* in **regular**. English took it too, in *regulate*, *rule* and *ruler*, and kept the tool and the law in one word as Spanish does.
The **rr** is where the *a-* meets the *r-* of *regla*. Spanish doubles it and rolls it, and the doubling is the only trace left of the prefix.

Your turn

Say these aloud:

- can you fix my bike?
- it's sorted now
- which of the two verbs belongs on a shop sign

Before you move on

To fix? (**Arreglar**.) What tool is hiding inside it? (**La regla**, the straight edge.) What does *arreglarse* mean about a person? (**Getting ready to go out**.)

449.2 el freno — what stops you

Say **la bicicleta** and **arreglar**. Name the part most often needing the second.

You'll want to know: el freno

el freno — the brake.

Los frenos no van — the brakes aren't working. *El freno de mano* — the handbrake. *Frenar* — to brake: *frena antes de la curva*, brake before the bend.

Spanish uses the plural far more than English does. A bicycle has *frenos*, and asking about *el freno* on a bike would sound as though you knew which one was at fault.

Grammar Lens: the noun and the verb in one step

el freno gives **frenar** by adding nothing but *-ar*, and this pair is one instance of a pattern you can lean on:

noun	verb from it
el freno	fren**ar** — to brake
la planta	plant**ar** — to plant
el arreglo	arregl**ar** — to fix

Note the third row runs backwards from the other two: **el arreglo** is the noun built from the verb, not the verb built from the noun. Spanish makes these in both directions and the ending alone will not tell you which came first — a question for a dictionary, not for a rule. What you can rely on is the shape: meeting a noun, try *-ar* on it; meeting an *-ar* verb, try cutting it back to a noun. You will be right often enough to make it worth the guess.

The word, taken apart — and its English cousins

Latin **frenum**, the bit — the metal bar in a horse's mouth that the reins pull on. That is the oldest brake there is, and the word moved onto carts, then bicycles, then cars, without ever changing its job. English has the same word in the medical **frenulum**, the small fold of tissue under your tongue, so called because it holds the tongue back. Spanish keeps the sense alive too: *poner freno a algo* — to put a stop to something.

Your turn

Say these aloud:

- the brakes aren't working
- can you fix the brakes?
- the verb that goes with *el freno*

Before you move on

The brake? (**El freno**.) On a bike, singular or plural? (**Plural** — *los frenos*.) What was a *frenum* originally? (**The bit in a horse's mouth**.)

449.3 la rueda — the wheel

Say **alrededor** and **la bicicleta**. There is a wheel inside one of those words, and it is not the obvious one.

You'll want to know: la rueda

la rueda — the wheel, and on a car the tyre as well.

La rueda de atrás — the back wheel. *Se me ha pinchado una rueda* — I've got a puncture. *La rueda de repuesto* — the spare.

A bicycle has *dos ruedas*, and Spanish will name a vehicle by counting them: *un vehículo de dos ruedas*.

Grammar Lens: the o that breaks in two

Latin *rota* has an **o**. Spanish has **ue**. That change is everywhere once you look for it, and it happens under one condition — stress:

unstressed o	**stressed, so ue**
r**o**dar — to roll	la r**ue**da
p**o**der — to be able	p**ue**do
v**o**lver — to return	v**ue**lvo

Say *rueda* and *rodar* one after the other and you can hear the same word twice. The vowel splits under the weight of the stress and closes up again when the stress moves off.

This is why so many Spanish verbs look irregular and are not. They

are one vowel obeying one condition.

The word, taken apart — and its English cousins

Latin **rota**, wheel. And here is the payoff on a word you already use daily.
Alrededor is *al* + *rededor*, and *rededor* comes from Latin **retrō**, *backwards* — **pulled sideways by *rota***, the wheel. That is the careful version and it is worth keeping careful: *rota* is not where the word started, it is what bent it on the way. Both ideas ended up inside it, which is why something *alrededor* is behind you as well as in front. The wheel half is generous. A **rotunda** is a round building, a **rotation** turns, Spanish keeps *rotonda* for the roundabout you drive round, and *la rodilla* — the knee — is *rotella*, a little wheel. A knee and the space around you, named by the same rolling.

Your turn

Say these aloud:

- the back wheel and the spare wheel
- the brakes and the wheel need fixing
- what *alrededor* has to do with *rueda*

Before you move on

The wheel? (**La rueda**.) Why *ue* and not *o*? (**The stress falls on it**.) What is the unstressed verb alongside it? (**Rodar**, to roll.)

449.4 el taladro — the drill

> Say **la mano** and **la madera**. One holds the tool, the other takes the hole.

You'll want to know: el taladro

el taladro — the drill.
¿Me dejas el taladro? — can you lend me the drill? *Taladrar* — to drill: *hay que taladrar la pared*, we need to drill the wall.

The word covers the machine and, in a workshop, the bit as well. *Un taladro para madera* is a wood bit; *un taladro sin cable* is a cordless drill.

Grammar Lens: lending, in Spanish

Asking to borrow a tool is where two verbs get tangled, because Spanish has no verb for *borrow* at all:

what you want	what Spanish says
lend me the drill	*¿me **dejas** el taladro?*
can I borrow it?	*¿me lo **prestas**?*

Both put the **lender** in the subject position. There is no sentence shaped like *I borrow the drill from you*; you turn it round and ask the other person to do the lending. *Dejar* is the everyday one and *prestar* the slightly more formal.
Hand the tool back with *aquí tienes* and you have the whole exchange.

The word, taken apart — and its English cousins

Latin **taratrum**, a borer — itself taken from Gaulish, the Celtic language spoken in France before Latin arrived. The Romans met a better tool than their own and kept the name with it.
From *taratrum* to *taladro* an **r** turned into an **l**, and notice that *taratrum* has no *l* to begin with. The word had **two r's**, which is awkward, so one of them gave way — a repeated sound in one short word is unstable, and changing one of the pair is the easiest repair.
That is not what happened to *milagro* and *peligro*. Those came from *miraculum* and *periculum*, which **did** have both letters, and the two traded places. Two different habits, worth telling apart.

Your turn

Say these aloud:

- can you lend me the drill?
- we have to drill the wall
- why *milagro* and *taladro* are the same kind of case

Before you move on

The drill? (**El taladro**.) To drill? (**Taladrar**.) How do you ask to borrow something? (**By asking the other person to lend it** — *¿me dejas…?*)

449.5 acercar — pass it here

Say **cerca** and **acercarse**. Now take the *-se* off the second one and see what is left.

You'll want to know: acercar

acercar — to bring something closer, and so, constantly, **to pass**.

¿Me acercas el taladro? — can you pass me the drill? *Acerca la silla* — pull your chair up. *Te acerco a la estación* — I'll run you to the station.

That last one is worth keeping. Offering somebody a lift in Spanish is offering to *acercar* them: you are bringing them nearer to where they are going.

Grammar Lens: one verb, two directions

You already own the *-se* version. Here they are side by side:

form	who moves
acercarse	the subject — *me acerco a la puerta*
acercar	something else — *acerco la silla*

Without the *-se*, the verb needs an object; the thing that comes closer is whatever you name. With the *-se*, the subject is the thing that comes closer. That is the same switch you saw in *mudar* and *mudarse*, and it runs through hundreds of Spanish verbs.

So in a workshop, *acércate* means come over here, and *acércamelo* means send it over here. One syllable apart, and two different people doing the moving.

The word, taken apart — and its English cousins

a-cerc-ar: the prefix *a-* meaning towards, the *cerca* you already say, and the *-ar* of an ordinary verb. The middle is Latin **circa**, around,

and its ring is still visible in *círculo* and in English *circle* and *circa*. The road from "around" to "near" is short: things arranged around you are the things close to you. Spanish turned the circle into a distance, then built a verb on it, and the verb now does the job of the English *pass*, *pull up* and *give a lift* all at once.

Your turn

Say these aloud:

- can you pass me the drill?
- pull your chair up
- I'll run you to the station

Before you move on

Pass me the drill? (**¿Me acercas el taladro?**) Who moves with *acercarse*? (**The subject**.) What does *te acerco a la estación* offer? (**A lift**.)

449.6 (arreglar, el freno, la rueda, el taladro, acercar) — from cold

Close the lessons before this one. Say all five: *to fix*, *the brake*, *the wheel*, *the drill*, *to pass*.

Grammar Lens: each noun brought a verb with it

Three of these five came in pairs, and the second half of each pair cost you nothing:

the noun	its verb
el freno	**frenar** — to brake
la rueda	**rodar** — to roll
el taladro	**taladrar** — to drill

Note that *rodar* does not keep the *ue*. The **ue** appears only where the stress lands on it, so the noun has it and the infinitive does not. If you try to say *ruedar* you will be corrected; if you say *rueda* and *rodamos*

you will not.
That one condition — stress — accounts for most of what looks irregular in Spanish verbs, and you now have a noun that shows it standing still.

Grammar Lens: the -se you keep meeting

Three verbs in two chapters have turned on the same small word:

without -se	**with -se**
mudar — change a thing	*mudarse* — move house
acercar — bring it closer	*acercarse* — come closer
arreglar — fix a thing	*arreglarse* — get ready

Read the right-hand column and one thing is constant: the subject is on the receiving end. Read the left and the verb is reaching out to an object. When you meet a new verb in both shapes, that question sorts them before you look anything up.

Your turn

Say these aloud:

- the brakes aren't working and the back wheel is loose
- can you fix it today?
- the verbs belonging to *freno*, *rueda* and *taladro*

Before you move on

All five again, in Spanish, without looking. Then one sentence that puts a tool in somebody's hand.

449.7 (dejar la bici en el taller) — read it, then do it yourself

Say **arreglar** and **el freno**. Both are on the slip below.

Your turn

The slip handed back across the counter. Read it, then answer.

> **Taller de bicicletas — resguardo**
>
> Bicicleta azul, sin cesta. Entra el martes.
>
> Los **frenos** de atrás no van. Se cambian.
>
> La **rueda** delantera está bien; solo hay que apretarla.
>
> Presupuesto: 24 €. Se **arregla** para el jueves.

Say these aloud:

- which part is being replaced and which is only being tightened
- what it will cost and when it will be ready
- what day the bike went in

Why it's said this way

Look at **se cambian** and **se arregla**. Neither says who does the work, and on a repair slip that is the point: the shop is not the subject of a sentence, the job is. Spanish gets there with *se* plus the verb, and the verb agrees with the thing being done — *frenos* is plural so *cambian* is plural, *la bicicleta* is singular so *arregla* is singular.
English reaches for the passive here: *the brakes are being changed*. Spanish reaches for *se*. Once you notice it you will see it on every notice and every menu: *se alquila*, *se vende*, *se ruega*.
And **solo hay que apretarla** does the same job a third way — no subject at all, only a thing that must be done.

Before you move on

Now your turn, out loud and then in writing. Four lines handing a bike over: say what is wrong with the brakes, say the front wheel is fine, ask whether they can fix it by Friday, and ask them to pass you the drill so you can do one part yourself.
Then check yourself: did you use *se* for the work being done, and did the verb agree with the part rather than with the shop?

Chapter 450

El césped y el patio

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read a notice pinned to the gate of a sports ground: say where training has moved to, tell a maintained pitch from grass that is merely growing, and warn somebody about stones on a path.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

450.1 el patio — the space in the middle

> Say **el jardín** and **la calle**. A patio is neither, and it sits between them.

You'll want to know: el patio

el patio — the courtyard: an open space with the building around it.

Un piso con patio — a flat with a courtyard. *Los niños están en el patio* — the children are out in the yard. *El patio de butacas* — the stalls of a theatre, the flat part with the seats.

A *jardín* has plants and can be anywhere. A *patio* is defined by what surrounds it, and it may hold nothing but a washing line.

Grammar Lens: the school patio

In a school, *el patio* is the playground, and with it comes a phrase you will hear constantly:

Spanish	what it covers
salir al patio	to go out at break
la hora del patio	break time

The second one names the time by naming the place, and Spanish does this often — *la hora de la calle* for knocking-off time works the same way. When a Spanish phrase seems to be about a location, check whether it is really about a moment in the day.

The word, taken apart — and its English cousins

Here the honest answer is that nobody knows.

The best-supported account brings it from Occitan *pati*, waste ground, and from there back to Latin **pactum**, an agreement — common land held by agreement. A rival account points at Latin *patere*, to lie open, which fits the meaning better and the sound worse. Neither has settled the matter.

That is why this lesson lists no root. An empty list is not an oversight in this material; it is a claim, and the claim is that the origin is genuinely unresolved. Saying so is more useful than picking the prettier story, because the next time you see a root listed you can trust that somebody checked.

What is certain is where the word went. Spanish carried *patio* into English, French and German, and it is now the ordinary word for a paved space behind a house in places that have never used it for anything else.

Your turn

Say these aloud:

- a flat with a courtyard
- the children are out at break
- the difference between a *patio* and a *jardín*

Before you move on

The courtyard? (**El patio.**) What defines one? (**The building around it.**) What does *la hora del patio* mean? (**Break time.**)

450.2 la hierba — grass, the plant

Say **la planta** and **verde**. Now name the smallest, commonest green plant there is.

You'll want to know: la hierba

la hierba — grass, and more widely any low soft plant: a herb, a weed.

Hay hierba entre las piedras — there is grass growing between the stones. *Las malas hierbas* — the weeds, literally the bad grasses. *Una infusión de hierbas* — a herbal tea.

You will also see it written **yerba**, mostly in the Americas, and *yerba mate* is the usual spelling for the drink. Both are the same word said the same way.

Grammar Lens: the h that is not pronounced and not decorative

Latin *herba* had an h that had already gone silent by Roman times. Spanish kept the letter and added it back where Latin had none:

Latin	Spanish	the h
herba	la **h**ierba	inherited
ovum	el **h**uevo	added
ossum	el **h**ueso	added

Look at what the added ones have in common: they all begin **ue**. Scribes put an *h* in front because a word starting with *u* was read as a *v*, and *uevo* would have been read *vevo*. The *h* is a fence around the vowel.

Hierba begins *ie* rather than *ue*, so it did not need the fence. It kept what Latin had already handed it. The letter is silent in all of them.

The word, taken apart — and its English cousins

Latin **herba**, grass or herb. English borrowed the same word twice: once through French as **herb**, and once as the botanical **herbaceous**. Spanish has the learned form too, in *herbicida* and *herbívoro*, where the h sits in front of an unbroken *e* because those words came from books rather than from speech.

That is the tell. *Hierba* has the broken vowel because ordinary speakers wore it down over centuries; *herbívoro* has not, because it was

lifted from Latin whole and handed to a scientist.

Your turn

Say these aloud:

- there is grass growing in the courtyard
- the weeds, using the Spanish phrase
- why *huevo* has an h and *hierba* has a different reason

Before you move on

Grass, the plant? (**La hierba**.) Is the h pronounced? (**No** — not on its own, anywhere in Spanish.) What are *las malas hierbas*? (**The weeds**.)

450.3 la piedra — the stone

Say **la madera** and **duro**. Now name the building material that is harder than the first.

You'll want to know: la piedra

la piedra — the stone.

Una casa de piedra — a stone house. *Hay piedras en el camino* — there are stones on the path. *De piedra* also works as a description of a person who has not moved: *me quedé de piedra*, I was stunned.

For the material in the mass — quarried, cut, built with — Spanish stays singular: *un muro de piedra.* For the things you can pick up, plural: *piedras.*

Grammar Lens: the same vowel trick, one row over

You have already watched a stressed **o** break into **ue** in *rueda.* A stressed **e** does the same thing and becomes **ie**:

Latin	Spanish	what broke
petra	la p**ie**dra	e under stress
rota	la r**ue**da	o under stress
herba	la h**ie**rba	e under stress

Three of this chapter's words are the same sound change caught at different moments. Once you hear *ie* and *ue* as stressed vowels that gave way, a large part of Spanish spelling stops looking arbitrary. And the test still works: *petrificar* keeps the plain **e**, because the stress has moved off it.

The word, taken apart — and its English cousins

Latin **petra**, taken from Greek **pétra**, a rock.
Latin already had its own word for stone, *lapis*, and it is the one that survived in the learned vocabulary — *lapidario*, and English *dilapidated*. The Greek borrowing won out in ordinary speech instead, which is the reverse of what usually happens.
The name **Pedro** is the same word: Greek *pétros*, a stone, handed out as a nickname and then carried by enough people to become a name in its own right. So *Pedro* and *piedra* are one word twice, and a **petrol** is an oil that comes out of rock.

Your turn

Say these aloud:

- a stone house
- there is grass between the stones
- what *piedra* and *Pedro* have in common

Before you move on

The stone? (**La piedra**.) Why *ie* rather than *e*? (**The stress fell on it**.) Which language did Latin take *petra* from? (**Greek**.)

450.4 el césped — grass you look after

Say **el campo** and **plantar**. Somebody planted the grass on a football pitch, and that is the whole difference.

You'll want to know: el césped

el césped — the lawn, and on a sports ground the pitch.

Cortar el césped — to mow the lawn. *No pisar el césped* — keep off the grass, the wording on the sign in every park. *El césped está seco* — the pitch is dry.

It has no everyday plural. Where English says *the lawns*, Spanish repeats the singular or names the places instead.

Grammar Lens: césped is not hierba

Both are grass. They answer different questions:

the question	the word
what plant is that?	**la hierba**
what surface is that?	**el césped**

Hierba is the thing growing; *césped* is the maintained expanse of it. So grass coming up between the paving stones is **hierba**, and nobody would call it *césped*. A mown lawn is **césped**, though it is made of *hierba*.

Sports tell the same story. *Jugar en el césped* is to play on the pitch, and a pitch that has stopped being looked after has stopped being *césped*.

The word, taken apart — and its English cousins

Latin **caespes**, a cut sod of turf — a slab of earth with grass on top, lifted with a spade for building banks and walls.

That is a good picture to hold, because it explains why *césped* is about the surface rather than the plant. A *caespes* was a thing you could carry.

The written accent is doing real work. A Spanish word ending in a consonant other than *n* or *s* takes its stress on the last syllable by default, so *cesped* without a mark would be read **ces-PED**. The accent overrules the default and pins the stress on **CÉS**-ped.

Your turn

Say these aloud:

- I have to mow the lawn
- keep off the grass, as the sign puts it

- which word fits grass between the stones

Before you move on

The lawn? (**El césped**.) Why the accent? (**Without it the stress would fall on the last syllable**.) A *caespes* was? (**A cut sod of turf**.)

450.5 el entrenamiento — the session

Say **el tren** and **correr**. One of those two is about to turn up somewhere you would not expect it.

You'll want to know: el entrenamiento

el entrenamiento — training, and a single training session.

Tengo entrenamiento los martes — I have training on Tuesdays. *El entrenamiento es en el césped de atrás* — training is on the back pitch. And the people: **el entrenador**, the coach; **entrenar**, to train; **entrenarse**, to train yourself.

Away from sport it keeps working: *un entrenamiento de dos días* for a course at work.

Grammar Lens: -miento names the process

You have met **-anza** turning a verb into a noun. **-miento** does the same job, and the two split the language between them:

verb	noun
entrenar	el entrena**miento**
mover	el movi**miento**
conocer	el conoci**miento**

Every **-miento** noun is masculine, as every **-anza** noun is feminine, so the ending hands you the article both times.

Which verb takes which is not predictable and has to be met word by word — *esperanza* but *movimiento*, with nothing in the verbs to tell you. What you can rely on is the gender, and that is worth having.

The word, taken apart — and its English cousins

Borrowed from French **entraîner**, to drag along — and inside it the same *traîner* that gave Spanish **el tren**.
Hold the two together. A **tren** is the set of carriages *dragged* behind the engine. To **entrenar** somebody is to *drag them along* with you until they can keep up. The coach is out in front and the squad is the train.
English took the identical picture from the identical French word, which is why *train* in English means both the thing on rails and what a coach does to a team. Spanish split the two forms — *tren* and *entrenar* — and so kept the relationship visible in a way English hides.

Your turn

Say these aloud:

- I have training on Tuesdays
- training is on the back pitch
- what a train and a coach are doing that is the same

Before you move on

The training session? (**El entrenamiento**.) The coach? (**El entrenador**.) What gender do *-miento* nouns take? (**Masculine**.)

450.6 (el patio, la hierba, la piedra, el césped, el entrenamiento) — from cold

From memory alone, say all five: *the courtyard*, *grass*, *the stone*, *the lawn*, *the training session*.

Grammar Lens: three words, one broken vowel

Say these aloud and listen for where the stress sits:

Latin or French	Spanish
herba	la h**ie**rba
petra	la p**ie**dra
entraîner	entren**a**miento

The first two broke their stressed **e** into **ie**. The third did not, because the stress in *entrenamiento* never lands on that **e** at all — it lands three syllables later. Same vowel, same language, different outcome, and the only variable is stress.
This is why *piedra* has a diphthong and *petrificar* does not, and why *rueda* has one and *rodamos* does not. One condition explains all four.

Grammar Lens: two pairs that are not synonyms

the pair	what separates them
patio / jardín	a patio is defined by what surrounds it
hierba / césped	hierba is the plant, césped is the tended surface

Both pairs fail in the same direction for an English speaker: “yard” and “grass” are wide words that cover each pair whole. Spanish is narrower here than English, which is the harder direction, because nothing in your own language warns you that a choice is waiting.

Your turn

Say these aloud:

- there are stones and grass in the courtyard
- somebody has to mow the lawn
- which of *hierba* and *césped* needs a gardener

Before you move on

All five again, in Spanish, without looking. Then one sentence putting a training session on a pitch.

450.7 (el aviso del polideportivo) — read it, then do it yourself

Say **el césped** and **el entrenamiento**. The notice below moves one of them off the other.

Your turn

A notice on the gate of the sports centre. *Read it:* the notice, then answer

AVISO

El **césped** del campo grande está en obras hasta el día 20.

Los **entrenamientos** de esta semana se hacen en el **patio** de atrás.

No dejen bolsas sobre la **hierba** del lateral. Se está replantando.

Disculpen las molestias.

Say these aloud:

- where training happens this week, and why
- what you are asked not to do, and where
- when the big pitch will be available again

Why it's said this way

The notice uses **césped** once and **hierba** once, four lines apart, and swapping them would make it unreadable.
The big pitch is **césped**: a maintained playing surface, currently closed for work on it. The strip down the side is **hierba**: grass as a plant, being replanted. A Spanish reader takes *se está replantando* as confirmation — you replant *hierba*, since that is the living thing; *césped* is what you get once the *hierba* has taken and somebody starts mowing it.
Notice also **no dejen** and **disculpen**. Both are the *ustedes* form, which is what public notices use: addressed to everyone, and formal without being cold. A sign saying *no dejes* would read as though it had

been written for one particular person who had already done it once.

Before you move on

Now your turn, out loud. Four lines for a gate notice: say the pitch is closed, say where training moves to, ask people to keep off the grass at the side, and say there are stones on the path.
Write it: the same four lines
Then check yourself: did *césped* go to the playing surface and *hierba* to the plant, and did you use the *ustedes* form?

Chapter 451

La cola y el carné

Modes: **voice** (4) **eyes** (4) **Hands-free start:** the first 2 of 8 lessons.

> ***By the end of this chapter:*** I can get through a counter: queue, put my name on a list, show the right card, keep the right slip of paper, and follow a notice that says what will be checked and when.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

451.1 la cola — the queue

> Say **esperar** and **la entrada**. Name what forms between the two.

You'll want to know: la cola

la cola — the queue, the line of people.

Hay mucha cola — there's a long queue. *Hacer cola* — to queue: *llevo media hora haciendo cola. Ponte a la cola* — get in line. *El último de la cola* — the last person in the queue.

Spanish says **hacer** cola, never *estar en* cola. You *make* a queue by standing in it, which puts the work where it belongs.

Grammar Lens: two colas, and one of them is glue

There are three separate words spelled **cola** in Spanish, and none of them is related to the others:

the word	where it comes from
la cola — tail, queue	Latin *cauda*
la cola — glue	Greek *kólla*
la cola — the drink	a West African word for the nut

La cola del perro is the dog's tail. *Un bote de cola* is a pot of glue. *Una cola* at a bar is the drink. Nothing but context separates them, and context always does: nobody queues in a tube and nobody glues at the entrance.

Words that collide like this are called homonyms, and Spanish has fewer of them than English because its spelling is so regular that unrelated words rarely arrive at the same shape. When they do, it is worth knowing, because a dictionary will list them as two entries and you might otherwise think you had missed a connection.

The word, taken apart — and its English cousins

Latin **cauda**, tail.

The jump from tail to queue is one picture: a line of people trailing behind something, the way a tail trails behind an animal. French made the same jump with *queue*, which English then borrowed — and *queue* is also from *cauda*. So the English and Spanish words for a line of people are the same Latin word, arrived at independently.

The *au* closing to *o* is regular: *causa* gave *cosa*, *paucum* gave *poco*, *taurum* gave *toro*. The **l** is not. Spanish inherited the word through a spoken form **coda**, and the step from *coda* to *cola* is one nobody has a tidy rule for — which is worth saying, because most of the sound changes in this material do have one.

Your turn

Say these aloud:

- there's a long queue at the entrance
- I've been queuing for half an hour
- which verb goes with *cola*

Before you move on

The queue? (**La cola**.) To queue? (**Hacer cola**.) What was a *cauda*? (**A tail**.)

451.2 apuntar — put it down

Say **el punto** and **la cola**. The first is inside the verb you are about to meet.

You'll want to know: apuntar

apuntar — to note down, to jot.

Apunta el número — write the number down. *Voy a apuntarlo* — I'll make a note of it.

And with **-se**, the meaning most useful at a counter: **apuntarse**, to put your name down, to sign up.

Me apunto a la excursión — I'm putting my name down for the trip. *¿Te apuntas?* — are you in? That last one is an invitation to anything at all, and it is the phrase you will hear when a group is deciding something.

Grammar Lens: apuntar is not escribir

what you are doing	the verb
producing text	**escribir**
capturing something before it escapes	**apuntar**

You *escribes* a letter, an essay, a message. You *apuntas* a phone number, an address, a time somebody has said aloud. The difference is not length; it is purpose. *Apuntar* is always about not losing the thing. That is why *apuntarse* means signing up: you are getting your name captured onto a list before the places run out.

The word, taken apart — and its English cousins

a-punt-ar, built straight on **el punto**, and behind that Latin **punctum**, a prick — from **pungere**, to pierce.
So *apuntar* is to put a point on something. All three of its senses are that one action: to note a thing down is to mark a point on paper, to

apuntar a weapon is to aim its point, and to *apuntarse* is to put a point beside your own name.
The family is wide. A **puncture** is a piercing, a **punctual** person hits the point in time, and **puntiagudo** in Spanish is sharp-pointed. Every one of them has a small sharp thing in it.

Your turn

Say these aloud:

- write the number down
- I'm putting my name down for the trip
- why *apuntar* and *el punto* are the same word

Before you move on

To note down? (**Apuntar**.) To sign up? (**Apuntarse**.) What does *¿te apuntas?* invite? (**Joining in with whatever is being planned**.)

451.3 el carné — the card with your name on it

Say **el documento** and **apuntarse**. You sign up, and then they hand you something.

You'll want to know: el carné

el carné — the card: an official one, with your name on it.

El carné de identidad — the ID card. *El carné de conducir* — the driving licence. *El carné de la biblioteca* — the library card. *El carné joven* — the youth discount card.

Plural **los carnés**. You will also see the French spelling **carnet**, which is common on forms and older signs.

Grammar Lens: carné is not tarjeta

Two Spanish words land on English "card", and they divide the work cleanly:

the card	the word
proves who you are or what you may do	**el carné**
pays, greets, or carries an address	**la tarjeta**

La tarjeta de crédito, *la tarjeta de cumpleaños*, *la tarjeta de visita* — none of those could be a *carné*. And a driving licence could never be a *tarjeta*, however much plastic it is made of.
The test is whether somebody official issued it about **you**. If yes, it is a *carné*.

The word, taken apart — and its English cousins

French **carnet**, a small notebook — from Old French *quernet*, and behind that Latin **quaternum**, a set of four.
Four what? Four sheets of paper folded together, which is how a small notebook was made. The same *quaternum* gave Spanish **el cuaderno**, and the two words are the same object seen at different sizes: a *cuaderno* stayed a notebook, while the French *carnet* shrank to the single card you carry.
Latin **quattuor**, four, is behind both, and behind *cuatro*, *cuarto* and *cuarenta*. A driving licence has four sheets of paper folded inside its history.

Your turn

Say these aloud:

- the ID card and the driving licence
- I'm signing up, so I need the library card
- which of *carné* and *tarjeta* would pay for something

Before you move on

The ID card? (**El carné de identidad**.) The driving licence? (**El carné de conducir**.) What number is hiding in the word? (**Four** — *quaternum*.)

451.4 mostrar — show it

Say **ver** and **el carné**. Somebody at a desk wants to do the first to the second.

You'll want to know: mostrar

mostrar — to show.

Es obligatorio **mostrar** el carné a la entrada.

Muéstrame la lista — show me the list. *El gráfico muestra tres años* — the chart shows three years.

In speech Spaniards more often say **enseñar** for this — *enséñame el carné*. **Mostrar** is what the sign says and what the form says, so it is a word you read more than you speak. Knowing which register a word belongs to is part of knowing the word.

Grammar Lens: the o that breaks again

You have watched a stressed **o** turn into **ue** in *la rueda*. Here it is inside a verb, doing exactly the same thing:

stress on the stem	stress on the ending
m**ue**stro, m**ue**stras	mostr**a**mos
m**ue**stra, m**ue**stran	mostr**á**is

The infinitive *mostrar* has the plain **o** because the stress is on the *-ar*. Push the stress back onto the stem and the vowel breaks.
So this verb is not irregular in any interesting sense. It is one vowel obeying one condition, and the same condition you used to explain a noun now explains a conjugation.

The word, taken apart — and its English cousins

Latin **monstrare**, to point out — from **monstrum**, and that is where it gets interesting.
A *monstrum* was an omen: something strange that the gods had **shown** you as a warning. The horror came later, from the strangeness of the sign. So **mostrar** and **monstruo** are the same root, one keeping the showing and the other keeping the thing shown.
English has both halves as well, in **demonstrate** and **monster**, and the pair is a clean example of a root splitting into a neutral word and a

frightening one while the idea inside stays the same: something put where you cannot miss it.

Your turn

Say these aloud:

- you must show your card at the entrance
- show me the list
- which form a friend would use instead

Before you move on

To show? (**Mostrar**.) I show? (**Muestro** — stress on the stem.) What was a *monstrum*? (**An omen, something shown as a warning**.)

451.5 el ticket — the receipt

Say **el billete** and **la entrada**. Neither of them is what the till prints.

You'll want to know: el ticket

el ticket — the receipt, the slip from the till.

¿Quiere el ticket? — would you like the receipt? *Guarde el ticket para cambios* — keep the receipt for exchanges. *El ticket de la compra* — the shopping receipt.

Said **TI-ket**. Spanish also writes it **tique**, and the shorter **el recibo** covers the same ground in more formal use — on an invoice, or where money has changed hands between businesses.

Grammar Lens: three slips of paper, three words

English calls all of these a ticket. Spanish will not:

what it does	the word
carries you somewhere	**el billete**
gets you in	**la entrada**
proves you paid	**el ticket**

A train journey is *un billete*. A concert is *una entrada*. What the supermarket hands you is *un ticket*, and asking for *un billete* at a till would suggest you wanted a banknote, since *billete* covers that too. Sort them by the job rather than by the paper, and all three stay apart.

The word, taken apart — and its English cousins

This word has been around the houses.
Old French **estiquier** meant to stick — a Frankish word, Germanic in origin, the same family as English *stick*. From it came **estiquet**, a little notice *stuck* onto something: a label.
English borrowed *estiquet* and wore it down to **ticket**, meanwhile narrowing it from any label to a paid-for slip. Spanish then borrowed the English word back, keeping the English spelling.
Spanish also kept the original French form separately, as **la etiqueta** — a label, and by extension the rules of polite behaviour, which were once literally the notices posted at court telling visitors how to behave. One Frankish word for sticking something on a surface, and it has ended up as a supermarket receipt and as the word *etiquette*.

Your turn

Say these aloud:

- would you like the receipt?
- keep the receipt and show it at the desk
- which of the three words fits a concert

Before you move on

The receipt? (**El ticket**.) The way in? (**La entrada**.) What did *estiquier* mean? (**To stick** — it was a label.)

451.6 revisar — look at it again

Say **ver** and **el aviso**. Both have the same Latin verb inside them, and so does the word coming next.

You'll want to know: revisar

revisar — to check, to go over, to inspect.

Voy a revisar el ticket — I'll check the receipt. *Han revisado el coche* — they've serviced the car. *Revisa las respuestas antes de entregar* — check your answers before handing it in.

Two nouns come with it: **la revisión**, the check-up or the service, and **el revisor**, the inspector who comes down the train.

Grammar Lens: revisar is not mirar

Three verbs of looking, now sorted:

what happens	the verb
it arrives at your eyes	**ver**
you aim your eyes at it	**mirar**
you go over it for faults	**revisar**

Veo el ticket — the receipt is in my field of vision. *Miro el ticket* — I direct my attention at it. *Reviso el ticket* — I am checking whether they charged me twice.

Only the third carries the idea of a verdict at the end. That is why a mechanic *revisa* a car and a passenger merely *mira* the timetable.

The word, taken apart — and its English cousins

re-vis-ar: the prefix *re-*, again, on the stem *vis-* from Latin **videre**, to see, through its participle *visus*.

So *revisar* is to see again — the second look, which is the one where you find what the first look missed.

You have met this root twice already without the seeing being visible. **Ver** is *videre* worn down to one syllable. **El aviso** is *a-vis-o*, a bringing to someone's sight. Add *revisar* and you have three words from one Latin verb, each hiding it to a different degree. The English relatives run alongside: **vision**, **advise**, **revise**.

Your turn

Say these aloud:

- I'll check the receipt
- check your answers before handing it in
- what *ver*, *aviso* and *revisar* share

Before you move on

To check over? (**Revisar**.) The inspector on the train? (**El revisor**.) What does the *re-* add? (**Again** — it is the second look.)

451.7 (la cola, apuntar, el carné, mostrar, el ticket, revisar) — from cold

Close the lessons before this one. Say all six: *the queue*, *to note down*, *the card*, *to show*, *the receipt*, *to check*.

Grammar Lens: which slip of paper

Four words now cover what English calls a card or a ticket. The sort is by job, not by material:

what it does	the word
says who you are	el carné
carries you somewhere	el billete
gets you in	la entrada
proves you paid	el ticket

Read the left-hand column aloud and the right-hand one answers itself. Try to remember it as four pieces of plastic and paper and it will not, because three of them look identical.

Grammar Lens: two verbs you already half-owned

new verb	what it was built on
apuntar	*el punto*, and behind it *pungere*, to pierce
revisar	*ver* and *el aviso*, and behind them *videre*
mostrar	*monstrum*, an omen — something shown

Revisar is the clearest case in the chapter. You have been saying **ver** since the beginning and **el aviso** for many chapters, without either one looking like Latin *videre*. The third member makes the family visible, and now all three are cheaper to hold than any one of them was alone.

Your turn

Say these aloud:

- there's a queue, so put your name down first
- you have to show your card at the entrance
- which verb means going over something for faults

Before you move on

All six again, in Spanish, without looking. Then one sentence that gets you from the back of a queue to a receipt in your hand.

451.8 (en el mostrador) — read it, then do it yourself

Say **el carné** and **el ticket**. The notice below asks for both, at different moments.

Your turn

A notice above the counter at a leisure centre. Read it, then answer.

CAMBIOS Y DEVOLUCIONES

1. Haga **cola** en la ventanilla 2. No se atiende sin turno.
2. **Muestre** el **carné** de socio y el **ticket** de compra.
3. Si no tiene el ticket, **apúntese** en la lista y le llamamos.
4. **Revisamos** cada caso en 48 horas.

Say these aloud:

- the two things you must have with you
- what to do if you have lost the receipt
- how long the decision takes

Why it's said this way

The notice asks for two pieces of plastic and the words are not interchangeable. The **carné de socio** says who you are; the **ticket** says you paid. Lose the first and they cannot identify you; lose the second and they cannot see what you bought. So step three deals only with the missing ticket, and identity is still required.
Then look at the verbs. **Muestre**, **apúntese**, **haga** are all *usted* commands — the register of any counter in Spain. **Apúntese** carries its pronoun on the end and takes a written accent to hold the stress where it was in *apunte*; without the mark you would read *apuntese* with the stress in the wrong place.
Revisamos breaks the pattern deliberately. The first three lines tell you what to do; the fourth says what *we* do. Moving to *nosotros* at the end is how a notice stops giving orders and starts making a promise.

Before you move on

Now your turn, out loud and then in writing. Four numbered lines for a counter notice: tell people to queue, to show a card, to keep the receipt, and say that you check each case within two days.
Then check yourself: did you use the *usted* command for the instructions and switch to *nosotros* for what the office does?

Chapter 452

El reparto

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can deal with a delivery: read the card left through the door, say where the parcel has gone, quote a tracking number, and ask for a time that suits me.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

452.1 el almacén — where the boxes wait

> Say **la tienda** and **la caja**. The shop sells them; somewhere else keeps them.

You'll want to know: el almacén

el almacén — the warehouse, and in a shop the stockroom out the back.

Está en el almacén — it's in the stockroom. *No queda en almacén* — there's none left in stock. *Los almacenes* — the plural, and note the accent disappears: *almacén* needs it, *almacenes* does not.

Almacenar is the verb, to store. A computer stores the same way: *datos almacenados*.

Grammar Lens: the accent that comes and goes

The stress never moves. The mark does:

singular	**plural**
el almac**é**n	los almac**e**nes
el exam**e**n →	los ex**á**menes

Almacén ends in **n** with the stress on the last syllable, which is not the default, so it needs a mark. Add *-es* and the stress is now on the second-to-last syllable, which **is** the default — so the mark comes off. *Examen* runs the opposite way for the same reason, and having the two side by side is the clearest way to see that the accent is a correction to a rule, not a property of the word.

The word, taken apart — and its English cousins

Arabic **al-makhzan**, the storehouse — from *khazana*, to store up. The **al-** is the Arabic definite article, and Spanish swallowed it whole. That happened to hundreds of words during the centuries of Arabic rule, and once you know the sign you can spot them: *almohada*, *alcalde*, *alfombra*, *algodón*, *azúcar*, *aceite*. Every *al-* at the front of a Spanish word is worth a second look.
So *el almacén* is, strictly, "the the-storehouse". Spanish was not troubled by this and neither is English, which took *magazine* from the same Arabic word by way of French — a store of articles, and then a store of ammunition.

Your turn

Say these aloud:

- it's in the stockroom
- the plural, and say whether it keeps the accent
- what the *al-* at the front is

Before you move on

The warehouse? (**El almacén**.) The plural? (**Los almacenes**, no accent.) Which English word is its cousin? (**Magazine**.)

452.2 la ruta — the way through

Say **roto** and **la calle**. One of those two is about to turn up inside a word for a road.

You'll want to know: la ruta

la ruta — the route.

La ruta del reparto — the delivery round. *Cambiar de ruta* — to change route. *La ruta más corta* — the shortest way. *En ruta* — on the way.

It is the word for a **planned** road, which is why a delivery driver, a bus company and a hiking map all use it. The street itself stays *la calle*; the line you trace across several of them is *la ruta*.

Grammar Lens: ruta, camino, calle

Three words an English speaker would cover with "road" or "way":

what it is	the word
the street with the houses on it	**la calle**
the path underfoot	**el camino**
the plan of where to go	**la ruta**

Voy por la calle Mayor — I'm going along a particular street. *El camino está mojado* — the path is wet, something you can stand on. *La ruta pasa por tres pueblos* — the route goes through three villages, which is a fact about the plan and not about any surface.

The word, taken apart — and its English cousins

Latin **via rupta** — a **broken** way.

Rupta is the participle of *rumpere*, to burst or break, and it is the very word you already have in **roto**. A *via rupta* was a road forced through what was in the way: trees felled, rock broken, a line opened where there had been none.

Latin then dropped the *via* and kept the adjective, which is how a word meaning "broken" ended up meaning "route". French wore it down to *route*, and Spanish took *ruta* from French. English took it from French too, as **route**, and also as **rout** — an army broken open — and **routine**, a way so well worn that you no longer choose it.

So *roto* and *ruta* are one Latin word: *roto* inherited, *ruta* borrowed back. A broken plate and a road through a mountain are the same

idea applied to two different obstacles.

Your turn

Say these aloud:

- the delivery route leaves from the warehouse
- we have to change route
- what *roto* and *ruta* have in common

Before you move on

The route? (**La ruta**.) The street? (**La calle**.) What did *via rupta* mean? (**A broken way** — forced through.)

452.3 el seguimiento — where the parcel is

Say **seguir** and **el entrenamiento**. Put the ending of the second onto the first.

You'll want to know: el seguimiento

el seguimiento — tracking, and in a clinic or an office, follow-up.

El número de seguimiento — the tracking number. *Hacer seguimiento de un pedido* — to track an order. *Una consulta de seguimiento* — a follow-up appointment.

Whatever is being followed, the word is the same: a parcel across a country, a patient across six months, a complaint across three departments.

Grammar Lens: you could have built this yourself

Seguir you have had for chapters. **-miento** you met on *entrenamiento*. Put them together and the word comes out with its gender attached:

verb	noun
entrenar	el entrena**miento**
seguir	el segui**miento**
sentir	el senti**miento**

Masculine, all of them, as every **-miento** noun is. And note what

happened to the stem: *seguir* has an **i** that *sigo* turns into... nothing you need here, because **-miento** attaches to the calm form of the verb, not the shouting one.
This is the point at which Spanish vocabulary starts paying compound interest. A verb plus a known ending is not a new word to learn; it is two things you own, joined.

The word, taken apart — and its English cousins

Latin **sequi**, to follow. It is a root you have been walking past for a long time.
Enseguida — *en seguida*, "in following" — is next-thing-along turned into right-away. And the family in English is enormous: a **sequence** is things following each other, a **consequence** is what follows from something, a **sequel** follows a film, and a **second** is the one that follows the first.
Perseguir is to follow all the way through, and *conseguir* — to get hold of something — is to follow it until you have it. Spanish named succeeding after the chasing.

Your turn

Say these aloud:

- the tracking number
- I'm going to track the order
- which verb is inside *enseguida*

Before you move on

Tracking? (**El seguimiento**.) What gender do *-miento* nouns take? (**Masculine**.) What does Latin *sequi* mean? (**To follow**.)

452.4 cómodo — comfortable, and convenient

Say **el modo** and **duro**. A hard mattress and a comfortable one are about to be the same question.

You'll want to know: cómodo

cómodo — comfortable, and also convenient.

Un sillón muy cómodo — a very comfortable armchair. *¿Estás cómodo?* — are you comfortable? And the other half: *una ruta más cómoda* — an easier route. *A la hora que te sea más cómoda* — whenever suits you best.

So it covers both the cushion and the convenience, where English needs two words. **La comodidad** is the noun, and **incómodo** the opposite, for a chair and for a silence alike.

Grammar Lens: the false friend runs one way only

English **commodious** means roomy, and that is not what *cómodo* means. The trap is worth naming because it is asymmetric:

you want to say	Spanish
a comfortable chair	*una silla* ***cómoda***
a convenient time	*una hora* ***cómoda***
a roomy flat	*un piso* ***amplio***

Going from Spanish to English, *cómodo* is safe — "comfortable" is nearly always right. Going the other way, "commodious" will not get you there and *amplio* will.

The word, taken apart — and its English cousins

Latin **commodus**: **com-**, with, plus **modus**, a measure — the same *modus* inside **el modo**.

Something *commodus* was "with measure": the right size, fitted to its purpose, neither too much nor too little. From there the road to "comfortable" is short, because a thing that fits is a thing that does not chafe.

The measuring sense survives in English **accommodate**, to make something fit, and in **commodity**, which began as a thing that suited you before it meant a sack of wheat. Spanish keeps the plainest version: a chair that fits you is *cómodo*, and so is a time that fits your day.

Your turn

Say these aloud:

- a very comfortable armchair
- whenever suits you best

- which Spanish word you would use for a roomy flat

Before you move on

Comfortable? (**Cómodo**.) What is the *modus* inside it? (**A measure** — a thing that fits.) The opposite? (**Incómodo**.)

452.5 (el almacén, la ruta, el seguimiento, cómodo) — from cold

From memory alone, say all four: *the warehouse*, *the route*, *the tracking*, *comfortable*.

Grammar Lens: three accents, three different jobs

Two of this chapter's words carry a written accent, and they carry it for opposite reasons:

word	why the mark is there
almac**é**n	stress on the last syllable, ending in *n*
c**ó**modo	stress three syllables from the end

Spanish defaults to the second-to-last syllable for a word ending in a vowel, *n* or *s*. *Almacén* breaks that by going later; *cómodo* breaks it by going earlier. Both need a mark to say so, and *ruta* and *seguimiento* need none because both obey the default.

That is why *almacenes* loses the accent while *cómodos* keeps it. The mark is a **correction to a rule**, not a decoration attached to a word, so it appears and disappears as the word changes shape.

Grammar Lens: two of the four were already yours

new word	what it was built on
la ruta	*roto* — Latin *via rupta*, a broken way
el seguimiento	*seguir* plus the *-miento* of *entrenamiento*
cómodo	*el modo*, a measure, with *com-* in front

La ruta is the one to keep. You learned *roto* for a plate in two halves, and the same Latin participle names a road — because a road is what you get when something in the way has been broken through.
Only **el almacén** arrived from outside the family, and it came from Arabic with its article still stuck to the front.

Your turn

Say these aloud:

- the route starts at the warehouse
- give me the tracking number
- which two of the four keep an accent in the plural

Before you move on

All four again, in Spanish, without looking. Then one sentence that sends a parcel somewhere.

452.6 (el aviso de entrega) — read it, then do it yourself

Say **el seguimiento** and **el almacén**. The card below sends you to one using the other.

Your turn

A card through the letterbox. *Read it:* the card, then answer

AVISO DE ENTREGA

Hemos pasado a las 11:40 y no había nadie.

Su paquete vuelve al **almacén** esta tarde.

Consulte el **seguimiento** con el número 4471-XK.

Puede recogerlo mañana o pedir una segunda entrega a la hora que le resulte más **cómoda**.

Say these aloud:

- where the parcel is going now
- the two things you are allowed to do tomorrow
- what the number is for

Why it's said this way

A la hora que le resulte más cómoda is the phrase to take away whole. It is how Spanish says "whenever suits you", and *cómoda* there has nothing to do with comfort — it is the convenience half of the word, agreeing with *la hora*.
Then notice what the card does **not** say. There is no *nosotros* after the first line: *su paquete vuelve*, *puede recogerlo*. Spanish keeps the company out of it and lets the parcel be the subject. The one place the firm appears — *hemos pasado* — is the one fact it is claiming responsibility for.
And **consulte** is the *usted* command again, the register of every counter and every card of this kind.

Before you move on

Now your turn, out loud. Four lines for a delivery card: say nobody was in, say the parcel goes back to the warehouse, give a tracking number to check, and offer a time that suits them.
Write it: the same four lines
Then check yourself: did *cómoda* agree with *la hora*, and did you use the *usted* command?

Chapter 453

El turno

Modes: **voice** (5) **eyes** (1) **Hands-free start:** the first 4 of 6 lessons.

> ***By the end of this chapter:*** I can read the rota taped up in a stairwell: say whose week it is, say what is and is not included, and check the sheet before changing anything.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

453.1 la limpieza — the cleaning

> Say **limpio** and **la mudanza**. One is a description, the other names a job of work. You are about to turn the first into the second.

You'll want to know: la limpieza

la limpieza — cleaning, the cleaning.

El turno de limpieza — the cleaning shift. *Productos de limpieza* — cleaning products. *La limpieza del portal es los martes* — the entrance hall is cleaned on Tuesdays.

It names the activity, not the state. For the state you still say *está limpio*. **Limpiar** is the verb: *hay que limpiar la cocina*.

Grammar Lens: four endings, four genders settled

You now have the full set of Spanish's everyday noun-makers:

ending	example	gender
-anza	la mud**anza**	feminine
-miento	el segui**miento**	masculine
-eza	la limpi**eza**	feminine
-ción	la instala**ción**	feminine

Three of the four are feminine, and **-miento** is the one to remember as the exception. Learn the ending and the article stops being a guess. Which ending a given word takes is not predictable — *limpieza* and not *limpiamiento*, *seguimiento* and not *seguianza* — and there is no rule waiting to be found. What is reliable is the gender, and that is most of what you needed.

-eza attaches to adjectives rather than verbs: *limpio* gives *limpieza*, *triste* gives *tristeza*, *pobre* gives *pobreza*. It names the quality, and in this one case also the work of producing it.

The word, taken apart — and its English cousins

Latin **limpidus**, clear — as in water you can see through.

English took the same word as **limpid**, and kept it for water and for prose. Spanish let it drift from "clear" to "clean", which is a short walk: a clear stream is a clean one.

Another Latin word for gleaming, *nitidus*, came in as *neto* by way of Catalan or French *net*, and it survives in *el peso neto* on a packet. Where Spanish kept two, it usually gave them separate jobs.

Your turn

Say these aloud:

- the cleaning shift
- the kitchen is clean, using the adjective
- which of the four endings is masculine

Before you move on

The cleaning? (**La limpieza**.) The verb? (**Limpiar**.) What did *limpidus* mean? (**Clear** — see-through water.)

453.2 la instalación — the act, and the thing

Say **arreglar** and **la oficina**. Somebody put the heating into that building, and there is one word for both halves of that.

You'll want to know: la instalación

la instalación — the installation, the fitting: and also the thing fitted.

La instalación del aire acondicionado — putting the air conditioning in. *La instalación eléctrica es vieja* — the wiring is old. And in the plural, the premises: *las instalaciones deportivas* — the sports facilities.

Instalar is the verb, for a boiler and for a program alike.

Grammar Lens: -ción names the act and then the result

This double sense is not a quirk of one word. It is what **-ción** does:

word	the act	the result
la instalación	fitting it	the wiring
la construcción	building it	the building
la decoración	decorating	the decor

The noun names the doing, and then drifts onto whatever the doing left behind. When you meet a *-ción* word, expect both readings and let the sentence pick: *durante la instalación* is the act, *revisar la instalación* is the thing.

Every one is feminine, and every one takes an accent in the singular that it loses in the plural — *instalación*, *instalaciones* — for the reason *almacén* did.

The word, taken apart — and its English cousins

Old French **installer**: **in-** plus **stalle**, a stall — a seat in a choir, from a Germanic word for a standing-place.

To *install* somebody was to put them **in their stall**: to seat a canon in his place in the cathedral. The word began as ceremony, moved to furniture, and now means putting a boiler on a wall or software on a machine.

The Germanic *stall* is still around in English for a horse's, in *stall* the market stand, and in **stand** itself. A boiler and a cathedral canon are installed with the same word because both have been put where they belong.

Your turn

Say these aloud:

- the wiring is old
- the sports facilities are closed for cleaning
- what *-ción* nouns name besides the act

Before you move on

The installation? (**La instalación**.) The plural? (**Las instalaciones**, accent gone.) What was a *stalle*? (**A stall** — a standing-place, a seat.)

453.3 rotativo — it comes round again

Say **la rueda** and **alrededor**. A third word off the same Latin wheel is coming.

You'll want to know: rotativo

rotativo — rotating, done in turns, on a rota.

Un turno rotativo — a rotating shift. *La limpieza es rotativa* — the cleaning goes round the neighbours. *Presidencia rotativa* — a chairmanship that passes from one member to the next.

The idea is always the same: the job does not stay with one person, it comes round. **Rotar** is the verb, and **la rotación** the noun with the ending from the lesson before this one.

Grammar Lens: -ivo describes what a thing does

-ivo makes an adjective meaning "of the kind that does this":

verb	adjective
rotar	rotat**ivo** — that rotates
informar	informat**ivo** — that informs
decorar	decorat**ivo** — that decorates

It is not about being in the act. A *turno rotativo* is not rotating at this moment; it is a shift **of the rotating kind**. The ending names a habit or a capacity, which is why *un cartel informativo* is informative

whether or not anybody is reading it.
English has the identical ending in *rotative*, *informative*, *decorative*, and uses it the same way.

The word, taken apart — and its English cousins

Latin **rota**, wheel — for the third time, and it is worth stopping on.

word	**how the wheel got in**
la rueda	straight down from *rota*, vowel broken by stress
alrededor	*retrō* bent sideways by *rota*
rotativo	lifted from *rota* whole, by scholars

Three words, three routes out of one Latin noun. *Rueda* is what centuries of speakers did to it. *Rotativo* is what a writer did to it in one step, keeping the **o** intact because it never passed through anybody's mouth on the way.
That difference — worn down by speech, or lifted whole from a book — is the single most useful thing to notice about Spanish vocabulary, and here you can see both outcomes of it side by side.

Your turn

Say these aloud:

- a rotating shift
- the cleaning goes round the neighbours
- why *rueda* has *ue* and *rotativo* does not

Before you move on

Rotating? (**Rotativo**.) The verb? (**Rotar**.) What does *-ivo* name — an action happening, or a habit? (**A habit or a capacity**.)

453.4 consultar — look it up

Say **revisar** and **el documento**. Both are about paper, and what you do to it differs.

You'll want to know: consultar

consultar — to look up, to check, to consult.

Consulte el horario — check the timetable. *Lo consulto y te digo* — I'll look into it and get back to you. *Consultar con el jefe* — to check with the boss.

Two nouns come with it: **la consulta**, which is both the query and a doctor's surgery, and **el consultorio**, the consulting room.

Grammar Lens: consultar, revisar, mirar

Three verbs that all come out as "check" in English, now separated by what you are after:

what you want	the verb
a fact you do not have	**consultar**
faults in something you do have	**revisar**
to aim your eyes at it	**mirar**

Consulto el horario — I do not know the time and the timetable does. *Reviso el horario* — I am checking the timetable for mistakes, which is a different errand entirely. *Miro el horario* — my eyes are on it, and the sentence has said nothing about why.

Note the preposition: you *consultar* a document directly, but *consultar* ***con*** a person. The **con** marks that the other party can answer back.

The word, taken apart — and its English cousins

Latin **consultare**, the repeated form of **consulere** — to take counsel, to deliberate.

The Roman **consul** is the same root: the officer who takes counsel for the state. And **el consejo** — advice, and a council — came down the spoken road from *consilium*, a close relation.

So *consultar* and *el consejo* are family, and the pair shows the split this chapter keeps meeting: *consejo* is worn smooth by centuries of speech, *consultar* was lifted from Latin by clerks with the **l** and the **t** still in place.

Your turn

Say these aloud:

- check the timetable

- I'll check with the boss and tell you
- which preposition goes before a person

Before you move on

To look up? (**Consultar**.) To check for faults? (**Revisar**.) Which Roman officer shares the root? (**The consul** — one who takes counsel.)

453.5 (la limpieza, la instalación, rotativo, consultar) — from cold

Close the lessons before this one. Say all four: *the cleaning*, *the installation*, *rotating*, *to look up*.

Grammar Lens: the same Latin word, twice, differently

Two pairs in this chapter show the single most useful fact about Spanish vocabulary: a Latin word can arrive **twice**, once through speech and once through books, and the two arrivals look nothing alike.

worn down by speech	**lifted from the page**
la r**ue**da	r**o**tativo
el cons**ejo**	cons**ultar**

The left-hand column went through hundreds of years of mouths: vowels broke, consonants softened, syllables fell out. The right-hand column was copied out by a clerk who could read Latin, so it kept its shape.

The practical payoff: when a Spanish word looks **more** like its Latin or English cousin, it is usually the later, bookish arrival — and it will belong to writing, forms and notices rather than to the kitchen. That is a register clue you can read straight off the spelling.

Grammar Lens: the four noun-makers, complete

ending	example	gender
-anza	la mudanza	feminine
-miento	el seguimiento	masculine
-eza	la limpieza	feminine
-ción	la instalación	feminine

Three feminine, one masculine. Which ending a word takes has to be met word by word; the gender never does.

Your turn

Say these aloud:

- the cleaning shift is on a rota
- check the timetable and tell me
- which of *rueda* and *rotativo* came through speech

Before you move on

All four again, in Spanish, without looking. Then one sentence putting somebody on a cleaning rota.

453.6 (el cuadro de turnos) — read it, then do it yourself

Say **la limpieza** and **rotativo**. The notice below puts them in the same line.

Your turn

A sheet taped inside the entrance hall. *Read it:* the sheet, then answer

TURNOS DE LIMPIEZA — ESCALERA B

La **limpieza** del portal es **rotativa**, una semana por vivienda.

Esta semana: 3º izquierda. La próxima: 3º derecha.

No se limpia la **instalación** de la caldera. De eso se encarga la empresa.

Para cambiar de semana, **consulten** el cuadro antes de escribir en él.

Say these aloud:

- whose turn it is this week and whose it is next
- the one thing the neighbours do not have to clean
- what you must do before changing your week

Why it's said this way

La instalación de la caldera is the noun in its second sense — not the act of fitting the boiler, which happened years ago, but the pipes and tank it left behind. Nothing in the sentence announces which reading is meant; *no se limpia* settles it, because you cannot clean an act.
Rotativa agrees with *la limpieza*, and it is doing the work of a whole English clause: "goes round the flats in turn". One adjective, because Spanish had a word for the wheel and built on it.
Then **consulten**: *ustedes*, plural and formal, the register of a notice addressed to every household at once. And *se encarga*, once again the *se* that lets a sentence say what happens without naming who.

Before you move on

Now your turn, out loud. Four lines for a stairwell notice: say the cleaning is on a rota, say whose week it is, say the boiler installation is not included, and tell people to check the sheet first.
Write it: the same four lines
Then check yourself: did *rotativa* agree with *la limpieza*, and did you use the *ustedes* command?

Chapter 454

La vía cortada

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can follow a road or rail closure: read the barrier notice, understand a delay announcement, say what caused it and what is running instead.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

454.1 la obra — the works

> Say **la oficina** and **arreglar**. There is a Latin word for *work* hiding in the first, and it is about to come out on its own.

You'll want to know: la obra

la obra — the works: building work, and the site it happens on.

> Calle cortada por **obras**.

Están de obras — they have the builders in. *La obra empieza en marzo* — work starts in March. *Un obrero* is a manual worker, and *la mano de obra* is labour.

It also means a work of art or a play — *una obra de teatro* — which is the same idea: a thing somebody made.

Grammar Lens: obras in the plural is the roadworks

Singular and plural point at different things here:

Spanish	what it names
la obra	the project, or the artwork
las obras	the works going on, the disruption

Every barrier and diversion sign in Spain says **OBRAS**, plural. A Spaniard saying *hay obras en mi calle* is complaining about noise and dust, not about a sculpture.
Keep *estar de obras* as a phrase: it describes a building in the state of being worked on, and *estar* is right because it is a condition that will pass.

The word, taken apart — and its English cousins

Latin **opera**, works — the plural of **opus**, a work, taken by Spanish as a singular feminine noun.
The same *opus* is inside **la oficina**, which is *opus* plus *facere*: the place where work gets done. So a builder's site and an office are the same Latin word, arriving by different routes and landing far apart.
Opera the music is the identical word again, borrowed through Italian: *the works*. And English **operate**, **operation** and **opus** are all here too. One Latin noun for work, and it has ended up meaning a hole in the road, a room with desks, and a night at the theatre.

Your turn

Say these aloud:

- street closed for works
- they have the builders in
- what *la obra* and *la oficina* share

Before you move on

The roadworks? (**Las obras**, plural.) A play? (**Una obra de teatro**.) What did Latin *opus* mean? (**A work**.)

454.2 la vía — the track

Say **el andén** and **todavía**. One of those two has a road inside it, and it is not the one at the station.

You'll want to know: la vía

la vía — the track, the way, the route.

Vía 4. Tren con destino Valencia.

No cruce la vía — do not cross the track. *La vía pública* — the public highway, the wording on every municipal notice. *Por vía aérea* — by air.

The **andén** is where you stand; the **vía** is the rails in front of it. A station announcement gives you both, and mixing them up will put you on the platform edge.

Grammar Lens: the accent that breaks a diphthong

vía is two syllables: **VÍ-a**. Without the accent, *via* would be one syllable, because **i** and **a** together normally fuse.

written	**syllables**
v**ía**	VÍ-a
d**ía**	DÍ-a
fam**ilia**	fa-MI-lia

The mark on the **i** is not about stress position at all here. It is there to say: **this vowel refuses to join the next one**. Spanish has no other way to write that, so the accent does double duty across the language — sometimes marking stress, sometimes prising two vowels apart. *Todavía* has it for the same reason, and you have been reading it correctly for chapters without being told why.

The word, taken apart — and its English cousins

Latin **via**, road — the word on every Roman milestone.
And here is the payoff. **Todavía** is *toda vía*: **all the way**. It meant "by every route, in any case", and from there slid to "still" — the sense of something that has gone the whole distance and is *still* going.
The family is everywhere once you see it: *el viaje*, a journey; *el viaducto*, a way carried over; English **via**, **obvious** (*ob-viam*, lying in the way), **trivial** (*tri-vium*, a place where three roads meet, so

common it is worth nothing), and **voyage**.

Your turn

Say these aloud:

- track 4, and do not cross the track
- which one is the platform and which the rails
- what *todavía* is made of

Before you move on

The track? (**La vía**.) How many syllables? (**Two** — the accent keeps them apart.) What does *todavía* literally say? (**All the way**.)

454.3 el accidente — what falls on you

Say **la ocasión** and **roto**. A chance and a breakage are about to meet in one Latin verb.

You'll want to know: el accidente

el accidente — the accident.

Ha habido un accidente en la vía — there has been an accident on the track. *Un accidente de tráfico* — a road accident. *Un accidente laboral* — an accident at work, the phrase on every insurance form.

Spanish says *tener un accidente*, and the adverb is **por accidente** — by accident, meaning unintentionally.

Grammar Lens: -cc- is two sounds, not one

accidente has a double **c**, and unlike English the two letters do different jobs:

letters	**sound**
first **c** (before *c*)	**k**
second **c** (before *i*)	**th** in Spain, **s** elsewhere

So the word is **ak-thi-DEN-te**, or **ak-si-DEN-te**. The rule underneath is one you already use: a Spanish **c** is hard before *a*, *o*, *u*

and another consonant, and soft before *e* and *i*.
The same double turns up in *acción*, *dirección* and *lección*. Once you hear the **k** in front of the soft one, these stop being awkward.

The word, taken apart — and its English cousins

Latin **accidere**: **ad-**, towards, plus **cadere**, **to fall**. A thing that falls upon you.
And **la ocasión** is the same *cadere*, with a different prefix — something that falls **to** you. Put the pair side by side and Spanish has a small map of luck:

word	**what falls, and how**
la ocasión	a chance falls your way
el accidente	a misfortune falls upon you

Neither was chosen by anybody. That is the whole idea the root carries, and it is why *accidental* in English still means unplanned rather than harmful.
The same *cadere* is in **caer**, to fall, and in English **cadence**, **decay** and **cascade**.

Your turn

Say these aloud:

- there has been an accident on the track
- I did it by accident
- how *ocasión* and *accidente* are related

Before you move on

The accident? (**El accidente**.) What does *cadere* mean? (**To fall**.) Which one lands *on* you, and which drops *in front of* you? (**Accidente** on you, **ocasión** in front of you.)

454.4 el servicio — the service

Say **servir** and **arreglar**. Somebody comes out to the accident to do the second, and what they belong to is coming next.

You'll want to know: el servicio

el servicio — the service.

El servicio de grúa — the recovery service, the tow truck. *Los servicios de emergencia* — the emergency services. *Fuera de servicio* — out of service, the sign on a broken lift or a stopped bus.

And the one that catches people out: **el servicio** on a door means **the toilet**. *¿Dónde está el servicio?* is how you ask, and *los servicios* is what the sign in a bar says.

Grammar Lens: fuera de servicio, and its cousins

Fuera de plus a bare noun is a fixed frame, and it turns up on notices constantly:

sign	what it means
fuera de servicio	out of order
fuera de plazo	past the deadline
fuera de temporada	out of season

No article after *de* in any of them. That bare noun is the signal that you are looking at a set phrase rather than a description, and trying to insert *el* will sound wrong to a Spanish ear for the same reason "out of the order" does to an English one.

Set beside **estropeado**, the difference is who is speaking: *fuera de servicio* is the institution's wording, *estropeado* is what a neighbour says.

The word, taken apart — and its English cousins

Latin **servitium**, from **servire**, to serve — and behind that **servus**, a slave.

That is the uncomfortable root of a very ordinary word, and it has not disappeared: *el siervo* is a serf, and English **servile** keeps the sting.

Spanish softened the rest of the family — *servir* is what a waiter does, *el servicio* is what a company sells — while the original sense stayed in the words nobody uses lightly.

English got **serve**, **servant** and **sergeant** from the same place. The last one is *serviens*, "one serving", which rose from servant to soldier to rank.

Your turn

Say these aloud:

- the emergency services are on the way
- the lift is out of service
- how you would ask for the toilet

Before you move on

Out of service? (**Fuera de servicio**.) The toilet? (**El servicio**.) What was a *servus*? (**A slave**.)

454.5 (la obra, la vía, el accidente, el servicio) — from cold

From memory alone, say all four: *the works*, *the track*, *the accident*, *the service*.

Grammar Lens: the plural is not always more of the same

Two of these four shift meaning when you add the **s**:

singular	**plural**
la obra — the project	*las obras* — the disruption
el servicio — the service	*los servicios* — the toilets

This is worth holding because the plural is the form you will actually read. Every diversion sign says **OBRAS** and every bar door says **SERVICIOS**, so the singular meanings you learned are the ones you will meet less often.

La vía and *el accidente* behave themselves and mean exactly more of the same thing.

Grammar Lens: every one of the four was already in the corpus

new word	where its root already was
la obra	*la oficina* — *opus* + *facere*
la vía	*todavía* — *toda vía*, all the way
el accidente	*la ocasión* — both from *cadere*, to fall
el servicio	*servir*

Todavía is the sharpest of the four. It is among the commonest words in the language, you have been using it for chapters, and the road was sitting inside it the whole time.
That keeps happening — *mira* gave *mirar*, *sí claro* will give *claro*, *el punto* gave *apuntar*. When a new word looks like a piece of something you already say, check before learning it twice.

Your turn

Say these aloud:

- the street is closed for works
- do not cross the track
- which two words change meaning in the plural

Before you move on

All four again, in Spanish, without looking. Then one sentence that closes a road.

454.6 (calle cortada) — read it, then do it yourself

Say **las obras** and **la vía**. Each one closes something below.

Your turn

Two notices on the same morning. *Read it:* both, then answer
1 — on a barrier

Calle cortada por **obras** hasta el día 12. Paso de peatones por la acera de enfrente.

2 — over the loudspeaker

Atención. Por un **accidente** en la **vía**, el tren con destino Valencia saldrá con retraso. El **servicio** de autobús sustituirá al tren hasta las once.

Say these aloud:

- how long the street is shut, and where to walk
- why the train is late
- what is replacing it, and until when

Why it's said this way

Por un accidente en la vía is doing the work of an English clause — "because there has been an accident on the line". *Por* plus a noun is how Spanish gives a cause on a notice, and it is shorter than any sentence you could build with *porque*. The same shape opened the first notice: *cortada por obras*.
Then notice **el servicio de autobús sustituirá al tren**. The announcement names the *service*, not the buses, and the service is what acts. An English announcement would more likely say "buses will replace the train". Spanish prefers the institution as the subject in this register, which is the opposite of what the delivery card did — and the difference is that a card is apologising while an announcement is informing.
Cortada agrees with *la calle*: feminine, because the street is.

Before you move on

Now your turn, out loud. Four lines: say the street is closed for works, say until when, say there has been an accident on the track, and say a bus service is replacing the train.
Write it: the same four lines
Then check yourself: did you use *por* plus a noun to give the reason, and did *cortada* agree with what it describes?

Chapter 455

La habitación

Modes: **voice** (6) **eyes** (1) **Hands-free start:** the first 4 of 7 lessons.

> ***By the end of this chapter:*** I can get a room ready and say so: what I have painted and what colour, what to put where, and what to hang out if the sun comes out.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

455.1 pintar — to paint

> Say **verde** and **arreglar**. One way of fixing a room is to change its colour.

You'll want to know: pintar

pintar — to paint, both walls and pictures.

Voy a pintar la cocina de verde — I'm going to paint the kitchen green. *Recién pintado* — wet paint, the wording on the sign. *¿Quién pintó esto?* — who painted this?

Note the **de** in *pintar de verde*. Spanish marks the resulting colour with *de*, where English puts the adjective straight after the object.

La pintura is both the paint in the tin and the painting on the wall.

Grammar Lens: recién plus a participle

Recién means "newly" or "a moment ago", and it attaches only to participles:

sign	what it means
recién pintado	wet paint
recién llegado	newly arrived
recién casados	newlyweds

In Spain it never stands alone and never modifies a normal adjective — *recién limpio* is not said. Take it as half of a two-word unit whose other half ends in *-ado* or *-ido*.
Much of Latin America is freer with it. *Recién llegué* — I arrived a moment ago — and *recién ayer* are ordinary in the Southern Cone, where *recién* behaves like a plain adverb of time.
The participle agrees: *recién pintada* for *la pared*, *recién pintados* for *los bancos*.

The word, taken apart — and its English cousins

Latin **pingere**, to paint — a verb that also meant to **embroider**, and behind both of those an older word for **pricking or cutting a mark** into a surface.
So painting and needlework were one verb in Latin, because both put a design onto cloth. The relatives come off the painting side: English **picture**, **pigment**, **paint** and **pictorial**, and Spanish **pintoresco** — worth-painting — whose English partner, **picturesque**, came from Italian through French.
The Latin participle *pictus* is where the harder consonants survived: Spanish kept the soft, spoken *pintar* and borrowed the bookish *pictórico* alongside it. Another pair arriving twice, by the two roads.

Your turn

Say these aloud:

- I'm going to paint the kitchen green
- wet paint, as the sign puts it
- which preposition goes before the colour

Before you move on

To paint? (**Pintar**.) Wet paint? (**Recién pintado**.) What else did *pingere* mean? (**To embroider** — both put a design on cloth.)

455.2 el dormitorio — the bedroom

Say **dormir** and **el piso**. Name the room in the second where you do the first.

You'll want to know: el dormitorio

el dormitorio — the bedroom.

Un piso de dos dormitorios — a two-bedroom flat, the wording in every advert. *El dormitorio da al patio* — the bedroom looks onto the courtyard.

La habitación also covers it in speech — *mi habitación* is what a child says — but a property listing counts *dormitorios*, because *habitación* means any room at all.

Grammar Lens: the vowel that has been breaking all along

You met **duermo** early on, as a verb that changes its stem. It is the same single rule you have now seen in a noun, an adjective and a conjugation:

plain o	**stressed, so ue**
d**o**rmir, d**o**rmitorio	d**ue**rmo
r**o**dar	la r**ue**da
m**o**strar	m**ue**stro

Dormitorio keeps the plain **o** because the stress lands on the **-to-**, three syllables along. Say *dormitorio* and *duermo* one after the other and you can hear the vowel change as the stress moves.

Nothing here is irregular. One vowel, one condition, and it has been running under the language since the first weeks of it.

The word, taken apart — and its English cousins

Latin **dormitorium**, a sleeping place — from **dormire**, to sleep.

-orio names the place where something is done, and once you have it you can read a lot of signs:

word	the place for
el dormit**orio**	sleeping
el laborat**orio**	working
el velat**orio**	keeping watch over the dead

English took *dormitorium* whole as **dormitory**, and shortened it to *dorm*. It also has **dormant**, lying asleep, and the **dormouse**, probably named for how much of the year it spends doing exactly that.

Your turn

Say these aloud:

- a two-bedroom flat
- I sleep, then the name of the room
- why *dormitorio* has no *ue*

Before you move on

The bedroom? (**El dormitorio**.) What does *-orio* name? (**The place where something is done**.) Why no *ue*? (**The stress is elsewhere**.)

455.3 claro — light, and clear

Say **sí, claro** and **verde**. You have been saying the first for a very long time. This lesson is about what its second word means.

You'll want to know: claro

claro — light, pale, bright, clear.

Un dormitorio muy claro — a very light bedroom, one that gets the sun. *Verde claro* — light green. *Azul claro* — pale blue. The opposite is **oscuro**, dark.

Beyond colour: *el agua está clara* — the water is clear. *No me queda claro* — I'm not clear about it.

Grammar Lens: the word you have been using without meeting

Sí, claro has been in your mouth since early on, as a way of agreeing — "yes, of course". You were told then that it is Latin *clarus*, bright — but never that you could point it at a wall, because the phrase does not need the colour sense to work.
It is the same word. *Claro* on its own means **it's clear**, and agreeing with somebody by saying "clear!" is how Spanish arrives at "of course".

what you say	what it is doing
sí, claro	of course — the fixed phrase
un cuarto claro	a light room — the adjective
claro que sí	of course — the phrase, emphasised

This is the fourth time a fixed phrase has turned out to have an ordinary word inside it. *Mira* gave you *mirar*, *el punto* gave *apuntar*, *interesante* gave *interesar*, and now *sí, claro* gives *claro*.
Check every new word against the phrases you already say. By this stage of a language, a surprising share of new vocabulary is not new.

Grammar Lens: colour words with claro and oscuro

A colour modified by *claro* or *oscuro* **stops agreeing**:

one thing	more than one
una pared verde	*unas paredes verd**es***
una pared verde claro	*unas paredes verde claro*

Add the shade and the pair freezes. The reason is that *verde claro* is standing in for "of a light green colour" — a description of the shade rather than of the walls — and Spanish leaves such compounds unchanged.

Your turn

Say these aloud:

- a very light bedroom
- light green walls, plural
- what *claro* is doing inside *sí, claro*

Before you move on

Light, pale? (**Claro**.) The opposite? (**Oscuro**.) Does *verde claro* agree in the plural? (**No** — it freezes.)

455.4 tender — hang it out

Say **la tienda** and **limpio**. A shop is about to turn out to be a stretched thing.

You'll want to know: tender

tender — to hang out, to spread, to stretch out.

Voy a tender la ropa — I'm going to hang the washing out. *El tendedero* — the airer or the washing line. *Tender la mano* — to hold out your hand.

In a flat with no garden this is daily vocabulary, and the sign in a stairwell saying *no tender ropa en la fachada* is asking you not to hang washing on the front of the building.

Grammar Lens: tender is an e-to-ie verb

The same break you have watched all chapter, one vowel over:

stress on the stem	stress on the ending
t**ie**ndo, t**ie**ndes	tend**e**mos
t**ie**nde, t**ie**nden	tend**é**is

And now say **tiendo** and **la tienda** together. They are the same shape, because *la tienda* **is** this verb: a shop was a stretched awning, a cloth tent pulled open over a market stall.

The shop chapter named that cloth when it taught *la tienda*; here is the verb it was named from, so the noun and its verb finally sit together. *Tienda de campaña* — a camping tent — kept the original object entirely.

The word, taken apart — and its English cousins

Latin **tendere**, to stretch.

The family in English is long: **tend**, **tent**, **tension**, **extend**, **intend**, **pretend** — to stretch something out in front of you — **attention**, a stretching towards.

Spanish has the whole set too: *tender*, *la tienda*, *extender*, *pretender*, *la tensión*, *atender*. Every one of them is something being pulled taut, either a cloth or a mind.

Your turn

Say these aloud:

- I'm going to hang the washing out
- I hang out, using the stem-changing form
- what a *tienda* originally was

Before you move on

To hang the washing out? (**Tender la ropa**.) I hang out? (**Tiendo**.) What does *tendere* mean? (**To stretch**.)

455.5 meter — put it in

Say **el permiso** and **la caja**. There is a Latin verb inside the first, and you are about to use it on the second.

You'll want to know: meter

meter — to put in, to put inside.

Mete la ropa en la caja — put the clothes in the box. *Meter la llave* — put the key in. *Se ha metido en la cama* — he's got into bed.

Meterse also does the social senses: *no te metas* — don't interfere. *Meterse con alguien* — to pick on somebody.

Grammar Lens: meter is not poner

Both come out as "put" and they are not interchangeable:

what you are doing	the verb
putting something **inside** something	**meter**
putting something **somewhere**	**poner**

Pon el libro en la mesa — on the table, a surface. *Mete el libro en la*

caja — into the box, an inside. Swap them and a Spanish speaker will picture you burying a book in a table.
Meter nearly always brings **en** with it, because "in" is the whole idea of the verb. If there is no inside, you want *poner*.

The word, taken apart — and its English cousins

Latin **mittere**, to send — and its participle *missus*.
Spanish wore the plain verb down to *meter* and shifted it from sending to inserting, which is a short move: to send a thing into a box is to put it there. The bookish arrivals kept the shape: *admitir*, *permitir*, *emitir*, *transmitir*.
And there it is in a word you already have. **El permiso** is *per-* plus *missus*: something **sent through**. English took the same set as **permit**, **admit**, **mission**, **missile** and **message** — every one of them a sending.
So *meter la ropa en la caja* and *pedir permiso* run on one Latin verb, one worn smooth and one carried in from the page.

Your turn

Say these aloud:

- put the clothes in the box
- put the book on the table, choosing the right verb
- what *el permiso* has to do with *meter*

Before you move on

To put inside? (**Meter**.) Which preposition follows it? (**En**.) What does *mittere* mean? (**To send**.)

455.6 (pintar, el dormitorio, claro, tender, meter) — from cold

From memory alone, say all five: *to paint*, *the bedroom*, *light*, *to hang out*, *to put in*.

Grammar Lens: the fourth phrase to give up a word

what you already said	the word inside it
interesante	**interesar**
mira	**mirar**
el punto	**apuntar**
sí, claro	**claro**

And **la tienda** joins them from the other direction: a shop turned out to be this chapter's verb, a stretched awning.
Claro is the strongest case yet, because *sí, claro* is among the first things anybody learns to say in Spanish and among the commonest things anybody says. You were told back then that it means *bright* — and still never once used it to describe a room, because agreeing with somebody asks nothing of the colour sense.
The habit to keep: when a new word resembles a phrase you already use, look for the connection before learning it twice.

Grammar Lens: two verbs that both mean put

the picture	the verb
into an inside	**meter** — *meter en la caja*
onto or at a place	**poner** — *poner en la mesa*

Meter comes with **en** because "in" is the verb's whole meaning. If nothing encloses the thing, *poner* is what you want.
The same test sorts *pintar de verde*, where **de** marks a resulting colour. Spanish tells you a great deal through its prepositions, and each of these verbs carries one it will not give up.

Your turn

Say these aloud:

- I'm painting the bedroom a light green
- put the clothes in the box
- which verb you use for a surface

Before you move on

All five again, in Spanish, without looking. Then one sentence about getting a room ready.

455.7 (dejar el piso listo) — read it, then do it yourself

Say **pintar** and **claro**. The message below uses them in the same line, and one of them is not about colour.

Your turn

A message between two people sharing a flat. *Read it:* the message, then answer

> Oye, mañana viene mi hermana.
>
> He **pintado** el **dormitorio** de azul **claro** y huele fuerte, así que deja la ventana abierta.
>
> ¿Puedes **meter** las cajas del pasillo en el trastero? No me ha dado tiempo.
>
> Y si sale el sol, **tiende** las toallas antes de irte. Gracias.

Say these aloud:

- what colour the bedroom is now, and what to do about the smell
- the two jobs being asked for
- what has to happen before the towels go out

Why it's said this way

De azul claro carries both of this chapter's small grammar points at once. *De* marks the resulting colour, and *azul claro* does **not** agree with anything — no *azules claros* even if there were several walls, because the pair has frozen into a name for the shade.
Meter las cajas en el trastero is *meter* doing exactly its job: a

storeroom is an inside, and *poner* would be wrong. Then **tiende** is the *tú* command of a stem-changing verb, so the **ie** is there — *tiende*, never *tende*.
Notice the register throughout. *Oye*, *¿puedes…?*, *deja* — every one is *tú*, because this is a flatmate and not a counter. Set it beside the notices in the chapters before this one and the difference is visible in the verb endings alone.

Before you move on

Now your turn, out loud. Four lines to a flatmate: say you have painted the bedroom a light colour, ask them to put the boxes in the storeroom, ask them to hang the washing out, and say why.
Write it: the same four lines
Then check yourself: did you use *de* before the colour, *meter* for the inside, and the *tú* forms throughout?

Chapter 456

La cuenta

Modes: **voice** (5) **eyes** (2) **Hands-free start:** the first 4 of 7 lessons.

> ***By the end of this chapter:*** I can order from a set menu and then read the bill: name a first course, tell a price from a charge, query something that was added, and ask whether they take cards.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

456.1 la ensalada — the salted thing

> Say **la sal** and **la verdura**. Put the first on the second and you have named a dish.

You'll want to know: la ensalada

la ensalada — the salad.

Una ensalada mixta — a mixed salad, the standard one on every menu: lettuce, tomato, onion, tuna, olives. *De primero, ensalada* — salad to start.

Ensaladilla is not a small salad. *La ensaladilla rusa* is a cold dish of potato, carrot, tuna and mayonnaise, and it is a fixture in bars.

Grammar Lens: ordering a course

A set menu comes in courses, and Spanish names them with **de**:

Spanish	what it covers
de primero	for a first course
de segundo	for a main
de postre	for pudding

De primero, una ensalada is a complete order. No verb is needed, and adding *quiero* makes it heavier rather than politer — the waiter has asked what you are having for each course, and the phrase answers exactly that.

The word, taken apart — and its English cousins

Ensalada is *en-* plus *sal*: a thing that has been **salted**.
It came from Catalan or Occitan and reached English as **salad** through French, wearing the salt down to nothing on the way. Spanish kept it visible, which is the whole point of stopping here — the dish is named after the dressing, not after the leaves.
The same **sal** is in **la salsa**, a sauce, and in **el salario** — Latin *salārium* is built on *sal*, and that much is solid. The famous story attached to it is not: no Roman source says soldiers were paid in salt, and the salt lesson has already warned you that the tale is an eighteenth-century invention. A salad, a sauce and a salary share a root; they do not share that anecdote.

Your turn

Say these aloud:

- a mixed salad
- salad to start, using the first-course phrase
- what *ensalada*, *salsa* and *salario* share

Before you move on

The salad? (**La ensalada**.) For a first course? (**De primero**.)
What is inside the word? (**Sal** — it is the salted thing.)

456.2 el cargo — what has been put on the bill

Say **el carrito** and **la cuenta**. A cart carries a load, and so does a bill.

You'll want to know: el cargo

el cargo — the charge: an amount put onto a bill or an account.

Hay un cargo de doce euros — there's a twelve-euro charge. *Un cargo por servicio* — a service charge. *Sin cargo* — free of charge, the wording on a receipt.

Cargar is the verb — *me han cargado dos veces*, they've charged me twice — and it also means to load, and to charge a phone.

Grammar Lens: cargo is not precio

what you mean	the word
what a thing costs	**el precio**
an amount added to your bill	**el cargo**

El precio de la ensalada is on the menu; *un cargo en la cuenta* is something a business has placed there, and you may be querying it. That is why *cargo* turns up on disputes and *precio* does not: a *precio* is announced in advance, a *cargo* appears afterwards.

El cargo has a third life as a post or office — *el cargo de director* — for the same reason: a job is a load somebody carries.

The word, taken apart — and its English cousins

Latin **carricare**, to load a cart, built on **carrus** — the cart itself, which Spanish kept as *el carro* and shrank into **el carrito**.

So a charge on your bill is a **load put onto a cart**, and the picture holds in every branch of the family: **la carga** is a load, **el cargamento** is cargo, and **descargar** is to unload — or to download, which is unloading onto your machine.

English has the same *carricare* twice, by two different doors: **charge** came through French, and **cargo** was taken straight from Spanish in the seventeenth century. Two English words, one Latin verb, and one of them is this very Spanish noun.

Your turn

Say these aloud:

- there's a twelve-euro charge on the bill
- free of charge
- which word is on the menu and which on the bill

Before you move on

The charge? (**El cargo**.) Free of charge? (**Sin cargo**.) What was a *carrus*? (**A cart** — the same one inside *el carrito*.)

456.3 aceptar — we take that here

Say **pagar** and **la cuenta**. The question is whether they take the card.

You'll want to know: aceptar

aceptar — to accept.

No se **aceptan** tarjetas.

¿Aceptan tarjeta? — do you take card? *Acepto* — I accept, on a form or a screen. *Aceptar las condiciones* — to accept the terms.

It is the verb of agreeing to something offered: money, terms, an invitation, an apology.

Grammar Lens: aceptar is not admitir

Both come out as "accept" in English and they part company on a bill:

what is happening	the verb
you agree to take what is offered	**aceptar**
you let something in, or own up to it	**admitir**

Aceptan tarjeta — they will take your card. *No se admiten perros* — dogs are not let in. And *admitir un error* is to own up to one, where *aceptar un error* would mean putting up with it.

The test is direction: *aceptar* is about **agreeing**, *admitir* about **letting through**.

The word, taken apart — and its English cousins

Latin **acceptare**, built on **accipere**: **ad-**, towards, plus **capere**, **to take**.
So to accept is to take a thing **towards yourself**, and the direction is the whole meaning. Something you did not take towards yourself, you did not accept.
Capere is one of Latin's most productive verbs and you meet it constantly in English: **capture**, **capable**, **captive**, **receive** (*re-capere*, take back), **deceive**, **conceive**, **perceive**. Spanish has *capaz*, *captar*, *recibir* and *percibir* from the same stem.
The **c** before **e** is soft, so *aceptar* is *a-thep-TAR* in Spain and *a-sep-TAR* elsewhere — the same rule that gave you *accidente*.

Your turn

Say these aloud:

- do you take card?
- cards are not accepted, as the sign puts it
- which verb fits a sign about dogs

Before you move on

To accept? (**Aceptar**.) What does *capere* mean? (**To take**.) Which direction does the *ad-* give it? (**Towards you**.)

456.4 el coste — what it comes to

Say **costar** and **el precio**. The verb has a noun of its own, and it is not *precio*.

You'll want to know: el coste

el coste — the cost.

El coste total — the total cost. *El coste del envío* — the cost of postage. *Sin coste adicional* — at no extra cost.

In Latin America you will more often hear **el costo**; Spain says *coste*. Both are the noun sitting beside *costar*.

Grammar Lens: coste, precio, cargo

Three words now stand between you and a bill you can read:

what it names	the word
what the seller asks	**el precio**
what it works out at for you	**el coste**
an amount added to your account	**el cargo**

El precio is a number on a label. *El coste* is what the thing ends up costing once postage and the rest are in — which is why a business talks about *costes* and a shop window shows *precios*.

The word, taken apart — and its English cousins

Latin **constare**: **con-**, together, plus **stare**, **to stand**.
Constare meant to stand firm, to be settled — and from "this is settled" it became "this is what it comes to". The price is the point at which the matter stands still.
English took the same verb twice. Through French it wore down to **cost**; lifted straight from Latin it gave **constant**, a thing that stands firm. *Coste* and *constant* are one word, and you can hear the *n* that Spanish dropped and English kept.
The *stare* underneath is the one inside **estar**, and that is the sense to hold: a cost is a standing, a place the reckoning comes to rest.

Your turn

Say these aloud:

- the total cost, and at no extra cost
- the verb that goes with it
- which of *precio* and *coste* is on a price tag

Before you move on

The cost? (**El coste**.) What does *constare* mean? (**To stand firm**.) Which English word kept the *n*? (**Constant**.)

456.5 la agencia — somebody who acts for you

Say **la agenda** and **la oficina**. One of those two is about to turn out to be a relative.

You'll want to know: la agencia

la agencia — the agency.

Una agencia de viajes — a travel agency. *La agencia inmobiliaria* — the estate agent's. *Lo he reservado por agencia* — I booked it through an agency.

El agente is the person. And the thing an agency charges you for its trouble is **la comisión**, which appears on the bill beside the *coste*.

Grammar Lens: -encia names the doing, again

You have a set of noun-making endings now, and this is another:

ending	example
-anza	la mudanza
-miento	el seguimiento
-encia	la agencia

-encia and its twin **-ancia** come off Latin present participles, which is why they so often name an activity or a quality: *la paciencia*, *la distancia*, *la experiencia*, *la importancia*.

Every **-encia** and **-ancia** noun is feminine. Set beside *-anza*, *-eza* and *-ción*, that is five feminine suffix families against the masculine *-miento*. Keep the claim on the **suffixes**, though, not on abstract nouns in general — *el coste* and *el cargo* from this same chapter are masculine and end in neither. What the endings buy you is an article you no longer have to guess at, one ending at a time.

The word, taken apart — and its English cousins

Latin **agere**, **to do**, **to drive**, **to act**.
An *agencia* is a place that **acts on your behalf**, and an *agente* is the one doing the acting. Now look at **la agenda**, which you already have: it is *agenda*, "the things that must be done" — a Latin plural that Spanish took as a singular noun.
So your diary and a travel agency are the same verb: one lists what must be done, the other does it for you.
English is full of the family too — **agent**, **agenda**, **act**, **agile**, **agitate** — and Spanish keeps *el acto*, *la acción*, *exigente* and *ágil* off the same root.

Your turn

Say these aloud:

- a travel agency
- I booked it through an agency and the cost was higher
- what *la agenda* literally means

Before you move on

The agency? (**La agencia**.) The person? (**El agente**.) What does *agere* mean? (**To do, to act**.)

456.6 (la ensalada, el cargo, aceptar, el coste, la agencia) — from cold

From memory alone, say all five: *the salad*, *the charge*, *to accept*, *the cost*, *the agency*.

Grammar Lens: three words for money on a page

what it names	the word	where you see it
what the seller asks	el precio	a label
what it comes to for you	el coste	a quote
what has been added	el cargo	a bill

The order is the order of a transaction: you read a *precio*, you work out a *coste*, and afterwards a *cargo* appears. Any of the three translated as "price" will read as slightly wrong to a Spanish speaker in two of the three places.

Grammar Lens: four of the five were relatives

new word	what it was built on
la ensalada	*la sal* — the salted thing
el cargo	*el carrito* — a load on a cart
el coste	*costar*, and *estar* underneath it
la agencia	*la agenda* — things to be done

La agencia is the neat one. Your **agenda** is a Latin plural meaning "the things that must be done", and an **agencia** is a firm that does them for you. Diary and travel agent, one verb.
Even **aceptar** has one, though it takes longer to spot: its *capere*, to take, is the *capere* inside **el principio**, where *princeps* is the one who **takes first place**. Every word in the chapter had a relative waiting.

Your turn

Say these aloud:

- there's a charge on the bill I didn't expect
- do you take card?
- which of the three money words appears last

Before you move on

All five again, in Spanish, without looking. Then one sentence querying something on a bill.

456.7 (revisar la cuenta) — read it, then do it yourself

Say **el cargo** and **la ensalada**. One of them is on the bill twice.

Your turn

A bill on the table. Read it, then answer.

Mesa 7

2 **ensaladas** mixtas 14,00

1 **ensalada** mixta 7,00

2 cafés 3,60

Cargo por servicio 2,50

No se **aceptan** tarjetas.

Say these aloud:

- what has been counted twice, and what it should say
- what the 2,50 is for
- how you are going to have to pay

Why it's said this way

To query this politely you need the right noun, and it is **cargo** rather than *precio*: the 2,50 was not asked for in advance, it was added. *Hay un cargo que no entiendo* is the sentence, and *hay un precio que no entiendo* would sound as though you were confused by the menu.
No se aceptan tarjetas is the *se* construction again, and it is plural because *tarjetas* is. Spanish agrees the verb with the thing, not with the restaurant, so a single line telling you the same thing about one card would read *no se acepta tarjeta*.
A useful softener for the whole exchange: *perdone, ¿me lo mira?* — literally "will you look at it for me", and far more common than accusing anybody of an error.

Before you move on

Now your turn, out loud and then in writing. Four lines querying a bill: ask them to look at it, say there is a charge you do not understand, say the salad appears twice, and ask whether they take card.
Then check yourself: did you use *cargo* rather than *precio*, and did *se aceptan* agree with the cards?

Chapter 457

La farmacia de guardia

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can get a medicine that is not in stock: ask for it by the word on the box, ask them to order it in, find out when it arrives, and find the chemist that is open tonight.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

457.1 el medicamento — what the doctor ordered

> Say **el médico** and **la farmacia**. One writes it down, the other hands it over.

You'll want to know: el medicamento

el medicamento — the medicine, the drug: the formal word, and the one on the packaging.

Un medicamento con receta — a prescription medicine. *Este medicamento no lo tenemos* — we don't have that one in.

In speech people say **la medicina** as readily, and for a single pill **la pastilla**. *Medicamento* is what the box, the leaflet and the pharmacist will use.

Grammar Lens: -mento and -miento are the same ending

You know **-miento** from *el seguimiento*. **-mento** is the same Latin ending arriving by the other road:

worn down by speech	lifted from the page
el segui**miento**	el medica**mento**
el pensa**miento**	el docu**mento**

Both are masculine, so nothing is lost either way. What the spelling tells you is the **register**: a *-miento* noun is usually everyday, a *-mento* noun usually formal or technical. The pattern held for *rueda* and *rotativo*, and it holds here.

The word, taken apart — and its English cousins

Latin **medicus**, a doctor — and behind it **medēri**, to heal, to look after.
So *el médico* and *el medicamento* are one word: the healer, and the thing that does the healing. The family runs wide — *la medicina*, *remedio*, and English **remedy**, **medical**, **meditate**.
That last one is worth a second, and worth handling carefully. An older root does sit behind *medeor*, and **modus**, **moderate** and **meditate** are independent evidence for it. What you should not do is gloss that root as "measure" and then offer a doctor's judgement as the proof — that argues in a circle, as the lesson on *el médico* has already said. The cousins are real; the story about why is not established.

Your turn

Say these aloud:

- a prescription medicine
- the pharmacy doesn't have that one
- what *médico* and *medicamento* share

Before you move on

The medicine, on the box? (**El medicamento**.) Which ending is the formal one? (**-mento**.) What did *medēri* mean? (**To heal, to look after**.)

457.2 encargar — ask them to get it in

Say **el cargo** and **el pedido**. Put *en-* on the front of the first and you get a verb.

You'll want to know: encargar

encargar — to order something in, to ask for a thing to be got.

¿Me lo puede encargar? — can you order it in for me? *Lo tengo encargado* — it's on order. *Encargar una tarta* — to order a cake.

With **-se de** it means to take charge of something: *yo me encargo de la comida* — I'll see to the food. *De eso se encarga la empresa* — the company handles that.

Grammar Lens: encargar is not pedir

what is happening	the verb
asking for what is there	**pedir**
asking them to **get** what is not	**encargar**

In a restaurant you *pides* a salad, because it is on the menu. At a chemist's you *encargas* a medicine, because it has to be brought in. *Pedir* takes something off a list; *encargar* creates a job for somebody. That is also why *encargarse de* means taking responsibility: the load has been put on you.

The word, taken apart — and its English cousins

en- plus **cargar**, and *cargar* is Latin *carricare*, met in the lesson on **el cargo** — to load a cart.

So *encargar* is to **load a task onto somebody**, and every sense follows from that one picture. Order a cake: the baker now carries it. Take charge: you are carrying it. *El encargado* — the person in charge — is the one with the load on.

English has the same metaphor in *charge*: you are *in charge*, you *take charge*, somebody is *charged with* a duty. Two languages reached for a cart.

Your turn

Say these aloud:

- can you order the medicine in for me?
- I'll see to the food
- which verb you use for something on a menu

Before you move on

To order something in? (**Encargar**.) To take charge of it? (**Encargarse de**.) What is being loaded, and onto what? (**A task, onto a person** — the cart again.)

457.3 la guardia — the one that stays open

Say **guardar** and **la farmacia**. Somebody is keeping watch tonight, and it is one chemist in the town.

You'll want to know: la guardia

la guardia — duty, watch: the turn of being the one available.

Farmacia de guardia. Servicio nocturno.

La farmacia de guardia — the duty chemist, the one open when the rest are shut, posted on every pharmacy door. *Estar de guardia* — to be on call. *El médico de guardia* — the doctor on duty.

El guardia with the masculine article is a different thing: a police officer. The article carries the whole distinction.

Grammar Lens: one word, two genders, two meanings

article	what it means
la guardia	the duty, the watch
el guardia	the officer keeping it

Spanish does this with a small set of words, and the rule inside it is consistent: the **feminine** is the abstract thing, the **masculine** is the person who does it. *La guía* is the guidebook, *el guía* is the person showing you round.
So *la farmacia de guardia* is a chemist **on watch**, and *un guardia en la puerta* is a man standing at it.

The word, taken apart — and its English cousins

Germanic ***wardōn**, to watch over — the same root as **guardar**, which you already have for keeping and putting away.
Spanish took a shelf of Germanic words from the Visigoths and from Frankish, and they are recognisable by the **gu-** where English has plain **w-**:

Spanish	English
guardar	**w**ard
guerra	**w**ar
guante	(glove, from Frankish **want*)

English got *guard* back from French, so **guard** and **ward** are the same Germanic word arriving twice — once directly, once round by way of Paris.

Your turn

Say these aloud:

- the duty chemist
- I'm on call tonight
- which article makes it a police officer

Before you move on

The duty chemist? (**La farmacia de guardia**.) What does **wardōn* mean? (**To watch over**.) What does Spanish **gu-** often answer to in English? (**W-** — *guerra* and *war*.)

457.4 (el medicamento, encargar, la guardia) — from cold

From memory alone, say all three: *the medicine*, *to order in*, *the duty rota*.

Grammar Lens: the article doing the work

feminine — the thing	**masculine — the person**
la guardia — the watch	el guardia — the officer
la guía — the guidebook	el guía — the guide
la policía — the force	el policía — the officer

One pattern, and it is worth having in advance: the **feminine** names the abstract thing or the body, the **masculine** names a person doing it. A Spanish speaker hears the article and knows which you meant before the noun arrives.
So *la farmacia de guardia* has nothing to do with a man on a door.

Grammar Lens: two of the three were relatives

new word	**what it was built on**
el medicamento	*el médico* — healer and the thing that heals
encargar	*el cargo*, and *el carrito* under that
la guardia	*guardar*, from Germanic *wardōn*

All three, in fact. *Encargar* is the clearest: a cart, then a load, then a charge on a bill, then a task loaded onto somebody. Four lessons apart and one picture throughout.

Your turn

Say these aloud:

- can you order the medicine in?
- the duty chemist is open tonight
- what *el guardia* means, with that article

Before you move on

All three again, in Spanish, without looking. Then one sentence getting a medicine that is not in stock.

457.5 (en la farmacia) — read it, then do it yourself

Say **la guardia** and **el medicamento**. The door below tells you where to find one of them after hours.

Your turn

A notice taped inside the glass, and the pharmacist's reply. *Read it:* both, then answer

1 — en la puerta

Horario: 9:00 a 14:00 y 17:00 a 20:30.

Fuera de ese horario, **farmacia de guardia** en la calle Mayor.

2 — en el mostrador

Ese **medicamento** se nos ha terminado. Se lo **encargo** y lo tiene mañana por la tarde, si le parece.

Say these aloud:

- where to go at nine in the evening
- what the pharmacist offers to do
- when the medicine will be there

Why it's said this way

Se lo encargo is the sentence to keep whole. *Encargo* rather than *pido*, because the thing is not there to be asked for — it has to be brought in. And *se lo* is two pronouns stacked: *lo* is the medicine, *se* is you. Spanish puts the person first and the thing second, which is the reverse of English.
Si le parece — "if that suits you" — is how an offer is softened at a counter. It does the same work as the *cómoda* of the delivery card, and both leave the decision with the customer without asking a question.
Notice too that the door says **fuera de ese horario** — the same *fuera de* frame as *fuera de servicio*, but here with a determiner. *Fuera de servicio* is a fixed phrase and takes nothing; *fuera de ese horario* points

back at the hours printed two lines above, and pointing needs *ese*.

Before you move on

Now your turn, out loud. Four lines at a chemist's counter: ask for a medicine, hear that it has run out, ask them to order it in, and ask when it will be there. Then say where the duty chemist is.
Write it: the same four lines
Then check yourself: did you use *encargar* rather than *pedir*, and did the pronouns come out as *se lo*?

Chapter 458

El plazo

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can deal with a deadline: read the window of dates, hand a form in the right way, and understand that nothing is accepted once the window shuts.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

458.1 el plazo — by when

> Say **el placer** and **la fecha**. One of those two is an odd relative of the word coming next.

You'll want to know: el plazo

el plazo — the period allowed, and so the deadline.

> **Plazo** de presentación: hasta el 30 de abril.

Fuera de plazo — past the deadline. *En el plazo de diez días* — within ten days. *A corto plazo* — in the short term.

A second sense on any purchase: **pagar a plazos** — to pay in instalments, each one a period agreed in advance.

Grammar Lens: plazo is not fecha

what it names	the word
a day on the calendar	**la fecha**
the stretch of time you are allowed	**el plazo**

La fecha límite is the last day; *el plazo* is the whole window that ends there. So *el plazo termina el viernes* and *la fecha límite es el viernes* say the same thing from opposite ends — one names the run, the other the wall at the end of it.
Most official Spanish prefers *plazo*, because a form cares how long you have, not which square on the calendar.

The word, taken apart — and its English cousins

Latin **placitum** — "a thing agreed", the past participle of **placēre**, to please. What pleased both parties was what they had settled on.
That makes *el plazo* a relative of **el placer**, which you already have. Pleasure and a deadline sit oddly together until you know the middle step: *placitum* meant an agreement, then the term of an agreement, then the time you have got.
French took the same *placitum* and made **plaid**, a court hearing, and English has **plea** and **plead** from it — all of them agreements argued over. Spanish kept the calmest branch: a *plazo* is what was agreed, and the paperwork holds you to it.

Your turn

Say these aloud:

- the deadline is the thirtieth of April
- past the deadline
- what *pagar a plazos* means

Before you move on

The deadline? (**El plazo**.) The date? (**La fecha**.) What did *placitum* mean? (**A thing agreed**.)

458.2 entregar — hand it over

Say **el documento** and **el almacén**. Things leave both of them the same way.

You'll want to know: entregar

entregar — to hand in, hand over, deliver.

Entregar los papeles — to hand the paperwork in. *Hay que entregarlo antes del viernes* — it has to be in before Friday. *El paquete se entrega mañana* — the parcel is delivered tomorrow.

La entrega is the noun: *la entrega a domicilio* is home delivery, and *el plazo de entrega* is the delivery time — both of this chapter's first two words in one phrase.

Grammar Lens: entregar is not dar

what is happening	the verb
passing something to somebody	**dar**
handing over what was owed or due	**entregar**

Dame el boli — pass me the pen. *Entrega el boli* would sound as though the pen were evidence.

Entregar carries an obligation with it: homework, a form, a parcel, a set of keys. Something was due, and now it has gone across. That is why a courier *entrega* and a friend *da*.

The word, taken apart — and its English cousins

Latin **integrare**, to make whole — from **integer**, **untouched, complete**, which is *in-* plus the root of *tangere*, to touch. An *integer* is a thing nobody has broken into.

So *entregar* is to hand a thing over **entire** — the sense of a delivery that arrives with nothing missing.

The same *integer* gave Spanish **entero**, whole, and **íntegro**, which is the bookish twin and means upright about a person. English took the number sense as **integer** and the character sense as **integrity** — and *integrity* is exactly what *entregar* asks for: the thing handed over undiminished.

Your turn

Say these aloud:

- it has to be handed in before Friday
- the delivery time, using both words
- which verb a friend passing you a pen would use

Before you move on

To hand in? (**Entregar**.) The delivery? (**La entrega**.) What did *integer* mean? (**Whole, untouched**.)

458.3 admitir — let it through

Say **meter** and **aceptar**. The word coming next is a cousin of the first and a rival of the second.

You'll want to know: admitir

admitir — to allow in, to accept as valid, and to own up to.

No se **admiten** solicitudes fuera de plazo.

No se admiten perros — no dogs. *Admitir un error* — to admit a mistake. *¿Admiten tarjeta?* — do you take cards, on a sign or a form.

La admisión is the noun, and *admitido* is the word beside your name on a list when you are in.

Grammar Lens: admitir, aceptar, entregar

Three verbs about a thing crossing a line, sorted by who is doing what:

the move	the verb
you agree to take what is offered	**aceptar**
an institution lets it through	**admitir**
you hand over what was due	**entregar**

You *entregas* the form; the office *admite* it or not; a shop *acepta* your card. Notice who is behind *admitir*: nearly every time, an institution. That is why it turns up in the *se* form on notices — *no se admiten* —

with nobody named.
The other sense follows from the same picture: to *admit* a mistake is to let it in rather than keep it outside.

The word, taken apart — and its English cousins

Latin **admittere**: **ad-**, towards, plus **mittere**, **to send**.
You have met *mittere* three times already, and this makes four:

word	**what the prefix does**
meter	the bare verb, worn down: put in
el permiso	*per-*, sent **through**
permitir	the verb of that noun, let through
admitir	*ad-*, sent **towards** — let in

So the family is a set of sendings, and the prefix does all the steering.
English holds the same shelf: **admit**, **permit**, **submit**, **transmit**, **commit**, **mission** — every one a sending in some direction.
Meter is the one that came down through speech, which is why it looks least like the others and is the only one you would use about a box.

Your turn

Say these aloud:

- applications are not accepted after the deadline
- I admit I was wrong
- which of the three verbs you do to a form yourself

Before you move on

To let in? (**Admitir**.) What does *mittere* mean? (**To send**.) Which of its relatives would you use about a box? (**Meter**.)

458.4 (el plazo, entregar, admitir) — from cold

From memory alone, say all three: *the deadline*, *to hand in*, *to let in*.

Grammar Lens: the three of them are one sentence

Put them in the order they happen and you have the whole of official life:

> **Entregue** la solicitud dentro del **plazo**. Fuera de plazo no se **admiten**.

You hand it in, there is a window, and the office decides. Three words, and every form you meet in Spanish will use at least two of them. Note *dentro del plazo* against *fuera de plazo*: the first takes an article, the second does not, because *fuera de* + bare noun is the fixed frame you met in *fuera de servicio*.

Grammar Lens: mittere, for the third time

word	**the prefix, and what it does**
meter	none — put in
el permiso	*per-*, sent through
admitir	*ad-*, sent towards, let in

One Latin verb, three Spanish words, and the prefix is the whole difference. *Meter* came down through speech and looks least like the others; *permiso* and *admitir* were lifted off the page and kept their shape — the same split you saw in *rueda* against *rotativo*.
And **entregar** hides a different picture: *integrare*, to make whole, so what you hand over should arrive entire.

Your turn

Say these aloud:

- hand the form in within the deadline
- late applications are not accepted
- which of the three has a cart nowhere near it

Before you move on

All three again, in Spanish, without looking. Then one sentence about a form that arrived too late.

458.5 (la convocatoria) — read it, then do it yourself

Say **el plazo** and **admitir**. The notice below puts one against the other in a single line.

Your turn

A notice on a noticeboard. *Read it:* the notice, then answer

CURSOS DE NATACIÓN — INSCRIPCIÓN

Plazo: del 2 al 20 de septiembre.

Entregue la ficha en el mostrador o por correo.

Fuera de plazo no se **admiten** fichas, aunque queden plazas.

Listas de admitidos: el día 25.

Say these aloud:

- the two ways of handing the form in
- what happens if you are a day late
- when you find out

Why it's said this way

Aunque queden plazas is the hard line, and it is where the grammar earns its keep: *aunque* with the subjunctive — *queden*, not *quedan* — says the office is not conceding that there are places. Had it written *aunque quedan plazas* it would have been admitting there are some and refusing anyway, which reads as spite rather than procedure.
So the subjunctive is doing something worth having: it lets a notice state a rule without commenting on the facts.
Then **no se admiten** again, with nobody named. Compare the three verbs in their natural order: *usted entrega*, *la oficina admite*, and you would *aceptar* only what is offered to you. The notice never says who decides, because in official Spanish the decision is a thing that happens rather than a person who acts.

Before you move on

Now your turn, out loud. Four lines for a sign-up notice: give the window of dates, say where to hand the form in, say late forms are not accepted, and say when the list goes up.
Write it: the same four lines
Then check yourself: did you use *entregar* for the handing in and *admitir* for the office, and did *fuera de plazo* go without an article?

Chapter 459

El inventario

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can read a shop door that is shut for the morning: why it is closed, when it opens, which part stays open, and when the usual hours come back.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

459.1 la sección — a piece cut off

> Say **cortar** and **el almacén**. A big store has been cut into parts, and each one has a name.

You'll want to know: la sección

la sección — the section, the department.

La sección de deportes — the sports department. *¿En qué sección está?* — which part of the shop is it in? *La sección de lácteos* — the dairy aisle.

Beyond shops: a section of a form, of a newspaper, of a report. Anywhere a whole has been divided and the parts labelled.

Plural **secciones**, and the accent comes off, as it does for every *-ción*.

Grammar Lens: sección, parte, departamento

what it names	the word
any piece of a whole	**la parte**
a piece somebody divided off on purpose	**la sección**
a unit of an organisation	**el departamento**

Una parte del libro could be any stretch of it. *Una sección del libro* is one somebody marked out and probably numbered. And a *departamento* has staff.
The middle one is the useful new distinction: *sección* always implies a dividing hand, which is exactly what its root says.

The word, taken apart — and its English cousins

Latin **secare**, **to cut** — the participle *sectus* gave *sectio*, a cutting. So a *sección* is a **cut piece**, and the family is full of cutting: **el insecto** is an animal cut into segments, which is what you can see on an ant.
A word to keep *out* of the family, because it looks as though it belongs: **la sierra** is a saw, and also a mountain range, since a ridge of peaks looks like a saw's teeth. That picture is right, but the word is Latin *serra* and has nothing to do with *secare*. Two words about cutting, unrelated.
English has **section**, **sector**, **dissect**, **segment** and **insect** off the same root — and *insect* is the one worth remembering, because nobody expects a bug to be named after a cut.
Cortar, which you already have, comes from a different Latin word — *curtus*, shortened — so the two are not relatives, and Spanish kept both: the everyday cutting and the bookish dividing.

Your turn

Say these aloud:

- which section is it in?
- the sports department of the store
- why an insect is called that

Before you move on

The section? (**La sección**.) The plural? (**Las secciones**, no accent.) What does *secare* mean? (**To cut**.)

459.2 el inventario — what we found

Say **venir** and **el almacén**. A very old verb is about to turn up in a very dull word.

You'll want to know: el inventario

el inventario — the inventory, and the stocktake itself.

Cerrado por **inventario**.

Hacer inventario — to do a stocktake. *Está en el inventario* — it's on the list.

That sign goes up on a shop door for a morning once or twice a year, and it is the reason this word is worth having before you need it.

Grammar Lens: cerrado por — the cause on a door

You have met *por* plus a bare noun giving a cause on a notice. Shop doors are where it lives:

sign	why they are shut
cerrado por inventario	stocktaking
cerrado por obras	building work
cerrado por vacaciones	holidays

No article, no verb, no explanation. The frame is *cerrado por* + the reason, and a Spanish reader takes the whole thing in at a glance from across a street — which is what a sign is for.

The word, taken apart — and its English cousins

Latin **invenire**: **in-** plus **venire**, **to come** — so *to come upon*, and from there **to find**.

An *inventario* is therefore a **list of what was found**, which is exactly what a stocktake produces: somebody walks the shelves and writes down what is actually there, as opposed to what the records claim.

The same *invenire* gave **inventar**, to invent — and that is the same idea seen from the other side. To invent something is to *come upon* it. Spanish and English both treat discovery and invention as one act, and the word for a warehouse list is the proof.
Venir is underneath all of it, and you have had it since the early lessons.

Your turn

Say these aloud:

- closed for stocktaking
- it's not on the list
- what *invenire* literally means

Before you move on

The stocktake? (**El inventario**.) Closed for it? (**Cerrado por inventario**.) Which verb is inside it? (**Venir** — to come upon, to find.)

459.3 habitual — the way it usually is

Say **he hablado** and **siempre**. The *he* in the first is about to turn up in an adjective.

You'll want to know: habitual

habitual — usual, regular, customary.

El horario habitual — the usual hours. *Nuestro proveedor habitual* — our regular supplier. *Lo habitual es avisar* — the usual thing is to let people know.

Habitualmente is the adverb, and **el cliente habitual** is a regular. The opposite is *poco habitual* — unusual — rather than any single word.

Grammar Lens: habitual, normal, siempre

what you mean	the word
this is the pattern, by habit	**habitual**
this is ordinary, not strange	**normal**
without exception	**siempre**

El horario habitual is the one they usually keep — and this week they may not. *Es normal* means nobody should be surprised. *Siempre abren a las nueve* allows no exceptions at all.
So *habitual* sits between the other two: stronger than "not strange", weaker than "always". A notice using it is telling you what to expect while leaving itself room.

The word, taken apart — and its English cousins

Latin **habēre**, **to have, to hold** — by way of *habitus*, "the way one holds oneself".
You own that verb already: *habēre* is the **haber** of *he hablado*, worn down by centuries of use into an auxiliary so small it barely looks like a word. Set the two side by side and the two roads are visible again:

worn down by speech	lifted from the page
he hablado	**habit**ual

A habit is something you *hold*, which is why English says you **have** a habit rather than doing one. And *el hábito* in Spanish is both a habit and a monk's robe — the clothing you hold yourself in, from the same *habitus*.
The **h** is silent, as it is anywhere in Spanish that it stands on its own.

Your turn

Say these aloud:

- the usual hours
- our regular supplier
- which of *habitual* and *siempre* allows an exception

Before you move on

Usual? (**Habitual**.) What does *habēre* mean? (**To have, to hold**.) Which everyday word is it worn down into? (**Haber** — *he hablado*.)

459.4 (la sección, el inventario, habitual) — from cold

Close the lessons before this one. Say all three: *the section*, *the stocktake*, *usual*.

Grammar Lens: two everyday verbs, hidden in office words

office word	the everyday verb inside it
el **invent**ario	**venir** — *in-venire*, to come upon
habitual	**haber** — *habēre*, to hold

Both verbs are among the first things anybody learns in Spanish, and both are so worn down that nothing on the surface connects them to these words. An inventory is **a list of what was found**; something habitual is **a thing held on to**.

This is what happens when a language takes the same Latin word twice. The spoken copy shrinks until it is almost nothing — *he*, *vengo* — while the written copy keeps its whole Latin shape.

Grammar Lens: the notice frames, collected

frame	example
cerrado por + bare noun	*cerrado por inventario*
fuera de + bare noun	*fuera de plazo*
por + bare noun, as a cause	*por obras*

No article after any of them. Spanish signs run on these three shapes, and once you can see the frame you can read a notice you have never met by filling in one word.

Your turn

Say these aloud:

- closed for stocktaking
- the usual hours in the sports section
- which verb is inside *inventario*

Before you move on

All three again, in Spanish, without looking. Then one sentence about a shop that is shut this morning.

459.5 (cerrado por inventario) — read it, then do it yourself

Say **el inventario** and **habitual**. The door below uses one to excuse breaking the other.

Your turn

A sheet taped to a shop door. *Read it:* the sheet, then answer

CERRADO POR INVENTARIO

Solo esta mañana. Abrimos a las 16:00.

El **horario habitual** se recupera mañana.

La **sección** de deportes permanece abierta por la puerta lateral.

Say these aloud:

- how long the shop is shut, and when it opens
- what is open anyway, and how to get in
- when things go back to normal

Why it's said this way

El horario habitual se recupera mañana is the line worth taking apart. *Habitual* rather than *normal*, because the shop is saying *this is the pattern we keep*, not *this is not strange*. And *se recupera* rather

than *recuperamos*: the timetable comes back by itself, nobody is thanked for it.
Permanece abierta agrees with *la sección*, feminine — a small check that catches people out, because *deportes* is masculine and plural and sits right next to the verb. Spanish agrees with the head noun, not with the nearest one.
And the heading is the frame you now know: *cerrado por* plus a bare noun. A reader takes it in from the pavement without reading the rest.

Before you move on

Now your turn, out loud. Four lines for a shop door: say you are closed for stocktaking, say when you reopen, say the usual hours come back tomorrow, and say which section stays open.
Write it: the same four lines
Then check yourself: did you use the *cerrado por* frame with no article, and did the adjective agree with *la sección* rather than with *deportes*?

Chapter 460

La herramienta

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can borrow a tool from a shared store: read the notice, apply the way the form wants, and understand that there is a waiting list.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

460.1 la herramienta — the tool

> Say **el taladro** and **arreglar**. The drill is one of these; name the category it belongs to.

You'll want to know: la herramienta

la herramienta — the tool.

Una caja de herramientas — a toolbox. *No tengo las herramientas* — I haven't got the tools. *La herramienta adecuada* — the right tool for the job.

It covers the abstract sense as well: *una herramienta muy útil* about an app or a method, exactly as English uses "tool".

Grammar Lens: the h that hides a diphthong

Say it: **e-rra-MIEN-ta**. The **h** is silent, as it is anywhere in Spanish that it stands alone, and underneath it is the **ie** you have met before:

Latin	Spanish
ferramenta	la h**e**rramienta
ferrum	el h**ie**rro

One rule governs both vowels, and it is the one you already have: a stressed **e** breaks, an unstressed one stays flat. In *ferrum* the stress is on the **e**, so it breaks — *h**ie**rro*. In *ferramenta* the stress has moved onto the suffix, so the first **e** stays flat — *h**e**rra-* — and the break happens where the stress went instead: *-m**ie**nta*, the very same *-miento* you have in *el seguimiento*.

The **h** is written because it was once spoken. Latin *f-* weakened to a breathy *h* in Castilian mouths, the breath faded, and the spelling stayed behind. That *f*-to-*h* shift is one of the loudest things Spanish did to Latin.

The word, taken apart — and its English cousins

Latin **ferramenta**, "things made of iron" — the plural of *ferramentum*, from **ferrum**, iron.

So a *herramienta* is an **iron thing**, and the name is older than any of the tools you own. The same *ferrum* is the **Fe** on the periodic table, and it gives Spanish *el hierro*, *el herrero* — the blacksmith — and *la herradura*, a horseshoe.

That **f** to **h** is the signature of Spanish among the Romance languages. Latin *facere* gave *hacer*, *filius* gave *hijo*, *ferrum* gave *hierro* — while Italian kept *ferro* and French kept *fer*. The letter is silent now, but it marks where an *f* used to be.

Your turn

Say these aloud:

- a toolbox, and the right tool
- the drill is a tool
- which letter *hierro* and *hacer* both used to start with

Before you move on

The tool? (**La herramienta**.) What is *ferrum*? (**Iron**.) What does a silent Spanish **h** often mark? (**Where a Latin f used to be**.)

460.2 solicitar — the word the form uses

Say **la cita** and **entregar**. Both belong to the same morning at a counter.

You'll want to know: solicitar

solicitar — to apply for, to request, formally.

Para **solicitar** una plaza, entregue la ficha antes del día 20.

Solicitar una beca — to apply for a grant. *Solicitar cita previa* — to book an appointment in advance, the phrase on Spanish health-centre and town-hall pages; much of Latin America says *sacar turno* or *agendar una cita* for the same act.

La solicitud is the application itself, and the piece of paper it is written on.

Grammar Lens: solicitar is not pedir

what you are doing	the verb
asking a person for a thing	**pedir**
asking an institution, on a form	**solicitar**

Le pido un café al camarero. Solicito una beca al ministerio. Using *solicitar* with a friend would sound as though you had filled in a form to borrow their drill.
That is the whole difference and it is register, not meaning: *solicitar* is the bookish arrival, worn nowhere down, and it belongs to writing.

The word, taken apart — and its English cousins

Latin **sollicitare**: **sollus**, whole, plus **citare**, to set in motion — so to stir something *entirely*, to shake it up.
The oldest sense is agitation, and Spanish keeps that branch too: *estar solícito* is to be attentive, and English **solicitous** means anxiously

caring, while **solicitude** is worry. To apply for something is to set the machinery in motion on your behalf.
That **citare** is the one inside **la cita** — an appointment is a *summoning* — and English **cite**, **excite**, **recite** and **incite** are all the same setting-in-motion.

Your turn

Say these aloud:

- to apply for a place, hand the form in
- book an appointment in advance
- which verb you use with a waiter

Before you move on

To apply for? (**Solicitar**.) The application? (**La solicitud**.) What does *citare* mean? (**To set in motion, to summon**.)

460.3 la espera — the wait

Say **esperar** and **el plazo**. One is the doing, one is the window. The noun between them is next.

You'll want to know: la espera

la espera — the wait.

Sala de espera.

La lista de espera — the waiting list. *Una espera de dos horas* — a two-hour wait. *En espera de su respuesta* — awaiting your reply, the closing line of a formal letter.

The verb you already have; this is the noun that goes on the door.

Grammar Lens: a noun made by cutting, not by adding

You have four noun-making suffixes — three that work on verbs, and *-eza*, which works on adjectives. This is a fifth move, and it is the

opposite of all of them: **take the ending off**.

verb	**noun**
esperar	la esper**a**
entregar	la entreg**a**
comprar	la compr**a**
pagar	el pag**o**

Cut *-ar* and put back a bare **-a** or **-o**. You already have one of these: *la entrega* arrived two chapters ago without being named as a pattern. These are the shortest nouns in the language and among the commonest. What you cannot predict is **which vowel** a given verb will take — *la compra* but *el pago*. Once you have the word, the ordinary *-o*/*-a* rule hands you the article as usual.
Set beside *la solicitud*: one verb swaps its ending for *-ud*, the other drops its ending and puts back a single vowel. Both are ordinary.

The word, taken apart — and its English cousins

Latin **sperare**, from **spes**, hope — though already in Latin it leaned as much on *looking forward to* as on hoping, and a Roman could *sperare* bad news as readily as good.
That middle sense is the hinge. *Esperar* took over the work of Latin *exspectare*, **to expect**, and ended up covering all three English verbs you met when you learned it: *espero el autobús* is waiting, *espero el pan* is expecting, *espero que sí* is hoping. *La espera* names only the first of them.
You met the same root in **la esperanza**, hope, which is *-anza* on this verb. So *la espera* and *la esperanza* are one word twice: the plain wait, and the hope that grew out of it.
The **e-** at the front is Spanish's own, the same one that turned *stare* into *estar* and *stroppiare* into *estropear*.

Your turn

Say these aloud:

- the waiting room and the waiting list
- I'm waiting for the bus, then I hope so
- what *la espera* and *la esperanza* share

Before you move on

The wait? (**La espera**.) The waiting room? (**La sala de espera**.) What else does *esperar* cover? (**Hoping and expecting**.)

460.4 (la herramienta, solicitar, la espera) — from cold

From memory alone, say all three: *the tool*, *to apply for*, *the wait*.

Grammar Lens: five ways to a noun, now complete

how	example	gender
-anza	la mudanza	feminine
-miento	el seguimiento	masculine
-eza	la limpieza	feminine
-ción	la instalación	feminine
cut the ending	la espera	either

The first four hand you the article. **The fifth does not** — *la espera*, *la compra*, but *el pago* and *el gasto*. The ending is no help in guessing which vowel a given verb takes; once you have the word, the ordinary *-o/-a* rule gives you the article as usual.

Note what that costs: these are the shortest and commonest nouns in Spanish, and they are the ones the endings cannot help you with.

Grammar Lens: two of the three were relatives

new word	what it was built on
la herramienta	*ferrum*, iron — and *el hierro*
solicitar	*citare*, inside *la cita*
la espera	*esperar*, and *la esperanza* beside it

La espera is the neat one: **esperar** and **la esperanza** arrived together with the verb itself, long ago, and the moving chapter showed you the *-anza* that builds the second from the first. This is the third member — the plain noun that sits between the verb and the abstract one.

Your turn

Say these aloud:

- the waiting room is that way
- to apply for a place you hand in the form
- which of the five noun-makers leaves the gender open

Before you move on

All three again, in Spanish, without looking. Then one sentence asking for something at a counter.

460.5 (pedir prestada una herramienta) — read it, then do it yourself

Say **la herramienta** and **solicitar**. The notice below uses one for the things and one for the paperwork.

Your turn

A notice in a neighbourhood centre. *Read it:* the notice, then answer

PRÉSTAMO DE HERRAMIENTAS

Taladros, escaleras y carritos. Dos días por vecino.

Para **solicitar** una **herramienta**, rellene la ficha en conserjería.

Hay **lista de espera** para el taladro grande.

Say these aloud:

- what you can borrow, and for how long
- what you have to do to ask for one
- which item you may not get straight away

Why it's said this way

Solicitar on a noticeboard and **pedir** at the counter are the same act in two registers. The notice says *para solicitar una herramienta* because it is describing a procedure; the neighbour who walks in says *¿me dejas el taladro?* That pair is the whole of Spanish formality in one scene.

Hay lista de espera — bare, with no article at all. The firm rule is what *hay* refuses: never *hay la lista*, because *hay* introduces a thing's existence rather than pointing at one already known. Between *hay lista* and *hay una lista* both are correct, and the bare noun is what a notice board uses.

And **por vecino** — "per neighbour" — is *por* doing distribution, the same *por* that gave a cause on the roadworks sign. One preposition, several jobs, and the noun after it stays bare.

Before you move on

Now your turn, out loud. Four lines for a tool library: say what is lent and for how long, say how to apply, say there is a waiting list, and then ask a neighbour informally for the same thing.

Write it: the same four lines

Then check yourself: did the notice use *solicitar* and the neighbour *pedir*?

Chapter 461

El donativo

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a collection appeal: what may be donated, what will be turned away and why, and where to hand it in.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

461.1 donar — to give it away

> Say **perdón** and **la sangre**. There is a verb of giving hiding in the first, and the second is the commonest thing it is used about.

You'll want to know: donar

donar — to donate.

Donar sangre — to give blood, the sign outside every mobile clinic. *Donar ropa* — to donate clothes. **La donación** is the donation and **el donante** the donor.

It is not the everyday verb for giving. *Dar* is that. *Donar* is giving to an institution or a cause, and it carries no expectation of return.

Grammar Lens: donar is not regalar

Three verbs of giving, and the difference is who receives:

what is happening	the verb
handing anything to anyone	**dar**
making somebody a present	**regalar**
giving to a cause or a body	**donar**

Te doy el taladro — I'm passing it to you. *Te regalo el taladro* — it is yours, a gift. *Dono el taladro al centro* — the neighbourhood centre has it now.

Use *donar* about a person and it sounds like a charitable act rather than a kindness, which is sometimes exactly the joke a Spanish speaker is making.

The word, taken apart — and its English cousins

Latin **donare**, to give — and here is the payoff on a word you have had since the courtesy chapter, long before you could take it apart. **Perdón** is *per-* plus *donare*: to **give thoroughly**, to give completely away. Forgiving somebody is giving the offence away rather than holding it, and the metaphor is the same in English — *for-give* is built the identical way, *for-* being an intensifier, so *pardon* and *forgive* are the same idea twice.

The family also gives *el don*, a gift or a talent. And off to one side sits **la dosis** — not from *donare* but from Greek's own word for a giving, off the same ancient root: a dose is what is *given* to you.

Your turn

Say these aloud:

- to give blood
- I'm donating the tools to the centre
- what *perdón* is made of

Before you move on

To donate? (**Donar**.) The donor? (**El donante**.) What does *perdón* literally say? (**To give thoroughly** — to give it away.)

461.2 peligroso — dangerous

Say **el taladro** and **el accidente**. One can lead to the other, and the sign warning you sits between them.

You'll want to know: peligroso

peligroso — dangerous.

Peligro. No pasar.

El peligro is the noun and the single word on the sign; **peligroso** is the adjective. *Una zona peligrosa* — a dangerous area. *Es peligroso dejarlo ahí* — it's dangerous to leave it there.

Estar en peligro is to be in danger, and *fuera de peligro* — out of danger — uses the frame you already have from *fuera de servicio*.

Grammar Lens: -oso makes an adjective of a noun

-oso means "full of" or "given to", and it turns nouns into adjectives all over the language:

noun	adjective
el peligro	peligr**oso**
el cuidado	cuidad**oso** — careful
la fama	fam**oso** — famous

English has the same ending in *dangerous*, *famous* and *curious*, from the same Latin *-osus*, so the pair usually translates straight across. It agrees like any adjective — *peligrosa*, *peligrosos* — and the noun keeps its own gender: *el peligro* is masculine, *una zona peligrosa* feminine.

The word, taken apart — and its English cousins

Latin **periculum**, a trial or a risk — from a root meaning **to try**, the one also behind *experiri*, to test by going through.
So a *peligro* is something you have to **try your luck against**, and English **peril** is the same word, kept closer to the Latin. **Experience** and **experiment** are relatives too: all of them are attempts, and only some are survived.
From *periculum* to *peligro* the **r** and the **l** swapped places — the metathesis you met in *milagro* from *miraculum*. Both words came

through speech, and both got their letters shuffled on the way; a word that arrived by book was never shuffled: **periclitar**, to be in danger, keeps *periculum*'s letters in their Latin order, and stands beside the spoken *peligro* as the same word at two speeds.

Your turn

Say these aloud:

- danger, do not enter
- the drill is dangerous for a child
- which other word swapped its r and l the same way

Before you move on

Dangerous? (**Peligroso**.) The noun? (**El peligro**.) What did *periculum* mean? (**A trial, a risk** — something you try your luck against.)

461.3 rechazar — to turn it down

Say **aceptar** and **admitir**. The word coming next undoes the first, and it is made of the same Latin.

You'll want to know: rechazar

rechazar — to turn down, to reject, to refuse.

Rechazar una oferta — to turn down an offer. *Han rechazado la solicitud* — the application has been rejected. *El banco rechazó la tarjeta* — the card was declined.

El rechazo is the noun: a refusal, and in medicine the rejection of a transplant.

Grammar Lens: the three verbs of the counter, completed

the move	the verb
you agree to what is offered	**aceptar**
the institution lets it through	**admitir**
it is turned back	**rechazar**

Rechazar is the mirror of **both** of the others, and which one it mirrors depends on who is doing it. A shop *rechaza* your card where it might have *aceptado* it; an office *rechaza* your form where it might have *admitido* it.

Notices usually phrase a refusal by negating the other two — *no se aceptan*, *no se admiten* — but *rechazar* takes the same *se* form when the refusing itself is the point: *se rechazan los rotos*. In the plain active it is a person who does it: *rechacé la oferta*.

Note the spelling: **rechacé**, with a **c**. Spanish spelling prefers **c** before *e*, so a stem *z* turns into a *c* right through the conjugation, which is why *empezar* gives *empecé*. A handful of borrowings keep the *z* — *zen*, *zeta* — but no verb ending does.

The word, taken apart — and its English cousins

re- plus *chazar*, to drive back — a verb Spanish took from Old French *chacier*, and behind that Vulgar Latin ***captiare**, to chase, built on **capere**, **to take**. That French leg is why this word has **ch**: Spanish's own inherited form of **captiare* is **cazar**, to hunt.

So *rechazar* and **aceptar** are cousins, and the pair is worth holding: *ad-* plus *capere* is taking a thing **towards** you, and *re-* plus **captiare* is driving it **back**. One Latin verb of taking, pointed two ways by two prefixes.

The same **captiare* gave Spanish **cazar**, to hunt, and French *chasser*, which English borrowed as **chase** — and, through a second borrowing, as **catch**. To reject something is to chase it back the way it came.

Your turn

Say these aloud:

- they have rejected the application
- I turned the offer down, in the past

- what *rechazar* and *aceptar* have in common

Before you move on

To turn down? (**Rechazar**.) I turned down? (**Rechacé** — z becomes c before e.) Which verb is its cousin? (**Aceptar** — both from *capere*.)

461.4 (donar, peligroso, rechazar) — from cold

From memory alone, say all three: *to donate*, *dangerous*, *to turn down*.

Grammar Lens: one verb of taking, pointed two ways

word	the prefix, and where it points
aceptar	*ad-*, **towards** you — you take it
rechazar	*re-*, **back** — you drive it away

Both are Latin *capere*, to take. The prefix does everything, exactly as it did for *meter*, *el permiso*, *permitir* and *admitir* off *mittere*.
That is now two families in four chapters where the prefix carries the whole meaning. When a Spanish verb starts with *a-*, *re-*, *per-*, *ad-* or *des-*, the part after it is usually a word you can already find.

Grammar Lens: two words hiding in your earliest vocabulary

new word	where it was already
donar	*perdón* — *per-donare*, to give thoroughly
peligroso	*el peligro*, and *periculum* behind it

Perdón is the one to keep. You learned it in the courtesy chapter as a thing you say when you bump into somebody, and it turns out to be built on **giving** — forgiveness is handing the offence over rather than keeping it. English does the identical thing in *for-give*.

Your turn

Say these aloud:

- they turned down the application
- giving blood is not dangerous
- which everyday word has *donar* inside it

Before you move on

All three again, in Spanish, without looking. Then one sentence about something offered and refused.

461.5 (la campaña de donación) — read it, then do it yourself

Say **donar** and **rechazar**. The notice below does the first and warns about the second.

Your turn

A poster in a stairwell. *Read it:* the poster, then answer

RECOGIDA DE JUGUETES

Puede **donar** juguetes en buen estado hasta el día 30.

Se **rechazan** los que estén rotos o sean **peligrosos** para menores de tres años.

Entréguelos en portería. Gracias por colaborar.

Say these aloud:

- what is being collected, and until when
- the two reasons something would be turned away
- where to hand things in

Why it's said this way

Se rechazan los que estén rotos o sean peligrosos is the sentence to take apart, and the subjunctive is back, doing a cousin of the job it

did on the swimming-course notice. There it withheld agreement that places remained; here it withholds any claim about which toys will actually turn up.
Los que ***estén*** *rotos*, not *están*. The poster is not saying that some of the toys are broken; it is describing a **category that may or may not turn up** — whichever ones happen to be broken. The indicative would point at particular toys the writer had in mind, which on a poster addressed to a whole building would be an odd thing to imply. Note **sean** as well: *ser* for a lasting property, because a toy that is dangerous for a toddler is dangerous by design, not by circumstance. And *estén* for *rotos*, because being broken is a state a thing arrived at. One sentence, both verbs, each right for its own reason.

Before you move on

Now your turn, out loud. Four lines for a collection poster: say what can be donated and until when, say what will be turned away and why, and say where to hand it in.
Write it: the same four lines
Then check yourself: did you use the subjunctive for the things that might turn up, and *ser* against *estar* for the two reasons?

Chapter 462

La reunión

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow a message from a manager about cutting spending, and reply that I am still choosing between two options.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

462.1 reducir — to bring it down

> Say **la ducha** and **el coste**. A shower is about to turn out to be a relative of the verb coming next.

You'll want to know: reducir

reducir — to reduce, to cut back.

Reducir costes — to cut costs, and *reducir costos* wherever you met *el costo*. *Reducir la velocidad* — to slow down, the wording on a road sign. *Han reducido la plantilla* — they've cut the staff.

La reducción is the noun, and *reducido* on a price tag means marked down.

Grammar Lens: the -zc- verbs

The **c** is already in *reducir*. What this group grows is a **z** in front of it:

verb	I ...
reducir	redu**zc**o
conducir	condu**zc**o
conocer	cono**zc**o

It is not only the *yo* form. The whole subjunctive carries the **z** too — *reduzca, reduzcas, reduzcamos* — and that is where you will actually read it, because the polite command is the subjunctive: **Reduzca la velocidad**, the road sign from a moment ago. The rest of the present stays plain: *reduces*, *reduce*, *reducimos*.

Watch the past, though, because those three verbs hide a split. *Reducir* and *conducir* go *reduje* and *conduje* — not *reducí*. *Conocer* shares the **-zc-** and not that past: it goes *conocí*. Two groups, one spelling.

The **z** has two different stories as well. In *conocer* it is inherited: Latin *cognoscere* had the cluster and the *yo* form kept it. Latin *reducere* never had it, so *reduzco* got its **z** by copying the verbs that did — a pattern that spread rather than a sound that survived. The family it spread through is large, several hundred verbs once the *-ecer* verbs are counted in.

The word, taken apart — and its English cousins

Latin **reducere**: **re-**, back, plus **ducere**, **to lead**. To reduce something is to **lead it back** — to a smaller size, to where it was. *Ducere* is everywhere once you see it. **La ducha** is the same root, and it travelled: Italian *doccia*, a water pipe, probably from Latin *ductio*, "a leading" (Lewis & Short), gave French *douche*, which gave Spanish *ducha* — a pipe that **leads** water. English has **conduct**, **produce**, **educate** (to lead out), **duke** — a leader — and **aqueduct**, which leads water as a shower does.

Spanish keeps *conducir*, to drive, and *el conductor*. A driver leads the car; a shower leads the water; reducing leads the number back down.

Your turn

Say these aloud:

- we have to cut costs, in the variety you use
- I reduce, using the first-person form

- what a shower and a duke have in common

Before you move on

To cut back? (**Reducir**.) I reduce? (**Reduzco**.) What does *ducere* mean? (**To lead**.)

462.2 decidirse — to make your mind up

Say **decidir** and **acercar**. You met *decidirse* in passing when you learned *decidir*; now take it properly, with what **-se** did to the second word in front of you.

You'll want to know: decidirse

decidirse — to make up your mind.

No me decido — I can't decide. *Decídete* — make your mind up. *Se decidió por el azul* — she went for the blue one.

The **-se** version takes **por** for the thing chosen: *me decidí por el piso pequeño.*

Grammar Lens: what the -se adds here

You have met the *-se* switch three times, and this is a fourth use of it — not a new meaning, but a new *shade*:

without -se	**with -se**
acercar — bring it closer	*acercarse* — come closer
decidir — settle a matter	*decidirse* — settle **yourself**

He decidido vender el coche states the decision. *Me he decidido a vender el coche* says you struggled and got there. The reflexive adds the **effort**, the sense of having had to bring yourself to it.
That is why *no me decido* is the natural way to say you are dithering, and *no decido* would sound like a job description.

The word, taken apart — and its English cousins

Latin **decidere**: **de-**, off, plus **caedere**, **to cut**. To decide is to **cut off** — the other options, the deliberating, the retreat.
That picture explains the English family exactly. A **decision** cuts things off. Something **decisive** cuts cleanly. And *caedere* is also in

concise (cut short), **precise** (cut in front, trimmed to the edge), and — through the same cutting — **homicide** and **suicide**.
Spanish has *decidir*, *la decisión*, *conciso* and *preciso* off the same root. When you make your mind up, a Latin speaker heard you reaching for a blade.

Your turn

Say these aloud:

- I can't make my mind up
- she went for the blue one
- which preposition follows *decidirse*

Before you move on

To make your mind up? (**Decidirse**.) What does the *-se* add? (**The effort of getting there**.) What does *caedere* mean? (**To cut**.)

462.3 el jefe — the one at the head

Say **la cabeza** and **el trabajo**. Put the first at the top of the second and you have named somebody.

You'll want to know: el jefe

el jefe — the boss, the head of something.

Hablar con el jefe — to speak to the boss. *La jefa de personal* — the head of HR. *El jefe de estación* — the stationmaster.

The feminine is **la jefa**, formed normally, and both are ordinary words at work — not slang and not deferential.

Grammar Lens: the j that used to be something else

Jefe came from French *chef*, and the **ch** became a **j**. Spanish did that to a whole shelf of borrowings:

French	Spanish
chef	el **j**efe
jardin	el **j**ardín
jamais	—

The **j** is the *jota*, the sound at the back of the throat, and it is a latecomer: medieval Spanish did not have it. Words spelled with **j** or with **g** before *e* and *i* all shifted to it at roughly the same time, a few hundred years ago, which is why *jefe*, *mujer* and *gente* now share a sound that none of them started with.

The word, taken apart — and its English cousins

French **chef** is Latin **caput**, **head** — and *caput* is the same word inside **la cabeza**.

That needs one correction to something you were told earlier. When you learned *la cabeza*, French was described as having dropped *caput* altogether for *testa*, a pot. That is true of the **body part** and only of it: *tête* replaced *caput* for the thing on your shoulders, while *caput* itself stayed on in French as *chef*, a head in the sense of a chief. It is that surviving branch Spanish later borrowed.

So *el jefe* and *la cabeza* are one Latin noun arriving twice: once worn down through Spanish speech into the body part, once borrowed back from French as the person in charge. A boss is literally **a head**, exactly as in English *head of department*.

The family is large: **el capítulo** (a chapter, a little head), **la capital** (the head city), **acabar** — to finish, to bring to a head — and English **captain**, **chief**, **chef**, **capital** and **cape**. A *chef* is the head of a kitchen, and *chief* and *jefe* are the same word in two languages.

Your turn

Say these aloud:

- I have to speak to the boss
- the head of HR, using the feminine
- that you cannot make your mind up about asking her
- what *jefe* and *cabeza* have in common

Before you move on

The boss? (**El jefe**.) The feminine? (**La jefa**.) What does *caput* mean? (**Head** — the same one inside *la cabeza*.)

462.4 (reducir, decidirse, el jefe) — from cold

From memory alone, say all three: *to cut back*, *to make your mind up*, *the boss*.

Grammar Lens: one word, two roads, four hundred years apart

the road	the word
worn down through Spanish speech	**la cabeza**
borrowed from French, much later	**el jefe**

Both are Latin *caput*, head. The first went through centuries of mouths and came out as a body part; the second was picked up whole from a neighbour and came out as a person.

You have watched this several times — *cosa* against *causa*, *razón* against *ración*, *rueda* against *rotativo*, *consejo* against *consultar*. Every one of those came out of Latin twice at two different speeds. This one took a detour through a **third** language, which is why it looks like neither.

Grammar Lens: two verbs, two pictures of cutting and leading

verb	the picture inside it
reducir	*re-ducere*, to **lead back**
decidirse	*de-caedere*, to **cut off**

Deciding cuts the other options away; reducing leads the number back down. Both are physical, and both are still doing the work: *la ducha* leads water, *preciso* is cut to the edge.

And *decidirse* is the fourth *-se* pair you have met, after *mudarse*, *acercarse* and *arreglarse*. Here the *-se* adds effort — *no me decido* is dithering, where *no decido* would be a job description.

Your turn

Say these aloud:

- the boss wants to cut costs
- I can't make my mind up
- which two Spanish words are both Latin *caput*

Before you move on

All three again, in Spanish, without looking. Then one sentence about a decision somebody is putting off.

462.5 (el correo del jefe) — read it, then do it yourself

Say **el jefe** and **reducir**. The message below is from one about the other.

Your turn

An internal message, and one reply. *Read it:* both, then answer

1 — de la jefa

Buenos días. Tenemos que **reducir** el gasto de material este trimestre.

Antes del viernes, decidme qué se puede dejar de comprar en vuestra sección.

2 — la respuesta

Lo miro hoy. Todavía no **me decido** entre quitar el papel de color o bajar los pedidos de tinta, así que te digo mañana.

Say these aloud:

- what has to be cut, and by when
- the two things the second person is choosing between
- when the answer is coming

Why it's said this way

No me decido entre is the phrase to keep whole. With **entre** you name the options you are stuck between; with **por** you name the one you finally take. *No me decido entre A y B*, then *me decidí por A*.
Decidme is *vosotros*, plural and informal — a boss writing to her own team in Spain. A Latin American writer would say *díganme*, and a formal Spanish notice to the public would too. The verb ending places the writer, the reader and the register in one word.
And **tenemos que reducir**: *nosotros*, although the decision is hers. Spanish management writing does this constantly, and it is doing the same softening as the *se* on a shop notice — spreading the action out so nobody is singled out as its author.

Before you move on

Now your turn, out loud. Four lines: as a boss, say spending has to be cut and ask for suggestions by Friday; then as the reply, say you are torn between two options and will answer tomorrow.
Write it: the same four lines
Then check yourself: did you use *entre* for the options and *por* for the choice?

Chapter 463

El viaje guiado

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can arrange or join an organised outing: say who is putting it on, that a guide is coming, and ask whether an early start matters to anyone.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

463.1 organizar — to put it together

> Say **la agenda** and **encargar**. Somebody has to put the whole thing together, and that is the verb next.

You'll want to know: organizar

organizar — to organise, to arrange, to put on.

Organizar una excursión — to arrange a trip. *Lo organiza el ayuntamiento* — the town hall is putting it on. *Organízate* — get yourself sorted.

La organización is both the act and the body that does it, the same double sense as *la instalación*.

Grammar Lens: the z that becomes c

You met this with *rechacé*. Here it is as a rule you can apply everywhere:

verb	I did it
organizar	organi**c**é
empezar	empe**c**é
rechazar	recha**c**é

Spanish almost never writes **ze** — outside a short list of oddities like *zeta* and *zigzag* — and in a verb ending it never does. Wherever an ending would put an *e* after the *z*, the *z* becomes a **c**, and the sound does not change at all, because *z* and *c*-before-*e* are the same sound already.
It is a spelling rule and nothing more, which is why every *-zar* verb in the language obeys it.

The word, taken apart — and its English cousins

Greek **órganon**, a tool or an instrument — from *érgon*, **work**.
So an *organ* is a **working part**, and to organise is to arrange the working parts so they function together. The body's **órganos** are named the same way: each one is a tool doing a job.
Érgon is worth keeping, because it is in English **energy** (work within), **surgery** — through *kheirourgía*, hand-work — and **ergonomic**. And the musical organ is the same Greek noun: an instrument, a tool for making sound.
Spanish took the word from Greek by way of Latin, which is why it kept its shape rather than wearing down.

Your turn

Say these aloud:

- the boss is organising a trip
- I organised it, in the past
- what an *órgano* and a tool have in common

Before you move on

To organise? (**Organizar**.) I organised? (**Organicé** — z becomes c.) What does *érgon* mean? (**Work**.)

463.2 el guía / la guía — the person, and the book

Say **la guardia** and **seguir**. The first taught you a rule about articles, and the word coming next obeys it.

You'll want to know: el guía / la guía

el guía — the guide, the person. **la guía** — the guidebook, and also a woman doing the job.

El guía habla inglés — the guide speaks English. *Una guía de Madrid* — a guidebook. *La guía telefónica* — the phone book.

Guiar is the verb: *nos guió por el casco viejo* — she led us round the old town.

Grammar Lens: the pattern you already met

The duty-chemist lesson gave you this: the feminine names the thing, the masculine names a person. Here is the set again, with the new one in place:

feminine	masculine
la guardia — the watch	el guardia — the officer
la guía — the guidebook	el guía — the guide
la policía — the force	el policía — the officer

La guía complicates it, because a female guide is *la guía* as well — so the feminine covers both the object and a woman doing the job, and only context separates them. *La policía* does the same: it is the force, and it is also a policewoman. *Llamé a la guía* is almost certainly a person; *compré la guía* is certainly a book.

The word, taken apart — and its English cousins

A Germanic word — and nobody can tell you which one. The usual candidate is a reconstructed ***witan**, to watch over, to show the way, which gave Occitan *guidar* and from there *guiar*. The asterisk is the warning you met on *tripaliare*: inferred, never written down. The Academy prefers a different Gothic form again. All the accounts agree on Germanic, and on **watching**.

So not *one who knows*, tempting as English **wit** makes it — that is the neighbouring branch, knowing and watching being two limbs off one

root for *seeing*. The Germanic *w-* does surface as **gu-**, as in *guardar* and *guerra*.
Set it against **seguir**, which is Latin *sequi*, to follow. A *guía* knows the way and a follower *sigue*. Two words for the two ends of the same walk, one Germanic and one Latin — which is the ordinary condition of Spanish vocabulary rather than an oddity.

Your turn

Say these aloud:

- the guide speaks English
- I bought a guidebook
- which article makes it a person, and why it is not decisive

Before you move on

The guidebook? (**La guía**.) A male guide? (**El guía**.) What is the root of *guía*? (**A Germanic word for watching over** — reconstructed, so it carries an asterisk.)

463.3 importar — to matter

Say **importante** and **interesar**. The first has a verb inside it, and that verb behaves like the second.

You'll want to know: importar

importar — to matter, to be of concern.

No importa — it doesn't matter. *¿Te importa si abro la ventana?* — do you mind if I open the window? *Me importa mucho* — it matters a lot to me.

It also means to import goods, which is the literal sense, but the everyday one is mattering.

Grammar Lens: it works like gustar and interesar

The thing that matters is the **subject**, and the person is an indirect object — the same shape as *interesar*:

Spanish	word for word
me interesa el arte	art interests me
me importa el resultado	the result matters to me
no me importan los horarios	the timetables don't matter to me

The verb agrees with the **thing**, not the person: *importan* for plural timetables. English puts the person first and Spanish puts the thing, which is why *I don't mind* comes out as *no me importa* — literally "it doesn't matter to me".

That makes **¿te importa...?** the standard polite request: you are asking whether a thing would matter to them, not asking permission.

The word, taken apart — and its English cousins

Latin **importare**: **in-**, in, plus **portare**, **to carry**. To carry something **in**.

Importing goods is carrying them in, and that is the whole of what Rome meant by it. **Mattering** is the later half, invented inside the Romance languages long after Latin — you met that split under *importante*, and this is the verb it was cut from. A thing that *imports* brings weight in with it.

Portare is a wide family: **transportar**, **exportar**, English **portable** and the **porter** who carries your bags. Keep it apart from its look-alike *porta*, a **gate** — the word inside *la puerta*, *el puerto* and **el pasaporte**, which carries you through a gate rather than carrying anything itself. You were warned about this pair at *la puerta*, where English's two *porter*s turned out to be two different words.

Your turn

Say these aloud:

- it doesn't matter
- do you mind if I open the window?
- ask whether the guidebook matters to them
- the timetables don't matter to me, watching the agreement

Before you move on

To matter? (**Importar**.) What does the verb agree with? (**The thing, not the person**.) What does *portare* mean? (**To carry**.)

463.4 (organizar, el guía, importar) — from cold

From memory alone, say all three: *to organise*, *the guide*, *to matter*.

