Preface

This book teaches Kannada one word at a time, and it teaches each word by taking it apart. It is written for someone starting from zero — who may not read a single Kannada letter — so the script is taught *inside the word lessons themselves*: each word introduces exactly the letters it needs, so you learn to read ನಮಸ್ಕಾರ *and* learn that it means "greetings" in the same few minutes. There is no alphabet drill to sit through first. (A reader who already reads Kannada simply skims the "letters in this word" notes.)

Kannada is one of the four literary **Dravidian** languages — a family entirely separate from the Indo-European one that gave us English, Latin, and Sanskrit. Its own personality shows in one contrast, drawn again and again in these pages: where its oldest sister **Tamil** guards its native word-stock, Kannada borrowed *freely* from Sanskrit. So "hello" is the Sanskrit ನಮಸ್ಕಾರ (*namaskāra*) — yet "no" and "okay" are the native Dravidian ಇಲ್ಲ (*illa*) and ಸರಿ (*sari*), shared almost unchanged with Tamil. Each lesson sets the word beside its cousins across the family — English always, and Sanskrit, Hindi, and the other Dravidian languages where they illuminate — every form supplied in full, so no prior knowledge of any of them is assumed.

How to use this book

Every numbered section is one word, or one small phrase, and takes a few minutes — the length of a queue, an errand, or the walk to the bus. Read them in order the first time through: each section stands on the ones before it, and nothing is used before it has been taught. After that the book becomes reference, and you can open it anywhere.

Say the Kannada out loud wherever you can. The prompts under *Your turn* are written to be spoken, and saying a word is most of what makes it stay. The questions under *Before you move on* carry their own answers in brackets: cover them, answer from memory, then look.

Nothing here is gated behind the alphabet. Each lesson introduces exactly the letters and sounds its own word needs, so you are reading real words from the first page rather than drilling a chart. The whole script is gathered in a reference at the back of the book — somewhere to look things up when you are curious, never a chapter to sit through first.

Chapter 1

Greetings

Modes: **voice** (1) **eyes** (5) **pen** (4) **Hands-free start:** the first of 10 lessons.

> ***By the end of this chapter:*** I can greet someone in Kannada, recognize the reply, and choose an appropriate response.
>
> *Read all five words straight off the page, then say which two are Sanskrit loans and which three are native Dravidian.*

1.1 Namaskāra — "greetings," a making of a bow

> Meet your first Kannada word. Say **namaskāra**: "hello" or "greetings." Then meet three of its letters, one small piece at a time.

The letters in this word

Kannada runs **left to right**. A consonant normally carries a built-in **a**.

- ನ · ಮ · ರ = *na* · *ma* · *ra* — three of the word's letters, each with its built-in *a*.

That is enough for a first lesson. The rest of the word — a long-$\bar{a}$ sign and two consonants stacked into one cluster — waits. The whole written word appears at the end of this chapter, after the next words have shown you how Kannada stacks one consonant on another.

The word, taken apart — its roots and family

Namaskāra came from Sanskrit **namas** ("a bow") + **kāra** ("a making," from *kṛ*, "to do"): literally **"the making of a bow."** Kannada borrowed the whole word. Tamil instead kept its native greeting, *vaṇakkam*.
Sanskrit *namaskāra* is listed in CDIAL 6960, and *namas*, "a bow, adoration", in CDIAL 6958.

Across the family — the same idea, five ways

Language	"Hello"	Source
Kannada	*namaskāra*	Sanskrit
Telugu	*namaskāram*	Sanskrit
Malayalam	*namaskāram*	Sanskrit
Hindi	*namaste*	Sanskrit
Tamil	*vaṇakkam*	**native Dravidian**
English	*hello*	Germanic

Tamil alone kept its own word; the rest lean on the Sanskrit *namas-*.

Why it's said this way

With palms together and a small bow, *namaskāra* works as **hello or goodbye**. It is respectful without being stiff.

Your turn

- *Say it:* its beats — na · ma · s · kā · ra → "namaskāra"
- *Say it:* na · ma · ra
- *Read it:* ನ · ಮ · ರ, left to right
- *Say it:* "namaskāra" — you are offering respect
- *Write it:* trace ನ with a finger, then copy it once

Before you move on

Read it: ನ · ಮ · ರ (*na · ma · ra.*) What does *namaskāra* mean? ("Greetings.") What does it literally mean? (Sanskrit *namas* + *kāra*: "the making of a bow.")

1.2 Dhanyavāda — "thank you," an utterance of "worthy"

The word for gratitude — and another Sanskrit loan, so a chance to see the *same* borrowed word Kannada shares with Telugu and Hindi.

The letters in this word

(Skim if you read Kannada.)
Three of its letters today:

- ಧ = "dha" — an **aspirated** *d* (a real puff of breath after it).
- ವ = "va."
- ದ = "da" — a plain *d*, with no puff. Set it beside ಧ and compare.

The middle of the word stacks *n* onto *ya* and stretches *va* to *vā*. Those pieces, and the whole written word, wait for the end of this chapter.

The word, taken apart — its roots and family

Dhanyavāda is **Sanskrit**: **dhanya** ("worthy, blessed," from *dhana*, "wealth") + **vāda** ("a saying, an utterance," from the root *vad*, "to speak"). Literally **"an utterance of '[you are] worthy'"** — a formal, dignified thanks. It is the **same word** as Hindi *dhanyavād* and Telugu *dhanyavādamulu*.
Sanskrit *dhanya* is in CDIAL 6727a, glossed "rich; fortunate, happy", and *vāda*, "speech", in CDIAL 11507.

Across the family — the same idea, five ways

Language	"Thanks"	Note
Kannada	*dhanyavāda*	**Sanskrit** (*dhanya* + *vāda*)
Telugu	*dhanyavādamulu* (ధన్యవాదములు)	Sanskrit — same word
Hindi	*dhanyavād* (धन्यवाद)	Sanskrit — same word
Tamil	*naṉṟi* (நன்றி)	**native** ("goodness")
Malayalam	*nandi* (നന്ദി)	**native** — Tamil's cousin

Here the split is stark: Kannada, Telugu, and Hindi all use the Sanskrit *dhanyavāda*, while Tamil and Malayalam keep the native Dravidian *naṉṟi / nandi*. Kannada sits on the Sanskrit-borrowing side of its own family.

Why it's said this way

dhanyavāda is the formal, written "thank you." In warm everyday Kannada people often reach for the English *thanks*, or simply show gratitude in tone and gesture; the full *dhanyavāda* carries weight, for when you mean to mark it.

Your turn

Say these aloud:

- dha · nya · vā · da → "dhanyavāda"
- the two Sanskrit blocks — *dhanya* ("worthy") + *vāda* ("a saying")
- notice ಧ is *dha*, a breathy *d* — not a plain *d*

Before you move on

Which carries the puff of breath, ಧ or ದ? (ಧ, *dha*.) What are the two Sanskrit pieces of *dhanyavāda*? (*dhanya* "worthy" + *vāda* "a saying.") Which two Dravidian languages use a *native* word for thanks instead? (Tamil *naṉṟi*, Malayalam *nandi*.)

1.3 ಹೌದು (haudu) — "yes"

After two Sanskrit loans, a **native Kannada** word — the plain "yes."

The letters in this word

(Skim if you read Kannada.)

- ಹೌ = "hau" — the consonant ಹ (ha) carrying the **"au" vowel sign** (the two little marks that hug the letter).
- ದು = "du" — ದ (da) with the **"u" vowel sign** hooked beneath.

Left to right: ಹೌ · ದು = *hau-du* →

ಹೌದು = **haudu** = "yes."

The word, taken apart — its roots and family

ಹೌದು (*haudu*) is the everyday **"yes / that's so,"** a genuinely native Kannada word (not a Sanskrit loan). Its polite-agreement cousins — *audu*, *houdu* in speech — all circle the same "it is so."
It is usually explained as *ahudu*, "it becomes, it is so", a form of the native verb *āgu*, "to become" (DEDR 333). Telugu *avunu*, "yes", comes from the same verb in that entry. DEDR 333 compares Sanskrit *ām*.

Grammar Lens: Dravidian often answers by echoing the verb

Like its sister Tamil, Kannada frequently answers "yes" by **repeating the verb** rather than using a stand-alone word: asked *"bandiddīyā?"* ("have you come?"), a natural yes is *"bandiddēne"* ("I have come"). Keep *haudu* as the simple all-purpose "yes," but expect a "yes" to come back as a whole verb — a habit shared right across the Dravidian family.

Your turn

Say these aloud:

- hau · du → "haudu"
- the "au" vowel sign on ಹ, then the "u" sign under ದ
- "haudu" — "yes, that's so"

Before you move on

Read it: ಹೌದು Is it native Kannada or a Sanskrit loan? (Native.) Besides *haudu*, how else might a Kannada speaker say "yes"? (By echoing the question's verb — e.g. *bandiddēne*, "I have come.")

1.4 ಇಲ್ಲ (illa) — "no," and a word Tamil shares almost exactly

The partner of *haudu* — and a beautiful piece of family evidence: this Kannada "no" is essentially the **same word** as Tamil's *illai*.

The letters in this word

(Skim if you read Kannada.)

- ಇ = **"i"** — an **independent vowel** (the word starts with it, so it gets a full letter, not a hooked-on sign).
- ಲ್ಲ = "lla" — ಲ (la) loses its vowel and stacks under another ಲ (la): a doubled, held "ll."

Left to right: ಇ · ಲ್ಲ = *i-lla* →

ಇಲ್ಲ = illa

The word, taken apart — its roots and family

ಇಲ್ಲ (*illa*) is built on the old Dravidian root **il**, "not-being, absence" — so, like Tamil *illai*, it is really the statement **"[it] is not, [there] is not,"** doing duty as the everyday "no." Its positive twin is *ide*, "there is."
DEDR 2559 lists Kannada *illa* with Tamil *illai*, Malayalam *illa* and Telugu *lē-*, *lēdu*.

Grammar Lens: Dravidian negates by *being*, not with a "not"-word

English inserts *not* / *no* to make a sentence negative. Kannada — exactly like Tamil — instead swaps in the **negative verb of existence**:

- *pustaka* ***ide*** — "there **is** a book."
- *pustaka* ***illa*** — "there **is not** a book."

So *illa* is both the plain "no" and the word that negates a whole sentence. This is a **shared Dravidian inheritance**: Tamil *illai*, Kannada *illa*, Malayalam *illa* — one family, one way of saying a thing is not.

Across the family — the same idea, five ways

Language	"No / isn't"	Note
Kannada	*illa* (ಇಲ್ಲ)	native Dravidian (root *il*)
Tamil	*illai* (இல்லை)	the **same** root
Malayalam	*illa* (ഇല്ല)	the **same** root
Telugu	*lēdu* (లేదు)	native Dravidian, the same entry (DEDR 2559)
Hindi	*nahīṁ* (नहीं)	Indo-European

Telugu's *lē-* has lost the *i-*, but DEDR 2559 files it with *il-* all the same. Hindi, from the other family entirely, is unrelated.

Your turn

Say these aloud:

- i · lla → "illa"
- the pair — *haudu* ("yes") / *illa* ("no")
- "pustaka illa" — "there is no book"

Before you move on

Read it: ಇಲ್ಲ Literally, is it closer to "no" or "is not"? ("Is not / there is not.") Which two other Dravidian languages share this exact root? (Tamil *illai*, Malayalam *illa*.)

1.5 ಸರಿ (sari) — "okay," the word that oils every conversation

The easy middle between "yes" and "no": "okay, alright, fine, correct." And Tamil has the very same word — the Dravidian family shares it whole.

The letters in this word

(Skim if you read Kannada.)

- ಸ = "sa."
- ರಿ = "ri" — the consonant ರ (ra) with the **"i" vowel sign**.

Left to right: ಸ · ರಿ = *sa-ri* →

ಸರಿ = **sari** = "okay / correct."

Two clean syllables — no conjunct, no stacking — a good moment to feel how smoothly Kannada's round letters read.

The word, taken apart — its roots and family

ಸರಿ (*sari*) means **"correct, even, right,"** and by an easy step, **"okay, agreed."** It is the verbal nod of Kannada, just as it is of Tamil (சரி, *sari*) — the **same word** across the family. Doubled, *sari sari*, it means "yes, yes, alright."
Its origin is uncertain. DEDR has no entry for *sari* in this sense, and the usual account traces it to Sanskrit *sadṛśa*, "like, equal", through a Prakrit form *sarisa* (CDIAL 13120).

Grammar Lens: one shared Dravidian word, two scripts

sari is a small proof of how close these languages are: identical word, identical meaning, written in two different scripts — Kannada ಸರಿ, Tamil சரி. As you learn to read each script, watching a shared word change its clothes but not its sound is the fastest way to feel the family resemblance. (This "same word, different script" pattern-matching is exactly what carries you across Kannada, Telugu, and Malayalam.)

Your turn

Say these aloud:

- sa · ri → "sari"
- the everyday triple — *haudu* (yes) · *illa* (no) · *sari* (okay)
- "sari, sari" — "alright, alright"

Before you move on

Read it: ಸರಿ What does it literally mean, and what does it do in conversation? ("Correct/even" → "okay, agreed.") Is it native or borrowed, and which sister language spells the same word ಶರಿ? (Native Dravidian; Tamil.)

1.6 ನ — one character, met inside words you already say

Rounded and looping like Telugu (its sister script), most letters topped by a small curved headstroke; no continuous top line.

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ನ

ನ — *na*.

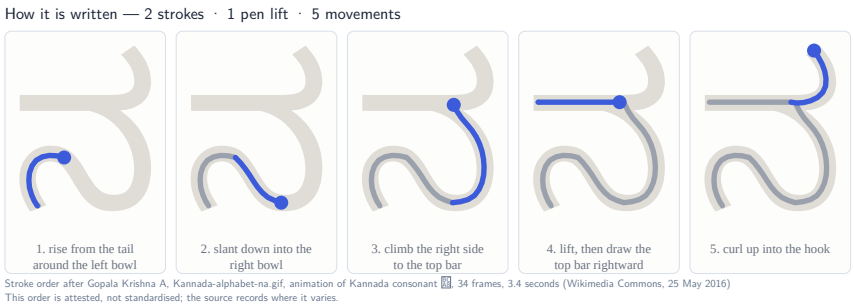

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *n*, it is **na**.

You already say these, and every one of them has ನ somewhere inside it:

- ನಮಸ್ಕಾರ *namaskāra* — hello / greetings (namaskāra — "a making of a bow")
- ಧನ್ಯವಾದ *dhanyavāda* — thank you (dhanyavāda — "an utterance of 'worthy'")

This is the first time both whole words are on the page. Three of their shapes are new to you — ಕ *ka*, ಯ *ya*, and the long-*ā* sign ಾ — and you need not read them yet. Today's work is finding ನ.

Writing: ನ

How ನ *is written, stroke by stroke*

- **1.** rise from the lower tail around the left bowl
- **2.** without lifting, slant down into the right bowl
- **3.** without lifting, climb the right side to the top bar
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook

Pen lifts: 1. The body is one run, from the tail at the bottom up to the right side; the curled bar on top comes after the only lift.

Your turn

- *Look:* at these words, and find ನ in the ones that have it

  ನಮಸ್ಕಾರ · ಧನ್ಯವಾದ · ಹೌದು

- *Trace it:* ನ three times, saying *na* as you finish each one
- *Look:* back at any page of this chapter and find ನ once more

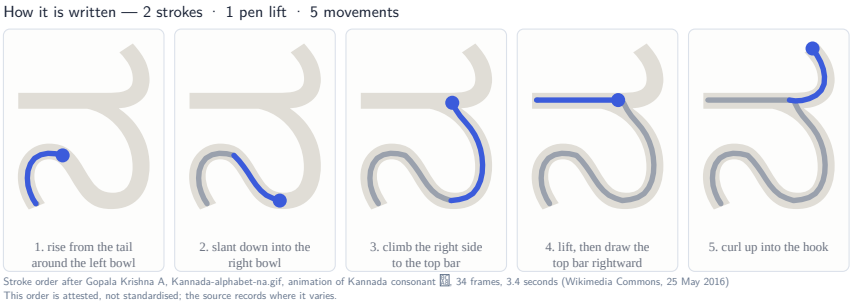

Before you move on

Which character is this — ನ? What sound does it carry? (***na.***)
Name one word you already say that contains it.

1.7 ನ — copy it where it lives

Find ನ inside ನಮಸ್ಕಾರ — *namaskāra* — and put your finger on it.

Writing — guided copy

How ನ *is written, stroke by stroke*

The model stays on the page. Copy ನ once on its own, then copy it a second time **with the letter that follows it in the word**, keeping the two the same size and the same distance apart as the printed pair.

That second copy is the whole lesson. A letter traced alone teaches your hand one shape; a letter copied beside its neighbour teaches it where the shape has to stop, and a hand that has only ever drawn letters alone writes them too large and too far apart the first time it writes a word.

Look back at the model as often as you want. Nothing is hidden today.

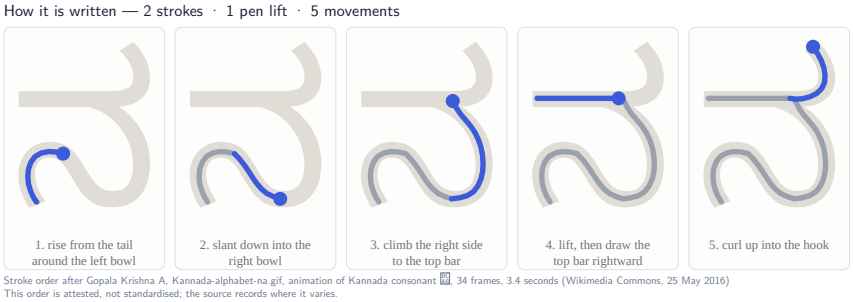

Before you move on

Hold your two copies next to the printed word. Is the gap you left the same one the book left? That gap is not spacing — it is the difference between two letters and one word.

1.8 ನ — write it with the model covered

Look at ನ once and say *na*. Then cover it, and every other ನ on the page.

Writing — delayed copy

How ನ *is written, stroke by stroke*

With the model covered, wait ten seconds, then write ನ once from memory.

Ten seconds is not long and is not meant to be. It is long enough that your hand cannot be tracing a shape it can still see, and short enough that a letter you met a minute ago is still there to be found.

Only after the letter is finished, uncover the model and compare. Repair **one** thing — the first that differs — and leave the rest.

Before you move on

The thing to look at is not whether your letter is beautiful. It is whether it is the **same letter**, and in this script that usually comes down to one curve closing where the model's closes, or staying open where the model's stays open. A hand drawing from memory rounds off what it is unsure about.

1.9 ನ — the letter from the sound

Cover every ನ on the page. Nothing to copy and nothing to uncover.

Writing — dictation

Say *na* aloud, or play it, and write the letter that carries it. Once.

This is a different job from the last lesson even though the letter is the same. A delayed copy asks your hand to remember a shape. Dictation asks it to turn a **sound** into a shape, which is the thing writing is actually for, and the two do not always arrive together.

Before you move on

Uncover the model and compare — and then notice what you were asked to write.
Not *n.* **na**. The vowel is already inside the letter and nobody wrote it, which is the fact about this script that the first three lessons showed you and this one makes you act on. Hearing *na* and writing one shape is the whole difference between an alphabet and what you are learning.

1.10 Chapter 1 — a five-word recap

Five words, and with them a first handful of Kannada letters read straight off the page. Let's gather only what you have already learned and make it feel easy.

Your turn: Read them back

Read it: the three written in Kannada, sounding each out left to right before checking

The other two stay in romanization until their letters arrive in later chapters:

Read	Meaning	Native or borrowed
ನಮಸ್ಕಾರ *namaskāra*	hello / greetings	Sanskrit
ಧನ್ಯವಾದ *dhanyavāda*	thank you	Sanskrit
ಹೌದು *haudu*	yes	native
illa	no / there isn't	native (= Tamil *illai*)
sari	okay / correct	native (= Tamil *sari*)

The letters that did it: consonants carry a built-in **"a"**; a **vowel sign** swaps that vowel (ಾ for "ā," ು for "u," ೌ for "au"); a **virama** strips the vowel so a consonant can **stack under** the next as a conjunct (*ottakṣara*

— ಸ್ಕ, ನ್ಯ); and a word-initial vowel gets a **full letter** of its own, which the next chapters begin to teach.

Notice the pattern already: the two **greeting/politeness** words are Sanskrit loans; the three **everyday grammar** words are native Dravidian — and two of them (*illa*, *sari*) are shared almost unchanged with Tamil.

You'll want to know: A promise for later

Kannada has a warm departure exchange built around going and coming back. It belongs in the later chapter where you learn those actions one at a time. For now, repeating the greeting is enough when you part.

Your turn

Say these aloud:

- all five — namaskāra · dhanyavāda · haudu · illa · sari
- greet and thank — "namaskāra!" … "dhanyavāda."

Before you move on

Read it: all five words aloud
Which two are Sanskrit loans, and which three are native Dravidian? (Loans: *namaskāra*, *dhanyavāda*. Native: *haudu*, *illa*, *sari*.) Which one means "okay / correct"? (*sari*.)
Next chapter starts introducing yourself, one short possession form at a time.

Chapter 2

Introducing Yourself

Modes: **voice** (5) **eyes** (4) **pen** (2) **Hands-free start:** the first 6 of 11 lessons.

> ***By the end of this chapter:*** I can introduce myself in Kannada, give my name, and understand the other person's name.
>
> *Run the whole introduction: give your name, ask for theirs, and close with santōṣa — then name the one Sanskrit word in it.*

2.1 ಹೆಸರು (hesaru) — "name," and the *p*→*h* shift

> "Name" — and a word that shows off a famous Kannada sound-law.

The letters in this word

(Skim if you read Kannada.) ಹ (ha) + ೆ (the *e*-sign) → ಹೆ (he); ಸ (sa); ರು (ru). Read ಹೆ · ಸ · ರು → **hesaru**.

The word, taken apart — its roots and family

ಹೆಸರು (*hesaru*, "name") is **native Dravidian**, from Proto-Dravidian ***pesar** — and it hides a famous Kannada sound-law: an old initial *p* became *h*. So ***pesar** → ***hesar** → **hesaru**. That makes it a **cousin of Tamil *peyar*** (same root; Tamil kept the *p*, Kannada softened it to *h*) — and, like *peyar*, *not* related to Sanskrit *nāma* (Hindi *nām*, English *name*).

Across the family: Kannada *hesaru*, Tamil *peyar*, Telugu *pēru*, Malayalam *pēr* — one Dravidian word; only Hindi *nām* / English *name* are Indo-European.
DEDR 4410 gives the older Kannada spelling *pesar(u)*, with the *p-* still in place.

Across the family — the same idea, five ways

Language	"Name"	Source
Kannada	**ಹೆಸರು** *hesaru*	Dravidian *pesar (p→h)
Tamil	*peyar*	the *same* Dravidian root (kept *p*)
Telugu	*pēru*	the *same* Dravidian root
Malayalam	*pēr*	the *same* Dravidian root
Hindi	*nām*	Sanskrit (Indo-European)
English	*name*	Indo-European

The *p→h* shift is why *hesaru* looks unlike its sisters — but it is the same word.

Your turn

Say these aloud:

- "hesaru"
- the shift — **pesar* → *hesaru* (p → h)
- its Tamil cousin — *peyar*

Before you move on

What sound-law turned **pesar* into *hesaru*, and what Tamil word is its cousin? (*p* → *h*; Tamil *peyar*.) Is it related to English *name*? (No — native Dravidian.)

2.2 ನನ್ನ (nanna) — “my”

“My” — native Dravidian, with no European cousin.

The letters in this word

(Skim if you read Kannada.) ನ (na) + the conjunct ನ್ನ (nna) → **nanna** — a doubled, held *nn*.

The word, taken apart — its roots and family

ನನ್ನ (*nanna*) means “my.” It belongs to Kannada’s native Dravidian first-person family, not to the Indo-European family behind English *I/ my*. The stem underneath is Dravidian *nān — the same one behind Tamil *nāṉ / eṉ*. You will meet the related word for “I” in its own lesson; today you only need *nanna*.
DEDR 5160 lists Kannada *nān*, “I”, with the stem *nan-* that *nanna* is built on, beside Tamil *nāṉ* and Telugu *nēnu*.

Your turn

Say these aloud:

- “nanna”
- *nanna* once with its meaning, “my”

Before you move on

What does ನನ್ನ mean? (“My.”) Is it native Dravidian or an Indo-European loan? (Native Dravidian.)

2.3 ನನ್ನ ಹೆಸರು ... (nanna hesaru ...) — “my name is...,” with no “is”

Assemble the two atoms — and notice, as in Tamil, no word for “is.”

You'll want to know: The phrase, assembled

- nanna (my) + hesaru (name) + your name.

  ನನ್ನ ಹೆಸರು ... = "my name …" → **"my name is..."**

Nanna hesaru Arun. → "My name is Arun."

The word, taken apart — its roots and family

ನನ್ನ ಹೆಸರು ... (*nanna hesaru …*) is two native Dravidian words: *nanna*, "my" (DEDR 5160), and *hesaru*, "name" (DEDR 4410). Tamil *en̲ peyar* is built the same way, from the same two roots, also with no word for "is".

Grammar Lens: the zero copula

There is **no verb**. Kannada sets "my name" beside "Arun" and lets the "is" be understood — the **zero copula** of the Dravidian family (just like Tamil). *Nanna hesaru Arun* = literally "my name Arun."

Your turn

Say these aloud:

- "nanna hesaru …" with your name
- notice — no word for "is"

Before you move on

Give your name in Kannada. (*Nanna hesaru ….*) What does Kannada leave out that English needs? (The verb "is" — zero copula.)

2.4 ನೀನು / ನೀವು (nīnu / nīvu) — "you," familiar and respectful

"You" — and Kannada makes respect the same way Tamil and French do.

The letters in this word

(Skim if you read Kannada.) ನೀ (nī) + ನು (nu) → *nīnu*; ನೀ + ವು (vu) → *nīvu*.

The word, taken apart — its roots and family

ನೀನು (*nīnu*, familiar "you") ← Proto-Dravidian ***nīn** — the same native root as Tamil *nī*. ನೀವು (*nīvu*) is the respectful/plural "you." DEDR 3684 lists Kannada *nīn(u)* with Tamil *nī*; DEDR 3688 lists the plural *nīvu* with Tamil *nīm* and Telugu *mīru*.

Grammar Lens: respect by the plural

nīnu (familiar) vs. *nīvu* (respectful, and literally plural) — the same politeness-by-plural as Tamil *nīṅgaḷ* and French *vous*: one respected person addressed as "you all." For a first meeting, **nīvu**.

Your turn

- *Say it:* "nīnu" (familiar), "nīvu" (respectful)
- *Recall:* say *namaskāra*

Before you move on

How does Kannada make "you" respectful, and which languages use the same trick? (By the plural — *nīvu*; Tamil *nīṅgaḷ*, French *vous*.)

2.5 ಏನು (ēnu) — "what"

The last piece of the question: "what."

The letters in this word

(Skim if you read Kannada.) ಏ (independent long *ē*, word-initial) + ನು (nu) → **ēnu**.

The word, taken apart — its roots and family

ಏನು (*ēnu*, "what") is native Dravidian, on the interrogative stem ***yā-** / ***e-** — the same Dravidian question-root as Tamil *e̲nn̲a*, heading

Kannada's question family: *ēnu* (what), *yāru* (who), *elli* (where), *yāke* (why).
DEDR 5151 lists Kannada *ēn*, "what", with Tamil *ētu* and Telugu *ēdi*.

Your turn

- *Say it:* "ēnu"
- *Say it:* the question family — ēnu, yāru, elli
- *Read it:* ಧನ್ಯವಾದ
- *Recall:* say *haudu*, then say *illa*

Before you move on

What Dravidian stem heads ಏನು and Kannada's other question-words? (**yā-/*e-*, the same as Tamil *enna*.)

2.6 ನಿಮ್ಮ ಹೆಸರು ಏನು? (nimma hesaru ēnu?) — "what's your name?"

Assemble the question — your + name + what — still no "is."

You'll want to know: The phrase, assembled

- ನಿಮ್ಮ (*nimma*, "your") = the possessive of *nīvu* ("you," respectful).

  ನಿಮ್ಮ ಹೆಸರು ಏನು? = literally "**your name what?**" = "what's your name?"

Three words, **no verb** — the zero copula holds for questions too.

The word, taken apart — its roots and family

ನಿಮ್ಮ ಹೆಸರು ಏನು? (*nimma hesaru ēnu?*) is three native Dravidian words: *nimma*, "your" (DEDR 3688), *hesaru*, "name" (DEDR 4410), and *ēnu*, "what" (DEDR 5151).

Grammar Lens: answer, and the familiar version

Answer with the sentence you built: **Nanna hesaru Arun.** The familiar "your" is *ninna* (from *nīnu*): *ninna hesaru ēnu?*

Your turn

Say these aloud:

- "nimma hesaru ēnu?"
- ask, then answer — "nimma hesaru ēnu?" / "nanna hesaru …"

Before you move on

What does **ನಿಮ್ಮ ಹೆಸರು ಏನು?** literally say, and what's missing vs. English? ("Your name what?"; no "is" — zero copula.)

2.7 ೆ — one character, met inside words you already say

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ೆ

ೆ — *e*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *e*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ೆ somewhere inside it:

- **ಹೆಸರು** *hesaru* — name
- **ನಿಮ್ಮ ಹೆಸರು ಏನು?** *nimma hesaru ēnu?* — what is your name?

Writing: ೆ — copy what you see

Put your pen on ೆ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ೆ in the ones that have it

  ಹೆಸರು · ಹೌದು · ನಮಸ್ಕಾರ

- *Trace it:* ೆ three times, saying *e* as you finish each one
- *Look:* back at any page of this chapter and find ೆ once more

Before you move on

Which character is this — ೆ? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *e* on; takes the built-in *a* off.**) Name one word you already say that contains it.

2.8 Santōṣa — "joy," and "pleased to meet you"

The warm close — and, true to Kannada, a Sanskrit word where Tamil used a native one.

You'll want to know: The phrase

The full form is *nimmannu bhēṭiyāgi santōṣa* — "having met you, joy."

Today it stays a spoken word. Its written form waits a few chapters, for the lesson that teaches the shape for *ta* inside it.

The word, taken apart — its roots and family

Santōṣa ("joy, contentment") is **Sanskrit** — *sam-* ("fully") + *toṣa* ("satisfaction") — not native. Where Tamil reaches for its home-grown *magiḻcci*, Kannada uses a Sanskrit word even for "pleased." The same split you saw over "hello" (*namaskāra*) and "thanks" (*dhanyavāda*)

runs right through the introductions: Kannada borrows, Tamil keeps its own.
CDIAL 12895 lists Sanskrit *santoṣa*, "satisfaction".

Your turn

Say these aloud:

- "santōṣa"
- the split — Kannada *santōṣa* (Sanskrit) vs. Tamil *magiḻcci* (native)

Before you move on

Is *santōṣa* native or borrowed, and what does the contrast with Tamil show? (Sanskrit; Kannada borrows Sanskrit — here for "pleased" — where Tamil keeps native *magiḻcci*.)

2.9 ು — one character, met inside words you already say

Before the new one: ನ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ು

ು — *u*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *u*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ು somewhere inside it:

- ಹೌದು *haudu* — yes (haudu)
- ಹೆಸರು *hesaru* — name
- ನೀನು / ನೀವು *nīnu / nīvu* — you (familiar / respectful)
- ಏನು *ēnu* — what

Writing: ು — copy what you see

Put your pen on ು and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ು in the ones that have it

  ಹೌದು · ಹೆಸರು · ನಮಸ್ಕಾರ

- *Trace it:* ು three times, saying *u* as you finish each one
- *Look:* back at any page of this chapter and find ು once more

Before you move on

Which character is this — ು? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *u* on; takes the built-in *a* off.**) Name one word you already say that contains it.

2.10 Chapter 2 — the introduction, whole

Every atom built. Here's the exchange.

You'll want to know: The dialogue

Kannada	English
ನನ್ನ ಹೆಸರು ಮೀರಾ. (*nanna hesaru Mira*)	My name is Mira.
ನಿಮ್ಮ ಹೆಸರು ಏನು? (*nimma hesaru ēnu*)	What's your name?
nanna hesaru Arun	My name is Arun.
santōṣa	Pleased to meet you.

Every atom traced:

- **hesaru** ← Dravidian **pesar* (p→h; cousin of Tamil *peyar*, *not name*)
- **nanna** ← *nānu* ("I")
- **ēnu** ← Dravidian question-stem **yā-/*e-*
- **santōṣa** ← **Sanskrit** (Kannada borrows even for "pleased"; Tamil keeps native *magiḻcci*)

The Kannada habit: the **zero copula** (no "is"). And the family thread — native Dravidian grammar words, a Sanskrit word for "pleased."

Your turn

Say these aloud:

- the whole exchange, both voices
- your own introduction — "nanna hesaru …"
- ask it back — "nimma hesaru ēnu?"

Before you move on

Give your name, ask someone else's, say you're pleased. (*Nanna hesaru …. / Nimma hesaru ēnu? / Santōṣa.*) Which word here is Sanskrit, not native? (*santōṣa* — "pleased.")
Next chapter: *hēgiddīra?* ("how are you?") and answering with *chennāgiddēne* — the responding cycle.

2.11 ನಿಮ್ಮ ಹೆಸರು ಏನು? — the exchange, with nothing left out

Two ways to agree. Say the one that answers a question, then the one that accepts what someone has said.

Your turn: the whole exchange

Say these aloud:

- ask a stranger their name — *nimma hesaru ēnu?*
- answer with your own — *nanna hesaru …*
- that meeting them is a pleasure — *santōṣa*
- agree that you followed it — *haudu*

Why it's said this way

Two things about this exchange that no translation of it carries.
There is no verb in either sentence. *Nimma hesaru ēnu?* is *your name what?* and *nanna hesaru …* is *my name …* — Kannada puts nothing where English insists on *is*. The question word alone finishes the question, and the naming alone finishes the answer.
And the word for *you* chose the register before you opened your mouth:

	familiar	**respectful**
you	ನೀನು *nīnu*	ನೀವು *nīvu*
your	*ninna*	ನಿಮ್ಮ *nimma*

The question above uses *nimma*, and that is not an accident — a stranger gets the respectful form, and the possessive follows the pronoun rather than being chosen separately.

Before you move on

How many verbs are in *nimma hesaru ēnu?* (**None.**) Which of the two agreements accepts a statement rather than answering a question? (*Sari.*) Which form of *you* would you use with someone you are meeting for the first time? (*Nīvu.*)

Chapter 3

How Are You?

Modes: **voice** (1) **eyes** (5) **pen** (2) **Hands-free start:** the first of 8 lessons.

> ***By the end of this chapter:*** I can ask how someone is in Kannada, answer naturally, and return the question.
>
> *Run the whole exchange: nīvu hēgiddīrā? — nānu cennāgiddēne, dhanyavāda — and wave away the thanks with paravāgilla.*

3.1 ಹೇಗೆ (hēge) — "how," another of the ē-questions

You met ಏನು (*ēnu*, "what") in Chapter 2. Here is its sibling in Kannada's question family.

The letters in this word

(Skim if you read Kannada.) ಹೇ (*hē*, *ha* + the long-*ē* sign) + ಗೆ (*ge*) → ಹೇಗೆ (*hēge*).

The word, taken apart — its roots and family

ಹೇಗೆ (*hēge*, "how") is native Dravidian, on the interrogative base **ē-/ yā-** you met in *ēnu*. Kannada gathers its questions here: *ēnu* (what), *hēge* (how), *yāru* (who), *elli* (where), *yāvāga* (when), *yāke* (why). It is the same Dravidian question-root heading Tamil's *eppaṭi* and Telugu's *elā* — a family far older than the Sanskrit words Kannada, like its sisters, borrows so readily.

DEDR 5151 lists *hēge* itself, "in what manner, how", among the Kannada question words.

Your turn

- *Say it:* "hēge"
- *Say it:* the question family — *ēnu, hēge, yāru, elli, yāvāga*
- *Recall:* say *sari*
- *Read it:* ಹೆಸರು
- *Recall:* say *nanna*

Before you move on

What base do Kannada's question-words share, and which cousins head their own? (The interrogative *ē-/yā-*; Tamil's *eppaṭi*, Telugu's *elā*.)

3.2 ◌್ — one character, met inside words you already say

Before the new one: ◌ು — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ◌್

◌್ — *no sound of its own — it takes one away.*

It is a **vowel-killer**. Every consonant in this script arrives with an *a* already inside it — that is what an abugida is. This mark takes the *a* back, leaving the bare consonant. It is how the script writes two consonants in a row.

You already say these, and every one of them has ◌್ somewhere inside it:

- ನಮಸ್ಕಾರ *namaskāra* — hello / greetings (namaskāra — "a making of a bow")

- ಧನ್ಯವಾದ *dhanyavāda* — thank you (dhanyavāda — "an utterance of 'worthy'")
- ಇಲ್ಲ *illa* — no / there isn't (illa — the negative)
- ನನ್ನ *nanna* — my

Writing: ್ — copy what you see

Put your pen on ್ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ್ in the ones that have it

  ನಮಸ್ಕಾರ · ಧನ್ಯವಾದ · ಹೌದು

- *Trace it:* ್ three times, and each time say what it does: **it kills the built-in *a***
- *Look:* back at any page of this chapter and find ್ once more

Before you move on

Which character is this — ್? What does it do to the consonant it sits on? (**Takes away the built-in *a*.**) Name one word you already say that contains it.

3.3 ನೀವು ಹೇಗಿದ್ದೀರಾ? (nīvu hēgiddīrā?)

> The everyday "how are you?" — and the verb "to be" that carries it.

The letters in this word

The new word is **ಹೇಗಿದ್ದೀರಾ** (*hēgiddīrā*): *hēge* ("how") fused with **ಇದ್ದೀರಾ** (*iddīrā*, "are you"), from the verb "to be, exist, stay" + the respectful-you ending. Note the doubled **ದ್ದ** (*dd*).

The word, taken apart — its roots and family

ನೀವು ಹೇಗಿದ್ದೀರಾ? = **ನೀವು** (*nīvu*, "you," respectful) + **ಹೇಗಿದ್ದೀರಾ** (*hēgiddīrā*, "how are you") — the verb **last**, as always. The verb is **ಇರು** (*iru*, "to be / exist / stay") — the same native Dravidian *iru* that Tamil uses for "how are you," and (in Chapter 5) the verb for "I live." All three pieces are native Dravidian: *nīvu* (DEDR 3688), *hēge* (DEDR 5151) and *iru*, "to be" (DEDR 480).

Grammar Lens: the verb carries "you"

The ending already means "you (respectful)," so *nīvu* can be dropped: *hēgiddīrā?* alone is a complete "how are you?" To a friend (*nīnu*), it shifts: **ನೀನು ಹೇಗಿದ್ದೀಯಾ?** (*nīnu hēgiddīyā?*). Match the "you" to the verb-ending, as Kannada always does.

Your turn

Say these aloud:

- the respectful question — *nīvu hēgiddīrā?*
- the familiar version — *nīnu hēgiddīyā?*
- the verb and its meaning (*iru* — "to be / exist / stay")

Before you move on

What verb powers "how are you?", and which Dravidian sister uses the same one? (*Iru*, "to be"; Tamil — its *iru* is the same word.)

3.4 ನಾನು (nānu) — "I," the Dravidian first person

To answer "how are you?" you first need "I." In Chapter 2 you learned *nanna* ("my"); here is its owner.

The letters in this word

ನಾ (*nā*, *na* + long-*ā* sign) + ನು (*nu*) → ನಾನು (*nānu*).

The word, taken apart — its roots and family

ನಾನು (*nānu*, "I") ← Proto-Dravidian ***yān̲ / *nān̲** — native, and (unlike Hindi's *maiṁ*, cousin of English *me*) **not** related to the European "I/me" family. Its possessive is the ನನ್ನ (*nanna*, "my") you already met: *nānu* "I," *nanna* "my." Kannada borrows Sanskrit words freely for higher vocabulary, but its bedrock pronouns stayed Dravidian.
DEDR 5160 lists Kannada *nān* and *ān* with Tamil *yān̲*, *nān̲* and Telugu *nēnu*.

Grammar Lens: "I" you can drop

Kannada verbs carry the person in their ending — *iddēne* already means "**I** am" — so *nānu* is often left out. You still learn it first, because the answer to *hēgiddīrā?* begins with it.

Your turn

- *Say it:* "nānu"
- *Say it:* the pair — *nānu* (I), *nanna* (my)
- *Say it:* is it related to English *me*? (No — native Dravidian)
- *Read it:* ನೀನು / ನೀವು

Before you move on

What is *nānu*'s possessive, and is Kannada's "I" cousin to English *me*? (*Nanna*, "my"; no — it is native Dravidian.)

3.5 ಚೆನ್ನಾಗಿ (cennāgi) — "well," and how to answer

The word that answers "how are you?" — and it means, at heart, "beautifully."

The letters in this word

ಚೆ (*ce* — the letter ಚ is "ch as in *cheese*," so this sounds like "che") + ನ್ನಾ (*nnā*, doubled *n* + long *ā*) + ಗಿ (*gi*) → ಚೆನ್ನಾಗಿ (*cennāgi*).

The word, taken apart — its roots and family

ಚೆನ್ನಾಗಿ (*cennāgi*, "well, nicely") is native Dravidian, from ಚೆನ್ನು (*cennu*, "good, beautiful, fine") + the adverb-maker *-āgi* ("in a … way"). So it literally means "in a beautiful way" — Kannada answers "how are you?" by saying, in effect, "beautifully." The root *cennu* is pure Kannada, with no Sanskrit or European cousin.
DEDR 2423 lists Kannada *cennu*, "beauty, grace", with Tulu *canna*, "handsome".

You'll want to know: The reply

Fuse it with the *iru* verb: *nānu cennāgiddēne* — "**I am well**" (*cennāgi* + *iddēne*, "I am"). The whole exchange:

> — *nīvu hēgiddīrā?* ("How are you?") — *nānu cennāgiddēne, dhanyavāda.* ("I'm well, thank you.")

Your turn

- *Say it:* "cennāgi" (the ಚ = "ch")
- *Say it:* the full reply — *nānu cennāgiddēne*
- *Say it:* what *cennu* means at root ("good / beautiful")
- *Recall:* say *ēnu*

Before you move on

Give the full reply to *nīvu hēgiddīrā?*, and say what *cennāgi* literally means. (*Nānu cennāgiddēne*; "in a beautiful way," from *cennu* "good/beautiful.")