Grammar Lens: the verbs where the thing is the subject

Spanish	what is the subject
me gusta el libro	the book
me interesa el arte	art
me importa el resultado	the result
me duele la cabeza	the head

Four verbs, one shape, and you now have the four this book has given you. The family is larger — *encantar*, *faltar* and *parecer* all run on the same machine. The person is never the subject; the thing is, and the verb agrees with it. *Me importan los horarios* takes the plural because the timetables are doing the mattering.
The useful consequence: **¿te importa...?** is how Spanish asks a small favour, and it is not asking permission. It asks whether the thing would weigh on them.

Grammar Lens: two spellings the ending forces

verb	I did it
organizar	organi**c**é
rechazar	recha**c**é

Verb endings never put an **e** after a *z*, so every *-zar* verb swaps to **c** before an *e*. The sound is unchanged; only the letter moves.
And **la guía** carries its accent for the reason *la vía* did — to keep the **i** from fusing with the **a**. Two syllables, not one.

Your turn

Say these aloud:

- they're organising a trip with a guide
- the times don't matter to me
- how you would ask somebody if they mind

Before you move on

All three again, in Spanish, without looking. Then one sentence arranging an outing.

463.5 (la excursión del sábado) — read it, then do it yourself

Say **organizar** and **el guía**. The notice below has one doing the other.

Your turn

A message to a walking group. *Read it:* the message, then answer

> Hola a todos. La excursión del sábado la **organiza** el centro cívico.
>
> Viene un **guía** del pueblo, así que no hace falta llevar mapa.
>
> Salimos a las ocho. Si a alguien le **importa** madrugar, hay otro grupo a las once, pero ese no lleva guía.

Say these aloud:

- who is putting the trip on, and who is coming with it
- why you do not need a map
- the difference between the two groups

Why it's said this way

La excursión del sábado la organiza el centro cívico puts the object first and then repeats it as **la**. That doubling is not a mistake and not emphasis for its own sake: Spanish allows the object to lead

the sentence, and when it does, a pronoun must hold its place beside the verb. English would say "the Saturday trip is organised by the civic centre" and reach for a passive; Spanish reorders instead.
Si a alguien le importa madrugar is *importar* in its natural habitat. The subject is *madrugar* — getting up early is what does the mattering — and *a alguien le* marks the person it matters to. Word for word: "if getting up early matters to anyone".
Note *le* even though *alguien* is already named. Spanish doubles the indirect object almost always, and leaving the *le* out would sound incomplete.

Before you move on

Now your turn, out loud. Four lines to a group: say who is organising the outing, say a guide is coming, give the time, and ask whether an early start matters to anyone.
Write it: the same four lines
Then check yourself: did *importar* agree with the thing rather than the person, and did you keep the *le*?

Chapter 464

La cita perdida

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can handle a missed appointment: read the reminder, apologise for not going, say what let me down, and ask for another.
>
> *Read the message or notice this chapter's words exist for, then say the same thing back.*

464.1 recordar — to remember, and to remind

> Say **el corazón** and **la cita**. The heart is inside the verb that keeps the appointment.

You'll want to know: recordar

recordar — to remember, and also to remind.

No recuerdo su nombre — I don't remember his name. *Recuérdame la cita* — remind me about the appointment. *Te recuerdo que mañana es fiesta* — I remind you that tomorrow is a holiday.

One verb, both jobs. Which it is depends on whether somebody else is being told: *recuerdo* alone is remembering, *te recuerdo* is reminding.

Grammar Lens: recordar is not acordarse

Spanish has a second verb for remembering and the two are near-twins:

Spanish	what it takes
recordar algo	a plain object
acordarse ***de*** *algo*	*de*, always

No recuerdo la dirección and *no me acuerdo de la dirección* mean the same thing. The difference is grammatical, not semantic: *recordar* takes the thing directly, *acordarse* needs its **de**, and dropping it is one of the commonest mistakes learners make.
Both are **o → ue** verbs: *recuerdo*, *me acuerdo*. That is the stressed-vowel break you have had since the stem-change chapter, and you have seen it on this exact root before: *de acuerdo* showed you *cor* opening into *cuerdo*.

The word, taken apart — and its English cousins

Latin **recordari**: **re-**, back, plus **cor**, **cordis** — **the heart**.
To remember is to **bring back through the heart**, because Latin located memory and thought there rather than in the head. That is the same *cor* inside **el corazón**, which you have had for many chapters.
The family is everywhere once seen: **el acuerdo**, an agreement — hearts brought together — and **recordar**'s English relative **record**, which is literally a thing committed to memory. **Courage** is *cor* too, by way of French, and so is **concordance**.
So a Spanish speaker asking you to remember something is asking you to run it back past your heart.

Your turn

Say these aloud:

- I don't remember the appointment
- remind me tomorrow
- which preposition *acordarse* needs

Before you move on

To remember? (**Recordar**.) I remember? (**Recuerdo**.) What is *cor*? (**The heart** — the same one in *corazón*.)

464.2 el dentista / la dentista — the dentist

Say **el diente** and **el médico**. Put them together and name the person.

You'll want to know: el dentista

el dentista, **la dentista** — the dentist.

Tengo cita con el dentista — I've got a dentist's appointment. *Voy al dentista* — I'm going to the dentist's.

Note *al dentista* for the place as well as the person: Spanish sends you to the professional, not to the surgery, where English says "to the dentist's".

Grammar Lens: -ista does not change for gender

-ista nouns have one form for both, and only the article moves:

the person	masculine	feminine
dentist	el dentista	la dentista
artist	el artista	la artista
tourist	el turista	la turista

The **-a** ending misleads, because it looks feminine and is not. *El dentista* is correct and *el dentisto* does not exist.

Compare *el médico / la médica*, which does change. The difference is the ending: *-ista* is invariable, *-o* is not. Learn the ending and the article stops being a guess — the same bargain the noun-making suffixes offered.

The word, taken apart — and its English cousins

Latin **dens**, **dentem** — **tooth** — plus the job-ending you met at the very start of this book, when *-ista* first showed you *el artista* and *la artista*. Greek wrote it **-istēs**; Latin took it in as *-ista*, and that Latin *-a* is the one Spanish inherited.

So *dentista* is a Latin body part with a borrowed job-ending welded on, which is how a large family of profession words was built: *el periodista*, *el electricista*, *el taxista*. The ending is still productive, so Spanish goes on making new ones. It is one of several — *-dor* gives *el conductor*, *-ero* gives *el camarero*.

Dentem gives **el diente**, and English **dental**, **dentist** and **indent** — to cut a tooth-shaped notch. A **dandelion** is *dent de lion*, a lion's

tooth, named for its leaves.

Your turn

Say these aloud:

- I've got a dentist's appointment
- a female dentist, with the right article
- why *el dentista* is not a mistake

Before you move on

The dentist? (**El dentista** or **la dentista**.) Does the noun change? (**No** — only the article.) What is *dentem*? (**A tooth**.)

464.3 fallar — to fail somebody

Say **falso** and **estropeado**. One is about truth, one about machines. The verb next covers both.

You'll want to know: fallar

fallar — to fail, to go wrong, to let somebody down.

Me falló el coche — the car let me down. *Ha fallado el sistema* — the system has gone down. *No me falles* — don't let me down.

El fallo is the noun in Spain: a fault, a glitch, and in an exam a wrong answer. Much of Latin America says **la falla** for the same fault.

Grammar Lens: fallar is not estropearse

Both are about things going wrong, and they are not the same:

what happened	the verb
it stopped working, and stayed that way	**estropearse**
it did not do its job at the moment needed	**fallar**

Se ha estropeado el coche — it is broken, in the garage. *Me falló el coche* — it let me down, this morning, when I needed it. A car can

fallar once and be fine afterwards.
That is why *fallar* is the verb for people too. *Me falló* about a friend is a reproach: they were not there when it counted.

The word, taken apart — and its English cousins

Latin **fallere** — the verb that **tripped you up**, as you had it under *falso*. That literal footing is what the rest grows out of: to trip somebody is to put the ground where they did not expect it, and from there to mislead them.
The move from tripping to failing runs through disappointment: something that *fails* you has, in effect, put the ground somewhere other than where it promised. Latin *fallere* carried the deceiving sense alongside the literal one, and Spanish kept the pair — *falso* for the lie, *fallar* for the letting-down.
English took it twice as well: **false** from the participle, and **fail** through French. **Fault**, **fallacy** and **failure** are all here, and so is **default**, which is a failing to act.
A second Spanish branch is **faltar**, to be lacking — *me falta tiempo*, I'm short of time — from the same root by a different road.

Your turn

Say these aloud:

- the car let me down this morning
- don't let me down
- which verb fits a washing machine that has stopped for good

Before you move on

To let somebody down? (**Fallar**.) The noun? (**El fallo**.) What did *fallere* do to you? (**Tripped you up** — the same verb as *falso*.)

464.4 (recordar, el dentista, fallar) — from cold

From memory alone, say all three: *to remember*, *the dentist*, *to let down*.

Grammar Lens: two bodies and a lie

new word	what it was built on
recordar	*cor*, the heart — the one in *el corazón*
el dentista	*dentem*, a tooth — the one in *el diente*
fallar	*fallere*, to deceive — the one in *falso*

Two body parts and a lie, and all three were already in your vocabulary. By this stage that is the ordinary case rather than a happy accident: a corpus of nearly a thousand words contains most of the roots the next hundred will need.

Recordar is the one worth keeping. Latin put memory in the **heart**, not the head, so remembering is running a thing back past it — and English **record** is the same word, a thing committed to memory.

Grammar Lens: endings that fix the article, and one that does not

ending	what it settles
-ista	**nothing changes**; only the article moves
-o / -a	the noun itself changes: *el médico*, *la médica*

El dentista looks feminine and is not. That **-a** rides in on the borrowed job-ending *-ista*, which does not bend for gender at all — so the noun stays put and the article does the work. *El guía* and *la guía*, one chapter back, make the same move without a word of Greek in them.

Your turn

Say these aloud:

- remind me about the dentist
- the car let me down
- which of the three words has a heart inside it

Before you move on

All three again, in Spanish, without looking. Then one sentence about an appointment you nearly missed.

464.5 (perder la cita) — read it, then do it yourself

Say **recordar** and **fallar**. The first message does one; the second admits the other.

Your turn

Two messages, a day apart. *Read it:* both, then answer

1 — de la clínica

Le **recordamos** su cita con la **dentista** el jueves a las 10:15. Para anular, llame con 24 horas de antelación.

2 — el jueves por la tarde

Buenas tardes. Siento no haber ido esta mañana; me **falló** el despertador y no me acordé hasta las once. ¿Puedo pedir otra cita?

Say these aloud:

- when the appointment was, and who with
- what you must do to cancel, and how far ahead
- the two things that went wrong

Why it's said this way

The apology uses **both** verbs for remembering and they are doing different work. **Me falló el despertador** — the alarm clock is the subject; it let the writer down. Then **no me acordé** — *acordarse*, the reflexive one, for the person's own failure to recall. Spanish separates the thing that failed from the person who forgot, and the apology is more honest for it.

La dentista, feminine, so the clinic is naming a particular woman. And *con la dentista*, not *con el dentista* — had the message said *el*, you would know it was a man, since the noun itself never tells you. **Siento no haber ido** is the standard apology frame: *sentir* plus a perfect infinitive. Not *siento que no fui*, which a learner reaches for and a Spanish speaker does not.

Before you move on

Now your turn, out loud. Four lines: as the clinic, remind somebody of a dental appointment and say how to cancel; then as the patient, apologise for missing it, say what let you down, and ask for another.
Write it: the same four lines
Then check yourself: did *fallar* go to the thing and *acordarse* to the person, and did *acordarse* keep its *de*?

Chapter 465

El cuaderno de campo

Modes: **voice** (5) **eyes** (1) **Hands-free start:** the first 3 of 6 lessons.

> ***By the end of this chapter:*** I can keep a shared written record: read the instructions inside a weather notebook, note down a temperature and a rainfall, and understand why a zero is not the same as a blank.
>
> *Read the instructions taped inside a shared weather notebook, then fill in a day out loud.*

465.1 el cuaderno — the notebook

> Say **el libro**, **el papel** and **el carné**. One is bound, one is loose, and the third already told you which number it counts to.

You'll want to know: el cuaderno

el cuaderno — the notebook, the exercise book.

> Traiga un **cuaderno** y un bolígrafo.

Un cuaderno de espiral — a spiral notebook. *El cuaderno de campo* — the field notebook, the one a person carries to write down what they see outside.

A *libro* is written for you. A *cuaderno* is waiting for you to write in it. That is the difference that matters, and it is why a school hands out *cuadernos* and a library lends *libros*.

The word, taken apart — and its English cousins

You have had this number already. *El carné* was Latin **quaternum**, a set of four — four sheets of paper folded together, which is how a small notebook was made — and that lesson named *el cuaderno* while it was there. This is the object the card shrank from.

Latin	Spanish
quaternum	el carné, el cuaderno
quattuor	cuatro, cuarto

So *quaternum* counts **sheets gathered into a fold**, not pages produced by one. Four leaves folded together was the cheapest book anybody could make, and the thing was named after how many went in.

English kept the count plainer still: a **quire** is a gathering of folded sheets, and it is the same *quaternum* worn down through French. The notebook in a bag and the number four are one word, separated by the thing rarely thought about when buying one — how many sheets went into the fold.

Grammar Lens: the ua that does not move

Spanish has taught you to watch stressed vowels, because those are the ones that break. This family shows the other half of that rule.

word	stress falls on
cua-tro	the *ua*
cua-**der**-no	the *-der-*

The *ua* sits still in both. It is not a broken vowel waiting to happen — it came straight from the Latin *qua-* and stayed. The lesson is that the stress test tells you where to *look*, and looking sometimes tells you nothing is happening. Breaking needs two things, not one: the vowel must be stressed **and** must have been a short Latin **e** or **o** (or the *ae* that fell in with short *e*, which is why *quaerere* gave *quiero*). In *cuatro* the *ua* is stressed, so it passes the first test and fails the second. In *cuaderno* it fails both.

Your turn

Say these aloud:

- bring a notebook

- the difference between a libro and a cuaderno
- which number is hiding in cuaderno

Before you move on

The notebook? (**El cuaderno**.) Which word did you meet its number under? (***El carné*** — the same *quaternum*, four sheets in one fold.)

465.2 anotar — to write it down

Say **apuntar** and **la nota**. You already have a verb for writing something down. A second one is about to arrive, and the two lean in different directions.

You'll want to know: anotar

anotar — to note down, to record in writing.

Anote la temperatura cada mañana en el cuaderno.

Anotar los datos — to record the figures. *Anotar un gol* — to score a goal, because the scoreboard is a record too.

Grammar Lens: anotar is not apuntar

Both put words on paper, and the difference is what the writing is *for*.

what you are doing	the verb
jotting so you do not forget	**apuntar**
entering it into a record	**anotar**

Apunta mi número is a scrap of paper in a pocket. *Anote su número en el registro* is a line in a book that will be read later by somebody else. The etymologies lean the same way, which is rare enough to be worth noticing. *Apuntar* is **punctum**, the dot a point leaves behind — you had it from *pungere*, to pierce. *Anotar* is **nota**, a mark made so that somebody could read it. Both name marks; the difference is who each mark is for.
So a doctor *apunta* while you talk and *anota* in your file afterwards.

The word, taken apart — and its English cousins

Latin **adnotare**: **ad-**, towards, plus **nota**, the mark you have from *la nota*. The writing is all in the noun.
Latin *nota* was a sign that stood for something — a letter, a brand, a mark in the margin. English took it both ways: a **note** you write, and to **notice**, which marks a thing without writing anything.
You were given **notar** alongside *la nota* — to notice, to catch the mark. That is Spanish having taken the second road. *Anotar* is the first road, with the prefix aiming the mark at something.

Spanish	what it does
notar	to notice it
anotar	to write it down

One root, one prefix, and the prefix is the whole difference between seeing something and keeping it.
Anotado is the participle, and *las anotaciones* are the notes themselves — the *-ción* ending doing the job it has done since you first met it.

Your turn

Say these aloud:

- note the temperature down in the notebook
- which verb you use for a scrap of paper
- what notar means without the a-

Before you move on

To write it into a record? (**Anotar**.) And to notice, without writing? (**Notar**.) Which Latin word is inside both? (***Nota***.)

465.3 la temperatura — the temperature

Say **el calor** and **el frío**. You have the two ends. Here is the word for the scale that runs between them.

You'll want to know: la temperatura

la temperatura — the temperature.

> Anote la **temperatura** a las ocho de la mañana y a las ocho de la tarde.

Tomar la temperatura — to take somebody's temperature. In Spain, *tener temperatura* is to be running a fever with no number said out loud; *tener fiebre* is the safer phrase everywhere.

Note what *calor* and *frío* cannot do: they tell you which way, never how much. *Hace calor* is a judgement. *La temperatura* is a measurement, and the whole reason a notebook wants one is that a measurement can be compared with yesterday's.

The word, taken apart — and its English cousins

Latin **temperare** did not mean heat at all. It meant **to mix in the right proportion** — to hold two things in balance so that neither wins.

Follow that one idea and a very odd family falls into line:

English	what is being balanced
to **temper** steel	heat against hardness
a **temperate** climate	summer against winter

A person's **temper** is the mix of their humours, and losing it is the mix coming apart. **Tempera** paint is pigment held in the right proportion of egg. And a **temperature** is the point a mixture has reached on the scale between hot and cold.

Spanish keeps the verb as **templar**, to temper or to tune an instrument, and *templado* is the word for weather that is neither one thing nor the other.

Grammar Lens: -ura has two jobs

La factura gave you **-ura** as the thing an action produces, with a verb hiding inside the noun. *Temperatura* is built the same way and on the same instruction: the verb inside it is *temperare*, and what the action produces is a reading.

The ending has a second family, though, and it does not take verbs at all:

base	noun
alto	la alt**ura**
ancho	la anch**ura**

Those sit on adjectives, and they name how much of the quality there is — *altura* is how tall, *anchura* is how wide, and *la verdura* is the one you already own. So when you meet a new **-ura** noun, look for a verb first, as *factura* told you to, and look for an adjective second.

Your turn

Say these aloud:

- note down the temperature
- what temperare meant before it meant heat
- how tall, using the -ura noun

Before you move on

The temperature? (**La temperatura**.) What did *temperare* mean? (**To mix in the right proportion**.) What does *-ura* build? (**The thing an action produces** — *factura*, *temperatura* — and on an adjective, **how much of a quality** — *altura*.)

465.4 la lluvia — the rain

Say **llueve** and **el llanto**. Both begin with the sound this word begins with, and both have already told you why.

You'll want to know: la lluvia

la lluvia — the rain.

Lluvia en los últimos tres días: 12 mm.

Lluvia fuerte — heavy rain. *Un día de lluvia* — a rainy day. *La lluvia ácida* — acid rain.

Grammar Lens: the verb and the noun do different work

You already have *llueve*, and it refuses a subject: there is nobody raining. *La lluvia* is what you reach for the moment rain has to be counted, described or put in a column.

what you are saying	the word
it is raining now	**llueve**
how much rain there was	**la lluvia**

Llueve mucho is a report from the window. *Hubo mucha lluvia* is a line in a notebook. A verb with no subject cannot be measured; a noun can, which is why the rainfall column is headed *lluvia* and never *llueve*.

The word, taken apart — and its English cousins

This word's Latin has been passed under your nose several times already, and it is worth saying so.

The rule came to you under *llamar*, back at the beginning: Latin *cl-*, *fl-* and *pl-* arrive as Spanish **ll-** in words that came down by mouth. *Llueve* put it on rain, from *pluere*. And under *el llanto* it was run out over a list — where *la lluvia* was already sitting, as the example beside *lleno* and *llorar*.

Latin	Spanish
pluvia	la lluvia
plenus	lleno

So nothing here is new except the use. Latin **pluvia** is the rain itself, *pluere* is the raining, and both came down by mouth with the cluster shifted.

The shift is not a law, and you have seen it fail. Words lifted later out of writing keep their *pl-* — which is why *planta* still has one, and why Spanish owns **la lluvia** and **pluvial** at the same time, the same word at two speeds. A *pluviómetro* measures exactly what this chapter's notebook is for, and it kept the cluster because it was built by scholars, not worn down by mouths.

That is what the earlier lessons were for. A rule you were given at the start turns up later holding a word you now need, and the word costs you nothing because the rule already paid for it.

Your turn

Say these aloud:

- heavy rain, and a rainy day
- which one goes in a column, llueve or la lluvia
- what Latin pl- turns into

Before you move on

The rain? (**La lluvia**.) Its Latin form? (***Pluvia***.) And why does it start with *ll*? (**Because Latin *pl-* became Spanish *ll-***.)

465.5 (el cuaderno, anotar, la temperatura, la lluvia) — from cold

Four words, no prompts. The book you write in, the verb for writing into it, the number you write, and the weather you write it about.

You'll want to know: the four, cold

English	Spanish
the notebook	**el cuaderno**
to note down	**anotar**
the temperature	**la temperatura**
the rain	**la lluvia**

Grammar Lens: an impression is not a record

This chapter is about the moment a thing stops being an impression and becomes a record.

impression	record
hace calor	*la temperatura: 24*
llueve	*lluvia: 12 mm*

Hace calor and *llueve* are both true and neither can be compared with yesterday. The nouns can. That is why the chapter's verb is **anotar** rather than **apuntar**: a note you jot is for you, and a note you enter is

for whoever reads the book next.

The word, taken apart — and its English cousins

Two of the four hide something that is not about writing or weather at all.

word	what is underneath
el cuaderno	**four** — *quaternum*, four sheets in one fold
la temperatura	**mixing** — *temperare*, to hold in proportion

The other two say what they are. *Anotar* is *nota*, a mark, with a prefix aiming it. And *la lluvia* is *pluvia*, which had been passed under your nose several times — under *llueve*, *el llanto*, *lleno* and *planta* — before you needed it.

Your turn

Say these aloud:

- note the temperature down in the notebook
- the rain, and then it is raining
- which of the four counts to four

Before you move on

The notebook? (**El cuaderno**.) To enter it in the record? (**Anotar**.) The temperature? (**La temperatura**.) The rain? (**La lluvia**.)

465.6 (el cuaderno de campo) — read it, then fill in a day

Say **el cuaderno** and **anotar**. Somebody else will read what you write in it, which is the whole reason the instructions exist.

Read this

Taped inside the front cover of a shared notebook in a community garden:

> **CUADERNO DE CAMPO — CÓMO USARLO**
>
> **Anote** la temperatura dos veces al día: a las ocho de la mañana y a las ocho de la tarde.
>
> Si ha llovido, **anote** también la lluvia en milímetros. Si no ha llovido, escriba un cero. No deje la casilla en blanco.
>
> Una línea por día. Si olvida un día, déjelo vacío y siga: es peor **anotar** de memoria que no **anotar** nada.

Grammar Lens: a zero is not a blank

Four instructions, and the last one is the interesting one.

the instruction	what it wants
anote la temperatura	twice a day, at fixed hours
escriba un cero	a zero, not an empty box

The notice draws a line between **un cero** and **la casilla en blanco**. A zero says it did not rain. A blank says nobody looked. Those are different facts, and a record that cannot tell them apart is worth less than one that can — which is why the last line would rather you left a gap than filled it in from memory.

Grammar Lens: anote, not anota

Every instruction here is **usted**: *anote*, *escriba*, *deje*, *siga*. A notice usually takes the polite form, because it does not know who will read it — though plenty of Spanish notices use a bare infinitive instead, as in *no fumar*.

to one person you know	on a notice
anota	**anote**

You have had the mechanism since *hable usted*: an *usted* command **is** the subjunctive, because *usted* is a third-person title. Not a borrowing — the same form doing its own job. (The *tú* negative is subjunctive too: *no anotes*.) It is why *reduzca* on the road sign looked the way it

did.

Your turn

Yesterday it rained in the morning and the afternoon was warm. Fill in the line out loud: say the date, the two temperatures, and the rain.

Now say what you would write if it had not rained at all — and say why that is not the same as leaving it blank.

Before you move on

The field notebook? (**El cuaderno de campo**.) The polite command to note something? (**Anote**.) What goes in the box on a dry day? (**Un cero** — never a blank.)

Chapter 466

Una carta del colegio

Modes: **voice** (5) **eyes** (1) **Hands-free start:** the first 5 of 6 lessons.

> ***By the end of this chapter:*** I can read a formal letter home from a school: understand who signed it, what it reports about behaviour, that the change can be seen, and that being asked to discuss something is an invitation rather than a summons.
>
> *Read a letter home from the head, then say what it actually asks for.*

466.1 el director — the one who signs the letter

> Say **directo** and **el actor**. One gave you the verb and one gave you the ending. Put them together and you have this word already.

You'll want to know: el director

el director, **la directora** — the head, the director.

> Atentamente, la **directora** del centro.

El director del colegio — the head teacher. *La directora de la empresa* — the company director. *El director de cine* — the film director.

Unlike *el guía*, this one **does** change: *director*, *directora* — the ordinary swap, the one *profesor / profesora* already showed you. It is a habit rather than a law, and this very family holds the exception: *actor* takes **actriz**, not *actora*, as you saw.

The word, taken apart — and its English cousins

You have been given both halves already, in two different chapters, and this is where they meet.
When you learned **el actor**, the *-tor* ending was set out as Latin's way of naming the doer: take a verb, add *-tor*, get the one who does it. That lesson listed *agere* → *actor*, *docere* → *doctor* — and **dirigere** → **director**. The word was printed in front of you before you needed it. Spanish borrowed it from Late Latin *director* (EtymDB 2.1).
And *dirigere* came earlier still, under **la derecha** and again under **directo**: *dis-*, apart, plus *regere*, to rule — to set something straight, to aim it. So a *director* is the one who **aims the thing**, not the one who shouts.

the verb	**the doer**
dirigere, to aim	el director

Dirigir is the living Spanish verb: *dirigir una empresa*, to run a company. And *dirigirse a alguien* is to address somebody — which is the point *derecha* made about English **address**, to set a letter straight towards a person. Here it is the same verb doing the same job in Spanish, and it is what the letter in this chapter does.

Your turn

Say these aloud:

- the head teacher, then the headmistress
- what dirigere means
- the ending that names the doer

Before you move on

The head? (**El director** — *la directora.*) What does a director do to a thing? (**Aims it** — *dirigere*, to set straight.)

466.2 visible — able to be seen

Say **sociable** and **el aviso**. One gave you the ending, the other gave you the root. This word is the two of them stuck together.

You'll want to know: visible

visible — visible, able to be seen.

El aviso debe quedar **visible** en el tablón de anuncios.

En un lugar visible — somewhere it can be seen, the phrase notices use about themselves. *Una mejora visible* — a noticeable improvement.

Like *sociable*, it has one form for both genders: *un cartel visible*, *una puerta visible*. The plural still moves — *carteles visibles*.

Grammar Lens: -able and -ible point two ways

They are one ending, Latin **-bilis**, wearing two spellings, and which vowel you get follows the verb's family:

verb family	ending
-ar — *lavar*	lav**able**
-er, **-ir** — *vender*, *ver*	vend**ible**, vis**ible**

Older borrowings can sit outside that, so it is a lean rather than a law — but it predicts the new words, which is what a rule is for.

The direction is steadier than the spelling. *Amable* told you what the ending does: **able to have this done to it**. That is the ordinary reading, and it is the one to reach for first — *lavable*, *visible*, *comestible* all describe a thing something is done **to**.

A small group leans the other way and names a doer or a causer instead: *sociable*, *agradable*, *durable*. Note that *sociable* is not even built on a verb — *socius* is a noun, a companion — which is part of why it behaves oddly. Take the common reading first and learn the handful that do not fit.

The word, taken apart — and its English cousins

Latin **videre**, to see — the root you met under *el aviso*, where *a-vis-o* turned out to be *ad visum*, "to what is seen".

Spanish did not set *videre* aside for the formal words. It kept it as the everyday **ver**, worn short through Old Spanish *veer*, which is what you were told when you learned the verb. What the formal words are built on is the verb's **other stem**, *vis-*: *visible*, *la visión*.

The same root is under a great many English words — **vision**, **visible**, **evident**, **advice**, **view** — most of them arriving through French on their way out of Latin rather than straight from it.

Your turn

Say these aloud:

- it must stay visible on the board
- which of sociable and visible has it done to them
- the Latin verb underneath

Before you move on

Visible? (**Visible.**) Does it change for a feminine noun? (**No** — but the plural does: *visibles.*) Which way does *-ible* usually point? (**At the thing** — able to have it done to it.)

466.3 el comportamiento — how somebody carries themselves

Say **importar** and **el entrenamiento**. One holds the root of the next word and the other holds its ending.

You'll want to know: el comportamiento

el comportamiento — behaviour, conduct.

Su **comportamiento** en clase ha mejorado.

El comportamiento del grupo — the group's behaviour. In a school letter it is the formal word; a parent at home is more likely to say *se porta bien* or *se porta mal*.

Comportarse is the verb: *compórtate*, behave yourself.

The word, taken apart — and its English cousins

com-, together, plus **portare**, to carry — the *portare* you had under *importar*, where carrying something **in** turned out to be the whole of what Rome meant by it. *Comportar* ← Latin *comportāre* (EtymDB 2.1).

To *comportarse* is to **carry yourself**, and English does the identical thing: *conduct* is *con-* plus *ducere*, to lead — to lead yourself. Two languages, two verbs of motion, the same idea that character is

something you are carrying about.

Spanish	English
comportarse, to carry oneself	to conduct oneself

Keep it away from *la puerta*. That is *porta*, a gate — the warning came first at *la puerta*, where English's two *porter*s turned out to be different words, and again at *importar*.

Grammar Lens: -miento on a reflexive verb

You have **-miento** from *el entrenamiento* and *el seguimiento*: it attaches to the calm form of the verb and hands back a masculine noun.
Comportarse is pronominal, and the ending is unbothered by that — it takes the plain stem, *comporta-*, so the *se* never enters the noun at all. You saw the same thing without it being named: *entrenarse* gives *el entrenamiento*.

verb	noun
entrenar(se)	el entrena**miento**
comportar(se)	el comporta**miento**

What the noun buys is register, not anonymity — *su comportamiento* says whose perfectly well. It states conduct as a topic rather than as something a child is doing to you, which is why a school letter reaches for it and a parent says *se porta mal*.

Your turn

Say these aloud:

- his behaviour in class has improved
- behave yourself
- what com- plus portare means literally

Before you move on

Behaviour? (**El comportamiento**.) The verb? (**Comportarse**.) What are you carrying? (**Yourself**.)

466.4 discutir — to discuss, and to argue

Say **la reunión** and **el director**. A meeting with the head is where this verb usually turns up.

You'll want to know: discutir

discutir — to discuss, and also to argue.

Podemos **discutir** el comportamiento en la reunión.

Discutir un tema — to discuss a topic. *Discutir con alguien* — to argue with somebody. **La discusión** is both the discussion and the row.

Grammar Lens: the preposition decides

One verb covers what English splits between *discuss* and *argue*, and the grammar around it does most of the sorting.

what follows	what it means
a thing — *discutir el precio*	discuss it
con a person — *discutir con él*	argue with him

A thing after the verb is a topic; a person after **con** is an opponent. It is not watertight — *discutir el precio con el jefe* can be either, and tone settles it — but the pattern is reliable enough to lean on, and mistaking the two is how a polite sentence turns rude.

The word, taken apart — and its English cousins

Latin **discutere**: **dis-**, apart, plus **quatere**, to shake.
To *discutere* was to **shake a thing to pieces** — to strike it until it came apart and you could see what was inside. The Romans used it of smashing, and only later of taking an argument apart.
Which makes the two Spanish senses one sense. Discussing a topic and arguing with a person are the same act at two temperatures: something is being shaken until it comes apart. English kept the violent end elsewhere — **concussion** is *con-* plus the same *quatere*, a violent shaking of the head.
Percusión is a third member, a striking right through.

Your turn

Say these aloud:

- we can discuss the behaviour at the meeting
- to argue with somebody
- what quatere means

Before you move on

To discuss? (**Discutir**.) And with a person, using *con*? (**To argue**.) What did *quatere* do? (**Shook** — *discutere* shakes a thing apart.)

466.5 (el director, visible, el comportamiento, discutir) — from cold

Four words, no prompts. Who signs the letter, what the notice must stay, what the letter is about, and what the meeting will do with it.

You'll want to know: the four, cold

English	Spanish
the head	**el director**
visible	**visible**
behaviour	**el comportamiento**
to discuss, to argue	**discutir**

Grammar Lens: three endings you already had

One piece of this chapter is new, and it is a spelling: **-ible**, beside the **-able** you already had. The endings themselves are all old news. What is worth holding is which way each one bends.

ending	does it change for a woman?
-tor	yes — *director*, *directora*
-ible	no — *visible* for everyone

El actor gave you *-tor* and printed *director* in its own table — and *la actriz* gave you the exception in the same breath. *Amable* and *sociable* gave you *-able*, and the reading to take first: able to have it done to it. *El entrenamiento* gave you *-miento*. Four words, and almost nothing underneath them you had not been handed.

The word, taken apart — and its English cousins

Two of the four are about **carrying and shaking**, which is not what a school letter sounds like.

word	**what is underneath**
el comportamiento	*com-* + *portare* — carrying yourself
discutir	*dis-* + *quatere* — shaking a thing apart

El director aims (*dirigere*, to set straight) and *visible* is seen (*videre*). Four abstractions, four physical verbs, and the letter that uses all four is about a child in a classroom.

Your turn

Say these aloud:

- the headmistress wants to discuss his behaviour
- it must stay visible
- which one of the four changes for a woman, and why the other three cannot

Before you move on

The head? (**El director**.) Visible? (**Visible**.) Behaviour? (**El comportamiento**.) To discuss? (**Discutir**.)

466.6 (una carta del colegio) — read it, then say what it wants

Say **el director** and **el comportamiento**. A letter with both words in it is rarely good news, and rarely as bad as it looks.

Read this

Estimada familia:

Les escribo para informarles de que el **comportamiento**

de su hijo en clase ha mejorado de forma **visible** durante este trimestre.

Me gustaría **discutir** con ustedes cómo mantener esa mejora. Pueden pedir una cita en secretaría.

Atentamente,

La **directora**

Grammar Lens: what the letter is not doing

A reader who knows *discutir* only as *argue* will read this as a summons. It is not one, and two words tell you so.

the word	**what it settles**
ha mejorado	the news is good
discutir **con ustedes**	a conversation, not a row

Discutir con leans towards arguing when nothing else is on the table. Here a topic follows it — *cómo mantener esa mejora* — which is exactly the mixed case you were warned about, and the good news settles it. The preposition leans; the content decides.

Note also **de forma visible**. The letter does not say the child is visible; it says the improvement can be seen. That reading comes from *videre* — seeing is done to a thing — rather than from the ending, which points either way.

Your turn

Say in one sentence what the letter reports and what it asks for.

Now say the same news to a friend, out of the formal register: start with *se porta* instead of *el comportamiento*.

Before you move on

Who wrote it? (**La directora**.) What improved? (**El comportamiento**.) How much? (**De forma visible**.) What does she want? (**Discutir** — to talk it over.)

Chapter 467

El huerto comunitario

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can read a monthly production sheet on a community garden's door: understand what was produced, who it fed, what the target was, and why a notice writes 'no fue suficiente' where a person would say 'no fue bastante'.
>
> *Read a community garden's monthly figures, then say whether the target was met.*

467.1 producir — to produce

> Say **reducir** and **la ducha**. The verb coming next is their close relative, and it will not make you learn anything twice.

You'll want to know: producir

producir — to produce, to make.

> El huerto **produce** unos cien kilos al mes.

Producir comida — to produce food. *La producción* is the noun, and **el producto** is the thing that comes out.

Grammar Lens: nothing new here, which is the point

Reducir taught you this whole verb, five chapters ago. *Producir* is the same class and takes the same two irregularities:

where	reducir	producir
the **z** before *c*	redu**zc**o	produ**zc**o
the **j** past	redu**j**e	produ**j**e

So the subjunctive is *produzca* — the form on a notice, as *reduzca* was on the road sign — and the past is *produjo*, never *producí*.
That is worth stopping on. Learning *reducir* bought you the whole *-ducir* corner of that class — *producir*, and *traducir* and *introducir* when you meet them — the verbs that take the **j** past as well as the **z**. Not the whole class, though. *Reducir*'s own lesson warned you: *conocer* shares the **-zc-** and not the past, going *conocí*. Two groups, one spelling, and the *-ducir* verbs are the half that also changes its past.

The word, taken apart — and its English cousins

Producir ← Latin *prōdūcere* (EtymDB 2.1): **pro-**, forward, plus **ducere**, to lead — the *ducere* already under *reducir* and under *la ducha*.
To produce is to **lead something forward**, out where it can be seen. A farmer leads a crop forward out of the ground; a factory leads goods forward out of a door. English keeps the picture in **produce** as a noun, the stuff itself, and in a theatre **producer**, who leads the show out in front of an audience.
Set them side by side and the prefix does all the work: *reducir* leads back, *producir* leads forward, and *conducir* — which *reducir*'s table already showed you — leads along.

Your turn

Say these aloud:

- the garden produces about a hundred kilos a month
- I produce, using the first-person form
- the past of producir, the one that is not producí

Before you move on

To produce? (**Producir**.) I produce? (**Produzco**.) It produced? (**Produjo**.) Which way does *pro-* lead? (**Forward**.)

467.2 suficiente — enough, and only enough

Say **bastante** and **escaso**. You already own both ends of this. The word coming next overlaps one of them, and the overlap is the lesson.

You'll want to know: suficiente

suficiente — enough, sufficient.

No producimos comida **suficiente** para todos.

Comida suficiente — enough food. *Lo suficiente* — enough of it, as a noun. *Suficientemente* — sufficiently.

Like *bastante*, it has one form for both genders: *un plato suficiente*, *una cantidad suficiente*.

Said of a person it turns unkind — *un tono suficiente* is a smug one.

Grammar Lens: bastante already means this, and that is the problem

Bastante was given to you as the middle of a scale — *poco*, **bastante**, *muy* — and its lesson was firm that it does **not** mean *a lot*. So what is *suficiente* for?

word	what else it does
bastante	*quite*, *fairly* — *bastante caro*
suficiente	names a requirement, not a place on a scale

Bastante has that second, adverbial job: *bastante caro* is **fairly** expensive, a reading on the scale. *Suficiente* has no scale reading at all. It measures a thing against what was needed, and reports whether the need was met.

Both can say there is not enough — *no hay bastante* is the everyday phrasing. A notice reaches for *no hay suficiente* because it names the requirement rather than the quantity, and because it is the formal choice.

The word, taken apart — and its English cousins

Latin **sufficere**: **sub-**, up from under, plus **facere**, to make or do — the *facere* that *la factura* called one of the hardest-working roots in the

language.
To *sufficere* was to put something **under** a thing: supply it from below, prop it, make it stand. Adequacy came out of that, which is why sufficiency is load-bearing rather than abundant — the amount that keeps the thing up.
Suficiente wears the **-ente** of *exigente*; *bastante* wears **-ante**. They are the same ending choosing its vowel by verb family — *-ar* verbs take *-ante*, *-er* and *-ir* verbs take *-ente*.
And the two words are one language at two speeds, the pattern you have from *rueda* against *rotativo*. *Suficiente* is a real Latin present participle, *sufficientem*, lifted off the page. *Bastante* was built inside Spanish on the inherited verb *bastar* — there was never a Latin *bastans*.

Your turn

Say these aloud:

- we do not produce enough food for everybody
- which of the two can also mean "fairly"
- what sub- plus facere does under a thing

Before you move on

Enough, on a notice? (**Suficiente**.) Which word also means *fairly*? (**Bastante**.) What does *sufficere* do? (**Props a thing from underneath** — adequacy is load-bearing.)

467.3 alimentar — to feed

Say **el medicamento** and **producir**. One lends its ending to this chapter's noun; the other is what has to happen before you can do the verb.

You'll want to know: alimentar

alimentar — to feed, to nourish.

Lo que producimos **alimenta** a unas cuarenta familias.

Alimentar a un niño — to feed a child; the **a** is there because the thing being fed is a person. **El alimento** is the food itself, and **la alimentación** is the feeding, or a person's diet.

Alimentarse de algo is what an animal or a person lives on: *se alimentan de fruta.*

The word, taken apart — and its English cousins

Latin **alere** was wider than *to feed.* It meant to nourish, and by that to **rear** — to bring a thing on, to make it bigger. Feeding is the sense that stuck in Spanish; the others are worth having:

English	how the root shows
adult	somebody who has finished growing
alumnus	somebody being brought up

An **alumnus** is literally *one being nourished* — a foster-child, then a pupil, then a graduate. **Coalesce** is *co-* plus *alescere*, to grow together. So *alimentar* is not about hunger. It is about making something bigger, and food is the means.

Grammar Lens: -mento, and the noun it builds here

El medicamento gave you **-mento**, the formal twin of *-miento*, arriving by the other road. Latin *-mentum* often named the **means** of a thing, and both of these are that kind:

noun	the means of
el medica**mento**	healing
el ali**mento**	growing

Watch the cut: it is *ali-* plus *-mento*, exactly as *medica-* plus *-mento.* And the noun is older than the verb — **Latin** built *alimentum* off *alere* first, and *alimentare* came afterwards. Spanish inherited both, which is why the noun is *alimento* and not *alimentamento.*

Your turn

Say these aloud:

- what we produce feeds about forty families
- the food itself, then the diet

- what alere meant before it meant feeding

Before you move on

To feed? (**Alimentar**.) The food? (**El alimento**.) What did *alere* cover? (**Nourishing, and rearing** — making a thing bigger.)

467.4 el objetivo — the target

Say **el objeto** and **rotativo**. One is the word underneath the next; the other is its ending.

You'll want to know: el objetivo

el objetivo — the target, the aim, the objective.

Objetivo del mes: alimentar a cincuenta familias.

Cumplir el objetivo — to meet the target. *Nuestro objetivo es…* — our aim is… As an adjective it means **objective**: *un informe objetivo.*

The word, taken apart — and its English cousins

You have the whole of this already. *El objeto*, from Latin *obiectum*, was **ob-**, before or against, plus **iacere**, to throw — a thing *thrown before* you, put in your way. That lesson listed the family: *object*, *project*, *inject*, *eject*, *subject*, all of them throws.
Objetivo is that same thrown thing wearing **-ivo**: *to do with the thing placed in front.* The throw does not turn round — the grammatical object is already what an action is thrown at, as *el objeto*'s own chapter said. What narrowed is **why** the thing is there.

word	**the thing placed before you**
el objeto	whatever is there
el objetivo	the one put there to be reached

English kept both jobs on the same word: an *objective* is an aim, and an **objective lens** is the one that faces the object.

Grammar Lens: -ivo makes an adjective that can stand alone

Rotativo gave you **-ivo**: an ending that names a habit or a capacity — of the kind that does this.
What *objetivo* adds is that such an adjective can harden into a noun and keep both jobs:

use	example
adjective	*un informe objetivo*
noun	*el objetivo del mes*

Spanish does this often and English follows it here, which makes the pair easy to trust: *an objective report*, *the month's objective*.

Your turn

Say these aloud:

- this month's target: to feed fifty families
- an objective report
- the difference between an objeto and an objetivo

Before you move on

The target? (**El objetivo**.) What is inside it? (***Iacere***, to throw.) What does *-ivo* add? (**Not a new direction** — the sense of a thing placed there to be reached.)

467.5 (producir, suficiente, alimentar, el objetivo) — from cold

Four words, no prompts. What the garden does, whether it is enough, who it keeps going, and the number written at the top of the sheet.

You'll want to know: the four, cold

English	Spanish
to produce	**producir**
enough	**suficiente**
to feed	**alimentar**
the target	**el objetivo**

Grammar Lens: what this chapter actually cost you

Three of the four are assembled out of parts you already held.

word	where the parts came from
producir	*reducir*'s verb class, *ducere*'s prefix trick
objetivo	*el objeto*'s throw, *rotativo*'s *-ivo*

Neither needed a new rule — only a new arrangement of rules you had. *Alimentar* borrowed *-mento* from *el medicamento*. Only *suficiente* asked for something genuinely new, and even that was a distinction rather than a word: you already had *bastante*.

That is what the earlier chapters bought. New words stop being new machinery and start being new arrangements of it, and each one costs less than the last.

The word, taken apart — and its English cousins

Two of the four hide a physical action.

word	what is underneath
suficiente	*sub-* + *facere* — **putting enough underneath** to hold it up
alimentar	*alere* — **growing** a thing, with food as the means

Producir leads forward; *objetivo* is the thing placed in front to be reached. Four words off a garden shed, four Latin verbs of handling and growing underneath them — the pattern this book keeps finding.

Your turn

Say these aloud:

- we do not produce enough to feed everybody

- the month's target
- which of the four came with its irregular forms already learned

Before you move on

To produce? (**Producir**.) Enough? (**Suficiente**.) To feed? (**Alimentar**.) The target? (**El objetivo**.)

467.6 (el informe mensual del huerto) — read the figures, then judge them

Say **producir** and **el objetivo**. A sheet with both on it is asking one question: did the first reach the second?

Read this

HUERTO COMUNITARIO — MARZO

Objetivo del mes: **alimentar** a 50 familias.

Producido: 380 kg. Familias atendidas: 41.

No fue **suficiente**. En abril vamos a plantar más patata (papa), que **produce** más kilos por metro cuadrado.

Grammar Lens: the sheet answers its own question

Four numbers and one verdict, and the verdict is the word this chapter was for.

what the sheet gives	what it settles
50 against 41	the target was missed
no fue suficiente	and by how the garden judges it

It says *suficiente*, not *bastante*, and that is deliberate — though both would be understood. *No fue bastante* is what you would say out loud. *No fue suficiente* is what a sheet writes, because it names the requirement rather than the quantity, and the 380 kg is being measured against the 50 families.

Note **producido** too: the participle, used as a plain label for the amount. A sheet does not need a whole sentence to report a quantity.

Your turn

Say in one sentence what the target was and whether it was met.

Now say what April is meant to change, and why the potato is the chosen crop.

Before you move on

The month's target? (**Alimentar a 50 familias**.) Was it enough? (**No fue suficiente**.) Why that word on a sheet? (**Because it names the requirement**, where *bastante* names a quantity.)

Chapter 468

Dos grados

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can act on a cold-weather reading: take a temperature in degrees off a bus-stop screen, and choose between a jacket, a coat and a scarf on the strength of the number rather than a general impression.
>
> *Read a bus-stop screen and a message from home, then decide what to put on.*

468.1 la chaqueta — the jacket

> Say **el jersey** and **la piel**. Both lessons put the next word in front of you without stopping to teach it.

You'll want to know: la chaqueta

la chaqueta — the jacket.

> Hace frío. Llévate una **chaqueta**.

Una chaqueta de piel — a leather jacket, the phrase *la piel* already gave you. *La chaqueta del traje* — the suit jacket.

Among knitwear the line is clean: a *jersey* goes over your head, a *chaqueta de punto* opens down the front — which is what a cardigan is. Beyond knitwear a *chaqueta* is any short tailored jacket.

where	the everyday word
Spain	**la chaqueta**
much of Latin America	**el saco**, **la campera**, **la chamarra**

Take the regional split seriously here. In Mexico and much of Central America *chaqueta* carries a vulgar second sense, and the neutral word is *saco* or *chamarra*.

The word, taken apart — and its English cousins

You were shown this one in passing when you learned *el jersey*, in a table of garments named after somewhere. It sat there as the odd row, because it is not named after a place at all.

French **jaquette** is a small **jaque**, a short tunic — and that much is firm. Where *jaque* came from is not. One account takes it to **Jacques**, the stock name for a French peasant, the way English once said *Jack* for any ordinary man. Another takes it through Spanish *jaco* to an Arabic word for a mail jerkin. Both are live; neither is proved.

You already know Spanish will name a garment after its wearer — *los vaqueros* are the cowherd's trousers. If the Jacques account is right, *la chaqueta* is the same habit, which is why it sat as the odd one out in the *jersey* chapter's table:

garment	named after
el jersey	an island
la chaqueta	a man's name, probably

English took both ends of the pair: **jack**, a medieval padded tunic, straight from *jaque*; and **jacket**, from the little one, *jaquette*.

Your turn

Say these aloud:

- it's cold, take a jacket
- a leather jacket
- the word to use instead in Mexico

Before you move on

The jacket, in Spain? (**La chaqueta**.) And in Mexico? (**El saco** or **la chamarra**.) Who is it probably named after? (**Jacques** — a peasant's name, on the usual account.)

468.2 el grado — the degree

Say **la temperatura**, then the scale: *poco*, *bastante*, *muy*. The word coming next is what that scale is a scale of, and you have never been given it.

You'll want to know: el grado

el grado — the degree.

Estamos a tres **grados**.

Doce grados — twelve degrees. *Bajo cero* — below zero. The everyday frame with a number is **estar a**: *estamos a tres grados*, we are at three degrees. You will also hear *hace tres grados* and *hay tres grados*; *estar a* is the one to produce.

When you learned *la temperatura* you got the quantity without its unit. This is the unit.

Grammar Lens: the word you already had under another job

Poco, *bastante*, *muy* is a scale of **degree**, and *degree* is **grado**. The review that taught that scale carries this word in its own filename and never once put it in front of you. Here it is.

use	what it counts
tres grados	steps up a thermometer
the *poco / bastante / muy* scale	steps up a quality

Latin **gradus** is a **step** — the one you take walking. From there it went to any step in a series: a step on a staircase, a step of rank, a step of temperature. English keeps the walking sense in **gradual**, one step at a time, and in **grade**, **degree** and **graduate**, who has climbed the steps.

So a *grado* is not only a number. It is a position on a set of stairs, and a thermometer is a staircase somebody agreed the height of.

The word, taken apart — and its English cousins

Gradus also gives Spanish **el grado** for a university degree and for a school year, and **la graduación**, which is both the ceremony and the strength of an alcohol — another scale with steps on it.
De buen grado — willingly, gladly — is a different word, from *gratum*, pleasing. Two *grado*s, and only this one has stairs in it.

Your turn

Say these aloud:

- we're at three degrees
- twelve degrees, then below zero
- what gradus means

Before you move on

The degree? (**El grado**.) How do you say it is three degrees? (**Estamos a tres grados**.) What is a *gradus*? (**A step**.)

468.3 el abrigo — the coat

Say **el frío** and **la chaqueta**. One is the reason for the next word; the other is not warm enough for it.

You'll want to know: el abrigo

el abrigo — the coat, the overcoat.

A tres grados no salgas sin **abrigo**.

Abrigar is the verb: *abrígate*, wrap up warm. And *una manta que abriga mucho* is a blanket that keeps you very warm — the verb is about the warmth, not the wrapping.

A *chaqueta* is a jacket. An *abrigo* is the long one you put on over everything else when it is properly cold.

The word, taken apart — and its English cousins

This word is not named for its shape. It is named for what it does. Behind *abrigar* is Latin **apricari**, to **bask in the sun**. *Apricus* was the adjective: open to the sun, warm.

Then Spanish did something quietly odd with it. A word for a place the sun gets **into** became a word for a place the weather cannot, and the coat is named for the second one. *El abrigo* is not "a long coat", it is **a shelter** — *un abrigo rocoso* is a hollow in the rock face out of the weather, and *al abrigo de* is **in the shelter of**.

Spanish	**the shelter**
el abrigo	the one you wear
al abrigo de	the one you stand behind

Watch that second one: what follows *de* is what shelters you, not what you are hiding from.

One warning while *apricus* is in front of you: English **apricot** looks like a relative and is not one. That word came through Arabic and Portuguese from Latin *praecoquum*, the early-ripening fruit, and the resemblance to *apricus* is a coincidence people have been reading meaning into for centuries.

So the garment is named for the sunny corner it replaces.

Your turn

Say these aloud:

- at three degrees don't go out without a coat
- wrap up warm
- what apricari meant

Before you move on

The coat? (**El abrigo**.) The verb? (**Abrigar**.) What did *apricari* mean? (**To bask in the sun** — the coat is a shelter you wear.)

468.4 la bufanda — the scarf

Say **el abrigo** and **la chaqueta**. One more goes on top of either, and it is the last piece this chapter needs.

You'll want to know: la bufanda

la bufanda — the scarf, the winter one you wind round your neck.

> Ponte la **bufanda**, que estamos a dos grados.

That **que** is not the joining *que* you have. It is the spoken shorthand for *porque* — *put your scarf on, because it's two degrees* — and Spanish leans on it constantly for reasons.

A *bufanda* is the one you put on because it is cold. **Un fular** is the light draped one worn for how it looks; **un pañuelo** is usually a handkerchief and only sometimes a scarf. A *bufanda* can be silk, so the material is not the test — the reason is.

The word, taken apart — and its English cousins

Every other word in this chapter came with a story. This one comes with a shrug, and you have met that shrug before.

La bufanda has no settled origin. The usual suggestion is French **bouffante**, puffed out, on *bouffer*, to puff — which fits a scarf's bulk around the throat. Another line points at Italian *buffa*, a visor or a covering for the face. The dictionaries hedge, and so does this lesson.

El patio is where this book set the rule out: an origin left open is a claim, not an oversight, and saying so is more useful than picking the prettier story. *El andén*, *tirar* and *el gorro* carry the same mark, and *el gorro* is the nearest neighbour — winter headwear whose origin the Academy also marks uncertain.

La bufanda is the fifth. Read the prose rather than the front matter for this: plenty of lessons leave the root list empty and still tell you the whole story. What is unusual here is that there is no story to tell.

Your turn

Say these aloud:

- put your scarf on, because it's two degrees
- which scarf is for warmth and which is for looks
- where la bufanda comes from

Before you move on

The scarf? (**La bufanda**.) Where does it come from? (**Nobody has settled it** — French *bouffante* is the usual guess.) Which earlier word said the same? (***El patio***, or *el gorro*.)

468.5 (la chaqueta, el grado, el abrigo, la bufanda) — from cold

Four words, no prompts. What you put on, what you put on over it, what goes round your neck, and the number that decides.

You'll want to know: the four, cold

English	Spanish
the jacket	**la chaqueta**
the degree	**el grado**
the coat	**el abrigo**
the scarf	**la bufanda**

Grammar Lens: a list that was closed, reopened on purpose

The wardrobe chapter called its list covered end to end. It was — for what that exam asked. *Pantalón*, *falda*, *camisa*, *zapato*, *vaqueros*, *jersey*, *bolso*: enough to say what you are wearing.
What it could not do is answer a question about **weather**.

the old list	this chapter
what you are wearing	what the cold makes you wear

That is the difference between the two exams. The first asks you to describe; the second asks you to decide, and deciding needs a number. *Hace frío* was never going to be enough once somebody writes *estamos a dos grados* on a screen at a bus stop.

The word, taken apart — and its English cousins

Two of the four have a settled origin, a third has a guess, and the fourth refuses.

word	underneath
el grado	*gradus*, a **step** — a thermometer is a staircase
el abrigo	*apricari*, to **bask in the sun** — a shelter you wear
la chaqueta	*Jacques*, a peasant's name — probably

La bufanda has no agreed origin at all, and its lesson says so rather than covering over, the way *el patio* and *el gorro* did before it.

Your turn

Say these aloud:

- it's two degrees, put a coat and a scarf on
- which of the four has no known origin
- what a gradus is

Before you move on

The jacket? (**La chaqueta**.) The degree? (**El grado**.) The coat? (**El abrigo**.) The scarf? (**La bufanda**.)

468.6 (el aviso de la parada) — read it, then decide

Say **el grado** and **el abrigo**. The first decides the second, which is the whole task here.

Read this

On the screen at the bus stop:

07:40 — LÍNEA 12 — 6 min

Ahora: **2 grados**. Máxima hoy: 7 grados.

(La máxima is the day's high.)

And a message on your phone:

> Hace mucho frío. Ponte el **abrigo**, no la **chaqueta**. Y llévate la **bufanda**, que estuviste enfermo la semana pasada.

Grammar Lens: what the message is doing that the screen cannot

The screen gives a number. The message gives a decision, and the two are not the same kind of statement.

the screen	the message
2 grados	*ponte el abrigo, no la chaqueta*

Note **no la chaqueta**. With the chosen thing said first, Spanish needs only *no* and the thing ruled out. Turn it round and you are back in the shape *sino* gave you — *no la chaqueta, sino el abrigo.* Same correction, two orders.

And *que estuviste enfermo* gives the reason, with the spoken **que** that stands in for *porque*, which *la bufanda* introduced two lessons ago. A screen rarely explains itself; a person usually does.

Your turn

Say what the temperature is now and what it will reach.

Now answer the message: say what you are putting on and what you are leaving behind, using *no* the way the message does.

Before you move on

How cold is it? (**Estamos a dos grados**.) What goes on? (**El abrigo** and **la bufanda**.) What stays behind? (**La chaqueta**.)

Chapter 469

La impresora de la sala 2

Modes: **voice** (5) **eyes** (1) **Hands-free start:** the first 5 of 6 lessons.

> ***By the end of this chapter:*** I can deal with a workplace machine that is not working: read a notice saying a printer is out of service, say what I want to print and what I cannot connect, and offer to make or return a phone call.
>
> *Read a notice taped to a printer and a message from a colleague, then say what you will do.*

469.1 imprimir — to print

> Say **el impreso** and **la prisa**. The first is this verb's participle and the second is its distant cousin.

You'll want to know: imprimir

imprimir — to print.

> Voy a **imprimir** el documento.

Imprimir a doble cara — to print on both sides, where *cara* is the face of the sheet: the same word you learned for a face, lent to paper.

You already have the participle. When you learned **el impreso**, it was given to you as *the irregular past participle of imprimir* — so the verb has been named in this book once, without ever being yours to use. Now it is.

Grammar Lens: the participle you already hold

Most Spanish verbs build a participle by rule. This one does not, and you have had the exception longer than the verb.
The irregular participles gave you *hecho*, *dicho*, *visto* and *puesto*; *cubierto* and *roto* joined the list later. **Impreso** belongs on it too.

verb	**participle**
imprimir	**impreso**
escribir	escrito

He impreso el documento — I have printed the document. You will also meet *imprimido*, which the Academy allows, but *impreso* is what a notice prints and what a printer's menu says.
And *el impreso* as a **noun** — a form to fill in — is that same participle hardened, which is the move *el pedido* taught you.

The word, taken apart — and its English cousins

Latin **imprimere**: **in-**, into, plus **premere**, to **press**. To print is to **press something into** a surface, which is exactly what a press does and exactly what the word has always meant.
Premere is the root under *la prisa* — a hurry is a pressing. Follow it outward and English fills up: **press**, **pressure**, **print**, **imprint**, **express** (pressed out), **compress**, **impression** — a mark pressed in, whether into wax or into a person.
So a printer does not "produce" a page. Historically it **presses** one, and the word kept the machine in it long after the machine changed.

Your turn

Say these aloud:

- I am going to print the document
- I have printed the document
- what premere means

Before you move on

To print? (**Imprimir**.) Its participle? (**Impreso**.) What does *premere* mean? (**To press**.)

469.2 la impresora — the printer

Say **la lavadora** and **el impreso**. One lends the ending, the other lends the stem, and together they make the machine.

You'll want to know: la impresora

la impresora — the printer.

La **impresora** de la sala 2 está fuera de servicio.

Una impresora en color — a colour printer.

You could have reached this word before being told, which is what la lavadora promised: a machine is often its verb plus **-dora**.

Grammar Lens: the article says which one you mean

El contador settled one thing already: the ending does not decide the article, since *la lavadora* is feminine and *el contador* masculine off the same **-dor**. Treat that as known.

What this word adds is a case where the article is not merely a fact to memorise but is **carrying the meaning**. *Lavar* has no human washer in ordinary speech, so **-dora** was free to mean the machine and nothing else. *Imprimir* is not like that. Printing was a trade long before it was a box on a desk, and the stem kept both.

Spanish	what it is
el impresor	the person who prints
la impresora	the machine that prints

Say *el impresor* about the box and you have promoted it to a tradesman. With *contador* and *lavadora* the article was something to learn; here it is something to choose.

English will not help you: it calls both of them a **printer** and leaves the sentence to sort it out. Spanish has decided in advance, in one letter.

The word, taken apart — and its English cousins

Same Latin *imprimere* as the verb: *in-* plus *premere*, to press into.

Why feminine rather than masculine? *El contador* told you the ending does not decide; this is the mechanism underneath. *Impresora* started life as an adjective leaning on a noun — *la máquina impresora*, the

printing machine. The noun dropped away and left its gender behind. So the article you cannot predict from the ending was fixed by a word no longer said.

Your turn

Say these aloud:

- the printer in room 2 is out of service
- which one is the person and which is the machine
- the verb this machine was built from

Before you move on

The printer? (**La impresora**.) Why feminine? (**Because *la máquina* is** — the noun fell away and left its gender.) And the person? (**El impresor**.)

469.3 conectar — to connect

Say **el ordenador**, then **imprimir**. Nothing gets printed until one more verb has happened.

You'll want to know: conectar

conectar — to connect, to join one thing to another.

No puedo **conectar** la impresora al ordenador.

The noun is **la conexión**, and it is worth a second look: the verb has a **c**, the noun has an **x**. Say *co-ne-XIÓN*, weight on the last syllable.

Grammar Lens: conectar and conectarse

The same verb does two different jobs depending on whether the thing being joined is an object out in front of you or yourself.

what you mean	what you say
join a thing to something	**conectar** la impresora
get yourself online	**conectarse** a internet

So *no me puedo conectar* means *I can't get connected* — you, not the printer. The pronoun is doing the whole of that work, and dropping it turns the sentence into a report about some object you never named.

The word, taken apart — and its English cousins

The Academy's dictionary derives **conectar** from English **to connect** — and English had built that out of Latin **conectere**: **con-**, together, plus **nectere**, to **tie**.
So the Latin is real, and the route is not the one it looks like. The word did not sit in Spanish since Rome waiting for wires. It came in from English in the modern era, carrying Latin parts back to a Latin language.
You have now met that happening three ways in a row:

- **el ordenador** — an old Spanish word that borrowed a new *meaning* from French;
- **internet** — an English word borrowed whole, with only the beat changed;
- **conectar** — an English word borrowed as a shape, its pieces Latin all along.

Nectere is a knot-word. English keeps it in **nexus**, a tying-together, and in **annex**, tied on. A *nexus* is not a vague link — it is the place where the threads are actually knotted.

Your turn

Say these aloud:

- I can't connect the printer to the computer
- I can't get connected
- what nectere means

Before you move on

To connect? (**Conectar**.) The noun? (**La conexión** — with an x.) What does *nectere* mean? (**To tie**.)

469.4 la llamada — the call

Say **el pedido** and **conectar**. One is a thing made from a verb; the other is what you do before the thing will work.

What to know first

- el pedido — the lesson whose table already showed you today's word.
- perder — you will want its participle in a moment.

You'll want to know: la llamada

la llamada — the call.

You have seen this word once, in the middle of somebody else's lesson. *El pedido* listed it as an example of a participle hardened into a noun, and then moved on. Here it is as yours.

Voy a hacer una **llamada**.

Devolver la llamada — to return the call. *Una llamada perdida* — a missed call, the notice your phone leaves you.

Grammar Lens: the vowel is a rule, the gender is not

Which vowel the participle takes is decided for you, and the participle lesson gave you that rule.

the verb ends	the participle takes
-ar	-ado, -ada
-er, **-ir**	-ido, -ida

Llamar is an *-ar* verb, so *-ada*. *Pedir* is an *-ir* verb, so *-ido*. That much you can work out.

What you cannot work out is the **article**. *El pedido* is masculine. *La llamada* and *la entrada* are feminine. Nothing in *pedir*, *llamar* or *entrar* predicts which way each one went — the gender was settled by

whatever noun the participle used to lean on, and that noun is long gone.
So learn the article with the word, the way you learned *el impreso* and *la impresora*. Working out the ending is free; the gender is not.

The word, taken apart — and its English cousins

Llamada is *llamar* made into a thing, and *llamar* you have had since the very beginning — the lesson where you learned to say your name traced it to Latin **clamare**, to cry out, and showed you the *cl-* that became *ll-*.
What is worth adding is how literal the noun still is. A *llamada* is a **crying-out**, and Spanish has not forgotten it: *una llamada de atención* is a warning — a call for attention, not a phone call at all. The telephone borrowed a word that was already doing the job.

Your turn

Say these aloud:

- I am going to make a call
- I have to return the call
- a missed call

Before you move on

The call? (**La llamada**.) From which verb? (**Llamar**.) Why *-ada* and not *-ida*? (**Because *llamar* is an -ar verb**.)

469.5 (imprimir, la impresora, conectar, la llamada) — from cold

Four words, no prompts. What the machine does, what the machine is, what you do to the machine first, and what you make when it will not work.

You'll want to know: the four, cold

English	Spanish
to print	**imprimir**
the printer	**la impresora**
to connect	**conectar**
the call	**la llamada**

Grammar Lens: two of these you could have guessed

Two of the four were reachable before you were told, and for the same reason: you already held the verb and the ending.

built from	gives you
imprimir + **-dora**	la impresora
llamar + **-ada**	la llamada

La lavadora taught the first ending and *el pedido* the second, and *el contador* already warned you that the ending settles nothing about the article. What this chapter added is a case where the article is not only unpredictable but **meaningful**: *la impresora* is the machine, *el impresor* is the person, and the one letter is the whole difference.

The word, taken apart — and its English cousins

This chapter put three different routes side by side, and the words look alike on the page whichever route they took.

word	how it got here
imprimir	inherited — Latin *imprimere*, all the way down
conectar	borrowed from English, its parts Latin
la llamada	inherited — Latin *clamare*, through *llamar*

Conectar is the odd one. It is the only word here whose Latin arrived by way of English, which is why it looks as native as the other three and is not.

Your turn

Say these aloud:

- I can't connect the printer, I am going to make a call
- which of the four came in through English
- the machine and the person, in that order

Before you move on

To print? (**Imprimir**.) The printer? (**La impresora**.) To connect? (**Conectar**.) The call? (**La llamada**.)

469.6 (el aviso de la impresora) — read it, then say what you will do

Say **la impresora** and **imprimir**. The notice below is about the first and stops you doing the second.

Read this

Taped to the machine:

> **AVISO**
>
> La **impresora** de la sala 2 está **fuera de servicio**.
>
> La de la tercera planta **funciona**.

And a message from a colleague:

> No me puedo **conectar** a internet desde mi ordenador. ¿Puedes **imprimir** tú el documento? Si no, te **devuelvo** la **llamada** en diez minutos.

Grammar Lens: what each text asks of you

The notice reports a state. The message asks for something and offers a way out if the answer is no. They want different replies.

the notice	the message
está fuera de servicio	*¿puedes imprimir tú el documento?*

Two details in the message repay a second look.

La de la tercera planta. The notice drops *impresora* and leaves *la* standing for it. Spanish does this freely once the noun is on the table, and a notice will do it to save a line.
¿Puedes imprimir tú? The *tú* is not needed for the grammar — the verb already says who. It is there to point: *you*, rather than me, because I cannot. A pronoun that could be dropped and is not is doing work.

Your turn

Say which printer is broken and which one works, using *la* on its own for the second the way the notice does.

Now answer the message: say you will print the document, and say why your colleague could not — the connection, not the machine.

Before you move on

What is wrong with the machine? (**Está fuera de servicio**.) What is wrong for your colleague? (**No se puede conectar**.) What will you do? (**Imprimir el documento**.)

Chapter 470

Un paraguas azul

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can deal with something I have lost: read a message describing a mislaid object by colour and by the part you hold, say that I cannot find it anywhere, and ask to be told rather than ask anyone to go looking.
>
> *Read a message to the building group about a mislaid umbrella, then answer it both ways.*

470.1 el paraguas — the umbrella

> Say **la parada** and **el cumpleaños**. One lends this word its first half, the other lends it its shape.

You'll want to know: el paraguas

el paraguas — the umbrella.

> Me he dejado el **paraguas** en el ascensor.

Hear it before you are told anything: **para** plus **aguas**. A verb and a plural noun fused into one word, which is the move *el cumpleaños* taught you — *cumple* plus *años*, a sentence that hardened.

And like *cumpleaños*, it wears a plural **-s** and is singular: **el** paraguas, one umbrella.

Grammar Lens: the plural that does not move

So what is the plural? Nothing changes.

one	more than one
el paraguas	**los** paraguas

This is not a quirk of this word. El análisis gave you the rule: a word already ending in **s**, with its stress somewhere other than the last syllable, takes no plural ending. *El lunes / los lunes* works the same way.

The article is doing all the counting. Drop it and the sentence cannot tell you how many umbrellas there are.

The word, taken apart — and its English cousins

The **para-** is the one *la parada* already unpacked: Latin **parare**, to **make ready** — and *parada* reminded you it is not the Greek *para-* of *parallel*. A **parasol** is made ready against the sun, a **parachute** against a fall. A **paraguas** is made ready against the waters.

Which is worth a second look, because English named the same object from the opposite direction:

language	what the word notices
Spanish **paraguas**	the **water** it keeps off
English **umbrella**	the **shade** it makes

Umbrella is Latin *umbra*, a shadow, with a diminutive on it — a little shade, and English took it from Italian. So one language named the object for the shade it casts and the other for the water it turns away, and both are describing the same thing held over the same head.

Your turn

Say these aloud:

- I have left the umbrella in the lift
- the plural of *el paraguas*
- what *parare* means

Before you move on

The umbrella? (**El paraguas**.) And two of them? (**Los paraguas** — the word does not change.) What is it made ready against? (**The waters**.)

470.2 el mango — the handle

Say **la mano** and **el paraguas**. This word is a relative of the first and a part of the second.

You'll want to know: el mango

el mango — the handle.

Un paraguas azul, con el **mango** de madera.

The handle of a knife, a pan, a door, an umbrella: whatever part of a thing is built for the hand.

Which is what the word says. It is a cousin of **la mano**, and once you hear that, you will not need to store it separately.

Grammar Lens: two mangos, and only one of them grows

There is a second **mango** in Spanish, and it is a completely different word that happens to be spelled the same. This is the situation la cola prepared you for.

the word	where it comes from
el mango — handle	Latin *manus*, the hand
el mango — the fruit	Portuguese *manga*, from Malay

The Academy traces the fruit through Portuguese **manga** to Malay *mangga*; behind that stands a Dravidian word, Tamil *māṅkāy*. It travelled by ship and the handle did not. Nothing connects them but the spelling.

Context settles it every time, so this is not a hazard — it is a reminder that *same letters* and *same word* are different claims.

The word, taken apart — and its English cousins

Latin **manus**, the hand — the root la mano already gave you, along with *manual*, *manufacture* and *maintain*.
A **mango** is the hand-part. Spanish built it on a late Latin form of that root and let the meaning settle on the graspable end of a thing. English does not have this word, so it has nothing to lend you here. What it does have is *manual*, *manuscript*, *manacle* — all of them hands. Put *mango* beside them and it stops looking like a fruit.

Your turn

Say these aloud:

- a blue umbrella with a wooden handle
- the two mangos, and where each comes from
- which Latin word is behind the handle

Before you move on

The handle? (**El mango**.) Which body part is inside it? (**La mano** — Latin *manus*.) And the fruit? (**A different word entirely.**)

470.3 encontrar — to find

> Say **buscar**. You have had the looking for a long time. Say **el mango**. You still have no word for the moment the looking succeeds.

You'll want to know: encontrar

encontrar — to find.

> No lo **encuentro** por ninguna parte.

Buscar and *encontrar* are the two halves of one search, and Spanish keeps them strictly apart:

what you do	what happens
buscar — look for	the effort
encontrar — find	the result

Busco mi paraguas is work in progress. *He encontrado mi paraguas* is over. You can *buscar* all afternoon and never *encontrar*.

Grammar Lens: the o that breaks

You wrote *encuentro* above, not *encontro*. That is mostrar's rule arriving again, unchanged: push the stress back onto the stem and the **o** breaks into **ue**.

stress on the stem	**stress on the ending**
enc**ue**ntro, enc**ue**ntras	encontr**a**mos
enc**ue**ntra, enc**ue**ntran	encontr**á**is

The infinitive keeps its **o** because the stress is on the ending there — *encon-TRAR*. Nothing about the verb is irregular once you know where the weight falls.

The word, taken apart — and its English cousins

en- plus **contra**: to come up **against** something.
That is the whole picture, and it is more honest than the English word. *Find* says nothing about how. *Encontrar* says you went along and the thing was in your way.
English has the same word by a different road: **encounter**, borrowed from French, is *in* plus *contra* exactly. To encounter somebody is to come against them — which is why an encounter can be a meeting or a fight, and *un encuentro* in Spanish is both as well.
So *encontrarse con alguien* is to run into somebody. The *contra* has not gone anywhere.

Your turn

Say these aloud:

- I can't find it anywhere
- I am looking for it, and I have not found it
- what *contra* is doing inside the word

Before you move on

To find? (**Encontrar**.) I find? (**Encuentro** — the stress moved onto the stem.) What is *contra* doing there? (**The thing came up against you**.)

470.4 avisar — to let know

Say **el aviso**. Say **encontrar**. If somebody finds the thing, this is what you want them to do next.

You'll want to know: avisar

avisar — to let know, to notify.

Si lo habéis visto, **avisadme**, por favor.

You have met this verb once already without being given it. El aviso named it in passing — *"behind it is the verb avisar, to notify"* — and then went back to the noun. Here it is as yours.

Avísame — let me know. *Avisar a alguien* — to tell somebody. *Avisar de algo* — to give notice of something.

Grammar Lens: it shows, it does not order

El aviso made a point that the verb inherits whole: an *aviso* is not an instruction but a **making-visible**. Somebody puts a thing where you can see it, and what you do next is yours.
So *avisar* is the weakest of the telling verbs, and that is its use.

you want	you say
somebody to know, no more	**avisar**
somebody to do it	*decir* that they must

Avísame si lo encuentras asks for information and nothing else. It is what you say about a paraguas you left behind: you are not giving an order to a neighbour, you are asking to be shown something.

The word, taken apart — and its English cousins

El aviso already traced this: Latin **ad vīsum**, toward what has been seen, on **vidēre**, to see. There is nothing to add to the derivation, so

take instead the thing it predicts.
Every relative of *avisar* is about **seeing**, not speaking:

- English **advise** is the same formation — to put something in somebody's view;
- **advice** is what you were shown;
- **evident**, **vision**, **provide**, **survey** are all seeings.

A word for telling, built entirely out of sight. That is why *avisar* feels lighter than it looks: nobody in it is talking.

Your turn

Say these aloud:

- let me know if you find it
- I left it in the lift; tell me if you have seen it
- which Latin verb is underneath

Before you move on

To let know? (**Avisar**.) Let me know? (**Avísame**.) Is it an order? (**No — it makes something visible**.)

470.5 (el paraguas, el mango, encontrar, avisar) — from cold

Four words, no prompts. The thing you left behind, the part of it you would describe, what you cannot do, and what you want the finder to do.

You'll want to know: the four, cold

English	Spanish
the umbrella	**el paraguas**
the handle	**el mango**
to find	**encontrar**
to let know	**avisar**

Grammar Lens: one English verb, two Spanish ones

English says *look for it and tell me*. Spanish makes you choose twice, and the choices are not the ones you would guess.

the English	what Spanish splits it into
look / find	*buscar* is the effort, **encontrar** the result
tell	**avisar** shows; *decir* says

Avísame si lo encuentras holds both splits in five words: let me know — not order me, not explain to me — if the search actually lands. That sentence is the whole chapter, and you could not have built it a lesson ago.

The word, taken apart — and its English cousins

Three of the four are older than they look, and each keeps a picture inside.

word	the picture
el paraguas	made **ready** against the waters
el mango	the part built for the **hand**
encontrar	to come up **against** a thing

Avisar is the fourth, and its picture is **seeing** rather than telling — which is what made it the gentle verb in the lens above.

Your turn

Say these aloud:

- a blue umbrella with a wooden handle
- I can't find it anywhere, let me know if you see it

- which of the four is about seeing

Before you move on

The umbrella? (**El paraguas**.) The handle? (**El mango**.) To find? (**Encontrar**.) To let know? (**Avisar**.)

470.6 (el mensaje del vecino) — read it, then answer

Say **el paraguas** and **avisar**. One is lost and the other is what the message is asking for.

Read this

To the building group, this morning:

> Hola, ¿sois vosotros los del piso doce? Me he dejado un **paraguas** azul, con el **mango** de madera, en el ascensor esta mañana y ya no lo **encuentro** por ninguna parte. Si lo habéis visto, **avisadme**, por favor.

Two things to notice before you answer.
Azul, de madera. The colour is the umbrella's and the wood is the handle's. Spanish hangs each description on the noun it belongs to, and *de madera* is how you say what a thing is made of.
Por ninguna parte. The stacking is no … nada's rule, unchanged: *no* in front of the verb and the negative word after it, both required. What is new is only the phrase. *Ninguna parte* joins *nada*, *nadie* and *nunca* as a negative word, and it is two words rather than one.
The trap is the English. *No lo encuentro por ninguna parte* comes out as *I can't find it* ***anywhere***, which looks positive — so the pull is to reach for *en cualquier parte*. Spanish keeps the negative on both halves.

Grammar Lens: what the message is actually asking

Read it: the last sentence again
It does not ask anyone to look.

what it says	what it does not say
si lo habéis visto	*buscadlo*

The writer is asking to be told about something that may already have happened, not asking the building to start a search. That is *avisar* doing exactly the work it was built for, and it is the polite shape of this kind of message: you ask for information, not labour. Answer in the same register.

Your turn

Say what was lost, where, and what it looks like — colour and handle both.

Now answer the message twice. First: you have seen it, and you say where. Then: you have not, and you offer to let them know if it turns up.

Before you move on

What is lost? (**Un paraguas azul con el mango de madera**.) What can the writer not do? (**Encontrarlo**.) What are they asking for? (**Que les avisen** — to be told.)

Chapter 471

El curso de cocina

Modes: 🚗 **voice** (8) 🚗 **Hands-free start:** all 8 lessons.

> ***By the end of this chapter:*** I can follow somebody explaining that a class did not suit them: hear that the level was too high, that they kept losing the thread, and that they moved to a beginners' group, and say the same about something of my own without criticising anyone.
>
> *Follow two friends on a cooking class that was too advanced, then say the same about something of your own.*

471.1 demasiado — too much

> Say **bastante** and **poco**. You have a scale with a bottom and a middle. Today it gets its top.

You'll want to know: demasiado

demasiado — too much, too many, too.

> El curso era **demasiado** difícil para mí.

Before an adjective it does not change: *demasiado difícil*, *demasiado avanzada*. Before a noun it agrees like any adjective: *demasiada gente*, *demasiados libros*.

Grammar Lens: the word that says it went past the point

Bastante built you a scale of degree. This is the member above the top of it, and the step matters.

the word	**where on the scale**
poco	below what is wanted
bastante	enough — the point itself
demasiado	past the point

Muy difícil is a judgement about the thing. **Demasiado difícil** is a judgement about a **fit**: too hard *for something*, usually for you. That is why it so often arrives with *para* — *demasiado avanzado para mí*. English blurs this, because *too* and *very* sit close together in speech. Spanish does not: say *muy* when you mean intense, and *demasiado* when you mean it has gone past what works.

The word, taken apart — and its English cousins

Underneath is **de más** — *of more*, in excess — which became *demasía*, an excess, and then this adjective. The *más* in it is the *más* you already use, from Latin **magis**, more.
So the word is built out of an admission: there is **more** here than the situation has room for. Not more than exists, more than **fits**.
Keep that and the grammar follows. *Demasiado* always implies a measure it has overrun, even when nobody says what the measure was.

Your turn

Say these aloud:

- it was too difficult for me
- the difference between *muy difícil* and *demasiado difícil*
- too many books, with the agreement

Before you move on

Too much? (**Demasiado**.) Which taught word is inside it? (***Más***.) Does it mean *very*? (**No — past the point that fits**.)

471.2 el nivel — the level

Say **el curso** and **demasiado**. A class has one of these, and when it is wrong the second word is how you say so.

You'll want to know: el nivel

el nivel — the level.

El **nivel** era demasiado alto para ella.

Nivel is what a class, a language exam or a game has. *¿Qué nivel tienes?* is the ordinary way to ask how far along somebody is. Note the stress: *ni-VEL*, on the end, and the plural is **los niveles**.

It is also a level in the physical sense — a floor of a building, the surface of water, the tool a builder uses.

Grammar Lens: the phrase the question will use

Two ways of saying the same complaint, and you need to recognise both.

about the class	about its level
el curso era **demasiado avanzado**	el **nivel** era **demasiado alto**

A speaker will usually say the first. Somebody reporting it afterwards — a summary, a question, an exam option — will often reach for the second, because *nivel* lets you talk about the difficulty without naming the class again.

Alto and *bajo* are what *nivel* takes, not *grande* or *mucho*. A level is a **height**.

The word, taken apart — and its English cousins

El litro already told you about Latin **libra**, the balance — hiding in *lb*, in **Libra** the scales in the sky, in **deliberate** and **equilibrium**.

Nivel is the same word, made small. Latin **libella** is a *little libra*, a builder's level: a tiny balance that tells you when a surface is true. It reached Spanish through Catalan *nivell* or Occitan, and on the way the first **l** turned into an **n** — *livel* became *nivel* — because two *l* sounds so close together pull apart.

English took *libella* too, without that swap, and got **level**.

So *nivel* and *litro* are cousins, and a level is not a measure of height so much as an instrument for finding **balance**.

Your turn

Say these aloud:

- the level was too high for her
- ask somebody what level they have
- which taught word *nivel* is a cousin of

Before you move on

The level? (**El nivel**.) Plural? (**Los niveles**.) What Latin word is underneath? (***Libra***, the balance — *libella*, a little one.)

471.3 avanzado — advanced

Say **el curso** and **antes**. The second is hiding inside today's word, and you would not guess it from the outside.

You'll want to know: avanzado

avanzado — advanced.

El curso de los lunes era demasiado **avanzado** para mí.

Un nivel avanzado, *un grupo avanzado*: it describes the class, not the person. For the person you say *tiene un nivel avanzado*.

It agrees like any adjective — *avanzada*, *avanzados*, *avanzadas*.

Grammar Lens: a participle doing an adjective's work

Avanzado is the past participle of *avanzar*, to advance, standing in as an adjective. Spanish does this constantly, and you have seen it before:

the participle	what it describes
invitado	the one who was invited
avanzado	the one that has moved ahead

El invitado made the point first — Spanish names a person by what was done to them. Here the same move names a **course** by how far it has got.
So a *curso avanzado* is not a course that is difficult in itself. It is one that has already travelled, and expects you to have travelled with it. That distinction is the whole reason the woman in the recording changed groups.

The word, taken apart — and its English cousins

Avanzar is Latin **ab ante** — *from in front* — which became spoken Latin **abantiare* and then the Spanish verb. The *ante* in it is the same *ante* you already hold in **antes**.
To advance is to put yourself **in front**. Not faster; further along.
One thing worth knowing about the English. **Advance** has a **d** that does not belong to it: the word arrived as *avancer*, and English later added the *d* on the mistaken assumption that the *av-* was a worn-down Latin *ad-*. It was not. Spanish never made that mistake, which is why *avanzar* has no *d* and never did.

Your turn

Say these aloud:

- the Monday course was too advanced for me
- which taught word is hiding inside *avanzar*
- why English *advance* has a d and Spanish has none

Before you move on

Advanced? (**Avanzado**.) What is it the participle of? (**Avanzar**.) What two Latin words are inside it? (***Ab ante*** — from in front.)

471.4 el principiante — the beginner

Say **el principio**. Say **el estudiante**. One gives today's word its meaning and the other gives it its ending — try it before reading on.

You'll want to know: el principiante

el principiante — the beginner.

> Ahora voy con los **principiantes** y disfruto mucho más.

La principiante for a woman. It is the natural opposite of what you learned a moment ago:

the class	**the person in it**
un curso **avanzado**	un **principiante**

Grammar Lens: you could have built this one

El estudiante gave you the rule outright: **verb plus -ante names the person doing it.** *Estudiar*, cut the *-ar*, add *-ante*.
Here it is again, one step further back. From **el principio**, the beginning, Spanish makes the verb **principiar**, to begin. Take that, cut the *-ar*, add *-ante*:

> princip**iar** → princip**iante**

The one who is beginning. The ending has not changed its job since chapter nine; the only new thing is the verb it is sitting on.
English wore the same ending down to *-ant*, which is why *participant*, *assistant* and *inhabitant* all name the doer too.

The word, taken apart — and its English cousins

El principio already traced this for you: Latin **principium**, from **princeps**, the one who takes first place — the same first-taking inside English **prince**, **principal** and **principle**.
So a *principiante* is not somebody who is bad at the thing. The word says only that they are at the **start** of it. Spanish has kept that neutral, and so should you when you use it about yourself.

Your turn

Say these aloud:

- now I go with the beginners
- build the word from *principiar* out loud

- the opposite of *un curso avanzado*

Before you move on

The beginner? (**El principiante**.) What does *-ante* add? (**The one who does it**.) Does the word say they are bad at it? (**No — only that they are at the start**.)

471.5 sencillo — simple

Say **difícil**. Say **el principiante**. Today's word is what a beginner's class is full of, and it is not the opposite of the first one.

You'll want to know: sencillo

sencillo — simple, plain, straightforward.

Hacemos cosas **sencillas**, pero las hacemos bien.

Una comida sencilla — a plain meal. *Un billete sencillo* — a one-way ticket, where the word means *single* rather than *easy*.

Grammar Lens: sencillo is not fácil

English lets *simple* and *easy* stand in for each other. Spanish keeps them apart, and the line runs between **parts** and **effort**.

the word	what it measures
sencillo	how few parts it has
fácil	how little effort it costs

A dish with three ingredients is *sencillo*. A dish you can cook half asleep is *fácil*. They often overlap and they are not the same claim — climbing a staircase is *sencillo* and not remotely *fácil*.
So *hacemos cosas sencillas, pero las hacemos bien* is not modest about the effort. It says the things have few parts, and then insists the execution is good. Hear it as *easy* and you lose the point the speaker is making.

The word, taken apart — and its English cousins

Latin **singulus**, one at a time, single — through a spoken form **singellus*. English took the same root for **single**, **singular** and **singly**.
That is why *un billete sencillo* means a **single**: the word's oldest sense is *one*, not *easy*. Something *sencillo* is made of one thing, or nearly. The *-illo* on the end is not doing what it usually does. Elsewhere it makes things small — but here it was already fused into the Latin, and there is no word *senci* underneath for it to shrink.

Your turn

Say these aloud:

- we do simple things, but we do them well
- the difference between *sencillo* and *fácil*
- what *un billete sencillo* is

Before you move on

Simple? (**Sencillo**.) Does it mean easy? (**No — few parts, not little effort**.) What Latin word is underneath? (***Singulus*** — one at a time.)

471.6 perderse — to get lost

Say **perder**. Say **equivocarse**. You have had both, and the second one already told you what happens when you put *-se* on the first.

You'll want to know: perderse

perderse — to get lost.

Todos habían hecho cursos antes y yo **me perdía**.

Note what is lost there. Not the way — the **thread**. In a class, in a film, in a conversation, *me pierdo* is *I lose track*, and it is the most useful sense the verb has for you.

Me he perdido — I've got lost, or I've lost the thread. *No te pierdas* — don't get lost, and also don't miss it.

Grammar Lens: the family you were told to notice

Equivocarse named this verb explicitly, in a group worth recalling whole:

plain	**reflexive**
perder — to lose a thing	**perderse** — to get lost
olvidar — to forget a thing	olvidarse — it slips your mind

The reflexive marks something that **befalls you** rather than something you do to an object. *Perder el paraguas* is an act with a victim. *Perderse* has no object at all: the losing happens to you. That is why *me perdía* is not an admission of carelessness. It reports a state she was in, which is exactly why it is the honest thing to say about a class that had moved on without her.

The word, taken apart — and its English cousins

Latin **perdere**: **per-** plus **dare**, to give — to give **away** thoroughly, to hand something over for good.
That *per-* is the thorough one, the same intensifier inside **perfect** (thoroughly made) and **perturb**. So losing, in Latin, is a kind of extreme giving: the thing goes and does not come back.
English **perdition** is the same word, kept for the most complete loss there is.

Your turn

Say these aloud:

- everyone had done courses before and I kept losing the thread
- the difference between *perder* and *perderse*
- what *per-* adds to *dare*

Before you move on

To get lost? (**Perderse**.) In a class, what do you lose? (**The thread**.) Why the *-se*? (**It happens to you, not to an object**.)

471.7 (demasiado, el nivel, avanzado, el principiante, sencillo, perderse) — from cold

Six words, no prompts. How far past the point it was, what it was too high a one of, what the hard class was, who is in the other one, what they cook there, and what kept happening to you in the first.

You'll want to know: the six, cold

English	Spanish
too much	**demasiado**
the level	**el nivel**
advanced	**avanzado**
the beginner	**el principiante**
simple	**sencillo**
to get lost	**perderse**

Grammar Lens: three endings, all of them already yours

Not one ending in this chapter is new. Each was taught somewhere else and is here doing its ordinary job.

the ending	what it does
-ado	a participle used as an adjective
-ante	the one who does it
-se	it happens to you

El invitado gave the first, *el estudiante* the second, *equivocarse* the third. So three of these six words were readable before you were told, and the chapter's real work was elsewhere: knowing which **sense** each carries, and filling two holes the scale had left.

The word, taken apart — and its English cousins

Four of the six hide a word you already hold.

word	underneath
demasiado	*de más* — the **más** you know
avanzado	*ab ante* — the **antes** you know
principiante	*principium* — the **principio** you know

And **el nivel** is Latin *libella*, a little *libra* — so it is a cousin of **el litro**, which carried that balance for you already.
Sencillo is Latin *singulus*, one at a time — English **single**. And *perderse* is *per-* plus *dare*, to give away thoroughly, which English kept in **perdition**.

Your turn

Say these aloud:

- the Monday class was too advanced and I kept losing the thread
- now I go with the beginners and we do simple things
- which of the six means few parts rather than little effort

Before you move on

Too much? (**Demasiado**.) The level? (**El nivel**.) Advanced? (**Avanzado**.) The beginner? (**El principiante**.) Simple? (**Sencillo**.) To get lost? (**Perderse**.)

471.8 (el curso de cocina) — follow it, then say your own

Say **avanzado** and **perderse**. The first explains the second in everything below.

Read this

— ¿Qué tal el curso de cocina? ¿Sigues yendo? — Sí, pero he cambiado de grupo. El de los lunes era demasiado **avanzado** para mí; todos habían hecho cursos antes y yo me **perdía**. — ¿Y ahora? — Ahora voy los miércoles con

los **principiantes** y disfruto mucho más. Hacemos cosas **sencillas**, pero las hacemos bien.

El de los lunes. The noun *grupo* is dropped and *el* carries it — the same move the printer notice made with *la de la tercera planta*.

Grammar Lens: she never says the class was bad

Every word of the complaint is about **fit**, not quality.

what she says	what she does not say
demasiado avanzado para mí	that the class was bad
yo me perdía	that the teacher was bad

Para mí puts the mismatch between the class and her; *me perdía* reports a state rather than blaming anyone; and *sencillas, pero las hacemos bien* refuses the obvious conclusion.
Now here it is the way somebody else would report it:

El **nivel** era **demasiado alto** para ella.

Not a word of that is in what she said, and it is what she meant. She talks about the **class**; a summary talks about its **nivel**. Move between the two, because the person asking what happened will use the second. Spanish gives you a way to leave something that is not working without criticising it, and an exam will ask you to hear the difference between *it did not suit me* and *it was no good*.

Your turn

Say why she changed groups, using *para mí* the way she does.

Now say it about something of your own — a class, a book, a game. Name what was too advanced, say you lost the thread, and say what you do now instead. Keep the blame out of it.

Before you move on

Why did she change? (**Era demasiado avanzado para ella**.) What happened to her in class? (**Se perdía**.) Who is she with now? (**Los principiantes**.) Are the new dishes worse? (**No — sencillas, pero bien hechas**.)

Chapter 472

La biblioteca que presta cosas

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read a report about a service that changed: follow that the idea arose from a survey of its users, that the place is no longer only for reading, and that other places have copied it rather than the other way round.
>
> *Read a report about a library that lends objects, then say where the idea came from and who copied whom.*

472.1 el usuario — the user

> Say **usar** and **la biblioteca**. Today's word is what the second calls the people who do the first.

You'll want to know: el usuario

el usuario — the user.

> Preguntaron a los **usuarios** qué necesitaban.

La usuaria for a woman. This is the word a library, a transport system or a health service uses for the people it serves, and you will meet it on notices far more often than in speech.

Grammar Lens: the word a service reaches for

Spanish picks a different noun depending on what the relationship is, and the choice tells you what kind of place you are in.

the place	what it calls you
a shop	*el cliente* — you pay
a service	**el usuario** — you use

A *biblioteca* has *usuarios*, not *clientes*, because nothing is being sold. A *cliente* implies a transaction; a *usuario* implies **access**.
So when a notice addresses *los usuarios*, it is telling you something beyond the word: this is a thing you are entitled to use, and the notice expects you to behave accordingly.

The word, taken apart — and its English cousins

usar plus **-ario**, an ending that names the person connected with the thing. Latin **usus**, a use, from **uti**, to use.
The same *usus* is inside English **use**, **usual** — what is used — and **utensil**, a thing for using. And *-ario* is the ending in *el bibliotecario*, the librarian, and *el funcionario*, the official.
So *usuario* is transparent once you see it: **the one who uses**. You could have built it from *usar* the way you built *principiante* from *principio*.

Your turn

Say these aloud:

- they asked the users what they needed
- why a library has *usuarios* and a shop has *clientes*
- the verb this word was built from

Before you move on

The user? (**El usuario**.) Built from? (**Usar**.) Would a shop use it? (**No — a shop has clientes**.)

472.2 la encuesta — the survey

Say **preguntar** and **el usuario**. Do both at once, to a hundred people, and you have today's word.

You'll want to know: la encuesta

la encuesta — the survey, the poll.

> Hicieron una **encuesta** entre los usuarios.

Hacer una encuesta is the verb it goes with — you **make** a survey, not *do* one. *Según la encuesta* — according to the survey.

Grammar Lens: asking one person and asking a population

You already have *preguntar*. An *encuesta* is not more of it — it is a different act.

what you do	what you get
preguntar	an answer from somebody
una encuesta	a picture of what a group thinks

Preguntar wants one reply and stops. An *encuesta* is built to be counted, which is why Spanish treats it as a thing you **make** rather than something you say. That is also why a notice will report *lo que dice la encuesta* — the survey speaks, not the people in it.

The word, taken apart — and its English cousins

French **enquête**, an inquiry, from Latin **inquirere**: **in-** plus **quaerere**, to seek.
Now look at what you already hold. **Querer** is that same **quaerere**. The verb that means *to want* in Spanish meant *to seek* in Latin, and *encuesta* is its other child — so **wanting and asking are one word underneath**, which is truer of people than either word admits on its own.
English took the same root repeatedly: an **inquest**, an **inquiry**, a **question**, a **quest**, and **require** — all seekings.

Your turn

Say these aloud:

- they made a survey among the users
- which taught verb *encuesta* is a cousin of
- the difference between *preguntar* and *una encuesta*

Before you move on

The survey? (**La encuesta**.) Which verb goes with it? (**Hacer**.) Which everyday verb is its cousin? (**Querer** — both are *quaerere*, to seek.)

472.3 surgir — to arise

Say **la encuesta** and **la biblioteca**. An idea came out of the first and changed the second. Today's word is *came out of*.

You'll want to know: surgir

surgir — to arise, to come up, to emerge.

La idea **surgió** de una encuesta.

Ha surgido un problema — a problem has come up. *Surgir de* — to arise *from* something, which is the shape you will meet most.

The **g** is the throaty one before *i*: *sur-JIR*. Before *a* or *o* it is written **j** — *surjo*, I arise — so the sound stays put while the spelling moves.

Grammar Lens: the verb that reports an origin

Surgir says something appeared **without anyone deciding it would**. That is its whole job, and it is why a question about where an idea came from uses it.

what you say	what it implies
la idea **surgió de**	it emerged, nobody planned it
alguien tuvo la idea	a person had it

So *¿de dónde surgió la idea?* is not asking who is responsible. It is asking what the idea **came out of** — a conversation, a complaint, a survey.

Answer it with *de* and a source, the way the question is built.

The word, taken apart — and its English cousins

Latin **surgere**, to rise — itself **sub-** plus **regere**, to direct: to straighten oneself up from below.

The picture is physical and the word has kept it. English took the

same verb for a **surge**, a rising of water, and for **resurgent** and **insurgent**, things that rise again or rise against.
So *surgir* is not *appear*. It is **rise**, and what rises came from somewhere underneath — which is exactly why it wants *de*.

Your turn

Say these aloud:

- the idea arose from a survey
- a problem has come up
- why the word wants *de* after it

Before you move on

To arise? (**Surgir**.) The idea arose from a survey? (**La idea surgió de una encuesta**.) What does *surgere* literally mean? (**To rise**.)

472.4 la lectura — the reading

> Say **leer** and **la factura**. One is this word's verb; the other printed this word in a table and moved on.

You'll want to know: la lectura

la lectura — the reading.

> El servicio ya no es solo de **lectura**.

You have met this word once without being given it. La factura put it in its own table — *leer, to read* / *lectura, a reading* — as an example of the **-ura** ending, then went back to invoices. Here it is as yours.

Un club de lectura — a book club. *La lectura del contador* — the meter reading.

Grammar Lens: three things one word covers

English splits these with different words. Spanish keeps one.

what is meant	English reaches for
the activity	reading
the thing read	a text, a book
the interpretation	a reading of

All three are *la lectura*, and you have already used the third without noticing. When this book asked you for *the two readings of* **como**, it was asking for two **lecturas** — two ways the sentence can be taken. So the word is not only about books. Anything you can take a meaning from has a *lectura*, including a meter and an argument.

The word, taken apart — and its English cousins

Leer is Latin **legere**, and *-ura* is the ending *la factura* gave you: the thing an action produces. A *lectura* is what reading makes.
Legere first meant **to gather**, and the reading sense came later — you gather letters the way you gather grain. That gathering is still visible in English **collect**, **select** and **elect**, all of them picking things out, and in **legible**, able to be gathered, and **lecture**, a reading aloud.
So the ending was predictable and the root was already yours. The only new thing here is permission to use the word.

Your turn

Say these aloud:

- the service is no longer only for reading
- a book club, using today's word
- what *legere* first meant

Before you move on

The reading? (**La lectura**.) Which ending built it? (**-ura** — the thing an action produces.) What did *legere* first mean? (**To gather**.)

472.5 copiar — to copy

Say **la lectura** and **la biblioteca**. If one library's idea works, what do the others do?

You'll want to know: copiar

copiar — to copy.

Tres bibliotecas han **copiado** el sistema.

Copiar un documento, *copiar a alguien*. The noun is **la copia**, a copy — and note that it is feminine, where English has no gender to keep track of.

Copiar en un examen is to cheat, so the verb is not always neutral; context does the work.

Grammar Lens: copying a thing and copying a person

The preposition changes what you are claiming.

what you say	what it means
copiar **el sistema**	reproduce the thing
copiar **a** otra biblioteca	imitate the one who did it

Han copiado el sistema is a compliment about a method. *Han copiado a otra biblioteca* puts another institution in the sentence and can sound like a charge of unoriginality.

Three libraries copying a system is a success story. The same three copying *a* somebody is a different report altogether, and a reading question will sometimes turn on which one the text said.

The word, taken apart — and its English cousins

Latin **copia** — **abundance**, plenty. Not *a duplicate*: the word for plenty.

How plenty became a duplicate is not settled. The usual account runs through medieval Latin *copiare*, where *copia* also meant the means or leave to do something: leave to make a transcript became the transcript itself.

The old meaning is still in English **copious**, meaning plentiful, and in **cornucopia**, the horn of plenty. Set those beside *una copia* and the journey is visible: from having a lot, to having another one.

Your turn

Say these aloud:

- three libraries have copied the system
- the difference *a* makes after this verb
- what *copia* meant in Latin

Before you move on

To copy? (**Copiar**.) The noun? (**La copia** — feminine.) What did *copia* mean first? (**Abundance**.)

472.6 (el usuario, la encuesta, surgir, la lectura, copiar) — from cold

Five words, no prompts. Who the library serves, what it asked them, what came out of it, what the place used to be only for, and what the neighbours did next.

You'll want to know: the five, cold

English	Spanish
the user	**el usuario**
the survey	**la encuesta**
to arise	**surgir**
the reading	**la lectura**
to copy	**copiar**

Grammar Lens: three of the five were already inside words you hold

This chapter minted very little. Most of it was recombination.

word	what it is made of
usuario	**usar** plus *-ario*
lectura	**leer** plus *-ura*
encuesta	the same Latin verb as **querer**

La factura had even printed *lectura* in a table already, as its own example of the *-ura* ending, and moved on. So the work here was less learning words than being handed ones the book had been using in front of you.

The word, taken apart — and its English cousins

The two that were genuinely new both hide a picture.

word	underneath
surgir	*surgere*, to **rise** — so it wants *de*
copiar	*copia*, **abundance** — a copy made there be more

And the one worth keeping: **encuesta** is *inquirere*, **in-** plus *quaerere*, to seek — and *quaerere* is **querer**. Wanting and asking are the same Latin verb, which is a better joke than either language intended.

Your turn

Say these aloud:

- the idea arose from a survey among the users
- three libraries have copied the system
- which two of the five you could have built yourself

Before you move on

The user? (**El usuario**.) The survey? (**La encuesta**.) To arise? (**Surgir**.) The reading? (**La lectura**.) To copy? (**Copiar**.)

472.7 (la biblioteca que presta cosas) — read it, then answer

Say **la encuesta** and **surgir**. The question below joins those two words, and it is the only question in this chapter you have to answer.

Read this

La biblioteca ya no presta solo libros. Desde hace dos años presta también objetos: herramientas, maletas, máquinas de cocina.

La idea **surgió** de una **encuesta**: preguntaron a los **usuarios** qué necesitaban y qué no querían comprar. El servicio dejó de ser solo de **lectura** y tres bibliotecas de la provincia ya lo han **copiado**.

Grammar Lens: the question is about the source, not the author

An exam will ask **¿de dónde surgió la idea?** and offer three answers. Two of them will be plausible-sounding origins the text does not claim.

what the text says	**what it does not say**
surgió **de una encuesta**	that somebody proposed it
otras bibliotecas **lo han copiado**	that this one copied another

That second row is the trap worth naming. The text says other libraries copied **this** one. A distractor will offer the reverse — *de copiar otra biblioteca* — and it uses the chapter's own word to do it. *Surgir de* points **backwards** to a source. Read the direction as carefully as the words.

Your turn

Say where the idea came from, using *surgir de*.

Now say who copied whom, in that order, and then say it the wrong way round so you can hear the difference.

Before you move on

Where did the idea come from? (**De una encuesta**.) Who was asked? (**Los usuarios**.) Who copied whom? (**Otras bibliotecas copiaron a esta**.)

Chapter 473

El consejo a otras bibliotecas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow advice given to somebody else: hear what a person recommends doing, answer a question that asks the same thing with a different verb, and say that something has to be in good condition.
>
> *Read the librarian's advice to anyone copying the scheme, then answer a question that swaps the verb.*

473.1 aconsejar — to advise

> Say **el consejo** and **la biblioteca**. You have the noun. Today you get the verb that goes with it.

You'll want to know: aconsejar

aconsejar — to advise.

> ¿Qué **aconseja** a otras bibliotecas?

Aconsejar a alguien — to advise somebody. *Aconsejar hacer algo* — to advise doing something. *Te aconsejo esperar* — I advise you to wait.

Grammar Lens: the same machine, a different part fed into it

Acercarse gave you this pattern outright — **a-** plus a word plus **-ar**, *to make it that* — with *acercar* from *cerca*, *alejar* from *lejos*, *aclarar* from *claro*.

Look at what those three have in common. Every one is built on a **preposition or an adjective**. This word is not:

built on	**example**
an adjective or preposition	aclarar, acercar
a **noun**	**aconsejar**, acompañar

Same machine, different raw material. *Acercar* makes something near; *aconsejar* does not make anything *consejo* — it **gives** one. So with a noun the sense shifts from *make it that* to *supply that*, which is worth knowing before you try to build your own.
Note the person goes in with **a**: *aconsejar **a** otras bibliotecas.* The advice itself follows with no preposition at all.

The word, taken apart — and its English cousins

El consejo already traced it: Latin **consilium**, a deliberation, a considering together.
So advising is, underneath, **deliberating together**: the word does not mean telling somebody what to do. English keeps *consilium* in **counsel**; **council**, the body that meets, is a look-alike from a different Latin word, *concilium*, a calling-together.
Spanish does the advising with one noun and one verb: *el consejo* and *aconsejar*.

Your turn

Say these aloud:

- what does he advise other libraries
- I advise you to wait
- the noun this verb was built from

Before you move on

To advise? (**Aconsejar**.) Built from? (**El consejo**, with *a-* on the front.) What does *consilium* mean underneath? (**A considering together**.)

473.2 recomendar — to recommend

Say **aconsejar** and **pensar**. The first gives today's meaning, the second gives today's spelling problem.

You'll want to know: recomendar

recomendar — to recommend.

Les **recomienda** empezar con pocos objetos.

Te recomiendo este — I recommend this one. *¿Qué me recomienda?* — what do you recommend? That last one is what you say to a waiter, and it is the most useful sentence in the lesson.

Grammar Lens: the e that breaks, and the twin it works beside

You said *recomienda*, not *recomenda*. That is pensar's rule: under stress the **e** breaks open into **ie**.

stress on the stem	**stress on the ending**
recom**ie**ndo, recom**ie**ndas	recomend**a**mos
recom**ie**nda, recom**ie**ndan	recomend**á**is

Only the **second** e breaks — the one that carries the stress. The first stays put, which is why the infinitive keeps both.

And the twin. *Aconsejar* and *recomendar* overlap almost completely, with one lean:

verb	**what it leans toward**
aconsejar	what would be wise for you
recomendar	what is good, of its kind

You *recomiendas* a restaurant. You *aconsejas* somebody to rest. Either verb will be understood in either sentence, and a careful speaker picks.

The word, taken apart — and its English cousins

Latin **re-** plus **commendare** (EtymDB 2.1): **com-**, wholly, plus **mandare**, to **entrust** — to put a thing into somebody's hand.

So recommending is not praising. It is **handing over**: you put the thing in the other person's care and let them judge it.

That *mandare* is busy in English — **command**, **mandate**, **demand**, **commend** — and the hand inside it is *manus*, the same hand you met

in **el mango**.

Your turn

Say these aloud:

- what do you recommend?
- he recommends starting with few objects
- which of the two verbs you would use about a restaurant

Before you move on

To recommend? (**Recomendar**.) I recommend? (**Recomiendo** — the second e breaks.) What does *mandare* mean? (**To entrust** — to put in the hand.)

473.3 el estado — the condition

Say **estar** and **recomendar**. What somebody recommends often depends on the thing's condition — and the word for that is hiding inside *estar*.

You'll want to know: el estado

el estado — the state, the condition.

Aceptar solo lo que esté en buen **estado**.

En buen estado — in good condition. **En mal estado** — in bad condition, and of food it means gone off. These two phrases are the word's everyday work.

You have read one of them already, on a donation notice: *juguetes en buen estado*.

Grammar Lens: a participle hardened into a noun, again

Estado is also the past participle of *estar* — *he estado aquí* — and that is worth being exact about, because the two are not quite the same story.

word	where the noun came from
el pedido	the participle of *pedir*, hardened
el estado	Latin *status*, borrowed as a noun

El pedido really is its verb's participle put to work. *El estado* arrived as a noun already, from Latin, and only **looks** like the participle because both descend from the same verb. The shape coincides; the route does not.
File it with them anyway — the family is the easiest place to remember it — but do not tell yourself you derived it.
Which is why it is *estar* and never *ser* underneath. A condition is temporary by definition, and the word carries that in its bones.

The word, taken apart — and its English cousins

Latin **status**, from **stare**, to stand — the root *estar* itself came from. English took *status* whole, and took the rest of the family too: **statue**, something made to stand; **station**, a standing-place; **stable**, able to stand; **estate** and **state**, which is the same word arriving twice by different roads.
So *el estado* is a standing — and the political **State** is that word again, meaning the way a country stands. Spanish uses one noun for both, and a capital letter does the separating.

Your turn

Say these aloud:

- accept only what is in good condition
- this milk is off, using *estado*
- which verb *estado* is the participle of

Before you move on

The condition? (**El estado**.) In good condition? (**En buen estado**.) Which verb is it the participle of? (**Estar** — Latin *stare*, to stand.)

473.4 (aconsejar, recomendar, el estado) — from cold

Three words, no prompts. What somebody does when asked, what they do about a restaurant, and the thing an object has to be in before anyone will take it.

You'll want to know: the three, cold

English	Spanish
to advise	**aconsejar**
to recommend	**recomendar**
the condition	**el estado**

Grammar Lens: none of the three was really new

Each one is a word you held, put through a machine you had already been shown.

the word you had	what happened to it
el consejo	*a-* on the front, *-ar* on the end
estar	its Latin root borrowed back as a noun

Acercarse gave the first machine. *El estado* is the subtler case: it looks like *estar*'s participle and is not derived from it — both come down from Latin *stare*, and the noun was borrowed from *status* directly. *Recomendar* is the odd one out: its pieces are Latin rather than Spanish, and what you already held was the **rule for its stem** — *pensar*'s e breaking into ie.

So the chapter asked you to recognise three shapes rather than memorise three words.

The word, taken apart — and its English cousins

Two of the three carry a picture that is still readable.

word	underneath
recomendar	*mandare*, to **entrust** — to put in the hand
el estado	*stare*, to **stand** — how a thing is standing

And *aconsejar* is *consilium*, a **sitting together** — so none of the three is really about giving orders. Advice hands a thing over, or sits down beside you, and neither pushes.

Your turn

Say these aloud:

- what do you recommend?
- he advises accepting only what is in good condition
- which of the three is a participle turned into a noun

Before you move on

To advise? (**Aconsejar**.) To recommend? (**Recomendar**.) The condition? (**El estado**.)

473.5 (el consejo a otras bibliotecas) — read it, then answer

Say **aconsejar** and **en buen estado**. The question below uses the first and the answer uses the second.

Read this

The library that lends objects, asked what others should do:

> A quien pregunta, le **recomienda** empezar con pocos objetos, aceptar solo lo que esté en buen **estado** y explicar muy bien las normas desde el primer día.

Three pieces of advice, joined by commas and a final **y**. Spanish lists like this without repeating the verb, so *recomienda* governs all three

infinitives: *empezar*, *aceptar*, *explicar*.

Grammar Lens: the question will not use the paragraph's verb

This is the thing to carry away. The text says *recomienda*. The question says:

> ¿Qué **aconseja** a otras bibliotecas?

the text	**the question**
recomienda empezar	¿qué **aconseja**?

Nothing has changed except the verb, and an exam does this on purpose: it checks that you hold the **meaning** rather than the word. If you learned *recomendar* and not *aconsejar*, the question looks like it is about something else.
So treat the two as one idea with two surfaces, and read past the swap.

Your turn

Say all three pieces of advice, keeping one verb and three infinitives the way the text does.

Now answer the question as asked — starting *Les aconseja…* — and notice you are saying the same thing with the other verb.

Before you move on

What does the text's verb say? (**Recomienda**.) What does the question's verb say? (**Aconseja**.) What must the objects be? (**En buen estado**.)

Chapter 474

El curso que paga la empresa

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can follow a conversation about who pays for something: hear that an amount is deducted over months rather than taken all at once, and match that to a statement saying the opposite in different words.
>
> *Match a statement about paying the full amount at once against a speaker who says the opposite in different words.*

474.1 invitar — to invite

> Say **el invitado** and **pagar**. Today's verb made the first, and in one very common use it means the second.

You'll want to know: invitar

invitar — to invite.

> Nos **invitaron** a la fiesta.

You have met this verb once without being handed it. El invitado named it in passing — *"from **invitar**, Latin **invitare**, to invite; **invitado** is its participle"* — and then stayed with the guest. Here it is as yours.

Invitar a alguien a algo — the person with **a**, and the thing with **a** as well.

Grammar Lens: in Spanish, inviting can mean paying

This is the use you will meet first in real life, and English has no single word for it.

Spanish	what it means
te invito	**I'm paying**
invito yo	this one's on me

Somebody who says *te invito a un café* is not asking whether you are free. They are telling you they will pay for it. Answering *vale, ¿a qué hora?* when the coffee is in front of you will land oddly.
So *invitar* covers both the asking and the paying, and which one is meant is settled by whether a time is mentioned.

The word, taken apart — and its English cousins

Latin **invitare**, to invite — and the honest answer about what is inside it is that nobody is sure. The older guess tied it to a root about **willingness**, which would make an invitation an appeal to somebody's good will.
English took the whole word twice: **invite**, and the noun **invitation**. There is no native English word for this, which is a small clue that the custom travelled with the Latin.
What Spanish added is the paying. That is not in the Latin and not in the English — it is a courtesy that attached itself to the word here.

Your turn

Say these aloud:

- they invited us to the party
- this one's on me
- the noun this verb already gave you

Before you move on

To invite? (**Invitar**.) What does *te invito* usually mean? (**I'm paying**.) Which word did you have first? (**El invitado** — its participle.)

474.2 el importe — the amount

Say **importar** and **importante**. Today's noun is the third member of that family, and it is the one that appears on a bill.

You'll want to know: el importe

el importe — the amount, the sum.

Hay que pagar el **importe** completo.

El importe total — the total. *El importe del curso* — the fee for a class. This is a form-and-invoice word: in speech people say *cuánto es*, but anything printed says *importe*.

Grammar Lens: one verb, three jobs

Importar told you two of these. Here is the third, and seeing them together is what makes the word stick.

the sense	example
to matter	*no me importa*
to import goods	*importar café*
to amount to	**el importe**

The thread is Latin **in-** plus **portare**, to **carry in**. Goods carried in are imports. A thing that carries weight *matters*. And what a bill **carries in** for you to pay is its *importe*.
So the noun is not a fourth meaning bolted on. It is the same carrying, applied to money.

The word, taken apart — and its English cousins

Portare is the carrying verb, and once you have it a great many words open at once. Spanish has already given you two of its children without saying so:

- **el deporte** — *de-* plus *portare*, carrying yourself away from work;
- **el comportamiento** — carrying yourself **with**, which is behaviour.

English carries the same root in **port**, **portable**, **export**, **transport** and **report** — a thing carried back.

And *importante* is literally **carrying-in-ish**: something that brings weight with it.
El importe is the noun of *importar* in its third sense, "to amount to": the sum a bill comes to.

Your turn

Say these aloud:

- you have to pay the full amount
- the three jobs of *importar*
- what *portare* means

Before you move on

The amount? (**El importe**.) Which verb is it from? (**Importar** — *in* plus *portare*.) Would you say it out loud in a shop? (**Usually not — it is a printed word**.)

474.3 descontar — to deduct

Say **contar** and **el importe**. Put *des-* on the first and you have what happens to the second.

You'll want to know: descontar

descontar — to deduct, to take off.

Te lo **descuentan** en doce meses.

El descuento is the noun — a discount. *Con descuento* — at a reduced price.

Note the stem: *desc**ue**nto*, *desc**ue**ntan*. The **o** breaks into **ue** under stress, exactly as it does in *contar* itself — *cuento*, *cuentas*.

Grammar Lens: the des- that reverses, and the one that does not

Cubrir set this out plainly: *des-* sometimes undoes the verb and sometimes does nothing of the kind, and only the whole word tells you which.

word	what des- does
descubrir	takes the cover off — it reverses
disfrutar	nothing — the prefix does not reverse
descontar	**takes off the count — it reverses**

This one is in the first camp, and cleanly. *Contar* adds up; *descontar* takes away from the total. If you can count the thing, *des-* will subtract it.

Descansar is the same family — *des-* undoing *cansar*, to tire — and it is where you first met the prefix doing real work.

The word, taken apart — and its English cousins

Contar is Latin **computare**: **com-**, together, plus **putare**, to reckon. So counting is a **reckoning-together**, and *descontar* is a reckoning taken back out.

That *computare* is where English **compute** and **count** both come from — the second worn down through French — so *contar* and *count* are the same word wearing different amounts of Latin.

And *putare* first meant to **prune** a tree. Reckoning, in Latin, began as cutting away what does not belong, which makes *descontar* an oddly exact return to the root.

Your turn

Say these aloud:

- they deduct it from you over twelve months
- the noun, meaning a discount
- which camp this *des-* is in, and why

Before you move on

To deduct? (**Descontar**.) They deduct? (**Descuentan** — the o breaks.) Does this *des-* reverse? (**Yes — it takes off the count**.)

474.4 el golpe — the blow

Say **descontar** and **pagar**. If the money is not taken off in instalments, it comes in one of today's word.

You'll want to know: el golpe

el golpe — the blow, the knock.

No te lo cobran de **golpe**.

The literal sense is a hit: *un golpe en la puerta*, a knock at the door. But the phrase is what you need: **de golpe** — all at once, suddenly.

Grammar Lens: the phrase a payment plan is defined against

Spanish has two ways to say *all at once*, and a notice about money will use one to rule out the other.

phrase	what it pictures
de golpe	in one blow — suddenly, often unwelcome
de una vez	in a single go — neutral

De golpe carries the impact. *Se me olvidó de golpe* — it went out of my head all at once. *Subió de golpe* — it shot up.
So *no de golpe* about a fee is doing more than saying *in instalments*: it is saying you will not be hit with it. That is why the reassurance lands, and why a question about it may use the calmer *de una vez* instead.

The word, taken apart — and its English cousins

Latin **colaphus**, a blow with the fist, borrowed from Greek **kólaphos**, a box on the ear.
The road from *colaphus* to *golpe* is worth a look, because two things happened: the **c** softened to **g**, and the middle syllable fell out entirely — *co-la-phus* worn down to *gol-pe*. That is ordinary wear, and it left a

word that no longer looks Greek at all.
English has the same blow in **coup**, taken from French rather than Spanish and kept intact: a *coup* is one sharp strike, which is what a *golpe* is. Spanish says **golpe de estado** where English says *coup d'état* — the same two words, twice.
French went further and made a quantity out of it. **Beaucoup** is *beau* plus *coup*, a **beautiful blow**, and it means *a lot* — so the same punch that gives Spanish its *golpe* gives French its word for plenty.

Your turn

Say these aloud:

- they don't charge you for it all at once
- a knock at the door
- which English word is the same blow

Before you move on

The blow? (**El golpe**.) All at once? (**De golpe**.) Which English word is its twin? (**Coup** — both are *colaphus*.)

474.5 (invitar, el importe, descontar, el golpe) — from cold

Four words, no prompts. What somebody does when they are paying, what the bill says, what happens to it over twelve months, and what it would have been if it had all come at once.

You'll want to know: the four, cold

English	Spanish
to invite	**invitar**
the amount	**el importe**
to deduct	**descontar**
the blow	**el golpe**

Grammar Lens: three of the four were already in the room

Only one of these arrived from nowhere.

word	what it came out of
invitar	**el invitado**, its own participle
el importe	**importar**, its third sense
descontar	**contar**, with *des-* reversing

El golpe is the outsider, and even it has a relative you know in English. So the chapter was mostly a matter of being handed things the book had been holding: *invitar* had been named inside *el invitado*, and *importar* had told you two of its three jobs already.

The word, taken apart — and its English cousins

Two roots do most of the work here.

root	what it gave
portare, to carry	**importe**, deporte, comportamiento
computare, to reckon	**descontar**, contar, English *count*

And *golpe* is Latin **colaphus** from Greek **kólaphos**, a box on the ear — the same blow English keeps in **coup**, and the one French built *beaucoup* out of. *Golpe de estado* and *coup d'état* are the same two words said twice.

Your turn

Say these aloud:

- they deduct the amount over twelve months, not all at once
- this one's on me
- which of the four did not come from a word you had

Before you move on

To invite? (**Invitar**.) The amount? (**El importe**.) To deduct? (**Descontar**.) All at once? (**De golpe**.)

474.6 (el curso que paga la empresa) — match it

Say **el importe** and **de golpe**. The exchange below turns on whether the second applies to the first.

Read this

— El setenta por ciento. El resto lo pones tú, pero te lo **descuentan** en doce meses, no de **golpe**. — Ah, eso no lo sabía.

And the statement you have to match to it:

Pensaba que había que pagar el **importe** completo de una vez.

Grammar Lens: the match is between two phrases, not two words

This is a matching task, so nothing is quoted back at you. The speaker and the statement describe the same fact in different words, and you have to see it.

the speaker says	**the statement says**
no **de golpe**	**de una vez**
te lo descuentan en doce meses	el importe completo

Neither phrase appears in the other. *De golpe* and *de una vez* are the pair that carries the match, and if you only hold one of them the item is closed to you even though you understood every sentence. That is worth knowing in general: a matching task rewards **paraphrase**, so the words to learn are the ones that come in pairs.

Your turn

Say what the company pays and what happens to the rest, using *descontar*.

Now say the misunderstanding twice — once with *de golpe* and once with *de una vez* — and hear that they are the same claim.

Before you move on

What happens to the rest? (**Te lo descuentan en doce meses**.) Not how? (**De golpe**.) What did the listener think? (**Que había**

que pagar el importe completo de una vez.)

Chapter 475

En el trabajo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a job notice that asks for a professional with initiative and a qualification, and says who provides the materials.
>
> *Complete the last lesson of chapter 475: I can read a job notice that asks for a professional with initiative and a qualification, and says who provides the materials.*

475.1 profesional — professional

> Before the new one: say the Spanish for to deduct, then the Spanish for the blow.

You'll want to know: profesional

profesional — "professional".

> Buscamos un equipo profesional.
>
> *We are looking for a professional team.*

It is an adjective and a noun: *un profesional* is a professional, a person who does the job for a living.

The word, taken apart — and its English cousins

profesional is built from *profesión*, "a profession", with *-al*. *Profesión* is Latin *professio*, "a public declaration" (Lewis & Short), from *profiteri*, "to declare openly": a profession was the work you declared. *Profesión* is learned: speech would have turned its *-ssi-* into *j*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: profesional*
- *Say it: profesional*, once more
- *Say it:* a sentence of your own with *profesional*
- *Recall:* say the Spanish for to deduct, then the Spanish for the blow, then say *profesional* again

Before you move on

What does profesional mean? ("Professional".) Say it once more.

475.2 la iniciativa — initiative

Before the new one: say the Spanish for the blow, then the Spanish for professional.

You'll want to know: la iniciativa

la iniciativa — "initiative".

Valoramos la iniciativa.

We value initiative.

Por iniciativa propia — on your own initiative.

The word, taken apart — and its English cousins

iniciativa is built from *iniciar*, "to begin" — Latin *initiare* (EtymDB 2.1), from *initium*, "a beginning" — with the ending *-tiva*. English *initiative* is built the same way. *Iniciar* is learned: its *-ti-* became *-ci-*, not the *z* of words worn down in speech.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la iniciativa*
- *Say it: la iniciativa*, once more
- *Say it:* a sentence of your own with *la iniciativa*
- *Recall:* say the Spanish for the blow, then the Spanish for professional, then say *la iniciativa* again

Before you move on

What does la iniciativa mean? ("Initiative".) Say it once more.

475.3 el título — the qualification, the title

Before the new one: say the Spanish for professional, then the Spanish for initiative.

You'll want to know: el título

el título — "the qualification, the title".

Es necesario el título de bachillerato.

The secondary-school qualification is required.

On a job notice *el título* is a qualification; on a book it is the title.

The word, taken apart — and its English cousins

título ← Latin *titulus*, "an inscription, a label" (EtymDB 2.1) — a learned borrowing: the stress stays on the first syllable and the *-t-* between vowels is kept. Worn down through Catalan or Occitan, the same Latin word gave *tilde*, the name of the accent mark.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el título*
- *Say it: el título*, once more
- *Say it:* a sentence of your own with *el título*
- *Recall:* say the Spanish for professional, then the Spanish for initiative, then say *el título* again

Before you move on

What does el título mean? ("The qualification, the title".) Say it once more.

475.4 el material — the material, the equipment

Before the new one: say the Spanish for initiative, then the Spanish for the qualification.

You'll want to know: el material

el material — "the material, the equipment".

La empresa pone el material.

The company provides the equipment.

El material escolar — school supplies.

The word, taken apart — and its English cousins

material ← Late Latin *materialis*, "of matter" (Lewis & Short), from *materia*, "stuff, timber" — a learned word. *La madera*, "wood", is the same *materia* worn down in speech.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el material*
- *Say it: el material*, once more
- *Say it:* a sentence of your own with *el material*
- *Recall:* say the Spanish for initiative, then the Spanish for the qualification, then say *el material* again

Before you move on

What does el material mean? ("The material, the equipment".) Say it once more.

475.5 el jardinero — the gardener

Before the new one: say the Spanish for the qualification, then the Spanish for the material.

You'll want to know: el jardinero

el jardinero — "the gardener".

El jardinero viene los martes.

The gardener comes on Tuesdays.

A woman who does the job is *la jardinera*; *el jardín* is the garden.

The word, taken apart — and its English cousins

jardinero is *jardín*, "a garden", with *-ero*, the ending for a person who works with a thing. *Jardín* came from French *jardin*, a word of Germanic origin for an enclosed plot.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *el jardinero*
- *Say it:* *el jardinero*, once more
- *Say it:* a sentence of your own with *el jardinero*
- *Recall:* say the Spanish for the qualification, then the Spanish for the material, then say *el jardinero* again

Before you move on

What does el jardinero mean? ("The gardener".) Say it once more.

Chapter 476

En clase

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can understand a teacher's note about a pupil who practises, understands, makes mistakes or is bored.
>
> *Complete the last lesson of chapter 476: I can understand a teacher's note about a pupil who practises, understands, makes mistakes or is bored.*

476.1 el alumno — the pupil, the student

> Before the new one: say the Spanish for the material, then the Spanish for the gardener.

You'll want to know: el alumno

el alumno — "the pupil, the student".

> Cada alumno tiene un libro.
>
> *Each pupil has a book.*

A girl or woman is *la alumna*.

The word, taken apart — and its English cousins

alumno ← Latin *alumnus*, "a foster child, a pupil" (EtymDB 2.1), from *alere*, "to feed, to bring up" — a learned borrowing: worn down in speech, its *-mn-* would have changed, as *damnum* became *daño*,

"harm".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el alumno*
- *Say it: el alumno*, once more
- *Say it:* a sentence of your own with *el alumno*
- *Recall:* say the Spanish for the material, then the Spanish for the gardener, then say *el alumno* again

Before you move on

What does el alumno mean? ("The pupil, the student".) Say it once more.

476.2 practicar — to practise

Before the new one: say the Spanish for the gardener, then the Spanish for the pupil.

You'll want to know: practicar

practicar — "to practise".

Practico español todos los días.

I practise Spanish every day.

Practicar un deporte — to play a sport regularly.

The word, taken apart — and its English cousins

practicar is built from *práctica*, "practice", from Late Latin *practicus*, "active", taken from Greek *praktikos*, "fit for doing", built on *prassein*, "to do".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: practicar*
- *Say it: practicar*, once more
- *Say it:* a sentence of your own with *practicar*
- *Recall:* say the Spanish for the gardener, then the Spanish for the pupil, then say *practicar* again

Before you move on

What does practicar mean? ("To practise".) Say it once more.

476.3 comprender — to understand

Before the new one: say the Spanish for the pupil, then the Spanish for to practise.

You'll want to know: comprender

comprender — "to understand".

No comprendo la pregunta.

I do not understand the question.

A close twin of *entender*, slightly more formal.

The word, taken apart — and its English cousins

comprender ← Latin *comprehendere*, "to grasp, to seize" (Lewis & Short): *com-*, "together", and *prehendere*, "to take hold of". To understand is to get a grip on a thing.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *comprender*
- *Say it:* *comprender*, once more
- *Say it:* a sentence of your own with *comprender*
- *Recall:* say the Spanish for the pupil, then the Spanish for to practise, then say *comprender* again

Before you move on

What does comprender mean? ("To understand".) Say it once more.

476.4 el error — the mistake, the error

Before the new one: say the Spanish for to practise, then the Spanish for to understand.

You'll want to know: el error

el error — "the mistake, the error".

Hay un error en la factura.

There is a mistake on the bill.

Por error — by mistake.

The word, taken apart — and its English cousins

error ← Latin *error*, "a wandering, a going astray" (EtymDB 2.1), from *errare*, "to wander" — taken from Latin unchanged. A mistake is a step off the path.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el error*
- *Say it: el error*, once more
- *Say it:* a sentence of your own with *el error*
- *Recall:* say the Spanish for to practise, then the Spanish for to understand, then say *el error* again

Before you move on

What does el error mean? ("The mistake, the error".) Say it once more.

476.5 aburrido — bored; boring

Before the new one: say the Spanish for to understand, then the Spanish for the mistake.

You'll want to know: aburrido

aburrido — "bored; boring".

La película es aburrida.

The film is boring.

With *estar* it means bored (*estoy aburrido*); with *ser* it means boring (*es aburrido*).

The word, taken apart — and its English cousins

aburrido is the participle of *aburrir*, "to bore", from Latin *abhorrere*, "to shrink back from, to shudder at" (Lewis & Short) — inherited. With the ending *-ecer*, the same Latin verb also gave *aborrecer*, "to loathe".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *aburrido*
- *Say it:* *aburrido*, once more
- *Say it:* a sentence of your own with *aburrido*
- *Recall:* say the Spanish for to understand, then the Spanish for the mistake, then say *aburrido* again

Before you move on

What does aburrido mean? (“Bored; boring”.) Say it once more.

Chapter 477

El dinero de cada mes

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a note about savings, rent, a fine and what someone earns.
>
> *Complete the last lesson of chapter 477: I can read a note about savings, rent, a fine and what someone earns.*

477.1 el ahorro — the saving; savings

> Before the new one: say the Spanish for the mistake, then the Spanish for bored.

You'll want to know: el ahorro

el ahorro — "the saving; savings".

> Tengo unos ahorros para el verano.
>
> *I have some savings for the summer.*

In the plural, *los ahorros* is the money you have put aside.

The word, taken apart — and its English cousins

ahorro is the noun of *ahorrar*, "to save". *Ahorrar* is built on *horro*, "freed", said of a slave set free, from Arabic *ḥurr*, "free" (EtymDB 2.1): to save was first to free, then to spare.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el ahorro*
- *Say it: el ahorro*, once more
- *Say it:* a sentence of your own with *el ahorro*
- *Recall:* say the Spanish for the mistake, then the Spanish for bored, then say *el ahorro* again

Before you move on

What does el ahorro mean? ("The saving; savings".) Say it once more.

477.2 el alquiler — the rent; renting

Before the new one: say the Spanish for bored, then the Spanish for the saving.

You'll want to know: el alquiler

el alquiler — "the rent; renting".

El alquiler sube en enero.

The rent goes up in January.

Se alquila on a sign means for rent.

The word, taken apart — and its English cousins

alquiler ← Hispanic Arabic *alkirí*, from Arabic *al-kirāʾ*, "the hire, the rent" — the Arabic article *al-* is still on the front.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el alquiler*
- *Say it: el alquiler*, once more
- *Say it:* a sentence of your own with *el alquiler*
- *Recall:* say the Spanish for bored, then the Spanish for the saving, then say *el alquiler* again

Before you move on

What does el alquiler mean? ("The rent; renting".) Say it once more.

477.3 la multa — the fine

Before the new one: say the Spanish for the saving, then the Spanish for the rent.

You'll want to know: la multa

la multa — "the fine".

Me pusieron una multa por aparcar mal.

They gave me a fine for parking badly.

Poner una multa — to give a fine. *Aparcar* is the word in Spain; in Latin America people say *estacionar*.

The word, taken apart — and its English cousins

multa ← Latin *multa*, "a fine, a penalty" — a word of Roman law, taken from Latin by scholars. The Romans themselves called it a Sabine or an Oscan word, from two of their Italian neighbours (Lewis & Short).

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la multa*
- *Say it: la multa*, once more
- *Say it:* a sentence of your own with *la multa*
- *Recall:* say the Spanish for the saving, then the Spanish for the rent, then say *la multa* again

Before you move on

What does la multa mean? ("The fine".) Say it once more.

477.4 ganar — to earn; to win

Before the new one: say the Spanish for the rent, then the Spanish for the fine.

You'll want to know: ganar

ganar — "to earn; to win".

Gana mil euros al mes.

She earns a thousand euros a month.

The same verb wins a game: *ganar un partido.*

The word, taken apart — and its English cousins

ganar is probably Germanic. The usual account traces it to Gothic **ganan*, "to covet" (EtymDB 2.1 records this line), perhaps crossed with the Germanic verb for grazing and hunting that is behind French *gagner*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: ganar*
- *Say it: ganar*, once more
- *Say it:* a sentence of your own with *ganar*
- *Recall:* say the Spanish for the rent, then the Spanish for the fine, then say *ganar* again

Before you move on

What does ganar mean? ("To earn; to win".) Say it once more.

477.5 trescientos — three hundred

Before the new one: say the Spanish for the fine, then the Spanish for to earn.

You'll want to know: trescientos

trescientos — "three hundred".

El billete cuesta trescientos euros.

The ticket costs three hundred euros.

It agrees with the noun: *trescientas personas.*

The word, taken apart — and its English cousins

trescientos ← Old Spanish *trezientos* (EtymDB 2.1), from Latin *trecenti*, "three hundred" — inherited: the stressed *e* opened into *ie*. The modern spelling remade the front to match *tres*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *trescientos*
- *Say it:* *trescientos*, once more
- *Say it:* a sentence of your own with *trescientos*
- *Recall:* say the Spanish for the fine, then the Spanish for to earn, then say *trescientos* again

Before you move on

What does trescientos mean? ("Three hundred".) Say it once more.

Chapter 478

Antes del viaje

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read travel information about luggage, footwear, the place and the space available.
>
> *Complete the last lesson of chapter 478: I can read travel information about luggage, footwear, the place and the space available.*

478.1 el equipaje — the luggage

> Before the new one: say the Spanish for to earn, then the Spanish for three hundred.

You'll want to know: el equipaje

el equipaje — "the luggage".

> El equipaje de mano no puede pesar más de diez kilos.
>
> *Hand luggage cannot weigh more than ten kilos.*

It is singular, like English luggage: *mi equipaje*.

The word, taken apart — and its English cousins

equipaje ← French *équipage*, "a ship's crew and gear" (EtymDB 2.1), from *équiper*, "to fit out a ship", a word of Germanic origin related to English *ship*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el equipaje*
- *Say it: el equipaje*, once more
- *Say it:* a sentence of your own with *el equipaje*
- *Recall:* say the Spanish for to earn, then the Spanish for three hundred, then say *el equipaje* again

Before you move on

What does el equipaje mean? ("The luggage".) Say it once more.

478.2 el calzado — the footwear

Before the new one: say the Spanish for three hundred, then the Spanish for the luggage.

You'll want to know: el calzado

el calzado — "the footwear".

Lleva calzado cómodo.

Wear comfortable footwear.

A notice word for shoes in general; one shoe is *un zapato*.

The word, taken apart — and its English cousins

calzado is the participle of *calzar*, "to put on shoes", from Latin *calceare* (EtymDB 2.1), built on *calceus*, "a shoe" — inherited: the Latin *-ce-* became *-z-*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el calzado*
- *Say it: el calzado*, once more
- *Say it:* a sentence of your own with *el calzado*
- *Recall:* say the Spanish for three hundred, then the Spanish for the luggage, then say *el calzado* again

Before you move on

What does el calzado mean? ("The footwear".) Say it once more.

478.3 el sitio — the place; the room, the space

Before the new one: say the Spanish for the luggage, then the Spanish for the footwear.

You'll want to know: el sitio

el sitio — "the place; the room, the space".

No hay sitio en el coche.

There is no room in the car.

Un sitio web is a website.

The word, taken apart — and its English cousins

sitio goes back to Latin *situs*, "a position, a site" (EtymDB 2.1); how it came by its ending *-io* is not settled. English *site* comes from the same Latin word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el sitio*
- *Say it: el sitio*, once more
- *Say it:* a sentence of your own with *el sitio*
- *Recall:* say the Spanish for the luggage, then the Spanish for the footwear, then say *el sitio* again

Before you move on

What does el sitio mean? ("The place; the room, the space".) Say it once more.

478.4 el espacio — the space

Before the new one: say the Spanish for the footwear, then the Spanish for the place.

You'll want to know: el espacio

el espacio — "the space".

El espacio es pequeño pero tiene luz.

The space is small but it has light.

More formal than *sitio*, and the word for outer space too.

The word, taken apart — and its English cousins

espacio ← Latin *spatium*, "room, extent" (EtymDB 2.1) — a learned borrowing, with the *e-* Spanish puts before *sp-*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el espacio*
- *Say it: el espacio*, once more
- *Say it:* a sentence of your own with *el espacio*
- *Recall:* say the Spanish for the footwear, then the Spanish for the place, then say *el espacio* again

Before you move on

What does el espacio mean? ("The space".) Say it once more.

478.5 disponible — available

Before the new one: say the Spanish for the place, then the Spanish for the space.

You'll want to know: disponible

disponible — "available".

La habitación está disponible desde el lunes.

The room is available from Monday.

Used with *estar*.

The word, taken apart — and its English cousins

disponible is built from *disponer*, "to arrange, to have at hand", with *-ible*, "able to be". *Disponer* is Latin *disponere*, "to set in order": *dis-*, "apart", and *ponere*, "to put".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *disponible*
- *Say it:* *disponible*, once more
- *Say it:* a sentence of your own with *disponible*
- *Recall:* say the Spanish for the place, then the Spanish for the space, then say *disponible* again

Before you move on

What does disponible mean? (“Available”.) Say it once more.

Chapter 479

Papeles y plazos

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a form that says what is compulsory, how to sign up or cancel, what to pay in advance and who stands in for whom.
>
> *Complete the last lesson of chapter 479: I can read a form that says what is compulsory, how to sign up or cancel, what to pay in advance and who stands in for whom.*

479.1 inscribirse — to sign up, to enrol

> Before the new one: say the Spanish for the space, then the Spanish for available.

You'll want to know: inscribirse

inscribirse — "to sign up, to enrol".

> Me inscribo en el curso de cocina.
>
> *I am signing up for the cooking class.*

La inscripción is the registration.

The word, taken apart — and its English cousins

inscribir ← Latin *inscribere*, "to write on" (EtymDB 2.1): *in-*, "on", and *scribere*, "to write" — a learned word beside the inherited *escribir*,

"to write". To sign up is to write your name in.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: inscribirse*
- *Say it: inscribirse*, once more
- *Say it:* a sentence of your own with *inscribirse*
- *Recall:* say the Spanish for the space, then the Spanish for available, then say *inscribirse* again

Before you move on

What does inscribirse mean? ("To sign up, to enrol".) Say it once more.

479.2 cancelar — to cancel

Before the new one: say the Spanish for available, then the Spanish for to sign up.

You'll want to know: cancelar

cancelar — "to cancel".

Cancelamos la reserva.

We are cancelling the booking.

Cancelado on a board means cancelled.

The word, taken apart — and its English cousins

cancelar ← Latin *cancellare*, "to make like a lattice" (Lewis & Short), from *cancelli*, "a lattice, railings" — a learned word: a cancelled document was struck through with crossed lines.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *cancelar*
- *Say it:* *cancelar*, once more
- *Say it:* a sentence of your own with *cancelar*
- *Recall:* say the Spanish for available, then the Spanish for to sign up, then say *cancelar* again

Before you move on

What does cancelar mean? ("To cancel".) Say it once more.

479.3 obligatorio — compulsory

Before the new one: say the Spanish for to sign up, then the Spanish for to cancel.

You'll want to know: obligatorio

obligatorio — "compulsory".

El uso de casco es obligatorio.

Wearing a helmet is compulsory.

The opposite on a notice is *opcional* or *voluntario*.

The word, taken apart — and its English cousins

obligatorio ← Late Latin *obligatorius*, "binding", from *obligare*, "to bind": *ob-* and *ligare*, "to tie" — a learned word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: obligatorio*
- *Say it: obligatorio*, once more
- *Say it:* a sentence of your own with *obligatorio*
- *Recall:* say the Spanish for to sign up, then the Spanish for to cancel, then say *obligatorio* again

Before you move on

What does obligatorio mean? ("Compulsory".) Say it once more.

479.4 adelantado — in advance; early, ahead

Before the new one: say the Spanish for to cancel, then the Spanish for compulsory.

You'll want to know: adelantado

adelantado — "in advance; early, ahead".

Hay que pagar por adelantado.

You have to pay in advance.

El reloj va adelantado — the clock is fast.

The word, taken apart — and its English cousins

adelantado is the participle of *adelantar*, "to move forward", built on *adelante*, "forward", and *delante*, "in front", from Old Spanish *denante* (EtymDB 2.1), Latin *de in ante*, "from in front".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: adelantado*
- *Say it: adelantado*, once more
- *Say it:* a sentence of your own with *adelantado*
- *Recall:* say the Spanish for to cancel, then the Spanish for compulsory, then say *adelantado* again

Before you move on

What does adelantado mean? ("In advance; early, ahead".) Say it once more.

479.5 sustituir — to replace, to stand in for

Before the new one: say the Spanish for compulsory, then the Spanish for in advance.

You'll want to know: sustituir

sustituir — "to replace, to stand in for".

Un compañero sustituye al profesor.

A colleague is standing in for the teacher.

It takes a *y* in some forms: *sustituyo*, *sustituye*.

The word, taken apart — and its English cousins

sustituir ← Latin *substituere*, "to put in place of" (Lewis & Short): *sub-*, "under", and *statuere*, "to set up" — a learned word, with the *b* dropped from the spelling.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: sustituir*
- *Say it: sustituir*, once more
- *Say it:* a sentence of your own with *sustituir*
- *Recall:* say the Spanish for compulsory, then the Spanish for in advance, then say *sustituir* again

Before you move on

What does sustituir mean? ("To replace, to stand in for".) Say it once more.

Chapter 480

Lo que dice la gente

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow what people state, communicate, interrupt, promise or complain about.
>
> *Complete the last lesson of chapter 480: I can follow what people state, communicate, interrupt, promise or complain about.*

480.1 afirmar — to state, to say that something is so

> Before the new one: say the Spanish for in advance, then the Spanish for to replace.

You'll want to know: afirmar

afirmar — "to state, to say that something is so".

> El director afirma que no hay problema.
>
> *The director states that there is no problem.*

More formal than *decir*; news reports use it a lot.

The word, taken apart — and its English cousins

afirmar ← Latin *affirmare*, "to make firm, to assert" (EtymDB 2.1), built on *firmus*, "firm" — the *firmus* inside *firmar*, "to sign".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: afirmar*
- *Say it: afirmar*, once more
- *Say it:* a sentence of your own with *afirmar*
- *Recall:* say the Spanish for in advance, then the Spanish for to replace, then say *afirmar* again

Before you move on

What does afirmar mean? ("To state, to say that something is so".) Say it once more.

480.2 comunicar — to communicate, to inform

Before the new one: say the Spanish for to replace, then the Spanish for to state.

You'll want to know: comunicar

comunicar — "to communicate, to inform".

Le comunicamos que su pedido ha llegado.

We inform you that your order has arrived.

In Spain, *está comunicando* on the phone means the line is busy; elsewhere people say *está ocupado*.

The word, taken apart — and its English cousins

comunicar ← Latin *communicare*, "to share, to make common" (EtymDB 2.1), from *communis*, "common" — a learned borrowing: the *-c-* between vowels did not become *-g-*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *comunicar*
- *Say it:* *comunicar*, once more
- *Say it:* a sentence of your own with *comunicar*
- *Recall:* say the Spanish for to replace, then the Spanish for to state, then say *comunicar* again

Before you move on

What does comunicar mean? ("To communicate, to inform".) Say it once more.

480.3 interrumpir — to interrupt

Before the new one: say the Spanish for to state, then the Spanish for to communicate.

You'll want to know: interrumpir

interrumpir — "to interrupt".

Perdona que te interrumpa.

Sorry to interrupt you.

Sin interrumpir — without interrupting.

The word, taken apart — and its English cousins

interrumpir ← Latin *interrumpere*, "to break off, to break apart" (EtymDB 2.1): *inter*, "between", and *rumpere*, "to break" — a learned word; *romper*, "to break", is the inherited one.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: interrumpir*
- *Say it: interrumpir*, once more
- *Say it:* a sentence of your own with *interrumpir*
- *Recall:* say the Spanish for to state, then the Spanish for to communicate, then say *interrumpir* again

Before you move on

What does interrumpir mean? ("To interrupt".) Say it once more.

480.4 prometer — to promise

Before the new one: say the Spanish for to communicate, then the Spanish for to interrupt.

You'll want to know: prometer

prometer — "to promise".

Te prometo que vuelvo pronto.

I promise you I will be back soon.

La promesa is the promise.

The word, taken apart — and its English cousins

prometer ← Latin *promittere*, "to send forward; to promise" (EtymDB 2.1) — inherited, through Old Spanish *prometer*: the short *i* became *e*, as in *meter*, "to put", from *mittere*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: prometer*
- *Say it: prometer*, once more
- *Say it:* a sentence of your own with *prometer*
- *Recall:* say the Spanish for to communicate, then the Spanish for to interrupt, then say *prometer* again

Before you move on

What does prometer mean? ("To promise".) Say it once more.

480.5 quejarse — to complain

Before the new one: say the Spanish for to interrupt, then the Spanish for to promise.

You'll want to know: quejarse

quejarse — "to complain".

Los vecinos se quejan del ruido.

The neighbours complain about the noise.

It goes with *de*: *quejarse de algo.*

The word, taken apart — and its English cousins

quejarse comes from spoken Latin **quassiare*, built on *quassare*, "to shake, to toss violently" (Lewis & Short) — inherited: the *-ssi-* became *j*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *quejarse*
- *Say it:* *quejarse*, once more
- *Say it:* a sentence of your own with *quejarse*
- *Recall:* say the Spanish for to interrupt, then the Spanish for to promise, then say *quejarse* again

Before you move on

What does quejarse mean? (“To complain”.) Say it once more.

Chapter 481

Problemas y soluciones

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can understand how a problem is solved: what is ruled out, foreseen, got back or watched.
>
> *Complete the last lesson of chapter 481: I can understand how a problem is solved: what is ruled out, foreseen, got back or watched.*

481.1 resolver — to solve, to sort out

> Before the new one: say the Spanish for to promise, then the Spanish for to complain.

You'll want to know: resolver

resolver — "to solve, to sort out".

> Vamos a resolver el problema hoy.
>
> *We are going to sort out the problem today.*

The o breaks into ue under stress: *resuelvo*, *resuelve*.

The word, taken apart — and its English cousins

resolver ← Latin *resolvere*, "to untie, to loosen" (EtymDB 2.1): *re-* and *solvere*, "to loosen". To solve a problem is to undo its knot. It bends like *volver*, "to return": *resuelvo*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: resolver*
- *Say it: resolver*, once more
- *Say it:* a sentence of your own with *resolver*
- *Recall:* say the Spanish for to promise, then the Spanish for to complain, then say *resolver* again

Before you move on

What does resolver mean? ("To solve, to sort out".) Say it once more.

481.2 recuperar — to get back, to recover

Before the new one: say the Spanish for to complain, then the Spanish for to solve.

You'll want to know: recuperar

recuperar — "to get back, to recover".

Quiero recuperar mi dinero.

I want to get my money back.

Recuperarse is to get better after an illness.

The word, taken apart — and its English cousins

recuperar ← Latin *recuperare*, "to get back" (EtymDB 2.1) — a learned borrowing. Worn down in speech, the same verb gave *recobrar*, "to recover", and its shortening *cobrar*, which you met as "to charge".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: recuperar*
- *Say it: recuperar*, once more
- *Say it:* a sentence of your own with *recuperar*
- *Recall:* say the Spanish for to complain, then the Spanish for to solve, then say *recuperar* again

Before you move on

What does recuperar mean? ("To get back, to recover".) Say it once more.

481.3 descartar — to rule out, to discard

Before the new one: say the Spanish for to solve, then the Spanish for to get back.

You'll want to know: descartar

descartar — "to rule out, to discard".

El médico descarta una infección.

The doctor rules out an infection.

The word, taken apart — and its English cousins

descartar is built from *des-* and *carta*, "a card": to throw a card out of your hand.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *descartar*
- *Say it:* *descartar*, once more
- *Say it:* a sentence of your own with *descartar*
- *Recall:* say the Spanish for to solve, then the Spanish for to get back, then say *descartar* again

Before you move on

What does descartar mean? ("To rule out, to discard".) Say it once more.

481.4 prever — to foresee, to expect

Before the new one: say the Spanish for to get back, then the Spanish for to rule out.

You'll want to know: prever

prever — "to foresee, to expect".

Se prevé lluvia para el fin de semana.

Rain is expected for the weekend.

Built on *ver*, and conjugated like it: *preveo*, *prevé*.

The word, taken apart — and its English cousins

prever is *pre-*, "before", and *ver*, "to see", matching Latin *praevidere*, "to foresee" (EtymDB 2.1); it bends like *ver*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: prever*
- *Say it: prever*, once more
- *Say it:* a sentence of your own with *prever*
- *Recall:* say the Spanish for to get back, then the Spanish for to rule out, then say *prever* again

Before you move on

What does prever mean? ("To foresee, to expect".) Say it once more.

481.5 vigilar — to watch, to keep an eye on

Before the new one: say the Spanish for to rule out, then the Spanish for to foresee.

You'll want to know: vigilar

vigilar — "to watch, to keep an eye on".

Vigila a los niños en la piscina.

Keep an eye on the children at the pool.

Zona vigilada on a sign means the area is watched.

The word, taken apart — and its English cousins

vigilar ← Latin *vigilare*, "to stay awake, to keep watch" (EtymDB 2.1) — a learned borrowing. Worn down in speech, the same verb became *velar*, "to stay up, to keep vigil".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: vigilar*
- *Say it: vigilar*, once more
- *Say it:* a sentence of your own with *vigilar*
- *Recall:* say the Spanish for to rule out, then the Spanish for to foresee, then say *vigilar* again

Before you move on

What does vigilar mean? ("To watch, to keep an eye on".) Say it once more.