3.6 ಗ — one character, met inside words you already say

Before the new one: ೆ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಗ

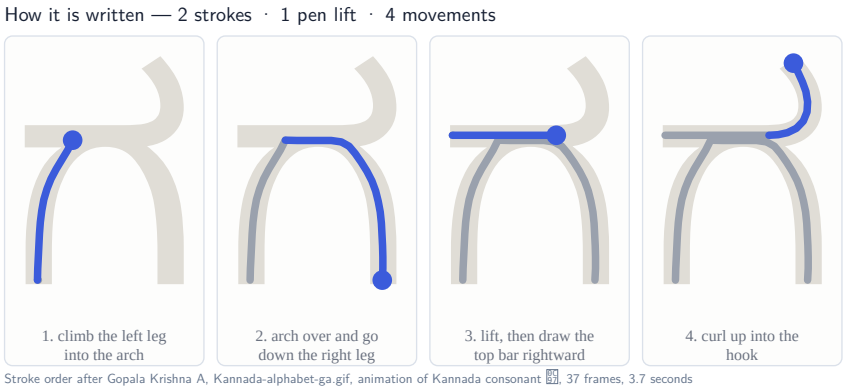

ಗ — *ga*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *g*, it is **ga**.

You already say these, and every one of them has ಗ somewhere inside it:

- ಹೇಗೆ *hēge* — how
- ನೀವು ಹೇಗಿದ್ದೀರಾ? *nīvu hēgiddīrā* — how are you? (respectful)
- ಚೆನ್ನಾಗಿ *cennāgi* — well, nicely — and the reply "ನಾನು ಚೆನ್ನಾಗಿದ್ದೇನೆ"

Writing: ಗ

Stroke order after Gopala Krishna A, Kannada-alphabet-ga.gif, animation of Kannada consonant ಗ, 37 frames, 3.7 seconds (Wikimedia Commons, 25 May 2016)
This order is attested, not standardised; the source records where it varies.

How ಗ is written, stroke by stroke

- **1.** climb the left leg from its foot into the arch
- **2.** without lifting, arch over and go down the right leg to its foot

- **3.** lift, then draw the top bar from left to right
- **4.** without lifting, curl up into the hook

Pen lifts: 1. Both legs and the arch between them are one run, starting from the foot of the left leg; the curled bar on top comes after the only lift, as it does for ನ.

Your turn

- *Look:* at these words, and find ಗ in the ones that have it

  ಹೇಗೆ · ನಮಸ್ಕಾರ

- *Trace it:* ಗ three times, saying *ga* as you finish each one
- *Look:* back at any page of this chapter and find ಗ once more

Before you move on

Which character is this — ಗ? What sound does it carry? (***ga***.) Name one word you already say that contains it.

3.7 ಪರವಾಗಿಲ್ಲ (paravāgilla) — "no problem"

When someone thanks you — or apologises — this is the easy, gracious reply, built on a word you met in Chapter 1.

The letters in this word

ಪರವಾ (*paravā*, "care, concern", Persian *parvā* through Hindustani) + ಗಿಲ್ಲ (*gilla*, a fused form of *āgi* + ಇಲ್ಲ *illa*, "is not") → ಪರವಾಗಿಲ್ಲ (*paravāgilla*).

The word, taken apart — its roots and family

ಪರವಾಗಿಲ್ಲ means "**it does not matter / there is no harm**" — *paravā* ("care, concern") + ಇಲ್ಲ (*illa*, "is-not"). It serves as "it's okay /

no worries / never mind / you're welcome." The key atom, ಇಲ್ಲ (*illa*), you met in Chapter 1 — Kannada's word for negation and non-existence, the mirror of *iru* ("to be"). Where *iru* says "it is," *illa* says "it is not." This *illa* is shared, almost unchanged, across **Kannada, Tamil, and Malayalam** — one of the deep bonds of the Dravidian south. (Telugu's *lēdu* looks different, but DEDR 2559 files it with them — Telugu's "no problem" is *paravālēdu*, Kannada's is *paravāgilla*.)

Grammar Lens: ಇಲ್ಲ, the all-purpose "no"

Illa negates existence and equations alike, and stands alone as "no": *duḍḍu illa* ("there's no money"), *nānu illa* ("it's not me"). Hold *iru* / *illa* together — "is" and "is-not."

Your turn

Say these aloud:

- "paravāgilla"
- what it literally means ("it does not matter / no harm")
- the three Dravidian sisters that share *illa* (Kannada, Tamil, Malayalam)

Before you move on

What does *paravāgilla* literally say, and which languages share its *illa*? ("There is no harm"; Kannada, Tamil, Malayalam — Telugu uses *lēdu*.)

3.8 Chapter 3 — The how-are-you exchange

No new words. The whole responding cycle, from atoms you now own.

The exchange

Say these aloud:

- "How are you?" (respectful) — *nīvu hēgiddīrā?*
- "I'm well, thank you." — *nānu cennāgiddēne, dhanyavāda.*
- "No problem / you're welcome." — *paravāgilla.*
- the familiar version of the question — *nīnu hēgiddīyā?*

You'll want to know: The atoms

Say these aloud:

- the ē- question-word for "how" (*hēge*)
- "I" and the verb "to be" (*nānu*, *iru*)
- the "is / is-not" pair (*iru* / *illa*)

The word, taken apart — its roots and family

- *hēge* ← the interrogative *ē-/yā-* (native Dravidian, like Tamil *eppaṭi*)
- *nānu* ← Proto-Dravidian (unrelated to English *me*); possessive *nanna*
- *cennāgi* ← *cennu* "good/beautiful" — "in a beautiful way"
- *iru* / *illa* — "is" and "is-not"; *illa* shared with Tamil & Malayalam

Before you move on

A stranger asks *nīvu hēgiddīrā?* — give a full, polite reply, and answer their thanks. (*Nānu cennāgiddēne, dhanyavāda* — and to thanks, *paravāgilla.*)

Chapter 4

Farewells

Modes: **voice** (2) **eyes** (4) **pen** (3) **Hands-free start:** the first of 9 lessons.

> ***By the end of this chapter:*** I can end a Kannada conversation politely and choose a farewell that fits the situation.
>
> *Part three ways without ever saying a blunt goodbye, and say what hōgi baruttēne promises instead.*

4.1 ಹೋಗು (hōgu) — "go," and bā (come)

Two everyday verbs — and together they make the Kannada goodbye.

The letters in this word

ಹೋ (*hō*, *ha* + long-*ō* sign) + **ಗು** (*gu*) → **ಹೋಗು** (*hōgu*). Its partner: *bā* ("come").

The word, taken apart — its roots and family

ಹೋಗು (*hōgu*, "to go") and *bā* ("come") are native Dravidian verbs. As commands they are whole words: *hōgu!* ("go!"), *bā!* ("come!"). You need both, because Kannada — like every Dravidian language — does not say a plain "goodbye." It says "I go, and I **come back**."
DEDR 4572 lists Kannada *pōgu*, *hōgu* with Tamil *pō*; DEDR 5270 lists *bar*, *bā* with Tamil *varu*, *vā*.

Your turn

- *Say it:* "hōgu" (go) and "bā" (come)
- *Say it:* why you need both to say goodbye (Kannada's farewell is "I'll go and come back")
- *Recall:* say *hēge*

Before you move on

What do *hōgu* and *bā* mean, and why will you need both to part? ("Go" and "come"; the Kannada goodbye is "I'll go and come back.")

4.2 ಿ — one character, met inside words you already say

Before the new one: ೆ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಿ

ಿ — *i*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *i*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ಿ somewhere inside it:

- ಸರಿ *sari* — okay / alright / correct (sari)
- ನೀವು ಹೇಗಿದ್ದೀರಾ? *nīvu hēgiddīrā* — how are you? (respectful)
- ಚೆನ್ನಾಗಿ *cennāgi* — well, nicely — and the reply "ನಾನು ಚೆನ್ನಾಗಿದ್ದೇನೆ"
- ಪರವಾಗಿಲ್ಲ *paravāgilla* — it's okay / no problem / you're welcome

Writing: ಿ — copy what you see

Put your pen on ಿ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ಿ in the ones that have it

  ಸರಿ · ನೀವು ಹೇಗಿದ್ದೀರಾ? · ನಮಸ್ಕಾರ

- *Trace it:* ಿ three times, saying *i* as you finish each one
- *Look:* back at any page of this chapter and find ಿ once more

Before you move on

Which character is this — ಿ? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *i* on; takes the built-in *a* off.**) Name one word you already say that contains it.

4.3 ಹೋಗಿ ಬರುತ್ತೇನೆ (hōgi baruttēne) — "I'll go and come back"

The everyday Kannada goodbye — a promise, not a parting.

The letters in this word

ಹೋಗಿ (*hōgi*, "having gone") is *hōgu* + the "-i" that means "having …d." ಬರುತ್ತೇನೆ (*baruttēne*, "I come") is from *baru* ("come") + present + "I."

The word, taken apart — its roots and family

ಹೋಗಿ ಬರುತ್ತೇನೆ = **ಹೋಗಿ** (*hōgi*, "having gone") + **ಬರುತ್ತೇನೆ** (*baruttēne*, "I come") — literally "**having gone, I come [back]**," i.e. "I'll go and come back." A Kannada speaker never signs off with a bare "I'm leaving" — it sounds final. It is the same "go-and-come-back" farewell across the Dravidian south (Tamil *pōy varugiṟēṉ*, Telugu *veḷḷi vastānu*, Malayalam *pōyi varāṁ*). The warm reply is **ಹೋಗಿ ಬನ್ನಿ** (*hōgi banni*, "go and come [back]").
Both verbs are native Dravidian: *hōgu* (DEDR 4572) and *baru*, "come" (DEDR 5270), the same pair as Tamil *pō* and *varu*.

Grammar Lens: the "having ...d" participle

Hōgi chains actions: "having gone, (then) I come." Kannada, like its sisters, strings verbs with one in the participle form and the last one fully conjugated.

Across the family — the same idea, five ways

Language	**"go and come back" (goodbye)**
Kannada	*hōgi baruttēne*
Tamil	*pōy varugiṟēṉ*
Telugu	*veḷḷi vastānu*
Malayalam	*pōyi varāṁ*
Bengali (Indo-Aryan)	*āshi* ("I come")

The whole south, and beyond, prefers a promise of return to a blunt farewell.

Your turn

Say these aloud:

- the goodbye — *hōgi baruttēne*
- its literal meaning ("having gone, I come" → "I'll come back")
- the warm reply — *hōgi banni*

Before you move on

What does the Kannada goodbye literally promise, and how do you answer? ("I'll go and come back"; reply *hōgi banni*, "go and come back".)

4.4 ನಾಳೆ ಸಿಗೋಣ (nāḷe sigōṇa) — "see you tomorrow"

A goodbye with a date on it.

The letters in this word

ನಾಳೆ (*nāḷe*): **ನಾ** (*nā*) + **ಳೆ** (*ḷe*, with the retroflex **ಳ** *ḷ*). **ಸಿಗೋಣ** (*sigōṇa*) = *sigu* ("meet, be found") + *-ōṇa* ("let's").

The word, taken apart — its roots and family

ನಾಳೆ (*nāḷe*, "tomorrow") is native Dravidian, from **ನಾಳ್** (*nāḷ*, "day") — the very same *nāḷ* behind Tamil's *nāḷai*. **ಸಿಗೋಣ** (*sigōṇa*, "let's meet") is from **ಸಿಗು** (*sigu*, "to meet, to be found") — so the phrase is "**tomorrow, let's meet**." The *-ōṇa* ending is Kannada's warm "let's ____": *hōgōṇa* ("let's go"), *tinnōṇa* ("let's eat").
DEDR 3656 lists *nāḷe* itself with Tamil *nāḷai*; DEDR 2498 lists *sigu*, "to be caught, be got", with Tamil *cikku*.

Your turn

Say these aloud:

- "nāḷe sigōṇa"
- the word for "day" inside "tomorrow" (*nāḷ*, shared with Tamil *nāḷai*)
- the "let's ____" ending (*-ōṇa*)

Before you move on

What are the two pieces of *nāḷe sigōṇa*, and what Tamil word shares the "day" root? (*Nāḷe* "tomorrow" + *sigu* "meet"; Tamil *nāḷai* — both from *nāḷ* "day.")

4.5 ಮತ್ತೆ ಸಿಗೋಣ (matte sigōṇa) — "we'll meet again"

The open-ended, warm goodbye — no date, just a promise.

The letters in this word

ಮತ್ತೆ (*matte*): note the doubled **ತ್ತ** (*tt*). **ಸಿಗೋಣ** (*sigōṇa*, "let's meet") you just learned.

The word, taken apart — its roots and family

ಮತ್ತೆ ಸಿಗೋಣ = **ಮತ್ತೆ** (*matte*, "again") + **ಸಿಗೋಣ** (*sigōṇa*, "let's meet") — "**we'll meet again**." Both words are native Dravidian: *matte* ("again") and *sigu* ("to meet"). Where Tamil's "we'll meet again" (*mīṇḍum sandippōm*) reaches for the Sanskrit loan *sandi* to say "meet," Kannada keeps the native *sigu* — the same phrase, from home-grown stock.
DEDR 4766 lists *matte* with Tamil *maṟṟu*, "other, again"; DEDR 2498 lists *sigu* with Tamil *cikku*.

Your turn

Say these aloud:

- "matte sigōṇa"
- "again" and "let's meet" (*matte*, *sigōṇa*)

Before you move on

What does the phrase mean, and which native verb does Kannada use for "meet"? ("We'll meet again"; *sigu* — where Tamil borrowed the Sanskrit *sandi*.)

4.6 ಳ — one character, met inside words you already say

Before the new one: **ಗ** — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಳ

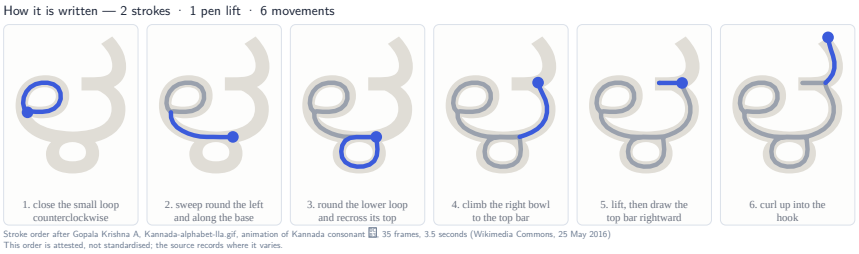

ಳ — *ḷa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ḷ*, it is **ḷa**.

You already say these, and every one of them has **ಳ** somewhere inside it:

- **ನಾಳೆ ಸಿಗೋಣ** *nāḷe sigōṇa* — see you tomorrow

Writing: ಳ

How **ಳ** *is written, stroke by stroke*

- **1.** start at the left of the small loop and close it counterclockwise
- **2.** without lifting, sweep down the outer left side and along the base
- **3.** without lifting, go clockwise round the lower loop and back across its top
- **4.** without lifting, climb the right bowl to the top bar
- **5.** lift, then draw the top bar from left to right
- **6.** without lifting, curl up into the hook

Pen lifts: 1. Both loops and the climb up the right side are one run, starting on the left side of the small loop at the top; the curled bar on top comes after the only lift, as it does for **ನ**.

4.7 ಬ — one character, met inside words you already say

Before the new one: ಳ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಬ

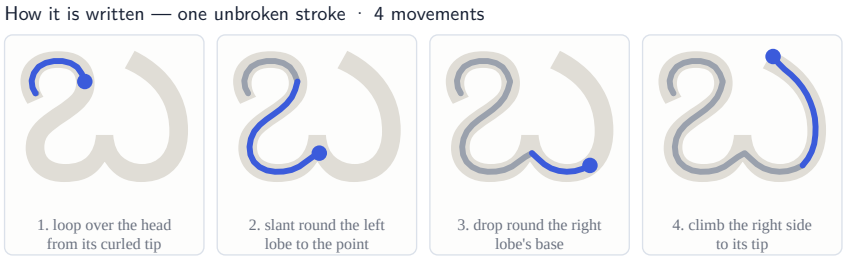

ಬ — *ba*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *b*, it is **ba**.

You already say these, and every one of them has ಬ somewhere inside it:

- **ಹೋಗಿ ಬರುತ್ತೇನೆ** *hōgi baruttēne* — goodbye (lit. "I'll go and come back")

Writing: ಬ

How ಬ *is written, stroke by stroke*

- **1.** start at the curled tip inside the head and loop up over it clockwise
- **2.** without lifting, slant down to the left and round the left lobe, rising into the middle point
- **3.** without lifting, drop from the point round the right lobe's base
- **4.** without lifting, climb the right side to its tip

Pen lifts: 0. The whole letter is one run, from the curled tip inside the head to the tip of the tall right side. ಬ has no curled bar on top, so there is nothing to lift for.

4.8 Chapter 4 — The farewells

No new words. Three ways to part — none of them a blunt "goodbye."

You'll want to know: The farewells

Say these aloud:

- the everyday goodbye — *hōgi baruttēne* ("I'll go and come back")
- the warm reply — *hōgi banni* ("go and come back")
- "see you tomorrow" — *nāḷe sigōṇa*
- "we'll meet again" — *matte sigōṇa*

You'll want to know: The atoms

Say these aloud:

- the two verbs (*hōgu* go, *bā* come)
- "day" inside "tomorrow" (*nāḷ*), "again," "let's meet" (*matte*, *sigōṇa*)
- the "let's _____" ending (*-ōṇa*)

The word, taken apart — its roots and family

- *hōgi baruttēne* — "having gone, I come"; the Dravidian promise-of-return goodbye
- *nāḷe* ← *nāḷ* "day" (shared with Tamil *nāḷai*); *sigu* "to meet" (native)
- *matte* "again" — where Tamil borrowed Sanskrit *sandi* for "meet," Kannada kept *sigu*

Before you move on

Why does Kannada never say a plain "I'm leaving," and what does its everyday goodbye promise instead? (It sounds too final; *hōgi baruttēne* promises "I'll go and come back.")

4.9 ಹೋಗಿ ಬರುತ್ತೇನೆ — nobody says goodbye

The ordinary Kannada goodbye. Say it, then say what it literally claims you are about to do.

Why it's said this way

ಹೋಗಿ ಬರುತ್ತೇನೆ is *I will go and come back*, and it is said by the person leaving even when they have no plan to return. Announcing a departure as final is the thing being avoided; the phrase is a small refusal to treat a parting as one.
Notice what is missing from it. There is no **ನಾನು** — no *I* — because the verb ending **-ತ್ತೇನೆ** already carries the person. Kannada drops the pronoun wherever the verb has already said it, which is the same economy the name exchange showed by dropping the verb *is* outright.

Your turn: leaving, three ways

Say these aloud:

- the ordinary goodbye — *hōgi baruttēne*
- name tomorrow — *nāḷe sigōṇa*
- leave the day open — *matte sigōṇa*
- wave away an apology — *paravāgilla*

Sigōṇa is *let us meet*, and it takes **us** with it: both of these arrange a meeting rather than promising one person's return.

Before you move on

What does the everyday goodbye literally say? (**I will go and come back.**) Why is *nānu* absent from it? (**The verb ending**

already carries the person.) And which phrase answers both a thank-you and an apology? (*Paravāgilla.*)

Chapter 5

The First Verbs

Modes: **voice** (1) **eyes** (4) **pen** (1) **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can build short present-tense Kannada sentences with the chapter's first verbs.
>
> *Say your language, your city and your work in one breath — nānu kannaḍa mātanāḍuttēne, nānu …alli iddēne, nānu kelasa māḍuttēne — and name the three pieces every Kannada verb is stacked from.*

5.1 ಮಾತನಾಡು (mātanāḍu) — "to speak," your first full verb

So far, "to be." Here is a verb that *does* something — and it shows how Kannada builds "I do X."

The letters in this word

ಮಾ (*mā*) + ತ (*ta*) + ನಾ (*nā*) + ಡು (*ḍu*) → ಮಾತನಾಡು (*mātanāḍu*).

The word, taken apart — its roots and family

ಮಾತನಾಡು (*mātanāḍu*, "to speak, to talk") is native Dravidian, built on ಮಾತು (*mātu*, "word, speech") + *āḍu* ("to play/do") — "to word-play," i.e. to converse. To say "**I speak**," Kannada adds a two-part ending to the stem:

> *mātanāḍ-* + *-utt-* (present) + *-ēne* ("I") → ಮಾತನಾಡುತ್ತೇನೆ (*mātanāḍuttēne*), "I speak."

The **-ಏನೆ** (*-ēne*) ending *is* "I," so *nānu* is rarely needed. Change the ending, change the person: *mātanāḍuttāne* (he), *mātanāḍuttāḷe* (she), *mātanāḍuttāre* (they / you-respectful).
DEDR 4834 lists Kannada *mātu*, "word, saying", with Telugu *māṭa*, "word", and even Telugu *māṭal-āḍu*, "to speak"; *āḍu* is in DEDR 347.

Grammar Lens: stem + tense + person

Every Kannada verb is built this way — a stem, a tense-marker, a person-ending. And, like Tamil and Telugu, Kannada marks **no gender in the first person**: *mātanāḍuttēne* is the same for a man or a woman.

Your turn

- *Say it:* "mātanāḍu" (speak)
- *Say it:* "I speak" — *mātanāḍuttēne*
- *Say it:* the word "speech" inside it (*mātu*)
- *Recall:* say *nānu*
- *Read it:* **ಚೆನ್ನಾಗಿ**

Before you move on

Build "I speak" from *mātanāḍu*, and name the noun it's built on. (*Mātanāḍuttēne*; *mātu*, "word / speech.")

5.2 ತ — one character, met inside words you already say

Before the new one: ◌ಿ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ತ

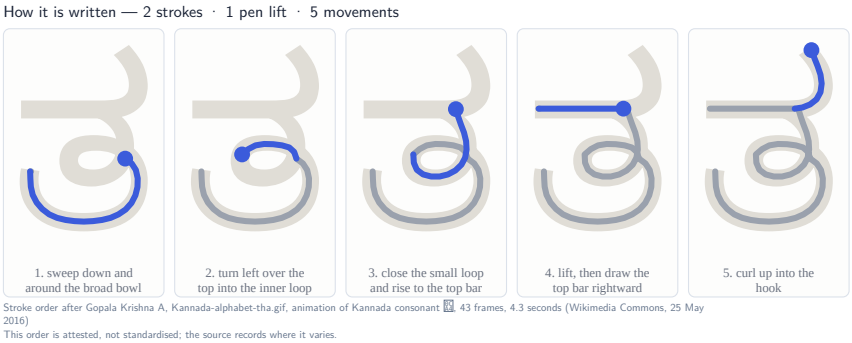

ತ — *ta*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *t*, it is **ta**.

You already say these, and every one of them has **ತ** somewhere inside it:

- **ಸಂತೋಷ** *santōṣa* — joy / pleased to meet you
- **ಹೋಗಿ ಬರುತ್ತೇನೆ** *hōgi baruttēne* — goodbye (lit. "I'll go and come back")
- **ಮತ್ತೆ ಸಿಗೋಣ** *matte sigōṇa* — we'll meet again
- **ಮಾತನಾಡು** *mātanāḍu* — to speak

Writing: ತ

How **ತ** *is written, stroke by stroke*

- **1.** start at the upper-left end and sweep down around the broad bowl and up its right side
- **2.** without lifting, turn left over the top and curl down into the inner loop
- **3.** without lifting, close the small loop and rise to the top bar
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook

Pen lifts: 1. The broad bowl, the arc over its top and the small loop inside are one run; the curled bar on top comes after the only lift, as it does for ನ.

5.3 ನಾನು ಕನ್ನಡ ಮಾತನಾಡುತ್ತೇನೆ (nānu kannaḍa mātanāḍuttēne) — "I speak Kannada"

Your first full, moving sentence — and it names one of the classical languages of India.

The letters in this word

ಕನ್ನಡ (*kannaḍa*): ಕ (*ka*) + ನ್ನ (*nna*, doubled) + ಡ (*ḍa*).

The word, taken apart — its roots and family

ನಾನು ಕನ್ನಡ ಮಾತನಾಡುತ್ತೇನೆ = ನಾನು (*nānu*, "I") + ಕನ್ನಡ (*kannaḍa*, the object) + ಮಾತನಾಡುತ್ತೇನೆ (*mātanāḍuttēne*, "speak") — "I Kannada

speak," the verb last as always. The name ಕನ್ನಡ (*kannaḍa*) is native (often linked to *kar-nāḍu*, "the black/high land," whence *Karnataka*). Kannada has a literature over a thousand years old and holds the second-most Jnanpith literary awards of any Indian language — a classical tongue, spoken by some fifty million.
DEDR 1284 lists *kannaḍa* and *karṇāṭa* for the Kannada country and its language, with Tamil *kaṉṉaṭam*.

Grammar Lens: no gender on "I speak"

Mātanāḍuttēne is the same whether a man or a woman says it — Kannada, like Tamil and Telugu, marks **no gender in the first or second person** (only the third: *-āne* he, *-āḷe* she). This is unlike Hindi, where even "I speak" changes for the speaker's gender (*boltā/ boltī*).

Your turn

Say these aloud:

- "nānu kannaḍa mātanāḍuttēne"
- the likely meaning of *kannaḍa* (*kar-nāḍu*, "the high/black land" → *Karnataka*)
- does "I speak" change for a man vs. a woman? (No — no 1st-person gender)

Before you move on

Say "I speak Kannada," and give the likely root of the name. (*Nānu kannaḍa mātanāḍuttēne*; *kar-nāḍu*, "the high/black land.")

5.4 ಇರು (iru) — "to be, to stay, to live"

You have already used this verb — in "how are you." Now meet it in its own right, and use it to say where you live.

The letters in this word

ಇ (independent *i*) + ರು (*ru*) → ಇರು (*iru*).

The word, taken apart — its roots and family

ಇರು (*iru*, "to be, to exist, to stay, to live") is native Dravidian — the very same *iru* Tamil uses, and the verb behind Chapter 3's *hēgiddīrā* ("how are you") and *cennāgiddēne* ("I'm well"). It also means "to reside": *nānu Beṅgaḷūrinalli iddēne* ("I live in Bangalore"). One verb covers "be," "stay," and "live."
DEDR 480 lists Kannada *ir*, *iru*, "to be, exist, stay", with Tamil *iru*.

Grammar Lens: "in" comes after the noun

Beṅgaḷūrinalli = *Bengaḷūru* + *-alli* ("in"), glued to the **end** of the noun. Kannada uses **post**positions (case-suffixes) where English uses prepositions: "Bangalore-in I am," the verb last.

Your turn

- *Say it:* "iru"
- *Say it:* "I live in Bangalore" — *nānu Beṅgaḷūrinalli iddēne*
- *Say it:* where "in" (*-alli*) sits — glued to the end of the noun
- *Read it:* ಹೋಗು

Before you move on

Name three things the one verb *iru* can mean, and say where "in" goes. ("To be / to stay / to live"; *-alli* "in" attaches to the **end** of the noun.)

5.5 ಕೆಲಸ ಮಾಡು (kelasa māḍu) — "to work"

The last verb of the chapter — and, like Hindi's *karnā* and Tamil's *sey*, it is a "do" verb that builds a hundred others.

The letters in this word

ಕೆಲಸ (*kelasa*, "work"): ಕೆ (*ke*) + ಲ (*la*) + ಸ (*sa*). ಮಾಡು (*māḍu*, "do"): ಮಾ (*mā*) + ಡು (*ḍu*).

The word, taken apart — its roots and family

ಮಾಡು (*māḍu*, "to do, to make") is a core native Dravidian verb, and Kannada — like Hindi with *karnā*, Tamil with *sey*, and Telugu with *cēyu* — builds compound verbs by putting a noun in front of it:

- **ಕೆಲಸ ಮಾಡು** (*kelasa māḍu*) = "work-do" = "**to work**" (*kelasa*, "work")
- *aḍuge māḍu* = "to cook"
- **ಸಹಾಯ ಮಾಡು** (*sahāya māḍu*) = "to help" (*sahāya* ← Sanskrit)

So "I work" is **ನಾನು ಕೆಲಸ ಮಾಡುತ್ತೇನೆ** (*nānu kelasa māḍuttēne*). Notice *sahāya māḍu* ("to help") pairs a **Sanskrit** noun with the **native** *māḍu* — Kannada's two vocabularies working together in one verb.
DEDR 1970 lists *kelasa* with Telugu *kelasamu*, "work"; DEDR 4797 lists *māḍu* with Malayalam *māṭuka*, "to build".

Grammar Lens: noun + ಮಾಡು = a new verb

This "noun + *māḍu*" pattern is the exact twin of Hindi's "noun + *karnā*," Tamil's "noun + *sey*," and Telugu's "noun + *cēyu*." Four languages — two of them from an unrelated family — all landed on the same trick.

Your turn

Say these aloud:

- "kelasa māḍu" (to work)
- "I work" — *nānu kelasa māḍuttēne*
- the Hindi, Tamil, and Telugu twins of this trick (*karnā*, *sey*, *cēyu*)

Before you move on

How does Kannada turn "work" into "to work," and what verbs work the same way in its neighbours? (*Kelasa* + *māḍu* = "work-do"; Hindi *karnā*, Tamil *sey*, Telugu *cēyu*.)

5.6 Chapter 5 — The first verbs

No new words. Three verbs, one engine — build real sentences about yourself.

Your turn: Build the sentences

Say these aloud:

- "I speak Kannada" — *nānu kannaḍa mātanāḍuttēne*
- "I live in Bangalore" — *nānu Beṅgaḷūrinalli iddēne*
- "I work" — *nānu kelasa māḍuttēne*
- "he speaks" vs. "she speaks" — *mātanāḍuttāne* / *mātanāḍuttāḷe*

You'll want to know: The engine

Say these aloud:

- the three stacked pieces of every Kannada verb (stem + tense + person)
- the ending that means "I" (*-ēne*)
- where Kannada marks gender — and where it doesn't (3rd person only)

The word, taken apart — its roots and family

- *mātanāḍu* "to speak" ← *mātu* "word"
- *iru* "to be / stay / live"; *-alli* "in" attaches to the noun's end
- *māḍu* "to do" → *kelasa māḍu* "to work" (the twin of *karnā* / *sey* / *cēyu*)
- *kannaḍa* ← *kar-nāḍu*, "the high/black land" (→ *Karnataka*)

Before you move on

In one breath, say your language, your city, and your work in Kannada. (*Nānu kannaḍa mātanāḍuttēne. Nānu … alli iddēne.*

Nānu kelasa māḍuttēne.)

Chapter 6

Case Endings and Dative Subjects

Modes: **voice** (1) **eyes** (2) **pen** (3) **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can say that I know Kannada the way Kannada itself says it — with no subject at all, marking myself with the dative -ge.
>
> *Say* ನನಗೆ ಕನ್ನಡ ಗೊತ್ತು *— "to-me Kannada known" — set against* ನಾನು ಕನ್ನಡ ಮಾತನಾಡುತ್ತೇನೆ*, line up the four Dravidian datives -ge · -ukku · -ku · -ikku, rebuild -ige and -kke and say why Kannada's dative has g, then point to* ದ *in words you already say.*

6.1 -ಗೆ (-ge) — "to, for"

Your first **case ending**. English puts "to" in **front**, as a separate word. Kannada sticks it on the **back** — the biggest structural fact about the language, in one suffix.

You'll want to know: Adding it on

word	+ -ge	meaning
ಹೆಸರು *hesaru* — name	ಹೆಸರಿಗೆ *hesar**ige***	to/for the name
ಕೆಲಸ *kelasa* — work	ಕೆಲಸಕ್ಕೆ *kelasa**kke***	for work

Two shapes, one suffix: **-ige** after some stems, **-kke** after others. Kannada adjusts it to fit the word in front — but you can still see exactly where the noun stops and the ending starts.

And with "I", which reshapes first:

ನಾನು *nānu* (“I”) → ನನಗೆ *nanage* (“to me”)

The word, taken apart — its roots and family

All four descend from one Proto-Dravidian dative, ***-k(k)u***. Look at what became of its *k*:

language	**dative**
Tamil	*-ukku*
Telugu	*-ku* / *-ki*
Malayalam	*-ikku* / *-inu*
Kannada	***-ge*** / *-ige*

Kannada is the one that **voiced** it — *k* → *g* between vowels — and carried that change into the dative, where its sisters kept the hard consonant. Note the other Kannada form, ***-kke***: a **doubled** consonant resists voicing, so the geminate preserved the original *k*. The two Kannada shapes are the same suffix caught on either side of a sound change.

Your turn

Say these aloud:

- “*hesaru … hesarige*”
- “*nānu … nanage*” — “I” … “to me”
- “*kelasakke*” — “for work,” from Ch. 5’s ಕೆಲಸ
- the family — “*-ukku* · *-ku* · ***-ge*** · -ikku”

Before you move on

What does **-ಗೆ** mean? (“**To**” or “**for**.”) Where does it go? (**On the end** of the noun.) What is “to me”? (ನನಗೆ *nanage*.) Why does Kannada have *g* where its sisters have *k*? (Kannada **voiced** the *k* between vowels; doubled *-kke* resisted and kept the old hard form.)

6.2 ದ — one character, met inside words you already say

Before the new one: ತ — what does it do?

> One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ದ

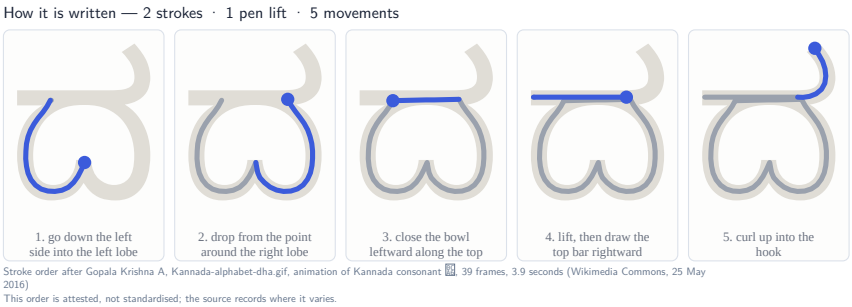

ದ — *da*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *d*, it is **da**.

You already say these, and every one of them has **ದ** somewhere inside it:

- **ಧನ್ಯವಾದ** *dhanyavāda* — thank you (dhanyavāda — "an utterance of 'worthy'")
- **ಹೌದು** *haudu* — yes (haudu)
- **ನೀವು ಹೇಗಿದ್ದೀರಾ?** *nīvu hēgiddīrā* — how are you? (respectful)

Writing: ದ

How **ದ** *is written, stroke by stroke*

- **1.** start at the upper left and go down the left side into the left lobe, rising into the middle point
- **2.** without lifting, drop from the point around the right lobe and climb the right side
- **3.** without lifting, close the bowl leftward along the top
- **4.** lift, then draw the top bar from left to right

- **5.** without lifting, curl up into the hook

Pen lifts: 1. The whole bowl, with the small point in the middle of its base, is one run that closes along the top; the curled bar comes after the only lift.

> The animation is filed as 'dha': that series spells dental ದ with an *h* and keeps 'da' for a different letter, ಡ.

Your turn

- *Look:* at these words, and find ದ in the ones that have it

  ಧನ್ಯವಾದ · ಹೌದು · ನಮಸ್ಕಾರ

- *Trace it:* ದ three times, saying *da* as you finish each one
- *Look:* back at any page of this chapter and find ದ once more

Before you move on

Which character is this — ದ? What sound does it carry? (***da***.) Name one word you already say that contains it.

6.3 -ಗೆ — one suffix, one job

> You can now attach **-ಗೆ** and make **ನನಗೆ** "to me." Look at what that visible seam tells you about how Kannada builds longer words.

Grammar Lens: Stacking versus fusion

	Kannada -ge	**a Latin ending like -īs**
pins down the case?	**yes** — dative, always	**no** — dative **or** ablative
carries number?	**no** — a separate suffix does	yes — plural, baked in
carries declension class?	**no**	yes — first or second
can you see the seam?	**yes**: *hesar* + *ige*	no — one fused lump

Kannada **stacks** suffixes. Each suffix carries one meaning and sits in a fixed order, so the learner can see where the noun ends and the case marker begins. That is what **agglutinative** means here: longer words are assembled from pieces whose jobs remain visible.
Latin **fuses** several jobs into one ending. *-īs* carries case, plural number, and declension class at once—and it does not even settle whether the case is dative or ablative. Kannada **-ಗೆ** carries one unambiguous job: "to/for."

Your turn

Say these aloud:

- *hesar* + *ige* — a visible noun-plus-case seam
- Kannada *-ge* — one job, dative
- Latin *-īs* — case, plural, and declension fused

Before you move on

Why is Kannada called agglutinative? (**It stacks visible pieces, each with one job.**) How many jobs can Latin *-īs* fuse? (**Case, number, and declension class—and its case can still be dative or ablative.**)

6.4 ನನಗೆ ಕನ್ನಡ ಗೊತ್ತು — "I know Kannada"

Chapter 5 gave you ನಾನು ಕನ್ನಡ — "**I** speak Kannada" — with the verb ಮಾತನಾಡುತ್ತೇನೆ. Now say "I **know** Kannada." Kannada will not let you use *nānu*.

You'll want to know: The sentence

ನನಗೆ ಕನ್ನಡ ಗೊತ್ತು. *nanage kannaḍa gottu.* literally: "**to-me** Kannada [is] **known**."

piece	
ನನಗೆ *nanage*	"to me" — the dative from the last lesson
ಕನ್ನಡ *kannaḍa*	Kannada (Ch. 5)
ಗೊತ್ತು *gottu*	"known"

You are not the subject: *nānu* has moved into the dative, and the sentence is about *kannaḍa*. And *gottu* is not an action — it is "**[is] known**." Nothing here is *doing* anything. *Gottu* is the same root as Tamil *kuṟi*, "a mark" (DEDR 1847).

Grammar Lens: Why: things that happen *to* you

Kannada separates what you **do** from what **happens to** you. Speaking is an action, so Ch. 5 used *nānu*. Knowing, liking, wanting **arrive** — so the person goes in the **dative**.

English frames it as	Kannada frames it as
I **know** Kannada	Kannada is known **to me**
I **like** it	it is pleasing **to me**
I **am** cold	cold is **to me**

English keeps one fossil of it: "**methinks**" — dative *me*, "it seems **to me**." Kannada made it a rule.

Grammar Lens: All four sisters do it

language	"I know [the language]"	the dative
Kannada	*nanage kannaḍa gottu*	**-ge**
Tamil	*enakku tamiḻ teriyum*	**-ukku**
Telugu	*nāku telugu vaccu*	**-ku**
Malayalam	*enikku malayāḷam aṟiyām*	**-ikku**

One construction, four visibly related suffixes — Kannada's *g* the softened *k* of the others: the Dravidian family showing its bones.

Your turn

Say these aloud:

- "*nanage kannaḍa gottu*"
- the contrast — "*nānu kannaḍa mātanāḍuttēne*" (I speak) … "*nanage kannaḍa gottu*" (known to me)
- the four cousins — "*-ge* · *-ukku* · *-ku* · *-ikku*"

Your turn — the ending underneath

- Say "to the name", then "for work". (***hesarige***, ***kelasakke*** — one suffix, two shapes.)
- Why *g* where Tamil has *k*? (Kannada **voiced** the *k* between vowels; doubled ***-kke*** resisted and kept it.)

Script — ದ

ಧನ್ಯವಾದ · ಹೌದು · ನಮಸ್ಕಾರ

- *Point to:* **ದ**, *da*, in each word that has it

(**ಹೌದು** ends on it, and so does **ಧನ್ಯವಾದ**; **ನಮಸ್ಕಾರ** has none.)

Before you move on

What does **ನನಗೆ ಕನ್ನಡ ಗೊತ್ತು** literally say? ("**To-me** Kannada **known**" — *gottu* is no action.) Where did *nānu* go, and why? (Into the dative, *nanage* — knowing **happens to** you.) Which English word keeps the idea? (**Methinks**.)

6.5 ೊ — one character, met inside words you already say

Before the new one: ಬ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ೊ

ೊ — *o*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *o*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ೊ somewhere inside it:

- **ನನಗೆ ಕನ್ನಡ ಗೊತ್ತು** *nanage kannaḍa gottu* — 'I know Kannada'

Writing: ೊ — copy what you see

Put your pen on ೊ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

6.6 ಇ — one character, met inside words you already say

Before the new one: ೊ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಇ

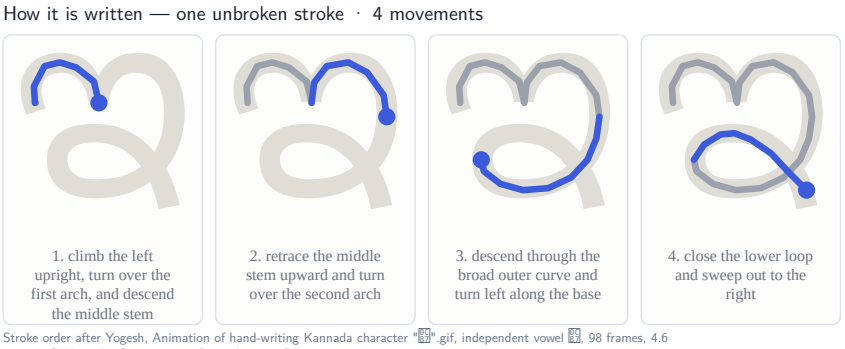

ಇ — *i*.

It is an **independent vowel** — the shape the vowel *i* takes when a word begins with it, rather than the sign it becomes inside a word.

You already say these, and every one of them has ಇ somewhere inside it:

- ಇಲ್ಲ *illa* — no / there isn't (illa — the negative)
- ಇರು *iru* — to be, to stay, to live

Writing: ಇ — follow the numbered strip

How ಇ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ಇ yourself — slowly, and larger than it is printed.

Chapter 7

Counting One to Ten

Modes: **voice** (9) **eyes** (1) **pen** (2) **Hands-free start:** the first 3 of 12 lessons.

> ***By the end of this chapter:*** I can count from one to ten in Kannada, one word at a time, and read each number word off the page in Kannada letters.
>
> *Count ondu through hattu aloud, reading each word in Kannada script, and hear the p to h shift that turns Tamil pattu into Kannada hattu.*

7.1 ಒಂದು — one, and the nasal that borrows its sound

> Six chapters of letters have gone by. Every shape in the word below is one you have already met, so this is the first word you read rather than recognise.

You'll want to know: ಒಂದು

ಒಂದು (*ondu*) — "**one**."

Tamil says *oṉṟu*. Both come down from an older *oṉ-*, and the family resemblance is easy to hear once you know to listen for it.

Telugu's "one", *okaṭi*, looks like a stranger beside them. Of the ten numbers you are about to learn, this is the one that wanders furthest.

The small circle ◌ಂ sitting on ಒ is the **anusvara** — a nasal with no fixed sound of its own. Here it borrows *n* from the ದ that follows.