Chapter 482

Cómo son las cosas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe things as specific, similar, fair, fast or varied.
>
> *Complete the last lesson of chapter 482: I can describe things as specific, similar, fair, fast or varied.*

482.1 concreto — specific, particular

Before the new one: say the Spanish for to foresee, then the Spanish for to watch.

You'll want to know: concreto

concreto — "specific, particular".

¿Buscas algo concreto?

Are you looking for something specific?

En concreto — specifically.

The word, taken apart — and its English cousins

concreto ← Latin *concretus*, "grown together, hardened" (EtymDB 2.1), the participle of *concrescere*: *con-* and *crescere*, "to grow" — a learned word. Something concrete has set solid.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *concreto*
- *Say it:* *concreto*, once more
- *Say it:* a sentence of your own with *concreto*
- *Recall:* say the Spanish for to foresee, then the Spanish for to watch, then say *concreto* again

Before you move on

What does concreto mean? ("Specific, particular".) Say it once more.

482.2 parecido — similar, alike

Before the new one: say the Spanish for to watch, then the Spanish for specific.

You'll want to know: parecido

parecido — "similar, alike".

Tu bolso es parecido al mío.

Your bag is similar to mine.

It goes with *a*: *parecido a*.

The word, taken apart — and its English cousins

parecido is the participle of *parecer*, "to seem, to look like", from spoken Latin **parescere*, built on *parere*, "to appear" (Lewis & Short). Things that are *parecidos* look like each other.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: parecido*
- *Say it: parecido*, once more
- *Say it:* a sentence of your own with *parecido*
- *Recall:* say the Spanish for to watch, then the Spanish for specific, then say *parecido* again

Before you move on

What does parecido mean? ("Similar, alike".) Say it once more.

482.3 justo — fair; exactly; tight

Before the new one: say the Spanish for specific, then the Spanish for similar.

You'll want to know: justo

justo — "fair; exactly; tight".

No es justo.

It is not fair.

Justo a tiempo — right on time; *me queda justo* — it is a tight fit.

The word, taken apart — and its English cousins

justo ← Latin *iustus*, "upright, righteous" (Lewis & Short), from *ius*, "right, law". "Exactly" and "tight" grew out of "fitting, right".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: justo*
- *Say it: justo*, once more
- *Say it:* a sentence of your own with *justo*
- *Recall:* say the Spanish for specific, then the Spanish for similar, then say *justo* again

Before you move on

What does justo mean? ("Fair; exactly; tight".) Say it once more.

482.4 rápido — fast, quick

Before the new one: say the Spanish for similar, then the Spanish for fair.

You'll want to know: rápido

rápido — "fast, quick".

El tren rápido llega antes.

The fast train gets there sooner.

As an adverb it also means quickly: *ven rápido.*

The word, taken apart — and its English cousins

rápido ← Latin *rapidus*, "snatching, swift" (EtymDB 2.1), from *rapere*, "to snatch" — a learned borrowing: the stress stays on the first syllable and the *-p-* is kept.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: rápido*
- *Say it: rápido*, once more
- *Say it:* a sentence of your own with *rápido*
- *Recall:* say the Spanish for similar, then the Spanish for fair, then say *rápido* again

Before you move on

What does rápido mean? ("Fast, quick".) Say it once more.

482.5 la variedad — the variety

Before the new one: say the Spanish for fair, then the Spanish for fast.

You'll want to know: la variedad

la variedad — "the variety".

Hay mucha variedad de fruta.

There is a wide variety of fruit.

The word, taken apart — and its English cousins

variedad ← Latin *varietas*, "difference, variety" (EtymDB 2.1), from *varius*, "different"; its ending is the *-dad* of *ciudad*, "city".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la variedad*
- *Say it: la variedad*, once more

- *Say it:* a sentence of your own with *la variedad*
- *Recall:* say the Spanish for fair, then the Spanish for fast, then say *la variedad* again

Before you move on

What does la variedad mean? (“The variety”.) Say it once more.

Chapter 483

Recuerdos y costumbres

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can talk about childhood, customs, the purpose of something and an improvement, and say where people go for help.
>
> *Complete the last lesson of chapter 483: I can talk about childhood, customs, the purpose of something and an improvement, and say where people go for help.*

483.1 la infancia — childhood

> Before the new one: say the Spanish for fast, then the Spanish for the variety.

You'll want to know: la infancia

la infancia — "childhood".

> Pasé la infancia en un pueblo.
>
> *I spent my childhood in a village.*

The word, taken apart — and its English cousins

infancia ← Latin *infantia*, "inability to speak; early childhood" (EtymDB 2.1), from *infans*, "not speaking": *in-*, "not", and *fari*, "to speak" — a learned word. The young child was named as the one who cannot talk yet.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la infancia*
- *Say it: la infancia*, once more
- *Say it:* a sentence of your own with *la infancia*
- *Recall:* say the Spanish for fast, then the Spanish for the variety, then say *la infancia* again

Before you move on

What does la infancia mean? ("Childhood".) Say it once more.

483.2 la costumbre — the custom, the habit

Before the new one: say the Spanish for the variety, then the Spanish for childhood.

You'll want to know: la costumbre

la costumbre — "the custom, the habit".

Es costumbre comer tarde.

It is the custom to eat late.

Tener la costumbre de — to be in the habit of.

The word, taken apart — and its English cousins

costumbre ← Old Spanish *costumne* (EtymDB 2.1), from Latin *consuetudo*, *consuetudinis*, "custom, habit" (Lewis & Short) — inherited and much worn: the shortened ending became *-mbre*, as *hominem*, "man", became *hombre*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la costumbre*
- *Say it: la costumbre*, once more
- *Say it:* a sentence of your own with *la costumbre*
- *Recall:* say the Spanish for the variety, then the Spanish for childhood, then say *la costumbre* again

Before you move on

What does la costumbre mean? ("The custom, the habit".) Say it once more.

483.3 la finalidad — the purpose, the aim

Before the new one: say the Spanish for childhood, then the Spanish for the custom.

You'll want to know: la finalidad

la finalidad — "the purpose, the aim".

La finalidad del curso es hablar más.

The aim of the class is to speak more.

A formal word, common on forms and notices.

The word, taken apart — and its English cousins

finalidad is built from *final*, "final", with *-idad*. *Final* is Latin *finalis*, from *finis*, "an end": a purpose is the end you aim at.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la finalidad*
- *Say it: la finalidad*, once more
- *Say it:* a sentence of your own with *la finalidad*
- *Recall:* say the Spanish for childhood, then the Spanish for the custom, then say *la finalidad* again

Before you move on

What does la finalidad mean? ("The purpose, the aim".) Say it once more.

483.4 la mejora — the improvement

Before the new one: say the Spanish for the custom, then the Spanish for the purpose.

You'll want to know: la mejora

la mejora — "the improvement".

Se nota la mejora en las notas.

You can see the improvement in the marks.

The noun of *mejorar*, to improve.

The word, taken apart — and its English cousins

mejora is the noun of *mejorar*, "to improve", built on *mejor*, "better", from Latin *melior* — inherited: the *-li-* became *j*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la mejora*
- *Say it: la mejora*, once more
- *Say it:* a sentence of your own with *la mejora*
- *Recall:* say the Spanish for the custom, then the Spanish for the purpose, then say *la mejora* again

Before you move on

What does la mejora mean? ("The improvement".) Say it once more.

483.5 acudir — to go, to come (to a place or to someone for help)

Before the new one: say the Spanish for the purpose, then the Spanish for the improvement.

You'll want to know: acudir

acudir — "to go, to come (to a place or to someone for help)".

Acuda a la oficina con su pasaporte.

Come to the office with your passport.

Notices use it where speech would use *ir* or *venir*.

The word, taken apart — and its English cousins

acudir is usually explained as Old Spanish *recudir*, "to come back, to turn to", with its prefix changed to *a-*; *recudir* is Latin *recutere*, "to strike back, to make rebound" (Lewis & Short).

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *acudir*
- *Say it:* *acudir*, once more
- *Say it:* a sentence of your own with *acudir*
- *Recall:* say the Spanish for the purpose, then the Spanish for the improvement, then say *acudir* again

Before you move on

What does acudir mean? ("To go, to come (to a place or to someone for help)".) Say it once more.

Chapter 484

Sacar partido

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say that someone uses, makes the most of, supports, thanks or saves.
>
> *Complete the last lesson of chapter 484: I can say that someone uses, makes the most of, supports, thanks or saves.*

484.1 utilizar — to use

Before the new one: say the Spanish for the improvement, then the Spanish for to go.

You'll want to know: utilizar

utilizar — "to use".

> Utilice la otra puerta.
>
> *Use the other door.*

A formal twin of *usar*.

The word, taken apart — and its English cousins

utilizar ← French *utiliser* (EtymDB 2.1), built on *utile*, "useful", Latin *utilis*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: utilizar*
- *Say it: utilizar*, once more
- *Say it:* a sentence of your own with *utilizar*
- *Recall:* say the Spanish for the improvement, then the Spanish for to go, then say *utilizar* again

Before you move on

What does utilizar mean? ("To use".) Say it once more.

484.2 aprovechar — to make the most of, to take advantage of

Before the new one: say the Spanish for to go, then the Spanish for to use.

You'll want to know: aprovechar

aprovechar — "to make the most of, to take advantage of".

Aprovecha el buen tiempo.

Make the most of the good weather.

¡Que aproveche! — enjoy your meal.

The word, taken apart — and its English cousins

aprovechar is built on *provecho*, "benefit", from Latin *profectus*, "progress, profit" — inherited: the *-ct-* became *-ch-*, as *noctem* became *noche*. To make the most of something is to take its profit.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: aprovechar*
- *Say it: aprovechar*, once more
- *Say it:* a sentence of your own with *aprovechar*
- *Recall:* say the Spanish for to go, then the Spanish for to use, then say *aprovechar* again

Before you move on

What does aprovechar mean? ("To make the most of, to take advantage of".) Say it once more.

484.3 apoyar — to support; to lean

Before the new one: say the Spanish for to use, then the Spanish for to make the most of.

You'll want to know: apoyar

apoyar — "to support; to lean".

Mis padres me apoyan.

My parents support me.

Apoyar la bici en la pared — to lean the bike against the wall.

The word, taken apart — and its English cousins

apoyar ← Italian *appoggiare*, "to lean", from spoken Latin **appodiare*, built on *podium*, "a raised platform".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *apoyar*
- *Say it:* *apoyar*, once more
- *Say it:* a sentence of your own with *apoyar*
- *Recall:* say the Spanish for to use, then the Spanish for to make the most of, then say *apoyar* again

Before you move on

What does apoyar mean? ("To support; to lean".) Say it once more.

484.4 agradecer — to thank for, to be grateful for

Before the new one: say the Spanish for to make the most of, then the Spanish for to support.

You'll want to know: agradecer

agradecer — "to thank for, to be grateful for".

Le agradezco su ayuda.

I am grateful for your help.

It takes a *z* in the first person present: *agradezco*.

The word, taken apart — and its English cousins

agradecer is *a-* and the old verb *gradecer*, "to thank", built on *grado*, "goodwill", from Latin *gratum*, "pleasing" — the *grado* of *de buen grado*, "willingly".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: agradecer*
- *Say it: agradecer*, once more
- *Say it:* a sentence of your own with *agradecer*
- *Recall:* say the Spanish for to make the most of, then the Spanish for to support, then say *agradecer* again

Before you move on

What does agradecer mean? ("To thank for, to be grateful for".) Say it once more.

484.5 ahorrar — to save (money or time)

Before the new one: say the Spanish for to support, then the Spanish for to thank for.

You'll want to know: ahorrar

ahorrar — "to save (money or time)".

Ahorro un poco cada mes.

I save a little every month.

The verb behind *el ahorro*.

The word, taken apart — and its English cousins

ahorrar is built on *horro*, "freed", said of a slave set free, from Arabic *ḥurr*, "free" (EtymDB 2.1). To save was first to set free, then to spare.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: ahorrar*
- *Say it: ahorrar*, once more
- *Say it:* a sentence of your own with *ahorrar*
- *Recall:* say the Spanish for to support, then the Spanish for to thank for, then say *ahorrar* again

Before you move on

What does ahorrar mean? ("To save (money or time)".) Say it once more.

484.6 Palabras de los capítulos 475-479 — a first pass

Say the Spanish for to thank for and to save.

Your turn

Say these aloud:

- professional, initiative, the qualification, the material, the gardener
- the pupil, to practise, to understand, the mistake, bored
- the saving, the rent, the fine, to earn, three hundred
- the luggage, the footwear, the place, the space, available
- to sign up, to cancel, compulsory, in advance, to replace

Before you move on

Professional? (**profesional**.) Initiative? (**la iniciativa**.) The qualification? (**el título**.) The material? (**el material**.) The gardener? (**el jardinero**.) The pupil? (**el alumno**.) Chapter 485

Las tareas de casa

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a rota of housework: sweeping, washing up, cleaning, drying and taking out the rubbish.
>
> *Complete the last lesson of chapter 485: I can read a rota of housework: sweeping, washing up, cleaning, drying and taking out the rubbish.*

485.1 barrer — to sweep

Before the new one: say the Spanish for to thank for, then the Spanish for to save.

You'll want to know: barrer

barrer — "to sweep".

> Hoy me toca barrer la cocina.
>
> *Today it is my turn to sweep the kitchen.*

Me toca — it is my turn.

The word, taken apart — and its English cousins

barrer ← Latin *verrere*, "to sweep" (EtymDB 2.1) — inherited: the *v* became *b*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *barrer*
- *Say it:* *barrer*, once more
- *Say it:* a sentence of your own with *barrer*
- *Recall:* say the Spanish for to thank for, then the Spanish for to save, then say *barrer* again

Before you move on

What does barrer mean? ("To sweep".) Say it once more.

485.2 fregar — to wash up; to mop

Before the new one: say the Spanish for to save, then the Spanish for to sweep.

You'll want to know: fregar

fregar — "to wash up; to mop".

Yo friego los platos y tú los secas.

I wash the dishes and you dry them.

The e breaks into ie under stress: *friego*, *friegas*.

The word, taken apart — and its English cousins

fregar ← Latin *fricare*, "to rub" (EtymDB 2.1) — inherited: the *-c-* between vowels became *-g-* and the *i* became *e*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: fregar*
- *Say it: fregar*, once more
- *Say it:* a sentence of your own with *fregar*
- *Recall:* say the Spanish for to save, then the Spanish for to sweep, then say *fregar* again

Before you move on

What does fregar mean? ("To wash up; to mop".) Say it once more.

485.3 limpiar — to clean

Before the new one: say the Spanish for to sweep, then the Spanish for to wash up.

You'll want to know: limpiar

limpiar — "to clean".

Limpiamos la casa los sábados.

We clean the house on Saturdays.

The verb behind *limpio*, clean.

The word, taken apart — and its English cousins

limpiar is built on *limpio*, "clean", from Latin *limpidus*, "clear" (EtymDB 2.1) — a clear stream is a clean one. *Limpio* is inherited: the *-d-* of *limpidus* wore away.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: limpiar*
- *Say it: limpiar*, once more
- *Say it:* a sentence of your own with *limpiar*
- *Recall:* say the Spanish for to sweep, then the Spanish for to wash up, then say *limpiar* again

Before you move on

What does limpiar mean? ("To clean".) Say it once more.

485.4 secar — to dry

Before the new one: say the Spanish for to wash up, then the Spanish for to clean.

You'll want to know: secar

secar — "to dry".

Seca la ropa al sol.

Dry the clothes in the sun.

Seco is dry.

The word, taken apart — and its English cousins

secar ← Latin *siccare*, "to dry" (EtymDB 2.1), from *siccus*, "dry" — inherited: the *i* became *e*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: secar*
- *Say it: secar*, once more
- *Say it:* a sentence of your own with *secar*
- *Recall:* say the Spanish for to wash up, then the Spanish for to clean, then say *secar* again

Before you move on

What does secar mean? ("To dry".) Say it once more.

485.5 la basura — the rubbish, the trash

Before the new one: say the Spanish for to clean, then the Spanish for to dry.

You'll want to know: la basura

la basura — "the rubbish, the trash".

¿Quién saca la basura?

Who takes out the rubbish?

Sacar la basura — to take out the rubbish.

The word, taken apart — and its English cousins

basura comes from spoken Latin **versura*, "a sweeping" (EtymDB 2.1), built on *verrere*, "to sweep" — the verb that gave *barrer*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la basura*
- *Say it: la basura*, once more
- *Say it:* a sentence of your own with *la basura*
- *Recall:* say the Spanish for to clean, then the Spanish for to dry, then say *la basura* again

Before you move on

What does la basura mean? (“The rubbish, the trash”.) Say it once more.

Chapter 486

En la consulta

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow a doctor's advice about coughing, breathing, an aspirin and a vaccine, and read a note about shaving before an operation.
>
> *Complete the last lesson of chapter 486: I can follow a doctor's advice about coughing, breathing, an aspirin and a vaccine, and read a note about shaving before an operation.*

486.1 afeitarse — to shave

> Before the new one: say the Spanish for to dry, then the Spanish for the rubbish.

You'll want to know: afeitarse

afeitarse — "to shave".

> Mi padre se afeita cada mañana.
>
> *My father shaves every morning.*

Reflexive, because you shave yourself.

The word, taken apart — and its English cousins

afeitar ← Latin *affectare*, "to strive after" (Lewis & Short). In Spanish it first meant "to adorn, to make up", and only later "to shave".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: afeitarse*
- *Say it: afeitarse*, once more
- *Say it:* a sentence of your own with *afeitarse*
- *Recall:* say the Spanish for to dry, then the Spanish for the rubbish, then say *afeitarse* again

Before you move on

What does afeitarse mean? ("To shave".) Say it once more.

486.2 toser — to cough

Before the new one: say the Spanish for the rubbish, then the Spanish for to shave.

You'll want to know: toser

toser — "to cough".

El niño tose mucho por la noche.

The child coughs a lot at night.

La tos is the cough.

The word, taken apart — and its English cousins

toser ← Latin *tussire*, "to cough" (EtymDB 2.1) — inherited: the *u* became *o*. *La tos*, "the cough", is Latin *tussis*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: toser*
- *Say it: toser*, once more
- *Say it:* a sentence of your own with *toser*
- *Recall:* say the Spanish for the rubbish, then the Spanish for to shave, then say *toser* again

Before you move on

What does toser mean? ("To cough".) Say it once more.

486.3 respirar — to breathe

Before the new one: say the Spanish for to shave, then the Spanish for to cough.

You'll want to know: respirar

respirar — "to breathe".

Respire hondo, por favor.

Breathe deeply, please.

The word, taken apart — and its English cousins

respirar ← Latin *respirare*, "to breathe out, to breathe again" (EtymDB 2.1): *re-* and *spirare*, "to breathe".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: respirar*
- *Say it: respirar*, once more

- *Say it:* a sentence of your own with *respirar*
- *Recall:* say the Spanish for to shave, then the Spanish for to cough, then say *respirar* again

Before you move on

What does respirar mean? ("To breathe".) Say it once more.

486.4 la aspirina — the aspirin

Before the new one: say the Spanish for to cough, then the Spanish for to breathe.

You'll want to know: la aspirina

la aspirina — "the aspirin".

Tómate una aspirina con agua.

Take an aspirin with water.

The word, taken apart — and its English cousins

aspirina ← German *Aspirin*, a brand name coined by the Bayer company in 1899: *a-* for acetyl, *-spir-* for *Spiraea*, the meadowsweet plant, and the chemists' ending *-in*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la aspirina*
- *Say it: la aspirina*, once more
- *Say it:* a sentence of your own with *la aspirina*
- *Recall:* say the Spanish for to cough, then the Spanish for to breathe, then say *la aspirina* again

Before you move on

What does la aspirina mean? (“The aspirin”.) Say it once more.

486.5 la vacuna — the vaccine

Before the new one: say the Spanish for to breathe, then the Spanish for the aspirin.

You’ll want to know: la vacuna

la vacuna — “the vaccine”.

La vacuna es gratis para los mayores.

The vaccine is free for older people.

Vacunarse — to get vaccinated.

The word, taken apart — and its English cousins

vacuna is built on *vacuno*, “of cattle” (EtymDB 2.1), from Latin *vacca*, “cow”: the first vaccine, in 1796, was made from cowpox.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la vacuna*
- *Say it: la vacuna*, once more
- *Say it:* a sentence of your own with *la vacuna*
- *Recall:* say the Spanish for to breathe, then the Spanish for the aspirin, then say *la vacuna* again

Before you move on

What does la vacuna mean? (“The vaccine”.) Say it once more.

Chapter 487

Cómo nos sentimos

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone is glad, gets angry, worries, relaxes or has fun.
>
> *Complete the last lesson of chapter 487: I can say that someone is glad, gets angry, worries, relaxes or has fun.*

487.1 alegrarse — to be glad

Before the new one: say the Spanish for the aspirin, then the Spanish for the vaccine.

You'll want to know: alegrarse

alegrarse — "to be glad".

Me alegro de verte.

I am glad to see you.

It goes with *de*: *alegrarse de algo*.

The word, taken apart — and its English cousins

alegrarse is built on *alegre*, "cheerful", from Latin *alacer*, "lively, brisk" (Lewis & Short), through a spoken form **alecris* — inherited: the *-c-* became *-g-*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: alegrarse*
- *Say it: alegrarse*, once more
- *Say it:* a sentence of your own with *alegrarse*
- *Recall:* say the Spanish for the aspirin, then the Spanish for the vaccine, then say *alegrarse* again

Before you move on

What does alegrarse mean? ("To be glad".) Say it once more.

487.2 enfadarse — to get angry

Before the new one: say the Spanish for the vaccine, then the Spanish for to be glad.

You'll want to know: enfadarse

enfadarse — "to get angry".

Mi hermana se enfada si llego tarde.

My sister gets angry if I arrive late.

In much of Latin America people say *enojarse*.

The word, taken apart — and its English cousins

enfadarse probably comes from Galician-Portuguese *enfadar*, "to weary, to annoy", built on *fado*, "fate", Latin *fatum*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: enfadarse*
- *Say it: enfadarse*, once more
- *Say it:* a sentence of your own with *enfadarse*
- *Recall:* say the Spanish for the vaccine, then the Spanish for to be glad, then say *enfadarse* again

Before you move on

What does enfadarse mean? ("To get angry".) Say it once more.

487.3 preocuparse — to worry

Before the new one: say the Spanish for to be glad, then the Spanish for to get angry.

You'll want to know: preocuparse

preocuparse — "to worry".

No te preocupes, todo va bien.

Do not worry, everything is fine.

It goes with *por*: *preocuparse por alguien.*

The word, taken apart — and its English cousins

preocupar ← Latin *praeoccupare*, "to seize beforehand" (EtymDB 2.1): *prae-*, "before", and *occupare*, "to take hold of". A worry is a thought that has taken hold of you first. A learned word: the *-p-* between vowels was kept, where speech made *saber* from *sapere.*

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: preocuparse*
- *Say it: preocuparse*, once more
- *Say it:* a sentence of your own with *preocuparse*
- *Recall:* say the Spanish for to be glad, then the Spanish for to get angry, then say *preocuparse* again

Before you move on

What does preocuparse mean? ("To worry".) Say it once more.

487.4 relajarse — to relax

Before the new one: say the Spanish for to get angry, then the Spanish for to worry.

You'll want to know: relajarse

relajarse — "to relax".

Los domingos me relajo en casa.

On Sundays I relax at home.

The word, taken apart — and its English cousins

relajar ← Latin *relaxare*, "to loosen" (EtymDB 2.1): *re-* and *laxare*, "to slacken" — inherited: the Latin *x* became *j*, as *axis* became *eje*, "axle".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: relajarse*
- *Say it: relajarse*, once more

- *Say it:* a sentence of your own with *relajarse*
- *Recall:* say the Spanish for to get angry, then the Spanish for to worry, then say *relajarse* again

Before you move on

What does relajarse mean? ("To relax".) Say it once more.

487.5 divertirse — to have fun, to enjoy yourself

Before the new one: say the Spanish for to worry, then the Spanish for to relax.

You'll want to know: divertirse

divertirse — "to have fun, to enjoy yourself".

Nos divertimos mucho en la fiesta.

We had a lot of fun at the party.

The e breaks into ie under stress: *me divierto.*

The word, taken apart — and its English cousins

divertir ← Latin *divertere*, "to turn aside" (EtymDB 2.1): *di-*, "apart", and *vertere*, "to turn". Fun is a turning aside from cares.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: divertirse*
- *Say it: divertirse*, once more
- *Say it:* a sentence of your own with *divertirse*
- *Recall:* say the Spanish for to worry, then the Spanish for to relax, then say *divertirse* again

Before you move on

What does divertirse mean? ("To have fun, to enjoy yourself".) Say it once more.

Chapter 488

Encuentros y despedidas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read news of people who marry, divorce or fall in love, and say hello or goodbye politely.
>
> *Complete the last lesson of chapter 488: I can read news of people who marry, divorce or fall in love, and say hello or goodbye politely.*

488.1 casarse — to get married

Before the new one: say the Spanish for to relax, then the Spanish for to have fun.

You'll want to know: casarse

casarse — "to get married".

Se casan en junio.

They are getting married in June.

It goes with *con*: *casarse con alguien*.

The word, taken apart — and its English cousins

casarse is the reflexive of *casar*, "to marry" (EtymDB 2.1), built on *casa*, "house": to marry was to set up house. *Casa* is Latin *casa*, "a hut, a cottage".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: casarse*
- *Say it: casarse*, once more
- *Say it:* a sentence of your own with *casarse*
- *Recall:* say the Spanish for to relax, then the Spanish for to have fun, then say *casarse* again

Before you move on

What does casarse mean? ("To get married".) Say it once more.

488.2 divorciarse — to get divorced

Before the new one: say the Spanish for to have fun, then the Spanish for to get married.

You'll want to know: divorciarse

divorciarse — "to get divorced".

Mis tíos se divorciaron hace años.

My aunt and uncle got divorced years ago.

The word, taken apart — and its English cousins

divorciarse is built on *divorcio*, "divorce", Latin *divortium*, "a separation" (Lewis & Short), from *divertere*, "to turn different ways" — the verb behind *divertirse*, "to have fun". *Divorcio* is learned: its *-ti-* became *-ci-*, not the *z* of speech.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: divorciarse*
- *Say it: divorciarse*, once more
- *Say it:* a sentence of your own with *divorciarse*
- *Recall:* say the Spanish for to have fun, then the Spanish for to get married, then say *divorciarse* again

Before you move on

What does divorciarse mean? ("To get divorced".) Say it once more.

488.3 enamorarse — to fall in love

Before the new one: say the Spanish for to get married, then the Spanish for to get divorced.

You'll want to know: enamorarse

enamorarse — "to fall in love".

Se enamoró de su vecino.

She fell in love with her neighbour.

It goes with *de*: *enamorarse de alguien.*

The word, taken apart — and its English cousins

enamorarse is *en-*, *amor*, "love", and *-ar*: to go into love. *Amor* is Latin *amor.*

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *enamorarse*
- *Say it:* *enamorarse*, once more
- *Say it:* a sentence of your own with *enamorarse*
- *Recall:* say the Spanish for to get married, then the Spanish for to get divorced, then say *enamorarse* again

Before you move on

What does enamorarse mean? ("To fall in love".) Say it once more.

488.4 despedirse — to say goodbye

Before the new one: say the Spanish for to get divorced, then the Spanish for to fall in love.

You'll want to know: despedirse

despedirse — "to say goodbye".

Me despido de todos antes de salir.

I say goodbye to everyone before leaving.

The e breaks into i: *me despido*.

The word, taken apart — and its English cousins

despedirse contains *pedir*, "to ask", from Latin *petere*; EtymDB 2.1 traces it to *de* and Latin *expetere*, "to ask for, to demand".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: despedirse*
- *Say it: despedirse*, once more
- *Say it:* a sentence of your own with *despedirse*
- *Recall:* say the Spanish for to get divorced, then the Spanish for to fall in love, then say *despedirse* again

Before you move on

What does despedirse mean? ("To say goodbye".) Say it once more.

488.5 saludar — to greet, to say hello

Before the new one: say the Spanish for to fall in love, then the Spanish for to say goodbye.

You'll want to know: saludar

saludar — "to greet, to say hello".

Saluda a tu madre de mi parte.

Say hello to your mother from me.

The verb behind *el saludo*, the greeting.

The word, taken apart — and its English cousins

saludar ← Latin *salutare*, "to greet, to wish good health" (EtymDB 2.1), from *salus*, *salutis*, "health" — inherited: the *-t-* became *-d-*. The *salud* you raise a glass to is the same word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *saludar*
- *Say it:* *saludar*, once more
- *Say it:* a sentence of your own with *saludar*
- *Recall:* say the Spanish for to fall in love, then the Spanish for to say goodbye, then say *saludar* again

Before you move on

What does saludar mean? (“To greet, to say hello”.) Say it once more.

Chapter 489

Por la ciudad

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a notice about parking, a traffic jam, petrol, the town hall and the postbox.
>
> *Complete the last lesson of chapter 489: I can read a notice about parking, a traffic jam, petrol, the town hall and the postbox.*

489.1 aparcar — to park

> Before the new one: say the Spanish for to say goodbye, then the Spanish for to greet.

You'll want to know: aparcar

aparcar — "to park".

> No se puede aparcar aquí.
>
> *You cannot park here.*

The verb behind *el aparcamiento*, the car park. In Latin America people say *estacionar*.

The word, taken apart — and its English cousins

aparcar is built on *parque*, "a park", in the sense of a place where vehicles are kept; *parque* came from French *parc*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *aparcar*
- *Say it:* *aparcar*, once more
- *Say it:* a sentence of your own with *aparcar*
- *Recall:* say the Spanish for to say goodbye, then the Spanish for to greet, then say *aparcar* again

Before you move on

What does aparcar mean? ("To park".) Say it once more.

489.2 el atasco — the traffic jam

Before the new one: say the Spanish for to greet, then the Spanish for to park.

You'll want to know: el atasco

el atasco — "the traffic jam".

Hay un atasco a la entrada de la ciudad.

There is a traffic jam at the entrance to the city.

In much of Latin America people say *el embotellamiento* or *el tráfico*.

The word, taken apart — and its English cousins

atasco is the noun of *atascar*, "to block, to clog", usually explained as *a-* and *tasco*, the coarse fibre left from beating flax or hemp, once used to plug gaps; where *tasco* comes from is uncertain.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el atasco*
- *Say it: el atasco*, once more
- *Say it:* a sentence of your own with *el atasco*
- *Recall:* say the Spanish for to greet, then the Spanish for to park, then say *el atasco* again

Before you move on

What does el atasco mean? ("The traffic jam".) Say it once more.

489.3 la gasolina — the petrol, the gas (for a car)

Before the new one: say the Spanish for to park, then the Spanish for the traffic jam.

You'll want to know: la gasolina

la gasolina — "the petrol, the gas (for a car)".

Tengo que echar gasolina.

I have to put petrol in.

La gasolinera is the petrol station.

The word, taken apart — and its English cousins

gasolina ← English *gasoline* (EtymDB 2.1), built on *gas*, a word coined in the 1600s by the Flemish chemist Van Helmont from Greek *khaos*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la gasolina*
- *Say it: la gasolina*, once more
- *Say it:* a sentence of your own with *la gasolina*
- *Recall:* say the Spanish for to park, then the Spanish for the traffic jam, then say *la gasolina* again

Before you move on

What does la gasolina mean? ("The petrol, the gas (for a car)".) Say it once more.

489.4 el ayuntamiento — the town hall, the city council

Before the new one: say the Spanish for the traffic jam, then the Spanish for the petrol.

You'll want to know: el ayuntamiento

el ayuntamiento — "the town hall, the city council".

El ayuntamiento abre a las nueve.

The town hall opens at nine.

The word, taken apart — and its English cousins

ayuntamiento first meant a joining, a meeting: it is built on the old verb *ayuntar*, "to join", from Latin *adiunctus*, "joined to", a relative of *junto*, "together". The council is the meeting.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el ayuntamiento*
- *Say it: el ayuntamiento*, once more
- *Say it:* a sentence of your own with *el ayuntamiento*
- *Recall:* say the Spanish for the traffic jam, then the Spanish for the petrol, then say *el ayuntamiento* again

Before you move on

What does el ayuntamiento mean? ("The town hall, the city council".) Say it once more.

489.5 el buzón — the postbox, the letterbox

Before the new one: say the Spanish for the petrol, then the Spanish for the town hall.

You'll want to know: el buzón

el buzón — "the postbox, the letterbox".

Deja la carta en el buzón.

Leave the letter in the postbox.

The word, taken apart — and its English cousins

buzón is of uncertain origin. The accounts that dictionaries offer do not agree, and none has won.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el buzón*
- *Say it: el buzón*, once more

- *Say it:* a sentence of your own with *el buzón*
- *Recall:* say the Spanish for the petrol, then the Spanish for the town hall, then say *el buzón* again

Before you move on

What does el buzón mean? (“The postbox, the letterbox”.) Say it once more.

Chapter 490

Buscar trabajo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a job advert about the position, the salary and the interview, and news of a strike or a business.
>
> *Complete the last lesson of chapter 490: I can read a job advert about the position, the salary and the interview, and news of a strike or a business.*

490.1 el empleo — the job, employment

> Before the new one: say the Spanish for the town hall, then the Spanish for the postbox.

You'll want to know: el empleo

el empleo — "the job, employment".

> Busco empleo como cocinero.
>
> *I am looking for a job as a cook.*

Oficina de empleo — job centre.

The word, taken apart — and its English cousins

empleo is the noun of *emplear*, "to use, to employ", taken from French *employer*, which goes back to Latin *implicare*, "to fold in, to involve".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *el empleo*
- *Say it:* *el empleo*, once more
- *Say it:* a sentence of your own with *el empleo*
- *Recall:* say the Spanish for the town hall, then the Spanish for the postbox, then say *el empleo* again

Before you move on

What does el empleo mean? ("The job, employment".) Say it once more.

490.2 el sueldo — the salary, the pay

Before the new one: say the Spanish for the postbox, then the Spanish for the job.

You'll want to know: el sueldo

el sueldo — "the salary, the pay".

El sueldo es de mil quinientos euros.

The salary is one thousand five hundred euros.

The word, taken apart — and its English cousins

sueldo ← Late Latin *soldus* (EtymDB 2.1), from *solidus*, "solid" — a solid gold coin — inherited: the *o* opened into *ue*. English *soldier* names one who served for that pay.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el sueldo*
- *Say it: el sueldo*, once more
- *Say it:* a sentence of your own with *el sueldo*
- *Recall:* say the Spanish for the postbox, then the Spanish for the job, then say *el sueldo* again

Before you move on

What does el sueldo mean? ("The salary, the pay".) Say it once more.

490.3 la entrevista — the interview

Before the new one: say the Spanish for the job, then the Spanish for the salary.

You'll want to know: la entrevista

la entrevista — "the interview".

Tengo una entrevista el jueves.

I have an interview on Thursday.

Una entrevista de trabajo — a job interview.

The word, taken apart — and its English cousins

entrevista is built from *entre*, "between", and *vista*, "a sight, a view", like French *entrevue*: two people seeing each other.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la entrevista*
- *Say it: la entrevista*, once more
- *Say it:* a sentence of your own with *la entrevista*
- *Recall:* say the Spanish for the job, then the Spanish for the salary, then say *la entrevista* again

Before you move on

What does la entrevista mean? ("The interview".) Say it once more.

490.4 la huelga — the strike

Before the new one: say the Spanish for the salary, then the Spanish for the interview.

You'll want to know: la huelga

la huelga — "the strike".

Mañana hay huelga de trenes.

Tomorrow there is a train strike.

Estar en huelga — to be on strike.

The word, taken apart — and its English cousins

huelga is the noun of *holgar*, "to rest, to be idle" (EtymDB 2.1), from Late Latin *follicare*, "to puff, to pant", built on *follis*, "bellows" — inherited: *f-* became *h-* and the stressed *o* opened into *ue*. A strike is a stopping of work.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la huelga*
- *Say it: la huelga*, once more
- *Say it:* a sentence of your own with *la huelga*
- *Recall:* say the Spanish for the salary, then the Spanish for the interview, then say *la huelga* again

Before you move on

What does la huelga mean? ("The strike".) Say it once more.

490.5 el negocio — the business

Before the new one: say the Spanish for the interview, then the Spanish for the strike.

You'll want to know: el negocio

el negocio — "the business".

Tiene un negocio de ropa.

He has a clothing business.

Los negocios — business in general.

The word, taken apart — and its English cousins

negocio ← Latin *negotium*, "business" (EtymDB 2.1), from *nec*, "not", and *otium*, "leisure" — a learned word. Business was the absence of leisure; *ocio*, "leisure", is still Spanish.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *el negocio*
- *Say it:* *el negocio*, once more
- *Say it:* a sentence of your own with *el negocio*
- *Recall:* say the Spanish for the interview, then the Spanish for the strike, then say *el negocio* again

Before you move on

What does el negocio mean? (“The business”.) Say it once more.

Chapter 491

Pagar en la tienda

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can deal with a receipt, a special offer, the cashier, my wallet and a tip.
>
> *Complete the last lesson of chapter 491: I can deal with a receipt, a special offer, the cashier, my wallet and a tip.*

491.1 el recibo — the receipt

> Before the new one: say the Spanish for the strike, then the Spanish for the business.

You'll want to know: el recibo

el recibo — "the receipt".

> Guarde el recibo para cambiar el producto.
>
> *Keep the receipt to exchange the item.*

The word, taken apart — and its English cousins

recibo is the noun of *recibir*, "to receive", from Latin *recipere*, "to take back" — inherited: the *-p-* became *-b-*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *el recibo*
- *Say it:* *el recibo*, once more
- *Say it:* a sentence of your own with *el recibo*
- *Recall:* say the Spanish for the strike, then the Spanish for the business, then say *el recibo* again

Before you move on

What does el recibo mean? ("The receipt".) Say it once more.

491.2 la oferta — the offer, the special offer

Before the new one: say the Spanish for the business, then the Spanish for the receipt.

You'll want to know: la oferta

la oferta — "the offer, the special offer".

Las naranjas están de oferta.

The oranges are on special offer.

De oferta — on offer.

The word, taken apart — and its English cousins

oferta goes back to Latin *offerre*, "to bring before, to offer" (Lewis & Short): *ob-*, "towards", and *ferre*, "to carry" — the verb behind *ofrecer*, "to offer".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la oferta*
- *Say it: la oferta*, once more
- *Say it:* a sentence of your own with *la oferta*
- *Recall:* say the Spanish for the business, then the Spanish for the receipt, then say *la oferta* again

Before you move on

What does la oferta mean? ("The offer, the special offer".) Say it once more.

491.3 el cajero — the cashier; the cash machine

Before the new one: say the Spanish for the receipt, then the Spanish for the offer.

You'll want to know: el cajero

el cajero — "the cashier; the cash machine".

El cajero no funciona.

The cash machine is not working.

La caja is the till.

The word, taken apart — and its English cousins

cajero is *caja*, "a box, a cash box", with *-ero*. *Caja* came through Catalan *caixa* from Latin *capsa*, "a box" (EtymDB 2.1 traces it to *capsa*).

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el cajero*
- *Say it: el cajero*, once more
- *Say it:* a sentence of your own with *el cajero*
- *Recall:* say the Spanish for the receipt, then the Spanish for the offer, then say *el cajero* again

Before you move on

What does el cajero mean? ("The cashier; the cash machine".) Say it once more.

491.4 la cartera — the wallet

Before the new one: say the Spanish for the offer, then the Spanish for the cashier.

You'll want to know: la cartera

la cartera — "the wallet".

Me robaron la cartera en el metro.

My wallet was stolen on the underground.

The word, taken apart — and its English cousins

cartera is *carta*, "a letter, a paper", with *-era*: a case for papers. *Carta* is Latin *charta*, a leaf of papyrus, from Greek *chartēs*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la cartera*
- *Say it: la cartera*, once more

- *Say it:* a sentence of your own with *la cartera*
- *Recall:* say the Spanish for the offer, then the Spanish for the cashier, then say *la cartera* again

Before you move on

What does la cartera mean? ("The wallet".) Say it once more.

491.5 la propina — the tip

Before the new one: say the Spanish for the cashier, then the Spanish for the wallet.

You'll want to know: la propina

la propina — "the tip".

Le dejamos una propina al camarero.

We left the waiter a tip.

In much of Latin America a waiter is *el mesero*.

The word, taken apart — and its English cousins

propina ← Medieval Latin *propina*, from Latin *propinare*, "to drink to someone's health" (Lewis & Short), itself from Greek: a tip was money for a drink.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la propina*
- *Say it: la propina*, once more
- *Say it:* a sentence of your own with *la propina*
- *Recall:* say the Spanish for the cashier, then the Spanish for the wallet, then say *la propina* again

Before you move on

What does la propina mean? (“The tip”.) Say it once more.

Chapter 492

Intentarlo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone tries, manages, avoids, chooses or keeps a promise.
>
> *Complete the last lesson of chapter 492: I can say that someone tries, manages, avoids, chooses or keeps a promise.*

492.1 intentar — to try

> Before the new one: say the Spanish for the wallet, then the Spanish for the tip.

You'll want to know: intentar

intentar — "to try".

> Intento llegar a tiempo.
>
> *I try to arrive on time.*

Followed by an infinitive, with no preposition.

The word, taken apart — and its English cousins

intentar ← Latin *intentare*, "to stretch out towards" (EtymDB 2.1), built on *tendere*, "to stretch" — a learned word. To try is to reach for something.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: intentar*
- *Say it: intentar*, once more
- *Say it:* a sentence of your own with *intentar*
- *Recall:* say the Spanish for the wallet, then the Spanish for the tip, then say *intentar* again

Before you move on

What does intentar mean? ("To try".) Say it once more.

492.2 lograr — to manage, to achieve

Before the new one: say the Spanish for the tip, then the Spanish for to try.

You'll want to know: lograr

lograr — "to manage, to achieve".

Por fin logró aprobar.

At last she managed to pass.

The word, taken apart — and its English cousins

lograr ← Latin *lucrari*, "to gain, to profit" (EtymDB 2.1) — inherited: the *-c-* became *-g-* and the *u* became *o*. *Lucro*, "profit", is the same word taken from books.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: lograr*
- *Say it: lograr*, once more
- *Say it:* a sentence of your own with *lograr*
- *Recall:* say the Spanish for the tip, then the Spanish for to try, then say *lograr* again

Before you move on

What does lograr mean? ("To manage, to achieve".) Say it once more.

492.3 evitar — to avoid

Before the new one: say the Spanish for to try, then the Spanish for to manage.

You'll want to know: evitar

evitar — "to avoid".

Evita la carretera por la mañana.

Avoid the road in the morning.

The word, taken apart — and its English cousins

evitar ← Latin *evitare*, "to shun" (EtymDB 2.1): *e-*, "out", and *vitare*, "to avoid" — a learned word: the *-t-* between vowels stayed *t*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: evitar*
- *Say it: evitar*, once more

- *Say it:* a sentence of your own with *evitar*
- *Recall:* say the Spanish for to try, then the Spanish for to manage, then say *evitar* again

Before you move on

What does evitar mean? ("To avoid".) Say it once more.

492.4 elegir — to choose

Before the new one: say the Spanish for to manage, then the Spanish for to avoid.

You'll want to know: elegir

elegir — "to choose".

Puedes elegir entre dos menús.

You can choose between two menus.

The e breaks into i and the g becomes j: *elijo*.

The word, taken apart — and its English cousins

elegir ← Latin *eligere*, "to pick out" (EtymDB 2.1): *e-*, "out", and *legere*, "to gather, to choose" — the *legere* inside *inteligente*, "intelligent". A learned word: speech lost the *-g-*, as *legere* became *leer*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: elegir*
- *Say it: elegir*, once more
- *Say it:* a sentence of your own with *elegir*
- *Recall:* say the Spanish for to manage, then the Spanish for to avoid, then say *elegir* again

Before you move on

What does elegir mean? ("To choose".) Say it once more.

492.5 cumplir — to keep (a promise); to turn (an age)

Before the new one: say the Spanish for to avoid, then the Spanish for to choose.

You'll want to know: cumplir

cumplir — "to keep (a promise); to turn (an age)".

Siempre cumple sus promesas.

She always keeps her promises.

Cumplir años — to have a birthday.

The word, taken apart — and its English cousins

cumplir ← Latin *complere*, "to fill up, to complete" (EtymDB 2.1) — inherited: the *o* became *u*. To keep a promise is to fill it; to turn an age is to complete it.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: cumplir*
- *Say it: cumplir*, once more
- *Say it:* a sentence of your own with *cumplir*
- *Recall:* say the Spanish for to avoid, then the Spanish for to choose, then say *cumplir* again

Before you move on

What does cumplir mean? ("To keep (a promise); to turn (an age)".) Say it once more.

Chapter 493

Dar una opinión

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can give and weigh opinions: think, convince, insist, suggest and doubt.
>
> *Complete the last lesson of chapter 493: I can give and weigh opinions: think, convince, insist, suggest and doubt.*

493.1 opinar — to think, to have an opinion

> Before the new one: say the Spanish for to choose, then the Spanish for to keep.

You'll want to know: opinar

opinar — "to think, to have an opinion".

> ¿Qué opinas del plan?
>
> *What do you think of the plan?*

The word, taken apart — and its English cousins

opinar ← Latin *opinari*, "to think, to suppose" (EtymDB 2.1) — a learned word, the verb of *opinión*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *opinar*
- *Say it:* *opinar*, once more
- *Say it:* a sentence of your own with *opinar*
- *Recall:* say the Spanish for to choose, then the Spanish for to keep, then say *opinar* again

Before you move on

What does opinar mean? ("To think, to have an opinion".) Say it once more.

493.2 convencer — to convince

Before the new one: say the Spanish for to keep, then the Spanish for to think.

You'll want to know: convencer

convencer — "to convince".

No me convence la idea.

I am not convinced by the idea.

It takes a *z* in the first person present: *convenzo*.

The word, taken apart — and its English cousins

convencer ← Latin *convincere*, "to overcome, to prove wrong" (EtymDB 2.1): *con-* and *vincere*, "to conquer", fitted to *vencer*, "to win". To convince is to win the argument.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *convencer*
- *Say it:* *convencer*, once more
- *Say it:* a sentence of your own with *convencer*
- *Recall:* say the Spanish for to keep, then the Spanish for to think, then say *convencer* again

Before you move on

What does convencer mean? ("To convince".) Say it once more.

493.3 insistir — to insist

Before the new one: say the Spanish for to think, then the Spanish for to convince.

You'll want to know: insistir

insistir — "to insist".

Insiste en pagar él.

He insists on paying.

It goes with *en*: *insistir en algo*.

The word, taken apart — and its English cousins

insistir ← Latin *insistere*, "to stand on, to press on" (EtymDB 2.1): *in-* and *sistere*, "to stand" — a learned word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: insistir*
- *Say it: insistir*, once more
- *Say it:* a sentence of your own with *insistir*
- *Recall:* say the Spanish for to think, then the Spanish for to convince, then say *insistir* again

Before you move on

What does insistir mean? ("To insist".) Say it once more.

493.4 sugerir — to suggest

Before the new one: say the Spanish for to convince, then the Spanish for to insist.

You'll want to know: sugerir

sugerir — "to suggest".

Te sugiero otro hotel.

I suggest another hotel to you.

The e breaks into ie under stress: *sugiero*.

The word, taken apart — and its English cousins

sugerir ← Latin *suggerere*, "to bring up from below, to supply" (EtymDB 2.1): *sub-*, "under", and *gerere*, "to carry" — a learned word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: sugerir*
- *Say it: sugerir*, once more
- *Say it:* a sentence of your own with *sugerir*
- *Recall:* say the Spanish for to convince, then the Spanish for to insist, then say *sugerir* again

Before you move on

What does sugerir mean? ("To suggest".) Say it once more.

493.5 la duda — the doubt; the question

Before the new one: say the Spanish for to insist, then the Spanish for to suggest.

You'll want to know: la duda

la duda — "the doubt; the question".

Si tienes dudas, pregunta.

If you have questions, ask.

Sin duda — without a doubt.

The word, taken apart — and its English cousins

duda is the noun of *dudar*, "to doubt", from Latin *dubitare*, "to waver" (EtymDB 2.1) — inherited, through Old Spanish *dubdar*: the *-b-* fell out.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la duda*
- *Say it: la duda*, once more
- *Say it:* a sentence of your own with *la duda*
- *Recall:* say the Spanish for to insist, then the Spanish for to suggest, then say *la duda* again

Before you move on

What does la duda mean? ("The doubt; the question".) Say it once more.

493.6 Palabras de los capítulos 485-489 — a first pass

Say the Spanish for to suggest and the doubt.

Your turn

Say these aloud:

- to sweep, to wash up, to clean, to dry, the rubbish
- to shave, to cough, to breathe, the aspirin, the vaccine
- to be glad, to get angry, to worry, to relax, to have fun
- to get married, to get divorced, to fall in love, to say goodbye, to greet

Before you move on

To sweep? (**barrer**.) To wash up? (**fregar**.) To clean? (**limpiar**.) To dry? (**secar**.) The rubbish? (**la basura**.) To shave? (**afeitarse**.) To cough? (**toser**.) To breathe? (**respirar**.) The aspirin? (**la aspirina**.) The vaccine? (**la vacuna**.) To be glad? (**alegrarse**.) To get angry? (**enfadarse**.) To worry? (**preocuparse**.) To relax? (**relajarse**.) To have fun? (**divertirse**.)

To get married? (**casarse**.) To get divorced? (**divorciarse**.) To fall in love? (**enamorarse**.) To say goodbye? (**despedirse**.) To greet? (**saludar**.)

493.7 Palabras de los capítulos 490-493 — a second pass

Say the Spanish for to park and the traffic jam.

Your turn

Say these aloud:

- to park, the traffic jam, the petrol, the town hall, the postbox
- the job, the salary, the interview, the strike, the business
- the receipt, the offer, the cashier, the wallet, the tip
- to try, to manage, to avoid, to choose, to keep
- to think, to convince, to insist, to suggest, the doubt

Before you move on

To park? (**aparcar**.) The traffic jam? (**el atasco**.) The petrol? (**la gasolina**.) The town hall? (**el ayuntamiento**.) The postbox? (**el buzón**.) The job? (**el empleo**.) The salary? (**el sueldo**.) The interview? (**la entrevista**.) The strike? (**la huelga**.) The business? (**el negocio**.) The receipt? (**el recibo**.) The offer? (**la oferta**.) The cashier? (**el cajero**.) The wallet? (**la cartera**.) The tip? (**la propina**.) To try? (**intentar**.) To manage? (**lograr**.) To avoid? (**evitar**.) To choose? (**elegir**.) To keep? (**cumplir**.) To think? (**opinar**.) To convince? (**convencer**.) To insist? (**insistir**.) To suggest? (**sugerir**.) The doubt? (**la duda**.)

Chapter 494

Por la mañana

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe a morning: waking up, getting ready, going downstairs, switching on the light and heating up breakfast.
>
> *Complete the last lesson of chapter 494: I can describe a morning: waking up, getting ready, going downstairs, switching on the light and heating up breakfast.*

494.1 despertarse — to wake up

> Before the new one: say the Spanish for to suggest, then the Spanish for the doubt.

You'll want to know: despertarse

despertarse — "to wake up".

> Me despierto a las siete.
>
> *I wake up at seven.*

The e breaks into ie under stress: *me despierto*.

The word, taken apart — and its English cousins

despertar is built on the old participle *despierto*, "awake", usually traced to a spoken Latin **expertus*, a shortening of *experrectus*, "woken

up" (Lewis & Short).

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: despertarse*
- *Say it: despertarse*, once more
- *Say it:* a sentence of your own with *despertarse*
- *Recall:* say the Spanish for to suggest, then the Spanish for the doubt, then say *despertarse* again

Before you move on

What does despertarse mean? ("To wake up".) Say it once more.

494.2 arreglarse — to get ready, to get dressed up

Before the new one: say the Spanish for the doubt, then the Spanish for to wake up.

You'll want to know: arreglarse

arreglarse — "to get ready, to get dressed up".

Se arregla para ir a la boda.

She gets ready to go to the wedding.

Without *se*, *arreglar* is to fix.

The word, taken apart — and its English cousins

arreglarse is *arreglar*, "to fix", turned on yourself: *a-*, *regla*, "a rule, a ruler", and *-ar*, to set a thing by the rule. *Regla* is Latin *regula*, "a straight edge".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: arreglarse*
- *Say it: arreglarse*, once more
- *Say it:* a sentence of your own with *arreglarse*
- *Recall:* say the Spanish for the doubt, then the Spanish for to wake up, then say *arreglarse* again

Before you move on

What does arreglarse mean? ("To get ready, to get dressed up".) Say it once more.

494.3 bajar — to go down, to come down; to lower

Before the new one: say the Spanish for to wake up, then the Spanish for to get ready.

You'll want to know: bajar

bajar — "to go down, to come down; to lower".

Bajo a comprar el pan.

I go down to buy the bread.

The opposite of *subir*. *Bajar el volumen* — to turn the volume down.

The word, taken apart — and its English cousins

bajar is built on *bajo*, "low", from Late Latin *bassus*, "low" (EtymDB 2.1) — inherited: the *-ss-* became *j*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *bajar*
- *Say it:* *bajar*, once more
- *Say it:* a sentence of your own with *bajar*
- *Recall:* say the Spanish for to wake up, then the Spanish for to get ready, then say *bajar* again

Before you move on

What does bajar mean? ("To go down, to come down; to lower".) Say it once more.

494.4 encender — to switch on; to light

Before the new one: say the Spanish for to get ready, then the Spanish for to go down.

You'll want to know: encender

encender — "to switch on; to light".

Enciende la luz, por favor.

Switch on the light, please.

The e breaks into ie under stress: *enciendo*. The opposite is *apagar*.

The word, taken apart — and its English cousins

encender ← Latin *incendere*, "to set on fire" (EtymDB 2.1) — inherited: *in-* became *en-*, and the stressed *e* opens into *ie* in *enciendo*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *encender*
- *Say it:* *encender*, once more
- *Say it:* a sentence of your own with *encender*
- *Recall:* say the Spanish for to get ready, then the Spanish for to go down, then say *encender* again

Before you move on

What does encender mean? (“To switch on; to light”.) Say it once more.

494.5 calentar — to heat up, to warm up

Before the new one: say the Spanish for to go down, then the Spanish for to switch on.

You’ll want to know: calentar

calentar — “to heat up, to warm up”.

Caliento la leche en el microondas.

I heat up the milk in the microwave.

The e breaks into ie under stress: *caliento*.

The word, taken apart — and its English cousins

calentar is built on *caliente*, “hot”, from Latin *calentem*, “being warm” (EtymDB 2.1), the participle of *calere*, “to be warm”. *Caliente* is inherited: the stressed *e* opened into *ie*.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *calentar*
- *Say it:* *calentar*, once more
- *Say it:* a sentence of your own with *calentar*
- *Recall:* say the Spanish for to go down, then the Spanish for to switch on, then say *calentar* again

Before you move on

What does calentar mean? (“To heat up, to warm up”.) Say it once more.

Chapter 495

Las noticias

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow a short news item about something that happened, a dog that went missing and a thief.
>
> *Complete the last lesson of chapter 495: I can follow a short news item about something that happened, a dog that went missing and a thief.*

495.1 la noticia — the piece of news

> Before the new one: say the Spanish for to switch on, then the Spanish for to heat up.

You'll want to know: la noticia

la noticia — "the piece of news".

> Tengo una buena noticia.
>
> *I have some good news.*

Las noticias on television are the news.

The word, taken apart — and its English cousins

noticia ← Latin *notitia*, "a being known, knowledge" (EtymDB 2.1), from *notus*, "known" — a learned word: the *-ti-* became *-ci-*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la noticia*
- *Say it: la noticia*, once more
- *Say it:* a sentence of your own with *la noticia*
- *Recall:* say the Spanish for to switch on, then the Spanish for to heat up, then say *la noticia* again

Before you move on

What does la noticia mean? ("The piece of news".) Say it once more.

495.2 ocurrir — to happen

Before the new one: say the Spanish for to heat up, then the Spanish for the piece of news.

You'll want to know: ocurrir

ocurrir — "to happen".

¿Qué ocurrió anoche?

What happened last night?

A little more formal than *pasar*.

The word, taken apart — and its English cousins

ocurrir ← Latin *occurrere*, "to run to meet" (EtymDB 2.1): *ob-*, "towards", and *currere*, "to run" — a learned word. What happens is what runs into you.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: ocurrir*
- *Say it: ocurrir*, once more
- *Say it:* a sentence of your own with *ocurrir*
- *Recall:* say the Spanish for to heat up, then the Spanish for the piece of news, then say *ocurrir* again

Before you move on

What does ocurrir mean? ("To happen".) Say it once more.

495.3 suceder — to happen, to take place

Before the new one: say the Spanish for the piece of news, then the Spanish for to happen.

You'll want to know: suceder

suceder — "to happen, to take place".

El accidente sucedió en la autopista.

The accident happened on the motorway.

News reports use it alongside *ocurrir*.

The word, taken apart — and its English cousins

suceder ← Latin *succedere*, "to come after, to follow" (Lewis & Short): *sub-* and *cedere*, "to go". What follows on is what happens.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *suceder*
- *Say it:* *suceder*, once more
- *Say it:* a sentence of your own with *suceder*
- *Recall:* say the Spanish for the piece of news, then the Spanish for to happen, then say *suceder* again

Before you move on

What does suceder mean? ("To happen, to take place".) Say it once more.

495.4 desaparecer — to disappear

Before the new one: say the Spanish for to happen, then the Spanish for to happen.

You'll want to know: desaparecer

desaparecer — "to disappear".

Desapareció un perro en el parque.

A dog disappeared in the park.

It takes a *z* in the first person present: *desaparezco*.

The word, taken apart — and its English cousins

desaparecer is *des-*, which undoes, and *aparecer*, "to appear", built on Latin *apparere*, "to come into view".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: desaparecer*
- *Say it: desaparecer*, once more
- *Say it:* a sentence of your own with *desaparecer*
- *Recall:* say the Spanish for to happen, then the Spanish for to happen, then say *desaparecer* again

Before you move on

What does desaparecer mean? ("To disappear".) Say it once more.

495.5 el ladrón — the thief

Before the new one: say the Spanish for to happen, then the Spanish for to disappear.

You'll want to know: el ladrón

el ladrón — "the thief".

La policía busca al ladrón.

The police are looking for the thief.

A woman is *la ladrona*.

The word, taken apart — and its English cousins

ladrón ← Latin *latro*, *latronem*, "a hired soldier; a robber" (EtymDB 2.1) — inherited: the *-t-* became *-d-*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el ladrón*
- *Say it: el ladrón*, once more
- *Say it:* a sentence of your own with *el ladrón*
- *Recall:* say the Spanish for to happen, then the Spanish for to disappear, then say *el ladrón* again

Before you move on

What does el ladrón mean? (“The thief”.) Say it once more.

Chapter 496

Cosas de casa

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about home: the lock, putting things in place, taking things away and filling something up.
>
> *Complete the last lesson of chapter 496: I can talk about home: the lock, putting things in place, taking things away and filling something up.*

496.1 el hogar — the home

> Before the new one: say the Spanish for to disappear, then the Spanish for the thief.

You'll want to know: el hogar

el hogar — "the home".

> Productos para el hogar.
>
> *Products for the home.*

A warmer word than *la casa*; shop signs use it.

The word, taken apart — and its English cousins

hogar ← Old Spanish *fogar* (EtymDB 2.1), from spoken Latin **focaris*, built on *focus*, "a hearth" — inherited: *f-* became *h-*. A home was named for its fire.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *el hogar*
- *Say it:* *el hogar*, once more
- *Say it:* a sentence of your own with *el hogar*
- *Recall:* say the Spanish for to disappear, then the Spanish for the thief, then say *el hogar* again

Before you move on

What does el hogar mean? ("The home".) Say it once more.

496.2 la cerradura — the lock

Before the new one: say the Spanish for the thief, then the Spanish for the home.

You'll want to know: la cerradura

la cerradura — "the lock".

La llave no entra en la cerradura.

The key does not go into the lock.

The word, taken apart — and its English cousins

cerradura is *cerrar*, "to close", with *-dura*, the ending for the thing that does the job. *Cerrar* is Late Latin *serare*, "to bolt", from *sera*, the bar across a door.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la cerradura*
- *Say it: la cerradura*, once more
- *Say it:* a sentence of your own with *la cerradura*
- *Recall:* say the Spanish for the thief, then the Spanish for the home, then say *la cerradura* again

Before you move on

What does la cerradura mean? ("The lock".) Say it once more.

496.3 colocar — to put, to place

Before the new one: say the Spanish for the home, then the Spanish for the lock.

You'll want to know: colocar

colocar — "to put, to place".

Coloca los libros en la estantería.

Put the books on the shelf.

It takes *qu* before *e*: *coloqué*.

The word, taken apart — and its English cousins

colocar ← Latin *collocare*, "to place, to set in order" (EtymDB 2.1): *con-* and *locare*, "to put" — a learned borrowing. Worn down in speech, the same verb became *colgar*, "to hang".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *colocar*
- *Say it:* *colocar*, once more
- *Say it:* a sentence of your own with *colocar*
- *Recall:* say the Spanish for the home, then the Spanish for the lock, then say *colocar* again

Before you move on

What does colocar mean? ("To put, to place".) Say it once more.

496.4 quitar — to take away, to remove

Before the new one: say the Spanish for the lock, then the Spanish for to put.

You'll want to know: quitar

quitar — "to take away, to remove".

Quita la mesa después de comer.

Clear the table after eating.

Quitarse la chaqueta — to take off your jacket.

The word, taken apart — and its English cousins

quitar ← Medieval Latin *quitare*, "to set free from a debt", from Latin *quietus*, "at rest". English *quit* is the same word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: quitar*
- *Say it: quitar*, once more
- *Say it:* a sentence of your own with *quitar*
- *Recall:* say the Spanish for the lock, then the Spanish for to put, then say *quitar* again

Before you move on

What does quitar mean? ("To take away, to remove".) Say it once more.

496.5 llenar — to fill

Before the new one: say the Spanish for to put, then the Spanish for to take away.

You'll want to know: llenar

llenar — "to fill".

Llena la botella de agua.

Fill the bottle with water.

The verb behind *lleno*, full.

The word, taken apart — and its English cousins

llenar is built on *lleno*, "full", from Latin *plenus*, "full" — inherited: the *pl-* became *ll-*, as *clamare* became *llamar*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *llenar*
- *Say it:* *llenar*, once more
- *Say it:* a sentence of your own with *llenar*
- *Recall:* say the Spanish for to put, then the Spanish for to take away, then say *llenar* again

Before you move on

What does llenar mean? (“To fill”.) Say it once more.

Chapter 497

Una vida

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a short life story: being born, dying, inheriting, looking after someone and friendship.
>
> *Complete the last lesson of chapter 497: I can read a short life story: being born, dying, inheriting, looking after someone and friendship.*

497.1 nacer — to be born

> Before the new one: say the Spanish for to take away, then the Spanish for to fill.

You'll want to know: nacer

nacer — "to be born".

> Nací en Sevilla.
>
> *I was born in Seville.*

It takes a *z* in the first person present: *nazco*.

The word, taken apart — and its English cousins

nacer ← Latin *nasci*, "to be born" (Lewis & Short) — inherited, and remade as an ordinary *-er* verb.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *nacer*
- *Say it:* *nacer*, once more
- *Say it:* a sentence of your own with *nacer*
- *Recall:* say the Spanish for to take away, then the Spanish for to fill, then say *nacer* again

Before you move on

What does nacer mean? ("To be born".) Say it once more.

497.2 fallecer — to pass away

Before the new one: say the Spanish for to fill, then the Spanish for to be born.

You'll want to know: fallecer

fallecer — "to pass away".

Su abuelo falleció el año pasado.

His grandfather passed away last year.

A gentler, more formal word than *morir*.

The word, taken apart — and its English cousins

fallecer comes from spoken Latin **fallescere* (EtymDB 2.1), built on *fallere*, "to deceive, to fail" — first "to run short", then "to die". *Fallar*, "to fail", is a relative.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: fallecer*
- *Say it: fallecer*, once more
- *Say it:* a sentence of your own with *fallecer*
- *Recall:* say the Spanish for to fill, then the Spanish for to be born, then say *fallecer* again

Before you move on

What does fallecer mean? ("To pass away".) Say it once more.

497.3 heredar — to inherit

Before the new one: say the Spanish for to be born, then the Spanish for to pass away.

You'll want to know: heredar

heredar — "to inherit".

Heredó la casa de su tía.

She inherited the house from her aunt.

The word, taken apart — and its English cousins

heredar ← Late Latin *hereditare*, "to inherit" (EtymDB 2.1), from *heres*, *heredis*, "an heir" — inherited, and shortened.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: heredar*
- *Say it: heredar*, once more

- *Say it:* a sentence of your own with *heredar*
- *Recall:* say the Spanish for to be born, then the Spanish for to pass away, then say *heredar* again

Before you move on

What does heredar mean? ("To inherit".) Say it once more.

497.4 cuidar — to look after, to take care of

Before the new one: say the Spanish for to pass away, then the Spanish for to inherit.

You'll want to know: cuidar

cuidar — "to look after, to take care of".

Cuido a mi hermano pequeño.

I look after my little brother.

The verb behind *el cuidado*, care.

The word, taken apart — and its English cousins

cuidar ← Latin *cogitare*, "to think" (EtymDB 2.1), through Old Spanish *coidar*, "to think, to be concerned" — inherited. Caring for someone began as thinking about them.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: cuidar*
- *Say it: cuidar*, once more
- *Say it:* a sentence of your own with *cuidar*
- *Recall:* say the Spanish for to pass away, then the Spanish for to inherit, then say *cuidar* again

Before you move on

What does cuidar mean? (“To look after, to take care of”.) Say it once more.

497.5 la amistad — friendship

Before the new one: say the Spanish for to inherit, then the Spanish for to look after.

You’ll want to know: la amistad

la amistad — “friendship”.

Nuestra amistad empezó en el colegio.

Our friendship began at school.

The word, taken apart — and its English cousins

amistad ← Old Spanish *amiztad* (EtymDB 2.1), from spoken Latin **amicitatem*, built on *amicus*, “friend” — inherited: the ending became *-dad*, as in *ciudad*, “city”.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la amistad*
- *Say it: la amistad*, once more
- *Say it:* a sentence of your own with *la amistad*
- *Recall:* say the Spanish for to inherit, then the Spanish for to look after, then say *la amistad* again

Before you move on

What does la amistad mean? (“Friendship”.) Say it once more.

Chapter 498

El deporte

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read about a championship: the sportsperson, competing, riding and drawing a poster for it.
>
> *Complete the last lesson of chapter 498: I can read about a championship: the sportsperson, competing, riding and drawing a poster for it.*

498.1 el campeonato — the championship

> Before the new one: say the Spanish for to look after, then the Spanish for friendship.

You'll want to know: el campeonato

el campeonato — "the championship".

> Ganamos el campeonato de baloncesto.
>
> *We won the basketball championship.*

The word, taken apart — and its English cousins

campeonato is *campeón*, "champion", with *-ato*. *Campeón* came from Italian *campione* (EtymDB 2.1), a fighter in the field, from Latin *campus*, "a field".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el campeonato*
- *Say it: el campeonato*, once more
- *Say it:* a sentence of your own with *el campeonato*
- *Recall:* say the Spanish for to look after, then the Spanish for friendship, then say *el campeonato* again

Before you move on

What does el campeonato mean? ("The championship".) Say it once more.

498.2 el deportista — the sportsperson, the athlete

Before the new one: say the Spanish for friendship, then the Spanish for the championship.

You'll want to know: el deportista

el deportista — "the sportsperson, the athlete".

Es una deportista muy conocida.

She is a very well-known athlete.

The same form for a woman: *la deportista*.

The word, taken apart — and its English cousins

deportista is *deporte*, "sport", with *-ista*. *Deporte* first meant amusement: it comes from *deportarse*, "to enjoy oneself", Latin *deportare*, "to carry away".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el deportista*
- *Say it: el deportista*, once more
- *Say it:* a sentence of your own with *el deportista*
- *Recall:* say the Spanish for friendship, then the Spanish for the championship, then say *el deportista* again

Before you move on

What does el deportista mean? ("The sportsperson, the athlete".) Say it once more.

498.3 competir — to compete

Before the new one: say the Spanish for the championship, then the Spanish for the sportsperson.

You'll want to know: competir

competir — "to compete".

Compite en los cien metros.

He competes in the hundred metres.

The e breaks into i: *compito*.

The word, taken apart — and its English cousins

competir ← Latin *competere*, "to strive together, to meet" (EtymDB 2.1): *con-* and *petere*, "to seek" — a learned word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: competir*
- *Say it: competir*, once more
- *Say it:* a sentence of your own with *competir*
- *Recall:* say the Spanish for the championship, then the Spanish for the sportsperson, then say *competir* again

Before you move on

What does competir mean? ("To compete".) Say it once more.

498.4 montar — to ride; to set up

Before the new one: say the Spanish for the sportsperson, then the Spanish for to compete.

You'll want to know: montar

montar — "to ride; to set up".

Monto en bici los domingos.

I ride my bike on Sundays.

Montar a caballo — to ride a horse. In much of Latin America people say *andar en bici*.

The word, taken apart — and its English cousins

montar is probably from French *monter*, "to climb", from spoken Latin **montare*, built on *mons*, *montis*, "a mountain" (EtymDB 2.1 has the spoken Latin verb).

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: montar*
- *Say it: montar*, once more
- *Say it:* a sentence of your own with *montar*
- *Recall:* say the Spanish for the sportsperson, then the Spanish for to compete, then say *montar* again

Before you move on

What does montar mean? ("To ride; to set up".) Say it once more.

498.5 dibujar — to draw

Before the new one: say the Spanish for to compete, then the Spanish for to ride.

You'll want to know: dibujar

dibujar — "to draw".

Mi hija dibuja muy bien.

My daughter draws very well.

El dibujo is the drawing.

The word, taken apart — and its English cousins

dibujar is usually traced to Old French *deboissier*, "to carve in wood" (EtymDB 2.1), built on *bois*, "wood".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *dibujar*
- *Say it:* *dibujar*, once more
- *Say it:* a sentence of your own with *dibujar*
- *Recall:* say the Spanish for to compete, then the Spanish for to ride, then say *dibujar* again

Before you move on

What does dibujar mean? (“To draw”.) Say it once more.

Chapter 499

Algo de comer

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can order a snack, say what I feel like, add something and share.
>
> *Complete the last lesson of chapter 499: I can order a snack, say what I feel like, add something and share.*

499.1 el bocadillo — the sandwich (in a bread roll)

> Before the new one: say the Spanish for to ride, then the Spanish for to draw.

You'll want to know: el bocadillo

el bocadillo — "the sandwich (in a bread roll)".

> Un bocadillo de queso, por favor.
>
> *A cheese sandwich, please.*

The word used in Spain; in much of Latin America a sandwich is *un sándwich*.

The word, taken apart — and its English cousins

bocadillo is *bocado*, "a mouthful", with the small-ending *-illo*: a little mouthful. *Bocado* is built on *boca*, "mouth", Latin *bucca*, "a cheek" — inherited: the short *u* became *o*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el bocadillo*
- *Say it: el bocadillo*, once more
- *Say it:* a sentence of your own with *el bocadillo*
- *Recall:* say the Spanish for to ride, then the Spanish for to draw, then say *el bocadillo* again

Before you move on

What does el bocadillo mean? ("The sandwich (in a bread roll)".) Say it once more.

499.2 el batido — the milkshake, the smoothie

Before the new one: say the Spanish for to draw, then the Spanish for the sandwich.

You'll want to know: el batido

el batido — "the milkshake, the smoothie".

Quiero un batido de fresa.

I would like a strawberry milkshake.

In parts of Latin America it is *el licuado*.

The word, taken apart — and its English cousins

batido is the participle of *batir*, "to beat, to whisk", from Latin *battuere*, "to beat" (Lewis & Short): a drink that has been beaten.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el batido*
- *Say it: el batido*, once more
- *Say it:* a sentence of your own with *el batido*
- *Recall:* say the Spanish for to draw, then the Spanish for the sandwich, then say *el batido* again

Before you move on

What does el batido mean? ("The milkshake, the smoothie".) Say it once more.

499.3 añadir — to add

Before the new one: say the Spanish for the sandwich, then the Spanish for the milkshake.

You'll want to know: añadir

añadir — "to add".

Añade un poco de sal.

Add a little salt.

The word, taken apart — and its English cousins

añadir is usually traced to spoken Latin **inaddere*, "to add on", built on *addere*, "to add" (Lewis & Short).

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: añadir*
- *Say it: añadir*, once more
- *Say it:* a sentence of your own with *añadir*
- *Recall:* say the Spanish for the sandwich, then the Spanish for the milkshake, then say *añadir* again

Before you move on

What does añadir mean? ("To add".) Say it once more.

499.4 apetecer — to feel like, to fancy

Before the new one: say the Spanish for the milkshake, then the Spanish for to add.

You'll want to know: apetecer

apetecer — "to feel like, to fancy".

¿Te apetece un café?

Do you feel like a coffee?

It works like *gustar*: *me apetece*. Used mostly in Spain; elsewhere *tener ganas de*.

The word, taken apart — and its English cousins

apetecer is Latin *appetere*, "to reach for, to desire" (Lewis & Short), with the ending *-ecer*. English *appetite* comes from the same verb. The *-t-* between vowels was kept, the mark of a word taken from books.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *apetecer*
- *Say it:* *apetecer*, once more
- *Say it:* a sentence of your own with *apetecer*
- *Recall:* say the Spanish for the milkshake, then the Spanish for to add, then say *apetecer* again

Before you move on

What does apetecer mean? ("To feel like, to fancy".) Say it once more.

499.5 compartir — to share

Before the new one: say the Spanish for to add, then the Spanish for to feel like.

You'll want to know: compartir

compartir — "to share".

Compartimos una pizza.

We share a pizza.

The word, taken apart — and its English cousins

compartir ← Late Latin *compartiri*, "to share out" (EtymDB 2.1): *con-* and *partiri*, "to divide", built on *pars*, "a part".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *compartir*
- *Say it:* *compartir*, once more
- *Say it:* a sentence of your own with *compartir*
- *Recall:* say the Spanish for to add, then the Spanish for to feel like, then say *compartir* again

Before you move on

What does compartir mean? ("To share".) Say it once more.

Chapter 500

Vivir juntos

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read house rules about respect, noise that bothers people, what is forbidden, the law and freedom.
>
> *Complete the last lesson of chapter 500: I can read house rules about respect, noise that bothers people, what is forbidden, the law and freedom.*

500.1 respetar — to respect

> Before the new one: say the Spanish for to feel like, then the Spanish for to share.

You'll want to know: respetar

respetar — "to respect".

> Respeta el horario de descanso.
>
> *Respect the quiet hours.*

The verb behind *el respeto*.

The word, taken apart — and its English cousins

respetar is built on *respeto*, "respect", from Latin *respectus*, "a looking back, regard", from *respicere*, "to look back" — semi-learned: its *-ct-* was simplified to *-t-*, not turned into the *-ch-* of words worn

down in speech.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: respetar*
- *Say it: respetar*, once more
- *Say it:* a sentence of your own with *respetar*
- *Recall:* say the Spanish for to feel like, then the Spanish for to share, then say *respetar* again

Before you move on

What does respetar mean? ("To respect".) Say it once more.

500.2 molestar — to bother, to disturb

Before the new one: say the Spanish for to share, then the Spanish for to respect.

You'll want to know: molestar

molestar — "to bother, to disturb".

No molestar.

Do not disturb.

It works like *gustar*: *¿te molesta el ruido?*

The word, taken apart — and its English cousins

molestar ← Latin *molestare*, "to trouble, to annoy" (Lewis & Short), from *molestus*, "troublesome".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: molestar*
- *Say it: molestar*, once more
- *Say it:* a sentence of your own with *molestar*
- *Recall:* say the Spanish for to share, then the Spanish for to respect, then say *molestar* again

Before you move on

What does molestar mean? ("To bother, to disturb".) Say it once more.

500.3 prohibir — to forbid, to ban

Before the new one: say the Spanish for to respect, then the Spanish for to bother.

You'll want to know: prohibir

prohibir — "to forbid, to ban".

Se prohíbe fumar.

Smoking is forbidden.

Note the written accent in *prohíbe*.

The word, taken apart — and its English cousins

prohibir ← Latin *prohibere*, "to hold back" (EtymDB 2.1): *pro-*, "in front", and *habere*, "to hold".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: prohibir*
- *Say it: prohibir*, once more
- *Say it:* a sentence of your own with *prohibir*
- *Recall:* say the Spanish for to respect, then the Spanish for to bother, then say *prohibir* again

Before you move on

What does prohibir mean? ("To forbid, to ban".) Say it once more.

500.4 la ley — the law

Before the new one: say the Spanish for to bother, then the Spanish for to forbid.

You'll want to know: la ley

la ley — "the law".

Es la ley.

It is the law.

The word, taken apart — and its English cousins

ley ← Latin *lex*, *legem*, "law" (EtymDB 2.1) — inherited: the *-g-* between vowels fell away.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la ley*
- *Say it: la ley*, once more
- *Say it:* a sentence of your own with *la ley*

- *Recall:* say the Spanish for to bother, then the Spanish for to forbid, then say *la ley* again

Before you move on

What does la ley mean? ("The law".) Say it once more.

500.5 la libertad — freedom, liberty

Before the new one: say the Spanish for to forbid, then the Spanish for the law.

You'll want to know: la libertad

la libertad — "freedom, liberty".

Los niños necesitan libertad para jugar.

Children need freedom to play.

The word, taken apart — and its English cousins

libertad ← Latin *libertas*, *libertatem*, "freedom" (Lewis & Short), from *liber*, "free" — not the *liber*, "book", behind *libro*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la libertad*
- *Say it: la libertad*, once more
- *Say it:* a sentence of your own with *la libertad*
- *Recall:* say the Spanish for to forbid, then the Spanish for the law, then say *la libertad* again

Before you move on

What does la libertad mean? ("Freedom, liberty".) Say it once more.

Chapter 501

De viaje otra vez

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a traveller who drives, follows the signs, comes back and stops at a fountain.
>
> *Complete the last lesson of chapter 501: I can talk about a traveller who drives, follows the signs, comes back and stops at a fountain.*

501.1 el viajero — the traveller, the passenger

> Before the new one: say the Spanish for the law, then the Spanish for freedom.

You'll want to know: el viajero

el viajero — "the traveller, the passenger".

> Los viajeros deben bajar del tren.
>
> *Passengers must get off the train.*

A woman is *la viajera*.

The word, taken apart — and its English cousins

viajero is *viaje*, "a journey", with *-ero*. *Viaje* came from Catalan *viatge*, Latin *viaticum*, "money for a journey", built on *via*, "a road".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el viajero*
- *Say it: el viajero*, once more
- *Say it:* a sentence of your own with *el viajero*
- *Recall:* say the Spanish for the law, then the Spanish for freedom, then say *el viajero* again

Before you move on

What does el viajero mean? ("The traveller, the passenger".) Say it once more.

501.2 conducir — to drive

Before the new one: say the Spanish for freedom, then the Spanish for the traveller.

You'll want to know: conducir

conducir — "to drive".

Conduzco al trabajo.

I drive to work.

It takes *zc* in the first person present: *conduzco*. In much of Latin America people say *manejar*.

The word, taken apart — and its English cousins

conducir ← Latin *conducere*, "to lead together" (EtymDB 2.1): *con-* and *ducere*, "to lead" — a learned word. To drive is to lead a car.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: conducir*
- *Say it: conducir*, once more
- *Say it:* a sentence of your own with *conducir*
- *Recall:* say the Spanish for freedom, then the Spanish for the traveller, then say *conducir* again

Before you move on

What does conducir mean? ("To drive".) Say it once more.

501.3 regresar — to come back, to return

Before the new one: say the Spanish for the traveller, then the Spanish for to drive.

You'll want to know: regresar

regresar — "to come back, to return".

Regresamos el domingo.

We are coming back on Sunday.

A close twin of *volver*.

The word, taken apart — and its English cousins

regresar is built on *regreso*, "a return", from Latin *regressus*, "a going back" (EtymDB 2.1), from *regredi*, "to step back".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: regresar*
- *Say it: regresar*, once more
- *Say it:* a sentence of your own with *regresar*
- *Recall:* say the Spanish for the traveller, then the Spanish for to drive, then say *regresar* again

Before you move on

What does regresar mean? ("To come back, to return".) Say it once more.

501.4 la señal — the sign, the signal

Before the new one: say the Spanish for to drive, then the Spanish for to come back.

You'll want to know: la señal

la señal — "the sign, the signal".

Sigue las señales hacia el aeropuerto.

Follow the signs to the airport.

Una señal de tráfico — a road sign. *No hay señal* — there is no signal, on a phone.

The word, taken apart — and its English cousins

señal ← Late Latin *signale* (EtymDB 2.1), from *signum*, "a mark, a sign" — inherited: the *-gn-* became *ñ*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la señal*
- *Say it: la señal*, once more
- *Say it:* a sentence of your own with *la señal*
- *Recall:* say the Spanish for to drive, then the Spanish for to come back, then say *la señal* again

Before you move on

What does la señal mean? ("The sign, the signal".) Say it once more.

501.5 la fuente — the fountain; the source

Before the new one: say the Spanish for to come back, then the Spanish for the sign.

You'll want to know: la fuente

la fuente — "the fountain; the source".

Nos vemos en la fuente de la plaza.

See you at the fountain in the square.

Una fuente de información — a source of information.

The word, taken apart — and its English cousins

fuente ← Latin *fons*, *fontem*, "a spring" (EtymDB 2.1) — inherited: the stressed *o* opened into *ue*. A source is where a river springs.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *la fuente*
- *Say it:* *la fuente*, once more
- *Say it:* a sentence of your own with *la fuente*
- *Recall:* say the Spanish for to come back, then the Spanish for the sign, then say *la fuente* again

Before you move on

What does la fuente mean? (“The fountain; the source”.) Say it once more.

Chapter 502

Hablar con otros

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can introduce someone, mention something, chat, tell a joke and translate.
>
> *Complete the last lesson of chapter 502: I can introduce someone, mention something, chat, tell a joke and translate.*

502.1 presentar — to introduce; to present

> Before the new one: say the Spanish for the sign, then the Spanish for the fountain.

You'll want to know: presentar

presentar — "to introduce; to present".

> Te presento a mi amiga Ana.
>
> *Let me introduce my friend Ana.*

Presentar un documento — to hand in a document.

The word, taken apart — and its English cousins

presentar ← Latin *praesentare*, "to place before, to show" (EtymDB 2.1), from *praesens*, "present, at hand".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: presentar*
- *Say it: presentar*, once more
- *Say it:* a sentence of your own with *presentar*
- *Recall:* say the Spanish for the sign, then the Spanish for the fountain, then say *presentar* again

Before you move on

What does presentar mean? ("To introduce; to present".) Say it once more.

502.2 mencionar — to mention

Before the new one: say the Spanish for the fountain, then the Spanish for to introduce.

You'll want to know: mencionar

mencionar — "to mention".

No mencionó el precio.

He did not mention the price.

The word, taken apart — and its English cousins

mencionar is built on *mención*, "a mention", from Latin *mentio*, *mentionem*, "a calling to mind" (Lewis & Short), from the root of *mens*, "mind". *Mención* is learned: its *-ti-* became *-ci-*, not the *z* of speech.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: mencionar*
- *Say it: mencionar*, once more
- *Say it:* a sentence of your own with *mencionar*
- *Recall:* say the Spanish for the fountain, then the Spanish for to introduce, then say *mencionar* again

Before you move on

What does mencionar mean? ("To mention".) Say it once more.

502.3 charlar — to chat

Before the new one: say the Spanish for to introduce, then the Spanish for to mention.

You'll want to know: charlar

charlar — "to chat".

Charlamos un rato en el bar.

We chatted for a while in the bar.

La charla is the chat, or a talk.

The word, taken apart — and its English cousins

charlar ← Italian *ciarlare*, "to chatter" (EtymDB 2.1), a word that probably imitates the sound of chatter.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *charlar*
- *Say it:* *charlar*, once more
- *Say it:* a sentence of your own with *charlar*
- *Recall:* say the Spanish for to introduce, then the Spanish for to mention, then say *charlar* again

Before you move on

What does charlar mean? (“To chat”.) Say it once more.

502.4 el chiste — the joke

Before the new one: say the Spanish for to mention, then the Spanish for to chat.

You’ll want to know: el chiste

el chiste — “the joke”.

Mi abuelo cuenta chistes muy malos.

My grandfather tells very bad jokes.

Contar un chiste — to tell a joke.

The word, taken apart — and its English cousins

chiste comes from *chistar*, “to make the slightest sound” (EtymDB 2.1), a verb built on the whispered noise *chist*.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el chiste*
- *Say it: el chiste*, once more
- *Say it:* a sentence of your own with *el chiste*
- *Recall:* say the Spanish for to mention, then the Spanish for to chat, then say *el chiste* again

Before you move on

What does el chiste mean? ("The joke".) Say it once more.

502.5 traducir — to translate

Before the new one: say the Spanish for to chat, then the Spanish for the joke.

You'll want to know: traducir

traducir — "to translate".

¿Me traduces este mensaje?

Can you translate this message for me?

It takes *zc* in the first person present: *traduzco*.

The word, taken apart — and its English cousins

traducir ← Latin *traducere*, "to lead across" (EtymDB 2.1): *trans*, "across", and *ducere*, "to lead". A translation carries words across into another language.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: traducir*
- *Say it: traducir*, once more
- *Say it:* a sentence of your own with *traducir*
- *Recall:* say the Spanish for to chat, then the Spanish for the joke, then say *traducir* again

Before you move on

What does traducir mean? ("To translate".) Say it once more.

502.6 Palabras de los capítulos 494-498 — a first pass

Say the Spanish for the joke and to translate.

Your turn

Say these aloud:

- to wake up, to get ready, to go down, to switch on, to heat up
- the piece of news, to happen, to happen, to disappear, the thief
- the home, the lock, to put, to take away, to fill
- to be born, to pass away, to inherit, to look after, friendship

Before you move on

To wake up? (**despertarse**.) To get ready? (**arreglarse**.) To go down? (**bajar**.) To switch on? (**encender**.) To heat up? (**calentar**.) The piece of news? (**la noticia**.) To happen? (**ocurrir**.) To happen? (**suceder**.) To disappear? (**desaparecer**.) The thief? (**el ladrón**.) The home? (**el hogar**.) The lock? (**la cerradura**.) To put? (**colocar**.) To take away? (**quitar**.) To fill? (**llenar**.) To be born? (**nacer**.) To pass away? (**fallecer**.) To inherit? (**heredar**.) To look after? (**cuidar**.) Friendship? (**la**

amistad.)

502.7 Palabras de los capítulos 499-502 — a second pass

Say the Spanish for the championship and the sportsperson.

Your turn

Say these aloud:

- the championship, the sportsperson, to compete, to ride, to draw
- the sandwich, the milkshake, to add, to feel like, to share
- to respect, to bother, to forbid, the law, freedom
- the traveller, to drive, to come back, the sign, the fountain
- to introduce, to mention, to chat, the joke, to translate

Before you move on

The championship? (**el campeonato**.) The sportsperson? (**el deportista**.) To compete? (**competir**.) To ride? (**montar**.) To draw? (**dibujar**.) The sandwich? (**el bocadillo**.) The milkshake? (**el batido**.) To add? (**añadir**.) To feel like? (**apetecer**.) To share? (**compartir**.) To respect? (**respetar**.) To bother? (**molestar**.) To forbid? (**prohibir**.) The law? (**la ley**.) Freedom? (**la libertad**.) The traveller? (**el viajero**.) To drive? (**conducir**.) To come back? (**regresar**.) The sign? (**la señal**.) The fountain? (**la fuente**.) To introduce? (**presentar**.) To mention? (**mencionar**.) To chat? (**charlar**.) The joke? (**el chiste**.) To translate? (**traducir**.)

Chapter 503

Ponerse en forma

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about getting fit: losing weight, putting up with effort and pressure, and being patient.
>
> *Complete the last lesson of chapter 503: I can talk about getting fit: losing weight, putting up with effort and pressure, and being patient.*

503.1 adelgazar — to lose weight

> Before the new one: say the Spanish for the joke, then the Spanish for to translate.

You'll want to know: adelgazar

adelgazar — "to lose weight".

> Quiere adelgazar antes del verano.
>
> *He wants to lose weight before the summer.*

The opposite is *engordar*. It takes *c* before *e*: *adelgacé*.

The word, taken apart — and its English cousins

adelgazar is *a-*, *delgado*, "thin", and *-azar*: to make thin. *Delgado* is Latin *delicatus*, "delicate" — inherited, its *-c-* and *-t-* softened to *-g-* and *-d-*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: adelgazar*
- *Say it: adelgazar*, once more
- *Say it:* a sentence of your own with *adelgazar*
- *Recall:* say the Spanish for the joke, then the Spanish for to translate, then say *adelgazar* again

Before you move on

What does adelgazar mean? ("To lose weight".) Say it once more.

503.2 aguantar — to put up with, to bear; to hold

Before the new one: say the Spanish for to translate, then the Spanish for to lose weight.

You'll want to know: aguantar

aguantar — "to put up with, to bear; to hold".

No aguanto el calor.

I cannot stand the heat.

Aguanta un momento — hold on a moment.

The word, taken apart — and its English cousins

aguantar ← Italian *agguantare*, "to grip, to hold fast" (EtymDB 2.1), built on *guanto*, "a glove".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: aguantar*
- *Say it: aguantar*, once more
- *Say it:* a sentence of your own with *aguantar*
- *Recall:* say the Spanish for to translate, then the Spanish for to lose weight, then say *aguantar* again

Before you move on

What does aguantar mean? ("To put up with, to bear; to hold".) Say it once more.

503.3 el esfuerzo — the effort

Before the new one: say the Spanish for to lose weight, then the Spanish for to put up with.

You'll want to know: el esfuerzo

el esfuerzo — "the effort".

Con esfuerzo, todo es posible.

With effort, everything is possible.

Hacer un esfuerzo — to make an effort.

The word, taken apart — and its English cousins

esfuerzo is the noun of *esforzarse*, "to strive", built on *fuerza*, "strength", from Late Latin *fortia*, from *fortis*, "strong".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el esfuerzo*
- *Say it: el esfuerzo*, once more
- *Say it:* a sentence of your own with *el esfuerzo*
- *Recall:* say the Spanish for to lose weight, then the Spanish for to put up with, then say *el esfuerzo* again

Before you move on

What does el esfuerzo mean? ("The effort".) Say it once more.

503.4 la presión — the pressure

Before the new one: say the Spanish for to put up with, then the Spanish for the effort.

You'll want to know: la presión

la presión — "the pressure".

Me toman la presión en la farmacia.

They take my blood pressure at the chemist's.

Bajo presión — under pressure.

The word, taken apart — and its English cousins

presión ← Latin *pressio*, "a pressing" (EtymDB 2.1), from *premere*, "to press" — a learned word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la presión*
- *Say it: la presión*, once more
- *Say it:* a sentence of your own with *la presión*
- *Recall:* say the Spanish for to put up with, then the Spanish for the effort, then say *la presión* again

Before you move on

What does la presión mean? ("The pressure".) Say it once more.

503.5 paciente — patient

Before the new one: say the Spanish for the effort, then the Spanish for the pressure.

You'll want to know: paciente

paciente — "patient".

Hay que ser paciente con los niños.

You have to be patient with children.

As a noun, *el paciente* or *la paciente* is a patient at a clinic.

The word, taken apart — and its English cousins

paciente ← Latin *patiens*, *patientem*, "enduring" (EtymDB 2.1), from *pati*, "to suffer" — a learned word. A patient person bears things.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: paciente*
- *Say it: paciente*, once more
- *Say it:* a sentence of your own with *paciente*
- *Recall:* say the Spanish for the effort, then the Spanish for the pressure, then say *paciente* again

Before you move on

What does paciente mean? (“Patient”.) Say it once more.

Chapter 504

Cuidar el planeta

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a notice about recycling, pollution, protecting nature, a factory and damage.
>
> *Complete the last lesson of chapter 504: I can read a notice about recycling, pollution, protecting nature, a factory and damage.*

504.1 reciclar — to recycle

> Before the new one: say the Spanish for the pressure, then the Spanish for patient.

You'll want to know: reciclar

reciclar — "to recycle".

> Reciclamos el papel y el vidrio.
>
> *We recycle paper and glass.*

The word, taken apart — and its English cousins

reciclar is *re-*, *ciclo*, "a cycle", and *-ar*: to send round again, built like English *recycle*. *Ciclo* is Latin *cyclus*, from Greek *kyklos*, "a circle, a wheel".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: reciclar*
- *Say it: reciclar*, once more
- *Say it:* a sentence of your own with *reciclar*
- *Recall:* say the Spanish for the pressure, then the Spanish for patient, then say *reciclar* again

Before you move on

What does reciclar mean? ("To recycle".) Say it once more.

504.2 la contaminación — pollution

Before the new one: say the Spanish for patient, then the Spanish for to recycle.

You'll want to know: la contaminación

la contaminación — "pollution".

La contaminación es un problema en las ciudades grandes.

Pollution is a problem in big cities.

The word, taken apart — and its English cousins

contaminación ← Latin *contaminatio*, "a defiling" (EtymDB 2.1), from *contaminare*, "to defile" — a learned word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la contaminación*
- *Say it: la contaminación*, once more
- *Say it:* a sentence of your own with *la contaminación*
- *Recall:* say the Spanish for patient, then the Spanish for to recycle, then say *la contaminación* again

Before you move on

What does la contaminación mean? ("Pollution".) Say it once more.

504.3 proteger — to protect

Before the new one: say the Spanish for to recycle, then the Spanish for pollution.

You'll want to know: proteger

proteger — "to protect".

Hay que proteger los bosques.

We must protect the forests.

The g becomes j before *o* and *a*: *protejo*.

The word, taken apart — and its English cousins

proteger ← Latin *protegere*, "to cover in front" (Lewis & Short): *pro-* and *tegere*, "to cover". A learned word: the *-t-* and *-g-* between vowels were kept. The participle of *tegere*, *tectum*, gave *techo*, "a roof".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: proteger*
- *Say it: proteger*, once more
- *Say it:* a sentence of your own with *proteger*
- *Recall:* say the Spanish for to recycle, then the Spanish for pollution, then say *proteger* again

Before you move on

What does proteger mean? ("To protect".) Say it once more.

504.4 la fábrica — the factory

Before the new one: say the Spanish for pollution, then the Spanish for to protect.

You'll want to know: la fábrica

la fábrica — "the factory".

Trabaja en una fábrica de coches.

She works in a car factory.

A false friend: fabric is *la tela*.

The word, taken apart — and its English cousins

fábrica ← Latin *fabrica*, "a workshop, a craft" (EtymDB 2.1), from *faber*, "a smith" — a learned word. Worn down in speech, the same Latin word became *fragua*, "a forge".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la fábrica*
- *Say it: la fábrica*, once more
- *Say it:* a sentence of your own with *la fábrica*
- *Recall:* say the Spanish for pollution, then the Spanish for to protect, then say *la fábrica* again

Before you move on

What does la fábrica mean? ("The factory".) Say it once more.

504.5 dañar — to damage, to harm

Before the new one: say the Spanish for to protect, then the Spanish for the factory.

You'll want to know: dañar

dañar — "to damage, to harm".

El sol puede dañar la piel.

The sun can damage your skin.

El daño is the damage.

The word, taken apart — and its English cousins

dañar ← Latin *damnare*, "to condemn, to fine" (EtymDB 2.1), from *damnum*, "loss" — inherited: the *-mn-* became *ñ*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *dañar*
- *Say it:* *dañar*, once more
- *Say it:* a sentence of your own with *dañar*
- *Recall:* say the Spanish for to protect, then the Spanish for the factory, then say *dañar* again

Before you move on

What does dañar mean? (“To damage, to harm”.) Say it once more.

Chapter 505

Estudiar

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about education: attending class, an explanation, rehearsing and success.
>
> *Complete the last lesson of chapter 505: I can talk about education: attending class, an explanation, rehearsing and success.*

505.1 la educación — education; manners

> Before the new one: say the Spanish for the factory, then the Spanish for to damage.

You'll want to know: la educación

la educación — "education; manners".

> La educación es gratuita.
>
> *Education is free.*

Tener buena educación — to have good manners.

The word, taken apart — and its English cousins

educación ← Latin *educatio*, "a bringing up" (EtymDB 2.1), from *educare*, "to rear" — a learned word. Manners are part of a good upbringing.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la educación*
- *Say it: la educación*, once more
- *Say it:* a sentence of your own with *la educación*
- *Recall:* say the Spanish for the factory, then the Spanish for to damage, then say *la educación* again

Before you move on

What does la educación mean? ("Education; manners".) Say it once more.

505.2 asistir — to attend

Before the new one: say the Spanish for to damage, then the Spanish for education.

You'll want to know: asistir

asistir — "to attend".

Asisto a clase todos los días.

I attend class every day.

A false friend: *asistir a* means to attend; to help is usually *ayudar*.

The word, taken apart — and its English cousins

asistir ← Latin *assistere*, "to stand by" (EtymDB 2.1): *ad-* and *sistere*, "to stand" — a learned word. To attend is to stand by.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: asistir*
- *Say it: asistir*, once more
- *Say it:* a sentence of your own with *asistir*
- *Recall:* say the Spanish for to damage, then the Spanish for education, then say *asistir* again

Before you move on

What does asistir mean? ("To attend".) Say it once more.

505.3 la explicación — the explanation

Before the new one: say the Spanish for education, then the Spanish for to attend.

You'll want to know: la explicación

la explicación — "the explanation".

No entiendo la explicación.

I do not understand the explanation.

The word, taken apart — and its English cousins

explicación ← Latin *explicatio*, "an unfolding" (EtymDB 2.1), from *explicare*, "to unfold": *ex-* and *plicare*, "to fold" — a learned word. Worn down in speech, *plicare* became *llegar*, "to arrive".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la explicación*
- *Say it: la explicación*, once more

- *Say it:* a sentence of your own with *la explicación*
- *Recall:* say the Spanish for education, then the Spanish for to attend, then say *la explicación* again

Before you move on

What does la explicación mean? ("The explanation".) Say it once more.

505.4 ensayar — to rehearse, to practise

Before the new one: say the Spanish for to attend, then the Spanish for the explanation.

You'll want to know: ensayar

ensayar — "to rehearse, to practise".

El grupo ensaya los viernes.

The band rehearses on Fridays.

El ensayo is the rehearsal, or an essay.

The word, taken apart — and its English cousins

ensayar is built on *ensayo*, "a trial, a rehearsal", from Late Latin *exagium*, "a weighing" (EtymDB 2.1) — inherited: the *-gi-* became *y*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: ensayar*
- *Say it: ensayar*, once more
- *Say it:* a sentence of your own with *ensayar*
- *Recall:* say the Spanish for to attend, then the Spanish for the explanation, then say *ensayar* again

Before you move on

What does ensayar mean? ("To rehearse, to practise".) Say it once more.

505.5 el éxito — success

Before the new one: say the Spanish for the explanation, then the Spanish for to rehearse.

You'll want to know: el éxito

el éxito — "success".

La obra fue un éxito.

The play was a success.

A false friend: the way out is *la salida*.

The word, taken apart — and its English cousins

éxito ← Latin *exitus*, "a going out, an outcome" (EtymDB 2.1) — a learned word. It means success, not *exit*: Spanish kept the good outcome.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el éxito*
- *Say it: el éxito*, once more
- *Say it:* a sentence of your own with *el éxito*
- *Recall:* say the Spanish for the explanation, then the Spanish for to rehearse, then say *el éxito* again

Before you move on

What does el éxito mean? (“Success”.) Say it once more.

Chapter 506

Un cumpleaños

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a birthday: giving a present, wrapping it, a toy, congratulating and hugging.
>
> *Complete the last lesson of chapter 506: I can talk about a birthday: giving a present, wrapping it, a toy, congratulating and hugging.*

506.1 regalar — to give (as a present)

> Before the new one: say the Spanish for to rehearse, then the Spanish for success.

You'll want to know: regalar

regalar — "to give (as a present)".

> Le regalo un libro a mi madre.
>
> *I am giving my mother a book.*

The verb behind *el regalo*.

The word, taken apart — and its English cousins

regalar is probably from French *régaler*, "to treat to a feast"; where the French word itself came from is disputed.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: regalar*
- *Say it: regalar*, once more
- *Say it:* a sentence of your own with *regalar*
- *Recall:* say the Spanish for to rehearse, then the Spanish for success, then say *regalar* again

Before you move on

What does regalar mean? ("To give (as a present)".) Say it once more.

506.2 envolver — to wrap

Before the new one: say the Spanish for success, then the Spanish for to give.

You'll want to know: envolver

envolver — "to wrap".

¿Me lo envuelve para regalo?

Could you gift-wrap it for me?

The o breaks into ue under stress: *envuelvo*.

The word, taken apart — and its English cousins

envolver ← Latin *involvere*, "to roll in, to wrap up" (EtymDB 2.1) — inherited: *in-* became *en-*, and the stressed *o* opens into *ue* in *envuelvo*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: envolver*
- *Say it: envolver*, once more
- *Say it:* a sentence of your own with *envolver*
- *Recall:* say the Spanish for success, then the Spanish for to give, then say *envolver* again

Before you move on

What does envolver mean? ("To wrap".) Say it once more.

506.3 el juguete — the toy

Before the new one: say the Spanish for to give, then the Spanish for to wrap.

You'll want to know: el juguete

el juguete — "the toy".

El niño tiene muchos juguetes.

The child has a lot of toys.

The word, taken apart — and its English cousins

juguete is built on *juego*, "a game", with the small-ending *-ete*. *Juego* is Latin *iocus*, "a joke, a jest" — inherited: the stressed *o* opened into *ue*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el juguete*
- *Say it: el juguete*, once more

- *Say it:* a sentence of your own with *el juguete*
- *Recall:* say the Spanish for to give, then the Spanish for to wrap, then say *el juguete* again

Before you move on

What does el juguete mean? (“The toy”.) Say it once more.

506.4 felicitar — to congratulate, to wish a happy birthday

Before the new one: say the Spanish for to wrap, then the Spanish for the toy.

You’ll want to know: felicitar

felicitar — “to congratulate, to wish a happy birthday”.

Te llamo para felicitarte.

I am calling to wish you a happy birthday.

¡Felicidades! — congratulations, happy birthday.

The word, taken apart — and its English cousins

felicitar ← Late Latin *felicitare*, “to make happy” (EtymDB 2.1), from *felix*, “happy” — the *felix* inside *feliz*. A learned word: the *-t-* between vowels stayed *t*.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it: felicitar*
- *Say it: felicitar*, once more
- *Say it:* a sentence of your own with *felicitar*

- *Recall:* say the Spanish for to wrap, then the Spanish for the toy, then say *felicitar* again

Before you move on

What does felicitar mean? ("To congratulate, to wish a happy birthday".) Say it once more.

506.5 abrazar — to hug

Before the new one: say the Spanish for the toy, then the Spanish for to congratulate.

You'll want to know: abrazar

abrazar — "to hug".

Abraza a su abuela.

He hugs his grandmother.

Un abrazo — a hug, and a common way to sign off a message.

The word, taken apart — and its English cousins

abrazar is *a-*, *brazo*, "arm", and *-ar* (EtymDB 2.1): to take into your arms. *Brazo* is Latin *bracchium*, "an arm", taken from Greek.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: abrazar*
- *Say it: abrazar*, once more
- *Say it:* a sentence of your own with *abrazar*
- *Recall:* say the Spanish for the toy, then the Spanish for to congratulate, then say *abrazar* again

Before you move on

What does abrazar mean? ("To hug".) Say it once more.

Chapter 507

La sociedad

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read about an election, taxes, the population, the inhabitants and a debate.
>
> *Complete the last lesson of chapter 507: I can read about an election, taxes, the population, the inhabitants and a debate.*

507.1 votar — to vote

> Before the new one: say the Spanish for to congratulate, then the Spanish for to hug.

You'll want to know: votar

votar — "to vote".

> Mañana votamos en el colegio del barrio.
>
> *Tomorrow we vote at the local school.*

The word, taken apart — and its English cousins

votar is built on *voto*, "a vote, a vow", from Latin *votum*, "a vow" — a learned word. Worn down in speech, its plural *vota* became *boda*, "a wedding".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: votar*
- *Say it: votar*, once more
- *Say it:* a sentence of your own with *votar*
- *Recall:* say the Spanish for to congratulate, then the Spanish for to hug, then say *votar* again

Before you move on

What does votar mean? ("To vote".) Say it once more.

507.2 el impuesto — the tax

Before the new one: say the Spanish for to hug, then the Spanish for to vote.

You'll want to know: el impuesto

el impuesto — "the tax".

El precio incluye los impuestos.

The price includes taxes.

The word, taken apart — and its English cousins

impuesto is the participle of *imponer*, "to impose", Latin *imponere*, "to place upon": a tax is what is laid on you. *Puesto*, "put", is the inherited participle of *poner*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el impuesto*
- *Say it: el impuesto*, once more
- *Say it:* a sentence of your own with *el impuesto*
- *Recall:* say the Spanish for to hug, then the Spanish for to vote, then say *el impuesto* again

Before you move on

What does el impuesto mean? ("The tax".) Say it once more.

507.3 la población — the population

Before the new one: say the Spanish for to vote, then the Spanish for the tax.

You'll want to know: la población

la población — "the population".

La población del pueblo es pequeña.

The village's population is small.

población ← Late Latin *populatio* (EtymDB 2.1), from *populus*, "a people" — the word that also became *pueblo*, "a town, a people".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la población*
- *Say it: la población*, once more

- *Say it:* a sentence of your own with *la población*
- *Recall:* say the Spanish for to vote, then the Spanish for the tax, then say *la población* again

Before you move on

What does la población mean? ("The population".) Say it once more.

507.4 el habitante — the inhabitant

Before the new one: say the Spanish for the tax, then the Spanish for the population.

You'll want to know: el habitante

el habitante — "the inhabitant".

La ciudad tiene un millón de habitantes.

The city has a million inhabitants.

The word, taken apart — and its English cousins

habitante ← Latin *habitans*, *habitantis*, "dwelling", the participle of *habitare*, "to dwell" — the *habitare* inside *habitación*. A learned word: the *-t-* between vowels stayed *t*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el habitante*
- *Say it: el habitante*, once more
- *Say it:* a sentence of your own with *el habitante*
- *Recall:* say the Spanish for the tax, then the Spanish for the population, then say *el habitante* again

Before you move on

What does el habitante mean? (“The inhabitant”.) Say it once more.

507.5 el debate — the debate

Before the new one: say the Spanish for the population, then the Spanish for the inhabitant.

You’ll want to know: el debate

el debate — “the debate”.

Vemos el debate en la tele.

We watch the debate on TV.

The word, taken apart — and its English cousins

debate is the noun of *debatir*, “to argue”, built from *de-* and *batir*, “to beat”, Latin *battuere*. French *débattre* is built the same way.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it: el debate*
- *Say it: el debate*, once more
- *Say it:* a sentence of your own with *el debate*
- *Recall:* say the Spanish for the population, then the Spanish for the inhabitant, then say *el debate* again

Before you move on

What does el debate mean? (“The debate”.) Say it once more.

Chapter 508

Cómo es

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe things and people as incredible, independent, well known, current or acceptable.
>
> *Complete the last lesson of chapter 508: I can describe things and people as incredible, independent, well known, current or acceptable.*

508.1 increíble — incredible, unbelievable

> Before the new one: say the Spanish for the inhabitant, then the Spanish for the debate.

You'll want to know: increíble

increíble — "incredible, unbelievable".

> ¡Es increíble!
>
> *It is incredible!*

The word, taken apart — and its English cousins

increíble ← Latin *incredibilis*, "not to be believed" (EtymDB 2.1): *in-*, "not", and *credibilis*, from *credere*, "to believe" — the verb worn down in *creer*, "to believe".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: increíble*
- *Say it: increíble*, once more
- *Say it:* a sentence of your own with *increíble*
- *Recall:* say the Spanish for the inhabitant, then the Spanish for the debate, then say *increíble* again

Before you move on

What does increíble mean? ("Incredible, unbelievable".) Say it once more.

508.2 independiente — independent

Before the new one: say the Spanish for the debate, then the Spanish for incredible.

You'll want to know: independiente

independiente — "independent".

Mi hija es muy independiente.

My daughter is very independent.

The word, taken apart — and its English cousins

independiente is *in-*, "not", and *dependiente*, "depending", from *depender*, the verb of *depende*, built on Latin *pendere*, "to hang".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: independiente*
- *Say it: independiente*, once more
- *Say it:* a sentence of your own with *independiente*
- *Recall:* say the Spanish for the debate, then the Spanish for incredible, then say *independiente* again

Before you move on

What does independiente mean? (“Independent”.) Say it once more.

508.3 conocido — well known; an acquaintance

Before the new one: say the Spanish for incredible, then the Spanish for independent.

You’ll want to know: conocido

conocido — “well known; an acquaintance”.

Es un cantante muy conocido.

He is a very well-known singer.

As a noun, *un conocido* is someone you know, not quite a friend.

The word, taken apart — and its English cousins

conocido is the participle of *conocer*, “to know”, from Latin *cognoscere*, “to get to know” — inherited: the *g* before *n* fell away.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *conocido*
- *Say it:* *conocido*, once more
- *Say it:* a sentence of your own with *conocido*
- *Recall:* say the Spanish for incredible, then the Spanish for independent, then say *conocido* again

Before you move on

What does conocido mean? ("Well known; an acquaintance".) Say it once more.

508.4 actual — current, present-day

Before the new one: say the Spanish for independent, then the Spanish for well known.

You'll want to know: actual

actual — "current, present-day".

El precio actual es de diez euros.

The current price is ten euros.

A false friend: actual in English is *real*.

The word, taken apart — and its English cousins

actual ← Late Latin *actualis*, "active, practical" (EtymDB 2.1), from *actus*, "a doing" — a learned word. It means current, not English *actual*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: actual*
- *Say it: actual*, once more
- *Say it:* a sentence of your own with *actual*
- *Recall:* say the Spanish for independent, then the Spanish for well known, then say *actual* again

Before you move on

What does actual mean? (“Current, present-day”.) Say it once more.

508.5 aceptable — acceptable

Before the new one: say the Spanish for well known, then the Spanish for current.

You’ll want to know: aceptable

aceptable — “acceptable”.

El resultado es aceptable.

The result is acceptable.

The word, taken apart — and its English cousins

aceptable ← Latin *acceptabilis*, “acceptable” (EtymDB 2.1), from *acceptare*, “to receive”, built on *capere*, “to take”. A learned word: the *-pt-* was kept, where *septem* became *siete*.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *aceptable*
- *Say it:* *aceptable*, once more
- *Say it:* a sentence of your own with *aceptable*
- *Recall:* say the Spanish for well known, then the Spanish for current, then say *aceptable* again

Before you move on

What does aceptable mean? (“Acceptable”.) Say it once more.

Chapter 509

Planes y deseos

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about plans, wishes, goals, hope and an agreement.
>
> *Complete the last lesson of chapter 509: I can talk about plans, wishes, goals, hope and an agreement.*

509.1 planear — to plan

> Before the new one: say the Spanish for current, then the Spanish for acceptable.

You'll want to know: planear

planear — "to plan".

> Planeamos un viaje a México.
>
> *We are planning a trip to Mexico.*

The word, taken apart — and its English cousins

planear is *plan*, "a plan", with *-ear*. *Plan* came from French *plan*, a drawing on a flat surface, from Latin *planus*, "flat".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: planear*
- *Say it: planear*, once more
- *Say it:* a sentence of your own with *planear*
- *Recall:* say the Spanish for current, then the Spanish for acceptable, then say *planear* again

Before you move on

What does planear mean? ("To plan".) Say it once more.

509.2 desear — to wish, to want

Before the new one: say the Spanish for acceptable, then the Spanish for to plan.

You'll want to know: desear

desear — "to wish, to want".

Te deseo un feliz año.

I wish you a happy new year.

In a shop, *¿qué desea?* — what would you like?

The word, taken apart — and its English cousins

desear is built on *deseo*, "a wish", usually traced to spoken Latin **desidium*, built on *desidia*, "idleness" (Lewis & Short).

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: desear*
- *Say it: desear*, once more
- *Say it:* a sentence of your own with *desear*
- *Recall:* say the Spanish for acceptable, then the Spanish for to plan, then say *desear* again

Before you move on

What does desear mean? ("To wish, to want".) Say it once more.

509.3 la meta — the goal, the finish line

Before the new one: say the Spanish for to plan, then the Spanish for to wish.

You'll want to know: la meta

la meta — "the goal, the finish line".

Mi meta es hablar bien español.

My goal is to speak Spanish well.

The word, taken apart — and its English cousins

meta ← Latin *meta*, "the turning post of a racecourse" (EtymDB 2.1): the post the chariots raced round became a finish line, then any goal. A learned word: the *-t-* between vowels stayed *t*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la meta*
- *Say it: la meta*, once more

- *Say it:* a sentence of your own with *la meta*
- *Recall:* say the Spanish for to plan, then the Spanish for to wish, then say *la meta* again

Before you move on

What does la meta mean? ("The goal, the finish line".) Say it once more.

509.4 la esperanza — hope

Before the new one: say the Spanish for to wish, then the Spanish for the goal.

You'll want to know: la esperanza

la esperanza — "hope".

Todavía hay esperanza.

There is still hope.

The word, taken apart — and its English cousins

esperanza is *esperar*, "to hope, to wait", with *-anza*. *Esperar* is Latin *sperare*, "to hope".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: la esperanza*
- *Say it: la esperanza*, once more
- *Say it:* a sentence of your own with *la esperanza*
- *Recall:* say the Spanish for to wish, then the Spanish for the goal, then say *la esperanza* again

Before you move on

What does la esperanza mean? (“Hope”.) Say it once more.

509.5 el acuerdo — the agreement

Before the new one: say the Spanish for the goal, then the Spanish for hope.

You’ll want to know: el acuerdo

el acuerdo — “the agreement”.

Llegamos a un acuerdo.

We reached an agreement.

Estar de acuerdo — to agree.

The word, taken apart — and its English cousins

acuerdo is the noun of *acordar*, “to agree”, from spoken Latin **accordare*, built on *cor*, *cordis*, “heart”: hearts brought together. The stressed *o* opens into *ue*.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it:* *el acuerdo*
- *Say it:* *el acuerdo*, once more
- *Say it:* a sentence of your own with *el acuerdo*
- *Recall:* say the Spanish for the goal, then the Spanish for hope, then say *el acuerdo* again

Before you move on

What does el acuerdo mean? (“The agreement”.) Say it once more.

Chapter 510

Entre personas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about apologising, trusting, fighting, hating and surprising someone.
>
> *Complete the last lesson of chapter 510: I can talk about apologising, trusting, fighting, hating and surprising someone.*

510.1 disculparse — to apologise

> Before the new one: say the Spanish for hope, then the Spanish for the agreement.

You'll want to know: disculparse

disculparse — "to apologise".

> Se disculpó por llegar tarde.
>
> *He apologised for arriving late.*

It goes with *por*: *disculparse por algo*.

The word, taken apart — and its English cousins

disculparse is *dis-*, which takes away, *culpa*, "blame", and *-ar*: to clear yourself of blame. *Culpa* is Latin *culpa*, "a fault".

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: disculparse*
- *Say it: disculparse*, once more
- *Say it:* a sentence of your own with *disculparse*
- *Recall:* say the Spanish for hope, then the Spanish for the agreement, then say *disculparse* again

Before you move on

What does disculparse mean? ("To apologise".) Say it once more.

510.2 fiarse — to trust

Before the new one: say the Spanish for the agreement, then the Spanish for to apologise.

You'll want to know: fiarse

fiarse — "to trust".

No me fío de él.

I do not trust him.

It goes with *de*: *fiarse de alguien*. Note the accent in *me fío*. In much of Latin America, *confiar en* is more common.

The word, taken apart — and its English cousins

fiarse comes from spoken Latin **fidare* (EtymDB 2.1), built on *fidere*, "to trust" — inherited: the *-d-* fell away.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: fiarse*
- *Say it: fiarse*, once more
- *Say it:* a sentence of your own with *fiarse*
- *Recall:* say the Spanish for the agreement, then the Spanish for to apologise, then say *fiarse* again

Before you move on

What does fiarse mean? ("To trust".) Say it once more.

510.3 pelear — to fight, to argue

Before the new one: say the Spanish for to apologise, then the Spanish for to trust.

You'll want to know: pelear

pelear — "to fight, to argue".

Los hermanos pelean por todo.

The brothers fight about everything.

Pelearse con alguien — to fall out with someone.

The word, taken apart — and its English cousins

pelear is built on *pelo*, "hair" (EtymDB 2.1): a fight was first a pulling of hair. *Pelo* is Latin *pilus*, "a hair" — inherited: the short *i* became *e*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: pelear*
- *Say it: pelear*, once more
- *Say it:* a sentence of your own with *pelear*
- *Recall:* say the Spanish for to apologise, then the Spanish for to trust, then say *pelear* again

Before you move on

What does pelear mean? ("To fight, to argue".) Say it once more.

510.4 odiar — to hate

Before the new one: say the Spanish for to trust, then the Spanish for to fight.

You'll want to know: odiar

odiar — "to hate".

Odio madrugar.

I hate getting up early.

The word, taken apart — and its English cousins

odiar is built on *odio*, "hatred", from Latin *odium*, "hatred" — a learned word.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: odiar*
- *Say it: odiar*, once more
- *Say it:* a sentence of your own with *odiar*

- *Recall:* say the Spanish for to trust, then the Spanish for to fight, then say *odiar* again

Before you move on

What does odiar mean? ("To hate".) Say it once more.

510.5 sorprender — to surprise

Before the new one: say the Spanish for to fight, then the Spanish for to hate.

You'll want to know: sorprender

sorprender — "to surprise".

Me sorprende tu pregunta.

Your question surprises me.

It works like *gustar*: *me sorprende*.

The word, taken apart — and its English cousins

sorprender ← French *surprendre*, "to take unawares" (EtymDB 2.1): *sur*, "over", and *prendre*, "to take", from Latin *prehendere*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: sorprender*
- *Say it: sorprender*, once more
- *Say it:* a sentence of your own with *sorprender*
- *Recall:* say the Spanish for to fight, then the Spanish for to hate, then say *sorprender* again

Before you move on

What does sorprender mean? ("To surprise".) Say it once more.

Chapter 511

Hacer y parecer

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can say that something seems a certain way, is kept up, is about a topic, is carried out or usually happens.
>
> *Complete the last lesson of chapter 511: I can say that something seems a certain way, is kept up, is about a topic, is carried out or usually happens.*

511.1 parecer — to seem

> Before the new one: say the Spanish for to hate, then the Spanish for to surprise.

You'll want to know: parecer

parecer — "to seem".

> Parece fácil, pero no lo es.
>
> *It seems easy, but it is not.*

¿Qué te parece? — what do you think? It takes a *z* in *parezco*.

The word, taken apart — and its English cousins

parecer comes from spoken Latin **parescere*, built on *parere*, "to appear" (Lewis & Short), with the ending *-ecer*. You met its participle

as *parecido*, “alike”.

What you’ve built

One more word for reading notices, forms and messages.

Your turn

- *Say it: parecer*
- *Say it: parecer*, once more
- *Say it:* a sentence of your own with *parecer*
- *Recall:* say the Spanish for to hate, then the Spanish for to surprise, then say *parecer* again

Before you move on

What does parecer mean? (“To seem”.) Say it once more.

511.2 mantener — to keep, to maintain

Before the new one: say the Spanish for to surprise, then the Spanish for to seem.

You’ll want to know: mantener

mantener — “to keep, to maintain”.

Mantenga la distancia.

Keep your distance.

Conjugated like *tener*: *mantengo*, *mantiene*.

The word, taken apart — and its English cousins

mantener ← Late Latin *manutenere*, “to hold in the hand” (EtymDB 2.1): *manu*, “with the hand”, and *tenere*, “to hold” — the *tenere* of *tener*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: mantener*
- *Say it: mantener*, once more
- *Say it:* a sentence of your own with *mantener*
- *Recall:* say the Spanish for to surprise, then the Spanish for to seem, then say *mantener* again

Before you move on

What does mantener mean? ("To keep, to maintain".) Say it once more.

511.3 tratar — to treat; to be about

Before the new one: say the Spanish for to seem, then the Spanish for to keep.

You'll want to know: tratar

tratar — "to treat; to be about".

La película trata de una familia.

The film is about a family.

Tratar de + infinitive — to try to.

The word, taken apart — and its English cousins

tratar ← Latin *tractare*, "to drag about, to handle" (Lewis & Short), built on *trahere*, "to draw, to drag" — semi-learned: its *-ct-* became plain *t*, not the *ch* of words worn down in speech.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: tratar*
- *Say it: tratar*, once more
- *Say it:* a sentence of your own with *tratar*
- *Recall:* say the Spanish for to seem, then the Spanish for to keep, then say *tratar* again

Before you move on

What does tratar mean? ("To treat; to be about".) Say it once more.

511.4 realizar — to carry out, to do

Before the new one: say the Spanish for to keep, then the Spanish for to treat.

You'll want to know: realizar

realizar — "to carry out, to do".

Realizamos obras en la calle.

We are carrying out works on the street.

A false friend: to realise is *darse cuenta*.

The word, taken apart — and its English cousins

realizar is *real*, "real", with *-izar*, like French *réaliser*. This *real* is Late Latin *realis*, from *res*, "a thing" — not the *real*, "royal", that comes from *regalis*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: realizar*
- *Say it: realizar*, once more
- *Say it:* a sentence of your own with *realizar*
- *Recall:* say the Spanish for to keep, then the Spanish for to treat, then say *realizar* again

Before you move on

What does realizar mean? ("To carry out, to do".) Say it once more.

511.5 soler — to usually do

Before the new one: say the Spanish for to treat, then the Spanish for to carry out.

You'll want to know: soler

soler — "to usually do".

Suelo cenar a las nueve.

I usually have dinner at nine.

Always followed by an infinitive. The o breaks into ue: *suelo*.

The word, taken apart — and its English cousins

soler ← Latin *solere*, "to be in the habit of" (EtymDB 2.1) — inherited: the stressed *o* opens into *ue* in *suele*.

What you've built

One more word for reading notices, forms and messages.

Your turn

- *Say it: soler*
- *Say it: soler*, once more
- *Say it:* a sentence of your own with *soler*
- *Recall:* say the Spanish for to treat, then the Spanish for to carry out, then say *soler* again

Before you move on

What does soler mean? ("To usually do".) Say it once more.

511.6 Palabras de los capítulos 503-507 — a first pass

Say the Spanish for to carry out and to usually do.

Your turn

Say these aloud:

- to lose weight, to put up with, the effort, the pressure, patient
- to recycle, pollution, to protect, the factory, to damage
- education, to attend, the explanation, to rehearse, success
- to give, to wrap, the toy, to congratulate, to hug

Before you move on

To lose weight? (**adelgazar**.) To put up with? (**aguantar**.) The effort? (**el esfuerzo**.) The pressure? (**la presión**.) Patient? (**paciente**.) To recycle? (**reciclar**.) Pollution? (**la contaminación**.) To protect? (**proteger**.) The factory? (**la fábrica**.) To damage? (**dañar**.) Education? (**la educación**.) To attend? (**asistir**.) The explanation? (**la explicación**.) To rehearse? (**ensayar**.) Success? (**el éxito**.) To give? (**regalar**.) To wrap? (**envolver**.) The toy? (**el juguete**.) To congratulate?

(**felicitar**.) To hug? (**abrazar**.)

511.7 Palabras de los capítulos 508-511 — a second pass

Say the Spanish for to vote and the tax.

Your turn

Say these aloud:

- to vote, the tax, the population, the inhabitant, the debate
- incredible, independent, well known, current, acceptable
- to plan, to wish, the goal, hope, the agreement
- to apologise, to trust, to fight, to hate, to surprise
- to seem, to keep, to treat, to carry out, to usually do

Before you move on

To vote? (**votar**.) The tax? (**el impuesto**.) The population? (**la población**.) The inhabitant? (**el habitante**.) The debate? (**el debate**.) Incredible? (**increíble**.) Independent? (**independiente**.) Well known? (**conocido**.) Current? (**actual**.) Acceptable? (**aceptable**.) To plan? (**planear**.) To wish? (**desear**.) The goal? (**la meta**.) Hope? (**la esperanza**.) (**mantener**.) To treat? (**tratar**.) To carry out? (**realizar**.) To usually do? (**soler**.)

Chapter 512

Lo que pasó

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what happened: that something occurred, came about or took place, and call it an incident or an event.
>
> *Complete the last lesson of chapter 512: I can say what happened: that something occurred, came about or took place, and call it an incident or an event.*

512.1 producirse — to occur, to take place (of an event)

> Before the new one: say the Spanish for to seem, then the Spanish for to keep.

You'll want to know: producirse

producirse — "to occur, to take place (of an event)".

> El accidente se produjo a las seis de la tarde.
>
> *The accident occurred at six in the evening.*

Common in the news. It changes like *conducir*: *se produjo*, *se produjeron*.

The word, taken apart — and its English cousins

producirse is built on *producir* 'to produce', a learned borrowing from Latin *prōdūcere* 'to lead forth, to bring out' (EtymDB), from *prō* 'forward' and *dūcere* 'to lead'. An event that occurs is one brought out into the open.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: producirse*
- *Say it: producirse*, once more
- *Say it:* a sentence of your own with *producirse*
- *Recall:* say the Spanish for to seem, then the Spanish for to keep, then say *producirse* again

Before you move on

What does producirse mean? ("To occur, to take place (of an event).") Say it once more.

512.2 el suceso — the happening, the incident

Before the new one: say the Spanish for to keep, then the Spanish for to occur.

You'll want to know: el suceso

el suceso — "the happening, the incident".

El suceso ocurrió el lunes.

The incident took place on Monday.

In a newspaper, *la sección de sucesos* is the page of accidents and crimes. It is a false friend: success is *el éxito*.

The word, taken apart — and its English cousins

suceso comes from Latin *successus* 'an advance, an outcome' (EtymDB), built on *succēdere* 'to come up after', from *sub* and *cēdere* 'to go' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el suceso*
- *Say it: el suceso*, once more
- *Say it:* a sentence of your own with *el suceso*
- *Recall:* say the Spanish for to keep, then the Spanish for to occur, then say *el suceso* again

Before you move on

What does el suceso mean? ("The happening, the incident".) Say it once more.

512.3 el acontecimiento — the event, the happening

Before the new one: say the Spanish for to occur, then the Spanish for the happening.

You'll want to know: el acontecimiento

el acontecimiento — "the event, the happening".

La boda de la princesa fue un gran acontecimiento.

The princess's wedding was a big event.

Used for important or public events.

The word, taken apart — and its English cousins

acontecimiento is built on *acontecer* 'to come about' with the ending *-miento* (EtymDB). *Acontecer* goes back to Latin *contingere* 'to touch, to befall' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el acontecimiento*
- *Say it: el acontecimiento*, once more
- *Say it:* a sentence of your own with *el acontecimiento*
- *Recall:* say the Spanish for to occur, then the Spanish for the happening, then say *el acontecimiento* again

Before you move on

What does el acontecimiento mean? ("The event, the happening".) Say it once more.

512.4 acontecer — to come about; to happen

Before the new one: say the Spanish for the happening, then the Spanish for the event.

You'll want to know: acontecer

acontecer — "to come about; to happen".

Nadie sabe qué va a acontecer.

Nobody knows what is going to come about.

A formal word, mostly in the third person: *aconteció*. It takes a *z* in *acontezca*.

The word, taken apart — and its English cousins

acontecer is built on old Spanish *contecer* with the prefix *a-* (EtymDB). *Contecer* comes from spoken Latin **contingescere* (EtymDB), from *contingere* 'to touch, to befall' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: acontecer*
- *Say it: acontecer*, once more
- *Say it:* a sentence of your own with *acontecer*
- *Recall:* say the Spanish for the happening, then the Spanish for the event, then say *acontecer* again

Before you move on

What does acontecer mean? ("To come about; to happen".) Say it once more.

512.5 tener lugar — to take place

Before the new one: say the Spanish for the event, then the Spanish for to come about.

You'll want to know: tener lugar

tener lugar — "to take place".

La reunión tuvo lugar en el ayuntamiento.

The meeting took place at the town hall.

Used for planned events: *La boda tendrá lugar en mayo.*

The word, taken apart — and its English cousins

tener lugar is built on *tener*, inherited from Latin *tenēre* 'to hold' (EtymDB), and *lugar*, which is usually traced to Latin *locālis* 'of a place', from *locus* 'a place' (Lewis & Short). To take place is, word for word, to hold a place.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: tener lugar*
- *Say it: tener lugar*, once more
- *Say it:* a sentence of your own with *tener lugar*
- *Recall:* say the Spanish for the event, then the Spanish for to come about, then say *tener lugar* again

Before you move on

What does tener lugar mean? ("To take place".) Say it once more.

Chapter 513

En el periódico

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a headline and talk about the press, the newsroom, a correspondent and what was published.
>
> *Complete the last lesson of chapter 513: I can read a headline and talk about the press, the newsroom, a correspondent and what was published.*

513.1 la redacción — the newsroom; the writing, the essay

> Before the new one: say the Spanish for to come about, then the Spanish for to take place.

You'll want to know: la redacción

la redacción — "the newsroom; the writing, the essay".

> La redacción del periódico está en el centro.
>
> *The paper's newsroom is in the centre.*

At school *una redacción* is a written essay.

The word, taken apart — and its English cousins

redacción is built on *redactar* 'to write up, to draw up', which is usually traced to Latin *redāctus*, the participle of *redigere* 'to bring back, to reduce to order' (Lewis & Short), built on *agere* 'to drive'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la redacción*
- *Say it: la redacción*, once more
- *Say it:* a sentence of your own with *la redacción*
- *Recall:* say the Spanish for to come about, then the Spanish for to take place, then say *la redacción* again

Before you move on

What does la redacción mean? ("The newsroom; the writing, the essay".) Say it once more.

513.2 el titular — the headline

Before the new one: say the Spanish for to take place, then the Spanish for the newsroom.

You'll want to know: el titular

el titular — "the headline".

El titular habla del accidente.

The headline is about the accident.

Los titulares are the headlines. As an adjective, *titular* means holding a post: *el profesor titular*.

The word, taken apart — and its English cousins

titular comes from Late Latin *titulāre* 'to give a title to' (EtymDB), built on *titulus* 'an inscription, a label' (Lewis & Short), the word behind *título*. A headline is the title printed over a story.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el titular*
- *Say it: el titular*, once more
- *Say it:* a sentence of your own with *el titular*
- *Recall:* say the Spanish for to take place, then the Spanish for the newsroom, then say *el titular* again

Before you move on

What does el titular mean? ("The headline".) Say it once more.

513.3 la prensa — the press

Before the new one: say the Spanish for the newsroom, then the Spanish for the headline.

You'll want to know: la prensa

la prensa — "the press".

La prensa habló mucho del caso.

The press talked a lot about the case.

La prensa is the newspapers and the journalists together. *Una rueda de prensa* is a press conference.

The word, taken apart — and its English cousins

prensa comes from Catalan *premsa* 'a press' (EtymDB), a word usually traced to Latin *premere* 'to press'. The printing press gave its name to the papers it printed.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la prensa*
- *Say it: la prensa*, once more
- *Say it:* a sentence of your own with *la prensa*
- *Recall:* say the Spanish for the newsroom, then the Spanish for the headline, then say *la prensa* again

Before you move on

What does la prensa mean? ("The press".) Say it once more.

513.4 el corresponsal — the correspondent

Before the new one: say the Spanish for the headline, then the Spanish for the press.

You'll want to know: el corresponsal

el corresponsal — "the correspondent".

El corresponsal vive en Roma desde hace años.

The correspondent has lived in Rome for years.

A reporter who sends news from another city or country. The same form for a woman: *la corresponsal*.

The word, taken apart — and its English cousins

corresponsal is usually traced to *corresponder* 'to correspond, to match', from *co-* and *responder*, which comes from Latin *respondēre* 'to answer', built on *spondēre* 'to promise' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el corresponsal*
- *Say it: el corresponsal*, once more
- *Say it:* a sentence of your own with *el corresponsal*
- *Recall:* say the Spanish for the headline, then the Spanish for the press, then say *el corresponsal* again

Before you move on

What does el corresponsal mean? ("The correspondent".) Say it once more.

513.5 publicar — to publish

Before the new one: say the Spanish for the press, then the Spanish for the correspondent.

You'll want to know: publicar

publicar — "to publish".

El periódico publicó la noticia el domingo.

The newspaper published the news on Sunday.

It takes *qu* before *e*: *publiqué*. *Publicar en internet* is to post online.

The word, taken apart — and its English cousins

publicar is a learned borrowing from Latin *pūblicāre* 'to make public' (EtymDB), built on *pūblicus* 'of the people'. English *publish* comes from the same verb through French.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: publicar*
- *Say it: publicar*, once more
- *Say it:* a sentence of your own with *publicar*
- *Recall:* say the Spanish for the press, then the Spanish for the correspondent, then say *publicar* again

Before you move on

What does publicar mean? ("To publish".) Say it once more.

Chapter 514

El reportaje

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that a reporter interviewed someone, spread the news and announced something.
>
> *Complete the last lesson of chapter 514: I can say that a reporter interviewed someone, spread the news and announced something.*

514.1 el reportaje — the report, the feature story

> Before the new one: say the Spanish for the correspondent, then the Spanish for to publish.

You'll want to know: el reportaje

el reportaje — "the report, the feature story".

> Vimos un reportaje sobre la ciudad.
>
> *We watched a report about the city.*

A longer piece in a paper or on television. A short official report is *un informe*.

The word, taken apart — and its English cousins

reportaje was borrowed from French *reportage*, which is usually traced to *reporter*, from Latin *reportāre* 'to carry back' (Lewis & Short). A report carries the story back to you.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el reportaje*
- *Say it: el reportaje*, once more
- *Say it:* a sentence of your own with *el reportaje*
- *Recall:* say the Spanish for the correspondent, then the Spanish for to publish, then say *el reportaje* again

Before you move on

What does el reportaje mean? ("The report, the feature story".) Say it once more.

514.2 el reportero — the reporter

Before the new one: say the Spanish for to publish, then the Spanish for the report.

You'll want to know: el reportero

el reportero — "the reporter".

El reportero llegó antes que la policía.

The reporter arrived before the police.

A woman is *la reportera*.

The word, taken apart — and its English cousins

reportero is usually traced to English *reporter*, given the Spanish ending *-ero*. The English word comes through French from Latin *reportāre* 'to carry back' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el reportero*
- *Say it: el reportero*, once more
- *Say it:* a sentence of your own with *el reportero*
- *Recall:* say the Spanish for to publish, then the Spanish for the report, then say *el reportero* again

Before you move on

What does el reportero mean? ("The reporter".) Say it once more.

514.3 entrevistar — to interview

Before the new one: say the Spanish for the report, then the Spanish for the reporter.

You'll want to know: entrevistar

entrevistar — "to interview".

Entrevistaron al alcalde en la radio.

They interviewed the mayor on the radio.

La entrevista is the interview. It takes personal *a* with people: *entrevistar a alguien.*

The word, taken apart — and its English cousins

entrevistar is built on *entrevista*, made from *entre* 'between' and *vista* 'a sight', and usually said to follow French *entrevue*. *Vista* comes from Latin *vidēre* 'to see' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: entrevistar*
- *Say it: entrevistar*, once more
- *Say it:* a sentence of your own with *entrevistar*
- *Recall:* say the Spanish for the report, then the Spanish for the reporter, then say *entrevistar* again

Before you move on

What does entrevistar mean? ("To interview".) Say it once more.

514.4 difundir — to spread, to broadcast

Before the new one: say the Spanish for the reporter, then the Spanish for to interview.

You'll want to know: difundir

difundir — "to spread, to broadcast".

La radio difundió la noticia en pocos minutos.

The radio spread the news in a few minutes.

Used for news, ideas and images: *difundir una foto.*

The word, taken apart — and its English cousins

difundir is a learned borrowing from Latin *diffundere* 'to pour out, to spread' (EtymDB), built on *dis-* 'apart' and *fundere* 'to pour'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: difundir*
- *Say it: difundir*, once more
- *Say it:* a sentence of your own with *difundir*
- *Recall:* say the Spanish for the reporter, then the Spanish for to interview, then say *difundir* again

Before you move on

What does difundir mean? ("To spread, to broadcast".) Say it once more.

514.5 anunciar — to announce

Before the new one: say the Spanish for to interview, then the Spanish for to spread.

You'll want to know: anunciar

anunciar — "to announce".

El presidente anunció su viaje a Chile.

The president announced his trip to Chile.

El anuncio is the announcement, and also an advert.

The word, taken apart — and its English cousins

anunciar is a learned borrowing from Latin *annūntiāre* 'to make known' (EtymDB), built on *nūntius* 'a messenger'. English *announce* is the same Latin verb through French.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *anunciar*
- *Say it:* *anunciar*, once more
- *Say it:* a sentence of your own with *anunciar*
- *Recall:* say the Spanish for to interview, then the Spanish for to spread, then say *anunciar* again

Before you move on

What does anunciar mean? ("To announce".) Say it once more.

Chapter 515

Según dicen

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that there was a rumour, a statement or an official note, and that someone declared or confirmed it.
>
> *Complete the last lesson of chapter 515: I can say that there was a rumour, a statement or an official note, and that someone declared or confirmed it.*

515.1 el rumor — the rumour

> Before the new one: say the Spanish for to spread, then the Spanish for to announce.

You'll want to know: el rumor

el rumor — "the rumour".

> Corre el rumor de que van a cerrar la fábrica.
>
> *There is a rumour going round that they are going to close the factory.*

Corre el rumor — word goes round. It also means a soft noise: *el rumor del mar*.

The word, taken apart — and its English cousins

rumor is a learned borrowing from Latin *rūmor* 'common talk, a noise' (EtymDB). The Spanish word kept both senses, the gossip and the murmur.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el rumor*
- *Say it:* *el rumor*, once more
- *Say it:* a sentence of your own with *el rumor*
- *Recall:* say the Spanish for to spread, then the Spanish for to announce, then say *el rumor* again

Before you move on

What does el rumor mean? ("The rumour".) Say it once more.

515.2 el comunicado — the official statement, the press release

Before the new one: say the Spanish for to announce, then the Spanish for the rumour.

You'll want to know: el comunicado

el comunicado — "the official statement, the press release".

La empresa envió un comunicado a la prensa.

The company sent a statement to the press.

Según el comunicado — according to the statement.

The word, taken apart — and its English cousins

comunicado is built on the participle of *comunicar* 'to communicate', which comes from Latin *commūnicāre* 'to share' (Lewis & Short), from *commūnis* 'common'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el comunicado*
- *Say it: el comunicado*, once more
- *Say it:* a sentence of your own with *el comunicado*
- *Recall:* say the Spanish for to announce, then the Spanish for the rumour, then say *el comunicado* again

Before you move on

What does el comunicado mean? ("The official statement, the press release".) Say it once more.

515.3 la declaración — the statement; the declaration

Before the new one: say the Spanish for the rumour, then the Spanish for the official statement.

You'll want to know: la declaración

la declaración — "the statement; the declaration".

La vecina hizo una declaración a la policía.

The neighbour made a statement to the police.

Prestar declaración is to give evidence.

The word, taken apart — and its English cousins

declaración is a learned borrowing from Latin *dēclārātiō* 'a making clear' (EtymDB), built on *dēclārāre*, from *clārus* 'clear, bright'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la declaración*
- *Say it: la declaración*, once more
- *Say it:* a sentence of your own with *la declaración*
- *Recall:* say the Spanish for the rumour, then the Spanish for the official statement, then say *la declaración* again

Before you move on

What does la declaración mean? ("The statement; the declaration".) Say it once more.

515.4 declarar — to declare, to state

Before the new one: say the Spanish for the official statement, then the Spanish for the statement.

You'll want to know: declarar

declarar — "to declare, to state".

El presidente declaró que no sabía nada.

The president stated that he knew nothing.

In court it means to testify, and at customs to declare goods: *¿Algo que declarar?*

The word, taken apart — and its English cousins

declarar comes from Latin *dēclārāre* 'to make clear, to show' (EtymDB), a learned word built on *clārus* 'clear'. English *declare* is the same Latin verb.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: declarar*
- *Say it: declarar*, once more
- *Say it:* a sentence of your own with *declarar*
- *Recall:* say the Spanish for the official statement, then the Spanish for the statement, then say *declarar* again

Before you move on

What does declarar mean? ("To declare, to state".) Say it once more.

515.5 confirmar — to confirm

Before the new one: say the Spanish for the statement, then the Spanish for to declare.

You'll want to know: confirmar

confirmar — "to confirm".

La policía confirmó la noticia.

The police confirmed the news.

Confirmar una reserva — to confirm a booking.

The word, taken apart — and its English cousins

confirmar is a learned borrowing from Latin *cōnfirmāre* 'to make firm, to strengthen' (EtymDB), built on *con-* and *firmāre*, from *firmus* 'firm'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *confirmar*
- *Say it:* *confirmar*, once more
- *Say it:* a sentence of your own with *confirmar*
- *Recall:* say the Spanish for the statement, then the Spanish for to declare, then say *confirmar* again

Before you move on

What does confirmar mean? ("To confirm".) Say it once more.

Chapter 516

Su versión

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone assured, corrected, revealed or publicly denied something, and give their version.
>
> *Complete the last lesson of chapter 516: I can say that someone assured, corrected, revealed or publicly denied something, and give their version.*

516.1 asegurar — to assure, to insist; to insure

> Before the new one: say the Spanish for to declare, then the Spanish for to confirm.

You'll want to know: asegurar

asegurar — "to assure, to insist; to insure".

> Me aseguró que no había visto nada.
>
> *He assured me that he had not seen anything.*

Asegurarse de algo is to make sure of it. *Asegurar el coche* is to insure the car.

The word, taken apart — and its English cousins

asegurar is built on *seguro* 'sure, safe' with the prefix *a-*. *Seguro* is inherited from Latin *sēcūrus* (EtymDB), 'free from care', from *sē-* 'without' and *cūra* 'care' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: asegurar*
- *Say it: asegurar*, once more
- *Say it:* a sentence of your own with *asegurar*
- *Recall:* say the Spanish for to declare, then the Spanish for to confirm, then say *asegurar* again

Before you move on

What does asegurar mean? ("To assure, to insist; to insure".) Say it once more.

516.2 rectificar — to correct, to put right

Before the new one: say the Spanish for to confirm, then the Spanish for to assure.

You'll want to know: rectificar

rectificar — "to correct, to put right".

Un día después, el periódico rectificó la noticia.

A day later, the newspaper corrected the story.

It takes *qu* before *e*: *rectifiqué*. *Rectificar es de sabios* — it is wise to admit a mistake.

The word, taken apart — and its English cousins

rectificar is usually traced to Late Latin *rēctificāre* 'to make straight', a learned word built on *rēctus* 'straight' (Lewis & Short) and *facere* 'to make'. To correct a story is to set it straight.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rectificar*
- *Say it: rectificar*, once more
- *Say it:* a sentence of your own with *rectificar*
- *Recall:* say the Spanish for to confirm, then the Spanish for to assure, then say *rectificar* again

Before you move on

What does rectificar mean? ("To correct, to put right".) Say it once more.

516.3 revelar — to reveal; to develop (a photo)

Before the new one: say the Spanish for to assure, then the Spanish for to correct.

You'll want to know: revelar

revelar — "to reveal; to develop (a photo)".

El periódico reveló el nombre del ladrón.

The newspaper revealed the thief's name.

With old film, *revelar las fotos* is to develop the photos.

The word, taken apart — and its English cousins

revelar is a learned borrowing from Latin *revēlāre* 'to draw back the veil' (EtymDB), built on *re-* and *vēlum* 'a cloth, a veil'. To reveal is to pull the cloth away.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: revelar*
- *Say it: revelar*, once more
- *Say it:* a sentence of your own with *revelar*
- *Recall:* say the Spanish for to assure, then the Spanish for to correct, then say *revelar* again

Before you move on

What does revelar mean? ("To reveal; to develop (a photo)".) Say it once more.

516.4 desmentir — to refute, to deny publicly

Before the new one: say the Spanish for to correct, then the Spanish for to reveal.

You'll want to know: desmentir

desmentir — "to refute, to deny publicly".

El club desmintió la noticia.

The club denied the story.

Used for rumours and news reports. Stem change: *desmiento*, *desmintió*.

The word, taken apart — and its English cousins

desmentir is built on *mentir* 'to lie' with the prefix *des-*. *Mentir* is inherited from Latin *mentīrī* 'to lie' (EtymDB). To desmentir a story is to call it a lie.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: desmentir*
- *Say it: desmentir*, once more
- *Say it:* a sentence of your own with *desmentir*
- *Recall:* say the Spanish for to correct, then the Spanish for to reveal, then say *desmentir* again

Before you move on

What does desmentir mean? ("To refute, to deny publicly".) Say it once more.

516.5 la versión — the version, the account

Before the new one: say the Spanish for to reveal, then the Spanish for to refute.

You'll want to know: la versión

la versión — "the version, the account".

Cada persona tiene su versión de lo que pasó.

Each person has their own version of what happened.

En versión original on a cinema listing means not dubbed.

The word, taken apart — and its English cousins

versión is a learned borrowing from Medieval Latin *versiō* 'a turning, a translation' (EtymDB), built on *vertere* 'to turn'. A version is a story turned one particular way.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la versión*
- *Say it: la versión*, once more
- *Say it:* a sentence of your own with *la versión*
- *Recall:* say the Spanish for to reveal, then the Spanish for to refute, then say *la versión* again

Before you move on

What does la versión mean? ("The version, the account".) Say it once more.

Chapter 517

El testigo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that a witness saw something happen, observed it, noticed a detail and told the police.
>
> *Complete the last lesson of chapter 517: I can say that a witness saw something happen, observed it, noticed a detail and told the police.*

517.1 el testigo — the witness

> Before the new one: say the Spanish for to refute, then the Spanish for the version.

You'll want to know: el testigo

el testigo — "the witness".

> Un testigo llamó a la policía.
>
> *A witness called the police.*

The same form for a woman: *la testigo*. *Ser testigo de algo* is to witness it.

The word, taken apart — and its English cousins

testigo comes from old Spanish *testiguar* 'to bear witness' (EtymDB), which goes back to Latin *testificārī*, built on *testis* 'a witness'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el testigo*
- *Say it: el testigo*, once more
- *Say it:* a sentence of your own with *el testigo*
- *Recall:* say the Spanish for to refute, then the Spanish for the version, then say *el testigo* again

Before you move on

What does el testigo mean? ("The witness".) Say it once more.

517.2 presenciar — to witness, to be present at

Before the new one: say the Spanish for the version, then the Spanish for the witness.

You'll want to know: presenciar

presenciar — "to witness, to be present at".

Presencié el accidente desde la ventana.

I witnessed the accident from the window.

It takes a direct object: *presenciar un partido* — to watch a match in person.

The word, taken apart — and its English cousins

presenciar is built on *presencia* 'presence', which comes from Latin *praesentia* 'a being at hand' (Lewis & Short), from *praesēns* 'present'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: presenciar*
- *Say it: presenciar*, once more
- *Say it:* a sentence of your own with *presenciar*
- *Recall:* say the Spanish for the version, then the Spanish for the witness, then say *presenciar* again

Before you move on

What does presenciar mean? ("To witness, to be present at".) Say it once more.

517.3 observar — to observe, to watch

Before the new one: say the Spanish for the witness, then the Spanish for to witness.

You'll want to know: observar

observar — "to observe, to watch".

La vecina lo observaba todo desde la ventana.

The neighbour was watching everything from the window.

It also means to remark: *Observó que era tarde.*

The word, taken apart — and its English cousins

observar is a learned borrowing from Latin *observāre* 'to watch, to heed' (EtymDB), built on *ob-* and *servāre* 'to keep, to guard'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: observar*
- *Say it: observar*, once more
- *Say it:* a sentence of your own with *observar*
- *Recall:* say the Spanish for the witness, then the Spanish for to witness, then say *observar* again

Before you move on

What does observar mean? ("To observe, to watch".) Say it once more.

517.4 percatarse — to notice, to realise

Before the new one: say the Spanish for to witness, then the Spanish for to observe.

You'll want to know: percatarse

percatarse — "to notice, to realise".

No me percaté de nada aquella noche.

I didn't notice anything that night.

Percatarse de algo — to notice something. A little formal; in speech, *darse cuenta*.

The word, taken apart — and its English cousins

percatarse is built on old Spanish *catar* 'to see, to examine' with *per-*. *Catar* is usually traced to Latin *captāre* 'to try to catch', from *capere* 'to take'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: percatarse*
- *Say it: percatarse*, once more
- *Say it:* a sentence of your own with *percatarse*
- *Recall:* say the Spanish for to witness, then the Spanish for to observe, then say *percatarse* again

Before you move on

What does percatarse mean? ("To notice, to realise".) Say it once more.

517.5 el detalle — the detail

Before the new one: say the Spanish for to observe, then the Spanish for to notice.

You'll want to know: el detalle

el detalle — "the detail".

Recuerdo cada detalle de aquel día.

I remember every detail of that day.

¡Qué detalle! — how thoughtful! — said about a small kind gesture.

The word, taken apart — and its English cousins

detalle was borrowed from French *détail*, which is usually traced to *tailler* 'to cut', from Late Latin *taliāre*. A detail is a small piece cut off from the whole.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el detalle*
- *Say it:* *el detalle*, once more
- *Say it:* a sentence of your own with *el detalle*
- *Recall:* say the Spanish for to observe, then the Spanish for to notice, then say *el detalle* again

Before you move on

What does el detalle mean? (“The detail”.) Say it once more.

Chapter 518

Un robo en el barrio

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can report a robbery: what was stolen, who the suspect is, and how the thief ran away.
>
> *Complete the last lesson of chapter 518: I can report a robbery: what was stolen, who the suspect is, and how the thief ran away.*

518.1 robar — to steal, to rob

Before the new one: say the Spanish for to notice, then the Spanish for the detail.

You'll want to know: robar

robar — "to steal, to rob".

Me robaron la cartera en el metro.

Someone stole my wallet on the metro.

Robar algo a alguien — to steal something from someone.

The word, taken apart — and its English cousins

robar comes from a Germanic verb **raubōn* 'to rob, to plunder', through Medieval Latin *raubāre* (EtymDB). English *rob* goes back to the same Germanic verb.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: robar*
- *Say it: robar*, once more
- *Say it:* a sentence of your own with *robar*
- *Recall:* say the Spanish for to notice, then the Spanish for the detail, then say *robar* again

Before you move on

What does robar mean? ("To steal, to rob".) Say it once more.

518.2 el robo — the robbery, the theft

Before the new one: say the Spanish for the detail, then the Spanish for to steal.

You'll want to know: el robo

el robo — "the robbery, the theft".

Hubo un robo en la tienda de la esquina.

There was a robbery at the shop on the corner.

¡Esto es un robo! — this is daylight robbery! — about a high price.

The word, taken apart — and its English cousins

robo is built on the verb *robar* (EtymDB), which comes from a Germanic verb **raubōn* 'to rob, to plunder'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el robo*
- *Say it: el robo*, once more
- *Say it:* a sentence of your own with *el robo*
- *Recall:* say the Spanish for the detail, then the Spanish for to steal, then say *el robo* again

Before you move on

What does el robo mean? ("The robbery, the theft".) Say it once more.

518.3 el sospechoso — the suspect; suspicious

Before the new one: say the Spanish for to steal, then the Spanish for the robbery.

You'll want to know: el sospechoso

el sospechoso — "the suspect; suspicious".

La policía busca a dos sospechosos.

The police are looking for two suspects.

As an adjective: *un coche sospechoso* — a suspicious car.

The word, taken apart — and its English cousins

sospechoso is built on *sospecha* 'suspicion' with the ending *-oso*. *Sospecha* is built on *sospechar*, which is inherited from Latin *suspectāre* 'to look up at, to suspect' (EtymDB), from *suspicere*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el sospechoso*
- *Say it: el sospechoso*, once more
- *Say it:* a sentence of your own with *el sospechoso*
- *Recall:* say the Spanish for to steal, then the Spanish for the robbery, then say *el sospechoso* again

Before you move on

What does el sospechoso mean? ("The suspect; suspicious".) Say it once more.

518.4 atracar — to hold up, to mug; to moor

Before the new one: say the Spanish for the robbery, then the Spanish for the suspect.

You'll want to know: atracar

atracar — "to hold up, to mug; to moor".

Dos hombres atracaron un banco en el centro.

Two men held up a bank in the centre.

Un atraco is a hold-up. For a boat, *atracar* means to moor.

The word, taken apart — and its English cousins

The origin of *atracar* is not settled. The sense 'to hold up, to mug' is often linked to the sailors' verb *atracar* 'to bring a boat alongside'. EtymDB traces a Spanish *atracar* to an Arabic verb, without saying which sense it means.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: atracar*
- *Say it: atracar*, once more
- *Say it:* a sentence of your own with *atracar*
- *Recall:* say the Spanish for the robbery, then the Spanish for the suspect, then say *atracar* again

Before you move on

What does atracar mean? ("To hold up, to mug; to moor".) Say it once more.

518.5 huir — to flee, to run away

Before the new one: say the Spanish for the suspect, then the Spanish for to hold up.

You'll want to know: huir

huir — "to flee, to run away".

El ladrón huyó en un coche rojo.

The thief fled in a red car.

It takes a *y* in many forms: *huyo*, *huyó*, *huyeron*.

The word, taken apart — and its English cousins

huir is inherited from Latin *fugere* 'to flee' (Lewis & Short), through old Spanish *fuir* (EtymDB). Latin *f-* became Spanish *h-*. English *fugitive* is from the same verb.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *huir*
- *Say it:* *huir*, once more
- *Say it:* a sentence of your own with *huir*
- *Recall:* say the Spanish for the suspect, then the Spanish for to hold up, then say *huir* again

Before you move on

What does huir mean? ("To flee, to run away".) Say it once more.

Chapter 519

La policía actúa

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say that a patrol came, and that an officer chased, stopped and arrested someone.
>
> *Complete the last lesson of chapter 519: I can say that a patrol came, and that an officer chased, stopped and arrested someone.*

519.1 detener — to detain, to arrest; to stop

> Before the new one: say the Spanish for to hold up, then the Spanish for to flee.

You'll want to know: detener

detener — "to detain, to arrest; to stop".

> La policía detuvo al ladrón en la estación.
>
> *The police arrested the thief at the station.*

It changes like *tener*: *detuve*, *detuvo*. *Detenerse* is to stop: *El coche se detuvo.*

The word, taken apart — and its English cousins

detener is inherited from Latin *dētinēre* 'to hold back' (EtymDB), built on *dē-* and *tenēre* 'to hold'. English *detain* is the same Latin verb through French.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: detener*
- *Say it: detener*, once more
- *Say it:* a sentence of your own with *detener*
- *Recall:* say the Spanish for to hold up, then the Spanish for to flee, then say *detener* again

Before you move on

What does detener mean? ("To detain, to arrest; to stop".) Say it once more.

519.2 arrestar — to arrest

Before the new one: say the Spanish for to flee, then the Spanish for to detain.

You'll want to know: arrestar

arrestar — "to arrest".

Arrestaron a tres personas.

They arrested three people.

Detener is the more common word in the news; *arrestar* is also used.

The word, taken apart — and its English cousins

arrestar comes from spoken Latin **arrestāre* 'to make stop', built on *ad* and *restāre* 'to stay back, to remain' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: arrestar*
- *Say it: arrestar*, once more
- *Say it:* a sentence of your own with *arrestar*
- *Recall:* say the Spanish for to flee, then the Spanish for to detain, then say *arrestar* again

Before you move on

What does arrestar mean? (“To arrest”.) Say it once more.

519.3 la detención — the arrest

Before the new one: say the Spanish for to detain, then the Spanish for to arrest.

You’ll want to know: la detención

la detención — “the arrest”.

La detención fue rápida.

The arrest was quick.

The word, taken apart — and its English cousins

detención is a learned borrowing from Latin *dētentiō* ’a holding back’ (EtymDB), from *dētinēre*, built on *tenēre* ’to hold’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la detención*
- *Say it: la detención*, once more

- *Say it:* a sentence of your own with *la detención*
- *Recall:* say the Spanish for to detain, then the Spanish for to arrest, then say *la detención* again

Before you move on

What does la detención mean? (“The arrest”.) Say it once more.

519.4 la patrulla — the patrol; the patrol car

Before the new one: say the Spanish for to arrest, then the Spanish for the arrest.

You’ll want to know: la patrulla

la patrulla — “the patrol; the patrol car”.

Una patrulla llegó en cinco minutos.

A patrol car arrived in five minutes.

Estar de patrulla — to be on patrol. *Patrullar* is to patrol.

The word, taken apart — and its English cousins

patrulla is built on *patrullar* ’to patrol’, which was borrowed from French *patrouiller* (EtymDB). In Old French that verb meant ’to paddle, to paw about’, and EtymDB builds it on *patte* ’a paw’. The patrol tramped round on foot.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la patrulla*
- *Say it: la patrulla*, once more
- *Say it:* a sentence of your own with *la patrulla*

- *Recall:* say the Spanish for to arrest, then the Spanish for the arrest, then say *la patrulla* again

Before you move on

What does la patrulla mean? ("The patrol; the patrol car".) Say it once more.

519.5 perseguir — to chase, to pursue

Before the new one: say the Spanish for the arrest, then the Spanish for the patrol.

You'll want to know: perseguir

perseguir — "to chase, to pursue".

El perro persiguió al gato por la calle.

The dog chased the cat down the street.

It changes like *seguir*: *persigo*, *persiguió*.

The word, taken apart — and its English cousins

perseguir is inherited from Latin *persequī* 'to follow up, to pursue' (EtymDB), built on *per* 'through' and *sequī* 'to follow'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: perseguir*
- *Say it: perseguir*, once more
- *Say it:* a sentence of your own with *perseguir*
- *Recall:* say the Spanish for the arrest, then the Spanish for the patrol, then say *perseguir* again

Before you move on

What does perseguir mean? (“To chase, to pursue”.) Say it once more.

519.6 Sucesos y relatos

Say the Spanish for to occur and the happening.

Your turn

Say these aloud:

- to occur, the happening, the event, to come about, to take place
- the newsroom, the headline, the press, the correspondent, to publish
- the report, the reporter, to interview, to spread, to announce
- the rumour, the official statement, the statement, to declare, to confirm
- to assure, to correct, to reveal, to refute, the version
- the witness, to witness, to observe, to notice, the detail
- to steal, the robbery, the suspect, to hold up, to flee
- to detain, to arrest, the arrest, the patrol, to chase

Before you move on

To occur? (**producirse**.) The happening? (**el suceso**.) The event? (**el acontecimiento**.) To come about? (**acontecer**.) To take place? (**tener lugar**.) The newsroom? (**la redacción**.) The headline? (**el titular**.) The press? (**la prensa**.) The correspondent? (**el corresponsal**.) To publish? (**publicar**.) The report? (**el reportaje**.) The reporter? (**el reportero**.) To interview? (**entrevistar**.) To spread? (**difundir**.) To announce? (**anunciar**.) The rumour? (**el rumor**.) The official statement? (**el comunicado**.) The statement? (**la declaración**.) To declare? (**declarar**.) To confirm? (**confirmar**.) To assure? (**asegurar**.) To

correct? (**rectificar**.) To reveal? (**revelar**.) To refute? (**desmentir**.) The version? (**la versión**.) The witness? (**el testigo**.) To witness? (**presenciar**.) To observe? (**observar**.) To notice? (**percatarse**.) The detail? (**el detalle**.) To steal? (**robar**.) The robbery? (**el robo**.) The suspect? (**el sospechoso**.) To hold up? (**atracar**.) To flee? (**huir**.) To detain? (**detener**.) To arrest? (**arrestar**.) The arrest? (**la detención**.) The patrol? (**la patrulla**.) To chase? (**perseguir**.)

Chapter 520

El delito

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about an offence and an offender, a crime, the victim and the investigation.
>
> *Complete the last lesson of chapter 520: I can talk about an offence and an offender, a crime, the victim and the investigation.*

520.1 el delito — the offence, the crime

> Before the new one: say the Spanish for the patrol, then the Spanish for to chase.

You'll want to know: el delito

el delito — "the offence, the crime".

> Robar es un delito.
>
> *Stealing is a crime.*

Cometer un delito — to commit an offence.

The word, taken apart — and its English cousins

delito is a learned borrowing from Latin *dēlictum* 'a fault, a misdeed' (EtymDB), from *dēlinquere* 'to fall short, to do wrong' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el delito*
- *Say it: el delito*, once more
- *Say it:* a sentence of your own with *el delito*
- *Recall:* say the Spanish for the patrol, then the Spanish for to chase, then say *el delito* again

Before you move on

What does el delito mean? ("The offence, the crime".) Say it once more.

520.2 el crimen — the crime (serious)

Before the new one: say the Spanish for to chase, then the Spanish for the offence.

You'll want to know: el crimen

el crimen — "the crime (serious)".

Nadie vio el crimen.

Nobody saw the crime.

The plural moves the accent: *los crímenes*.

The word, taken apart — and its English cousins

crimen is a learned borrowing from Latin *crīmen* 'a verdict, a charge, a crime' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el crimen*
- *Say it: el crimen*, once more
- *Say it:* a sentence of your own with *el crimen*
- *Recall:* say the Spanish for to chase, then the Spanish for the offence, then say *el crimen* again

Before you move on

What does el crimen mean? (“The crime (serious)”.) Say it once more.

520.3 el delincuente — the offender, the criminal

Before the new one: say the Spanish for the offence, then the Spanish for the crime.

You’ll want to know: el delincuente

el delincuente — “the offender, the criminal”.

Detuvieron al delincuente en la estación.

They arrested the offender at the station.

The same form for a woman: *la delincuente*.

The word, taken apart — and its English cousins

delincuente is a learned borrowing from Latin *dēlinquēns* ’doing wrong’ (EtymDB), the participle of *dēlinquere* ’to fall short, to do wrong’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el delincuente*
- *Say it: el delincuente*, once more
- *Say it:* a sentence of your own with *el delincuente*
- *Recall:* say the Spanish for the offence, then the Spanish for the crime, then say *el delincuente* again

Before you move on

What does el delincuente mean? ("The offender, the criminal".) Say it once more.

520.4 la víctima — the victim

Before the new one: say the Spanish for the crime, then the Spanish for the offender.

You'll want to know: la víctima

la víctima — "the victim".

La víctima era un hombre de cuarenta años.

The victim was a man of forty.

Always feminine, even for a man: *la víctima*.

The word, taken apart — and its English cousins

víctima is a learned borrowing from Latin *victima* 'an animal offered in sacrifice' (EtymDB). The word moved from the altar to anyone who suffers harm.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la víctima*
- *Say it: la víctima*, once more
- *Say it:* a sentence of your own with *la víctima*
- *Recall:* say the Spanish for the crime, then the Spanish for the offender, then say *la víctima* again

Before you move on

What does la víctima mean? ("The victim".) Say it once more.

520.5 la investigación — the investigation; research

Before the new one: say the Spanish for the offender, then the Spanish for the victim.

You'll want to know: la investigación

la investigación — "the investigation; research".

La investigación duró dos años.

The investigation lasted two years.

It also means scientific research: *la investigación médica*.

The word, taken apart — and its English cousins

investigación is a learned borrowing from Latin *investīgātiō* 'a searching out', from *investīgāre* 'to track, as a dog does' (Lewis & Short), built on *vestīgium* 'a footprint'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la investigación*
- *Say it: la investigación*, once more
- *Say it:* a sentence of your own with *la investigación*
- *Recall:* say the Spanish for the offender, then the Spanish for the victim, then say *la investigación* again

Before you move on

What does la investigación mean? ("The investigation; research".) Say it once more.

Chapter 521

Siguiendo la pista

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone investigated a case, followed a lead, found proof and suspected someone.
>
> *Complete the last lesson of chapter 521: I can say that someone investigated a case, followed a lead, found proof and suspected someone.*

521.1 investigar — to investigate

> Before the new one: say the Spanish for the victim, then the Spanish for the investigation.

You'll want to know: investigar

investigar — "to investigate".

> La policía investiga el caso.
>
> *The police are investigating the case.*

It takes *gu* before *e*: *investigué*.

The word, taken apart — and its English cousins

investigar is a learned borrowing from Latin *investīgāre* 'to track, to search after' (EtymDB), built on *vestīgium* 'a footprint'. To investigate is to follow the footprints.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: investigar*
- *Say it: investigar*, once more
- *Say it:* a sentence of your own with *investigar*
- *Recall:* say the Spanish for the victim, then the Spanish for the investigation, then say *investigar* again

Before you move on

What does investigar mean? ("To investigate".) Say it once more.

521.2 la pista — the clue, the lead; the track

Before the new one: say the Spanish for the investigation, then the Spanish for to investigate.

You'll want to know: la pista

la pista — "the clue, the lead; the track".

La policía no tiene ninguna pista.

The police do not have any leads.

It also means a track or court: *una pista de tenis*, *la pista de baile*.

The word, taken apart — and its English cousins

pista was borrowed from Italian *pista* 'a track, a beaten trail' (EtymDB). A clue is the trail you follow.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la pista*
- *Say it: la pista*, once more
- *Say it:* a sentence of your own with *la pista*
- *Recall:* say the Spanish for the investigation, then the Spanish for to investigate, then say *la pista* again

Before you move on

What does la pista mean? ("The clue, the lead; the track".) Say it once more.

521.3 la prueba — the proof, the evidence; the test

Before the new one: say the Spanish for to investigate, then the Spanish for the clue.

You'll want to know: la prueba

la prueba — "the proof, the evidence; the test".

No hay pruebas contra él.

There is no evidence against him.

Una prueba is also a test: *una prueba de inglés.*

The word, taken apart — and its English cousins

prueba is built on *probar* 'to test, to try', which is inherited from Latin *probāre* 'to test, to prove' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la prueba*
- *Say it: la prueba*, once more
- *Say it:* a sentence of your own with *la prueba*
- *Recall:* say the Spanish for to investigate, then the Spanish for the clue, then say *la prueba* again

Before you move on

What does la prueba mean? (“The proof, the evidence; the test”.) Say it once more.

521.4 averiguar — to find out

Before the new one: say the Spanish for the clue, then the Spanish for the proof.

You’ll want to know: averiguar

averiguar — “to find out”.

Quiero averiguar qué pasó.

I want to find out what happened.

It takes *ü* before *e*: *averigüé*.

The word, taken apart — and its English cousins

averiguar is usually traced to Late Latin *verificāre* ’to show to be true’, built on *vērus* ’true’. To find out is to get at the truth.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: averiguar*
- *Say it: averiguar*, once more
- *Say it:* a sentence of your own with *averiguar*
- *Recall:* say the Spanish for the clue, then the Spanish for the proof, then say *averiguar* again

Before you move on

What does averiguar mean? ("To find out".) Say it once more.

521.5 sospechar — to suspect

Before the new one: say the Spanish for the proof, then the Spanish for to find out.

You'll want to know: sospechar

sospechar — "to suspect".

Nadie sospechaba de él.

Nobody suspected him.

Sospechar de alguien — to suspect someone.

The word, taken apart — and its English cousins

sospechar is inherited from Latin *suspectāre* 'to look up at, to suspect' (EtymDB), built on *suspicere* 'to look up at'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *sospechar*
- *Say it:* *sospechar*, once more
- *Say it:* a sentence of your own with *sospechar*
- *Recall:* say the Spanish for the proof, then the Spanish for to find out, then say *sospechar* again

Before you move on

What does sospechar mean? (“To suspect”.) Say it once more.

Chapter 522

Ante el juez

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that there was a trial, that the judge judged and sentenced someone, and that they went to prison.
>
> *Complete the last lesson of chapter 522: I can say that there was a trial, that the judge judged and sentenced someone, and that they went to prison.*

522.1 el juicio — the trial; judgement

> Before the new one: say the Spanish for to find out, then the Spanish for to suspect.

You'll want to know: el juicio

el juicio — "the trial; judgement".

> El juicio empieza el martes.
>
> *The trial starts on Tuesday.*

A mi juicio — in my judgement.

The word, taken apart — and its English cousins

juicio is inherited from Latin *iūdicium* 'a trial, a judgement' (EtymDB), built on *iūdex* 'a judge'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el juicio*
- *Say it: el juicio*, once more
- *Say it:* a sentence of your own with *el juicio*
- *Recall:* say the Spanish for to find out, then the Spanish for to suspect, then say *el juicio* again

Before you move on

What does el juicio mean? ("The trial; judgement".) Say it once more.

522.2 el juez — the judge

Before the new one: say the Spanish for to suspect, then the Spanish for the trial.

You'll want to know: el juez

el juez — "the judge".

El juez escuchó a los testigos.

The judge listened to the witnesses.

A woman judge is *la jueza* or *la juez*. Plural: *los jueces*.

The word, taken apart — and its English cousins

juez is inherited from Latin *iūdex* 'a judge' (EtymDB), built on *iūs* 'law' and *dīcere* 'to say'. The judge is the one who says what the law is.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el juez*
- *Say it: el juez*, once more
- *Say it:* a sentence of your own with *el juez*
- *Recall:* say the Spanish for to suspect, then the Spanish for the trial, then say *el juez* again

Before you move on

What does el juez mean? (“The judge”.) Say it once more.

522.3 juzgar — to judge, to try

Before the new one: say the Spanish for the trial, then the Spanish for the judge.

You’ll want to know: juzgar

juzgar — “to judge, to try”.

Lo juzgaron por robo.

They tried him for robbery.

It takes *gu* before *e*: *juzgué*. Also everyday: *No me juzgues.*

The word, taken apart — and its English cousins

juzgar is inherited from Latin *iūdicāre* ’to judge’, through old Spanish *judgar* (EtymDB). It is built on *iūdex* ’a judge’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: juzgar*
- *Say it: juzgar*, once more
- *Say it:* a sentence of your own with *juzgar*
- *Recall:* say the Spanish for the trial, then the Spanish for the judge, then say *juzgar* again

Before you move on

What does juzgar mean? ("To judge, to try".) Say it once more.

522.4 condenar — to sentence, to condemn

Before the new one: say the Spanish for the judge, then the Spanish for to judge.

You'll want to know: condenar

condenar — "to sentence, to condemn".

Lo condenaron a pagar una multa.

He was sentenced to pay a fine.

Condenar a alguien a... — to sentence someone to...

The word, taken apart — and its English cousins

condenar is inherited from Latin *condemnāre* 'to sentence, to condemn' (EtymDB), built on *con-* and *damnāre* 'to condemn'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: condenar*
- *Say it: condenar*, once more
- *Say it:* a sentence of your own with *condenar*
- *Recall:* say the Spanish for the judge, then the Spanish for to judge, then say *condenar* again

Before you move on

What does condenar mean? ("To sentence, to condemn".) Say it once more.

522.5 la cárcel — the prison, the jail

Before the new one: say the Spanish for to judge, then the Spanish for to sentence.

You'll want to know: la cárcel

la cárcel — "the prison, the jail".

Pasó tres años en la cárcel.

He spent three years in prison.

La prisión is a more formal word.

The word, taken apart — and its English cousins

cárcel is inherited from Latin *carcer* 'a prison, an enclosure', through old Spanish *carcel* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la cárcel*
- *Say it: la cárcel*, once more
- *Say it:* a sentence of your own with *la cárcel*
- *Recall:* say the Spanish for to judge, then the Spanish for to sentence, then say *la cárcel* again

Before you move on

What does la cárcel mean? ("The prison, the jail".) Say it once more.

Chapter 523

El preso

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone was accused, confessed, testified and was set free.
>
> *Complete the last lesson of chapter 523: I can say that someone was accused, confessed, testified and was set free.*

523.1 el preso — the prisoner

> Before the new one: say the Spanish for to sentence, then the Spanish for the prison.

You'll want to know: el preso

el preso — "the prisoner".

> El preso salió de la cárcel ayer.
>
> *The prisoner came out of prison yesterday.*

A woman is *la presa*. As an adjective: *Está preso* — he is in prison.

The word, taken apart — and its English cousins

preso is inherited from Latin *prēnsus*, a shorter form of *prehēnsus* 'seized' (EtymDB), the participle of *prehendere* 'to take hold of'. A prisoner is a person who has been seized.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el preso*
- *Say it:* *el preso*, once more
- *Say it:* a sentence of your own with *el preso*
- *Recall:* say the Spanish for to sentence, then the Spanish for the prison, then say *el preso* again

Before you move on

What does el preso mean? ("The prisoner".) Say it once more.

523.2 acusar — to accuse

Before the new one: say the Spanish for the prison, then the Spanish for the prisoner.

You'll want to know: acusar

acusar — "to accuse".

Lo acusaron de robar el dinero.

They accused him of stealing the money.

Acusar a alguien de algo — to accuse someone of something.

The word, taken apart — and its English cousins

acusar comes from Latin *accūsāre* 'to call to account' (EtymDB), built on *ad* and *causa* 'a case at law'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: acusar*
- *Say it: acusar*, once more
- *Say it:* a sentence of your own with *acusar*
- *Recall:* say the Spanish for the prison, then the Spanish for the prisoner, then say *acusar* again

Before you move on

What does acusar mean? ("To accuse".) Say it once more.

523.3 confesar — to confess

Before the new one: say the Spanish for the prisoner, then the Spanish for to accuse.

You'll want to know: confesar

confesar — "to confess".

Al final confesó la verdad.

In the end he confessed the truth.

Stem change: *confieso*, *confiesas*.

The word, taken apart — and its English cousins

confesar is usually traced to a spoken Latin verb made from *cōnfessus*, the participle of *cōnfitērī* 'to acknowledge, to confess' (Lewis & Short), from *fatērī* 'to admit'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: confesar*
- *Say it: confesar*, once more
- *Say it:* a sentence of your own with *confesar*
- *Recall:* say the Spanish for the prisoner, then the Spanish for to accuse, then say *confesar* again

Before you move on

What does confesar mean? ("To confess".) Say it once more.

523.4 testificar — to testify

Before the new one: say the Spanish for to accuse, then the Spanish for to confess.

You'll want to know: testificar

testificar — "to testify".

La vecina testificó en el juicio.

The neighbour testified at the trial.

It takes *qu* before *e*: *testifiqué*.

The word, taken apart — and its English cousins

testificar is a learned borrowing from Latin *testificārī* 'to bear witness' (EtymDB), built on *testis* 'a witness' and *facere* 'to make'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: testificar*
- *Say it: testificar*, once more
- *Say it:* a sentence of your own with *testificar*
- *Recall:* say the Spanish for to accuse, then the Spanish for to confess, then say *testificar* again

Before you move on

What does testificar mean? ("To testify".) Say it once more.

523.5 liberar — to free, to release

Before the new one: say the Spanish for to confess, then the Spanish for to testify.

You'll want to know: liberar

liberar — "to free, to release".

Liberaron a los presos el lunes.

The prisoners were released on Monday.

Liberar a alguien — to set someone free.

The word, taken apart — and its English cousins

liberar is a learned borrowing from Latin *līberāre* 'to set free' (EtymDB), built on *līber* 'free'. It is not the *liber* 'bark, book' behind *libro*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *liberar*
- *Say it:* *liberar*, once more
- *Say it:* a sentence of your own with *liberar*
- *Recall:* say the Spanish for to confess, then the Spanish for to testify, then say *liberar* again

Before you move on

What does liberar mean? (“To free, to release”.) Say it once more.

Chapter 524

El incendio

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can report a fire: what burned, the alarm, and the people who were evacuated.
>
> *Complete the last lesson of chapter 524: I can report a fire: what burned, the alarm, and the people who were evacuated.*

524.1 el incendio — the fire (big, destructive)

> Before the new one: say the Spanish for to testify, then the Spanish for to free.

You'll want to know: el incendio

el incendio — "the fire (big, destructive)".

> El incendio empezó en la cocina.
>
> *The fire started in the kitchen.*

El fuego is fire in general; *un incendio* is a fire that burns a building or a forest.

The word, taken apart — and its English cousins

incendio is a learned borrowing from Latin *incendium* 'a fire, a blaze' (EtymDB), built on *incendere* 'to set on fire'. English *incendiary* comes from the same verb.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el incendio*
- *Say it: el incendio*, once more
- *Say it:* a sentence of your own with *el incendio*
- *Recall:* say the Spanish for to testify, then the Spanish for to free, then say *el incendio* again

Before you move on

What does el incendio mean? ("The fire (big, destructive)".) Say it once more.

524.2 incendiar — to set on fire

Before the new one: say the Spanish for to free, then the Spanish for the fire.

You'll want to know: incendiar

incendiar — "to set on fire".

Alguien incendió el coche de noche.

Someone set the car on fire at night.

Incendiarse is to catch fire: *La casa se incendió.*

The word, taken apart — and its English cousins

incendiar is built on *incendio* 'a fire', a learned word from Latin *incendium*, built on *incendere* 'to set on fire' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: incendiar*
- *Say it: incendiar*, once more
- *Say it:* a sentence of your own with *incendiar*
- *Recall:* say the Spanish for to free, then the Spanish for the fire, then say *incendiar* again

Before you move on

What does incendiar mean? ("To set on fire".) Say it once more.

524.3 arder — to burn, to be on fire

Before the new one: say the Spanish for the fire, then the Spanish for to set on fire.

You'll want to know: arder

arder — "to burn, to be on fire".

El edificio ardió toda la noche.

The building burned all night.

Arder is to be burning; to burn something is *quemar*.

The word, taken apart — and its English cousins

arder is inherited from Latin *ārdēre* 'to be on fire, to blaze' (EtymDB). English *ardent* comes from the same verb.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: arder*
- *Say it: arder*, once more
- *Say it:* a sentence of your own with *arder*
- *Recall:* say the Spanish for the fire, then the Spanish for to set on fire, then say *arder* again

Before you move on

What does arder mean? ("To burn, to be on fire".) Say it once more.

524.4 la alarma — the alarm

Before the new one: say the Spanish for to set on fire, then the Spanish for to burn.

You'll want to know: la alarma

la alarma — "the alarm".

Sonó la alarma a las tres de la mañana.

The alarm went off at three in the morning.

Dar la alarma — to raise the alarm.

The word, taken apart — and its English cousins

alarma comes from the Italian cry *all'arme* 'to arms' (EtymDB), and *arme* goes back to Latin *arma* 'weapons'. An alarm was first a call to take up your weapons.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la alarma*
- *Say it: la alarma*, once more
- *Say it:* a sentence of your own with *la alarma*
- *Recall:* say the Spanish for to set on fire, then the Spanish for to burn, then say *la alarma* again

Before you move on

What does la alarma mean? ("The alarm".) Say it once more.

524.5 evacuar — to evacuate

Before the new one: say the Spanish for to burn, then the Spanish for the alarm.

You'll want to know: evacuar

evacuar — "to evacuate".

Evacuaron el edificio en diez minutos.

They evacuated the building in ten minutes.

The word, taken apart — and its English cousins

evacuar is a learned borrowing from Latin *ēvacuāre* 'to empty out' (EtymDB), built on *vacuus* 'empty'. To evacuate a building is to empty it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: evacuar*
- *Say it: evacuar*, once more

- *Say it:* a sentence of your own with *evacuar*
- *Recall:* say the Spanish for to burn, then the Spanish for the alarm, then say *evacuar* again

Before you move on

What does evacuar mean? (“To evacuate”.) Say it once more.

Chapter 525

Hay heridos

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone was injured, how bad the wound was, who helped and that an ambulance came.
>
> *Complete the last lesson of chapter 525: I can say that someone was injured, how bad the wound was, who helped and that an ambulance came.*

525.1 la herida — the wound, the injury

> Before the new one: say the Spanish for the alarm, then the Spanish for to evacuate.

You'll want to know: la herida

la herida — "the wound, the injury".

> Tiene una herida en la pierna.
>
> *He has a wound on his leg.*

The word, taken apart — and its English cousins

herida is built on the participle of *herir* 'to wound', which is inherited from Latin *ferīre* 'to strike' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la herida*
- *Say it: la herida*, once more
- *Say it:* a sentence of your own with *la herida*
- *Recall:* say the Spanish for the alarm, then the Spanish for to evacuate, then say *la herida* again

Before you move on

What does la herida mean? ("The wound, the injury".) Say it once more.

525.2 herir — to wound, to injure; to hurt

Before the new one: say the Spanish for to evacuate, then the Spanish for the wound.

You'll want to know: herir

herir — "to wound, to injure; to hurt".

El accidente hirió a dos personas.

The accident injured two people.

Stem change: *hiero*, *hirió*. It also hurts feelings: *Me hirió lo que dijo.*

The word, taken apart — and its English cousins

herir is inherited from Latin *ferīre* 'to strike', through old Spanish *ferir* (EtymDB). Latin *f-* became Spanish *h-*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: herir*
- *Say it: herir*, once more
- *Say it:* a sentence of your own with *herir*
- *Recall:* say the Spanish for to evacuate, then the Spanish for the wound, then say *herir* again

Before you move on

What does herir mean? (“To wound, to injure; to hurt”.) Say it once more.

525.3 la ambulancia — the ambulance

Before the new one: say the Spanish for the wound, then the Spanish for to wound.

You’ll want to know: la ambulancia

la ambulancia — “the ambulance”.

La ambulancia llegó en cinco minutos.

The ambulance arrived in five minutes.

The word, taken apart — and its English cousins

ambulancia was borrowed from French *ambulance*, a word usually explained as first naming a field hospital that moved with an army. It is built on Latin *ambulāre* ’to walk’ (Lewis & Short).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ambulancia*
- *Say it: la ambulancia*, once more
- *Say it:* a sentence of your own with *la ambulancia*
- *Recall:* say the Spanish for the wound, then the Spanish for to wound, then say *la ambulancia* again

Before you move on

What does la ambulancia mean? ("The ambulance".) Say it once more.

525.4 socorrer — to help, to come to the aid of

Before the new one: say the Spanish for to wound, then the Spanish for the ambulance.

You'll want to know: socorrer

socorrer — "to help, to come to the aid of".

Unos vecinos socorrieron a los heridos.

Some neighbours came to the aid of the injured.

¡Socorro! — help! *Socorrer a alguien* — to help someone in danger.

The word, taken apart — and its English cousins

socorrer is inherited from Latin *succurrere* 'to run up, to run to help' (EtymDB), built on *sub* and *currere* 'to run' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: socorrer*
- *Say it: socorrer*, once more
- *Say it:* a sentence of your own with *socorrer*
- *Recall:* say the Spanish for to wound, then the Spanish for the ambulance, then say *socorrer* again

Before you move on

What does socorrer mean? ("To help, to come to the aid of".) Say it once more.

525.5 el herido — the injured person; injured

Before the new one: say the Spanish for the ambulance, then the Spanish for to help.

You'll want to know: el herido

el herido — "the injured person; injured".

Hay tres heridos graves.

There are three people seriously injured.

As an adjective: *Está herido* — he is injured.

The word, taken apart — and its English cousins

herido is built on the participle of *herir* 'to wound', which is inherited from Latin *ferīre* 'to strike' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el herido*
- *Say it:* *el herido*, once more
- *Say it:* a sentence of your own with *el herido*
- *Recall:* say the Spanish for the ambulance, then the Spanish for to help, then say *el herido* again

Before you move on

What does el herido mean? ("The injured person; injured".) Say it once more.

Chapter 526

El rescate

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that people were trapped, rescued and saved, and that they survived.
>
> *Complete the last lesson of chapter 526: I can say that people were trapped, rescued and saved, and that they survived.*

526.1 rescatar — to rescue

> Before the new one: say the Spanish for to help, then the Spanish for the injured person.

You'll want to know: rescatar

rescatar — "to rescue".

> Rescataron a los niños del río.
>
> *They rescued the children from the river.*

The word, taken apart — and its English cousins

rescatar comes from spoken Latin **reexcaptāre* 'to take back' (EtymDB), built on *captāre* 'to try to catch', from *capere* 'to take'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rescatar*
- *Say it: rescatar*, once more
- *Say it:* a sentence of your own with *rescatar*
- *Recall:* say the Spanish for to help, then the Spanish for the injured person, then say *rescatar* again

Before you move on

What does rescatar mean? ("To rescue".) Say it once more.

526.2 el rescate — the rescue; the ransom

Before the new one: say the Spanish for the injured person, then the Spanish for to rescue.

You'll want to know: el rescate

el rescate — "the rescue; the ransom".

El rescate duró toda la noche.

The rescue lasted all night.

It is also the money asked for a hostage: *pedir un rescate*.

The word, taken apart — and its English cousins

rescate is built on *rescatar* 'to rescue' (EtymDB), which goes back to spoken Latin **reexcaptāre*, from *captāre* 'to try to catch'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el rescate*
- *Say it:* *el rescate*, once more
- *Say it:* a sentence of your own with *el rescate*
- *Recall:* say the Spanish for the injured person, then the Spanish for to rescue, then say *el rescate* again

Before you move on

What does el rescate mean? ("The rescue; the ransom".) Say it once more.

526.3 salvar — to save (a life)

Before the new one: say the Spanish for to rescue, then the Spanish for the rescue.

You'll want to know: salvar

salvar — "to save (a life)".

El médico le salvó la vida.

The doctor saved his life.

To save money is *ahorrar*, not *salvar*.

The word, taken apart — and its English cousins

salvar is inherited from Late Latin *salvāre* 'to save' (EtymDB), built on *salvus* 'safe, unharmed'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: salvar*
- *Say it: salvar*, once more
- *Say it:* a sentence of your own with *salvar*
- *Recall:* say the Spanish for to rescue, then the Spanish for the rescue, then say *salvar* again

Before you move on

What does salvar mean? ("To save (a life)".) Say it once more.

526.4 sobrevivir — to survive

Before the new one: say the Spanish for the rescue, then the Spanish for to save.

You'll want to know: sobrevivir

sobrevivir — "to survive".

Todos sobrevivieron al accidente.

Everyone survived the accident.

Sobrevivir a algo — to survive something.

The word, taken apart — and its English cousins

sobrevivir comes from Latin *supervīvere* 'to outlive' (EtymDB), built on *super* 'over, beyond' and *vīvere* 'to live'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sobrevivir*
- *Say it: sobrevivir*, once more
- *Say it:* a sentence of your own with *sobrevivir*
- *Recall:* say the Spanish for the rescue, then the Spanish for to save, then say *sobrevivir* again

Before you move on

What does sobrevivir mean? ("To survive".) Say it once more.

526.5 atrapar — to trap, to catch

Before the new one: say the Spanish for to save, then the Spanish for to survive.

You'll want to know: atrapar

atrapar — "to trap, to catch".

El humo atrapó a la familia en el piso.

The smoke trapped the family in the flat.

Quedarse atrapado — to be trapped.

The word, taken apart — and its English cousins

atrapar is usually traced to French *attraper* 'to catch in a trap', built on *trappe* 'a trap', a word of Frankish origin. English *trap* comes from the same Germanic family.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *atrapar*
- *Say it:* *atrapar*, once more
- *Say it:* a sentence of your own with *atrapar*
- *Recall:* say the Spanish for to save, then the Spanish for to survive, then say *atrapar* again

Before you move on

What does atrapar mean? (“To trap, to catch”.) Say it once more.

Chapter 527

En la carretera

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can describe a road accident: two cars crashed, someone was run over or fell, and who came out unhurt.
>
> *Complete the last lesson of chapter 527: I can describe a road accident: two cars crashed, someone was run over or fell, and who came out unhurt.*

527.1 chocar — to crash, to collide

> Before the new one: say the Spanish for to survive, then the Spanish for to trap.

You'll want to know: chocar

chocar — "to crash, to collide".

> Dos coches chocaron en la esquina.
>
> *Two cars crashed on the corner.*

Chocar con or *chocar contra* — to crash into. *¡Chócala!* — high five!

The word, taken apart — and its English cousins

The origin of *chocar* is not settled. It is usually treated as imitative, a word that copies the noise of a blow; French *choquer* is close beside it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: chocar*
- *Say it: chocar*, once more
- *Say it:* a sentence of your own with *chocar*
- *Recall:* say the Spanish for to survive, then the Spanish for to trap, then say *chocar* again

Before you move on

What does chocar mean? ("To crash, to collide".) Say it once more.

527.2 el choque — the crash, the collision; the shock

Before the new one: say the Spanish for to trap, then the Spanish for to crash.

You'll want to know: el choque

el choque — "the crash, the collision; the shock".

El choque fue muy fuerte.

The crash was very violent.

Un choque cultural — a culture shock.

The word, taken apart — and its English cousins

choque is built on the verb *chocar* (EtymDB), whose own origin is not settled; it is often treated as a sound word.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el choque*
- *Say it: el choque*, once more
- *Say it:* a sentence of your own with *el choque*
- *Recall:* say the Spanish for to trap, then the Spanish for to crash, then say *el choque* again

Before you move on

What does el choque mean? ("The crash, the collision; the shock".) Say it once more.

527.3 atropellar — to run over, to knock down

Before the new one: say the Spanish for to crash, then the Spanish for the crash.

You'll want to know: atropellar

atropellar — "to run over, to knock down".

Un coche atropelló a una señora en el paso de cebra.

A car knocked down a woman on the zebra crossing.

Me atropelló un coche — I was hit by a car.

The word, taken apart — and its English cousins

atropellar is built on *tropel* 'a rushing crowd' (EtymDB), with *a-*. *Tropel* is usually said to have come into Spanish from Occitan or French, and its root is usually traced to Germanic.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: atropellar*
- *Say it: atropellar*, once more
- *Say it:* a sentence of your own with *atropellar*
- *Recall:* say the Spanish for to crash, then the Spanish for the crash, then say *atropellar* again

Before you move on

What does atropellar mean? ("To run over, to knock down".) Say it once more.

527.4 ileso — unhurt, unharmed

Before the new one: say the Spanish for the crash, then the Spanish for to run over.

You'll want to know: ileso

ileso — "unhurt, unharmed".

Los pasajeros salieron ilesos del accidente.

The passengers came out of the accident unhurt.

Salir ileso — to escape unhurt.

The word, taken apart — and its English cousins

ileso is a learned borrowing from Latin *illaesus* 'unhurt, unharmed' (EtymDB), built on *in-* 'not' and *laesus* 'hurt', from *laedere* 'to hurt'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ileso*
- *Say it: ileso*, once more
- *Say it:* a sentence of your own with *ileso*
- *Recall:* say the Spanish for the crash, then the Spanish for to run over, then say *ileso* again

Before you move on

What does ileso mean? (“Unhurt, unharmed”.) Say it once more.

527.5 caer — to fall

Before the new one: say the Spanish for to run over, then the Spanish for unhurt.

You’ll want to know: caer

caer — “to fall”.

Un árbol cayó en medio de la calle.

A tree fell in the middle of the street.

Caerse is to fall over: *Me caí en la calle.* Forms: *caigo*, *cayó*, *cayeron.*

The word, taken apart — and its English cousins

caer is inherited from Latin *cadere* ’to fall, to happen’, through spoken Latin **cadēre* (EtymDB). The *d* between vowels was lost.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: caer*
- *Say it: caer*, once more
- *Say it:* a sentence of your own with *caer*
- *Recall:* say the Spanish for to run over, then the Spanish for unhurt, then say *caer* again

Before you move on

What does caer mean? ("To fall".) Say it once more.

527.6 Repaso de los capítulos 520–527

Say the Spanish for the offence and the crime.

Your turn

Say these aloud:

- the offence, the crime, the offender, the victim, the investigation
- to investigate, the clue, the proof, to find out, to suspect
- the trial, the judge, to judge, to sentence, the prison
- the prisoner, to accuse, to confess, to testify, to free
- the fire, to set on fire, to burn, the alarm, to evacuate
- the wound, to wound, the ambulance, to help, the injured person
- to rescue, the rescue, to save, to survive, to trap
- to crash, the crash, to run over, unhurt, to fall

Before you move on

The offence? (**el delito**.) The crime? (**el crimen**.) The offender? (**el delincuente**.) The victim? (**la víctima**.) The investigation? (**la investigación**.) To investigate? (**investigar**.) The clue? (**la**

pista.) The proof? (**la prueba**.) To find out? (**averiguar**.) To suspect? (**sospechar**.) The trial? (**el juicio**.) The judge? (**el juez**.) To judge? (**juzgar**.) To sentence? (**condenar**.) The prison? (**la cárcel**.) The prisoner? (**el preso**.) To accuse? (**acusar**.) To confess? (**confesar**.) To testify? (**testificar**.) To free? (**liberar**.) The fire? (**el incendio**.) To set on fire? (**incendiar**.) To burn? (**arder**.) The alarm? (**la alarma**.) To evacuate? (**evacuar**.) The wound? (**la herida**.) To wound? (**herir**.) The ambulance? (**la ambulancia**.) To help? (**socorrer**.) The injured person? (**el herido**.) To rescue? (**rescatar**.) The rescue? (**el rescate**.) To save? (**salvar**.) To survive? (**sobrevivir**.) To trap? (**atrapar**.) To crash? (**chocar**.) The crash? (**el choque**.) To run over? (**atropellar**.) Unhurt? (**ileso**.) To fall? (**caer**.)

Chapter 528

Una catástrofe

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a disaster in the news: an earthquake, a flood, a tragedy.
>
> *Complete the last lesson of chapter 528: I can talk about a disaster in the news: an earthquake, a flood, a tragedy.*

528.1 el desastre — the disaster

> Before the new one: say the Spanish for unhurt, then the Spanish for to fall.

You'll want to know: el desastre

el desastre — "the disaster".

> La fiesta fue un desastre.
>
> *The party was a disaster.*

In everyday speech it is anything that goes badly: *¡Qué desastre!*

The word, taken apart — and its English cousins

desastre is usually traced to Occitan *desastre* or Italian *disastro*, where it meant 'bad star', built on *des-* and the word for 'star', from Latin *astrum* (Lewis & Short). A disaster was blamed on the stars.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desastre*
- *Say it: el desastre*, once more
- *Say it:* a sentence of your own with *el desastre*
- *Recall:* say the Spanish for unhurt, then the Spanish for to fall, then say *el desastre* again

Before you move on

What does el desastre mean? ("The disaster".) Say it once more.

528.2 la catástrofe — the catastrophe

Before the new one: say the Spanish for to fall, then the Spanish for the disaster.

You'll want to know: la catástrofe

la catástrofe — "the catastrophe".

El huracán fue una catástrofe para la isla.

The hurricane was a catastrophe for the island.

The word, taken apart — and its English cousins

catástrofe is a learned borrowing that comes from Greek *katastrophḗ* 'an overturning' (EtymDB), built on *katá* 'down' and *stréphein* 'to turn'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la catástrofe*
- *Say it: la catástrofe*, once more
- *Say it:* a sentence of your own with *la catástrofe*
- *Recall:* say the Spanish for to fall, then the Spanish for the disaster, then say *la catástrofe* again

Before you move on

What does la catástrofe mean? ("The catastrophe".) Say it once more.

528.3 la tragedia — the tragedy

Before the new one: say the Spanish for the disaster, then the Spanish for the catastrophe.

You'll want to know: la tragedia

la tragedia — "the tragedy".

El accidente fue una tragedia para el pueblo.

The accident was a tragedy for the town.

The word, taken apart — and its English cousins

tragedia is a learned borrowing from Latin *tragoedia*, which comes from Greek *tragōidía*, built on *trágos* 'goat' and *ōidḗ* 'song' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tragedia*
- *Say it: la tragedia*, once more

- *Say it:* a sentence of your own with *la tragedia*
- *Recall:* say the Spanish for the disaster, then the Spanish for the catastrophe, then say *la tragedia* again

Before you move on

What does la tragedia mean? ("The tragedy".) Say it once more.

528.4 el terremoto — the earthquake

Before the new one: say the Spanish for the catastrophe, then the Spanish for the tragedy.

You'll want to know: el terremoto

el terremoto — "the earthquake".

El terremoto duró treinta segundos.

The earthquake lasted thirty seconds.

Un sismo is a more technical word, common in Latin America.

The word, taken apart — and its English cousins

terremoto was borrowed from Italian *terremoto*, from Latin *terrae mōtus* 'a movement of the earth' (EtymDB), built on *terra* 'earth' and *mōtus* 'movement'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el terremoto*
- *Say it: el terremoto*, once more
- *Say it:* a sentence of your own with *el terremoto*
- *Recall:* say the Spanish for the catastrophe, then the Spanish for the tragedy, then say *el terremoto* again

Before you move on

What does el terremoto mean? (“The earthquake”.) Say it once more.

528.5 la inundación — the flood

Before the new one: say the Spanish for the tragedy, then the Spanish for the earthquake.

You’ll want to know: la inundación

la inundación — “the flood”.

Después de la lluvia hubo inundaciones.

After the rain there were floods.

The word, taken apart — and its English cousins

inundación is a learned borrowing from Latin *inundātiō* ’an overflowing’ (EtymDB), built on *unda* ’a wave’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la inundación*
- *Say it: la inundación*, once more
- *Say it:* a sentence of your own with *la inundación*
- *Recall:* say the Spanish for the tragedy, then the Spanish for the earthquake, then say *la inundación* again

Before you move on

What does la inundación mean? (“The flood”.) Say it once more.

Chapter 529

La explosión

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something exploded or burst, what it destroyed and what was left in the rubble.
>
> *Complete the last lesson of chapter 529: I can say that something exploded or burst, what it destroyed and what was left in the rubble.*

529.1 la explosión — the explosion

> Before the new one: say the Spanish for the earthquake, then the Spanish for the flood.

You'll want to know: la explosión

la explosión — "the explosion".

> Oímos una explosión muy fuerte.
>
> *We heard a very loud explosion.*

The word, taken apart — and its English cousins

explosión is a learned borrowing from Latin *explōsiō* 'a driving off the stage by clapping' (Lewis & Short), built on *plaudere* 'to clap'. The noise of the crowd became the noise of a blast.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la explosión*
- *Say it: la explosión*, once more
- *Say it:* a sentence of your own with *la explosión*
- *Recall:* say the Spanish for the earthquake, then the Spanish for the flood, then say *la explosión* again

Before you move on

What does la explosión mean? ("The explosion".) Say it once more.

529.2 explotar — to explode; to exploit

Before the new one: say the Spanish for the flood, then the Spanish for the explosion.

You'll want to know: explotar

explotar — "to explode; to exploit".

La bombona de gas explotó.

The gas canister exploded.

It also means to exploit: *explotar a los trabajadores.*

The word, taken apart — and its English cousins

explotar was borrowed from French *exploiter* 'to make use of' (EtymDB). The sense 'to explode' is usually explained as a later Spanish growth, pulled along by *explosión*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: explotar*
- *Say it: explotar*, once more
- *Say it:* a sentence of your own with *explotar*
- *Recall:* say the Spanish for the flood, then the Spanish for the explosion, then say *explotar* again

Before you move on

What does explotar mean? ("To explode; to exploit".) Say it once more.

529.3 estallar — to burst, to break out

Before the new one: say the Spanish for the explosion, then the Spanish for to explode.

You'll want to know: estallar

estallar — "to burst, to break out".

Estalló una tormenta por la tarde.

A storm broke out in the afternoon.

Also for wars and scandals: *Estalló la guerra.*

The word, taken apart — and its English cousins

estallar is usually traced to an old verb **astellar* 'to break into splinters', built on *astilla* 'a splinter'; the details are not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: estallar*
- *Say it: estallar*, once more
- *Say it:* a sentence of your own with *estallar*
- *Recall:* say the Spanish for the explosion, then the Spanish for to explode, then say *estallar* again

Before you move on

What does estallar mean? ("To burst, to break out".) Say it once more.

529.4 los escombros — the rubble, the debris

Before the new one: say the Spanish for to explode, then the Spanish for to burst.

You'll want to know: los escombros

los escombros — "the rubble, the debris".

Sacaron a dos personas de entre los escombros.

They pulled two people out of the rubble.

Almost always in the plural.

The word, taken apart — and its English cousins

escombros is built on *escombrar* 'to clear out', which EtymDB traces to spoken Latin **excomborāre* and a Celtic word **comboros*, usually glossed 'a barrier, a heap'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: los escombros*
- *Say it: los escombros*, once more
- *Say it:* a sentence of your own with *los escombros*
- *Recall:* say the Spanish for to explode, then the Spanish for to burst, then say *los escombros* again

Before you move on

What does los escombros mean? ("The rubble, the debris".) Say it once more.

529.5 destruir — to destroy

Before the new one: say the Spanish for to burst, then the Spanish for the rubble.

You'll want to know: destruir

destruir — "to destroy".

El fuego destruyó tres casas.

The fire destroyed three houses.

It takes a *y*: *destruyo*, *destruyó*.

The word, taken apart — and its English cousins

destruir comes from Latin *dēstruere* 'to tear down, to destroy' (EtymDB), the reverse of *struere* 'to pile up, to build'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *destruir*
- *Say it:* *destruir*, once more
- *Say it:* a sentence of your own with *destruir*
- *Recall:* say the Spanish for to burst, then the Spanish for the rubble, then say *destruir* again

Before you move on

What does destruir mean? (“To destroy”.) Say it once more.

Chapter 530

En peligro

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that there was a risk or a threat, that something was risky, and that someone attacked.
>
> *Complete the last lesson of chapter 530: I can say that there was a risk or a threat, that something was risky, and that someone attacked.*

530.1 arriesgado — risky, daring

> Before the new one: say the Spanish for the rubble, then the Spanish for to destroy.

You'll want to know: arriesgado

arriesgado — "risky, daring".

> Fue una idea muy arriesgada.
>
> *It was a very risky idea.*

Arriesgarse is to take a risk.

The word, taken apart — and its English cousins

arriesgado is built on the participle of *arriesgar* 'to risk', from *riesgo* 'a risk' (EtymDB). EtymDB takes *riesgo* back to Italian *rischio*; where that word came from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: arriesgado*
- *Say it: arriesgado*, once more
- *Say it:* a sentence of your own with *arriesgado*
- *Recall:* say the Spanish for the rubble, then the Spanish for to destroy, then say *arriesgado* again

Before you move on

What does arriesgado mean? ("Risky, daring".) Say it once more.

530.2 el riesgo — the risk

Before the new one: say the Spanish for to destroy, then the Spanish for risky.

You'll want to know: el riesgo

el riesgo — "the risk".

Hay riesgo de incendio.

There is a risk of fire.

Correr un riesgo — to take a risk.

The word, taken apart — and its English cousins

The origin of *riesgo* is not settled. EtymDB links it to old Spanish *riesco* and Italian *rischio*, but the older source of that word is still disputed.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el riesgo*
- *Say it:* *el riesgo*, once more
- *Say it:* a sentence of your own with *el riesgo*
- *Recall:* say the Spanish for to destroy, then the Spanish for risky, then say *el riesgo* again

Before you move on

What does el riesgo mean? (“The risk”.) Say it once more.

530.3 la amenaza — the threat

Before the new one: say the Spanish for risky, then the Spanish for the risk.

You’ll want to know: la amenaza

la amenaza — “the threat”.

Recibió una amenaza por teléfono.

He received a threat over the phone.

Amenazar is to threaten.

The word, taken apart — and its English cousins

amenaza comes from spoken Latin **minācia* ’a threat’ (EtymDB), built on *minācem* ’threatening’, from *minārī* ’to threaten’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la amenaza*
- *Say it: la amenaza*, once more
- *Say it:* a sentence of your own with *la amenaza*
- *Recall:* say the Spanish for risky, then the Spanish for the risk, then say *la amenaza* again

Before you move on

What does la amenaza mean? ("The threat".) Say it once more.

530.4 el ataque — the attack

Before the new one: say the Spanish for the risk, then the Spanish for the threat.

You'll want to know: el ataque

el ataque — "the attack".

El ataque ocurrió de noche.

The attack happened at night.

Un ataque de risa — a fit of laughter.

The word, taken apart — and its English cousins

ataque is built on *atacar* (EtymDB), which was borrowed from Italian *attaccare* 'to attach, to join (battle)'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ataque*
- *Say it: el ataque*, once more
- *Say it:* a sentence of your own with *el ataque*
- *Recall:* say the Spanish for the risk, then the Spanish for the threat, then say *el ataque* again

Before you move on

What does el ataque mean? (“The attack”.) Say it once more.

530.5 atacar — to attack

Before the new one: say the Spanish for the threat, then the Spanish for the attack.

You’ll want to know: atacar

atacar — “to attack”.

Un perro atacó al cartero.

A dog attacked the postman.

It takes *qu* before *e*: *ataqué*.

The word, taken apart — and its English cousins

atacar was borrowed from Italian *attaccare* ’to attach, to fasten’ (EtymDB); to join battle was to fasten on to the enemy.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *atacar*
- *Say it:* *atacar*, once more
- *Say it:* a sentence of your own with *atacar*
- *Recall:* say the Spanish for the threat, then the Spanish for the attack, then say *atacar* again

Before you move on

What does atacar mean? (“To attack”.) Say it once more.

Chapter 531

La búsqueda

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone went missing, there was a search, and they were found.
>
> *Complete the last lesson of chapter 531: I can say that someone went missing, there was a search, and they were found.*

531.1 desaparecido — missing; disappeared

> Before the new one: say the Spanish for the attack, then the Spanish for to attack.

You'll want to know: desaparecido

desaparecido — "missing; disappeared".

> El niño estuvo desaparecido dos días.
>
> *The boy was missing for two days.*

Un desaparecido is a missing person.

The word, taken apart — and its English cousins

desaparecido is built on the participle of *desaparecer* 'to disappear', from *des-* and *aparecer*, which comes from Latin *appārēre* 'to appear' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: desaparecido*
- *Say it: desaparecido*, once more
- *Say it:* a sentence of your own with *desaparecido*
- *Recall:* say the Spanish for the attack, then the Spanish for to attack, then say *desaparecido* again

Before you move on

What does desaparecido mean? ("Missing; disappeared".) Say it once more.

531.2 la búsqueda — the search

Before the new one: say the Spanish for to attack, then the Spanish for missing.

You'll want to know: la búsqueda

la búsqueda — "the search".

La búsqueda duró toda la noche.

The search lasted all night.

En busca de — in search of.

The word, taken apart — and its English cousins

búsqueda is built on *buscar* 'to look for' (EtymDB). The origin of *buscar* itself is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la búsqueda*
- *Say it: la búsqueda*, once more
- *Say it:* a sentence of your own with *la búsqueda*
- *Recall:* say the Spanish for to attack, then the Spanish for missing, then say *la búsqueda* again

Before you move on

What does la búsqueda mean? ("The search".) Say it once more.

531.3 localizar — to locate, to find; to reach

Before the new one: say the Spanish for missing, then the Spanish for the search.

You'll want to know: localizar

localizar — "to locate, to find; to reach".

Por fin localizaron el coche.

At last they located the car.

It also means to reach someone by phone: *No te pude localizar.*

The word, taken apart — and its English cousins

localizar is built on *local*, from Latin *locālis* 'of a place' (Lewis & Short), from *locus* 'a place', with the ending *-izar*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: localizar*
- *Say it: localizar*, once more
- *Say it:* a sentence of your own with *localizar*
- *Recall:* say the Spanish for missing, then the Spanish for the search, then say *localizar* again

Before you move on

What does localizar mean? ("To locate, to find; to reach".) Say it once more.

531.4 hallar — to find

Before the new one: say the Spanish for the search, then the Spanish for to locate.

You'll want to know: hallar

hallar — "to find".

Hallaron al niño en el bosque.

They found the boy in the woods.

More formal than *encontrar*; common in the news.

The word, taken apart — and its English cousins

hallar is inherited from Latin *afflāre* 'to blow, to breathe on' (EtymDB), through old Spanish *fallar*, a hunting word: the dog sniffs and finds.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: hallar*
- *Say it: hallar*, once more
- *Say it:* a sentence of your own with *hallar*
- *Recall:* say the Spanish for the search, then the Spanish for to locate, then say *hallar* again

Before you move on

What does hallar mean? ("To find".) Say it once more.

531.5 el hallazgo — the find, the discovery

Before the new one: say the Spanish for to locate, then the Spanish for to find.

You'll want to know: el hallazgo

el hallazgo — "the find, the discovery".

Fue un hallazgo muy importante.

It was a very important find.

The word, taken apart — and its English cousins

hallazgo is built on *hallar* 'to find', which is inherited from Latin *afflāre* 'to breathe on' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el hallazgo*
- *Say it: el hallazgo*, once more

- *Say it:* a sentence of your own with *el hallazgo*
- *Recall:* say the Spanish for to locate, then the Spanish for to find, then say *el hallazgo* again

Before you move on

What does el hallazgo mean? ("The find, the discovery".) Say it once more.

Chapter 532

Un misterio

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that there was a mystery or a secret, and that someone hid something.
>
> *Complete the last lesson of chapter 532: I can say that there was a mystery or a secret, and that someone hid something.*

532.1 el misterio — the mystery

> Before the new one: say the Spanish for to find, then the Spanish for the find.

You'll want to know: el misterio

el misterio — "the mystery".

> Lo que pasó aquella noche sigue siendo un misterio.
>
> *What happened that night is still a mystery.*

The word, taken apart — and its English cousins

misterio comes from Latin *mystērium*, a learned word taken from Greek *mystḗrion* 'a secret rite' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el misterio*
- *Say it:* *el misterio*, once more
- *Say it:* a sentence of your own with *el misterio*
- *Recall:* say the Spanish for to find, then the Spanish for the find, then say *el misterio* again

Before you move on

What does el misterio mean? ("The mystery".) Say it once more.

532.2 el enigma — the enigma, the puzzle

Before the new one: say the Spanish for the find, then the Spanish for the mystery.

You'll want to know: el enigma

el enigma — "the enigma, the puzzle".

Su desaparición sigue siendo un enigma.

His disappearance is still a puzzle.

Masculine although it ends in *-a*: *un enigma*.

The word, taken apart — and its English cousins

enigma is a learned borrowing from Latin *aenigma*, which comes from Greek *aínigma* 'a riddle' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el enigma*
- *Say it: el enigma*, once more
- *Say it:* a sentence of your own with *el enigma*
- *Recall:* say the Spanish for the find, then the Spanish for the mystery, then say *el enigma* again

Before you move on

What does el enigma mean? ("The enigma, the puzzle".) Say it once more.

532.3 ocultar — to conceal, to hide

Before the new one: say the Spanish for the mystery, then the Spanish for the enigma.

You'll want to know: ocultar

ocultar — "to conceal, to hide".

Ocultó la verdad durante años.

She hid the truth for years.

A little formal; often for information or feelings: *ocultar la verdad.*

The word, taken apart — and its English cousins

ocultar is a learned borrowing from Latin *occultāre* 'to hide' (EtymDB), built on *occultus* 'hidden', from *occulere* 'to cover over' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *ocultar*
- *Say it:* *ocultar*, once more
- *Say it:* a sentence of your own with *ocultar*
- *Recall:* say the Spanish for the mystery, then the Spanish for the enigma, then say *ocultar* again

Before you move on

What does ocultar mean? ("To conceal, to hide".) Say it once more.

532.4 esconder — to hide

Before the new one: say the Spanish for the enigma, then the Spanish for to conceal.

You'll want to know: esconder

esconder — "to hide".

Escondió el dinero debajo de la cama.

He hid the money under the bed.

Esconderse is to hide yourself.

The word, taken apart — and its English cousins

esconder is inherited from Latin *abscondere* 'to put away, to hide' (Lewis & Short), built on *abs* 'away' and *condere* 'to put, to store'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: esconder*
- *Say it: esconder*, once more
- *Say it:* a sentence of your own with *esconder*
- *Recall:* say the Spanish for the enigma, then the Spanish for to conceal, then say *esconder* again

Before you move on

What does esconder mean? ("To hide".) Say it once more.

532.5 el secreto — the secret; secret

Before the new one: say the Spanish for to conceal, then the Spanish for to hide.

You'll want to know: el secreto

el secreto — "the secret; secret".

Es un secreto, no se lo digas a nadie.

It is a secret, don't tell anyone.

As an adjective: *una puerta secreta.*

The word, taken apart — and its English cousins

secreto is a learned borrowing from Latin *sēcrētus* 'set apart' (EtymDB), the participle of *sēcernere* 'to separate', built on *cernere* 'to sift'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el secreto*
- *Say it:* *el secreto*, once more
- *Say it:* a sentence of your own with *el secreto*
- *Recall:* say the Spanish for to conceal, then the Spanish for to hide, then say *el secreto* again

Before you move on

What does el secreto mean? ("The secret; secret".) Say it once more.

Chapter 533

Por casualidad

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something happened by chance, by coincidence or by accident, when nobody expected it.
>
> *Complete the last lesson of chapter 533: I can say that something happened by chance, by coincidence or by accident, when nobody expected it.*

533.1 la casualidad — chance, coincidence

> Before the new one: say the Spanish for to hide, then the Spanish for the secret.

You'll want to know: la casualidad

la casualidad — "chance, coincidence".

> Nos vimos por casualidad en el mercado.
>
> *We met by chance at the market.*

Por casualidad — by chance. *¡Qué casualidad!* — what a coincidence!

The word, taken apart — and its English cousins

casualidad is built on *casual* 'happening by chance', from Latin *cāsuālis*, from *cāsus* 'a fall, a chance' (Lewis & Short), and *cāsus* is built on *cadere* 'to fall'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la casualidad*
- *Say it: la casualidad*, once more
- *Say it:* a sentence of your own with *la casualidad*
- *Recall:* say the Spanish for to hide, then the Spanish for the secret, then say *la casualidad* again

Before you move on

What does la casualidad mean? ("Chance, coincidence".) Say it once more.

533.2 la coincidencia — the coincidence

Before the new one: say the Spanish for the secret, then the Spanish for chance.

You'll want to know: la coincidencia

la coincidencia — "the coincidence".

No fue una coincidencia.

It was not a coincidence.

Coincidir is to coincide or to agree.

The word, taken apart — and its English cousins

coincidencia is built on *coincidir*, from Medieval Latin *coincidere* 'to fall together', usually explained as *co-* and *incidere* 'to fall upon' (Lewis & Short), built on *cadere* 'to fall'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la coincidencia*
- *Say it: la coincidencia*, once more
- *Say it:* a sentence of your own with *la coincidencia*
- *Recall:* say the Spanish for the secret, then the Spanish for chance, then say *la coincidencia* again

Before you move on

What does la coincidencia mean? ("The coincidence".) Say it once more.

533.3 fortuito — accidental, by chance

Before the new one: say the Spanish for chance, then the Spanish for the coincidence.

You'll want to know: fortuito

fortuito — "accidental, by chance".

Fue un hallazgo fortuito: buscaba otra cosa.

It was a chance find: I was looking for something else.

Un caso fortuito is an accident nobody could foresee.

The word, taken apart — and its English cousins

fortuito is a learned borrowing from Latin *fortuītus* 'happening by chance' (EtymDB), built on *fors* 'chance, luck' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: fortuito*
- *Say it: fortuito*, once more
- *Say it:* a sentence of your own with *fortuito*
- *Recall:* say the Spanish for chance, then the Spanish for the coincidence, then say *fortuito* again

Before you move on

What does fortuito mean? ("Accidental, by chance".) Say it once more.

533.4 inesperado — unexpected

Before the new one: say the Spanish for the coincidence, then the Spanish for accidental.

You'll want to know: inesperado

inesperado — "unexpected".

Recibimos una visita inesperada.

We had an unexpected visit.

The word, taken apart — and its English cousins

inesperado is built on *esperado*, the participle of *esperar*, with *in-* 'not'. *Esperar* is inherited from Latin *spērāre* 'to hope' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: inesperado*
- *Say it: inesperado*, once more

- *Say it:* a sentence of your own with *inesperado*
- *Recall:* say the Spanish for the coincidence, then the Spanish for accidental, then say *inesperado* again

Before you move on

What does inesperado mean? ("Unexpected".) Say it once more.

533.5 repentino — sudden

Before the new one: say the Spanish for accidental, then the Spanish for unexpected.

You'll want to know: repentino

repentino — "sudden".

El cambio de tiempo fue repentino.

The change in the weather was sudden.

De repente — suddenly — comes from the same family.

The word, taken apart — and its English cousins

repentino is a learned borrowing from Latin *repentīnus* 'sudden' (EtymDB), built on *repēns* 'sudden, unexpected'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: repentino*
- *Say it: repentino*, once more
- *Say it:* a sentence of your own with *repentino*
- *Recall:* say the Spanish for accidental, then the Spanish for unexpected, then say *repentino* again

Before you move on

What does repentino mean? (“Sudden”.) Say it once more.

Chapter 534

De pronto

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can tell a story that moves fast: suddenly, abruptly, immediately and next.
>
> *Complete the last lesson of chapter 534: I can tell a story that moves fast: suddenly, abruptly, immediately and next.*

534.1 de pronto — suddenly

> Before the new one: say the Spanish for unexpected, then the Spanish for sudden.

You'll want to know: de pronto

de pronto — "suddenly".

> De pronto se apagaron las luces.
>
> *Suddenly the lights went out.*

The same as *de repente*.

The word, taken apart — and its English cousins

de pronto is built on *pronto*, which comes from Latin *promptus* 'brought forth, ready' (EtymDB). *De pronto* is the moment something is ready to happen and happens.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: de pronto*
- *Say it: de pronto*, once more
- *Say it:* a sentence of your own with *de pronto*
- *Recall:* say the Spanish for unexpected, then the Spanish for sudden, then say *de pronto* again

Before you move on

What does de pronto mean? ("Suddenly".) Say it once more.

534.2 súbitamente — all of a sudden, suddenly

Before the new one: say the Spanish for sudden, then the Spanish for suddenly.

You'll want to know: súbitamente

súbitamente — "all of a sudden, suddenly".

Súbitamente se abrió la puerta.

Suddenly the door opened.

A written word; in speech, *de repente* or *de pronto*.

The word, taken apart — and its English cousins

súbitamente is built on *súbito* 'sudden' and the ending *-mente*. *Súbito* is a learned borrowing from Latin *subitus* 'sudden' (EtymDB), from *subīre* 'to come up', built on *sub* and *īre* 'to go'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: súbitamente*
- *Say it: súbitamente*, once more
- *Say it:* a sentence of your own with *súbitamente*
- *Recall:* say the Spanish for sudden, then the Spanish for suddenly, then say *súbitamente* again

Before you move on

What does súbitamente mean? ("All of a sudden, suddenly".) Say it once more.

534.3 inmediatamente — immediately

Before the new one: say the Spanish for suddenly, then the Spanish for all of a sudden.

You'll want to know: inmediatamente

inmediatamente — "immediately".

Llamé inmediatamente a la policía.

I immediately called the police.

Enseguida is a more everyday word for it.

The word, taken apart — and its English cousins

inmediatamente is built on *inmediato* and the ending *-mente* (EtymDB). *Inmediato* is a learned word from Latin *immediātus* 'with nothing in the middle', from *medius* 'middle'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: inmediatamente*
- *Say it: inmediatamente*, once more
- *Say it:* a sentence of your own with *inmediatamente*
- *Recall:* say the Spanish for suddenly, then the Spanish for all of a sudden, then say *inmediatamente* again

Before you move on

What does inmediatamente mean? ("Immediately".) Say it once more.

534.4 a continuación — next, then; below

Before the new one: say the Spanish for all of a sudden, then the Spanish for immediately.

You'll want to know: a continuación

a continuación — "next, then; below".

A continuación, el ladrón salió por la ventana.

Next, the thief went out through the window.

In a text it means below: *Lea las instrucciones que aparecen a continuación.*

The word, taken apart — and its English cousins

a continuación is built on *continuación*, a learned borrowing from Latin *continuātiō* 'an unbroken series, a following of one thing after another' (Lewis & Short), from *continuus* 'joined, unbroken'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a continuación*
- *Say it: a continuación*, once more
- *Say it:* a sentence of your own with *a continuación*
- *Recall:* say the Spanish for all of a sudden, then the Spanish for immediately, then say *a continuación* again

Before you move on

What does a continuación mean? ("Next, then; below".) Say it once more.

534.5 bruscamente — abruptly, sharply

Before the new one: say the Spanish for immediately, then the Spanish for next.

You'll want to know: bruscamente

bruscamente — "abruptly, sharply".

El autobús frenó bruscamente.

The bus braked sharply.

Brusco also describes a rude manner: *una respuesta brusca.*

The word, taken apart — and its English cousins

bruscamente is built on *brusco* 'abrupt' and the ending *-mente*. *Brusco* was borrowed from Italian *brusco* 'sharp, sour' (EtymDB), whose own origin is less certain.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *bruscamente*
- *Say it:* *bruscamente*, once more
- *Say it:* a sentence of your own with *bruscamente*
- *Recall:* say the Spanish for immediately, then the Spanish for next, then say *bruscamente* again

Before you move on

What does bruscamente mean? (“Abruptly, sharply”.) Say it once more.

Chapter 535

Tarde o temprano

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can put a story in order: at first, in the long run, sooner or later, finally and later.
>
> *Complete the last lesson of chapter 535: I can put a story in order: at first, in the long run, sooner or later, finally and later.*

535.1 en un principio — at first, in the beginning

> Before the new one: say the Spanish for next, then the Spanish for abruptly.

You'll want to know: en un principio

en un principio — "at first, in the beginning".

> En un principio nadie creyó al niño.
>
> *At first nobody believed the boy.*

It often sets up a later change: *En un principio..., pero luego...*

The word, taken apart — and its English cousins

en un principio is built on *principio*, which comes from Latin *prīncipium* 'a beginning' (EtymDB), from *prīnceps* 'first' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en un principio*
- *Say it: en un principio*, once more
- *Say it:* a sentence of your own with *en un principio*
- *Recall:* say the Spanish for next, then the Spanish for abruptly, then say *en un principio* again

Before you move on

What does en un principio mean? ("At first, in the beginning".) Say it once more.

535.2 a la larga — in the long run

Before the new one: say the Spanish for abruptly, then the Spanish for at first.

You'll want to know: a la larga

a la larga — "in the long run".

A la larga, fue lo mejor para todos.

In the long run, it was the best thing for everyone.

The word, taken apart — and its English cousins

a la larga is built on *largo* 'long', which is inherited from Latin *largus* 'abundant, generous' (EtymDB). Spanish moved the sense from plenty to length.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a la larga*
- *Say it: a la larga*, once more
- *Say it:* a sentence of your own with *a la larga*
- *Recall:* say the Spanish for abruptly, then the Spanish for at first, then say *a la larga* again

Before you move on

What does a la larga mean? (“In the long run”.) Say it once more.

535.3 tarde o temprano — sooner or later

Before the new one: say the Spanish for at first, then the Spanish for in the long run.

You’ll want to know: tarde o temprano

tarde o temprano — “sooner or later”.

Tarde o temprano vas a saber la verdad.

Sooner or later you are going to find out the truth.

Spanish puts late first: *tarde o temprano*.

The word, taken apart — and its English cousins

tarde o temprano is built on *tarde*, from Latin *tardē* ’slowly, late’, and *temprano*, which is inherited from spoken Latin *temporānus*, from *temporāneus* ’timely’ (EtymDB), built on *tempus* ’time’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: tarde o temprano*
- *Say it: tarde o temprano*, once more
- *Say it:* a sentence of your own with *tarde o temprano*
- *Recall:* say the Spanish for at first, then the Spanish for in the long run, then say *tarde o temprano* again

Before you move on

What does tarde o temprano mean? ("Sooner or later".) Say it once more.

535.4 finalmente — finally, in the end

Before the new one: say the Spanish for in the long run, then the Spanish for sooner or later.

You'll want to know: finalmente

finalmente — "finally, in the end".

Finalmente, la policía detuvo al ladrón.

Finally, the police arrested the thief.

Common in written stories and in the news.

The word, taken apart — and its English cousins

finalmente is built on *final* and the ending *-mente*, from Latin *mente* 'with a mind'. *Final* comes from Latin *fīnis* 'end' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: finalmente*
- *Say it: finalmente*, once more
- *Say it:* a sentence of your own with *finalmente*
- *Recall:* say the Spanish for in the long run, then the Spanish for sooner or later, then say *finalmente* again

Before you move on

What does finalmente mean? ("Finally, in the end".) Say it once more.

535.5 más tarde — later

Before the new one: say the Spanish for sooner or later, then the Spanish for finally.

You'll want to know: más tarde

más tarde — "later".

Más tarde fuimos al hospital.

Later we went to the hospital.

Hasta más tarde — see you later.

The word, taken apart — and its English cousins

más tarde is built on *tarde*, which is inherited from Latin *tardē* 'slowly, late', from *tardus* 'slow' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: más tarde*
- *Say it: más tarde*, once more
- *Say it:* a sentence of your own with *más tarde*
- *Recall:* say the Spanish for sooner or later, then the Spanish for finally, then say *más tarde* again

Before you move on

What does más tarde mean? ("Later".) Say it once more.

535.6 Repaso de los capítulos 528–535

Say the Spanish for the disaster and the catastrophe.

Your turn

Say these aloud:

- the disaster, the catastrophe, the tragedy, the earthquake, the flood
- the explosion, to explode, to burst, the rubble, to destroy
- risky, the risk, the threat, the attack, to attack
- missing, the search, to locate, to find, the find
- the mystery, the enigma, to conceal, to hide, the secret
- chance, the coincidence, accidental, unexpected, sudden
- suddenly, all of a sudden, immediately, next, abruptly
- at first, in the long run, sooner or later, finally, later

Before you move on

The disaster? (**el desastre**.) The catastrophe? (**la catástrofe**.) The tragedy? (**la tragedia**.) The earthquake? (**el terremoto**.) The flood? (**la inundación**.) The explosion? (**la explosión**.) To

explode? (**explotar**.) To burst? (**estallar**.) The rubble? (**los escombros**.) To destroy? (**destruir**.) Risky? (**arriesgado**.) The risk? (**el riesgo**.) The threat? (**la amenaza**.) The attack? (**el ataque**.) To attack? (**atacar**.) Missing? (**desaparecido**.) The search? (**la búsqueda**.) To locate? (**localizar**.) To find? (**hallar**.) The find? (**el hallazgo**.) The mystery? (**el misterio**.) The enigma? (**el enigma**.) To conceal? (**ocultar**.) To hide? (**esconder**.) The secret? (**el secreto**.) Chance? (**la casualidad**.) The coincidence? (**la coincidencia**.) Accidental? (**fortuito**.) Unexpected? (**inesperado**.) Sudden? (**repentino**.) Suddenly? (**de pronto**.) All of a sudden? (**súbitamente**.) Immediately? (**inmediatamente**.) Next? (**a continuación**.) Abruptly? (**bruscamente**.) At first? (**en un principio**.) In the long run? (**a la larga**.) Sooner or later? (**tarde o temprano**.) Finally? (**finalmente**.) Later? (**más tarde**.)

Chapter 536

Mientras tanto

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that two things happened at the same time, and that one thing happened as soon as another did.
>
> *Complete the last lesson of chapter 536: I can say that two things happened at the same time, and that one thing happened as soon as another did.*

536.1 mientras tanto — meanwhile, in the meantime

Before the new one: say the Spanish for finally, then the Spanish for later.

You'll want to know: mientras tanto

mientras tanto — "meanwhile, in the meantime".

> Mientras tanto, su hermano llamó a la ambulancia.
>
> *Meanwhile, his brother called the ambulance.*

The word, taken apart — and its English cousins

mientras tanto is built on *mientras* 'while', which is usually traced to Latin *dum interim* 'while meanwhile', and *tanto*, which comes from Latin *tantum* 'so much' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: mientras tanto*
- *Say it: mientras tanto*, once more
- *Say it:* a sentence of your own with *mientras tanto*
- *Recall:* say the Spanish for finally, then the Spanish for later, then say *mientras tanto* again

Before you move on

What does mientras tanto mean? ("Meanwhile, in the meantime".) Say it once more.

536.2 al mismo tiempo — at the same time

Before the new one: say the Spanish for later, then the Spanish for meanwhile.

You'll want to know: al mismo tiempo

al mismo tiempo — "at the same time".

Los dos hablaron al mismo tiempo.

They both spoke at the same time.

The word, taken apart — and its English cousins

al mismo tiempo is built on *mismo*, from spoken Latin **metipsimus* 'the very same', and *tiempo*, inherited from Latin *tempus* 'time' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: al mismo tiempo*
- *Say it: al mismo tiempo*, once more
- *Say it:* a sentence of your own with *al mismo tiempo*
- *Recall:* say the Spanish for later, then the Spanish for meanwhile, then say *al mismo tiempo* again

Before you move on

What does al mismo tiempo mean? ("At the same time".) Say it once more.

536.3 a la vez — at once, at the same time

Before the new one: say the Spanish for meanwhile, then the Spanish for at the same time.

You'll want to know: a la vez

a la vez — "at once, at the same time".

No puedo hacer dos cosas a la vez.

I can't do two things at once.

Close to *al mismo tiempo*, and shorter.

The word, taken apart — and its English cousins

a la vez is built on *vez*, which is inherited from Latin *vicem* 'a turn, a change' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a la vez*
- *Say it: a la vez*, once more
- *Say it:* a sentence of your own with *a la vez*
- *Recall:* say the Spanish for meanwhile, then the Spanish for at the same time, then say *a la vez* again

Before you move on

What does a la vez mean? ("At once, at the same time".) Say it once more.

536.4 en cuanto — as soon as

Before the new one: say the Spanish for at the same time, then the Spanish for at once.

You'll want to know: en cuanto

en cuanto — "as soon as".

En cuanto llegó, se fue a dormir.

As soon as he arrived, he went to bed.

About the future it takes the subjunctive: *En cuanto llegues, llámame.*

The word, taken apart — and its English cousins

en cuanto is built on *cuanto*, which is inherited from Latin *quantus* 'how great, how much' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en cuanto*
- *Say it: en cuanto*, once more
- *Say it:* a sentence of your own with *en cuanto*
- *Recall:* say the Spanish for at the same time, then the Spanish for at once, then say *en cuanto* again

Before you move on

What does en cuanto mean? ("As soon as".) Say it once more.

536.5 tan pronto como — the moment that, as soon as

Before the new one: say the Spanish for at once, then the Spanish for as soon as.

You'll want to know: tan pronto como

tan pronto como — "the moment that, as soon as".

> Tan pronto como sonó la alarma, salimos.
>
> *As soon as the alarm went off, we went out.*

The same as *en cuanto*, a little more formal.

The word, taken apart — and its English cousins

tan pronto como is built on *tan*, from Latin *tam* 'so', and *pronto*, which comes from Latin *promptus* 'brought forth, ready' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: tan pronto como*
- *Say it: tan pronto como*, once more
- *Say it:* a sentence of your own with *tan pronto como*
- *Recall:* say the Spanish for at once, then the Spanish for as soon as, then say *tan pronto como* again

Before you move on

What does tan pronto como mean? ("The moment that, as soon as".) Say it once more.

Chapter 537

Desde entonces

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what has happened since then, what happened until then, the next day, a short time ago and the day before yesterday.
>
> *Complete the last lesson of chapter 537: I can say what has happened since then, what happened until then, the next day, a short time ago and the day before yesterday.*

537.1 desde entonces — since then

Before the new one: say the Spanish for as soon as, then the Spanish for the moment that.

You'll want to know: desde entonces

desde entonces — "since then".

> Desde entonces no lo he visto.
>
> *I haven't seen him since then.*

The word, taken apart — and its English cousins

desde entonces is built on *desde* 'since' and *entonces*, which comes from Latin *in tunc* 'at that time' (EtymDB), with an *-s* added on the end.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: desde entonces*
- *Say it: desde entonces*, once more
- *Say it:* a sentence of your own with *desde entonces*
- *Recall:* say the Spanish for as soon as, then the Spanish for the moment that, then say *desde entonces* again

Before you move on

What does desde entonces mean? ("Since then".) Say it once more.

537.2 hasta entonces — until then

Before the new one: say the Spanish for the moment that, then the Spanish for since then.

You'll want to know: hasta entonces

hasta entonces — "until then".

Hasta entonces, nadie sabía nada.

Until then, nobody knew anything.

In a goodbye: *¡Hasta entonces!* — see you then!

The word, taken apart — and its English cousins

hasta entonces is built on *hasta*, which is usually traced to Arabic *ḥattā* 'until', and *entonces*, from Latin *in tunc* 'at that time' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: hasta entonces*
- *Say it: hasta entonces*, once more
- *Say it:* a sentence of your own with *hasta entonces*
- *Recall:* say the Spanish for the moment that, then the Spanish for since then, then say *hasta entonces* again

Before you move on

What does hasta entonces mean? ("Until then".) Say it once more.

537.3 al día siguiente — the next day, the following day

Before the new one: say the Spanish for since then, then the Spanish for until then.

You'll want to know: al día siguiente

al día siguiente — "the next day, the following day".

Al día siguiente volvió a la tienda.

The next day he went back to the shop.

In a story about the past use *al día siguiente*, not *mañana*.

The word, taken apart — and its English cousins

al día siguiente is built on *siguiente* 'following', from *seguir*, which comes from Latin *sequī* 'to follow' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: al día siguiente*
- *Say it: al día siguiente*, once more
- *Say it:* a sentence of your own with *al día siguiente*
- *Recall:* say the Spanish for since then, then the Spanish for until then, then say *al día siguiente* again

Before you move on

What does al día siguiente mean? ("The next day, the following day".) Say it once more.

537.4 hace poco — a short time ago, recently

Before the new one: say the Spanish for until then, then the Spanish for the next day.

You'll want to know: hace poco

hace poco — "a short time ago, recently".

Hace poco me mudé a esta ciudad.

I moved to this city a short time ago.

Hace + time = ago: *hace dos años.*

The word, taken apart — and its English cousins

hace poco is built on *hace*, from *hacer*, inherited from Latin *facere* 'to make', and *poco*, from Latin *paucus* 'few, little' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: hace poco*
- *Say it: hace poco*, once more
- *Say it:* a sentence of your own with *hace poco*
- *Recall:* say the Spanish for until then, then the Spanish for the next day, then say *hace poco* again

Before you move on

What does hace poco mean? (“A short time ago, recently”.) Say it once more.

537.5 anteayer — the day before yesterday

Before the new one: say the Spanish for the next day, then the Spanish for a short time ago.

You’ll want to know: anteayer

anteayer — “the day before yesterday”.

Anteayer hubo un accidente en mi calle.

The day before yesterday there was an accident on my street.

In Latin America people also say *antier*.

The word, taken apart — and its English cousins

anteayer is built on *ante* ’before’ and *ayer* ’yesterday’, which comes from Latin *herī* ’yesterday’ (Lewis & Short).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *anteayer*
- *Say it:* *anteayer*, once more
- *Say it:* a sentence of your own with *anteayer*
- *Recall:* say the Spanish for the next day, then the Spanish for a short time ago, then say *anteayer* again

Before you move on

What does anteayer mean? (“The day before yesterday”.) Say it once more.

Chapter 538

Antes y después

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something happened earlier, afterwards, beforehand, recently or lately.
>
> *Complete the last lesson of chapter 538: I can say that something happened earlier, afterwards, beforehand, recently or lately.*

538.1 anteriormente — previously, earlier

> Before the new one: say the Spanish for a short time ago, then the Spanish for the day before yesterday.

You'll want to know: anteriormente

anteriormente — "previously, earlier".

> Anteriormente vivía en Madrid.
>
> *Previously she lived in Madrid.*

A formal word; in speech people say *antes*.

The word, taken apart — and its English cousins

anteriormente is built on *anterior* and the ending *-mente* (EtymDB). *Anterior* is a learned word from Latin *anterior* 'former', built on *ante* 'before'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: anteriormente*
- *Say it: anteriormente*, once more
- *Say it:* a sentence of your own with *anteriormente*
- *Recall:* say the Spanish for a short time ago, then the Spanish for the day before yesterday, then say *anteriormente* again

Before you move on

What does anteriormente mean? ("Previously, earlier".) Say it once more.

538.2 posteriormente — subsequently, later

Before the new one: say the Spanish for the day before yesterday, then the Spanish for previously.

You'll want to know: posteriormente

posteriormente — "subsequently, later".

Posteriormente la policía detuvo al hombre.

The police later arrested the man.

A formal word, common in the news.

The word, taken apart — and its English cousins

posteriormente is built on *posterior* and the ending *-mente* (EtymDB). *Posterior* is a learned word from Latin *posterior* 'later', from *posterus*, built on *post* 'after' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: posteriormente*
- *Say it: posteriormente*, once more
- *Say it:* a sentence of your own with *posteriormente*
- *Recall:* say the Spanish for the day before yesterday, then the Spanish for previously, then say *posteriormente* again

Before you move on

What does posteriormente mean? ("Subsequently, later".) Say it once more.

538.3 previamente — beforehand, previously

Before the new one: say the Spanish for previously, then the Spanish for subsequently.

You'll want to know: previamente

previamente — "beforehand, previously".

Hay que reservar previamente.

You have to book beforehand.

The word, taken apart — and its English cousins

previamente is built on *previo* and the ending *-mente* (EtymDB). *Previo* is a learned word from Latin *praevius* 'going before', built on *prae* and *via* 'way' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: previamente*
- *Say it: previamente*, once more
- *Say it:* a sentence of your own with *previamente*
- *Recall:* say the Spanish for previously, then the Spanish for subsequently, then say *previamente* again

Before you move on

What does previamente mean? ("Beforehand, previously".) Say it once more.

538.4 recientemente — recently

Before the new one: say the Spanish for subsequently, then the Spanish for beforehand.

You'll want to know: recientemente

recientemente — "recently".

Recientemente abrieron un museo nuevo.

A new museum opened recently.

Before a participle it shortens to *recién*: *recién llegado*.

The word, taken apart — and its English cousins

recientemente is built on *reciente* and the ending *-mente* (EtymDB). *Reciente* is a learned word from Latin *recēns* 'fresh, new'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: recientemente*
- *Say it: recientemente*, once more
- *Say it:* a sentence of your own with *recientemente*
- *Recall:* say the Spanish for subsequently, then the Spanish for beforehand, then say *recientemente* again

Before you move on

What does recientemente mean? (“Recently”.) Say it once more.

538.5 últimamente — lately

Before the new one: say the Spanish for beforehand, then the Spanish for recently.

You’ll want to know: últimamente

últimamente — “lately”.

Últimamente duermo mal.

Lately I have been sleeping badly.

Usually with the present or the present perfect.

The word, taken apart — and its English cousins

últimamente is built on *último* and the ending *-mente* (EtymDB). *Último* is a learned word from Latin *ultimus* ’farthest, last’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *últimamente*
- *Say it:* *últimamente*, once more
- *Say it:* a sentence of your own with *últimamente*
- *Recall:* say the Spanish for beforehand, then the Spanish for recently, then say *últimamente* again

Before you move on

What does últimamente mean? ("Lately".) Say it once more.

Chapter 539

Semestres y quincenas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about stretches of time: half a year, a fortnight, five years, a millennium and a period.
>
> *Complete the last lesson of chapter 539: I can talk about stretches of time: half a year, a fortnight, five years, a millennium and a period.*

539.1 el semestre — the semester, the half-year

> Before the new one: say the Spanish for recently, then the Spanish for lately.

You'll want to know: el semestre

el semestre — "the semester, the half-year".

> El primer semestre del año fue muy difícil.
>
> *The first half of the year was very hard.*

At university it is a term of six months.

The word, taken apart — and its English cousins

semestre comes from Latin *sēmestris* 'of six months' (EtymDB), built on *sex* 'six' and *mēnsis* 'month'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el semestre*
- *Say it: el semestre*, once more
- *Say it:* a sentence of your own with *el semestre*
- *Recall:* say the Spanish for recently, then the Spanish for lately, then say *el semestre* again

Before you move on

What does el semestre mean? ("The semester, the half-year".) Say it once more.

539.2 la quincena — the fortnight, two weeks

Before the new one: say the Spanish for lately, then the Spanish for the semester.

You'll want to know: la quincena

la quincena — "the fortnight, two weeks".

Nos fuimos de vacaciones la primera quincena de agosto.

We went on holiday in the first two weeks of August.

Some workers are paid *por quincenas*, every two weeks.

The word, taken apart — and its English cousins

quincena is built on *quince* 'fifteen' (EtymDB), which is inherited from Latin *quīndecim* 'fifteen', from *quīnque* 'five' and *decem* 'ten' (Lewis & Short). A fortnight is counted as fifteen days.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la quincena*
- *Say it: la quincena*, once more
- *Say it:* a sentence of your own with *la quincena*
- *Recall:* say the Spanish for lately, then the Spanish for the semester, then say *la quincena* again

Before you move on

What does la quincena mean? ("The fortnight, two weeks".) Say it once more.

539.3 el lustro — the five-year period

Before the new one: say the Spanish for the semester, then the Spanish for the fortnight.

You'll want to know: el lustro

el lustro — "the five-year period".

En el último lustro la ciudad cambió mucho.

In the last five years the city changed a lot.

A formal word, common in the press.

The word, taken apart — and its English cousins

lustro is a learned borrowing from Latin *lūstrum* (EtymDB), the cleansing sacrifice that Rome held every five years after the census.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el lustro*
- *Say it: el lustro*, once more
- *Say it:* a sentence of your own with *el lustro*
- *Recall:* say the Spanish for the semester, then the Spanish for the fortnight, then say *el lustro* again

Before you move on

What does el lustro mean? ("The five-year period".) Say it once more.

539.4 el milenio — the millennium

Before the new one: say the Spanish for the fortnight, then the Spanish for the five-year period.

You'll want to know: el milenio

el milenio — "the millennium".

La ciudad tiene más de un milenio.

The city is more than a thousand years old.

The word, taken apart — and its English cousins

milenio is a learned borrowing from New Latin *millennium*, built on *mīlle* 'a thousand' and *annus* 'year' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el milenio*
- *Say it: el milenio*, once more

- *Say it:* a sentence of your own with *el milenio*
- *Recall:* say the Spanish for the fortnight, then the Spanish for the five-year period, then say *el milenio* again

Before you move on

What does el milenio mean? ("The millennium".) Say it once more.

539.5 el período — the period

Before the new one: say the Spanish for the five-year period, then the Spanish for the millennium.

You'll want to know: el período

el período — "the period".

Fue un período difícil para la familia.

It was a difficult period for the family.

Periodo without the accent is also correct.

The word, taken apart — and its English cousins

período is a learned borrowing from Latin *periodus*, which comes from Greek *períodos* 'a going round, a cycle' (EtymDB), built on *perí* 'around' and *hodós* 'way'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el período*
- *Say it: el período*, once more
- *Say it:* a sentence of your own with *el período*
- *Recall:* say the Spanish for the five-year period, then the Spanish for the millennium, then say *el período* again

Before you move on

What does el período mean? (“The period”.) Say it once more.

Chapter 540

A finales de año

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say whether something happened at the beginning, in the middle or at the end of a month or a year, and how often it happens.
>
> *Complete the last lesson of chapter 540: I can say whether something happened at the beginning, in the middle or at the end of a month or a year, and how often it happens.*

540.1 a principios de — at the beginning of

> Before the new one: say the Spanish for the millennium, then the Spanish for the period.

You'll want to know: a principios de

a principios de — "at the beginning of".

> Llegaron a principios de junio.
>
> *They arrived at the beginning of June.*

Used with months, years and centuries: *a principios del siglo XX*.

The word, taken apart — and its English cousins

a principios de is built on *principio*, from Latin *prīncipium* 'a beginning' (Lewis & Short), which comes from *prīnceps* 'first'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a principios de*
- *Say it: a principios de*, once more
- *Say it:* a sentence of your own with *a principios de*
- *Recall:* say the Spanish for the millennium, then the Spanish for the period, then say *a principios de* again

Before you move on

What does a principios de mean? ("At the beginning of".) Say it once more.

540.2 a mediados de — in the middle of, around the middle of

Before the new one: say the Spanish for the period, then the Spanish for at the beginning of.

You'll want to know: a mediados de

a mediados de — "in the middle of, around the middle of".

La boda es a mediados de mayo.

The wedding is in the middle of May.

The word, taken apart — and its English cousins

a mediados de is built on *mediado*, from *mediar* 'to reach the middle', which comes from Latin *medius* 'middle' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a mediados de*
- *Say it: a mediados de*, once more
- *Say it:* a sentence of your own with *a mediados de*
- *Recall:* say the Spanish for the period, then the Spanish for at the beginning of, then say *a mediados de* again

Before you move on

What does a mediados de mean? ("In the middle of, around the middle of".) Say it once more.

540.3 a finales de — at the end of

Before the new one: say the Spanish for at the beginning of, then the Spanish for in the middle of.

You'll want to know: a finales de

a finales de — "at the end of".

Se jubiló a finales del año pasado.

He retired at the end of last year.

A fines de is also common in Latin America.

The word, taken apart — and its English cousins

a finales de is built on *final*, a learned word from Latin *fīnālis*, which comes from *fīnis* 'end, boundary' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a finales de*
- *Say it: a finales de*, once more
- *Say it:* a sentence of your own with *a finales de*
- *Recall:* say the Spanish for at the beginning of, then the Spanish for in the middle of, then say *a finales de* again

Before you move on

What does a finales de mean? ("At the end of".) Say it once more.

540.4 semanal — weekly

Before the new one: say the Spanish for in the middle of, then the Spanish for at the end of.

You'll want to know: semanal

semanal — "weekly".

El mercado semanal es los jueves.

The weekly market is on Thursdays.

The word, taken apart — and its English cousins

semanal is built on *semana* 'week' with the ending *-al* (EtymDB). *Semana* is inherited from Late Latin *septimāna* 'a set of seven', built on *septem* 'seven'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: semanal*
- *Say it: semanal*, once more

- *Say it:* a sentence of your own with *semanal*
- *Recall:* say the Spanish for in the middle of, then the Spanish for at the end of, then say *semanal* again

Before you move on

What does semanal mean? (“Weekly”.) Say it once more.

540.5 anual — yearly, annual

Before the new one: say the Spanish for at the end of, then the Spanish for weekly.

You’ll want to know: anual

anual — “yearly, annual”.

La fiesta anual del pueblo es en agosto.

The town’s annual festival is in August.

The word, taken apart — and its English cousins

anual is a learned borrowing from Late Latin *annuālis* ’yearly’ (EtymDB), built on *annus* ’year’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: anual*
- *Say it: anual*, once more
- *Say it:* a sentence of your own with *anual*
- *Recall:* say the Spanish for at the end of, then the Spanish for weekly, then say *anual* again

Before you move on

What does anual mean? ("Yearly, annual".) Say it once more.

Chapter 541

Cuánto duró

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say how long something went on, what phase it was in and how the time went by.
>
> *Complete the last lesson of chapter 541: I can say how long something went on, what phase it was in and how the time went by.*

541.1 la fase — the phase, the stage

Before the new one: say the Spanish for weekly, then the Spanish for yearly.

You'll want to know: la fase

la fase — "the phase, the stage".

> El proyecto está en la primera fase.
>
> *The project is in its first phase.*

The word, taken apart — and its English cousins

fase comes from Greek *phásis* 'an appearance' (EtymDB), the word for each new look of the moon.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la fase*
- *Say it: la fase*, once more
- *Say it:* a sentence of your own with *la fase*
- *Recall:* say the Spanish for weekly, then the Spanish for yearly, then say *la fase* again

Before you move on

What does la fase mean? ("The phase, the stage".) Say it once more.

541.2 el transcurso — the passing, the span (of time)

Before the new one: say the Spanish for yearly, then the Spanish for the phase.

You'll want to know: el transcurso

el transcurso — "the passing, the span (of time)".

En el transcurso de la noche llegó más gente.

As the night went on, more people arrived.

En el transcurso de — during, over the span of.

The word, taken apart — and its English cousins

transcurso is a learned borrowing from Latin *trānscursus* 'a running through' (Lewis & Short), built on *trāns* 'across' and *currere* 'to run'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el transcurso*
- *Say it: el transcurso*, once more
- *Say it:* a sentence of your own with *el transcurso*
- *Recall:* say the Spanish for yearly, then the Spanish for the phase, then say *el transcurso* again

Before you move on

What does el transcurso mean? ("The passing, the span (of time)".) Say it once more.

541.3 la duración — the length, the duration

Before the new one: say the Spanish for the phase, then the Spanish for the passing.

You'll want to know: la duración

la duración — "the length, the duration".

La duración del viaje es de dos horas.

The journey takes two hours.

The word, taken apart — and its English cousins

duración is a learned borrowing from Medieval Latin *dūrātiō* (EtymDB), built on *dūrāre* 'to last', from *dūrus* 'hard'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la duración*
- *Say it: la duración*, once more

- *Say it:* a sentence of your own with *la duración*
- *Recall:* say the Spanish for the phase, then the Spanish for the passing, then say *la duración* again

Before you move on

What does la duración mean? ("The length, the duration".) Say it once more.

541.4 prolongarse — to go on, to drag on

Before the new one: say the Spanish for the passing, then the Spanish for the length.

You'll want to know: prolongarse

prolongarse — "to go on, to drag on".

La reunión se prolongó hasta la medianoche.

The meeting went on until midnight.

It takes *gu* before *e*: *se prolongue*. Without *se*, *prolongar* is to extend.

The word, taken apart — and its English cousins

prolongarse is built on *prolongar*, a learned borrowing from Late Latin *prōlongāre* 'to lengthen' (EtymDB), built on *prō* and *longus* 'long' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: prolongarse*
- *Say it: prolongarse*, once more
- *Say it:* a sentence of your own with *prolongarse*

- *Recall:* say the Spanish for the passing, then the Spanish for the length, then say *prolongarse* again

Before you move on

What does prolongarse mean? ("To go on, to drag on".) Say it once more.

541.5 transcurrir — to go by, to pass (of time); to take place

Before the new one: say the Spanish for the length, then the Spanish for to go on.

You'll want to know: transcurrir

transcurrir — "to go by, to pass (of time); to take place".

Transcurrieron dos horas sin noticias.

Two hours went by without news.

A written word; the story *transcurre en Sevilla* is set in Seville.

The word, taken apart — and its English cousins

transcurrir is a learned borrowing from Latin *trānscurrere* 'to run across' (EtymDB), built on *trāns* 'across' and *currere* 'to run'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: transcurrir*
- *Say it: transcurrir*, once more
- *Say it:* a sentence of your own with *transcurrir*
- *Recall:* say the Spanish for the length, then the Spanish for to go on, then say *transcurrir* again

Before you move on

What does transcurrir mean? ("To go by, to pass (of time); to take place".) Say it once more.

Chapter 542

El comienzo

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say when something began, started and ended, using formal and everyday words.
>
> *Complete the last lesson of chapter 542: I can say when something began, started and ended, using formal and everyday words.*

542.1 comenzar — to begin, to start

> Before the new one: say the Spanish for to go on, then the Spanish for to go by.

You'll want to know: comenzar

comenzar — "to begin, to start".

> La película comenzó a las nueve.
>
> *The film began at nine.*

Stem change: *comienza*, *comienzan*. A little more formal than *empezar*. *Comenzar a* + infinitive.

The word, taken apart — and its English cousins

comenzar is inherited from spoken Latin **cominitiāre* (EtymDB), built on *com-* and *initiāre* 'to begin', from *initium* 'a beginning'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *comenzar*
- *Say it:* *comenzar*, once more
- *Say it:* a sentence of your own with *comenzar*
- *Recall:* say the Spanish for to go on, then the Spanish for to go by, then say *comenzar* again

Before you move on

What does comenzar mean? ("To begin, to start".) Say it once more.

542.2 iniciar — to launch, to start, to begin

Before the new one: say the Spanish for to go by, then the Spanish for to begin.

You'll want to know: iniciar

iniciar — "to launch, to start, to begin".

La policía inició una investigación.

The police started an investigation.

Formal; common in the news. *Iniciar sesión* — to log in.

The word, taken apart — and its English cousins

iniciar is a learned borrowing from Latin *initiāre* 'to begin, to initiate' (EtymDB), built on *initium* 'a going in, a beginning'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: iniciar*
- *Say it: iniciar*, once more
- *Say it:* a sentence of your own with *iniciar*
- *Recall:* say the Spanish for to go by, then the Spanish for to begin, then say *iniciar* again

Before you move on

What does iniciar mean? ("To launch, to start, to begin".) Say it once more.

542.3 el comienzo — the beginning, the start

Before the new one: say the Spanish for to begin, then the Spanish for to launch.

You'll want to know: el comienzo

el comienzo — "the beginning, the start".

El comienzo del libro es muy lento.

The beginning of the book is very slow.

Al comienzo — at the beginning.

The word, taken apart — and its English cousins

comienzo is built on *comenzar* (EtymDB), which comes from spoken Latin **cominitiāre*, from *initium* 'a beginning'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el comienzo*
- *Say it: el comienzo*, once more
- *Say it:* a sentence of your own with *el comienzo*
- *Recall:* say the Spanish for to begin, then the Spanish for to launch, then say *el comienzo* again

Before you move on

What does el comienzo mean? ("The beginning, the start".) Say it once more.

542.4 el arranque — the start; the outburst

Before the new one: say the Spanish for to launch, then the Spanish for the beginning.

You'll want to know: el arranque

el arranque — "the start; the outburst".

El arranque del curso fue difícil.

The start of the school year was hard.

A car's starter is also *el arranque*.

The word, taken apart — and its English cousins

arranque is built on *arrancar* 'to pull out, to start'. The origin of *arrancar* is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el arranque*
- *Say it:* *el arranque*, once more
- *Say it:* a sentence of your own with *el arranque*
- *Recall:* say the Spanish for to launch, then the Spanish for the beginning, then say *el arranque* again

Before you move on

What does el arranque mean? (“The start; the outburst”.) Say it once more.

542.5 finalizar — to end, to finish

Before the new one: say the Spanish for the beginning, then the Spanish for the start.

You’ll want to know: finalizar

finalizar — “to end, to finish”.

La reunión finalizó a las seis.

The meeting ended at six.

Formal; in speech people say *terminar* or *acabar*.

The word, taken apart — and its English cousins

finalizar is built on *final* with the ending *-izar*. *Final* comes from Latin *fīnālis*, from *fīnis* ’end’ (Lewis & Short).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: finalizar*
- *Say it: finalizar*, once more
- *Say it:* a sentence of your own with *finalizar*
- *Recall:* say the Spanish for the beginning, then the Spanish for the start, then say *finalizar* again

Before you move on

What does finalizar mean? ("To end, to finish".) Say it once more.

Chapter 543

Más tarde de lo previsto

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say that something was resumed, delayed, put off, moved forward or stayed the same.
>
> *Complete the last lesson of chapter 543: I can say that something was resumed, delayed, put off, moved forward or stayed the same.*

543.1 reanudar — to resume, to start again

> Before the new one: say the Spanish for the start, then the Spanish for to end.

You'll want to know: reanudar

reanudar — "to resume, to start again".

> Después de la lluvia reanudaron el partido.
>
> *After the rain they resumed the match.*

Reanudarse — to start up again: *Se reanudó el servicio.*

The word, taken apart — and its English cousins

reanudar is built on *anudar* 'to tie a knot' with *re-* 'again'. *Anudar*, older *añudar* (EtymDB), is built on *nudo* 'a knot', from Latin *nōdus* 'a knot' (Lewis & Short). To resume is to tie the thread again.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: reanudar*
- *Say it: reanudar*, once more
- *Say it:* a sentence of your own with *reanudar*
- *Recall:* say the Spanish for the start, then the Spanish for to end, then say *reanudar* again

Before you move on

What does reanudar mean? ("To resume, to start again".) Say it once more.

543.2 retrasar — to delay, to put back

Before the new one: say the Spanish for to end, then the Spanish for to resume.

You'll want to know: retrasar

retrasar — "to delay, to put back".

La nieve retrasó el vuelo.

The snow delayed the flight.

Retrasarse is to be late: *El tren se retrasó.*

The word, taken apart — and its English cousins

retrasar is usually explained as built on *tras* 'behind', which comes from Latin *trāns* 'across, beyond' (Lewis & Short), with *re-* and the verb ending *-ar*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: retrasar*
- *Say it: retrasar*, once more
- *Say it:* a sentence of your own with *retrasar*
- *Recall:* say the Spanish for to end, then the Spanish for to resume, then say *retrasar* again

Before you move on

What does retrasar mean? ("To delay, to put back".) Say it once more.

543.3 aplazar — to postpone, to put off

Before the new one: say the Spanish for to resume, then the Spanish for to delay.

You'll want to know: aplazar

aplazar — "to postpone, to put off".

Aplazaron el partido por la lluvia.

They postponed the match because of the rain.

It takes *c* before *e*: *aplacé*. *Aplazar algo hasta el lunes* — to put something off until Monday.

The word, taken apart — and its English cousins

aplazar is usually explained as built on *plazo* 'a time limit' with *a-* and *-ar*. *Plazo* comes from Latin *placitum* 'what has been agreed', from *placēre* 'to please' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: aplazar*
- *Say it: aplazar*, once more
- *Say it:* a sentence of your own with *aplazar*
- *Recall:* say the Spanish for to resume, then the Spanish for to delay, then say *aplazar* again

Before you move on

What does aplazar mean? ("To postpone, to put off".) Say it once more.

543.4 adelantar — to bring forward; to overtake

Before the new one: say the Spanish for to delay, then the Spanish for to postpone.

You'll want to know: adelantar

adelantar — "to bring forward; to overtake".

Adelantaron la reunión al lunes.

They brought the meeting forward to Monday.

On the road it means to overtake. *Adelantarse* is to get ahead.

The word, taken apart — and its English cousins

adelantar is built on *adelante* 'forward' (EtymDB), which comes from *delante*, old Spanish *denante*, built on Latin *dē*, *in* and *ante* 'before'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: adelantar*
- *Say it: adelantar*, once more
- *Say it:* a sentence of your own with *adelantar*
- *Recall:* say the Spanish for to delay, then the Spanish for to postpone, then say *adelantar* again

Before you move on

What does adelantar mean? ("To bring forward; to overtake".) Say it once more.

543.5 permanecer — to remain, to stay

Before the new one: say the Spanish for to postpone, then the Spanish for to bring forward.

You'll want to know: permanecer

permanecer — "to remain, to stay".

Permaneció en el hospital una semana.

He remained in hospital for a week.

Formal; in speech *quedarse*. It takes a *z*: *permanezco*.

The word, taken apart — and its English cousins

permanecer comes from Latin *permanēre* 'to stay to the end, to last' (EtymDB), built on *per* and *manēre* 'to stay', with the Spanish ending *-ecer*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: permanecer*
- *Say it: permanecer*, once more
- *Say it:* a sentence of your own with *permanecer*
- *Recall:* say the Spanish for to postpone, then the Spanish for to bring forward, then say *permanecer* again

Before you move on

What does permanecer mean? ("To remain, to stay".) Say it once more.

543.6 Repaso de los capítulos 536–543

Say the Spanish for meanwhile and at the same time.

Your turn

Say these aloud:

- meanwhile, at the same time, at once, as soon as, the moment that
- since then, until then, the next day, a short time ago, the day before yesterday
- previously, subsequently, beforehand, recently, lately
- the semester, the fortnight, the five-year period, the millennium, the period
- at the beginning of, in the middle of, at the end of, weekly, yearly
- the phase, the passing, the length, to go on, to go by
- to begin, to launch, the beginning, the start, to end
- to resume, to delay, to postpone, to bring forward, to remain

Before you move on

Meanwhile? (**mientras tanto**.) At the same time? (**al mismo tiempo**.) At once? (**a la vez**.) As soon as? (**en cuanto**.) The moment that? (**tan pronto como**.) Since then? (**desde entonces**.) Until then? (**hasta entonces**.) The next day? (**al día siguiente**.) A short time ago? (**hace poco**.) The day before yesterday? (**anteayer**.) Previously? (**anteriormente**.) Subsequently? (**posteriormente**.) Beforehand? (**previamente**.) Recently? (**recientemente**.) Lately? (**últimamente**.) The semester? (**el semestre**.) The fortnight? (**la quincena**.) The five-year period? (**el lustro**.) The millennium? (**el milenio**.) The period? (**el período**.) At the beginning of? (**a principios de**.) In the middle of? (**a mediados de**.) At the end of? (**a finales de**.) Weekly? (**semanal**.) Yearly? (**anual**.) The phase? (**la fase**.) The passing? (**el transcurso**.) The length? (**la duración**.) To go on? (**prolongarse**.) To go by? (**transcurrir**.) To begin? (**comenzar**.) To launch? (**iniciar**.) The beginning? (**el comienzo**.) The start? (**el arranque**.) To end? (**finalizar**.) To resume? (**reanudar**.) To delay? (**retrasar**.) To postpone? (**aplazar**.) To bring forward? (**adelantar**.) To remain? (**permanecer**.)

Chapter 544

Un bebé en camino

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a pregnancy and a birth: the newborn baby and how the birth went.
>
> *Complete the last lesson of chapter 544: I can talk about a pregnancy and a birth: the newborn baby and how the birth went.*

544.1 el nacimiento — the birth

> Before the new one: say the Spanish for to bring forward, then the Spanish for to remain.

You'll want to know: el nacimiento

el nacimiento — "the birth".

> Celebramos el nacimiento de mi sobrina.
>
> *We celebrated my niece's birth.*

La fecha de nacimiento — the date of birth.

The word, taken apart — and its English cousins

nacimiento is built on *nacer* 'to be born' with the ending *-miento*. *Nacer* comes from Latin *nāscī* 'to be born' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el nacimiento*
- *Say it: el nacimiento*, once more
- *Say it:* a sentence of your own with *el nacimiento*
- *Recall:* say the Spanish for to bring forward, then the Spanish for to remain, then say *el nacimiento* again

Before you move on

What does el nacimiento mean? ("The birth".) Say it once more.

544.2 el parto — the delivery (of a baby), the birth

Before the new one: say the Spanish for to remain, then the Spanish for the birth.

You'll want to know: el parto

el parto — "the delivery (of a baby), the birth".

El parto fue largo pero todo salió bien.

The birth was long but everything went well.

Estar de parto — to be in labour.

The word, taken apart — and its English cousins

parto is inherited from Latin *partus* 'a birth' (EtymDB), built on *parere* 'to bring forth, to give birth'. It is not the *parere* 'to appear' behind *parecer*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el parto*
- *Say it: el parto*, once more
- *Say it:* a sentence of your own with *el parto*
- *Recall:* say the Spanish for to remain, then the Spanish for the birth, then say *el parto* again

Before you move on

What does el parto mean? ("The delivery (of a baby), the birth".) Say it once more.

544.3 dar a luz — to give birth

Before the new one: say the Spanish for the birth, then the Spanish for the delivery.

You'll want to know: dar a luz

dar a luz — "to give birth".

Dio a luz a una niña el martes.

She gave birth to a girl on Tuesday.

Dar a luz a + baby. Word for word, to give to the light.

The word, taken apart — and its English cousins

dar a luz is built on *dar*, inherited from Latin *dare* 'to give', and *luz*, inherited from Latin *lūx* 'light' (Lewis & Short). To give birth is to give the child to the light.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dar a luz*
- *Say it: dar a luz*, once more
- *Say it:* a sentence of your own with *dar a luz*
- *Recall:* say the Spanish for the birth, then the Spanish for the delivery, then say *dar a luz* again

Before you move on

What does dar a luz mean? ("To give birth".) Say it once more.

544.4 el embarazo — the pregnancy

Before the new one: say the Spanish for the delivery, then the Spanish for to give birth.

You'll want to know: el embarazo

el embarazo — "the pregnancy".

Tuvo un embarazo tranquilo.

She had an easy pregnancy.

It once meant an obstacle, and in formal Spanish it still can.

The word, taken apart — and its English cousins

embarazo is built on *embarazar*, first 'to get in the way, to hinder'. The origin of *embarazar* is not settled; it is often linked to Portuguese *embaraçar* and an old word *baraça* 'a cord'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el embarazo*
- *Say it: el embarazo*, once more
- *Say it:* a sentence of your own with *el embarazo*
- *Recall:* say the Spanish for the delivery, then the Spanish for to give birth, then say *el embarazo* again

Before you move on

What does el embarazo mean? ("The pregnancy".) Say it once more.

544.5 el recién nacido — the newborn baby

Before the new one: say the Spanish for to give birth, then the Spanish for the pregnancy.

You'll want to know: el recién nacido

el recién nacido — "the newborn baby".

El recién nacido pesó tres kilos.

The newborn baby weighed three kilos.

It agrees: *una niña recién nacida.*

The word, taken apart — and its English cousins

el recién nacido is built on *recién*, the short form of *reciente*, from Latin *recēns* 'fresh, new', and *nacido*, the participle of *nacer*, from Latin *nāscī* 'to be born' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el recién nacido*
- *Say it: el recién nacido*, once more
- *Say it:* a sentence of your own with *el recién nacido*
- *Recall:* say the Spanish for to give birth, then the Spanish for the pregnancy, then say *el recién nacido* again

Before you move on

What does el recién nacido mean? ("The newborn baby".) Say it once more.

Chapter 545

De niño

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about growing up: who brought me up, my childhood, my youth and my generation.
>
> *Complete the last lesson of chapter 545: I can talk about growing up: who brought me up, my childhood, my youth and my generation.*

545.1 criar — to bring up, to raise

> Before the new one: say the Spanish for the pregnancy, then the Spanish for the newborn baby.

You'll want to know: criar

criar — "to bring up, to raise".

> Mi abuela me crió en el pueblo.
>
> *My grandmother brought me up in the village.*

Criarse is to grow up: *Me crié en Valencia.* It takes an accent: *crío.*

The word, taken apart — and its English cousins

criar is inherited from Latin *creāre* 'to make, to bring forth' (EtymDB). Spanish kept the everyday sense of rearing children; *crear* 'to create' is the same verb taken again from books.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: criar*
- *Say it: criar*, once more
- *Say it:* a sentence of your own with *criar*
- *Recall:* say the Spanish for the pregnancy, then the Spanish for the newborn baby, then say *criar* again

Before you move on

What does criar mean? ("To bring up, to raise".) Say it once more.

545.2 la niñez — childhood

Before the new one: say the Spanish for the newborn baby, then the Spanish for to bring up.

You'll want to know: la niñez

la niñez — "childhood".

Tuve una niñez muy feliz.

I had a very happy childhood.

La infancia means the same.

The word, taken apart — and its English cousins

niñez is built on *niño* 'child' with the ending *-ez*. *Niño* is usually traced to a baby-talk word, *ninno*, not to any Latin noun.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la niñez*
- *Say it: la niñez*, once more
- *Say it:* a sentence of your own with *la niñez*
- *Recall:* say the Spanish for the newborn baby, then the Spanish for to bring up, then say *la niñez* again

Before you move on

What does la niñez mean? (“Childhood”.) Say it once more.

545.3 la juventud — youth; young people

Before the new one: say the Spanish for to bring up, then the Spanish for childhood.

You’ll want to know: la juventud

la juventud — “youth; young people”.

En mi juventud viajé mucho.

In my youth I travelled a lot.

La juventud is also young people as a group.

The word, taken apart — and its English cousins

juventud comes from Latin *iuventūs*, *iuventūtis* ’youth’, built on *iuvenis* ’young’ (Lewis & Short). English *juvenile* is from the same root.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la juventud*
- *Say it: la juventud*, once more
- *Say it:* a sentence of your own with *la juventud*
- *Recall:* say the Spanish for to bring up, then the Spanish for childhood, then say *la juventud* again

Before you move on

What does la juventud mean? ("Youth; young people".) Say it once more.

545.4 la adolescencia — adolescence, the teenage years

Before the new one: say the Spanish for childhood, then the Spanish for youth.

You'll want to know: la adolescencia

la adolescencia — "adolescence, the teenage years".

Pasé la adolescencia en Barcelona.

I spent my teenage years in Barcelona.

En la adolescencia — in your teens.

The word, taken apart — and its English cousins

adolescencia is a learned borrowing from Latin *adolēscentia* 'youth' (EtymDB), built on *adolēscere* 'to grow up'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la adolescencia*
- *Say it: la adolescencia*, once more
- *Say it:* a sentence of your own with *la adolescencia*
- *Recall:* say the Spanish for childhood, then the Spanish for youth, then say *la adolescencia* again

Before you move on

What does la adolescencia mean? ("Adolescence, the teenage years".) Say it once more.

545.5 la generación — the generation

Before the new one: say the Spanish for youth, then the Spanish for adolescence.

You'll want to know: la generación

la generación — "the generation".

Tres generaciones viven en esa casa.

Three generations live in that house.

The word, taken apart — and its English cousins

generación is a learned borrowing from Latin *generātiō* 'a begetting' (EtymDB), from *generāre*, built on *genus* 'birth, kind'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la generación*
- *Say it: la generación*, once more

- *Say it:* a sentence of your own with *la generación*
- *Recall:* say the Spanish for youth, then the Spanish for adolescence, then say *la generación* again

Before you move on

What does la generación mean? (“The generation”.) Say it once more.

Chapter 546

El bautizo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a christening: the godparents, the baby's nappies and the grandchildren.
>
> *Complete the last lesson of chapter 546: I can talk about a christening: the godparents, the baby's nappies and the grandchildren.*

546.1 el bautizo — the christening

> Before the new one: say the Spanish for adolescence, then the Spanish for the generation.

You'll want to know: el bautizo

el bautizo — "the christening".

> El bautizo fue en la iglesia del pueblo.
>
> *The christening was in the village church.*

Bautizar is to christen. *El bautismo* is the sacrament itself.

The word, taken apart — and its English cousins

bautizo is built on *bautizar*, which comes from Church Latin *baptīzāre* 'to baptize' (Lewis & Short), taken from Greek *baptízein* 'to dip in water'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el bautizo*
- *Say it: el bautizo*, once more
- *Say it:* a sentence of your own with *el bautizo*
- *Recall:* say the Spanish for adolescence, then the Spanish for the generation, then say *el bautizo* again

Before you move on

What does el bautizo mean? ("The christening".) Say it once more.

546.2 el padrino — the godfather; the best man

Before the new one: say the Spanish for the generation, then the Spanish for the christening.

You'll want to know: el padrino

el padrino — "the godfather; the best man".

Mi tío es mi padrino.

My uncle is my godfather.

At a wedding, *el padrino* walks with the bride or the groom. *Los padrinos* — the godparents.

The word, taken apart — and its English cousins

padrino is inherited from spoken Latin **patrīnus* 'a godfather' (EtymDB), built on *pater* 'father'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el padrino*
- *Say it: el padrino*, once more
- *Say it:* a sentence of your own with *el padrino*
- *Recall:* say the Spanish for the generation, then the Spanish for the christening, then say *el padrino* again

Before you move on

What does el padrino mean? (“The godfather; the best man”.) Say it once more.

546.3 la madrina — the godmother

Before the new one: say the Spanish for the christening, then the Spanish for the godfather.

You’ll want to know: la madrina

la madrina — “the godmother”.

Mi madrina me regaló una bicicleta.

My godmother gave me a bicycle.

At a wedding she is the woman who accompanies the groom.

The word, taken apart — and its English cousins

madrina is inherited from spoken Latin **mātrīna* (EtymDB), built on *māter* ’mother’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la madrina*
- *Say it: la madrina*, once more
- *Say it:* a sentence of your own with *la madrina*
- *Recall:* say the Spanish for the christening, then the Spanish for the godfather, then say *la madrina* again

Before you move on

What does la madrina mean? ("The godmother".) Say it once more.

546.4 el nieto — the grandson, the grandchild

Before the new one: say the Spanish for the godfather, then the Spanish for the godmother.

You'll want to know: el nieto

el nieto — "the grandson, the grandchild".

Mis abuelos tienen seis nietos.

My grandparents have six grandchildren.

La nieta is the granddaughter; *los nietos* can mean all the grandchildren.

The word, taken apart — and its English cousins

nieto is usually traced to spoken Latin **neptus*, a masculine made from Latin *neptis* 'a granddaughter' (Lewis & Short), which belongs with *nepōs* 'grandson'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el nieto*
- *Say it: el nieto*, once more
- *Say it:* a sentence of your own with *el nieto*
- *Recall:* say the Spanish for the godfather, then the Spanish for the godmother, then say *el nieto* again

Before you move on

What does el nieto mean? ("The grandson, the grandchild".) Say it once more.

546.5 el pañal — the nappy, the diaper

Before the new one: say the Spanish for the godmother, then the Spanish for the grandson.

You'll want to know: el pañal

el pañal — "the nappy, the diaper".

Hay que cambiarle el pañal al bebé.

The baby's nappy needs changing.

Estar en pañales — to be in its infancy, to know very little about something.

The word, taken apart — and its English cousins

pañal is built on *paño* 'cloth' (EtymDB), which is inherited from Latin *pannus* 'a piece of cloth'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el pañal*
- *Say it:* *el pañal*, once more
- *Say it:* a sentence of your own with *el pañal*
- *Recall:* say the Spanish for the godmother, then the Spanish for the grandson, then say *el pañal* again

Before you move on

What does el pañal mean? ("The nappy, the diaper".) Say it once more.

Chapter 547

Los novios

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that two people got engaged: the boyfriend, the girlfriend, the engagement and the ring.
>
> *Complete the last lesson of chapter 547: I can say that two people got engaged: the boyfriend, the girlfriend, the engagement and the ring.*

547.1 el novio — the boyfriend; the groom

> Before the new one: say the Spanish for the grandson, then the Spanish for the nappy.

You'll want to know: el novio

el novio — "the boyfriend; the groom".

> Su novio es de Bogotá.
>
> *Her boyfriend is from Bogotá.*

On the wedding day *el novio* is the groom, and *los novios* are the couple.

The word, taken apart — and its English cousins

novio is inherited from spoken Latin **novius* 'newly married' (EtymDB), built on *novus* 'new'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el novio*
- *Say it: el novio*, once more
- *Say it:* a sentence of your own with *el novio*
- *Recall:* say the Spanish for the grandson, then the Spanish for the nappy, then say *el novio* again

Before you move on

What does el novio mean? ("The boyfriend; the groom".) Say it once more.

547.2 la novia — the girlfriend; the bride

Before the new one: say the Spanish for the nappy, then the Spanish for the boyfriend.

You'll want to know: la novia

la novia — "the girlfriend; the bride".

La novia llevaba un vestido azul.

The bride wore a blue dress.

The word, taken apart — and its English cousins

novia is the feminine of *novio*, inherited from spoken Latin **novius*, **novia* 'newly married', built on *novus* 'new' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la novia*
- *Say it: la novia*, once more
- *Say it:* a sentence of your own with *la novia*
- *Recall:* say the Spanish for the nappy, then the Spanish for the boyfriend, then say *la novia* again

Before you move on

What does la novia mean? ("The girlfriend; the bride".) Say it once more.

547.3 comprometerse — to get engaged; to commit oneself

Before the new one: say the Spanish for the boyfriend, then the Spanish for the girlfriend.

You'll want to know: comprometerse

comprometerse — "to get engaged; to commit oneself".

Se comprometieron en Navidad.

They got engaged at Christmas.

Comprometerse a + infinitive is to promise to: *Me comprometo a ayudar.*

The word, taken apart — and its English cousins

comprometerse comes from Latin *comprōmittere* 'to promise each other' (Lewis & Short), built on *com-* and *prōmittere* 'to promise', from *mittere* 'to send'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *comprometerse*
- *Say it:* *comprometerse*, once more
- *Say it:* a sentence of your own with *comprometerse*
- *Recall:* say the Spanish for the boyfriend, then the Spanish for the girlfriend, then say *comprometerse* again

Before you move on

What does comprometerse mean? ("To get engaged; to commit oneself".) Say it once more.

547.4 el compromiso — the engagement; the commitment

Before the new one: say the Spanish for the girlfriend, then the Spanish for to get engaged.

You'll want to know: el compromiso

el compromiso — "the engagement; the commitment".

Anunciaron su compromiso en la cena.

They announced their engagement at dinner.

A false friend: compromise is *el acuerdo* or *la concesión*.

The word, taken apart — and its English cousins

compromiso comes from Latin *comprōmissum* 'a mutual promise' (EtymDB), built on *prōmittere* 'to promise', from *mittere* 'to send'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el compromiso*
- *Say it: el compromiso*, once more
- *Say it:* a sentence of your own with *el compromiso*
- *Recall:* say the Spanish for the girlfriend, then the Spanish for to get engaged, then say *el compromiso* again

Before you move on

What does el compromiso mean? ("The engagement; the commitment".) Say it once more.

547.5 el anillo — the ring

Before the new one: say the Spanish for to get engaged, then the Spanish for the engagement.

You'll want to know: el anillo

el anillo — "the ring".

Le regaló un anillo de oro.

He gave her a gold ring.

El anillo de compromiso — the engagement ring.

The word, taken apart — and its English cousins

anillo is inherited from Latin *ānellus* 'a little ring' (EtymDB), a small form of *ānulus* 'ring'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el anillo*
- *Say it: el anillo*, once more
- *Say it:* a sentence of your own with *el anillo*
- *Recall:* say the Spanish for to get engaged, then the Spanish for the engagement, then say *el anillo* again

Before you move on

What does el anillo mean? (“The ring”.) Say it once more.

Chapter 548

El banquete

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe a wedding: the marriage, the ceremony, the reception meal, the toast and the honeymoon.
>
> *Complete the last lesson of chapter 548: I can describe a wedding: the marriage, the ceremony, the reception meal, the toast and the honeymoon.*

548.1 el matrimonio — the marriage; the married couple

> Before the new one: say the Spanish for the engagement, then the Spanish for the ring.

You'll want to know: el matrimonio

el matrimonio — "the marriage; the married couple".

> Su matrimonio duró cincuenta años.
>
> *Their marriage lasted fifty years.*

Un matrimonio is also a married couple: *En el quinto vive un matrimonio mayor.*

The word, taken apart — and its English cousins

matrimonio is a learned borrowing from Latin *mātrimōnium* 'marriage, wedlock' (EtymDB), built on *māter* 'mother'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el matrimonio*
- *Say it: el matrimonio*, once more
- *Say it:* a sentence of your own with *el matrimonio*
- *Recall:* say the Spanish for the engagement, then the Spanish for the ring, then say *el matrimonio* again

Before you move on

What does el matrimonio mean? ("The marriage; the married couple".) Say it once more.

548.2 la ceremonia — the ceremony

Before the new one: say the Spanish for the ring, then the Spanish for the marriage.

You'll want to know: la ceremonia

la ceremonia — "the ceremony".

La ceremonia fue corta y bonita.

The ceremony was short and lovely.

The word, taken apart — and its English cousins

ceremonia is a learned borrowing from Latin *caerimōnia* 'a sacred rite' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ceremonia*
- *Say it: la ceremonia*, once more
- *Say it:* a sentence of your own with *la ceremonia*
- *Recall:* say the Spanish for the ring, then the Spanish for the marriage, then say *la ceremonia* again

Before you move on

What does la ceremonia mean? ("The ceremony".) Say it once more.

548.3 el banquete — the banquet, the wedding meal

Before the new one: say the Spanish for the marriage, then the Spanish for the ceremony.

You'll want to know: el banquete

el banquete — "the banquet, the wedding meal".

Después de la boda hubo un banquete.

After the wedding there was a banquet.

The word, taken apart — and its English cousins

banquete is usually traced to French *banquet* or Italian *banchetto*, a small form of *banco* 'bench', a Germanic word. The feast was named after the little benches the guests sat on.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el banquete*
- *Say it: el banquete*, once more
- *Say it:* a sentence of your own with *el banquete*
- *Recall:* say the Spanish for the marriage, then the Spanish for the ceremony, then say *el banquete* again

Before you move on

What does el banquete mean? ("The banquet, the wedding meal".) Say it once more.

548.4 el brindis — the toast (with a drink)

Before the new one: say the Spanish for the ceremony, then the Spanish for the banquet.

You'll want to know: el brindis

el brindis — "the toast (with a drink)".

El padrino hizo un brindis por los novios.

The best man made a toast to the couple.

The same form in the plural: *los brindis*.

The word, taken apart — and its English cousins

brindis comes from the German toast *bring dir's* 'I bring it to you' (EtymDB), said to have been picked up from German soldiers in the 1500s.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el brindis*
- *Say it: el brindis*, once more
- *Say it:* a sentence of your own with *el brindis*
- *Recall:* say the Spanish for the ceremony, then the Spanish for the banquet, then say *el brindis* again

Before you move on

What does el brindis mean? ("The toast (with a drink)".) Say it once more.

548.5 la luna de miel — the honeymoon

Before the new one: say the Spanish for the banquet, then the Spanish for the toast.

You'll want to know: la luna de miel

la luna de miel — "the honeymoon".

Pasaron la luna de miel en Cuba.

They spent their honeymoon in Cuba.

Irse de luna de miel — to go on honeymoon.

The word, taken apart — and its English cousins

luna de miel was built on Latin *lūna* 'moon' and *mel* 'honey' (Lewis & Short), and is usually said to copy English *honeymoon*, through French *lune de miel*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la luna de miel*
- *Say it: la luna de miel*, once more
- *Say it:* a sentence of your own with *la luna de miel*
- *Recall:* say the Spanish for the banquet, then the Spanish for the toast, then say *la luna de miel* again

Before you move on

What does la luna de miel mean? (“The honeymoon”.) Say it once more.

Chapter 549

Casados

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say whether someone is married or single, who married whom, and who raised a glass.
>
> *Complete the last lesson of chapter 549: I can say whether someone is married or single, who married whom, and who raised a glass.*

549.1 casado — married

> Before the new one: say the Spanish for the toast, then the Spanish for the honeymoon.

You'll want to know: casado

casado — "married".

> Mi hermano está casado con una francesa.
>
> *My brother is married to a Frenchwoman.*

Estar casado con — to be married to.

The word, taken apart — and its English cousins

casado is built on the participle of *casar* 'to marry', which comes from *casa* 'house', inherited from Latin *casa* 'a hut' (Lewis & Short). To marry was to set up house.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: casado*
- *Say it: casado*, once more
- *Say it:* a sentence of your own with *casado*
- *Recall:* say the Spanish for the toast, then the Spanish for the honeymoon, then say *casado* again

Before you move on

What does casado mean? ("Married".) Say it once more.

549.2 soltero — single, unmarried

Before the new one: say the Spanish for the honeymoon, then the Spanish for married.

You'll want to know: soltero

soltero — "single, unmarried".

Mi tío nunca se casó; sigue soltero.

My uncle never married; he is still single.

Un soltero is a single man; *la despedida de soltero* is a stag party.

The word, taken apart — and its English cousins

soltero is inherited from Latin *sōlitārius* 'alone, solitary' (EtymDB), built on *sōlus* 'alone'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: soltero*
- *Say it: soltero*, once more
- *Say it:* a sentence of your own with *soltero*
- *Recall:* say the Spanish for the honeymoon, then the Spanish for married, then say *soltero* again

Before you move on

What does soltero mean? ("Single, unmarried".) Say it once more.

549.3 casar — to marry (someone to someone)

Before the new one: say the Spanish for married, then the Spanish for single.

You'll want to know: casar

casar — "to marry (someone to someone)".

Los casó el alcalde.

The mayor married them.

Without *se* it is the person who performs the wedding. *Casarse* is to get married.

The word, taken apart — and its English cousins

casar is built on *casa* 'house', which is inherited from Latin *casa* 'a hut, a cottage' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: casar*
- *Say it: casar*, once more
- *Say it:* a sentence of your own with *casar*
- *Recall:* say the Spanish for married, then the Spanish for single, then say *casar* again

Before you move on

What does casar mean? ("To marry (someone to someone").) Say it once more.

549.4 el marido — the husband

Before the new one: say the Spanish for single, then the Spanish for to marry.

You'll want to know: el marido

el marido — "the husband".

Su marido trabaja en un hospital.

Her husband works in a hospital.

El esposo means the same, a little more formal.

The word, taken apart — and its English cousins

marido is inherited from Latin *marītus* 'a husband' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el marido*
- *Say it: el marido*, once more
- *Say it:* a sentence of your own with *el marido*
- *Recall:* say the Spanish for single, then the Spanish for to marry, then say *el marido* again

Before you move on

What does el marido mean? ("The husband".) Say it once more.

549.5 brindar — to toast, to drink to; to offer

Before the new one: say the Spanish for to marry, then the Spanish for the husband.

You'll want to know: brindar

brindar — "to toast, to drink to; to offer".

Brindamos por el nuevo año.

We drank a toast to the new year.

Brindar por — to drink to. *Brindar ayuda* — to offer help.

The word, taken apart — and its English cousins

brindar is built on *brindis* 'a toast' (EtymDB), which comes from the German words *bring dir's* 'I bring it to you'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *brindar*
- *Say it:* *brindar*, once more
- *Say it:* a sentence of your own with *brindar*
- *Recall:* say the Spanish for to marry, then the Spanish for the husband, then say *brindar* again

Before you move on

What does brindar mean? (“To toast, to drink to; to offer”.) Say it once more.

Chapter 550

La separación

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that a couple separated or divorced, and that someone lost a husband or a wife.
>
> *Complete the last lesson of chapter 550: I can say that a couple separated or divorced, and that someone lost a husband or a wife.*

550.1 el divorcio — the divorce

Before the new one: say the Spanish for the husband, then the Spanish for to toast.

You'll want to know: el divorcio

el divorcio — "the divorce".

El divorcio fue difícil para los niños.

The divorce was hard for the children.

The word, taken apart — and its English cousins

divorcio is a learned borrowing from Latin *dīvortium* 'a separation, a divorce' (EtymDB), built on *dīvertere* 'to turn aside'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el divorcio*
- *Say it: el divorcio*, once more
- *Say it:* a sentence of your own with *el divorcio*
- *Recall:* say the Spanish for the husband, then the Spanish for to toast, then say *el divorcio* again

Before you move on

What does el divorcio mean? ("The divorce".) Say it once more.

550.2 separarse — to separate, to split up

Before the new one: say the Spanish for to toast, then the Spanish for the divorce.

You'll want to know: separarse

separarse — "to separate, to split up".

Se separaron después de diez años.

They split up after ten years.

Without *se*: *separar* is to separate two things.

The word, taken apart — and its English cousins

separarse is a learned borrowing from Latin *sēparāre* 'to set apart' (Lewis & Short), built on *sē-* 'apart' and *parāre* 'to make ready'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: separarse*
- *Say it: separarse*, once more
- *Say it:* a sentence of your own with *separarse*
- *Recall:* say the Spanish for to toast, then the Spanish for the divorce, then say *separarse* again

Before you move on

What does separarse mean? (“To separate, to split up”.) Say it once more.

550.3 divorciado — divorced

Before the new one: say the Spanish for the divorce, then the Spanish for to separate.

You’ll want to know: divorciado

divorciado — “divorced”.

Está divorciado y tiene dos hijos.

He is divorced and has two children.

Used with *estar*.

The word, taken apart — and its English cousins

divorciado is built on the participle of *divorciar*, from *divorcio*, a learned word from Latin *dīvortium* ’a separation’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: divorciado*
- *Say it: divorciado*, once more
- *Say it:* a sentence of your own with *divorciado*
- *Recall:* say the Spanish for the divorce, then the Spanish for to separate, then say *divorciado* again

Before you move on

What does divorciado mean? ("Divorced".) Say it once more.

550.4 el viudo — the widower; widowed

Before the new one: say the Spanish for to separate, then the Spanish for divorced.

You'll want to know: el viudo

el viudo — "the widower; widowed".

Mi abuelo es viudo desde hace años.

My grandfather has been a widower for years.

Quedarse viudo — to be widowed.

The word, taken apart — and its English cousins

viudo is inherited from Latin *viduus* 'bereaved, widowed' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el viudo*
- *Say it: el viudo*, once more

- *Say it:* a sentence of your own with *el viudo*
- *Recall:* say the Spanish for to separate, then the Spanish for divorced, then say *el viudo* again

Before you move on

What does el viudo mean? (“The widower; widowed”.) Say it once more.

550.5 la viuda — the widow

Before the new one: say the Spanish for divorced, then the Spanish for the widower.

You’ll want to know: la viuda

la viuda — “the widow”.

La viuda vive sola en el pueblo.

The widow lives alone in the village.

The word, taken apart — and its English cousins

viuda is inherited from Latin *vidua* ’a widow’ (EtymDB), the feminine of *viduus* ’bereaved’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la viuda*
- *Say it: la viuda*, once more
- *Say it:* a sentence of your own with *la viuda*
- *Recall:* say the Spanish for divorced, then the Spanish for the widower, then say *la viuda* again

Before you move on

What does la viuda mean? (“The widow”.) Say it once more.

Chapter 551

Una vida nueva

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say that someone found a warm welcome, settled in, established themselves, emigrated and adapted.
>
> *Complete the last lesson of chapter 551: I can say that someone found a warm welcome, settled in, established themselves, emigrated and adapted.*

551.1 la acogida — the welcome, the reception

> Before the new one: say the Spanish for the widower, then the Spanish for the widow.

You'll want to know: la acogida

la acogida — "the welcome, the reception".

> La acogida en el pueblo fue muy buena.
>
> *The welcome in the village was very good.*

Un centro de acogida is a shelter for refugees or homeless people.

The word, taken apart — and its English cousins

acogida is built on *acoger* 'to take in, to welcome' (EtymDB), which is inherited from spoken Latin **accolligere*, built on *colligere* 'to gather together'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la acogida*
- *Say it: la acogida*, once more
- *Say it:* a sentence of your own with *la acogida*
- *Recall:* say the Spanish for the widower, then the Spanish for the widow, then say *la acogida* again

Before you move on

What does la acogida mean? ("The welcome, the reception".) Say it once more.

551.2 instalarse — to settle in, to move in

Before the new one: say the Spanish for the widow, then the Spanish for the welcome.

You'll want to know: instalarse

instalarse — "to settle in, to move in".

Nos instalamos en un piso pequeño.

We settled into a small flat.

Without *se*: *instalar* is to install.

The word, taken apart — and its English cousins

instalarse was borrowed from French *installer* (EtymDB), from Medieval Latin *installāre* 'to put into a seat', built on *stallum* 'a stall, a seat', a Germanic word.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: instalarse*
- *Say it: instalarse*, once more
- *Say it:* a sentence of your own with *instalarse*
- *Recall:* say the Spanish for the widow, then the Spanish for the welcome, then say *instalarse* again

Before you move on

What does instalarse mean? ("To settle in, to move in".) Say it once more.

551.3 establecerse — to settle, to establish oneself

Before the new one: say the Spanish for the welcome, then the Spanish for to settle in.

You'll want to know: establecerse

establecerse — "to settle, to establish oneself".

La familia se estableció en Argentina.

The family settled in Argentina.

It takes a *z*: *me establezco*.

The word, taken apart — and its English cousins

establecerse comes from spoken Latin **stabilīscere* (EtymDB), built on *stabilīre* 'to make firm' (Lewis & Short), from *stabilis* 'steady', built on *stāre* 'to stand'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *establecerse*
- *Say it:* *establecerse*, once more
- *Say it:* a sentence of your own with *establecerse*
- *Recall:* say the Spanish for the welcome, then the Spanish for to settle in, then say *establecerse* again

Before you move on

What does establecerse mean? ("To settle, to establish oneself".) Say it once more.

551.4 emigrar — to emigrate

Before the new one: say the Spanish for to settle in, then the Spanish for to settle.

You'll want to know: emigrar

emigrar — "to emigrate".

Mis abuelos emigraron a Alemania.

My grandparents emigrated to Germany.

Emigrar is leaving your country; *inmigrar* is coming into a new one.

The word, taken apart — and its English cousins

emigrar is a learned borrowing from Latin *ēmigrāre* 'to move out, to depart' (EtymDB), built on *ē* 'out' and *migrāre* 'to move'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: emigrar*
- *Say it: emigrar*, once more
- *Say it:* a sentence of your own with *emigrar*
- *Recall:* say the Spanish for to settle in, then the Spanish for to settle, then say *emigrar* again

Before you move on

What does emigrar mean? ("To emigrate".) Say it once more.

551.5 adaptarse — to adapt, to get used to

Before the new one: say the Spanish for to settle, then the Spanish for to emigrate.

You'll want to know: adaptarse

adaptarse — "to adapt, to get used to".

Me adapté rápido a la nueva ciudad.

I quickly got used to the new city.

Adaptarse a — to adapt to.

The word, taken apart — and its English cousins

adaptarse is a learned borrowing from Latin *adaptāre* 'to fit to' (Lewis & Short), built on *ad* and *aptus* 'fitted, suited'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: adaptarse*
- *Say it: adaptarse*, once more
- *Say it:* a sentence of your own with *adaptarse*
- *Recall:* say the Spanish for to settle, then the Spanish for to emigrate, then say *adaptarse* again

Before you move on

What does adaptarse mean? ("To adapt, to get used to".) Say it once more.

551.6 Repaso de los capítulos 544–551

Say the Spanish for the birth and the delivery.

Your turn

Say these aloud:

- the birth, the delivery, to give birth, the pregnancy, the newborn baby
- to bring up, childhood, youth, adolescence, the generation
- the christening, the godfather, the godmother, the grandson, the nappy
- the boyfriend, the girlfriend, to get engaged, the engagement, the ring

- married, single, to marry, the husband, to toast
- the divorce, to separate, divorced, the widower, the widow
- the welcome, to settle in, to settle, to emigrate, to adapt

Before you move on

The birth? (**el nacimiento**.) The delivery? (**el parto**.) To give birth? (**dar a luz**.) The pregnancy? (**el embarazo**.) The newborn baby? (**el recién nacido**.) To bring up? (**criar**.) Childhood? (**la niñez**.) Youth? (**la juventud**.) Adolescence? (**la adolescencia**.) The generation? (**la generación**.) The christening? (**el bautizo**.) The godfather? (**el padrino**.) The godmother? (**la madrina**.) The grandson? (**el nieto**.) The nappy? (**el pañal**.) The boyfriend? (**el novio**.) The girlfriend? (**la novia**.) To get engaged? (**comprometerse**.) The engagement? (**el compromiso**.) The ring? (**el anillo**.) The marriage? (**el matrimonio**.) The ceremony? (**la ceremonia**.) The banquet? (**el banquete**.) The toast? (**el brindis**.) The honeymoon? (**la luna de miel**.) Married? (**casado**.) Single? (**soltero**.) To marry? (**casar**.) The husband? (**el marido**.) To toast? (**brindar**.) The divorce? (**el divorcio**.) To separate? (**separarse**.) Divorced? (**divorciado**.) The widower? (**el viudo**.) The widow? (**la viuda**.) The welcome? (**la acogida**.) To settle in? (**instalarse**.) To settle? (**establecerse**.) To emigrate? (**emigrar**.) To adapt? (**adaptarse**.)

Chapter 552

Lejos de casa

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about people who left their country: immigrants, refugees, exile, borders and leaving home.
>
> *Complete the last lesson of chapter 552: I can talk about people who left their country: immigrants, refugees, exile, borders and leaving home.*

552.1 el inmigrante — the immigrant

> Before the new one: say the Spanish for to emigrate, then the Spanish for to adapt.

You'll want to know: el inmigrante

el inmigrante — "the immigrant".

> Muchos inmigrantes trabajan en el campo.
>
> *Many immigrants work on the land.*

The same form for a woman: *la inmigrante*.

The word, taken apart — and its English cousins

inmigrante is built on *inmigrar*, a learned word from Latin *immigrāre* 'to move into' (Lewis & Short), built on *in* and *migrāre* 'to move'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el inmigrante*
- *Say it: el inmigrante*, once more
- *Say it:* a sentence of your own with *el inmigrante*
- *Recall:* say the Spanish for to emigrate, then the Spanish for to adapt, then say *el inmigrante* again

Before you move on

What does el inmigrante mean? ("The immigrant".) Say it once more.

552.2 el exilio — the exile

Before the new one: say the Spanish for to adapt, then the Spanish for the immigrant.

You'll want to know: el exilio

el exilio — "the exile".

Vivió veinte años en el exilio.

He lived in exile for twenty years.

Exiliarse is to go into exile.

The word, taken apart — and its English cousins

exilio is a learned borrowing from Latin *exilium* 'banishment' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el exilio*
- *Say it: el exilio*, once more
- *Say it:* a sentence of your own with *el exilio*
- *Recall:* say the Spanish for to adapt, then the Spanish for the immigrant, then say *el exilio* again

Before you move on

What does el exilio mean? ("The exile".) Say it once more.

552.3 el refugiado — the refugee

Before the new one: say the Spanish for the immigrant, then the Spanish for the exile.

You'll want to know: el refugiado

el refugiado — "the refugee".

El país acogió a miles de refugiados.

The country took in thousands of refugees.

The word, taken apart — and its English cousins

refugiado is built on *refugiarse* 'to take shelter', from *refugio*, which comes from Latin *refugium* 'a taking refuge' (Lewis & Short), built on *fugere* 'to flee'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el refugiado*
- *Say it: el refugiado*, once more

- *Say it:* a sentence of your own with *el refugiado*
- *Recall:* say the Spanish for the immigrant, then the Spanish for the exile, then say *el refugiado* again

Before you move on

What does el refugiado mean? (“The refugee”.) Say it once more.

552.4 la frontera — the border, the frontier

Before the new one: say the Spanish for the exile, then the Spanish for the refugee.

You’ll want to know: la frontera

la frontera — “the border, the frontier”.

Cruzaron la frontera de noche.

They crossed the border at night.

The word, taken apart — and its English cousins

frontera is usually traced to an old word for ’facing, opposite’, from Latin *frōns*, *frontem* ’forehead, front’ (EtymDB). The border is the line where two countries face each other.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la frontera*
- *Say it: la frontera*, once more
- *Say it:* a sentence of your own with *la frontera*
- *Recall:* say the Spanish for the exile, then the Spanish for the refugee, then say *la frontera* again

Before you move on

What does la frontera mean? (“The border, the frontier”.) Say it once more.

552.5 independizarse — to become independent; to leave home

Before the new one: say the Spanish for the refugee, then the Spanish for the border.

You’ll want to know: independizarse

independizarse — “to become independent; to leave home”.

Me independicé a los veintidós años.

I left home at twenty-two.

For a young person it means moving out of the parents’ house. It takes *c* before *e*: *me independicé*.

The word, taken apart — and its English cousins

independizarse is built on *independiente* with the ending *-izar*. The root is *depender*, from Latin *dēpendēre* ’to hang down from’, built on *pendēre* ’to hang’ (Lewis & Short).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: independizarse*
- *Say it: independizarse*, once more
- *Say it:* a sentence of your own with *independizarse*
- *Recall:* say the Spanish for the refugee, then the Spanish for the border, then say *independizarse* again

Before you move on

What does independizarse mean? ("To become independent; to leave home".) Say it once more.

Chapter 553

Cambios en el trabajo

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about changes at work: a promotion, a final settlement, someone taking over, a dismissal and resigning.
>
> *Complete the last lesson of chapter 553: I can talk about changes at work: a promotion, a final settlement, someone taking over, a dismissal and resigning.*

553.1 el relevo — the replacement, the handover; the relay

> Before the new one: say the Spanish for the border, then the Spanish for to become independent.

You'll want to know: el relevo

el relevo — "the replacement, the handover; the relay".

> Su hija tomó el relevo en la tienda.
>
> *Her daughter took over at the shop.*

Tomar el relevo — to take over. In sport, *los relevos* is the relay.

The word, taken apart — and its English cousins

relevo is built on *relevar* 'to relieve, to replace' (EtymDB), which comes from Latin *relevāre* 'to lift up, to lighten', built on *levāre* 'to raise' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el relevo*
- *Say it: el relevo*, once more
- *Say it:* a sentence of your own with *el relevo*
- *Recall:* say the Spanish for the border, then the Spanish for to become independent, then say *el relevo* again

Before you move on

What does el relevo mean? ("The replacement, the handover; the relay".) Say it once more.

553.2 el ascenso — the promotion; the climb

Before the new one: say the Spanish for to become independent, then the Spanish for the replacement.