The word, taken apart — its roots and family

ಒಂದು (*ondu*) is native Dravidian (DEDR 990). The entry gathers Tamil *onṟu* and Telugu *oṇḍu*, "one thing", and also Telugu *oka*, "one": the Telugu word that looks least alike is filed in the same family.

Your turn

- *Say it:* "ondu"
- *Look:* at ಒಂದು and find the ದ you learned as a letter
- *Say it:* "Tamil onṟu, Kannada ondu — same word, new coat"
- *Recall:* say *mātanāḍu*

Before you move on

What is "one" in Kannada? (***Ondu***.) Which sister language's "one" looks least like it? (**Telugu** — *okaṭi*.) What sound is the ಂ carrying in ಒಂದು? (An *n*, borrowed from the ದ after it.)

7.2 ಎರಡು — two, and the softening that runs through Kannada

One was *ondu*. Say it before you meet the next one.

You'll want to know: ಎರಡು

ಎರಡು (*eraḍu*) — "**two**."

Tamil says *iraṇṭu*. Hold the two beside each other and one difference does all the work: where Tamil keeps a hard cluster **ṇṭ**, Kannada wears it down to a single soft **ḍ**.

That softening is not a one-off for "two". It is a habit of the language, and you will hear it again at *aidu* — "five" — in three lessons.

Your turn

- *Say it:* "eraḍu"
- *Look:* at ಎರಡು and find the ು that ends it, as it ended *ondu*

- *Say it:* the count so far — "ondu, eraḍu"
- *Read it:* ಇರು

Before you move on

Count to two. (*Ondu, eraḍu.*) What happened to Tamil's **ṇṭ** on the way into Kannada? (It softened to a single **ḍ**.) Which later number will show you the same softening? (**Five** — *aidu.*)

7.3 ಮೂರು — three, the number nobody argued about

Two was *eraḍu*, with the softened **ḍ**. Say it once more.

You'll want to know: ಮೂರು

ಮೂರು (*mūru*) — "**three**."

Tamil *mūṉṟu*, Kannada *mūru*, Telugu *mūḍu*. The endings drift, but the long **ū** at the front holds firm in all three. Three is the number the family never quarrelled over, and it is a useful anchor: when you meet a Dravidian language you have never studied, look for a word that starts *mū-*.

The long vowel is written with the sign ೂ hanging under ಮ.

The word, taken apart — its roots and family

ಮೂರು (*mūru*) is native Dravidian, one word with Tamil *mūṉṟu* and Telugu *mūḍu* (DEDR 5052). The entry gives the older Kannada spelling *mūṟu*.

Your turn

- *Say it:* "mūru" — hold the ū long
- *Look:* at **ಮೂರು** and find the long ೂ under the first letter
- *Say it:* the count so far — "ondu, eraḍu, mūru"
- *Recall:* say *kelasa māḍu*

Before you move on

Count to three. (*Ondu, eraḍu, mūru.*) What do Tamil, Kannada and Telugu all keep in "three"? (The **long ū** at the front.)

7.4 ರ — one character, met inside words you already say

Before the new one: ದ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ರ

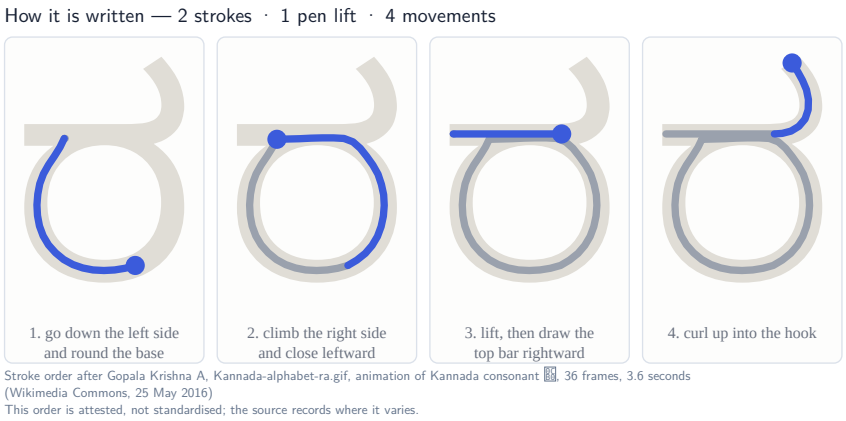

ರ — *ra.*

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *r*, it is **ra**.

You already say these, and every one of them has ರ somewhere inside it:

- ನಮಸ್ಕಾರ *namaskāra* — hello / greetings (namaskāra — "a making of a bow")
- ಸರಿ *sari* — okay / alright / correct (sari)
- ಹೆಸರು *hesaru* — name
- ನೀವು ಹೇಗಿದ್ದೀರಾ? *nīvu hēgiddīrā* — how are you? (respectful)

Writing: ರ

How ರ is written, stroke by stroke

- **1.** start at the upper left and go down the left side and round the base
- **2.** without lifting, climb the right side and close the bowl leftward along the top
- **3.** lift, then draw the top bar from left to right
- **4.** without lifting, curl up into the hook

Pen lifts: 1. The round bowl is one run that closes along the top; the curled bar comes after the only lift. It is ರ without the point in the base.

Which character is this — ರ? What sound does it carry? (***ra.***)
Name one word you already say that contains it.

7.5 ನಾಲ್ಕು — four, held together by a mark you know

Three was *mūru.* And the small slanting mark ್ — what did it do to the letter under it?

You'll want to know: ನಾಲ್ಕು

ನಾಲ್ಕು (*nālku*) — "**four**."

Tamil says *nāṉku.* Kannada turned that middle **ṉ** into an **l**, and left everything else alone.

The word breaks into **ನಾ** (*nā*) · **ಲ್** (*l*, with your virama stripping the vowel away) · **ಕು** (*ku*). *Read it:* the word slowly

Four is where the virama earns its keep — it is what lets *l* and *k* sit together with no vowel between them.

The word, taken apart — its roots and family

ನಾಲ್ಕು (*nālku*) is native Dravidian, one word with Tamil *nālku* and Telugu *nālugu* (DEDR 3655). The entry gives Kannada *nāl(u)ku* and *nāku.*

Your turn

- *Say it:* "nālku"
- *Look:* at **ನಾಲ್ಕು** and find the ್ that joins **ಲ** to **ಕ**
- *Say it:* the count so far — "ondu, eraḍu, mūru, nālku"
- *Read it:* **-ಗೆ**

Before you move on

Count to four. (*Ondu, eraḍu, mūru, nālku.*) Which Tamil consonant became Kannada's **l**? (The **ṉ** of *nāṉku.*) What is the ್ doing inside

ನಾಲ್ಕು? (Taking the vowel off ಲ so it can lean on ಕ.)

7.6 ಐದು — five, and a rule you have now seen twice

Two lessons ago Tamil's **ṇṭ** softened into Kannada's **ḍ**. Hold that in mind.

You'll want to know: ಐದು

ಐದು (*aidu*) — "**five**."

Tamil says *aintu*. Kannada says *aidu*. The hard **nt** in the middle has worn down to a soft **d** — the same wearing-down you met in *iraṇṭu* → *eraḍu*.

Twice is enough to call it a pattern rather than a coincidence. When a Tamil word you know has a hard cluster in the middle, guess that Kannada softened it, and you will be right more often than not.

ಐ is an independent vowel: the shape *ai* takes when it opens a word.

The word, taken apart — its roots and family

ಐದು (*aidu*) is native Dravidian, one word with Tamil *aintu* and Telugu *ayidu* (DEDR 2826). The entry spells the Kannada word *ay(i)du*.

Your turn

- *Say it:* "aidu"
- *Look:* at ಐದು and find the ದು that also closes *ondu*
- *Say it:* the count so far — "ondu, eraḍu, mūru, nālku, aidu"

Before you move on

Count to five. (*Ondu, eraḍu, mūru, nālku, aidu.*) Which two numbers show the same softening? (**Two and five** — *iraṇṭu* → *eraḍu*, *aintu* → *aidu*.)

7.7 ಆರು — six, and you are halfway

Count from one to five before you add to it.

You'll want to know: ಆರು

ಆರು (*āru*) — "**six**."

Tamil says *ā̲ru*, with a rare trilled **r̲** that Tamil keeps and almost nobody else does. Kannada flattened it into an ordinary **r** — the one you learned as the letter **ರ** a few lessons back.

So the two words are the same word, and the only difference is a consonant Kannada stopped distinguishing.

The word, taken apart — its roots and family

ಆರು (*āru*) is native Dravidian, one word with Tamil *ā̲ru* and Telugu *ā̲ru* (DEDR 2485). The entry gives the older Kannada spelling *ā̲ru*.

Your turn

- *Say it:* "āru" — long ā, ordinary r
- *Look:* at **ಆರು** and find the **ರ** you met as a letter
- *Say it:* the count so far — "ondu, eraḍu, mūru, nālku, aidu, āru"

Before you move on

Count to six. What did Kannada do with Tamil's rare **r̲** in *ā̲ru*? (Flattened it into an ordinary **r**.)

7.8 ಕ — one character, met inside words you already say

Before the new one: **ಇ** — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಕ

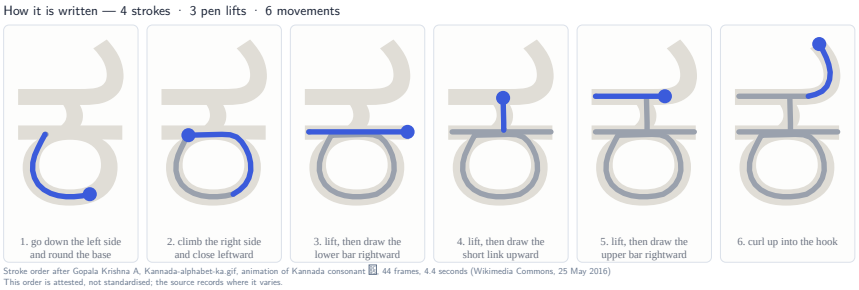

ಕ — *ka*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *k*, it is **ka**.

You already say these, and every one of them has **ಕ** somewhere inside it:

- ನಮಸ್ಕಾರ *namaskāra* — hello / greetings (namaskāra — “a making of a bow”)
- ಕೆಲಸ ಮಾಡು *kelasa māḍu* — to work (lit. “work-do”)
- ನಾಲ್ಕು *nālku* — four

Writing: ಕ

How ಕ *is written, stroke by stroke*

- **1.** start at the upper left and go down the left side and round the base
- **2.** without lifting, climb the right side and close the bowl leftward along the top
- **3.** lift, then draw the lower bar from left to right
- **4.** lift, then draw the short link up from the lower bar
- **5.** lift, then draw the upper bar from left to right
- **6.** without lifting, curl up into the hook

Pen lifts: 3. The round bowl comes first, then the lower bar, then the short link that rises from it, then the upper bar with its hook, each one started fresh.

Which character is this — **ಕ**? What sound does it carry? (***ka***.)
Name one word you already say that contains it.

7.9 ಏಳು — seven, and the letter that replaced Tamil's rarest sound

Six was *āru*. And the letter **ಳ** — say the sound it carries.

You'll want to know: ಏಳು

ಏಳು (*ēḷu*) — "**seven**."

Tamil's word is *ēḻu*, and that ḻ is the sound Tamil is famous for: a curled, almost swallowed sound with no equivalent in most languages.

Kannada let it go. Where Tamil curls, Kannada uses the plain retroflex **ḷ** — which is exactly the letter **ಳ** you have already been reading.

That trade happened across the whole vocabulary, not only in "seven". A Tamil word with ḻ will usually turn up in Kannada with **ಳ**.

The word, taken apart — its roots and family

ಏಳು (*ēḷu*) is native Dravidian, one word with Tamil *ēḻu* and Telugu *ēḍu* (DEDR 910). The entry gives the older Kannada spelling *ēḻu*.

Your turn

- *Say it:* "ēḷu" — tongue curled back for the ḷ
- *Look:* at **ಏಳು** and find the **ಳ**
- *Say it:* the count so far — "…aidu, āru, ēḷu"

Before you move on

What is "seven"? (*ēḷu*.) Which Tamil sound did Kannada give up here, and what took its place? (Tamil's ள, replaced by the ordinary retroflex ಳ, written ಳ.)

7.10 ಎಂಟು — eight, and the loose end of the family

Seven was *ēḷu*, with the letter ಳ. Say one to seven.

You'll want to know: ಎಂಟು

ಎಂಟು (*eṇṭu*) — "**eight**."

Kannada *eṇṭu* and Tamil *eṭṭu* are still relatives — near enough to guess at. But **Telugu** drifts furthest here: its "eight" is *enimidi*, and its "nine" will be *tommidi*. Neither is easy to recognise from the other two.

So eight and nine are the loose cells. Everywhere else in this chapter, knowing one Dravidian language hands you the next; at eight and nine it stops doing that, and you have to learn each language on its own terms.

Here the anusvara ಂ borrows an *ṇ* from the retroflex ಟ after it — the same borrowing you saw in *ondu*, taking a different sound.

The word, taken apart — its roots and family

ಎಂಟು (*eṇṭu*) is native Dravidian, one word with Tamil *eṭṭu* and Telugu *enimidi* (DEDR 784): the Telugu word has drifted far, but it is filed in the same entry.

Your turn

- *Say it:* "eṇṭu"
- *Look:* at ಎಂಟು and find the ಂ — the same mark *ondu* carries, a different sound
- *Say it:* the count so far — "…āru, ēḷu, eṇṭu"

Before you move on

Which two numbers should you trust least as family cousins? (**Eight and nine** — Telugu drifts furthest, to *enimidi* and *tommidi*.) What nasal is the ◌ಂ carrying in ಎಂಟು? (An **ṇ**, taken from the ಟ.)

7.11 ಒಂಬತ್ತು — nine, and the anusvara's third face

In *ondu* the ◌ಂ said *n*. In *eṇṭu* it said *ṇ*. Watch what it does next.

You'll want to know: ಒಂಬತ್ತು

ಒಂಬತ್ತು (*ombattu*) — "**nine**." Tamil's *oṉpatu* is the same word underneath.

Now the ◌ಂ sits in front of ಬ, and a nasal made with the lips is what a *b* wants next to it — so it says *m*. One written mark, three sounds so far, each one decided by the letter after it and never by the mark itself.

That is the whole rule, and it holds everywhere in Kannada: read the ◌ಂ forwards.

The word, taken apart — its roots and family

ಒಂಬತ್ತು (*ombattu*) is native Dravidian, one word with Tamil *oṉpatu* and Malayalam *ompatu* (DEDR 1025).

The letters in this word

Now look at the end of the word: ತ್ತು — a **doubled** *t*. The first ತ್ is *ta* silenced by the **virama** (its vowel cut), and it tucks **under** the next letter as an *ottu* (a subscript form) before ತು *tu*. Kannada writes a double consonant by **stacking**, not by repeating side by side — the Roman alphabet just writes "tt".

Your turn

- *Say it:* "ombattu" — the m comes from the ಬ
- *Look:* at ಒಂಬತ್ತು and find the ◌ಂ — the same mark *ondu* and *eṇṭu* carry
- *Look:* at ತ್ತು and find the small *t* tucked under the second one

- *Say it:* the count so far — "…ēḷu, eṇṭu, ombattu"
- *Recall:* say *ondu*

Before you move on

What is "nine"? (*Ombattu.*) How does Kannada write its double *tt*? (**Stacked** — the first *t* tucks under the second.) Why does the ◌ೊ say *m* here and *n* in *ondu*? (It takes the nasal the **next** letter asks for — ಬ wants *m*, ದ wants *n*.)

7.12 ಹತ್ತು — ten, and the p that turned into h

Nine was *ombattu*. One number left, and it carries the change that most makes Kannada sound like Kannada.

You'll want to know: ಹತ್ತು

ಹತ್ತು (*hattu*) — "**ten**." Tamil says *pattu*.

Kannada softened an old word-initial **p-** into **h-**, and did it right across the language: *pāl* became *hālu* ("milk"), *pal* became *hallu* ("tooth").

Once you know the rule it runs backwards for you. Meet a Kannada word starting **h-**, take the *h* off, put a *p* on, and you often have its Tamil cousin.

Every letter in **ಹತ್ತು** is one you have learned: ಹ, ತ, the virama ◌್, and ◌ು.

The word, taken apart — its roots and family

ಹತ್ತು (*hattu*) is native Dravidian, one word with Tamil *pattu* (DEDR 3918). The entry gives the older Kannada form *pattu*, with the *p-* that modern Kannada turns into *h-*.

Your turn

- *Say it:* "hattu" — then "pattu", and hear the trade
- *Look:* at **ಹತ್ತು** and read it letter by letter
- *Say it:* all ten — "ondu, eraḍu, mūru, nālku, aidu, āru, ēḷu, eṇṭu, ombattu, hattu"

- *Recall:* say *eraḍu*, then say *mūru*

Before you move on

Count from one to ten in Kannada. What regular change turns Tamil *pattu* into Kannada *hattu*? (Word-initial **p- to h-** — also *pāl* to *hālu*.) Which number wandered off at the start of the chapter, and which two wandered off near the end? (**One**, then **eight and nine**.)

Please

Modes: **eyes** (1) **pen** (2) **Hands-free start:** none of the 3 lessons.

8.1 ಾ — one character, met inside words you already say

Before the new one: ರ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಾ

ಾ — *ā*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ā*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ಾ somewhere inside it:

- ನಮಸ್ಕಾರ *namaskāra* — hello / greetings (namaskāra — "a making of a bow")

- ಧನ್ಯವಾದ *dhanyavāda* — thank you (dhanyavāda — "an utterance of 'worthy'")
- ನೀವು ಹೇಗಿದ್ದೀರಾ? *nīvu hēgiddīrā* — how are you? (respectful)
- ನಾನು *nānu* — I

Writing: ಾ — copy what you see

Put your pen on ಾ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ಾ in the ones that have it

  ನಮಸ್ಕಾರ · ಧನ್ಯವಾದ · ಹೌದು

- *Trace it:* ಾ three times, saying *ā* as you finish each one
- *Look:* back at any page of this chapter and find ಾ once more

Before you move on

Which character is this — ಾ? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ā* on; takes the built-in *a* off.**) Name one word you already say that contains it.

8.2 ದಯವಿಟ್ಟು (dayaviṭṭu) — please (having placed compassion)

Kannada's everyday "please" is, once you open it up, a small act of generosity: "having **placed** compassion" between us.

The word, taken apart — its roots and family

ದಯವಿಟ್ಟು = **please**, literally "**having placed compassion / kindness**." Two pieces:

- ದಯ (*daya*) = **compassion, kindness, grace** — from Sanskrit **daya**.
- ಇಟ್ಟು (*iṭṭu*) = "**having placed / set down**," from the verb ಇಡು (*iḍu*) "to place, to put."

So *dayaviṭṭu* means, at heart, *setting kindness down (before you)* — asking the listener to act from compassion.
That is exactly how **Tamil** builds it (*tayavu seytu*, "**do** the kindness"), and the same instinct as **Arabic** *min faḍlik* ("from your **grace**") and **Hindi** *kṛpayā* (from *kṛpā*, "**compassion**"). A wide arc of Asia says *please* by naming the kindness it hopes for.

The word, taken apart — its roots and family

daya + a light verb, four times over:

- Kannada ದಯವಿಟ್ಟು *daya**viṭṭu*** — compassion + **having placed**
- Tamil தயவுசெய்து *tayavu **seytu*** — kindness + **do**
- Telugu దయచేసి *daya**cēsi*** — compassion + **having done**
- Malayalam ദയവായി *daya**vāyi*** — compassion + **as / having become**

Why it's said this way

The honest note: a standalone please-word is a little **formal / emphatic**. Everyday Kannada politeness leans on the **respectful command** — the verb ending **-ಿ** (*-i*): ಕುಳಿತುಕೊಳ್ಳಿ (*kuḷitukoḷḷi*) "please sit," ಹೇಳಿ (*hēḷi*) "please tell me." That ending already means "please" do this. Add ದಯವಿಟ್ಟು in front when you want to underline the courtesy.

The letters in this word

Look at ಟ್ಟು — a **doubled** *ṭ*, stacked exactly the way ತ್ತು was in *ombattu* ("nine"). The first ಟ್ is *ṭa* silenced by the **virama**, tucked **under** ಟು *ṭu* as an *ottu*. Same rule, a new letter.

Your turn

- *Say it:* "daya" — compassion — then "iṭṭu," having placed
- *Say it:* the whole word — "dayaviṭṭu" = please
- *Say it:* the everyday way — the verb ending: "kuḷitukoḷḷi" = please sit
- *Recall:* say *nālku*

Before you move on

What is the Kannada word for please? (ದಯವಿಟ್ಟು *dayaviṭṭu*.) What do its pieces mean? ("**Compassion**" *daya* + "**having placed**" *iṭṭu*.) Which cousins ask the same way? (**Tamil, Telugu, Malayalam** with *daya* — plus **Arabic** *faḍl*, **Hindi** *kṛpā*.) What carries "please" in ordinary speech? (**The respectful verb ending** -ಿ *-i*.)

8.3 ಯ — one character, met inside words you already say

- ಧನ್ಯವಾದ *dhanyavāda* — thank you (dhanyavāda — “an utterance of ’worthy’”)
- ದಯವಿಟ್ಟು *dayaviṭṭu* — please (dayaviṭṭu

Writing: ಯ

- **1.** start at the upper left and go down the left side and round the base
- **2.** without lifting, climb the right side and close the bowl over the top
- **3.** lift, then dip from the foot of the bowl and climb the middle arm to the top bar
- **4.** without lifting, run back left along the top bar
- **5.** without lifting, draw the top bar from left to right
- **6.** without lifting, curl up into the hook
- **7.** lift, then round the small right bowl from its foot
- **8.** without lifting, climb its right side and curl in at the top

Pen lifts: 2. The round bowl comes first. Then a fresh stroke from its foot climbs the middle arm, runs back along the top bar, draws it and curls into the hook. Last, after a second lift, comes the small bowl on the right. The animation lifts before each part; most people copying ಯ in the Omniglot study used two or three strokes. Joining the bowl or the hook to the next part would mean going back over most of a curve, so two lifts stay.

> *Say* ಕ್ಷಮಿಸಿ*, trace it back through kṣamisu to Sanskrit kṣamā, and contrast it with Tamil's unrelated maṉṉikkavum.*

9.1 ಕ್ಷಮಿಸಿ (kṣamisi) — forgive me / sorry

You already know ದಯವಿಟ್ಟು (*dayaviṭṭu*), "please." Kannada's "sorry" reuses a trick you'll see everywhere in this language: taking a Sanskrit noun and turning it into a working Kannada verb.

The word, taken apart — its roots and family

- ಕ್ಷಮಾ (*kṣamā*) = "**patience, forbearance, forgiveness**" — a Sanskrit noun, unchanged.
- **-ಇಸು** (*-isu*) = a **verb-making suffix**: bolt it onto a Sanskrit noun and you get a brand-new Kannada verb. *kṣamā* + *-isu* → ಕ್ಷಮಿಸು (*kṣamisu*), "**to forgive**." (The same move builds *prārambhisu*, "to begin," from Sanskrit *prārambha*.)
- **-ಿ** (*-i*) = the plain **imperative** ending — the very one you met on *kuḷitukoḷḷi* ("please sit") in the please lesson.

So ಕ್ಷಮಿಸಿ is simply "**forgive!**" — *kṣamisu* wearing its imperative

ending.

The word, taken apart — its roots and family

Three of the four Dravidian cousins build "sorry" from the very same Sanskrit noun, each with its own verb-making suffix and its own imperative shape:

- Kannada ಕ್ಷಮಿಸಿ *kṣamis**i*** — Sanskrit *kṣamā* + **-isu** (verb) + **-i** (imperative)
- Telugu క్షమించండి *kṣamiñc**aṇḍi*** — Sanskrit *kṣamā* + **-iñcu** (verb) + **-aṇḍi** (imperative)
- Malayalam ക്ഷമിക്കണം *kṣamik**kaṇaṁ*** — Sanskrit *kṣama* + **-ikkuka** (verb) + **-aṇaṁ** (necessitative)
- Tamil மன்னிக்கவும் *maṉṉik**kavum*** — its **own** native root *maṉṉi*, not Sanskrit at all

Why it's said this way

ಕ್ಷಮಿಸಿ is a genuine, everyday way to say "sorry" — not overly formal — but in casual conversation you'll also hear the softer ಕ್ಷಮಿಸಿ ಬಿಡಿ (*kṣamisi biḍi*, roughly "just forgive [it]") or simply the borrowed English "**sorry**," which is extremely common in spoken Kannada.

Your turn

- *Say it:* "kṣamā" — the Sanskrit noun, patience/forgiveness
- *Say it:* the verb — "kṣamisu," to forgive — then "kṣamisi," forgive!
- *Say it:* contrast — Tamil's maṉṉikkavum uses its own root instead
- *Recall:* say *aidu*, then say *āru*

Before you move on

What is ಕ್ಷಮಿಸಿ built from? (**Sanskrit kṣamā** "forgiveness" + the verb-making suffix **-isu** + the imperative **-i**.) Which cousin languages do the same trick, and which one doesn't? (**Telugu and Malayalam** also verb-ify *kṣamā*; **Tamil** uses its own native root

maṉṉi instead.) What do people often say casually instead? (**Kṣamisi biḍi**, or simply borrowed English "**sorry**.")

9.2 ಡ — one character, met inside words you already say

Before the new one: ಯು — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಡ

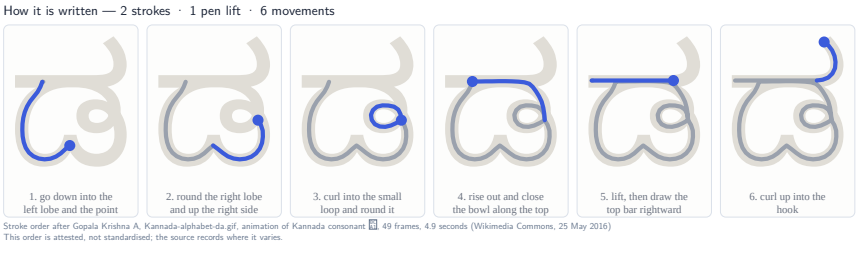

ಡ — *ḍa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ḍ*, it is **ḍa**.

You already say these, and every one of them has ಡ somewhere inside it:

- ಮಾತನಾಡು *mātanāḍu* — to speak
- ಕೆಲಸ ಮಾಡು *kelasa māḍu* — to work (lit. "work-do")
- ಎರಡು *eraḍu* — two

Writing: ಡ

How ಡ is written, stroke by stroke

- **1.** start at the upper left and go down the left side into the left lobe, rising into the middle point

- **2.** without lifting, drop from the point around the right lobe and climb the right side
- **3.** without lifting, curl left into the small inner loop and go round it counterclockwise
- **4.** without lifting, rise out of the loop and close the bowl leftward along the top
- **5.** lift, then draw the top bar from left to right
- **6.** without lifting, curl up into the hook

Pen lifts: 1. The whole body, with the point in its base and the small loop inside its right lobe, is one run that closes along the top; the curled bar comes after the only lift. It is ದ with that small loop tucked inside.

> The animation is filed as 'da': that series keeps 'da' for this letter, ಡ, and spells dental ದ with an *h*, as 'dha'.

Your turn

- *Look:* at these words, and find ಡ in the ones that have it

  ಮಾತನಾಡು · ನಮಸ್ಕಾರ

- *Trace it:* ಡ three times, saying *ḍa* as you finish each one
- *Look:* back at any page of this chapter and find ಡ once more

Which character is this — ಡ? What sound does it carry? (***ḍa***.) Name one word you already say that contains it.

9.3 ೧ — the digit for ondu

Before the new shape: ಡ — what sound does that letter carry?

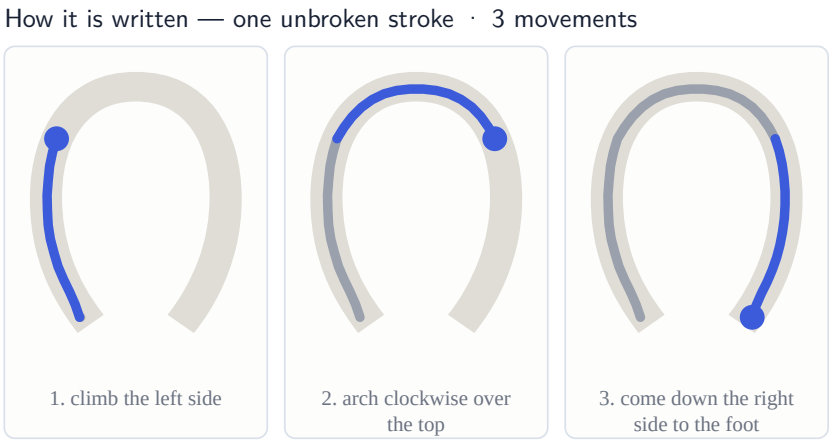

You have been counting since you learned to count. Now the written form arrives, one shape at a time.

Script you'll notice: ೧

೧ — **1**, the digit for ಒಂದು (*ondu*), "one".

Kannada writes its numbers with its own ten digits. You will see them on bus boards, house plates and price tags all over Karnataka, sitting beside the Western digits rather than replacing them. Here is the first.

Writing: ೧ — follow the numbered strip

Stroke order after Chimple (Sutara Learning Foundation, Bangalore), LIDO tracing lessons LIDO_kn2_0318 and LIDO_kn2_0319, chimple/chimple-zips at commit 5b137ab1 (October 2026): the hidden, ordered tracing path for ೧, trace image file-vkey5uhp.svg
This order is attested, not standardised; the source records where it varies.

How ೧ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ೧ yourself — slowly, and larger than it is printed.

The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real

variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the digits you have met, and name each one aloud

  ೧

- *Say it:* "ondu" as you point at ೧

Before you move on

Which number is ೧? (**1** — *ondu*, ಒಂದು.) Name every digit you have met so far, in order.

Chapter 10

Days of the Week

Modes: **voice** (1) **pen** (3) **Hands-free start:** the first of 4 lessons.

By the end of this chapter: I can name any day of the week in Kannada, including the Sunday that uses a different sun-name from Hindi's.

Complete KA-C10-checkpoint, the chapter's closing checkpoint: say the seven days from sōmavāra to bhānuvāra and name the sun-name that differs from Hindi's, find ೋ in ಸೋಮವಾರ and read ೨ as eraḍu, then write both from sound.

10.1 ಸೋಮವಾರ to ಭಾನುವಾರ — the Sanskrit week

Unlike Tamil and Malayalam, Kannada's week is built entirely from Sanskrit — the same recipe as Hindi's. But even here, one day picks a **different** Sanskrit word than Hindi does.

You'll want to know: The pattern: [deity] + ವಾರ, "day"

Kannada	deity/planet	day
ಸೋಮವಾರ (*Somavāra*)	**Moon** (Soma)	Monday
ಮಂಗಳವಾರ (*Maṅgaḷavāra*)	**Mars** (Maṅgala)	Tuesday
ಬುಧವಾರ (*Budhavāra*)	**Mercury** (Budha)	Wednesday
ಗುರುವಾರ (*Guruvāra*)	**Jupiter** (Guru/ Bṛhaspati)	Thursday
ಶುಕ್ರವಾರ (*Śukravāra*)	**Venus** (Śukra)	Friday
ಶನಿವಾರ (*Śanivāra*)	**Saturn** (Śani)	Saturday
ಭಾನುವಾರ (*Bhānuvāra*)	the **Sun** (Bhānu, "light, splendor")	Sunday

Five of these are identical in shape to Hindi's — same deity, same **-vāra/ -vār** ending. **Sunday** is the interesting exception: where Hindi says रविवार (*Ravivār*, from *Ravi*, "sun"), Kannada says ಭಾನುವಾರ (*Bhānuvāra*), built on a **different** Sanskrit word for the sun — **Bhānu**, "light, splendor," rather than *Ravi*. Sanskrit has **many** names for the sun, and different languages downstream picked different ones for their week.

Your turn

- *Say it:* "Somavāra, Maṅgaḷavāra, Budhavāra, Guruvāra, Śukravāra, Śanivāra" — Monday through Saturday
- *Say it:* the different one — "Bhānuvāra," Sunday
- *Say it:* the contrast — Hindi says Ravivāra (Ravi), Kannada says Bhānuvāra (Bhānu) — two different Sanskrit sun-names
- *Recall:* say *ēḷu*
- *Read it:* ಎಂಟು

Before you move on

What ending does every Kannada weekday share, and where's it from? (**-ವಾರ** *-vāra*, Sanskrit "day.") Which day differs from Hindi's version, and how? (**Sunday** — Kannada's *Bhānuvāra* ("light") uses a different Sanskrit sun-name than Hindi's *Ravivār* ("Ravi").)

10.2 ೋ — one character, met inside words you already say

Before the new one: ಡ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ೋ

ೋ — *ō*.

It is a **vowel sign**. It is not a letter and never stands alone: it attaches to a consonant and **replaces** the *a* built into it with *ō*. Replaces, not adds — the *a* is gone.

You already say these, and every one of them has ೋ somewhere inside it:

- ಸಂತೋಷ *santōṣa* — joy / pleased to meet you
- ಹೋಗು *hōgu* — to go (and ಬಾ, come)
- ಹೋಗಿ ಬರುತ್ತೇನೆ *hōgi baruttēne* — goodbye (lit. "I'll go and come back")
- ನಾಳೆ ಸಿಗೋಣ *nāḷe sigōṇa* — see you tomorrow

Writing: ೋ — copy what you see

Put your pen on ೋ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ೋ in the ones that have it

  ಸಂತೋಷ · ಹೋಗು · ನಮಸ್ಕಾರ

- *Trace it:* ೋ three times, saying *ō* as you finish each one
- *Look:* back at any page of this chapter and find ೋ once more

Before you move on

Which character is this — ೋ? What vowel does it put on the consonant it attaches to — and what does it take off? (**Puts *ō* on; takes the built-in *a* off.**) Name one word you already say that contains it.

10.3 ೨ — the digit for eraḍu

Before the new shape: ೧ — which number is it?

One digit this time, and you already know its name.

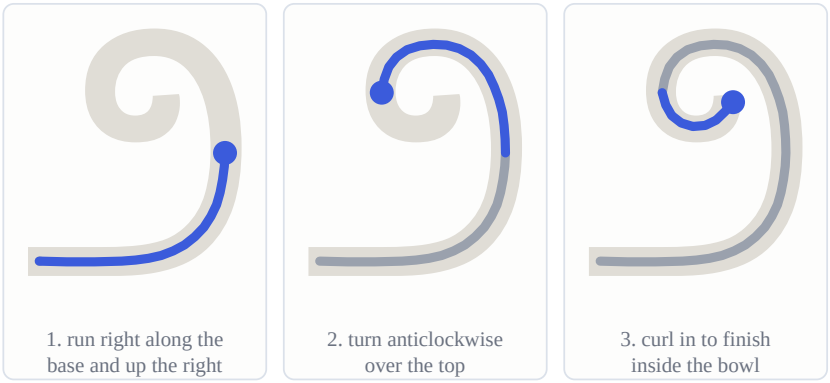

Script you'll notice: ೨

೨ — **2**, the digit for ಎರಡು (*eraḍu*), "two".

Each Dravidian script carries its own set of ten digits. Telugu, Malayalam and Tamil all have theirs; none of the four sets is borrowed from another.

Writing: ೨ — follow the numbered strip

How it is written — one unbroken stroke · 3 movements

Stroke order after Chimple (Sutara Learning Foundation, Bangalore), LIDO tracing lessons LIDO_kn2_0318 and LIDO_kn2_0319, chimple/chimple-zips at commit 5b137ab1 (October 2026): the hidden, ordered tracing path for ೨, trace image 2.svg
This order is attested, not standardised; the source records where it varies.

How ೨ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ೨ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the digits you have met, and name each one aloud

  ೧ · ೨

- *Say it:* "eraḍu" as you point at ೨

Before you move on

Which number is ೨? (**2** — *eraḍu*, ಎರಡು.) Name every digit you have met so far, in order.

10.4 Chapter 10 checkpoint — the week, ೋ and ೨

Nothing new here. The week out loud first, then the two shapes this chapter put on the page.

Your turn — the week

- *Say it:* the seven days, Monday to Sunday

(*Sōmavāra, maṅgaḷavāra, budhavāra, guruvāra, śukravāra, śanivāra, bhānuvāra.*)

- What ending does every day share, and what does it mean? (*-vāra*, "day.")
- Which day takes a different Sanskrit sun-name from Hindi's, and what are the two names? (Sunday: Kannada *bhānuvāra*, "light"; Hindi *ravivār.*)

Script — ೋ and ೨

- ಸೋಮವಾರ is Monday. Which mark in it gives its first consonant the *ō*, and what does that mark take away? (ೋ: it puts *ō* on and takes the built-in *a* off.)
- Which number is ೨, and which word does it stand for? (**2**, *eraḍu.*)

Read it: ಸೋಮವಾರ aloud, and point to the ೋ in it
Read it: ೨ aloud as *eraḍu*

Writing — from sound

Cover: the Script block above, so no model stays in view
Write it: the digit for *eraḍu*, then the sign that turns a consonant's *a* into *ō*
Check: against the key — ೨, ೋ
Write it: one repaired shape, then stop

Before you move on

Say today's day in Kannada, then Sunday's. That is the chapter: the week by name, and two shapes that sit inside it on the page. Next chapter: the colours.

Chapter 11

Four Core Colours

Modes: **voice** (1) **pen** (2) **Hands-free start:** the first of 3 lessons.

By the end of this chapter: I can name four basic colours in Kannada — black, white, red, and blue.

Say ಕಪ್ಪು, ಬಿಳಿ, ಕೆಂಪು *— the three native colours — then the borrowed* ನೀಲಿ*, and point out that the week is Sanskritic where the colours are not.*

11.1 ಕಪ್ಪು, ಬಿಳಿ, ಕೆಂಪು, ನೀಲಿ — native colors, after a fully Sanskrit week

Kannada's week ran entirely on Sanskrit deity-names. Its colors tell a different story — here, native Dravidian vocabulary is back in charge, except for one familiar exception.

You'll want to know: Three native colors

- ಕಪ್ಪು (*kappu*) = "**black**" — native Dravidian.
- ಬಿಳಿ (*biḷi*) = "**white**" — native Dravidian.
- ಕೆಂಪು (*kempu*) = "**red**" — native Dravidian.

The word, taken apart — its roots and family

ಕಪ್ಪು (*kappu*) is native Dravidian (DEDR 1395, with Tamil *karuppu*), ಬಿಳಿ (*biḷi*) is native too (DEDR 5496, with Tamil *veḷ*), and so is ಕೆಂಪು

(*kempu*) (DEDR 1931, with Telugu *kempu*). ನೀಲಿ (*nīli*) comes from Sanskrit *nīla*, "dark blue" (CDIAL 7563). DEDR 1395 compares Sanskrit *karparī*.

You'll want to know: The familiar borrowed blue

ನೀಲಿ (*nīli*) = "**blue**" — from the **same Sanskrit** ನೀಲ (*nīla*) that Tamil, Malayalam, and Hindi all reach for. Even Kannada, whose week went fully Sanskritic, still keeps its everyday black/white/red **native** — it's specifically **blue** that pulls in the Sanskrit word, across all four Dravidian languages and Hindi alike.

Your turn

- *Say it:* "kappu, biḷi, kempu" — black, white, red
- *Say it:* "nīli" — blue, the shared Sanskrit word
- *Say it:* the contrast — Kannada's week is Sanskritic, but its colors (except blue) are native
- *Recall:* say *ombattu*
- *Read it:* ಹತ್ತು

Before you move on

Are Kannada's black/white/red native or Sanskrit? (**Native Dravidian** — kappu, biḷi, kempu.) Which color is the shared Sanskrit loan across Kannada, Tamil, Malayalam, and Hindi? (**Blue** — ನೀಲಿ *nīli* / நீலம் *nīlam* / നീല *nīla* / नीला *nīlā*.)

11.2 ಹ — one character, met inside words you already say

Before the new one: ೊೀ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಹ

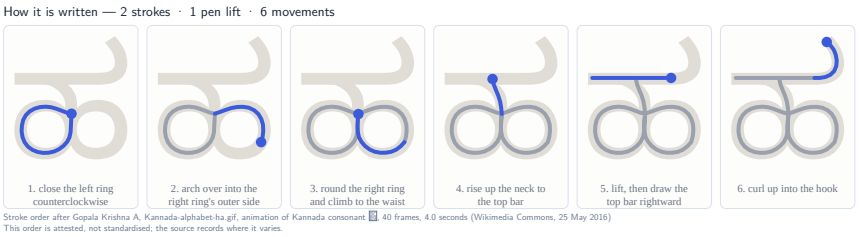

ಹ — *ha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *h*, it is **ha**.

You already say these, and every one of them has **ಹ** somewhere inside it:

- **ಹೌದು** *haudu* — yes (haudu)
- **ಹೆಸರು** *hesaru* — name
- **ಹೇಗೆ** *hēge* — how
- **ನೀವು ಹೇಗಿದ್ದೀರಾ?** *nīvu hēgiddīrā* — how are you? (respectful)

Writing: ಹ

How **ಹ** *is written, stroke by stroke*

- **1.** start at the upper right of the left ring and close it counterclockwise
- **2.** without lifting, arch over to the right and go down the right ring's outer side
- **3.** without lifting, round the right ring's base and climb its inner side to the waist
- **4.** without lifting, rise up the neck to the top bar
- **5.** lift, then draw the top bar from left to right
- **6.** without lifting, curl up into the hook

Pen lifts: 1. Both rings and the neck that rises between them are one run, starting at the top right of the left ring; the curled bar on top comes after the only lift.

  ಹೌದು · ಹೆಸರು · ನಮಸ್ಕಾರ

- *Trace it:* ಹ three times, saying *ha* as you finish each one
- *Look:* back at any page of this chapter and find ಹ once more

Which character is this — ಹ? What sound does it carry? (***ha***.)
Name one word you already say that contains it.

11.3 ೩ — the digit for mūru

Before the new shape: ೨ — which number is it?

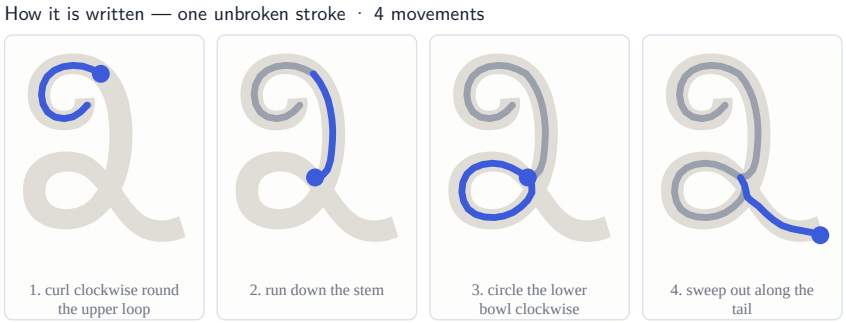

One digit this time, and you already know its name.