You'll want to know: el ascenso

el ascenso — "the promotion; the climb".

Le dieron un ascenso en enero.

She got a promotion in January.

In sport, *el ascenso* is going up a division.

The word, taken apart — and its English cousins

ascenso is a learned borrowing from Latin *ascēnsus* 'a going up' (EtymDB), from *ascendere* 'to climb'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ascenso*
- *Say it: el ascenso*, once more
- *Say it:* a sentence of your own with *el ascenso*
- *Recall:* say the Spanish for to become independent, then the Spanish for the replacement, then say *el ascenso* again

Before you move on

What does el ascenso mean? ("The promotion; the climb".) Say it once more.

553.3 el finiquito — the final settlement, the severance pay

Before the new one: say the Spanish for the replacement, then the Spanish for the promotion.

You'll want to know: el finiquito

el finiquito — "the final settlement, the severance pay".

Cobró el finiquito al dejar la empresa.

He got his final settlement when he left the company.

The money owed to a worker when a job ends, and the paper that settles it.

The word, taken apart — and its English cousins

finiquito is built on *finiquitar* 'to settle an account', usually traced to the old phrase *fin y quito* 'end and quit'. *Fin* comes from Latin *fīnis* 'end'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el finiquito*
- *Say it:* *el finiquito*, once more
- *Say it:* a sentence of your own with *el finiquito*
- *Recall:* say the Spanish for the replacement, then the Spanish for the promotion, then say *el finiquito* again

Before you move on

What does el finiquito mean? ("The final settlement, the severance pay".) Say it once more.

553.4 despedir — to dismiss, to fire; to see off

Before the new one: say the Spanish for the promotion, then the Spanish for the final settlement.

You'll want to know: despedir

despedir — "to dismiss, to fire; to see off".

Despidieron a veinte trabajadores.

They fired twenty workers.

It also means to see someone off: *Fuimos a despedirla al aeropuerto.* Stem change: *despido.*

The word, taken apart — and its English cousins

despedir comes from Latin *dē* and *expetere* 'to ask for, to seek' (EtymDB), built on *petere* 'to seek'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: despedir*
- *Say it: despedir*, once more
- *Say it:* a sentence of your own with *despedir*
- *Recall:* say the Spanish for the promotion, then the Spanish for the final settlement, then say *despedir* again

Before you move on

What does despedir mean? ("To dismiss, to fire; to see off".) Say it once more.

553.5 renunciar — to resign, to give up

Before the new one: say the Spanish for the final settlement, then the Spanish for to dismiss.

You'll want to know: renunciar

renunciar — "to resign, to give up".

Renunció a su puesto en marzo.

She resigned from her post in March.

Renunciar a algo — to give something up.

The word, taken apart — and its English cousins

renunciar is a learned borrowing from Latin *renūntiāre* 'to report back, to give up' (EtymDB), built on *nūntius* 'a messenger'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: renunciar*
- *Say it: renunciar*, once more
- *Say it:* a sentence of your own with *renunciar*
- *Recall:* say the Spanish for the final settlement, then the Spanish for to dismiss, then say *renunciar* again

Before you move on

What does renunciar mean? ("To resign, to give up".) Say it once more.

Chapter 554

Hacerse mayor

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about graduating, coming of age and getting old.
>
> *Complete the last lesson of chapter 554: I can talk about graduating, coming of age and getting old.*

554.1 graduarse — to graduate

Before the new one: say the Spanish for to dismiss, then the Spanish for to resign.

You'll want to know: graduarse

graduarse — "to graduate".

Se graduó en Medicina en 2020.

She graduated in Medicine in 2020.

It takes an accent: *me gradúo*.

The word, taken apart — and its English cousins

graduarse is usually traced to Medieval Latin *graduāre* 'to give a degree', built on Latin *gradus* 'a step' (Lewis & Short), the word behind *grado*. To graduate is to take the next step.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: graduarse*
- *Say it: graduarse*, once more
- *Say it:* a sentence of your own with *graduarse*
- *Recall:* say the Spanish for to dismiss, then the Spanish for to resign, then say *graduarse* again

Before you move on

What does graduarse mean? ("To graduate".) Say it once more.

554.2 la graduación — the graduation

Before the new one: say the Spanish for to resign, then the Spanish for to graduate.

You'll want to know: la graduación

la graduación — "the graduation".

Mis padres vinieron a mi graduación.

My parents came to my graduation.

The word, taken apart — and its English cousins

graduación is built on *graduar*, which is usually traced to Medieval Latin *graduāre*, from Latin *gradus* 'a step' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la graduación*
- *Say it: la graduación*, once more
- *Say it:* a sentence of your own with *la graduación*
- *Recall:* say the Spanish for to resign, then the Spanish for to graduate, then say *la graduación* again

Before you move on

What does la graduación mean? ("The graduation".) Say it once more.

554.3 licenciarse — to get a degree, to graduate

Before the new one: say the Spanish for to graduate, then the Spanish for the graduation.

You'll want to know: licenciarse

licenciarse — "to get a degree, to graduate".

Me licencié en Historia.

I got my degree in History.

Mostly in Spain: *la licenciatura* is the degree.

The word, taken apart — and its English cousins

licenciarse is built on *licencia*, from Latin *licentia* 'freedom, leave to act' (Lewis & Short), from *licet* 'it is allowed'. A degree was the licence to teach.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: licenciarse*
- *Say it: licenciarse*, once more
- *Say it:* a sentence of your own with *licenciarse*
- *Recall:* say the Spanish for to graduate, then the Spanish for the graduation, then say *licenciarse* again

Before you move on

What does licenciarse mean? ("To get a degree, to graduate".) Say it once more.

554.4 la mayoría de edad — the age of majority, adulthood

Before the new one: say the Spanish for the graduation, then the Spanish for to get a degree.

You'll want to know: la mayoría de edad

la mayoría de edad — "the age of majority, adulthood".

Al cumplir la mayoría de edad, sacó el carné.

When she came of age, she got her licence.

In Spain it is eighteen: *ser mayor de edad* — to be an adult.

The word, taken apart — and its English cousins

la mayoría de edad is built on *mayoría*, from *mayor*, which comes from Latin *maior* 'greater', and *edad*, from Latin *aetās*, *aetātem* 'age, lifetime' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la mayoría de edad*
- *Say it: la mayoría de edad*, once more
- *Say it:* a sentence of your own with *la mayoría de edad*
- *Recall:* say the Spanish for the graduation, then the Spanish for to get a degree, then say *la mayoría de edad* again

Before you move on

What does la mayoría de edad mean? ("The age of majority, adulthood".) Say it once more.

554.5 envejecer — to grow old, to age

Before the new one: say the Spanish for to get a degree, then the Spanish for the age of majority.

You'll want to know: envejecer

envejecer — "to grow old, to age".

Mi perro ha envejecido mucho.

My dog has aged a lot.

It takes a *z*: *envejezco*.

The word, taken apart — and its English cousins

envejecer is built on *viejo* 'old' with *en-* and *-ecer*. *Viejo* is inherited from Latin *vetulus* 'little old', from *vetus* 'old' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *envejecer*
- *Say it:* *envejecer*, once more
- *Say it:* a sentence of your own with *envejecer*
- *Recall:* say the Spanish for to get a degree, then the Spanish for the age of majority, then say *envejecer* again

Before you move on

What does envejecer mean? ("To grow old, to age".) Say it once more.

Chapter 555

La vejez

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about old age and death: the elderly, the dead and the deceased.
>
> *Complete the last lesson of chapter 555: I can talk about old age and death: the elderly, the dead and the deceased.*

555.1 la vejez — old age

> Before the new one: say the Spanish for the age of majority, then the Spanish for to grow old.

You'll want to know: la vejez

la vejez — "old age".

> Vivió una vejez tranquila en el campo.
>
> *He lived a quiet old age in the country.*

The word, taken apart — and its English cousins

vejez is built on *viejo* 'old' with the ending *-ez*. *Viejo* is inherited from Latin *vetulus*, from *vetus* 'old' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la vejez*
- *Say it: la vejez*, once more
- *Say it:* a sentence of your own with *la vejez*
- *Recall:* say the Spanish for the age of majority, then the Spanish for to grow old, then say *la vejez* again

Before you move on

What does la vejez mean? ("Old age".) Say it once more.

555.2 anciano — elderly; the elderly person

Before the new one: say the Spanish for to grow old, then the Spanish for old age.

You'll want to know: anciano

anciano — "elderly; the elderly person".

Un anciano me ayudó a encontrar la calle.

An elderly man helped me find the street.

More respectful than *viejo*.

The word, taken apart — and its English cousins

anciano comes from spoken Latin **anteānus* 'one from before' (EtymDB), built on *ante* 'before'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: anciano*
- *Say it: anciano*, once more
- *Say it:* a sentence of your own with *anciano*
- *Recall:* say the Spanish for to grow old, then the Spanish for old age, then say *anciano* again

Before you move on

What does anciano mean? ("Elderly; the elderly person".) Say it once more.

555.3 la muerte — death

Before the new one: say the Spanish for old age, then the Spanish for elderly.

You'll want to know: la muerte

la muerte — "death".

La muerte de su madre le cambió la vida.

His mother's death changed his life.

The word, taken apart — and its English cousins

muerte is inherited from Latin *mortem*, the object form of *mors* 'death' (EtymDB). The stressed *o* became *ue*, as in *muerto*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la muerte*
- *Say it: la muerte*, once more

- *Say it:* a sentence of your own with *la muerte*
- *Recall:* say the Spanish for old age, then the Spanish for elderly, then say *la muerte* again

Before you move on

What does la muerte mean? ("Death".) Say it once more.

555.4 muerto — dead; the dead person

Before the new one: say the Spanish for elderly, then the Spanish for death.

You'll want to know: muerto

muerto — "dead; the dead person".

El accidente dejó dos muertos.

The accident left two people dead.

Used with *estar*: *Está muerto. Muerto de hambre* — starving.

The word, taken apart — and its English cousins

muerto is inherited from Latin *mortuus* 'dead' (EtymDB), the participle of *morī̄* 'to die', through spoken Latin **mortus*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: muerto*
- *Say it: muerto*, once more
- *Say it:* a sentence of your own with *muerto*
- *Recall:* say the Spanish for elderly, then the Spanish for death, then say *muerto* again

Before you move on

What does muerto mean? ("Dead; the dead person".) Say it once more.

555.5 el difunto — the deceased, the late

Before the new one: say the Spanish for death, then the Spanish for dead.

You'll want to know: el difunto

el difunto — "the deceased, the late".

La familia del difunto llegó a la iglesia.

The family of the deceased arrived at the church.

Formal. As an adjective: *mi difunto marido* — my late husband.

The word, taken apart — and its English cousins

difunto comes from Latin *dēfūnctus*, the participle of *dēfungī* 'to finish, to discharge' (Lewis & Short). The dead are those who have finished their life's work.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el difunto*
- *Say it: el difunto*, once more
- *Say it:* a sentence of your own with *el difunto*
- *Recall:* say the Spanish for death, then the Spanish for dead, then say *el difunto* again

Before you move on

What does el difunto mean? (“The deceased, the late”.) Say it once more.

Chapter 556

El entierro

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a funeral and a burial in a cemetery.
>
> *Complete the last lesson of chapter 556: I can talk about a funeral and a burial in a cemetery.*

556.1 el entierro — the burial, the funeral

> Before the new one: say the Spanish for dead, then the Spanish for the deceased.

You'll want to know: el entierro

el entierro — "the burial, the funeral".

> Fuimos al entierro de su abuelo.
>
> *We went to his grandfather's funeral.*

The word, taken apart — and its English cousins

entierro is built on *enterrar* 'to bury', which comes from spoken Latin **interrāre* 'to put in the earth' (EtymDB), from *terra* 'earth'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el entierro*
- *Say it:* *el entierro*, once more
- *Say it:* a sentence of your own with *el entierro*
- *Recall:* say the Spanish for dead, then the Spanish for the deceased, then say *el entierro* again

Before you move on

What does el entierro mean? ("The burial, the funeral".) Say it once more.

556.2 enterrar — to bury

Before the new one: say the Spanish for the deceased, then the Spanish for the burial.

You'll want to know: enterrar

enterrar — "to bury".

Lo enterraron en su pueblo.

They buried him in his home village.

Stem change: *entierro*, *entierras*.

The word, taken apart — and its English cousins

enterrar is inherited from spoken Latin **interrāre* 'to put in the earth' (EtymDB), built on *in* and *terra* 'earth'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: enterrar*
- *Say it: enterrar*, once more
- *Say it:* a sentence of your own with *enterrar*
- *Recall:* say the Spanish for the deceased, then the Spanish for the burial, then say *enterrar* again

Before you move on

What does enterrar mean? ("To bury".) Say it once more.

556.3 el velatorio — the wake; the funeral parlour

Before the new one: say the Spanish for the burial, then the Spanish for to bury.

You'll want to know: el velatorio

el velatorio — "the wake; the funeral parlour".

> Fuimos al velatorio por la noche.
>
> *We went to the wake in the evening.*

In Latin America *el velorio* is common.

The word, taken apart — and its English cousins

velatorio is built on *velar* 'to stay awake, to keep watch over', which is inherited from Latin *vigilāre* 'to stay awake' (EtymDB). Family and friends stay up with the dead.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el velatorio*
- *Say it: el velatorio*, once more
- *Say it:* a sentence of your own with *el velatorio*
- *Recall:* say the Spanish for the burial, then the Spanish for to bury, then say *el velatorio* again

Before you move on

What does el velatorio mean? ("The wake; the funeral parlour".) Say it once more.

556.4 la tumba — the grave, the tomb

Before the new one: say the Spanish for to bury, then the Spanish for the wake.

You'll want to know: la tumba

la tumba — "the grave, the tomb".

Pusimos flores en su tumba.

We put flowers on his grave.

The word, taken apart — and its English cousins

tumba comes from Late Latin *tumba*, taken from Greek *týmbos* 'a burial mound' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tumba*
- *Say it: la tumba*, once more

- *Say it:* a sentence of your own with *la tumba*
- *Recall:* say the Spanish for to bury, then the Spanish for the wake, then say *la tumba* again

Before you move on

What does la tumba mean? (“The grave, the tomb”.) Say it once more.

556.5 el cementerio — the cemetery

Before the new one: say the Spanish for the wake, then the Spanish for the grave.

You’ll want to know: el cementerio

el cementerio — “the cemetery”.

El cementerio está detrás de la iglesia.

The cemetery is behind the church.

The word, taken apart — and its English cousins

cementerio is a learned borrowing from Church Latin *coemētērium* (EtymDB), taken from Greek *koimētḗrion* ’a sleeping place’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el cementerio*
- *Say it: el cementerio*, once more
- *Say it:* a sentence of your own with *el cementerio*
- *Recall:* say the Spanish for the wake, then the Spanish for the grave, then say *el cementerio* again

Before you move on

What does el cementerio mean? ("The cemetery".) Say it once more.

Chapter 557

De luto

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about mourning: a death notice, condolences, the coffin and what someone inherited.
>
> *Complete the last lesson of chapter 557: I can talk about mourning: a death notice, condolences, the coffin and what someone inherited.*

557.1 el luto — mourning

Before the new one: say the Spanish for the grave, then the Spanish for the cemetery.

You'll want to know: el luto

el luto — "mourning".

Toda la familia iba de luto.

The whole family was in mourning.

Ir de luto — to wear black for mourning.

The word, taken apart — and its English cousins

luto is inherited from Latin *lūctus* 'grief, mourning' (EtymDB), built on *lūgēre* 'to mourn'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el luto*
- *Say it: el luto*, once more
- *Say it:* a sentence of your own with *el luto*
- *Recall:* say the Spanish for the grave, then the Spanish for the cemetery, then say *el luto* again

Before you move on

What does el luto mean? ("Mourning".) Say it once more.

557.2 la esquela — the death notice

Before the new one: say the Spanish for the cemetery, then the Spanish for mourning.

You'll want to know: la esquela

la esquela — "the death notice".

Leí su esquela en el periódico.

I read his death notice in the paper.

A notice in the paper or on a wall telling people about a death and the funeral.

The word, taken apart — and its English cousins

esquela is usually traced to Latin *schedula* 'a small sheet of paper' (Lewis & Short), first any short note and later the notice of a death.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la esquela*
- *Say it: la esquela*, once more
- *Say it:* a sentence of your own with *la esquela*
- *Recall:* say the Spanish for the cemetery, then the Spanish for mourning, then say *la esquela* again

Before you move on

What does la esquela mean? ("The death notice".) Say it once more.

557.3 el pésame — the condolences

Before the new one: say the Spanish for mourning, then the Spanish for the death notice.

You'll want to know: el pésame

el pésame — "the condolences".

Le di el pésame a la viuda.

I offered my condolences to the widow.

Dar el pésame — to offer condolences. *Mi más sentido pésame* — my deepest sympathy.

The word, taken apart — and its English cousins

pésame is built on the phrase *me pesa* 'it weighs on me, I am sorry', from *pesar* 'to weigh', which comes from Latin *pēnsāre* 'to weigh', built on *pendere* 'to weigh, to hang' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el pésame*
- *Say it:* *el pésame*, once more
- *Say it:* a sentence of your own with *el pésame*
- *Recall:* say the Spanish for mourning, then the Spanish for the death notice, then say *el pésame* again

Before you move on

What does el pésame mean? ("The condolences".) Say it once more.

557.4 el ataúd — the coffin

Before the new one: say the Spanish for the death notice, then the Spanish for the condolences.

You'll want to know: el ataúd

el ataúd — "the coffin".

Seis amigos llevaron el ataúd.

Six friends carried the coffin.

In Latin America *el féretro* is also used.

The word, taken apart — and its English cousins

ataúd was borrowed from Arabic *tābūt* 'a box, a coffin' (EtymDB), with the Arabic article joined to the front.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ataúd*
- *Say it: el ataúd*, once more
- *Say it:* a sentence of your own with *el ataúd*
- *Recall:* say the Spanish for the death notice, then the Spanish for the condolences, then say *el ataúd* again

Before you move on

What does el ataúd mean? ("The coffin".) Say it once more.

557.5 la herencia — the inheritance

Before the new one: say the Spanish for the condolences, then the Spanish for the coffin.

You'll want to know: la herencia

la herencia — "the inheritance".

Recibió una casa en herencia.

He inherited a house.

Heredar is to inherit.

The word, taken apart — and its English cousins

herencia is usually traced to Latin *haerentia* 'things that cling, belongings', from *haerēre* 'to stick'. It was later pulled towards *heredar* 'to inherit', from Latin *hērēs* 'heir'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la herencia*
- *Say it: la herencia*, once more
- *Say it:* a sentence of your own with *la herencia*
- *Recall:* say the Spanish for the condolences, then the Spanish for the coffin, then say *la herencia* again

Before you move on

What does la herencia mean? ("The inheritance".) Say it once more.

Chapter 558

Un homenaje

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about public celebrations: a tribute, an anniversary that is commemorated and a new building that is opened.
>
> *Complete the last lesson of chapter 558: I can talk about public celebrations: a tribute, an anniversary that is commemorated and a new building that is opened.*

558.1 la celebración — the celebration

> Before the new one: say the Spanish for the coffin, then the Spanish for the inheritance.

You'll want to know: la celebración

la celebración — "the celebration".

> La celebración duró hasta las tres.
>
> *The celebration went on until three.*

The word, taken apart — and its English cousins

celebración is a learned borrowing from Latin *celebrātiō* 'a crowded gathering, a festival' (Lewis & Short), from *celebrāre* 'to fill, to celebrate'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la celebración*
- *Say it: la celebración*, once more
- *Say it:* a sentence of your own with *la celebración*
- *Recall:* say the Spanish for the coffin, then the Spanish for the inheritance, then say *la celebración* again

Before you move on

What does la celebración mean? ("The celebration".) Say it once more.

558.2 festejar — to celebrate, to party

Before the new one: say the Spanish for the inheritance, then the Spanish for the celebration.

You'll want to know: festejar

festejar — "to celebrate, to party".

Festejamos el cumpleaños de la abuela en el jardín.

We celebrated grandma's birthday in the garden.

Very common in Latin America; *celebrar* is used everywhere.

The word, taken apart — and its English cousins

festejar is built on *fiesta*, from Latin *fēsta*, the plural of *fēstum* 'a feast day' (Lewis & Short), with the ending *-ejar*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: festejar*
- *Say it: festejar*, once more
- *Say it:* a sentence of your own with *festejar*
- *Recall:* say the Spanish for the inheritance, then the Spanish for the celebration, then say *festejar* again

Before you move on

What does festejar mean? ("To celebrate, to party".) Say it once more.

558.3 conmemorar — to commemorate

Before the new one: say the Spanish for the celebration, then the Spanish for to celebrate.

You'll want to know: conmemorar

conmemorar — "to commemorate".

El pueblo conmemora aquel día cada año.

The town commemorates that day every year.

The word, taken apart — and its English cousins

conmemorar is a learned borrowing from Latin *commemorāre* 'to call to mind' (EtymDB), built on *con-* and *memorāre* 'to recall', from *memor* 'mindful'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *conmemorar*
- *Say it:* *conmemorar*, once more
- *Say it:* a sentence of your own with *conmemorar*
- *Recall:* say the Spanish for the celebration, then the Spanish for to celebrate, then say *conmemorar* again

Before you move on

What does conmemorar mean? ("To commemorate".) Say it once more.

558.4 el homenaje — the tribute, the homage

Before the new one: say the Spanish for to celebrate, then the Spanish for to commemorate.

You'll want to know: el homenaje

el homenaje — "the tribute, the homage".

Le hicieron un homenaje al viejo profesor.

They held a tribute to the old teacher.

En homenaje a — in honour of.

The word, taken apart — and its English cousins

homenaje is usually traced to Occitan or Catalan *homenatge*, built on the word for 'man', from Latin *homō* (Lewis & Short). Homage was the vow of a lord's man.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el homenaje*
- *Say it: el homenaje*, once more
- *Say it:* a sentence of your own with *el homenaje*
- *Recall:* say the Spanish for to celebrate, then the Spanish for to commemorate, then say *el homenaje* again

Before you move on

What does el homenaje mean? ("The tribute, the homage".) Say it once more.

558.5 inaugurar — to open, to inaugurate

Before the new one: say the Spanish for to commemorate, then the Spanish for the tribute.

You'll want to know: inaugurar

inaugurar — "to open, to inaugurate".

El alcalde inauguró la nueva biblioteca.

The mayor opened the new library.

The word, taken apart — and its English cousins

inaugurar is a learned borrowing from Latin *inaugurāre* 'to take omens from the flight of birds' (Lewis & Short), built on *augur*, the priest who read the birds before anything new began.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *inaugurar*
- *Say it:* *inaugurar*, once more
- *Say it:* a sentence of your own with *inaugurar*
- *Recall:* say the Spanish for to commemorate, then the Spanish for the tribute, then say *inaugurar* again

Before you move on

What does inaugurar mean? (“To open, to inaugurate”.) Say it once more.

Chapter 559

El desfile

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can talk about public events: a parade with floats, a procession, a fair and the crowd.
>
> *Complete the last lesson of chapter 559: I can talk about public events: a parade with floats, a procession, a fair and the crowd.*

559.1 el desfile — the parade

> Before the new one: say the Spanish for the tribute, then the Spanish for to open.

You'll want to know: el desfile

el desfile — "the parade".

> Vimos el desfile desde la ventana.
>
> *We watched the parade from the window.*

Un desfile de moda — a fashion show.

The word, taken apart — and its English cousins

desfile is built on *desfilar* (EtymDB), from French *défiler* 'to march in a line', built on *fil* 'thread', from Latin *fīlum*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desfile*
- *Say it: el desfile*, once more
- *Say it:* a sentence of your own with *el desfile*
- *Recall:* say the Spanish for the tribute, then the Spanish for to open, then say *el desfile* again

Before you move on

What does el desfile mean? ("The parade".) Say it once more.

559.2 la procesión — the procession

Before the new one: say the Spanish for to open, then the Spanish for the parade.

You'll want to know: la procesión

la procesión — "the procession".

La procesión sale de la iglesia a las ocho.

The procession leaves the church at eight.

Very important in Holy Week, *la Semana Santa*.

The word, taken apart — and its English cousins

procesión is a learned borrowing from Latin *prōcessiō* 'a marching forward' (EtymDB), from *prōcēdere* 'to go forward', built on *cēdere* 'to go'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la procesión*
- *Say it: la procesión*, once more
- *Say it:* a sentence of your own with *la procesión*
- *Recall:* say the Spanish for to open, then the Spanish for the parade, then say *la procesión* again

Before you move on

What does la procesión mean? ("The procession".) Say it once more.

559.3 la feria — the fair

Before the new one: say the Spanish for the parade, then the Spanish for the procession.

You'll want to know: la feria

la feria — "the fair".

En abril hay feria en Sevilla.

In April there is a fair in Seville.

Una feria del libro — a book fair.

The word, taken apart — and its English cousins

feria is inherited from Latin *fēriae* 'holidays, feast days' (EtymDB). Markets were held on feast days.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la feria*
- *Say it: la feria*, once more
- *Say it:* a sentence of your own with *la feria*
- *Recall:* say the Spanish for the parade, then the Spanish for the procession, then say *la feria* again

Before you move on

What does la feria mean? ("The fair".) Say it once more.

559.4 la carroza — the float (in a parade); the carriage

Before the new one: say the Spanish for the procession, then the Spanish for the fair.

You'll want to know: la carroza

la carroza — "the float (in a parade); the carriage".

Los niños saludaban desde las carrozas.

The children waved from the floats.

La carroza de los Reyes Magos — the Three Kings' float on 5 January.

The word, taken apart — and its English cousins

carroza was borrowed from Italian *carrozza* 'a carriage', built on *carro* 'a cart', which comes from Latin *carrus* (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la carroza*
- *Say it: la carroza*, once more
- *Say it:* a sentence of your own with *la carroza*
- *Recall:* say the Spanish for the procession, then the Spanish for the fair, then say *la carroza* again

Before you move on

What does la carroza mean? ("The float (in a parade); the carriage".) Say it once more.

559.5 la multitud — the crowd

Before the new one: say the Spanish for the fair, then the Spanish for the float.

You'll want to know: la multitud

la multitud — "the crowd".

Una multitud esperaba en la plaza.

A crowd was waiting in the square.

The word, taken apart — and its English cousins

multitud is a learned borrowing from Latin *multitūdō* 'a great number' (EtymDB), built on *multus* 'much, many'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la multitud*
- *Say it: la multitud*, once more

- *Say it:* a sentence of your own with *la multitud*
- *Recall:* say the Spanish for the fair, then the Spanish for the float, then say *la multitud* again

Before you move on

What does la multitud mean? (“The crowd”.) Say it once more.

559.6 Repaso de los capítulos 552–559

Say the Spanish for the immigrant and the exile.

Your turn

Say these aloud:

- the immigrant, the exile, the refugee, the border, to become independent
- the replacement, the promotion, the final settlement, to dismiss, to resign
- to graduate, the graduation, to get a degree, the age of majority, to grow old
- old age, elderly, death, dead, the deceased
- the burial, to bury, the wake, the grave, the cemetery
- mourning, the death notice, the condolences, the coffin, the inheritance
- the celebration, to celebrate, to commemorate, the tribute, to open
- the parade, the procession, the fair, the float, the crowd

Before you move on

The immigrant? (**el inmigrante**.) The exile? (**el exilio**.) The refugee? (**el refugiado**.) The border? (**la frontera**.) To become independent? (**independizarse**.) The replacement? (**el relevo**.)

The promotion? (**el ascenso**.) The final settlement? (**el finiquito**.) To dismiss? (**despedir**.) To resign? (**renunciar**.) To graduate? (**graduarse**.) The graduation? (**la graduación**.) To get a degree? (**licenciarse**.) The age of majority? (**la mayoría de edad**.) To grow old? (**envejecer**.) Old age? (**la vejez**.) Elderly? (**anciano**.) Death? (**la muerte**.) Dead? (**muerto**.) The deceased? (**el difunto**.) The burial? (**el entierro**.) To bury? (**enterrar**.) The wake? (**el velatorio**.) The grave? (**la tumba**.) The cemetery? (**el cementerio**.) Mourning? (**el luto**.) The death notice? (**la esquela**.) The condolences? (**el pésame**.) The coffin? (**el ataúd**.) The inheritance? (**la herencia**.) The celebration? (**la celebración**.) To celebrate? (**festejar**.) To commemorate? (**conmemorar**.) The tribute? (**el homenaje**.) To open? (**inaugurar**.) The parade? (**el desfile**.) The procession? (**la procesión**.) The fair? (**la feria**.) The float? (**la carroza**.) The crowd? (**la multitud**.)

Chapter 560

El reencuentro

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that people gathered, got together, met to talk, were called to a meeting and saw each other again.
>
> *Complete the last lesson of chapter 560: I can say that people gathered, got together, met to talk, were called to a meeting and saw each other again.*

560.1 congregarse — to gather, to assemble

> Before the new one: say the Spanish for the float, then the Spanish for the crowd.

You'll want to know: congregarse

congregarse — "to gather, to assemble".

> Cientos de personas se congregaron en la plaza.
>
> *Hundreds of people gathered in the square.*

It takes *gu* before *e*: *se congreguen*. Common in the news.

The word, taken apart — and its English cousins

congregarse is a learned borrowing from Latin *congregāre* 'to gather into a flock, to assemble' (Lewis & Short), built on *grex*, *gregis* 'a flock'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *congregarse*
- *Say it:* *congregarse*, once more
- *Say it:* a sentence of your own with *congregarse*
- *Recall:* say the Spanish for the float, then the Spanish for the crowd, then say *congregarse* again

Before you move on

What does congregarse mean? ("To gather, to assemble".) Say it once more.

560.2 juntarse — to get together; to join

Before the new one: say the Spanish for the crowd, then the Spanish for to gather.

You'll want to know: juntarse

juntarse — "to get together; to join".

Los amigos se juntan los viernes.

The friends get together on Fridays.

Common in Latin America for meeting friends. *Juntarse con alguien* — to hang out with someone.

The word, taken apart — and its English cousins

juntarse is built on *junto* 'together', which comes from Latin *iūnctus* 'joined', the participle of *iungere* 'to join, to yoke' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: juntarse*
- *Say it: juntarse*, once more
- *Say it:* a sentence of your own with *juntarse*
- *Recall:* say the Spanish for the crowd, then the Spanish for to gather, then say *juntarse* again

Before you move on

What does juntarse mean? ("To get together; to join".) Say it once more.

560.3 convocar — to call (a meeting, a strike)

Before the new one: say the Spanish for to gather, then the Spanish for to get together.

You'll want to know: convocar

convocar — "to call (a meeting, a strike)".

Los trabajadores convocaron una huelga.

The workers called a strike.

It takes *qu* before *e*: *convoqué*.

The word, taken apart — and its English cousins

convocar is a learned borrowing from Latin *convocāre* 'to call together' (Lewis & Short), built on *con-* and *vocāre* 'to call'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *convocar*
- *Say it:* *convocar*, once more
- *Say it:* a sentence of your own with *convocar*
- *Recall:* say the Spanish for to gather, then the Spanish for to get together, then say *convocar* again

Before you move on

What does convocar mean? ("To call (a meeting, a strike)".) Say it once more.

560.4 la tertulia — the get-together (for conversation)

Before the new one: say the Spanish for to get together, then the Spanish for to call.

You'll want to know: la tertulia

la tertulia — "the get-together (for conversation)".

Los viernes hay tertulia en el café.

On Fridays there is a get-together at the café.

A regular group that meets to talk; on radio and TV, *una tertulia* is a panel discussion.

The word, taken apart — and its English cousins

The origin of *tertulia* is not settled. A common account links it to the Latin writer Tertullian, read and argued over in old gatherings, but this is not proved.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tertulia*
- *Say it: la tertulia*, once more
- *Say it:* a sentence of your own with *la tertulia*
- *Recall:* say the Spanish for to get together, then the Spanish for to call, then say *la tertulia* again

Before you move on

What does la tertulia mean? ("The get-together (for conversation)".) Say it once more.

560.5 el reencuentro — the reunion

Before the new one: say the Spanish for to call, then the Spanish for the get-together.

You'll want to know: el reencuentro

el reencuentro — "the reunion".

El reencuentro de los hermanos fue muy bonito.

The brothers' reunion was lovely.

The word, taken apart — and its English cousins

reencuentro is built on *encuentro* with *re-* 'again'. *Encuentro* comes from *encontrar*, which EtymDB traces to Latin *in contrā* 'facing'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el reencuentro*
- *Say it: el reencuentro*, once more

- *Say it:* a sentence of your own with *el reencuentro*
- *Recall:* say the Spanish for to call, then the Spanish for the get-together, then say *el reencuentro* again

Before you move on

What does el reencuentro mean? (“The reunion”.) Say it once more.

Chapter 561

La partida

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone left, a ship set sail, someone was away and came back.
>
> *Complete the last lesson of chapter 561: I can say that someone left, a ship set sail, someone was away and came back.*

561.1 marcharse — to leave, to go away

> Before the new one: say the Spanish for the get-together, then the Spanish for the reunion.

You'll want to know: marcharse

marcharse — "to leave, to go away".

> Se marchó sin decir adiós.
>
> *He left without saying goodbye.*

Common in Spain; *irse* is used everywhere.

The word, taken apart — and its English cousins

marcharse is built on *marchar*, which was borrowed from French *marcher* 'to walk, to march' (EtymDB). The French verb is usually traced to a Frankish word for marking out, pressing with the feet.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: marcharse*
- *Say it: marcharse*, once more
- *Say it:* a sentence of your own with *marcharse*
- *Recall:* say the Spanish for the get-together, then the Spanish for the reunion, then say *marcharse* again

Before you move on

What does marcharse mean? ("To leave, to go away".) Say it once more.

561.2 zarpar — to set sail, to leave port

Before the new one: say the Spanish for the reunion, then the Spanish for to leave.

You'll want to know: zarpar

zarpar — "to set sail, to leave port".

El barco zarpó a las ocho.

The ship set sail at eight.

Only for ships and boats.

The word, taken apart — and its English cousins

zarpar comes from old Italian *sarpare* 'to weigh anchor' (EtymDB). Where the Italian word came from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: zarpar*
- *Say it: zarpar*, once more
- *Say it:* a sentence of your own with *zarpar*
- *Recall:* say the Spanish for the reunion, then the Spanish for to leave, then say *zarpar* again

Before you move on

What does zarpar mean? ("To set sail, to leave port".) Say it once more.

561.3 la partida — the departure; the game

Before the new one: say the Spanish for to leave, then the Spanish for to set sail.

You'll want to know: la partida

la partida — "the departure; the game".

La partida del tren se retrasó.

The train's departure was delayed.

Una partida de cartas is a game of cards. *Un partido* is a match.

The word, taken apart — and its English cousins

partida is built on the participle of *partir*, which is inherited from Latin *partīre* 'to divide' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la partida*
- *Say it: la partida*, once more
- *Say it:* a sentence of your own with *la partida*
- *Recall:* say the Spanish for to leave, then the Spanish for to set sail, then say *la partida* again

Before you move on

What does la partida mean? ("The departure; the game".) Say it once more.

561.4 el regreso — the return

Before the new one: say the Spanish for to set sail, then the Spanish for the departure.

You'll want to know: el regreso

el regreso — "the return".

A su regreso, todo había cambiado.

On his return, everything had changed.

De regreso — on the way back.

The word, taken apart — and its English cousins

regreso is a learned borrowing from Latin *regressus* 'a going back' (Lewis & Short), from *regredī* 'to step back'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el regreso*
- *Say it: el regreso*, once more
- *Say it:* a sentence of your own with *el regreso*
- *Recall:* say the Spanish for to set sail, then the Spanish for the departure, then say *el regreso* again

Before you move on

What does el regreso mean? (“The return”.) Say it once more.

561.5 la ausencia — the absence

Before the new one: say the Spanish for the departure, then the Spanish for the return.

You’ll want to know: la ausencia

la ausencia — “the absence”.

Durante su ausencia, su hermana cuidó la casa.

During his absence, his sister looked after the house.

The word, taken apart — and its English cousins

ausencia is a learned borrowing from Latin *absentia* ’absence’ (Lewis & Short), from *abesse* ’to be away’, built on *ab* and *esse* ’to be’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ausencia*
- *Say it: la ausencia*, once more

- *Say it:* a sentence of your own with *la ausencia*
- *Recall:* say the Spanish for the departure, then the Spanish for the return, then say *la ausencia* again

Before you move on

What does la ausencia mean? (“The absence”.) Say it once more.

Chapter 562

Volver a empezar

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone did something again, ended up doing it, started doing it or burst out doing it, and moved away.
>
> *Complete the last lesson of chapter 562: I can say that someone did something again, ended up doing it, started doing it or burst out doing it, and moved away.*

562.1 volver a — to do again

> Before the new one: say the Spanish for the return, then the Spanish for the absence.

You'll want to know: volver a

volver a — "to do again".

> Volvió a llamar a las diez.
>
> *She called again at ten.*

Volver a + infinitive: *No volveré a hacerlo* — I won't do it again.

The word, taken apart — and its English cousins

volver a is built on *volver* 'to return', which is inherited from Latin *volvere* 'to roll, to turn' (Lewis & Short). To do something again is to

turn back to it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: volver a*
- *Say it: volver a*, once more
- *Say it:* a sentence of your own with *volver a*
- *Recall:* say the Spanish for the return, then the Spanish for the absence, then say *volver a* again

Before you move on

What does volver a mean? ("To do again".) Say it once more.

562.2 acabar por — to end up (doing)

Before the new one: say the Spanish for the absence, then the Spanish for to do again.

You'll want to know: acabar por

acabar por — "to end up (doing)".

Acabó por aceptar el trabajo.

He ended up accepting the job.

Acabar por + infinitive, or *acabar* + gerund: *Acabó aceptando.*

The word, taken apart — and its English cousins

acabar por is built on *acabar* 'to finish', made from *a-* and *cabo* 'an end', which comes from Latin *caput* 'head' (Lewis & Short). To end up doing something is to reach its end.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: acabar por*
- *Say it: acabar por*, once more
- *Say it:* a sentence of your own with *acabar por*
- *Recall:* say the Spanish for the absence, then the Spanish for to do again, then say *acabar por* again

Before you move on

What does acabar por mean? ("To end up (doing)".) Say it once more.

562.3 ponerse a — to start (doing), to set about

Before the new one: say the Spanish for to do again, then the Spanish for to end up.

You'll want to know: ponerse a

ponerse a — "to start (doing), to set about".

Se puso a llover de repente.

It suddenly started to rain.

Ponerse a + infinitive: *Me puse a estudiar.*

The word, taken apart — and its English cousins

ponerse a is built on *poner* 'to put', which is inherited from Latin *pōnere* 'to put, to place' (Lewis & Short). To start something is to put yourself to it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ponerse a*
- *Say it: ponerse a*, once more
- *Say it:* a sentence of your own with *ponerse a*
- *Recall:* say the Spanish for to do again, then the Spanish for to end up, then say *ponerse a* again

Before you move on

What does ponerse a mean? ("To start (doing), to set about".) Say it once more.

562.4 echarse a — to burst out (doing)

Before the new one: say the Spanish for to end up, then the Spanish for to start.

You'll want to know: echarse a

echarse a — "to burst out (doing)".

Al ver la carta, se echó a reír.

When she saw the letter, she burst out laughing.

Mostly with *reír* and *correr*: *Se echó a correr.*

The word, taken apart — and its English cousins

echarse a is built on *echar* 'to throw', which is inherited from Latin *iactāre* 'to throw about' (Lewis & Short). To burst out crying is to throw yourself into it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: echarse a*
- *Say it: echarse a*, once more
- *Say it:* a sentence of your own with *echarse a*
- *Recall:* say the Spanish for to end up, then the Spanish for to start, then say *echarse a* again

Before you move on

What does echarse a mean? ("To burst out (doing)".) Say it once more.

562.5 alejarse — to move away, to go off

Before the new one: say the Spanish for to start, then the Spanish for to burst out.

You'll want to know: alejarse

alejarse — "to move away, to go off".

El coche se alejó despacio.

The car moved slowly away.

Alejarse de — to move away from.

The word, taken apart — and its English cousins

alejarse is built on *lejos* 'far', which comes from Latin *laxius* 'more loosely, further apart', from *laxus* 'loose' (Lewis & Short), with *a-* and *-ar*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: alejarse*
- *Say it: alejarse*, once more
- *Say it:* a sentence of your own with *alejarse*
- *Recall:* say the Spanish for to start, then the Spanish for to burst out, then say *alejarse* again

Before you move on

What does alejarse mean? ("To move away, to go off".) Say it once more.

Chapter 563

Contar una historia

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about telling stories: a fable, an account, the narrator, and the verbs to narrate and to relate.
>
> *Complete the last lesson of chapter 563: I can talk about telling stories: a fable, an account, the narrator, and the verbs to narrate and to relate.*

563.1 la fábula — the fable

> Before the new one: say the Spanish for to burst out, then the Spanish for to move away.

You'll want to know: la fábula

la fábula — "the fable".

> En la fábula, la tortuga le gana a la liebre.
>
> *In the fable, the tortoise beats the hare.*

La moraleja is the moral at the end.

The word, taken apart — and its English cousins

fábula is a learned borrowing from Latin *fābula* 'a story, a tale' (EtymDB), built on *fārī* 'to speak' (Lewis & Short). The inherited form of the same word is *habla*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la fábula*
- *Say it: la fábula*, once more
- *Say it:* a sentence of your own with *la fábula*
- *Recall:* say the Spanish for to burst out, then the Spanish for to move away, then say *la fábula* again

Before you move on

What does la fábula mean? ("The fable".) Say it once more.

563.2 el relato — the account; the short story

Before the new one: say the Spanish for to move away, then the Spanish for the fable.

You'll want to know: el relato

el relato — "the account; the short story".

Escribió un relato sobre la guerra.

She wrote a short story about the war.

The word, taken apart — and its English cousins

relato comes from Latin *relātus* 'brought back, reported' (EtymDB), the participle of *referre* 'to carry back', built on *ferre* 'to carry'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el relato*
- *Say it:* *el relato*, once more
- *Say it:* a sentence of your own with *el relato*
- *Recall:* say the Spanish for to move away, then the Spanish for the fable, then say *el relato* again

Before you move on

What does el relato mean? (“The account; the short story”.) Say it once more.

563.3 narrar — to narrate, to tell

Before the new one: say the Spanish for the fable, then the Spanish for the account.

You’ll want to know: narrar

narrar — “to narrate, to tell”.

El libro narra la vida de un pescador.

The book tells the life of a fisherman.

A written word; in speech, *contar*.

The word, taken apart — and its English cousins

narrar is a learned borrowing from Latin *nārrāre* ’to tell, to relate’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: narrar*
- *Say it: narrar*, once more
- *Say it:* a sentence of your own with *narrar*
- *Recall:* say the Spanish for the fable, then the Spanish for the account, then say *narrar* again

Before you move on

What does narrar mean? ("To narrate, to tell".) Say it once more.

563.4 relatar — to relate, to recount

Before the new one: say the Spanish for the account, then the Spanish for to narrate.

You'll want to know: relatar

relatar — "to relate, to recount".

El testigo relató lo que vio.

The witness recounted what he saw.

The word, taken apart — and its English cousins

relatar is built on *relato* 'an account', which comes from Latin *relātus* 'reported', the participle of *referre* 'to carry back' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: relatar*
- *Say it: relatar*, once more
- *Say it:* a sentence of your own with *relatar*

- *Recall:* say the Spanish for the account, then the Spanish for to narrate, then say *relatar* again

Before you move on

What does relatar mean? (“To relate, to recount”.) Say it once more.

563.5 el narrador — the narrator

Before the new one: say the Spanish for to narrate, then the Spanish for to relate.

You’ll want to know: el narrador

el narrador — “the narrator”.

El narrador es un niño de diez años.

The narrator is a ten-year-old boy.

A woman is *la narradora*.

The word, taken apart — and its English cousins

narrador comes from Latin *nārrātor* ’a storyteller’ (EtymDB), from *nārrāre* ’to tell’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el narrador*
- *Say it: el narrador*, once more
- *Say it:* a sentence of your own with *el narrador*
- *Recall:* say the Spanish for to narrate, then the Spanish for to relate, then say *el narrador* again

Before you move on

What does el narrador mean? (“The narrator”.) Say it once more.

Chapter 564

El héroe de la historia

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about the people in a story: the character, the main character, the hero, and the legends and myths they come from.
>
> *Complete the last lesson of chapter 564: I can talk about the people in a story: the character, the main character, the hero, and the legends and myths they come from.*

564.1 el personaje — the character (in a story)

> Before the new one: say the Spanish for to relate, then the Spanish for the narrator.

You'll want to know: el personaje

el personaje — "the character (in a story)".

> Mi personaje favorito es el abuelo.
>
> *My favourite character is the grandfather.*

Always masculine, even for a woman: *el personaje principal.*

The word, taken apart — and its English cousins

personaje was borrowed from French *personnage* (EtymDB), built on Latin *persōna* 'an actor's mask, a role'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el personaje*
- *Say it: el personaje*, once more
- *Say it:* a sentence of your own with *el personaje*
- *Recall:* say the Spanish for to relate, then the Spanish for the narrator, then say *el personaje* again

Before you move on

What does el personaje mean? ("The character (in a story)".) Say it once more.

564.2 el protagonista — the main character, the lead

Before the new one: say the Spanish for the narrator, then the Spanish for the character.

You'll want to know: el protagonista

el protagonista — "the main character, the lead".

La protagonista de la película es una médica.

The main character in the film is a doctor.

The same form for a woman: *la protagonista*.

The word, taken apart — and its English cousins

protagonista is usually traced to Greek *prōtagōnistḗs* 'the first actor', built on *prôtos* 'first' and *agōnistḗs* 'a competitor', from *agṓn* 'a contest'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el protagonista*
- *Say it: el protagonista*, once more
- *Say it:* a sentence of your own with *el protagonista*
- *Recall:* say the Spanish for the narrator, then the Spanish for the character, then say *el protagonista* again

Before you move on

What does el protagonista mean? ("The main character, the lead".) Say it once more.

564.3 el héroe — the hero

Before the new one: say the Spanish for the character, then the Spanish for the main character.

You'll want to know: el héroe

el héroe — "the hero".

El bombero fue el héroe del día.

The firefighter was the hero of the day.

A woman is *la heroína*.

The word, taken apart — and its English cousins

héroe is a learned borrowing from Latin *hērōs*, which comes from Greek *hḗrōs* 'a demigod, a hero' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el héroe*
- *Say it:* *el héroe*, once more
- *Say it:* a sentence of your own with *el héroe*
- *Recall:* say the Spanish for the character, then the Spanish for the main character, then say *el héroe* again

Before you move on

What does el héroe mean? ("The hero".) Say it once more.

564.4 la leyenda — the legend; the caption

Before the new one: say the Spanish for the main character, then the Spanish for the hero.

You'll want to know: la leyenda

la leyenda — "the legend; the caption".

Según la leyenda, aquí vivía un dragón.

According to the legend, a dragon lived here.

On a map or a photo it is the key or caption.

The word, taken apart — and its English cousins

leyenda comes from Medieval Latin *legenda* 'things to be read' (EtymDB), from *legere* 'to read'. The first legends were the lives of saints read aloud.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la leyenda*
- *Say it: la leyenda*, once more
- *Say it:* a sentence of your own with *la leyenda*
- *Recall:* say the Spanish for the main character, then the Spanish for the hero, then say *la leyenda* again

Before you move on

What does la leyenda mean? ("The legend; the caption".) Say it once more.

564.5 el mito — the myth

Before the new one: say the Spanish for the hero, then the Spanish for the legend.

You'll want to know: el mito

el mito — "the myth".

Es un mito que los toros odian el rojo.

It is a myth that bulls hate red.

The word, taken apart — and its English cousins

mito is a learned borrowing from Late Latin *mythos*, taken from Greek *mŷthos* 'a word, a story' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el mito*
- *Say it: el mito*, once more

- *Say it:* a sentence of your own with *el mito*
- *Recall:* say the Spanish for the hero, then the Spanish for the legend, then say *el mito* again

Before you move on

What does el mito mean? (“The myth”.) Say it once more.

Chapter 565

Capítulo uno

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about how a story is built: the plot, the storyline, the chapter, the episode and the ending.
>
> *Complete the last lesson of chapter 565: I can talk about how a story is built: the plot, the storyline, the chapter, the episode and the ending.*

565.1 la trama — the plot

> Before the new one: say the Spanish for the legend, then the Spanish for the myth.

You'll want to know: la trama

la trama — "the plot".

> La trama de la novela es muy complicada.
>
> *The plot of the novel is very complicated.*

The word, taken apart — and its English cousins

trama is inherited from Latin *trāma* 'the weft, the threads woven across' (EtymDB). A plot is the threads of a story woven together.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la trama*
- *Say it: la trama*, once more
- *Say it:* a sentence of your own with *la trama*
- *Recall:* say the Spanish for the legend, then the Spanish for the myth, then say *la trama* again

Before you move on

What does la trama mean? ("The plot".) Say it once more.

565.2 el argumento — the storyline, the plot summary; the argument

Before the new one: say the Spanish for the myth, then the Spanish for the plot.

You'll want to know: el argumento

el argumento — "the storyline, the plot summary; the argument".

Me contó el argumento de la película.

He told me the storyline of the film.

It also means a reason in a debate: *un buen argumento.*

The word, taken apart — and its English cousins

argumento is a learned borrowing from Latin *argūmentum* 'a proof, the subject of a story' (EtymDB), from *arguere* 'to make clear'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el argumento*
- *Say it: el argumento*, once more
- *Say it:* a sentence of your own with *el argumento*
- *Recall:* say the Spanish for the myth, then the Spanish for the plot, then say *el argumento* again

Before you move on

What does el argumento mean? ("The storyline, the plot summary; the argument".) Say it once more.

565.3 el capítulo — the chapter; the episode

Before the new one: say the Spanish for the plot, then the Spanish for the storyline.

You'll want to know: el capítulo

el capítulo — "the chapter; the episode".

Leí el último capítulo anoche.

I read the last chapter last night.

On television it is an episode: *el primer capítulo*.

The word, taken apart — and its English cousins

capítulo is a learned borrowing from Late Latin *capitulum* 'a little head, a heading' (EtymDB), from *caput* 'head'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el capítulo*
- *Say it: el capítulo*, once more
- *Say it:* a sentence of your own with *el capítulo*
- *Recall:* say the Spanish for the plot, then the Spanish for the storyline, then say *el capítulo* again

Before you move on

What does el capítulo mean? ("The chapter; the episode".) Say it once more.

565.4 el episodio — the episode

Before the new one: say the Spanish for the storyline, then the Spanish for the chapter.

You'll want to know: el episodio

el episodio — "the episode".

Fue un episodio triste de su vida.

It was a sad episode in her life.

The word, taken apart — and its English cousins

episodio is usually traced to Greek *epeisódion* 'an added part between the songs of a play', built on *eísodos* 'a way in', from *hodós* 'way'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el episodio*
- *Say it: el episodio*, once more

- *Say it:* a sentence of your own with *el episodio*
- *Recall:* say the Spanish for the storyline, then the Spanish for the chapter, then say *el episodio* again

Before you move on

What does el episodio mean? ("The episode".) Say it once more.

565.5 el desenlace — the ending, the outcome

Before the new one: say the Spanish for the chapter, then the Spanish for the episode.

You'll want to know: el desenlace

el desenlace — "the ending, the outcome".

El desenlace de la novela me sorprendió.

The ending of the novel surprised me.

Also the outcome of a real event: *un desenlace feliz*.

The word, taken apart — and its English cousins

desenlace is built on *desenlazar* 'to untie' (EtymDB), from *des-* and *lazo* 'a knot, a bow', which comes from Latin *laqueus* 'a noose'. The ending unties the knot of the story.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desenlace*
- *Say it: el desenlace*, once more
- *Say it:* a sentence of your own with *el desenlace*
- *Recall:* say the Spanish for the chapter, then the Spanish for the episode, then say *el desenlace* again

Before you move on

What does el desenlace mean? ("The ending, the outcome".) Say it once more.

Chapter 566

Una aventura

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can tell an anecdote about an adventure, a great feat, a record or some news.
>
> *Complete the last lesson of chapter 566: I can tell an anecdote about an adventure, a great feat, a record or some news.*

566.1 la anécdota — the anecdote

> Before the new one: say the Spanish for the episode, then the Spanish for the ending.

You'll want to know: la anécdota

la anécdota — "the anecdote".

> Me contó una anécdota muy graciosa.
>
> *He told me a very funny anecdote.*

The word, taken apart — and its English cousins

anécdota was borrowed from French *anecdote*, which comes from Greek *anékdota* 'unpublished things' (EtymDB), built on *an-* 'not' and *ékdotos* 'given out, published'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la anécdota*
- *Say it: la anécdota*, once more
- *Say it:* a sentence of your own with *la anécdota*
- *Recall:* say the Spanish for the episode, then the Spanish for the ending, then say *la anécdota* again

Before you move on

What does la anécdota mean? ("The anecdote".) Say it once more.

566.2 la aventura — the adventure; the affair

Before the new one: say the Spanish for the ending, then the Spanish for the anecdote.

You'll want to know: la aventura

la aventura — "the adventure; the affair".

El viaje fue toda una aventura.

The trip was quite an adventure.

It can also mean a love affair.

The word, taken apart — and its English cousins

aventura comes from spoken Latin **adventūra* 'the things that are going to happen' (EtymDB), from *advenīre* 'to arrive', built on *venīre* 'to come'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la aventura*
- *Say it: la aventura*, once more
- *Say it:* a sentence of your own with *la aventura*
- *Recall:* say the Spanish for the ending, then the Spanish for the anecdote, then say *la aventura* again

Before you move on

What does la aventura mean? (“The adventure; the affair”.) Say it once more.

566.3 la hazaña — the feat, the great deed

Before the new one: say the Spanish for the anecdote, then the Spanish for the adventure.

You’ll want to know: la hazaña

la hazaña — “the feat, the great deed”.

Cruzar el país a pie fue una hazaña.

Crossing the country on foot was a great feat.

The word, taken apart — and its English cousins

hazaña comes from Andalusi Arabic *ḥasána* ’a good deed’, from Arabic *ḥasana* (EtymDB). The good deed grew into a heroic one.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la hazaña*
- *Say it: la hazaña*, once more

- *Say it:* a sentence of your own with *la hazaña*
- *Recall:* say the Spanish for the anecdote, then the Spanish for the adventure, then say *la hazaña* again

Before you move on

What does la hazaña mean? ("The feat, the great deed".) Say it once more.

566.4 el récord — the record (best result)

Before the new one: say the Spanish for the adventure, then the Spanish for the feat.

You'll want to know: el récord

el récord — "the record (best result)".

Tiene el récord del mundo.

He holds the world record.

Tener el récord — to hold the record. A record in writing is *un registro*.

The word, taken apart — and its English cousins

récord was borrowed from English *record* (EtymDB), which came from Old French *recorder* 'to recall', from Latin *recordārī* 'to call to mind'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el récord*
- *Say it: el récord*, once more
- *Say it:* a sentence of your own with *el récord*
- *Recall:* say the Spanish for the adventure, then the Spanish for the feat, then say *el récord* again

Before you move on

What does el récord mean? (“The record (best result)”.) Say it once more.

566.5 la novedad — the novelty; the news, the change

Before the new one: say the Spanish for the feat, then the Spanish for the record.

You’ll want to know: la novedad

la novedad — “the novelty; the news, the change”.

¿Hay alguna novedad sobre el caso?

Is there any news about the case?

Sin novedad — nothing new to report.

The word, taken apart — and its English cousins

novedad is inherited from Latin *novitās*, *novitātem* ’newness’ (EtymDB), built on *novus* ’new’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la novedad*
- *Say it: la novedad*, once more
- *Say it:* a sentence of your own with *la novedad*
- *Recall:* say the Spanish for the feat, then the Spanish for the record, then say *la novedad* again

Before you move on

What does la novedad mean? ("The novelty; the news, the change".) Say it once more.

Chapter 567

La guerra

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can talk about a war: the fighting, a truce, battles, soldiers and the army.
>
> *Complete the last lesson of chapter 567: I can talk about a war: the fighting, a truce, battles, soldiers and the army.*

567.1 el combate — the fight, the combat

Before the new one: say the Spanish for the record, then the Spanish for the novelty.

You'll want to know: el combate

el combate — "the fight, the combat".

> Murieron cien hombres en el combate.
>
> *A hundred men died in the fighting.*

Fuera de combate — out of action, knocked out.

The word, taken apart — and its English cousins

combate is built on *combatir* 'to fight', which comes from spoken Latin **combattere* (EtymDB), built on *com-* and *battuere* 'to beat'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el combate*
- *Say it: el combate*, once more
- *Say it:* a sentence of your own with *el combate*
- *Recall:* say the Spanish for the record, then the Spanish for the novelty, then say *el combate* again

Before you move on

What does el combate mean? ("The fight, the combat".) Say it once more.

567.2 la tregua — the truce

Before the new one: say the Spanish for the novelty, then the Spanish for the fight.

You'll want to know: la tregua

la tregua — "the truce".

Los dos países firmaron una tregua.

The two countries signed a truce.

Also a break in anything hard: *La lluvia no dio tregua.*

The word, taken apart — and its English cousins

tregua comes from Gothic *triggwa* 'a treaty, a covenant' (EtymDB), a Germanic word of the same family as English *true* and *truce*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tregua*
- *Say it: la tregua*, once more
- *Say it:* a sentence of your own with *la tregua*
- *Recall:* say the Spanish for the novelty, then the Spanish for the fight, then say *la tregua* again

Before you move on

What does la tregua mean? (“The truce”.) Say it once more.

567.3 la batalla — the battle

Before the new one: say the Spanish for the fight, then the Spanish for the truce.

You’ll want to know: la batalla

la batalla — “the battle”.

La batalla duró tres días.

The battle lasted three days.

The word, taken apart — and its English cousins

batalla comes from Late Latin *battuālia* ’fighting and fencing drills’ (EtymDB), from *battuere* ’to beat’, probably through Occitan.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la batalla*
- *Say it: la batalla*, once more

- *Say it:* a sentence of your own with *la batalla*
- *Recall:* say the Spanish for the fight, then the Spanish for the truce, then say *la batalla* again

Before you move on

What does la batalla mean? ("The battle".) Say it once more.

567.4 el soldado — the soldier

Before the new one: say the Spanish for the truce, then the Spanish for the battle.

You'll want to know: el soldado

el soldado — "the soldier".

Los soldados volvieron a casa.

The soldiers came home.

A woman is *la soldado*.

The word, taken apart — and its English cousins

soldado is usually traced to Italian *soldato* 'paid', from *soldo* 'pay', from Latin *solidus*, a gold coin; EtymDB lists the two words as cousins. A soldier was a man paid to fight.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el soldado*
- *Say it: el soldado*, once more
- *Say it:* a sentence of your own with *el soldado*
- *Recall:* say the Spanish for the truce, then the Spanish for the battle, then say *el soldado* again

Before you move on

What does el soldado mean? (“The soldier”.) Say it once more.

567.5 el ejército — the army

Before the new one: say the Spanish for the battle, then the Spanish for the soldier.

You’ll want to know: el ejército

el ejército — “the army”.

Mi tío estuvo en el ejército.

My uncle was in the army.

The word, taken apart — and its English cousins

ejército is a learned borrowing from Latin *exercitus* ’a trained army’ (EtymDB), from *exercēre* ’to train, to exercise’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ejército*
- *Say it: el ejército*, once more
- *Say it:* a sentence of your own with *el ejército*
- *Recall:* say the Spanish for the battle, then the Spanish for the soldier, then say *el ejército* again

Before you move on

What does el ejército mean? (“The army”.) Say it once more.

567.6 Repaso de los capítulos 560–567

Say the Spanish for to gather and to get together.

Your turn

Say these aloud:

- to gather, to get together, to call, the get-together, the reunion
- to leave, to set sail, the departure, the return, the absence
- to do again, to end up, to start, to burst out, to move away

Before you move on

To gather? (**congregarse**.) To get together? (**juntarse**.) To call? (**convocar**.) The get-together? (**la tertulia**.) The reunion? (**el reencuentro**.) To leave? (**marcharse**.) To set sail? (**zarpar**.) The departure? (**la partida**.) The return? (**el regreso**.) The absence? (**la ausencia**.) To do again? (**volver a**.) To end up? (**acabar por**.) To start? (**ponerse a**.) To burst out? (**echarse a**.) To move away? (**alejarse**.) The fable? (**la fábula**.) The account? (**el relato**.) To narrate? (**narrar**.) To relate? (**relatar**.) The narrator? (**el narrador**.) The character? (**el personaje**.) The main character? (**el protagonista**.) The hero? (**el héroe**.) The legend? (**la leyenda**.) The myth? (**el mito**.) The plot? (**la trama**.) The storyline? (**el argumento**.) The chapter? (**el capítulo**.) The episode? (**el episodio**.) The ending? (**el desenlace**.) The anecdote? (**la anécdota**.) The adventure? (**la aventura**.) The feat? (**la hazaña**.) The record? (**el récord**.) The novelty? (**la novedad**.) The fight? (**el combate**.) The truce? (**la tregua**.) The battle? (**la batalla**.) The soldier? (**el soldado**.) The army? (**el**

ejército.)

Chapter 568

Reyes y revoluciones

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about history: monarchs and queens, conquests, revolutions and historic days.
>
> *Complete the last lesson of chapter 568: I can talk about history: monarchs and queens, conquests, revolutions and historic days.*

568.1 histórico — historic; historical

> Before the new one: say the Spanish for the soldier, then the Spanish for the army.

You'll want to know: histórico

histórico — "historic; historical".

> Fue un día histórico para el país.
>
> *It was a historic day for the country.*

El centro histórico — the old town.

The word, taken apart — and its English cousins

histórico is a learned borrowing from Latin *historicus*, which comes from Greek *historikós* 'of history' (EtymDB), built on *historía* 'an inquiry'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: histórico*
- *Say it: histórico*, once more
- *Say it:* a sentence of your own with *histórico*
- *Recall:* say the Spanish for the soldier, then the Spanish for the army, then say *histórico* again

Before you move on

What does histórico mean? ("Historic; historical".) Say it once more.

568.2 la revolución — the revolution

Before the new one: say the Spanish for the army, then the Spanish for historic.

You'll want to know: la revolución

la revolución — "the revolution".

La revolución cambió el país.

The revolution changed the country.

The word, taken apart — and its English cousins

revolución is a learned borrowing from Late Latin *revolūtiō* 'a rolling back, a revolving' (EtymDB), built on *re-* and *volvere* 'to roll, to turn'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la revolución*
- *Say it: la revolución*, once more
- *Say it:* a sentence of your own with *la revolución*
- *Recall:* say the Spanish for the army, then the Spanish for historic, then say *la revolución* again

Before you move on

What does la revolución mean? ("The revolution".) Say it once more.

568.3 el monarca — the monarch

Before the new one: say the Spanish for historic, then the Spanish for the revolution.

You'll want to know: el monarca

el monarca — "the monarch".

El monarca visitó la ciudad en 1990.

The monarch visited the city in 1990.

Masculine although it ends in *-a*. *La monarquía* is the monarchy.

The word, taken apart — and its English cousins

monarca is a learned borrowing from Late Latin *monarcha*, which comes from Greek *monárchēs* 'one who rules alone' (EtymDB), built on *mónos* 'alone' and *árchein* 'to rule'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el monarca*
- *Say it: el monarca*, once more
- *Say it:* a sentence of your own with *el monarca*
- *Recall:* say the Spanish for historic, then the Spanish for the revolution, then say *el monarca* again

Before you move on

What does el monarca mean? ("The monarch".) Say it once more.

568.4 la reina — the queen

Before the new one: say the Spanish for the revolution, then the Spanish for the monarch.

You'll want to know: la reina

la reina — "the queen".

La reina inauguró el hospital.

The queen opened the hospital.

The word, taken apart — and its English cousins

reina is inherited from Latin *rēgīna* 'queen' (EtymDB), through old Spanish *reyna*. *Rēgīna* is built on *rēx* 'king'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la reina*
- *Say it: la reina*, once more

- *Say it:* a sentence of your own with *la reina*
- *Recall:* say the Spanish for the revolution, then the Spanish for the monarch, then say *la reina* again

Before you move on

What does la reina mean? ("The queen".) Say it once more.

568.5 conquistar — to conquer; to win over

Before the new one: say the Spanish for the monarch, then the Spanish for the queen.

You'll want to know: conquistar

conquistar — "to conquer; to win over".

Los romanos conquistaron la península.

The Romans conquered the peninsula.

It also means to win someone's heart: *La conquistó con su humor.*

The word, taken apart — and its English cousins

conquistar is usually traced to spoken Latin **conquīstāre*, built on *conquīsītus*, the participle of *conquīrere* 'to seek out, to bring together' (Lewis & Short), from *quaerere* 'to seek'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: conquistar*
- *Say it: conquistar*, once more
- *Say it:* a sentence of your own with *conquistar*
- *Recall:* say the Spanish for the monarch, then the Spanish for the queen, then say *conquistar* again

Before you move on

What does conquistar mean? ("To conquer; to win over".) Say it once more.

Chapter 569

La lucha

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that people fought, defended themselves, defeated the enemy and won, and talk about the conflict.
>
> *Complete the last lesson of chapter 569: I can say that people fought, defended themselves, defeated the enemy and won, and talk about the conflict.*

569.1 luchar — to fight, to struggle

> Before the new one: say the Spanish for the queen, then the Spanish for to conquer.

You'll want to know: luchar

luchar — "to fight, to struggle".

> Lucharon por sus derechos.
>
> *They fought for their rights.*

Luchar por — to fight for. *Luchar contra* — to fight against.

The word, taken apart — and its English cousins

luchar is inherited from Latin *luctārī* 'to wrestle', through spoken Latin **luctāre* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: luchar*
- *Say it: luchar*, once more
- *Say it:* a sentence of your own with *luchar*
- *Recall:* say the Spanish for the queen, then the Spanish for to conquer, then say *luchar* again

Before you move on

What does luchar mean? ("To fight, to struggle".) Say it once more.

569.2 derrotar — to defeat

Before the new one: say the Spanish for to conquer, then the Spanish for to fight.

You'll want to know: derrotar

derrotar — "to defeat".

Nuestro club derrotó al favorito.

Our club beat the favourite.

Derrotar a alguien — to defeat someone.

The word, taken apart — and its English cousins

derrotar is built on *derrota* (EtymDB), which goes back to Latin *dīrumpere* 'to break apart', from *rumpere* 'to break'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: derrotar*
- *Say it: derrotar*, once more
- *Say it:* a sentence of your own with *derrotar*
- *Recall:* say the Spanish for to conquer, then the Spanish for to fight, then say *derrotar* again

Before you move on

What does derrotar mean? (“To defeat”.) Say it once more.

569.3 vencer — to beat, to win; to expire

Before the new one: say the Spanish for to fight, then the Spanish for to defeat.

You’ll want to know: vencer

vencer — “to beat, to win; to expire”.

Vencimos por dos a uno.

We won two-one.

It takes *z*: *venzo*. On a document it means to expire: *El plazo vence el lunes.*

The word, taken apart — and its English cousins

vencer is inherited from Latin *vincere* ’to conquer’ (EtymDB), through old Spanish *vencer*.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vencer*
- *Say it: vencer*, once more
- *Say it:* a sentence of your own with *vencer*
- *Recall:* say the Spanish for to fight, then the Spanish for to defeat, then say *vencer* again

Before you move on

What does vencer mean? ("To beat, to win; to expire".) Say it once more.

569.4 defender — to defend

Before the new one: say the Spanish for to defeat, then the Spanish for to beat.

You'll want to know: defender

defender — "to defend".

Defendió a su hermano en el colegio.

He stood up for his brother at school.

Stem change: *defiendo*. *Defenderse* — to defend yourself; also to get by.

The word, taken apart — and its English cousins

defender is inherited from Latin *dēfendere* 'to ward off, to defend' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: defender*
- *Say it: defender*, once more
- *Say it:* a sentence of your own with *defender*
- *Recall:* say the Spanish for to defeat, then the Spanish for to beat, then say *defender* again

Before you move on

What does defender mean? ("To defend".) Say it once more.

569.5 el conflicto — the conflict

Before the new one: say the Spanish for to beat, then the Spanish for to defend.

You'll want to know: el conflicto

el conflicto — "the conflict".

El conflicto duró muchos años.

The conflict lasted many years.

The word, taken apart — and its English cousins

conflicto is a learned borrowing from Latin *cōnflīctus* 'a striking together' (Lewis & Short), from *cōnflīgere* 'to strike together'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el conflicto*, once more

- *Say it:* a sentence of your own with *el conflicto*
- *Recall:* say the Spanish for to beat, then the Spanish for to defend, then say *el conflicto* again

Before you move on

What does el conflicto mean? (“The conflict”.) Say it once more.

Chapter 570

En la calle

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about public unrest: a demonstration, a protest, riots, a scandal and a controversy.
>
> *Complete the last lesson of chapter 570: I can talk about public unrest: a demonstration, a protest, riots, a scandal and a controversy.*

570.1 la manifestación — the demonstration, the protest march

> Before the new one: say the Spanish for to defend, then the Spanish for the conflict.

You'll want to know: la manifestación

la manifestación — "the demonstration, the protest march".

> Miles de personas fueron a la manifestación.
>
> *Thousands of people went to the demonstration.*

In Spain people often say *la mani*.

The word, taken apart — and its English cousins

manifestación is a learned borrowing from Latin *manifestātiō* 'a showing' (Lewis & Short), from *manifestus* 'plain to see'. A

demonstration shows what people want.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la manifestación*
- *Say it: la manifestación*, once more
- *Say it:* a sentence of your own with *la manifestación*
- *Recall:* say the Spanish for to defend, then the Spanish for the conflict, then say *la manifestación* again

Before you move on

What does la manifestación mean? ("The demonstration, the protest march".) Say it once more.

570.2 la protesta — the protest

Before the new one: say the Spanish for the conflict, then the Spanish for the demonstration.

You'll want to know: la protesta

la protesta — "the protest".

Hubo protestas en todo el país.

There were protests all over the country.

The word, taken apart — and its English cousins

protesta is built on *protestar*, from Latin *prōtestārī* 'to declare in public, to bear witness' (Lewis & Short), built on *testis* 'a witness'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la protesta*
- *Say it: la protesta*, once more
- *Say it:* a sentence of your own with *la protesta*
- *Recall:* say the Spanish for the conflict, then the Spanish for the demonstration, then say *la protesta* again

Before you move on

What does la protesta mean? ("The protest".) Say it once more.

570.3 el disturbio — the disturbance, the riot

Before the new one: say the Spanish for the demonstration, then the Spanish for the protest.

You'll want to know: el disturbio

el disturbio — "the disturbance, the riot".

Hubo disturbios en el centro después del partido.

There was rioting in the centre after the match.

Usually in the plural: *los disturbios*.

The word, taken apart — and its English cousins

disturbio is built on *disturbar* (EtymDB), a learned word from Latin *disturbāre* 'to throw into disorder' (Lewis & Short), built on *turba* 'an uproar, a crowd'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el disturbio*
- *Say it: el disturbio*, once more
- *Say it:* a sentence of your own with *el disturbio*
- *Recall:* say the Spanish for the demonstration, then the Spanish for the protest, then say *el disturbio* again

Before you move on

What does el disturbio mean? ("The disturbance, the riot".) Say it once more.

570.4 el escándalo — the scandal; the racket

Before the new one: say the Spanish for the protest, then the Spanish for the disturbance.

You'll want to know: el escándalo

el escándalo — "the scandal; the racket".

El escándalo salió en todos los periódicos.

The scandal was in all the newspapers.

It also means a lot of noise: *¡Qué escándalo!*

The word, taken apart — and its English cousins

escándalo is a learned borrowing from Church Latin *scandalum*, taken from Greek *skándalon* 'a stumbling block' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el escándalo*
- *Say it: el escándalo*, once more
- *Say it:* a sentence of your own with *el escándalo*
- *Recall:* say the Spanish for the protest, then the Spanish for the disturbance, then say *el escándalo* again

Before you move on

What does el escándalo mean? ("The scandal; the racket".) Say it once more.

570.5 la polémica — the controversy

Before the new one: say the Spanish for the disturbance, then the Spanish for the scandal.

You'll want to know: la polémica

la polémica — "the controversy".

La nueva ley creó mucha polémica.

The new law caused a lot of controversy.

As an adjective: *una ley polémica* — a controversial law.

The word, taken apart — and its English cousins

polémica comes from Greek *polemikós* 'warlike' (EtymDB), built on *pólemos* 'war'. A controversy is a war of words.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la polémica*
- *Say it: la polémica*, once more
- *Say it:* a sentence of your own with *la polémica*
- *Recall:* say the Spanish for the disturbance, then the Spanish for the scandal, then say *la polémica* again

Before you move on

What does la polémica mean? (“The controversy”.) Say it once more.

Chapter 571

Un gran descubrimiento

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about how things began: an inventor, a discovery, an invention, its origin and how it developed.
>
> *Complete the last lesson of chapter 571: I can talk about how things began: an inventor, a discovery, an invention, its origin and how it developed.*

571.1 el inventor — the inventor

> Before the new one: say the Spanish for the scandal, then the Spanish for the controversy.

You'll want to know: el inventor

el inventor — "the inventor".

> El inventor del teléfono fue muy famoso.
>
> *The inventor of the telephone was very famous.*

A woman is *la inventora*.

The word, taken apart — and its English cousins

inventor is a learned borrowing from Latin *inventor* 'one who finds out, a deviser' (EtymDB), from *invenīre* 'to come upon' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el inventor*
- *Say it: el inventor*, once more
- *Say it:* a sentence of your own with *el inventor*
- *Recall:* say the Spanish for the scandal, then the Spanish for the controversy, then say *el inventor* again

Before you move on

What does el inventor mean? ("The inventor".) Say it once more.

571.2 el descubrimiento — the discovery

Before the new one: say the Spanish for the controversy, then the Spanish for the inventor.

You'll want to know: el descubrimiento

el descubrimiento — "the discovery".

Fue un descubrimiento muy importante para la medicina.

It was a very important discovery for medicine.

The word, taken apart — and its English cousins

descubrimiento is built on *descubrir* with the ending *-miento*. *Descubrir* comes from *cubrir*, inherited from Latin *cooperīre* 'to cover over' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el descubrimiento*
- *Say it: el descubrimiento*, once more
- *Say it:* a sentence of your own with *el descubrimiento*
- *Recall:* say the Spanish for the controversy, then the Spanish for the inventor, then say *el descubrimiento* again

Before you move on

What does el descubrimiento mean? ("The discovery".) Say it once more.

571.3 el invento — the invention

Before the new one: say the Spanish for the inventor, then the Spanish for the discovery.

You'll want to know: el invento

el invento — "the invention".

El teléfono fue un gran invento.

The telephone was a great invention.

Inventar is to invent, and also to make something up.

The word, taken apart — and its English cousins

invento comes from Latin *inventum* 'a device, an invention' (EtymDB), from *invenīre* 'to come upon, to find'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el invento*
- *Say it:* *el invento*, once more
- *Say it:* a sentence of your own with *el invento*
- *Recall:* say the Spanish for the inventor, then the Spanish for the discovery, then say *el invento* again

Before you move on

What does el invento mean? ("The invention".) Say it once more.

571.4 el origen — the origin

Before the new one: say the Spanish for the discovery, then the Spanish for the invention.

You'll want to know: el origen

el origen — "the origin".

Nadie conoce el origen del incendio.

Nobody knows the origin of the fire.

Plural: *los orígenes*.

The word, taken apart — and its English cousins

origen is a learned borrowing from Latin *orīgō* 'a beginning, a source' (EtymDB), from *orīrī* 'to rise'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el origen*
- *Say it: el origen*, once more
- *Say it:* a sentence of your own with *el origen*
- *Recall:* say the Spanish for the discovery, then the Spanish for the invention, then say *el origen* again

Before you move on

What does el origen mean? (“The origin”.) Say it once more.

571.5 el desarrollo — the development

Before the new one: say the Spanish for the invention, then the Spanish for the origin.

You’ll want to know: el desarrollo

el desarrollo — “the development”.

El desarrollo de la ciudad fue muy rápido.

The city’s development was very fast.

The word, taken apart — and its English cousins

desarrollo is built on *desarrollar* ’to unroll, to develop’, from *des-* and *arrollar* ’to roll up’, built on *rollo* ’a roll’, which is usually traced to Latin *rotulus* ’a little wheel’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desarrollo*
- *Say it: el desarrollo*, once more

- *Say it:* a sentence of your own with *el desarrollo*
- *Recall:* say the Spanish for the invention, then the Spanish for the origin, then say *el desarrollo* again

Before you move on

What does el desarrollo mean? (“The development”.) Say it once more.

Chapter 572

Todo cambió

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone or something became, transformed, evolved, developed and got over something.
>
> *Complete the last lesson of chapter 572: I can say that someone or something became, transformed, evolved, developed and got over something.*

572.1 convertirse — to become, to turn into

> Before the new one: say the Spanish for the origin, then the Spanish for the development.

You'll want to know: convertirse

convertirse — "to become, to turn into".

> El pueblo se convirtió en una ciudad.
>
> *The village turned into a city.*

Convertirse en + noun. Stem change: *se convierte*.

The word, taken apart — and its English cousins

convertirse comes from Latin *convertere* 'to turn around, to change' (Lewis & Short), built on *con-* and *vertere* 'to turn'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: convertirse*
- *Say it: convertirse*, once more
- *Say it:* a sentence of your own with *convertirse*
- *Recall:* say the Spanish for the origin, then the Spanish for the development, then say *convertirse* again

Before you move on

What does convertirse mean? ("To become, to turn into".) Say it once more.

572.2 transformar — to transform

Before the new one: say the Spanish for the development, then the Spanish for to become.

You'll want to know: transformar

transformar — "to transform".

Transformaron la fábrica en un museo.

They turned the factory into a museum.

The word, taken apart — and its English cousins

transformar is a learned borrowing from Latin *trānsfōrmāre* 'to change in shape' (EtymDB), built on *trāns* 'across' and *forma* 'shape'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: transformar*
- *Say it: transformar*, once more
- *Say it:* a sentence of your own with *transformar*
- *Recall:* say the Spanish for the development, then the Spanish for to become, then say *transformar* again

Before you move on

What does transformar mean? ("To transform".) Say it once more.

572.3 evolucionar — to evolve, to progress

Before the new one: say the Spanish for to become, then the Spanish for to transform.

You'll want to know: evolucionar

evolucionar — "to evolve, to progress".

El paciente evoluciona bien.

The patient is progressing well.

Used for patients, situations and species.

The word, taken apart — and its English cousins

evolucionar is built on *evolución*, from Latin *ēvolūtiō* 'an unrolling' (Lewis & Short), from *ēvolvere*, built on *volvere* 'to roll'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: evolucionar*
- *Say it: evolucionar*, once more
- *Say it:* a sentence of your own with *evolucionar*
- *Recall:* say the Spanish for to become, then the Spanish for to transform, then say *evolucionar* again

Before you move on

What does evolucionar mean? ("To evolve, to progress".) Say it once more.

572.4 desarrollar — to develop

Before the new one: say the Spanish for to transform, then the Spanish for to evolve.

You'll want to know: desarrollar

desarrollar — "to develop".

La empresa desarrolló un coche nuevo.

The company developed a new car.

Desarrollarse is to take place or to develop: *La historia se desarrolla en Lima.*

The word, taken apart — and its English cousins

desarrollar is built on *arrollar* 'to roll up' with *des-* 'un-'. *Arrollar* comes from *rollo*, usually traced to Latin *rotulus* 'a little wheel', built on *rota* 'wheel'. To develop is to unroll.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: desarrollar*
- *Say it: desarrollar*, once more
- *Say it:* a sentence of your own with *desarrollar*
- *Recall:* say the Spanish for to transform, then the Spanish for to evolve, then say *desarrollar* again

Before you move on

What does desarrollar mean? ("To develop".) Say it once more.

572.5 superar — to overcome, to get over; to beat

Before the new one: say the Spanish for to evolve, then the Spanish for to develop.

You'll want to know: superar

superar — "to overcome, to get over; to beat".

> Le costó mucho superar la muerte de su padre.
>
> *It was very hard for him to get over his father's death.*

It also means to exceed: *superar un récord*.

The word, taken apart — and its English cousins

superar is a learned borrowing from Latin *superāre* 'to go over, to rise above' (EtymDB), built on *super* 'over'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *superar*
- *Say it:* *superar*, once more
- *Say it:* a sentence of your own with *superar*
- *Recall:* say the Spanish for to evolve, then the Spanish for to develop, then say *superar* again

Before you move on

What does superar mean? ("To overcome, to get over; to beat".) Say it once more.

Chapter 573

Lo consiguió

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that someone reached a goal, failed, suffered and how things turned out.
>
> *Complete the last lesson of chapter 573: I can say that someone reached a goal, failed, suffered and how things turned out.*

573.1 alcanzar — to reach, to catch up with

> Before the new one: say the Spanish for to develop, then the Spanish for to overcome.

You'll want to know: alcanzar

alcanzar — "to reach, to catch up with".

> Después de tres horas alcanzamos al grupo.
>
> *After three hours we caught up with the group.*

It takes *c* before *e*: *alcancé*. *Alcanzar un objetivo* — to achieve a goal.

The word, taken apart — and its English cousins

alcanzar is usually traced to spoken Latin **incalciāre* 'to follow at the heels' (EtymDB), built on *calx* 'heel'. To catch up is to be on someone's heels.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: alcanzar*
- *Say it: alcanzar*, once more
- *Say it:* a sentence of your own with *alcanzar*
- *Recall:* say the Spanish for to develop, then the Spanish for to overcome, then say *alcanzar* again

Before you move on

What does alcanzar mean? ("To reach, to catch up with".) Say it once more.

573.2 fracasar — to fail

Before the new one: say the Spanish for to overcome, then the Spanish for to reach.

You'll want to know: fracasar

fracasar — "to fail".

El proyecto fracasó por falta de dinero.

The project failed for lack of money.

Used for plans and projects; to fail an exam is *suspender*.

The word, taken apart — and its English cousins

fracasar was borrowed from Italian *fracassare* 'to smash, to shatter' (EtymDB). A plan that fails is smashed.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: fracasar*
- *Say it: fracasar*, once more
- *Say it:* a sentence of your own with *fracasar*
- *Recall:* say the Spanish for to overcome, then the Spanish for to reach, then say *fracasar* again

Before you move on

What does fracasar mean? ("To fail".) Say it once more.

573.3 el fracaso — the failure

Before the new one: say the Spanish for to reach, then the Spanish for to fail.

You'll want to know: el fracaso

el fracaso — "the failure".

La película fue un fracaso.

The film was a failure.

The word, taken apart — and its English cousins

fracaso comes from Italian *fracasso* 'a crash, a smash' (EtymDB), from *fracassare* 'to smash to pieces'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el fracaso*
- *Say it: el fracaso*, once more

- *Say it:* a sentence of your own with *el fracaso*
- *Recall:* say the Spanish for to reach, then the Spanish for to fail, then say *el fracaso* again

Before you move on

What does el fracaso mean? (“The failure”.) Say it once more.

573.4 sufrir — to suffer; to undergo

Before the new one: say the Spanish for to fail, then the Spanish for the failure.

You’ll want to know: sufrir

sufrir — “to suffer; to undergo”.

Sufrió un accidente de tráfico.

He was in a road accident.

Sufrir un accidente — to have an accident. *Sufrir de* — to suffer from.

The word, taken apart — and its English cousins

sufrir comes from Latin *sufferre* ’to bear up under’ (Lewis & Short), built on *sub* ’under’ and *ferre* ’to carry’, usually through a spoken Latin form **sufferīre*.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sufrir*
- *Say it: sufrir*, once more
- *Say it:* a sentence of your own with *sufrir*
- *Recall:* say the Spanish for to fail, then the Spanish for the failure, then say *sufrir* again

Before you move on

What does sufrir mean? ("To suffer; to undergo".) Say it once more.

573.5 resultar — to turn out, to prove to be

Before the new one: say the Spanish for the failure, then the Spanish for to suffer.

You'll want to know: resultar

resultar — "to turn out, to prove to be".

El examen resultó muy fácil.

The exam turned out to be very easy.

Resultar herido — to be injured: *Dos personas resultaron heridas.*

The word, taken apart — and its English cousins

resultar is a learned borrowing from Latin *resultāre* 'to spring back, to rebound' (EtymDB), built on *resilīre* 'to leap back', from *salīre* 'to leap' (Lewis & Short). A result is what springs back from an action.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: resultar*
- *Say it: resultar*, once more
- *Say it:* a sentence of your own with *resultar*
- *Recall:* say the Spanish for the failure, then the Spanish for to suffer, then say *resultar* again

Before you move on

What does resultar mean? (“To turn out, to prove to be”.) Say it once more.

Chapter 574

Cómo me enteré

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say how I found out about an incident: I got a notification or saw it on the TV news.
>
> *Complete the last lesson of chapter 574: I can say how I found out about an incident: I got a notification or saw it on the TV news.*

574.1 enterarse — to hear about, to find out

> Before the new one: say the Spanish for to suffer, then the Spanish for to turn out.

You'll want to know: enterarse

enterarse — "to hear about, to find out".

> Me enteré de la noticia por la radio.
>
> *I heard the news on the radio.*

Enterarse de algo — to find out about something. *¿Te has enterado?* — have you heard?

The word, taken apart — and its English cousins

enterarse is built on *entero* 'whole', inherited from Latin *integer* 'untouched, whole' (Lewis & Short). To find out is to get the whole story.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *enterarse*
- *Say it:* *enterarse*, once more
- *Say it:* a sentence of your own with *enterarse*
- *Recall:* say the Spanish for to suffer, then the Spanish for to turn out, then say *enterarse* again

Before you move on

What does enterarse mean? ("To hear about, to find out".) Say it once more.

574.2 recibir — to receive, to get

Before the new one: say the Spanish for to turn out, then the Spanish for to hear about.

You'll want to know: recibir

recibir — "to receive, to get".

Recibí una carta de mi tía.

I got a letter from my aunt.

It also means to welcome: *Nos recibieron muy bien.*

The word, taken apart — and its English cousins

recibir is inherited from Latin *recipere* 'to take back, to receive' (Lewis & Short), built on *re-* and *capere* 'to take'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: recibir*
- *Say it: recibir*, once more
- *Say it:* a sentence of your own with *recibir*
- *Recall:* say the Spanish for to turn out, then the Spanish for to hear about, then say *recibir* again

Before you move on

What does recibir mean? ("To receive, to get".) Say it once more.

574.3 la notificación — the notification, the alert

Before the new one: say the Spanish for to hear about, then the Spanish for to receive.

You'll want to know: la notificación

la notificación — "the notification, the alert".

Me llegó una notificación al móvil.

I got a notification on my phone.

Also an official notice: *una notificación del juzgado.*

The word, taken apart — and its English cousins

notificación is built on *notificar*, a learned borrowing from Latin *nōtificāre* 'to make known' (Lewis & Short), built on *nōtus* 'known' and *facere* 'to make'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la notificación*
- *Say it: la notificación*, once more
- *Say it:* a sentence of your own with *la notificación*
- *Recall:* say the Spanish for to hear about, then the Spanish for to receive, then say *la notificación* again

Before you move on

What does la notificación mean? ("The notification, the alert".) Say it once more.

574.4 el telediario — the television news

Before the new one: say the Spanish for to receive, then the Spanish for the notification.

You'll want to know: el telediario

el telediario — "the television news".

Vi la noticia en el telediario de las nueve.

I saw the story on the nine o'clock news.

The word in Spain; in Latin America people say *el noticiero*.

The word, taken apart — and its English cousins

telediario is built on *tele-*, from Greek *tēle* 'far', and *diario* 'daily', which comes from Latin *diārium* 'a daily allowance' (Lewis & Short), from *diēs* 'day'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el telediario*
- *Say it: el telediario*, once more
- *Say it:* a sentence of your own with *el telediario*
- *Recall:* say the Spanish for to receive, then the Spanish for the notification, then say *el telediario* again

Before you move on

What does el telediario mean? (“The television news”.) Say it once more.

574.5 el incidente — the incident

Before the new one: say the Spanish for the notification, then the Spanish for the television news.

You’ll want to know: el incidente

el incidente — “the incident”.

El vuelo llegó sin incidentes.

The flight arrived without incident.

The word, taken apart — and its English cousins

incidente is a learned borrowing from Latin *incidēns* ’falling upon’, from *incidere* ’to fall into, to happen’ (Lewis & Short), built on *in* and *cadere* ’to fall’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el incidente*
- *Say it:* *el incidente*, once more
- *Say it:* a sentence of your own with *el incidente*
- *Recall:* say the Spanish for the notification, then the Spanish for the television news, then say *el incidente* again

Before you move on

What does el incidente mean? (“The incident”.) Say it once more.

Chapter 575

El pasado

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can talk about the ancient world, the present and what lies ahead, about old times and how things used to be.
>
> *Complete the last lesson of chapter 575: I can talk about the ancient world, the present and what lies ahead, about old times and how things used to be.*

575.1 la antigüedad — antiquity, the ancient world; age

> Before the new one: say the Spanish for the television news, then the Spanish for the incident.

You'll want to know: la antigüedad

la antigüedad — "antiquity, the ancient world; age".

> En la Antigüedad no había relojes como los de hoy.
>
> *In ancient times there were no clocks like today's.*

At work it means seniority: *años de antigüedad*. *Una tienda de antigüedades* sells antiques.

The word, taken apart — and its English cousins

antigüedad comes from Latin *antīquitās*, *antīquitātem* 'age, antiquity' (Lewis & Short), built on *antīquus* 'old'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la antigüedad*
- *Say it: la antigüedad*, once more
- *Say it:* a sentence of your own with *la antigüedad*
- *Recall:* say the Spanish for the television news, then the Spanish for the incident, then say *la antigüedad* again

Before you move on

What does la antigüedad mean? ("Antiquity, the ancient world; age".) Say it once more.

575.2 el presente — the present

Before the new one: say the Spanish for the incident, then the Spanish for antiquity.

You'll want to know: el presente

el presente — "the present".

Hay que vivir el presente.

You have to live in the present.

As an adjective it means present: *Estaba presente.* In class, *¡Presente!* — here!

The word, taken apart — and its English cousins

presente is a learned borrowing from Latin *praesēns* 'at hand, present' (Lewis & Short), built on *prae* 'before' and the verb *esse* 'to be'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el presente*
- *Say it: el presente*, once more
- *Say it:* a sentence of your own with *el presente*
- *Recall:* say the Spanish for the incident, then the Spanish for antiquity, then say *el presente* again

Before you move on

What does el presente mean? ("The present".) Say it once more.

575.3 el porvenir — the future (what lies ahead)

Before the new one: say the Spanish for antiquity, then the Spanish for the present.

You'll want to know: el porvenir

el porvenir — "the future (what lies ahead)".

Nadie sabe qué nos traerá el porvenir.

Nobody knows what the future will bring us.

A little literary; it often means someone's prospects: *un joven con porvenir.*

The word, taken apart — and its English cousins

porvenir is built on *por* and *venir* 'to come', which is inherited from Latin *venīre* 'to come' (EtymDB). The future is what is still to come.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el porvenir*
- *Say it: el porvenir*, once more
- *Say it:* a sentence of your own with *el porvenir*
- *Recall:* say the Spanish for antiquity, then the Spanish for the present, then say *el porvenir* again

Before you move on

What does el porvenir mean? ("The future (what lies ahead)".) Say it once more.

575.4 antiguo — old, ancient; former

Before the new one: say the Spanish for the present, then the Spanish for the future.

You'll want to know: antiguo

antiguo — "old, ancient; former".

Vivimos en un edificio muy antiguo.

We live in a very old building.

Before a noun it can mean former: *mi antiguo jefe* — my old boss.

The word, taken apart — and its English cousins

antiguo is inherited from Latin *antīquus* 'old, of former times' (EtymDB), through old Spanish *antigo*; it is built on *ante* 'before'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: antiguo*
- *Say it: antiguo*, once more
- *Say it:* a sentence of your own with *antiguo*
- *Recall:* say the Spanish for the present, then the Spanish for the future, then say *antiguo* again

Before you move on

What does antiguo mean? ("Old, ancient; former".) Say it once more.

575.5 antiguamente — in the old days, formerly

Before the new one: say the Spanish for the future, then the Spanish for old.

You'll want to know: antiguamente

antiguamente — "in the old days, formerly".

> Antiguamente la gente viajaba a caballo.
>
> *In the old days people travelled on horseback.*

Usually with the imperfect: *Antiguamente aquí había un río.*

The word, taken apart — and its English cousins

antiguamente is built on *antiguo* and the ending *-mente*, from Latin *mente* 'with a mind'. *Antiguo* comes from Latin *antīquus* 'of former times' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: antiguamente*
- *Say it: antiguamente*, once more
- *Say it:* a sentence of your own with *antiguamente*
- *Recall:* say the Spanish for the future, then the Spanish for old, then say *antiguamente* again

Before you move on

What does antiguamente mean? ("In the old days, formerly".) Say it once more.

575.6 Más sucesos y relatos

Say the Spanish for historic and the revolution.

Your turn

Say these aloud:

- historic, the revolution, the monarch, the queen, to conquer
- to fight, to defeat, to beat, to defend, the conflict
- the demonstration, the protest, the disturbance, the scandal, the controversy
- the inventor, the discovery, the invention, the origin, the development

- to become, to transform, to evolve, to develop, to overcome
- to reach, to fail, the failure, to suffer, to turn out
- to hear about, to receive, the notification, the television news, the incident
- antiquity, the present, the future, old, in the old days

Before you move on

Historic? (**histórico**.) The revolution? (**la revolución**.) The monarch? (**el monarca**.) The queen? (**la reina**.) To conquer? (**conquistar**.) To fight? (**luchar**.) To defeat? (**derrotar**.) To beat? (**vencer**.) To defend? (**defender**.) The conflict? (**el conflicto**.) The demonstration? (**la manifestación**.) The protest? (**la protesta**.) The disturbance? (**el disturbio**.) The scandal? (**el escándalo**.) The controversy? (**la polémica**.) The inventor? (**el inventor**.) The discovery? (**el descubrimiento**.) The invention? (**el invento**.) The origin? (**el origen**.) The development? (**el desarrollo**.) To become? (**convertirse**.) To transform? (**transformar**.) To evolve? (**evolucionar**.) To develop? (**desarrollar**.) To overcome? (**superar**.) To reach? (**alcanzar**.) To fail? (**fracasar**.) The failure? (**el fracaso**.) To suffer? (**sufrir**.) To turn out? (**resultar**.) To hear about? (**enterarse**.) To receive? (**recibir**.) The notification? (**la notificación**.) The television news? (**el telediario**.) The incident? (**el incidente**.) Antiquity? (**la antigüedad**.) The present? (**el presente**.) The future? (**el porvenir**.) Old? (**antiguo**.) In the old days? (**antiguamente**.)

575.7 El pasado — once more

Say the Spanish for antiquity and the present.

Your turn

- *Say it:* antiquity, the present, the future, old, in the old days

Before you move on

Antiquity? (**la antigüedad**.) The present? (**el presente**.) The future? (**el porvenir**.) Old? (**antiguo**.) In the old days? (**antiguamente**.)

Chapter 576

Lo que pienso

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what I think about something, what I believe and how firmly.
>
> *Complete the last lesson of chapter 576: I can say what I think about something, what I believe and how firmly.*

576.1 considerar — to consider; to regard as

> Before the new one: say the Spanish for to seem, then the Spanish for to keep.

You'll want to know: considerar

considerar — "to consider; to regard as".

> Considero que es una buena idea.
>
> *I consider it a good idea.*

Considerar que + indicative gives your opinion; *considerar algo importante* is to regard it as important.

The word, taken apart — and its English cousins

considerar is a learned borrowing from Latin *considerare* 'to examine closely, to scrutinize', built from *con-* and, by the usual account, *sidus* 'star', as if first to watch the stars (EtymDB; Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: considerar*
- *Say it: considerar*, once more
- *Say it:* a sentence of your own with *considerar*
- *Recall:* say the Spanish for to seem, then the Spanish for to keep, then say *considerar* again

Before you move on

What does considerar mean? ("To consider; to regard as".) Say it once more.

576.2 sostener — to maintain, to claim; to hold up

Before the new one: say the Spanish for to keep, then the Spanish for to consider.

You'll want to know: sostener

sostener — "to maintain, to claim; to hold up".

Sostengo que el plan es bueno.

I maintain that the plan is good.

Like *tener*: *sostengo, sostuve.* In a debate *sostener que* is to argue that.

The word, taken apart — and its English cousins

sostener is inherited from Latin *sustinere* 'to hold up, to support', built from *sub(s)* and *tenere* 'to hold' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sostener*
- *Say it: sostener*, once more
- *Say it:* a sentence of your own with *sostener*
- *Recall:* say the Spanish for to keep, then the Spanish for to consider, then say *sostener* again

Before you move on

What does sostener mean? ("To maintain, to claim; to hold up".) Say it once more.

576.3 la creencia — the belief

Before the new one: say the Spanish for to consider, then the Spanish for to maintain.

You'll want to know: la creencia

la creencia — "the belief".

Es una creencia muy antigua.

It is a very old belief.

Las creencias — beliefs, often religious ones.

The word, taken apart — and its English cousins

creencia is built on *creer* with the ending *-encia*; *creer* is inherited from Latin *credere* 'to trust, to believe' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la creencia*
- *Say it: la creencia*, once more
- *Say it:* a sentence of your own with *la creencia*
- *Recall:* say the Spanish for to consider, then the Spanish for to maintain, then say *la creencia* again

Before you move on

What does la creencia mean? ("The belief".) Say it once more.

576.4 la convicción — the conviction, the firm belief

Before the new one: say the Spanish for to maintain, then the Spanish for the belief.

You'll want to know: la convicción

la convicción — "the conviction, the firm belief".

Lo digo con convicción.

I say it with conviction.

Tener la convicción de que — to be firmly convinced that.

The word, taken apart — and its English cousins

convicción is a learned borrowing from Latin *convictio* 'proof', built on *convincere* 'to overcome, to prove', from *vincere* 'to win' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la convicción*
- *Say it: la convicción*, once more
- *Say it:* a sentence of your own with *la convicción*
- *Recall:* say the Spanish for to maintain, then the Spanish for the belief, then say *la convicción* again

Before you move on

What does la convicción mean? ("The conviction, the firm belief".) Say it once more.

576.5 la postura — the stance, the position; posture

Before the new one: say the Spanish for the belief, then the Spanish for the conviction.

You'll want to know: la postura

la postura — "the stance, the position; posture".

¿Cuál es tu postura sobre el tema?

What is your position on the issue?

In a debate, *la postura* is the side you take; for the body it means posture.

The word, taken apart — and its English cousins

postura comes from Latin *positura* 'position, arrangement', built on *ponere* 'to put, to place' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la postura*
- *Say it: la postura*, once more
- *Say it:* a sentence of your own with *la postura*
- *Recall:* say the Spanish for the belief, then the Spanish for the conviction, then say *la postura* again

Before you move on

What does la postura mean? (“The stance, the position; posture”.) Say it once more.

Chapter 577

Defender una idea

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can give reasons for an idea, answer an objection and say that it is reasonable.
>
> *Complete the last lesson of chapter 577: I can give reasons for an idea, answer an objection and say that it is reasonable.*

577.1 argumentar — to argue, to give reasons

> Before the new one: say the Spanish for the conviction, then the Spanish for the stance.

You'll want to know: argumentar

argumentar — "to argue, to give reasons".

> Tienes que argumentar tu respuesta.
>
> *You have to give reasons for your answer.*

To argue a point with reasons, not to quarrel: a quarrel is *discutir* or *pelearse*.

The word, taken apart — and its English cousins

argumentar is built on *argumento*, a learned borrowing from Latin *argumentum* 'proof', from *arguere* 'to make clear, to prove' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: argumentar*
- *Say it: argumentar*, once more
- *Say it:* a sentence of your own with *argumentar*
- *Recall:* say the Spanish for the conviction, then the Spanish for the stance, then say *argumentar* again

Before you move on

What does argumentar mean? ("To argue, to give reasons".) Say it once more.

577.2 la objeción — the objection

Before the new one: say the Spanish for the stance, then the Spanish for to argue.

You'll want to know: la objeción

la objeción — "the objection".

¿Alguien tiene alguna objeción?

Does anyone have any objection?

Poner una objeción — to raise an objection.

The word, taken apart — and its English cousins

objeción is a learned borrowing from Latin *obiectio* 'a throwing against, an objection', built on *obicere*, from *ob* and *iacere* 'to throw' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la objeción*
- *Say it: la objeción*, once more
- *Say it:* a sentence of your own with *la objeción*
- *Recall:* say the Spanish for the stance, then the Spanish for to argue, then say *la objeción* again

Before you move on

What does la objeción mean? ("The objection".) Say it once more.

577.3 convencido — convinced

Before the new one: say the Spanish for to argue, then the Spanish for the objection.

You'll want to know: convencido

convencido — "convinced".

Estoy convencido de que es verdad.

I am convinced that it is true.

With *estar* and *de que*: *estoy convencida de que...*

The word, taken apart — and its English cousins

convencido is built on *convencer*, inherited from Latin *convincere* (EtymDB) 'to overcome, to prove wrong', *con* + *vincere* 'to conquer' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *convencido*
- *Say it:* *convencido*, once more
- *Say it:* a sentence of your own with *convencido*
- *Recall:* say the Spanish for to argue, then the Spanish for the objection, then say *convencido* again

Before you move on

What does convencido mean? ("Convinced".) Say it once more.

577.4 razonable — reasonable

Before the new one: say the Spanish for the objection, then the Spanish for convinced.

You'll want to know: razonable

razonable — "reasonable".

Es un precio razonable.

It is a reasonable price.

The same for both genders: *una idea razonable.*

The word, taken apart — and its English cousins

razonable is inherited from Late Latin *rationabilis*, built on *ratio* 'reckoning, reason', the word that also gave *razón* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: razonable*
- *Say it: razonable*, once more
- *Say it:* a sentence of your own with *razonable*
- *Recall:* say the Spanish for the objection, then the Spanish for convinced, then say *razonable* again

Before you move on

What does razonable mean? ("Reasonable".) Say it once more.

577.5 lógico — logical; natural, to be expected

Before the new one: say the Spanish for convinced, then the Spanish for reasonable.

You'll want to know: lógico

lógico — "logical; natural, to be expected".

Es lógico que estés cansado.

It is natural that you are tired.

Es lógico que + subjunctive: it makes sense that...

The word, taken apart — and its English cousins

lógico is a learned borrowing from Latin *logicus*, taken from Greek *logikos* 'of reasoning', built on *logos* 'word, reason' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *lógico*
- *Say it:* *lógico*, once more
- *Say it:* a sentence of your own with *lógico*
- *Recall:* say the Spanish for convinced, then the Spanish for reasonable, then say *lógico* again

Before you move on

What does lógico mean? ("Logical; natural, to be expected".) Say it once more.

Chapter 578

No estoy de acuerdo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say politely that I disagree, that I am against something or in favour of it.
>
> *Complete the last lesson of chapter 578: I can say politely that I disagree, that I am against something or in favour of it.*

578.1 el desacuerdo — the disagreement

> Before the new one: say the Spanish for reasonable, then the Spanish for logical.

You'll want to know: el desacuerdo

el desacuerdo — "the disagreement".

> Estoy en desacuerdo con esa idea.
>
> *I disagree with that idea.*

Estar en desacuerdo con is the opposite of *estar de acuerdo con*.

The word, taken apart — and its English cousins

desacuerdo is built on *acuerdo* with the prefix *des-*; *acuerdo* comes from *acordar*, inherited from spoken Latin *accordare*, built on *cor* 'heart' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desacuerdo*
- *Say it: el desacuerdo*, once more
- *Say it:* a sentence of your own with *el desacuerdo*
- *Recall:* say the Spanish for reasonable, then the Spanish for logical, then say *el desacuerdo* again

Before you move on

What does el desacuerdo mean? ("The disagreement".) Say it once more.

578.2 discrepar — to disagree, to differ

Before the new one: say the Spanish for logical, then the Spanish for the disagreement.

You'll want to know: discrepar

discrepar — "to disagree, to differ".

Discrepo un poco de tu opinión.

I disagree a little with your opinion.

A polite, formal verb: *discrepar de* someone or something.

The word, taken apart — and its English cousins

discrepar is a learned borrowing from Latin *discrepare* 'to be out of tune, to differ', built from *dis-* 'apart' and *crepare* 'to rattle, to creak' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: discrepar*
- *Say it: discrepar*, once more
- *Say it:* a sentence of your own with *discrepar*
- *Recall:* say the Spanish for logical, then the Spanish for the disagreement, then say *discrepar* again

Before you move on

What does discrepar mean? ("To disagree, to differ".) Say it once more.

578.3 oponerse — to oppose, to be against

Before the new one: say the Spanish for the disagreement, then the Spanish for to disagree.

You'll want to know: oponerse

oponerse — "to oppose, to be against".

Me opongo a ese cambio.

I am against that change.

Like *poner*: *me opongo*. Always with *a*: *oponerse a algo*.

The word, taken apart — and its English cousins

oponerse is a learned borrowing from Latin *opponere* 'to set against', *ob* + *ponere* 'to put', rebuilt on *poner*; EtymDB does not list it, but the Latin gloss is in Lewis & Short.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: oponerse*
- *Say it: oponerse*, once more
- *Say it:* a sentence of your own with *oponerse*
- *Recall:* say the Spanish for the disagreement, then the Spanish for to disagree, then say *oponerse* again

Before you move on

What does oponerse mean? ("To oppose, to be against".) Say it once more.

578.4 partidario — in favour; supporter

Before the new one: say the Spanish for to disagree, then the Spanish for to oppose.

You'll want to know: partidario

partidario — "in favour; supporter".

Soy partidario de trabajar en casa.

I am in favour of working from home.

Ser partidario de + noun or infinitive. As a noun: *los partidarios del plan.*

The word, taken apart — and its English cousins

partidario is built on *partido* 'a side, a party', from *partir* 'to divide', which is inherited from Latin *partire*, built on *pars* 'part' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: partidario*
- *Say it: partidario*, once more
- *Say it:* a sentence of your own with *partidario*
- *Recall:* say the Spanish for to disagree, then the Spanish for to oppose, then say *partidario* again

Before you move on

What does partidario mean? ("In favour; supporter".) Say it once more.

578.5 contrario — opposed, against; opposite

Before the new one: say the Spanish for to oppose, then the Spanish for in favour.

You'll want to know: contrario

contrario — "opposed, against; opposite".

Mi hermano es contrario a la idea.

My brother is against the idea.

Al contrario — on the contrary. *Lo contrario* — the opposite.

The word, taken apart — and its English cousins

contrario is a learned borrowing from Latin *contrarius* 'opposite', built on *contra* 'against' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *contrario*
- *Say it:* *contrario*, once more
- *Say it:* a sentence of your own with *contrario*
- *Recall:* say the Spanish for to oppose, then the Spanish for in favour, then say *contrario* again

Before you move on

What does contrario mean? (“Opposed, against; opposite”.) Say it once more.

Chapter 579

Críticas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can criticise something, contradict someone or admit that they are right.
>
> *Complete the last lesson of chapter 579: I can criticise something, contradict someone or admit that they are right.*

579.1 criticar — to criticise

Before the new one: say the Spanish for in favour, then the Spanish for opposed.

You'll want to know: criticar

criticar — "to criticise".

No me gusta criticar a la gente.

I do not like criticising people.

Spelling: *critiqué* in the past, *critique* in the subjunctive.

The word, taken apart — and its English cousins

criticar is built on *crítico*, a learned borrowing from Latin *criticus* and Greek *kritikos* 'able to judge', from *krinein* 'to separate, to decide' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: criticar*
- *Say it: criticar*, once more
- *Say it:* a sentence of your own with *criticar*
- *Recall:* say the Spanish for in favour, then the Spanish for opposed, then say *criticar* again

Before you move on

What does criticar mean? ("To criticise".) Say it once more.

579.2 la crítica — the criticism; the review

Before the new one: say the Spanish for opposed, then the Spanish for to criticise.

You'll want to know: la crítica

la crítica — "the criticism; the review".

Acepto la crítica con calma.

I accept the criticism calmly.

Also a review of a book or film: *la crítica de la película.*

The word, taken apart — and its English cousins

la crítica is built on *crítico*, a learned borrowing from Latin *criticus*, taken from Greek *kritikos* 'able to judge', from *krinein* 'to judge' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la crítica*
- *Say it: la crítica*, once more
- *Say it:* a sentence of your own with *la crítica*
- *Recall:* say the Spanish for opposed, then the Spanish for to criticise, then say *la crítica* again

Before you move on

What does la crítica mean? ("The criticism; the review".) Say it once more.

579.3 contradecir — to contradict

Before the new one: say the Spanish for to criticise, then the Spanish for the criticism.

You'll want to know: contradecir

contradecir — "to contradict".

No me gusta contradecir a mi jefe.

I do not like contradicting my boss.

Like *decir*: *contradigo, contradije, contradicho.*

The word, taken apart — and its English cousins

contradecir is a learned borrowing from Latin *contradicere* 'to speak against', built from *contra* and *dicere* 'to say', and rebuilt on *decir* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *contradecir*
- *Say it:* *contradecir*, once more
- *Say it:* a sentence of your own with *contradecir*
- *Recall:* say the Spanish for to criticise, then the Spanish for the criticism, then say *contradecir* again

Before you move on

What does contradecir mean? ("To contradict".) Say it once more.

579.4 reconocer — to admit; to recognise

Before the new one: say the Spanish for the criticism, then the Spanish for to contradict.

You'll want to know: reconocer

reconocer — "to admit; to recognise".

Reconozco que me equivoqué.

I admit that I was wrong.

Like *conocer*: *reconozco*. In a debate it means to admit a point.

The word, taken apart — and its English cousins

reconocer is inherited from Latin *recognoscere* 'to know again, to examine', built on *cognoscere* 'to get to know', the same verb as *conocer* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: reconocer*
- *Say it: reconocer*, once more
- *Say it:* a sentence of your own with *reconocer*
- *Recall:* say the Spanish for the criticism, then the Spanish for to contradict, then say *reconocer* again

Before you move on

What does reconocer mean? (“To admit; to recognise”.) Say it once more.

579.5 absurdo — absurd, ridiculous

Before the new one: say the Spanish for to contradict, then the Spanish for to admit.

You’ll want to know: absurdo

absurdo — “absurd, ridiculous”.

Es absurdo pagar tanto.

It is absurd to pay so much.

Es absurdo que + subjunctive.

The word, taken apart — and its English cousins

absurdo is a learned borrowing from Latin *absurdus* ’out of tune, senseless’, built from *ab* and *surdus* ’deaf, dull-sounding’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *absurdo*
- *Say it:* *absurdo*, once more
- *Say it:* a sentence of your own with *absurdo*
- *Recall:* say the Spanish for to contradict, then the Spanish for to admit, then say *absurdo* again

Before you move on

What does absurdo mean? (“Absurd, ridiculous”.) Say it once more.

Chapter 580

El porqué

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can give the reason for something with since and given that.
>
> *Complete the last lesson of chapter 580: I can give the reason for something with since and given that.*

580.1 el motivo — the reason, the motive

> Before the new one: say the Spanish for to admit, then the Spanish for absurd.

You'll want to know: el motivo

el motivo — "the reason, the motive".

> ¿Cuál es el motivo del viaje?
>
> *What is the reason for the trip?*

Por este motivo — for this reason. Close to *la razón*.

The word, taken apart — and its English cousins

motivo is a learned borrowing from Late Latin *motivus* 'moving', built on *movere* 'to move': a motive is what moves you (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el motivo*
- *Say it: el motivo*, once more
- *Say it:* a sentence of your own with *el motivo*
- *Recall:* say the Spanish for to admit, then the Spanish for absurd, then say *el motivo* again

Before you move on

What does el motivo mean? ("The reason, the motive".) Say it once more.

580.2 a raíz de — as a result of, following

Before the new one: say the Spanish for absurd, then the Spanish for the reason.

You'll want to know: a raíz de

a raíz de — "as a result of, following".

A raíz del accidente, cambiaron las normas.

Following the accident, they changed the rules.

Followed by a noun; it names the event that started something.

The word, taken apart — and its English cousins

a raíz de is built on *raíz* 'root', inherited from Latin *radicem*, a form of *radix* 'root' (EtymDB): something grows from the event.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a raíz de*
- *Say it: a raíz de*, once more
- *Say it:* a sentence of your own with *a raíz de*
- *Recall:* say the Spanish for absurd, then the Spanish for the reason, then say *a raíz de* again

Before you move on

What does a raíz de mean? ("As a result of, following".) Say it once more.

580.3 ya que — since, as

Before the new one: say the Spanish for the reason, then the Spanish for as a result of.

You'll want to know: ya que

ya que — "since, as".

Ya que estás aquí, ayúdame.

Since you are here, help me.

Gives a reason the listener already knows; it often goes first in the sentence.

The word, taken apart — and its English cousins

ya que is built on *ya*, inherited from Latin *iam* 'already', and *que*, from Latin *quid* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ya que*
- *Say it: ya que*, once more
- *Say it:* a sentence of your own with *ya que*
- *Recall:* say the Spanish for the reason, then the Spanish for as a result of, then say *ya que* again

Before you move on

What does ya que mean? (“Since, as”.) Say it once more.

580.4 puesto que — seeing as; since

Before the new one: say the Spanish for as a result of, then the Spanish for since.

You’ll want to know: puesto que

puesto que — “seeing as; since”.

Puesto que llueve, no salimos.

Seeing as it is raining, we are not going out.

More formal than *porque*; common in writing.

The word, taken apart — and its English cousins

puesto que is built on *puesto*, the participle of *poner*, which is inherited from Latin *ponere* ’to put’ (EtymDB): literally ’it being put that’.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: puesto que*
- *Say it: puesto que*, once more
- *Say it:* a sentence of your own with *puesto que*
- *Recall:* say the Spanish for as a result of, then the Spanish for since, then say *puesto que* again

Before you move on

What does puesto que mean? ("Seeing as; since".) Say it once more.

580.5 dado que — given that

Before the new one: say the Spanish for since, then the Spanish for seeing as.

You'll want to know: dado que

dado que — "given that".

Dado que no hay dinero, esperamos.

Given that there is no money, we wait.

Formal, like *puesto que*; it is followed by the indicative.

The word, taken apart — and its English cousins

dado que is built on *dado*, inherited from Latin *datus* 'given', the participle of *dare* 'to give' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *dado que*
- *Say it:* *dado que*, once more
- *Say it:* a sentence of your own with *dado que*
- *Recall:* say the Spanish for since, then the Spanish for seeing as, then say *dado que* again

Before you move on

What does dado que mean? (“Given that”.) Say it once more.

Chapter 581

Por culpa de, gracias a

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what caused something, for good or for bad.
>
> *Complete the last lesson of chapter 581: I can say what caused something, for good or for bad.*

581.1 causar — to cause

> Before the new one: say the Spanish for seeing as, then the Spanish for given that.

You'll want to know: causar

causar — "to cause".

> La lluvia causó muchos problemas.
>
> *The rain caused a lot of problems.*

Regular -ar verb.

The word, taken apart — and its English cousins

causar is built on *causa*, a learned borrowing from Latin *causa* 'reason, cause' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: causar*
- *Say it: causar*, once more
- *Say it:* a sentence of your own with *causar*
- *Recall:* say the Spanish for seeing as, then the Spanish for given that, then say *causar* again

Before you move on

What does causar mean? ("To cause".) Say it once more.

581.2 provocar — to bring about, to cause; to provoke

Before the new one: say the Spanish for given that, then the Spanish for to cause.

You'll want to know: provocar

provocar — "to bring about, to cause; to provoke".

El ruido provoca dolor de cabeza.

Noise causes headaches.

Often for bad results: *provocar un accidente*. Spelling: *provoqué*.

The word, taken apart — and its English cousins

provocar is a learned borrowing from Latin *provocare* 'to call forth, to challenge', built from *pro-* and *vocare* 'to call' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: provocar*
- *Say it: provocar*, once more
- *Say it:* a sentence of your own with *provocar*
- *Recall:* say the Spanish for given that, then the Spanish for to cause, then say *provocar* again

Before you move on

What does provocar mean? ("To bring about, to cause; to provoke".) Say it once more.

581.3 debido a — due to, owing to

Before the new one: say the Spanish for to cause, then the Spanish for to bring about.

You'll want to know: debido a

debido a — "due to, owing to".

El tren llega tarde debido a la nieve.

The train arrives late due to the snow.

Followed by a noun: *debido al frío.*

The word, taken apart — and its English cousins

debido a is built on *debido*, the participle of *deber*, which is inherited from Latin *debere* 'to owe' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: debido a*
- *Say it: debido a*, once more
- *Say it:* a sentence of your own with *debido a*
- *Recall:* say the Spanish for to cause, then the Spanish for to bring about, then say *debido a* again

Before you move on

What does debido a mean? ("Due to, owing to".) Say it once more.

581.4 a causa de — because of

Before the new one: say the Spanish for to bring about, then the Spanish for due to.

You'll want to know: a causa de

a causa de — "because of".

No salimos a causa del frío.

We did not go out because of the cold.

Followed by a noun; *porque* is followed by a whole sentence.

The word, taken apart — and its English cousins

a causa de is built on *causa*, a learned borrowing from Latin *causa* 'reason, cause' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a causa de*
- *Say it: a causa de*, once more
- *Say it:* a sentence of your own with *a causa de*
- *Recall:* say the Spanish for to bring about, then the Spanish for due to, then say *a causa de* again

Before you move on

What does a causa de mean? (“Because of”.) Say it once more.

581.5 gracias a — thanks to

Before the new one: say the Spanish for due to, then the Spanish for because of.

You’ll want to know: gracias a

gracias a — “thanks to”.

Aprobé gracias a tu ayuda.

I passed thanks to your help.

For a good cause; for a bad one people say *por culpa de*.

The word, taken apart — and its English cousins

gracias a is built on *gracias*, the plural of *gracia*, inherited from Latin *gratia* ’favour, thanks’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: gracias a*
- *Say it: gracias a*, once more
- *Say it:* a sentence of your own with *gracias a*
- *Recall:* say the Spanish for due to, then the Spanish for because of, then say *gracias a* again

Before you move on

What does gracias a mean? (“Thanks to”.) Say it once more.

Chapter 582

Las consecuencias

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what follows from something, what it involves and what impact it had.
>
> *Complete the last lesson of chapter 582: I can say what follows from something, what it involves and what impact it had.*

582.1 la consecuencia — the consequence

Before the new one: say the Spanish for because of, then the Spanish for thanks to.

You'll want to know: la consecuencia

la consecuencia — "the consequence".

Todo lo que haces tiene consecuencias.

Everything you do has consequences.

Como consecuencia — as a result.

The word, taken apart — and its English cousins

consecuencia is a learned borrowing from Latin *consequentia*, built on *consequi* 'to follow closely' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la consecuencia*
- *Say it: la consecuencia*, once more
- *Say it:* a sentence of your own with *la consecuencia*
- *Recall:* say the Spanish for because of, then the Spanish for thanks to, then say *la consecuencia* again

Before you move on

What does la consecuencia mean? ("The consequence".) Say it once more.

582.2 el impacto — the impact

Before the new one: say the Spanish for thanks to, then the Spanish for the consequence.

You'll want to know: el impacto

el impacto — "the impact".

La noticia tuvo un gran impacto.

The news had a big impact.

Tener impacto en — to have an impact on.

The word, taken apart — and its English cousins

impacto is a learned borrowing from Latin *impactus* 'struck against' (EtymDB), the participle of *impingere*, built on *pangere* 'to fasten, to drive in'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el impacto*
- *Say it: el impacto*, once more
- *Say it:* a sentence of your own with *el impacto*
- *Recall:* say the Spanish for thanks to, then the Spanish for the consequence, then say *el impacto* again

Before you move on

What does el impacto mean? ("The impact".) Say it once more.

582.3 conllevar — to involve, to entail

Before the new one: say the Spanish for the consequence, then the Spanish for the impact.

You'll want to know: conllevar

conllevar — "to involve, to entail".

Este trabajo conlleva mucha responsabilidad.

This job involves a lot of responsibility.

Formal. It is conjugated like *llevar*.

The word, taken apart — and its English cousins

conllevar is built on *llevar* with the prefix *con-*; *llevar* is inherited from Latin *levare* 'to lift, to raise' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *conllevar*
- *Say it:* *conllevar*, once more
- *Say it:* a sentence of your own with *conllevar*
- *Recall:* say the Spanish for the consequence, then the Spanish for the impact, then say *conllevar* again

Before you move on

What does conllevar mean? ("To involve, to entail".) Say it once more.

582.4 por consiguiente — consequently, therefore

Before the new one: say the Spanish for the impact, then the Spanish for to involve.

You'll want to know: por consiguiente

por consiguiente — "consequently, therefore".

No hay tren; por consiguiente, vamos en coche.

There is no train; therefore, we are going by car.

Formal; in speech people say *por eso* or *así que*.

The word, taken apart — and its English cousins

por consiguiente is built on *consiguiente*, inherited from Latin *consequentem* 'following', from *consequi* 'to follow' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: por consiguiente*
- *Say it: por consiguiente*, once more
- *Say it:* a sentence of your own with *por consiguiente*
- *Recall:* say the Spanish for the impact, then the Spanish for to involve, then say *por consiguiente* again

Before you move on

What does por consiguiente mean? ("Consequently, therefore".) Say it once more.

582.5 de modo que — so; so that

Before the new one: say the Spanish for to involve, then the Spanish for consequently.

You'll want to know: de modo que

de modo que — "so; so that".

Estoy cansado, de modo que me voy.

I am tired, so I am leaving.

With the indicative it gives a result; with the subjunctive a purpose.

The word, taken apart — and its English cousins

de modo que is built on *modo*, inherited from Latin *modus* 'measure, manner' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: de modo que*
- *Say it: de modo que*, once more
- *Say it:* a sentence of your own with *de modo que*
- *Recall:* say the Spanish for to involve, then the Spanish for consequently, then say *de modo que* again

Before you move on

What does de modo que mean? ("So; so that".) Say it once more.

Chapter 583

Lo que influye

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say what influences or affects a situation.
>
> *Complete the last lesson of chapter 583: I can say what influences or affects a situation.*

583.1 influir — to influence, to have an effect

> Before the new one: say the Spanish for consequently, then the Spanish for so.

You'll want to know: influir

influir — "to influence, to have an effect".

> El tiempo influye en mi humor.
>
> *The weather influences my mood.*

Like *construir*: *influyo, influye*. With *en*: *influir en algo*.

The word, taken apart — and its English cousins

influir is a learned borrowing from Latin *influere* 'to flow in', built from *in* and *fluere* 'to flow' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: influir*
- *Say it: influir*, once more
- *Say it:* a sentence of your own with *influir*
- *Recall:* say the Spanish for consequently, then the Spanish for so, then say *influir* again

Before you move on

What does influir mean? ("To influence, to have an effect".) Say it once more.

583.2 la influencia — the influence

Before the new one: say the Spanish for so, then the Spanish for to influence.

You'll want to know: la influencia

la influencia — "the influence".

Sus padres tienen mucha influencia en él.

His parents have a lot of influence on him.

Tener influencia en or *sobre* someone.

The word, taken apart — and its English cousins

influencia is a learned word usually traced to Medieval Latin *influentia*, first the power thought to flow in from the stars; it is built on Latin *influere* 'to flow in' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la influencia*
- *Say it: la influencia*, once more
- *Say it:* a sentence of your own with *la influencia*
- *Recall:* say the Spanish for so, then the Spanish for to influence, then say *la influencia* again

Before you move on

What does la influencia mean? ("The influence".) Say it once more.

583.3 afectar — to affect

Before the new one: say the Spanish for to influence, then the Spanish for the influence.

You'll want to know: afectar

afectar — "to affect".

La crisis afecta a todos.

The crisis affects everyone.

With *a* before people: *afecta a los jóvenes.*

The word, taken apart — and its English cousins

afectar is a learned borrowing from Latin *affectare*, a form of *afficere* 'to act upon', built from *ad* and *facere* 'to do' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *afectar*
- *Say it:* *afectar*, once more
- *Say it:* a sentence of your own with *afectar*
- *Recall:* say the Spanish for to influence, then the Spanish for the influence, then say *afectar* again

Before you move on

What does afectar mean? ("To affect".) Say it once more.

583.4 el factor — the factor

Before the new one: say the Spanish for the influence, then the Spanish for to affect.

You'll want to know: el factor

el factor — "the factor".

El precio es un factor importante.

The price is an important factor.

Un factor clave — a key factor.

The word, taken apart — and its English cousins

factor is a learned borrowing from Latin *factor* 'maker, doer', built on *facere* 'to make, to do' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el factor*
- *Say it: el factor*, once more
- *Say it:* a sentence of your own with *el factor*
- *Recall:* say the Spanish for the influence, then the Spanish for to affect, then say *el factor* again

Before you move on

What does el factor mean? ("The factor".) Say it once more.

583.5 generar — to generate, to create

Before the new one: say the Spanish for to affect, then the Spanish for the factor.

You'll want to know: generar

generar — "to generate, to create".

La nueva fábrica genera empleo.

The new factory creates jobs.

Common in news: *generar dinero, generar problemas.*

The word, taken apart — and its English cousins

generar is a learned borrowing from Latin *generare* 'to beget, to produce', built on *genus* 'birth, kind' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: generar*
- *Say it: generar*, once more
- *Say it:* a sentence of your own with *generar*
- *Recall:* say the Spanish for to affect, then the Spanish for the factor, then say *generar* again

Before you move on

What does generar mean? ("To generate, to create".) Say it once more.

583.6 Opiniones y razones

Say the Spanish for to consider and to maintain.

Your turn

Say these aloud:

- to consider, to maintain, the belief, the conviction, the stance
- to argue, the objection, convinced, reasonable, logical
- the disagreement, to disagree, to oppose, in favour, opposed
- to criticise, the criticism, to contradict, to admit, absurd
- the reason, as a result of, since, seeing as, given that
- to cause, to bring about, due to, because of, thanks to
- the consequence, the impact, to involve, consequently, so
- to influence, the influence, to affect, the factor, to generate

Before you move on

To consider? (**considerar**.) To maintain? (**sostener**.) The belief? (**la creencia**.) The conviction? (**la convicción**.) The stance? (**la**

postura.) To argue? (**argumentar**.) The objection? (**la objeción**.) Convinced? (**convencido**.) Reasonable? (**razonable**.) Logical? (**lógico**.) The disagreement? (**el desacuerdo**.) To disagree? (**discrepar**.) To oppose? (**oponerse**.) In favour? (**partidario**.) Opposed? (**contrario**.) To criticise? (**criticar**.) The criticism? (**la crítica**.) To contradict? (**contradecir**.) To admit? (**reconocer**.) Absurd? (**absurdo**.) The reason? (**el motivo**.) As a result of? (**a raíz de**.) Since? (**ya que**.) Seeing as? (**puesto que**.) Given that? (**dado que**.) To cause? (**causar**.) To bring about? (**provocar**.) Due to? (**debido a**.) Because of? (**a causa de**.) Thanks to? (**gracias a**.) The consequence? (**la consecuencia**.) The impact? (**el impacto**.) To involve? (**conllevar**.) Consequently? (**por consiguiente**.) So? (**de modo que**.) To influence? (**influir**.) The influence? (**la influencia**.) To affect? (**afectar**.) The factor? (**el factor**.) To generate? (**generar**.)

Chapter 584

Pros y contras

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can weigh the advantages and the drawbacks of a choice.
>
> *Complete the last lesson of chapter 584: I can weigh the advantages and the drawbacks of a choice.*

584.1 la ventaja — the advantage

Before the new one: say the Spanish for the factor, then the Spanish for to generate.

You'll want to know: la ventaja

la ventaja — "the advantage".

> Vivir cerca tiene muchas ventajas.
>
> *Living nearby has many advantages.*

Sacar ventaja — to gain an advantage, to get ahead.

The word, taken apart — and its English cousins

ventaja was borrowed from French *avantage* 'a being in front', built on *avant*, from Latin *ab ante* 'in front' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ventaja*
- *Say it: la ventaja*, once more
- *Say it:* a sentence of your own with *la ventaja*
- *Recall:* say the Spanish for the factor, then the Spanish for to generate, then say *la ventaja* again

Before you move on

What does la ventaja mean? ("The advantage".) Say it once more.

584.2 la desventaja — the disadvantage

Before the new one: say the Spanish for to generate, then the Spanish for the advantage.

You'll want to know: la desventaja

la desventaja — "the disadvantage".

La desventaja es el precio.

The disadvantage is the price.

The opposite of *la ventaja*.

The word, taken apart — and its English cousins

desventaja is built on *ventaja* with the prefix *des-*; *ventaja* was borrowed from French *avantage*, from Latin *ab ante* 'in front' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la desventaja*
- *Say it: la desventaja*, once more
- *Say it:* a sentence of your own with *la desventaja*
- *Recall:* say the Spanish for to generate, then the Spanish for the advantage, then say *la desventaja* again

Before you move on

What does la desventaja mean? ("The disadvantage".) Say it once more.

584.3 el inconveniente — the drawback, the problem; inconvenient

Before the new one: say the Spanish for the advantage, then the Spanish for the disadvantage.

You'll want to know: el inconveniente

el inconveniente — "the drawback, the problem; inconvenient".

No hay ningún inconveniente.

There is no problem at all.

No tengo inconveniente — I do not mind.

The word, taken apart — and its English cousins

inconveniente is a learned borrowing from Latin *inconveniens* 'unsuitable', built on *convenire* 'to come together, to suit' with *in-* 'not' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el inconveniente*
- *Say it: el inconveniente*, once more
- *Say it:* a sentence of your own with *el inconveniente*
- *Recall:* say the Spanish for the advantage, then the Spanish for the disadvantage, then say *el inconveniente* again

Before you move on

What does el inconveniente mean? ("The drawback, the problem; inconvenient".) Say it once more.

584.4 positivo — positive

Before the new one: say the Spanish for the disadvantage, then the Spanish for the drawback.

You'll want to know: positivo

positivo — "positive".

Tiene una actitud positiva.

She has a positive attitude.

Lo positivo — the good side.

The word, taken apart — and its English cousins

positivo is a learned borrowing from Latin *positivus* 'set down, settled', built on *ponere* 'to put' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: positivo*
- *Say it: positivo*, once more
- *Say it:* a sentence of your own with *positivo*
- *Recall:* say the Spanish for the disadvantage, then the Spanish for the drawback, then say *positivo* again

Before you move on

What does positivo mean? (“Positive”.) Say it once more.

584.5 negativo — negative

Before the new one: say the Spanish for the drawback, then the Spanish for positive.

You’ll want to know: negativo

negativo — “negative”.

No seas tan negativo.

Do not be so negative.

Lo negativo — the bad side.

The word, taken apart — and its English cousins

negativo is a learned borrowing from Latin *negativus*, built on *negare* ’to deny’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *negativo*
- *Say it:* *negativo*, once more
- *Say it:* a sentence of your own with *negativo*
- *Recall:* say the Spanish for the drawback, then the Spanish for positive, then say *negativo* again

Before you move on

What does negativo mean? (“Negative”.) Say it once more.

Chapter 585

Propuestas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can make a proposal, give a suggestion and warn of a problem.
>
> *Complete the last lesson of chapter 585: I can make a proposal, give a suggestion and warn of a problem.*

585.1 proponer — to propose, to suggest

Before the new one: say the Spanish for positive, then the Spanish for negative.

You'll want to know: proponer

proponer — "to propose, to suggest".

> Propongo salir más temprano.
>
> *I propose leaving earlier.*

Like *poner*: *propongo, propuse, propuesto.*

The word, taken apart — and its English cousins

proponer is a learned borrowing from Latin *proponere* 'to put forward', *pro* + *ponere* 'to put', and rebuilt on *poner* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: proponer*
- *Say it: proponer*, once more
- *Say it:* a sentence of your own with *proponer*
- *Recall:* say the Spanish for positive, then the Spanish for negative, then say *proponer* again

Before you move on

What does proponer mean? ("To propose, to suggest".) Say it once more.

585.2 la propuesta — the proposal

Before the new one: say the Spanish for negative, then the Spanish for to propose.

You'll want to know: la propuesta

la propuesta — "the proposal".

Me gusta tu propuesta.

I like your proposal.

Hacer una propuesta — to make a proposal.

The word, taken apart — and its English cousins

la propuesta is built on *propuesto*, the participle of *proponer*, a learned borrowing from Latin *proponere*, whose participle was *propositus* 'put forward' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la propuesta*
- *Say it: la propuesta*, once more
- *Say it:* a sentence of your own with *la propuesta*
- *Recall:* say the Spanish for negative, then the Spanish for to propose, then say *la propuesta* again

Before you move on

What does la propuesta mean? ("The proposal".) Say it once more.

585.3 la sugerencia — the suggestion

Before the new one: say the Spanish for to propose, then the Spanish for the proposal.

You'll want to know: la sugerencia

la sugerencia — "the suggestion".

¿Tienes alguna sugerencia?

Do you have any suggestions?

Built on *sugerir* — to suggest.

The word, taken apart — and its English cousins

sugerencia is built on *sugerir*, a learned borrowing from Latin *suggerere* 'to bring up, to supply', *sub* + *gerere* 'to carry' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la sugerencia*
- *Say it: la sugerencia*, once more
- *Say it:* a sentence of your own with *la sugerencia*
- *Recall:* say the Spanish for to propose, then the Spanish for the proposal, then say *la sugerencia* again

Before you move on

What does la sugerencia mean? ("The suggestion".) Say it once more.

585.4 advertir — to warn; to notice

Before the new one: say the Spanish for the proposal, then the Spanish for the suggestion.

You'll want to know: advertir

advertir — "to warn; to notice".

Te advierto que es difícil.

I am warning you that it is difficult.

Like *sentir*: *advierto, advirtió.*

The word, taken apart — and its English cousins

advertir is inherited from Latin *advertere* 'to turn towards, to give attention', built from *ad* and *vertere* 'to turn' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: advertir*
- *Say it: advertir*, once more
- *Say it:* a sentence of your own with *advertir*
- *Recall:* say the Spanish for the proposal, then the Spanish for the suggestion, then say *advertir* again

Before you move on

What does advertir mean? ("To warn; to notice".) Say it once more.

585.5 la advertencia — the warning

Before the new one: say the Spanish for the suggestion, then the Spanish for to warn.

You'll want to know: la advertencia

la advertencia — "the warning".

Fue una advertencia seria.

It was a serious warning.

Hacer una advertencia — to give a warning.

The word, taken apart — and its English cousins

advertencia is built on *advertir*, inherited from Latin *advertere* 'to turn towards' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la advertencia*
- *Say it: la advertencia*, once more
- *Say it:* a sentence of your own with *la advertencia*
- *Recall:* say the Spanish for the suggestion, then the Spanish for to warn, then say *la advertencia* again

Before you move on

What does la advertencia mean? ("The warning".) Say it once more.

Chapter 586

Dar explicaciones

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can justify a decision, tell an excuse from a reason and show that something is true.
>
> *Complete the last lesson of chapter 586: I can justify a decision, tell an excuse from a reason and show that something is true.*

586.1 justificar — to justify

> Before the new one: say the Spanish for to warn, then the Spanish for the warning.

You'll want to know: justificar

justificar — "to justify".

> Tienes que justificar los gastos.
>
> *You have to justify the expenses.*

Spelling: *justifiqué*.

The word, taken apart — and its English cousins

justificar is a learned borrowing from Late Latin *iustificare* 'to make right', built on *iustus* 'right, lawful' and *facere* 'to make' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: justificar*
- *Say it: justificar*, once more
- *Say it:* a sentence of your own with *justificar*
- *Recall:* say the Spanish for to warn, then the Spanish for the warning, then say *justificar* again

Before you move on

What does justificar mean? ("To justify".) Say it once more.

586.2 la justificación — the justification

Before the new one: say the Spanish for the warning, then the Spanish for to justify.

You'll want to know: la justificación

la justificación — "the justification".

No hay justificación para eso.

There is no justification for that.

Often after *no hay*.

The word, taken apart — and its English cousins

justificación is a learned borrowing from Late Latin *iustificatio*, built on *iustificare* 'to make right', from *iustus* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la justificación*
- *Say it: la justificación*, once more
- *Say it:* a sentence of your own with *la justificación*
- *Recall:* say the Spanish for the warning, then the Spanish for to justify, then say *la justificación* again

Before you move on

What does la justificación mean? ("The justification".) Say it once more.

586.3 la excusa — the excuse

Before the new one: say the Spanish for to justify, then the Spanish for the justification.

You'll want to know: la excusa

la excusa — "the excuse".

Tiene una excusa para todo.

He has an excuse for everything.

Poner excusas — to make excuses.

The word, taken apart — and its English cousins

excusa is built on *excusar*, inherited from Latin *excusare* 'to free from blame', *ex* + *causa* 'case, charge' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la excusa*
- *Say it: la excusa*, once more
- *Say it:* a sentence of your own with *la excusa*
- *Recall:* say the Spanish for to justify, then the Spanish for the justification, then say *la excusa* again

Before you move on

What does la excusa mean? ("The excuse".) Say it once more.

586.4 el pretexto — the pretext

Before the new one: say the Spanish for the justification, then the Spanish for the excuse.

You'll want to know: el pretexto

el pretexto — "the pretext".

Usó la lluvia como pretexto.

He used the rain as a pretext.

Con el pretexto de — on the pretext of.

The word, taken apart — and its English cousins

pretexto is a learned borrowing from Latin *praetextus* 'a cover, a show', built on *praetexere* 'to weave in front', from *texere* 'to weave' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el pretexto*
- *Say it: el pretexto*, once more
- *Say it:* a sentence of your own with *el pretexto*
- *Recall:* say the Spanish for the justification, then the Spanish for the excuse, then say *el pretexto* again

Before you move on

What does el pretexto mean? ("The pretext".) Say it once more.

586.5 demostrar — to show, to prove

Before the new one: say the Spanish for the excuse, then the Spanish for the pretext.

You'll want to know: demostrar

demostrar — "to show, to prove".

Los datos demuestran que tengo razón.

The data show that I am right.

Stem change o→ue: *demuestro*.

The word, taken apart — and its English cousins

demostrar is inherited from Latin *demonstrare* 'to point out', built on *monstrare* 'to show', the verb behind *mostrar* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *demostrar*
- *Say it:* *demostrar*, once more
- *Say it:* a sentence of your own with *demostrar*
- *Recall:* say the Spanish for the excuse, then the Spanish for the pretext, then say *demostrar* again

Before you move on

What does demostrar mean? ("To show, to prove".) Say it once more.

Chapter 587

Está claro

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something is obvious, check it and say how sure I am.
>
> *Complete the last lesson of chapter 587: I can say that something is obvious, check it and say how sure I am.*

587.1 comprobar — to check, to verify

> Before the new one: say the Spanish for the pretext, then the Spanish for to show.

You'll want to know: comprobar

comprobar — "to check, to verify".

> Comprueba el precio antes de pagar.
>
> *Check the price before paying.*

Stem change o→ue: *compruebo*.

The word, taken apart — and its English cousins

comprobar is inherited from Latin *comprobare* 'to confirm, to approve', built on *probare* 'to test' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: comprobar*
- *Say it: comprobar*, once more
- *Say it:* a sentence of your own with *comprobar*
- *Recall:* say the Spanish for the pretext, then the Spanish for to show, then say *comprobar* again

Before you move on

What does comprobar mean? ("To check, to verify".) Say it once more.

587.2 evidente — evident, obvious

Before the new one: say the Spanish for to show, then the Spanish for to check.

You'll want to know: evidente

evidente — "evident, obvious".

Es evidente que está cansado.

It is obvious that he is tired.

Es evidente que + indicative.

The word, taken apart — and its English cousins

evidente is a learned borrowing from Latin *evidens* 'clearly visible', built from *ex* and *videre* 'to see' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: evidente*
- *Say it: evidente*, once more
- *Say it:* a sentence of your own with *evidente*
- *Recall:* say the Spanish for to show, then the Spanish for to check, then say *evidente* again

Before you move on

What does evidente mean? (“Evident, obvious”.) Say it once more.

587.3 obvio — obvious

Before the new one: say the Spanish for to check, then the Spanish for evident.

You’ll want to know: obvio

obvio — “obvious”.

La respuesta es obvia.

The answer is obvious.

Es obvio que + indicative.

The word, taken apart — and its English cousins

obvio is a learned borrowing from Latin *obvius* ’standing in the way’, built from *ob* and *via* ’road’: the obvious is what you meet on the road (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *obvio*
- *Say it:* *obvio*, once more
- *Say it:* a sentence of your own with *obvio*
- *Recall:* say the Spanish for to check, then the Spanish for evident, then say *obvio* again

Before you move on

What does obvio mean? ("Obvious".) Say it once more.

587.4 la certeza — the certainty

Before the new one: say the Spanish for evident, then the Spanish for obvious.

You'll want to know: la certeza

la certeza — "the certainty".

No tengo la certeza.

I am not certain.

Con certeza — for sure.

The word, taken apart — and its English cousins

certeza is built on *cierto* with the ending *-eza*; *cierto* is inherited from Latin *certus* 'settled, sure' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la certeza*
- *Say it: la certeza*, once more
- *Say it:* a sentence of your own with *la certeza*
- *Recall:* say the Spanish for evident, then the Spanish for obvious, then say *la certeza* again

Before you move on

What does la certeza mean? (“The certainty”.) Say it once more.

587.5 aparentemente — apparently

Before the new one: say the Spanish for obvious, then the Spanish for the certainty.

You’ll want to know: aparentemente

aparentemente — “apparently”.

Aparentemente, todo va bien.

Apparently, everything is going well.

Aparente + -mente.

The word, taken apart — and its English cousins

aparentemente is built on *aparente* and *-mente*; *aparente* is a learned borrowing from Latin *apparens*, from *apparere* ’to appear’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *aparentemente*
- *Say it:* *aparentemente*, once more
- *Say it:* a sentence of your own with *aparentemente*
- *Recall:* say the Spanish for obvious, then the Spanish for the certainty, then say *aparentemente* again

Before you move on

What does aparentemente mean? ("Apparently".) Say it once more.

Chapter 588

Ordenar las ideas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can explain what I mean, contrast two points, stress what matters most and draw a conclusion.
>
> *Complete the last lesson of chapter 588: I can explain what I mean, contrast two points, stress what matters most and draw a conclusion.*

588.1 por tanto — therefore, so

Before the new one: say the Spanish for the certainty, then the Spanish for apparently.

You'll want to know: por tanto

por tanto — "therefore, so".

> No tengo dinero; por tanto, no voy.
>
> *I have no money; therefore, I am not going.*

Means the same as *por lo tanto* and *así que*, a little more formal.

The word, taken apart — and its English cousins

por tanto is built on *tanto*, inherited from Latin *tantus* 'so great, so much' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: por tanto*
- *Say it: por tanto*, once more
- *Say it:* a sentence of your own with *por tanto*
- *Recall:* say the Spanish for the certainty, then the Spanish for apparently, then say *por tanto* again

Before you move on

What does por tanto mean? ("Therefore, so".) Say it once more.

588.2 o sea — I mean, that is

Before the new one: say the Spanish for apparently, then the Spanish for therefore.

You'll want to know: o sea

o sea — "I mean, that is".

Llego el lunes, o sea, dentro de tres días.

I arrive on Monday, that is, in three days.

Very common in speech to explain or correct what you said.

The word, taken apart — and its English cousins

o sea 'or let it be' is built on *o*, inherited from Latin *aut* 'or' (EtymDB), and *sea*, the subjunctive of *ser*, usually traced to Latin *sedeat*, from *sedere* 'to sit'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: o sea*
- *Say it: o sea*, once more
- *Say it:* a sentence of your own with *o sea*
- *Recall:* say the Spanish for apparently, then the Spanish for therefore, then say *o sea* again

Before you move on

What does o sea mean? ("I mean, that is".) Say it once more.

588.3 en cambio — whereas, by contrast

Before the new one: say the Spanish for therefore, then the Spanish for I mean.

You'll want to know: en cambio

en cambio — "whereas, by contrast".

Yo trabajo; mi hermano, en cambio, estudia.

I work; my brother, by contrast, studies.

It shows a contrast between two people or things.

The word, taken apart — and its English cousins

en cambio is built on *cambio*, from *cambiar*, which is inherited from Late Latin *cambiare* 'to exchange', a word of Gaulish origin (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en cambio*
- *Say it: en cambio*, once more
- *Say it:* a sentence of your own with *en cambio*
- *Recall:* say the Spanish for therefore, then the Spanish for I mean, then say *en cambio* again

Before you move on

What does en cambio mean? ("Whereas, by contrast".) Say it once more.

588.4 sobre todo — above all, especially

Before the new one: say the Spanish for I mean, then the Spanish for whereas.

You'll want to know: sobre todo

sobre todo — "above all, especially".

> Me gusta, sobre todo, el precio.
>
> *I like, above all, the price.*

Written as two words; *el sobretodo* is an overcoat.

The word, taken apart — and its English cousins

sobre todo is built on *sobre*, inherited from Latin *super* 'over', and *todo*, from *totus* 'whole' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sobre todo*
- *Say it: sobre todo*, once more
- *Say it:* a sentence of your own with *sobre todo*
- *Recall:* say the Spanish for I mean, then the Spanish for whereas, then say *sobre todo* again

Before you move on

What does sobre todo mean? ("Above all, especially".) Say it once more.

588.5 en general — in general, generally

Before the new one: say the Spanish for whereas, then the Spanish for above all.

You'll want to know: en general

en general — "in general, generally".

En general, la gente está contenta.

In general, people are happy.

Por lo general means the same.

The word, taken apart — and its English cousins

en general is built on *general*, a learned borrowing from Latin *generalis* 'of a whole class', built on *genus* 'kind' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *en general*
- *Say it:* *en general*, once more
- *Say it:* a sentence of your own with *en general*
- *Recall:* say the Spanish for whereas, then the Spanish for above all, then say *en general* again

Before you move on

What does en general mean? ("In general, generally".) Say it once more.

Chapter 589

En realidad

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can correct an idea, stress a point and say what is true deep down.
>
> *Complete the last lesson of chapter 589: I can correct an idea, stress a point and say what is true deep down.*

589.1 de hecho — in fact

Before the new one: say the Spanish for above all, then the Spanish for in general.

You'll want to know: de hecho

de hecho — "in fact".

> De hecho, ya lo sabía.
>
> *In fact, I already knew it.*

It adds a stronger point or a correction.

The word, taken apart — and its English cousins

de hecho is built on *hecho*, inherited from Latin *factus* 'done, made', the participle of *facere* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: de hecho*
- *Say it: de hecho*, once more
- *Say it:* a sentence of your own with *de hecho*
- *Recall:* say the Spanish for above all, then the Spanish for in general, then say *de hecho* again

Before you move on

What does de hecho mean? ("In fact".) Say it once more.

589.2 en realidad — actually, really

Before the new one: say the Spanish for in general, then the Spanish for in fact.

You'll want to know: en realidad

en realidad — "actually, really".

En realidad, no es tan caro.

Actually, it is not so expensive.

It corrects what someone thinks.

The word, taken apart — and its English cousins

en realidad is built on *realidad*, a learned borrowing from Medieval Latin *realitas*, built on *res* 'thing' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en realidad*
- *Say it: en realidad*, once more
- *Say it:* a sentence of your own with *en realidad*
- *Recall:* say the Spanish for in general, then the Spanish for in fact, then say *en realidad* again

Before you move on

What does en realidad mean? ("Actually, really".) Say it once more.

589.3 desde luego — certainly, of course

Before the new one: say the Spanish for in fact, then the Spanish for actually.

You'll want to know: desde luego

desde luego — "certainly, of course".

Desde luego, te ayudo.

Of course I will help you.

¡Desde luego! can also show annoyance: honestly!

The word, taken apart — and its English cousins

desde luego is built on *luego*, inherited from Latin *loco* 'on the spot', a form of *locus* 'place' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: desde luego*
- *Say it: desde luego*, once more
- *Say it:* a sentence of your own with *desde luego*
- *Recall:* say the Spanish for in fact, then the Spanish for actually, then say *desde luego* again

Before you move on

What does desde luego mean? ("Certainly, of course".) Say it once more.

589.4 en absoluto — not at all

Before the new one: say the Spanish for actually, then the Spanish for certainly.

You'll want to know: en absoluto

en absoluto — "not at all".

—¿Te molesta? —En absoluto.

Does it bother you? Not at all.

Alone it means no, not at all, even without *no*.

The word, taken apart — and its English cousins

en absoluto is built on *absoluto*, a learned borrowing from Latin *absolutus* 'freed, complete', from *absolvere* 'to set loose' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en absoluto*
- *Say it: en absoluto*, once more
- *Say it:* a sentence of your own with *en absoluto*
- *Recall:* say the Spanish for actually, then the Spanish for certainly, then say *en absoluto* again

Before you move on

What does en absoluto mean? (“Not at all”.) Say it once more.

589.5 en el fondo — deep down, at heart

Before the new one: say the Spanish for certainly, then the Spanish for not at all.

You’ll want to know: en el fondo

en el fondo — “deep down, at heart”.

En el fondo, es una buena persona.

Deep down, he is a good person.

It gives what is true underneath the surface.

The word, taken apart — and its English cousins

en el fondo is built on *fondo* ’bottom’, inherited from Latin *fundus* ’bottom, base’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *en el fondo*
- *Say it:* *en el fondo*, once more
- *Say it:* a sentence of your own with *en el fondo*
- *Recall:* say the Spanish for certainly, then the Spanish for not at all, then say *en el fondo* again

Before you move on

What does en el fondo mean? (“Deep down, at heart”.) Say it once more.

Chapter 590

Buscar trabajo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read a job offer that names the vacancy, the profile and the training needed, and how people are selected.
>
> *Complete the last lesson of chapter 590: I can read a job offer that names the vacancy, the profile and the training needed, and how people are selected.*

590.1 la vacante — the vacancy, the open post

> Before the new one: say the Spanish for not at all, then the Spanish for deep down.

You'll want to know: la vacante

la vacante — "the vacancy, the open post".

> Hay una vacante en la tienda.
>
> *There is a vacancy in the shop.*

Also an adjective: *un puesto vacante*.

The word, taken apart — and its English cousins

vacante is a learned borrowing from Latin *vacans* 'being empty', from *vacare* 'to be empty, to be free' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la vacante*
- *Say it: la vacante*, once more
- *Say it:* a sentence of your own with *la vacante*
- *Recall:* say the Spanish for not at all, then the Spanish for deep down, then say *la vacante* again

Before you move on

What does la vacante mean? ("The vacancy, the open post".) Say it once more.

590.2 seleccionar — to select, to choose

Before the new one: say the Spanish for deep down, then the Spanish for the vacancy.

You'll want to know: seleccionar

seleccionar — "to select, to choose".

Seleccionamos a tres personas para la entrevista.

We selected three people for the interview.

More formal than *elegir*.

The word, taken apart — and its English cousins

seleccionar is built on *selección*, a learned borrowing from Latin *selectio* 'a picking out' (EtymDB), from *seligere*, built on *legere* 'to gather'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: seleccionar*
- *Say it: seleccionar*, once more
- *Say it:* a sentence of your own with *seleccionar*
- *Recall:* say the Spanish for deep down, then the Spanish for the vacancy, then say *seleccionar* again

Before you move on

What does seleccionar mean? ("To select, to choose".) Say it once more.

590.3 el empleado — the employee

Before the new one: say the Spanish for the vacancy, then the Spanish for to select.

You'll want to know: el empleado

el empleado — "the employee".

Es empleado de un banco.

He is a bank employee.

A woman is *la empleada*; in Spain *la empleada del hogar* is a domestic worker.

The word, taken apart — and its English cousins

empleado is the participle of *emplear*, which was borrowed from Old French *empleier*, from Latin *implicare* 'to fold in, to involve' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el empleado*
- *Say it:* *el empleado*, once more
- *Say it:* a sentence of your own with *el empleado*
- *Recall:* say the Spanish for the vacancy, then the Spanish for to select, then say *el empleado* again

Before you move on

What does el empleado mean? ("The employee".) Say it once more.

590.4 la formación — the training, the education

Before the new one: say the Spanish for to select, then the Spanish for the employee.

You'll want to know: la formación

la formación — "the training, the education".

Buscamos a alguien con formación técnica.

We are looking for someone with technical training.

Formación profesional (FP) is vocational training in Spain.

The word, taken apart — and its English cousins

formación is a learned borrowing from Latin *formatio* 'a shaping', built on *formare* and *forma* 'shape' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la formación*
- *Say it: la formación*, once more
- *Say it:* a sentence of your own with *la formación*
- *Recall:* say the Spanish for to select, then the Spanish for the employee, then say *la formación* again

Before you move on

What does la formación mean? (“The training, the education”.) Say it once more.

590.5 el perfil — the profile

Before the new one: say the Spanish for the employee, then the Spanish for the training.

You’ll want to know: el perfil

el perfil — “the profile”.

Buscamos un perfil técnico.

We are looking for someone with a technical profile.

In a job offer it is the kind of person wanted. *Mi perfil* is also your profile online.

The word, taken apart — and its English cousins

perfil was borrowed from Occitan *perfil* ’outline’ (EtymDB), usually traced to Latin *filum* ’thread’: a line drawn round the edge.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el perfil*
- *Say it:* *el perfil*, once more
- *Say it:* a sentence of your own with *el perfil*
- *Recall:* say the Spanish for the employee, then the Spanish for the training, then say *el perfil* again

Before you move on

What does el perfil mean? ("The profile".) Say it once more.

Chapter 591

Formas de trabajar

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can talk about civil servants, the self-employed, working from home, the union and its agreement.
>
> *Complete the last lesson of chapter 591: I can talk about civil servants, the self-employed, working from home, the union and its agreement.*

591.1 el convenio — the agreement; the collective agreement

> Before the new one: say the Spanish for the training, then the Spanish for the profile.

You'll want to know: el convenio

el convenio — "the agreement; the collective agreement".

> El convenio sube los sueldos un dos por ciento.
>
> *The collective agreement raises wages by two per cent.*

El convenio sets pay and hours for everyone in one kind of work.

The word, taken apart — and its English cousins

convenio comes from *convenir*, inherited from Latin *convenire* 'to come together, to agree' (EtymDB), built on *venire* 'to come'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el convenio*
- *Say it: el convenio*, once more
- *Say it:* a sentence of your own with *el convenio*
- *Recall:* say the Spanish for the training, then the Spanish for the profile, then say *el convenio* again

Before you move on

What does el convenio mean? ("The agreement; the collective agreement".) Say it once more.

591.2 el autónomo — the self-employed worker; autonomous

Before the new one: say the Spanish for the profile, then the Spanish for the agreement.

You'll want to know: el autónomo

el autónomo — "the self-employed worker; autonomous".

Mi hermana trabaja como autónoma.

My sister is self-employed.

In Spain *ser autónomo* is to be self-employed; much of Latin America says *trabajador independiente*.

The word, taken apart — and its English cousins

autónomo is a learned borrowing from Greek *autonomos* 'having its own laws', built from *autos* 'self' and *nomos* 'custom, law' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el autónomo*
- *Say it: el autónomo*, once more
- *Say it:* a sentence of your own with *el autónomo*
- *Recall:* say the Spanish for the profile, then the Spanish for the agreement, then say *el autónomo* again

Before you move on

What does el autónomo mean? ("The self-employed worker; autonomous".) Say it once more.

591.3 el funcionario — the civil servant, the public employee

Before the new one: say the Spanish for the agreement, then the Spanish for the self-employed worker.

You'll want to know: el funcionario

el funcionario — "the civil servant, the public employee".

Mi madre es funcionaria del ayuntamiento.

My mother is a civil servant at the town council.

A woman is *la funcionaria*. In Spain many people sit public exams to become one.

The word, taken apart — and its English cousins

funcionario is built on *función*, a learned borrowing from Latin *functio* 'a performance, a duty' (EtymDB), from *fungi* 'to carry out'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el funcionario*
- *Say it: el funcionario*, once more
- *Say it:* a sentence of your own with *el funcionario*
- *Recall:* say the Spanish for the agreement, then the Spanish for the self-employed worker, then say *el funcionario* again

Before you move on

What does el funcionario mean? ("The civil servant, the public employee".) Say it once more.

591.4 el teletrabajo — remote work, working from home

Before the new one: say the Spanish for the self-employed worker, then the Spanish for the civil servant.

You'll want to know: el teletrabajo

el teletrabajo — "remote work, working from home".

Hago teletrabajo dos días a la semana.

I work from home two days a week.

The verb is *teletrabajar*.

The word, taken apart — and its English cousins

teletrabajo is built on Greek *tele* 'far' and *trabajo*. *Trabajo* is usually traced to Vulgar Latin *tripālium*, a device for torture (EtymDB), so the word for work first meant suffering.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el teletrabajo*
- *Say it: el teletrabajo*, once more
- *Say it:* a sentence of your own with *el teletrabajo*
- *Recall:* say the Spanish for the self-employed worker, then the Spanish for the civil servant, then say *el teletrabajo* again

Before you move on

What does el teletrabajo mean? ("Remote work, working from home".) Say it once more.

591.5 el sindicato — the trade union

Before the new one: say the Spanish for the civil servant, then the Spanish for remote work.

You'll want to know: el sindicato

el sindicato — "the trade union".

El sindicato pide salarios más altos.

The union is asking for higher wages.

A trade unionist is *un sindicalista*; a member is *un afiliado*.

The word, taken apart — and its English cousins

sindicato is built on *síndico* 'representative', a learned borrowing from Latin *syndicus* and Greek *syndikos* 'advocate' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el sindicato*
- *Say it:* *el sindicato*, once more
- *Say it:* a sentence of your own with *el sindicato*
- *Recall:* say the Spanish for the civil servant, then the Spanish for remote work, then say *el sindicato* again

Before you move on

What does el sindicato mean? ("The trade union".) Say it once more.

591.6 Repaso de los capítulos 584–591

Say the Spanish for the advantage and the disadvantage.

Your turn

Say these aloud:

- the advantage, the disadvantage, the drawback, positive, negative
- to propose, the proposal, the suggestion, to warn, the warning
- to justify, the justification, the excuse, the pretext, to show
- to check, evident, obvious, the certainty, apparently
- therefore, I mean, whereas, above all, in general
- in fact, actually, certainly, not at all, deep down

- the vacancy, to select, the employee, the training, the profile
- the agreement, the self-employed worker, the civil servant, remote work, the trade union

Before you move on

The advantage? (**la ventaja**.) The disadvantage? (**la desventaja**.) The drawback? (**el inconveniente**.) Positive? (**positivo**.) Negative? (**negativo**.) To propose? (**proponer**.) The proposal? (**la propuesta**.) The suggestion? (**la sugerencia**.) To warn? (**advertir**.) The warning? (**la advertencia**.) To justify? (**justificar**.) The justification? (**la justificación**.) The excuse? (**la excusa**.) The pretext? (**el pretexto**.) To show? (**demostrar**.) To check? (**comprobar**.) Evident? (**evidente**.) Obvious? (**obvio**.) The certainty? (**la certeza**.) Apparently? (**aparentemente**.) Therefore? (**por tanto**.) I mean? (**o sea**.) Whereas? (**en cambio**.) Above all? (**sobre todo**.) In general? (**en general**.) In fact? (**de hecho**.) Actually? (**en realidad**.) Certainly? (**desde luego**.) Not at all? (**en absoluto**.) Deep down? (**en el fondo**.) The vacancy? (**la vacante**.) To select? (**seleccionar**.) The employee? (**el empleado**.) The training? (**la formación**.) The profile? (**el perfil**.) The agreement? (**el convenio**.) The self-employed worker? (**el autónomo**.) The civil servant? (**el funcionario**.) Remote work? (**el teletrabajo**.) The trade union? (**el sindicato**.)

Chapter 592

La empresa

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what kind of company someone works for and where its head office and branches are.
>
> *Complete the last lesson of chapter 592: I can say what kind of company someone works for and where its head office and branches are.*

592.1 el empresario — the businessman, the employer

> Before the new one: say the Spanish for remote work, then the Spanish for the trade union.

You'll want to know: el empresario

el empresario — "the businessman, the employer".

> Su padre es empresario.
>
> *His father is a businessman.*

A woman is *la empresaria*. *Los empresarios* can mean employers as a group.

The word, taken apart — and its English cousins

empresario is built on *empresa*, which was borrowed from Italian *impresa* 'undertaking', built on Latin *prehendere* 'to take hold of' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el empresario*
- *Say it: el empresario*, once more
- *Say it:* a sentence of your own with *el empresario*
- *Recall:* say the Spanish for remote work, then the Spanish for the trade union, then say *el empresario* again

Before you move on

What does el empresario mean? ("The businessman, the employer".) Say it once more.

592.2 la multinacional — the multinational company

Before the new one: say the Spanish for the trade union, then the Spanish for the businessman.

You'll want to know: la multinacional

la multinacional — "the multinational company".

Trabaja en una multinacional.

She works for a multinational.

Also an adjective: *una empresa multinacional.*

The word, taken apart — and its English cousins

multinacional is built on *nación*, a learned borrowing from Latin *natio* 'birth, a people' (EtymDB), from *nasci* 'to be born', with Latin *multi-* 'many'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la multinacional*
- *Say it: la multinacional*, once more
- *Say it:* a sentence of your own with *la multinacional*
- *Recall:* say the Spanish for the trade union, then the Spanish for the businessman, then say *la multinacional* again

Before you move on

What does la multinacional mean? ("The multinational company".) Say it once more.

592.3 la industria — the industry

Before the new one: say the Spanish for the businessman, then the Spanish for the multinational company.

You'll want to know: la industria

la industria — "the industry".

La industria del coche es grande aquí.

The car industry is big here.

Industrial is the adjective.

The word, taken apart — and its English cousins

industria is a learned borrowing from Latin *industria* 'diligence, activity' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la industria*
- *Say it: la industria*, once more
- *Say it:* a sentence of your own with *la industria*
- *Recall:* say the Spanish for the businessman, then the Spanish for the multinational company, then say *la industria* again

Before you move on

What does la industria mean? ("The industry".) Say it once more.

592.4 la sede — the head office, the headquarters

Before the new one: say the Spanish for the multinational company, then the Spanish for the industry.

You'll want to know: la sede

la sede — "the head office, the headquarters".

La sede de la empresa está en Madrid.

The company's head office is in Madrid.

La sede central — the head office.

The word, taken apart — and its English cousins

sede is a learned borrowing from Latin *sedes* 'seat, home' (EtymDB), built on *sedere* 'to sit'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la sede*
- *Say it: la sede*, once more
- *Say it:* a sentence of your own with *la sede*
- *Recall:* say the Spanish for the multinational company, then the Spanish for the industry, then say *la sede* again

Before you move on

What does la sede mean? ("The head office, the headquarters".) Say it once more.

592.5 la sucursal — the branch

Before the new one: say the Spanish for the industry, then the Spanish for the head office.

You'll want to know: la sucursal

la sucursal — "the branch".

El banco tiene una sucursal en mi barrio.

The bank has a branch in my neighbourhood.

A branch of a bank or a shop.

The word, taken apart — and its English cousins

sucursal was borrowed from French *succursale*, which goes back to Medieval Latin *succursus* 'help' (EtymDB links the Spanish word to *succursus*), from *succurrere* 'to run to help', built on *currere* 'to run'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la sucursal*
- *Say it: la sucursal*, once more
- *Say it:* a sentence of your own with *la sucursal*
- *Recall:* say the Spanish for the industry, then the Spanish for the head office, then say *la sucursal* again

Before you move on

What does la sucursal mean? ("The branch".) Say it once more.

Chapter 593

Mis tareas

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what tasks someone carries out, how well and how efficiently, and what they do for a living.
>
> *Complete the last lesson of chapter 593: I can say what tasks someone carries out, how well and how efficiently, and what they do for a living.*

593.1 la tarea — the task; homework

> Before the new one: say the Spanish for the head office, then the Spanish for the branch.

You'll want to know: la tarea

la tarea — "the task; homework".

> Mi tarea es hablar con los clientes.
>
> *My task is to talk to the customers.*

In Latin America *la tarea* is also school homework; Spain says *los deberes*.

The word, taken apart — and its English cousins

tarea was borrowed from Andalusian Arabic *ṭarīḥa*, a set amount of work (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tarea*
- *Say it: la tarea*, once more
- *Say it:* a sentence of your own with *la tarea*
- *Recall:* say the Spanish for the head office, then the Spanish for the branch, then say *la tarea* again

Before you move on

What does la tarea mean? ("The task; homework".) Say it once more.

593.2 desempeñar — to carry out, to perform; to hold (a post)

Before the new one: say the Spanish for the branch, then the Spanish for the task.

You'll want to know: desempeñar

desempeñar — "to carry out, to perform; to hold (a post)".

Desempeña un papel importante en la empresa.

She plays an important role in the company.

Desempeñar un cargo — to hold a post.

The word, taken apart — and its English cousins

desempeñar is built on *empeñar* 'to pawn' with *des-*. *Empeñar* goes with *empeño* 'a pledge', which EtymDB traces to Latin *in pignus* 'in pledge'. To redeem a pledge became to carry out a duty.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: desempeñar*
- *Say it: desempeñar*, once more
- *Say it:* a sentence of your own with *desempeñar*
- *Recall:* say the Spanish for the branch, then the Spanish for the task, then say *desempeñar* again

Before you move on

What does desempeñar mean? ("To carry out, to perform; to hold (a post)".) Say it once more.

593.3 el rendimiento — the performance, the output; the yield

Before the new one: say the Spanish for the task, then the Spanish for to carry out.

You'll want to know: el rendimiento

el rendimiento — "the performance, the output; the yield".

Su rendimiento en el trabajo es excelente.

Her performance at work is excellent.

El rendimiento escolar — performance at school.

The word, taken apart — and its English cousins

rendimiento is built on *rendir* with *-miento* (EtymDB); *rendir* is inherited from spoken Latin *rendere*, Latin *reddere* 'to give back'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el rendimiento*
- *Say it:* *el rendimiento*, once more
- *Say it:* a sentence of your own with *el rendimiento*
- *Recall:* say the Spanish for the task, then the Spanish for to carry out, then say *el rendimiento* again

Before you move on

What does el rendimiento mean? ("The performance, the output; the yield".) Say it once more.

593.4 dedicarse — to do for a living; to devote oneself

Before the new one: say the Spanish for to carry out, then the Spanish for the performance.

You'll want to know: dedicarse

dedicarse — "to do for a living; to devote oneself".

¿A qué te dedicas?

What do you do for a living?

¿A qué te dedicas? is the usual way to ask about someone's job. Spelling: *me dediqué*.

The word, taken apart — and its English cousins

dedicarse is a learned borrowing from Latin *dedicare* 'to devote, to dedicate', built on *dicare* 'to proclaim', a relative of *dicere* 'to say' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dedicarse*
- *Say it: dedicarse*, once more
- *Say it:* a sentence of your own with *dedicarse*
- *Recall:* say the Spanish for to carry out, then the Spanish for the performance, then say *dedicarse* again

Before you move on

What does dedicarse mean? ("To do for a living; to devote oneself".) Say it once more.

593.5 eficiente — efficient

Before the new one: say the Spanish for the performance, then the Spanish for to do for a living.

You'll want to know: eficiente

eficiente — "efficient".

Es una trabajadora muy eficiente.

She is a very efficient worker.

The same for both genders.

The word, taken apart — and its English cousins

eficiente is a learned borrowing from Latin *efficiens* 'bringing about' (EtymDB), from *efficere*, built from *ex* and *facere* 'to make'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *eficiente*
- *Say it:* *eficiente*, once more
- *Say it:* a sentence of your own with *eficiente*
- *Recall:* say the Spanish for the performance, then the Spanish for to do for a living, then say *eficiente* again

Before you move on

What does eficiente mean? ("Efficient".) Say it once more.

Chapter 594

En equipo

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about leadership, motivating people, working together and managing.
>
> *Complete the last lesson of chapter 594: I can talk about leadership, motivating people, working together and managing.*

594.1 el liderazgo — the leadership

> Before the new one: say the Spanish for to do for a living, then the Spanish for efficient.

You'll want to know: el liderazgo

el liderazgo — "the leadership".

> Necesitamos un buen liderazgo.
>
> *We need good leadership.*

Built on *el líder* — the leader.

The word, taken apart — and its English cousins

liderazgo is built on *líder*, which was borrowed from English *leader* (EtymDB), with the ending *-azgo*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el liderazgo*
- *Say it: el liderazgo*, once more
- *Say it:* a sentence of your own with *el liderazgo*
- *Recall:* say the Spanish for to do for a living, then the Spanish for efficient, then say *el liderazgo* again

Before you move on

What does el liderazgo mean? ("The leadership".) Say it once more.

594.2 motivar — to motivate

Before the new one: say the Spanish for efficient, then the Spanish for the leadership.

You'll want to know: motivar

motivar — "to motivate".

Un buen jefe sabe motivar a la gente.

A good boss knows how to motivate people.

Estar motivado — to be motivated.

The word, taken apart — and its English cousins

motivar is built on *motivo*, a learned borrowing from Late Latin *motivus* 'moving' (EtymDB), from *movere* 'to move'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: motivar*
- *Say it: motivar*, once more
- *Say it:* a sentence of your own with *motivar*
- *Recall:* say the Spanish for efficient, then the Spanish for the leadership, then say *motivar* again

Before you move on

What does motivar mean? ("To motivate".) Say it once more.

594.3 la colaboración — the collaboration, the help

Before the new one: say the Spanish for the leadership, then the Spanish for to motivate.

You'll want to know: la colaboración

la colaboración — "the collaboration, the help".

Gracias por tu colaboración.

Thank you for your help.

A polite word on notices: *agradecemos su colaboración.*

The word, taken apart — and its English cousins

colaboración is built on *colaborar*, a learned borrowing from Late Latin *collaborare*, from *laborare* 'to work' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la colaboración*
- *Say it: la colaboración*, once more
- *Say it:* a sentence of your own with *la colaboración*
- *Recall:* say the Spanish for the leadership, then the Spanish for to motivate, then say *la colaboración* again

Before you move on

What does la colaboración mean? ("The collaboration, the help".) Say it once more.

594.4 dirigir — to run, to manage; to direct

Before the new one: say the Spanish for to motivate, then the Spanish for the collaboration.

You'll want to know: dirigir

dirigir — "to run, to manage; to direct".

Ella dirige el proyecto.

She runs the project.

Spelling: *dirijo*. *Dirigir una película* — to direct a film.

The word, taken apart — and its English cousins

dirigir is a learned borrowing from Latin *dirigere* 'to set straight, to direct', built on *regere* 'to guide, to rule' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dirigir*
- *Say it: dirigir*, once more
- *Say it:* a sentence of your own with *dirigir*
- *Recall:* say the Spanish for to motivate, then the Spanish for the collaboration, then say *dirigir* again

Before you move on

What does dirigir mean? ("To run, to manage; to direct".) Say it once more.

594.5 gestionar — to manage, to handle

Before the new one: say the Spanish for the collaboration, then the Spanish for to run.

You'll want to know: gestionar

gestionar — "to manage, to handle".

Gestiono los pedidos de la tienda.

I manage the shop's orders.

For paperwork too: *gestionar un permiso*.

The word, taken apart — and its English cousins

gestionar is built on *gestión*, a learned borrowing from Latin *gestio* 'management', from *gerere* 'to carry, to carry on' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *gestionar*
- *Say it:* *gestionar*, once more
- *Say it:* a sentence of your own with *gestionar*
- *Recall:* say the Spanish for the collaboration, then the Spanish for to run, then say *gestionar* again

Before you move on

What does gestionar mean? (“To manage, to handle”.) Say it once more.

Chapter 595

Mi carrera

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a career, ambition, being promoted, merit and success.
>
> *Complete the last lesson of chapter 595: I can talk about a career, ambition, being promoted, merit and success.*

595.1 la carrera — the career; the degree; the race

Before the new one: say the Spanish for to run, then the Spanish for to manage.

You'll want to know: la carrera

la carrera — "the career; the degree; the race".

> Tiene una larga carrera en la empresa.
>
> *She has a long career in the company.*

In Spain *hacer una carrera* is to study for a degree.

The word, taken apart — and its English cousins

carrera is usually traced to Late Latin *(via) carraria* 'cart road', built on *carrus* 'a wagon' (Lewis & Short); a road became a race and then a career.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la carrera*
- *Say it: la carrera*, once more
- *Say it:* a sentence of your own with *la carrera*
- *Recall:* say the Spanish for to run, then the Spanish for to manage, then say *la carrera* again

Before you move on

What does la carrera mean? ("The career; the degree; the race".) Say it once more.

595.2 ascender — to be promoted; to rise

Before the new one: say the Spanish for to manage, then the Spanish for the career.

You'll want to know: ascender

ascender — "to be promoted; to rise".

Ascendió a directora en dos años.

She was promoted to director in two years.

Stem change e→ie: *asciendo*. *Ascender a* + post.

The word, taken apart — and its English cousins

ascender is a learned borrowing from Latin *ascendere* 'to climb up', built from *ad* and *scandere* 'to climb' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ascender*
- *Say it: ascender*, once more
- *Say it:* a sentence of your own with *ascender*
- *Recall:* say the Spanish for to manage, then the Spanish for the career, then say *ascender* again

Before you move on

What does ascender mean? ("To be promoted; to rise".) Say it once more.

595.3 el mérito — the merit, the credit

Before the new one: say the Spanish for the career, then the Spanish for to be promoted.

You'll want to know: el mérito

el mérito — "the merit, the credit".

Todo el mérito es suyo.

All the credit is hers.

Tener mérito — to deserve credit.

The word, taken apart — and its English cousins

mérito is a learned borrowing from Latin *meritum* 'what one deserves', the participle of *merere* 'to earn' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el mérito*
- *Say it: el mérito*, once more
- *Say it:* a sentence of your own with *el mérito*
- *Recall:* say the Spanish for the career, then the Spanish for to be promoted, then say *el mérito* again

Before you move on

What does el mérito mean? ("The merit, the credit".) Say it once more.

595.4 ambicioso — ambitious

Before the new one: say the Spanish for to be promoted, then the Spanish for the merit.

You'll want to know: ambicioso

ambicioso — "ambitious".

Es un proyecto muy ambicioso.

It is a very ambitious project.

It can be good or bad: *una persona ambiciosa.*

The word, taken apart — and its English cousins

ambicioso is a learned borrowing from Latin *ambitiosus* (EtymDB), built on *ambitio* 'a going round to ask for votes', from *ambire* 'to go round'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ambicioso*
- *Say it: ambicioso*, once more
- *Say it:* a sentence of your own with *ambicioso*
- *Recall:* say the Spanish for to be promoted, then the Spanish for the merit, then say *ambicioso* again

Before you move on

What does ambicioso mean? ("Ambitious".) Say it once more.

595.5 triunfar — to succeed, to triumph

Before the new one: say the Spanish for the merit, then the Spanish for ambitious.

You'll want to know: triunfar

triunfar — "to succeed, to triumph".

Quiere triunfar en su profesión.

He wants to succeed in his profession.

Triunfar en la vida — to be a success in life.

The word, taken apart — and its English cousins

triunfar is a learned borrowing from Latin *triumphare* 'to hold a victory procession', built on *triumphus* 'triumph' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: triunfar*
- *Say it: triunfar*, once more
- *Say it:* a sentence of your own with *triunfar*
- *Recall:* say the Spanish for the merit, then the Spanish for ambitious, then say *triunfar* again

Before you move on

What does triunfar mean? ("To succeed, to triumph".) Say it once more.

Chapter 596

En la universidad

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

By the end of this chapter: I can talk about the syllabus, enrolment, tutorials and a master's degree.

Complete the last lesson of chapter 596: I can talk about the syllabus, enrolment, tutorials and a master's degree.

596.1 el temario — the syllabus, the list of topics

Before the new one: say the Spanish for ambitious, then the Spanish for to succeed.

You'll want to know: el temario

el temario — "the syllabus, the list of topics".

El temario del examen es muy largo.

The syllabus for the exam is very long.

In Spain it is the set of topics you study for an exam.

The word, taken apart — and its English cousins

temario is built on *tema* with *-ario*; *tema* comes from Latin *thema*, taken from Greek *thema* 'a thing laid down', from *tithenai* 'to put' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el temario*
- *Say it: el temario*, once more
- *Say it:* a sentence of your own with *el temario*
- *Recall:* say the Spanish for ambitious, then the Spanish for to succeed, then say *el temario* again

Before you move on

What does el temario mean? ("The syllabus, the list of topics".) Say it once more.

596.2 la matrícula — the enrolment, the registration; the number plate

Before the new one: say the Spanish for to succeed, then the Spanish for the syllabus.

You'll want to know: la matrícula

la matrícula — "the enrolment, the registration; the number plate".

Pagué trescientos euros de matrícula.

I paid three hundred euros for enrolment.

In Spain it is also the car number plate; in much of Latin America that is *la placa*.

The word, taken apart — and its English cousins

matrícula is a learned borrowing from Late Latin *matricula* 'a list, a register', a small form of *matrix*, built on *mater* 'mother' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la matrícula*
- *Say it: la matrícula*, once more
- *Say it:* a sentence of your own with *la matrícula*
- *Recall:* say the Spanish for to succeed, then the Spanish for the syllabus, then say *la matrícula* again

Before you move on

What does la matrícula mean? ("The enrolment, the registration; the number plate".) Say it once more.

596.3 la tutoría — the tutorial, the office hours

Before the new one: say the Spanish for the syllabus, then the Spanish for the enrolment.

You'll want to know: la tutoría

la tutoría — "the tutorial, the office hours".

Tengo tutoría con la profesora el jueves.

I have a tutorial with the teacher on Thursday.

The time when a teacher sees students one by one.

The word, taken apart — and its English cousins

tutoría is built on *tutor*, a learned borrowing from Latin *tutor* 'guardian, protector' (EtymDB), from *tueri* 'to watch over'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tutoría*
- *Say it: la tutoría*, once more
- *Say it:* a sentence of your own with *la tutoría*
- *Recall:* say the Spanish for the syllabus, then the Spanish for the enrolment, then say *la tutoría* again

Before you move on

What does la tutoría mean? ("The tutorial, the office hours".) Say it once more.

596.4 la facultad — the faculty, the school of a university; ability

Before the new one: say the Spanish for the enrolment, then the Spanish for the tutorial.

You'll want to know: la facultad

la facultad — "the faculty, the school of a university; ability".

Estudio en la Facultad de Derecho.

I study at the Faculty of Law.

Tener facultades para — to have the ability for.

The word, taken apart — and its English cousins

facultad is a learned borrowing from Latin *facultas* 'skill, ability', built on an old form of *facilis* 'easy to do' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la facultad*
- *Say it: la facultad*, once more
- *Say it:* a sentence of your own with *la facultad*
- *Recall:* say the Spanish for the enrolment, then the Spanish for the tutorial, then say *la facultad* again

Before you move on

What does la facultad mean? ("The faculty, the school of a university; ability".) Say it once more.

596.5 el máster — the master's degree

Before the new one: say the Spanish for the tutorial, then the Spanish for the faculty.

You'll want to know: el máster

el máster — "the master's degree".

Quiero hacer un máster en historia.

I want to do a master's in history.

This is the word in Spain; much of Latin America says *la maestría*.

The word, taken apart — and its English cousins

máster was borrowed from English *master*, which comes from Latin *magister* 'master, teacher' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el máster*
- *Say it:* *el máster*, once more
- *Say it:* a sentence of your own with *el máster*
- *Recall:* say the Spanish for the tutorial, then the Spanish for the faculty, then say *el máster* again

Before you move on

What does el máster mean? ("The master's degree".) Say it once more.

Chapter 597

Aprender y evaluar

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about how people learn, how they are taught and how they are assessed.
>
> *Complete the last lesson of chapter 597: I can talk about how people learn, how they are taught and how they are assessed.*

597.1 el aprendizaje — the learning; the apprenticeship

> Before the new one: say the Spanish for the faculty, then the Spanish for the master's degree.

You'll want to know: el aprendizaje

el aprendizaje — "the learning; the apprenticeship".

> El aprendizaje de un idioma lleva tiempo.
>
> *Learning a language takes time.*

A noun for the process of learning.

The word, taken apart — and its English cousins

aprendizaje is built on *aprendiz* 'apprentice', from *aprender*, inherited from Latin *apprehendere* 'to seize, to grasp' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el aprendizaje*
- *Say it: el aprendizaje*, once more
- *Say it:* a sentence of your own with *el aprendizaje*
- *Recall:* say the Spanish for the faculty, then the Spanish for the master's degree, then say *el aprendizaje* again

Before you move on

What does el aprendizaje mean? ("The learning; the apprenticeship".) Say it once more.

597.2 la enseñanza — the teaching, the education

Before the new one: say the Spanish for the master's degree, then the Spanish for the learning.

You'll want to know: la enseñanza

la enseñanza — "the teaching, the education".

La enseñanza pública es gratuita.

State education is free.

La enseñanza secundaria — secondary education.

The word, taken apart — and its English cousins

enseñanza is built on *enseñar*, inherited from Medieval Latin *insignare* 'to mark', from *signum* 'sign' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la enseñanza*
- *Say it: la enseñanza*, once more
- *Say it:* a sentence of your own with *la enseñanza*
- *Recall:* say the Spanish for the master's degree, then the Spanish for the learning, then say *la enseñanza* again

Before you move on

What does la enseñanza mean? ("The teaching, the education".) Say it once more.

597.3 educar — to educate; to bring up

Before the new one: say the Spanish for the learning, then the Spanish for the teaching.

You'll want to know: educar

educar — "to educate; to bring up".

Es difícil educar a los hijos.

Bringing up children is difficult.

Educar a los hijos — to bring up your children.

The word, taken apart — and its English cousins

educar is a learned borrowing from Latin *educare* 'to bring up, to rear' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *educar*
- *Say it:* *educar*, once more
- *Say it:* a sentence of your own with *educar*
- *Recall:* say the Spanish for the learning, then the Spanish for the teaching, then say *educar* again

Before you move on

What does educar mean? ("To educate; to bring up".) Say it once more.

597.4 evaluar — to assess, to evaluate

Before the new one: say the Spanish for the teaching, then the Spanish for to educate.

You'll want to know: evaluar

evaluar — "to assess, to evaluate".

El profesor evalúa el trabajo de todo el año.

The teacher assesses the work of the whole year.

Written accent in *evalúo, evalúas, evalúa.*

The word, taken apart — and its English cousins

evaluar was borrowed from French *évaluer*, built on *value* 'worth', from Latin *valere* 'to be strong, to be worth' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: evaluar*
- *Say it: evaluar*, once more
- *Say it:* a sentence of your own with *evaluar*
- *Recall:* say the Spanish for the teaching, then the Spanish for to educate, then say *evaluar* again

Before you move on

What does evaluar mean? ("To assess, to evaluate".) Say it once more.

597.5 la evaluación — the assessment; the exam period

Before the new one: say the Spanish for to educate, then the Spanish for to assess.

You'll want to know: la evaluación

la evaluación — "the assessment; the exam period".

La evaluación es en junio.

The exams are in June.

In Spanish schools a school year has three *evaluaciones*.

The word, taken apart — and its English cousins

evaluación is built on *evaluar*, borrowed from French *évaluer*, from Latin *valere* 'to be worth' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la evaluación*
- *Say it: la evaluación*, once more
- *Say it:* a sentence of your own with *la evaluación*
- *Recall:* say the Spanish for to educate, then the Spanish for to assess, then say *la evaluación* again

Before you move on

What does la evaluación mean? ("The assessment; the exam period".) Say it once more.

Chapter 598

Saber hacer

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe knowledge, skills and effort and say what I bring to a team.
>
> *Complete the last lesson of chapter 598: I can describe knowledge, skills and effort and say what I bring to a team.*

598.1 el conocimiento — the knowledge

Before the new one: say the Spanish for to assess, then the Spanish for the assessment.

You'll want to know: el conocimiento

el conocimiento — "the knowledge".

> Tiene buenos conocimientos de inglés.
>
> *She has a good knowledge of English.*

In the plural it means what you know about a subject.

The word, taken apart — and its English cousins

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el conocimiento*
- *Say it: el conocimiento*, once more
- *Say it:* a sentence of your own with *el conocimiento*
- *Recall:* say the Spanish for to assess, then the Spanish for the assessment, then say *el conocimiento* again

Before you move on

What does el conocimiento mean? ("The knowledge".) Say it once more.

598.2 la habilidad — the skill, the ability

Before the new one: say the Spanish for the assessment, then the Spanish for the knowledge.

You'll want to know: la habilidad

la habilidad — "the skill, the ability".

Tiene mucha habilidad con las manos.

He is very skilful with his hands.

Habilidades sociales — social skills.

The word, taken apart — and its English cousins

habilidad is a learned borrowing from Latin *habilitas* 'aptness', built on *habilis* 'handy, fit', from *habere* 'to hold' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la habilidad*
- *Say it: la habilidad*, once more
- *Say it:* a sentence of your own with *la habilidad*
- *Recall:* say the Spanish for the assessment, then the Spanish for the knowledge, then say *la habilidad* again

Before you move on

What does la habilidad mean? ("The skill, the ability".) Say it once more.

598.3 la capacidad — the ability, the capacity

Before the new one: say the Spanish for the knowledge, then the Spanish for the skill.

You'll want to know: la capacidad

la capacidad — "the ability, the capacity".

Tiene capacidad para dirigir.

She has the ability to lead.

Also how much a place holds: *capacidad para cien personas.*

The word, taken apart — and its English cousins

capacidad is a learned borrowing from Latin *capacitas* 'room, capacity', built on *capax* 'able to hold', from *capere* 'to take' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la capacidad*
- *Say it: la capacidad*, once more
- *Say it:* a sentence of your own with *la capacidad*
- *Recall:* say the Spanish for the knowledge, then the Spanish for the skill, then say *la capacidad* again

Before you move on

What does la capacidad mean? ("The ability, the capacity".) Say it once more.

598.4 esforzarse — to make an effort, to try hard

Before the new one: say the Spanish for the skill, then the Spanish for the ability.

You'll want to know: esforzarse

esforzarse — "to make an effort, to try hard".

Me esfuerzo mucho en clase.

I try very hard in class.

Stem change o→ue: *me esfuerzo*. Spelling: *me esforcé*.

The word, taken apart — and its English cousins

esforzarse is built on *fuerza* 'strength', inherited from Late Latin *fortia*, from *fortis* 'strong' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: esforzarse*
- *Say it: esforzarse*, once more
- *Say it:* a sentence of your own with *esforzarse*
- *Recall:* say the Spanish for the skill, then the Spanish for the ability, then say *esforzarse* again

Before you move on

What does esforzarse mean? ("To make an effort, to try hard".) Say it once more.

598.5 aportar — to contribute, to bring

Before the new one: say the Spanish for the ability, then the Spanish for to make an effort.

You'll want to know: aportar

aportar — "to contribute, to bring".

Cada persona aporta algo al equipo.

Each person brings something to the team.

Aportar ideas — to contribute ideas. *La aportación* — the contribution.

The word, taken apart — and its English cousins

aportar is inherited from Latin *apportare* 'to carry to, to bring', built from *ad* and *portare* 'to carry' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *aportar*
- *Say it:* *aportar*, once more
- *Say it:* a sentence of your own with *aportar*
- *Recall:* say the Spanish for the ability, then the Spanish for to make an effort, then say *aportar* again

Before you move on

What does aportar mean? (“To contribute, to bring”.) Say it once more.

Chapter 599

Un estudio

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can talk about a study: the experiment, the comparison, the method and what it concluded.
>
> *Complete the last lesson of chapter 599: I can talk about a study: the experiment, the comparison, the method and what it concluded.*

599.1 el experimento — the experiment

> Before the new one: say the Spanish for to make an effort, then the Spanish for to contribute.

You'll want to know: el experimento

el experimento — "the experiment".

> Hicimos un experimento en clase.
>
> *We did an experiment in class.*

Hacer un experimento — to do an experiment.

The word, taken apart — and its English cousins

experimento is a learned borrowing from Latin *experimentum* 'a test, a trial', built on *experiri* 'to try out' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el experimento*
- *Say it: el experimento*, once more
- *Say it:* a sentence of your own with *el experimento*
- *Recall:* say the Spanish for to make an effort, then the Spanish for to contribute, then say *el experimento* again

Before you move on

What does el experimento mean? ("The experiment".) Say it once more.

599.2 comparar — to compare

Before the new one: say the Spanish for to contribute, then the Spanish for the experiment.

You'll want to know: comparar

comparar — "to compare".

Comparamos los resultados de dos grupos.

We compared the results of two groups.

Comparar con — to compare with.

The word, taken apart — and its English cousins

comparar is a learned borrowing from Latin *comparare* 'to put together, to match', built on *par* 'equal' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *comparar*
- *Say it:* *comparar*, once more
- *Say it:* a sentence of your own with *comparar*
- *Recall:* say the Spanish for to contribute, then the Spanish for the experiment, then say *comparar* again

Before you move on

What does comparar mean? ("To compare".) Say it once more.

599.3 analizar — to analyse

Before the new one: say the Spanish for the experiment, then the Spanish for to compare.

You'll want to know: analizar

analizar — "to analyse".

Tenemos que analizar los datos.

We have to analyse the data.

Spelling: *analicé*.

The word, taken apart — and its English cousins

analizar is built on *análisis*, a learned borrowing from Greek *analysis* 'a loosening, a breaking up' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: analizar*
- *Say it: analizar*, once more
- *Say it:* a sentence of your own with *analizar*
- *Recall:* say the Spanish for the experiment, then the Spanish for to compare, then say *analizar* again

Before you move on

What does analizar mean? ("To analyse".) Say it once more.

599.4 la conclusión — the conclusion

Before the new one: say the Spanish for to compare, then the Spanish for to analyse.

You'll want to know: la conclusión

la conclusión — "the conclusion".

Llegamos a una conclusión.

We reached a conclusion.

En conclusión — in conclusion.

The word, taken apart — and its English cousins

conclusión is a learned borrowing from Latin *conclusio* 'a closing, an end', built on *concludere* and *claudere* 'to shut' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la conclusión*
- *Say it: la conclusión*, once more
- *Say it:* a sentence of your own with *la conclusión*
- *Recall:* say the Spanish for to compare, then the Spanish for to analyse, then say *la conclusión* again

Before you move on

What does la conclusión mean? ("The conclusion".) Say it once more.

599.5 el método — the method

Before the new one: say the Spanish for to analyse, then the Spanish for the conclusion.

You'll want to know: el método

el método — "the method".

Es un buen método para estudiar.

It is a good method for studying.

Método de pago — payment method.

The word, taken apart — and its English cousins

método is a learned borrowing from Latin *methodus*, taken from Greek *methodos* 'a following after, a way of inquiry', built from *meta* and *hodos* 'way' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el método*
- *Say it: el método*, once more
- *Say it:* a sentence of your own with *el método*
- *Recall:* say the Spanish for to analyse, then the Spanish for the conclusion, then say *el método* again

Before you move on

What does el método mean? ("The method".) Say it once more.

599.6 Repaso de los capítulos 592–599

- the experiment, to compare, to analyse, the conclusion, the method

Before you move on

The businessman? (**el empresario**.) The multinational company? (**la multinacional**.) The industry? (**la industria**.) The head office? (**la sede**.) The branch? (**la sucursal**.) The task? (**la tarea**.) To carry out? (**desempeñar**.) The performance? (**el rendimiento**.) To do for a living? (**dedicarse**.) Efficient? (**eficiente**.) The leadership? (**el liderazgo**.) To motivate? (**motivar**.) The collaboration? (**la colaboración**.) To run? (**dirigir**.) To manage? (**gestionar**.) The career? (**la carrera**.) To be promoted? (**ascender**.) The merit? (**el mérito**.) Ambitious? (**ambicioso**.) To succeed? (**triunfar**.) The syllabus? (**el temario**.) The enrolment? (**la matrícula**.) The tutorial? (**la tutoría**.) The faculty? (**la facultad**.) The master's degree? (**el máster**.) The learning? (**el aprendizaje**.) The teaching? (**la enseñanza**.) To educate? (**educar**.) To assess? (**evaluar**.) The assessment? (**la evaluación**.) The knowledge? (**el conocimiento**.) The skill? (**la habilidad**.) The ability? (**la capacidad**.) To make an effort? (**esforzarse**.) To contribute? (**aportar**.) The experiment? (**el experimento**.) To compare? (**comparar**.) To analyse? (**analizar**.) The conclusion? (**la conclusión**.) The method? (**el método**.)

Chapter 600

La sociedad

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about citizenship, civic behaviour and the groups people belong to.
>
> *Complete the last lesson of chapter 600: I can talk about citizenship, civic behaviour and the groups people belong to.*

600.1 la ciudadanía — the citizenship; the citizens

Before the new one: say the Spanish for the conclusion, then the Spanish for the method.

You'll want to know: la ciudadanía

la ciudadanía — "the citizenship; the citizens".

> Tiene la ciudadanía española.
>
> *He has Spanish citizenship.*

It also means all the citizens together: *la ciudadanía decide.*

The word, taken apart — and its English cousins

ciudadanía is built on *ciudadano*, from *ciudad*, inherited from Latin *civitatem* 'city, state' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ciudadanía*
- *Say it: la ciudadanía*, once more
- *Say it:* a sentence of your own with *la ciudadanía*
- *Recall:* say the Spanish for the conclusion, then the Spanish for the method, then say *la ciudadanía* again

Before you move on

What does la ciudadanía mean? ("The citizenship; the citizens".) Say it once more.

600.2 el colectivo — the group; collective

Before the new one: say the Spanish for the method, then the Spanish for the citizenship.

You'll want to know: el colectivo

el colectivo — "the group; collective".

Es un colectivo de artistas.

It is a collective of artists.

Also a group of people with something in common: *el colectivo de jóvenes*. In Argentina *el colectivo* is also the city bus.

The word, taken apart — and its English cousins

colectivo is a learned borrowing from Latin *collectivus* 'gathered together', built on *colligere*, from *legere* 'to gather' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el colectivo*
- *Say it: el colectivo*, once more
- *Say it:* a sentence of your own with *el colectivo*
- *Recall:* say the Spanish for the method, then the Spanish for the citizenship, then say *el colectivo* again

Before you move on

What does el colectivo mean? ("The group; collective".) Say it once more.

600.3 el civismo — civic-mindedness, good citizenship

Before the new one: say the Spanish for the citizenship, then the Spanish for the group.

You'll want to know: el civismo

el civismo — "civic-mindedness, good citizenship".

Tirar basura en la calle es falta de civismo.

Dropping litter in the street shows a lack of civic-mindedness.

Respect for shared spaces and for the people around you.

The word, taken apart — and its English cousins

civismo is built on *cívico*, a learned borrowing from Latin *civicus* 'of citizens' (EtymDB), from *civis* 'citizen'; it probably came in through French *civisme*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el civismo*
- *Say it: el civismo*, once more
- *Say it:* a sentence of your own with *el civismo*
- *Recall:* say the Spanish for the citizenship, then the Spanish for the group, then say *el civismo* again

Before you move on

What does el civismo mean? ("Civic-mindedness, good citizenship".) Say it once more.

600.4 el ciudadano — the citizen

Before the new one: say the Spanish for the group, then the Spanish for civic-mindedness.

You'll want to know: el ciudadano

el ciudadano — "the citizen".

Todos los ciudadanos pueden votar.

All citizens can vote.

A woman is *la ciudadana*.

The word, taken apart — and its English cousins

ciudadano is built on *ciudad*, inherited from Latin *civitatem* 'city, state', built on *civis* 'citizen' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ciudadano*
- *Say it: el ciudadano*, once more
- *Say it:* a sentence of your own with *el ciudadano*
- *Recall:* say the Spanish for the group, then the Spanish for civic-mindedness, then say *el ciudadano* again

Before you move on

What does el ciudadano mean? ("The citizen".) Say it once more.

600.5 pertenecer — to belong

Before the new one: say the Spanish for civic-mindedness, then the Spanish for the citizen.

You'll want to know: pertenecer

pertenecer — "to belong".

Este libro pertenece a la biblioteca.

This book belongs to the library.

Like *conocer*: *pertenezco*. Always with *a*.

The word, taken apart — and its English cousins

pertenecer is inherited from Latin *pertinere* 'to stretch to, to belong', built from *per* and *tenere* 'to hold', with the ending *-ecer* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: pertenecer*
- *Say it: pertenecer*, once more
- *Say it:* a sentence of your own with *pertenecer*
- *Recall:* say the Spanish for civic-mindedness, then the Spanish for the citizen, then say *pertenecer* again

Before you move on

What does pertenecer mean? ("To belong".) Say it once more.

Chapter 601

El gobierno

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow simple talk about the government, politics and a town councillor.
>
> *Complete the last lesson of chapter 601: I can follow simple talk about the government, politics and a town councillor.*

601.1 el gobierno — the government

> Before the new one: say the Spanish for the citizen, then the Spanish for to belong.

You'll want to know: el gobierno

el gobierno — "the government".

> El gobierno subió los impuestos.
>
> *The government raised taxes.*

The verb is *gobernar* (e→ie).

The word, taken apart — and its English cousins

gobierno is built on *gobernar*, inherited from Latin *gubernare* 'to steer' (EtymDB), a verb Latin took from Greek *kybernan* (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el gobierno*
- *Say it: el gobierno*, once more
- *Say it:* a sentence of your own with *el gobierno*
- *Recall:* say the Spanish for the citizen, then the Spanish for to belong, then say *el gobierno* again

Before you move on

You'll want to know: político

político — "political; the politician".

Es un tema político.

It is a political issue.

As a noun: *el político, la política* — the politician.

The word, taken apart — and its English cousins

político is a learned borrowing from Latin *politicus*, taken from Greek *politikos* 'of citizens, of the state', built on *polis* 'city' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: político*
- *Say it: político*, once more
- *Say it:* a sentence of your own with *político*
- *Recall:* say the Spanish for the government, then the Spanish for the politics, then say *político* again

Before you move on

What does político mean? ("Political; the politician".) Say it once more.

601.4 el ministro — the minister

Before the new one: say the Spanish for the politics, then the Spanish for political.

You'll want to know: el ministro

el ministro — "the minister".

El ministro habló en la tele.

The minister spoke on TV.

A woman is *la ministra*.

The word, taken apart — and its English cousins

ministro is a learned borrowing from Latin *minister* 'servant, helper' (EtymDB), built on *minus* 'less' as *magister* is on *magis*: the lesser one who serves (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ministro*
- *Say it: el ministro*, once more
- *Say it:* a sentence of your own with *el ministro*
- *Recall:* say the Spanish for the politics, then the Spanish for political, then say *el ministro* again

Before you move on

What does el ministro mean? ("The minister".) Say it once more.

601.5 el concejal — the town councillor

Before the new one: say the Spanish for political, then the Spanish for the minister.

You'll want to know: el concejal

el concejal — "the town councillor".

La concejala abrió la nueva biblioteca.

The councillor opened the new library.

A woman is *la concejala*.

The word, taken apart — and its English cousins

concejal is built on *concejo* 'town council', inherited from Latin *concilium* 'assembly, meeting' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el concejal*
- *Say it:* *el concejal*, once more
- *Say it:* a sentence of your own with *el concejal*
- *Recall:* say the Spanish for political, then the Spanish for the minister, then say *el concejal* again

Before you move on

What does el concejal mean? (“The town councillor”.) Say it once more.

Chapter 602

Las elecciones

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about an election, the candidates and the voters.
>
> *Complete the last lesson of chapter 602: I can talk about an election, the candidates and the voters.*

602.1 el voto — the vote

> Before the new one: say the Spanish for the minister, then the Spanish for the town councillor.

You'll want to know: el voto

el voto — "the vote".

> Cada voto es importante.
>
> *Every vote matters.*

Votar — to vote.

The word, taken apart — and its English cousins

voto is a learned borrowing from Latin *votum* 'a vow, a wish', from *vovere* 'to vow' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el voto*
- *Say it:* *el voto*, once more
- *Say it:* a sentence of your own with *el voto*
- *Recall:* say the Spanish for the minister, then the Spanish for the town councillor, then say *el voto* again

Before you move on

What does el voto mean? ("The vote".) Say it once more.

602.2 las elecciones — the elections

Before the new one: say the Spanish for the town councillor, then the Spanish for the vote.

You'll want to know: las elecciones

las elecciones — "the elections".

Las elecciones son en mayo.

The elections are in May.

Plural for a political vote; in the singular *la elección* is a choice.

The word, taken apart — and its English cousins

elecciones is the plural of *elección*, a learned borrowing from Latin *electio* 'choice', built on *eligere* 'to pick out', from *legere* 'to gather' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: las elecciones*
- *Say it: las elecciones*, once more
- *Say it:* a sentence of your own with *las elecciones*
- *Recall:* say the Spanish for the town councillor, then the Spanish for the vote, then say *las elecciones* again

Before you move on

What does las elecciones mean? ("The elections".) Say it once more.

602.3 el candidato — the candidate

Before the new one: say the Spanish for the vote, then the Spanish for the elections.

You'll want to know: el candidato

el candidato — "the candidate".

Hay tres candidatos para alcalde.

There are three candidates for mayor.

A woman is *la candidata*. Also used for a job.

The word, taken apart — and its English cousins

candidato is a learned borrowing from Latin *candidatus* 'clothed in white', built on *candidus* 'white': Roman candidates wore white togas (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el candidato*
- *Say it: el candidato*, once more
- *Say it:* a sentence of your own with *el candidato*
- *Recall:* say the Spanish for the vote, then the Spanish for the elections, then say *el candidato* again

Before you move on

What does el candidato mean? ("The candidate".) Say it once more.

602.4 el votante — the voter

Before the new one: say the Spanish for the elections, then the Spanish for the candidate.

You'll want to know: el votante

el votante — "the voter".

Muchos votantes no fueron a votar.

Many voters did not go to vote.

The same form for a woman: *la votante*.

The word, taken apart — and its English cousins

votante is built on *votar*, which comes from *voto*, a learned borrowing from Latin *votum* 'a vow' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el votante*
- *Say it: el votante*, once more
- *Say it:* a sentence of your own with *el votante*
- *Recall:* say the Spanish for the elections, then the Spanish for the candidate, then say *el votante* again

Before you move on

What does el votante mean? ("The voter".) Say it once more.

602.5 la democracia — the democracy

Before the new one: say the Spanish for the candidate, then the Spanish for the voter.

You'll want to know: la democracia

la democracia — "the democracy".

La democracia necesita participación.

Democracy needs participation.

Democrático is the adjective.

The word, taken apart — and its English cousins

democracia is a learned borrowing from Greek *dēmokratia*, built from *dēmos* 'the people' and *kratos* 'power' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la democracia*
- *Say it: la democracia*, once more
- *Say it:* a sentence of your own with *la democracia*
- *Recall:* say the Spanish for the candidate, then the Spanish for the voter, then say *la democracia* again

Before you move on

What does la democracia mean? (“The democracy”.) Say it once more.

Chapter 603

Derechos

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about equality, privilege, justice and what is unfair.
>
> *Complete the last lesson of chapter 603: I can talk about equality, privilege, justice and what is unfair.*

603.1 el privilegio — the privilege

> Before the new one: say the Spanish for the voter, then the Spanish for the democracy.

You'll want to know: el privilegio

el privilegio — "the privilege".

> Estudiar en esta universidad es un privilegio.
>
> *Studying at this university is a privilege.*

Privilegiado — privileged.

The word, taken apart — and its English cousins

privilegio is a learned borrowing from Latin *privilegium* 'a law made for one person' (EtymDB), from *privus* 'one's own' and *lex* 'law'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el privilegio*
- *Say it: el privilegio*, once more
- *Say it:* a sentence of your own with *el privilegio*
- *Recall:* say the Spanish for the voter, then the Spanish for the democracy, then say *el privilegio* again

Before you move on

What does el privilegio mean? ("The privilege".) Say it once more.

603.2 la igualdad — the equality

Before the new one: say the Spanish for the democracy, then the Spanish for the privilege.

You'll want to know: la igualdad

la igualdad — "the equality".

Luchamos por la igualdad.

We fight for equality.

Igual — equal, the same.

The word, taken apart — and its English cousins

igualdad is inherited from Latin *aequalitas* 'evenness, equality', built on *aequus* 'level, equal' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la igualdad*
- *Say it: la igualdad*, once more
- *Say it:* a sentence of your own with *la igualdad*
- *Recall:* say the Spanish for the democracy, then the Spanish for the privilege, then say *la igualdad* again

Before you move on

What does la igualdad mean? ("The equality".) Say it once more.

603.3 la desigualdad — the inequality

Before the new one: say the Spanish for the privilege, then the Spanish for the equality.

You'll want to know: la desigualdad

la desigualdad — "the inequality".

La desigualdad crece en las ciudades.

Inequality is growing in the cities.

The opposite of *la igualdad*.

The word, taken apart — and its English cousins

desigualdad is built on *igualdad* with the prefix *des-*; *igualdad* is inherited from Latin *aequalitas*, from *aequus* 'equal' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la desigualdad*
- *Say it: la desigualdad*, once more
- *Say it:* a sentence of your own with *la desigualdad*
- *Recall:* say the Spanish for the privilege, then the Spanish for the equality, then say *la desigualdad* again

Before you move on

What does la desigualdad mean? ("The inequality".) Say it once more.

603.4 la justicia — the justice

Before the new one: say the Spanish for the equality, then the Spanish for the inequality.

You'll want to know: la justicia

la justicia — "the justice".

Pedimos justicia.

We ask for justice.

Also the courts: *acudir a la justicia* — to go to court.

The word, taken apart — and its English cousins

justicia is a learned borrowing from Latin *iustitia* 'justice', built on *iustus* 'lawful, right' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la justicia*
- *Say it: la justicia*, once more
- *Say it:* a sentence of your own with *la justicia*
- *Recall:* say the Spanish for the equality, then the Spanish for the inequality, then say *la justicia* again

Before you move on

What does la justicia mean? ("The justice".) Say it once more.

603.5 injusto — unfair

Before the new one: say the Spanish for the inequality, then the Spanish for the justice.

You'll want to know: injusto

injusto — "unfair".

Es injusto pagar más.

It is unfair to pay more.

Es injusto que + subjunctive.

The word, taken apart — and its English cousins

injusto is a learned borrowing from Latin *iniustus* 'unfair', built from *in-* 'not' and *iustus* 'right' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *injusto*
- *Say it:* *injusto*, once more
- *Say it:* a sentence of your own with *injusto*
- *Recall:* say the Spanish for the inequality, then the Spanish for the justice, then say *injusto* again

Before you move on

What does injusto mean? (“Unfair”.) Say it once more.

Chapter 604

Protestar

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what people protest about, what they demand and what is controversial.
>
> *Complete the last lesson of chapter 604: I can say what people protest about, what they demand and what is controversial.*

604.1 protestar — to protest; to complain

> Before the new one: say the Spanish for the justice, then the Spanish for unfair.

You'll want to know: protestar

protestar — "to protest; to complain".

> Los vecinos protestan por el ruido.
>
> *The neighbours are protesting about the noise.*

Protestar por or *contra* something.

The word, taken apart — and its English cousins

protestar is a learned borrowing from Latin *protestari* 'to declare publicly', built on *testis* 'witness' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: protestar*
- *Say it: protestar*, once more
- *Say it:* a sentence of your own with *protestar*
- *Recall:* say the Spanish for the justice, then the Spanish for unfair, then say *protestar* again

Before you move on

What does protestar mean? ("To protest; to complain".) Say it once more.

604.2 expresar — to express

Before the new one: say the Spanish for unfair, then the Spanish for to protest.

You'll want to know: expresar

expresar — "to express".

Quiero expresar mi opinión.

I want to express my opinion.

Expresarse — to express yourself.

The word, taken apart — and its English cousins

expresar is built on *expreso* (EtymDB), a learned borrowing from Latin *expressus* 'pressed out, clear', from *exprimere*, built on *premere* 'to press'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: expresar*
- *Say it: expresar*, once more
- *Say it:* a sentence of your own with *expresar*
- *Recall:* say the Spanish for unfair, then the Spanish for to protest, then say *expresar* again

Before you move on

What does expresar mean? ("To express".) Say it once more.

604.3 polémico — controversial

Before the new one: say the Spanish for to protest, then the Spanish for to express.

You'll want to know: polémico

polémico — "controversial".

Es un tema muy polémico.

It is a very controversial subject.

La polémica — the controversy.

The word, taken apart — and its English cousins

polémico is a learned word usually traced to Greek *polemikos* 'warlike', built on *polemos* 'war', probably through French *polémique*; EtymDB does not list it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: polémico*
- *Say it: polémico*, once more
- *Say it:* a sentence of your own with *polémico*
- *Recall:* say the Spanish for to protest, then the Spanish for to express, then say *polémico* again

Before you move on

What does polémico mean? ("Controversial".) Say it once more.

604.4 reclamar — to claim, to demand; to complain

Before the new one: say the Spanish for to express, then the Spanish for controversial.

You'll want to know: reclamar

reclamar — "to claim, to demand; to complain".

Reclamo mi dinero.

I am claiming my money back.

Reclamar a la empresa — to complain to the company.

The word, taken apart — and its English cousins

reclamar is a learned borrowing from Latin *reclamare* 'to cry out against', built on *clamare* 'to shout' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: reclamar*
- *Say it: reclamar*, once more
- *Say it:* a sentence of your own with *reclamar*
- *Recall:* say the Spanish for to express, then the Spanish for controversial, then say *reclamar* again

Before you move on

What does reclamar mean? ("To claim, to demand; to complain".) Say it once more.

604.5 reivindicar — to demand, to claim (a right)

Before the new one: say the Spanish for controversial, then the Spanish for to claim.

You'll want to know: reivindicar

reivindicar — "to demand, to claim (a right)".

Los trabajadores reivindican mejores sueldos.

The workers are demanding better pay.

Spelling: *reivindiqué*. *La reivindicación* — the demand.

The word, taken apart — and its English cousins

reivindicar is a learned word built from Latin *rei*, a form of *res* 'thing, property', and *vindicare* 'to claim' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: reivindicar*
- *Say it: reivindicar*, once more
- *Say it:* a sentence of your own with *reivindicar*
- *Recall:* say the Spanish for controversial, then the Spanish for to claim, then say *reivindicar* again

Before you move on

What does reivindicar mean? ("To demand, to claim (a right)".) Say it once more.

Chapter 605

Problemas sociales

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name some social problems and give my view on them.
>
> *Complete the last lesson of chapter 605: I can name some social problems and give my view on them.*

605.1 la marginación — the social exclusion, the marginalisation

Before the new one: say the Spanish for to claim, then the Spanish for to demand.

You'll want to know: la marginación

la marginación — "the social exclusion, the marginalisation".

> Muchas personas viven en la marginación.
>
> *Many people live on the margins of society.*

Built on *marginar* — to push to the edge.

The word, taken apart — and its English cousins

marginación is built on *marginar*, a learned borrowing from Late Latin *marginare* (EtymDB), from *margo* 'edge, border'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la marginación*
- *Say it: la marginación*, once more
- *Say it:* a sentence of your own with *la marginación*
- *Recall:* say the Spanish for to claim, then the Spanish for to demand, then say *la marginación* again

Before you move on

What does la marginación mean? ("The social exclusion, the marginalisation".) Say it once more.

605.2 la violencia — the violence

Before the new one: say the Spanish for to demand, then the Spanish for the social exclusion.

You'll want to know: la violencia

la violencia — "the violence".

Estamos contra la violencia.

We are against violence.

Violento — violent.

The word, taken apart — and its English cousins

violencia is a learned borrowing from Latin *violentia*, built on *violentus* 'violent', from *vis* 'force' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la violencia*
- *Say it: la violencia*, once more
- *Say it:* a sentence of your own with *la violencia*
- *Recall:* say the Spanish for to demand, then the Spanish for the social exclusion, then say *la violencia* again

Before you move on

What does la violencia mean? ("The violence".) Say it once more.

605.3 la discriminación — the discrimination

Before the new one: say the Spanish for the social exclusion, then the Spanish for the violence.

You'll want to know: la discriminación

la discriminación — "the discrimination".

La discriminación en el trabajo va contra la ley.

Discrimination at work is against the law.

Discriminar — to discriminate.

The word, taken apart — and its English cousins

discriminación is built on *discriminar*, a learned borrowing from Latin *discriminare* 'to divide', from *discrimen* 'a dividing line', from *cernere* 'to sift' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la discriminación*
- *Say it: la discriminación*, once more
- *Say it:* a sentence of your own with *la discriminación*
- *Recall:* say the Spanish for the social exclusion, then the Spanish for the violence, then say *la discriminación* again

Before you move on

What does la discriminación mean? ("The discrimination".) Say it once more.

605.4 el racismo — the racism

Before the new one: say the Spanish for the violence, then the Spanish for the discrimination.

You'll want to know: el racismo

el racismo — "the racism".

El racismo no tiene excusa.

Racism has no excuse.

Racista — racist.

The word, taken apart — and its English cousins

racismo is built on *raza* 'race' with *-ismo*; the origin of *raza* is not settled, and EtymDB traces it through Old Spanish *raça* to Latin *radius*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el racismo*
- *Say it: el racismo*, once more
- *Say it:* a sentence of your own with *el racismo*
- *Recall:* say the Spanish for the violence, then the Spanish for the discrimination, then say *el racismo* again

Before you move on

What does el racismo mean? ("The racism".) Say it once more.

605.5 la corrupción — the corruption

Before the new one: say the Spanish for the discrimination, then the Spanish for the racism.

You'll want to know: la corrupción

la corrupción — "the corruption".

La gente está cansada de la corrupción.

People are tired of corruption.

Corrupto — corrupt.

The word, taken apart — and its English cousins

corrupción is a learned borrowing from Latin *corruptio* 'decay, spoiling', built on *corrumpere*, from *rumpere* 'to break' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la corrupción*
- *Say it: la corrupción*, once more
- *Say it:* a sentence of your own with *la corrupción*
- *Recall:* say the Spanish for the discrimination, then the Spanish for the racism, then say *la corrupción* again

Before you move on

What does la corrupción mean? ("The corruption".) Say it once more.

Chapter 606

Ayudar a los demás

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about volunteering and the groups that help people.
>
> *Complete the last lesson of chapter 606: I can talk about volunteering and the groups that help people.*

606.1 la solidaridad — the solidarity

> Before the new one: say the Spanish for the racism, then the Spanish for the corruption.

You'll want to know: la solidaridad

la solidaridad — "the solidarity".

> Necesitamos más solidaridad.
>
> *We need more solidarity.*

Solidario — caring, ready to help.

The word, taken apart — and its English cousins

solidaridad is built on *solidario* with *-idad* (EtymDB); *solidario* was borrowed from French *solidaire*, from Latin *solidus* 'whole, firm'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la solidaridad*
- *Say it: la solidaridad*, once more
- *Say it:* a sentence of your own with *la solidaridad*
- *Recall:* say the Spanish for the racism, then the Spanish for the corruption, then say *la solidaridad* again

Before you move on

What does la solidaridad mean? ("The solidarity".) Say it once more.

606.2 el voluntariado — the volunteering; the volunteers

Before the new one: say the Spanish for the corruption, then the Spanish for the solidarity.

You'll want to know: el voluntariado

el voluntariado — "the volunteering; the volunteers".

Hago voluntariado los fines de semana.

I do volunteering at weekends.

It also means all the volunteers together.

The word, taken apart — and its English cousins

voluntariado is built on *voluntario*, a learned borrowing from Latin *voluntarius* 'willing', from *voluntas* and *velle* 'to want' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el voluntariado*
- *Say it: el voluntariado*, once more
- *Say it:* a sentence of your own with *el voluntariado*
- *Recall:* say the Spanish for the corruption, then the Spanish for the solidarity, then say *el voluntariado* again

Before you move on

What does el voluntariado mean? ("The volunteering; the volunteers".) Say it once more.

606.3 la asociación — the association, the society

Before the new one: say the Spanish for the solidarity, then the Spanish for the volunteering.

You'll want to know: la asociación

la asociación — "the association, the society".

Es miembro de una asociación de vecinos.

She is a member of a residents' association.

Asociarse — to join together.

The word, taken apart — and its English cousins

asociación is built on *asociar*, a learned borrowing from Latin *associare* 'to join to', built on *socius* 'companion' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la asociación*
- *Say it: la asociación*, once more
- *Say it:* a sentence of your own with *la asociación*
- *Recall:* say the Spanish for the solidarity, then the Spanish for the volunteering, then say *la asociación* again

Before you move on

What does la asociación mean? ("The association, the society".) Say it once more.

606.4 la caridad — the charity

Before the new one: say the Spanish for the volunteering, then the Spanish for the association.

You'll want to know: la caridad

la caridad — "the charity".

Dan dinero a obras de caridad.

They give money to charity.

Pedir caridad — to beg.

The word, taken apart — and its English cousins

caridad comes from Latin *cāritās*, *cāritātem* 'dearness, love', built on *cārus* 'dear' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la caridad*
- *Say it: la caridad*, once more
- *Say it:* a sentence of your own with *la caridad*
- *Recall:* say the Spanish for the volunteering, then the Spanish for the association, then say *la caridad* again

Before you move on

What does la caridad mean? ("The charity".) Say it once more.

606.5 participar — to take part, to participate

Before the new one: say the Spanish for the association, then the Spanish for the charity.

You'll want to know: participar

participar — "to take part, to participate".

Quiero participar en el proyecto.

I want to take part in the project.

Participar en something.

The word, taken apart — and its English cousins

participar is a learned borrowing from Latin *participare* 'to share in', built on *particeps*, from *pars* 'part' and *capere* 'to take' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: participar*
- *Say it: participar*, once more
- *Say it:* a sentence of your own with *participar*
- *Recall:* say the Spanish for the association, then the Spanish for the charity, then say *participar* again

Before you move on

What does participar mean? ("To take part, to participate".) Say it once more.

Chapter 607

El medio ambiente

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can talk about the environment, consumption and what measures help.
>
> *Complete the last lesson of chapter 607: I can talk about the environment, consumption and what measures help.*

607.1 el medio ambiente — the environment

> Before the new one: say the Spanish for the charity, then the Spanish for to take part.

You'll want to know: el medio ambiente

el medio ambiente — "the environment".

> Hay que cuidar el medio ambiente.
>
> *We have to look after the environment.*

Also written *medioambiente*; the adjective is *medioambiental*.

The word, taken apart — and its English cousins

el medio ambiente is built on *medio*, inherited from Latin *medius* 'middle', and *ambiente*, from Latin *ambiens* 'going round', from *ambire* (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el medio ambiente*
- *Say it: el medio ambiente*, once more
- *Say it:* a sentence of your own with *el medio ambiente*
- *Recall:* say the Spanish for the charity, then the Spanish for to take part, then say *el medio ambiente* again

Before you move on

What does el medio ambiente mean? ("The environment".) Say it once more.

607.2 el consumo — the consumption

Before the new one: say the Spanish for to take part, then the Spanish for the environment.

You'll want to know: el consumo

el consumo — "the consumption".

El consumo de agua es muy alto.

Water consumption is very high.

La sociedad de consumo — the consumer society.

The word, taken apart — and its English cousins

consumo is built on *consumir*, a learned borrowing from Latin *consumere* 'to use up', from *sumere* 'to take' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el consumo*
- *Say it: el consumo*, once more
- *Say it:* a sentence of your own with *el consumo*
- *Recall:* say the Spanish for to take part, then the Spanish for the environment, then say *el consumo* again

Before you move on

What does el consumo mean? (“The consumption”.) Say it once more.

607.3 consumir — to consume, to use

Before the new one: say the Spanish for the environment, then the Spanish for the consumption.

You’ll want to know: consumir

consumir — “to consume, to use”.

Este coche consume poca gasolina.

This car uses little petrol.

Regular -ir verb.

The word, taken apart — and its English cousins

consumir is a learned borrowing from Latin *consumere* ’to use up’, built from *con* and *sumere* ’to take’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *consumir*
- *Say it:* *consumir*, once more
- *Say it:* a sentence of your own with *consumir*
- *Recall:* say the Spanish for the environment, then the Spanish for the consumption, then say *consumir* again

Before you move on

What does consumir mean? ("To consume, to use".) Say it once more.

607.4 el recurso — the resource; the appeal

Before the new one: say the Spanish for the consumption, then the Spanish for to consume.

You'll want to know: el recurso

el recurso — "the resource; the appeal".

El agua es un recurso limitado.

Water is a limited resource.

Recursos humanos — human resources. In law, an appeal.

The word, taken apart — and its English cousins

recurso is a learned borrowing from Latin *recursus* 'a return, a running back', built on *currere* 'to run' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el recurso*
- *Say it: el recurso*, once more
- *Say it:* a sentence of your own with *el recurso*
- *Recall:* say the Spanish for the consumption, then the Spanish for to consume, then say *el recurso* again

Before you move on

What does el recurso mean? ("The resource; the appeal".) Say it once more.

607.5 la medida — the measure, the step; the size

Before the new one: say the Spanish for to consume, then the Spanish for the resource.

You'll want to know: la medida

la medida — "the measure, the step; the size".

El gobierno tomó nuevas medidas.

The government took new measures.

Tomar medidas — to take steps. *A medida que* — as.

The word, taken apart — and its English cousins

medida is built on *medir*, which is inherited from spoken Latin *metire*, Latin *metiri* 'to measure' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la medida*
- *Say it: la medida*, once more
- *Say it:* a sentence of your own with *la medida*
- *Recall:* say the Spanish for to consume, then the Spanish for the resource, then say *la medida* again

Before you move on

What does la medida mean? ("The measure, the step; the size".) Say it once more.

607.6 Repaso de los capítulos 600–607

Say the Spanish for the citizenship and the group.

Your turn

Say these aloud:

- the citizenship, the group, civic-mindedness, the citizen, to belong
- the government, the politics, political, the minister, the town councillor
- the vote, the elections, the candidate, the voter, the democracy

- the social exclusion, the violence, the discrimination, the racism, the corruption
- the solidarity, the volunteering, the association, the charity, to take part
- the environment, the consumption, to consume, the resource, the measure

Before you move on

The citizenship? (**la ciudadanía**.) The group? (**el colectivo**.) Civic-mindedness? (**el civismo**.) The citizen? (**el ciudadano**.) To belong? (**pertenecer**.) The government? (**el gobierno**.) The politics? (**la política**.) Political? (**político**.) The minister? (**el ministro**.) The town councillor? (**el concejal**.) The vote? (**el voto**.) The elections? (**las elecciones**.) The candidate? (**el candidato**.) The voter? (**el votante**.) The democracy? (**la democracia**.) The privilege? (**el privilegio**.) The equality? (**la igualdad**.) The inequality? (**la desigualdad**.) The justice? (**la justicia**.) Unfair? (**injusto**.) To protest? (**protestar**.) To express? (**expresar**.) Controversial? (**polémico**.) To claim? (**reclamar**.) To demand? (**reivindicar**.) The social exclusion? (**la marginación**.) The violence? (**la violencia**.) The discrimination? (**la discriminación**.) The racism? (**el racismo**.) The corruption? (**la corrupción**.) The solidarity? (**la solidaridad**.) The volunteering? (**el voluntariado**.) The association? (**la asociación**.) The charity? (**la caridad**.) To take part? (**participar**.) The environment? (**el medio ambiente**.) The consumption? (**el consumo**.) To consume? (**consumir**.) The resource? (**el recurso**.) The measure? (**la medida**.)

Chapter 608

Sube y baja

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something is rising or falling, and describe a trend.
>
> *Complete the last lesson of chapter 608: I can say that something is rising or falling, and describe a trend.*

608.1 aumentar — to increase, to rise

> Before the new one: say the Spanish for the resource, then the Spanish for the measure.

You'll want to know: aumentar

aumentar — "to increase, to rise".

> Los precios aumentan cada año.
>
> *Prices increase every year.*

Used for numbers that grow; *subir* is more everyday.

The word, taken apart — and its English cousins

aumentar is inherited from Late Latin *augmentare*, built on *augere* 'to increase' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: aumentar*
- *Say it: aumentar*, once more
- *Say it:* a sentence of your own with *aumentar*
- *Recall:* say the Spanish for the resource, then the Spanish for the measure, then say *aumentar* again

Before you move on

What does aumentar mean? ("To increase, to rise".) Say it once more.

608.2 disminuir — to decrease, to go down

Before the new one: say the Spanish for the measure, then the Spanish for to increase.

You'll want to know: disminuir

disminuir — "to decrease, to go down".

El paro disminuyó en verano.

Unemployment went down in summer.

Like *construir*: *disminuye, disminuyó.*

The word, taken apart — and its English cousins

disminuir is a learned borrowing from Latin *diminuere* 'to make smaller', built on *minuere* 'to lessen' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: disminuir*
- *Say it: disminuir*, once more
- *Say it:* a sentence of your own with *disminuir*
- *Recall:* say the Spanish for the measure, then the Spanish for to increase, then say *disminuir* again

Before you move on

What does disminuir mean? ("To decrease, to go down".) Say it once more.

608.3 el aumento — the increase, the rise

Before the new one: say the Spanish for to increase, then the Spanish for to decrease.

You'll want to know: el aumento

el aumento — "the increase, the rise".

Pedimos un aumento de sueldo.

We are asking for a pay rise.

Un aumento de sueldo — a pay rise.

The word, taken apart — and its English cousins

aumento is a learned borrowing from Latin *augmentum* 'an increase', built on *augere* 'to increase' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el aumento*
- *Say it: el aumento*, once more
- *Say it:* a sentence of your own with *el aumento*
- *Recall:* say the Spanish for to increase, then the Spanish for to decrease, then say *el aumento* again

Before you move on

What does el aumento mean? ("The increase, the rise".) Say it once more.

608.4 el crecimiento — the growth

Before the new one: say the Spanish for to decrease, then the Spanish for the increase.

You'll want to know: el crecimiento

el crecimiento — "the growth".

El crecimiento de la ciudad es rápido.

The growth of the city is fast.

Built on *crecer* — to grow.

The word, taken apart — and its English cousins

crecimiento is built on *crecer*, inherited from Latin *crescere* 'to grow' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el crecimiento*
- *Say it: el crecimiento*, once more
- *Say it:* a sentence of your own with *el crecimiento*
- *Recall:* say the Spanish for to decrease, then the Spanish for the increase, then say *el crecimiento* again

Before you move on

What does el crecimiento mean? ("The growth".) Say it once more.

608.5 la tendencia — the trend, the tendency

Before the new one: say the Spanish for the increase, then the Spanish for the growth.

You'll want to know: la tendencia

la tendencia — "the trend, the tendency".

Es una tendencia nueva.

It is a new trend.

Tener tendencia a — to tend to.

The word, taken apart — and its English cousins

tendencia is a learned borrowing from Medieval Latin *tendentia*, built on *tendere* 'to stretch, to aim at' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tendencia*
- *Say it: la tendencia*, once more
- *Say it:* a sentence of your own with *la tendencia*
- *Recall:* say the Spanish for the increase, then the Spanish for the growth, then say *la tendencia* again

Before you move on

What does la tendencia mean? ("The trend, the tendency".) Say it once more.

Chapter 609

Progresar

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about progress, a challenge and how to face it and do better.
>
> *Complete the last lesson of chapter 609: I can talk about progress, a challenge and how to face it and do better.*

609.1 el progreso — the progress

> Before the new one: say the Spanish for the growth, then the Spanish for the trend.

You'll want to know: el progreso

el progreso — "the progress".

> Has hecho muchos progresos.
>
> *You have made a lot of progress.*

Hacer progresos — to make progress; the plural is usual here.

The word, taken apart — and its English cousins

progreso is a learned borrowing from Latin *progressus* 'an advance', built on *progredi* 'to go forward', from *gradi* 'to step' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el progreso*
- *Say it:* *el progreso*, once more
- *Say it:* a sentence of your own with *el progreso*
- *Recall:* say the Spanish for the growth, then the Spanish for the trend, then say *el progreso* again

Before you move on

What does el progreso mean? ("The progress".) Say it once more.

609.2 perfeccionar — to perfect, to polish

Before the new one: say the Spanish for the trend, then the Spanish for the progress.

You'll want to know: perfeccionar

perfeccionar — "to perfect, to polish".

Quiero perfeccionar mi español.

I want to perfect my Spanish.

Built on *la perfección* — perfection.

The word, taken apart — and its English cousins

perfeccionar is built on *perfección*, a learned borrowing from Latin *perfectio* 'completion', from *perficere* 'to finish', built on *facere* 'to make' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: perfeccionar*
- *Say it: perfeccionar*, once more
- *Say it:* a sentence of your own with *perfeccionar*
- *Recall:* say the Spanish for the trend, then the Spanish for the progress, then say *perfeccionar* again

Before you move on

What does perfeccionar mean? ("To perfect, to polish".) Say it once more.

609.3 el desafío — the challenge

Before the new one: say the Spanish for the progress, then the Spanish for to perfect.

You'll want to know: el desafío

el desafío — "the challenge".

Aprender un idioma es un desafío.

Learning a language is a challenge.

The verb is *desafiar* (*desafío, desafías*).

The word, taken apart — and its English cousins

desafío is built on *desafiar*, which is *des-* + *afiar* (EtymDB), an old verb for pledging faith, from *fiar*, inherited from spoken Latin *fidare*, from *fidere* 'to trust'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desafío*
- *Say it: el desafío*, once more
- *Say it:* a sentence of your own with *el desafío*
- *Recall:* say the Spanish for the progress, then the Spanish for to perfect, then say *el desafío* again

Before you move on

What does el desafío mean? ("The challenge".) Say it once more.

609.4 afrontar — to face, to confront

Before the new one: say the Spanish for to perfect, then the Spanish for the challenge.

You'll want to know: afrontar

afrontar — "to face, to confront".

Tenemos que afrontar el problema.

We have to face the problem.

Afrontar la realidad — to face reality.

The word, taken apart — and its English cousins

afrontar is inherited from spoken Latin *affrontare* 'to meet face to face', built on *frons, frontis* 'forehead, front' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: afrontar*
- *Say it: afrontar*, once more
- *Say it:* a sentence of your own with *afrontar*
- *Recall:* say the Spanish for to perfect, then the Spanish for the challenge, then say *afrontar* again

Before you move on

What does afrontar mean? ("To face, to confront".) Say it once more.

609.5 perseverar — to persevere, to keep at it

Before the new one: say the Spanish for the challenge, then the Spanish for to face.

You'll want to know: perseverar

perseverar — "to persevere, to keep at it".

Si perseveras, lo vas a conseguir.

If you keep at it, you will manage.

La perseverancia — perseverance.

The word, taken apart — and its English cousins

perseverar is a learned borrowing from Latin *perseverare* 'to persist' (EtymDB), usually traced to *severus* 'strict, serious'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: perseverar*
- *Say it: perseverar*, once more
- *Say it:* a sentence of your own with *perseverar*
- *Recall:* say the Spanish for the challenge, then the Spanish for to face, then say *perseverar* again

Before you move on

What does perseverar mean? ("To persevere, to keep at it".) Say it once more.

Chapter 610

Convivir

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about tolerance, migration and living together.
>
> *Complete the last lesson of chapter 610: I can talk about tolerance, migration and living together.*

610.1 la tolerancia — the tolerance

> Before the new one: say the Spanish for to face, then the Spanish for to persevere.

You'll want to know: la tolerancia

la tolerancia — "the tolerance".

> La tolerancia es importante en una sociedad.
>
> *Tolerance is important in a society.*

Tolerante — tolerant.

The word, taken apart — and its English cousins

tolerancia is a learned borrowing from Latin *tolerantia* 'endurance', built on *tolerare* 'to bear' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tolerancia*
- *Say it: la tolerancia*, once more
- *Say it:* a sentence of your own with *la tolerancia*
- *Recall:* say the Spanish for to face, then the Spanish for to persevere, then say *la tolerancia* again

Before you move on

What does la tolerancia mean? ("The tolerance".) Say it once more.

610.2 tolerar — to tolerate, to put up with

Before the new one: say the Spanish for to persevere, then the Spanish for the tolerance.

You'll want to know: tolerar

tolerar — "to tolerate, to put up with".

No tolero las mentiras.

I do not tolerate lies.

Close to *aguantar*.

The word, taken apart — and its English cousins

tolerar is a learned borrowing from Latin *tolerare* 'to carry, to endure' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: tolerar*
- *Say it: tolerar*, once more
- *Say it:* a sentence of your own with *tolerar*
- *Recall:* say the Spanish for to persevere, then the Spanish for the tolerance, then say *tolerar* again

Before you move on

What does tolerar mean? ("To tolerate, to put up with".) Say it once more.

610.3 la integración — the integration

Before the new one: say the Spanish for the tolerance, then the Spanish for to tolerate.

You'll want to know: la integración

la integración — "the integration".

La integración de los inmigrantes lleva tiempo.

The integration of immigrants takes time.

Integrarse — to fit in.

The word, taken apart — and its English cousins

integración is built on *integrar*, a learned borrowing from Latin *integrare* 'to make whole', from *integer* 'whole, untouched' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la integración*
- *Say it: la integración*, once more
- *Say it:* a sentence of your own with *la integración*
- *Recall:* say the Spanish for the tolerance, then the Spanish for to tolerate, then say *la integración* again

Before you move on

What does la integración mean? ("The integration".) Say it once more.

610.4 la inmigración — the immigration

Before the new one: say the Spanish for to tolerate, then the Spanish for the integration.

You'll want to know: la inmigración

la inmigración — "the immigration".

La inmigración cambia el país.

Immigration changes the country.

El inmigrante — the immigrant.

The word, taken apart — and its English cousins

inmigración is a learned word built on Latin *immigrare* 'to move into', from *migrare* 'to move house' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la inmigración*
- *Say it: la inmigración*, once more
- *Say it:* a sentence of your own with *la inmigración*
- *Recall:* say the Spanish for to tolerate, then the Spanish for the integration, then say *la inmigración* again

Before you move on

What does la inmigración mean? ("The immigration".) Say it once more.

610.5 la convivencia — the living together, the coexistence

Before the new one: say the Spanish for the integration, then the Spanish for the immigration.

You'll want to know: la convivencia

la convivencia — "the living together, the coexistence".

La convivencia en el barrio es buena.

People get on well together in the neighbourhood.

Las normas de convivencia — the rules for living together.

The word, taken apart — and its English cousins

convivencia is built on *convivir*, a learned borrowing from Latin *convivere* 'to live together', from *vivere* 'to live' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la convivencia*
- *Say it: la convivencia*, once more
- *Say it:* a sentence of your own with *la convivencia*
- *Recall:* say the Spanish for the integration, then the Spanish for the immigration, then say *la convivencia* again

Before you move on

What does la convivencia mean? ("The living together, the coexistence".) Say it once more.

Chapter 611

Con una condición

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can set a condition with as long as, unless and provided that.
>
> *Complete the last lesson of chapter 611: I can set a condition with as long as, unless and provided that.*

611.1 la condición — the condition

> Before the new one: say the Spanish for the immigration, then the Spanish for the living together.

You'll want to know: la condición

la condición — "the condition".

> Te ayudo con una condición.
>
> *I will help you on one condition.*

Las condiciones de trabajo — working conditions.

The word, taken apart — and its English cousins

condición is a learned borrowing from Latin *condicio* 'agreement, terms', built on *condicere* 'to agree together', from *dicere* 'to say' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la condición*
- *Say it: la condición*, once more
- *Say it:* a sentence of your own with *la condición*
- *Recall:* say the Spanish for the immigration, then the Spanish for the living together, then say *la condición* again

Before you move on

What does la condición mean? ("The condition".) Say it once more.

611.2 siempre que — as long as; whenever

Before the new one: say the Spanish for the living together, then the Spanish for the condition.

You'll want to know: siempre que

siempre que — "as long as; whenever".

Puedes ir siempre que vuelvas pronto.

You can go as long as you come back early.

With the subjunctive it sets a condition; with the indicative it means whenever.

The word, taken apart — and its English cousins

siempre que is built on *siempre*, inherited from Latin *semper* 'always', and *que* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: siempre que*
- *Say it: siempre que*, once more
- *Say it:* a sentence of your own with *siempre que*
- *Recall:* say the Spanish for the living together, then the Spanish for the condition, then say *siempre que* again

Before you move on

What does siempre que mean? ("As long as; whenever".) Say it once more.

611.3 a menos que — unless

Before the new one: say the Spanish for the condition, then the Spanish for as long as.

You'll want to know: a menos que

a menos que — "unless".

Voy a la playa, a menos que llueva.

I am going to the beach, unless it rains.

Always followed by the subjunctive.

The word, taken apart — and its English cousins

a menos que is built on *menos*, inherited from Latin *minus* 'less' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a menos que*
- *Say it: a menos que*, once more
- *Say it:* a sentence of your own with *a menos que*
- *Recall:* say the Spanish for the condition, then the Spanish for as long as, then say *a menos que* again

Before you move on

What does a menos que mean? ("Unless".) Say it once more.

611.4 con tal de que — provided that

Before the new one: say the Spanish for as long as, then the Spanish for unless.

You'll want to know: con tal de que

con tal de que — "provided that".

Te lo presto con tal de que me lo devuelvas.

I will lend it to you provided that you give it back.

Followed by the subjunctive; *con tal de* + infinitive also works.

The word, taken apart — and its English cousins

con tal de que is built on *tal*, inherited from Latin *talis* 'such, of that kind' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: con tal de que*
- *Say it: con tal de que*, once more
- *Say it:* a sentence of your own with *con tal de que*
- *Recall:* say the Spanish for as long as, then the Spanish for unless, then say *con tal de que* again

Before you move on

What does con tal de que mean? (“Provided that”.) Say it once more.

611.5 en caso de que — in case; if

Before the new one: say the Spanish for unless, then the Spanish for provided that.

You’ll want to know: en caso de que

en caso de que — “in case; if”.

En caso de que llegues tarde, llámame.

If you are late, call me.

Followed by the subjunctive; *en caso de* + noun: *en caso de incendio* — in case of fire.

The word, taken apart — and its English cousins

en caso de que is built on *caso*, a learned borrowing from Latin *casus* ’a falling, an event’, from *cadere* ’to fall’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en caso de que*
- *Say it: en caso de que*, once more
- *Say it:* a sentence of your own with *en caso de que*
- *Recall:* say the Spanish for unless, then the Spanish for provided that, then say *en caso de que* again

Before you move on

What does en caso de que mean? (“In case; if”.) Say it once more.

Chapter 612

Si no es así

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what happens otherwise, in that case or in any case.
>
> *Complete the last lesson of chapter 612: I can say what happens otherwise, in that case or in any case.*

612.1 a no ser que — except if; unless

Before the new one: say the Spanish for provided that, then the Spanish for in case.

You'll want to know: a no ser que

a no ser que — "except if; unless".

Salimos a las ocho, a no ser que llueva.

We leave at eight, unless it rains.

Means the same as *a menos que*, with the subjunctive.

The word, taken apart — and its English cousins

a no ser que is built on *ser*, usually explained as a merger of Latin *esse* 'to be' and *sedere* 'to sit'; EtymDB takes it back to Old Spanish *seer*. The phrase means 'unless it be that'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a no ser que*
- *Say it: a no ser que*, once more
- *Say it:* a sentence of your own with *a no ser que*
- *Recall:* say the Spanish for provided that, then the Spanish for in case, then say *a no ser que* again

Before you move on

What does a no ser que mean? ("Except if; unless".) Say it once more.

612.2 a condición de que — on condition that

Before the new one: say the Spanish for in case, then the Spanish for except if.

You'll want to know: a condición de que

a condición de que — "on condition that".

> Firmo a condición de que me paguen antes.
>
> *I will sign on condition that they pay me first.*

Formal; followed by the subjunctive.

The word, taken apart — and its English cousins

a condición de que is built on *condición*, a learned borrowing from Latin *condicio* 'terms, agreement' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a condición de que*
- *Say it: a condición de que*, once more
- *Say it:* a sentence of your own with *a condición de que*
- *Recall:* say the Spanish for in case, then the Spanish for except if, then say *a condición de que* again

Before you move on

What does a condición de que mean? ("On condition that".) Say it once more.

612.3 de lo contrario — otherwise

Before the new one: say the Spanish for except if, then the Spanish for on condition that.

You'll want to know: de lo contrario

de lo contrario — "otherwise".

Date prisa; de lo contrario, perdemos el tren.

Hurry up; otherwise, we will miss the train.

In speech people also say *si no*.

The word, taken apart — and its English cousins

de lo contrario is built on *contrario*, a learned borrowing from Latin *contrarius* 'opposite', from *contra* 'against' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: de lo contrario*
- *Say it: de lo contrario*, once more
- *Say it:* a sentence of your own with *de lo contrario*
- *Recall:* say the Spanish for except if, then the Spanish for on condition that, then say *de lo contrario* again

Before you move on

What does de lo contrario mean? ("Otherwise".) Say it once more.

612.4 en ese caso — in that case

Before the new one: say the Spanish for on condition that, then the Spanish for otherwise.

You'll want to know: en ese caso

en ese caso — "in that case".

—No tengo coche. —En ese caso, vamos en tren.

I do not have a car. In that case, we will go by train.

It answers a condition that someone has given.

The word, taken apart — and its English cousins

en ese caso is built on *caso*, a learned borrowing from Latin *casus* 'an event', from *cadere* 'to fall' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en ese caso*
- *Say it: en ese caso*, once more
- *Say it:* a sentence of your own with *en ese caso*
- *Recall:* say the Spanish for on condition that, then the Spanish for otherwise, then say *en ese caso* again

Before you move on

What does en ese caso mean? (“In that case”.) Say it once more.

612.5 en todo caso — in any case; if anything

Before the new one: say the Spanish for otherwise, then the Spanish for in that case.

You’ll want to know: en todo caso

en todo caso — “in any case; if anything”.

En todo caso, te llamo mañana.

In any case, I will call you tomorrow.

Close to *de todas formas*.

The word, taken apart — and its English cousins

en todo caso is built on *todo*, inherited from Latin *totus* ’whole’, and *caso*, borrowed from Latin *casus* ’an event’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en todo caso*
- *Say it: en todo caso*, once more
- *Say it:* a sentence of your own with *en todo caso*
- *Recall:* say the Spanish for otherwise, then the Spanish for in that case, then say *en todo caso* again

Before you move on

What does en todo caso mean? ("In any case; if anything".) Say it once more.

Chapter 613

Lo que hace falta

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what something requires and how likely it is.
>
> *Complete the last lesson of chapter 613: I can say what something requires and how likely it is.*

613.1 requerir — to require, to call for

> Before the new one: say the Spanish for in that case, then the Spanish for in any case.

You'll want to know: requerir

requerir — "to require, to call for".

> El puesto requiere experiencia.
>
> *The post requires experience.*

Like *sentir*: *requiere, requirió*. Common in job offers and rules.

The word, taken apart — and its English cousins

requerir is inherited from Latin *requirere* 'to look for again, to need', built from *re* and *quaerere* 'to seek', and it follows *querer* in its forms (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: requerir*
- *Say it: requerir*, once more
- *Say it:* a sentence of your own with *requerir*
- *Recall:* say the Spanish for in that case, then the Spanish for in any case, then say *requerir* again

Before you move on

What does requerir mean? ("To require, to call for".) Say it once more.

613.2 el requisito — the requirement

Before the new one: say the Spanish for in any case, then the Spanish for to require.

You'll want to know: el requisito

el requisito — "the requirement".

El inglés es un requisito para el puesto.

English is a requirement for the post.

Cumplir los requisitos — to meet the requirements.

The word, taken apart — and its English cousins

requisito is a learned borrowing from Latin *requisitus* 'required', the participle of *requirere*, built on *quaerere* 'to seek' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el requisito*
- *Say it: el requisito*, once more
- *Say it:* a sentence of your own with *el requisito*
- *Recall:* say the Spanish for in any case, then the Spanish for to require, then say *el requisito* again

Before you move on

What does el requisito mean? ("The requirement".) Say it once more.

613.3 la incertidumbre — the uncertainty

Before the new one: say the Spanish for to require, then the Spanish for the requirement.

You'll want to know: la incertidumbre

la incertidumbre — "the uncertainty".

Hay mucha incertidumbre sobre el futuro.

There is a lot of uncertainty about the future.

The opposite of *la certeza*.

The word, taken apart — and its English cousins

incertidumbre is usually traced to Late Latin *incertitūdō* 'uncertainty', a learned word built on *incertus* 'not sure', from *certus* 'sure' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la incertidumbre*
- *Say it: la incertidumbre*, once more
- *Say it:* a sentence of your own with *la incertidumbre*
- *Recall:* say the Spanish for to require, then the Spanish for the requirement, then say *la incertidumbre* again

Before you move on

What does la incertidumbre mean? ("The uncertainty".) Say it once more.

613.4 probable — likely, probable

Before the new one: say the Spanish for the requirement, then the Spanish for the uncertainty.

You'll want to know: probable

probable — "likely, probable".

Es probable que llueva.

It is likely to rain.

Es probable que + subjunctive.

The word, taken apart — and its English cousins

probable is a learned borrowing from Latin *probabilis* 'credible, that can be proved', built on *probare* 'to test' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: probable*
- *Say it: probable*, once more
- *Say it:* a sentence of your own with *probable*
- *Recall:* say the Spanish for the requirement, then the Spanish for the uncertainty, then say *probable* again

Before you move on

What does probable mean? ("Likely, probable".) Say it once more.

613.5 la probabilidad — the probability, the likelihood

Before the new one: say the Spanish for the uncertainty, then the Spanish for likely.

You'll want to know: la probabilidad

la probabilidad — "the probability, the likelihood".

La probabilidad es baja.

The likelihood is low.

Con toda probabilidad — in all likelihood.

The word, taken apart — and its English cousins

probabilidad is built on *probable*, a learned borrowing from Latin *probabilis*, from *probare* 'to test' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la probabilidad*
- *Say it: la probabilidad*, once more
- *Say it:* a sentence of your own with *la probabilidad*
- *Recall:* say the Spanish for the uncertainty, then the Spanish for likely, then say *la probabilidad* again

Before you move on

What does la probabilidad mean? ("The probability, the likelihood".) Say it once more.

Chapter 614

Riesgos y garantías

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about taking risks, preventing problems and what is guaranteed.
>
> *Complete the last lesson of chapter 614: I can talk about taking risks, preventing problems and what is guaranteed.*

614.1 prevenir — to prevent, to head off; to warn

Before the new one: say the Spanish for likely, then the Spanish for the probability.

You'll want to know: prevenir

prevenir — "to prevent, to head off; to warn".

> Es mejor prevenir los problemas.
>
> *It is better to prevent problems.*

Like *venir*: *prevengo, previne.*

The word, taken apart — and its English cousins

prevenir is a learned borrowing from Latin *praevenire* 'to come before, to anticipate', built from *prae* and *venire* 'to come' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: prevenir*
- *Say it: prevenir*, once more
- *Say it:* a sentence of your own with *prevenir*
- *Recall:* say the Spanish for likely, then the Spanish for the probability, then say *prevenir* again

Before you move on

What does prevenir mean? ("To prevent, to head off; to warn".) Say it once more.

614.2 arriesgar — to risk

Before the new one: say the Spanish for the probability, then the Spanish for to prevent.

You'll want to know: arriesgar

arriesgar — "to risk".

No quiero arriesgar mi dinero.

I do not want to risk my money.

Arriesgarse — to take a chance. Spelling: *arriesgué*.

The word, taken apart — and its English cousins

arriesgar is built on *riesgo* 'risk', which comes from Italian *rischio* (EtymDB); the older origin is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: arriesgar*
- *Say it: arriesgar*, once more
- *Say it:* a sentence of your own with *arriesgar*
- *Recall:* say the Spanish for the probability, then the Spanish for to prevent, then say *arriesgar* again

Before you move on

What does arriesgar mean? ("To risk".) Say it once more.

614.3 garantizar — to guarantee

Before the new one: say the Spanish for to prevent, then the Spanish for to risk.

You'll want to know: garantizar

garantizar — "to guarantee".

No te puedo garantizar nada.

I cannot guarantee you anything.

Spelling: *garanticé*.

The word, taken apart — and its English cousins

garantizar is built on *garantía*; EtymDB links *garantía* with Catalan *garantia* and English *guarantee*, and the family is usually traced to Old French *garant* 'guarantor', from a Frankish word for a protector.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: garantizar*
- *Say it: garantizar*, once more
- *Say it:* a sentence of your own with *garantizar*
- *Recall:* say the Spanish for to prevent, then the Spanish for to risk, then say *garantizar* again

Before you move on

What does garantizar mean? ("To guarantee".) Say it once more.

614.4 la garantía — the guarantee, the warranty

Before the new one: say the Spanish for to risk, then the Spanish for to guarantee.

You'll want to know: la garantía

la garantía — "the guarantee, the warranty".

El móvil tiene dos años de garantía.

The phone has a two-year warranty.

Estar en garantía — to be under warranty.

The word, taken apart — and its English cousins

garantía comes from *garante* 'guarantor'; EtymDB links it with Catalan *garantia*, and the family is usually traced to Old French *garant*, from a Frankish word for a protector.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la garantía*
- *Say it: la garantía*, once more
- *Say it:* a sentence of your own with *la garantía*
- *Recall:* say the Spanish for to risk, then the Spanish for to guarantee, then say *la garantía* again

Before you move on

What does la garantía mean? ("The guarantee, the warranty".) Say it once more.

614.5 la protección — the protection

Before the new one: say the Spanish for to guarantee, then the Spanish for the guarantee.

You'll want to know: la protección

la protección — "the protection".

Usa protección solar.

Use sun protection.

Proteger — to protect.

The word, taken apart — and its English cousins

protección is a learned borrowing from Late Latin *protectio* 'a covering over', built on *protegere*, from *tegere* 'to cover' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la protección*
- *Say it: la protección*, once more
- *Say it:* a sentence of your own with *la protección*
- *Recall:* say the Spanish for to guarantee, then the Spanish for the guarantee, then say *la protección* again

Before you move on

What does la protección mean? ("The protection".) Say it once more.

Chapter 615

Planes

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can describe a plan, its purpose and what I intend to do.
>
> *Complete the last lesson of chapter 615: I can describe a plan, its purpose and what I intend to do.*

615.1 programar — to schedule, to plan; to program

Before the new one: say the Spanish for the guarantee, then the Spanish for the protection.

You'll want to know: programar

programar — "to schedule, to plan; to program".

> Programamos la reunión para el martes.
>
> *We scheduled the meeting for Tuesday.*

Also to write a computer program.

The word, taken apart — and its English cousins

programar is built on *programa*, from Late Latin *programma*, taken from Greek *programma* 'a public notice', from *graphein* 'to write'

(EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: programar*
- *Say it: programar*, once more
- *Say it:* a sentence of your own with *programar*
- *Recall:* say the Spanish for the guarantee, then the Spanish for the protection, then say *programar* again

Before you move on

What does programar mean? ("To schedule, to plan; to program".) Say it once more.

615.2 planificar — to plan

Before the new one: say the Spanish for the protection, then the Spanish for to schedule.

You'll want to know: planificar

planificar — "to plan".

Planificamos el viaje con tiempo.

We planned the trip in good time.

More formal than *planear*. Spelling: *planifiqué*.

The word, taken apart — and its English cousins

planificar is built on *plan* with the ending *-ificar*; *plan* rests on *plano*, a learned borrowing from Latin *planus* 'flat' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: planificar*
- *Say it: planificar*, once more
- *Say it:* a sentence of your own with *planificar*
- *Recall:* say the Spanish for the protection, then the Spanish for to schedule, then say *planificar* again

Before you move on

What does planificar mean? ("To plan".) Say it once more.

615.3 el propósito — the purpose, the aim; the resolution

Before the new one: say the Spanish for to schedule, then the Spanish for to plan.

You'll want to know: el propósito

el propósito — "the purpose, the aim; the resolution".

Mi propósito es aprender inglés.

My aim is to learn English.

A propósito — on purpose; by the way. *Los propósitos de Año Nuevo* — New Year resolutions.

The word, taken apart — and its English cousins

propósito is a learned borrowing from Latin *propositum* 'that which is proposed, an aim', built on *proponere* 'to put forward' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el propósito*
- *Say it: el propósito*, once more
- *Say it:* a sentence of your own with *el propósito*
- *Recall:* say the Spanish for to schedule, then the Spanish for to plan, then say *el propósito* again

Before you move on

What does el propósito mean? ("The purpose, the aim; the resolution".) Say it once more.

615.4 la intención — the intention

Before the new one: say the Spanish for to plan, then the Spanish for the purpose.

You'll want to know: la intención

la intención — "the intention".

No tengo intención de mudarme.

I have no intention of moving house.

Tener la intención de + infinitive.

The word, taken apart — and its English cousins

intención is a learned borrowing from Latin *intentio* 'a stretching, a purpose', built on *intendere* and *tendere* 'to stretch' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la intención*
- *Say it: la intención*, once more
- *Say it:* a sentence of your own with *la intención*
- *Recall:* say the Spanish for to plan, then the Spanish for the purpose, then say *la intención* again

Before you move on

What does la intención mean? ("The intention".) Say it once more.

615.5 proponerse — to set out to, to resolve

Before the new one: say the Spanish for the purpose, then the Spanish for the intention.

You'll want to know: proponerse

proponerse — "to set out to, to resolve".

Me propongo correr cada mañana.

I have resolved to run every morning.

Proponerse + infinitive is to make it your goal.

The word, taken apart — and its English cousins

proponerse is built on *proponer*, a learned borrowing from Latin *proponere* 'to put forward' and rebuilt on *poner* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: proponerse*
- *Say it: proponerse*, once more
- *Say it:* a sentence of your own with *proponerse*
- *Recall:* say the Spanish for the purpose, then the Spanish for the intention, then say *proponerse* again

Before you move on

What does proponerse mean? ("To set out to, to resolve".) Say it once more.

615.6 Repaso de los capítulos 608–615

Say the Spanish for to increase and to decrease.

Your turn

Say these aloud:

- to increase, to decrease, the increase, the growth, the trend
- the progress, to perfect, the challenge, to face, to persevere
- the tolerance, to tolerate, the integration, the immigration, the living together
- the condition, as long as, unless, provided that, in case
- except if, on condition that, otherwise, in that case, in any case
- to require, the requirement, the uncertainty, likely, the probability
- to prevent, to risk, to guarantee, the guarantee, the protection
- to schedule, to plan, the purpose, the intention, to set out to

Before you move on

To increase? (**aumentar**.) To decrease? (**disminuir**.) The increase? (**el aumento**.) The growth? (**el crecimiento**.) The trend? (**la tendencia**.) The progress? (**el progreso**.) To perfect? (**perfeccionar**.) The challenge? (**el desafío**.) To face? (**afrontar**.) To persevere? (**perseverar**.) The tolerance? (**la tolerancia**.) To tolerate? (**tolerar**.) The integration? (**la integración**.) The immigration? (**la inmigración**.) The living together? (**la convivencia**.) The condition? (**la condición**.) As long as? (**siempre que**.) Unless? (**a menos que**.) Provided that? (**con tal de que**.) In case? (**en caso de que**.) Except if? (**a no ser que**.) On condition that? (**a condición de que**.) Otherwise? (**de lo contrario**.) In that case? (**en ese caso**.) In any case? (**en todo caso**.) To require? (**requerir**.) The requirement? (**el requisito**.) The uncertainty? (**la incertidumbre**.) Likely? (**probable**.) The probability? (**la probabilidad**.) To prevent? (**prevenir**.) To risk? (**arriesgar**.) To guarantee? (**garantizar**.) The guarantee? (**la garantía**.) The protection? (**la protección**.) To schedule? (**programar**.) To plan? (**planificar**.) The purpose? (**el propósito**.) The intention? (**la intención**.) To set out to? (**proponerse**.)

Chapter 616

Imprevistos

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something went wrong, move a plan earlier or later and find an alternative.
>
> *Complete the last lesson of chapter 616: I can say that something went wrong, move a plan earlier or later and find an alternative.*

616.1 el imprevisto — the unexpected problem; unforeseen

Before the new one: say the Spanish for the intention, then the Spanish for to set out to.

You'll want to know: el imprevisto

el imprevisto — "the unexpected problem; unforeseen".

> Tuve un imprevisto y llegué tarde.
>
> *Something came up and I arrived late.*

Tener un imprevisto — something unexpected comes up.

The word, taken apart — and its English cousins

imprevisto is built on *previsto*, the participle of *prever*, a learned borrowing from Latin *praevidere* 'to foresee', with *in-* 'not' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el imprevisto*
- *Say it: el imprevisto*, once more
- *Say it:* a sentence of your own with *el imprevisto*
- *Recall:* say the Spanish for the intention, then the Spanish for to set out to, then say *el imprevisto* again

Before you move on

What does el imprevisto mean? ("The unexpected problem; unforeseen".) Say it once more.

616.2 anticipar — to bring forward; to anticipate

Before the new one: say the Spanish for to set out to, then the Spanish for the unexpected problem.

You'll want to know: anticipar

anticipar — "to bring forward; to anticipate".

Anticipamos la reunión al viernes.

We brought the meeting forward to Friday.

Adelantar is more everyday. *Anticiparse a* — to get ahead of.

The word, taken apart — and its English cousins

anticipar is a learned borrowing from Latin *anticipare* 'to take beforehand', built from *ante* and *capere* 'to take' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: anticipar*
- *Say it: anticipar*, once more
- *Say it:* a sentence of your own with *anticipar*
- *Recall:* say the Spanish for to set out to, then the Spanish for the unexpected problem, then say *anticipar* again

Before you move on

What does anticipar mean? ("To bring forward; to anticipate".) Say it once more.

616.3 posponer — to postpone

Before the new one: say the Spanish for the unexpected problem, then the Spanish for to bring forward.

You'll want to know: posponer

posponer — "to postpone".

Tuvimos que posponer el viaje.

We had to postpone the trip.

Like *poner*: *pospongo, pospuse.*

The word, taken apart — and its English cousins

posponer is a learned borrowing from Latin *postponere* 'to put after', built from *post* and *ponere* 'to put' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: posponer*
- *Say it: posponer*, once more
- *Say it:* a sentence of your own with *posponer*
- *Recall:* say the Spanish for the unexpected problem, then the Spanish for to bring forward, then say *posponer* again

Before you move on

What does posponer mean? ("To postpone".) Say it once more.

616.4 el contratiempo — the setback, the mishap

Before the new one: say the Spanish for to bring forward, then the Spanish for to postpone.

You'll want to know: el contratiempo

el contratiempo — "the setback, the mishap".

Tuvimos un contratiempo con el coche.

We had a setback with the car.

A small problem that upsets a plan.

The word, taken apart — and its English cousins

contratiempo is built from *contra* 'against' and *tiempo*, inherited from Latin *tempus* 'time' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el contratiempo*
- *Say it: el contratiempo*, once more
- *Say it:* a sentence of your own with *el contratiempo*
- *Recall:* say the Spanish for to bring forward, then the Spanish for to postpone, then say *el contratiempo* again

Before you move on

What does el contratiempo mean? (“The setback, the mishap”.) Say it once more.

616.5 la alternativa — the alternative, the other option

Before the new one: say the Spanish for to postpone, then the Spanish for the setback.

You’ll want to know: la alternativa

la alternativa — “the alternative, the other option”.

No hay otra alternativa.

There is no other alternative.

Also an adjective: *una ruta alternativa.*

The word, taken apart — and its English cousins

alternativa is built on *alternar* and *alterno*, learned borrowings from Latin *alternare* and *alternus* ’by turns’, from *alter* ’the other’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la alternativa*
- *Say it: la alternativa*, once more
- *Say it:* a sentence of your own with *la alternativa*
- *Recall:* say the Spanish for to postpone, then the Spanish for the setback, then say *la alternativa* again

Before you move on

What does la alternativa mean? ("The alternative, the other option".) Say it once more.

Chapter 617

Elegir

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a decision, the options and what comes first for me.
>
> *Complete the last lesson of chapter 617: I can talk about a decision, the options and what comes first for me.*

617.1 la decisión — the decision

Before the new one: say the Spanish for the setback, then the Spanish for the alternative.

You'll want to know: la decisión

la decisión — "the decision".

Es una decisión difícil.

It is a difficult decision.

Tomar una decisión — to make a decision.

The word, taken apart — and its English cousins

decisión is a learned borrowing from Latin *decisio* 'a settlement', built on *decidere* 'to cut off, to settle', from *caedere* 'to cut' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la decisión*
- *Say it: la decisión*, once more
- *Say it:* a sentence of your own with *la decisión*
- *Recall:* say the Spanish for the setback, then the Spanish for the alternative, then say *la decisión* again

Before you move on

What does la decisión mean? ("The decision".) Say it once more.

617.2 la opción — the option, the choice

Before the new one: say the Spanish for the alternative, then the Spanish for the decision.

You'll want to know: la opción

la opción — "the option, the choice".

Tenemos dos opciones.

We have two options.

No tener opción — to have no choice.

The word, taken apart — and its English cousins

opción is a learned borrowing from Latin *optio* 'free choice', built on *optare* 'to choose, to wish' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la opción*
- *Say it: la opción*, once more
- *Say it:* a sentence of your own with *la opción*
- *Recall:* say the Spanish for the alternative, then the Spanish for the decision, then say *la opción* again

Before you move on

What does la opción mean? ("The option, the choice".) Say it once more.

617.3 el dilema — the dilemma

Before the new one: say the Spanish for the decision, then the Spanish for the option.

You'll want to know: el dilema

el dilema — "the dilemma".

Tengo un dilema: trabajar o estudiar.

I have a dilemma: to work or to study.

Estar ante un dilema — to face a dilemma.

The word, taken apart — and its English cousins

dilema comes from Latin *dilemma*, taken from Greek *dilēmma* 'a double premise', from *dis* 'twice' and *lēmma* 'premise' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el dilema*
- *Say it: el dilema*, once more
- *Say it:* a sentence of your own with *el dilema*
- *Recall:* say the Spanish for the decision, then the Spanish for the option, then say *el dilema* again

Before you move on

What does el dilema mean? ("The dilemma".) Say it once more.

617.4 la prioridad — the priority

Before the new one: say the Spanish for the option, then the Spanish for the dilemma.

You'll want to know: la prioridad

la prioridad — "the priority".

Mi familia es mi prioridad.

My family is my priority.

Dar prioridad a — to put first.

The word, taken apart — and its English cousins

prioridad is a learned word usually traced to Medieval Latin *prioritas*, built on Latin *prior* 'earlier, former' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la prioridad*
- *Say it: la prioridad*, once more
- *Say it:* a sentence of your own with *la prioridad*
- *Recall:* say the Spanish for the option, then the Spanish for the dilemma, then say *la prioridad* again

Before you move on

What does la prioridad mean? ("The priority".) Say it once more.

617.5 el criterio — the criterion; judgement

Before the new one: say the Spanish for the dilemma, then the Spanish for the priority.

You'll want to know: el criterio

el criterio — "the criterion; judgement".

¿Con qué criterio eliges?

On what basis do you choose?

Tener criterio — to have good judgement.

The word, taken apart — and its English cousins

criterio is a learned borrowing from Greek *kritērion* 'a test, a means for judging', built on *krinein* 'to judge'; EtymDB does not list it, but it gives the same root for *crítico*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el criterio*
- *Say it:* *el criterio*, once more
- *Say it:* a sentence of your own with *el criterio*
- *Recall:* say the Spanish for the dilemma, then the Spanish for the priority, then say *el criterio* again

Before you move on

What does el criterio mean? (“The criterion; judgement”.) Say it once more.

Chapter 618

Supongamos que...

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can imagine a situation and talk about what would probably happen.
>
> *Complete the last lesson of chapter 618: I can imagine a situation and talk about what would probably happen.*

618.1 imaginar — to imagine

Before the new one: say the Spanish for the priority, then the Spanish for the criterion.

You'll want to know: imaginar

imaginar — "to imagine".

Imagina que ganas la lotería.

Imagine that you win the lottery.

Me imagino que — I suppose that.

The word, taken apart — and its English cousins

imaginar is a learned borrowing from Latin *imaginari* 'to picture to oneself', built on *imago* 'image' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: imaginar*
- *Say it: imaginar*, once more
- *Say it:* a sentence of your own with *imaginar*
- *Recall:* say the Spanish for the priority, then the Spanish for the criterion, then say *imaginar* again

Before you move on

What does imaginar mean? ("To imagine".) Say it once more.

618.2 la hipótesis — the hypothesis

Before the new one: say the Spanish for the criterion, then the Spanish for to imagine.

You'll want to know: la hipótesis

la hipótesis — "the hypothesis".

Es solo una hipótesis.

It is only a hypothesis.

The same form in the plural: *las hipótesis*.

The word, taken apart — and its English cousins

hipótesis is a learned borrowing from Late Latin *hypothesis*, taken from Greek *hypothesis* 'a base, a supposition', from *hypo* 'under' and *thesis* 'a placing' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la hipótesis*
- *Say it: la hipótesis*, once more
- *Say it:* a sentence of your own with *la hipótesis*
- *Recall:* say the Spanish for the criterion, then the Spanish for to imagine, then say *la hipótesis* again

Before you move on

What does la hipótesis mean? ("The hypothesis".) Say it once more.

618.3 en teoría — in theory

Before the new one: say the Spanish for to imagine, then the Spanish for the hypothesis.

You'll want to know: en teoría

en teoría — "in theory".

En teoría, el tren llega a las ocho.

In theory, the train arrives at eight.

It often goes with *en la práctica*.

The word, taken apart — and its English cousins

en teoría is built on *teoría*, from Late Latin *theoria*, taken from Greek *theōria* 'a looking at, contemplation' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: en teoría*
- *Say it: en teoría*, once more
- *Say it:* a sentence of your own with *en teoría*
- *Recall:* say the Spanish for to imagine, then the Spanish for the hypothesis, then say *en teoría* again

Before you move on

What does en teoría mean? ("In theory".) Say it once more.

618.4 posiblemente — possibly

Before the new one: say the Spanish for the hypothesis, then the Spanish for in theory.

You'll want to know: posiblemente

posiblemente — "possibly".

Posiblemente llegue mañana.

He will possibly arrive tomorrow.

Often with the subjunctive.

The word, taken apart — and its English cousins

posiblemente is built on *posible*, a learned borrowing from Latin *possibilis*, built on *posse* 'to be able', with the ending *-mente* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: posiblemente*
- *Say it: posiblemente*, once more
- *Say it:* a sentence of your own with *posiblemente*
- *Recall:* say the Spanish for the hypothesis, then the Spanish for in theory, then say *posiblemente* again

Before you move on

What does posiblemente mean? ("Possibly".) Say it once more.

618.5 seguramente — most likely, probably

Before the new one: say the Spanish for in theory, then the Spanish for possibly.

You'll want to know: seguramente

seguramente — "most likely, probably".

Seguramente está en casa.

She is probably at home.

It means probably, not surely: *seguramente* leaves room for doubt.

The word, taken apart — and its English cousins

seguramente is built on *seguro* and *-mente*; *seguro* is inherited from Latin *securus* 'free from care' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: seguramente*
- *Say it: seguramente*, once more
- *Say it:* a sentence of your own with *seguramente*
- *Recall:* say the Spanish for in theory, then the Spanish for possibly, then say *seguramente* again

Before you move on

What does seguramente mean? ("Most likely, probably".) Say it once more.

Chapter 619

A lo mejor

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say that something may happen and look ahead.
>
> *Complete the last lesson of chapter 619: I can say that something may happen and look ahead.*

619.1 a lo mejor — maybe, perhaps

> Before the new one: say the Spanish for possibly, then the Spanish for most likely.

You'll want to know: a lo mejor

a lo mejor — "maybe, perhaps".

> A lo mejor vamos al cine.
>
> *Maybe we will go to the cinema.*

Followed by the indicative, while *quizás* often takes the subjunctive. Very common in Spain; parts of Latin America also say *capaz que*.

The word, taken apart — and its English cousins

a lo mejor is built on *mejor*, inherited from Latin *melior* 'better' (EtymDB); literally the phrase is 'at the best'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: a lo mejor*
- *Say it: a lo mejor*, once more
- *Say it:* a sentence of your own with *a lo mejor*
- *Recall:* say the Spanish for possibly, then the Spanish for most likely, then say *a lo mejor* again

Before you move on

What does a lo mejor mean? ("Maybe, perhaps".) Say it once more.

619.2 previsible — predictable, foreseeable

Before the new one: say the Spanish for most likely, then the Spanish for maybe.

You'll want to know: previsible

previsible — "predictable, foreseeable".

Era algo previsible.

It was something you could see coming.

The opposite is *imprevisible*.

The word, taken apart — and its English cousins

previsible is built on *prever*, a learned borrowing from Latin *praevidere* 'to foresee', from *videre* 'to see' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: previsible*
- *Say it: previsible*, once more
- *Say it:* a sentence of your own with *previsible*
- *Recall:* say the Spanish for most likely, then the Spanish for maybe, then say *previsible* again

Before you move on

What does previsible mean? (“Predictable, foreseeable”.) Say it once more.

619.3 la oportunidad — the opportunity, the chance

Before the new one: say the Spanish for maybe, then the Spanish for predictable.

You’ll want to know: la oportunidad

la oportunidad — “the opportunity, the chance”.

Es una buena oportunidad.

It is a good opportunity.

Aprovechar la oportunidad — to take the chance.

The word, taken apart — and its English cousins

oportunidad is a learned borrowing from Latin *opportunitas* ’fitness, a good moment’ (EtymDB), built on *opportunus* ’fit, timely’, literally ’before the harbour’, from *portus* ’harbour’ (Lewis & Short).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la oportunidad*
- *Say it: la oportunidad*, once more
- *Say it:* a sentence of your own with *la oportunidad*
- *Recall:* say the Spanish for maybe, then the Spanish for predictable, then say *la oportunidad* again

Before you move on

What does la oportunidad mean? ("The opportunity, the chance".) Say it once more.

619.4 la perspectiva — the prospect; the perspective

Before the new one: say the Spanish for predictable, then the Spanish for the opportunity.

You'll want to know: la perspectiva

la perspectiva — "the prospect; the perspective".

Las perspectivas de empleo son buenas.

The job prospects are good.

In the plural it often means future chances.

The word, taken apart — and its English cousins

perspectiva is a learned word usually traced to Medieval Latin *perspectiva* 'the science of optics'; it is built on Latin *perspicere* 'to look through' (Lewis & Short), from *specere* 'to look'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la perspectiva*
- *Say it: la perspectiva*, once more
- *Say it:* a sentence of your own with *la perspectiva*
- *Recall:* say the Spanish for predictable, then the Spanish for the opportunity, then say *la perspectiva* again

Before you move on

What does la perspectiva mean? ("The prospect; the perspective".) Say it once more.

619.5 predecir — to predict

Before the new one: say the Spanish for the opportunity, then the Spanish for the prospect.

You'll want to know: predecir

predecir — "to predict".

Nadie puede predecir el futuro.

Nobody can predict the future.

Like *decir*: *predigo, predije.*

The word, taken apart — and its English cousins

predecir is a learned borrowing from Latin *praedicere* 'to say beforehand', built from *prae* and *dicere* 'to say', rebuilt on *decir* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: predecir*
- *Say it: predecir*, once more
- *Say it:* a sentence of your own with *predecir*
- *Recall:* say the Spanish for the opportunity, then the Spanish for the prospect, then say *predecir* again

Before you move on

What does predecir mean? (“To predict”.) Say it once more.

Chapter 620

Buscar soluciones

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can raise a problem, describe the difficulty and propose a solution.
>
> *Complete the last lesson of chapter 620: I can raise a problem, describe the difficulty and propose a solution.*

620.1 la solución — the solution

> Before the new one: say the Spanish for the prospect, then the Spanish for to predict.

You'll want to know: la solución

la solución — "the solution".

> Tenemos que buscar una solución.
>
> *We have to look for a solution.*

No tiene solución — it cannot be fixed.

The word, taken apart — and its English cousins

solución is a learned borrowing from Latin *solutio* 'a loosening, a solving', built on *solvere* 'to loosen' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la solución*
- *Say it: la solución*, once more
- *Say it:* a sentence of your own with *la solución*
- *Recall:* say the Spanish for the prospect, then the Spanish for to predict, then say *la solución* again

Before you move on

What does la solución mean? ("The solution".) Say it once more.

620.2 solucionar — to solve, to sort out

Before the new one: say the Spanish for to predict, then the Spanish for the solution.

You'll want to know: solucionar

solucionar — "to solve, to sort out".

Vamos a solucionar el problema.

We are going to sort out the problem.

Regular -ar verb; close to *resolver*.

The word, taken apart — and its English cousins

solucionar is built on *solución*, a learned borrowing from Latin *solutio*, from *solvere* 'to loosen' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: solucionar*
- *Say it: solucionar*, once more
- *Say it:* a sentence of your own with *solucionar*
- *Recall:* say the Spanish for to predict, then the Spanish for the solution, then say *solucionar* again

Before you move on

What does solucionar mean? ("To solve, to sort out".) Say it once more.

620.3 el obstáculo — the obstacle

Before the new one: say the Spanish for the solution, then the Spanish for to solve.

You'll want to know: el obstáculo

el obstáculo — "the obstacle".

Hay muchos obstáculos en el camino.

There are many obstacles in the way.

Superar un obstáculo — to overcome an obstacle.

The word, taken apart — and its English cousins

obstáculo is a learned borrowing from Latin *obstaculum* (EtymDB), built on *obstare* 'to stand in the way', from *stare* 'to stand'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el obstáculo*
- *Say it: el obstáculo*, once more
- *Say it:* a sentence of your own with *el obstáculo*
- *Recall:* say the Spanish for the solution, then the Spanish for to solve, then say *el obstáculo* again

Before you move on

What does el obstáculo mean? ("The obstacle".) Say it once more.

620.4 complicado — complicated

Before the new one: say the Spanish for to solve, then the Spanish for the obstacle.

You'll want to know: complicado

complicado — "complicated".

La situación es complicada.

The situation is complicated.

The participle of *complicar*.

The word, taken apart — and its English cousins

complicado is the participle of *complicar*, a learned borrowing from Latin *complicare* 'to fold together', built on *plicare* 'to fold' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *complicado*
- *Say it:* *complicado*, once more
- *Say it:* a sentence of your own with *complicado*
- *Recall:* say the Spanish for to solve, then the Spanish for the obstacle, then say *complicado* again

Before you move on

What does complicado mean? (“Complicated”.) Say it once more.

620.5 plantear — to raise, to bring up; to pose

Before the new one: say the Spanish for the obstacle, then the Spanish for complicated.

You’ll want to know: plantear

plantear — “to raise, to bring up; to pose”.

Quiero plantear una pregunta.

I want to raise a question.

Plantear un problema — to raise a problem. *Plantearse* — to think about doing.

The word, taken apart — and its English cousins

plantear is built on *planta* ’sole of the foot; ground plan’, a learned borrowing from Latin *planta* (EtymDB): to set something down so all can see it.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: plantear*
- *Say it: plantear*, once more
- *Say it:* a sentence of your own with *plantear*
- *Recall:* say the Spanish for the obstacle, then the Spanish for complicated, then say *plantear* again

Before you move on

What does plantear mean? (“To raise, to bring up; to pose”.) Say it once more.

Chapter 621

Lo hace posible o no

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what makes something easier or harder, what is forbidden and who is exempt.
>
> *Complete the last lesson of chapter 621: I can say what makes something easier or harder, what is forbidden and who is exempt.*

621.1 impedir — to stop, to prevent

> Before the new one: say the Spanish for complicated, then the Spanish for to raise.

You'll want to know: impedir

impedir — "to stop, to prevent".

> La lluvia nos impidió salir.
>
> *The rain stopped us going out.*

Like *pedir*: *impido, impidió.*

The word, taken apart — and its English cousins

impedir is a learned borrowing from Latin *impedire* 'to hinder, to entangle the feet', built on *pes, pedis* 'foot' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: impedir*
- *Say it: impedir*, once more
- *Say it:* a sentence of your own with *impedir*
- *Recall:* say the Spanish for complicated, then the Spanish for to raise, then say *impedir* again

Before you move on

What does impedir mean? ("To stop, to prevent".) Say it once more.

621.2 facilitar — to make easier; to provide

Before the new one: say the Spanish for to raise, then the Spanish for to stop.

You'll want to know: facilitar

facilitar — "to make easier; to provide".

El ordenador facilita el trabajo.

The computer makes the work easier.

On forms: *facilite sus datos* — provide your details.

The word, taken apart — and its English cousins

facilitar is built on *fácil*, a learned borrowing from Latin *facilis* 'easy to do', from *facere* 'to do' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: facilitar*
- *Say it: facilitar*, once more
- *Say it:* a sentence of your own with *facilitar*
- *Recall:* say the Spanish for to raise, then the Spanish for to stop, then say *facilitar* again

Before you move on

What does facilitar mean? ("To make easier; to provide".) Say it once more.

621.3 dificultar — to make difficult, to hinder

Before the new one: say the Spanish for to stop, then the Spanish for to make easier.

You'll want to know: dificultar

dificultar — "to make difficult, to hinder".

La nieve dificulta el viaje.

The snow makes the journey difficult.

The opposite of *facilitar*.

The word, taken apart — and its English cousins

dificultar is a learned borrowing from Latin *difficultare* 'to make hard', built on *difficultas*, from *facilis* 'easy' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dificultar*
- *Say it: dificultar*, once more
- *Say it:* a sentence of your own with *dificultar*
- *Recall:* say the Spanish for to stop, then the Spanish for to make easier, then say *dificultar* again

Before you move on

What does dificultar mean? ("To make difficult, to hinder".) Say it once more.

621.4 exento — exempt, free from

Before the new one: say the Spanish for to make easier, then the Spanish for to make difficult.

You'll want to know: exento

exento — "exempt, free from".

Los niños están exentos de pagar.

Children are exempt from paying.

Exento de + noun or infinitive.

The word, taken apart — and its English cousins

exento is a learned borrowing from Latin *exemptus* 'taken out, freed', from *eximere*, built on *emere* 'to take' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: exento*
- *Say it: exento*, once more
- *Say it:* a sentence of your own with *exento*
- *Recall:* say the Spanish for to make easier, then the Spanish for to make difficult, then say *exento* again

Before you move on

What does exento mean? ("Exempt, free from".) Say it once more.

621.5 prohibido — forbidden, prohibited

Before the new one: say the Spanish for to make difficult, then the Spanish for exempt.

You'll want to know: prohibido

prohibido — "forbidden, prohibited".

Prohibido aparcar.

No parking.

Common on signs: *prohibido el paso* — no entry.

The word, taken apart — and its English cousins

prohibido is the participle of *prohibir*, a learned borrowing from Latin *prohibere* 'to hold back', built on *habere* 'to hold' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: prohibido*
- *Say it: prohibido*, once more
- *Say it:* a sentence of your own with *prohibido*
- *Recall:* say the Spanish for to make difficult, then the Spanish for exempt, then say *prohibido* again

Before you move on

What does prohibido mean? ("Forbidden, prohibited".) Say it once more.

Chapter 622

Las reglas

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read the rules of a place and say what is obligatory.
>
> *Complete the last lesson of chapter 622: I can read the rules of a place and say what is obligatory.*

622.1 la normativa — the set of rules, the regulations

Before the new one: say the Spanish for exempt, then the Spanish for forbidden.

You'll want to know: la normativa

la normativa — "the set of rules, the regulations".

> La nueva normativa empieza en enero.
>
> *The new rules start in January.*

Rules made by an authority for a whole area.

The word, taken apart — and its English cousins

normativa is built on *norma*, which comes from Latin *norma* 'a carpenter's square, a rule' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la normativa*
- *Say it: la normativa*, once more
- *Say it:* a sentence of your own with *la normativa*
- *Recall:* say the Spanish for exempt, then the Spanish for forbidden, then say *la normativa* again

Before you move on

What does la normativa mean? ("The set of rules, the regulations".) Say it once more.

622.2 el reglamento — the regulations, the rules

Before the new one: say the Spanish for forbidden, then the Spanish for the set of rules.

You'll want to know: el reglamento

el reglamento — "the regulations, the rules".

Lee el reglamento antes de empezar.

Read the regulations before you start.

The written set of rules of a club, a building or a game.

The word, taken apart — and its English cousins

reglamento is built on *reglar*, a learned borrowing from Latin *regulare* 'to direct', from *regula* 'rule' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el reglamento*
- *Say it: el reglamento*, once more
- *Say it:* a sentence of your own with *el reglamento*
- *Recall:* say the Spanish for forbidden, then the Spanish for the set of rules, then say *el reglamento* again

Before you move on

What does el reglamento mean? ("The regulations, the rules".) Say it once more.

622.3 la prohibición — the ban, the prohibition

Before the new one: say the Spanish for the set of rules, then the Spanish for the regulations.

You'll want to know: la prohibición

la prohibición — "the ban, the prohibition".

Hay una prohibición de fumar.

There is a smoking ban.

Built on *prohibir*.

The word, taken apart — and its English cousins

prohibición is a learned borrowing from Latin *prohibitio* 'a forbidding', built on *prohibere* 'to hold back', from *habere* 'to hold' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la prohibición*
- *Say it: la prohibición*, once more
- *Say it:* a sentence of your own with *la prohibición*
- *Recall:* say the Spanish for the set of rules, then the Spanish for the regulations, then say *la prohibición* again

Before you move on

What does la prohibición mean? ("The ban, the prohibition".) Say it once more.

622.4 obligar — to force, to oblige

Before the new one: say the Spanish for the regulations, then the Spanish for the ban.

You'll want to know: obligar

obligar — "to force, to oblige".

Nadie te obliga a venir.

Nobody is forcing you to come.

Obligar a alguien a + infinitive. Spelling: *obligué*.

The word, taken apart — and its English cousins

obligar is a learned borrowing from Latin *obligare* 'to bind, to put under a duty', built on *ligare* 'to tie' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: obligar*
- *Say it: obligar*, once more
- *Say it:* a sentence of your own with *obligar*
- *Recall:* say the Spanish for the regulations, then the Spanish for the ban, then say *obligar* again

Before you move on

What does obligar mean? ("To force, to oblige".) Say it once more.

622.5 la obligación — the obligation, the duty

Before the new one: say the Spanish for the ban, then the Spanish for to force.

You'll want to know: la obligación

la obligación — "the obligation, the duty".

Votar es un derecho, no una obligación.

Voting is a right, not an obligation.

Tener la obligación de + infinitive.

The word, taken apart — and its English cousins

obligación is a learned borrowing from Latin *obligatio* 'a binding, a legal tie', built on *obligare* 'to bind' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la obligación*
- *Say it: la obligación*, once more
- *Say it:* a sentence of your own with *la obligación*
- *Recall:* say the Spanish for the ban, then the Spanish for to force, then say *la obligación* again

Before you move on

What does la obligación mean? ("The obligation, the duty".) Say it once more.

Chapter 623

Si no cumples

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say what happens to people who break the rules.
>
> *Complete the last lesson of chapter 623: I can say what happens to people who break the rules.*

623.1 el castigo — the punishment

> Before the new one: say the Spanish for to force, then the Spanish for the obligation.

You'll want to know: el castigo

el castigo — "the punishment".

> El castigo fue muy duro.
>
> *The punishment was very harsh.*

Un castigo justo — a fair punishment.

The word, taken apart — and its English cousins

castigo is built on *castigar*, inherited from Latin *castigare* 'to correct, to chastise', built on *castus* 'pure' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el castigo*
- *Say it: el castigo*, once more
- *Say it:* a sentence of your own with *el castigo*
- *Recall:* say the Spanish for to force, then the Spanish for the obligation, then say *el castigo* again

Before you move on

What does el castigo mean? ("The punishment".) Say it once more.

623.2 castigar — to punish

Before the new one: say the Spanish for the obligation, then the Spanish for the punishment.

You'll want to know: castigar

castigar — "to punish".

Lo castigaron sin salir.

They grounded him.

Castigar sin salir — to keep a child in. Spelling: *castigué*.

The word, taken apart — and its English cousins

castigar is inherited from Latin *castigare* 'to correct, to chasten', built on *castus* 'pure' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: castigar*
- *Say it: castigar*, once more
- *Say it:* a sentence of your own with *castigar*
- *Recall:* say the Spanish for the obligation, then the Spanish for the punishment, then say *castigar* again

Before you move on

What does castigar mean? ("To punish".) Say it once more.

623.3 la sanción — the penalty, the sanction

Before the new one: say the Spanish for the punishment, then the Spanish for to punish.

You'll want to know: la sanción

la sanción — "the penalty, the sanction".

El club recibió una sanción.

The club received a sanction.

A formal word for a punishment or fine.

The word, taken apart — and its English cousins

sanción is a learned borrowing from Latin *sanctio* 'a decree, the penalty clause of a law', built on *sancire* 'to make sacred, to decree' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la sanción*
- *Say it: la sanción*, once more
- *Say it:* a sentence of your own with *la sanción*
- *Recall:* say the Spanish for the punishment, then the Spanish for to punish, then say *la sanción* again

Before you move on

What does la sanción mean? ("The penalty, the sanction".) Say it once more.

623.4 sancionar — to penalise, to sanction

Before the new one: say the Spanish for to punish, then the Spanish for the penalty.

You'll want to know: sancionar

sancionar — "to penalise, to sanction".

La empresa fue sancionada.

The company was penalised.

Common in the news, often in the passive.

The word, taken apart — and its English cousins

sancionar is built on *sanción*, a learned borrowing from Latin *sanctio* 'a decree', from *sancire* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sancionar*
- *Say it: sancionar*, once more
- *Say it:* a sentence of your own with *sancionar*
- *Recall:* say the Spanish for to punish, then the Spanish for the penalty, then say *sancionar* again

Before you move on

What does sancionar mean? (“To penalise, to sanction”.) Say it once more.

623.5 multar — to fine

Before the new one: say the Spanish for the penalty, then the Spanish for to penalise.

You’ll want to know: multar

multar — “to fine”.

Me multaron por ir rápido.

They fined me for speeding.

The noun is *la multa*.

The word, taken apart — and its English cousins

multar is a learned borrowing from Latin *multare* ’to punish, to fine’, built on *multa* ’a fine’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *multar*
- *Say it:* *multar*, once more
- *Say it:* a sentence of your own with *multar*
- *Recall:* say the Spanish for the penalty, then the Spanish for to penalise, then say *multar* again

Before you move on

What does multar mean? (“To fine”.) Say it once more.

623.6 Repaso de los capítulos 616–623

Say the Spanish for the unexpected problem and to bring forward.

Your turn

Say these aloud:

- the unexpected problem, to bring forward, to postpone, the setback, the alternative
- the decision, the option, the dilemma, the priority, the criterion
- to imagine, the hypothesis, in theory, possibly, most likely
- maybe, predictable, the opportunity, the prospect, to predict
- the solution, to solve, the obstacle, complicated, to raise
- to stop, to make easier, to make difficult, exempt, forbidden
- the set of rules, the regulations, the ban, to force, the obligation
- the punishment, to punish, the penalty, to penalise, to fine

Before you move on

The unexpected problem? (**el imprevisto**.) To bring forward? (**anticipar**.) To postpone? (**posponer**.) The setback? (**el contratiempo**.) The alternative? (**la alternativa**.) The decision? (**la decisión**.) The option? (**la opción**.) The dilemma? (**el dilema**.) The priority? (**la prioridad**.) The criterion? (**el criterio**.) To imagine? (**imaginar**.) The hypothesis? (**la hipótesis**.) In theory? (**en teoría**.) Possibly? (**posiblemente**.) Most likely? (**seguramente**.) Maybe? (**a lo mejor**.) Predictable? (**previsible**.) The opportunity? (**la oportunidad**.) The prospect? (**la perspectiva**.) To predict? (**predecir**.) The solution? (**la solución**.) To solve? (**solucionar**.) The obstacle? (**el obstáculo**.) Complicated? (**complicado**.) To raise? (**plantear**.) To stop? (**impedir**.) To make easier? (**facilitar**.) To make difficult? (**dificultar**.) Exempt? (**exento**.) Forbidden? (**prohibido**.) The set of rules? (**la normativa**.) The regulations? (**el reglamento**.) The ban? (**la prohibición**.) To force? (**obligar**.) The obligation? (**la obligación**.) The punishment? (**el castigo**.) To punish? (**castigar**.) The penalty? (**la sanción**.) To penalise? (**sancionar**.) To fine? (**multar**.)

Chapter 624

Papeles oficiales

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can ask for an authorisation, process the paperwork and get a certificate.
>
> *Complete the last lesson of chapter 624: I can ask for an authorisation, process the paperwork and get a certificate.*

624.1 autorizar — to authorise, to allow

Before the new one: say the Spanish for to penalise, then the Spanish for to fine.

You'll want to know: autorizar

autorizar — "to authorise, to allow".

El director autorizó la salida al museo.

The head teacher authorised the trip to the museum.

Spelling: *autoricé*.

The word, taken apart — and its English cousins

autorizar is a learned borrowing from Medieval Latin *auctorizare*, built on *auctor* 'originator, guarantor', from *augere* 'to increase' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: autorizar*
- *Say it: autorizar*, once more
- *Say it:* a sentence of your own with *autorizar*
- *Recall:* say the Spanish for to penalise, then the Spanish for to fine, then say *autorizar* again

Before you move on

What does autorizar mean? ("To authorise, to allow".) Say it once more.

624.2 la autorización — the authorisation, the permission

Before the new one: say the Spanish for to fine, then the Spanish for to authorise.

You'll want to know: la autorización

la autorización — "the authorisation, the permission".

Necesitas una autorización de tus padres.

You need your parents' permission.

More formal than *el permiso*.

The word, taken apart — and its English cousins

autorización is built on *autorizar*, a learned borrowing from Medieval Latin *auctorizare*, built on *auctor* 'guarantor' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la autorización*
- *Say it: la autorización*, once more
- *Say it:* a sentence of your own with *la autorización*
- *Recall:* say the Spanish for to fine, then the Spanish for to authorise, then say *la autorización* again

Before you move on

What does la autorización mean? ("The authorisation, the permission".) Say it once more.

624.3 tramitar — to process, to deal with (paperwork)

Before the new one: say the Spanish for to authorise, then the Spanish for the authorisation.

You'll want to know: tramitar

tramitar — "to process, to deal with (paperwork)".

> Tardan un mes en tramitar el permiso.
>
> *It takes them a month to process the permit.*

Formal, for official paperwork.

The word, taken apart — and its English cousins

tramitar is built on *trámite*, a learned borrowing from Latin *trames, tramitis* 'a path, a way across' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: tramitar*
- *Say it: tramitar*, once more
- *Say it:* a sentence of your own with *tramitar*
- *Recall:* say the Spanish for to authorise, then the Spanish for the authorisation, then say *tramitar* again

Before you move on

What does tramitar mean? ("To process, to deal with (paperwork)".) Say it once more.

624.4 el certificado — the certificate

Before the new one: say the Spanish for the authorisation, then the Spanish for to process.

You'll want to know: el certificado

el certificado — "the certificate".

Necesito un certificado médico.

I need a medical certificate.

The verb is *certificar* — to certify.

The word, taken apart — and its English cousins

certificado is the participle of *certificar*, which EtymDB traces to Late Latin *certificāre* 'to make sure', built on *certus* 'sure'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el certificado*
- *Say it: el certificado*, once more
- *Say it:* a sentence of your own with *el certificado*
- *Recall:* say the Spanish for the authorisation, then the Spanish for to process, then say *el certificado* again

Before you move on

What does el certificado mean? ("The certificate".) Say it once more.

624.5 oficial — official; the officer

Before the new one: say the Spanish for to process, then the Spanish for the certificate.

You'll want to know: oficial

oficial — "official; the officer".

Es el documento oficial.

It is the official document.

As a noun it is a rank in the army or the police.

The word, taken apart — and its English cousins

oficial is a learned borrowing from Latin *officialis* 'of duty', built on *officium* 'service, duty' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *oficial*
- *Say it:* *oficial*, once more
- *Say it:* a sentence of your own with *oficial*
- *Recall:* say the Spanish for to process, then the Spanish for the certificate, then say *oficial* again

Before you move on

What does oficial mean? (“Official; the officer”.) Say it once more.

Chapter 625

Legal o ilegal

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say which laws are in force, who breaks them and how to report it.
>
> *Complete the last lesson of chapter 625: I can say which laws are in force, who breaks them and how to report it.*

625.1 vigente — in force, current

Before the new one: say the Spanish for the certificate, then the Spanish for official.

You'll want to know: vigente

vigente — "in force, current".

> Esta ley ya no está vigente.
>
> *This law is no longer in force.*

For laws, rules and prices.

The word, taken apart — and its English cousins

vigente is a learned borrowing from Latin *vigens* 'thriving, strong' (EtymDB), from *vigere* 'to be lively'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: vigente*
- *Say it: vigente*, once more
- *Say it:* a sentence of your own with *vigente*
- *Recall:* say the Spanish for the certificate, then the Spanish for official, then say *vigente* again

Before you move on

What does vigente mean? ("In force, current".) Say it once more.

625.2 ilegal — illegal

Before the new one: say the Spanish for official, then the Spanish for in force.

You'll want to know: ilegal

ilegal — "illegal".

Aparcar aquí es ilegal.

Parking here is illegal.

The opposite of *legal*.

The word, taken apart — and its English cousins

ilegal is a learned borrowing from Medieval Latin *illegalis*, built from *in-* 'not' and *legalis*, from *lex* 'law' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ilegal*
- *Say it: ilegal*, once more
- *Say it:* a sentence of your own with *ilegal*
- *Recall:* say the Spanish for official, then the Spanish for in force, then say *ilegal* again

Before you move on

What does ilegal mean? ("Illegal".) Say it once more.

625.3 infringir — to break, to infringe

Before the new one: say the Spanish for in force, then the Spanish for illegal.

You'll want to know: infringir

infringir — "to break, to infringe".

Infringió las normas del club.

He broke the club rules.

Formal, for rules and laws. Spelling: *infrinjo*.

The word, taken apart — and its English cousins

infringir is a learned borrowing from Latin *infringere* 'to break, to weaken', built from *in* and *frangere* 'to break' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: infringir*
- *Say it: infringir*, once more
- *Say it:* a sentence of your own with *infringir*
- *Recall:* say the Spanish for in force, then the Spanish for illegal, then say *infringir* again

Before you move on

What does infringir mean? ("To break, to infringe".) Say it once more.

625.4 denunciar — to report; to denounce

Before the new one: say the Spanish for illegal, then the Spanish for to break.

You'll want to know: denunciar

denunciar — "to report; to denounce".

Denuncié el robo a la policía.

I reported the theft to the police.

Denunciar to the police is to make a formal report.

The word, taken apart — and its English cousins

denunciar is a learned borrowing from Latin *denuntiare* 'to announce, to give notice', built on *nuntius* 'messenger' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: denunciar*
- *Say it: denunciar*, once more
- *Say it:* a sentence of your own with *denunciar*
- *Recall:* say the Spanish for illegal, then the Spanish for to break, then say *denunciar* again

Before you move on

What does denunciar mean? ("To report; to denounce".) Say it once more.

625.5 la denuncia — the report, the complaint

Before the new one: say the Spanish for to break, then the Spanish for to report.

You'll want to know: la denuncia

la denuncia — "the report, the complaint".

Puse una denuncia en la policía.

I made a report to the police.

Poner una denuncia — to file a report.

The word, taken apart — and its English cousins

denuncia is built on *denunciar*, a learned borrowing from Latin *denuntiare* 'to announce', from *nuntius* 'messenger' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la denuncia*
- *Say it: la denuncia*, once more
- *Say it:* a sentence of your own with *la denuncia*
- *Recall:* say the Spanish for to break, then the Spanish for to report, then say *la denuncia* again

Before you move on

What does la denuncia mean? ("The report, the complaint".) Say it once more.

Chapter 626

En el tribunal

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow a short news item about a court, a charge, a verdict and a fraud.
>
> *Complete the last lesson of chapter 626: I can follow a short news item about a court, a charge, a verdict and a fraud.*

626.1 la sentencia — the court ruling, the judgment; the sentence

> Before the new one: say the Spanish for to report, then the Spanish for the report.

You'll want to know: la sentencia

la sentencia — "the court ruling, the judgment; the sentence".

> La sentencia sale mañana.
>
> *The ruling comes out tomorrow.*

A court decision; *dictar sentencia* — to pass judgment. A sentence in grammar is *la oración* or *la frase*.

The word, taken apart — and its English cousins

sentencia is a learned borrowing from Latin *sententia* 'way of thinking, opinion, verdict', built on *sentire* 'to feel, to think' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la sentencia*
- *Say it: la sentencia*, once more
- *Say it:* a sentence of your own with *la sentencia*
- *Recall:* say the Spanish for to report, then the Spanish for the report, then say *la sentencia* again

Before you move on

What does la sentencia mean? ("The court ruling, the judgment; the sentence".) Say it once more.

626.2 la acusación — the accusation, the charge

Before the new one: say the Spanish for the report, then the Spanish for the court ruling.

You'll want to know: la acusación

la acusación — "the accusation, the charge".

La acusación es muy grave.

The accusation is very serious.

In court *la acusación* is also the prosecution.

The word, taken apart — and its English cousins

acusación is a learned borrowing from Latin *accusatio* 'an accusation', built on *accusare*, from *ad* and *causa* 'case at law' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la acusación*
- *Say it: la acusación*, once more
- *Say it:* a sentence of your own with *la acusación*
- *Recall:* say the Spanish for the report, then the Spanish for the court ruling, then say *la acusación* again

Before you move on

What does la acusación mean? ("The accusation, the charge".) Say it once more.

626.3 el tribunal — the court

Before the new one: say the Spanish for the court ruling, then the Spanish for the accusation.

You'll want to know: el tribunal

el tribunal — "the court".

El caso llegó al tribunal.

The case reached the court.

Also an exam board: *el tribunal del examen.*

The word, taken apart — and its English cousins

tribunal is a learned borrowing from Latin *tribunal*, the raised seat of the tribunes, built on *tribunus* and *tribus* 'tribe' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el tribunal*
- *Say it: el tribunal*, once more
- *Say it:* a sentence of your own with *el tribunal*
- *Recall:* say the Spanish for the court ruling, then the Spanish for the accusation, then say *el tribunal* again

Before you move on

What does el tribunal mean? ("The court".) Say it once more.

626.4 culpable — guilty; the culprit

Before the new one: say the Spanish for the accusation, then the Spanish for the court.

You'll want to know: culpable

culpable — "guilty; the culprit".

El juez lo declaró culpable.

The judge found him guilty.

The opposite is *inocente*.

The word, taken apart — and its English cousins

culpable is a learned borrowing from Latin *culpabilis* 'blameworthy', built on *culpa* 'fault' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: culpable*
- *Say it: culpable*, once more
- *Say it:* a sentence of your own with *culpable*
- *Recall:* say the Spanish for the accusation, then the Spanish for the court, then say *culpable* again

Before you move on

What does culpable mean? ("Guilty; the culprit".) Say it once more.

626.5 el fraude — the fraud

Before the new one: say the Spanish for the court, then the Spanish for guilty.

You'll want to know: el fraude

el fraude — "the fraud".

Fue un fraude de millones de euros.

It was a fraud worth millions of euros.

Fraude fiscal — tax fraud.

The word, taken apart — and its English cousins

fraude is a learned borrowing from Latin *fraus, fraudis* 'deceit, harm' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el fraude*
- *Say it:* *el fraude*, once more
- *Say it:* a sentence of your own with *el fraude*
- *Recall:* say the Spanish for the court, then the Spanish for guilty, then say *el fraude* again

Before you move on

What does el fraude mean? (“The fraud”.) Say it once more.

Chapter 627

Las cuentas de casa

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about income, wasting money, debt and getting into debt.
>
> *Complete the last lesson of chapter 627: I can talk about income, wasting money, debt and getting into debt.*

627.1 derrochar — to waste, to squander

> Before the new one: say the Spanish for guilty, then the Spanish for the fraud.