Script you'll notice: ೩

೩ — **3**, the digit for ಮೂರು (*mūru*), "three".

The digits behave exactly like the ones you grew up with: ten shapes, and place value doing the rest.

Writing: ೩ — follow the numbered strip

How ೩ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ೩ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the digits you have met, and name each one aloud

  ೧ · ೨ · ೩

- *Say it:* "mūru" as you point at ೩

Before you move on

Which number is ೩? (**3** — *mūru*, ಮೂರು.) Name every digit you have met so far, in order.

Chapter 12

Family

Modes: **voice** (1) **pen** (2) **Hands-free start:** the first of 3 lessons.

By the end of this chapter: I can name my parents and my brothers and sisters in Kannada, choosing the right word for older or younger.

Name ಅಪ್ಪ *and* ಅಮ್ಮ, *then the four age-graded siblings* ಅಣ್ಣ · ತಮ್ಮ · ಅಕ್ಕ · ತಂಗಿ, *where age is chosen before gender.*

12.1 ಅಪ್ಪ, ಅಮ್ಮ, and four sibling words — the same system as Tamil

Kannada asks the same question Tamil does about any sibling: **older, or younger?** — and the words for answering it are almost identical.

The word, taken apart — its roots and family

- ಅಪ್ಪ (*appa*) = "**father**" — matches Tamil *appā* closely.
- ಅಮ್ಮ (*amma*) = "**mother**" — matches Tamil *ammā* closely.

The word, taken apart — its roots and family

Kannada	meaning	compare Tamil
ಅಣ್ಣ (*aṇṇa*)	**older** brother	*aṇṇaṉ* — near match
ತಮ್ಮ (*tamma*)	**younger** brother	*tambi* — near match
ಅಕ್ಕ (*akka*)	**older** sister	*akkā* — near match
ತಂಗಿ (*tangi*)	**younger** sister	*tangai* — near match

Just like Tamil, Kannada has **no single word** that simply means "brother" or "sister" — you name the sibling's **relative age** every time, not just their gender. This age-first system runs across the whole Dravidian family, not just one language.

Your turn

- *Say it:* "appa, amma" — father, mother
- *Say it:* "aṇṇa, tamma" — older/younger brother
- *Say it:* "akka, tangi" — older/younger sister
- *Recall:* say *dayaviṭṭu*
- *Read it:* ಕ್ಷಮಿಸಿ

Before you move on

How many Kannada sibling words are there, and what do they split on? (**Four** — ಅಣ್ಣ/ತಮ್ಮ, ಅಕ್ಕ/ತಂಗಿ — split by **relative age**, not just gender.) How closely do Kannada's words match Tamil's? (**Very closely** — nearly the same forms across the whole set.)

12.2 ಸ — one character, met inside words you already say

Before the new one: ಹ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಸ

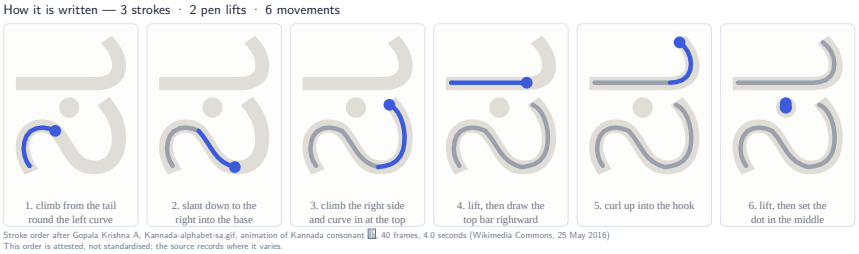

ಸ — *sa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *s*, it is **sa**.

You already say these, and every one of them has **ಸ** somewhere inside it:

- **ನಮಸ್ಕಾರ** *namaskāra* — hello / greetings (namaskāra — "a making of a bow")
- **ಸರಿ** *sari* — okay / alright / correct (sari)
- **ಹೆಸರು** *hesaru* — name
- **ಸಂತೋಷ** *santōṣa* — joy / pleased to meet you

Writing: ಸ

How **ಸ** *is written, stroke by stroke*

- **1.** start at the tail and climb round the left curve
- **2.** without lifting, slant down to the right into the base
- **3.** without lifting, climb the right side and curve in at the top
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook
- **6.** lift, then set the dot in the middle

Pen lifts: 2. The body is one run, from the tail at the bottom left to the curl at the top right; then comes the curled bar, and last the dot in the middle, each after a lift.

12.3 ೪ — the digit for nālku

Before the new shape: ೩ — which number is it?

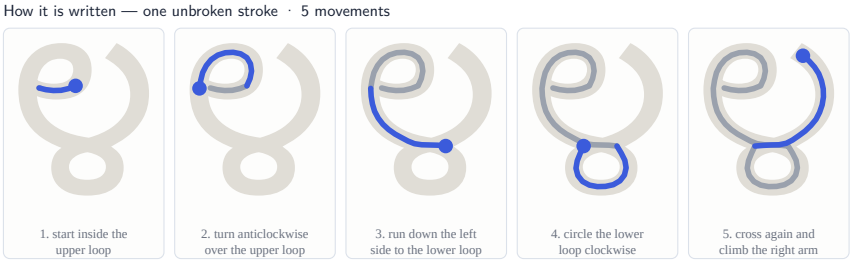

One digit this time, and you already know its name.

Script you'll notice: ೪

೪ — **4**, the digit for ನಾಲ್ಕು (*nālku*), "four".

You have now met four of the ten. The words came first, when you learned to count; the shapes are arriving one at a time, on top of words you can already say.

Writing: ೪ — follow the numbered strip

How ೪ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ೪ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Chapter 13

Head and Hand

Modes: **voice** (1) **pen** (3) **Hands-free start:** the first of 4 lessons.

> ***By the end of this chapter:*** I can name the head and the hand in Kannada.
>
> *Complete KA-C13-checkpoint, the chapter's closing checkpoint: say tale and kai and match them with Tamil and Malayalam, find* ಚ *in* ಚೆನ್ನಾಗಿ *and read* ಐ *as aidu, then write both from sound.*

13.1 ತಲೆ, ಕೈ — head and hand, the shared Dravidian core

Three languages, nearly one word each — Kannada's basic body parts line up with Tamil and Malayalam almost perfectly.

You'll want to know: The words

- ತಲೆ (*tale*) = "**head**" — native Dravidian, matching Tamil *talai* and Malayalam *thala*.
- ಕೈ (*kai*) = "**hand**" — native Dravidian, matching Tamil and Malayalam's *kai* almost exactly.

The word, taken apart — its roots and family

ತಲೆ (*tale*) is native Dravidian, one word with Tamil *talai* and Telugu *tala* (DEDR 3103). ಕೈ (*kai*) is native too, one word with Tamil *kai* (DEDR 2023), where the entry spells the Kannada word *kay*, *kayi*.

Your turn

- *Say it:* "tale" — head
- *Say it:* "kai" — hand
- *Say it:* the match — nearly identical across Tamil, Malayalam, Kannada
- *Recall:* say *sōmavāra maṅgaḷavāra budhavāra guruvāra śukravāra śanivāra bhānuvāra*

Before you move on

What are Kannada's words for head and hand? (**ತಲೆ tale, ಕೈ kai**.) How closely do they match Tamil and Malayalam? (**Very closely** — all three share essentially the same native Dravidian words.)

13.2 ಚ — one character, met inside words you already say

Before the new one: **ಸ** — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಚ

ಚ — *ca*.

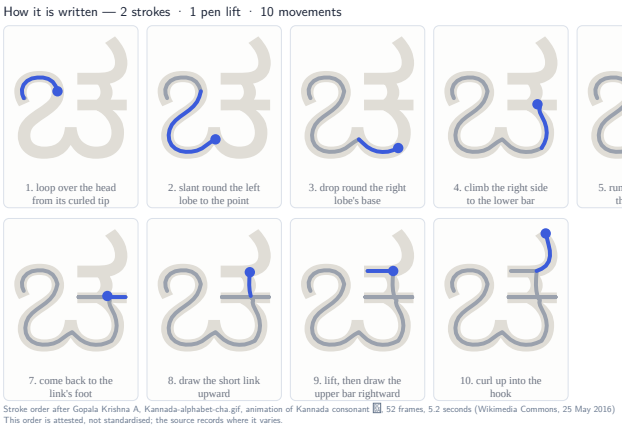

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *c*, it is **ca**.

You already say this word, and **ಚ** sits at the front of it:

- **ಚೆನ್ನಾಗಿ** *cennāgi* — well, nicely — and the reply "**ನಾನು ಚೆನ್ನಾಗಿದ್ದೇನೆ**"

And a first look ahead: the months lesson names twelve months, and **ಚ** opens the first. Here are the first three — **ಚೈತ್ರ, ವೈಶಾಖ, ಜ್ಯೇಷ್ಠ** (*caitra, vaiśākha, jyēṣṭha*). Find **ಚ**; the other shapes can wait.

Writing: ಜ

How ಜ is written, stroke by stroke

- **1.** start at the curled tip inside the head and loop up over it clockwise
- **2.** without lifting, slant down to the left and round the left lobe, rising into the middle point
- **3.** without lifting, drop from the point round the right lobe's base
- **4.** without lifting, climb the right side to the lower bar
- **5.** without lifting, run back left along the lower bar
- **6.** without lifting, draw the lower bar from left to right
- **7.** without lifting, come back along the bar to the short link
- **8.** without lifting, draw the short link up from the lower bar
- **9.** lift, then draw the upper bar from left to right
- **10.** without lifting, curl up into the hook

Pen lifts: 1. The body is drawn as ಐ's is; then the pen runs back along the lower bar, draws it, and comes back to climb the short link. It lifts once, for the curled bar on top. The animation lifts before each part; most people copying ಜ in the Omniglot study lifted only once.

Your turn

- *Look:* at these words, and find **ಚ** in the ones that have it

  ಚೆನ್ನಾಗಿ · **ನಮಸ್ಕಾರ**

- *Trace it:* **ಚ** three times, saying *ca* as you finish each one
- *Look:* back at any page of this chapter and find **ಚ** once more

Before you move on

Which character is this — **ಚ**? What sound does it carry? (***ca***.) Name one word you already say that contains it.

13.3 ೫ — the digit for aidu

Before the new shape: **೪** — which number is it?

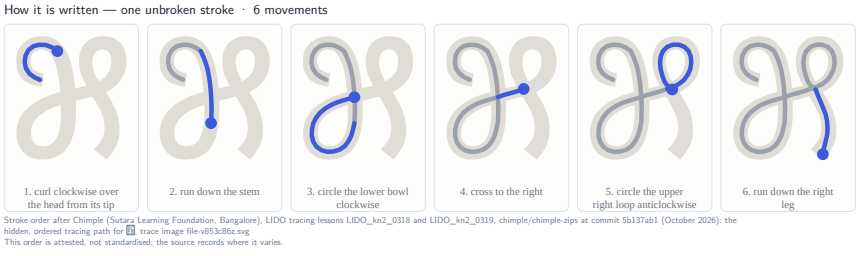

One digit this time, and you already know its name.

Script you'll notice: ೫

೫ — **5**, the digit for **ಐದು** (*aidu*), "five".

Halfway through the digits. Notice how little there is to learn here compared with the letters: no vowel signs, no stacking, no virama.

Writing: ೫ — follow the numbered strip

How ೫ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ೫ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the digits you have met, and name each one aloud

  ೧ · ೨ · ೩ · ೪ · ೫

- *Say it:* "aidu" as you point at ೫

Before you move on

Which number is ೫? (**5** — *aidu*, ಐದು.) Name every digit you have met so far, in order.

13.4 Chapter 13 checkpoint — head, hand, ಚ and ೫

> Nothing new here. The two body words out loud first, then the letter and the digit this chapter put on the page.

Your turn — head and hand

- *Say it:* "head", then "hand", in Kannada

(*Tale*; *kai.*)

- How close are they to Tamil's and Malayalam's words? (Very close: Tamil *talai* and *kai*, Malayalam *tala* and *kai*; all three kept the native Dravidian pair.)

Script — ಚ and ೫

- ಚೆನ್ನಾಗಿ is "well". Which letter opens it, and what sound does that letter carry on its own? (**ಚ**, *ca*: a consonant with its *a* built in.)
- Which number is **೫**, and which word does it stand for? (**5**, *aidu*.)

Read it: ಚೆನ್ನಾಗಿ aloud, and point to the ಚ in it
Read it: ೫ aloud as *aidu*

Writing — from sound

Cover: the Script block above, so no model stays in view
Write it: the letter for *ca*, then the digit for *aidu*
Check: against the key — ಚ, ೫
Write it: one repaired shape, then stop

Before you move on

Touch your head and say its word, then your hand and say its word.
That is the chapter: two native words, one letter and one digit.
Next chapter: the seasons.

Chapter 14

Seasons

Modes: 🚗 **voice** (1) ↙ **pen** (2) 🚗 **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can name the four seasons in Kannada, including the monsoon that actually shapes the Karnataka year.
>
> *Say* ಬೇಸಿಗೆ, ಮಳೆಗಾಲ *and* ಚಳಿಗಾಲ *from native roots, then the doubly-Sanskrit* ವಸಂತ ಋತು *for spring.*

14.1 ವಸಂತ ಋತು, ಬೇಸಿಗೆ, ಮಳೆಗಾಲ, ಚಳಿಗಾಲ — native words, plus a double Sanskrit loan

Kannada's summer, rain, and cold words are native, just like Tamil's — but its word for "spring" borrows **twice** from Sanskrit, not once.

You'll want to know: The words

Kannada	meaning	source
ವಸಂತ ಋತು (*vasanta ṛtu*)	"spring"	**both** *vasanta* AND ಋತು *ṛtu* ("season") are Sanskrit
ಬೇಸಿಗೆ (*bēsige*)	"summer"	native Dravidian
ಮಳೆಗಾಲ (*maḷegāla*)	"rainy season"	ಮಳೆ *maḷe*, native Dravidian ("rain") + ಕಾಲ *kāla* ("time," itself a Sanskrit loan)
ಚಳಿಗಾಲ (*caḷigāla*)	"winter/cold season"	ಚಳಿ *caḷi*, native Dravidian ("cold") + *kāla*

Why it's said this way

Where Tamil and Malayalam just say *kaalam* ("time/season," itself ultimately Sanskrit-derived too, but assimilated long ago as ordinary vocabulary), Kannada's word for spring, **ವಸಂತ ಋತು**, keeps **both** halves visibly Sanskrit — *vasanta* the season-name, *ṛtu* the very word for "season." Summer, rain, and cold, by contrast, are built on native Dravidian roots (*bēsige*, *maḷe*, *caḷi*).
And as with Tamil and Malayalam: it's **ಮಳೆಗಾಲ** (*maḷegāla*, the rains) that shapes Karnataka's agricultural year the most, not a clean four-way Western split.

Your turn

- *Say it:* "bēsige" — summer, native
- *Say it:* "maḷegāla" — the rains
- *Say it:* "caḷigāla" — the cold season, native
- *Say it:* the double loan — "vasanta ṛtu" — both halves Sanskrit
- *Recall:* say *kappu biḷi kempu nīli*

Before you move on

How does **ವಸಂತ ಋತು** differ from the Tamil/Malayalam spring-word? (**Both halves are Sanskrit** — *vasanta* and *ṛtu*, "season" itself — where Tamil/Malayalam just add the long-assimilated *kaalam*.) Which season actually shapes Karnataka's year most? (**ಮಳೆಗಾಲ**, the rains.)

14.2 ◌ಂ — one character, met inside words you already say

Before the new one: **ಚ** — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ◌ಂ

◌ಂ — *a nasal, ridden on the syllable before it.*

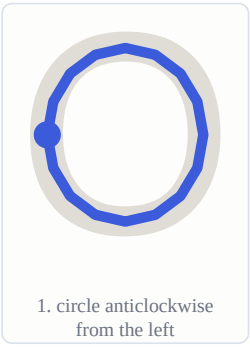

It is a **nasal**, written as a mark rather than as a letter. It rides on the syllable before it and turns the end of it nasal.

You already say these, and every one of them has ◌ಂ somewhere inside it:

- **ಸಂತೋಷ** *santōṣa* — joy / pleased to meet you
- **ಒಂದು** *ondu* — one
- **ಎಂಟು** *eṇṭu* — eight
- **ಒಂಬತ್ತು** *ombattu* — nine

Writing: ◌ಂ — follow the numbered strip

How it is written — one unbroken stroke · 1 movement

1. circle anticlockwise from the left

Stroke order after Chimple (Sutara Learning Foundation, Bangalore), LIDO tracing lessons LIDO_kn4800 to LIDO_kn4806, chimple/chimple-zips at commit 5b137ab1 (October 2026): the hidden, ordered tracing paths for 34 consonants with ಂ, among them ಕಂ (trace image file-2g6kdrwp.svg)

14.3 ೬ — the digit for āru

Before the new shape: ೫ — which number is it?

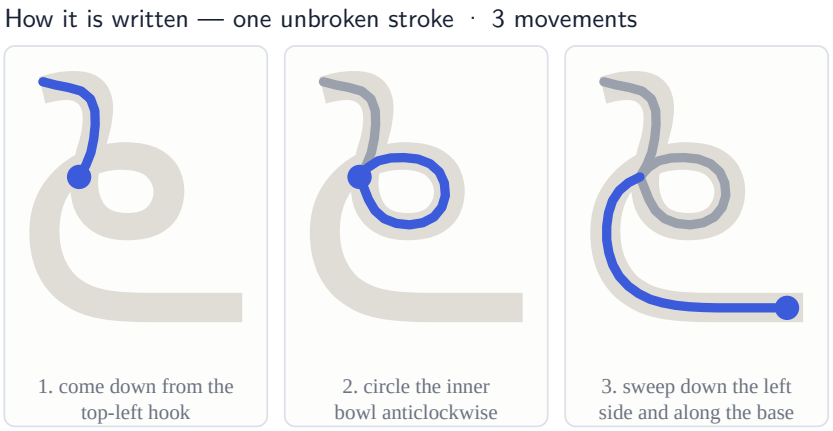

One digit this time, and you already know its name.

Script you'll notice: ೬

೬ — **6**, the digit for **ಆರು** (*āru*), "six".

A digit carries no sound of its own — it stands for a number, and you read it aloud with the word you learned when you learned to count.

Writing: ೬ — follow the numbered strip

Stroke order after Chimple (Sutara Learning Foundation, Bangalore), LIDO tracing lessons LIDO_kn2_0318 and LIDO_kn2_0319, chimple/chimple-zips at commit 5b137ab1 (October 2026): the hidden, ordered tracing path for ೬, trace image file-7nlw0r9i.svg

Chapter 15

Water and Rice

Modes: **voice** (1) **pen** (2) **Hands-free start:** the first of 3 lessons.

> ***By the end of this chapter:*** I can ask for water in Kannada and tell raw rice apart from cooked rice.
>
> *Say* ನೀರು *— matching Tamil's neer, not Malayalam's — then separate* ಅಕ್ಕಿ*, raw rice, from* ಅನ್ನ*, the cooked rice on the plate.*

15.1 ನೀರು, ಅಕ್ಕಿ, ಅನ್ನ — water matching Tamil, and rice, raw and cooked

Kannada's water-word sides with Tamil, not with Malayalam's surprising break from the pack.

The word, taken apart — its roots and family

ನೀರು (*nīru*) = "**water**" — matching Tamil's நீர் (*nīr*, the root inside *taṇṇīr*) closely. Kannada didn't make Malayalam's switch to the *veḷ-* "bright/white" root.

The word, taken apart — its roots and family

- ಅಕ್ಕಿ (*akki*) = "**rice**" (raw grain).
- ಅನ್ನ (*anna*) = "**cooked rice**" (the meal) — likely Sanskrit-influenced, the same general idea as Tamil's *sātam*.

Your turn

- *Say it:* "nīru" — water, matching Tamil
- *Say it:* "akki" — raw rice
- *Say it:* "anna" — cooked rice
- *Recall:* say *appa amma aṇṇa tamma akka taṅgi*

Before you move on

Does Kannada's water-word match Tamil's or Malayalam's? (**Tamil's** — *nīru*/*nīr*, not Malayalam's *veḷḷam*.) What's the raw/cooked rice pair? (**ಅಕ್ಕಿ** *akki* raw, **ಅನ್ನ** *anna* cooked.)

15.2 ಪ — one character, met inside words you already say

Before the new one: ◌ೊ — what does it do?

One character this time. Just one — and you have been saying it for pages without knowing which mark on the page it was.

Script you'll notice: ಪ

ಪ — *pa*.

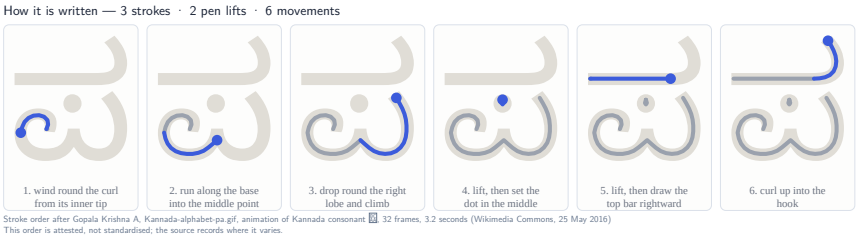

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *p*, it is **pa**.

You already say these, and every one of them has **ಪ** somewhere inside it:

- **ಪರವಾಗಿಲ್ಲ** *paravāgilla* — it's okay / no problem / you're welcome
- **ಕಪ್ಪು ಬಿಳಿ ಕೆಂಪು ನೀಲಿ** — black, white, red, blue
- **ಅಪ್ಪ ಅಮ್ಮ ಅಣ್ಣ ತಮ್ಮ ಅಕ್ಕ ತಂಗಿ** — father, mother, and four age-graded sibling words

And a look ahead to the months lesson: two month names carry **ಪ** — **ಭಾದ್ರಪದ, ಪುಷ್ಯ** (*bhādrapada, puṣya*) — and three more arrive beside them: **ಆಷಾಢ, ಮಾಘ, ಫಾಲ್ಗುಣ** (*āṣāḍha, māgha, phālguṇa*). Find **ಪ**; the other shapes can wait.

Writing: ಪ

How ಪ *is written, stroke by stroke*

- **1.** start at the inner tip of the curl and wind up and round it to the left
- **2.** without lifting, run along the base and rise into the middle point
- **3.** without lifting, drop round the right lobe and climb the right side to its tip
- **4.** lift, then set the dot in the middle
- **5.** lift, then draw the top bar from left to right
- **6.** without lifting, curl up into the hook

Pen lifts: 2. The body is one run, from the inner tip of the curl to the tip of the right side; then comes the dot in the middle, and last the curled bar on top, each after a lift.

15.3 ೭ — the digit for ēḷu

Before the new shape: ೬ — which number is it?

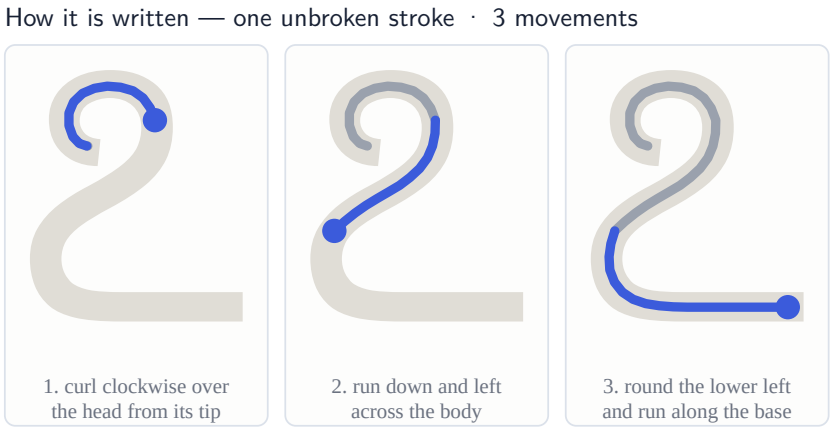

One digit this time, and you already know its name.

Script you'll notice: ೭

೭ — **7**, the digit for ಏಳು (*ēḷu*), "seven".

Seven of ten. From here the remaining shapes are the ones you will meet least often, which is exactly why they come last.

Writing: ೭ — follow the numbered strip

Stroke order after Chimple (Sutara Learning Foundation, Bangalore), LIDO tracing lessons LIDO_kn2_0318 and LIDO_kn2_0319, chimple/chimple-zips at commit 5b137ab1 (October 2026): the hidden, ordered tracing path for ೭, trace image file-jzwz9r79.svg

Chapter 16

The Traditional Months

Modes: **voice** (2) **pen** (3) **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can name the twelve traditional Kannada months and say when the new year Ugadi falls.
>
> *Complete KA-C16-checkpoint, the chapter's closing checkpoint: say the twelve months, place Ugadi on Chaitra Śukla Pratipada and say the calendar is shared with Hindi, recall uttara, find* ಉ *in* ಉತ್ತರ *and read* ೮ *as eṇṭu, then write both from sound.*

16.1 ಚೈತ್ರ to ಫಾಲ್ಗುಣ — the calendar Kannada shares with Hindi, not with Tamil

> Tamil and Malayalam each built their own solar calendar. Kannada takes a different path entirely — the same path as Hindi.

You'll want to know: The twelve months

ಚೈತ್ರ, ವೈಶಾಖ, ಜ್ಯೇಷ್ಠ, ಆಷಾಢ, ಶ್ರಾವಣ, ಭಾದ್ರಪದ, ಆಶ್ವಯುಜ, ಕಾರ್ತೀಕ, ಮಾರ್ಗಶಿರ, ಪುಷ್ಯ, ಮಾಘ, ಫಾಲ್ಗುಣ (*Caitra, Vaiśākha, Jyēṣṭha, Āṣāḍha, Śrāvaṇa, Bhādrapada, Āśvayuja, Kārtīka, Mārgaśira, Puṣya, Māgha, Phālguṇa*).

The word, taken apart — its roots and family

All twelve names are Sanskrit, most kept whole and a few lightly reshaped (*kārtīka* for Sanskrit *kārttika*, *phālguṇa* for *phālguna*). Most are named for a lunar asterism: *caitra* is the month whose full moon is in the asterism Sanskrit calls *citrā* (CDIAL 4915, 4812). CDIAL also

lists *vaiśākha* (12149), *jyaiṣṭha* (5293), *āṣāḍha* (1473), *bhādrapada* (9447), Sanskrit *kārttika* (3070), *mārgaśiras* (10076), *puṣya* (8307), *māgha* (9993) and *phālguna* (9075).

Why it's said this way

This is the **same pan-Indian Sanskritic lunisolar calendar** you already met as Hindi's **Vikram Samvat** — the same twelve month names, tied to the same **six-ṛtu** seasonal cycle. Karnataka's own New Year, **Ugadi**, falls on *Chaitra Śukla Pratipada* — the first day of the bright fortnight of Chaitra — exactly the reasoning behind Hindu New Year celebrations across much of India. Unlike Tamil's or Malayalam's genuinely home-grown solar calendars, Kannada didn't build its own separate system here — it shares this one with Hindi, Telugu, and much of the rest of the subcontinent.

Your turn

- *Say it:* the twelve — "Caitra, Vaiśākha, Jyēṣṭha, Āṣāḍha, Śrāvaṇa, Bhādrapada, Āśvayuja, Kārtīka, Mārgaśira, Puṣya, Māgha, Phālguṇa"
- *Say it:* "Ugadi — Chaitra Śukla Pratipada"
- *Say it:* the honest point — shared with Hindi, unlike Tamil/ Malayalam's own calendars
- *Recall:* say *tale kai*

Before you move on

Does Kannada use its own solar calendar, like Tamil and Malayalam? (**No** — it uses the **same pan-Indian lunisolar calendar** as Hindi's Vikram Samvat.) What is Kannada's New Year called, and when does it fall? (**Ugadi**, on *Chaitra Śukla Pratipada*.)

16.2 ಉತ್ತರ (uttara) — an answer; north

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ಉತ್ತರ

ಉತ್ತರ — *uttara* — "an answer; north".

Say it: *uttara*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ಉ, and writes it on its own.

The word, taken apart — its roots and family

ಉತ್ತರ (*uttara*) is Sanskrit *uttara*, "upper, northern; answer", taken over whole as a learned loan, a tatsama (CDIAL 1767).

Your turn

Say these aloud:

- *uttara*
- *uttara*, and what it means

Before you move on

What is "an answer; north"? (ಉತ್ತರ, *uttara*.)

16.3 ಉ — one character, the standing half of a sign you already read

Before the new one: ಪ — what sound does it carry?

One character this time, and you are already reading half of it.

Script you'll notice: ಉ

ಉ — *u*.

It is an **independent vowel**: the shape a vowel takes when it stands at the start of a word with no consonant in front of it.

You have been reading its other half since the chapter that taught ◌ು, the vowel *sign* — the same sound, drawn as a tail that rides on the consonant before it. Look at the ending of each of these, which you can already say:

- ಹೌದು *haudu* — yes
- ಇರು *iru* — to be, to stay

- ನೀವು *nīvu* — you

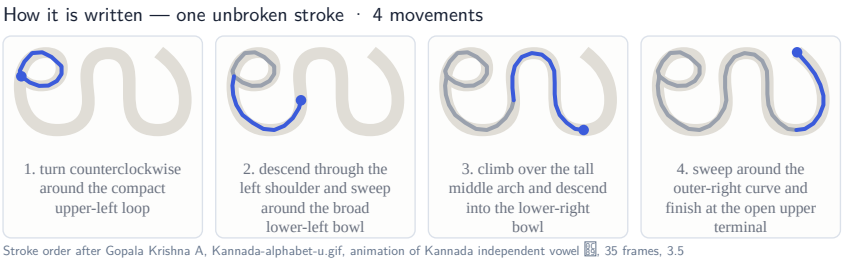

Every one of them ends in that riding tail. Take the consonant away and the same vowel has to stand on its own feet, and ಉ is what it looks like standing.

So one sound, two shapes, and where you find it in the word tells you which one you are looking at:

- ಉ — standing alone, at the beginning.
- ು — attached, riding on the consonant before it.

This is the same arrangement as ಓ and ೊೀ, and as ಇ and ಿ. Kannada does it for every vowel it has.

Writing: ಉ — follow the numbered strip

How ಉ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ಉ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two and say which one carries the riding tail, not the standing letter

ಹೌದು · ಉ

- *Trace it:* ಉ three times, saying *u* as you finish each one
- *Look:* at ಉ and ು side by side, and say which one stands alone

Before you move on

Which character is this — ಉ? What sound does it carry? (***u***.) What is the difference between ಉ and ು? (One stands alone at the start of a word; the other rides on the consonant before it.) Name a word you already say that ends in the riding one.

16.4 ೮ — the digit for eṇṭu

Before the new shape: ೭ — which number is it?

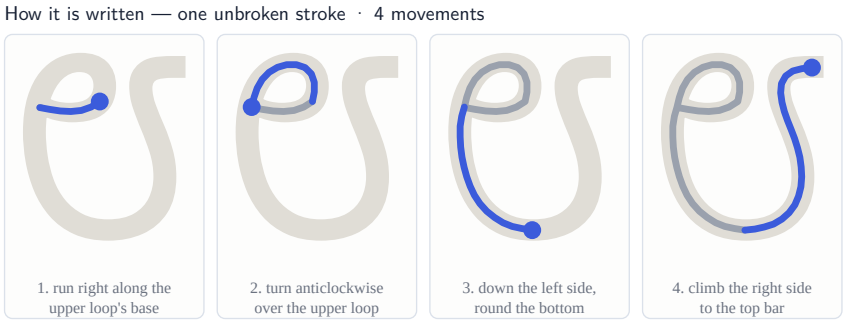

One digit this time, and you already know its name.

Script you'll notice: ೮

೮ — **೮**, the digit for ಎಂಟು (*eṇṭu*), "eight".

Eight. The two numbers whose words wander furthest from Tamil and Telugu have the least surprising digits.

Writing: ೮ — follow the numbered strip

How ೮ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ೮ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the digits you have met, and name each one aloud

  ೧ · ೨ · ೩ · ೪ · ೫ · ೬ · ೭ · ೮

- *Say it:* "eṇṭu" as you point at ೮

Before you move on

Which number is ೮? (೪ — *eṇṭu*, ಎಂಟು.) Name every digit you have met so far, in order.

16.5 Chapter 16 checkpoint — the months, Ugadi, ಉ and ೮

> Nothing new here. The months and the new year out loud first, then one word, one letter and one digit on the page.

Your turn — the months

- *Say it:* the twelve months, from the first

(*Caitra, Vaiśākha, Jyēṣṭha, Āṣāḍha, Śrāvaṇa, Bhādrapada, Āśvayuja, Kārtīka, Mārgaśira, Puṣya, Māgha, Phālguṇa.*)

- Is this calendar Kannada's own, the way Tamil's and Malayalam's are theirs? (No: it is the pan-Indian lunisolar calendar Hindi uses too.)
- When does Ugadi fall? (On *Chaitra Śukla Pratipada*, the first day of the bright fortnight of Chaitra.)

Your turn — one more word from this chapter

- What is "an answer", and also "north"? (*Uttara.*)

Script — ಉ and ೮

- ಉತ್ತರ is *uttara.* Which character opens it, and why does it stand on its own there? (ಉ, *u*: the word starts on a vowel, so the vowel takes its standing shape.)
- Where would the same *u* take its riding shape, ು? (After a consonant, as at the end of ಹೌದು.)
- Which number is ೮, and which word does it stand for? (**8**, *eṇṭu.*)

Read it: ಉತ್ತರ aloud, and point to the ಉ in it
Read it: ೮ aloud as *eṇṭu*

Writing — from sound

Cover: the Script block above, so no model stays in view
Write it: *u* as it stands at the start of a word, then the digit for *eṇṭu*
Check: against the key — ಉ, ೮
Write it: one repaired shape, then stop

Before you move on

Which month opens the year, and which festival opens it? (*Caitra*; Ugadi.) That is the chapter: a calendar shared with Hindi, a word that means both answer and north, and the vowel and the digit that sit inside it.
Next chapter: noon and midnight.

Chapter 17

Noon and Midnight

Modes: 🚗 **voice** (1) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 2 lessons.

> ***By the end of this chapter:*** I can say noon and midnight in Kannada and point out the "middle" word they share.
>
> *Say* ಮಧ್ಯಾಹ್ನ *and* ಮಧ್ಯರಾತ್ರಿ*, then isolate the madhya sitting inside both.*

17.1 ಮಧ್ಯಾಹ್ನ, ಮಧ್ಯರಾತ್ರಿ — one Sanskrit root, two everyday Kannada words

You've just seen Hindi's *dopahar* (an old timekeeping unit) and *aadhi raat* (plain "half night"). Kannada takes a completely different path — straight to Sanskrit, and straight down the middle.

The word, taken apart — its roots and family

ಮಧ್ಯಾಹ್ನ (*madhyāhna*) = "**noon, midday**" — a Sanskrit *tatsama* (borrowed whole, unchanged) compound: ಮಧ್ಯ (*madhya*, "**middle**") + ಅಹ್ನ (*ahna*, "**day**"). This is the everyday, ordinary Kannada word for noon — not a formal or bookish alternative the way it can feel in some of its sister languages.

The word, taken apart — its roots and family

ಮಧ್ಯರಾತ್ರಿ (*madhyarātri*) = "**midnight**" — the exact same ಮಧ್ಯ (*madhya*, "middle") root, this time compounded with ರಾತ್ರಿ (*rātri*,

"**night**"). Same logic, same "middle" word, just paired with "night" instead of "day."

Why it's said this way

Both words are unmistakably **Sanskrit tatsama** compounds — Kannada borrowed them whole rather than building native Dravidian equivalents. That's worth contrasting directly with Hindi, a language actually *descended* from Sanskrit: Hindi has these exact same words too (*madhyāhna*, *madhyarātri*), but treats them as the more **formal, literary** register — its everyday words are the homegrown *dopahar* ("two pahars") and *aadhi raat* ("half night") instead. Kannada, by contrast, took the Sanskrit-formal compound and made it the **plain, everyday** word — there's no separate native-Dravidian doublet in common use here the way there is for some other concepts.

Your turn

- *Say it:* "madhyāhna" — noon, "middle of the day"
- *Say it:* "madhyarātri" — midnight, "middle of the night"
- *Say it:* the shared piece — "madhya," middle, in both words
- *Recall:* say *vasanta ṛtu bēsige maḷegāla caḷigāla*

Before you move on

What Sanskrit root do ಮಧ್ಯಾಹ್ನ and ಮಧ್ಯರಾತ್ರಿ share, and what does it mean? (ಮಧ್ಯ, *madhya*, "middle.") Are these native Dravidian words or Sanskrit borrowings? (**Sanskrit tatsama** borrowings, taken whole.) Does Hindi treat its version of these words as everyday or formal? (**Formal/literary** — Hindi's everyday words are *dopahar* and *aadhi raat* instead.)

17.2 ೯ — the digit for ombattu

Before the new shape: ೮ — which number is it?

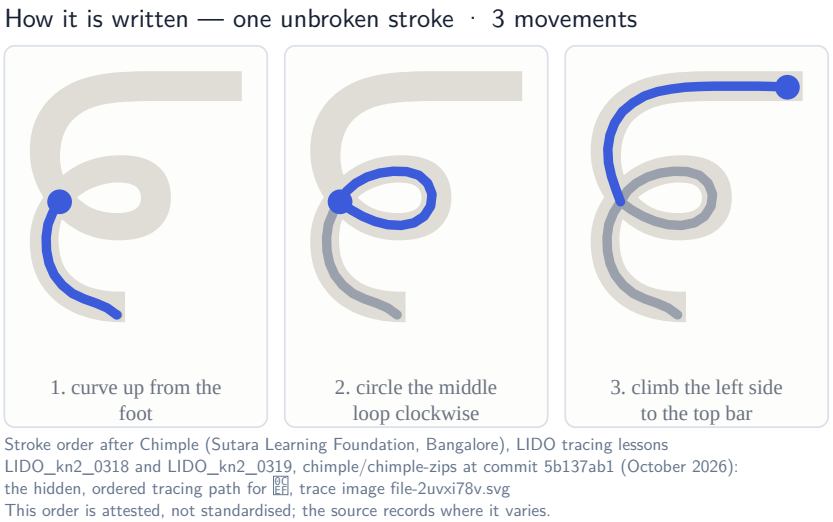

One digit this time, and you already know its name.

Script you'll notice: ೯

೯ — **9**, the digit for ಒಂಬತ್ತು (*ombattu*), "nine".

Nine — the last of the shapes that stand alone. One more to go, and it is the one that makes every larger number possible.

Writing: ೯ — follow the numbered strip

How ೯ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ೯ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at the digits you have met, and name each one aloud

  ೧ · ೨ · ೩ · ೪ · ೫ · ೬ · ೭ · ೮ · ೯

- *Say it:* "ombattu" as you point at ೯

Before you move on

Which number is ೯? (**9** — *ombattu*, ಒಂಬತ್ತು.) Name every digit you have met so far, in order.

Telling Time

Modes: 🚗 **voice** (2) ✓ **pen** (2) 🚗 **Hands-free start:** the first 2 of 4 lessons.

> ***By the end of this chapter:*** I can tell someone the time on the hour in Kannada.
>
> *Say* ಗಂಟೆ *— hour, and also "bell" — then* ಒಂದು ಗಂಟೆ *and* ಎರಡು ಗಂಟೆ *for one and two o'clock.*

18.1 ಗಂಟೆ — the same "bell" word as Hindi, borrowed through Prakrit

> You've already met Hindi's *ghaṇṭā* — "hour," literally "bell." Kannada has the exact same word, arriving by the exact same logic.

The word, taken apart — its roots and family

ಗಂಟೆ (*gaṇṭe*) = "**hour**" — and, just like Hindi, it means "**bell, gong**" just as commonly. It's related to the same Sanskrit ಘಣ್ಟಾ (*ghaṇṭā*, "bell"). The semantic shift is identical to Hindi's: temples, towns, and clock towers announced the hour by striking a bell, so the bell-word became the hour-word.

Why it's said this way

This is a genuinely different picture from Tamil's. Kannada's *gaṇṭe*, like Hindi's *ghaṇṭā*, is a **Sanskrit-derived** "bell → hour" word. Tamil, by contrast, most likely uses a **native Dravidian** word for

exactly the same "bell → hour" idea — a different root entirely, arrived at independently (though even specialists don't call this fully settled). So the *pattern* (bell-word becomes hour-word) repeats across languages, but the *word itself* splits along the familiar Sanskrit/native line (compare *madhyāhna* vs. Tamil's *naḷ*-based words for noon).

Grammar Lens: telling the time

ಒಂದು ಗಂಟೆ. — "One o'clock." (*ondu gaṇṭe*, "one hour/bell")

ಎರಡು ಗಂಟೆ. — "Two o'clock." (*eraḍu gaṇṭe*)

Kannada simply pairs the cardinal number with *gaṇṭe* — no ordinal/cardinal split like Arabic's, no singular/plural verb switch like Hindi's *bajnā*.

Your turn

- *Say it:* "gaṇṭe" — hour, also "bell"
- *Say it:* "ondu gaṇṭe" — one o'clock
- *Say it:* "eraḍu gaṇṭe" — two o'clock
- *Recall:* say *nīru akki anna*

Before you move on

What does **ಗಂಟೆ** mean besides "hour," and what Sanskrit word is it related to? (**"Bell, gong"** — related to Sanskrit *ghaṇṭā*.) Is this the same root Hindi uses for "hour"? (**Yes** — Hindi's *ghanṭā* is the same Sanskrit word.) Does Tamil use this same Sanskrit root for "hour"? (**Most likely not** — it uses a native Dravidian word instead, arrived at independently.)

18.2 ಊರುಗೋಲು (ūrugōlu) — a walking stick

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ಊರುಗೋಲು

ಊರುಗೋಲು — *ūrugōlu* — "a walking stick".

Say it: *ūrugōlu*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ಊ, and writes it on its own.

The word, taken apart — its roots and family

ಊರುಗೋಲು (*ūrugōlu*) is native Dravidian. DEDR 763 lists it whole as Kannada *ūṟu-gōlu*, "walking-stick": *ūṟu*, "to set firmly, lean on", the same root as Tamil *ūṉṟu*; then *kōlu*, "stick" (DEDR 2237, with Tamil *kōl*).