You'll want to know: derrochar

derrochar — "to waste, to squander".

> No derroches el dinero.
>
> *Do not waste your money.*

El derroche — the waste.

The word, taken apart — and its English cousins

The origin of *derrochar* is not settled; one account links it to French *dérocher* 'to throw down from a rock', and EtymDB does not list it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: derrochar*
- *Say it: derrochar*, once more
- *Say it:* a sentence of your own with *derrochar*
- *Recall:* say the Spanish for guilty, then the Spanish for the fraud, then say *derrochar* again

Before you move on

What does derrochar mean? ("To waste, to squander".) Say it once more.

627.2 el ingreso — the income; the deposit; admission

Before the new one: say the Spanish for the fraud, then the Spanish for to waste.

You'll want to know: el ingreso

el ingreso — "the income; the deposit; admission".

Mis ingresos son bajos.

My income is low.

In the plural it is income. *El ingreso en el hospital* — hospital admission.

The word, taken apart — and its English cousins

ingreso is a learned borrowing from Latin *ingressus* 'an entering', built on *ingredi* 'to step in', from *gradi* 'to step' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ingreso*
- *Say it: el ingreso*, once more
- *Say it:* a sentence of your own with *el ingreso*
- *Recall:* say the Spanish for the fraud, then the Spanish for to waste, then say *el ingreso* again

Before you move on

What does el ingreso mean? ("The income; the deposit; admission".) Say it once more.

627.3 la deuda — the debt

Before the new one: say the Spanish for to waste, then the Spanish for the income.

You'll want to know: la deuda

la deuda — "the debt".

Tengo una deuda con el banco.

I have a debt with the bank.

Estar en deuda con — to be in debt to, also in a moral sense.

The word, taken apart — and its English cousins

deuda is inherited from Latin *debita* 'things owed', through Old Spanish *debda*, from *debere* 'to owe' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la deuda*
- *Say it: la deuda*, once more
- *Say it:* a sentence of your own with *la deuda*
- *Recall:* say the Spanish for to waste, then the Spanish for the income, then say *la deuda* again

Before you move on

What does la deuda mean? ("The debt".) Say it once more.

627.4 endeudarse — to get into debt

Before the new one: say the Spanish for the income, then the Spanish for the debt.

You'll want to know: endeudarse

endeudarse — "to get into debt".

Se endeudó para comprar un coche.

He got into debt to buy a car.

Built on *la deuda*.

The word, taken apart — and its English cousins

endeudarse is built on *deuda* 'debt', inherited from Latin *debita* 'things owed', from *debere* 'to owe' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: endeudarse*
- *Say it: endeudarse*, once more
- *Say it:* a sentence of your own with *endeudarse*
- *Recall:* say the Spanish for the income, then the Spanish for the debt, then say *endeudarse* again

Before you move on

What does endeudarse mean? ("To get into debt".) Say it once more.

627.5 invertir — to invest; to reverse

Before the new one: say the Spanish for the debt, then the Spanish for to get into debt.

You'll want to know: invertir

invertir — "to invest; to reverse".

Quiero invertir en mi educación.

I want to invest in my education.

Like *sentir*: *invierto, invirtió.*

The word, taken apart — and its English cousins

invertir is a learned borrowing from Latin *invertere* 'to turn upside down', built from *in* and *vertere* 'to turn' (EtymDB); the money sense came later.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: invertir*
- *Say it: invertir*, once more
- *Say it:* a sentence of your own with *invertir*
- *Recall:* say the Spanish for the debt, then the Spanish for to get into debt, then say *invertir* again

Before you move on

What does invertir mean? ("To invest; to reverse".) Say it once more.

Chapter 628

En el banco

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about cash, a bank transfer, a mortgage, interest and taking money out.
>
> *Complete the last lesson of chapter 628: I can talk about cash, a bank transfer, a mortgage, interest and taking money out.*

628.1 el efectivo — the cash

> Before the new one: say the Spanish for to get into debt, then the Spanish for to invest.

You'll want to know: el efectivo

el efectivo — "the cash".

> ¿Paga en efectivo o con tarjeta?
>
> *Are you paying in cash or by card?*

En efectivo — in cash. As an adjective it means effective.

The word, taken apart — and its English cousins

efectivo is a learned borrowing from Latin *effectivus* 'productive', built on *effectus*, from *efficere* 'to bring about' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el efectivo*
- *Say it: el efectivo*, once more
- *Say it:* a sentence of your own with *el efectivo*
- *Recall:* say the Spanish for to get into debt, then the Spanish for to invest, then say *el efectivo* again

Before you move on

What does el efectivo mean? ("The cash".) Say it once more.

628.2 la transferencia — the bank transfer; the transfer

Before the new one: say the Spanish for to invest, then the Spanish for the cash.

You'll want to know: la transferencia

la transferencia — "the bank transfer; the transfer".

Te hago una transferencia mañana.

I will send you a bank transfer tomorrow.

Hacer una transferencia — to make a transfer.

The word, taken apart — and its English cousins

transferencia is a learned word built on Latin *transferre* 'to carry across', from *trans* and *ferre* 'to carry' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la transferencia*
- *Say it: la transferencia*, once more
- *Say it:* a sentence of your own with *la transferencia*
- *Recall:* say the Spanish for to invest, then the Spanish for the cash, then say *la transferencia* again

Before you move on

What does la transferencia mean? ("The bank transfer; the transfer".) Say it once more.

628.3 la hipoteca — the mortgage

Before the new one: say the Spanish for the cash, then the Spanish for the bank transfer.

You'll want to know: la hipoteca

la hipoteca — "the mortgage".

Pagamos la hipoteca cada mes.

We pay the mortgage every month.

Hipotecar — to mortgage.

The word, taken apart — and its English cousins

hipoteca is a learned borrowing from Latin *hypotheca*, taken from Greek *hypothēkē* 'a pledge, a deposit', built from *hypo* 'under' and *thēkē* 'a place to put things' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la hipoteca*
- *Say it: la hipoteca*, once more
- *Say it:* a sentence of your own with *la hipoteca*
- *Recall:* say the Spanish for the cash, then the Spanish for the bank transfer, then say *la hipoteca* again

Before you move on

What does la hipoteca mean? ("The mortgage".) Say it once more.

628.4 el interés — the interest

Before the new one: say the Spanish for the bank transfer, then the Spanish for the mortgage.

You'll want to know: el interés

el interés — "the interest".

El banco cobra un interés alto.

The bank charges high interest.

Also interest in a subject: *tengo interés en la historia.*

The word, taken apart — and its English cousins

interés is a learned borrowing from Latin *interesse* 'to be between, to make a difference', built from *inter* and *esse* 'to be' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el interés*
- *Say it: el interés*, once more
- *Say it:* a sentence of your own with *el interés*
- *Recall:* say the Spanish for the bank transfer, then the Spanish for the mortgage, then say *el interés* again

Before you move on

What does el interés mean? (“The interest”.) Say it once more.

628.5 retirar — to withdraw, to take out; to remove

Before the new one: say the Spanish for the mortgage, then the Spanish for the interest.

You’ll want to know: retirar

retirar — “to withdraw, to take out; to remove”.

Retiro dinero del cajero.

I take money out of the cash machine.

In speech people often say *sacar dinero*. *Retirarse* — to retire, to withdraw.

The word, taken apart — and its English cousins

retirar is built on *tirar* ’to pull, to throw’ with *re-*; *tirar* is usually traced to a Germanic verb meaning ’to tear’ (EtymDB), but its origin is not settled.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: retirar*
- *Say it: retirar*, once more
- *Say it:* a sentence of your own with *retirar*
- *Recall:* say the Spanish for the mortgage, then the Spanish for the interest, then say *retirar* again

Before you move on

What does retirar mean? ("To withdraw, to take out; to remove".) Say it once more.

Chapter 629

Ganar y perder

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about profit and loss and how something is paid for.
>
> *Complete the last lesson of chapter 629: I can talk about profit and loss and how something is paid for.*

629.1 la ganancia — the gain, the profit

Before the new one: say the Spanish for the interest, then the Spanish for to withdraw.

You'll want to know: la ganancia

la ganancia — "the gain, the profit".

> La tienda tuvo ganancias este año.
>
> *The shop made a profit this year.*

Often plural: *las ganancias*.

The word, taken apart — and its English cousins

ganancia is built on *ganar* 'to earn, to win', which was probably borrowed from Gothic *ganan* 'to covet' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ganancia*
- *Say it: la ganancia*, once more
- *Say it:* a sentence of your own with *la ganancia*
- *Recall:* say the Spanish for the interest, then the Spanish for to withdraw, then say *la ganancia* again

Before you move on

What does la ganancia mean? ("The gain, the profit".) Say it once more.

629.2 la pérdida — the loss

Before the new one: say the Spanish for to withdraw, then the Spanish for the gain.

You'll want to know: la pérdida

la pérdida — "the loss".

Fue una pérdida de tiempo.

It was a waste of time.

Pérdida de tiempo — a waste of time.

The word, taken apart — and its English cousins

pérdida is inherited from Late Latin *perdita* 'lost', from *perdere* 'to lose, to destroy' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la pérdida*
- *Say it: la pérdida*, once more
- *Say it:* a sentence of your own with *la pérdida*
- *Recall:* say the Spanish for to withdraw, then the Spanish for the gain, then say *la pérdida* again

Before you move on

What does la pérdida mean? ("The loss".) Say it once more.

629.3 el beneficio — the profit; the benefit

Before the new one: say the Spanish for the gain, then the Spanish for the loss.

You'll want to know: el beneficio

el beneficio — "the profit; the benefit".

La empresa tuvo un beneficio de un millón.

The company made a profit of a million.

Also a benefit: *en beneficio de todos* — for the good of all.

The word, taken apart — and its English cousins

beneficio is a learned borrowing from Latin *beneficium* 'a kindness, a favour', built from *bene* 'well' and *facere* 'to do' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el beneficio*
- *Say it: el beneficio*, once more
- *Say it:* a sentence of your own with *el beneficio*
- *Recall:* say the Spanish for the gain, then the Spanish for the loss, then say *el beneficio* again

Before you move on

What does el beneficio mean? ("The profit; the benefit".) Say it once more.

629.4 la inversión — the investment

Before the new one: say the Spanish for the loss, then the Spanish for the profit.

You'll want to know: la inversión

la inversión — "the investment".

La casa es una buena inversión.

The house is a good investment.

Built on *invertir*.

The word, taken apart — and its English cousins

inversión is a learned borrowing from Latin *inversio* 'a turning about', built on *invertere*, from *vertere* 'to turn' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la inversión*
- *Say it: la inversión*, once more
- *Say it:* a sentence of your own with *la inversión*
- *Recall:* say the Spanish for the loss, then the Spanish for the profit, then say *la inversión* again

Before you move on

What does la inversión mean? ("The investment".) Say it once more.

629.5 financiar — to finance, to fund

Before the new one: say the Spanish for the profit, then the Spanish for the investment.

You'll want to know: financiar

financiar — "to finance, to fund".

El ayuntamiento financia el proyecto.

The town council funds the project.

La financiación — the funding.

The word, taken apart — and its English cousins

financiar is built on *finanzas*, borrowed from French *finance* 'payment, settlement' (EtymDB), which is usually traced to Latin *finis* 'end': to settle a debt was to end it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: financiar*
- *Say it: financiar*, once more
- *Say it:* a sentence of your own with *financiar*
- *Recall:* say the Spanish for the profit, then the Spanish for the investment, then say *financiar* again

Before you move on

What does financiar mean? ("To finance, to fund".) Say it once more.

Chapter 630

La economía

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow simple news about the economy, inflation, exports and trade.
>
> *Complete the last lesson of chapter 630: I can follow simple news about the economy, inflation, exports and trade.*

630.1 la economía — the economy; economics

> Before the new one: say the Spanish for the investment, then the Spanish for to finance.

You'll want to know: la economía

la economía — "the economy; economics".

> La economía va mejor.
>
> *The economy is doing better.*

Also the subject at university.

The word, taken apart — and its English cousins

economía is a learned borrowing from Latin *oeconomia*, taken from Greek *oikonomia* 'household management', built from *oikos* 'house' and *nomos* 'custom, rule' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la economía*
- *Say it: la economía*, once more
- *Say it:* a sentence of your own with *la economía*
- *Recall:* say the Spanish for the investment, then the Spanish for to finance, then say *la economía* again

Before you move on

What does la economía mean? ("The economy; economics".) Say it once more.

630.2 económico — economic; cheap

Before the new one: say the Spanish for to finance, then the Spanish for the economy.

You'll want to know: económico

económico — "economic; cheap".

Es un hotel económico.

It is a cheap hotel.

It means cheap as well as economic: *una opción económica.*

The word, taken apart — and its English cousins

económico is a learned borrowing from Latin *oeconomicus*, taken from Greek *oikonomikos* 'skilled in household management', from *oikos* 'house' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: económico*
- *Say it: económico*, once more
- *Say it:* a sentence of your own with *económico*
- *Recall:* say the Spanish for to finance, then the Spanish for the economy, then say *económico* again

Before you move on

What does económico mean? ("Economic; cheap".) Say it once more.

630.3 la exportación — the export

Before the new one: say the Spanish for the economy, then the Spanish for economic.

You'll want to know: la exportación

la exportación — "the export".

La exportación de aceite crece.

Olive oil exports are growing.

Exportar — to export; *la importación* — the import.

The word, taken apart — and its English cousins

exportación is built on *exportar*, a learned borrowing from Latin *exportare* 'to carry out', from *ex* and *portare* 'to carry' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la exportación*
- *Say it: la exportación*, once more
- *Say it:* a sentence of your own with *la exportación*
- *Recall:* say the Spanish for the economy, then the Spanish for economic, then say *la exportación* again

Before you move on

What does la exportación mean? ("The export".) Say it once more.

630.4 la inflación — the inflation

Before the new one: say the Spanish for economic, then the Spanish for the export.

You'll want to know: la inflación

la inflación — "the inflation".

La inflación está muy alta este año.

Inflation is very high this year.

When inflation goes up, everything costs more.

The word, taken apart — and its English cousins

inflación is a learned borrowing from Latin *inflatio* 'a swelling', built on *inflare* 'to blow into', from *flare* 'to blow' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la inflación*
- *Say it: la inflación*, once more
- *Say it:* a sentence of your own with *la inflación*
- *Recall:* say the Spanish for economic, then the Spanish for the export, then say *la inflación* again

Before you move on

What does la inflación mean? ("The inflation".) Say it once more.

630.5 el comercio — the trade, the commerce; the shop

Before the new one: say the Spanish for the export, then the Spanish for the inflation.

You'll want to know: el comercio

el comercio — "the trade, the commerce; the shop".

El comercio con Europa crece.

Trade with Europe is growing.

Un comercio is also a shop: *los comercios del barrio.*

The word, taken apart — and its English cousins

comercio is a learned borrowing from Latin *commercium* 'trade, dealings', built from *con* and *merx* 'goods' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el comercio*
- *Say it:* *el comercio*, once more
- *Say it:* a sentence of your own with *el comercio*
- *Recall:* say the Spanish for the export, then the Spanish for the inflation, then say *el comercio* again

Before you move on

What does el comercio mean? ("The trade, the commerce; the shop".) Say it once more.

Chapter 631

Ofertas y rebajas

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can talk about clearance sales, price cuts, demand and what something is worth.
>
> *Complete the last lesson of chapter 631: I can talk about clearance sales, price cuts, demand and what something is worth.*

631.1 la liquidación — the clearance sale; the settlement

> Before the new one: say the Spanish for the inflation, then the Spanish for the trade.

You'll want to know: la liquidación

la liquidación — "the clearance sale; the settlement".

> La tienda cierra y hay liquidación.
>
> *The shop is closing and there is a clearance sale.*

Also the final pay you receive when you leave a job.

The word, taken apart — and its English cousins

liquidación is built on *liquidar*, which comes from *líquido*, a learned borrowing from Latin *liquidus* 'fluid, clear' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la liquidación*
- *Say it: la liquidación*, once more
- *Say it:* a sentence of your own with *la liquidación*
- *Recall:* say the Spanish for the inflation, then the Spanish for the trade, then say *la liquidación* again

Before you move on

What does la liquidación mean? ("The clearance sale; the settlement".) Say it once more.

631.2 la rebaja — the price cut; the sales

Before the new one: say the Spanish for the trade, then the Spanish for the clearance sale.

You'll want to know: la rebaja

la rebaja — "the price cut; the sales".

En enero empiezan las rebajas.

The sales start in January.

In Spain *las rebajas* are the seasonal sales; Latin America often says *las ofertas* or *las liquidaciones*.

The word, taken apart — and its English cousins

rebaja is built on *rebajar* 'to lower', from *bajo* 'low', which is inherited from Late Latin *bassus* 'low' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la rebaja*
- *Say it: la rebaja*, once more
- *Say it:* a sentence of your own with *la rebaja*
- *Recall:* say the Spanish for the trade, then the Spanish for the clearance sale, then say *la rebaja* again

Before you move on

What does la rebaja mean? ("The price cut; the sales".) Say it once more.

631.3 la venta — the sale

Before the new one: say the Spanish for the clearance sale, then the Spanish for the price cut.

You'll want to know: la venta

la venta — "the sale".

La casa está en venta.

The house is for sale.

En venta — for sale.

The word, taken apart — and its English cousins

venta is inherited from Latin *vendita* 'sold', the participle of *vendere* 'to sell' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la venta*
- *Say it: la venta*, once more
- *Say it:* a sentence of your own with *la venta*
- *Recall:* say the Spanish for the clearance sale, then the Spanish for the price cut, then say *la venta* again

Before you move on

What does la venta mean? ("The sale".) Say it once more.

631.4 la demanda — the demand; the lawsuit

Before the new one: say the Spanish for the price cut, then the Spanish for the sale.

You'll want to know: la demanda

la demanda — "the demand; the lawsuit".

Hay mucha demanda de pisos.

There is a lot of demand for flats.

La oferta y la demanda — supply and demand. In law, a lawsuit.

The word, taken apart — and its English cousins

demanda is built on *demandar*, inherited from Latin *demandare* 'to entrust', from *mandare* 'to give into someone's hand, to order' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la demanda*
- *Say it: la demanda*, once more
- *Say it:* a sentence of your own with *la demanda*
- *Recall:* say the Spanish for the price cut, then the Spanish for the sale, then say *la demanda* again

Before you move on

What does la demanda mean? ("The demand; the lawsuit".) Say it once more.

631.5 valer — to be worth; to cost

Before the new one: say the Spanish for the sale, then the Spanish for the demand.

You'll want to know: valer

valer — "to be worth; to cost".

¿Cuánto vale este libro?

How much is this book?

Irregular: *valgo, valdré*. *Vale* — OK, in Spain. *No vale la pena* — it is not worth it.

The word, taken apart — and its English cousins

valer is inherited from Latin *valere* 'to be strong, to be worth' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: valer*
- *Say it: valer*, once more
- *Say it:* a sentence of your own with *valer*
- *Recall:* say the Spanish for the sale, then the Spanish for the demand, then say *valer* again

Before you move on

What does valer mean? ("To be worth; to cost".) Say it once more.

631.6 Repaso de los capítulos 624–631

Say the Spanish for to authorise and the authorisation.

Your turn

Say these aloud:

- to authorise, the authorisation, to process, the certificate, official
- in force, illegal, to break, to report, the report
- the court ruling, the accusation, the court, guilty, the fraud
- to waste, the income, the debt, to get into debt, to invest
- the cash, the bank transfer, the mortgage, the interest, to withdraw
- the gain, the loss, the profit, the investment, to finance
- the economy, economic, the export, the inflation, the trade
- the clearance sale, the price cut, the sale, the demand, to be worth

Before you move on

To authorise? (**autorizar**.) The authorisation? (**la autorización**.) To process? (**tramitar**.) The certificate? (**el certificado**.) Official? (**oficial**.) In force? (**vigente**.) Illegal? (**ilegal**.) To break?

(**infringir**.) To report? (**denunciar**.) The report? (**la denuncia**.) The court ruling? (**la sentencia**.) The accusation? (**la acusación**.) The court? (**el tribunal**.) Guilty? (**culpable**.) The fraud? (**el fraude**.) To waste? (**derrochar**.) The income? (**el ingreso**.) The debt? (**la deuda**.) To get into debt? (**endeudarse**.) To invest? (**invertir**.) The cash? (**el efectivo**.) The bank transfer? (**la transferencia**.) The mortgage? (**la hipoteca**.) The interest? (**el interés**.) To withdraw? (**retirar**.) The gain? (**la ganancia**.) The loss? (**la pérdida**.) The profit? (**el beneficio**.) The investment? (**la inversión**.) To finance? (**financiar**.) The economy? (**la economía**.) Economic? (**económico**.) The export? (**la exportación**.) The inflation? (**la inflación**.) The trade? (**el comercio**.) The clearance sale? (**la liquidación**.) The price cut? (**la rebaja**.) The sale? (**la venta**.) The demand? (**la demanda**.) To be worth? (**valer**.)

Chapter 632

Pagos

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about paying, monthly payments, splitting a bill and a pension.
>
> *Complete the last lesson of chapter 632: I can talk about paying, monthly payments, splitting a bill and a pension.*

632.1 abonar — to pay; to credit

> Before the new one: say the Spanish for the demand, then the Spanish for to be worth.

You'll want to know: abonar

abonar — "to pay; to credit".

> Puede abonar la cantidad con tarjeta.
>
> *You can pay the amount by card.*

Formal, on bills and notices. It also means to fertilise.

The word, taken apart — and its English cousins

abonar is built on *bueno*, inherited from Latin *bonus* 'good' (EtymDB): it first meant to make good, then to pay.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: abonar*
- *Say it: abonar*, once more
- *Say it:* a sentence of your own with *abonar*
- *Recall:* say the Spanish for the demand, then the Spanish for to be worth, then say *abonar* again

Before you move on

What does abonar mean? ("To pay; to credit".) Say it once more.

632.2 la mensualidad — the monthly payment

Before the new one: say the Spanish for to be worth, then the Spanish for to pay.

You'll want to know: la mensualidad

la mensualidad — "the monthly payment".

Pago una mensualidad de cincuenta euros.

I pay fifty euros a month.

One monthly payment out of several.

The word, taken apart — and its English cousins

mensualidad is built on *mensual*, a learned borrowing from Late Latin *mensualis*, from *mensis* 'month' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la mensualidad*
- *Say it: la mensualidad*, once more
- *Say it:* a sentence of your own with *la mensualidad*
- *Recall:* say the Spanish for to be worth, then the Spanish for to pay, then say *la mensualidad* again

Before you move on

What does la mensualidad mean? ("The monthly payment".) Say it once more.

632.3 fraccionar — to split into instalments, to divide

Before the new one: say the Spanish for to pay, then the Spanish for the monthly payment.

You'll want to know: fraccionar

fraccionar — "to split into instalments, to divide".

Puedes fraccionar el pago en tres meses.

You can split the payment over three months.

Common in shops and banks.

The word, taken apart — and its English cousins

fraccionar is built on *fracción*, a learned borrowing from Latin *fractio* 'a breaking' (EtymDB), from *frangere* 'to break'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: fraccionar*
- *Say it: fraccionar*, once more
- *Say it:* a sentence of your own with *fraccionar*
- *Recall:* say the Spanish for to pay, then the Spanish for the monthly payment, then say *fraccionar* again

Before you move on

What does fraccionar mean? ("To split into instalments, to divide".) Say it once more.

632.4 ingresar — to pay in, to deposit; to be admitted

Before the new one: say the Spanish for the monthly payment, then the Spanish for to split into instalments.

You'll want to know: ingresar

ingresar — "to pay in, to deposit; to be admitted".

Ingresé el dinero en mi cuenta.

I paid the money into my account.

In Spain *ingresar dinero* is to pay it in; much of Latin America says *depositar*. *Ingresar en el hospital* — to be admitted.

The word, taken apart — and its English cousins

ingresar is built on *ingreso*, a learned borrowing from Latin *ingressus* 'an entering', from *ingredi* and *gradi* 'to step' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: ingresar*
- *Say it: ingresar*, once more
- *Say it:* a sentence of your own with *ingresar*
- *Recall:* say the Spanish for the monthly payment, then the Spanish for to split into instalments, then say *ingresar* again

Before you move on

What does ingresar mean? ("To pay in, to deposit; to be admitted".) Say it once more.

632.5 la pensión — the pension; the guesthouse

Before the new one: say the Spanish for to split into instalments, then the Spanish for to pay in.

You'll want to know: la pensión

la pensión — "the pension; the guesthouse".

Mi abuela cobra una pensión.

My grandmother gets a pension.

Also a cheap guesthouse: *una pensión en el centro.*

The word, taken apart — and its English cousins

pensión is a learned borrowing from Latin *pensio* 'a payment', built on *pendere* 'to weigh out, to pay' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la pensión*
- *Say it: la pensión*, once more
- *Say it:* a sentence of your own with *la pensión*
- *Recall:* say the Spanish for to split into instalments, then the Spanish for to pay in, then say *la pensión* again

Before you move on

What does la pensión mean? (“The pension; the guesthouse”.) Say it once more.

Chapter 633

Ricos y pobres

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can compare rich and poor and say what is free or a luxury.
>
> *Complete the last lesson of chapter 633: I can compare rich and poor and say what is free or a luxury.*

633.1 rico — rich; tasty

> Before the new one: say the Spanish for to pay in, then the Spanish for the pension.

You'll want to know: rico

rico — "rich; tasty".

> Es un país rico.
>
> *It is a rich country.*

With *ser* it means rich; with *estar* it means tasty: *la sopa está muy rica.*

The word, taken apart — and its English cousins

rico was borrowed from Gothic *reiks* 'mighty, powerful', from Germanic *rīkijaz* (EtymDB); being powerful came to mean having money.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rico*
- *Say it: rico*, once more
- *Say it:* a sentence of your own with *rico*
- *Recall:* say the Spanish for to pay in, then the Spanish for the pension, then say *rico* again

Before you move on

What does rico mean? ("Rich; tasty".) Say it once more.

633.2 la miseria — the poverty, the misery; a pittance

Before the new one: say the Spanish for the pension, then the Spanish for rich.

You'll want to know: la miseria

la miseria — "the poverty, the misery; a pittance".

Vivían en la miseria.

They lived in great poverty.

Ganar una miseria — to earn a pittance.

The word, taken apart — and its English cousins

miseria is a learned borrowing from Latin *miseria* 'wretchedness' (EtymDB), built on *miser* 'wretched'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la miseria*
- *Say it: la miseria*, once more
- *Say it:* a sentence of your own with *la miseria*
- *Recall:* say the Spanish for the pension, then the Spanish for rich, then say *la miseria* again

Before you move on

What does la miseria mean? ("The poverty, the misery; a pittance".) Say it once more.

633.3 la riqueza — the wealth

Before the new one: say the Spanish for rich, then the Spanish for the poverty.

You'll want to know: la riqueza

la riqueza — "the wealth".

La riqueza no lo es todo.

Wealth is not everything.

Built on *rico* with *-eza*.

The word, taken apart — and its English cousins

riqueza is built on *rico*, which was borrowed from Gothic *reiks* 'mighty' (EtymDB), with the ending *-eza*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la riqueza*
- *Say it: la riqueza*, once more
- *Say it:* a sentence of your own with *la riqueza*
- *Recall:* say the Spanish for rich, then the Spanish for the poverty, then say *la riqueza* again

Before you move on

What does la riqueza mean? ("The wealth".) Say it once more.

633.4 el lujo — the luxury

Before the new one: say the Spanish for the poverty, then the Spanish for the wealth.

You'll want to know: el lujo

el lujo — "the luxury".

Un coche así es un lujo.

A car like that is a luxury.

De lujo — luxury, deluxe: *un hotel de lujo.*

The word, taken apart — and its English cousins

lujo is a learned borrowing from Latin *luxus* 'excess, extravagance' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el lujo*
- *Say it: el lujo*, once more
- *Say it:* a sentence of your own with *el lujo*
- *Recall:* say the Spanish for the poverty, then the Spanish for the wealth, then say *el lujo* again

Before you move on

What does el lujo mean? ("The luxury".) Say it once more.

633.5 gratuito — free of charge

Before the new one: say the Spanish for the wealth, then the Spanish for the luxury.

You'll want to know: gratuito

gratuito — "free of charge".

La entrada es gratuita.

Entry is free.

More formal than *gratis*.

The word, taken apart — and its English cousins

gratuito is a learned borrowing from Latin *gratuitus* 'freely given', built on *gratia* 'favour, kindness' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *gratuito*
- *Say it:* *gratuito*, once more
- *Say it:* a sentence of your own with *gratuito*
- *Recall:* say the Spanish for the wealth, then the Spanish for the luxury, then say *gratuito* again

Before you move on

What does gratuito mean? (“Free of charge”.) Say it once more.

Chapter 634

Llegar a un acuerdo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can negotiate, persuade, give way on a point and reach an agreement.
>
> *Complete the last lesson of chapter 634: I can negotiate, persuade, give way on a point and reach an agreement.*

634.1 negociar — to negotiate

> Before the new one: say the Spanish for the luxury, then the Spanish for free of charge.

You'll want to know: negociar

negociar — "to negotiate".

> Vamos a negociar el precio.
>
> *We are going to negotiate the price.*

Regular -ar verb.

The word, taken apart — and its English cousins

negociar is a learned borrowing from Latin *negotiari* 'to do business', built on *negotium* 'business', from *nec* 'not' and *otium* 'leisure' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *negociar*
- *Say it:* *negociar*, once more
- *Say it:* a sentence of your own with *negociar*
- *Recall:* say the Spanish for the luxury, then the Spanish for free of charge, then say *negociar* again

Before you move on

What does negociar mean? ("To negotiate".) Say it once more.

634.2 la negociación — the negotiation

Before the new one: say the Spanish for free of charge, then the Spanish for to negotiate.

You'll want to know: la negociación

la negociación — "the negotiation".

La negociación duró tres días.

The negotiation lasted three days.

Often plural: *las negociaciones*.

The word, taken apart — and its English cousins

negociación is a learned borrowing from Latin *negotiatio* 'business, trade', built on *negotium*, from *otium* 'leisure' with *nec* 'not' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la negociación*
- *Say it: la negociación*, once more
- *Say it:* a sentence of your own with *la negociación*
- *Recall:* say the Spanish for free of charge, then the Spanish for to negotiate, then say *la negociación* again

Before you move on

What does la negociación mean? ("The negotiation".) Say it once more.

634.3 ceder — to give way, to give in; to hand over

Before the new one: say the Spanish for to negotiate, then the Spanish for the negotiation.

You'll want to know: ceder

ceder — "to give way, to give in; to hand over".

Al final, mi padre cedió.

In the end, my father gave in.

Ceda el paso on a road sign — give way.

The word, taken apart — and its English cousins

ceder is a learned borrowing from Latin *cedere* 'to go away, to yield' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *ceder*
- *Say it:* *ceder*, once more
- *Say it:* a sentence of your own with *ceder*
- *Recall:* say the Spanish for to negotiate, then the Spanish for the negotiation, then say *ceder* again

Before you move on

What does ceder mean? ("To give way, to give in; to hand over".) Say it once more.

634.4 acordar — to agree on

Before the new one: say the Spanish for the negotiation, then the Spanish for to give way.

You'll want to know: acordar

acordar — "to agree on".

Acordamos una fecha.

We agreed on a date.

Acordar algo — to agree on it. Stem change o→ue.

The word, taken apart — and its English cousins

acordar is inherited from spoken Latin *accordare*, built on *cor* 'heart' (EtymDB): to agree is to be of one heart.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: acordar*
- *Say it: acordar*, once more
- *Say it:* a sentence of your own with *acordar*
- *Recall:* say the Spanish for the negotiation, then the Spanish for to give way, then say *acordar* again

Before you move on

What does acordar mean? ("To agree on".) Say it once more.

634.5 persuadir — to persuade

Before the new one: say the Spanish for to give way, then the Spanish for to agree on.

You'll want to know: persuadir

persuadir — "to persuade".

Me persuadió para firmar.

She persuaded me to sign.

Persuadir a alguien para or *de* + infinitive.

The word, taken apart — and its English cousins

persuadir is a learned borrowing from Latin *persuadere* 'to convince', built from *per* and *suadere* 'to advise' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: persuadir*
- *Say it: persuadir*, once more
- *Say it:* a sentence of your own with *persuadir*
- *Recall:* say the Spanish for to give way, then the Spanish for to agree on, then say *persuadir* again

Before you move on

What does persuadir mean? (“To persuade”.) Say it once more.

Chapter 635

Pactos y dudas

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can make a deal, vouch for someone, question what I doubt and say whether ideas are consistent.
>
> *Complete the last lesson of chapter 635: I can make a deal, vouch for someone, question what I doubt and say whether ideas are consistent.*

635.1 el pacto — the pact, the deal

> Before the new one: say the Spanish for to agree on, then the Spanish for to persuade.

You'll want to know: el pacto

el pacto — "the pact, the deal".

> Hicimos un pacto: yo cocino y tú limpias.
>
> *We made a deal: I cook and you clean.*

Pactar — to agree a deal.

The word, taken apart — and its English cousins

pacto is a learned borrowing from Latin *pactum* 'an agreement' (EtymDB), from *pacisci* 'to make a bargain'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el pacto*
- *Say it:* *el pacto*, once more
- *Say it:* a sentence of your own with *el pacto*
- *Recall:* say the Spanish for to agree on, then the Spanish for to persuade, then say *el pacto* again

Before you move on

What does el pacto mean? ("The pact, the deal".) Say it once more.

635.2 cuestionar — to question, to call into doubt

Before the new one: say the Spanish for to persuade, then the Spanish for the pact.

You'll want to know: cuestionar

cuestionar — "to question, to call into doubt".

Nadie cuestiona su palabra.

Nobody questions his word.

It means to doubt something, not to ask a question: that is *preguntar*.

The word, taken apart — and its English cousins

cuestionar is built on *cuestión*, a learned borrowing from Latin *quaestio* 'inquiry, question', from *quaerere* 'to seek, to ask' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *cuestionar*
- *Say it:* *cuestionar*, once more
- *Say it:* a sentence of your own with *cuestionar*
- *Recall:* say the Spanish for to persuade, then the Spanish for the pact, then say *cuestionar* again

Before you move on

What does cuestionar mean? ("To question, to call into doubt".) Say it once more.

635.3 avalar — to vouch for, to guarantee; to back

Before the new one: say the Spanish for the pact, then the Spanish for to question.

You'll want to know: avalar

avalar — "to vouch for, to guarantee; to back".

Mis padres me avalan para el piso.

My parents are my guarantors for the flat.

El aval — the guarantee; *el avalista* — the guarantor.

The word, taken apart — and its English cousins

avalar is built on *aval* 'guarantee', which was borrowed from French *aval* (EtymDB); where the French word comes from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: avalar*
- *Say it: avalar*, once more
- *Say it:* a sentence of your own with *avalar*
- *Recall:* say the Spanish for the pact, then the Spanish for to question, then say *avalar* again

Before you move on

What does avalar mean? ("To vouch for, to guarantee; to back".) Say it once more.

635.4 la coherencia — the consistency, the coherence

Before the new one: say the Spanish for to question, then the Spanish for to vouch for.

You'll want to know: la coherencia

la coherencia — "the consistency, the coherence".

Sus ideas tienen coherencia.

Her ideas are consistent.

Coherente — consistent.

The word, taken apart — and its English cousins

coherencia is a learned borrowing from Latin *cohaerentia* (EtymDB), built on *cohaerere* 'to stick together', from *haerere* 'to stick'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la coherencia*
- *Say it: la coherencia*, once more
- *Say it:* a sentence of your own with *la coherencia*
- *Recall:* say the Spanish for to question, then the Spanish for to vouch for, then say *la coherencia* again

Before you move on

What does la coherencia mean? ("The consistency, the coherence".) Say it once more.

635.5 dispuesto — willing, ready

Before the new one: say the Spanish for to vouch for, then the Spanish for the consistency.

You'll want to know: dispuesto

dispuesto — "willing, ready".

Estoy dispuesto a ayudar.

I am willing to help.

Estar dispuesto a + infinitive.

The word, taken apart — and its English cousins

dispuesto is the participle of *disponer*, a learned borrowing from Latin *disponere* 'to set in order', built from *dis* and *ponere* 'to put' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *dispuesto*
- *Say it:* *dispuesto*, once more
- *Say it:* a sentence of your own with *dispuesto*
- *Recall:* say the Spanish for to vouch for, then the Spanish for the consistency, then say *dispuesto* again

Before you move on

What does dispuesto mean? (“Willing, ready”.) Say it once more.

Chapter 636

Decir la verdad

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about lies, honesty and what someone deserves.
>
> *Complete the last lesson of chapter 636: I can talk about lies, honesty and what someone deserves.*

636.1 mentir — to lie, to tell lies

> Before the new one: say the Spanish for the consistency, then the Spanish for willing.

You'll want to know: mentir

mentir — "to lie, to tell lies".

> No me mientas.
>
> *Do not lie to me.*

Like *sentir*: *miento, mintió.*

The word, taken apart — and its English cousins

mentir is inherited from Latin *mentiri* 'to lie, to invent', usually linked with *mens* 'mind' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: mentir*
- *Say it: mentir*, once more
- *Say it:* a sentence of your own with *mentir*
- *Recall:* say the Spanish for the consistency, then the Spanish for willing, then say *mentir* again

Before you move on

What does mentir mean? ("To lie, to tell lies".) Say it once more.

636.2 la mentira — the lie

Before the new one: say the Spanish for willing, then the Spanish for to lie.

You'll want to know: la mentira

la mentira — "the lie".

Eso es mentira.

That is a lie.

Parece mentira — it is hard to believe.

The word, taken apart — and its English cousins

mentira is built on *mentir*, inherited from Latin *mentiri* 'to lie' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la mentira*
- *Say it: la mentira*, once more
- *Say it:* a sentence of your own with *la mentira*
- *Recall:* say the Spanish for willing, then the Spanish for to lie, then say *la mentira* again

Before you move on

What does la mentira mean? (“The lie”.) Say it once more.

636.3 engañar — to deceive, to cheat

Before the new one: say the Spanish for to lie, then the Spanish for the lie.

You’ll want to know: engañar

engañar — “to deceive, to cheat”.

El vendedor me engañó.

The seller cheated me.

Engañar a someone. It can also mean to be unfaithful.

The word, taken apart — and its English cousins

engañar is usually traced to spoken Latin *ingannare* ’to mock, to trick’; EtymDB has no parent for it, and the origin is not settled.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *engañar*
- *Say it:* *engañar*, once more
- *Say it:* a sentence of your own with *engañar*
- *Recall:* say the Spanish for to lie, then the Spanish for the lie, then say *engañar* again

Before you move on

What does engañar mean? (“To deceive, to cheat”.) Say it once more.

636.4 honesto — honest

Before the new one: say the Spanish for the lie, then the Spanish for to deceive.

You’ll want to know: honesto

honesto — “honest”.

Es una persona honesta.

She is an honest person.

In Spain *honrado* is also common for honest.

The word, taken apart — and its English cousins

honesto is a learned borrowing from Latin *honestus* ’honourable’, built on *honor* ’honour’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: honesto*
- *Say it: honesto*, once more
- *Say it:* a sentence of your own with *honesto*
- *Recall:* say the Spanish for the lie, then the Spanish for to deceive, then say *honesto* again

Before you move on

What does honesto mean? (“Honest”.) Say it once more.

636.5 merecer — to deserve

Before the new one: say the Spanish for to deceive, then the Spanish for honest.

You’ll want to know: merecer

merecer — “to deserve”.

Mereces unas vacaciones.

You deserve a holiday.

Like *conocer*: *merezco*. *Merecer la pena* — to be worth it.

The word, taken apart — and its English cousins

merecer is inherited from spoken Latin *merescere*, built on *merere* ’to earn, to deserve’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *merecer*
- *Say it:* *merecer*, once more
- *Say it:* a sentence of your own with *merecer*
- *Recall:* say the Spanish for to deceive, then the Spanish for honest, then say *merecer* again

Before you move on

What does merecer mean? (“To deserve”.) Say it once more.

Chapter 637

A favor o en contra

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what favours or harms someone and what suits them.
>
> *Complete the last lesson of chapter 637: I can say what favours or harms someone and what suits them.*

637.1 favorecer — to favour; to suit

> Before the new one: say the Spanish for honest, then the Spanish for to deserve.

You'll want to know: favorecer

favorecer — "to favour; to suit".

> La nueva ley favorece a las familias.
>
> *The new law favours families.*

Like *conocer*: *favorezco*. *Ese color te favorece* — that colour suits you.

The word, taken apart — and its English cousins

favorecer is built on *favor* with the ending *-ecer*; *favor* is a learned borrowing from Latin *favor*, from *favere* 'to be well disposed' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: favorecer*
- *Say it: favorecer*, once more
- *Say it:* a sentence of your own with *favorecer*
- *Recall:* say the Spanish for honest, then the Spanish for to deserve, then say *favorecer* again

Before you move on

What does favorecer mean? ("To favour; to suit".) Say it once more.

637.2 perjudicar — to harm, to damage

Before the new one: say the Spanish for to deserve, then the Spanish for to favour.

You'll want to know: perjudicar

perjudicar — "to harm, to damage".

Fumar perjudica la salud.

Smoking harms your health.

Spelling: *perjudiqué*. *Perjudicial* — harmful.

The word, taken apart — and its English cousins

perjudicar is a learned borrowing from Latin *praeiudicare* 'to judge in advance, to harm a case', built on *iudicare* and *iudex* 'judge' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: perjudicar*
- *Say it: perjudicar*, once more
- *Say it:* a sentence of your own with *perjudicar*
- *Recall:* say the Spanish for to deserve, then the Spanish for to favour, then say *perjudicar* again

Before you move on

What does perjudicar mean? ("To harm, to damage".) Say it once more.

637.3 rentable — profitable, worthwhile

Before the new one: say the Spanish for to favour, then the Spanish for to harm.

You'll want to know: rentable

rentable — "profitable, worthwhile".

El negocio es rentable.

The business is profitable.

Built on *la renta* — income.

The word, taken apart — and its English cousins

rentable is built on *renta* 'income', which is usually traced to spoken Latin *rendita* 'what is given back', from *reddere* 'to give back' (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rentable*
- *Say it: rentable*, once more
- *Say it:* a sentence of your own with *rentable*
- *Recall:* say the Spanish for to favour, then the Spanish for to harm, then say *rentable* again

Before you move on

What does rentable mean? ("Profitable, worthwhile".) Say it once more.

637.4 conveniente — advisable, convenient

Before the new one: say the Spanish for to harm, then the Spanish for profitable.

You'll want to know: conveniente

conveniente — "advisable, convenient".

Es conveniente llegar pronto.

It is advisable to arrive early.

Es conveniente que + subjunctive.

The word, taken apart — and its English cousins

conveniente is a learned borrowing from Latin *conveniens* 'agreeing, fitting', the participle of *convenire* 'to come together', from *venire* 'to come' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: conveniente*
- *Say it: conveniente*, once more
- *Say it:* a sentence of your own with *conveniente*
- *Recall:* say the Spanish for to harm, then the Spanish for profitable, then say *conveniente* again

Before you move on

What does conveniente mean? ("Advisable, convenient".) Say it once more.

637.5 convenir — to suit, to be advisable; to agree

Before the new one: say the Spanish for profitable, then the Spanish for advisable.

You'll want to know: convenir

convenir — "to suit, to be advisable; to agree".

Te conviene descansar.

You would do well to rest.

Like *venir*: *conviene, convino. Me conviene* — it suits me.

The word, taken apart — and its English cousins

convenir is inherited from Latin *convenire* 'to come together, to agree, to suit', built on *venire* 'to come' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *convenir*
- *Say it:* *convenir*, once more
- *Say it:* a sentence of your own with *convenir*
- *Recall:* say the Spanish for profitable, then the Spanish for advisable, then say *convenir* again

Before you move on

What does convenir mean? ("To suit, to be advisable; to agree".) Say it once more.

Chapter 638

Límites

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say how much room there is, what is limited and controlled, with one exception.
>
> *Complete the last lesson of chapter 638: I can say how much room there is, what is limited and controlled, with one exception.*

638.1 el margen — the margin; the room

Before the new one: say the Spanish for advisable, then the Spanish for to suit.

You'll want to know: el margen

el margen — "the margin; the room".

No hay margen para errores.

There is no room for mistakes.

Al margen — on the sidelines.

The word, taken apart — and its English cousins

margen is inherited from Latin *margo, marginis* 'edge, border', through Old Spanish *margen* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el margen*
- *Say it:* *el margen*, once more
- *Say it:* a sentence of your own with *el margen*
- *Recall:* say the Spanish for advisable, then the Spanish for to suit, then say *el margen* again

Before you move on

What does el margen mean? ("The margin; the room".) Say it once more.

638.2 limitar — to limit

Before the new one: say the Spanish for to suit, then the Spanish for the margin.

You'll want to know: limitar

limitar — "to limit".

Tenemos que limitar los gastos.

We have to limit our spending.

Limitarse a — to confine yourself to.

The word, taken apart — and its English cousins

limitar is a learned borrowing from Latin *limitare* 'to bound', built on *limes* 'boundary' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: limitar*
- *Say it: limitar*, once more
- *Say it:* a sentence of your own with *limitar*
- *Recall:* say the Spanish for to suit, then the Spanish for the margin, then say *limitar* again

Before you move on

What does limitar mean? ("To limit".) Say it once more.

638.3 el control — the control; the check

Before the new one: say the Spanish for the margin, then the Spanish for to limit.

You'll want to know: el control

el control — "the control; the check".

Hay un control de seguridad.

There is a security check.

El control de pasaportes — passport control.

The word, taken apart — and its English cousins

control was borrowed from French *contrôle* 'a check', from Old French *contrerole*, a second roll kept to check the first, from Medieval Latin *contrarotulum*, built from *contra* and *rotulus* 'roll' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el control*
- *Say it:* *el control*, once more
- *Say it:* a sentence of your own with *el control*
- *Recall:* say the Spanish for the margin, then the Spanish for to limit, then say *el control* again

Before you move on

What does el control mean? ("The control; the check".) Say it once more.

638.4 controlar — to control; to check

Before the new one: say the Spanish for to limit, then the Spanish for the control.

You'll want to know: controlar

controlar — "to control; to check".

No puedo controlar todo.

I cannot control everything.

Regular -ar verb.

The word, taken apart — and its English cousins

controlar was borrowed from French *contrôler*, built on Old French *contrerole* 'a duplicate register', from Medieval Latin *contrarotulum*, from *contra* and *rotulus* 'roll' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: controlar*
- *Say it: controlar*, once more
- *Say it:* a sentence of your own with *controlar*
- *Recall:* say the Spanish for to limit, then the Spanish for the control, then say *controlar* again

Before you move on

What does controlar mean? (“To control; to check”.) Say it once more.

638.5 excepto — except

Before the new one: say the Spanish for the control, then the Spanish for to control.

You’ll want to know: excepto

excepto — “except”.

Abrimos todos los días excepto el lunes.

We are open every day except Monday.

Means the same as *salvo* and *menos*.

The word, taken apart — and its English cousins

excepto is a learned borrowing from Latin *exceptus* ’taken out’, the participle of *excipere*, from *capere* ’to take’ (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *excepto*
- *Say it:* *excepto*, once more
- *Say it:* a sentence of your own with *excepto*
- *Recall:* say the Spanish for the control, then the Spanish for to control, then say *excepto* again

Before you move on

What does excepto mean? (“Except”.) Say it once more.

Chapter 639

Si todo sale bien

Modes: **voice** (8) **Hands-free start:** all 8 lessons.

> ***By the end of this chapter:*** I can say what someone obtained, who gave up and whether it was a success.
>
> *Complete the last lesson of chapter 639: I can say what someone obtained, who gave up and whether it was a success.*

639.1 obtener — to obtain, to get

> Before the new one: say the Spanish for to control, then the Spanish for except.

You'll want to know: obtener

obtener — "to obtain, to get".

> Obtuvo el mejor resultado.
>
> *She got the best result.*

Like *tener*: *obtengo, obtuve*. More formal than *conseguir*.

The word, taken apart — and its English cousins

obtener is a learned borrowing from Latin *obtinere* 'to hold, to get', built from *ob* and *tenere* 'to hold', rebuilt on *tener* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: obtener*
- *Say it: obtener*, once more
- *Say it:* a sentence of your own with *obtener*
- *Recall:* say the Spanish for to control, then the Spanish for except, then say *obtener* again

Before you move on

What does obtener mean? ("To obtain, to get".) Say it once more.

639.2 abandonar — to abandon, to give up; to leave

Before the new one: say the Spanish for except, then the Spanish for to obtain.

You'll want to know: abandonar

abandonar — "to abandon, to give up; to leave".

Abandonó los estudios a los dieciocho años.

He gave up his studies at eighteen.

Abandonar un proyecto — to drop a project.

The word, taken apart — and its English cousins

abandonar was borrowed from French *abandonner*, from the phrase *à bandon* 'under someone's power', built on a Germanic word for an order, *bannan* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: abandonar*
- *Say it: abandonar*, once more
- *Say it:* a sentence of your own with *abandonar*
- *Recall:* say the Spanish for except, then the Spanish for to obtain, then say *abandonar* again

Before you move on

What does abandonar mean? ("To abandon, to give up; to leave".) Say it once more.

639.3 rendirse — to give up, to surrender

Before the new one: say the Spanish for to obtain, then the Spanish for to abandon.

You'll want to know: rendirse

rendirse — "to give up, to surrender".

No te rindas.

Do not give up.

Like *pedir*: *me rindo, se rindió.*

The word, taken apart — and its English cousins

rendirse is built on *rendir*, inherited from spoken Latin *rendere*, Latin *reddere* 'to give back, to yield' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rendirse*
- *Say it: rendirse*, once more
- *Say it:* a sentence of your own with *rendirse*
- *Recall:* say the Spanish for to obtain, then the Spanish for to abandon, then say *rendirse* again

Before you move on

What does rendirse mean? ("To give up, to surrender".) Say it once more.

639.4 asumir — to take on; to accept

Before the new one: say the Spanish for to abandon, then the Spanish for to give up.

You'll want to know: asumir

asumir — "to take on; to accept".

Asumo la responsabilidad.

I take responsibility.

Asumir un riesgo — to take a risk. It does not usually mean to suppose.

The word, taken apart — and its English cousins

asumir is a learned borrowing from Latin *assumere* 'to take up, to adopt', built from *ad* and *sumere* 'to take' (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: asumir*
- *Say it: asumir*, once more
- *Say it:* a sentence of your own with *asumir*
- *Recall:* say the Spanish for to abandon, then the Spanish for to give up, then say *asumir* again

Before you move on

What does asumir mean? ("To take on; to accept".) Say it once more.

639.5 exitoso — successful

Before the new one: say the Spanish for to give up, then the Spanish for to take on.

You'll want to know: exitoso

exitoso — "successful".

Fue un año muy exitoso.

It was a very successful year.

Built on *el éxito*.

The word, taken apart — and its English cousins

exitoso is built on *éxito* with *-oso* (EtymDB); *éxito* is a learned borrowing from Latin *exitus* 'a going out, an outcome'.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *exitoso*
- *Say it:* *exitoso*, once more
- *Say it:* a sentence of your own with *exitoso*
- *Recall:* say the Spanish for to give up, then the Spanish for to take on, then say *exitoso* again

Before you move on

What does exitoso mean? (“Successful”.) Say it once more.

639.6 Condiciones y planes

Say the Spanish for to pay and the monthly payment.

Your turn

Say these aloud:

- to pay, the monthly payment, to split into instalments, to pay in, the pension
- rich, the poverty, the wealth, the luxury, free of charge
- to negotiate, the negotiation, to give way, to agree on, to persuade
- the pact, to question, to vouch for, the consistency, willing
- to lie, the lie, to deceive, honest, to deserve
- to favour, to harm, profitable, advisable, to suit
- the margin, to limit, the control, to control, except
- to obtain, to abandon, to give up, to take on, successful

Before you move on

To pay? (**abonar**.) The monthly payment? (**la mensualidad**.) To split into instalments? (**fraccionar**.) To pay in? (**ingresar**.) The pension? (**la pensión**.) Rich? (**rico**.) The poverty? (**la miseria**.) The wealth? (**la riqueza**.) The luxury? (**el lujo**.) Free of charge? (**gratuito**.) To negotiate? (**negociar**.) The negotiation? (**la negociación**.) To give way? (**ceder**.) To agree on? (**acordar**.) To persuade? (**persuadir**.) The pact? (**el pacto**.) To question? (**cuestionar**.) To vouch for? (**avalar**.) The consistency? (**la coherencia**.) Willing? (**dispuesto**.) To lie? (**mentir**.) The lie? (**la mentira**.) To deceive? (**engañar**.) Honest? (**honesto**.) To deserve? (**merecer**.) To favour? (**favorecer**.) To harm? (**perjudicar**.) Profitable? (**rentable**.) Advisable? (**conveniente**.) To suit? (**convenir**.) The margin? (**el margen**.) To limit? (**limitar**.) The control? (**el control**.) To control? (**controlar**.) Except? (**excepto**.) To obtain? (**obtener**.) To abandon? (**abandonar**.) To give up? (**rendirse**.) To take on? (**asumir**.) Successful? (**exitoso**.)

639.7 Si todo sale bien — once more

Say the Spanish for to obtain and to abandon.

Your turn

- *Say it:* to obtain, to abandon, to give up, to take on, successful

Before you move on

To obtain? (**obtener**.) To abandon? (**abandonar**.) To give up? (**rendirse**.) To take on? (**asumir**.) Successful? (**exitoso**.)

639.8 Why, and what if — back to the first reasons

Two verbs from much earlier in the book: say the Spanish for "to explain" and for "must, should".

Your turn

Say these aloud:

- *Te lo explico.* — I'll explain it to you.
- a chain of reasons: *Creo que va a llover, así que debo volver a casa.*
- the cause, pointed at with *por*: *No salimos por la lluvia.* — We didn't go out because of the rain.
- a world that is not real: *Si tuviera tiempo, te lo explicaría.* Then the same with *hiciera*: *Si hiciera buen tiempo, saldríamos.*
- an answer that keeps its condition hidden: *¿Vienes mañana?* — *Depende.* Then name it: *Depende del tiempo.*

Before you move on

Which word points back at a cause, *por* or *para*? (**Por**.) Which form says "if I had": *tenía* or *tuviera*? (**Tuviera**.) What does *depende* leave unsaid? (The condition; add *de* to name it.) Say one reason chain of your own with *creo que*, *porque* and *así que*.

Chapter 640

Cómo nos movemos

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about how I get around: summer trips, cars and vans, the traffic and the driver.
>
> *Complete the last lesson of chapter 640: I can talk about how I get around: summer trips, cars and vans, the traffic and the driver.*

640.1 veranear — to spend the summer (on holiday)

> Before the new one: say the Spanish for to seem, then the Spanish for to keep.

You'll want to know: veranear

veranear — "to spend the summer (on holiday)".

> Veraneamos en la costa todos los años.
>
> *We spend every summer on the coast.*

Built on *el verano*. *El veraneo* is the summer holiday.

The word, taken apart — and its English cousins

veranear is built on *verano* "summer", which is inherited from Vulgar Latin *vērānum (tempus)*, built on Latin *vēr* "spring" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: veranear*
- *Say it: veranear*, once more
- *Say it:* a sentence of your own with *veranear*
- *Recall:* say the Spanish for to seem, then the Spanish for to keep, then say *veranear* again

Before you move on

What does veranear mean? ("To spend the summer (on holiday)".) Say it once more.

640.2 el automóvil — the car, the automobile

Before the new one: say the Spanish for to keep, then the Spanish for to spend the summer.

You'll want to know: el automóvil

el automóvil — "the car, the automobile".

Mi abuelo compró su primer automóvil en 1970.

My grandfather bought his first car in 1970.

A formal or old-fashioned word; in speech, *el coche* in Spain, *el carro* or *el auto* in Latin America.

The word, taken apart — and its English cousins

automóvil came from French *automobile*, a word built from Greek *autós* "self" (EtymDB) and Latin *mōbilis* "movable": a carriage that moves by itself.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el automóvil*
- *Say it: el automóvil*, once more
- *Say it:* a sentence of your own with *el automóvil*
- *Recall:* say the Spanish for to keep, then the Spanish for to spend the summer, then say *el automóvil* again

Before you move on

What does el automóvil mean? ("The car, the automobile".) Say it once more.

640.3 la circulación — the traffic (flow); circulation

Before the new one: say the Spanish for to spend the summer, then the Spanish for the car.

You'll want to know: la circulación

la circulación — "the traffic (flow); circulation".

A esta hora hay mucha circulación en el centro.

At this time there is a lot of traffic in the centre.

On the radio: *la circulación es lenta* — traffic is slow. It is also the circulation of the blood.

The word, taken apart — and its English cousins

circulación is built on *circular* "to move round", a learned borrowing from Late Latin *circulāre* (EtymDB), from *circulus* "a small ring", a little *circus*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la circulación*
- *Say it: la circulación*, once more
- *Say it:* a sentence of your own with *la circulación*
- *Recall:* say the Spanish for to spend the summer, then the Spanish for the car, then say *la circulación* again

Before you move on

What does la circulación mean? ("The traffic (flow); circulation".) Say it once more.

640.4 la furgoneta — the van

Before the new one: say the Spanish for the car, then the Spanish for the traffic.

You'll want to know: la furgoneta

la furgoneta — "the van".

Llevamos las bicis en la furgoneta.

We are taking the bikes in the van.

A small van; much of Latin America says *la camioneta*.

The word, taken apart — and its English cousins

furgoneta is a little *furgón* "goods wagon", which came from French *fourgon* (EtymDB). Where the French word comes from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la furgoneta*
- *Say it: la furgoneta*, once more
- *Say it:* a sentence of your own with *la furgoneta*
- *Recall:* say the Spanish for the car, then the Spanish for the traffic, then say *la furgoneta* again

Before you move on

What does la furgoneta mean? ("The van".) Say it once more.

640.5 el conductor — the driver

Before the new one: say the Spanish for the traffic, then the Spanish for the van.

You'll want to know: el conductor

el conductor — "the driver".

El conductor del autobús es muy amable.

The bus driver is very kind.

A woman is *la conductora*. In Spain the verb is *conducir*.

The word, taken apart — and its English cousins

conductor is a learned borrowing from Latin *conductor*, which meant "one who hires, a contractor" (Lewis & Short); it is built on *condūcere* "to bring together", from *dūcere* "to lead" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el conductor*
- *Say it:* *el conductor*, once more
- *Say it:* a sentence of your own with *el conductor*
- *Recall:* say the Spanish for the traffic, then the Spanish for the van, then say *el conductor* again

Before you move on

What does el conductor mean? (“The driver”.) Say it once more.

Chapter 641

En taxi

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can take a taxi: ask about the fare, say how long the trip is and ask the driver to stop.
>
> *Complete the last lesson of chapter 641: I can take a taxi: ask about the fare, say how long the trip is and ask the driver to stop.*

641.1 el taxi — the taxi

> Before the new one: say the Spanish for the van, then the Spanish for the driver.

You'll want to know: el taxi

el taxi — "the taxi".

> Cogemos un taxi a la estación.
>
> *We are taking a taxi to the station.*

Coger un taxi in Spain; in much of Latin America say *tomar un taxi*, because *coger* is vulgar there.

The word, taken apart — and its English cousins

taxi is short for *taxímetro*, which came from French *taximètre*, a meter that measures the charge; it is built on Medieval Latin *taxa* "charge, rate" and Greek *métron* "measure" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el taxi*
- *Say it: el taxi*, once more
- *Say it:* a sentence of your own with *el taxi*
- *Recall:* say the Spanish for the van, then the Spanish for the driver, then say *el taxi* again

Before you move on

What does el taxi mean? ("The taxi".) Say it once more.

641.2 el taxista — the taxi driver

Before the new one: say the Spanish for the driver, then the Spanish for the taxi.

You'll want to know: el taxista

el taxista — "the taxi driver".

El taxista conoce todas las calles.

The taxi driver knows every street.

One form for a man or a woman: *el taxista*, *la taxista*.

The word, taken apart — and its English cousins

taxista is built on *taxi* with *-ista*, the ending for someone who does a job, which comes from Greek *-istḗs* through Latin.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el taxista*
- *Say it: el taxista*, once more
- *Say it:* a sentence of your own with *el taxista*
- *Recall:* say the Spanish for the driver, then the Spanish for the taxi, then say *el taxista* again

Before you move on

What does el taxista mean? ("The taxi driver".) Say it once more.

641.3 la tarifa — the fare, the rate; the price list

Before the new one: say the Spanish for the taxi, then the Spanish for the taxi driver.

You'll want to know: la tarifa

la tarifa — "the fare, the rate; the price list".

La tarifa de noche es más cara.

The night fare is more expensive.

For a phone or for electricity too: *una tarifa plana* is a flat rate.

The word, taken apart — and its English cousins

tarifa comes from Arabic *taʿrīfa* "a notice, a list of rates" (EtymDB), from the verb *ʿarrafa* "to make known".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tarifa*
- *Say it: la tarifa*, once more
- *Say it:* a sentence of your own with *la tarifa*
- *Recall:* say the Spanish for the taxi, then the Spanish for the taxi driver, then say *la tarifa* again

Before you move on

What does la tarifa mean? ("The fare, the rate; the price list".) Say it once more.

641.4 el trayecto — the journey, the stretch (from one place to another)

Before the new one: say the Spanish for the taxi driver, then the Spanish for the fare.

You'll want to know: el trayecto

el trayecto — "the journey, the stretch (from one place to another)".

El trayecto dura veinte minutos.

The journey takes twenty minutes.

One leg of the way; *el viaje* is the whole trip.

The word, taken apart — and its English cousins

trayecto comes from Latin *trāiectus* "a crossing over, a passage" (Lewis & Short), from *trāicere* "to throw across", built from *trans* and *iacere* "to throw".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el trayecto*
- *Say it: el trayecto*, once more
- *Say it:* a sentence of your own with *el trayecto*
- *Recall:* say the Spanish for the taxi driver, then the Spanish for the fare, then say *el trayecto* again

Before you move on

What does el trayecto mean? ("The journey, the stretch (from one place to another)".) Say it once more.

641.5 parar — to stop

Before the new one: say the Spanish for the fare, then the Spanish for the journey.

You'll want to know: parar

parar — "to stop".

¿Puede parar aquí, por favor?

Can you stop here, please?

Pararse is to come to a stop; in Latin America it also means to stand up.

The word, taken apart — and its English cousins

parar is inherited from Latin *parāre* "to make or get ready, to prepare" (Lewis & Short; EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *parar*
- *Say it:* *parar*, once more
- *Say it:* a sentence of your own with *parar*
- *Recall:* say the Spanish for the fare, then the Spanish for the journey, then say *parar* again

Before you move on

What does parar mean? (“To stop”.) Say it once more.

Chapter 642

En ruta

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can follow a road trip: the ring road, the hard shoulder, potholes, tolls and each stretch of the way.
>
> *Complete the last lesson of chapter 642: I can follow a road trip: the ring road, the hard shoulder, potholes, tolls and each stretch of the way.*

642.1 la circunvalación — the ring road, the bypass

Before the new one: say the Spanish for the journey, then the Spanish for to stop.

You'll want to know: la circunvalación

la circunvalación — "the ring road, the bypass".

Por la circunvalación no pasas por el centro.

On the ring road you do not go through the centre.

In some Spanish cities it is called *la ronda*.

The word, taken apart — and its English cousins

circunvalación is a learned borrowing built on Latin *circumvallāre* "to surround with a wall" (Lewis & Short), from *circum* "around" and *vallum* "rampart".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la circunvalación*
- *Say it: la circunvalación*, once more
- *Say it:* a sentence of your own with *la circunvalación*
- *Recall:* say the Spanish for the journey, then the Spanish for to stop, then say *la circunvalación* again

Before you move on

What does la circunvalación mean? ("The ring road, the bypass".) Say it once more.

642.2 el arcén — the hard shoulder (of a road)

Before the new one: say the Spanish for to stop, then the Spanish for the ring road.

You'll want to know: el arcén

el arcén — "the hard shoulder (of a road)".

Paramos en el arcén con las luces encendidas.

We stopped on the hard shoulder with the lights on.

A Spain word; Mexico says *el acotamiento* and Argentina *la banquina*.

The word, taken apart — and its English cousins

The origin of *arcén* is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el arcén*
- *Say it: el arcén*, once more
- *Say it:* a sentence of your own with *el arcén*
- *Recall:* say the Spanish for to stop, then the Spanish for the ring road, then say *el arcén* again

Before you move on

What does el arcén mean? ("The hard shoulder (of a road)".) Say it once more.

642.3 el peaje — the toll

Before the new one: say the Spanish for the ring road, then the Spanish for the hard shoulder.

You'll want to know: el peaje

el peaje — "the toll".

En esta autopista hay que pagar peaje.

You have to pay a toll on this motorway.

Una autopista de peaje — a toll motorway.

The word, taken apart — and its English cousins

peaje is usually traced to Old French *péage*, from Medieval Latin *pedāticum* "a toll for passing through", built on Latin *pēs, pedis* "a

foot" (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el peaje*
- *Say it: el peaje*, once more
- *Say it:* a sentence of your own with *el peaje*
- *Recall:* say the Spanish for the ring road, then the Spanish for the hard shoulder, then say *el peaje* again

Before you move on

What does el peaje mean? ("The toll".) Say it once more.

642.4 el bache — the pothole; the bad patch

Before the new one: say the Spanish for the hard shoulder, then the Spanish for the toll.

You'll want to know: el bache

el bache — "the pothole; the bad patch".

Cuidado con los baches.

Watch out for the potholes.

Pasar un bache — to go through a rough patch.

The word, taken apart — and its English cousins

The origin of *bache* is not settled; it may imitate the thud of a wheel dropping into a hole.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el bache*
- *Say it: el bache*, once more
- *Say it:* a sentence of your own with *el bache*
- *Recall:* say the Spanish for the hard shoulder, then the Spanish for the toll, then say *el bache* again

Before you move on

What does el bache mean? ("The pothole; the bad patch".) Say it once more.

642.5 el tramo — the stretch, the section (of a road or route)

Before the new one: say the Spanish for the toll, then the Spanish for the pothole.

You'll want to know: el tramo

el tramo — "the stretch, the section (of a road or route)".

Este tramo está en obras.

This stretch has roadworks.

Un tramo de escalera — a flight of stairs.

The word, taken apart — and its English cousins

tramo is traced in EtymDB to Latin *trāmes* "a cross-way, a by-path" (Lewis & Short). Some sources link it to *trama* "weft" instead, so the origin is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el tramo*
- *Say it:* *el tramo*, once more
- *Say it:* a sentence of your own with *el tramo*
- *Recall:* say the Spanish for the toll, then the Spanish for the pothole, then say *el tramo* again

Before you move on

What does el tramo mean? ("The stretch, the section (of a road or route)".) Say it once more.

Chapter 643

Al volante

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what a car does: start, skid, get stuck, speed up and move with the traffic.
>
> *Complete the last lesson of chapter 643: I can say what a car does: start, skid, get stuck, speed up and move with the traffic.*

643.1 derrapar — to skid

> Before the new one: say the Spanish for the pothole, then the Spanish for the stretch.

You'll want to know: derrapar

derrapar — "to skid".

> Con la lluvia, el coche derrapó.
>
> *The car skidded in the rain.*

Un derrape is a skid.

The word, taken apart — and its English cousins

derrapar was borrowed from French *déraper* (EtymDB), first said of an anchor that comes loose from the sea bed.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: derrapar*
- *Say it: derrapar*, once more
- *Say it:* a sentence of your own with *derrapar*
- *Recall:* say the Spanish for the pothole, then the Spanish for the stretch, then say *derrapar* again

Before you move on

What does derrapar mean? ("To skid".) Say it once more.

643.2 arrancar — to start (an engine); to pull out, to tear out

Before the new one: say the Spanish for the stretch, then the Spanish for to skid.

You'll want to know: arrancar

arrancar — "to start (an engine); to pull out, to tear out".

El coche no arranca.

The car will not start.

The older sense is pulling out by force: *arrancar una hoja* — to tear out a page.

The word, taken apart — and its English cousins

The origin of *arrancar* is not settled. One proposal links it to Latin *ērunc̄are* "to pull up weeds", but the path is disputed.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: arrancar*
- *Say it: arrancar*, once more
- *Say it:* a sentence of your own with *arrancar*
- *Recall:* say the Spanish for the stretch, then the Spanish for to skid, then say *arrancar* again

Before you move on

What does arrancar mean? ("To start (an engine); to pull out, to tear out".) Say it once more.

643.3 atascarse — to get stuck; to get jammed

Before the new one: say the Spanish for to skid, then the Spanish for to start.

You'll want to know: atascarse

atascarse — "to get stuck; to get jammed".

El coche se atascó en la arena.

The car got stuck in the sand.

Un atasco is a traffic jam: the same family.

The word, taken apart — and its English cousins

The origin of *atascarse* is not settled; it is the verb behind *atasco* "traffic jam".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: atascarse*
- *Say it: atascarse*, once more
- *Say it:* a sentence of your own with *atascarse*
- *Recall:* say the Spanish for to skid, then the Spanish for to start, then say *atascarse* again

Before you move on

What does atascarse mean? ("To get stuck; to get jammed".) Say it once more.

643.4 acelerar — to speed up, to accelerate

Before the new one: say the Spanish for to start, then the Spanish for to get stuck.

You'll want to know: acelerar

acelerar — "to speed up, to accelerate".

No aceleres en la ciudad.

Do not speed up in town.

The pedal is *el acelerador*.

The word, taken apart — and its English cousins

acelerar is a learned borrowing from Latin *accelerāre* "to hasten" (Lewis & Short; EtymDB), built from *ad* and *celer* "swift".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: acelerar*
- *Say it: acelerar*, once more
- *Say it:* a sentence of your own with *acelerar*
- *Recall:* say the Spanish for to start, then the Spanish for to get stuck, then say *acelerar* again

Before you move on

What does acelerar mean? ("To speed up, to accelerate".) Say it once more.

643.5 circular — to circulate, to drive (of traffic)

Before the new one: say the Spanish for to get stuck, then the Spanish for to speed up.

You'll want to know: circular

circular — "to circulate, to drive (of traffic)".

En España se circula por la derecha.

In Spain you drive on the right.

A word for signs and rules: *circule despacio* — drive slowly. As an adjective it means round.

The word, taken apart — and its English cousins

circular is a learned borrowing from Late Latin *circulāre* "to make round" (EtymDB; Lewis & Short), built on *circulus* "a small ring", from *circus* "a ring".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *circular*
- *Say it:* *circular*, once more
- *Say it:* a sentence of your own with *circular*
- *Recall:* say the Spanish for to get stuck, then the Spanish for to speed up, then say *circular* again

Before you move on

What does circular mean? ("To circulate, to drive (of traffic)".) Say it once more.

Chapter 644

Dentro del coche

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the parts of a car I use on a trip: the engine, the steering wheel, the boot and the seat belt.
>
> *Complete the last lesson of chapter 644: I can name the parts of a car I use on a trip: the engine, the steering wheel, the boot and the seat belt.*

644.1 el motor — the engine, the motor

> Before the new one: say the Spanish for to speed up, then the Spanish for to circulate.

You'll want to know: el motor

el motor — "the engine, the motor".

> El motor hace un ruido raro.
>
> *The engine is making a strange noise.*

Arrancar el motor — to start the engine.

The word, taken apart — and its English cousins

motor is a learned borrowing from Latin *mōtor* "a mover, one that sets a thing moving" (Lewis & Short; EtymDB), from *movēre* "to move".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el motor*
- *Say it: el motor*, once more
- *Say it:* a sentence of your own with *el motor*
- *Recall:* say the Spanish for to speed up, then the Spanish for to circulate, then say *el motor* again

Before you move on

What does el motor mean? ("The engine, the motor".) Say it once more.

644.2 el volante — the steering wheel

Before the new one: say the Spanish for to circulate, then the Spanish for the engine.

You'll want to know: el volante

el volante — "the steering wheel".

Pon las dos manos en el volante.

Put both hands on the wheel.

Estar al volante — to be at the wheel, to be driving.

The word, taken apart — and its English cousins

volante is built on *volar* "to fly", inherited from Latin *volāre*; as an adjective it means "flying" (EtymDB), and it came to name parts that turn or move freely.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el volante*
- *Say it: el volante*, once more
- *Say it:* a sentence of your own with *el volante*
- *Recall:* say the Spanish for to circulate, then the Spanish for the engine, then say *el volante* again

Before you move on

What does el volante mean? ("The steering wheel".) Say it once more.

644.3 el maletero — the boot (of a car), the trunk

Before the new one: say the Spanish for the engine, then the Spanish for the steering wheel.

You'll want to know: el maletero

el maletero — "the boot (of a car), the trunk".

Las maletas van en el maletero.

The suitcases go in the boot.

Spain says *el maletero*; Mexico *la cajuela*; much of South America *el baúl*.

The word, taken apart — and its English cousins

maletero is built on *maleta* "suitcase". *Maleta* is usually traced to French *mallette*, a little *malle* "trunk", which goes back to a Frankish word for a bag.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el maletero*
- *Say it: el maletero*, once more
- *Say it:* a sentence of your own with *el maletero*
- *Recall:* say the Spanish for the engine, then the Spanish for the steering wheel, then say *el maletero* again

Before you move on

What does el maletero mean? ("The boot (of a car), the trunk".) Say it once more.

644.4 el cinturón — the belt; the seat belt

Before the new one: say the Spanish for the steering wheel, then the Spanish for the boot.

You'll want to know: el cinturón

el cinturón — "the belt; the seat belt".

Ponte el cinturón, por favor.

Put your seat belt on, please.

El cinturón de seguridad — the seat belt.

The word, taken apart — and its English cousins

cinturón is built on *cintura* "waist", which is inherited from Latin *cinctūra* "a girdle", from *cingere* "to put a belt round".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el cinturón*
- *Say it: el cinturón*, once more
- *Say it:* a sentence of your own with *el cinturón*
- *Recall:* say the Spanish for the steering wheel, then the Spanish for the boot, then say *el cinturón* again

Before you move on

What does el cinturón mean? ("The belt; the seat belt".) Say it once more.

644.5 abrocharse — to fasten (a belt, a button)

Before the new one: say the Spanish for the boot, then the Spanish for the belt.

You'll want to know: abrocharse

abrocharse — "to fasten (a belt, a button)".

Abróchense el cinturón, por favor.

Please fasten your seat belts.

Without *se*, *abrochar* is to fasten something: *abrochar el abrigo.*

The word, taken apart — and its English cousins

abrocharse is built on *broche* "clasp, brooch", which was borrowed from French *broche* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *abrocharse*
- *Say it:* *abrocharse*, once more
- *Say it:* a sentence of your own with *abrocharse*
- *Recall:* say the Spanish for the boot, then the Spanish for the belt, then say *abrocharse* again

Before you move on

What does abrocharse mean? ("To fasten (a belt, a button)".) Say it once more.

Chapter 645

Una avería

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can explain that the car has broken down or has a flat tyre and ask for a mechanic.
>
> *Complete the last lesson of chapter 645: I can explain that the car has broken down or has a flat tyre and ask for a mechanic.*

645.1 el pinchazo — the puncture, the flat tyre

> Before the new one: say the Spanish for the belt, then the Spanish for to fasten.

You'll want to know: el pinchazo

el pinchazo — "the puncture, the flat tyre".

> Tuvimos un pinchazo cerca del pueblo.
>
> *We had a puncture near the village.*

In Mexico people say *la ponchadura*.

The word, taken apart — and its English cousins

pinchazo is built on *pinchar* "to prick". The origin of *pinchar* is not settled; it is often linked to Latin *punctum* "a prick".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el pinchazo*
- *Say it: el pinchazo*, once more
- *Say it:* a sentence of your own with *el pinchazo*
- *Recall:* say the Spanish for the belt, then the Spanish for to fasten, then say *el pinchazo* again

Before you move on

What does el pinchazo mean? ("The puncture, the flat tyre".) Say it once more.

645.2 averiarse — to break down

Before the new one: say the Spanish for to fasten, then the Spanish for the puncture.

You'll want to know: averiarse

averiarse — "to break down".

El autobús se averió en la autopista.

The bus broke down on the motorway.

Machines *se averían*; a person *se pone enfermo*.

The word, taken apart — and its English cousins

averiarse is built on *avería* "breakdown", a word that came through Catalan or Italian and is usually traced to Arabic *ʿawār* "a defect".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: averiarse*
- *Say it: averiarse*, once more
- *Say it:* a sentence of your own with *averiarse*
- *Recall:* say the Spanish for to fasten, then the Spanish for the puncture, then say *averiarse* again

Before you move on

What does averiarse mean? ("To break down".) Say it once more.

645.3 el mecánico — the mechanic

Before the new one: say the Spanish for the puncture, then the Spanish for to break down.

You'll want to know: el mecánico

el mecánico — "the mechanic".

El mecánico viene en media hora.

The mechanic is coming in half an hour.

As an adjective it means mechanical. A woman is *la mecánica*.

The word, taken apart — and its English cousins

mecánico is a learned borrowing from Latin *mēchanicus* "mechanical" (Lewis & Short), which comes from Greek *mēkhanikós*, built on *mēkhanḗ* "machine" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el mecánico*
- *Say it: el mecánico*, once more
- *Say it:* a sentence of your own with *el mecánico*
- *Recall:* say the Spanish for the puncture, then the Spanish for to break down, then say *el mecánico* again

Before you move on

What does el mecánico mean? ("The mechanic".) Say it once more.

645.4 el neumático — the tyre

Before the new one: say the Spanish for to break down, then the Spanish for the mechanic.

You'll want to know: el neumático

el neumático — "the tyre".

Hay que cambiar el neumático.

The tyre has to be changed.

Spain says *el neumático* or *la rueda*; much of Latin America says *la llanta*.

The word, taken apart — and its English cousins

neumático is a learned borrowing from Latin *pneumaticus* "of air or wind" (Lewis & Short), from Greek *pneumatikós*, built on *pneûma* "air, breath" (EtymDB). A tyre is full of air.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el neumático*
- *Say it: el neumático*, once more
- *Say it:* a sentence of your own with *el neumático*
- *Recall:* say the Spanish for to break down, then the Spanish for the mechanic, then say *el neumático* again

Before you move on

What does el neumático mean? ("The tyre".) Say it once more.

645.5 pinchar — to get a puncture; to prick; to click

Before the new one: say the Spanish for the mechanic, then the Spanish for the tyre.

You'll want to know: pinchar

pinchar — "to get a puncture; to prick; to click".

Pinchamos una rueda en el camino.

We got a puncture on the way.

In Spain *pinchar* is also to click on a screen. Mexico says *ponchar* for a puncture.

The word, taken apart — and its English cousins

The origin of *pinchar* is not settled. It is often linked to Latin *punctum* "a prick, a point", but the path is unclear.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: pinchar*
- *Say it: pinchar*, once more
- *Say it:* a sentence of your own with *pinchar*
- *Recall:* say the Spanish for the mechanic, then the Spanish for the tyre, then say *pinchar* again

Before you move on

What does pinchar mean? ("To get a puncture; to prick; to click".) Say it once more.

Chapter 646

Llenar el depósito

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can fill up at a petrol pump and talk about the tank, fuel and kilometres.
>
> *Complete the last lesson of chapter 646: I can fill up at a petrol pump and talk about the tank, fuel and kilometres.*

646.1 el surtidor — the petrol pump; the jet (of a fountain)

> Before the new one: say the Spanish for the tyre, then the Spanish for to get a puncture.

You'll want to know: el surtidor

el surtidor — "the petrol pump; the jet (of a fountain)".

> Pare junto al surtidor número tres.
>
> *Stop next to pump number three.*

At a petrol station each pump is *un surtidor*.

The word, taken apart — and its English cousins

surtidor is built on *surtir* "to supply; to spout". The origin of *surtir* is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el surtidor*
- *Say it: el surtidor*, once more
- *Say it:* a sentence of your own with *el surtidor*
- *Recall:* say the Spanish for the tyre, then the Spanish for to get a puncture, then say *el surtidor* again

Before you move on

What does el surtidor mean? ("The petrol pump; the jet (of a fountain)".) Say it once more.

646.2 repostar — to refuel, to fill up

Before the new one: say the Spanish for to get a puncture, then the Spanish for the petrol pump.

You'll want to know: repostar

repostar — "to refuel, to fill up".

Tenemos que repostar antes de salir.

We have to fill up before we leave.

A Spain word; in Latin America people say *cargar gasolina* or *echar gasolina*.

The word, taken apart — and its English cousins

repostar is usually traced to *reposte* "store-room, larder", from Latin *repositum* "something put away", built on *pōnere* "to put"; it first meant taking on fresh supplies.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: repostar*
- *Say it: repostar*, once more
- *Say it:* a sentence of your own with *repostar*
- *Recall:* say the Spanish for to get a puncture, then the Spanish for the petrol pump, then say *repostar* again

Before you move on

What does repostar mean? ("To refuel, to fill up".) Say it once more.

646.3 el depósito — the tank; the deposit

Before the new one: say the Spanish for the petrol pump, then the Spanish for to refuel.

You'll want to know: el depósito

el depósito — "the tank; the deposit".

Llene el depósito, por favor.

Fill the tank, please.

At a bank *el depósito* is a deposit.

The word, taken apart — and its English cousins

depósito is a learned borrowing from Latin *dēpositum* "something laid down, entrusted", from *dēpōnere* "to put down" (Lewis & Short), built on *pōnere* "to put".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el depósito*
- *Say it: el depósito*, once more
- *Say it:* a sentence of your own with *el depósito*
- *Recall:* say the Spanish for the petrol pump, then the Spanish for to refuel, then say *el depósito* again

Before you move on

What does el depósito mean? ("The tank; the deposit".) Say it once more.

646.4 el combustible — the fuel

Before the new one: say the Spanish for to refuel, then the Spanish for the tank.

You'll want to know: el combustible

el combustible — "the fuel".

El combustible está muy caro.

Fuel is very expensive.

As an adjective it means something that can burn.

The word, taken apart — and its English cousins

combustible is a learned borrowing built on Latin *combūrere* "to burn up, to consume" (Lewis & Short), through its past form *combustus*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el combustible*
- *Say it: el combustible*, once more
- *Say it:* a sentence of your own with *el combustible*
- *Recall:* say the Spanish for to refuel, then the Spanish for the tank, then say *el combustible* again

Before you move on

What does el combustible mean? ("The fuel".) Say it once more.

646.5 el kilómetro — the kilometre

Before the new one: say the Spanish for the tank, then the Spanish for the fuel.

You'll want to know: el kilómetro

el kilómetro — "the kilometre".

Faltan diez kilómetros.

There are ten kilometres to go.

Often written *km*. *El kilómetro cero* is the point distances are measured from.

The word, taken apart — and its English cousins

kilómetro was borrowed from French *kilomètre*, a word made from Greek *khílioi* "a thousand" and *métron* "measure".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el kilómetro*
- *Say it: el kilómetro*, once more
- *Say it:* a sentence of your own with *el kilómetro*
- *Recall:* say the Spanish for the tank, then the Spanish for the fuel, then say *el kilómetro* again

Before you move on

What does el kilómetro mean? ("The kilometre".) Say it once more.

Chapter 647

Cruzar la calle

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can get across town safely: traffic lights, turnings, the roadway, pedestrians and roundabouts.
>
> *Complete the last lesson of chapter 647: I can get across town safely: traffic lights, turnings, the roadway, pedestrians and roundabouts.*

647.1 el semáforo — the traffic lights

> Before the new one: say the Spanish for the fuel, then the Spanish for the kilometre.

You'll want to know: el semáforo

el semáforo — "the traffic lights".

> Espera, el semáforo está en rojo.
>
> *Wait, the lights are red.*

One word for the whole set of lights: *el semáforo*.

The word, taken apart — and its English cousins

semáforo was borrowed from French *sémaphore* (EtymDB), a word made from Greek *sêma* "sign" and *-phóros* "carrying": a thing that carries signals.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el semáforo*
- *Say it: el semáforo*, once more
- *Say it:* a sentence of your own with *el semáforo*
- *Recall:* say the Spanish for the fuel, then the Spanish for the kilometre, then say *el semáforo* again

Before you move on

What does el semáforo mean? ("The traffic lights".) Say it once more.

647.2 la bocacalle — the turning, the side-street opening

Before the new one: say the Spanish for the kilometre, then the Spanish for the traffic lights.

You'll want to know: la bocacalle

la bocacalle — "the turning, the side-street opening".

Gire en la segunda bocacalle a la derecha.

Take the second turning on the right.

Built from *boca* and *calle*: the mouth of a street.

The word, taken apart — and its English cousins

bocacalle is built from *boca* "mouth", inherited from Latin *bucca* "cheek", and *calle* "street", from Latin *callis* "footpath".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la bocacalle*
- *Say it: la bocacalle*, once more
- *Say it:* a sentence of your own with *la bocacalle*
- *Recall:* say the Spanish for the kilometre, then the Spanish for the traffic lights, then say *la bocacalle* again

Before you move on

What does la bocacalle mean? ("The turning, the side-street opening".) Say it once more.

647.3 la calzada — the roadway, the carriageway

Before the new one: say the Spanish for the traffic lights, then the Spanish for the turning.

You'll want to know: la calzada

la calzada — "the roadway, the carriageway".

No juegues en la calzada.

Do not play in the road.

The part of the street for cars; people walk beside it.

The word, taken apart — and its English cousins

calzada is usually traced to Vulgar Latin *(via) calciāta* "a paved road", built on Latin *calx, calcis* "limestone" (Lewis & Short); the details are not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la calzada*
- *Say it: la calzada*, once more
- *Say it:* a sentence of your own with *la calzada*
- *Recall:* say the Spanish for the traffic lights, then the Spanish for the turning, then say *la calzada* again

Before you move on

What does la calzada mean? ("The roadway, the carriageway".) Say it once more.

647.4 el peatón — the pedestrian

Before the new one: say the Spanish for the turning, then the Spanish for the roadway.

You'll want to know: el peatón

el peatón — "the pedestrian".

Los peatones tienen prioridad.

Pedestrians have priority.

El paso de peatones — the pedestrian crossing.

The word, taken apart — and its English cousins

peatón was borrowed from French *piéton* (EtymDB), built on *pied* "foot", which comes from Latin *pēs, pedis*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el peatón*
- *Say it: el peatón*, once more
- *Say it:* a sentence of your own with *el peatón*
- *Recall:* say the Spanish for the turning, then the Spanish for the roadway, then say *el peatón* again

Before you move on

What does el peatón mean? ("The pedestrian".) Say it once more.

647.5 la rotonda — the roundabout

Before the new one: say the Spanish for the roadway, then the Spanish for the pedestrian.

You'll want to know: la rotonda

la rotonda — "the roundabout".

En la rotonda, toma la segunda salida.

At the roundabout, take the second exit.

In Spain also *la glorieta*.

The word, taken apart — and its English cousins

rotonda was borrowed from Italian *rotonda* "a round building", from Latin *rotundus* "round" (Lewis & Short), which is built on *rota* "wheel".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la rotonda*
- *Say it: la rotonda*, once more
- *Say it:* a sentence of your own with *la rotonda*
- *Recall:* say the Spanish for the roadway, then the Spanish for the pedestrian, then say *la rotonda* again

Before you move on

What does la rotonda mean? (“The roundabout”.) Say it once more.

647.6 Viajes y ciudades

Say the Spanish for to spend the summer and the car.

Your turn

Say these aloud:

- to spend the summer, the car, the traffic, the van, the driver
- the taxi, the taxi driver, the fare, the journey, to stop
- the ring road, the hard shoulder, the toll, the pothole, the stretch
- to skid, to start, to get stuck, to speed up, to circulate
- the engine, the steering wheel, the boot, the belt, to fasten
- the puncture, to break down, the mechanic, the tyre, to get a puncture
- the petrol pump, to refuel, the tank, the fuel, the kilometre
- the traffic lights, the turning, the roadway, the pedestrian, the roundabout

Before you move on

To spend the summer? (**veranear**.) The car? (**el automóvil**.) The traffic? (**la circulación**.) The van? (**la furgoneta**.) The driver? (**el conductor**.) The taxi? (**el taxi**.) The taxi driver? (**el taxista**.) The fare? (**la tarifa**.) The journey? (**el trayecto**.) To stop? (**parar**.) The ring road? (**la circunvalación**.) The hard shoulder? (**el arcén**.) The toll? (**el peaje**.) The pothole? (**el bache**.) The stretch? (**el tramo**.) To skid? (**derrapar**.) To start? (**arrancar**.) To get stuck? (**atascarse**.) To speed up? (**acelerar**.) To circulate? (**circular**.) The engine? (**el motor**.) The steering wheel? (**el volante**.) The boot? (**el maletero**.) The belt? (**el cinturón**.) To fasten? (**abrocharse**.) The puncture? (**el pinchazo**.) To break down? (**averiarse**.) The mechanic? (**el mecánico**.) The tyre? (**el neumático**.) To get a puncture? (**pinchar**.) The petrol pump? (**el surtidor**.) To refuel? (**repostar**.) The tank? (**el depósito**.) The fuel? (**el combustible**.) The kilometre? (**el kilómetro**.) The traffic lights? (**el semáforo**.) The turning? (**la bocacalle**.) The roadway? (**la calzada**.) The pedestrian? (**el peatón**.) The roundabout? (**la rotonda**.)

Chapter 648

Dónde dejar el coche

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can find a parking space, pay at the meter, keep to my lane and talk about trailers and towing.
>
> *Complete the last lesson of chapter 648: I can find a parking space, pay at the meter, keep to my lane and talk about trailers and towing.*

648.1 el parquímetro — the parking meter

> Before the new one: say the Spanish for the pedestrian, then the Spanish for the roundabout.

You'll want to know: el parquímetro

el parquímetro — "the parking meter".

> Pon dinero en el parquímetro.
>
> *Put money in the parking meter.*

You pay at the machine and leave the ticket in the car.

The word, taken apart — and its English cousins

parquímetro is built on *parking*, borrowed from English (EtymDB), with *-metro*, from Greek *métron* "measure".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el parquímetro*
- *Say it: el parquímetro*, once more
- *Say it:* a sentence of your own with *el parquímetro*
- *Recall:* say the Spanish for the pedestrian, then the Spanish for the roundabout, then say *el parquímetro* again

Before you move on

What does el parquímetro mean? ("The parking meter".) Say it once more.

648.2 el estacionamiento — the car park, the parking lot; parking

Before the new one: say the Spanish for the roundabout, then the Spanish for the parking meter.

You'll want to know: el estacionamiento

el estacionamiento — "the car park, the parking lot; parking".

El estacionamiento del hotel es gratis.

The hotel car park is free.

Spain says *el aparcamiento* or *el parking*.

The word, taken apart — and its English cousins

estacionamiento is built on *estacionar* "to park", which comes from *estación*, Latin *statiō* "a standing still" (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el estacionamiento*
- *Say it: el estacionamiento*, once more
- *Say it:* a sentence of your own with *el estacionamiento*
- *Recall:* say the Spanish for the roundabout, then the Spanish for the parking meter, then say *el estacionamiento* again

Before you move on

What does el estacionamiento mean? ("The car park, the parking lot; parking".) Say it once more.

648.3 el remolque — the trailer; towing

Before the new one: say the Spanish for the parking meter, then the Spanish for the car park.

You'll want to know: el remolque

el remolque — "the trailer; towing".

Llevamos el barco en un remolque.

We are taking the boat on a trailer.

For a boat, a horse or a small caravan.

The word, taken apart — and its English cousins

remolque is built on *remolcar* "to tow", from a Vulgar Latin verb (EtymDB) built on Latin *remulcum* "a tow-rope" (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el remolque*
- *Say it:* *el remolque*, once more
- *Say it:* a sentence of your own with *el remolque*
- *Recall:* say the Spanish for the parking meter, then the Spanish for the car park, then say *el remolque* again

Before you move on

What does el remolque mean? (“The trailer; towing”.) Say it once more.

648.4 el carril — the lane; the rail

Before the new one: say the Spanish for the car park, then the Spanish for the trailer.

You’ll want to know: el carril

el carril — “the lane; the rail”.

El carril de la derecha es para autobuses.

The right-hand lane is for buses.

El carril bici — the cycle lane.

The word, taken apart — and its English cousins

carril is usually traced to *carro* “cart”, from Latin *carrus*; it first named the rut that a cart wheel leaves on a road.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el carril*
- *Say it: el carril*, once more
- *Say it:* a sentence of your own with *el carril*
- *Recall:* say the Spanish for the car park, then the Spanish for the trailer, then say *el carril* again

Before you move on

What does el carril mean? ("The lane; the rail".) Say it once more.

648.5 remolcar — to tow

Before the new one: say the Spanish for the trailer, then the Spanish for the lane.

You'll want to know: remolcar

remolcar — "to tow".

La grúa remolca el coche hasta el taller.

The tow truck tows the car to the garage.

The c becomes qu before e: *remolqué*. *El remolque* is a trailer.

The word, taken apart — and its English cousins

remolcar comes from a Vulgar Latin verb (EtymDB) built on Latin *remulcum* "a tow-rope" (Lewis & Short), a word of seafaring that the Romans took from Greek.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *remolcar*
- *Say it:* *remolcar*, once more
- *Say it:* a sentence of your own with *remolcar*
- *Recall:* say the Spanish for the trailer, then the Spanish for the lane, then say *remolcar* again

Before you move on

What does remolcar mean? (“To tow”.) Say it once more.

Chapter 649

Sobre dos ruedas

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about getting around on two wheels: motorbikes and their riders, scooters and bicycles.
>
> *Complete the last lesson of chapter 649: I can talk about getting around on two wheels: motorbikes and their riders, scooters and bicycles.*

649.1 la moto — the motorbike

> Before the new one: say the Spanish for the lane, then the Spanish for to tow.

You'll want to know: la moto

la moto — "the motorbike".

> Voy al trabajo en moto.
>
> *I go to work by motorbike.*

Short for *la motocicleta*, so it is feminine.

The word, taken apart — and its English cousins

moto is short for *motocicleta*, which comes from French *motocyclette* (EtymDB), built on words for an engine and a cycle.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la moto*
- *Say it: la moto*, once more
- *Say it:* a sentence of your own with *la moto*
- *Recall:* say the Spanish for the lane, then the Spanish for to tow, then say *la moto* again

Before you move on

What does la moto mean? ("The motorbike".) Say it once more.

649.2 el motorista — the motorcyclist

Before the new one: say the Spanish for to tow, then the Spanish for the motorbike.

You'll want to know: el motorista

el motorista — "the motorcyclist".

Los motoristas llevan chaqueta y guantes.

Motorcyclists wear jackets and gloves.

One form for both: *el motorista*, *la motorista*.

The word, taken apart — and its English cousins

motorista is built on *motor*, a learned borrowing from Latin *mōtor* "a mover" (Lewis & Short), with *-ista*, the ending for a person, from Greek *-istḗs*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el motorista*
- *Say it: el motorista*, once more
- *Say it:* a sentence of your own with *el motorista*
- *Recall:* say the Spanish for to tow, then the Spanish for the motorbike, then say *el motorista* again

Before you move on

What does el motorista mean? ("The motorcyclist".) Say it once more.

649.3 el patinete — the scooter (kick or electric)

Before the new one: say the Spanish for the motorbike, then the Spanish for the motorcyclist.

You'll want to know: el patinete

el patinete — "the scooter (kick or electric)".

Muchos jóvenes usan patinete eléctrico.

A lot of young people use electric scooters.

In Latin America people often say *el scooter* or *el monopatín*.

The word, taken apart — and its English cousins

patinete is built on *patín* "skate", which was borrowed from French *patin*, built on *patte* "paw, foot" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el patinete*
- *Say it:* *el patinete*, once more
- *Say it:* a sentence of your own with *el patinete*
- *Recall:* say the Spanish for the motorbike, then the Spanish for the motorcyclist, then say *el patinete* again

Before you move on

What does el patinete mean? ("The scooter (kick or electric)".) Say it once more.

649.4 pedalear — to pedal

Before the new one: say the Spanish for the motorcyclist, then the Spanish for the scooter.

You'll want to know: pedalear

pedalear — "to pedal".

Pedaleo una hora cada mañana.

I pedal for an hour every morning.

Built on *el pedal*.

The word, taken apart — and its English cousins

pedalear is built on *pedal*, a learned borrowing from Latin *pedālis* "of the foot" (EtymDB), from *pēs, pedis* "foot".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: pedalear*
- *Say it: pedalear*, once more
- *Say it:* a sentence of your own with *pedalear*
- *Recall:* say the Spanish for the motorcyclist, then the Spanish for the scooter, then say *pedalear* again

Before you move on

What does pedalear mean? ("To pedal".) Say it once more.

649.5 el ciclista — the cyclist

Before the new one: say the Spanish for the scooter, then the Spanish for to pedal.

You'll want to know: el ciclista

el ciclista — "the cyclist".

Hay muchos ciclistas en la carretera.

There are a lot of cyclists on the road.

One form for both: *el ciclista*, *la ciclista*.

The word, taken apart — and its English cousins

ciclista comes from French *cycliste* (EtymDB), built on *cycle*, from Greek *kýklos* "circle, wheel".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el ciclista*
- *Say it:* *el ciclista*, once more
- *Say it:* a sentence of your own with *el ciclista*
- *Recall:* say the Spanish for the scooter, then the Spanish for to pedal, then say *el ciclista* again

Before you move on

What does el ciclista mean? (“The cyclist”.) Say it once more.

Chapter 650

Autocar y tranvía

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can take a coach or a tram, use a bus pass, change and validate my ticket.
>
> *Complete the last lesson of chapter 650: I can take a coach or a tram, use a bus pass, change and validate my ticket.*

650.1 el autocar — the coach (long-distance bus)

> Before the new one: say the Spanish for to pedal, then the Spanish for the cyclist.

You'll want to know: el autocar

el autocar — "the coach (long-distance bus)".

> El autocar sale a las ocho.
>
> *The coach leaves at eight.*

A Spain word; Latin America says *el autobús*, *el bus* or *el micro*.

The word, taken apart — and its English cousins

autocar was borrowed from French *autocar* (EtymDB), made from *auto-* and English *car*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el autocar*
- *Say it: el autocar*, once more
- *Say it:* a sentence of your own with *el autocar*
- *Recall:* say the Spanish for to pedal, then the Spanish for the cyclist, then say *el autocar* again

Before you move on

What does el autocar mean? ("The coach (long-distance bus)".) Say it once more.

650.2 el tranvía — the tram, the streetcar

Before the new one: say the Spanish for the cyclist, then the Spanish for the coach.

You'll want to know: el tranvía

el tranvía — "the tram, the streetcar".

El tranvía pasa cada diez minutos.

The tram comes every ten minutes.

It ends in -a but is masculine: *el tranvía*.

The word, taken apart — and its English cousins

tranvía was borrowed from English *tramway*, with the second half remade as Spanish *vía* "track, way", from Latin *via*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el tranvía*
- *Say it: el tranvía*, once more
- *Say it:* a sentence of your own with *el tranvía*
- *Recall:* say the Spanish for the cyclist, then the Spanish for the coach, then say *el tranvía* again

Before you move on

What does el tranvía mean? ("The tram, the streetcar".) Say it once more.

650.3 el bonobús — the bus pass (for several trips)

Before the new one: say the Spanish for the coach, then the Spanish for the tram.

You'll want to know: el bonobús

el bonobús — "the bus pass (for several trips)".

Con el bonobús el viaje sale más barato.

With a bus pass the trip works out cheaper.

A Spain word; it holds ten trips, or a month of travel.

The word, taken apart — and its English cousins

bonobús is built from *bono* "voucher", from Latin *bonus* "good", and *bus*, short for *autobús*, from Latin *omnibus* "for all".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el bonobús*
- *Say it: el bonobús*, once more
- *Say it:* a sentence of your own with *el bonobús*
- *Recall:* say the Spanish for the coach, then the Spanish for the tram, then say *el bonobús* again

Before you move on

What does el bonobús mean? ("The bus pass (for several trips)".) Say it once more.

650.4 el transbordo — the change, the transfer (between trains or buses)

Before the new one: say the Spanish for the tram, then the Spanish for the bus pass.

You'll want to know: el transbordo

el transbordo — "the change, the transfer (between trains or buses)".

Hay que hacer transbordo en la siguiente estación.

You have to change at the next station.

Hacer transbordo — to change trains or lines.

The word, taken apart — and its English cousins

transbordo is built on Latin *trans* "across" and *bordo* "side of a ship", which comes from *borde* "edge" (EtymDB). It first meant moving goods from one ship to another.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el transbordo*
- *Say it: el transbordo*, once more
- *Say it:* a sentence of your own with *el transbordo*
- *Recall:* say the Spanish for the tram, then the Spanish for the bus pass, then say *el transbordo* again

Before you move on

What does el transbordo mean? ("The change, the transfer (between trains or buses)".) Say it once more.

650.5 validar — to validate (a ticket)

Before the new one: say the Spanish for the bus pass, then the Spanish for the change.

You'll want to know: validar

validar — "to validate (a ticket)".

Valide el billete al subir.

Validate your ticket when you get on.

Buses and trams have a small machine for this.

The word, taken apart — and its English cousins

validar is built on *válido* "valid", a learned borrowing from Latin *validus* "strong, able" (Lewis & Short), from *valēre* "to be strong".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *validar*
- *Say it:* *validar*, once more
- *Say it:* a sentence of your own with *validar*
- *Recall:* say the Spanish for the bus pass, then the Spanish for the change, then say *validar* again

Before you move on

What does validar mean? (“To validate (a ticket)”.) Say it once more.

Chapter 651

En el tren

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can travel by train: find my carriage, sleep in a berth, buy a ticket at the ticket office and get off at my stop.
>
> *Complete the last lesson of chapter 651: I can travel by train: find my carriage, sleep in a berth, buy a ticket at the ticket office and get off at my stop.*

651.1 el vagón — the carriage, the railway car

> Before the new one: say the Spanish for the change, then the Spanish for to validate.

You'll want to know: el vagón

el vagón — "the carriage, the railway car".

> Nuestro asiento está en el vagón tres.
>
> *Our seat is in carriage three.*

El vagón restaurante — the dining car.

The word, taken apart — and its English cousins

vagón was borrowed from English *wagon* (EtymDB), which itself came from Dutch *wagen*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el vagón*
- *Say it: el vagón*, once more
- *Say it:* a sentence of your own with *el vagón*
- *Recall:* say the Spanish for the change, then the Spanish for to validate, then say *el vagón* again

Before you move on

What does el vagón mean? ("The carriage, the railway car".) Say it once more.

651.2 el maquinista — the train driver, the engine driver

Before the new one: say the Spanish for to validate, then the Spanish for the carriage.

You'll want to know: el maquinista

el maquinista — "the train driver, the engine driver".

El maquinista para el tren en la estación.

The train driver stops the train at the station.

Built on *la máquina*: the first trains were pulled by steam engines.

The word, taken apart — and its English cousins

maquinista is built on *máquina* "machine" with *-ista* (EtymDB); *máquina* is a learned borrowing from Latin *māchina*, from Greek *mēkhanḗ*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el maquinista*
- *Say it: el maquinista*, once more
- *Say it:* a sentence of your own with *el maquinista*
- *Recall:* say the Spanish for to validate, then the Spanish for the carriage, then say *el maquinista* again

Before you move on

What does el maquinista mean? ("The train driver, the engine driver".) Say it once more.

651.3 la taquilla — the ticket office, the box office; the locker

Before the new one: say the Spanish for the carriage, then the Spanish for the train driver.

You'll want to know: la taquilla

la taquilla — "the ticket office, the box office; the locker".

Compramos los billetes en la taquilla.

We bought the tickets at the ticket office.

In Latin America also *la boletería*.

The word, taken apart — and its English cousins

taquilla is a little *taca* "a small cupboard". Where *taca* comes from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la taquilla*
- *Say it: la taquilla*, once more
- *Say it:* a sentence of your own with *la taquilla*
- *Recall:* say the Spanish for the carriage, then the Spanish for the train driver, then say *la taquilla* again

Before you move on

What does la taquilla mean? ("The ticket office, the box office; the locker".) Say it once more.

651.4 la litera — the berth, the bunk

Before the new one: say the Spanish for the train driver, then the Spanish for the ticket office.

You'll want to know: la litera

la litera — "the berth, the bunk".

Dormimos en litera en el tren de noche.

We slept in a berth on the night train.

At home, *una litera* is a bunk bed.

The word, taken apart — and its English cousins

litera came from Catalan *llitera* (EtymDB), built on *llit* "bed", which comes from Latin *lectus* "a couch, a bed" (Lewis & Short). French *litière* is a cousin.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la litera*
- *Say it: la litera*, once more
- *Say it:* a sentence of your own with *la litera*
- *Recall:* say the Spanish for the train driver, then the Spanish for the ticket office, then say *la litera* again

Before you move on

What does la litera mean? ("The berth, the bunk".) Say it once more.

651.5 apearse — to get off (a train or bus), to step down

Before the new one: say the Spanish for the ticket office, then the Spanish for the berth.

You'll want to know: apearse

apearse — "to get off (a train or bus), to step down".

Nos apeamos en la próxima estación.

We are getting off at the next station.

A formal word heard in announcements; in speech people say *bajarse*.

The word, taken apart — and its English cousins

apearse is usually traced to a Vulgar Latin verb *appedāre* "to set foot down", built on Latin *pēs, pedis* "a foot" (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: apearse*
- *Say it: apearse*, once more
- *Say it:* a sentence of your own with *apearse*
- *Recall:* say the Spanish for the ticket office, then the Spanish for the berth, then say *apearse* again

Before you move on

What does apearse mean? ("To get off (a train or bus), to step down".) Say it once more.

Chapter 652

En el aeropuerto

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can sort things out at the airport: the terminal, the airline, a label for my bag and luggage that goes missing.
>
> *Complete the last lesson of chapter 652: I can sort things out at the airport: the terminal, the airline, a label for my bag and luggage that goes missing.*

652.1 la terminal — the terminal

> Before the new one: say the Spanish for the berth, then the Spanish for to get off.

You'll want to know: la terminal

la terminal — "the terminal".

> Los vuelos internacionales salen de la terminal dos.
>
> *International flights leave from terminal two.*

At an airport it is feminine: *la terminal*; *el terminal* is a device.

The word, taken apart — and its English cousins

terminal is a learned borrowing from Latin *terminālis* "of a boundary" (EtymDB), from *terminus* "a boundary, an end" (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la terminal*
- *Say it: la terminal*, once more
- *Say it:* a sentence of your own with *la terminal*
- *Recall:* say the Spanish for the berth, then the Spanish for to get off, then say *la terminal* again

Before you move on

What does la terminal mean? ("The terminal".) Say it once more.

652.2 extraviarse — to go missing, to get lost (of things)

Before the new one: say the Spanish for to get off, then the Spanish for the terminal.

You'll want to know: extraviarse

extraviarse — "to go missing, to get lost (of things)".

Mi maleta se extravió en el viaje.

My suitcase went missing on the trip.

Formal; airports talk about *equipaje extraviado*.

The word, taken apart — and its English cousins

extraviarse is built from *extra* "outside" and *vía* "way" (EtymDB), from Latin *via*: to go off the road.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: extraviarse*
- *Say it: extraviarse*, once more
- *Say it:* a sentence of your own with *extraviarse*
- *Recall:* say the Spanish for to get off, then the Spanish for the terminal, then say *extraviarse* again

Before you move on

What does extraviarse mean? ("To go missing, to get lost (of things)".) Say it once more.

652.3 la aerolínea — the airline

Before the new one: say the Spanish for the terminal, then the Spanish for to go missing.

You'll want to know: la aerolínea

la aerolínea — "the airline".

La aerolínea nos paga el hotel por el retraso.

The airline is paying for our hotel because of the delay.

Also *la compañía aérea*.

The word, taken apart — and its English cousins

aerolínea is built from *aero-*, from Greek *aḗr* "air", and *línea* "line", a learned borrowing from Latin *līnea* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la aerolínea*
- *Say it: la aerolínea*, once more
- *Say it:* a sentence of your own with *la aerolínea*
- *Recall:* say the Spanish for the terminal, then the Spanish for to go missing, then say *la aerolínea* again

Before you move on

What does la aerolínea mean? ("The airline".) Say it once more.

652.4 la etiqueta — the label, the tag; etiquette

Before the new one: say the Spanish for to go missing, then the Spanish for the airline.

You'll want to know: la etiqueta

la etiqueta — "the label, the tag; etiquette".

Pon una etiqueta con tu nombre en la maleta.

Put a label with your name on the suitcase.

De etiqueta — formal dress.

The word, taken apart — and its English cousins

etiqueta was borrowed from French *étiquette* "a label, a ticket", from Old French *estiquier* "to attach, to stick" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la etiqueta*
- *Say it: la etiqueta*, once more
- *Say it:* a sentence of your own with *la etiqueta*
- *Recall:* say the Spanish for to go missing, then the Spanish for the airline, then say *la etiqueta* again

Before you move on

What does la etiqueta mean? (“The label, the tag; etiquette”.) Say it once more.

652.5 la mochila — the backpack, the rucksack

Before the new one: say the Spanish for the airline, then the Spanish for the label.

You’ll want to know: la mochila

la mochila — “the backpack, the rucksack”.

Solo llevo una mochila.

I am only taking a backpack.

Un mochilero is a backpacker.

The word, taken apart — and its English cousins

mochila comes from *mochil* “an errand boy”, a word borrowed from Basque *motxil* (EtymDB); the bag was what such a boy carried.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *la mochila*
- *Say it:* *la mochila*, once more
- *Say it:* a sentence of your own with *la mochila*
- *Recall:* say the Spanish for the airline, then the Spanish for the label, then say *la mochila* again

Before you move on

What does la mochila mean? (“The backpack, the rucksack”.) Say it once more.

Chapter 653

La puerta de embarque

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can go through security and board: the tray for my things, the metal detector, stopovers and boarding times.
>
> *Complete the last lesson of chapter 653: I can go through security and board: the tray for my things, the metal detector, stopovers and boarding times.*

653.1 embarcar — to board; to embark

> Before the new one: say the Spanish for the label, then the Spanish for the backpack.

You'll want to know: embarcar

embarcar — "to board; to embark".

> Los pasajeros ya pueden embarcar.
>
> *Passengers can now board.*

Used for planes as well as ships.

The word, taken apart — and its English cousins

embarcar is built on *barca* "boat", which is inherited from Late Latin *barca* (EtymDB). Getting on a plane is still getting on a boat.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: embarcar*
- *Say it: embarcar*, once more
- *Say it:* a sentence of your own with *embarcar*
- *Recall:* say the Spanish for the label, then the Spanish for the backpack, then say *embarcar* again

Before you move on

What does embarcar mean? ("To board; to embark".) Say it once more.

653.2 el embarque — the boarding

Before the new one: say the Spanish for the backpack, then the Spanish for to board.

You'll want to know: el embarque

el embarque — "the boarding".

El embarque empieza a las diez.

Boarding starts at ten.

La puerta de embarque — the gate; *la tarjeta de embarque* — the boarding pass.

The word, taken apart — and its English cousins

embarque is built on *embarcar* "to board", which comes from *barca* "boat", Late Latin *barca* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el embarque*
- *Say it: el embarque*, once more
- *Say it:* a sentence of your own with *el embarque*
- *Recall:* say the Spanish for the backpack, then the Spanish for to board, then say *el embarque* again

Before you move on

What does el embarque mean? ("The boarding".) Say it once more.

653.3 el detector — the detector; the metal detector

Before the new one: say the Spanish for to board, then the Spanish for the boarding.

You'll want to know: el detector

el detector — "the detector; the metal detector".

Pasa por el detector sin el cinturón.

Go through the detector without your belt.

El detector de metales — the metal detector.

The word, taken apart — and its English cousins

detector came from English *detector*, a word built on Latin *dētegere* "to uncover", from *tegere* "to cover".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el detector*
- *Say it: el detector*, once more
- *Say it:* a sentence of your own with *el detector*
- *Recall:* say the Spanish for to board, then the Spanish for the boarding, then say *el detector* again

Before you move on

What does el detector mean? ("The detector; the metal detector".) Say it once more.

653.4 la bandeja — the tray

Before the new one: say the Spanish for the boarding, then the Spanish for the detector.

You'll want to know: la bandeja

la bandeja — "the tray".

Pon el móvil en la bandeja.

Put your phone in the tray.

At security your things go in *una bandeja*; on a plane, *la bandeja* is the seat tray.

The word, taken apart — and its English cousins

bandeja was borrowed from Portuguese *bandeja* (EtymDB), which is usually linked to *banda* "side"; the details are not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la bandeja*
- *Say it: la bandeja*, once more
- *Say it:* a sentence of your own with *la bandeja*
- *Recall:* say the Spanish for the boarding, then the Spanish for the detector, then say *la bandeja* again

Before you move on

What does la bandeja mean? ("The tray".) Say it once more.

653.5 la escala — the stopover; the scale; the ladder

Before the new one: say the Spanish for the detector, then the Spanish for the tray.

You'll want to know: la escala

la escala — "the stopover; the scale; the ladder".

El vuelo hace una escala de dos horas.

The flight has a two-hour stopover.

Sin escalas — non-stop.

The word, taken apart — and its English cousins

escala comes from Latin *scāla* "a flight of steps, a ladder" (EtymDB), from *scandere* "to climb". The stopover sense came from sea travel, where an *escala* was a port of call.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la escala*
- *Say it: la escala*, once more
- *Say it:* a sentence of your own with *la escala*
- *Recall:* say the Spanish for the detector, then the Spanish for the tray, then say *la escala* again

Before you move on

What does la escala mean? ("The stopover; the scale; the ladder".) Say it once more.

Chapter 654

En el avión

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a flight: take-off and landing, the pilot and the crew.
>
> *Complete the last lesson of chapter 654: I can talk about a flight: take-off and landing, the pilot and the crew.*

654.1 despegar — to take off; to unstick

> Before the new one: say the Spanish for the tray, then the Spanish for the stopover.

You'll want to know: despegar

despegar — "to take off; to unstick".

> El avión despega a las seis.
>
> *The plane takes off at six.*

The noun is *el despegue*, take-off.

The word, taken apart — and its English cousins

despegar is built on *pegar* "to stick" with *des-* "un-"; *pegar* is inherited from Latin *picāre* "to smear with pitch" (EtymDB). A plane unsticks itself from the ground.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *despegar*
- *Say it:* *despegar*, once more
- *Say it:* a sentence of your own with *despegar*
- *Recall:* say the Spanish for the tray, then the Spanish for the stopover, then say *despegar* again

Before you move on

What does despegar mean? ("To take off; to unstick".) Say it once more.

654.2 aterrizar — to land

Before the new one: say the Spanish for the stopover, then the Spanish for to take off.

You'll want to know: aterrizar

aterrizar — "to land".

Vamos a aterrizar en diez minutos.

We are going to land in ten minutes.

The noun is *el aterrizaje*. The z becomes c before e: *aterricé*.

The word, taken apart — and its English cousins

aterrizar is built on *tierra* "land", which is inherited from Latin *terra* (EtymDB), perhaps after French *atterrir* "to land".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: aterrizar*
- *Say it: aterrizar*, once more
- *Say it:* a sentence of your own with *aterrizar*
- *Recall:* say the Spanish for the stopover, then the Spanish for to take off, then say *aterrizar* again

Before you move on

What does aterrizar mean? ("To land".) Say it once more.

654.3 el piloto — the pilot; the driver (racing)

Before the new one: say the Spanish for to take off, then the Spanish for to land.

You'll want to know: el piloto

el piloto — "the pilot; the driver (racing)".

El piloto habla por el altavoz.

The pilot is speaking over the loudspeaker.

For a woman, *la piloto*.

The word, taken apart — and its English cousins

piloto was borrowed from Italian *piloto* (EtymDB), first the man who steered a ship into port. Its deeper origin is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el piloto*
- *Say it:* *el piloto*, once more
- *Say it:* a sentence of your own with *el piloto*
- *Recall:* say the Spanish for to take off, then the Spanish for to land, then say *el piloto* again

Before you move on

What does el piloto mean? ("The pilot; the driver (racing)".) Say it once more.

654.4 la tripulación — the crew

Before the new one: say the Spanish for to land, then the Spanish for the pilot.

You'll want to know: la tripulación

la tripulación — "the crew".

La tripulación es muy amable.

The crew are very kind.

One member is *un tripulante*.

The word, taken apart — and its English cousins

tripulación is built on *tripular* "to crew a ship", which is usually traced to Latin *interpolāre* "to refurbish, to patch up" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tripulación*
- *Say it: la tripulación*, once more
- *Say it:* a sentence of your own with *la tripulación*
- *Recall:* say the Spanish for to land, then the Spanish for the pilot, then say *la tripulación* again

Before you move on

What does la tripulación mean? ("The crew".) Say it once more.

654.5 la azafata — the flight attendant

Before the new one: say the Spanish for the pilot, then the Spanish for the crew.

You'll want to know: la azafata

la azafata — "the flight attendant".

La azafata nos trae agua.

The flight attendant brings us water.

Latin America says *la aeromoza* or *la sobrecargo*; the neutral term is *auxiliar de vuelo*.

The word, taken apart — and its English cousins

azafata is built on *azafate* "tray", which comes from Arabic *safaṭ* "basket" (EtymDB). The first *azafata* was a lady who held the queen's tray.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *la azafata*
- *Say it:* *la azafata*, once more
- *Say it:* a sentence of your own with *la azafata*
- *Recall:* say the Spanish for the pilot, then the Spanish for the crew, then say *la azafata* again

Before you move on

What does la azafata mean? (“The flight attendant”.) Say it once more.

Chapter 655

Un vuelo movido

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can talk about a hard flight: jet lag, turbulence, feeling sick and the life jacket.
>
> *Complete the last lesson of chapter 655: I can talk about a hard flight: jet lag, turbulence, feeling sick and the life jacket.*

655.1 el desfase horario — jet lag; the time difference

Before the new one: say the Spanish for the crew, then the Spanish for the flight attendant.

You'll want to know: el desfase horario

el desfase horario — "jet lag; the time difference".

> Con el desfase horario no duermo bien.
>
> *With jet lag I do not sleep well.*

Many people also say *el jet lag*.

The word, taken apart — and its English cousins

desfase is built on *fase* "phase", from Greek *phásis* "appearance" (EtymDB); *horario* is built on *hora* "hour", from Latin *hōra*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desfase horario*
- *Say it: el desfase horario*, once more
- *Say it:* a sentence of your own with *el desfase horario*
- *Recall:* say the Spanish for the crew, then the Spanish for the flight attendant, then say *el desfase horario* again

Before you move on

What does el desfase horario mean? ("Jet lag; the time difference".) Say it once more.

655.2 la turbulencia — the turbulence

Before the new one: say the Spanish for the flight attendant, then the Spanish for jet lag.

You'll want to know: la turbulencia

la turbulencia — "the turbulence".

Hay turbulencias, abróchense el cinturón.

There is turbulence, fasten your seat belts.

Often plural on a plane: *hay turbulencias.*

The word, taken apart — and its English cousins

turbulencia is a learned borrowing from Latin *turbulentia* (EtymDB), from *turbulentus* "restless, stormy" (Lewis & Short), built on *turba* "uproar, crowd".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la turbulencia*
- *Say it: la turbulencia*, once more
- *Say it:* a sentence of your own with *la turbulencia*
- *Recall:* say the Spanish for the flight attendant, then the Spanish for jet lag, then say *la turbulencia* again

Before you move on

What does la turbulencia mean? ("The turbulence".) Say it once more.

655.3 el mareo — travel sickness; dizziness

Before the new one: say the Spanish for jet lag, then the Spanish for the turbulence.

You'll want to know: el mareo

el mareo — "travel sickness; dizziness".

Estas pastillas son para el mareo.

These pills are for travel sickness.

Built on *marear*, which comes from *mar*: the first *mareo* was at sea.

The word, taken apart — and its English cousins

mareo is built on *marear* "to make seasick" (EtymDB), which comes from *mar* "sea", inherited from Latin *mare*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el mareo*
- *Say it:* *el mareo*, once more
- *Say it:* a sentence of your own with *el mareo*
- *Recall:* say the Spanish for jet lag, then the Spanish for the turbulence, then say *el mareo* again

Before you move on

What does el mareo mean? ("Travel sickness; dizziness".) Say it once more.

655.4 marearse — to feel sick (in a vehicle), to get dizzy

Before the new one: say the Spanish for the turbulence, then the Spanish for travel sickness.

You'll want to know: marearse

marearse — "to feel sick (in a vehicle), to get dizzy".

Me mareo si leo en el coche.

I feel sick if I read in the car.

Estar mareado — to feel sick or dizzy.

The word, taken apart — and its English cousins

marearse is built on *mar* "sea", inherited from Latin *mare* (EtymDB); it first meant to be seasick.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: marearse*
- *Say it: marearse*, once more
- *Say it:* a sentence of your own with *marearse*
- *Recall:* say the Spanish for the turbulence, then the Spanish for travel sickness, then say *marearse* again

Before you move on

What does marearse mean? ("To feel sick (in a vehicle), to get dizzy".) Say it once more.

655.5 el chaleco — the waistcoat, the vest

Before the new one: say the Spanish for travel sickness, then the Spanish for to feel sick.

You'll want to know: el chaleco

el chaleco — "the waistcoat, the vest".

El chaleco salvavidas está debajo del asiento.

The life jacket is under the seat.

El chaleco salvavidas — the life jacket.

The word, taken apart — and its English cousins

chaleco is usually traced to Turkish *yelek* "waistcoat", a word that reached Spanish through Arabic.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el chaleco*
- *Say it: el chaleco*, once more
- *Say it:* a sentence of your own with *el chaleco*
- *Recall:* say the Spanish for travel sickness, then the Spanish for to feel sick, then say *el chaleco* again

Before you move on

What does el chaleco mean? ("The waistcoat, the vest".) Say it once more.

655.6 Repaso de los capítulos 648–655

Say the Spanish for the parking meter and the car park.

Your turn

Say these aloud:

- the parking meter, the car park, the trailer, the lane, to tow
- the motorbike, the motorcyclist, the scooter, to pedal, the cyclist
- the coach, the tram, the bus pass, the change, to validate
- the carriage, the train driver, the ticket office, the berth, to get off
- the terminal, to go missing, the airline, the label, the backpack
- to board, the boarding, the detector, the tray, the stopover
- to take off, to land, the pilot, the crew, the flight attendant
- jet lag, the turbulence, travel sickness, to feel sick, the waistcoat

Before you move on

The parking meter? (**el parquímetro**.) The car park? (**el estacionamiento**.) The trailer? (**el remolque**.) The lane? (**el**

carril.) To tow? (**remolcar**.) The motorbike? (**la moto**.) The motorcyclist? (**el motorista**.) The scooter? (**el patinete**.) To pedal? (**pedalear**.) The cyclist? (**el ciclista**.) The coach? (**el autocar**.) The tram? (**el tranvía**.) The bus pass? (**el bonobús**.) The change? (**el transbordo**.) To validate? (**validar**.) The carriage? (**el vagón**.) The train driver? (**el maquinista**.) The ticket office? (**la taquilla**.) The berth? (**la litera**.) To get off? (**apearse**.) The terminal? (**la terminal**.) To go missing? (**extraviarse**.) The airline? (**la aerolínea**.) The label? (**la etiqueta**.) The backpack? (**la mochila**.) To board? (**embarcar**.) The boarding? (**el embarque**.) The detector? (**el detector**.) The tray? (**la bandeja**.) The stopover? (**la escala**.) To take off? (**despegar**.) To land? (**aterrizar**.) The pilot? (**el piloto**.) The crew? (**la tripulación**.) The flight attendant? (**la azafata**.) Jet lag? (**el desfase horario**.) The turbulence? (**la turbulencia**.) Travel sickness? (**el mareo**.) To feel sick? (**marearse**.) The waistcoat? (**el chaleco**.)

Chapter 656

En la aduana

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can cross a border: customs and the customs officer, a visa, a passport stamp and a bag search.
>
> *Complete the last lesson of chapter 656: I can cross a border: customs and the customs officer, a visa, a passport stamp and a bag search.*

656.1 el aduanero — the customs officer

> Before the new one: say the Spanish for to feel sick, then the Spanish for the waistcoat.

You'll want to know: el aduanero

el aduanero — "the customs officer".

> El aduanero abre mi maleta.
>
> *The customs officer opens my suitcase.*

A woman is *la aduanera*. As an adjective: *el control aduanero*.

The word, taken apart — and its English cousins

aduanero is built on *aduana* "customs", which comes from Andalusian Arabic *ad-dīwān* "the office", Arabic *dīwān* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el aduanero*
- *Say it: el aduanero*, once more
- *Say it:* a sentence of your own with *el aduanero*
- *Recall:* say the Spanish for to feel sick, then the Spanish for the waistcoat, then say *el aduanero* again

Before you move on

What does el aduanero mean? ("The customs officer".) Say it once more.

656.2 la aduana — customs

Before the new one: say the Spanish for the waistcoat, then the Spanish for the customs officer.

You'll want to know: la aduana

la aduana — "customs".

En la aduana revisan las maletas.

At customs they check the suitcases.

Pasar la aduana — to go through customs.

The word, taken apart — and its English cousins

aduana comes from Andalusian Arabic *ad-dīwān* "the office", from Arabic *dīwān* "administrative office, register" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la aduana*
- *Say it: la aduana*, once more
- *Say it:* a sentence of your own with *la aduana*
- *Recall:* say the Spanish for the waistcoat, then the Spanish for the customs officer, then say *la aduana* again

Before you move on

What does la aduana mean? ("Customs".) Say it once more.

656.3 el visado — the visa

Before the new one: say the Spanish for the customs officer, then the Spanish for customs.

You'll want to know: el visado

el visado — "the visa".

Para este país necesitas visado.

You need a visa for this country.

Spain says *el visado*; Latin America says *la visa*.

The word, taken apart — and its English cousins

visado is built on *visar* "to endorse, to stamp as seen", which is usually linked to *visa*; Spanish *visa* was borrowed from French *visa*, from Latin *vīsa* "things seen" (EtymDB), built on *vidēre* "to see".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el visado*
- *Say it: el visado*, once more
- *Say it:* a sentence of your own with *el visado*
- *Recall:* say the Spanish for the customs officer, then the Spanish for customs, then say *el visado* again

Before you move on

What does el visado mean? ("The visa".) Say it once more.

656.4 sellar — to stamp; to seal

Before the new one: say the Spanish for customs, then the Spanish for the visa.

You'll want to know: sellar

sellar — "to stamp; to seal".

En la frontera me sellaron el pasaporte.

They stamped my passport at the border.

Sellar un sobre — to seal an envelope.

The word, taken apart — and its English cousins

sellar is inherited from Vulgar Latin *sigellāre*, Latin *sigillāre* "to seal" (EtymDB), from *sigillum* "a seal", a little *signum* "sign".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sellar*
- *Say it: sellar*, once more
- *Say it:* a sentence of your own with *sellar*
- *Recall:* say the Spanish for customs, then the Spanish for the visa, then say *sellar* again

Before you move on

What does sellar mean? ("To stamp; to seal".) Say it once more.

656.5 registrar — to search; to register, to record

Before the new one: say the Spanish for the visa, then the Spanish for to stamp.

You'll want to know: registrar

registrar — "to search; to register, to record".

La policía registró el coche.

The police searched the car.

Registrarse is to check in or sign up: *registrarse en el hotel.*

The word, taken apart — and its English cousins

registrar is built on *registro* "register" (EtymDB), which comes from Medieval Latin *registrum*, from *regesta* "things recorded", built on *gerere* "to carry, to carry out".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: registrar*
- *Say it: registrar*, once more
- *Say it:* a sentence of your own with *registrar*
- *Recall:* say the Spanish for the visa, then the Spanish for to stamp, then say *registrar* again

Before you move on

What does registrar mean? (“To search; to register, to record”.) Say it once more.

Chapter 657

Papeles en regla

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can check that my documents are valid, renew a passport, bring a photocopy and go to the consulate.
>
> *Complete the last lesson of chapter 657: I can check that my documents are valid, renew a passport, bring a photocopy and go to the consulate.*

657.1 caducar — to expire

> Before the new one: say the Spanish for to stamp, then the Spanish for to search.

You'll want to know: caducar

caducar — "to expire".

> Mi pasaporte caduca en marzo.
>
> *My passport expires in March.*

Food *caduca* too: *la fecha de caducidad* is the use-by date.

The word, taken apart — and its English cousins

caducar is built on *caduco* "worn out, past its time" (EtymDB), a learned borrowing from Latin *cadūcus* "falling, fallen" (Lewis & Short), from *cadere* "to fall".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *caducar*
- *Say it:* *caducar*, once more
- *Say it:* a sentence of your own with *caducar*
- *Recall:* say the Spanish for to stamp, then the Spanish for to search, then say *caducar* again

Before you move on

What does caducar mean? ("To expire".) Say it once more.

657.2 válido — valid

Before the new one: say the Spanish for to search, then the Spanish for to expire.

You'll want to know: válido

válido — "valid".

Este billete es válido por un mes.

This ticket is valid for a month.

Válido hasta — valid until.

The word, taken apart — and its English cousins

válido is a learned borrowing from Latin *validus* "strong, able, powerful" (Lewis & Short; EtymDB), from *valēre* "to be strong".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: válido*
- *Say it: válido*, once more
- *Say it:* a sentence of your own with *válido*
- *Recall:* say the Spanish for to search, then the Spanish for to expire, then say *válido* again

Before you move on

What does válido mean? ("Valid".) Say it once more.

657.3 renovar — to renew

Before the new one: say the Spanish for to expire, then the Spanish for valid.

You'll want to know: renovar

renovar — "to renew".

Tengo que renovar el pasaporte.

I have to renew my passport.

The o becomes ue under stress: *renuevo*, *renueva*.

The word, taken apart — and its English cousins

renovar comes from Latin *renovāre* "to renew, to restore" (Lewis & Short), built on *novus* "new" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: renovar*
- *Say it: renovar*, once more
- *Say it:* a sentence of your own with *renovar*
- *Recall:* say the Spanish for to expire, then the Spanish for valid, then say *renovar* again

Before you move on

What does renovar mean? ("To renew".) Say it once more.

657.4 la fotocopia — the photocopy

Before the new one: say the Spanish for valid, then the Spanish for to renew.

You'll want to know: la fotocopia

la fotocopia — "the photocopy".

Trae una fotocopia del pasaporte.

Bring a photocopy of your passport.

The verb is *fotocopiar*.

The word, taken apart — and its English cousins

fotocopia is built from Greek *phōs, phōtós* "light" and *copia* "copy", which comes from Latin *cōpia* "plenty".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la fotocopia*
- *Say it: la fotocopia*, once more
- *Say it:* a sentence of your own with *la fotocopia*
- *Recall:* say the Spanish for valid, then the Spanish for to renew, then say *la fotocopia* again

Before you move on

What does la fotocopia mean? ("The photocopy".) Say it once more.

657.5 el consulado — the consulate

Before the new one: say the Spanish for to renew, then the Spanish for the photocopy.

You'll want to know: el consulado

el consulado — "the consulate".

El consulado abre por la mañana.

The consulate opens in the morning.

The person is *el cónsul*.

The word, taken apart — and its English cousins

consulado is a learned borrowing from Latin *cōnsulātus* "the office of consul" (Lewis & Short; EtymDB), from *cōnsul*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el consulado*
- *Say it:* *el consulado*, once more
- *Say it:* a sentence of your own with *el consulado*
- *Recall:* say the Spanish for to renew, then the Spanish for the photocopy, then say *el consulado* again

Before you move on

What does el consulado mean? (“The consulate”.) Say it once more.

Chapter 658

En barco

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can travel by sea: a ferry or a cruise, sailing and going ashore at the quay.
>
> *Complete the last lesson of chapter 658: I can travel by sea: a ferry or a cruise, sailing and going ashore at the quay.*

658.1 el ferry — the ferry

> Before the new one: say the Spanish for the photocopy, then the Spanish for the consulate.

You'll want to know: el ferry

el ferry — "the ferry".

> Tomamos el ferry a la isla.
>
> *We took the ferry to the island.*

Also *el transbordador*. Plural *los ferris*.

The word, taken apart — and its English cousins

ferry was borrowed from English *ferry* (EtymDB), from Old English *ferian* "to carry, to convey".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ferry*
- *Say it: el ferry*, once more
- *Say it:* a sentence of your own with *el ferry*
- *Recall:* say the Spanish for the photocopy, then the Spanish for the consulate, then say *el ferry* again

Before you move on

What does el ferry mean? ("The ferry".) Say it once more.

658.2 el crucero — the cruise; the cruise ship

Before the new one: say the Spanish for the consulate, then the Spanish for the ferry.

You'll want to know: el crucero

el crucero — "the cruise; the cruise ship".

Hicimos un crucero por las islas.

We went on a cruise round the islands.

It also names the ship itself: *un crucero enorme.*

The word, taken apart — and its English cousins

crucero is built on *cruz* "cross", inherited from Latin *crux*; a *crucero* crosses the sea back and forth.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el crucero*
- *Say it: el crucero*, once more
- *Say it:* a sentence of your own with *el crucero*
- *Recall:* say the Spanish for the consulate, then the Spanish for the ferry, then say *el crucero* again

Before you move on

What does el crucero mean? ("The cruise; the cruise ship".) Say it once more.

658.3 navegar — to sail; to browse (the internet)

Before the new one: say the Spanish for the ferry, then the Spanish for the cruise.

You'll want to know: navegar

navegar — "to sail; to browse (the internet)".

Navegamos dos días hasta la costa.

We sailed for two days to the coast.

Navegar por internet — to browse the web.

The word, taken apart — and its English cousins

navegar comes from Latin *nāvigāre* "to sail" (Lewis & Short; EtymDB), built from *nāvis* "ship" and *agere* "to drive".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: navegar*
- *Say it: navegar*, once more
- *Say it:* a sentence of your own with *navegar*
- *Recall:* say the Spanish for the ferry, then the Spanish for the cruise, then say *navegar* again

Before you move on

What does navegar mean? ("To sail; to browse (the internet)".) Say it once more.

658.4 el muelle — the quay, the dock; the spring (metal)

Before the new one: say the Spanish for the cruise, then the Spanish for to sail.

You'll want to know: el muelle

el muelle — "the quay, the dock; the spring (metal)".

El barco espera en el muelle.

The boat is waiting at the quay.

A second *muelle* is a metal spring.

The word, taken apart — and its English cousins

muelle for a quay comes from Catalan *moll*, from Latin *mōlēs* "a mass; a dam, a pier" (Lewis & Short). The *muelle* that means a spring is a different word, from Latin *mollis* "soft".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el muelle*
- *Say it: el muelle*, once more
- *Say it:* a sentence of your own with *el muelle*
- *Recall:* say the Spanish for the cruise, then the Spanish for to sail, then say *el muelle* again

Before you move on

What does el muelle mean? ("The quay, the dock; the spring (metal)".) Say it once more.

658.5 desembarcar — to disembark, to go ashore; to unload

Before the new one: say the Spanish for to sail, then the Spanish for the quay.

You'll want to know: desembarcar

desembarcar — "to disembark, to go ashore; to unload".

Desembarcamos por la tarde.

We went ashore in the afternoon.

The opposite of *embarcar*.

The word, taken apart — and its English cousins

desembarcar is built on *embarcar* with *des-* "un-"; both come from *barca* "boat", Late Latin *barca* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *desembarcar*
- *Say it:* *desembarcar*, once more
- *Say it:* a sentence of your own with *desembarcar*
- *Recall:* say the Spanish for to sail, then the Spanish for the quay, then say *desembarcar* again

Before you move on

What does desembarcar mean? ("To disembark, to go ashore; to unload".) Say it once more.

Chapter 659

Barcas y marineros

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about small boats: a launch, a sailing boat, rowing, the sailor and the captain.
>
> *Complete the last lesson of chapter 659: I can talk about small boats: a launch, a sailing boat, rowing, the sailor and the captain.*

659.1 la lancha — the launch, the motorboat

> Before the new one: say the Spanish for the quay, then the Spanish for to disembark.

You'll want to know: la lancha

la lancha — "the launch, the motorboat".

> Fuimos a la cueva en lancha.
>
> *We went to the cave by motorboat.*

La lancha has a motor; *la barca* is often rowed.

The word, taken apart — and its English cousins

lancha came through Portuguese *lancha* and is usually traced to a Malay word meaning "swift".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la lancha*
- *Say it: la lancha*, once more
- *Say it:* a sentence of your own with *la lancha*
- *Recall:* say the Spanish for the quay, then the Spanish for to disembark, then say *la lancha* again

Before you move on

What does la lancha mean? ("The launch, the motorboat".) Say it once more.

659.2 el velero — the sailing boat

Before the new one: say the Spanish for to disembark, then the Spanish for the launch.

You'll want to know: el velero

el velero — "the sailing boat".

El velero sale del puerto con poco viento.

The sailing boat leaves the harbour in a light wind.

Built on *la vela*, the sail.

The word, taken apart — and its English cousins

velero is built on *vela* "sail", which comes from Latin *vēla*, the plural of *vēlum* "a cloth, a covering" (Lewis & Short), used for sails.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el velero*
- *Say it:* *el velero*, once more
- *Say it:* a sentence of your own with *el velero*
- *Recall:* say the Spanish for to disembark, then the Spanish for the launch, then say *el velero* again

Before you move on

What does el velero mean? (“The sailing boat”.) Say it once more.

659.3 remar — to row

Before the new one: say the Spanish for the launch, then the Spanish for the sailing boat.

You’ll want to know: remar

remar — “to row”.

Remamos hasta la isla.

We rowed to the island.

El remo is the oar.

The word, taken apart — and its English cousins

remar is built on *remo* “oar” (EtymDB), inherited from Latin *rēmus* “an oar” (Lewis & Short).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: remar*
- *Say it: remar*, once more
- *Say it:* a sentence of your own with *remar*
- *Recall:* say the Spanish for the launch, then the Spanish for the sailing boat, then say *remar* again

Before you move on

What does remar mean? ("To row".) Say it once more.

659.4 el marinero — the sailor

Before the new one: say the Spanish for the sailing boat, then the Spanish for to row.

You'll want to know: el marinero

el marinero — "the sailor".

Mi abuelo era marinero.

My grandfather was a sailor.

As an adjective it means seafaring: *un pueblo marinero.*

The word, taken apart — and its English cousins

marinero is built on *marina* (EtymDB), and through it on *mar* "sea", inherited from Latin *mare*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el marinero*
- *Say it: el marinero*, once more
- *Say it:* a sentence of your own with *el marinero*
- *Recall:* say the Spanish for the sailing boat, then the Spanish for to row, then say *el marinero* again

Before you move on

What does el marinero mean? ("The sailor".) Say it once more.

659.5 el capitán — the captain

Before the new one: say the Spanish for to row, then the Spanish for the sailor.

You'll want to know: el capitán

el capitán — "the captain".

El capitán habla con los pasajeros.

The captain is talking to the passengers.

Of a ship, a plane or a team.

The word, taken apart — and its English cousins

capitán comes from Late Latin *capitāneus* "chief" (EtymDB), built on *caput* "head".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el capitán*
- *Say it:* *el capitán*, once more
- *Say it:* a sentence of your own with *el capitán*
- *Recall:* say the Spanish for to row, then the Spanish for the sailor, then say *el capitán* again

Before you move on

What does el capitán mean? (“The captain”.) Say it once more.

Chapter 660

Dónde dormir

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about where to stay: a guesthouse, a hostel or with friends.
>
> *Complete the last lesson of chapter 660: I can talk about where to stay: a guesthouse, a hostel or with friends.*

660.1 el alojamiento — the accommodation, the lodging

Before the new one: say the Spanish for the sailor, then the Spanish for the captain.

You'll want to know: el alojamiento

el alojamiento — "the accommodation, the lodging".

El precio incluye el alojamiento.

The price includes accommodation.

Alojamiento y desayuno — bed and breakfast.

The word, taken apart — and its English cousins

alojamiento is built on *alojar* "to lodge", which came from Occitan *alotjar* (EtymDB), built on a Germanic word for a shelter or hut.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el alojamiento*
- *Say it: el alojamiento*, once more
- *Say it:* a sentence of your own with *el alojamiento*
- *Recall:* say the Spanish for the sailor, then the Spanish for the captain, then say *el alojamiento* again

Before you move on

What does el alojamiento mean? ("The accommodation, the lodging".) Say it once more.

660.2 alojarse — to stay (at a hotel or a house), to lodge

Before the new one: say the Spanish for the captain, then the Spanish for the accommodation.

You'll want to know: alojarse

alojarse — "to stay (at a hotel or a house), to lodge".

Nos alojamos en un hotel del centro.

We are staying at a hotel in the centre.

Without *se*, *alojar* is to put someone up.

The word, taken apart — and its English cousins

alojarse comes from Occitan *alotjar* "to lodge" (EtymDB), which is built on a Germanic word for a shelter or hut.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: alojarse*
- *Say it: alojarse*, once more
- *Say it:* a sentence of your own with *alojarse*
- *Recall:* say the Spanish for the captain, then the Spanish for the accommodation, then say *alojarse* again

Before you move on

What does alojarse mean? ("To stay (at a hotel or a house), to lodge".) Say it once more.

660.3 hospedarse — to stay as a guest

Before the new one: say the Spanish for the accommodation, then the Spanish for to stay.

You'll want to know: hospedarse

hospedarse — "to stay as a guest".

Se hospedó en casa de unos amigos.

He stayed at some friends' house.

A close twin of *alojarse*, very common in Latin America.

The word, taken apart — and its English cousins

hospedarse is inherited from Late Latin *hospitāre* (EtymDB), Latin *hospitārī* "to be a guest, to put up" (Lewis & Short), built on *hospes* "guest, host".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: hospedarse*
- *Say it: hospedarse*, once more
- *Say it:* a sentence of your own with *hospedarse*
- *Recall:* say the Spanish for the accommodation, then the Spanish for to stay, then say *hospedarse* again

Before you move on

What does hospedarse mean? ("To stay as a guest".) Say it once more.

660.4 el hostal — the guesthouse, the small hotel

Before the new one: say the Spanish for to stay, then the Spanish for to stay as a guest.

You'll want to know: el hostal

el hostal — "the guesthouse, the small hotel".

El hostal es barato y limpio.

The guesthouse is cheap and clean.

In Spain *un hostal* is a modest, often family-run hotel.

The word, taken apart — and its English cousins

hostal is inherited through Old Spanish *ostal* (EtymDB) from Late Latin *hospitāle* "a guest house", built on *hospes* "guest".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el hostal*
- *Say it: el hostal*, once more
- *Say it:* a sentence of your own with *el hostal*
- *Recall:* say the Spanish for to stay, then the Spanish for to stay as a guest, then say *el hostal* again

Before you move on

What does el hostal mean? ("The guesthouse, the small hotel".) Say it once more.

660.5 el albergue — the hostel; the shelter

Before the new one: say the Spanish for to stay as a guest, then the Spanish for the guesthouse.

You'll want to know: el albergue

el albergue — "the hostel; the shelter".

Dormimos en un albergue juvenil.

We slept in a youth hostel.

Albergue juvenil — youth hostel.

The word, taken apart — and its English cousins

albergue is built on *albergar* "to shelter" (EtymDB), which comes from a Germanic compound *heriberga* "a shelter for an army", from *harjaz* "army" and *bergô* "shelter".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el albergue*
- *Say it:* *el albergue*, once more
- *Say it:* a sentence of your own with *el albergue*
- *Recall:* say the Spanish for to stay as a guest, then the Spanish for the guesthouse, then say *el albergue* again

Before you move on

What does el albergue mean? (“The hostel; the shelter”.) Say it once more.

Chapter 661

En recepción

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can deal with hotel staff, from the receptionist to the concierge, and say how long I am staying.
>
> *Complete the last lesson of chapter 661: I can deal with hotel staff, from the receptionist to the concierge, and say how long I am staying.*

661.1 el recepcionista — the receptionist

> Before the new one: say the Spanish for the guesthouse, then the Spanish for the hostel.

You'll want to know: el recepcionista

el recepcionista — "the receptionist".

> El recepcionista me da la llave.
>
> *The receptionist gives me the key.*

One form for both: *el recepcionista*, *la recepcionista*.

The word, taken apart — and its English cousins

recepcionista is built on *recepción*, a learned borrowing from Latin *receptiō* "a receiving" (EtymDB), from *recipere* "to receive".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el recepcionista*
- *Say it: el recepcionista*, once more
- *Say it:* a sentence of your own with *el recepcionista*
- *Recall:* say the Spanish for the guesthouse, then the Spanish for the hostel, then say *el recepcionista* again

Before you move on

What does el recepcionista mean? ("The receptionist".) Say it once more.

661.2 el botones — the bellboy, the porter (in a hotel)

Before the new one: say the Spanish for the hostel, then the Spanish for the receptionist.

You'll want to know: el botones

el botones — "the bellboy, the porter (in a hotel)".

El botones sube las maletas.

The bellboy takes the suitcases up.

One person, but the word ends in -s: *el botones*, *los botones*.

The word, taken apart — and its English cousins

botones is built on *botón* "button", which comes from French *bouton*; the porter is named for the rows of buttons on his uniform.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el botones*
- *Say it: el botones*, once more
- *Say it:* a sentence of your own with *el botones*
- *Recall:* say the Spanish for the hostel, then the Spanish for the receptionist, then say *el botones* again

Before you move on

What does el botones mean? ("The bellboy, the porter (in a hotel)".) Say it once more.

661.3 el huésped — the guest (at a hotel or a house)

Before the new one: say the Spanish for the receptionist, then the Spanish for the bellboy.

You'll want to know: el huésped

el huésped — "the guest (at a hotel or a house)".

Los huéspedes desayunan a las ocho.

The guests have breakfast at eight.

Una casa de huéspedes — a guesthouse.

The word, taken apart — and its English cousins

huésped is inherited from Latin *hospitem*, a form of *hospes* "guest; host" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el huésped*
- *Say it: el huésped*, once more
- *Say it:* a sentence of your own with *el huésped*
- *Recall:* say the Spanish for the receptionist, then the Spanish for the bellboy, then say *el huésped* again

Before you move on

What does el huésped mean? ("The guest (at a hotel or a house)".) Say it once more.

661.4 la estancia — the stay; the room; the ranch (Southern Cone)

Before the new one: say the Spanish for the bellboy, then the Spanish for the guest.

You'll want to know: la estancia

la estancia — "the stay; the room; the ranch (Southern Cone)".

Disfrute de su estancia.

Enjoy your stay.

In Argentina and Uruguay *una estancia* is a large farm.

The word, taken apart — and its English cousins

estancia is built on *estar* "to be, to stay", which is inherited from Latin *stāre* "to stand".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la estancia*
- *Say it: la estancia*, once more
- *Say it:* a sentence of your own with *la estancia*
- *Recall:* say the Spanish for the bellboy, then the Spanish for the guest, then say *la estancia* again

Before you move on

What does la estancia mean? ("The stay; the room; the ranch (Southern Cone)".) Say it once more.

661.5 el conserje — the concierge, the porter; the caretaker

Before the new one: say the Spanish for the guest, then the Spanish for the stay.

You'll want to know: el conserje

el conserje — "the concierge, the porter; the caretaker".

El conserje nos recomienda un restaurante.

The concierge recommends a restaurant to us.

In a school or a block of flats, *el conserje* is the caretaker.

The word, taken apart — and its English cousins

conserje was borrowed from French *concierge*. Where the French word comes from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el conserje*
- *Say it:* *el conserje*, once more
- *Say it:* a sentence of your own with *el conserje*
- *Recall:* say the Spanish for the guest, then the Spanish for the stay, then say *el conserje* again

Before you move on

What does el conserje mean? ("The concierge, the porter; the caretaker".) Say it once more.

Chapter 662

Cambios y cancelaciones

>
> *Complete the last lesson of chapter 662: I can change and cancel a booking: the booking reference, the confirmation and any penalty.*

662.1 el localizador — the booking reference

> Before the new one: say the Spanish for the stay, then the Spanish for the concierge.

You'll want to know: el localizador

el localizador — "the booking reference".

> Dígame el localizador de su billete, por favor.
>
> *Tell me the booking reference for your ticket, please.*

A short code of letters and numbers.

The word, taken apart — and its English cousins

localizador is built on *localizar* "to locate", from *local*, a learned borrowing from Late Latin *locālis* (EtymDB), from *locus* "place".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el localizador*
- *Say it: el localizador*, once more
- *Say it:* a sentence of your own with *el localizador*
- *Recall:* say the Spanish for the stay, then the Spanish for the concierge, then say *el localizador* again

Before you move on

What does el localizador mean? ("The booking reference".) Say it once more.

662.2 modificar — to change, to modify

Before the new one: say the Spanish for the concierge, then the Spanish for the booking reference.

You'll want to know: modificar

modificar — "to change, to modify".

¿Puedo modificar la fecha de la reserva?

Can I change the date of the booking?

The c becomes qu before e: *modifiqué*. Formal, common on booking sites.

The word, taken apart — and its English cousins

modificar is a learned borrowing from Latin *modificāre* "to set limits to, to regulate" (Lewis & Short; EtymDB), built from *modus* "measure" and *facere* "to make".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: modificar*
- *Say it: modificar*, once more
- *Say it:* a sentence of your own with *modificar*
- *Recall:* say the Spanish for the concierge, then the Spanish for the booking reference, then say *modificar* again

Before you move on

What does modificar mean? ("To change, to modify".) Say it once more.

662.3 la confirmación — the confirmation

Before the new one: say the Spanish for the booking reference, then the Spanish for to change.

You'll want to know: la confirmación

la confirmación — "the confirmation".

Recibí la confirmación del vuelo.

I got the flight confirmation.

It is also a church ceremony.