Your turn

Say these aloud:

- *ūrugōlu*
- *ūrugōlu*, and what it means

Before you move on

What is "a walking stick"? (ಊರುಗೋಲು, *ūrugōlu*.)

18.3 ಊ — one character, the long partner of one you already have

Before the new one: ಉ — what sound does it carry, and does it stand alone or ride on a consonant?

One character this time. It is the same vowel held longer.

Script you'll notice: ಊ

ಊ — *ū*, the long *u*.

Kannada keeps **short and long as two different letters**, not as one letter with a mark on it. So the vowel you met two chapters ago has a partner:

- ಉ — *u*, short. Say it and stop.

- ಊ — *ū*, long. Say it and hold it about twice as long.

Look at the shapes: ಊ is ಉ with an extra stroke. Kannada builds the long vowel out of the short one and repeats that habit across its vowels.

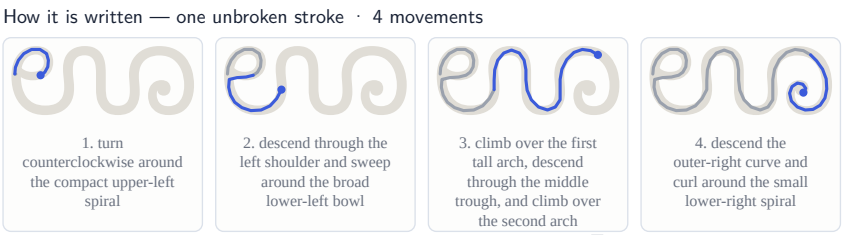

The length is not decoration. It separates words, the way *ship* and *sheep* are separated by nothing else.

ಊ has a riding half too. You have already read it:

- ಮೂರು *mūru* — three

That ೂ in the middle is this same long vowel, drawn as a tail on ಮ. Take the consonant away and it has to stand up, and standing up it is ಊ.

Writing: ಊ — follow the numbered strip

How ಊ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ಊ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two and say which is the long one

  ಉ · ಊ

- *Trace it:* ಊ three times, holding the *ū* long as you finish each one
- *Look:* at ಮೂರು and find the riding half of today's letter inside it
- *Say it:* the short one, then the long one — "u … ū"

Before you move on

Which character is this — ಊ? What sound does it carry? (*ū*, the long *u*.) How is its shape related to ಉ? (It is ಉ with an added stroke.) What is its riding half, and in which word have you already read it? (ೂ, in *mūru*.)

18.4 ೦ — the digit for hattu

Before the new shape: ೯ — which number is it?

One digit this time, and you already know its name.

Script you'll notice: ೦

೦ — **0**, the digit for ಹತ್ತು (*hattu*), "zero".

Zero. On its own it is nothing; behind another digit it multiplies by ten, which is how ಹತ್ತು is written ೧೦ — a ೧ and a ೦, exactly as *10* is.

Writing: ೦ — copy what you see

Put your pen on ೦ and follow its line. Copy the shape in front of you — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what you can see needs no such source.

Your turn

- *Look:* at the digits you have met, and name each one aloud

  ೧ · ೨ · ೩ · ೪ · ೫ · ೬ · ೭ · ೮ · ೯ · ೦

- *Say it:* "hattu" as you point at ೦

Before you move on

Which number is 0? (**0** — *hattu*, ಹತ್ತು.) Name every digit you have met so far, in order.

Chapter 19

Asking Someone's Age

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can ask someone how old they are in Kannada and give my own age in return.
>
> *Ask* **ನಿನ್ನ ವಯಸ್ಸು ಎಷ್ಟು?** *and answer* **ನನ್ನ ವಯಸ್ಸು ಇಪ್ಪತ್ತು** *— a complete verbless exchange about age.*

19.1 ನಿನ್ನ ವಯಸ್ಸು ಎಷ್ಟು? — "your age, how much?"

Here's a genuinely nice callback: the Sanskrit word behind Kannada's "age" is a distant cousin of a Latin word you already know.

The word, taken apart — its roots and family

ವಯಸ್ಸು (*vayassu*, "**age**") comes from Sanskrit **वयस्** (*vayas*, "age, youth, vigor, strength"), which traces back to **Proto-Indo-European** ***wéyh₁os***. *That PIE root is the* ***same*** *one behind Latin* ***vīs****, "force, strength, vigor" — so Sanskrit's word for "age" and Latin's word for "force" are genuine, distant cousins, both carrying the older sense of "vigor, life-force" before splitting toward different specific meanings.*

Grammar Lens: a simple possessive, no verb

ನಿನ್ನ ವಯಸ್ಸು ಎಷ್ಟು? — "How old are you?" — literally "**your age — how much?**" (*ninna vayassu eṣṭu?*)

ನನ್ನ ವಯಸ್ಸು ಹತ್ತು. — "I am ten years old." — literally "**my**

age [is] ten." (*nanna vayassu hattu.*)

Just like Arabic's *ᶜumr*, this is a **verbless** construction in the present tense — Kannada simply states "your age" and "how much," with no "is" needed. But notice the shape is simpler than Arabic's: no possessive suffix fused onto the noun, just the ordinary possessive word **ನಿನ್ನ** (*ninna*, "your") sitting in front of **ವಯಸ್ಸು**.

Your turn

Say these aloud:

- "vayassu" — age
- "ninna vayassu eṣṭu?" — how old are you?
- "nanna vayassu hattu" — I am ten, "my age [is] ten"

Before you move on

What Sanskrit word is **ವಯಸ್ಸು** from, and what Latin word is its PIE cousin? (**वयस्**, *vayas*, "age/vigor" — cousin of Latin **vīs**, "force," both from PIE *wéyh₁os.) Does Kannada use a verb to state age? (**No** — "your age how-much," no verb needed.) How do you say "I am ten"? (*Nanna vayassu hattu — "my age [is] ten.")

Chapter 20

Numbers 11–20 and Weather

Modes: **voice** (4) **pen** (1) **Hands-free start:** the first 4 of 5 lessons.

> ***By the end of this chapter:*** I can say what the weather is doing in Kannada and count past ten up to twenty.
>
> *Count 11 and 12 as ten-plus-a-digit and say what is buried in* **ಇಪ್ಪತ್ತು**, *then say* **ಹವಾಮಾನ** *— the Persian hava plus Sanskrit māna — and report the weather with* **ಮಳೆ ಬರುತ್ತಿದೆ**, *"rain is coming."*

20.1 ಹನ್ನೊಂದು to ಇಪ್ಪತ್ತು — numbers 11–20

You've now seen four different language families each build "twenty" as its own special, opaque word — Sanskrit's *vimshati*, Latin's *viginti*, Arabic's *ʿishrūn*. Kannada's twenty genuinely started life as "two tens" too — but be careful: the modern surface no longer shows it plainly.

The word, taken apart — its roots and family

Kannada's teens are built on **ಹತ್ತು** (*hattu*, "**ten**") plus each digit — **ಹನ್ನೊಂದು** (*hannondu*, 11), **ಹನ್ನೆರಡು** (*hanneraḍu*, 12), and onward through **ಹತ್ತೊಂಬತ್ತು** (*hattombattu*, 19). Each teen is a compound built the same way English builds "four-**teen**" — just placed the same digit-plus-ten pattern in front instead of behind.

The word, taken apart — its roots and family

ಇಪ್ಪತ್ತು (*ippattu*, "**twenty**") traces back to Proto-Dravidian ***ir-** ("**two**") + ***paHtu** ("**ten**") — a genuine compositional origin, "two-tens." But be honest about what's actually visible today: the ***ir-** piece is an old *bound* root, not the same as modern Kannada's everyday word for "two," ಎರಡು (*eraḍu*) — a separate, longer descendant of the same ancient family. And the "ten" piece surfaces here as **-pp-** (geminated after the *r*), not as modern ಹತ್ತು (*hattu*)'s **h-** — because Kannada's historical $p \rightarrow h$ shift only fired at the **start** of a word, and this "ten" sits in the **middle** of the compound, so it never lenited. So *ippattu* really did start as "two-tens" — you just can't spot modern *eraḍu* or modern *hattu* inside it anymore the way you might expect. Compare this to Sanskrit's विंशति (*vimshati*), Latin's **vīgintī**, and Arabic's عشرون (*ʿishrūn*): those have **no** compositional "two-ten" origin at all, not even a buried one — a genuinely different kind of history from Kannada's.

Your turn

Say these aloud:

- "hannondu, hanneraḍu" — 11, 12
- "hattu" — ten (today's word), "eraḍu" — two (today's word)
- "ippattu" — twenty, "two-tens" underneath, from the OLD *ir-*/ paHtu roots, not directly from hattu/eraḍu

Before you move on

How are Kannada's teens built? (ಹತ್ತು (ten) + a digit, compounded.) Does ಇಪ್ಪತ್ತು (twenty) have a compositional "two-tens" origin? (**Yes** — Proto-Dravidian **ir-* "two" + **paHtu* "ten.") Can you still spot modern *eraḍu* or modern *hattu* inside it today? (**No** — the old bound "two" root and the un-lenited middle-of-word "ten" root look different from their modern standalone descendants.) Do Sanskrit's *vimshati* or Latin's *vīgintī* have any compositional origin like this at all? (**No** — neither has a buried "two-ten" history the way Kannada's does.)

20.2 ನನಗೆ — one ending, and the sentences that have no subject

Say that you know Kannada. Then say that you speak it. Only one of the two sentences has a subject — say which.

Why it's said this way

ನನಗೆ ಕನ್ನಡ ಗೊತ್ತು is *to-me Kannada known*. There is no *I* in it and no verb *to know*: knowing is something that **is the case for you**, not something you do.

That one idea runs much further than it looks, and age is where it surfaces again. Kannada asks *your age how-much?* rather than *how old are you* — the years are a quantity attached to a person, not a property the person performs. The same suffix, the same shape of thought:

what you mean	how Kannada builds it
I know Kannada	**to-me** Kannada known
how old are you	**your** age how-much

English needs a different verb for each — *know*, *be* — and Kannada needs neither.

Grammar Lens: one suffix per job

Where Latin fuses number and case into one ending you cannot take apart, Kannada adds **one visible suffix per job**, and they stack in order. A reader who can find the seams can read a long word they have never met.

Say these aloud:

- that you speak Kannada, with its subject — *nānu kannaḍa mātanāḍuttēne*
- that you know it, without one — *nanage kannaḍa gottu*
- that it is no trouble — *paravāgilla*

Before you move on

Which of the two sentences about Kannada has no subject? (**The one about knowing.**) How many jobs does a single Kannada suffix do? (**One** — they stack rather than fuse.)

20.3 ಹವಾಮಾನ — a genuine two-language hybrid word

Kannada's word for "weather" isn't purely Sanskrit or purely native — it's a compound with a piece from each of two different borrowed sources.

The word, taken apart — its roots and family

ಹವಾಮಾನ (*havāmāna*) = "**weather**" — built from two pieces:

- ಹವಾ (*hava*, "**air**") — itself a loanword, from **Persian** هوا (*havā*), which traces back to **Arabic** هَوَاء (*hawāʾ*, "air"). This is the exact same root behind Hindi's own हवा (*havā*, "air, wind").
- ಮಾನ (*māna*, "**measure**") — from **Sanskrit** मान (*māna*), "measure, standard" (the same word behind *pramāṇa*, "proof, measure of truth").

So *havāmāna* literally means "**air-measure**" — and it's genuinely a two-source hybrid, not a single borrowed compound: one piece Perso-Arabic, one piece Sanskrit, fused into one Kannada word.

You'll want to know: ಮಳೆ ಬರುತ್ತಿದೆ — "rain is coming"

ಮಳೆ ಬರುತ್ತಿದೆ. — "It's raining." — literally "**rain is coming**." (*maḷe baruttide.*)

Your turn

Say these aloud:

- "havāmāna" — weather, literally "air-measure"
- "hava" — air, a Persian/Arabic loan

- "maḷe baruttide" — it's raining, "rain is coming"

Your turn — eleven to twenty

- Say 11, then 12. (***hannondu***, ***hanneraḍu*** — ಹತ್ತು, ten, plus a digit.)
- Say twenty. What is buried in it? (***ippattu*** — Proto-Dravidian **ir-* "two" + **paHtu* "ten"; modern *eraḍu* and *hattu* no longer show inside.)

Before you move on

What are the two pieces of ಹವಾಮಾನ, and where does each come from? (ಹವಾ, "air," a **Persian/Arabic** loan; ಮಾನ, "measure," native **Sanskrit**.) What does *havāmāna* literally mean? ("**Air-measure**.") What other Indian language shares the exact same word for "air"? (**Hindi** — *havā*.)

20.4 ಝರಿ (jhari) — a stream

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ಝರಿ

ಝರಿ — *jhari* — "a stream".

Say it: *jhari*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ಝ, and writes it on its own.

The word, taken apart — its roots and family

ಝರಿ (*jhari*) is Sanskrit *jharī*, "river" (the masculine *jhara* is "waterfall"), taken over whole as a learned loan, a tatsama, with the final *-ī* shortened (CDIAL 5343). In Kannada it names any stream that runs down a slope.

Your turn

Say these aloud:

- *jhari*

- *jhari*, and what it means

Before you move on

What is "a stream"? (ಝರಿ, *jhari*.)

20.5 ಝ — one character, and the pattern it completes

Before the new one: ಊ — short or long?

One character this time, and it is the rarest one in this book. That is the reason to meet it now rather than inside a word.

Script you'll notice: ಝ

ಝ — *jha*.

It is ಜ (*ja*) with a puff of breath behind it. Hold your palm at your mouth: on *ja* the air stays put, on *jha* it hits your hand.

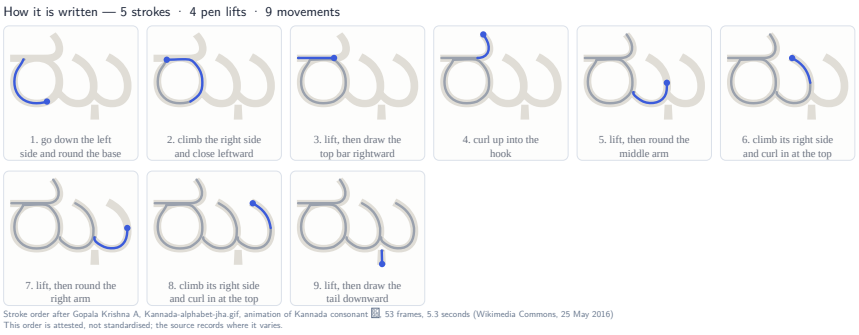

You have met that pairing six times already, in letters you can read:

- ಕ *ka* · ಖ *kha*
- ಗ *ga* · ಘ *gha*
- ಡ *ḍa* · ಢ *ḍha*
- ದ *da* · ಧ *dha*
- ಪ *pa* · ಫ *pha*
- ಬ *ba* · ಭ *bha*

Two of those sit inside words you say daily — the ಧ of ಧನ್ಯವಾದ *dhanyavāda*, the ಭ of ಶುಭ *śubha*. ಝ takes the same step from ಜ, and its shape keeps the plain letter visible inside it.

Why it is rare. A native Kannada word will almost never hand you this letter. It writes words Kannada took in from elsewhere — and one of those is coming shortly, which is why you meet it here first.

Writing: ದು

How ದು *is written, stroke by stroke*

- **1.** start at the upper left and go down the left side and round the base
- **2.** without lifting, climb the right side and close the bowl leftward along the top
- **3.** lift, then draw the top bar from left to right
- **4.** without lifting, curl up into the hook
- **5.** lift, then round the middle arm from its foot
- **6.** without lifting, climb its right side and curl in
- **7.** lift, then round the right arm from its foot
- **8.** without lifting, climb its right side and curl in
- **9.** lift, then draw the tail downward

Pen lifts: **4**, one before each part that follows the bowl.

This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-jha.gif', 53 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Your turn

- *Look:* at these two and say which one carries the breath

  ಜ · ಝ

- *Trace it:* ಝ three times, pushing the breath out as you finish each one
- *Look:* at ಧನ್ಯವಾದ and find the breathed letter at the front of it
- *Say it:* "ka kha, ga gha, da dha, ba bha" — then the new one, "ja jha"

Before you move on

Which character is this — ಝ? Which plain letter is it built on? (ಜ, *ja*.) What does the extra stroke stand for? (**A puff of breath.**) Name one breathed letter you already read inside a word you say.

Chapter 21

Dog and Cat

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can name a dog and a cat in Kannada.
>
> *Say* **ನಾಯಿ**, *an unambiguously native Dravidian root, and* **ಬೆಕ್ಕು**, *a different ancient root from Tamil's everyday cat word.*

21.1 ನಾಯಿ, ಬೆಕ್ಕು — solid ground, and a genuine split

After a whole arc of mystery dog-words — Spanish's *perro*, English's *dog*, Hindi's *kuttā* — here's the opposite: a dog-word with absolutely no mystery attached.

The word, taken apart — its roots and family

ನಾಯಿ (*nāyi*, "**dog**") is a genuine, native **Proto-Dravidian** root — no debate, no substrate mystery, nothing like the *perro/dog/kuttā* pattern you've now seen across three unrelated language families. It's the same root shared right across the Dravidian family.

The word, taken apart — its roots and family

ಬೆಕ್ಕು (*bekku*, "**cat**") is where things get honestly more complicated. It's cognate with a **different** ancient Dravidian root — the same one behind Tamil and Malayalam's word for "**wildcat**" or "**civet cat**" — not the same root as Tamil's **everyday** word for cat. So unlike "dog,"

where Dravidian largely agrees on one shared root, "cat" genuinely **splits**: different Dravidian languages settled on different ancient roots for their everyday word.

Your turn

- *Say it:* "nāyi" — dog, solid native Dravidian, no mystery
- *Say it:* "bekku" — cat, a different Dravidian root than Tamil's everyday word
- *Recall:* say *caitra vaiśākha jyēṣṭha āṣāḍha śrāvaṇa bhādrapada āśvayuja kārtīka mārgaśira puṣya māgha phālguṇa*
- *Read it:* ಮಧ್ಯಾಹ್ನ ಮಧ್ಯರಾತ್ರಿ

Before you move on

Is ನಾಯಿ a mystery word, like Spanish's *perro* or Hindi's *kuttā*? (**No** — a solid, native Proto-Dravidian root.) Does ಬೆಕ್ಕು come from the same root as Tamil's everyday cat-word? (**No** — a genuinely different ancient Dravidian root, related instead to the word for "wildcat.")

Chapter 22

Green and Yellow

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can name green and yellow in Kannada, on top of the four colours I already had.
>
> *Say* **ಹಸಿರು**, *a true cousin of Tamil paccai and Telugu pacca, then* **ಹಳದಿ**, *the turmeric-borrowing that is secretly a cousin of German gelb.*

22.1 ಹಸಿರು, ಹಳದಿ — a real Dravidian family, and a borrowed cousin of gelb

Kannada's green word belongs to a real Dravidian family you'll meet again soon. Its yellow word isn't native at all — and it turns out to be hiding the very same ancient root this whole arc keeps circling back to.

The word, taken apart — its roots and family

ಹಸಿರು (**hasiru**, "**green**") comes from **Old Kannada ಪಸಿರ್** (**pasir**), from **Proto-Dravidian **pac-***, "**green**" — the **exact same root** behind **Tamil**'s **பச்சை** (*paccai*) and **Telugu**'s **పచ్చ** (*pacca*). Kannada even keeps a doublet of its own, **ಪಚ್ಚೆ** (*pacce*), sitting right alongside *hasiru*. So unlike Kannada's **blue** (**ನೀಲಿ**, borrowed from Sanskrit), green here is the real, deep, native Dravidian word — and this particular root resurfaces in Telugu's, Malayalam's, and Tamil's own green words too.

The word, taken apart — its roots and family

ಹಳದಿ (**haḷadi**, "**yellow**") is **not** Kannada's native turmeric word — that's ಅರಿಶಿನ (*ariśina*). Instead, *haḷadi* appears to be shaped by Sanskrit/Hindi हरिद्रा/हल्दी (**haridrā**/*haldi*, "**turmeric**"), the same word that gives "turmeric" across a huge swath of Indo-Aryan languages (Hindi/Urdu/Punjabi *haldi*, Bengali *holud*, Odia *haladi*) — and in some of these, like Bengali and Odia, that turmeric-word doubles as the everyday word for the color **yellow** itself, exactly as *haḷadi* does in Kannada (Hindi keeps the two separate: *haldi* stays "turmeric," while "yellow" is the unrelated word *pīlā*). Here's the part that closes a loop running through this whole arc: **haridrā** itself traces back to हरि (**hari**, "**yellow, tawny**"), from **Proto-Indo- European **ǵʰelh₃-*** — the **same ancient root** already behind Hindi's own हरा (*harā*, "green") and German's **gelb** ("yellow"). So Kannada picked up its yellow word from a completely different language family, Indo-Aryan rather than Dravidian — and that borrowed word still lands on the exact same PIE root this arc has been tracing all along.

Your turn

Say these aloud:

- "ಹಸಿರು" — green, a real Dravidian cousin of Tamil paccai and Telugu pacca
- "ಹಳದಿ" — yellow, borrowed, and secretly a cousin of gelb
- the contrast — hasiru is native Dravidian; haladi is a Sanskrit/ Hindi loan built on the turmeric word

Before you move on

What Proto-Dravidian root gives ಹಸಿರು (*hasiru*), and which two other Dravidian languages share it? (****pac-***, "green" — shared with **Tamil**'s *paccai* and **Telugu**'s *pacca*.) Is ಹಳದಿ (*haḷadi*) Kannada's native word for turmeric? (**No** — that's *ariśina*; *haḷadi* is a Sanskrit/Hindi loan.) What ancient PIE root connects **haḷadi**, through Sanskrit **hari**, to Hindi's **harā** and German's **gelb**? (****ǵʰelh₃-***, "to shine.")

Chapter 23

Day

Modes: **voice** (2) **pen** (1) **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can say "day" in Kannada and tell it apart from the native word for daytime.
>
> *Say* ದಿನ*, kept whole as a Sanskrit tatsama where Hindi's din eroded, and set it against native* ಹಗಲು*, which means daytime rather than a day.*

23.1 ದಿನ (dina) — "day," Sanskrit kept whole

You've already met Sanskrit's "middle" compounds for noon and midnight. Here's the plain word for "day" itself — and a genuinely interesting twist on how borrowing works.

The word, taken apart — its roots and family

ದಿನ (**dina**) — "**day**" — is a Sanskrit **tatsama** word: borrowed **whole**, unchanged, the same way *madhyāhna*/*madhyarātri* were (Chapter 17). It's Kannada's ordinary, everyday word for "a day."

The word, taken apart — its roots and family

Here's the honest twist: Kannada's *dina* and Hindi's दिन (*din*) trace to the **exact same** Sanskrit word, दिन (*dina*) — but they got there by **different routes**. Hindi's *din* is a **tadbhava** form: Sanskrit *dina* wore down naturally over centuries, through Prakrit, losing its final vowel along the way. Kannada's *dina*, by contrast, is a direct **tatsama**

borrowing — taken straight from Sanskrit, unworn, keeping the full shape. So Kannada's *dina* and Hindi's *din* look almost identical, but one is an unbroken **inheritance** (eroded), the other a **later borrowing** (kept whole) — genuinely different histories landing on nearly the same modern word.

The word, taken apart — its roots and family

Kannada does have a genuine **native Dravidian** word here too: ಹಗಲು (*hagalu*) — but be careful, it means specifically "**daytime**" (the daylight hours, as opposed to night), not "**a day**" as a calendar unit. It's not a synonym for *dina*; it's a different sense of "day" entirely.

Your turn

- *Say it:* "dina" — "day," Sanskrit tatsama, kept whole
- *Say it:* the twist — dina and Hindi's din, same Sanskrit source, but borrowing vs. natural erosion
- *Say it:* hagalu — native Dravidian, "daytime," a different sense than dina
- *Recall:* say *gaṇṭe*

Before you move on

Is Kannada's ದಿನ a tatsama borrowing or a tadbhava inheritance? (**Tatsama** — borrowed whole from Sanskrit.) How does this differ from Hindi's दिन (*din*), even though both trace to the same Sanskrit word? (**Din is tadbhava** — naturally eroded through Prakrit — while Kannada's *dina* was borrowed later, unworn.) What does ಹಗಲು (*hagalu*) mean, and is it a synonym for *dina*? (**"Daytime"** — a different sense, not "a day" as a calendar unit.)

23.2 ಕಥೆ (kathe) — a story

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ಕಥೆ

ಕಥೆ — *kathe* — "a story".

Say it: *kathe*. *Look:* at its shape as you say it. The next lesson takes one piece of it, **ಥ**, and writes it on its own.

The word, taken apart — its roots and family

ಕಥೆ (*kathe*) is Sanskrit *kathā*, "conversation; story", taken over whole as a learned loan, a tatsama, with Kannada's *-e* for the Sanskrit *-ā* (CDIAL 2704).

Your turn

Say these aloud:

- *kathe*
- *kathe*, and what it means

Before you move on

What is "a story"? (**ಕಥೆ**, *kathe*.)

23.3 ಥ — one character, and the gap it fills

Before the new one: **ದು** — which plain letter is it built on, and what does the extra stroke stand for?

One character this time, and it closes the set you started three chapters ago.

Script you'll notice: ಥ

ಥ — *tha*.

Same step as last time, on a letter you have read since the beginning: **ತ** (*ta*) with breath behind it. **ತ** in **ಹತ್ತು** *hattu* leaves the air still; **ಥ** pushes it into your palm. That completes the run:

- **ಕ** *ka* · **ಖ** *kha*
- **ಗ** *ga* · **ಘ** *gha*

- ಜ *ja* · ಝ *jha*
- ಡ *ḍa* · ಢ *ḍha*
- ದ *da* · ಧ *dha*
- ಪ *pa* · ಫ *pha*
- ಬ *ba* · ಭ *bha*
- ತ *ta* · ಥ *tha*

Eight pairs, one step between each, drawn the same way every time. The eighth cost you almost nothing, because you learned the pattern at the first.

A warning worth having. Do not read ಥ as the English *th* of *think*. There is no such sound here. It is a ತ with breath after it, nothing more.

Writing: ಥ

How ಥ is written, stroke by stroke

- **1.** start at the upper left and go down the left side into the left lobe, rising into the middle point
- **2.** without lifting, drop from the point around the right lobe and climb the right side

- **3.** without lifting, close the bowl leftward along the top
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook
- **6.** lift, then draw the tail downward
- **7.** lift, then set the dot in the middle

Pen lifts: 3. The body is drawn as in ದ; the bar, the tail and the dot each start fresh.

> Filed as 'thha': that series spells ತ as 'tha'.

Your turn

- *Look:* at these two and say which one carries the breath

  ತ · ಥ

- *Trace it:* ಥ three times, pushing the breath out as you finish each one
- *Look:* at ಹತ್ತು and ಸಂತೋಷ and find the plain letter in both
- *Say it:* "ta … tha" with your palm at your mouth, and feel the difference

Before you move on

Which character is this — ಥ? Which plain letter is it built on? (ತ, *ta*.) Is it the *th* of English *think*? (**No** — a *ta* with breath after it.) How many plain-and-breathed pairs can you now read? (**Eight**.)

Chapter 24

Night

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can say "night" in Kannada and recognise it inside the midnight word I already knew.
>
> *Say* ರಾತ್ರಿ*, find it again inside* ಮಧ್ಯರಾತ್ರಿ*, and note that native* ಇರುಳು *lost its job where* ಹಗಲು *kept a different one.*

24.1 ರಾತ್ರಿ (rātri) — "night," and its native cousin, pushed aside

Last lesson's *dina* had a living native partner, *hagalu*. This word's native partner tells a different, more honest story — one of being pushed out, not living alongside.

The word, taken apart — its roots and family

ರಾತ್ರಿ (**rātri**) — "**night**" — is the same Sanskrit **tatsama** word already hiding inside ಮಧ್ಯರಾತ್ರಿ (*madhyarātri*, "midnight," Chapter 17), now standing on its own as Kannada's ordinary, everyday word for "night."

The word, taken apart — its roots and family

Kannada **does** have a genuine **native Dravidian** word for night: ಇರುಳು (**iruḷu**), from **Proto-Dravidian** ****cirVḷ*** — a real pan-Dravidian cognate, matching **Tamil**'s இருள் (*iruḷ*), **Malayalam**'s ഇരുൾ (*iruḷ*), and **Telugu**'s ఇరులు (*irulu*). But here's the honest difference from last lesson's *hagalu*: while *hagalu* is still a

living, everyday word (just for a different sense, "daytime"), *iruḷu* has been genuinely **pushed aside** by the Sanskrit loan — it now survives mainly in **older poetry**, carrying extra metaphorical weight ("darkness," even "ignorance"), rather than in everyday speech. *Rātri* simply **won** the job of "night" in modern Kannada.

Your turn

Say these aloud:

- "rātri" — "night," already met inside madhyarātri
- "iruḷu" — the real native word, now mostly archaic/poetic
- the honest contrast — hagalu still lives (different sense); iruḷu was pushed aside (same sense, lost the job)

Before you move on

Where have you already met ರಾತ್ರಿ before this lesson? (ಮಧ್ಯರಾತ್ರಿ, *madhyarātri*, "midnight.") What genuine native Dravidian word for "night" does Kannada have, and what's its status today? (ಇರುಳು, *iruḷu* — largely **archaic**, surviving mainly in older poetry.) How is *iruḷu*'s story different from *hagalu*'s, from last lesson? (**Hagalu still lives**, for a different sense ["daytime"]; **iruḷu was pushed aside** entirely by the Sanskrit loan, for the same sense ["night"].)

Chapter 25

Good Night

Modes: **voice** (1) **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can wish someone good night in Kannada.
>
> *Say* **ಶುಭ ರಾತ್ರಿ** *— "auspicious night" — pairing the* **ರಾತ್ರಿ** *already learned with śubha, from a root meaning "to be beautiful."*

25.1 ಶುಭ ರಾತ್ರಿ (śubha rātri) — "good night," auspicious to the end

You already have *rātri*. Pair it with one more Sanskrit word, and you have Kannada's everyday "good night" — the same phrase, word for word, as Hindi's.

The word, taken apart — its roots and family

ಶುಭ ರಾತ್ರಿ (**śubha rātri**) — "**good night**" — literally "**auspicious night**." Both pieces are Sanskrit **tatsama**: **ರಾತ್ರಿ** (*rātri*, "night," already met last lesson) plus **ಶುಭ** (*śubha*, "**auspicious, good**").

The word, taken apart — its roots and family

ಶುಭ (**śubha**) comes from the Sanskrit verbal root **śubh**, whose core sense is "**to be beautiful, splendid**" — traceable to a well-sourced **Proto-Indo-European** root, ****ḱewbʰ-*** ("to be beautiful"). A further, more speculative connection to a root meaning "to shine" has also been proposed — but either way, the underlying idea is a familiar one:

auspiciousness imagined as a kind of radiance or beauty.

The word, taken apart — its roots and family

Here's the honest cross-language note: ಶುಭ ರಾತ್ರಿ and Hindi's own शुभ रात्रि are, word for word, the **exact same phrase** — a Dravidian language and an Indo-Aryan language landing on an identical "good night." The most likely explanation is **shared Sanskrit vocabulary**, not one language directly copying the phrase from the other — but be honest about the limits of that claim: "good night" as a farewell greeting is itself a **modern** convention across Indian languages, not an ancient one, so some degree of cross-language reinforcement (Hindi's wide reach as a pan-Indian media language, for instance) can't be ruled out either. Unlike Hindi, where *rātri* is the formal member of a live doublet against everyday *raat*, Kannada's *rātri* is simply the ordinary word (Chapter 24) — so this phrase draws on shared **Sanskrit vocabulary**, not a shared "formal-versus-everyday" register split the way it does in Hindi.

Your turn

Say these aloud:

- "śubha rātri" — "good night," literally "auspicious night"
- śubha's own root — śubh, "to be beautiful" → "auspicious"
- the honest cross-language note — identical to Hindi's shubh rātri, most likely via shared Sanskrit vocabulary, though direct reinforcement can't be fully ruled out

Before you move on

What does ಶುಭ ರಾತ್ರಿ literally mean? ("**Auspicious night**.") What does ಶುಭ literally trace back to? (A root meaning "**to be beautiful, splendid**.") Is Kannada's *śubha rātri* definitely borrowed directly from Hindi? (**Most likely not** — shared Sanskrit vocabulary is the more parsimonious explanation, though since "good night" as a farewell is itself a modern convention, some cross-language reinforcement can't be fully ruled out.)

Chapter 26

Morning

Modes: **voice** (2) **pen** (1) **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can say "morning" in Kannada using the language's own native word for it.
>
> *Say* ಬೆಳಗ್ಗೆ, *trace it to beḷagu ("to dawn") and beḷaku ("light"), and contrast it with the Sanskrit dina, rātri and madhyāhna around it.*

26.1 ಬೆಳಗ್ಗೆ (beḷagge) — the one time-word that's genuinely Kannada's own

Every everyday time-word you've met in Kannada so far — day, night, noon, midnight — has been Sanskrit, borrowed whole. This one breaks that pattern completely.

The word, taken apart — its roots and family

ಬೆಳಗ್ಗೆ (**beḷagge**) — "**morning**" — is **native Dravidian**, built on ಬೆಳಗು (*beḷagu*, "**to shine, to become bright, to dawn**") and the related noun ಬೆಳಕು (*beḷaku*, "**light**"). Morning is, quite literally, "the shining," "the dawning" — a transparent, homegrown metaphor, no borrowed vocabulary anywhere in it.

Why it's said this way

Here's what makes this lesson different from every other Kannada time-word lesson so far: ದಿನ (*dina*, "day"), ರಾತ್ರಿ (*ratri*, "night"), and ಮಧ್ಯಾಹ್ನ (*madhyāhna*, "noon") are all genuine **Sanskrit tatsama**

borrowings, taken whole, doing the plain everyday job in Kannada. **ಬೆಳಗ್ಗೆ** breaks that streak — it's the one everyday time-word in this set that's actually **Kannada's own**, not a loan from anywhere. If you'd only met *dina*, *ratri*, and *madhyāhna*, you might start to assume every Kannada time-word is Sanskrit underneath. This one is the honest counter-example — though, matching the pattern already seen with *hagalu* and *iruḷu* (Chapters 23–24), a native compound for "noon" does technically exist too: **ನಡುಹಗಲು** (*naḍuhagalu*, "middle-of-daytime," built from *naḍu*, "middle," the same everyday word already met, plus *hagalu*). It just lost the everyday job to *madhyāhna*, the same way *hagalu* and *iruḷu* were pushed into narrower, or archaic, roles by their own Sanskrit competitors.

Your turn

- *Say it:* "beḷagge" — "morning," native Dravidian
- *Say it:* the root — beḷagu, "to shine, to dawn," and beḷaku, "light"
- *Say it:* the contrast — dina, ratri, madhyāhna are all Sanskrit; beḷagge is genuinely Kannada's own
- *Recall:* say *hannondu* — *ippattu*

Before you move on

What native root does **ಬೆಳಗ್ಗೆ** come from, and what does it mean? (**ಬೆಳಗು/ಬೆಳಕು** — "to shine/dawn" and "light.") Is **ಬೆಳಗ್ಗೆ** a Sanskrit tatsama, like dina, ratri, and madhyāhna? (**No** — genuinely native Dravidian, the odd one out among Kannada's everyday time-words.)

26.2 ಈಜು (īju) — swimming; to swim

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ಈಜು

ಈಜು — *īju* — "swimming; to swim".

Say it: *īju*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ಈ, and writes it on its own.

The word, taken apart — its roots and family

ಈಜು (*īju*) is native Dravidian, one word with Tamil *nīntu* (DEDR 3687). The entry gives Kannada *īju* beside *īsu* and *hīju*.

Your turn

Say these aloud:

- *īju*
- *īju*, and what it means

Before you move on

What is "swimming; to swim"? (ಈಜು, *īju*.)

26.3 ಈ — one character, standing where you have only seen it riding

Before the new one: ಥ — which plain letter is it built on?

One character this time. Its riding half has been on the page since your second chapter.

Script you'll notice: ಈ

ಈ — *ī*, the long *i*.

By now the arrangement should be familiar, because this is the fourth vowel you have seen it in. One sound, two shapes:

- ಈ — standing alone, at the start of a word.
- ◌ೀ — riding on the consonant before it.

You read the riding one in the very first word you used for **you**:

- ನೀವು *nīvu* — you

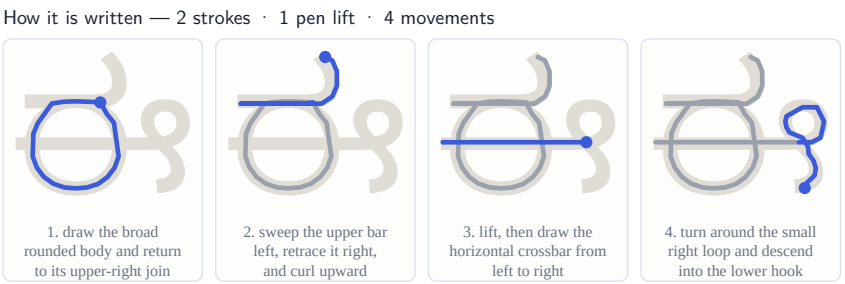

That ◌ೀ hanging off ನ is today's vowel. Pull the consonant away and it stands up as ಈ.

And it has a short partner you already know, so the full square is:

- ಇ *i* short, standing · ◌ಿ short, riding
- ಈ *ī* long, standing · ◌ೀ long, riding

Four shapes, two sounds, and the only questions are *short or long* and *standing or riding*. Notice that ಈ is built out of ಇ with an added stroke — the same way ಊ was built out of ಉ. Kannada makes the long vowel out of the short one and lets you see the seam.

Writing: ಈ — follow the numbered strip

How ಈ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ಈ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two and say which one is the long standing vowel

  ಇ · ಈ

- *Trace it:* ಈ three times, holding the *ī* long as you finish each one
- *Look:* at ನೀವು and find the riding half of today's letter inside it
- *Say it:* the square — "i, ī, and the same two riding"

Before you move on

Which character is this — ಈ? What sound does it carry? (*ī*, the long *i*.) What is its riding half, and in which word have you read it? (ೀ, in *nīvu*.) Which short letter is its shape built on? (ಇ.)

Chapter 27

Evening

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can say "evening" in Kannada.
>
> *Say* **ಸಂಜೆ***, follow it back through Maharashtri Prakrit to Sanskrit saṃdhyā, and set it beside Hindi's* **साँझ***, the same root down a different Prakrit road.*

27.1 ಸಂಜೆ (sañje) — a Sanskrit word that arrived already worn down

ದಿನ, **ರಾತ್ರಿ**, and **ಮಧ್ಯಾಹ್ನ** all arrived in Kannada whole, unworn, straight from Sanskrit. This word took a very different route — and it lands somewhere genuinely surprising.

The word, taken apart — its roots and family

ಸಂಜೆ (**sañje**) — "**evening**" — traces to **Sanskrit ಸಂಧ್ಯಾ** (*saṃdhyā*, "**twilight**," literally "the junction of day and night") — but it didn't arrive in Kannada as a fresh, whole tatsama the way *dina*, *ratri*, and *madhyāhna* did. Instead, it came by way of **Maharashtri Prakrit ಸಂಝಾ** (*sañjhā*) — Sanskrit's word, already worn down by centuries of everyday Middle Indo-Aryan speech, *then* borrowed into Kannada in that already-eroded shape.

The word, taken apart — its roots and family

Here's the genuinely surprising part: Hindi's own evening word, साँझ (*sāñjh*), comes from the **exact same** Sanskrit ಸಂಧ್ಯಾ — but by a **different** route. Hindi *inherited* it, generation to generation, through **Śauraseni Prakrit** (a different, sister Middle Indo-Aryan dialect than the Maharashtri Prakrit Kannada borrowed from). Two separate erosion paths — one an unbroken inheritance within the Indo-Aryan family, one a loan crossing into a completely different language family — and they land on nearly **identical-sounding** modern words, *sañje* and *sāñjh*, purely because they share the same Sanskrit starting point.

Your turn

- *Say it:* "sañje" — "evening," from Sanskrit sandhyā via Maharashtri Prakrit
- *Say it:* the contrast with dina/ratri/madhyāhna — those arrived whole; sañje arrived already worn down
- *Say it:* the striking convergence — Hindi's साँझ, same Sanskrit root, different Prakrit path, nearly the same sound today
- *Recall:* say *hasiru haḷadi*
- *Read it:* ದಿನ

Before you move on

Does ಸಂಜೆ arrive in Kannada as a fresh, whole Sanskrit tatsama, like *dina* and *ratri* did? (**No** — it arrived already worn down, via Maharashtri Prakrit ಸಂಝಾ.) What Hindi word shares ಸಂಜೆ's exact Sanskrit root, and by what different path did it get there? (साँझ (sāñjh) — inherited via a different sister Prakrit, Śauraseni, rather than borrowed via Maharashtri.)

Chapter 28

Afternoon

Modes: **voice** (1) **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can say "afternoon" in Kannada and keep it distinct from noon.
>
> *Say* **ಅಪರಾಹ್ನ**, *split it into apara ("latter") + ahna ("day"), and match that -ahna against the one in* **ಮಧ್ಯಾಹ್ನ**.

28.1 ಅಪರಾಹ್ನ (aparāhna) — the same "-ahna" pattern, a different first piece

You already know **ಮಧ್ಯಾಹ್ನ**, "noon" — "middle" plus "day." This lesson's word for "afternoon" uses the exact same building pattern, just with a different first piece.

The word, taken apart — its roots and family

ಅಪರಾಹ್ನ (**aparāhna**) — "**afternoon**" — is a genuine **Sanskrit tatsama**: **ಅಪರ** (*apara*, "**latter, further**") + the same **-ಅಹ್ನ** (*-ahna*, "**day**") suffix already hiding inside **ಮಧ್ಯಾಹ್ನ** (*madhyāhna*, "noon," Chapter 17). Same clean two-piece structure, same "day" ending — just swap *madhya* ("middle") for *apara* ("latter, further along") and you move from "noon" to "afternoon." This distinction comes from a genuine, classical **five-part Sanskrit division of the day** — *prāta* (early morning), *saṅgava*, *madhyāhna* (noon), *aparāhna* (afternoon), *sāyāhna* (evening) — with *aparāhna* landing specifically as the fourth part, after noon and before evening.

Why it's said this way

Here's where this lesson needs real care: some sources describe ಮಧ್ಯಾಹ್ನ itself being stretched loosely in casual modern speech to cover the whole afternoon too — which would echo Hindi's own दोपहर, attested to have genuinely widened from "precisely noon" to "the whole afternoon." But the evidence for Kannada is **much thinner** than what backed the Hindi finding — general dictionary listings rather than clear, independently-confirmed usage sources. Treat this as a plausible, hedged parallel, not a settled fact the way दोपहर's widening was. ಅಪರಾಹ್ನ remains the more precisely, formally correct word for "afternoon" specifically.