The word, taken apart — and its English cousins

confirmación is a learned borrowing from Latin *cōnfirmātiō* (EtymDB), from *cōnfirmāre* "to make firm", built on *firmus* "firm".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la confirmación*
- *Say it: la confirmación*, once more
- *Say it:* a sentence of your own with *la confirmación*
- *Recall:* say the Spanish for the booking reference, then the Spanish for to change, then say *la confirmación* again

Before you move on

What does la confirmación mean? ("The confirmation".) Say it once more.

662.4 la penalización — the penalty, the charge (for cancelling)

Before the new one: say the Spanish for to change, then the Spanish for the confirmation.

You'll want to know: la penalización

la penalización — "the penalty, the charge (for cancelling)".

Si cancela hoy, no hay penalización.

If you cancel today, there is no charge.

Booking terms often say *sin penalización* — free of charge.

The word, taken apart — and its English cousins

penalización is built on *penalizar* "to penalise", from *penal*, a learned borrowing from Latin *poenālis*, built on *poena* "penalty, punishment".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la penalización*
- *Say it: la penalización*, once more
- *Say it:* a sentence of your own with *la penalización*
- *Recall:* say the Spanish for to change, then the Spanish for the confirmation, then say *la penalización* again

Before you move on

What does la penalización mean? ("The penalty, the charge (for cancelling)".) Say it once more.

662.5 la cancelación — the cancellation

Before the new one: say the Spanish for the confirmation, then the Spanish for the penalty.

You'll want to know: la cancelación

la cancelación — "the cancellation".

La cancelación es gratis hasta el viernes.

Cancellation is free until Friday.

Un seguro de cancelación — cancellation insurance.

The word, taken apart — and its English cousins

cancelación is built on *cancelar*, a learned borrowing from Latin *cancellāre* "to cross out with lines like a lattice", from *cancellī* "bars".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la cancelación*
- *Say it: la cancelación*, once more
- *Say it:* a sentence of your own with *la cancelación*
- *Recall:* say the Spanish for the confirmation, then the Spanish for the penalty, then say *la cancelación* again

Before you move on

What does la cancelación mean? (“The cancellation”.) Say it once more.

Chapter 663

Lo que cuesta la habitación

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can understand the price of a stay: the tourist tax, extra charges, the deposit and a refund.
>
> *Complete the last lesson of chapter 663: I can understand the price of a stay: the tourist tax, extra charges, the deposit and a refund.*

663.1 la tasa — the tax, the fee; the rate

> Before the new one: say the Spanish for the penalty, then the Spanish for the cancellation.

You'll want to know: la tasa

la tasa — "the tax, the fee; the rate".

> El hotel cobra una tasa turística.
>
> *The hotel charges a tourist tax.*

La tasa turística — the tourist tax. *La tasa de paro* — the unemployment rate.

The word, taken apart — and its English cousins

tasa is built on *tasar* "to value, to set a price on", which is inherited from Latin *taxāre* "to assess, to rate" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la tasa*
- *Say it: la tasa*, once more
- *Say it:* a sentence of your own with *la tasa*
- *Recall:* say the Spanish for the penalty, then the Spanish for the cancellation, then say *la tasa* again

Before you move on

What does la tasa mean? ("The tax, the fee; the rate".) Say it once more.

663.2 el suplemento — the extra charge, the supplement

Before the new one: say the Spanish for the cancellation, then the Spanish for the tax.

You'll want to know: el suplemento

el suplemento — "the extra charge, the supplement".

La cama extra tiene un suplemento.

There is an extra charge for the extra bed.

A newspaper *suplemento* is a magazine inside it.

The word, taken apart — and its English cousins

suplemento is a learned borrowing from Latin *supplēmentum* "that which makes a thing full, a supply" (Lewis & Short; EtymDB), from *supplēre* "to fill up".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el suplemento*
- *Say it: el suplemento*, once more
- *Say it:* a sentence of your own with *el suplemento*
- *Recall:* say the Spanish for the cancellation, then the Spanish for the tax, then say *el suplemento* again

Before you move on

What does el suplemento mean? ("The extra charge, the supplement".) Say it once more.

663.3 la fianza — the deposit, the security; bail

Before the new one: say the Spanish for the tax, then the Spanish for the extra charge.

You'll want to know: la fianza

la fianza — "the deposit, the security; bail".

Hay que dejar una fianza de cien euros.

You have to leave a hundred-euro deposit.

For a rented flat, the deposit is *la fianza*.

The word, taken apart — and its English cousins

fianza is built on *fiar* "to vouch for" (EtymDB), which comes from Vulgar Latin *fīdāre*, Latin *fīdere* "to trust".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la fianza*
- *Say it: la fianza*, once more
- *Say it:* a sentence of your own with *la fianza*
- *Recall:* say the Spanish for the tax, then the Spanish for the extra charge, then say *la fianza* again

Before you move on

What does la fianza mean? ("The deposit, the security; bail".) Say it once more.

663.4 el reembolso — the refund

Before the new one: say the Spanish for the extra charge, then the Spanish for the deposit.

You'll want to know: el reembolso

el reembolso — "the refund".

Pedí el reembolso del billete.

I asked for a refund on the ticket.

Contra reembolso — cash on delivery.

The word, taken apart — and its English cousins

reembolso is built on *reembolsar*, from *re-* and *embolsar* "to put in the purse"; *bolsa* comes from Late Latin *bursa*, from Greek *býrsa* "hide".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el reembolso*
- *Say it: el reembolso*, once more
- *Say it:* a sentence of your own with *el reembolso*
- *Recall:* say the Spanish for the extra charge, then the Spanish for the deposit, then say *el reembolso* again

Before you move on

What does el reembolso mean? ("The refund".) Say it once more.

663.5 reembolsar — to refund, to pay back

Before the new one: say the Spanish for the deposit, then the Spanish for the refund.

You'll want to know: reembolsar

reembolsar — "to refund, to pay back".

Le reembolsamos el dinero en tres días.

We will refund your money within three days.

Close to *devolver el dinero*.

The word, taken apart — and its English cousins

reembolsar is built from *re-* "back" and *embolsar* "to put in the purse", on *bolsa*, from Late Latin *bursa*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: reembolsar*
- *Say it: reembolsar*, once more
- *Say it:* a sentence of your own with *reembolsar*
- *Recall:* say the Spanish for the deposit, then the Spanish for the refund, then say *reembolsar* again

Before you move on

What does reembolsar mean? ("To refund, to pay back".) Say it once more.

663.6 Repaso de los capítulos 656–663

Say the Spanish for the customs officer and customs.

Your turn

Say these aloud:

- the customs officer, customs, the visa, to stamp, to search
- to expire, valid, to renew, the photocopy, the consulate
- the ferry, the cruise, to sail, the quay, to disembark
- the launch, the sailing boat, to row, the sailor, the captain
- the accommodation, to stay, to stay as a guest, the guesthouse, the hostel
- the receptionist, the bellboy, the guest, the stay, the concierge
- the booking reference, to change, the confirmation, the penalty, the cancellation
- the tax, the extra charge, the deposit, the refund, to refund

Before you move on

The customs officer? (**el aduanero**.) Customs? (**la aduana**.) The visa? (**el visado**.) To stamp? (**sellar**.) To search? (**registrar**.) To expire? (**caducar**.) Valid? (**válido**.) To renew? (**renovar**.) The photocopy? (**la fotocopia**.) The consulate? (**el consulado**.) The ferry? (**el ferry**.) The cruise? (**el crucero**.) To sail? (**navegar**.) The quay? (**el muelle**.) To disembark? (**desembarcar**.) The launch? (**la lancha**.) The sailing boat? (**el velero**.) To row? (**remar**.) The sailor? (**el marinero**.) The captain? (**el capitán**.) The accommodation? (**el alojamiento**.) To stay? (**alojarse**.) To stay as a guest? (**hospedarse**.) The guesthouse? (**el hostal**.) The hostel? (**el albergue**.) The receptionist? (**el recepcionista**.) The bellboy? (**el botones**.) The guest? (**el huésped**.) The stay? (**la estancia**.) The concierge? (**el conserje**.) The booking reference? (**el localizador**.) To change? (**modificar**.) The confirmation? (**la confirmación**.) The penalty? (**la penalización**.) The cancellation? (**la cancelación**.) The tax? (**la tasa**.) The extra charge? (**el suplemento**.) The deposit? (**la fianza**.) The refund? (**el reembolso**.) To refund? (**reembolsar**.)

Chapter 664

Cómo es la habitación

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe a hotel room: the sheets, the balcony, the view, the sockets and the taps.
>
> *Complete the last lesson of chapter 664: I can describe a hotel room: the sheets, the balcony, the view, the sockets and the taps.*

664.1 la sábana — the sheet (on a bed)

> Before the new one: say the Spanish for the refund, then the Spanish for to refund.

You'll want to know: la sábana

la sábana — "the sheet (on a bed)".

> Cambian las sábanas cada día.
>
> *They change the sheets every day.*

Do not mix it up with *la sabana*, savannah, with no written accent.

The word, taken apart — and its English cousins

sábana is inherited from Latin *sabana*, the plural of *sabanum* "a linen cloth, a towel" (Lewis & Short; EtymDB), from Greek *sábanon*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la sábana*
- *Say it: la sábana*, once more
- *Say it:* a sentence of your own with *la sábana*
- *Recall:* say the Spanish for the refund, then the Spanish for to refund, then say *la sábana* again

Before you move on

What does la sábana mean? ("The sheet (on a bed)".) Say it once more.

664.2 el balcón — the balcony

Before the new one: say the Spanish for to refund, then the Spanish for the sheet.

You'll want to know: el balcón

el balcón — "the balcony".

La habitación tiene un balcón al mar.

The room has a balcony over the sea.

Salir al balcón — to go out on the balcony.

The word, taken apart — and its English cousins

balcón was borrowed from Italian *balcone*, which comes from Langobardic *balko* "beam", a Germanic word (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el balcón*
- *Say it: el balcón*, once more
- *Say it:* a sentence of your own with *el balcón*
- *Recall:* say the Spanish for to refund, then the Spanish for the sheet, then say *el balcón* again

Before you move on

What does el balcón mean? ("The balcony".) Say it once more.

664.3 la vista — the view; sight, eyesight

Before the new one: say the Spanish for the sheet, then the Spanish for the balcony.

You'll want to know: la vista

la vista — "the view; sight, eyesight".

Desde aquí hay una vista preciosa.

There is a lovely view from here.

Con vistas al mar — with a sea view. *Hasta la vista* — see you.

The word, taken apart — and its English cousins

vista is built on *visto* "seen", the past form of *ver* "to see", which comes from Latin *vidēre* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la vista*
- *Say it: la vista*, once more
- *Say it:* a sentence of your own with *la vista*
- *Recall:* say the Spanish for the sheet, then the Spanish for the balcony, then say *la vista* again

Before you move on

What does la vista mean? ("The view; sight, eyesight".) Say it once more.

664.4 el enchufe — the socket, the plug; connections (influence)

Before the new one: say the Spanish for the balcony, then the Spanish for the view.

You'll want to know: el enchufe

el enchufe — "the socket, the plug; connections (influence)".

No hay enchufe al lado de la cama.

There is no socket next to the bed.

Colloquially, *tener enchufe* is to have connections that get you a job.

The word, taken apart — and its English cousins

enchufe is built on *enchufar* "to fit one pipe into another" (EtymDB). The origin of the verb is not settled; it may be imitative.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el enchufe*
- *Say it: el enchufe*, once more
- *Say it:* a sentence of your own with *el enchufe*
- *Recall:* say the Spanish for the balcony, then the Spanish for the view, then say *el enchufe* again

Before you move on

What does el enchufe mean? ("The socket, the plug; connections (influence)".) Say it once more.

664.5 el grifo — the tap, the faucet

Before the new one: say the Spanish for the view, then the Spanish for the socket.

You'll want to know: el grifo

el grifo — "the tap, the faucet".

El grifo del baño gotea.

The bathroom tap is dripping.

Latin America says *la llave* or *la canilla*.

The word, taken apart — and its English cousins

grifo is the same word as *grifo* "griffin", from Latin *gryphus* and Greek *grýps* (EtymDB); old taps were often shaped like a griffin head.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el grifo*
- *Say it:* *el grifo*, once more
- *Say it:* a sentence of your own with *el grifo*
- *Recall:* say the Spanish for the view, then the Spanish for the socket, then say *el grifo* again

Before you move on

What does el grifo mean? (“The tap, the faucet”.) Say it once more.

Chapter 665

Una queja

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can complain about damage or a problem, ask for the manager or the owner and ask to be compensated.
>
> *Complete the last lesson of chapter 665: I can complain about damage or a problem, ask for the manager or the owner and ask to be compensated.*

665.1 la queja — the complaint

> Before the new one: say the Spanish for the socket, then the Spanish for the tap.

You'll want to know: la queja

la queja — "the complaint".

> Tengo una queja sobre el ruido.
>
> *I have a complaint about the noise.*

The verb is *quejarse*.

The word, taken apart — and its English cousins

queja is built on *quejarse* "to complain", which is usually traced to a Vulgar Latin form of *quassāre* "to shake hard, to batter" (Lewis &

Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la queja*
- *Say it: la queja*, once more
- *Say it:* a sentence of your own with *la queja*
- *Recall:* say the Spanish for the socket, then the Spanish for the tap, then say *la queja* again

Before you move on

What does la queja mean? ("The complaint".) Say it once more.

665.2 el desperfecto — the minor damage, the defect

Before the new one: say the Spanish for the tap, then the Spanish for the complaint.

You'll want to know: el desperfecto

el desperfecto — "the minor damage, the defect".

La habitación tenía varios desperfectos.

The room had several things damaged.

Small damage: a broken lamp, a stain on the wall.

The word, taken apart — and its English cousins

desperfecto is built from *des-* and *perfecto* "perfect", a learned borrowing from Latin *perfectus* "finished" (EtymDB), from *perficere*, built on *facere* "to make".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desperfecto*
- *Say it: el desperfecto*, once more
- *Say it:* a sentence of your own with *el desperfecto*
- *Recall:* say the Spanish for the tap, then the Spanish for the complaint, then say *el desperfecto* again

Before you move on

What does el desperfecto mean? ("The minor damage, the defect".) Say it once more.

665.3 compensar — to compensate, to make up for

Before the new one: say the Spanish for the complaint, then the Spanish for the minor damage.

You'll want to know: compensar

compensar — "to compensate, to make up for".

El hotel nos compensó con una noche gratis.

The hotel made up for it with a free night.

Compensar a alguien por algo — to compensate someone for something.

The word, taken apart — and its English cousins

compensar is a learned borrowing from Latin *compēnsāre* "to weigh things against one another, to balance" (Lewis & Short; EtymDB), built on *pēnsāre* "to weigh".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: compensar*
- *Say it: compensar*, once more
- *Say it:* a sentence of your own with *compensar*
- *Recall:* say the Spanish for the complaint, then the Spanish for the minor damage, then say *compensar* again

Before you move on

What does compensar mean? ("To compensate, to make up for".) Say it once more.

665.4 el gerente — the manager

Before the new one: say the Spanish for the minor damage, then the Spanish for to compensate.

You'll want to know: el gerente

el gerente — "the manager".

Quiero hablar con el gerente.

I want to speak to the manager.

A woman is *la gerente*, sometimes *la gerenta*.

The word, taken apart — and its English cousins

gerente is a learned borrowing from Latin *gerēns, gerentis* "managing" (EtymDB), from *gerere* "to carry on, to manage".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el gerente*
- *Say it: el gerente*, once more
- *Say it:* a sentence of your own with *el gerente*
- *Recall:* say the Spanish for the minor damage, then the Spanish for to compensate, then say *el gerente* again

Before you move on

What does el gerente mean? ("The manager".) Say it once more.

665.5 el dueño — the owner

Before the new one: say the Spanish for to compensate, then the Spanish for the manager.

You'll want to know: el dueño

el dueño — "the owner".

El dueño del hostal es muy simpático.

The owner of the guesthouse is very nice.

A woman is *la dueña*. *El dueño del perro* — the owner of the dog.

The word, taken apart — and its English cousins

dueño is inherited from Late Latin *domnus*, a short form of Latin *dominus* "master" (EtymDB), built on *domus* "house": the master of the house.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el dueño*
- *Say it: el dueño*, once more
- *Say it:* a sentence of your own with *el dueño*
- *Recall:* say the Spanish for to compensate, then the Spanish for the manager, then say *el dueño* again

Before you move on

What does el dueño mean? (“The owner”.) Say it once more.

Chapter 666

Bajo las estrellas

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can go camping: a sleeping bag and a mat, travelling in a caravan and bringing a torch.
>
> *Complete the last lesson of chapter 666: I can go camping: a sleeping bag and a mat, travelling in a caravan and bringing a torch.*

666.1 el saco de dormir — the sleeping bag

> Before the new one: say the Spanish for the manager, then the Spanish for the owner.

You'll want to know: el saco de dormir

el saco de dormir — "the sleeping bag".

> Hace frío, lleva un buen saco de dormir.
>
> *It is cold, take a good sleeping bag.*

In Latin America also *la bolsa de dormir*.

The word, taken apart — and its English cousins

saco is inherited from Latin *saccus* "a sack, a bag" (Lewis & Short; EtymDB), and *dormir* from Latin *dormīre* "to sleep".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el saco de dormir*
- *Say it: el saco de dormir*, once more
- *Say it:* a sentence of your own with *el saco de dormir*
- *Recall:* say the Spanish for the manager, then the Spanish for the owner, then say *el saco de dormir* again

Before you move on

What does el saco de dormir mean? ("The sleeping bag".) Say it once more.

666.2 acampar — to camp

Before the new one: say the Spanish for the owner, then the Spanish for the sleeping bag.

You'll want to know: acampar

acampar — "to camp".

Está prohibido acampar en la playa.

Camping on the beach is forbidden.

La acampada libre — wild camping.

The word, taken apart — and its English cousins

acampar was borrowed from Italian *accampare* (EtymDB), built on *campo* "field", from Latin *campus*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *acampar*
- *Say it:* *acampar*, once more
- *Say it:* a sentence of your own with *acampar*
- *Recall:* say the Spanish for the owner, then the Spanish for the sleeping bag, then say *acampar* again

Before you move on

What does acampar mean? ("To camp".) Say it once more.

666.3 la esterilla — the sleeping mat; the small mat

Before the new one: say the Spanish for the sleeping bag, then the Spanish for to camp.

You'll want to know: la esterilla

la esterilla — "the sleeping mat; the small mat".

Pongo la esterilla debajo del saco.

I put the mat under the sleeping bag.

At the gym or the beach, *una esterilla* is a mat.

The word, taken apart — and its English cousins

esterilla is a little *estera* "mat", which is inherited from Latin *storea* "a mat of plaited straw or rushes" (Lewis & Short; EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la esterilla*
- *Say it: la esterilla*, once more
- *Say it:* a sentence of your own with *la esterilla*
- *Recall:* say the Spanish for the sleeping bag, then the Spanish for to camp, then say *la esterilla* again

Before you move on

What does la esterilla mean? ("The sleeping mat; the small mat".) Say it once more.

666.4 la caravana — the caravan, the camper; the tailback

Before the new one: say the Spanish for to camp, then the Spanish for the sleeping mat.

You'll want to know: la caravana

la caravana — "the caravan, the camper; the tailback".

Viajamos por la costa en caravana.

We travelled along the coast in a caravan.

In Spain *una caravana* is also a long line of cars.

The word, taken apart — and its English cousins

caravana comes from Persian *kārvān* "a company of travellers" (EtymDB), which reached Spanish through French or Italian.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la caravana*
- *Say it: la caravana*, once more
- *Say it:* a sentence of your own with *la caravana*
- *Recall:* say the Spanish for to camp, then the Spanish for the sleeping mat, then say *la caravana* again

Before you move on

What does la caravana mean? ("The caravan, the camper; the tailback".) Say it once more.

666.5 la linterna — the torch, the flashlight

Before the new one: say the Spanish for the sleeping mat, then the Spanish for the caravan.

You'll want to know: la linterna

la linterna — "the torch, the flashlight".

Lleva una linterna para la noche.

Take a torch for the night.

A lantern on a ship or a tower is also *la linterna*.

The word, taken apart — and its English cousins

linterna comes from older *lanterna* (EtymDB), a learned borrowing from Latin *lanterna* "a lantern, a lamp, a torch" (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *la linterna*
- *Say it:* *la linterna*, once more
- *Say it:* a sentence of your own with *la linterna*
- *Recall:* say the Spanish for the sleeping mat, then the Spanish for the caravan, then say *la linterna* again

Before you move on

What does la linterna mean? (“The torch, the flashlight”.) Say it once more.

Chapter 667

Un piso de vacaciones

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can rent a holiday flat or a car: meet the owner or host and talk about tenants.
>
> *Complete the last lesson of chapter 667: I can rent a holiday flat or a car: meet the owner or host and talk about tenants.*

667.1 el apartamento — the flat, the apartment

> Before the new one: say the Spanish for the caravan, then the Spanish for the torch.

You'll want to know: el apartamento

el apartamento — "the flat, the apartment".

> Alquilamos un apartamento cerca de la playa.
>
> *We rented a flat near the beach.*

Spain also says *el piso*; much of Latin America says *el departamento*.

The word, taken apart — and its English cousins

apartamento is usually traced to Italian *appartamento*, perhaps through French *appartement*; the Italian is built on *appartare* "to set apart", from Latin *ad* and *pars* "part" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el apartamento*
- *Say it: el apartamento*, once more
- *Say it:* a sentence of your own with *el apartamento*
- *Recall:* say the Spanish for the caravan, then the Spanish for the torch, then say *el apartamento* again

Before you move on

What does el apartamento mean? ("The flat, the apartment".) Say it once more.

667.2 el propietario — the proprietor, the owner; the landlord

Before the new one: say the Spanish for the torch, then the Spanish for the flat.

You'll want to know: el propietario

el propietario — "the proprietor, the owner; the landlord".

El propietario nos da las llaves.

The owner gives us the keys.

A woman is *la propietaria.* In speech *el dueño* is common.

The word, taken apart — and its English cousins

propietario is a learned borrowing from Latin *proprietārius* "an owner, a proprietor" (Lewis & Short), built on *proprius* "own".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el propietario*
- *Say it: el propietario*, once more
- *Say it:* a sentence of your own with *el propietario*
- *Recall:* say the Spanish for the torch, then the Spanish for the flat, then say *el propietario* again

Before you move on

What does el propietario mean? ("The proprietor, the owner; the landlord".) Say it once more.

667.3 el anfitrión — the host

Before the new one: say the Spanish for the flat, then the Spanish for the proprietor.

You'll want to know: el anfitrión

el anfitrión — "the host".

El anfitrión nos espera en la puerta.

The host is waiting for us at the door.

A woman is *la anfitriona*.

The word, taken apart — and its English cousins

anfitrión comes from the name *Anfitrión*, Greek *Amphitryōn* (EtymDB), a Theban hero of Greek legend; in an old comedy a great dinner is given at his house.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el anfitrión*
- *Say it: el anfitrión*, once more
- *Say it:* a sentence of your own with *el anfitrión*
- *Recall:* say the Spanish for the flat, then the Spanish for the proprietor, then say *el anfitrión* again

Before you move on

What does el anfitrión mean? ("The host".) Say it once more.

667.4 el inquilino — the tenant

Before the new one: say the Spanish for the proprietor, then the Spanish for the host.

You'll want to know: el inquilino

el inquilino — "the tenant".

El inquilino paga el alquiler cada mes.

The tenant pays the rent every month.

A woman is *la inquilina*.

The word, taken apart — and its English cousins

inquilino is a learned borrowing from Latin *inquilīnus* "a tenant, a lodger" (Lewis & Short; EtymDB), from *incolere* "to dwell in".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el inquilino*
- *Say it: el inquilino*, once more
- *Say it:* a sentence of your own with *el inquilino*
- *Recall:* say the Spanish for the proprietor, then the Spanish for the host, then say *el inquilino* again

Before you move on

What does el inquilino mean? ("The tenant".) Say it once more.

667.5 alquilar — to rent, to hire; to rent out

Before the new one: say the Spanish for the host, then the Spanish for the tenant.

You'll want to know: alquilar

alquilar — "to rent, to hire; to rent out".

Alquilamos un coche para tres días.

We are hiring a car for three days.

Se alquila on a sign — for rent.

The word, taken apart — and its English cousins

alquilar is built on *alquiler* "rent" (EtymDB), which comes from Andalusian Arabic *al-kirá* "the hire, the rent", with the Arabic article fused on.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *alquilar*
- *Say it:* *alquilar*, once more
- *Say it:* a sentence of your own with *alquilar*
- *Recall:* say the Spanish for the host, then the Spanish for the tenant, then say *alquilar* again

Before you move on

What does alquilar mean? ("To rent, to hire; to rent out".) Say it once more.

Chapter 668

Hacer y deshacer el equipaje

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can pack and unpack, wrap things up, drag my case and weigh my bag.
>
> *Complete the last lesson of chapter 668: I can pack and unpack, wrap things up, drag my case and weigh my bag.*

668.1 deshacer — to undo; to unpack

> Before the new one: say the Spanish for the tenant, then the Spanish for to rent.

You'll want to know: deshacer

deshacer — "to undo; to unpack".

> Deshago la maleta al llegar.
>
> *I unpack my case when I arrive.*

Conjugated like *hacer*: *deshago*, *deshice*. *Deshacer la maleta* — to unpack.

The word, taken apart — and its English cousins

deshacer is built on *hacer* "to make, to do" with *des-* "un-"; *hacer* is inherited from Latin *facere*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: deshacer*
- *Say it: deshacer*, once more
- *Say it:* a sentence of your own with *deshacer*
- *Recall:* say the Spanish for the tenant, then the Spanish for to rent, then say *deshacer* again

Before you move on

What does deshacer mean? ("To undo; to unpack".) Say it once more.

668.2 empaquetar — to pack up, to wrap up

Before the new one: say the Spanish for to rent, then the Spanish for to undo.

You'll want to know: empaquetar

empaquetar — "to pack up, to wrap up".

Empaqueto los regalos antes del viaje.

I wrap up the presents before the trip.

Built on *el paquete*, the parcel.

The word, taken apart — and its English cousins

empaquetar is built on *paquete* "parcel", which came from French *paquet* (EtymDB), from Dutch *pak* "bundle".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *empaquetar*
- *Say it:* *empaquetar*, once more
- *Say it:* a sentence of your own with *empaquetar*
- *Recall:* say the Spanish for to rent, then the Spanish for to undo, then say *empaquetar* again

Before you move on

What does empaquetar mean? ("To pack up, to wrap up".) Say it once more.

668.3 la báscula — the scales (for weighing)

Before the new one: say the Spanish for to undo, then the Spanish for to pack up.

You'll want to know: la báscula

la báscula — "the scales (for weighing)".

Pon la maleta en la báscula.

Put the suitcase on the scales.

In the bathroom it weighs you; at the airport it weighs your bag.

The word, taken apart — and its English cousins

báscula comes from French *bascule* "seesaw" (EtymDB): old scales tipped like a seesaw.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la báscula*
- *Say it: la báscula*, once more
- *Say it:* a sentence of your own with *la báscula*
- *Recall:* say the Spanish for to undo, then the Spanish for to pack up, then say *la báscula* again

Before you move on

What does la báscula mean? ("The scales (for weighing)".) Say it once more.

668.4 el exceso — the excess

Before the new one: say the Spanish for to pack up, then the Spanish for the scales.

You'll want to know: el exceso

el exceso — "the excess".

Pagué cincuenta euros por exceso de equipaje.

I paid fifty euros for excess baggage.

Exceso de equipaje — excess baggage.

The word, taken apart — and its English cousins

exceso is a learned borrowing from Latin *excessus* "a going out, a departure" (Lewis & Short), from *excēdere* "to go beyond", built on *cēdere* "to go".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el exceso*
- *Say it: el exceso*, once more
- *Say it:* a sentence of your own with *el exceso*
- *Recall:* say the Spanish for to pack up, then the Spanish for the scales, then say *el exceso* again

Before you move on

What does el exceso mean? ("The excess".) Say it once more.

668.5 arrastrar — to drag, to pull along

Before the new one: say the Spanish for the scales, then the Spanish for the excess.

You'll want to know: arrastrar

arrastrar — "to drag, to pull along".

Arrastro la maleta por la calle.

I drag my suitcase along the street.

Arrastrar los pies — to shuffle your feet.

The word, taken apart — and its English cousins

arrastrar is built from *a-* and *rastrar*, on *rastro* "trail" (EtymDB), which comes from Latin *rāstrum* "a rake", from *rādere* "to scrape".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *arrastrar*
- *Say it:* *arrastrar*, once more
- *Say it:* a sentence of your own with *arrastrar*
- *Recall:* say the Spanish for the scales, then the Spanish for the excess, then say *arrastrar* again

Before you move on

What does arrastrar mean? (“To drag, to pull along”.) Say it once more.

Chapter 669

Con el plano

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can find a place on a street map, point it out and say where it is.
>
> *Complete the last lesson of chapter 669: I can find a place on a street map, point it out and say where it is.*

669.1 el plano — the street map, the plan

> Before the new one: say the Spanish for the excess, then the Spanish for to drag.

You'll want to know: el plano

el plano — "the street map, the plan".

> ¿Tiene un plano de la ciudad?
>
> *Do you have a map of the town?*

El plano is of a town or a building; *el mapa* is of a country.

The word, taken apart — and its English cousins

plano is a learned borrowing from Latin *plānus* "even, level, flat" (Lewis & Short; EtymDB): a town drawn flat on paper. The inherited form is *llano* "flat".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el plano*
- *Say it:* *el plano*, once more
- *Say it:* a sentence of your own with *el plano*
- *Recall:* say the Spanish for the excess, then the Spanish for to drag, then say *el plano* again

Before you move on

What does el plano mean? ("The street map, the plan".) Say it once more.

669.2 orientarse — to find your way, to get your bearings

Before the new one: say the Spanish for to drag, then the Spanish for the street map.

You'll want to know: orientarse

orientarse — "to find your way, to get your bearings".

Me oriento bien en las ciudades.

I find my way around cities easily.

The opposite is *perderse*.

The word, taken apart — and its English cousins

orientarse is built on *oriente* "east", a learned borrowing from Latin *oriēns* "rising", said of the sun (EtymDB): to find your way was first to find the east.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: orientarse*
- *Say it: orientarse*, once more
- *Say it:* a sentence of your own with *orientarse*
- *Recall:* say the Spanish for to drag, then the Spanish for the street map, then say *orientarse* again

Before you move on

What does orientarse mean? ("To find your way, to get your bearings".) Say it once more.

669.3 la ubicación — the location

Before the new one: say the Spanish for the street map, then the Spanish for to find your way.

You'll want to know: la ubicación

la ubicación — "the location".

Te mando la ubicación del hotel.

I will send you the location of the hotel.

Latin America often uses *ubicar* for to find or to be located.

The word, taken apart — and its English cousins

ubicación is built on *ubicar* "to place, to locate", which is built on Latin *ubī* "where" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ubicación*
- *Say it: la ubicación*, once more
- *Say it:* a sentence of your own with *la ubicación*
- *Recall:* say the Spanish for the street map, then the Spanish for to find your way, then say *la ubicación* again

Before you move on

What does la ubicación mean? ("The location".) Say it once more.

669.4 señalar — to point to, to point out; to mark

Before the new one: say the Spanish for to find your way, then the Spanish for the location.

You'll want to know: señalar

señalar — "to point to, to point out; to mark".

Me señaló el hotel en el plano.

He pointed out the hotel on the map.

Señalar con el dedo — to point with your finger.

The word, taken apart — and its English cousins

señalar is built on *señal* "sign" (EtymDB), which is inherited from Late Latin *signāle*, from *signum* "a mark, a sign".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: señalar*
- *Say it: señalar*, once more
- *Say it:* a sentence of your own with *señalar*
- *Recall:* say the Spanish for to find your way, then the Spanish for the location, then say *señalar* again

Before you move on

What does señalar mean? ("To point to, to point out; to mark".) Say it once more.

669.5 situado — located, situated

Before the new one: say the Spanish for the location, then the Spanish for to point to.

You'll want to know: situado

situado — "located, situated".

El hotel está situado en el centro.

The hotel is located in the centre.

Used with *estar*. Latin America often says *ubicado*.

The word, taken apart — and its English cousins

situado is the past form of *situar* "to place", which is built on Latin *situs* "position, site".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *situado*
- *Say it:* *situado*, once more
- *Say it:* a sentence of your own with *situado*
- *Recall:* say the Spanish for the location, then the Spanish for to point to, then say *situado* again

Before you move on

What does situado mean? ("Located, situated".) Say it once more.

Chapter 670

Cómo llegar

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can ask the way and follow directions: turn, go through and turn off.
>
> *Complete the last lesson of chapter 670: I can ask the way and follow directions: turn, go through and turn off.*

670.1 indicar — to show, to point out, to indicate

> Before the new one: say the Spanish for to point to, then the Spanish for located.

You'll want to know: indicar

indicar — "to show, to point out, to indicate".

> ¿Me puede indicar el camino a la estación?
>
> *Can you show me the way to the station?*

A polite way to ask for directions.

The word, taken apart — and its English cousins

indicar is a learned borrowing from Latin *indicāre* "to point out, to show" (Lewis & Short; EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: indicar*
- *Say it: indicar*, once more
- *Say it:* a sentence of your own with *indicar*
- *Recall:* say the Spanish for to point to, then the Spanish for located, then say *indicar* again

Before you move on

What does indicar mean? ("To show, to point out, to indicate".) Say it once more.

670.2 la indicación — the instruction, the direction (how to get somewhere)

Before the new one: say the Spanish for located, then the Spanish for to show.

You'll want to know: la indicación

la indicación — "the instruction, the direction (how to get somewhere)".

Sigue las indicaciones del hotel.

Follow the hotel's directions.

In the plural, *las indicaciones* are directions.

The word, taken apart — and its English cousins

indicación is a learned borrowing from Latin *indicātiō* (EtymDB), from *indicāre* "to point out".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la indicación*
- *Say it: la indicación*, once more
- *Say it:* a sentence of your own with *la indicación*
- *Recall:* say the Spanish for located, then the Spanish for to show, then say *la indicación* again

Before you move on

What does la indicación mean? ("The instruction, the direction (how to get somewhere)".) Say it once more.

670.3 doblar — to turn (a corner); to fold; to dub

Before the new one: say the Spanish for to show, then the Spanish for the instruction.

You'll want to know: doblar

doblar — "to turn (a corner); to fold; to dub".

Dobla a la izquierda en la plaza.

Turn left at the square.

Very common for turning in Latin America; Spain also says *girar*. *Una película doblada* is a dubbed film.

The word, taken apart — and its English cousins

doblar is inherited from Late Latin *duplāre* "to double" (Lewis & Short; EtymDB), built on *duplus* "double".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: doblar*
- *Say it: doblar*, once more
- *Say it:* a sentence of your own with *doblar*
- *Recall:* say the Spanish for to show, then the Spanish for the instruction, then say *doblar* again

Before you move on

What does doblar mean? ("To turn (a corner); to fold; to dub".) Say it once more.

670.4 atravesar — to cross, to go through

Before the new one: say the Spanish for the instruction, then the Spanish for to turn.

You'll want to know: atravesar

atravesar — "to cross, to go through".

Atravesamos el parque a pie.

We went through the park on foot.

The e becomes ie under stress: *atravieso*, *atraviesa*.

The word, taken apart — and its English cousins

atravesar is built on *través* "crossways", which is inherited from Latin *trānsversus* "lying across" (EtymDB), from *trans* and *vertere* "to turn".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: atravesar*
- *Say it: atravesar*, once more
- *Say it:* a sentence of your own with *atravesar*
- *Recall:* say the Spanish for the instruction, then the Spanish for to turn, then say *atravesar* again

Before you move on

What does atravesar mean? ("To cross, to go through".) Say it once more.

670.5 desviarse — to turn off, to leave the road; to go off course

Before the new one: say the Spanish for to turn, then the Spanish for to cross.

You'll want to know: desviarse

desviarse — "to turn off, to leave the road; to go off course".

Desvíate en la próxima salida.

Turn off at the next exit.

The i takes a written accent in some forms: *te desvías*, *se desvía*.

The word, taken apart — and its English cousins

desviarse is built on *desviar*, from Late Latin *dēviāre* "to turn aside, to stray" (EtymDB), built on *via* "road".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *desviarse*
- *Say it:* *desviarse*, once more
- *Say it:* a sentence of your own with *desviarse*
- *Recall:* say the Spanish for to turn, then the Spanish for to cross, then say *desviarse* again

Before you move on

What does desviarse mean? ("To turn off, to leave the road; to go off course".) Say it once more.

Chapter 671

Cerca y lejos

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say how near or far a place is, and whether to take a short cut or the long way round.
>
> *Complete the last lesson of chapter 671: I can say how near or far a place is, and whether to take a short cut or the long way round.*

671.1 cercano — nearby, close

> Before the new one: say the Spanish for to cross, then the Spanish for to turn off.

You'll want to know: cercano

cercano — "nearby, close".

> Busco una farmacia cercana.
>
> *I am looking for a nearby chemist.*

Un amigo cercano — a close friend.

The word, taken apart — and its English cousins

cercano is built on *cerca* "near" (EtymDB), which comes from Latin *circā* "around".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: cercano*
- *Say it: cercano*, once more
- *Say it:* a sentence of your own with *cercano*
- *Recall:* say the Spanish for to cross, then the Spanish for to turn off, then say *cercano* again

Before you move on

What does cercano mean? ("Nearby, close".) Say it once more.

671.2 lejano — distant, far-off

Before the new one: say the Spanish for to turn off, then the Spanish for nearby.

You'll want to know: lejano

lejano — "distant, far-off".

Viven en un pueblo lejano.

They live in a far-off village.

The adverb is *lejos*.

The word, taken apart — and its English cousins

lejano is built on *lejos* "far" (EtymDB), which is usually traced to Latin *laxius* "more loosely, more widely", from *laxus* "loose".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: lejano*
- *Say it: lejano*, once more
- *Say it:* a sentence of your own with *lejano*
- *Recall:* say the Spanish for to turn off, then the Spanish for nearby, then say *lejano* again

Before you move on

What does lejano mean? ("Distant, far-off".) Say it once more.

671.3 el atajo — the short cut

Before the new one: say the Spanish for nearby, then the Spanish for distant.

You'll want to know: el atajo

el atajo — "the short cut".

Por este atajo llegamos antes.

We get there sooner by this short cut.

Coger un atajo — to take a short cut.

The word, taken apart — and its English cousins

atajo is built on *atajar* "to cut short", from *tajar* "to cut" (EtymDB), which comes from Late Latin *taliāre* "to cut".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el atajo*
- *Say it:* *el atajo*, once more
- *Say it:* a sentence of your own with *el atajo*
- *Recall:* say the Spanish for nearby, then the Spanish for distant, then say *el atajo* again

Before you move on

What does el atajo mean? (“The short cut”.) Say it once more.

671.4 adelante — forward, ahead

Before the new one: say the Spanish for distant, then the Spanish for the short cut.

You’ll want to know: adelante

adelante — “forward, ahead”.

Siga adelante hasta el cruce.

Keep going to the junction.

¡Adelante! also means come in! or go ahead!

The word, taken apart — and its English cousins

adelante comes from *delante* “in front” and Old Spanish *denante* (EtymDB), a fusion of Latin *de*, *in* and *ante* “before”.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: adelante*
- *Say it: adelante*, once more
- *Say it:* a sentence of your own with *adelante*
- *Recall:* say the Spanish for distant, then the Spanish for the short cut, then say *adelante* again

Before you move on

What does adelante mean? (“Forward, ahead”.) Say it once more.

671.5 el rodeo — the detour, the long way round; the rodeo

Before the new one: say the Spanish for the short cut, then the Spanish for forward.

You’ll want to know: el rodeo

el rodeo — “the detour, the long way round; the rodeo”.

Si vamos por el puente, damos un rodeo.

If we go over the bridge, we go the long way round.

Sin rodeos — without beating about the bush.

The word, taken apart — and its English cousins

rodeo is built on *rodear* “to go round”, from *rueda* “wheel”, which is inherited from Latin *rota*.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el rodeo*
- *Say it: el rodeo*, once more
- *Say it:* a sentence of your own with *el rodeo*
- *Recall:* say the Spanish for the short cut, then the Spanish for forward, then say *el rodeo* again

Before you move on

What does el rodeo mean? ("The detour, the long way round; the rodeo".) Say it once more.

671.6 Repaso de los capítulos 664–671

Say the Spanish for the sheet and the balcony.

Your turn

Say these aloud:

- the sheet, the balcony, the view, the socket, the tap
- the complaint, the minor damage, to compensate, the manager, the owner
- the sleeping bag, to camp, the sleeping mat, the caravan, the torch
- the flat, the proprietor, the host, the tenant, to rent
- to undo, to pack up, the scales, the excess, to drag
- the street map, to find your way, the location, to point to, located
- to show, the instruction, to turn, to cross, to turn off
- nearby, distant, the short cut, forward, the detour

Before you move on

The sheet? (**la sábana**.) The balcony? (**el balcón**.) The view? (**la vista**.) The socket? (**el enchufe**.) The tap? (**el grifo**.) The complaint? (**la queja**.) The minor damage? (**el desperfecto**.) To compensate? (**compensar**.) The manager? (**el gerente**.) The owner? (**el dueño**.) The sleeping bag? (**el saco de dormir**.) To camp? (**acampar**.) The sleeping mat? (**la esterilla**.) The caravan? (**la caravana**.) The torch? (**la linterna**.) The flat? (**el apartamento**.) The proprietor? (**el propietario**.) The host? (**el anfitrión**.) The tenant? (**el inquilino**.) To rent? (**alquilar**.) To undo? (**deshacer**.) To pack up? (**empaquetar**.) The scales? (**la báscula**.) The excess? (**el exceso**.) To drag? (**arrastrar**.) The street map? (**el plano**.) To find your way? (**orientarse**.) The location? (**la ubicación**.) To point to? (**señalar**.) Located? (**situado**.) To show? (**indicar**.) The instruction? (**la indicación**.) To turn? (**doblar**.) To cross? (**atravesar**.) To turn off? (**desviarse**.) Nearby? (**cercano**.) Distant? (**lejano**.) The short cut? (**el atajo**.) Forward? (**adelante**.) The detour? (**el rodeo**.)

Chapter 672

Carteles y flechas

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can read signs on the way: signposts, notices, arrows, the signposting and diversions.
>
> *Complete the last lesson of chapter 672: I can read signs on the way: signposts, notices, arrows, the signposting and diversions.*

672.1 el indicador — the signpost, the sign; the gauge

> Before the new one: say the Spanish for forward, then the Spanish for the detour.

You'll want to know: el indicador

el indicador — "the signpost, the sign; the gauge".

> Sigue los indicadores hacia el centro.
>
> *Follow the signs for the centre.*

In a car, *el indicador* also shows the fuel or the speed.

The word, taken apart — and its English cousins

indicador is built on *indicar* "to point out", a learned borrowing from Latin *indicāre* (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el indicador*
- *Say it: el indicador*, once more
- *Say it:* a sentence of your own with *el indicador*
- *Recall:* say the Spanish for forward, then the Spanish for the detour, then say *el indicador* again

Before you move on

What does el indicador mean? ("The signpost, the sign; the gauge".) Say it once more.

672.2 el letrero — the sign (with words), the notice

Before the new one: say the Spanish for the detour, then the Spanish for the signpost.

You'll want to know: el letrero

el letrero — "the sign (with words), the notice".

El letrero de la tienda es azul.

The shop sign is blue.

Close to *el cartel*; a *letrero* is the one made of letters.

The word, taken apart — and its English cousins

letrero is built on *letra* "letter" with *-ero* (EtymDB), and *letra* is inherited from Latin *littera*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el letrero*
- *Say it: el letrero*, once more
- *Say it:* a sentence of your own with *el letrero*
- *Recall:* say the Spanish for the detour, then the Spanish for the signpost, then say *el letrero* again

Before you move on

What does el letrero mean? ("The sign (with words), the notice".) Say it once more.

672.3 la flecha — the arrow

Before the new one: say the Spanish for the signpost, then the Spanish for the sign.

You'll want to know: la flecha

la flecha — "the arrow".

Sigue las flechas amarillas.

Follow the yellow arrows.

On a map or a sign, the arrow shows the way.

The word, taken apart — and its English cousins

flecha is usually traced to French *flèche* "arrow", a word of Germanic origin.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la flecha*
- *Say it: la flecha*, once more
- *Say it:* a sentence of your own with *la flecha*
- *Recall:* say the Spanish for the signpost, then the Spanish for the sign, then say *la flecha* again

Before you move on

What does la flecha mean? ("The arrow".) Say it once more.

672.4 la señalización — the signs, the signposting

Before the new one: say the Spanish for the sign, then the Spanish for the arrow.

You'll want to know: la señalización

la señalización — "the signs, the signposting".

La señalización de la ciudad es muy clara.

The signposting in the city is very clear.

All the road signs together.

The word, taken apart — and its English cousins

señalización is built on *señalizar* (EtymDB), from *señal* "sign", inherited from Late Latin *signāle*, from *signum* "a mark".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la señalización*
- *Say it: la señalización*, once more
- *Say it:* a sentence of your own with *la señalización*
- *Recall:* say the Spanish for the sign, then the Spanish for the arrow, then say *la señalización* again

Before you move on

What does la señalización mean? ("The signs, the signposting".) Say it once more.

672.5 el desvío — the diversion, the detour

Before the new one: say the Spanish for the arrow, then the Spanish for the signs.

You'll want to know: el desvío

el desvío — "the diversion, the detour".

Hay un desvío por obras.

There is a diversion because of roadworks.

The verb is *desviar*, to divert.

The word, taken apart — and its English cousins

desvío is built on *desviar* "to divert", from Late Latin *dēviāre* "to leave the road", built on *via* "road".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el desvío*
- *Say it: el desvío*, once more
- *Say it:* a sentence of your own with *el desvío*
- *Recall:* say the Spanish for the arrow, then the Spanish for the signs, then say *el desvío* again

Before you move on

What does el desvío mean? ("The diversion, the detour".) Say it once more.

Chapter 673

Hacia dónde

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say where people are heading, taking a short cut, going back, going round or skirting along.
>
> *Complete the last lesson of chapter 673: I can say where people are heading, taking a short cut, going back, going round or skirting along.*

673.1 dirigirse — to head (for), to make your way; to speak to

> Before the new one: say the Spanish for the signs, then the Spanish for the diversion.

You'll want to know: dirigirse

dirigirse — "to head (for), to make your way; to speak to".

> Nos dirigimos a la salida.
>
> *We are heading for the exit.*

Dirigirse a alguien — to address someone. The g becomes j: *me dirijo.*

The word, taken apart — and its English cousins

dirigirse is built on *dirigir*, a learned borrowing from Latin *dīrigere* "to lay straight, to direct" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: dirigirse*
- *Say it: dirigirse*, once more
- *Say it:* a sentence of your own with *dirigirse*
- *Recall:* say the Spanish for the signs, then the Spanish for the diversion, then say *dirigirse* again

Before you move on

What does dirigirse mean? ("To head (for), to make your way; to speak to".) Say it once more.

673.2 acortar — to shorten; to cut short

Before the new one: say the Spanish for the diversion, then the Spanish for to head.

You'll want to know: acortar

acortar — "to shorten; to cut short".

Por el parque acortamos camino.

Going through the park shortens the way.

Acortar camino — to take a short cut; *el atajo* is the short cut itself.

The word, taken apart — and its English cousins

acortar is built on *corto* "short", which is inherited from Latin *curtus* "shortened, incomplete" (EtymDB); EtymDB also links it with *cortar* "to cut", from the same Latin word.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: acortar*
- *Say it: acortar*, once more
- *Say it:* a sentence of your own with *acortar*
- *Recall:* say the Spanish for the diversion, then the Spanish for to head, then say *acortar* again

Before you move on

What does acortar mean? ("To shorten; to cut short".) Say it once more.

673.3 retroceder — to go back, to back up

Before the new one: say the Spanish for to head, then the Spanish for to shorten.

You'll want to know: retroceder

retroceder — "to go back, to back up".

Tuvimos que retroceder dos kilómetros.

We had to go back two kilometres.

In a car, *dar marcha atrás* is to reverse.

The word, taken apart — and its English cousins

retroceder is a learned borrowing from Latin *retrōcēdere* "to go back, to retire" (Lewis & Short; EtymDB), from *retrō* "back" and *cēdere* "to go".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: retroceder*
- *Say it: retroceder*, once more
- *Say it:* a sentence of your own with *retroceder*
- *Recall:* say the Spanish for to head, then the Spanish for to shorten, then say *retroceder* again

Before you move on

What does retroceder mean? ("To go back, to back up".) Say it once more.

673.4 rodear — to go round; to surround

Before the new one: say the Spanish for to shorten, then the Spanish for to go back.

You'll want to know: rodear

rodear — "to go round; to surround".

Rodeamos el lago a pie.

We walked round the lake.

Rodeado de — surrounded by.

The word, taken apart — and its English cousins

rodear is built on *rueda* "wheel", which is inherited from Latin *rota*: to go round as a wheel does.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rodear*
- *Say it: rodear*, once more
- *Say it:* a sentence of your own with *rodear*
- *Recall:* say the Spanish for to shorten, then the Spanish for to go back, then say *rodear* again

Before you move on

What does rodear mean? ("To go round; to surround".) Say it once more.

673.5 bordear — to go along the edge of, to skirt

Before the new one: say the Spanish for to go back, then the Spanish for to go round.

You'll want to know: bordear

bordear — "to go along the edge of, to skirt".

El camino bordea la costa.

The path runs along the coast.

Close to *rodear*, but along the edge rather than all the way round.

The word, taken apart — and its English cousins

bordear is built on *borde* "edge", which came from French *bord* (EtymDB), a word of Germanic origin.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *bordear*
- *Say it:* *bordear*, once more
- *Say it:* a sentence of your own with *bordear*
- *Recall:* say the Spanish for to go back, then the Spanish for to go round, then say *bordear* again

Before you move on

What does bordear mean? (“To go along the edge of, to skirt”.) Say it once more.

Chapter 674

De paseo

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about walking round a town: strolling, going on foot and following a route.
>
> *Complete the last lesson of chapter 674: I can talk about walking round a town: strolling, going on foot and following a route.*

674.1 pasear — to go for a walk, to stroll

> Before the new one: say the Spanish for to go round, then the Spanish for to go along the edge of.

You'll want to know: pasear

pasear — "to go for a walk, to stroll".

> Por la tarde paseamos por el puerto.
>
> *In the evening we stroll round the harbour.*

Pasear al perro — to walk the dog.

The word, taken apart — and its English cousins

pasear is built on *paso* "step" (EtymDB), which is inherited from Latin *passus* "a step".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: pasear*
- *Say it: pasear*, once more
- *Say it:* a sentence of your own with *pasear*
- *Recall:* say the Spanish for to go round, then the Spanish for to go along the edge of, then say *pasear* again

Before you move on

What does pasear mean? ("To go for a walk, to stroll".) Say it once more.

674.2 el paseo — the walk, the stroll; the promenade

Before the new one: say the Spanish for to go along the edge of, then the Spanish for to go for a walk.

You'll want to know: el paseo

el paseo — "the walk, the stroll; the promenade".

Damos un paseo después de cenar.

We go for a walk after dinner.

Dar un paseo — to go for a walk. *El paseo marítimo* — the seafront.

The word, taken apart — and its English cousins

paseo is built on *pasear* "to stroll" (EtymDB), from *paso* "step", Latin *passus*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el paseo*
- *Say it: el paseo*, once more
- *Say it:* a sentence of your own with *el paseo*
- *Recall:* say the Spanish for to go along the edge of, then the Spanish for to go for a walk, then say *el paseo* again

Before you move on

What does el paseo mean? ("The walk, the stroll; the promenade".) Say it once more.

674.3 callejear — to wander the streets

Before the new one: say the Spanish for to go for a walk, then the Spanish for the walk.

You'll want to know: callejear

callejear — "to wander the streets".

Me encanta callejear por el barrio viejo.

I love wandering the streets of the old quarter.

Built on *la calle*: walking with no plan.

The word, taken apart — and its English cousins

callejear is built on *calle* "street", which is inherited from Latin *callis* "a footpath".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: callejear*
- *Say it: callejear*, once more
- *Say it:* a sentence of your own with *callejear*
- *Recall:* say the Spanish for to go for a walk, then the Spanish for the walk, then say *callejear* again

Before you move on

What does callejear mean? ("To wander the streets".) Say it once more.

674.4 recorrer — to travel around, to go all over; to cover (a distance)

Before the new one: say the Spanish for the walk, then the Spanish for to wander the streets.

You'll want to know: recorrer

recorrer — "to travel around, to go all over; to cover (a distance)".

Queremos recorrer todo el país.

We want to travel all over the country.

It takes a direct object: *recorrer la ciudad.*

The word, taken apart — and its English cousins

recorrer is inherited from Latin *recurrere* "to run back" (Lewis & Short; EtymDB), built on *currere* "to run".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: recorrer*
- *Say it: recorrer*, once more
- *Say it:* a sentence of your own with *recorrer*
- *Recall:* say the Spanish for the walk, then the Spanish for to wander the streets, then say *recorrer* again

Before you move on

What does recorrer mean? ("To travel around, to go all over; to cover (a distance)".) Say it once more.

674.5 el recorrido — the route, the tour

Before the new one: say the Spanish for to wander the streets, then the Spanish for to travel around.

You'll want to know: el recorrido

el recorrido — "the route, the tour".

El recorrido dura dos horas.

The tour takes two hours.

Un recorrido guiado — a guided tour.

The word, taken apart — and its English cousins

recorrido is the past form of *recorrer*, which is inherited from Latin *recurrere* "to run back", built on *currere* "to run".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el recorrido*
- *Say it:* *el recorrido*, once more
- *Say it:* a sentence of your own with *el recorrido*
- *Recall:* say the Spanish for to wander the streets, then the Spanish for to travel around, then say *el recorrido* again

Before you move on

What does el recorrido mean? ("The route, the tour".) Say it once more.

Chapter 675

Las partes de la ciudad

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about parts of a town: the outskirts, the blocks, an alley, arcades and cobbled streets.
>
> *Complete the last lesson of chapter 675: I can talk about parts of a town: the outskirts, the blocks, an alley, arcades and cobbled streets.*

675.1 las afueras — the outskirts

> Before the new one: say the Spanish for to travel around, then the Spanish for the route.

You'll want to know: las afueras

las afueras — "the outskirts".

> Vivimos en las afueras de la ciudad.
>
> *We live on the outskirts of the city.*

Always plural: *las afueras*.

The word, taken apart — and its English cousins

afueras is built on *afuera* and *fuera* "outside", which come from Latin *forās* "out of doors" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: las afueras*
- *Say it: las afueras*, once more
- *Say it:* a sentence of your own with *las afueras*
- *Recall:* say the Spanish for to travel around, then the Spanish for the route, then say *las afueras* again

Before you move on

What does las afueras mean? ("The outskirts".) Say it once more.

675.2 la cuadra — the block (of a street) (Latin America); the stable

Before the new one: say the Spanish for the route, then the Spanish for the outskirts.

You'll want to know: la cuadra

la cuadra — "the block (of a street) (Latin America); the stable".

El hotel está a dos cuadras.

The hotel is two blocks away.

Spain says *la manzana* for a block; there *la cuadra* is a stable.

The word, taken apart — and its English cousins

cuadra comes from Latin *quadra* "a square" (Lewis & Short): a city block is a square of streets.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la cuadra*
- *Say it: la cuadra*, once more
- *Say it:* a sentence of your own with *la cuadra*
- *Recall:* say the Spanish for the route, then the Spanish for the outskirts, then say *la cuadra* again

Before you move on

What does la cuadra mean? ("The block (of a street) (Latin America); the stable".) Say it once more.

675.3 el callejón — the alley, the lane

Before the new one: say the Spanish for the outskirts, then the Spanish for the block.

You'll want to know: el callejón

el callejón — "the alley, the lane".

El bar está en un callejón.

The bar is down an alley.

Un callejón sin salida — a dead end.

The word, taken apart — and its English cousins

callejón is built on *calleja* "a little street" (EtymDB), and *calle* is inherited from Latin *callis* "a footpath".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el callejón*
- *Say it: el callejón*, once more
- *Say it:* a sentence of your own with *el callejón*
- *Recall:* say the Spanish for the outskirts, then the Spanish for the block, then say *el callejón* again

Before you move on

What does el callejón mean? ("The alley, the lane".) Say it once more.

675.4 el soportal — the arcade (covered walkway)

Before the new one: say the Spanish for the block, then the Spanish for the alley.

You'll want to know: el soportal

el soportal — "the arcade (covered walkway)".

Con la lluvia caminamos bajo los soportales.

In the rain we walk under the arcades.

Often plural: *los soportales* of a main square.

The word, taken apart — and its English cousins

soportal is built from *so-* "under", from Latin *sub*, and *portal* "doorway", from Latin *porta* "gate".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el soportal*
- *Say it: el soportal*, once more
- *Say it:* a sentence of your own with *el soportal*
- *Recall:* say the Spanish for the block, then the Spanish for the alley, then say *el soportal* again

Before you move on

What does el soportal mean? (“The arcade (covered walkway)”.) Say it once more.

675.5 el adoquín — the paving stone, the cobblestone

Before the new one: say the Spanish for the alley, then the Spanish for the arcade.

You’ll want to know: el adoquín

el adoquín — “the paving stone, the cobblestone”.

Las calles del centro son de adoquines.

The streets in the centre are cobbled.

Hard work for a suitcase on wheels.

The word, taken apart — and its English cousins

adoquín comes from Andalusian Arabic *ad-dukkán* “stone bench”, from Arabic *dukkān* (EtymDB).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el adoquín*
- *Say it:* *el adoquín*, once more
- *Say it:* a sentence of your own with *el adoquín*
- *Recall:* say the Spanish for the alley, then the Spanish for the arcade, then say *el adoquín* again

Before you move on

What does el adoquín mean? ("The paving stone, the cobblestone".) Say it once more.

Chapter 676

Turismo

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about tourism, pick up a leaflet, find a viewpoint and haggle at a market.
>
> *Complete the last lesson of chapter 676: I can talk about tourism, pick up a leaflet, find a viewpoint and haggle at a market.*

676.1 el turismo — tourism; a private car (Spain, on forms)

> Before the new one: say the Spanish for the arcade, then the Spanish for the paving stone.

You'll want to know: el turismo

el turismo — "tourism; a private car (Spain, on forms)".

> El turismo es importante aquí.
>
> *Tourism is important here.*

Hacer turismo — to go sightseeing.

The word, taken apart — and its English cousins

turismo was borrowed from English *tourism* (EtymDB), built on *tour*, from French *tour* "a turn, a round trip".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el turismo*
- *Say it: el turismo*, once more
- *Say it:* a sentence of your own with *el turismo*
- *Recall:* say the Spanish for the arcade, then the Spanish for the paving stone, then say *el turismo* again

Before you move on

What does el turismo mean? ("Tourism; a private car (Spain, on forms)".) Say it once more.

676.2 el mirador — the viewpoint; the glazed balcony

Before the new one: say the Spanish for the paving stone, then the Spanish for tourism.

You'll want to know: el mirador

el mirador — "the viewpoint; the glazed balcony".

Desde el mirador se ve toda la ciudad.

The whole city can be seen from the viewpoint.

Built on *mirar*: a place for looking.

The word, taken apart — and its English cousins

mirador is built on *mirar* "to look", which is inherited from Latin *mīrārī* "to wonder at".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el mirador*
- *Say it: el mirador*, once more
- *Say it:* a sentence of your own with *el mirador*
- *Recall:* say the Spanish for the paving stone, then the Spanish for tourism, then say *el mirador* again

Before you move on

What does el mirador mean? ("The viewpoint; the glazed balcony".) Say it once more.

676.3 turístico — tourist (as an adjective); touristy

Before the new one: say the Spanish for tourism, then the Spanish for the viewpoint.

You'll want to know: turístico

turístico — "tourist (as an adjective); touristy".

Es una zona muy turística.

It is a very touristy area.

Clase turista — economy class.

The word, taken apart — and its English cousins

turístico is built on *turista* "tourist", which comes from English *tourist*, from French *tour* "a turn".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: turístico*
- *Say it: turístico*, once more
- *Say it:* a sentence of your own with *turístico*
- *Recall:* say the Spanish for tourism, then the Spanish for the viewpoint, then say *turístico* again

Before you move on

What does turístico mean? ("Tourist (as an adjective); touristy".) Say it once more.

676.4 el folleto — the leaflet, the brochure

Before the new one: say the Spanish for the viewpoint, then the Spanish for tourist.

You'll want to know: el folleto

el folleto — "the leaflet, the brochure".

Coge un folleto en la oficina de turismo.

Take a leaflet at the tourist office.

Hotels and museums give them out for free.

The word, taken apart — and its English cousins

folleto came from Italian *foglietto* "a little sheet" (EtymDB), built on *foglio*, from Latin *folium* "leaf".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el folleto*
- *Say it: el folleto*, once more
- *Say it:* a sentence of your own with *el folleto*
- *Recall:* say the Spanish for the viewpoint, then the Spanish for tourist, then say *el folleto* again

Before you move on

What does el folleto mean? ("The leaflet, the brochure".) Say it once more.

676.5 regatear — to haggle, to bargain

Before the new one: say the Spanish for tourist, then the Spanish for the leaflet.

You'll want to know: regatear

regatear — "to haggle, to bargain".

En el mercado puedes regatear un poco.

At the market you can haggle a little.

Shops have fixed prices; at a market stall you can try.

The word, taken apart — and its English cousins

regatear is usually traced, through older *recatear* (EtymDB), to Vulgar Latin *recaptāre*, built on Latin *captāre* "to try to seize".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: regatear*
- *Say it: regatear*, once more
- *Say it:* a sentence of your own with *regatear*
- *Recall:* say the Spanish for tourist, then the Spanish for the leaflet, then say *regatear* again

Before you move on

What does regatear mean? ("To haggle, to bargain".) Say it once more.

Chapter 677

Monumentos

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about the sights of an old town: monuments, the cathedral, the castle, the palace and the walls.
>
> *Complete the last lesson of chapter 677: I can talk about the sights of an old town: monuments, the cathedral, the castle, the palace and the walls.*

677.1 el monumento — the monument, the sight

> Before the new one: say the Spanish for the leaflet, then the Spanish for to haggle.

You'll want to know: el monumento

el monumento — "the monument, the sight".

> Visitamos el monumento más famoso.
>
> *We visited the most famous monument.*

Monumentos are the sights of a town.

The word, taken apart — and its English cousins

monumento is a learned borrowing from Latin *monumentum* "that which keeps a memory, a memorial" (Lewis & Short; EtymDB), from *monēre* "to remind".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el monumento*
- *Say it: el monumento*, once more
- *Say it:* a sentence of your own with *el monumento*
- *Recall:* say the Spanish for the leaflet, then the Spanish for to haggle, then say *el monumento* again

Before you move on

What does el monumento mean? ("The monument, the sight".) Say it once more.

677.2 la catedral — the cathedral

Before the new one: say the Spanish for to haggle, then the Spanish for the monument.

You'll want to know: la catedral

la catedral — "the cathedral".

La catedral es del siglo XIII.

The cathedral is from the thirteenth century.

The bishop's church of a city.

The word, taken apart — and its English cousins

catedral is a learned borrowing from Latin *(ecclesia) cathedrālis* "the church with the chair", from *cathedra* "a chair" (Lewis & Short), Greek *kathédra*: the bishop's seat.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la catedral*
- *Say it: la catedral*, once more
- *Say it:* a sentence of your own with *la catedral*
- *Recall:* say the Spanish for to haggle, then the Spanish for the monument, then say *la catedral* again

Before you move on

What does la catedral mean? ("The cathedral".) Say it once more.

677.3 el castillo — the castle

Before the new one: say the Spanish for the monument, then the Spanish for the cathedral.

You'll want to know: el castillo

el castillo — "the castle".

Desde el castillo se ve todo el pueblo.

The whole town can be seen from the castle.

Hacer castillos en el aire — to build castles in the air.

The word, taken apart — and its English cousins

castillo is inherited from Latin *castellum* "a castle, a fort" (Lewis & Short), a little *castrum* "fortified camp".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el castillo*
- *Say it: el castillo*, once more
- *Say it:* a sentence of your own with *el castillo*
- *Recall:* say the Spanish for the monument, then the Spanish for the cathedral, then say *el castillo* again

Before you move on

What does el castillo mean? ("The castle".) Say it once more.

677.4 el palacio — the palace

Before the new one: say the Spanish for the cathedral, then the Spanish for the castle.

You'll want to know: el palacio

el palacio — "the palace".

El rey vivía en este palacio.

The king lived in this palace.

El Palacio de Justicia — the law courts.

The word, taken apart — and its English cousins

palacio is a learned borrowing from Latin *palātium* (EtymDB), named after the Palatine hill in Rome, where the emperors had their houses.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el palacio*
- *Say it: el palacio*, once more
- *Say it:* a sentence of your own with *el palacio*
- *Recall:* say the Spanish for the cathedral, then the Spanish for the castle, then say *el palacio* again

Before you move on

What does el palacio mean? (“The palace”.) Say it once more.

677.5 la muralla — the city wall, the ramparts

Before the new one: say the Spanish for the castle, then the Spanish for the palace.

You’ll want to know: la muralla

la muralla — “the city wall, the ramparts”.

La muralla rodea el casco antiguo.

The city wall runs round the old town.

A garden wall is *un muro*; a city wall is *la muralla*.

The word, taken apart — and its English cousins

muralla is built on *muro* “wall”, which is inherited from Latin *mūrus* (Lewis & Short).

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *la muralla*
- *Say it:* *la muralla*, once more
- *Say it:* a sentence of your own with *la muralla*
- *Recall:* say the Spanish for the castle, then the Spanish for the palace, then say *la muralla* again

Before you move on

What does la muralla mean? (“The city wall, the ramparts”.) Say it once more.

Chapter 678

De visita

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can plan a visit to a town: statues, towers, galleries and a country chapel.
>
> *Complete the last lesson of chapter 678: I can plan a visit to a town: statues, towers, galleries and a country chapel.*

678.1 visitar — to visit

> Before the new one: say the Spanish for the palace, then the Spanish for the city wall.

You'll want to know: visitar

visitar — "to visit".

> Queremos visitar el museo mañana.
>
> *We want to visit the museum tomorrow.*

For people, use *a*: *visitar a mis abuelos*.

The word, taken apart — and its English cousins

visitar comes from Latin *vīsitāre* "to see, to go to see" (Lewis & Short; EtymDB), built on *vīsere* "to go and see", from *vidēre* "to see".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: visitar*
- *Say it: visitar*, once more
- *Say it:* a sentence of your own with *visitar*
- *Recall:* say the Spanish for the palace, then the Spanish for the city wall, then say *visitar* again

Before you move on

What does visitar mean? ("To visit".) Say it once more.

678.2 la ermita — the country chapel, the hermitage

Before the new one: say the Spanish for the city wall, then the Spanish for to visit.

You'll want to know: la ermita

la ermita — "the country chapel, the hermitage".

Subimos a la ermita del pueblo.

We walked up to the village chapel.

Many villages walk to their *ermita* on a feast day.

The word, taken apart — and its English cousins

ermita goes back to Late Latin *erēmīta* "a hermit" (Lewis & Short), from Greek *erēmítēs*, built on *érēmos* "lonely, desert": the hermit lived alone.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ermita*
- *Say it: la ermita*, once more
- *Say it:* a sentence of your own with *la ermita*
- *Recall:* say the Spanish for the city wall, then the Spanish for to visit, then say *la ermita* again

Before you move on

What does la ermita mean? ("The country chapel, the hermitage".) Say it once more.

678.3 la estatua — the statue

Before the new one: say the Spanish for to visit, then the Spanish for the country chapel.

You'll want to know: la estatua

la estatua — "the statue".

Hay una estatua en el centro de la plaza.

There is a statue in the middle of the square.

Quedarse como una estatua — to stand stock-still.

The word, taken apart — and its English cousins

estatua is a learned borrowing from Latin *statua* "an image, a statue" (Lewis & Short; EtymDB), from *statuere* "to set up".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la estatua*
- *Say it: la estatua*, once more
- *Say it:* a sentence of your own with *la estatua*
- *Recall:* say the Spanish for to visit, then the Spanish for the country chapel, then say *la estatua* again

Before you move on

What does la estatua mean? ("The statue".) Say it once more.

678.4 la torre — the tower

Before the new one: say the Spanish for the country chapel, then the Spanish for the statue.

You'll want to know: la torre

la torre — "the tower".

Subimos a la torre de la iglesia.

We went up the church tower.

In Spain *una torre* is also a tall block of flats.

The word, taken apart — and its English cousins

torre is inherited, through Old Spanish *torre*, from Latin *turris* "a tower" (Lewis & Short; EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la torre*
- *Say it: la torre*, once more
- *Say it:* a sentence of your own with *la torre*
- *Recall:* say the Spanish for the country chapel, then the Spanish for the statue, then say *la torre* again

Before you move on

What does la torre mean? ("The tower".) Say it once more.

678.5 la galería — the gallery; the covered balcony

Before the new one: say the Spanish for the statue, then the Spanish for the tower.

You'll want to know: la galería

la galería — "the gallery; the covered balcony".

La galería tiene cuadros modernos.

The gallery has modern paintings.

Galerías comerciales — a shopping arcade.

The word, taken apart — and its English cousins

galería came from Italian *galleria*, a covered walk; where the word itself comes from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la galería*
- *Say it: la galería*, once more
- *Say it:* a sentence of your own with *la galería*
- *Recall:* say the Spanish for the statue, then the Spanish for the tower, then say *la galería* again

Before you move on

What does la galería mean? ("The gallery; the covered balcony".) Say it once more.

Chapter 679

Servicios de la ciudad

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can find the police station, the embassy, the tobacconist, stamps and the toilets.
>
> *Complete the last lesson of chapter 679: I can find the police station, the embassy, the tobacconist, stamps and the toilets.*

679.1 la comisaría — the police station

> Before the new one: say the Spanish for the tower, then the Spanish for the gallery.

You'll want to know: la comisaría

la comisaría — "the police station".

> La comisaría está al lado del ayuntamiento.
>
> *The police station is next to the town hall.*

In Latin America also *la estación de policía*.

The word, taken apart — and its English cousins

comisaría is built on *comisario* "commissioner", from Medieval Latin *commissārius* "one entrusted", from *committere* "to entrust".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la comisaría*
- *Say it: la comisaría*, once more
- *Say it:* a sentence of your own with *la comisaría*
- *Recall:* say the Spanish for the tower, then the Spanish for the gallery, then say *la comisaría* again

Before you move on

What does la comisaría mean? ("The police station".) Say it once more.

679.2 la embajada — the embassy

Before the new one: say the Spanish for the gallery, then the Spanish for the police station.

You'll want to know: la embajada

la embajada — "the embassy".

Perdí el pasaporte y llamé a la embajada.

I lost my passport and phoned the embassy.

The person is *el embajador*, *la embajadora*.

The word, taken apart — and its English cousins

embajada came from Occitan *ambaissada* "embassy" (EtymDB), from Late Latin *ambactia*, built on Gaulish *ambactos* "a servant, a messenger".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la embajada*
- *Say it: la embajada*, once more
- *Say it:* a sentence of your own with *la embajada*
- *Recall:* say the Spanish for the gallery, then the Spanish for the police station, then say *la embajada* again

Before you move on

What does la embajada mean? ("The embassy".) Say it once more.

679.3 el estanco — the tobacconist's (Spain)

Before the new one: say the Spanish for the police station, then the Spanish for the embassy.

You'll want to know: el estanco

el estanco — "the tobacconist's (Spain)".

El estanco de la plaza abre los domingos.

The tobacconist on the square opens on Sundays.

In Spain *el estanco* sells tobacco, and stamps too.

The word, taken apart — and its English cousins

estanco is built on *estancar* "to hold back", which EtymDB traces to Latin *stagnum* "standing water"; the shop once sold goods the state kept for itself.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el estanco*
- *Say it: el estanco*, once more
- *Say it:* a sentence of your own with *el estanco*
- *Recall:* say the Spanish for the police station, then the Spanish for the embassy, then say *el estanco* again

Before you move on

What does el estanco mean? ("The tobacconist's (Spain)".) Say it once more.

679.4 el sello — the stamp; the seal

Before the new one: say the Spanish for the embassy, then the Spanish for the tobacconist's.

You'll want to know: el sello

el sello — "the stamp; the seal".

Necesito un sello para esta carta.

I need a stamp for this letter.

In Latin America *la estampilla*, and in Mexico *el timbre*.

The word, taken apart — and its English cousins

sello is inherited from Latin *sigillum* "a little image, a seal", a little *signum* "sign".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el sello*
- *Say it: el sello*, once more
- *Say it:* a sentence of your own with *el sello*
- *Recall:* say the Spanish for the embassy, then the Spanish for the tobacconist's, then say *el sello* again

Before you move on

What does el sello mean? ("The stamp; the seal".) Say it once more.

679.5 el aseo — the toilet, the restroom (Spain); cleanliness

Before the new one: say the Spanish for the tobacconist's, then the Spanish for the stamp.

You'll want to know: el aseo

el aseo — "the toilet, the restroom (Spain); cleanliness".

¿Dónde están los aseos?

Where are the toilets?

Los aseos on a sign in Spain; Latin America says *el baño*.

The word, taken apart — and its English cousins

aseo is built on *asear* "to tidy, to clean" (EtymDB). The origin of *asear* is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el aseo*
- *Say it:* *el aseo*, once more
- *Say it:* a sentence of your own with *el aseo*
- *Recall:* say the Spanish for the tobacconist's, then the Spanish for the stamp, then say *el aseo* again

Before you move on

What does el aseo mean? ("The toilet, the restroom (Spain); cleanliness".) Say it once more.

679.6 Repaso de los capítulos 672–679

Say the Spanish for the signpost and the sign.

Your turn

Say these aloud:

- the signpost, the sign, the arrow, the signs, the diversion
- to head, to shorten, to go back, to go round, to go along the edge of
- to go for a walk, the walk, to wander the streets, to travel around, the route
- the outskirts, the block, the alley, the arcade, the paving stone
- tourism, the viewpoint, tourist, the leaflet, to haggle
- the monument, the cathedral, the castle, the palace, the city wall
- to visit, the country chapel, the statue, the tower, the gallery
- the police station, the embassy, the tobacconist's, the stamp, the toilet

Before you move on

The signpost? (**el indicador**.) The sign? (**el letrero**.) The arrow? (**la flecha**.) The signs? (**la señalización**.) The diversion? (**el desvío**.) To head? (**dirigirse**.) To shorten? (**acortar**.) To go back? (**retroceder**.) To go round? (**rodear**.) To go along the edge of? (**bordear**.) To go for a walk? (**pasear**.) The walk? (**el paseo**.) To wander the streets? (**callejear**.) To travel around? (**recorrer**.) The route? (**el recorrido**.) The outskirts? (**las afueras**.) The block? (**la cuadra**.) The alley? (**el callejón**.) The arcade? (**el soportal**.) The paving stone? (**el adoquín**.) Tourism? (**el turismo**.) The viewpoint? (**el mirador**.) Tourist? (**turístico**.) The leaflet? (**el folleto**.) To haggle? (**regatear**.) The monument? (**el monumento**.) The cathedral? (**la catedral**.) The castle? (**el castillo**.) The palace? (**el palacio**.) The city wall? (**la muralla**.) To visit? (**visitar**.) The country chapel? (**la ermita**.) The statue? (**la estatua**.) The tower? (**la torre**.) The gallery? (**la galería**.) The police station? (**la comisaría**.) The embassy? (**la embajada**.) The tobacconist's? (**el estanco**.) The stamp? (**el sello**.) The toilet? (**el aseo**.)

Chapter 680

Tiendas del barrio

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can find the cake shop, the stationer's, the hairdresser, the launderette and the ice-cream shop.
>
> *Complete the last lesson of chapter 680: I can find the cake shop, the stationer's, the hairdresser, the launderette and the ice-cream shop.*

680.1 la pastelería — the cake shop, the pastry shop

> Before the new one: say the Spanish for the stamp, then the Spanish for the toilet.

You'll want to know: la pastelería

la pastelería — "the cake shop, the pastry shop".

> Compramos un pastel en la pastelería.
>
> *We bought a cake at the cake shop.*

The baker of cakes is *el pastelero*.

The word, taken apart — and its English cousins

pastelería is built on *pastel* "cake" with *-ería* (EtymDB); *pastel* is usually traced to Late Latin *pasta* "dough".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la pastelería*
- *Say it: la pastelería*, once more
- *Say it:* a sentence of your own with *la pastelería*
- *Recall:* say the Spanish for the stamp, then the Spanish for the toilet, then say *la pastelería* again

Before you move on

What does la pastelería mean? ("The cake shop, the pastry shop".) Say it once more.

680.2 la papelería — the stationer's

Before the new one: say the Spanish for the toilet, then the Spanish for the cake shop.

You'll want to know: la papelería

la papelería — "the stationer's".

Venden cuadernos y bolígrafos en la papelería.

They sell notebooks and pens at the stationer's.

For pens, paper and envelopes.

The word, taken apart — and its English cousins

papelería is built on *papel* "paper", which came from Catalan *paper*, from Latin *papyrus* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la papelería*
- *Say it: la papelería*, once more
- *Say it:* a sentence of your own with *la papelería*
- *Recall:* say the Spanish for the toilet, then the Spanish for the cake shop, then say *la papelería* again

Before you move on

What does la papelería mean? ("The stationer's".) Say it once more.

680.3 la peluquería — the hairdresser's

Before the new one: say the Spanish for the cake shop, then the Spanish for the stationer's.

You'll want to know: la peluquería

la peluquería — "the hairdresser's".

La peluquería cierra los lunes.

The hairdresser's is closed on Mondays.

The hairdresser is *el peluquero*, *la peluquera*.

The word, taken apart — and its English cousins

peluquería is built on *peluca* "wig" (EtymDB), which came from French *perruque* and Italian before it.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la peluquería*
- *Say it: la peluquería*, once more
- *Say it:* a sentence of your own with *la peluquería*
- *Recall:* say the Spanish for the cake shop, then the Spanish for the stationer's, then say *la peluquería* again

Before you move on

What does la peluquería mean? ("The hairdresser's".) Say it once more.

680.4 la lavandería — the launderette, the laundry

Before the new one: say the Spanish for the stationer's, then the Spanish for the hairdresser's.

You'll want to know: la lavandería

la lavandería — "the launderette, the laundry".

En el barrio hay una lavandería.

There is a launderette in the neighbourhood.

Lavandería automática — self-service launderette.

The word, taken apart — and its English cousins

lavandería is built on *lavandero* "washerman", from *lavar* "to wash", which is inherited from Latin *lavāre* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la lavandería*
- *Say it: la lavandería*, once more
- *Say it:* a sentence of your own with *la lavandería*
- *Recall:* say the Spanish for the stationer's, then the Spanish for the hairdresser's, then say *la lavandería* again

Before you move on

What does la lavandería mean? ("The launderette, the laundry".) Say it once more.

680.5 la heladería — the ice-cream shop

Before the new one: say the Spanish for the hairdresser's, then the Spanish for the launderette.

You'll want to know: la heladería

la heladería — "the ice-cream shop".

Después de cenar vamos a la heladería.

After dinner we go to the ice-cream shop.

Built on *el helado*, ice cream.

The word, taken apart — and its English cousins

heladería is built on *helado* "ice cream", the past form of a verb inherited from Latin *gelāre* "to freeze".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la heladería*
- *Say it: la heladería*, once more
- *Say it:* a sentence of your own with *la heladería*
- *Recall:* say the Spanish for the hairdresser's, then the Spanish for the launderette, then say *la heladería* again

Before you move on

What does la heladería mean? ("The ice-cream shop".) Say it once more.

Chapter 681

De compras

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can shop around a town: the street market, the shopping centre, the department store, holiday opening and who serves me.
>
> *Complete the last lesson of chapter 681: I can shop around a town: the street market, the shopping centre, the department store, holiday opening and who serves me.*

681.1 el mercadillo — the street market, the flea market

> Before the new one: say the Spanish for the launderette, then the Spanish for the ice-cream shop.

You'll want to know: el mercadillo

el mercadillo — "the street market, the flea market".

> Los domingos hay mercadillo en la plaza.
>
> *On Sundays there is a street market in the square.*

Smaller than *el mercado*, often outdoors and once a week.

The word, taken apart — and its English cousins

mercadillo is a little *mercado* "market", which is inherited from Latin *mercātus* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el mercadillo*
- *Say it: el mercadillo*, once more
- *Say it:* a sentence of your own with *el mercadillo*
- *Recall:* say the Spanish for the launderette, then the Spanish for the ice-cream shop, then say *el mercadillo* again

Before you move on

What does el mercadillo mean? ("The street market, the flea market".) Say it once more.

681.2 el centro comercial — the shopping centre, the mall

Before the new one: say the Spanish for the ice-cream shop, then the Spanish for the street market.

You'll want to know: el centro comercial

el centro comercial — "the shopping centre, the mall".

El centro comercial abre hasta las diez.

The shopping centre is open until ten.

In parts of Latin America also *el mall* or *el shopping*.

The word, taken apart — and its English cousins

centro comes from Latin *centrum*, Greek *kéntron* "a sharp point"; *comercial* is built on *comercio*, a learned borrowing from Latin *commercium* "trade".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el centro comercial*
- *Say it: el centro comercial*, once more
- *Say it:* a sentence of your own with *el centro comercial*
- *Recall:* say the Spanish for the ice-cream shop, then the Spanish for the street market, then say *el centro comercial* again

Before you move on

What does el centro comercial mean? ("The shopping centre, the mall".) Say it once more.

681.3 los grandes almacenes — the department store

Before the new one: say the Spanish for the street market, then the Spanish for the shopping centre.

You'll want to know: los grandes almacenes

los grandes almacenes — "the department store".

Compré la maleta en unos grandes almacenes.

I bought the suitcase in a department store.

Always plural, even for one store.

The word, taken apart — and its English cousins

almacén comes from Andalusian Arabic *al-maxzán* "the storehouse", from Arabic *makhzan*; *grande* is inherited from Latin *grandis* "big".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: los grandes almacenes*
- *Say it: los grandes almacenes*, once more
- *Say it:* a sentence of your own with *los grandes almacenes*
- *Recall:* say the Spanish for the street market, then the Spanish for the shopping centre, then say *los grandes almacenes* again

Before you move on

What does los grandes almacenes mean? ("The department store".) Say it once more.

681.4 festivo — holiday (of a day: día festivo); festive

Before the new one: say the Spanish for the shopping centre, then the Spanish for the department store.

You'll want to know: festivo

festivo — "holiday (of a day: día festivo); festive".

El museo cierra los días festivos.

The museum is closed on public holidays.

On timetables: *domingos y festivos* — Sundays and public holidays.

The word, taken apart — and its English cousins

festivo is a learned borrowing from Latin *fēstīvus* "festive, merry" (Lewis & Short), from *fēstum* "a holiday".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: festivo*
- *Say it: festivo*, once more
- *Say it:* a sentence of your own with *festivo*
- *Recall:* say the Spanish for the shopping centre, then the Spanish for the department store, then say *festivo* again

Before you move on

What does festivo mean? ("Holiday (of a day: día festivo); festive".) Say it once more.

681.5 atender — to serve (a customer); to attend to; to pay attention

Before the new one: say the Spanish for the department store, then the Spanish for holiday.

You'll want to know: atender

atender — "to serve (a customer); to attend to; to pay attention".

¿Ya le atienden?

Are you being served?

The e becomes ie under stress: *atiendo*, *atiende*.

The word, taken apart — and its English cousins

atender comes from Latin *attendere* “to stretch towards, to give heed” (EtymDB), built on *tendere* “to stretch”.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *atender*
- *Say it:* *atender*, once more
- *Say it:* a sentence of your own with *atender*
- *Recall:* say the Spanish for the department store, then the Spanish for holiday, then say *atender* again

Before you move on

What does atender mean? (“To serve (a customer); to attend to; to pay attention”.) Say it once more.

Chapter 682

Lo que hay en la calle

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about what is in the street: lamp posts, bins, kerbs and pedestrian streets.
>
> *Complete the last lesson of chapter 682: I can talk about what is in the street: lamp posts, bins, kerbs and pedestrian streets.*

682.1 la farola — the street lamp, the lamp post

> Before the new one: say the Spanish for holiday, then the Spanish for to serve.

You'll want to know: la farola

la farola — "the street lamp, the lamp post".

> Las farolas se encienden a las nueve.
>
> *The street lamps come on at nine.*

A Spain word for a tall street lamp.

The word, taken apart — and its English cousins

farola is built on *farol* "lantern". The word is usually linked to *faro* "lighthouse", from Latin *pharus*, though the details are not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la farola*
- *Say it: la farola*, once more
- *Say it:* a sentence of your own with *la farola*
- *Recall:* say the Spanish for holiday, then the Spanish for to serve, then say *la farola* again

Before you move on

What does la farola mean? ("The street lamp, the lamp post".) Say it once more.

682.2 la papelera — the litter bin, the wastepaper basket

Before the new one: say the Spanish for to serve, then the Spanish for the street lamp.

You'll want to know: la papelera

la papelera — "the litter bin, the wastepaper basket".

Tira el papel a la papelera.

Throw the paper in the bin.

For paper and small rubbish; *la basura* is the rubbish.

The word, taken apart — and its English cousins

papelera is built on *papel* "paper", which came from Catalan *paper*, from Latin *papyrus*, Greek *pápyros* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la papelera*
- *Say it: la papelera*, once more
- *Say it:* a sentence of your own with *la papelera*
- *Recall:* say the Spanish for to serve, then the Spanish for the street lamp, then say *la papelera* again

Before you move on

What does la papelera mean? ("The litter bin, the wastepaper basket".) Say it once more.

682.3 el contenedor — the large bin; the container

Before the new one: say the Spanish for the street lamp, then the Spanish for the litter bin.

You'll want to know: el contenedor

el contenedor — "the large bin; the container".

El vidrio va al contenedor verde.

Glass goes in the green bin.

El contenedor de reciclaje — the recycling bin.

The word, taken apart — and its English cousins

contenedor is built on *contener* "to contain", which comes from Latin *continēre* "to hold together, to contain" (EtymDB), built on *tenēre* "to hold".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el contenedor*
- *Say it: el contenedor*, once more
- *Say it:* a sentence of your own with *el contenedor*
- *Recall:* say the Spanish for the street lamp, then the Spanish for the litter bin, then say *el contenedor* again

Before you move on

What does el contenedor mean? ("The large bin; the container".) Say it once more.

682.4 el bordillo — the kerb, the curb

Before the new one: say the Spanish for the litter bin, then the Spanish for the large bin.

You'll want to know: el bordillo

el bordillo — "the kerb, the curb".

El autobús para junto al bordillo.

The bus stops next to the kerb.

A Spain word; elsewhere *el borde de la acera* or *el cordón*.

The word, taken apart — and its English cousins

bordillo is built on *borde* "edge", which comes from French *bord* (EtymDB), a word of Germanic origin.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el bordillo*
- *Say it: el bordillo*, once more
- *Say it:* a sentence of your own with *el bordillo*
- *Recall:* say the Spanish for the litter bin, then the Spanish for the large bin, then say *el bordillo* again

Before you move on

What does el bordillo mean? ("The kerb, the curb".) Say it once more.

682.5 peatonal — pedestrian (as an adjective)

Before the new one: say the Spanish for the large bin, then the Spanish for the kerb.

You'll want to know: peatonal

peatonal — "pedestrian (as an adjective)".

Esta calle es peatonal.

This is a pedestrian street.

Calle peatonal or *zona peatonal* — no cars.

The word, taken apart — and its English cousins

peatonal is built on *peatón* "pedestrian", which came from French *piéton*, built on *pied* "foot", from Latin *pēs*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: peatonal*
- *Say it: peatonal*, once more
- *Say it:* a sentence of your own with *peatonal*
- *Recall:* say the Spanish for the large bin, then the Spanish for the kerb, then say *peatonal* again

Before you move on

What does peatonal mean? ("Pedestrian (as an adjective)".) Say it once more.

Chapter 683

Regiones y pueblos

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say which region, district or municipality a place is in, find the mayor's office and talk about hamlets.
>
> *Complete the last lesson of chapter 683: I can say which region, district or municipality a place is in, find the mayor's office and talk about hamlets.*

683.1 la región — the region

> Before the new one: say the Spanish for the kerb, then the Spanish for pedestrian.

You'll want to know: la región

la región — "the region".

> Es una región famosa por su vino.
>
> *It is a region famous for its wine.*

La región is wider than *la zona*.

The word, taken apart — and its English cousins

región is a learned borrowing from Latin *regiō* "a direction, a boundary, a district" (EtymDB), from *regere* "to guide, to rule".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la región*
- *Say it: la región*, once more
- *Say it:* a sentence of your own with *la región*
- *Recall:* say the Spanish for the kerb, then the Spanish for pedestrian, then say *la región* again

Before you move on

What does la región mean? ("The region".) Say it once more.

683.2 la comarca — the district, the area (of several villages)

Before the new one: say the Spanish for pedestrian, then the Spanish for the region.

You'll want to know: la comarca

la comarca — "the district, the area (of several villages)".

Es el pueblo más grande de la comarca.

It is the biggest village in the district.

Smaller than a province, bigger than a municipality.

The word, taken apart — and its English cousins

comarca is usually traced to *marca*, an old word for a border district, which is of Germanic origin.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la comarca*
- *Say it: la comarca*, once more
- *Say it:* a sentence of your own with *la comarca*
- *Recall:* say the Spanish for pedestrian, then the Spanish for the region, then say *la comarca* again

Before you move on

What does la comarca mean? ("The district, the area (of several villages)".) Say it once more.

683.3 el municipio — the municipality, the town council

Before the new one: say the Spanish for the region, then the Spanish for the district.

You'll want to know: el municipio

el municipio — "the municipality, the town council".

El municipio tiene tres pueblos.

The municipality has three villages.

Its people and its council: *el ayuntamiento* runs *el municipio*.

The word, taken apart — and its English cousins

municipio is a learned borrowing from Latin *mūnicipium* "a free town with its own rights" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el municipio*
- *Say it: el municipio*, once more
- *Say it:* a sentence of your own with *el municipio*
- *Recall:* say the Spanish for the region, then the Spanish for the district, then say *el municipio* again

Before you move on

What does el municipio mean? ("The municipality, the town council".) Say it once more.

683.4 la aldea — the hamlet, the small village

Before the new one: say the Spanish for the district, then the Spanish for the municipality.

You'll want to know: la aldea

la aldea — "the hamlet, the small village".

En la aldea viven veinte personas.

Twenty people live in the hamlet.

Smaller than *un pueblo*.

The word, taken apart — and its English cousins

aldea comes from Arabic *aḍ-ḍayᶜa* "the farm, the village" (EtymDB), with the Arabic article *al-* fused on.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la aldea*
- *Say it: la aldea*, once more
- *Say it:* a sentence of your own with *la aldea*
- *Recall:* say the Spanish for the district, then the Spanish for the municipality, then say *la aldea* again

Before you move on

What does la aldea mean? ("The hamlet, the small village".) Say it once more.

683.5 la alcaldía — the mayor's office; the office of mayor

Before the new one: say the Spanish for the municipality, then the Spanish for the hamlet.

You'll want to know: la alcaldía

la alcaldía — "the mayor's office; the office of mayor".

La alcaldía está en la plaza mayor.

The mayor's office is on the main square.

Built on *el alcalde*, the mayor.

The word, taken apart — and its English cousins

alcaldía is built on *alcalde* "mayor", which comes from Arabic *al-qāḍī* "the judge" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la alcaldía*
- *Say it: la alcaldía*, once more
- *Say it:* a sentence of your own with *la alcaldía*
- *Recall:* say the Spanish for the municipality, then the Spanish for the hamlet, then say *la alcaldía* again

Before you move on

What does la alcaldía mean? ("The mayor's office; the office of mayor".) Say it once more.

Chapter 684

Ciudad o campo

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can compare city and country life and talk about locals and people from out of town.
>
> *Complete the last lesson of chapter 684: I can compare city and country life and talk about locals and people from out of town.*

684.1 el forastero — the outsider, the stranger (from out of town)

> Before the new one: say the Spanish for the hamlet, then the Spanish for the mayor's office.

You'll want to know: el forastero

el forastero — "the outsider, the stranger (from out of town)".

> En el pueblo todos saben quién es forastero.
>
> *In the village everyone knows who is from out of town.*

As an adjective: *gente forastera*. It is not quite *extranjero*, a foreigner.

The word, taken apart — and its English cousins

forastero was borrowed from Catalan *foraster* (EtymDB), built on *fora* "outside", from Latin *forās* "out of doors".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el forastero*
- *Say it: el forastero*, once more
- *Say it:* a sentence of your own with *el forastero*
- *Recall:* say the Spanish for the hamlet, then the Spanish for the mayor's office, then say *el forastero* again

Before you move on

What does el forastero mean? ("The outsider, the stranger (from out of town)".) Say it once more.

684.2 urbano — urban, city (as an adjective)

Before the new one: say the Spanish for the mayor's office, then the Spanish for the outsider.

You'll want to know: urbano

urbano — "urban, city (as an adjective)".

El autobús urbano es muy barato.

The city bus is very cheap.

Transporte urbano — city transport.

The word, taken apart — and its English cousins

urbano is a learned borrowing from Latin *urbānus* "of the city" (EtymDB), from *urbs* "city".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: urbano*
- *Say it: urbano*, once more
- *Say it:* a sentence of your own with *urbano*
- *Recall:* say the Spanish for the mayor's office, then the Spanish for the outsider, then say *urbano* again

Before you move on

What does urbano mean? ("Urban, city (as an adjective)".) Say it once more.

684.3 rural — rural, country (as an adjective)

Before the new one: say the Spanish for the outsider, then the Spanish for urban.

You'll want to know: rural

rural — "rural, country (as an adjective)".

Pasamos una semana en una casa rural.

We spent a week in a country cottage.

In Spain *una casa rural* is a holiday cottage in the country.

The word, taken apart — and its English cousins

rural is a learned borrowing from Latin *rūrālis* "of the countryside" (EtymDB), from *rūs* "the country".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: rural*
- *Say it: rural*, once more
- *Say it:* a sentence of your own with *rural*
- *Recall:* say the Spanish for the outsider, then the Spanish for urban, then say *rural* again

Before you move on

What does rural mean? ("Rural, country (as an adjective)".) Say it once more.

684.4 residir — to reside, to live

Before the new one: say the Spanish for urban, then the Spanish for rural.

You'll want to know: residir

residir — "to reside, to live".

Residimos en la ciudad desde hace años.

We have lived in the city for years.

A formal word for *vivir*, common on forms.

The word, taken apart — and its English cousins

residir is a learned borrowing from Latin *residēre* "to remain, to settle" (EtymDB), built on *sedēre* "to sit".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: residir*
- *Say it: residir*, once more
- *Say it:* a sentence of your own with *residir*
- *Recall:* say the Spanish for urban, then the Spanish for rural, then say *residir* again

Before you move on

What does residir mean? ("To reside, to live".) Say it once more.

684.5 el vecindario — the neighbourhood; the residents

Before the new one: say the Spanish for rural, then the Spanish for to reside.

You'll want to know: el vecindario

el vecindario — "the neighbourhood; the residents".

El vecindario es muy tranquilo.

The neighbourhood is very quiet.

Common in Latin America; Spain often says *el barrio*.

The word, taken apart — and its English cousins

vecindario is built on *vecino* "neighbour", inherited from Latin *vīcīnus* (EtymDB), from *vīcus* "a village, a street".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el vecindario*
- *Say it:* *el vecindario*, once more
- *Say it:* a sentence of your own with *el vecindario*
- *Recall:* say the Spanish for rural, then the Spanish for to reside, then say *el vecindario* again

Before you move on

What does el vecindario mean? ("The neighbourhood; the residents".) Say it once more.

Chapter 685

El paisaje

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe a landscape: nature, mountain ranges, hills and deserts.
>
> *Complete the last lesson of chapter 685: I can describe a landscape: nature, mountain ranges, hills and deserts.*

685.1 el paisaje — the landscape, the scenery

Before the new one: say the Spanish for to reside, then the Spanish for the neighbourhood.

You'll want to know: el paisaje

el paisaje — "the landscape, the scenery".

El paisaje es precioso.

The scenery is beautiful.

Un paisaje de montaña — a mountain landscape.

The word, taken apart — and its English cousins

paisaje was borrowed from French *paysage*, built on *pays* "country", which goes back to Latin *pāgus* "a district, the countryside".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el paisaje*
- *Say it: el paisaje*, once more
- *Say it:* a sentence of your own with *el paisaje*
- *Recall:* say the Spanish for to reside, then the Spanish for the neighbourhood, then say *el paisaje* again

Before you move on

What does el paisaje mean? ("The landscape, the scenery".) Say it once more.

685.2 la naturaleza — nature

Before the new one: say the Spanish for the neighbourhood, then the Spanish for the landscape.

You'll want to know: la naturaleza

la naturaleza — "nature".

Me gusta pasear por la naturaleza.

I like walking in nature.

Por naturaleza — by nature.

The word, taken apart — and its English cousins

naturaleza is built on *natural* with *-eza* (EtymDB); *natural* comes from Latin *nātūrālis*, built on *nātus* "born".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la naturaleza*
- *Say it: la naturaleza*, once more
- *Say it:* a sentence of your own with *la naturaleza*
- *Recall:* say the Spanish for the neighbourhood, then the Spanish for the landscape, then say *la naturaleza* again

Before you move on

What does la naturaleza mean? ("Nature".) Say it once more.

685.3 la sierra — the mountain range; the saw

Before the new one: say the Spanish for the landscape, then the Spanish for nature.

You'll want to know: la sierra

la sierra — "the mountain range; the saw".

Pasamos el fin de semana en la sierra.

We spent the weekend in the mountains.

A row of peaks looks like the teeth of a saw.

The word, taken apart — and its English cousins

sierra is inherited from Latin *serra* "a saw" (EtymDB); a jagged line of peaks looks like its teeth.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la sierra*
- *Say it: la sierra*, once more
- *Say it:* a sentence of your own with *la sierra*
- *Recall:* say the Spanish for the landscape, then the Spanish for nature, then say *la sierra* again

Before you move on

What does la sierra mean? ("The mountain range; the saw".) Say it once more.

685.4 el monte — the mountain, the hill; the woodland

Before the new one: say the Spanish for nature, then the Spanish for the mountain range.

You'll want to know: el monte

el monte — "the mountain, the hill; the woodland".

Subimos al monte por la mañana.

We went up the mountain in the morning.

El monte is also wild land with trees and bushes.

The word, taken apart — and its English cousins

monte is inherited from Latin *montem*, a form of *mōns* "a mountain" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el monte*
- *Say it: el monte*, once more
- *Say it:* a sentence of your own with *el monte*
- *Recall:* say the Spanish for nature, then the Spanish for the mountain range, then say *el monte* again

Before you move on

What does el monte mean? ("The mountain, the hill; the woodland".) Say it once more.

685.5 el desierto — the desert; deserted

Before the new one: say the Spanish for the mountain range, then the Spanish for the mountain.

You'll want to know: el desierto

el desierto — "the desert; deserted".

Cruzamos el desierto en coche.

We drove across the desert.

As an adjective it means empty: *una calle desierta.*

The word, taken apart — and its English cousins

desierto is inherited from Latin *dēsertus* "abandoned, forsaken" (EtymDB): a desert is land that people have left.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el desierto*
- *Say it:* *el desierto*, once more
- *Say it:* a sentence of your own with *el desierto*
- *Recall:* say the Spanish for the mountain range, then the Spanish for the mountain, then say *el desierto* again

Before you move on

What does el desierto mean? ("The desert; deserted".) Say it once more.

Chapter 686

Hacia la cima

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about climbing a mountain: the way up, the rocks, the peak and the summit.
>
> *Complete the last lesson of chapter 686: I can talk about climbing a mountain: the way up, the rocks, the peak and the summit.*

686.1 la cima — the top, the summit

> Before the new one: say the Spanish for the mountain, then the Spanish for the desert.

You'll want to know: la cima

la cima — "the top, the summit".

> Llegamos a la cima a mediodía.
>
> *We reached the top at midday.*

En la cima de — at the top of.

The word, taken apart — and its English cousins

cima comes from Latin *cyma* "a young sprout" (EtymDB), from Greek *kŷma* "a swelling, a wave": the top of a plant, then the top of a hill.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la cima*
- *Say it: la cima*, once more
- *Say it:* a sentence of your own with *la cima*
- *Recall:* say the Spanish for the mountain, then the Spanish for the desert, then say *la cima* again

Before you move on

What does la cima mean? ("The top, the summit".) Say it once more.

686.2 el pico — the peak; the beak

Before the new one: say the Spanish for the desert, then the Spanish for the top.

You'll want to know: el pico

el pico — "the peak; the beak".

Desde el pico se ve el mar.

The sea can be seen from the peak.

Y pico — and a bit: *las tres y pico.*

The word, taken apart — and its English cousins

pico is inherited from Latin *beccus* "beak" (EtymDB), which the Romans took from Gaulish.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el pico*
- *Say it: el pico*, once more
- *Say it:* a sentence of your own with *el pico*
- *Recall:* say the Spanish for the desert, then the Spanish for the top, then say *el pico* again

Before you move on

What does el pico mean? ("The peak; the beak".) Say it once more.

686.3 la subida — the climb, the way up; the rise

Before the new one: say the Spanish for the top, then the Spanish for the peak.

You'll want to know: la subida

la subida — "the climb, the way up; the rise".

La subida al pico dura dos horas.

The climb to the peak takes two hours.

The opposite is *la bajada*, the way down.

The word, taken apart — and its English cousins

subida is built on *subir* "to go up", which is inherited from Latin *subīre*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la subida*
- *Say it: la subida*, once more

- *Say it:* a sentence of your own with *la subida*
- *Recall:* say the Spanish for the top, then the Spanish for the peak, then say *la subida* again

Before you move on

What does la subida mean? ("The climb, the way up; the rise".) Say it once more.

686.4 la roca — the rock

Before the new one: say the Spanish for the peak, then the Spanish for the climb.

You'll want to know: la roca

la roca — "the rock".

Nos sentamos en una roca a descansar.

We sat on a rock to rest.

Firme como una roca — solid as a rock.

The word, taken apart — and its English cousins

roca comes from Vulgar Latin *rocca* (EtymDB); where that word comes from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la roca*
- *Say it: la roca*, once more
- *Say it:* a sentence of your own with *la roca*
- *Recall:* say the Spanish for the peak, then the Spanish for the climb, then say *la roca* again

Before you move on

What does la roca mean? (“The rock”.) Say it once more.

686.5 escalar — to climb (a mountain, a wall)

Before the new one: say the Spanish for the climb, then the Spanish for the rock.

You’ll want to know: escalar

escalar — “to climb (a mountain, a wall)”.

Mi hermana escala montañas.

My sister climbs mountains.

La escalada is climbing as a sport.

The word, taken apart — and its English cousins

escalar is built on *escala* “ladder” (EtymDB), from Latin *scāla* “a flight of steps, a ladder”, from *scandere* “to climb”.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: escalar*
- *Say it: escalar*, once more
- *Say it:* a sentence of your own with *escalar*
- *Recall:* say the Spanish for the climb, then the Spanish for the rock, then say *escalar* again

Before you move on

What does escalar mean? ("To climb (a mountain, a wall)".) Say it once more.

Chapter 687

Caminos de montaña

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can plan a day out on foot: a long walk along a path, a mountain hut, climbing and exploring.
>
> *Complete the last lesson of chapter 687: I can plan a day out on foot: a long walk along a path, a mountain hut, climbing and exploring.*

687.1 el refugio — the mountain hut; the shelter

> Before the new one: say the Spanish for the rock, then the Spanish for to climb.

You'll want to know: el refugio

el refugio — "the mountain hut; the shelter".

> Dormimos en un refugio de montaña.
>
> *We slept in a mountain hut.*

A *refugio* is a simple hut for walkers.

The word, taken apart — and its English cousins

refugio is a learned borrowing from Latin *refugium* "a taking refuge" (Lewis & Short), from *fugere* "to flee".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el refugio*
- *Say it: el refugio*, once more
- *Say it:* a sentence of your own with *el refugio*
- *Recall:* say the Spanish for the rock, then the Spanish for to climb, then say *el refugio* again

Before you move on

What does el refugio mean? ("The mountain hut; the shelter".) Say it once more.

687.2 la caminata — the long walk, the hike

Before the new one: say the Spanish for to climb, then the Spanish for the mountain hut.

You'll want to know: la caminata

la caminata — "the long walk, the hike".

Fue una caminata de cinco horas.

It was a five-hour hike.

Hacer una caminata — to go for a long walk.

The word, taken apart — and its English cousins

caminata is built on *caminar* "to walk", from *camino* "road", which came into Late Latin from Celtic.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la caminata*
- *Say it: la caminata*, once more
- *Say it:* a sentence of your own with *la caminata*
- *Recall:* say the Spanish for to climb, then the Spanish for the mountain hut, then say *la caminata* again

Before you move on

What does la caminata mean? ("The long walk, the hike".) Say it once more.

687.3 la senda — the path, the trail

Before the new one: say the Spanish for the mountain hut, then the Spanish for the long walk.

You'll want to know: la senda

la senda — "the path, the trail".

La senda sube por el bosque.

The path goes up through the woods.

Close to *el sendero*.

The word, taken apart — and its English cousins

senda is inherited from Latin *sēmita* "a narrow way, a footpath" (Lewis & Short; EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la senda*
- *Say it: la senda*, once more
- *Say it:* a sentence of your own with *la senda*
- *Recall:* say the Spanish for the mountain hut, then the Spanish for the long walk, then say *la senda* again

Before you move on

What does la senda mean? ("The path, the trail".) Say it once more.

687.4 trepar — to clamber, to climb (using your hands)

Before the new one: say the Spanish for the long walk, then the Spanish for the path.

You'll want to know: trepar

trepar — "to clamber, to climb (using your hands)".

Los niños trepan a los árboles.

The children climb trees.

Escalar is the sport; *trepar* is any scrambling climb.

The word, taken apart — and its English cousins

The origin of *trepar* is not settled; it may imitate the sound of feet stamping.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: trepar*
- *Say it: trepar*, once more
- *Say it:* a sentence of your own with *trepar*
- *Recall:* say the Spanish for the long walk, then the Spanish for the path, then say *trepar* again

Before you move on

What does trepar mean? ("To clamber, to climb (using your hands)".) Say it once more.

687.5 explorar — to explore

Before the new one: say the Spanish for the path, then the Spanish for to clamber.

You'll want to know: explorar

explorar — "to explore".

Queremos explorar la isla.

We want to explore the island.

El explorador is the explorer.

The word, taken apart — and its English cousins

explorar is a learned borrowing from Latin *explōrāre* "to search out, to investigate" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *explorar*
- *Say it:* *explorar*, once more
- *Say it:* a sentence of your own with *explorar*
- *Recall:* say the Spanish for the path, then the Spanish for to clamber, then say *explorar* again

Before you move on

What does explorar mean? (“To explore”.) Say it once more.

687.6 Repaso de los capítulos 680–687

Say the Spanish for the cake shop and the stationer’s.

Your turn

Say these aloud:

- the cake shop, the stationer’s, the hairdresser’s, the launderette, the ice-cream shop
- the street market, the shopping centre, the department store, holiday, to serve
- the street lamp, the litter bin, the large bin, the kerb, pedestrian
- the region, the district, the municipality, the hamlet, the mayor’s office
- the outsider, urban, rural, to reside, the neighbourhood
- the landscape, nature, the mountain range, the mountain, the desert
- the top, the peak, the climb, the rock, to climb
- the mountain hut, the long walk, the path, to clamber, to explore

Before you move on

The cake shop? (**la pastelería**.) The stationer's? (**la papelería**.) The hairdresser's? (**la peluquería**.) The launderette? (**la lavandería**.) The ice-cream shop? (**la heladería**.) The street market? (**el mercadillo**.) The shopping centre? (**el centro comercial**.) The department store? (**los grandes almacenes**.) Holiday? (**festivo**.) To serve? (**atender**.) The street lamp? (**la farola**.) The litter bin? (**la papelera**.) The large bin? (**el contenedor**.) The kerb? (**el bordillo**.) Pedestrian? (**peatonal**.) The region? (**la región**.) The district? (**la comarca**.) The municipality? (**el municipio**.) The hamlet? (**la aldea**.) The mayor's office? (**la alcaldía**.) The outsider? (**el forastero**.) Urban? (**urbano**.) Rural? (**rural**.) To reside? (**residir**.) The neighbourhood? (**el vecindario**.) The landscape? (**el paisaje**.) Nature? (**la naturaleza**.) The mountain range? (**la sierra**.) The mountain? (**el monte**.) The desert? (**el desierto**.) The top? (**la cima**.) The peak? (**el pico**.) The climb? (**la subida**.) The rock? (**la roca**.) To climb? (**escalar**.) The mountain hut? (**el refugio**.) The long walk? (**la caminata**.) The path? (**la senda**.) To clamber? (**trepar**.) To explore? (**explorar**.)

Chapter 688

El mar

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about the sea: the ocean, waves, tides, bays and floating in the water.
>
> *Complete the last lesson of chapter 688: I can talk about the sea: the ocean, waves, tides, bays and floating in the water.*

688.1 el océano — the ocean

> Before the new one: say the Spanish for to clamber, then the Spanish for to explore.

You'll want to know: el océano

el océano — "the ocean".

> El océano está muy frío.
>
> *The ocean is very cold.*

El océano is bigger than *el mar*.

The word, taken apart — and its English cousins

océano is a learned borrowing from Latin *ōceanus*, from Greek *Ōkeanós* (EtymDB), the great river that the Greeks thought ran round the world.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el océano*
- *Say it: el océano*, once more
- *Say it:* a sentence of your own with *el océano*
- *Recall:* say the Spanish for to clamber, then the Spanish for to explore, then say *el océano* again

Before you move on

What does el océano mean? ("The ocean".) Say it once more.

688.2 la ola — the wave

Before the new one: say the Spanish for to explore, then the Spanish for the ocean.

You'll want to know: la ola

la ola — "the wave".

Hoy hay olas muy grandes.

The waves are very big today.

Una ola de calor — a heat wave.

The word, taken apart — and its English cousins

The origin of *ola* is not settled; several sources have been proposed, none of them sure.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la ola*
- *Say it: la ola*, once more
- *Say it:* a sentence of your own with *la ola*
- *Recall:* say the Spanish for to explore, then the Spanish for the ocean, then say *la ola* again

Before you move on

What does la ola mean? ("The wave".) Say it once more.

688.3 la marea — the tide

Before the new one: say the Spanish for the ocean, then the Spanish for the wave.

You'll want to know: la marea

la marea — "the tide".

Con la marea baja se puede pasar a la isla.

At low tide you can walk across to the island.

Marea alta / *baja* — high / low tide.

The word, taken apart — and its English cousins

marea was borrowed from French *marée* "tide", built on *mer* "sea", from Latin *mare* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la marea*
- *Say it: la marea*, once more
- *Say it:* a sentence of your own with *la marea*
- *Recall:* say the Spanish for the ocean, then the Spanish for the wave, then say *la marea* again

Before you move on

What does la marea mean? ("The tide".) Say it once more.

688.4 la bahía — the bay

Before the new one: say the Spanish for the wave, then the Spanish for the tide.

You'll want to know: la bahía

la bahía — "the bay".

El hotel está en una bahía tranquila.

The hotel is on a quiet bay.

A small bay is *una cala*.

The word, taken apart — and its English cousins

bahía is usually traced to French *baie* "bay"; where the French word comes from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la bahía*
- *Say it: la bahía*, once more
- *Say it:* a sentence of your own with *la bahía*
- *Recall:* say the Spanish for the wave, then the Spanish for the tide, then say *la bahía* again

Before you move on

What does la bahía mean? ("The bay".) Say it once more.

688.5 flotar — to float

Before the new one: say the Spanish for the tide, then the Spanish for the bay.

You'll want to know: flotar

flotar — "to float".

En este mar flotas sin esfuerzo.

In this sea you float easily.

El flotador is a rubber ring.

The word, taken apart — and its English cousins

flotar was borrowed from French *flotter* "to float" (EtymDB), a word of Germanic origin, a cousin of English *float*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: flotar*
- *Say it: flotar*, once more
- *Say it:* a sentence of your own with *flotar*
- *Recall:* say the Spanish for the tide, then the Spanish for the bay, then say *flotar* again

Before you move on

What does flotar mean? ("To float".) Say it once more.

Chapter 689

Agua en el paisaje

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe water in the countryside: waterfalls, streams, lagoons, marshes and cliffs.
>
> *Complete the last lesson of chapter 689: I can describe water in the countryside: waterfalls, streams, lagoons, marshes and cliffs.*

689.1 la cascada — the waterfall

> Before the new one: say the Spanish for the bay, then the Spanish for to float.

You'll want to know: la cascada

la cascada — "the waterfall".

> Caminamos hasta la cascada.
>
> *We walked to the waterfall.*

A very big one is *una catarata*.

The word, taken apart — and its English cousins

cascada was borrowed from Italian *cascata* "a fall" (EtymDB), from *cascare* "to fall", which goes back to Latin *cadere* "to fall".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la cascada*
- *Say it: la cascada*, once more
- *Say it:* a sentence of your own with *la cascada*
- *Recall:* say the Spanish for the bay, then the Spanish for to float, then say *la cascada* again

Before you move on

What does la cascada mean? ("The waterfall".) Say it once more.

689.2 el arroyo — the stream, the brook

Before the new one: say the Spanish for to float, then the Spanish for the waterfall.

You'll want to know: el arroyo

el arroyo — "the stream, the brook".

Cruzamos el arroyo por un puente.

We crossed the stream by a bridge.

Smaller than *un río*.

The word, taken apart — and its English cousins

arroyo is usually traced to a pre-Roman word recorded in Latin as *arrugia* "a mine gallery"; the origin is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el arroyo*
- *Say it: el arroyo*, once more
- *Say it:* a sentence of your own with *el arroyo*
- *Recall:* say the Spanish for to float, then the Spanish for the waterfall, then say *el arroyo* again

Before you move on

What does el arroyo mean? ("The stream, the brook".) Say it once more.

689.3 la laguna — the lagoon, the small lake

Before the new one: say the Spanish for the waterfall, then the Spanish for the stream.

You'll want to know: la laguna

la laguna — "the lagoon, the small lake".

Hay patos en la laguna.

There are ducks on the lagoon.

Tener lagunas — to have gaps in your memory.

The word, taken apart — and its English cousins

laguna is inherited from Latin *lacūna* "a ditch, a pool, a gap" (EtymDB), from *lacus* "lake".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la laguna*
- *Say it: la laguna*, once more
- *Say it:* a sentence of your own with *la laguna*
- *Recall:* say the Spanish for the waterfall, then the Spanish for the stream, then say *la laguna* again

Before you move on

What does la laguna mean? ("The lagoon, the small lake".) Say it once more.

689.4 el pantano — the marsh, the swamp; the reservoir (Spain)

Before the new one: say the Spanish for the stream, then the Spanish for the lagoon.

You'll want to know: el pantano

el pantano — "the marsh, the swamp; the reservoir (Spain)".

Este verano el pantano tiene poca agua.

This summer the reservoir has little water.

In Spain *el pantano* is often a reservoir behind a dam.

The word, taken apart — and its English cousins

pantano was borrowed from Italian *pantano* "swamp" (EtymDB); where the Italian word comes from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el pantano*
- *Say it:* *el pantano*, once more
- *Say it:* a sentence of your own with *el pantano*
- *Recall:* say the Spanish for the stream, then the Spanish for the lagoon, then say *el pantano* again

Before you move on

What does el pantano mean? (“The marsh, the swamp; the reservoir (Spain)”.) Say it once more.

689.5 el acantilado — the cliff

Before the new one: say the Spanish for the lagoon, then the Spanish for the marsh.

You’ll want to know: el acantilado

el acantilado — “the cliff”.

El faro está sobre un acantilado.

The lighthouse stands on a cliff.

A cliff by the sea; inland, *la pared de roca*.

The word, taken apart — and its English cousins

acantilado is built on *acantilar* (EtymDB), from *cantil* “a shelf of rock”, which is built on *canto* “edge”; *canto* is usually traced to Latin *canthus* “an iron tyre”.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el acantilado*
- *Say it:* *el acantilado*, once more
- *Say it:* a sentence of your own with *el acantilado*
- *Recall:* say the Spanish for the lagoon, then the Spanish for the marsh, then say *el acantilado* again

Before you move on

What does el acantilado mean? ("The cliff".) Say it once more.

Chapter 690

Un día de playa

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about a day at the beach: swimming, getting a tan and lying under a sunshade in my swimsuit.
>
> *Complete the last lesson of chapter 690: I can talk about a day at the beach: swimming, getting a tan and lying under a sunshade in my swimsuit.*

690.1 bañarse — to have a swim; to have a bath

> Before the new one: say the Spanish for the marsh, then the Spanish for the cliff.

You'll want to know: bañarse

bañarse — "to have a swim; to have a bath".

> Nos bañamos en el mar por la mañana.
>
> *We swim in the sea in the morning.*

At the beach, *bañarse* is to go in the water, not to swim lengths.

The word, taken apart — and its English cousins

bañarse is built on *baño* "bath", which is inherited from Latin *balneum* "a bath".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: bañarse*
- *Say it: bañarse*, once more
- *Say it:* a sentence of your own with *bañarse*
- *Recall:* say the Spanish for the marsh, then the Spanish for the cliff, then say *bañarse* again

Before you move on

What does bañarse mean? ("To have a swim; to have a bath".) Say it once more.

690.2 broncearse — to get a tan

Before the new one: say the Spanish for the cliff, then the Spanish for to have a swim.

You'll want to know: broncearse

broncearse — "to get a tan".

Me bronceo muy rápido.

I tan very quickly.

Estar bronceado — to be tanned.

The word, taken apart — and its English cousins

broncearse is built on *bronce* "bronze", which was borrowed from Italian *bronzo* (EtymDB): tanned skin turns the colour of bronze.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: broncearse*
- *Say it: broncearse*, once more
- *Say it:* a sentence of your own with *broncearse*
- *Recall:* say the Spanish for the cliff, then the Spanish for to have a swim, then say *broncearse* again

Before you move on

What does broncearse mean? ("To get a tan".) Say it once more.

690.3 la sombrilla — the sunshade, the beach umbrella

Before the new one: say the Spanish for to have a swim, then the Spanish for to get a tan.

You'll want to know: la sombrilla

la sombrilla — "the sunshade, the beach umbrella".

Ponemos la sombrilla cerca del agua.

We put the sunshade up near the water.

El paraguas is for rain; *la sombrilla* is for sun.

The word, taken apart — and its English cousins

sombrilla is a little *sombra* "shade". The origin of *sombra* is not settled; it is often linked to Latin *umbra* "shade".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la sombrilla*
- *Say it: la sombrilla*, once more
- *Say it:* a sentence of your own with *la sombrilla*
- *Recall:* say the Spanish for to have a swim, then the Spanish for to get a tan, then say *la sombrilla* again

Before you move on

What does la sombrilla mean? ("The sunshade, the beach umbrella".) Say it once more.

690.4 el bañador — the swimsuit, the swimming trunks

Before the new one: say the Spanish for to get a tan, then the Spanish for the sunshade.

You'll want to know: el bañador

el bañador — "the swimsuit, the swimming trunks".

No olvides el bañador.

Do not forget your swimsuit.

A Spain word; Latin America says *el traje de baño*.

The word, taken apart — and its English cousins

bañador is built on *bañar* "to bathe", from *baño* "bath", inherited from Latin *balneum*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el bañador*
- *Say it: el bañador*, once more
- *Say it:* a sentence of your own with *el bañador*
- *Recall:* say the Spanish for to get a tan, then the Spanish for the sunshade, then say *el bañador* again

Before you move on

What does el bañador mean? ("The swimsuit, the swimming trunks".) Say it once more.

690.5 tumbarse — to lie down

Before the new one: say the Spanish for the sunshade, then the Spanish for the swimsuit.

You'll want to know: tumbarse

tumbarse — "to lie down".

Me tumbo en la arena a leer.

I lie down on the sand to read.

Estar tumbado — to be lying down.

The word, taken apart — and its English cousins

tumbarse is built on *tumbar* "to knock down", which is usually taken to imitate the thud of something falling; the origin is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *tumbarse*
- *Say it:* *tumbarse*, once more
- *Say it:* a sentence of your own with *tumbarse*
- *Recall:* say the Spanish for the sunshade, then the Spanish for the swimsuit, then say *tumbarse* again

Before you move on

What does tumbarse mean? (“To lie down”.) Say it once more.

Chapter 691

La vida en el campo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about life on the land: farmers, a country estate, a vineyard and growing crops.
>
> *Complete the last lesson of chapter 691: I can talk about life on the land: farmers, a country estate, a vineyard and growing crops.*

691.1 el agricultor — the farmer

> Before the new one: say the Spanish for the swimsuit, then the Spanish for to lie down.

You'll want to know: el agricultor

el agricultor — "the farmer".

> El agricultor trabaja desde muy temprano.
>
> *The farmer works from very early.*

A woman is *la agricultora*. *La agricultura* is farming.

The word, taken apart — and its English cousins

agricultor is a learned borrowing from Latin *agricultor* "a farmer" (EtymDB), made from *ager* "field" and *cultor* "one who tills".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el agricultor*
- *Say it: el agricultor*, once more
- *Say it:* a sentence of your own with *el agricultor*
- *Recall:* say the Spanish for the swimsuit, then the Spanish for to lie down, then say *el agricultor* again

Before you move on

What does el agricultor mean? ("The farmer".) Say it once more.

691.2 el campesino — the country person, the peasant, the farm worker

Before the new one: say the Spanish for to lie down, then the Spanish for the farmer.

You'll want to know: el campesino

el campesino — "the country person, the peasant, the farm worker".

Los campesinos venden fruta en el mercado.

The country people sell fruit at the market.

As an adjective it means country: *la vida campesina.*

The word, taken apart — and its English cousins

campesino is built on *campo* "field, countryside", which is inherited from Latin *campus* "a field, a plain".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el campesino*
- *Say it: el campesino*, once more
- *Say it:* a sentence of your own with *el campesino*
- *Recall:* say the Spanish for to lie down, then the Spanish for the farmer, then say *el campesino* again

Before you move on

What does el campesino mean? ("The country person, the peasant, the farm worker".) Say it once more.

691.3 la finca — the country estate, the farm; the property

Before the new one: say the Spanish for the farmer, then the Spanish for the country person.

You'll want to know: la finca

la finca — "the country estate, the farm; the property".

Mis tíos tienen una finca con caballos.

My aunt and uncle have a farm with horses.

In Spain *una finca* is also a building or plot in town.

The word, taken apart — and its English cousins

finca is built on old *fincar* "to stay put, to settle" (EtymDB), which comes from a Vulgar Latin form of *fīgere* "to fix".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la finca*
- *Say it: la finca*, once more
- *Say it:* a sentence of your own with *la finca*
- *Recall:* say the Spanish for the farmer, then the Spanish for the country person, then say *la finca* again

Before you move on

What does la finca mean? ("The country estate, the farm; the property".) Say it once more.

691.4 el viñedo — the vineyard

Before the new one: say the Spanish for the country person, then the Spanish for the country estate.

You'll want to know: el viñedo

el viñedo — "the vineyard".

En otoño trabajan en el viñedo.

In autumn they work in the vineyard.

Same family as *la viña* and *el vino*.

The word, taken apart — and its English cousins

viñedo is inherited from Latin *vīnētum* "a vineyard" (EtymDB), from *vīnum* "wine".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el viñedo*
- *Say it: el viñedo*, once more
- *Say it:* a sentence of your own with *el viñedo*
- *Recall:* say the Spanish for the country person, then the Spanish for the country estate, then say *el viñedo* again

Before you move on

What does el viñedo mean? ("The vineyard".) Say it once more.

691.5 cultivar — to grow (crops), to farm; to cultivate

Before the new one: say the Spanish for the country estate, then the Spanish for the vineyard.

You'll want to know: cultivar

cultivar — "to grow (crops), to farm; to cultivate".

Aquí cultivan arroz.

They grow rice here.

El cultivo is the crop or the growing of it.

The word, taken apart — and its English cousins

cultivar is a learned borrowing from Medieval Latin *cultīvāre* (EtymDB), built on *colere* "to till, to tend".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *cultivar*
- *Say it:* *cultivar*, once more
- *Say it:* a sentence of your own with *cultivar*
- *Recall:* say the Spanish for the country estate, then the Spanish for the vineyard, then say *cultivar* again

Before you move on

What does cultivar mean? ("To grow (crops), to farm; to cultivate".) Say it once more.

Chapter 692

Sembrar y regar

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can describe farm work: sowing, watering, harvesting, the well and the first flowers.
>
> *Complete the last lesson of chapter 692: I can describe farm work: sowing, watering, harvesting, the well and the first flowers.*

692.1 sembrar — to sow

Before the new one: say the Spanish for the vineyard, then the Spanish for to grow.

You'll want to know: sembrar

sembrar — "to sow".

> En primavera siembran el maíz.
>
> *In spring they sow the maize.*

The e becomes ie under stress: *siembro*, *siembra*.

The word, taken apart — and its English cousins

sembrar is inherited from Latin *sēmināre* "to sow" (EtymDB), from *sēmen* "seed".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: sembrar*
- *Say it: sembrar*, once more
- *Say it:* a sentence of your own with *sembrar*
- *Recall:* say the Spanish for the vineyard, then the Spanish for to grow, then say *sembrar* again

Before you move on

What does sembrar mean? ("To sow".) Say it once more.

692.2 regar — to water (plants)

Before the new one: say the Spanish for to grow, then the Spanish for to sow.

You'll want to know: regar

regar — "to water (plants)".

Riego las plantas por la noche.

I water the plants in the evening.

The e becomes ie under stress: *riego*, *riega*.

The word, taken apart — and its English cousins

regar is inherited from Latin *rigāre* "to water, to moisten" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: regar*
- *Say it: regar*, once more
- *Say it:* a sentence of your own with *regar*
- *Recall:* say the Spanish for to grow, then the Spanish for to sow, then say *regar* again

Before you move on

What does regar mean? ("To water (plants)".) Say it once more.

692.3 cosechar — to harvest, to reap

Before the new one: say the Spanish for to sow, then the Spanish for to water.

You'll want to know: cosechar

cosechar — "to harvest, to reap".

En septiembre cosechan la uva.

In September they harvest the grapes.

La cosecha is the harvest.

The word, taken apart — and its English cousins

cosechar is built on *cosecha* "harvest", which comes from Latin *collēcta* "a gathering" (EtymDB), from *colligere* "to gather".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *cosechar*
- *Say it:* *cosechar*, once more
- *Say it:* a sentence of your own with *cosechar*
- *Recall:* say the Spanish for to sow, then the Spanish for to water, then say *cosechar* again

Before you move on

What does cosechar mean? ("To harvest, to reap".) Say it once more.

692.4 el pozo — the well

Before the new one: say the Spanish for to water, then the Spanish for to harvest.

You'll want to know: el pozo

el pozo — "the well".

Sacan agua del pozo.

They draw water from the well.

Un pozo de petróleo — an oil well.

The word, taken apart — and its English cousins

pozo is inherited from Latin *puteus* "a well, a pit" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el pozo*
- *Say it: el pozo*, once more
- *Say it:* a sentence of your own with *el pozo*
- *Recall:* say the Spanish for to water, then the Spanish for to harvest, then say *el pozo* again

Before you move on

What does el pozo mean? ("The well".) Say it once more.

692.5 florecer — to flower, to bloom; to flourish

Before the new one: say the Spanish for to harvest, then the Spanish for the well.

You'll want to know: florecer

florecer — "to flower, to bloom; to flourish".

Los árboles florecen en primavera.

The trees blossom in spring.

It adds a z: *florezco*, *florezca*.

The word, taken apart — and its English cousins

florecer is inherited from Latin *flōrēscere* "to begin to bloom" (EtymDB), from *flōs, flōris* "flower".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: florecer*
- *Say it: florecer*, once more
- *Say it:* a sentence of your own with *florecer*
- *Recall:* say the Spanish for to harvest, then the Spanish for the well, then say *florecer* again

Before you move on

What does florecer mean? ("To flower, to bloom; to flourish".) Say it once more.

Chapter 693

Árboles y plantas

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name trees and plants on a walk: olive trees, pines, oaks, bushes and plant life.
>
> *Complete the last lesson of chapter 693: I can name trees and plants on a walk: olive trees, pines, oaks, bushes and plant life.*

693.1 el olivo — the olive tree

> Before the new one: say the Spanish for the well, then the Spanish for to flower.

You'll want to know: el olivo

el olivo — "the olive tree".

> En el campo hay miles de olivos.
>
> *There are thousands of olive trees in the countryside.*

The fruit is *la aceituna*; the oil is *el aceite de oliva*.

The word, taken apart — and its English cousins

olivo is inherited from Vulgar Latin *olīvus*, from Latin *olīva*, which comes from Greek *elaía* "olive" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el olivo*
- *Say it: el olivo*, once more
- *Say it:* a sentence of your own with *el olivo*
- *Recall:* say the Spanish for the well, then the Spanish for to flower, then say *el olivo* again

Before you move on

What does el olivo mean? ("The olive tree".) Say it once more.

693.2 el pino — the pine tree

Before the new one: say the Spanish for to flower, then the Spanish for the olive tree.

You'll want to know: el pino

el pino — "the pine tree".

El camino pasa por un bosque de pinos.

The path goes through a pine forest.

La piña is the pine cone, and also a pineapple.

The word, taken apart — and its English cousins

pino is inherited from Latin *pīnus* "a pine tree" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el pino*
- *Say it: el pino*, once more
- *Say it:* a sentence of your own with *el pino*
- *Recall:* say the Spanish for to flower, then the Spanish for the olive tree, then say *el pino* again

Before you move on

What does el pino mean? (“The pine tree”.) Say it once more.

693.3 el arbusto — the bush, the shrub

Before the new one: say the Spanish for the olive tree, then the Spanish for the pine tree.

You’ll want to know: el arbusto

el arbusto — “the bush, the shrub”.

Hay arbustos a los dos lados del camino.

There are bushes on both sides of the path.

Smaller than *un árbol*.

The word, taken apart — and its English cousins

arbusto is a learned borrowing from Latin *arbustum* “a place planted with trees” (Lewis & Short; EtymDB), from *arbor* “tree”.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el arbusto*
- *Say it: el arbusto*, once more
- *Say it:* a sentence of your own with *el arbusto*
- *Recall:* say the Spanish for the olive tree, then the Spanish for the pine tree, then say *el arbusto* again

Before you move on

What does el arbusto mean? ("The bush, the shrub".) Say it once more.

693.4 la vegetación — the vegetation, the plant life

Before the new one: say the Spanish for the pine tree, then the Spanish for the bush.

You'll want to know: la vegetación

la vegetación — "the vegetation, the plant life".

La vegetación es muy verde en el norte.

The vegetation is very green in the north.

A general word for all the plants of a place.

The word, taken apart — and its English cousins

vegetación is a learned borrowing from Late Latin *vegetātiō* "an enlivening, a quickening" (Lewis & Short), from *vegetāre* "to enliven".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la vegetación*
- *Say it: la vegetación*, once more
- *Say it:* a sentence of your own with *la vegetación*
- *Recall:* say the Spanish for the pine tree, then the Spanish for the bush, then say *la vegetación* again

Before you move on

What does la vegetación mean? ("The vegetation, the plant life".) Say it once more.

693.5 el roble — the oak tree

Before the new one: say the Spanish for the bush, then the Spanish for the vegetation.

You'll want to know: el roble

el roble — "the oak tree".

Comimos a la sombra de un roble.

We ate in the shade of an oak tree.

Fuerte como un roble — as strong as an ox.

The word, taken apart — and its English cousins

roble is inherited from Latin *rōbur* "an oak tree; hardness, strength" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el roble*
- *Say it:* *el roble*, once more
- *Say it:* a sentence of your own with *el roble*
- *Recall:* say the Spanish for the bush, then the Spanish for the vegetation, then say *el roble* again

Before you move on

What does el roble mean? (“The oak tree”.) Say it once more.

Chapter 694

Animales del campo

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name small wild creatures: seagulls, birds, insects, butterflies and lizards.
>
> *Complete the last lesson of chapter 694: I can name small wild creatures: seagulls, birds, insects, butterflies and lizards.*

694.1 la gaviota — the seagull

> Before the new one: say the Spanish for the vegetation, then the Spanish for the oak tree.

You'll want to know: la gaviota

la gaviota — "the seagull".

> Las gaviotas vuelan sobre el puerto.
>
> *The seagulls fly over the harbour.*

Common in ports and on beaches.

The word, taken apart — and its English cousins

gaviota is built on Latin *gāvia* "a sea bird, perhaps the seamew" (Lewis & Short; EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la gaviota*
- *Say it: la gaviota*, once more
- *Say it:* a sentence of your own with *la gaviota*
- *Recall:* say the Spanish for the vegetation, then the Spanish for the oak tree, then say *la gaviota* again

Before you move on

What does la gaviota mean? ("The seagull".) Say it once more.

694.2 el ave — the large bird, the bird (formal); poultry

Before the new one: say the Spanish for the oak tree, then the Spanish for the seagull.

You'll want to know: el ave

el ave — "the large bird, the bird (formal); poultry".

En el lago hay muchas aves.

There are a lot of birds on the lake.

Feminine, but *el ave* because of the stressed a; plural *las aves*.

The word, taken apart — and its English cousins

ave is inherited from Latin *avis* "a bird" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el ave*
- *Say it:* *el ave*, once more
- *Say it:* a sentence of your own with *el ave*
- *Recall:* say the Spanish for the oak tree, then the Spanish for the seagull, then say *el ave* again

Before you move on

What does el ave mean? ("The large bird, the bird (formal); poultry".) Say it once more.

694.3 el insecto — the insect

Before the new one: say the Spanish for the seagull, then the Spanish for the large bird.

You'll want to know: el insecto

el insecto — "the insect".

Por la noche hay muchos insectos.

There are a lot of insects at night.

Una picadura de insecto — an insect bite.

The word, taken apart — and its English cousins

insecto is a learned borrowing from Latin *insectum* "cut into" (EtymDB), from *in* and *secāre* "to cut": an insect body looks cut into parts.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el insecto*
- *Say it: el insecto*, once more
- *Say it:* a sentence of your own with *el insecto*
- *Recall:* say the Spanish for the seagull, then the Spanish for the large bird, then say *el insecto* again

Before you move on

What does el insecto mean? ("The insect".) Say it once more.

694.4 la mariposa — the butterfly

Before the new one: say the Spanish for the large bird, then the Spanish for the insect.

You'll want to know: la mariposa

la mariposa — "the butterfly".

En primavera hay muchas mariposas.

There are a lot of butterflies in spring.

A moth is *la polilla*.

The word, taken apart — and its English cousins

The origin of *mariposa* is not settled; it is often explained as *Mari, posa* "Mary, settle down", from a children's song.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la mariposa*
- *Say it: la mariposa*, once more
- *Say it:* a sentence of your own with *la mariposa*
- *Recall:* say the Spanish for the large bird, then the Spanish for the insect, then say *la mariposa* again

Before you move on

What does la mariposa mean? ("The butterfly".) Say it once more.

694.5 la lagartija — the small lizard, the wall lizard

Before the new one: say the Spanish for the insect, then the Spanish for the butterfly.

You'll want to know: la lagartija

la lagartija — "the small lizard, the wall lizard".

Una lagartija toma el sol en la pared.

A lizard is sunning itself on the wall.

A bigger one is *un lagarto*.

The word, taken apart — and its English cousins

lagartija is built on *lagarto* "lizard", which is inherited from Latin *lacertus* "a lizard" (Lewis & Short; EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la lagartija*
- *Say it: la lagartija*, once more
- *Say it:* a sentence of your own with *la lagartija*
- *Recall:* say the Spanish for the insect, then the Spanish for the butterfly, then say *la lagartija* again

Before you move on

What does la lagartija mean? ("The small lizard, the wall lizard".) Say it once more.

Chapter 695

Fauna y flora

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can talk about wildlife such as deer, plant life, fishing, and insects that bite.
>
> *Complete the last lesson of chapter 695: I can talk about wildlife such as deer, plant life, fishing, and insects that bite.*

695.1 picar — to bite, to sting (insects); to be spicy; to nibble

Before the new one: say the Spanish for the butterfly, then the Spanish for the small lizard.

You'll want to know: picar

picar — "to bite, to sting (insects); to be spicy; to nibble".

> Me picó un mosquito en el brazo.
>
> *A mosquito bit me on the arm.*

Esta salsa pica — this sauce is hot. *Picar algo* — to have a snack.

The word, taken apart — and its English cousins

picar comes from Vulgar Latin *piccāre* "to prick, to strike" (EtymDB); where that verb came from is not settled.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: picar*
- *Say it: picar*, once more
- *Say it:* a sentence of your own with *picar*
- *Recall:* say the Spanish for the butterfly, then the Spanish for the small lizard, then say *picar* again

Before you move on

What does picar mean? ("To bite, to sting (insects); to be spicy; to nibble".) Say it once more.

695.2 la fauna — the fauna, the wildlife

Before the new one: say the Spanish for the small lizard, then the Spanish for to bite.

You'll want to know: la fauna

la fauna — "the fauna, the wildlife".

La fauna de la isla es única.

The wildlife on the island is unique.

The animals of a place: *la fauna marina* — sea life.

The word, taken apart — and its English cousins

fauna is a learned borrowing from Latin *Fauna*, a Roman goddess, the sister of the woodland god *Faunus* (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la fauna*
- *Say it: la fauna*, once more
- *Say it:* a sentence of your own with *la fauna*
- *Recall:* say the Spanish for the small lizard, then the Spanish for to bite, then say *la fauna* again

Before you move on

What does la fauna mean? ("The fauna, the wildlife".) Say it once more.

695.3 la flora — the flora, the plant life

Before the new one: say the Spanish for to bite, then the Spanish for the fauna.

You'll want to know: la flora

la flora — "the flora, the plant life".

Aquí la flora es muy variada.

The plant life here is very varied.

Often with *la fauna*.

The word, taken apart — and its English cousins

flora is a learned borrowing from Latin *Flōra*, the Roman goddess of flowers (Lewis & Short), from *flōs* "flower".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la flora*
- *Say it: la flora*, once more
- *Say it:* a sentence of your own with *la flora*
- *Recall:* say the Spanish for to bite, then the Spanish for the fauna, then say *la flora* again

Before you move on

What does la flora mean? (“The flora, the plant life”.) Say it once more.

695.4 pescar — to fish; to catch

Before the new one: say the Spanish for the fauna, then the Spanish for the flora.

You’ll want to know: pescar

pescar — “to fish; to catch”.

Mi padre va a pescar al río.

My father goes fishing in the river.

El pescado is fish as food; *el pez* is a live fish.

The word, taken apart — and its English cousins

pescar is inherited from Vulgar Latin *piscāre*, Latin *piscārī* “to fish” (EtymDB), from *piscis* “fish”.

What you’ve built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: pescar*
- *Say it: pescar*, once more
- *Say it:* a sentence of your own with *pescar*
- *Recall:* say the Spanish for the fauna, then the Spanish for the flora, then say *pescar* again

Before you move on

What does pescar mean? ("To fish; to catch".) Say it once more.

695.5 el ciervo — the deer, the stag

Before the new one: say the Spanish for the flora, then the Spanish for to fish.

You'll want to know: el ciervo

el ciervo — "the deer, the stag".

Por la mañana vimos un ciervo en el bosque.

In the morning we saw a deer in the woods.

The female is *la cierva*.

The word, taken apart — and its English cousins

ciervo is inherited from Latin *cervus* "a stag, a deer" (Lewis & Short).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el ciervo*
- *Say it: el ciervo*, once more

- *Say it:* a sentence of your own with *el ciervo*
- *Recall:* say the Spanish for the flora, then the Spanish for to fish, then say *el ciervo* again

Before you move on

What does el ciervo mean? ("The deer, the stag".) Say it once more.

695.6 Repaso de los capítulos 688–695

Say the Spanish for the ocean and the wave.

Your turn

Say these aloud:

- the ocean, the wave, the tide, the bay, to float
- the waterfall, the stream, the lagoon, the marsh, the cliff
- to have a swim, to get a tan, the sunshade, the swimsuit, to lie down
- the farmer, the country person, the country estate, the vineyard, to grow
- to sow, to water, to harvest, the well, to flower
- the olive tree, the pine tree, the bush, the vegetation, the oak tree
- the seagull, the large bird, the insect, the butterfly, the small lizard
- to bite, the fauna, the flora, to fish, the deer

Before you move on

The ocean? (**el océano**.) The wave? (**la ola**.) The tide? (**la marea**.) The bay? (**la bahía**.) To float? (**flotar**.) The waterfall? (**la cascada**.) The stream? (**el arroyo**.) The lagoon? (**la laguna**.) The marsh? (**el pantano**.) The cliff? (**el acantilado**.) To have a swim? (**bañarse**.) To get a tan? (**broncearse**.) The sunshade? (**la sombrilla**.) The swimsuit? (**el bañador**.) To lie down?

(**tumbarse**.) The farmer? (**el agricultor**.) The country person? (**el campesino**.) The country estate? (**la finca**.) The vineyard? (**el viñedo**.) To grow? (**cultivar**.) To sow? (**sembrar**.) To water? (**regar**.) To harvest? (**cosechar**.) The well? (**el pozo**.) To flower? (**florecer**.) The olive tree? (**el olivo**.) The pine tree? (**el pino**.) The bush? (**el arbusto**.) The vegetation? (**la vegetación**.) The oak tree? (**el roble**.) The seagull? (**la gaviota**.) The large bird? (**el ave**.) The insect? (**el insecto**.) The butterfly? (**la mariposa**.) The small lizard? (**la lagartija**.) To bite? (**picar**.) The fauna? (**la fauna**.) The flora? (**la flora**.) To fish? (**pescar**.) The deer? (**el ciervo**.)

Chapter 696

Tiempo y temperatura

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can understand a weather forecast and talk about the thermometer and the humidity.
>
> *Complete the last lesson of chapter 696: I can understand a weather forecast and talk about the thermometer and the humidity.*

696.1 el termómetro — the thermometer

> Before the new one: say the Spanish for to fish, then the Spanish for the deer.

You'll want to know: el termómetro

el termómetro — "the thermometer".

> El termómetro marca treinta grados.
>
> *The thermometer shows thirty degrees.*

Treinta grados a la sombra — thirty degrees in the shade.

The word, taken apart — and its English cousins

termómetro came from French *thermomètre*, a word made from Greek *thermós* "hot" and *métron* "measure".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el termómetro*
- *Say it: el termómetro*, once more
- *Say it:* a sentence of your own with *el termómetro*
- *Recall:* say the Spanish for to fish, then the Spanish for the deer, then say *el termómetro* again

Before you move on

What does el termómetro mean? ("The thermometer".) Say it once more.

696.2 el pronóstico — the forecast; the prognosis

Before the new one: say the Spanish for the deer, then the Spanish for the thermometer.

You'll want to know: el pronóstico

el pronóstico — "the forecast; the prognosis".

El pronóstico dice que va a llover.

The forecast says it is going to rain.

El pronóstico del tiempo — the weather forecast.

The word, taken apart — and its English cousins

pronóstico is a learned borrowing from Late Latin *prognōsticus*, from Greek *prognōstikós* "knowing beforehand".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el pronóstico*
- *Say it: el pronóstico*, once more
- *Say it:* a sentence of your own with *el pronóstico*
- *Recall:* say the Spanish for the deer, then the Spanish for the thermometer, then say *el pronóstico* again

Before you move on

What does el pronóstico mean? ("The forecast; the prognosis".) Say it once more.

696.3 la previsión — the outlook, the forecast; foresight

Before the new one: say the Spanish for the thermometer, then the Spanish for the forecast.

You'll want to know: la previsión

la previsión — "the outlook, the forecast; foresight".

La previsión para mañana es buena.

The forecast for tomorrow is good.

The verb is *prever*.

The word, taken apart — and its English cousins

previsión is a learned borrowing from Late Latin *praevīsiō* "foresight" (EtymDB), from *praevidēre* "to foresee", built on *vidēre* "to see".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la previsión*
- *Say it: la previsión*, once more
- *Say it:* a sentence of your own with *la previsión*
- *Recall:* say the Spanish for the thermometer, then the Spanish for the forecast, then say *la previsión* again

Before you move on

What does la previsión mean? ("The outlook, the forecast; foresight".) Say it once more.

696.4 húmedo — humid, damp

Before the new one: say the Spanish for the forecast, then the Spanish for the outlook.

You'll want to know: húmedo

húmedo — "humid, damp".

El aire es muy húmedo en la costa.

The air is very humid on the coast.

Ropa húmeda — damp clothes.

The word, taken apart — and its English cousins

húmedo is a learned borrowing from Latin *hūmidus* "moist, damp" (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: húmedo*
- *Say it: húmedo*, once more
- *Say it:* a sentence of your own with *húmedo*
- *Recall:* say the Spanish for the forecast, then the Spanish for the outlook, then say *húmedo* again

Before you move on

What does húmedo mean? ("Humid, damp".) Say it once more.

696.5 la humedad — the humidity, the damp

Before the new one: say the Spanish for the outlook, then the Spanish for humid.

You'll want to know: la humedad

la humedad — "the humidity, the damp".

Con tanta humedad hace más calor.

With so much humidity it feels hotter.

Hay humedad en la pared — there is damp in the wall.

The word, taken apart — and its English cousins

humedad is built on *húmedo* "humid", a learned borrowing from Latin *hūmidus* "moist".

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la humedad*
- *Say it: la humedad*, once more
- *Say it:* a sentence of your own with *la humedad*
- *Recall:* say the Spanish for the outlook, then the Spanish for humid, then say *la humedad* again

Before you move on

What does la humedad mean? (“The humidity, the damp”.) Say it once more.

Chapter 697

Lluvia

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can talk about rain, from a light drizzle to a sudden downpour, and say when it stops.
>
> *Complete the last lesson of chapter 697: I can talk about rain, from a light drizzle to a sudden downpour, and say when it stops.*

697.1 escampar — to stop raining, to clear up

> Before the new one: say the Spanish for humid, then the Spanish for the humidity.

You'll want to know: escampar

escampar — "to stop raining, to clear up".

> Esperamos en el bar hasta que escampó.
>
> *We waited in the bar until it stopped raining.*

Ya ha escampado — it has stopped raining.

The word, taken apart — and its English cousins

escampar is usually explained as *es-* and *campo* "field", inherited from Latin *campus*: first to clear a field, then for the sky to clear.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: escampar*
- *Say it: escampar*, once more
- *Say it:* a sentence of your own with *escampar*
- *Recall:* say the Spanish for humid, then the Spanish for the humidity, then say *escampar* again

Before you move on

What does escampar mean? ("To stop raining, to clear up".) Say it once more.

697.2 el chubasco — the shower (of rain)

Before the new one: say the Spanish for the humidity, then the Spanish for to stop raining.

You'll want to know: el chubasco

el chubasco — "the shower (of rain)".

Por la tarde habrá chubascos.

There will be showers in the afternoon.

A forecast word for a short heavy shower.

The word, taken apart — and its English cousins

chubasco comes from Portuguese *chuvasco*, built on *chuva* "rain" (EtymDB), from Latin *pluvia.*

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: el chubasco*
- *Say it: el chubasco*, once more
- *Say it:* a sentence of your own with *el chubasco*
- *Recall:* say the Spanish for the humidity, then the Spanish for to stop raining, then say *el chubasco* again

Before you move on

What does el chubasco mean? ("The shower (of rain)".) Say it once more.

697.3 el aguacero — the downpour

Before the new one: say the Spanish for to stop raining, then the Spanish for the shower.

You'll want to know: el aguacero

el aguacero — "the downpour".

De repente cayó un aguacero.

Suddenly there was a downpour.

Heavier than *un chubasco*.

The word, taken apart — and its English cousins

aguacero is built on *agua* "water" (EtymDB), which is inherited from Latin *aqua*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *el aguacero*
- *Say it:* *el aguacero*, once more
- *Say it:* a sentence of your own with *el aguacero*
- *Recall:* say the Spanish for to stop raining, then the Spanish for the shower, then say *el aguacero* again

Before you move on

What does el aguacero mean? ("The downpour".) Say it once more.

697.4 la llovizna — the drizzle

Before the new one: say the Spanish for the shower, then the Spanish for the downpour.

You'll want to know: la llovizna

la llovizna — "the drizzle".

Con esta llovizna no hace falta paraguas.

You do not need an umbrella in this drizzle.

Light, fine rain.

The word, taken apart — and its English cousins

llovizna is built on *lloviznar* "to drizzle", which comes from *llover* "to rain", Latin *pluere* (EtymDB).

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it: la llovizna*
- *Say it: la llovizna*, once more
- *Say it:* a sentence of your own with *la llovizna*
- *Recall:* say the Spanish for the shower, then the Spanish for the downpour, then say *la llovizna* again

Before you move on

What does la llovizna mean? ("The drizzle".) Say it once more.

697.5 lloviznar — to drizzle

Before the new one: say the Spanish for the downpour, then the Spanish for the drizzle.

You'll want to know: lloviznar

lloviznar — "to drizzle".

Está lloviznando un poco.

It is drizzling a little.

Like *llover*, used in the third person.

The word, taken apart — and its English cousins

lloviznar is built on *llover* "to rain" (EtymDB), which is inherited from Latin *pluere*.

What you've built

One more word for telling, explaining and describing at B1.

Your turn

- *Say it:* *lloviznar*
- *Say it:* *lloviznar*, once more
- *Say it:* a sentence of your own with *lloviznar*
- *Recall:* say the Spanish for the downpour, then the Spanish for the drizzle, then say *lloviznar* again

Before you move on

What does lloviznar mean? (“To drizzle”.) Say it once more.

Chapter 698

Nubes y sol

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say whether the sky is cloudy, clear or sunny, and whether it is clearing up.
>