Your turn

- *Say it:* "aparāhna" — "afternoon," apara + ahna
- *Say it:* the shared piece with madhyāhna — both end in "-ahna," "day"
- *Say it:* the honest hedge — madhyāhna MAY also loosely cover "afternoon" in casual speech, but this is far less certain than Hindi's dopahar-widening story
- *Recall:* say *nāyi, bekku*

Before you move on

What suffix does ಅಪರಾಹ್ನ share with ಮಧ್ಯಾಹ್ನ, and what does it mean? (**-ಅಹ್ನ**, *-ahna*, "day.") What's the difference in their first pieces? (ಅಪರ, *apara*, "latter/further" vs. ಮಧ್ಯ, *madhya*, "middle.") Is the claim that ಮಧ್ಯಾಹ್ನ also covers "afternoon" in casual speech as well-supported as Hindi's दोपहर-widening finding? (**No** — much more thinly sourced; treat it as a hedged possibility, not a settled fact.)

Chapter 29

Good Morning

Modes: 🚗 **voice** (2) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can wish someone good morning in Kannada and judge when it will sound too formal.
>
> *Say* **ಶುಭೋದಯ** *— śubha + udaya, "auspicious rising" — and note the formal/written skew that makes* **ನಮಸ್ಕಾರ** *the safer casual morning greeting.*

29.1 ಶುಭೋದಯ (śubhōdaya) — "good morning," a third root for morning

You already have **ಬೆಳಗ್ಗೆ**, the everyday word for "morning." This greeting reaches for a completely different word for the same idea — and, honestly, this lesson's twist is about how uncertain its own "everyday" status turns out to be, once you look closely.

The word, taken apart — its roots and family

ಶುಭೋದಯ (**śubhōdaya**) — "**good morning**" — is built from **ಶುಭ** (*śubha*, "**good, auspicious**") plus **ಉದಯ** (*udaya*, "**rising, sunrise**," from Sanskrit **ud-** "up" + **i** "to go" — the same root behind **ಸೂರ್ಯೋದಯ**, *sūryōdaya*, "sunrise" itself). This is a **completely different word** from **ಬೆಳಗ್ಗೆ** (*beḷagge*, Chapter 26's native "morning") — Kannada now has (at least) two unrelated roots circling the idea of morning: one native ("the shining"), one Sanskrit ("the rising").

Why it's said this way

Here's where this lesson needs real care. Some sources describe **ಶುಭೋದಯ** as the most common everyday way to say "good morning" in Kannada — but these are largely the same genre of generic phrasebook site whose claims about Hindi's **सुप्रभात** turned out, on closer inspection, to be overstated. A more careful source instead describes **ಶುಭೋದಯ** as reserved mainly for **formal or written** contexts — speeches, greeting cards, WhatsApp images — calling it "not as frequently used in daily conversations" as **ನಮಸ್ಕಾರ/ನಮಸ್ತೆ**, and at least one native-speaker account suggests casual spoken Kannada often reaches for **English** "good morning" instead of **ಶುಭೋದಯ** entirely. Taken together, this looks like the **same** formal/written skew already found for Hindi's **सुप्रभात**, not the genuine cross-language contrast a first pass at the sources might suggest. A native alternate, **ಶುಭ ಮುಂಜಾನೆ** (*śubha muñjāne*, using *muñjāne*, "the early morning, before sunrise"), also exists as a real, attested greeting construction — but its own register isn't independently confirmed here either.

Your turn

Say these aloud:

- "śubhōdaya" — "good morning," śubha + udaya
- the root contrast — beḷagge is native "shining"; udaya is Sanskrit "rising"
- the honest note — sources conflict, but the more careful ones point to the same formal/written skew already found for Hindi

Before you move on

Does **ಶುಭೋದಯ** share a root with **ಬೆಳಗ್ಗೆ**? (**No** — **ಉದಯ**, "rising," is a completely different Sanskrit root from native **ಬೆಳಗ್ಗೆ**'s "shining.") Is **ಶುಭೋದಯ** genuinely common in everyday casual Kannada speech? (**Unclear, and possibly not** — sources conflict; the more careful ones describe it skewing formal/written, with **ನಮಸ್ಕಾರ/ನಮಸ್ತೆ** covering casual mornings instead, and one native-speaker account suggests English "good morning" often gets used in casual speech instead of **ಶುಭೋದಯ** entirely.)

29.2 ಓಟ (ōṭa) — running, a race

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ಓಟ

ಓಟ — *ōṭa* — "running, a race".

Say it: *ōṭa*. *Look:* at its shape as you say it. The next lesson takes one piece of it, **ಓ**, and writes it on its own.

The word, taken apart — its roots and family

ಓಟ (*ōṭa*) is native Dravidian, the noun of *ōḍu*, "to run", and DEDR 1041 lists *ōṭa* itself, "running, a race"; the entry also has Tamil *ōṭu*, Telugu *ōḍu* and Malayalam *ōṭuka*.

Your turn

Say these aloud:

- *ōṭa*
- *ōṭa*, and what it means

Before you move on

What is "running, a race"? (**ಓಟ**, *ōṭa*.)

29.3 ಓ — one character, met inside a word you already say

Before the new one: **ಈ** — what sound does it carry, and what is its riding half?

One character this time. It waited longer than most, for a reason worth knowing.

Script you'll notice: ಓ

ಓ — *ō*.

It is an **independent vowel**: the shape a vowel takes when it stands at the start of a word with no consonant in front of it. You have already met its other half, the vowel *sign* ೋ, which is what the same sound looks like when it rides on a consonant.

So the same vowel has two shapes, and which one you see tells you where in the word you are:

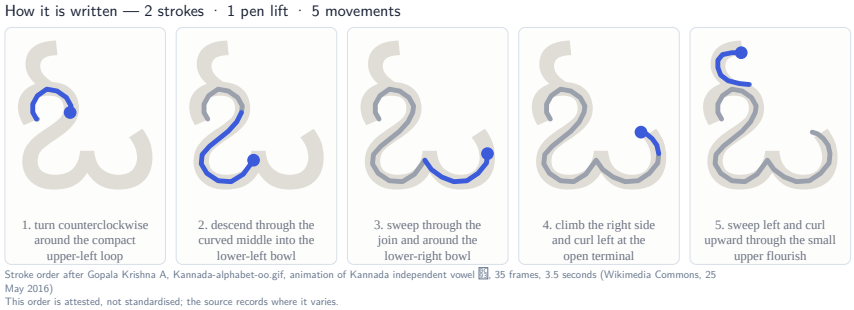

- ಓ — standing alone, at the beginning.
- ೋ — attached, riding on the consonant before it.

The word you already say that opens with it:

- ಓಟ *ōṭa* — running, a race

Why this one waited. Every other character in this sequence was introduced once a word containing it was already in your mouth. ಓ had to wait until ಓಟ was taught, because until then there was nothing to find it inside — and a character shown without a word to hold it is a character you will not keep.

Writing: ಓ — follow the numbered strip

How ಓ *is written, stroke by stroke*

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ಓ yourself — slowly, and larger than it is printed.

The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two, and say which one begins with the independent vowel

  ಓಟ · ಪರವಾಗಿಲ್ಲ

- *Trace it:* ಓ three times, saying *ō* as you finish each one
- *Look:* at ಓ and ೋ side by side, and say which one stands alone

Before you move on

Which character is this — ಓ? What sound does it carry? (*ō*.) What is the difference between ಓ and ೋ? (One stands alone at the start of a word; the other rides on a consonant.)

Chapter 30

Good Evening

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can wish someone good evening in Kannada.
>
> *Say* **ಶುಭ ಸಂಜೆ**, *correct the common claim that* **ಸಂಜೆ** *is native Dravidian, and keep* **ನಮಸ್ಕಾರ** *as the all-hours fallback.*

30.1 ಶುಭ ಸಂಜೆ (śubha sañje) — formal, and correctly citing where ಸಂಜೆ comes from

You already have **ಸಂಜೆ**, "evening" — and you already know it's a Sanskrit word that arrived in Kannada already worn down, via Prakrit. Keep that fact straight here, since it's an easy one to second-guess.

The word, taken apart — its roots and family

ಶುಭ ಸಂಜೆ (**śubha sañje**) — "**good evening**" — pairs **ಶುಭ** ("good, auspicious") with **ಸಂಜೆ**, the exact word from Chapter 27: Sanskrit **ಸಂಧ್ಯಾ** (*saṃdhyā*), borrowed into Kannada via **Maharashtri Prakrit** **ಸಂಝಾ** (*sañjhā*). You might run across a plausible-sounding claim elsewhere that **ಸಂಜೆ** is "native Dravidian" — it isn't, and you already have the real answer from Chapter 27. Don't let a claim that merely *sounds* plausible override something you've already verified.

Why it's said this way

Here's where this lesson needs to be careful about its own sourcing, not just the etymology's. General impressions lean toward **ಶುಭ ಸಂಜೆ** skewing **formal**, with the all-purpose **ನಮಸ್ಕಾರ** — or, among younger urban speakers, borrowed English "**hello**" — more likely to cover ordinary casual conversation. But the evidence for this specific register claim is genuinely **thin**: it's the same kind of impression that, for both Hindi's **सुप्रभात** and Kannada's own **ಶುಭೋದಯ**, needed real digging to confirm or correct, and here that deeper digging hasn't turned up anything more solid than a general leaning. Treat this as an open **question**, echoing the same one already raised for those two greetings, not a third confirmed data point — this lesson doesn't have strong enough sourcing to settle it either way.

Your turn

Say these aloud:

- "śubha sañje" — "good evening," a genuinely Sanskrit-rooted pairing
- the correction — **ಸಂಜೆ** is Sanskrit-via-Prakrit, NOT native Dravidian, whatever a plausible-sounding claim elsewhere might say
- **ನಮಸ್ಕಾರ** — the likely all-purpose everyday alternative, though this greeting's own register remains an open question

Before you move on

Is **ಸಂಜೆ** native Dravidian? (**No** — Sanskrit **ಸಂಧ್ಯಾ** via Maharashtri Prakrit, already established in Chapter 27; be skeptical of any claim otherwise.) Is it settled that **ಶುಭ ಸಂಜೆ** is formal/rare in casual speech, the way **सुप्रभात** and **ಶುಭೋದಯ** turned out to be? (**Not settled** — the impression leans that way, with **ನಮಸ್ಕಾರ** likely covering casual use, but the sourcing here is too thin to call it confirmed.)

Chapter 31

Good Afternoon

Modes: 🚗 **voice** (2) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can wish someone good afternoon in Kannada, and fall back on **ನಮಸ್ಕಾರ** when I want a greeting that fits any hour.
>
> *Say* **ಶುಭ ಮಧ್ಯಾಹ್ನ** *— built on the "noon" word rather than* **ಅಪರಾಹ್ನ** *— and reach instead for* **ನಮಸ್ಕಾರ**, *the greeting confirmed to work at any time of day.*

31.1 ಶುಭ ಮಧ್ಯಾಹ್ನ — good afternoon

Two lessons ago you met a careful hedge: does **ಮಧ್ಯಾಹ್ನ**, "noon," also loosely cover "afternoon"? This greeting hands you a real data point.

The word, taken apart — its roots and family

ಶುಭ ಮಧ್ಯಾಹ್ನ (**śubha madhyāhna**) — "**good afternoon**" — is the standard greeting for this concept. Notice which noun it actually reuses: **ಮಧ್ಯಾಹ್ನ** (*madhyāhna*, "noon," Chapter 17) — **not** **ಅಪರಾಹ್ನ** (*aparāhna*, the word Chapter 28 established as the more precisely "afternoon"-specific term). This is exactly the kind of concrete usage evidence that bears on Chapter 28's own hedge: if the standard **greeting** for "good afternoon" reaches for *madhyāhna* rather than *aparāhna*, that's a real (if still not fully conclusive) sign that *madhyāhna*'s job has genuinely stretched to cover the afternoon in everyday use, not just at noon itself.

Why it's said this way

Here's the useful discipline this lesson followed: checking a claim against an actual, directly fetched source page, not just trusting a search-engine's own summary of one. That check turned up **two** claims of very different strength. **ನಮಸ್ಕಾರ**'s status as a genuinely **universal** greeting — suited to any time of day, any occasion — is independently confirmed across multiple fetched sources; that one's solid. The claim that **ಶುಭ ಮಧ್ಯಾಹ್ನ** leans **formal or semi-formal** — workplaces, official meetings — traces back to just **one** source. It's a real, directly-verified data point, worth taking seriously — but it isn't cross-corroborated the way the **ನಮಸ್ಕಾರ** claim is, so treat it as a single well-checked impression, not a settled fact.

Your turn

Say these aloud:

- "śubha madhyāhna" — "good afternoon," reusing the "noon" word, not "aparāhna"
- why that matters — real evidence for madhyāhna's meaning stretching to cover "afternoon"
- **ನಮಸ್ಕಾರ** — the confirmed universal, any-time-of-day greeting, cross-checked across multiple sources

Before you move on

Does **ಶುಭ ಮಧ್ಯಾಹ್ನ** use **ಮಧ್ಯಾಹ್ನ** ("noon") or **ಅಪರಾಹ್ನ** (the more precise "afternoon" word)? (**ಮಧ್ಯಾಹ್ನ** — real evidence for its meaning stretching to cover "afternoon" too.) Is the "formal/workplace" register claim for **ಶುಭ ಮಧ್ಯಾಹ್ನ** as solidly confirmed as **ನಮಸ್ಕಾರ**'s universal status? (**No** — the workplace claim rests on a single directly-verified source, not cross-corroborated the way **ನಮಸ್ಕಾರ**'s is.) What's the confirmed universal, any-time-of-day alternative? (**ನಮಸ್ಕಾರ**.)

31.2 ಕೃಷಿ (kṛṣi) — farming

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ಕೃಷಿ

ಕೃಷಿ — *kṛṣi* — "farming".

Say it: *kṛṣi*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ೃ, and writes it on its own.

The word, taken apart — its roots and family

ಕೃಷಿ (*kṛṣi*) is Sanskrit *kṛṣi*, "ploughing", taken over whole as a learned loan, a tatsama (CDIAL 3448).

Your turn

Say these aloud:

- *kṛṣi*
- *kṛṣi*, and what it means

Before you move on

What is "farming"? (**ಕೃಷಿ**, *kṛṣi*.)

31.3 ೃ — one character, and the pair met the other way round

Before the new one: ೆ — does it stand alone or ride on a consonant, and what is its other shape?

One character this time, and today the halves arrive in the opposite order from every vowel so far.

Script you'll notice: ೃ

ೃ — the riding form of ಋ (*ṛ*).

Every vowel until now came standing first and riding second: ಉ then ು, ಊ then ೂ, ಈ then ೀ. This one is the reverse. You have had the standing letter since the chapter that taught ಋ, in a word you say:

- ಋತು *ṛtu* — season

What you have not seen is that vowel riding a consonant. It becomes a small hook tucked underneath:

- ಹ plus ೃ gives ಹೃ — *hṛ*

Standing at the front of a word, look for ಋ. Tucked under a consonant, look for ೃ. Same vowel, two places it can sit.

What it sounds like. An *r* doing a vowel's work — close to the *ri* in a quick *bring it*. Kannada took the sound and both shapes from Sanskrit, which is where the words needing it come from.

Writing: ೃ — copy what you see

Put your pen on ೃ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these two and say which one is standing and which one is riding

  ಋತು · ಹೃ

- *Trace it:* ೃ three times under a ಹ, saying *hṛ* as you finish each one
- *Look:* at ಋ and ೃ side by side, and say which one opens a word

Before you move on

Which character is this — ೃ? Which standing letter is it the other half of? (ಋ.) Where does it sit on the page? (**Tucked under the consonant it rides.**) Name the word you already say that carries the standing one. (*ṛtu*, season.)

Chapter 32

The Core Verbs

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can build a Kannada verb as stem plus tense plus person, swap the middle bead for the past, hear the p → h law that separates Kannada from its three sisters, and say why ಕೊತ್ತು carries no person at all.
>
> *Say* ನನಗೆ ಕೊತ್ತು*, name the three slots that built iruttēne, hōguttēne and nōḍuttēne, explain which slot* ಕೊತ್ತು *leaves empty and where its person went instead, and give the sound-law behind pōgu → hōgu.*

32.1 ಇರು (iru) — "to be," and the machine inside every Kannada verb

Thirty-one chapters of words. Now the engine room. Kannada builds a verb the way you thread beads on a string, and this first verb carries the whole string.

You'll want to know: ಇರು

ಇರು — *iru* — **to be, to exist, to stay, to live**

It is native Dravidian, from an old root meaning "be, remain, stay put." Tamil kept the very same word, இரு (*iru*), and Malayalam has ഇരിക്കുക (*irikkuka*); Telugu went its own way with ఉండు (*uṇḍu*).

Iru is about **existing** or **being somewhere**, not about linking two nouns: "I am in Bangalore" takes *iru*, but "I am a teacher" takes no verb at all.

The letters in this word

ಇ (the standing vowel *i*) + ರು (*ru*) → ಇರು. Both shapes turned up already in ಇಲ್ಲ (*illa*, "no").
The form you hear most is ಇದ್ದೇನೆ (*iddēne*), "I am," its ದ್ದ held long — *id-dē-ne*. You have said it already, inside Chapter 3's ಚೆನ್ನಾಗಿದ್ದೇನೆ (*cennāgiddēne*, "I'm well").

Grammar Lens: stem, then tense, then person

English changes a verb by putting words **around** it: *I am, I was, I will be*. Kannada changes it by gluing pieces **onto the end** of it, always in the same order:

ಇರು + ಉತ್ತ + ಏನೆ → ಇರುತ್ತೇನೆ

iru (be) + *-utt-* (happening now) + *-ēne* ("I") → *iruttēne*

Left to right: **be** — **present** — **I**, three slots welded into one word. Languages built this way are called **agglutinative**, from Latin *glutinare*, "to glue."
Two payoffs at once. The last piece already means "I," so *nānu* is optional. And nothing here belongs to *iru* alone: every verb in this chapter is the same three slots with a new first bead.
(*Iruttēne* is the regular build, "I stay, I will be"; *iddēne* is the same verb worn down onto its own past stem *idd-*, for "I am **right now**.")

Your turn

Say these aloud:

- "iru" — be, exist, stay
- the three beads in order — "iru … utt … ēne"
- the sisters — Tamil "iru", Malayalam "irikkuka", Telugu "uṇḍu"

Before you move on

What are the three pieces of *iruttēne*, in order? (**Stem, tense, person** — *iru*, *-utt-*, *-ēne*.) Which piece carries "I"? (**The last one**, *-ēne* — which is why *nānu* can be dropped.) Which sister kept

the same verb unchanged, and which went its own way? (**Tamil** *iru*; **Telugu** *uṇḍu*.) Next: the sound-law that made Kannada sound unlike all three of its sisters.

32.2 ಹೋಗು (hōgu) — "to go," and the law that made Kannada sound like Kannada

Keep the three beads and change only the first, and you have a new verb. But this first bead hides the single most useful sound-fact in the language.

You'll want to know: ಹೋಗು

ಹೋಗು — *hōgu* — **to go**

ಹೋ (*ha* carrying the long-*ō* sign) + **ಗು** (*gu*). Thread the beads and you get **ಹೋಗುತ್ತೇನೆ** (*hōguttēne*), "I go" — *hōgu* + *-utt-* + *-ēne*, exactly the machine *iru* just handed you. The bare stem is already a command: *hōgu!*, "go!"

The word, taken apart — its roots and family

Tamil's word for "go" is **போ** / **போகு** (*pō* / *pōgu*). Kannada's is *hōgu*, and that *h* is **not** a different root. Around a thousand years ago Kannada softened every old word-initial ***p-*** to **h-** — and Kannada is the **only** one of the four literary Dravidian languages that did it. Once you know the law, whole shelves of vocabulary line up:

Tamil	Kannada	meaning
pōgu	*hōgu*	go
pattu	*hattu*	ten
pāl	*hālu*	milk
peyar	*hesaru*	name

You have met two of those already — *hattu* in Chapter 7, *hesaru* back in Chapter 2. One law, and both of them stop being coincidences. The other two sisters kept the *p*: Telugu **పోవు** (*pōvu*), **పది** (*padi*, "ten"), **పాలు** (*pālu*, "milk"); Malayalam **പോകുക** (*pōkuka*), **പത്ത്** (*pattu*), **പാൽ** (*pāl*). A whole stripe of the family vocabulary, explained by one change only Kannada made.

The proof is written down: **Old Kannada** still spells these words with ಪ (*pa*), and the modern *h* is the later step. Nor has the law finished — in casual speech many speakers drop the *h* too, so *hōgu* can come out as *ōgu*.

Your turn

- *Say it:* "hōgu" — go — then "hōguttēne", I go
- *Say it:* the three beads again — "hōgu … utt … ēne"
- *Say it:* the four pairs — "pōgu … hōgu", "pattu … hattu", "pāl … hālu", "peyar … hesaru"
- *Say it:* the sisters that kept the p — Telugu "pōvu", Malayalam "pōkuka"
- *Read it:* ರಾತ್ರಿ

Before you move on

Is Kannada's *hōgu* a different root from Tamil's *pōgu*? (**No** — the same old *p*, softened to *h*.) How many of the four sisters made that change? (**One** — Kannada alone.) Give two more pairs that follow the law. (*Pattu / hattu*, *pāl / hālu*, *peyar / hesaru*.) What do Old Kannada texts write instead of ಹ? (ಪ, *pa*.) Build "I go." (*Hōguttēne*.)

32.3 ಬಾ (bā) — "come," and the stem hiding underneath it

Every verb so far has been honest: the word you learn it by is the word the endings glue onto. This one is not — and Chapter 4's goodbye has been quietly showing you why.

You'll want to know: ಬಾ

ಬಾ — *bā* — **come!**

One letter and a vowel sign: ಬ (*ba*) with the long-*ā* stroke. As it stands it is a whole command — *bā!*, "come!" — the partner of *hōgu!* from Chapter 4.

But you cannot thread beads onto *bā*. Underneath, the verb's working stem is **ಬರು-** (*baru-*), and everything attaches to that:

baru- + *-utt-* + *-ēne* → **ಬರುತ್ತೇನೆ** (*baruttēne*), "I come."

The word, taken apart — its roots and family

ಬಾ (*bā / baru*) is native Dravidian, one word with Tamil *varu*, *vā* and Malayalam *varuka* (DEDR 5270). DEDR gives Kannada *bar*, *bā*: the old *v-* has become *b-*.

Grammar Lens: two shapes, one verb

Most Kannada verbs have nothing to hide. *Iru* gives *iruttēne*, *hōgu* gives *hōguttēne*; the name of the verb **is** the stem. A small handful do not, and *bā* is the one you will meet daily: **call it *bā*, build on *baru-***. That is exactly what Chapter 4's farewell was made of:

> **ಹೋಗಿ ಬರುತ್ತೇನೆ** — *hōgi baruttēne* — "having gone, I come" — "I'll go and come back."

Hōgi is *hōgu* in its "having …-ed" form; *baruttēne* is *baru-* with the present bead and the "I" bead. Kannada refuses a bare goodbye, so it promises the return instead — and needs both verbs to do it.

Tamil splits the same verb the same way: **வா** (*vā*) to call it by, **வரு-** (*varu-*) to build on; Malayalam has **വരുക** (*varuka*), Telugu **వచ్చు** (*vaccu*), whose command form is **రా** (*rā*).

And notice Kannada's *b* against Tamil's *v* — a second Kannada-only habit, sitting right beside the *p* → *h* law:

Tamil	Kannada	meaning
vā	*bā*	come
vāy	*bāyi*	mouth

Two laws, both at the front of the word, both Kannada's own. Between them they account for much of why Kannada does not sound like its sisters.

Your turn

- *Say it:* "bā" — come! — then the stem, "baru-"
- *Say it:* "baruttēne" — I come
- *Say it:* the farewell, taken apart — "hōgi … baruttēne"
- *Say it:* the two Kannada laws together — "vā … bā" and "pōgu … hōgu"
- *Recall:* say *beḷagge*

Before you move on

You call this verb *bā* — so what do the endings actually attach to? (ಬರು-, *baru-*.) Build "I come." (*Baruttēne.*) What are the two halves of *hōgi baruttēne*? ("**Having gone**" and "**I come**" — Kannada promises the return instead of saying goodbye.) Kannada has *bā* where Tamil has *vā*: what change is that? (**Word-initial *v-* became *b-***.) Next: the middle bead.

32.4 ತಿನ್ನು (tinnu) — "to eat," and the bead that carries time

Hold the first and last beads still and swap only the middle one. That is almost the whole of Kannada tense — almost, because one of the three times you expect is missing.

You'll want to know: ತಿನ್ನು

ತಿನ್ನು — *tinnu* — **to eat**

ತಿ (*ta* with the short-*i* sign) + ನ್ನು (a doubled *n* with *u*), the ನ್ನ held long — *tin-nu*.

It is Proto-Dravidian, an old root meaning simply "eat," and here the family agrees: Telugu తిను (*tinu*), Malayalam തിന്നുക (*tinnuka*). Tamil has the root as தின் (*tiṉ*) — but narrowed it to chewing and snacking, handing everyday eating to சாப்பிடு (*sāppiḍu*).

For a **full meal**, Kannada reaches instead for a meal-noun plus *māḍu*, "to do a meal" — the same noun-plus-*māḍu* trick that built *kelasa māḍu*, "to work," in Chapter 5.

Grammar Lens: one bead for the past, and a future that never separated

Hold the stem *tinn-* and the person bead *-ēne* fixed, and let the middle piece do the work:

when	**Kannada**
now	*tinnuttēne*
already	*tinde*
tomorrow	*tinnuttēne* — again

The past bead is a **-d-**: *tin* + *-d-* + *-e* → **ತಿಂದೆ** (*tinde*), "I ate." One consonant of difference between two pieces that never moved. English needs a whole new shape (*ate*); Kannada needs one bead.
Now the surprise in the third row. Everyday Kannada keeps **no** separate future — the *-utt-* bead covers both:

ನಾಳೆ ತಿನ್ನುತ್ತೇನೆ — *nāḷe tinnuttēne* — "I'll eat **tomorrow**."

The time-word *nāḷe* does the work the verb declines to do. Kannada **has** a distinct future bead, *-uv-* — **ತಿನ್ನುವೆನು** (*tinnuvenu*) — but you will meet it in writing far more often than in conversation.

Your turn

Say these aloud:

- "tinnu" — eat — then "tinnuttēne", I eat
- the past — "tinde", I ate
- tomorrow, with the same present bead — "nāḷe tinnuttēne"
- the full meal instead — "ūṭa māḍu"

Before you move on

Which of the three beads changes for tense? (**The middle one**.) Say "I ate." (*Tinde* — the past bead is a *-d-*.) How does everyday Kannada say "I will eat"? (**With the present bead**, *tinnuttēne*, plus a time-word like *nāḷe*.) Which sister narrowed this root away from everyday eating? (**Tamil** — *sāppiḍu* took over.) Next: the third slot, and a word where the four sisters genuinely part company.

32.5 ನೋಡು (nōḍu) — "to see," and the last bead of all

First bead, the verb. Middle bead, the time. One slot is left — the one that lets Kannada drop "I," "you" and "she" altogether.

The word, taken apart — its roots and family

ನೋಡು — *nōḍu* — to see, to look

ನೋ (*na* with the long-*ō* sign) + ಡು (*ḍu*, tongue curled back — the retroflex *ḍ*, not an English *d*).
Nōḍu is native Dravidian, close kin to Tamil's நோக்கு (*nōkku*, "to look") — though the exact reconstruction is not fully settled.
What is settled is stranger. Every sister has a native Dravidian everyday word for "see," and **no two chose the same one**: Kannada ನೋಡು (*nōḍu*), Tamil பார் (*pār*), Telugu చూడు (*cūḍu*), Malayalam കാണുക (*kāṇuka*). Four inherited roots, one meaning each — a genuine split, like the cat-word in Chapter 21.
And the passed-over roots did not vanish. Kannada still has ಕಾಣು (*kāṇu*) — Malayalam's very root — with a different job: "to **appear**, to be visible."

Grammar Lens: the third slot, and where gender lives

Hold *nōḍutt-* still and swap only the last bead:

who	Kannada
I	*nōḍuttēne*
you, familiar	*nōḍuttīya*
you, respectful	*nōḍuttīri*
he	*nōḍuttāne*
she	*nōḍuttāḷe*
they	*nōḍuttāre*

Six endings, and they are not *nōḍu*'s — they are the same six on every verb in this chapter. Learn them once and the other five come free.
Two things worth naming. **Gender lives only in the third person** — *-āne* he, *-āḷe* she; *nōḍuttēne* is the same word whoever says it. And **the respectful *-ttīri* is the plural ending**, the same plural-for-respect you met at *nīvu*, sitting inside Chapter 3's ನೀವು

ಹೇಗಿದ್ದೀರಾ? (*nīvu hēgiddīrā?*).

Your turn

Say these aloud:

- "nōḍu" — see — then "nōḍuttēne", I see
- the six endings — "ēne … īya … īri … āne … āḷe … āre"
- the four sisters' four see-words — "nōḍu … pār … cūḍu … kāṇuka"
- the same six beads on another verb — "hōguttēne … hōguttāne … hōguttāre"

Before you move on

Which slot does the last bead fill? (**Person** — which is why the pronoun can be dropped.) In which person does Kannada mark gender? (**The third** only.) Do the four sisters share an everyday word for "see"? (**No** — *nōḍu*, *pār*, *cūḍu*, *kāṇuka*, four different native roots.) What job does *kāṇu* do in Kannada? ("To **appear**.") Next: a know-word with no beads at all.

32.6 ಗೊತ್ತು (gottu) — "known," the word with no beads at all

Five verbs, every one ending on a bead that meant "I." The last word of the chapter has no such bead — and Chapter 6 handed you the sentence it makes, whole, before you could take it apart.

You'll want to know: ಗೊತ್ತು

ಗೊತ್ತು — *gottu* — **known**

ಗೊ (*ga* with the short-*o* sign) + **ತ್ತು** (a doubled *t* with *u*), the **ತ್ತ** held long — *got-tu.*

And here is the catch: *gottu* is **not a verb**. It is a noun-like word meaning "known, settled, fixed." No stem slot, no tense bead, no person bead — and it never changes shape.

ನನಗೆ ಗೊತ್ತು. — *nanage gottu.* — literally "**to-me** [it is] **known**."

Grammar Lens: no person slot, so the person moves out

Chapter 6 told you *nānu* was gone and the dative *nanage* stood in its place. Now you can see **why**: a person bead needs a verb to sit on, and *gottu* is not one. So the knower is pushed outside the word entirely:

- *nanage gottu* — known **to me**
- *ninage gottu* — known **to you**
- *avanige gottu* — known **to him**

Only the little dative word changes. That is the chapter's closing symmetry: five verbs carried the person in the ending, so *nānu* could be dropped; here the ending carries no person, so the dative word is the one thing you **cannot** drop.

The word, taken apart — its roots and family

Kannada does have proper verbs for knowing, both native Dravidian. ತಿಳಿ (*tiḷi*, "to become clear") takes all three beads — ತಿಳಿಯುತ್ತದೆ (*tiḷiyuttade*). ಅರಿ (*ari*, "to perceive") survives mostly in writing. Both have cousins: *tiḷi* answers Tamil தெளி (*teḷi*) and Telugu తెలియు (*teliyu*), everyday form తెలుసు (*telusu*); *ari* answers Tamil அறி (*aṟi*) and Malayalam അറിയുക (*aṟiyuka*). Underneath, this family's word for "know" usually means "**become clear**" — and all four sisters put the knower in the dative, exactly as Chapter 6's table showed.

Your turn

Say these aloud:

- "gottu" — known — then "nanage gottu", I know
- the three knowers, one unchanged word — "nanage … ninage … avanige gottu"
- the five that carried the person — "iruttēne, hōguttēne, baruttēne, tinnuttēne, nōḍuttēne"

Before you move on

Is *gottu* a verb? (**No** — a noun-like word meaning "known, settled," with none of the three beads.) So where does the knower go, and why? (**Into the dative**, *nanage* — there is no person slot for it.) Say "I know." (*Nanage gottu.*) Name the three slots one last time. (**Stem, tense, person** — *nōḍu* + *-utt-* + *-ēne.*) And the law behind *pōgu* → *hōgu*? (**Initial *p-* became *h-*** — in Kannada alone.)

Chapter 33

Four Verbs of Mind and Page

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say I think, I understand, I read and I write in Kannada, name the suffix that turns a Sanskrit noun into a Kannada verb, use the ending that hands an action back to its doer, and give both of the front-of-the-word sound laws that separate Kannada from Tamil.
>
> *Say* ನಾನು ಕನ್ನಡ ಬರೆಯುತ್ತೇನೆ*, keep it apart from* ಬರುತ್ತೇನೆ *one vowel away, explain the glide a vowel-final stem needs, take bare back to the Dravidian line-drawing root behind Tamil* ವರ, *set the v → b law beside the p → h law, and count this chapter's four verbs onto Chapter 32's six to reach hattu.*

33.1 ಯೋಚಿಸು (yōcisu) — "to think," a borrowed word on a Kannada frame

> *Nanage gottu* — "known to me," a word with no beads at all, so the knower sat outside it. Now the opposite case: a verb with all three beads, whose stem is not Kannada.

You'll want to know: ಯೋಚಿಸು

ಯೋಚಿಸು — *yōcisu* — **to think**

ನಾನು ಯೋಚಿಸುತ್ತೇನೆ. — *nānu yōcisuttēne.* — "I think."

The pronoun is optional. The noun beside the verb is **ಯೋಚನೆ** (*yōcane*), "a thought."

The letters in this word

ಯೋ is ಯ (*ya*) with the long-*ō* sign, then ಚಿ, then ಸು — three even beats, *yō-ci-su*.

The word, taken apart — its roots and family

Chapter 9 built ಕ್ಷಮಿಸು (*kṣamisu*, "to forgive") from the Sanskrit noun ಕ್ಷಮಾ (*kṣamā*) plus **-ಇಸು** (*-isu*), Kannada's verb-making suffix. *Yōcisu* is the same machine: ಯೋಚನೆ plus *-isu*.
And *yōcane* is itself Sanskrit — योजना (*yojanā*), "a joining, an arranging," from the root युज् (*yuj*), "**to yoke**": the root behind *yoga* and behind English **yoke**. Thinking, so told, is putting things together.

The word, taken apart — its roots and family

Kannada's inherited think-word did not die. It changed jobs. ನೆನೆ (*nene*) is ordinary and alive, and means "**to call to mind, to remember**."
The Dravidian dictionaries reconstruct that root as ****nen-ay***, "**to think**" — and Tamil நினை (*ninai*) is the same word, doing Tamil's everyday thinking. Two sisters divided one root's work: Kannada thinks with a borrowed noun and remembers with the old verb; Tamil thinks with the old verb outright.

Grammar Lens: a borrowed stem, the native machine

Nothing of *yōcisu*'s origin shows in how it works:

yōcisu + *-utt-* + *-ēne* → ಯೋಚಿಸುತ್ತೇನೆ

Stem, tense, person — the three slots that built *iruttēne*, and the six person endings untouched: *yōcisuttīya*, *yōcisuttāne*, *yōcisuttāḷe*, *yōcisuttāre*. A word may come from anywhere; once *-isu* is on it, it is a Kannada verb.

Your turn

Say these aloud:

- "yōcisu" — think — then "yōcisuttēne"
- two builds, one suffix — "kṣamā, isu … yōcane, isu"

- the old root's two lives — "nene" … Tamil "ninai"
- beadless, then three-bead — "nanage gottu … yōcisuttēne"

Before you move on

Say "I think," name the suffix that made it a verb, and name the Chapter 9 word built that way. (*Yōcisuttēne*; **-ಇಸು**; *kṣamisu.*) Which Sanskrit root sits inside *yōcane*, and what does it mean? (***Yuj*** — "to yoke," the root of *yoga.*) What does **ನೆನೆ** mean, and what is its Tamil cousin doing? (**To remember**; *ninai* is Tamil's everyday "think.") Why does **ಗೊತ್ತು** take no *-ēne*? (**It is not a verb** — no person slot, so its knower goes into the dative.)

33.2 ಅರ್ಥಮಾಡಿಕೊ (arthamāḍiko) — "to understand," in three welded pieces

Yōcisuttēne was one borrowed noun with one Kannada suffix. The next verb is three separate words fused into one, and only the first is borrowed.

You'll want to know: ಅರ್ಥಮಾಡಿಕೊ

ಅರ್ಥಮಾಡಿಕೊ — *arthamāḍiko* — **to understand**

ನಾನು ಅರ್ಥಮಾಡಿಕೊಳ್ಳುತ್ತೇನೆ. — *nānu arthamāḍikoḷḷuttēne.* — "I understand."

Long, and worth saying slowly, because every piece has a name:
ಅರ್ಥ + **ಮಾಡಿ** + **-ಕೊ** → **ಅರ್ಥಮಾಡಿಕೊ**

- *artha* — "**meaning**," a Sanskrit noun taken in whole.
- **ಮಾಡಿ** (*māḍi*) — "**having done**," from the native **ಮಾಡು** (*māḍu*, "to do") of Chapter 5's *kelasa māḍu*, "to work."
- **-ಕೊ** (*-ko*) — "**and take it for yourself**."

Meaning — made — taken back. That is the whole word.

The letters in this word

ರ್ಥ stacks a silent *r* over ಥ (*tha*, breathy), and the long form holds its ಳ್ — *koḷ-ḷut-tē-ne*, the retroflex *ḷ* doubled.

Grammar Lens: -ಕೊ, the ending that gives the action back

-ಕೊ is a worn-down **ಕೊಳ್ಳು** (*koḷḷu*), a real verb meaning "to take **for oneself**." Glued onto another verb it says: whatever this action produced, the doer keeps. Tamil **கொள்** (*koḷ*) and Telugu **కొను** (*konu*) are the same ancient word at the same job.
Kannada has a second way to say it, with no doer at all:

> **ನನಗೆ ಅರ್ಥವಾಯಿತು.** — *nanage arthavāyitu.* — "**to me** it became meaning" — "**I understood**."

That is Chapter 6's dative subject, the frame that carried *nanage gottu*. So Kannada offers a choice: take the meaning yourself with *-ko*, or let it arrive at you in the dative.

The word, taken apart — its roots and family

Telugu builds understanding from the same parts: **అర్థం చేసుకో** (*arthaṃ cēsuko*) — *arthaṃ*, its own "do" verb, its own *-ko*. Tamil declines the loan for a native verb, **புரிந்துகொள்** (*purintukoḷ*), yet keeps the *koḷ* — the same instinct that left Tamil's everyday "think" as the inherited *ninai* while Kannada reached for a Sanskrit noun.

Your turn

Say these aloud:

- the three pieces — "artha … māḍi … ko"
- "arthamāḍikoḷḷuttēne" — I understand
- the dative way — "nanage arthavāyitu"
- two datives together — "nanage gottu … nanage arthavāyitu"
- this chapter so far — "yōcisuttēne … arthamāḍikoḷḷuttēne"

Before you move on

Name the three pieces of **ಅರ್ಥಮಾಡಿಕೊ** and say which one is borrowed. (*Artha*, *māḍi*, *-ko*; **artha** is Sanskrit, the other two are native.) What does *-ko* do, and which verb is it worn down from? (**Hands the action back to its doer**; *koḷḷu*.) Give the other way to say "I understood," and name the Chapter 6 sentence it matches. (*Nanage arthavāyitu*; *nanage gottu*.) Which sister keeps the ending but refuses the noun? (**Tamil** — *purintukoḷ*.)

33.3 ಓದು (ōdu) — "to read," and a warning about one letter

Arthamāḍikoḷḷuttēne — four syllables of ending. The next verb is two letters long, and the whole difficulty is keeping it apart from one you already have.

You'll want to know: ಓದು

ಓದು — *ōdu* — **to read**, and also **to study**

ನಾನು ಕನ್ನಡ ಓದುತ್ತೇನೆ. — *nānu kannaḍa ōduttēne.* — "I read Kannada."

Say it beside Chapter 32's **ನೋಡು** (*nōḍu*, "to see"). They differ by a single opening consonant and by which *d* they use:

Kannada	said	means
ಓದು	*ōdu*, plain *d*	read
ನೋಡು	*nōḍu*, curled *ḍ*	see

Ōdu also does the work English splits off as "study." Kannada does not keep the two apart: the same verb covers reading a page and reading for a degree.

The letters in this word

ಓ is the independent long *ō*, a letter in its own right rather than a sign hung on a consonant. Then **ದು** (*du*) — tongue at the teeth, not curled back. That is the one contrast to guard: *nōḍu* curls, *ōdu* does not.

The word, taken apart — its roots and family

Ōdu is inherited, not borrowed. The Dravidian dictionaries reconstruct ***ōtu***, "**to recite, to read**," and list the sisters: Tamil ஓது (*ōtu*) and Malayalam ഓതുക (*ōtuka*).
Notice the meaning that comes first in that gloss. The old sense is **reciting aloud** — reading in a world where you always said the words out loud — and Tamil's word stayed there, narrowing to the chanting of sacred verse. Tamil's everyday "read" became a different word, படி (*paṭi*); Telugu's is చదువు (*caduvu*).
So Kannada is the sister that left the inherited word in its ordinary job. That is the reverse of what happened with thinking, where Kannada took the loan and Tamil kept the old root as *ninai*. Neither language borrows on principle; each word made its own bargain.

Your turn

Say these aloud:

- the pair, slowly — "ōdu … nōḍu"
- "nānu kannaḍa ōduttēne" — I read Kannada
- the sisters' read-words — "ōdu … ōtu … paṭi … caduvu"
- the chapter so far — "yōcisuttēne, arthamāḍikoḷḷuttēne, ōduttēne"

Before you move on

Say "I read Kannada," then say "I see" — and name what separates the two verbs. (*Nānu kannaḍa ōduttēne*; *nōḍuttēne*; the opening *n-* and a **curled *ḍ*** against a **plain *d***.) What did the old root mean before it meant reading? (**Reciting aloud** — and Tamil's *ōtu* stayed there.) Which sister keeps the inherited word for everyday reading? (**Kannada**.) And which one keeps the inherited word for everyday thinking? (**Tamil**, with *ninai*.)

33.4 ಬರೆ (bare) — "to write," which began as scratching a line

Ōduttēne, "I read." Its partner sits one vowel from a verb you have had since Chapter 32.

You'll want to know: ಬರೆ

ಬರೆ — *bare* — **to write**, equally **to draw**

ನಾನು ಕನ್ನಡ ಬರೆಯುತ್ತೇನೆ. — *nānu kannaḍa bareyuttēne.* — "I write Kannada."

The trap: **ಬರು** (*baru*) is the come-stem under *bā*.

Kannada	means
ಬರೆಯುತ್ತೇನೆ *bareyuttēne*	I write
ಬರುತ್ತೇನೆ *baruttēne*	I come

Chapter 20's weather line takes the second — **ಮಳೆ ಬರುತ್ತಿದೆ** (*maḷe baruttide*), "rain is coming.

Grammar Lens: the glide a vowel-final stem needs

Why *bare-**y**-uttēne*? The stem ends in a vowel, and Kannada will not let two vowels collide, so it slips a **ಯ** (*y*) between:

bare + **y** + *-utt-* + *-ēne* → **ಬರೆಯುತ್ತೇನೆ**

Stems in *-u* need none: *ōdu* gives *ōduttēne* straight off. Stems in *-e* or *-i* take the glide. The six person endings are unchanged: *bareyuttīri*, *bareyuttāne*, *bareyuttāre*.

The word, taken apart — its roots and family

Bare is inherited, from a root reconstructed as ****warV-***, "**to scratch, to draw lines**." Every sister still means **draw** as readily as **write** — Tamil **வரை** (*varai*), Malayalam **വരയ്ക്കുക** (*varaykkuka*), Telugu **రాయు** (*rāyu*).

Now the front of those words: Tamil *v-*, Kannada *b-* — Chapter 32's law, the one that gave **ಬಾ** (*bā*) for *vā*. Kannada has two such laws:

law	Tamil or older	Kannada
$p \rightarrow h$	*pattu*, *pasir*	*hattu*, *hasiru*
$v \rightarrow b$	*vā*, *varai*	*bā*, *bare*

Between them they explain much of Kannada's distinctive sound.

What you've built: four more verbs, and ten in all

Chapter 32 handed you ಆರು (*āru*) verbs: *iru*, *hōgu*, *baru*, *tinnu*, *nōḍu*, *gottu*. Four more makes ಹತ್ತು (*hattu*), ten, and none needed a new machine. What they added was history: *yōcisu* a Sanskrit noun on a Kannada suffix, *arthamāḍiko* one welded to two native verbs, *ōdu* and *bare* inherited outright.

Your turn

Say these aloud:

- "nānu kannaḍa bareyuttēne" — I write Kannada
- the pair that must not merge — "bareyuttēne … baruttēne … maḷe baruttide"
- the root across the sisters — "bare … varai … rāyu"
- the two laws — "pattu, hattu; pasir, hasiru; vā, bā; varai, bare"
- the four, then the count — "yōcisuttēne, arthamāḍikoḷḷuttēne, ōduttēne, bareyuttēne … āru, hattu"

Before you move on

Say "I write Kannada," then "I come." (*Nānu kannaḍa bareyuttēne*; *baruttēne* — **one vowel** apart.) Why the *y*? (**The stem ends in a vowel**; *ōdu* needs none.) What did **warV-* mean, and what is Tamil's form? (**To scratch a line**; *varai*, its *v* against Kannada's *b*.) Run the chapter's four and count them onto Chapter 32's six. (*Yōcisuttēne, arthamāḍikoḷḷuttēne, ōduttēne, bareyuttēne* — *āru* plus four is *hattu*.)

Chapter 34

Four Verbs Between People

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can say I take, I ask and I help in Kannada, say I like Kannada in a sentence with no verb in it, place it beside the two other dative sentences I have built, and show that the frame it uses was Kannada's own before any Sanskrit word moved into it.
>
> *Say* ನನಗೆ ಕನ್ನಡ ಇಷ್ಟ *and unpack it as "to me, Kannada, a liking" with no verb at all; line it up against* ನನಗೆ ಗೊತ್ತು *and* ನನಗೆ ಬೇಕು*; show that the inherited bēku takes the same dative and answers Tamil vēṇṭum by the v → b law; and trace iṣṭa to the Indo-European root behind English ask, unrelated to the kēḷu of the same chapter.*

34.1 ತೆಗೆದುಕೊ (tegeduko) — "to take," in two verbs rather than one

Bareyuttēne, with its glide. The last chapter ended on writing. This one opens on the plainest thing a person does — taking something — and Kannada needs two verbs to say it.

You'll want to know: ತೆಗೆದುಕೊ

ತೆಗೆದುಕೊ — *tegeduko* — **to take**

ನಾನು ತೆಗೆದುಕೊಳ್ಳುತ್ತೇನೆ. — *nānu tegedukoḷḷuttēne.* — "I take it."

The ending is one you have already met. **-ಕೊ** is Chapter 33's *-ko*, the worn *koḷḷu*, "take for oneself" — the very ending inside *arthamāḍikoḷḷuttēne*. What is new is the verb underneath it:

- **ತೆಗೆ** (*tege*) — "**to pull, to draw towards oneself, to remove**."
- **ತೆಗೆದು** (*tegedu*) — the same verb as "**having pulled it out**."
- **ತೆಗೆದು + ಕೊ** — having pulled it out, **keep it**.

English has one flat word, *take*. Kannada narrates the whole gesture: the pulling, then the keeping.

The letters in this word

ತೆ-ಗೆ-ದು runs light and even — *te-ge-du*, all short. Then the ending lands heavy, its **ಳ್** held long: *koḷ-ḷut-tē-ne*. Light, light, light, then weight.

The word, taken apart — its roots and family

Both halves are old, and the dictionaries file each with its cousins. **ತೆಗೆ** sits in one entry with Telugu **తీయు** (*tīyu*), "to pull, to draw, to take." **ಕೊಳ್ಳು** sits in another with Tamil **கொள்** (*koḷ*) and Telugu **కొను** (*konu*). Put them together and the sisters line up:

language	"take"	built from
Kannada	*tegeduko*	*tege + ko*
Telugu	*tīsuko*	*tīsi + ko*
Tamil	*eṭuttukkoḷ*	*eṭuttu + koḷ*

Kannada and Telugu share **both** roots. Tamil shares only the second: its first verb is **எடு** (*eṭu*), a different word altogether.
That cuts against the family tree, where Kannada stands with Tamil and Malayalam and Telugu sits one branch over. A tree records descent, not the fate of every word.

Your turn

Say these aloud:

- the gesture in order — "tege … tegedu … tegedukoḷḷuttēne"
- the two verbs sharing an ending — "arthamāḍikoḷḷuttēne … tegedukoḷḷuttēne"
- the sisters' take-words — "tegeduko … tīsuko … eṭuttukkoḷ"
- with and without the glide — "bareyuttēne … ōduttēne"

Before you move on

Say "I take it," then name the two verbs inside it. (*Nānu tegedukoḷḷuttēne*; *tege*, "to pull out," and *koḷḷu*, "to keep for oneself.") Which other verb of yours carries the same ending? (*Arthamāḍikoḷḷuttēne.*) Which sister matches Kannada on both roots, and which on only one? (**Telugu** on both; **Tamil** on the second, with its own *eṭu* in front.) And why is that mildly surprising? (**The family tree** puts Kannada with Tamil, not with Telugu — descent does not decide every word.)

34.2 ಕೇಳು (kēḷu) — one verb for "ask" and for "hear"

Tegedukoḷḷuttēne took two verbs to say one English word. Now the opposite bargain: one Kannada verb covering two English ones.

You'll want to know: ಕೇಳು

ಕೇಳು — *kēḷu* — **to ask** — and **to hear, to listen**

ನಾನು ಕೇಳುತ್ತೇನೆ. — *nānu kēḷuttēne.* — "I ask." Or: "I hear."

Both readings are correct. Kannada is not being vague; it files the two acts under one verb. The stem ends in *-u*, so no glide.

The letters in this word

ಕೇ is **ಕ** (*ka*) with the long-*ē* sign; **ಳು** carries the retroflex **ಳ** of *ēḷu*, "seven." Hold that *ē*: *kē-ḷu*, not *ke-ḷu*.

Grammar Lens: how you tell which job it is doing

What settles the meaning is what stands beside the verb. Put a **person** next to it and it asks them; put a **sound** next to it and it hears that sound. Nothing in *kēḷuttēne* changes.
The polite imperative is the plain one you already build: **ಕೇಳಿ** (*kēḷi*) — "ask," or "listen," with the bare **-ಿ** ending of *kṣamisi*. And if you must be unambiguous, **ಪ್ರಶ್ನೆ ಕೇಳು** (*praśne kēḷu*) is "to ask a question.

The word, taken apart — its roots and family

Not a Kannada quirk. The Dravidian dictionaries reconstruct the root with **both senses at once** — "to hear, to ask" — and the sisters carry the pair: Tamil கேள் (*kēḷ*), Malayalam കേൾക്കുക (*kēḷkkuka*), Tulu *kēṇuni*.
Telugu is the odd one out. It splits the work between విను (*vinu*), "to hear," and అడుగు (*aḍugu*), "to ask."
Be careful how much that carries. Kannada, Tamil and Malayalam do sit on one branch of the family and Telugu on the next one over, so the split looks tidy. But the root reaches Telugu's own branch-mates Gondi and Kui: Telugu **dropped** a word its neighbours kept. Chapter 7 found the identical pattern in the numbers, where eight and nine are where Telugu wanders off.

Your turn

Say these aloud:

- "kēḷuttēne" — as "I ask", then as "I hear"
- the polite form — "kēḷi"
- the sisters who keep both senses — "kēḷu … kēḷ … kēḷkkuka"
- the sister who splits them — "vinu … aḍugu"
- three inherited verbs of yours — "ōduttēne, bareyuttēne, kēḷuttēne"

Before you move on

Give the two meanings of *kēḷuttēne*, and say what decides between them. (**I ask** and **I hear**; whatever stands **beside the verb** — a person or a sound.) Is the double job Kannada's own invention? (**No** — the root is reconstructed with both senses, and Tamil and Malayalam carry the pair too.) Which sister splits them, and what is the honest wording? (**Telugu**, *vinu* against *aḍugu* — it **dropped** the old word, since Gondi and Kui still have it.) Say "please ask." (*Kēḷi*.)

34.3 ಸಹಾಯ ಮಾಡು (sahāya māḍu) — "to help," a noun and a verb

Kēḷi — "ask," or "listen." Now the sentence you would most want a stranger to understand, and it is built on a pattern Chapter 5 already gave you.

You'll want to know: ಸಹಾಯ ಮಾಡು

ಸಹಾಯ ಮಾಡು — *sahāya māḍu* — **to help**, literally "**help-do**"

ನಾನು ಸಹಾಯ ಮಾಡುತ್ತೇನೆ. — *nānu sahāya māḍuttēne.* — "I help."

ಸಹಾಯ ಮಾಡಿ. — *sahāya māḍi.* — "**Please help.**"

The second of those is the one to keep loaded. It is the same bare **-ಿ** imperative that gave you *kēḷi*, sitting on the same *māḍu* that Chapter 5 used for **ಕೆಲಸ ಮಾಡು** (*kelasa māḍu*), "to work." Kannada builds a great many verbs this way: a noun in front, *māḍu* behind.

The letters in this word

ಸಹಾಯ has its weight in the middle — *sa-**hā**-ya* — and that **ಹ** is a real, breathed *h*, not a swallowed one. Then **ಮಾಡು** with its own long *ā* and the curled **ಡ**: *sa-hā-ya mā-ḍu*.

The word, taken apart — its roots and family

ಸಹಾಯ is Sanskrit **सहाय**, and the standard analysis splits it into **सह** (*saha*, "**with**") plus **अय** (*aya*, "**going**") — "**one who goes with**." A helper, at root, is a companion on the road.

That *saha* reaches back further, to an Indo-European root ****sem-***, "**one, together**" — the root behind English **same** and Latin *simul*.

Now the layering. *Sahāya* is Sanskrit; *māḍu* is native Dravidian; the two live in one Kannada verb. Chapter 20's **ಹವಾಮಾನ** (*havāmāna*) was the same trick with different parts, Persian *hava* welded to Sanskrit *māna*. Kannada does not keep its vocabularies in separate rooms — and the choice is per word, not per topic: helping came in from Sanskrit while asking stayed inherited, *kēḷu* arriving with both its senses already attached.

And the native word for help did not leave: **ನೆರವು** (*neravu*), "help, aid,"

is ordinary Kannada, and **ನೆರವಾಗು** (*neravāgu*) means "to be of help."

Your turn

Say these aloud:

- the one to keep loaded — "sahāya māḍi"
- "nānu sahāya māḍuttēne" — I help
- two imperatives, one ending — "kēḷi … sahāya māḍi"
- two hybrids — "havāmāna" then "sahāya māḍu"
- the native word beside it — "neravu"
- this chapter so far — "tegedukoḷḷuttēne, kēḷuttēne, sahāya māḍuttēne"

Before you move on

Say "please help," then "I help." (*Sahāya māḍi*; *nānu sahāya māḍuttēne*.) What are the two pieces of *sahāya*, and what did they mean? (*Saha*, "with," and *aya*, "going" — "**one who goes with**.") Which piece of *sahāya māḍu* is Sanskrit and which is native, and what earlier word was layered the same way? (*Sahāya* **Sanskrit**, *māḍu* **native**; *havāmāna*, Persian plus Sanskrit.) Name Kannada's own native word for help. (**ನೆರವು**, *neravu*.)

34.4 ನನಗೆ ಕನ್ನಡ ಇಷ್ಟ — "I like Kannada," with no verb in it

Tegedukoḷḷuttēne, *kēḷuttēne*, *sahāya māḍuttēne* — each ending on the bead for "I." The chapter's last sentence has no verb.

You'll want to know: the sentence

ನನಗೆ ಕನ್ನಡ ಇಷ್ಟ. — *nanage kannaḍa iṣṭa.* — "**to me** — Kannada — **a liking**."

ಇಷ್ಟ is a **noun**: "a liking, a thing desired." No *is*, no *like*. ಗೊತ್ತು behaved so too — a noun-like word with no person slot — so only the front word moves: *nanage*, *ninage*, *avanige*.

The letters in this word

ಷ್ಟ stacks ಷ (*ṣa*) over ಟ (*ṭa*), both retroflex.

Grammar Lens: the frame is native even where the word is not

Three sentences, one design, all from Chapter 6's dative subject:

to me ...	**it is**
nanage gottu, known	a fact
nanage kannaḍa iṣṭa, a liking	a taste
nanage bēku, wanted	a need

These **happen to you**, so the person sits in the dative and nothing acts.

The third settles a question the second raises. If *iṣṭa* is borrowed, is the frame? No. ಬೇಕು (*bēku*, "is wanted") is inherited Dravidian, takes the same dative, and answers Tamil வேண்டும் (*vēṇṭum*) by the $v \rightarrow b$ law behind *bā* and *bare*. Sanskrit only filled a slot.

The word, taken apart — its roots and family

ಇಷ್ಟ is Sanskrit इष्ट, past participle of इष् (*iṣ*), "**to desire**," from an Indo-European root whose English descendant is So the chapter holds two unrelated asking-words: the inherited *kēḷu*, with its double job, and this loan — as *sahāya* was borrowed and the take-word was not. Tamil takes no loan: எனக்குத் தமிழ் பிடிக்கும் (*enakkut tamiḻ piḍikkum*) rests on native பிடி (*piḍi*), "to grasp." Telugu borrowed: నాకు తెలుగు ఇష్టం (*nāku telugu iṣṭaṃ*).

Kannada's company here is not its family. Spanish says **me gusta el kannada**, "Kannada pleases me," with the liker in the dative; Italian says **mi piace**. Romance and Dravidian borrowed nothing from each other. They arrived at one shape independently.

Your turn

Say these aloud:

- "nanage kannaḍa iṣṭa" — to me, Kannada, a liking
- three likers, one unchanged word — "nanage … ninage … avanige"
- the three datives, then the Tamil cousin — "gottu … iṣṭa … bēku … vēṇṭum"
- the chapter — "tegedukoḷḷuttēne, kēḷuttēne, sahāya māḍuttēne, iṣṭa"

Before you move on

Say "I like Kannada," and how many verbs it holds. (*Nanage kannaḍa iṣṭa*; **none**.) Name the three datives. (*Nanage gottu*, a **fact**; *nanage kannaḍa iṣṭa*, a **taste**; *nanage bēku*, a **need**.) Is the frame borrowed with the word? (**No** — inherited *bēku* uses it, answering *vēṇṭum* by the $v \to b$ law.) Which English word is *iṣṭa*'s cousin? (**Ask** — and *kēḷu* is no relation.)

Chapter 35

Family and Friends

Modes: 🚗 **voice** (2) 🚗 **Hands-free start:** both lessons.

> ***By the end of this chapter:*** I can name my family as a group in Kannada and name a friend, and say which of the two words is native and which is a Sanskrit loan.
>
> *Say* ಇದು ನನ್ನ ಕುಟುಂಬ *and* ಇವನು ನನ್ನ ಸ್ನೇಹಿತ*, trace kuṭumba and snēhita back to Sanskrit, and set snēhita beside the native pair* ಗೆಳೆಯ/ಗೆಳತಿ*.*

35.1 ಕುಟುಂಬ (kuṭumba) — "family," the word the household words never needed

Nanage kannaḍa iṣṭa closed the last chapter on a sentence built from nothing but nouns. This chapter opens on the plainest nouns of all: the words for the people you would actually say that sentence to.

You'll want to know: ಕುಟುಂಬ

ಕುಟುಂಬ — *kuṭumba* — **family**

ನನ್ನ ಕುಟುಂಬ — *nanna kuṭumba* — "my family"

Nanna, "my," has been yours since Chapter 2.

The word, taken apart — its roots and family

ಕುಟುಂಬ is Sanskrit कुटुम्ब (*kuṭumba*), "family, household," carried into Kannada whole — the same kind of loan as ಇಷ್ಟ and ಸಹಾಯ. Chapter 12 gave you six words: ಅಪ್ಪ, ಅಮ್ಮ, and the four age-graded siblings ಅಣ್ಣ/ತಮ್ಮ, ಅಕ್ಕ/ತಂಗಿ. Every one is native Dravidian, and not one of them means "family" — each names a single specific person. Kannada never inherited a word for the group itself, so when it needed one, it reached for Sanskrit. The people came first, and stayed native; the collective came later, and came borrowed.

Your turn

- *Say it:* "nanna kuṭumba" — my family
- *Say it:* the six named people, then the borrowed group word — "appa, amma, aṇṇa, tamma, akka, tangi … kuṭumba"
- *Say it:* "nanage kannaḍa iṣṭa" — once more, no verb in it
- *Recall:* say *iru*
- *Read it:* ಹೋಗು
- *Recall:* say *bā / baru*

Before you move on

Say "my family." (*Nanna kuṭumba.*) Is *kuṭumba* native Dravidian or a loan? (**A Sanskrit loan**, like *iṣṭa* and *sahāya.*) Name Chapter 12's six family words. (*Appa, amma, aṇṇa, tamma, akka, tangi.*) Which of those six means "family" as a group? (**None of them** — that's exactly the gap *kuṭumba* fills.)

35.2 ಸ್ನೇಹಿತ (snēhita) — "friend," built out of the word for oil

Kuṭumba named the people you are born into. Not every important person in your life is one of them.

You'll want to know: ಸ್ನೇಹಿತ

ಸ್ನೇಹಿತ — *snēhita* — **friend** (a woman friend is ಸ್ನೇಹಿತೆ, *snēhite*)

ಇವನು ನನ್ನ ಸ್ನೇಹಿತ. — *ivanu nanna snēhita.* — "He is my friend."

The word, taken apart — its roots and family

ಸ್ನೇಹಿತ is Sanskrit स्नेहित (*snēhita*), built on स्नेह (*snēha*). *Snēha*'s **first** meaning is not "affection" at all — it is **"oil, unctuousness, smoothness."** Only from there did it stretch to "fondness, love": a substance that makes things slide smoothly together became the word for whatever binds two people the same way.
Kannada also holds an inherited word for the same idea, and it did not retire when the Sanskrit one arrived: ಗೆಳೆಯ (*geḷeya*, a male friend) and ಗೆಳತಿ (*geḷati*, a female friend) are ordinary, everyday Dravidian words, sitting right beside *snēhita* the way ನೆರವು sits beside *sahāya*.

Your turn

- *Say it:* "ivanu nanna snēhita" — he is my friend
- *Say it:* the loan, then the native pair — "snēhita … geḷeya, geḷati"
- *Say it:* oil, then affection — "snēha: oil … snēha: love"
- *Say it:* family, then friend — "kuṭumba … snēhita"
- *Read it:* ತಿನ್ನು
- *Recall:* say *nōḍu*
- *Read it:* ಗೊತ್ತು

Before you move on

Say "he is my friend." (*Ivanu nanna snēhita.*) What did *snēha* mean before it meant "affection"? (**Oil, smoothness.**) Name Kannada's native word for a friend. (ಗೆಳೆಯ *geḷeya*, or ಗೆಳತಿ *geḷati* for a woman.) Is *kuṭumba* the people you choose, or the people you're born into? (**Born into** — *snēhita* is who you choose.)

Chapter 36

One Root, Three Endings

Modes: **voice** (3) **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can say child, son and daughter in Kannada, and show how one shared root with three different endings does the job Chapter 12 needed four separate words for.
>
> *Line up* ಮಗು, ಮಗ *and* ಮಗಳು *against Proto-Dravidian* maka, and contrast gender-by-ending here with Chapter 12's four unrelated age-graded sibling words.

36.1 ಮಗು (magu) — "child," before it picks a gender

> *Snēhita* and *geḷeya* were two words for one idea. This word is the opposite kind of pair-maker: one word that the next two lessons will split in two.

You'll want to know: ಮಗು

ಮಗು — *magu* — **baby, child** (no gender specified)

ನನ್ನ ಮಗು — *nanna magu* — "my child"

The word, taken apart — its roots and family

ಮಗು goes back to Proto-Dravidian ***maka**, "child" — a plain root with no gender marked on it at all. Hold that root in mind: the next lesson adds one ending to it and gets "son"; the one after adds a

different ending and gets "daughter." Chapter 12 solved the parallel problem — telling siblings apart — with four completely separate words. This root solves a smaller problem the opposite way: one shape, several endings.

Your turn

- *Say it:* "nanna magu" — my child
- *Say it:* the root to hold onto — "maka"
- *Say it:* friend, then child — "snēhita … magu"
- *Recall:* say *yōcisu*

Before you move on

Say "my child." (*Nanna magu.*) Does *magu* specify a gender? (**No.**) What is the Proto-Dravidian root underneath it, and what happens to it next? (***maka*** — the next two lessons put different endings on it for "son" and "daughter.")

36.2 ಮಗ (maga) — "son," the same root with one vowel doing the work

Maga, *magu* — hold the root steady and change almost nothing.

You'll want to know: ಮಗ

ಮಗ — *maga* — **son**

ಇವನು ನನ್ನ ಮಗ. — *ivanu nanna maga.* — "He is my son."

Set beside *magu*: ಮಗು *magu* → ಮಗ *maga*. The same three letters, minus the length on the final vowel — the plain, inherent *-a* now standing for "male."

The word, taken apart — its roots and family

Maga descends from the same Proto-Dravidian ***maka** as *magu*. The sisters carry a longer form for "son" — reconstructed as ***magan** —

and Kannada is the branch that wore the ending down to a single open vowel. Tamil keeps more of the shape: மகன் (*makaṉ*), "son."

Your turn

- *Say it:* "ivanu nanna maga" — he is my son
- *Say it:* the near pair — "magu … maga"
- *Say it:* Kannada's worn form, then Tamil's fuller one — "maga … makaṉ"
- *Read it:* ಅರ್ಥಮಾಡಿಕೊ

Before you move on

Say "he is my son." (*Ivanu nanna maga.*) How does *maga* differ from *magu*? (**One vowel** — the plain *-a* standing for "male.") What does Tamil's fuller form for "son" look like? (மகன் *makaṉ* — Kannada wore the ending down to just the vowel.)

36.3 ಮಗಳು (magaḷu) — "daughter," one more ending on the same root

Magu gave you the plain root, *maga* the male ending. One more ending closes the set.

You'll want to know: ಮಗಳು

ಮಗಳು — *magaḷu* — **daughter**

ಇವಳು ನನ್ನ ಮಗಳು. — *ivaḷu nanna magaḷu.* — "She is my daughter."

Grammar Lens: gender by ending, not by a new word

Line the three up:

Kannada	means
ಮಗು *magu*	child, no gender
ಮಗ *maga*	son
ಮಗಳು *magaḷu*	daughter

One root, three endings. Chapter 12 solved a different split — **older** against **younger** sibling — the opposite way, with **four unrelated words**, ಅಣ್ಣ/ತಮ್ಮ and ಅಕ್ಕ/ತಂಗಿ sharing no root at all. Gender here rides on a suffix; age there needed a whole new word every time.

The word, taken apart — its roots and family

Magaḷu continues Proto-Dravidian ***makaḷ***, "daughter." Tamil மகள் (*makaḷ*) and Malayalam മകൾ (*makaḷ*) are close to identical to Kannada's own form — this branch of the family barely touched the word at all.

Your turn

- *Say it:* "ivaḷu nanna magaḷu" — she is my daughter
- *Say it:* the set of three — "magu … maga … magaḷu"
- *Say it:* one root three endings, then four words no root — "maga, magaḷu … aṇṇa, tamma, akka, tangi"
- *Say it:* the sisters, near-identical — "magaḷu … makaḷ … makaḷ"
- *Recall:* say *ōdu*

Before you move on

Say "she is my daughter." (*Ivaḷu nanna magaḷu.*) Name the three words built on *maka* and what each means. (*Magu* — child; *maga* — son; *magaḷu* — daughter.) How does that differ from how Chapter 12 split siblings by age? (**Chapter 12 used four unrelated words**; this set uses **one root and different endings**.) How close is Tamil's word for daughter? (**Nearly identical** — *makaḷ*.)

Chapter 37

Four Words on the Face

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name my eye, ear, nose and mouth in Kannada, and say which of the four the Dravidian family agrees on closely and which one splits.
>
> *Name* ಕಣ್ಣು, ಕಿವಿ, ಮೂಗು *and* ಬಾಯಿ*, and finally explain* ಬಾಯಿ *— the word this book already used twice, unglossed, as proof of the* $v \to b$ *law behind* ಬಾ *and* ಬರೆ*.*

37.1 ಕಣ್ಣು (kaṇṇu) — "eye," the same word across four languages

> *Tale, kai* — Chapter 13's head and hand, and nothing more of the body since. This chapter adds four words to that short list, starting above the nose.

You'll want to know: ಕಣ್ಣು

ಕಣ್ಣು — *kaṇṇu* — **eye**

ನನ್ನ ಕಣ್ಣು. — *nanna kaṇṇu.* — "My eye."

The word, taken apart — its roots and family

ಕಣ್ಣು continues Proto-Dravidian ***kaṇ***, "eye." Tamil கண் (*kaṇ*) and Malayalam കണ്ണ് (*kaṇṇŭ*) sit close beside it — and Telugu కన్ను (*kannu*) sits closest of all, nearly identical letter for letter. Four

languages that otherwise pull apart on nearly everything — tense, the $p \to h$ law, half their vocabulary — agree almost completely on this one, the same closeness the last chapter found between Kannada's *magaḷu* and Tamil and Malayalam's own *makaḷ*.

Your turn

- *Say it:* "nanna kaṇṇu" — my eye
- *Say it:* the four sisters, nearly one word — "kaṇṇu … kaṇ … kaṇṇŭ … kannu"
- *Say it:* two more near-matches — "magaḷu, makaḷ … kaṇṇu, kaṇ"
- *Say it:* three body words now — "tale, kai, kaṇṇu"
- *Recall:* say *bare*

Before you move on

Say "my eye." (*Nanna kaṇṇu.*) Which sister matches Kannada's word almost exactly? (**Telugu** — *kannu.*) Which earlier word showed this same closeness with Tamil and Malayalam? (ಮಗಳು, *magaḷu.*) Name the body words you have now. (*Tale*, head; *kai*, hand; *kaṇṇu*, eye.)

37.2 ಕಿವಿ (kivi) — "ear," where Tamil's everyday word actually diverges

Kaṇṇu matched all three sisters closely. This one is honest about matching only some of them.

You'll want to know: ಕಿವಿ

ಕಿವಿ — *kivi* — **ear**

ನನ್ನ ಕಿವಿ. — *nanna kivi.* — "My ear."

The word, taken apart — its roots and family

కివి continues Proto-Dravidian ***kewi**, "ear." Telugu's everyday word **చెవి** (*cevi*) is the same root, and so is Tamil's — but only in its **literary** register: **செவி** (*cevi*) shows up in poetry and formal speech, while ordinary spoken Tamil reaches for an unrelated word instead, **காது** (*kātu*). It is the same honest split Chapter 34 found in **కేళ్**/*kēḷ* against Telugu's *vinu* and *aḍugu*: a shared root can go on living in one register of a language while everyday speech moves on to something else.

Your turn

- *Say it:* "nanna kivi" — my ear
- *Say it:* the shared root's two lives — "cevi, literary … kātu, everyday"
- *Say it:* eye, then ear — "kaṇṇu … kivi"
- *Read it:* **తేగెదుకొ**

Before you move on

Say "my ear." (*Nanna kivi.*) Does everyday spoken Tamil use the same root as *kivi*? (**No** — it uses *kātu*; the shared root *cevi* survives mostly in literary Tamil.) Which earlier Kannada word split the same way? (**కేళ్**/*kēḷu* — kept by three sisters, dropped in Telugu's everyday speech.)

37.3 ಮೂಗು (mūgu) — "nose," where Telugu is the one that drifts

Kivi split the family down a register line. This word splits it a different way.

You'll want to know: ಮೂಗು

ಮೂಗು — *mūgu* — **nose**

ನನ್ನ ಮೂಗು. — *nanna mūgu.* — "My nose."

The word, taken apart — its roots and family

ಮೂಗು continues Proto-Dravidian ***mūnk(k)u***, "nose." Tamil மூக்கு (*mūkku*) and Malayalam മൂക്ക് (*mūkkŭ*) sit close beside Kannada's own form. Telugu is the outlier this round: ముక్కు (*mukku*) is treated as a slightly irregular reflex, likely blended with a separate word for "face." Ear put Telugu with the group and split Tamil's registers; nose does the opposite — Telugu drifts, and Tamil and Malayalam hold the line.

Your turn

- *Say it:* "nanna mūgu" — my nose
- *Say it:* the close sisters, then the drifting one — "mūkku, mūkkŭ … mukku"
- *Say it:* ear, then nose — "kivi … mūgu"
- *Recall:* say *kēḷu*

Before you move on

Say "my nose." (*Nanna mūgu.*) Which sister drifts from the shared root this time? (**Telugu** — *mukku*, likely blended with its word for "face.") Which two sisters hold the root closely? (**Tamil and Malayalam** — *mūkku*, *mūkkŭ*.)

37.4 ಬಾಯಿ (bāyi) — "mouth," a word you've already met twice

Bā, come; *bare*, write. Both chapters used one more word in passing, to prove the same sound law, and neither one told you what it meant.

You'll want to know: ಬಾಯಿ

ಬಾಯಿ — *bāyi* — **mouth**

ನನ್ನ ಬಾಯಿ. — *nanna bāyi.* — "My mouth."

Four body words now: *tale*, *kai*, *kaṇṇu*, *kivi*, *mūgu*, *bāyi* — six.

The word, taken apart — its roots and family

ಬಾಯಿ answers Tamil வாய் (*vāy*), "mouth," through the exact law Chapter 32 gave you: word-initial Tamil *v-* becomes Kannada *b-*. You have already seen this pair once, sitting quietly inside Chapter 32's etymology note for ಬಾ, and again inside Chapter 33's for ಬರೆ — both times as a worked example, neither time explained. Here is what it means:

Tamil	Kannada	meaning
vā	*bā*	come
varai	*bare*	write, draw
vāy	*bāyi*	mouth

Three clean proofs of one law, and this lesson finally cashes in the third.

Your turn

- *Say it:* "nanna bāyi" — my mouth
- *Say it:* the three proofs — "vā, bā … varai, bare … vāy, bāyi"
- *Say it:* all six body words — "tale, kai, kaṇṇu, kivi, mūgu, bāyi"
- *Read it:* ಸಹಾಯ ಮಾಡು

Before you move on

Say "my mouth." (*Nanna bāyi.*) Which two earlier chapters already used this exact word, without explaining it? (**Chapter 32's** *bā* note and **Chapter 33's** *bare* note.) Give the law it proves, and its other two examples. (**Word-initial *v-* becomes *b-*** — *vā* → *bā*, *varai* → *bare*.)

Chapter 38

The Heart

Modes: **voice** (1) **eyes** (1) **pen** (1) **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can name my heart in Kannada and say why it is a genuine Indo-European cousin of the English word, not just a resemblance.
>
> *Say* ನನ್ನ ಹೃದಯ*, read the vocalic-r sign* ೃ *against Chapter 14's independent* ಋ*, and trace hṛdaya to the same Proto-Indo-European root as English heart, Latin cor and Greek kardía.*

38.1 ಹೃದಯ (hṛdaya) — "heart," a real cousin of the English word

Six body words so far, all Dravidian. This one is Sanskrit — and it hides the closest kinship to English that this whole book has found.

You'll want to know: ಹೃದಯ

ಹೃದಯ — *hṛdaya* — **heart**

ನನ್ನ ಹೃದಯ. — *nanna hṛdaya.* — "My heart."

The letters in this word

(Skip this if you already read Kannada.) ಹೃ is ಹ (*ha*) carrying a sign you have not met: ೃ, the **vocalic-r** vowel sign, said *ṛ* — a short, tapped "ri."

Chapter 14 taught this same sound as a full **independent** letter, ಋ, at the front of ಋತು (*ṛtu*, "season"), because a word can only open with the independent form. Here the sound falls in the middle of a word, so it rides on a consonant as the small sign ೃ instead: ಹ + ೃ = ಹೃ, *hṛ*. Same sound, two different shapes, depending only on where in the word it lands.

The word, taken apart — its roots and family

ಹೃದಯ is Sanskrit हृदय (*hṛdaya*), from Proto-Indo-European ***ḱērd-**. That root also gave English **heart**, Latin **cor** (behind English *courage* and *cordial*), and Greek **kardía** (behind *cardiac*). Every earlier cross-family match in this book — *iṣṭa* and *ask*, *sahāya* and *same*, Spanish's *me gusta* — was two languages landing on the same idea by accident, unrelated in ancestry. This one is different: Sanskrit and English are both **Indo-European**, so *hṛdaya* and *heart* are not a coincidence. They are real cousins, descended from the very same word.

Your turn

- *Say it:* "nanna hṛdaya" — my heart
- *Say it:* the vocalic-r, word-middle and word-initial — "hṛ … ṛtu"
- *Say it:* the real cousins — "hṛdaya … heart … cor … kardía"
- *Say it:* seven body words now — "tale, kai, kaṇṇu, kivi, mūgu, bāyi, hṛdaya"
- *Recall:* say *kuṭumba*

Before you move on

Say "my heart." (*Nanna hṛdaya.*) Where else have you seen the vocalic-*r* sound, and in what shape? (**Chapter 14's** *ṛtu* — as the **independent** letter ಋ, word-initially.) Is *hṛdaya*'s match with English *heart* an accident, like *iṣṭa* and *ask*? (**No** — Sanskrit and English are both **Indo-European**; this is real shared ancestry.) Name two other English words from the same root. (**Cardiac**, from Greek; **courage** or **cordial**, from Latin.)

38.2 ನಮಃ (namaḥ) — a salutation, bowing

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ನಮಃ

ನಮಃ — *namaḥ* — "a salutation, bowing".

Say it: *namaḥ*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ◌ಃ, and writes it on its own.

The word, taken apart — its roots and family

ನಮಃ (*namaḥ*) is Sanskrit *namas*, "bow, adoration", taken over whole as a learned loan, a tatsama (CDIAL 6958). *Namaḥ* is the shape Sanskrit gives *namas* at the end of a phrase, where the final *-s* becomes a breath.

Your turn

Say these aloud:

- *namaḥ*
- *namaḥ*, and what it means

Before you move on

What is "a salutation, bowing"? (**ನಮಃ**, *namaḥ*.)

38.3 ◌ಃ — one character, two dots, a breath at the end

Before the new one: ◌ೃ — where does it sit, and which standing letter is it the other half of?

One character this time. It has a partner you met long ago, and the two are easiest to learn side by side.

Script you'll notice: ಃ

ಃ — two dots, one above the other, sitting after a syllable.

Kannada has **two marks that ride at the end of a syllable** rather than standing as letters. You already read one:

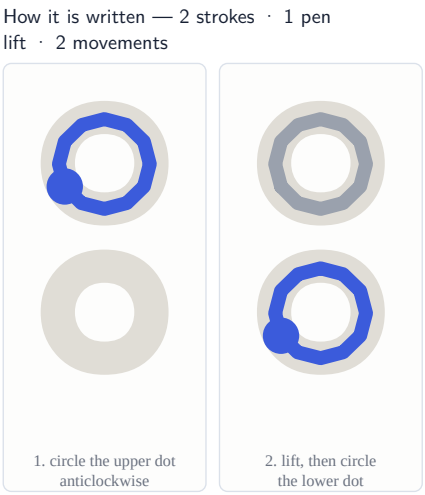

- ಂ — one small circle. Turns the end of the syllable **nasal**, the sound in the middle of ಸಂತೋಷ *santōṣa*.
- ಃ — two dots. Adds a **breath**, an *h* let out after the vowel.

Say *santōṣa* and feel the air go up into your nose on the ಂ. Now say **ah** and let it fall away as a soft *ha*. That falling breath is what the two dots are for.

Hold the two marks as a pair: neither is a letter you can sound out alone, and both attach to what came before them.

Where you will meet it. Rarely, and almost always ending a word Kannada borrowed from Sanskrit. Knowing the two dots on sight is enough.

Writing: ಃ — follow the numbered strip

Stroke order after Gopala Krishna A, Kannada-Alphabet-Aha.gif, repeated animation of Kannada visarga ಃ, 569 frames, 22.76 seconds (Wikimedia Commons, 2 June 2016)
This order is attested, not standardised; the source records where it varies.

How ಃ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ◌ಃ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these two marks and say which one turns the syllable nasal

  ◌ಂ · ◌ಃ

- *Trace it:* ◌ಃ three times, letting a soft breath out as you finish each one
- *Look:* at **ಸಂತೋಷ** and find the other mark inside it
- *Say it:* the nasal one, then the breathed one, and name what each adds

Before you move on

Which character is this — ◌ಃ, and what does it add to the syllable before it? (**A breath, an *h* after the vowel**.) Which mark is its partner, and what does that one add? (◌ಂ, a **nasal**.)

Chapter 39

Tea, Coffee, Milk

Modes: **voice** (2) **eyes** (1) **Hands-free start:** all 3 lessons.

> ***By the end of this chapter:*** I can politely ask for tea, coffee or milk in Kannada, and trace each word along the road it travelled to get here.
>
> *Ask* ದಯವಿಟ್ಟು ಚಹಾ, ಕಾಫಿ *or* ಹಾಲು, *follow chā through Persian and kāphi through five languages, then explain hālu — the word Chapter 32 already recited unglossed as proof of the p → h law.*

39.1 ಚಹಾ (cahā) — "tea," which walked to Kannada rather than sailed

Seven body words done. Now the drink you would politely ask for first, in any Karnataka home.

You'll want to know: ಚಹಾ

ಚಹಾ — *cahā* — **tea**

ದಯವಿಟ್ಟು ಚಹಾ. — *dayaviṭṭu cahā.* — "Tea, please."

Dayaviṭṭu has been yours since Chapter 8.

The word, taken apart — its roots and family

ಚಹಾ goes back to Northern Chinese **chá**, carried overland along Central Asian trade routes into Persian چای (*chāy*), and from Persian into Kannada and most of North and South India alike. That is the

very same road — Chinese into Persian, Persian into Kannada — that Chapter 20's **ಹವಾಮಾನ** took for its own first half, *hava*.
Tea that instead reached Europe by **sea** kept a different Chinese form, from the southern coast, which is why English says **tea** and French says *thé* — one word, two roads, "chai" by land and "tea" by sea.

Your turn

- *Say it:* "dayaviṭṭu cahā" — tea, please
- *Say it:* the road — "chá … chāy … cahā"
- *Say it:* two Persian loans — "hava … cahā"
- *Say it:* land against sea — "chai … tea"
- *Recall:* say *snēhita*

Before you move on

Say "tea, please." (*Dayaviṭṭu cahā.*) Name the three languages *cahā* passed through, in order. (**Chinese**, then **Persian**, then **Kannada**.) Which earlier Kannada word took the same Persian road? (**ಹವಾಮಾನ**, weather.) Why does English say "tea" instead of "chai"? (**It arrived by sea**, carrying a different Chinese form.)

39.2 ಕಾಫಿ (kāphi) — "coffee," the longest chain of loans in this book

Cahā crossed two languages to reach Kannada. This drink crossed four.

You'll want to know: ಕಾಫಿ

ಕಾಫಿ — *kāphi* — **coffee**

ದಯವಿಟ್ಟು ಕಾಫಿ. — *dayaviṭṭu kāphi.* — "Coffee, please."

The letters in this word

(Skip this if you already read Kannada.) ಫ (*pha*) is new: ಪ (*pa*) with an aspirated puff of breath added, the same relationship ಕ/ಖ and ತ/ಥ already carry. You met plain ಪ back in Chapter 20's ಇಪ್ಪತ್ತು (*ippattu*, "twenty") — one of the rare places a native word still opens with *p*, since most word-initial *p*'s became *h*. ಫ never went through that law at all: it shows up almost only in borrowed words like this one, holding the foreign sound steady.

The word, taken apart — its roots and family

ಕಾಫಿ traces to Arabic قهوة (*qahwa*), into Ottoman Turkish **kahve**, into Dutch **koffie**, into English **coffee**, into Kannada **kāphi** — five languages deep, the longest chain of loans in this book, longer even than *cahā*'s three-language road through China and Persia. South India's filter-coffee tradition is comparatively recent, arriving through colonial-era sea trade — the newer drink, on the older-sounding name.

Your turn

- *Say it:* "dayaviṭṭu kāphi" — coffee, please
- *Say it:* plain and aspirated — "pa … pha"
- *Say it:* the chain — "qahwa … kahve … koffie … coffee … kāphi"
- *Say it:* two drinks, two roads — "cahā, three languages … kāphi, five"
- *Read it:* ಮಗು

Before you move on

Say "coffee, please." (*Dayaviṭṭu kāphi.*) Where did you meet plain ಪ before, and what makes ಫ different? (**Chapter 20's** *ippattu*; ಫ adds a puff of breath and shows up mostly in loanwords.) Name the chain of languages *kāphi* passed through. (**Arabic, Turkish, Dutch, English, Kannada** — five deep.) Which drink's name travelled further, *cahā*'s or *kāphi*'s? (***Kāphi***'s — five languages against three.)

39.3 ಹಾಲು (hālu) — "milk," a word you've already recited without knowing it

Two borrowed drinks in a row. This one is native — and it has been sitting inside a sentence you already said, back in Chapter 32, without anyone telling you what it meant.

You'll want to know: ಹಾಲು

ಹಾಲು — *hālu* — **milk**

ದಯವಿಟ್ಟು ಹಾಲು. — *dayaviṭṭu hālu.* — "Milk, please."

The word, taken apart — its roots and family

ಹಾಲು continues Old Kannada *pālu*, from Proto-South-Dravidian ***pāl**, "milk." Tamil keeps the *p* untouched: **பால்** (*pāl*).
Chapter 32 already gave you this exact pair. Teaching *hōgu*, it listed four proofs of the $p \rightarrow h$ law and asked you to say all four aloud:

pōgu … hōgu, *pattu … hattu*, ***pāl … hālu***, *peyar … hesaru*

You have said *pāl … hālu* before. Nobody told you then that it meant "milk" — exactly the gap Chapter 37 found with *bāyi*.
Hālu is not only a drink on its own: turmeric stirred into warm milk, **ಅರಿಶಿನ ಹಾಲು** (*ariśina hālu*), is an everyday Karnataka drink, its color Chapter 22's other word, **ಹಳದಿ**.

Your turn

- *Say it:* "dayaviṭṭu hālu" — milk, please
- *Say it:* Chapter 32's four pairs again — "pōgu, hōgu … pattu, hattu … pāl, hālu … peyar, hesaru"
- *Say it:* turmeric milk, and its color — "ariśina hālu … haḷadi"
- *Say it:* three drinks now — "cahā, kāphi, hālu"
- *Recall:* say *maga*

Before you move on

Say "milk, please." (*Dayaviṭṭu hālu.*) Where did you already say *pāl … hālu*, before knowing what it meant? (**Chapter 32's** *hōgu* lesson, reciting the four $p \to h$ pairs.) Name all four pairs. (*Pōgu/ hōgu*, *pattu/hattu*, *pāl/hālu*, *peyar/hesaru.*) What is *ariśina hālu*, and which earlier chapter's color names it? (**Turmeric milk** — Chapter 22's **ಹಳದಿ**, yellow.)

Chapter 40

A Meal

Modes: 👁 **eyes** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can say I am having a meal in Kannada, using the word Chapter 32 used once and never explained, and place it at the hour of two greetings I already know.
>
> *Say* ಊಟ ಮಾಡು*, explain ūṭa against everyday tinnu, read the independent vowel* ಊ*, and place the word at the hour of* ಶುಭ ಮಧ್ಯಾಹ್ನ *and before* ಶುಭ ರಾತ್ರಿ*.*

40.1 ಊಟ (ūṭa) — "a meal," the word that closes this chapter's table

Chapter 32 taught you *tinnu*, "to eat," and then, in a single line, reached for a different word for a **full** meal — without ever teaching that word. Fourteen chapters later, here it is.

You'll want to know: ಊಟ

ಊಟ — *ūṭa* — **a meal**

ಊಟ ಮಾಡು. — *ūṭa māḍu.* — "to have a meal" (literally, "meal-do")

The letters in this word

(Skip this if you already read Kannada.) ಊ is the **independent** long-*ū* vowel — the shape a word uses when it *opens* with this sound, the way ಋ

opened *ṛtu* back in Chapter 14. Every other long-*ū* you have read so far rode on a consonant as the small sign ೂ; here, with no consonant in front of it to carry, the vowel stands alone in its full independent form.

The word, taken apart — its roots and family

ಊಟ is native Dravidian, a root Tulu keeps as its own everyday word for food, *ūṭa*. Chapter 32 used the phrase ಊಟ ಮಾಡು to mark a **full** meal, set against everyday ತಿನ್ನು — the same verb Tamil narrowed down to chewing and snacking — but the book left *ūṭa* itself unexplained until today.

A meal keeps close company with greetings you already own. ಶುಭ ಮಧ್ಯಾಹ್ನ is wished at the very hour of the midday *ūṭa*; ಶುಭ ರಾತ್ರಿ is wished once the evening one is over. Two greetings that name the hour; one word for what fills it.

Your turn

- *Say it:* "ūṭa māḍu" — to have a meal
- *Say it:* everyday against full — "tinnuttēne … ūṭa māḍu"
- *Say it:* the hour and the meal — "śubha madhyāhna … ūṭa"
- *Say it:* the meal and the goodnight after it — "ūṭa … śubha rātri"
- *Say it:* this chapter's three drinks, once more — "cahā, kāphi, hālu"
- *Recall:* say *magaḷu*

Before you move on

Say "to have a meal." (*Ūṭa māḍu.*) Which chapter used that exact phrase already, without explaining *ūṭa*? (**Chapter 32's** *tinnu* lesson.) How does *ūṭa* differ from *tinnu*? (*Tinnu* is **everyday eating**; *ūṭa* is a **full meal**.) Name the two greetings that keep company with mealtimes, and which meal each marks. (ಶುಭ ಮಧ್ಯಾಹ್ನ, the midday meal; ಶುಭ ರಾತ್ರಿ, after the evening one.)

Chapter 41

Pointing, and Asking

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can point at something in Kannada and ask who or where it is — and I can say what the six words have in common.
>
> *Say the near word, the far word and the question word in a row, and name the part that changed.*

41.1 ಇದು (idu) — this one — the thing near me

You can already name things. This is how you POINT at them.

You'll want to know: ಇದು

ಇದು — *idu* — this one — the thing near me.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner, the far one, comes in the next lesson. The two of them differ by one sound at the front — **i-** for near — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

ಇದು (*idu*) is native Dravidian: the near-pointing base *i-* with an ending meaning "thing". DEDR 410 lists Kannada *idu* with Tamil *itu*.

Your turn

- *Say it:* "ಇದು" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *kaṇṇu*

Before you move on

What is *idu*? (this one — the thing near me.) What sound does it start with, and does that sound mean near, far, or a question? (**i-** — near.)

41.2 ಅದು (adu) — that one — the thing over there

You can already name things. This is how you POINT at them.

You'll want to know: ಅದು

ಅದು — *adu* — that one — the thing over there.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner is **ಇದು** *idu*, which you have just met. The two of them differ by one sound at the front — **a-** for far — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

ಅದು (*adu*) is native Dravidian: the far-pointing base *a-* with an ending meaning "thing". DEDR 1 lists Kannada *adu* with Tamil *atu*.

Your turn

- *Say it:* "ಅದು" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Read it:* **ಕಿವಿ**

Before you move on

What is *adu*? (that one — the thing over there.) What sound does it start with, and does that sound mean near, far, or a question? (**a-** — far.)

41.3 ಇಲ್ಲಿ (illi) — here — where I am

You can already name things. This is how you POINT at them.

You'll want to know: ಇಲ್ಲಿ

ಇಲ್ಲಿ — *illi* — here — where I am.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner, the far one, comes in the next lesson. The two of them differ by one sound at the front — **i-** for near — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

ಇಲ್ಲಿ (*illi*) is native Dravidian: the near-pointing base *i-* with an ending for place. DEDR 410 lists *illi* itself, "in this place, here".

Your turn

- *Say it:* "ಇಲ್ಲಿ" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *mūgu*

Before you move on

What is *illi*? (here — where I am.) What sound does it start with, and does that sound mean near, far, or a question? (**i-** — near.)

41.4 ಅಲ್ಲಿ (alli) — there — where I am not

You can already name things. This is how you POINT at them.

You'll want to know: ಅಲ್ಲಿ

ಅಲ್ಲಿ — *alli* — there — where I am not.

Say it, and picture the thing it lands on as you say it. That is the whole word: it does not mean anything on its own, it means whatever the speaker is pointing at.

Its partner is ಇಲ್ಲಿ *illi*, which you have just met. The two of them differ by one sound at the front — **a-** for far — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

ಅಲ್ಲಿ (*alli*) is native Dravidian: the far-pointing base *a-* with an ending for place. DEDR 1 lists *alli* itself, "in that place, there".

Your turn

- *Say it:* "ಅಲ್ಲಿ" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Read it:* ಬಾಯಿ

Before you move on

What is *alli*? (there — where I am not.) What sound does it start with, and does that sound mean near, far, or a question? (**a-** — far.)

41.5 ಯಾರು (yāru) — who? — asking about a person

You can already name things. This is how you ASK about them.

You'll want to know: ಯಾರು

ಯಾರು — *yāru* — who? — asking about a person.

Say it with an asking voice. It points at no one: it asks your listener to name the person.

yāru opens with **yā-**, not with the **i-** of near or the **a-** of far that the four words before it share. It is the one word in this chapter outside that pattern, so learn it as itself: the asking word for people.

The word, taken apart — its roots and family

ಯಾರು (*yāru*) is native Dravidian, built on the question base *yā-*. DEDR 5151 lists Kannada *yār* with Tamil *yār*.

Your turn

- *Say it:* "ಯಾರು" three times, asking about a different person each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *hṛdaya*

Before you move on

What is *yāru*? (who? — asking about a person.) What sound does it start with: the i- of near, the a- of far, or neither? (**Neither** — **yā-**; it asks about a person.)

41.6 ಎಲ್ಲಿ (elli) — where? — asking about a place

You can already name things. This is how you ASK about them.

You'll want to know: ಎಲ್ಲಿ

ಎಲ್ಲಿ — *elli* — where? — asking about a place.

Say it with an asking voice. It points at no place: it asks your listener to point one out.

Its partners are ಇಲ್ಲಿ *illi* and ಅಲ್ಲಿ *alli*, which you have already met. The three differ by one sound at the front — **e-** for ask — and that is not a coincidence. It is the whole system, and the last lesson of this chapter says so.

The word, taken apart — its roots and family

ಎಲ್ಲಿ (*elli*) is native Dravidian, built on the question base *e-* with an ending for place. DEDR 5151 lists *elli* itself, "what place, where".

Your turn

- *Say it:* "ಎಲ್ಲಿ" three times, asking about a different place each time
- *Say it:* it once with a word you already know after it
- *Read it:* ಚಹಾ

Before you move on

What is *elli*? (where? — asking about a place.) What sound does it start with, and does that sound mean near, far, or a question? (**e-** — ask.)

41.7 i- / a- / e- — six words, one machine

Say the six words from this chapter out loud, in order. Listen to how they begin.

Grammar lens: one slot changes

Five of these six words are **three beginnings**, reused; only the person question stands apart.

meaning	word
near	ಇಲ್ಲಿ *illi*
far	ಅಲ್ಲಿ *alli*
question	ಎಲ್ಲಿ *elli*

Kannada's place words are the shortest of the four: ಇಲ್ಲಿ, ಅಲ್ಲಿ, ಎಲ್ಲಿ. Change the front, and the meaning walks from **near** to **far** to **a question**. Nothing else in the word moves.

The same three beginnings run the thing-words too: ಇದು *idu* and ಅದು *adu* start exactly like the first two rows. This chapter did not teach you the matching question word for things — that one arrives later, and when it does you will already know what it has to start with.

This is worth more than the six words are. When you meet a new word in this family later, you will not have to be taught all three of it — you will be taught one and work out the others.

Your turn

- *Say it:* the near word, then the far word, then the question word

- *Say it:* them again for place, not for things
- *Notice:* the part that did NOT change

Before you move on

Which beginning means near? (**i-**) Far? (**a-**) And which one turns the word into a question? (**e-**)

Chapter 42

Describing Things

Modes: **voice** (7) **pen** (1) **Hands-free start:** the first 7 of 8 lessons.

> ***By the end of this chapter:*** I can point at something in Kannada and ask who or where it is — and I can say what the six words have in common.
>
> *Say the near word, the far word and the question word in a row, and name the part that changed.*

42.1 ದೊಡ್ಡ (doḍḍa) — big

You can already name things. This is how you DESCRIBE them.

You'll want to know: ದೊಡ್ಡ

ದೊಡ್ಡ — *doḍḍa* — big.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

ದೊಡ್ಡ (*doḍḍa*) is native Dravidian, one word with Tamil *toṭṭa* and Telugu *doḍḍa* (DEDR 3491).

Your turn

- *Say it:* "ದೊಡ್ಡ" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *kāphi*

Before you move on

What is *doḍḍa*? (**big**.) Where does it go — before the word it describes, or after? (**Before.**)

42.2 ಚಿಕ್ಕ (cikka) — small

You can already name things. This is how you DESCRIBE them.

You'll want to know: ಚಿಕ್ಕ

ಚಿಕ್ಕ — *cikka* — small.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met ದೊಡ್ಡ *doḍḍa* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

ಚಿಕ್ಕ (*cikka*) is native Dravidian by DEDR 2495, which lists *cikka*, "little, small, young", with Telugu *cikiciki*, "small". Its note cites a Prakrit *cikka*, "small" (CDIAL 4781). DEDR 2495 compares Sanskrit *cikkagaja*.

Your turn

- *Say it:* "ಚಿಕ್ಕ" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Read it:* ಹಾಲು

Before you move on

What is *cikka*? (**small**.) Where does it go — before the word it describes, or after? (**Before.**)

42.3 ಒಳ್ಳೆಯ (oḷḷeya) — good

You can already name things. This is how you DESCRIBE them.

You'll want to know: ಒಳ್ಳೆಯ

ಒಳ್ಳೆಯ — *oḷḷeya* — good.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met **ಚಿಕ್ಕ** *cikka* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

ಒಳ್ಳೆಯ (*oḷḷeya*) is native Dravidian, the adjective of *oḷḷe*, "goodness", which DEDR 1017 lists with Tamil *oḷi*, "excellence".

Your turn

- *Say it:* "**ಒಳ್ಳೆಯ**" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *ūṭa*

Before you move on

What is *oḷḷeya*? (**good**.) Where does it go — before the word it describes, or after? (**Before.**)

42.4 ಹೊಸ (hosa) — new

You can already name things. This is how you DESCRIBE them.

You'll want to know: ಹೊಸ

ಹೊಸ — *hosa* — new.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met **ಒಳ್ಳೆಯ** *oḷḷeya* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

ಹೊಸ (*hosa*) is native Dravidian, one word with Tamil *putu* (DEDR 4275). DEDR gives the older Kannada form *posa* beside *hosa*.

Your turn

- *Say it:* "**ಹೊಸ**" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Read it:* **ಇದು**

Before you move on

What is *hosa*? (**new**.) Where does it go — before the word it describes, or after? (**Before.**)

42.5 ಹಳೆಯ (haḷeya) — old — of a thing, not of a person

You can already name things. This is how you DESCRIBE them.

You'll want to know: ಹಳೆಯ

ಹಳೆಯ — *haḷeya* — old — of a thing, not of a person.

Put it in front of a word you already know and you have said something new. That is all an adjective does in this language.

You met **ಹೊಸ** *hosa* a moment ago. Put them side by side and nothing about either one changes.

The last lesson of this chapter gives the one rule that governs every adjective you will ever meet here.

The word, taken apart — its roots and family

ಹಳೆಯ (*haḷeya*) is native Dravidian, the adjective of *haḷe*, "old". DEDR 3999 gives the older Kannada form *paḻe*, with Tamil *paḻa* and Malayalam *paḻa*: the *p-* has become *h-* and the *ḻ* has become *ḷ*.

Your turn

- *Say it:* "ಹಳೆಯ" three times, picturing something different each time
- *Say it:* it once with a word you already know after it
- *Recall:* say *adu*
- *Read it:* ಇಲ್ಲಿ

Before you move on

What is *haḷeya*? (**old — of a thing, not of a person**.) Where does it go — before the word it describes, or after? (**Before.**)

42.6 before the noun, unchanged — five words, one rule

Say the five words from this chapter out loud, then say each one in front of a noun you already know.

Grammar lens: where an adjective goes

You did not learn five separate words. You learned **where an adjective goes**, and five words that go there.

meaning	word
big	ದೊಡ್ಡ *doḍḍa*
small	ಚಿಕ್ಕ *cikka*
good	ಒಳ್ಳೆಯ *oḷḷeya*

They sit in front of the noun and stay exactly as they are.
This is worth more than the five words are. Every noun you already

know — your name, the house, the water, the day — can now take any of them in front, and every adjective you meet from here goes in the same place.

Your turn

- *Say it:* each of the five in front of a noun you already know
- *Say it:* two of them with the same noun, one after the other
- *Notice:* whether the adjective changed shape when the noun did

Before you move on

Where does an adjective go in this language? (**In front of the noun.**) Does it change shape to match the noun? (unchanged.)

42.7 ಜ್ಞಾನ (jñāna) — knowledge

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: ಜ್ಞಾನ

ಜ್ಞಾನ — *jñāna* — "knowledge".

Say it: *jñāna*. *Look:* at its shape as you say it. The next lesson takes one piece of it, ಞ, and writes it on its own.

The word, taken apart — its roots and family

ಜ್ಞಾನ (*jñāna*) is Sanskrit *jñāna*, "knowledge", taken over whole as a learned loan, a tatsama (CDIAL 5281).

Your turn

Say these aloud:

- *jñāna*
- *jñāna*, and what it means

Before you move on

What is "knowledge"? (ಜ್ಞಾನ, *jñāna.*)

42.8 ಞ — one character, and the stack it hides in

Before the new one: ಃ — what does it add, and which mark is its partner?

One character this time. You will hardly ever see it alone, and that fact is the lesson.

Script you'll notice: ಞ

ಞ — *ña.*

It is a **nasal**, and you can already read two of its relatives:

- ನ *na* — tongue at the teeth ridge, the sound in ನಮಸ್ಕಾರ *namaskāra*
- ಣ *ṇa* — tongue curled back, the sound in ಗಂಟೆ *gaṇṭe*
- ಞ *ña* — tongue flat against the roof of the mouth, the *ny* an English speaker hears in **canyon**

Kannada keeps these apart as separate letters where English writes *n* for all three and lets the neighbours decide.

Why you will not see it standing. Almost every time it appears it is **stacked underneath another letter**. The pair you will meet is:

- ಜ plus ಞ stacked gives ಜ್ಞ

Learn that stack, because it is where this letter lives, and a word built on it is close at hand. Find the ಜ on top; what is squashed underneath is today's character. Expect it under another letter, not beside one.

Writing: ಞ — follow the numbered strip

How ಞ is written, stroke by stroke

Follow the numbered strip: start where movement 1 begins, and let each panel show you the next movement before your pen makes it. Then write ಞ yourself — slowly, and larger than it is printed.

> The strip shows **where to start the character and which way to travel**, in one attested order. That is taught with real variation from school to school, so the strip names its source beneath it: treat it as a sound way in, not the only one.

Your turn

- *Look:* at these three nasals and say which one is today's

  ನ · ಣ · ಞ

- *Trace it:* ಞ three times, saying *ña* as in canyon as you finish each one
- *Look:* at ಜ್ಞ and say which letter sits on top and which is squashed beneath
- *Say it:* the three nasals in a row — "na, ṇa, ña"

Before you move on

Which character is this — ಞ? What sound does it carry? (***ña***, the *ny* of **canyon**.) Where will you nearly always find it? (**Stacked underneath another letter**, as in ಜ್ಞ.) Name the two nasals you could already read. (ನ and ಣ.)

Chapter 43

More Everyday Verbs

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can tell someone to come, sit, stand and give in Kannada.
>
> *Complete KA-C43-give and say all four verbs in order.*

43.1 ಬಾ (bā) — come

A short run of everyday verbs, one at a time.

You'll want to know: ಬಾ

ಬಾ (*bā*) — "come".

One syllable, and a whole sentence. The commonest thing said at a doorway.

The word, taken apart — its roots and family

ಬಾ (*bā*) is native Dravidian, one word with Tamil *varu* and Malayalam *varuka* (DEDR 5270). DEDR gives Kannada *bar*, *bā*: the old *v-* has become *b-*.

What you've built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

- *Say it:* *bā*
- *Say it:* it again, to someone standing in a doorway
- *Recall:* say *alli*
- *Read it:* ಯಾರು

Before you move on

What does ಬಾ mean? (“come”.) Say it once more.

43.2 ಕುಳಿತುಕೋ (kuḷitukō) — sit

Before the new one: what did *bā* mean?

You’ll want to know: ಕುಳಿತುಕೋ

ಕುಳಿತುಕೋ (*kuḷitukō*) — “sit”.

Longer than it looks: the *-ko* on the end is a reflexive, so it is closer to ’seat yourself’ than to a bare order.

The word, taken apart — its roots and family

ಕುಳಿತುಕೋ (*kuḷitukō*) is native Dravidian: the verb for “to squat, sit down”, which DEDR 1835 lists as Kannada *kuḷir* and *kuḷḷu* (Tamil *kuḷir*), and *kō*, “take”, the command form of *koḷḷu*, “to take” (DEDR 2151). The *kō* turns the action back on the doer: sit yourself down.

What you’ve built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

- *Say it:* *kuḷitukō*
- *Say it:* it again, to someone standing in a doorway
- *Say it:* it after *bā*, so the two sit together

- *Read it:* ಎಲ್ಲಿ

Before you move on

What does ಕುಳಿತುಕೋ mean? (“sit”.) Say it once more.

43.3 నిల్లు (nillu) — stand

Before the new one: what did *kuḷitukō* mean?

You’ll want to know: నిల్లు

నిల్లు (*nillu*) — “stand”.

The pair to sitting, and the bare stem again — Kannada asks for nothing extra to make a command.

The word, taken apart — its roots and family

నిల్లు (*nillu*) is native Dravidian, one word with Tamil *nil*, Telugu *nilucu* and Malayalam *nilkka* (DEDR 3675).

What you’ve built

One more everyday action. Three more follow, and each reuses the ones before it.

Your turn

Say these aloud:

- *nillu*
- it again, to someone standing in a doorway
- it after *kuḷitukō*, so the two sit together

Before you move on

What does నిల్లు mean? (“stand”.) Say it once more.

43.4 ಕೊಡು (koḍu) — give

Before the new one: what did *nillu* mean?

You'll want to know: ಕೊಡು

ಕೊಡು (*koḍu*) — "give".

The everyday 'give'. Politeness is added with a separate word, not by altering this one.

The word, taken apart — its roots and family

ಕೊಡು (*koḍu*) is native Dravidian, one word with Tamil *koṭu* (DEDR 2053).

What you've built

One more everyday action. That closes the run: four everyday actions, each met on its own.

Your turn

- *Say it: koḍu*
- *Say it:* it again, to someone standing in a doorway
- *Say it:* it after *nillu*, so the two sit together
- *Read it:* **ದೊಡ್ಡ**

Before you move on

What does **ಕೊಡು** mean? ("give".) Say it once more.

Chapter 44

Verbs of Seeing and Saying

Modes: **voice** (4) **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can tell someone to look, listen, speak and write in Kannada.
>
> *Complete KA-C44-write and say all four verbs in order.*

44.1 ನೋಡು (nōḍu) — look

Four verbs for taking things in and putting them out, one at a time.

You'll want to know: ನೋಡು

ನೋಡು (*nōḍu*) — "look".

Also 'to see' and, in the right sentence, 'to look after'. One stem covering watching, seeing and caring for is common across the Dravidian languages.

The word, taken apart — its roots and family

ನೋಡು (*nōḍu*) is native Dravidian. DEDR 3794 lists it with Malayalam *nōṭṭam*, "viewing", and Tamil *nōṭṭam*, "examination".

What you've built

One more. Three follow, and each reuses the ones before.

Your turn

- *Say it:* *nōḍu*
- *Say it:* it once more, slowly
- *Recall:* say *cikka*

Before you move on

What does ನೋಡು mean? (“look”.) Say it once more.

44.2 ಕೇಳು (kēḷu) — listen

Before the new one: what did *nōḍu* mean?

You’ll want to know: ಕೇಳು

ಕೇಳು (*kēḷu*) — “listen”.

And ’to ask’. Kannada uses the same stem for taking in words and for requesting them, which is less strange than it sounds — both are aimed at what someone else knows.

The word, taken apart — its roots and family

ಕೇಳು (*kēḷu*) is native Dravidian, one word with Tamil *kēḷ* and Malayalam *kēḷkka* (DEDR 2017).

What you’ve built

One more. Three follow, and each reuses the ones before.

Your turn

- *Say it:* *kēḷu*
- *Say it:* it once more, slowly
- *Say it:* it after *nōḍu*, so the two sit together
- *Read it:* ಒಳ್ಳೆಯ

Before you move on

What does **ಕೇಳು** mean? (“listen”.) Say it once more.

44.3 ಮಾತಾಡು (mātāḍu) — speak

Before the new one: what did *kēḷu* mean?

You’ll want to know: ಮಾತಾಡು

ಮಾತಾಡು (*mātāḍu*) — “speak”.

Built from *māta*, ’word’ — a native Dravidian word, not a Sanskrit one — plus *āḍu*, ’to play’. To speak is to play with words.

DEDR 4834 lists Kannada *mātu*, *māta*, “word, saying”, cognate with Telugu *māṭa*; *āḍu* is in DEDR 347.

What you’ve built

One more. Three follow, and each reuses the ones before.

Your turn

- *Say it: mātāḍu*
- *Say it:* it once more, slowly
- *Say it:* it after *kēḷu*, so the two sit together
- *Recall:* say *hosa*

Before you move on

What does **ಮಾತಾಡು** mean? (“speak”.) Say it once more.

44.4 ಬರೆ (bare) — write

Before the new one: what did *mātāḍu* mean?

You'll want to know: ಬರೆ

ಬರೆ (*bare*) — "write".

An old Dravidian stem, unrelated to the Sanskrit words for writing. It is the same root behind *baraha*, 'writing'.

The word, taken apart — its roots and family

ಬರೆ (*bare*) is native Dravidian, one word with Tamil *vari* and Malayalam *vara* (DEDR 5263). DEDR 5263 compares, with a query, Prakrit *rajju*, "a writer".

What you've built

That closes the run: look, listen, speak, write.

Your turn

- *Say it: bare*
- *Say it:* it once more, slowly
- *Say it:* it after *mātāḍu*, so the two sit together
- *Read it:* **ಹಳೆಯ**

Before you move on

What does **ಬರೆ** mean? ("write".) Say it once more.

Chapter 45

The Older Generation

Modes: 🚗 **voice** (4) 🚗 **Hands-free start:** all 4 lessons.

> ***By the end of this chapter:*** I can name four more family and people words in this language.
>
> *Complete KA-C45-wife and say all four words in order.*

45.1 అజ్జ (ajja) — grandfather

Before the new one: what did *bare* mean?

You'll want to know: అజ్జ

అజ్జ (*ajja*) — "grandfather".

A native Dravidian word of the short, doubled shape that small children's mouths reach for first, and it carries respect well past the family: an unrelated old man can be *ajja* too. The *-a* closing it is the masculine ending.

The word, taken apart — its roots and family

DEDR 50 lists Kannada *ajja*, "grandfather", and *ajji*, "grandmother", with Tamil *accaṉ*, "father", but notes that the whole group is probably a loan from Indo-Aryan: Prakrit *ajja*, from Sanskrit *ārya*, "noble, honoured" (CDIAL 1347). So **అజ్జ** (*ajja*) is most likely an old loan, not a native Dravidian word.

What you've built

The first of four words for the generation above you and the one beside you. Three follow, and each reuses the ones before.

Your turn

Say these aloud:

- *ajja*
- it once more, slowly
- it after *bare*, so the two sit together

Before you move on

What does **ಅಜ್ಜ** mean? ("grandfather".) Say it once more.

45.2 ಅಜ್ಜಿ (ajji) — grandmother

Before the new one: what did *ajja* mean?

You'll want to know: ಅಜ್ಜಿ

ಅಜ್ಜಿ (*ajji*) — "grandmother".

The same stem as the last word, with the ending swapped: *-i* where *ajja* had *-a*. The son-and-daughter pair built **ಮಗಳು** out of **ಮಗ** by that same trick, one stem carrying two endings, and this pair is tidier still — only the final vowel moves.

The word, taken apart — its roots and family

DEDR 50 lists Kannada *ajji*, "grandmother", beside *ajja*, "grandfather", and notes that the group is probably a loan from Indo-Aryan: Prakrit *ajja*, from Sanskrit *ārya*, "noble, honoured" (CDIAL 1347). So **ಅಜ್ಜಿ** (*ajji*) is most likely an old loan, not a native Dravidian word.

What you've built

Two of the four, and a pattern you have now seen twice in this book.

Your turn

Say these aloud:

- *ajji*
- it once more, slowly
- it after *ajja*, and hear only the last vowel move

Before you move on

What does ಅಜ್ಜಿ mean? ("grandmother".) Say it once more.

45.3 ಗಂಡ (gaṇḍa) — husband

Before the new one: what did *ajji* mean?

You'll want to know: ಗಂಡ

ಗಂಡ (*gaṇḍa*) — "husband".

The everyday word, and a native one. Its own stem also gives ಗಂಡು (*gaṇḍu*), 'male', so what it names is a man of the house rather than anything about the wedding. Formal Kannada keeps the Sanskrit *pati* alongside it for writing and ceremony.

DEDR 1173 lists Kannada *gaṇḍu*, "male", and *gaṇḍa*, "husband", with Tamil *kaṇṭaṉ*, "warrior, husband". DEDR 1173 compares Sanskrit *gaṇḍa*, "hero".

What you've built

Three of the four. The last one is built the same way, from the other half of the pair.

Your turn

- *Say it: gaṇḍa*
- *Say it:* it once more, slowly
- *Say it:* it after *ajji*, so the two sit together
- *Recall:* say *bā*

Before you move on

What does **ಗಂಡ** mean? (“husband”.) Say it once more.

45.4 ಹೆಂಡತಿ (heṇḍati) — wife

Before the new one: what did *gaṇḍa* mean?

You’ll want to know: ಹೆಂಡತಿ

ಹೆಂಡತಿ (*heṇḍati*) — “wife”.

Built on **ಹೆಣ್ಣು** (*heṇṇu*), ’female’, with a *-ti* ending. And *heṇṇu* carries the sound change you already met in **ಹೋಗು**: where its sisters keep an old *p-*, Kannada has *h-*. So Tamil *peṇ*, ’woman’, and this *heṇ-* are one word wearing two faces.

The word, taken apart — its roots and family

ಹೆಂಡತಿ (*heṇḍati*) is native Dravidian. DEDR 4395 lists the older Kannada form *peṇḍati*, “wife”, with *peṇ*, “female, woman”, and Tamil *peṇ*: the *p-* has become *h-*. DEDR 4395 compares Sanskrit *paṇḍa*, “weakling”.

What you’ve built

That closes the run: grandfather, grandmother, husband, wife.

Your turn

- *Say it: heṇḍati*
- *Say it:* it once more, slowly
- *Say it:* it after *gaṇḍa*, so the two sit together
- *Read it:* **ಕುಳಿತುಕೋ**

Before you move on

What does **ಹೆಂಡತಿ** mean? (“wife”.) Say it once more.

Chapter 46

Things You Ask For

Modes: **voice** (4) **eyes** (1) **Hands-free start:** the first 4 of 5 lessons.

> ***By the end of this chapter:*** I can name five everyday things I might ask someone for in Kannada, and say which of them Kannada has always had and which arrived from elsewhere.
>
> *Complete KA-C46-book and say all five words in order.*

46.1 ಹಣ್ಣು (haṇṇu) — a fruit

Before the new run of words: what did *heṇḍati* mean?

You'll want to know: ಹಣ್ಣು

ಹಣ್ಣು (*haṇṇu*) — "a fruit".

Behind it there is a verb: **ಹಣ್ಣಾಗು**, to ripen. The fruit is named for what happened to it — the ripened thing — and Kannada saw no need to invent a second noun for the object itself.

Proto-Dravidian ***paḻ***, 'to ripen, to grow old', is the source, and the sound law this book keeps returning to is at work in the very first letter. Tamil kept **பழம்** (*paḻam*); Telugu has **పండు** (*paṇḍu*); Kannada turned that *p-* into *h-* and arrived at **ಹಣ್ಣು**. It is the same law that made milk **ಹಾಲು** here and left it *pāl* next door.

DEDR 4004 lists the older Kannada *paṇṇu*, "ripe fruit", with Tamil *paḻu*, "to ripen", and Telugu *paṇḍu*. DEDR 4004 compares Sanskrit *phala*, "fruit".

What you've built

The first of five things you might ask someone for.

Your turn

- *Say it: haṇṇu*
- *Say it:* it once more, slowly
- *Say it: haṇṇu*, then *dayaviṭṭu haṇṇu koḍi* — "please give a fruit"
- *Recall:* say *nillu*

Before you move on

What does ಹಣ್ಣು mean? ("a fruit".) Say it once more.

46.2 ಬಟ್ಟೆ (baṭṭe) — cloth

Before the new one: what did *haṇṇu* mean?

You'll want to know: ಬಟ್ಟೆ

ಬಟ್ಟೆ (*baṭṭe*) — "cloth".

ಬಟ್ಟೆ is the plain word for cloth: the bolt on the shelf, the washing on the line, the rag in your hand.

Sanskrit has *paṭṭa*, 'a strip of cloth, a bandage', and here the borrowing most likely ran the unusual way — out of Dravidian and into Sanskrit, rather than the direction this book has shown so often. The same strip reached English by another road: Hindi *paṭṭī*, a wrapping, is the soldier's *puttee*.

Older Kannada also used ಬಟ್ಟೆ for a road — the way you go — a sense the modern language has quietly let go of.

The word, taken apart — its roots and family

The origin of ಬಟ್ಟೆ (*baṭṭe*) is uncertain. Neither DEDR nor CDIAL records it, and no source for it is settled.

What you've built

Two: a fruit and a cloth.

Your turn

- *Say it: baṭṭe*
- *Say it:* it once more, slowly
- *Say it: haṇṇu*, then *baṭṭe*, and ask for each one with *dayaviṭṭu*
- *Read it:* ಕೊಡು

Before you move on

What does ಬಟ್ಟೆ mean? ("cloth".) Say it once more.

46.3 ದೀಪ (dīpa) — a lamp

Before the new one: what did *baṭṭe* mean?

You'll want to know: ದೀಪ

ದೀಪ (*dīpa*) — "a lamp".

Sanskrit *dīpa*, from a root meaning to blaze, to shine. Kannada took it whole and wore not one letter off it.

Put it beside *āvali*, 'a row', and you have *Dīpāvali* — a row of lamps — a festival whose name explains itself the moment the seam is visible.

Kannada has a word of its own as well, **ಹಣತೆ** (*haṇate*), and it means something narrower: the small clay saucer with a wick lying in it. The borrowed word covers every lamp; the native one names a particular thing you can hold in one hand.

CDIAL 6348 lists Sanskrit *dīpa*, "lamp".

What you've built

Three, and one of them came from Sanskrit.

Your turn

- *Say it: dīpa*
- *Say it:* it once more, slowly
- *Say it:* all three so far, and say which of them a potter makes

- *Recall:* say *nōḍu*

Before you move on

What does ದೀಪ mean? ("a lamp".) Say it once more.

46.4 ಉಪ್ಪು (uppu) — salt

Before the new one: what did *dīpa* mean?

You'll want to know: ಉಪ್ಪು

ಉಪ್ಪು (*uppu*) — "salt".

Proto-Dravidian ***uppu**, and the whole family kept it very nearly untouched: Tamil உப்பு, Telugu ఉప్పు, Malayalam ഉപ്പ്.

There is a *p* sitting in the middle of this word, and it did not become *h*. That is worth stopping over, because the law that made ಹಣ್ಣು out of an older *p*-word only ever reached the FIRST sound of a word. Inside one, the *p* stays where it was put.

DEDR 2674 lists Kannada *uppu* with Tamil, Malayalam and Telugu *uppu*.

What you've built

Four. Salt, and the fruit, and the cloth, and the lamp.

Your turn

- *Say it: uppu*
- *Say it:* it once more, slowly
- *Say it: uppu*, then *haṇṇu*, and hear the *p* survive in one and vanish from the other
- *Read it:* ಕೇಳು

Before you move on

What does ಉಪ್ಪು mean? ("salt".) Say it once more.

46.5 ಪುಸ್ತಕ (pustaka) — a book

Before the new one: what did *uppu* mean?

You'll want to know: ಪುಸ್ತಕ

ಪುಸ್ತಕ (*pustaka*) — "a book".

Sanskrit *pustaka* is the source, but the trail behind it leaves India altogether. Middle Persian *post* meant 'hide, skin' — the thing written on before there was paper.

Now look at its first letter. **ಪುಸ್ತಕ** opens with *p-*, and that *p-* stayed. So did the *p-* of every other word Kannada took in from Sanskrit. The law that turned inherited *p-* into *h-* had finished its work before these words walked in, and it left them alone.

Two of these five came from outside; three were here already.

What you've built

Five things you might ask for: a fruit, a cloth, a lamp, salt, a book.

Your turn

- *Say it: pustaka*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then sort them into the inherited and the borrowed
- *Recall:* say *mātāḍu*

Before you move on

What does **ಪುಸ್ತಕ** mean? ("a book".) Say it once more.

Chapter 47

The Leg and the Tooth

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five more parts of the body in Kannada, and point to the two regular sound exchanges that separate them from their Tamil and Telugu cousins.
>
> *Complete KA-C47-stomach and say all five words in order.*

47.1 ಕಾಲು (kālu) — leg, foot

> Before the new run: what did *pustaka* mean, and what did *uppu* mean?

You'll want to know: ಕಾಲು

ಕಾಲು (*kālu*) — "leg, foot".

Proto-Dravidian ***kāl**, and every sister kept it nearly whole: Tamil **கால்**, Telugu **కాలు**, Malayalam **കാൽ**.

Set that beside **ಕೈ**, the hand-word, which wore down so far that the family resemblance is hard to see at all. Two body words of the same age; one held its shape and one did not, and nothing about the meaning predicts which.

ಕಾಲು covers the whole limb, foot and leg together. It also names a quarter — a fourth of anything — so **ಕಾಲು ಗಂಟೆ** is a quarter of an hour. Nothing joins the leg to the fraction but an accident of sound, and context is the only fix, which is what context is for.

DEDR 1479 lists Kannada *kāl*, "foot, leg, quarter", with Tamil *kāl* and Telugu *kālu*.

What you've built

The first of five more body words.

Your turn

- *Say it: kālu*
- *Say it:* it once more, slowly
- *Say it: kālu*, then *tale*, so the top and the bottom sit together
- *Recall:* say *bare*

Before you move on

What does **ಕಾಲು** mean? ("leg, foot".) Say it once more.

47.2 ಹಲ್ಲು (hallu) — a tooth

Before the new one: what did *kālu* mean?

You'll want to know: ಹಲ್ಲು

ಹಲ್ಲು (*hallu*) — "a tooth".

Proto-Dravidian ***pal**. Tamil kept **பல்**; Telugu took a third road and came out with **పన్ను**; Kannada applied its own law and got **ಹಲ್ಲು**, the *p*- turned to *h*- exactly where the chapter before said to watch for it.

That makes **ಹಣ್ಣು** and **ಹಲ್ಲು** a matched pair: two inherited words, one *h* apiece, and a *p* at the front of both a thousand years ago.

DEDR 3986 lists the older Kannada *pal* with Tamil *pal* and Telugu *pallu*, *pannu*.

What you've built

Two: a leg and a tooth.

Your turn

- *Say it: hallu*
- *Say it:* it once more, slowly

- *Say it: kālu*, then *hallu*, and say which of the two also names a fraction
- *Read it:* ಅಜ್ಜ

Before you move on

What does ಹಲ್ಲು mean? ("a tooth".) Say it once more.

47.3 ಕೂದಲು (kūdalu) — hair

Before the new one: what did *hallu* mean?

You'll want to know: ಕೂದಲು

ಕೂದಲು (*kūdalu*) — "hair".

ಕೂದಲು is the hair on a head, counted as a mass rather than strand by strand. Tamil's கூந்தல் (*kūntal*) is the same inherited word.

Look at what it finishes on. ಕಾಲು, ಹಲ್ಲು, ಕಣ್ಣು and ಹಣ್ಣು all end on a small *-u* as well. Kannada dislikes leaving a word standing on a bare consonant and sets a light vowel behind it — a prop, carrying no meaning of its own. Tamil tolerates the bare consonant and writes பல் and கால் with nothing after them at all.

Careful Kannada also has ಕೇಶ (*kēśa*), straight from Sanskrit, for the barber's signboard and the poem.

DEDR 1892 lists Kannada *kūdal* with Tamil *kūntal*. DEDR 1892 compares Sanskrit *kuntala*, "hair".

What you've built

Three: a leg, a tooth, and hair.

Your turn

- *Say it: kūdalu*
- *Say it:* it once more, slowly
- *Say it:* all three, and listen for the little *-u* at the end of each
- *Recall:* say *ajji*

Before you move on

What does **ಕೂದಲು** mean? ("hair".) Say it once more.

47.4 ಬೆರಳು (beraḷu) — a finger

Before the new one: what did *kūdalu* mean?

You'll want to know: ಬೆರಳು

ಬೆರಳು (*beraḷu*) — "a finger".

Tamil has **விரல்** (*viral*), Malayalam **വിരൽ**, Telugu **వేలు** (*vēlu*) — and Kannada opens the word with *b-* where its sisters have *v-*.

That is the second regular exchange this book has shown you, the one already visible in **ಬರೆ**, 'to write', where the sisters again have a *v*. One family, two swaps: *p-* for *h-*, *v-* for *b-*. Between them they account for a great many words that look unrelated at first glance and are nothing of the kind.

The word, taken apart — its roots and family

ಬೆರಳು (*beraḷu*) is native Dravidian, one word with Tamil *viral*, Telugu *vēlu* and Malayalam *viral* (DEDR 5409). DEDR gives Kannada *beral*, *beraḷ*: the old *v-* has become *b-*.

What you've built

Four. A leg, a tooth, hair, a finger.

Your turn

- *Say it:* *beraḷu*
- *Say it:* it once more, slowly
- *Say it:* *beraḷu*, then *bare*, and hear the same *b* at the front of both
- *Read it:* **ಗಂಡ**

Before you move on

What does **ಬೆರಳು** mean? ("a finger".) Say it once more.

47.5 ಹೊಟ್ಟೆ (hoṭṭe) — the stomach, the belly

Before the new one: what did *beraḷu* mean?

You'll want to know: ಹೊಟ್ಟೆ

ಹೊಟ್ಟೆ (*hoṭṭe*) — "the stomach, the belly".

Telugu has **పొట్ట** (*poṭṭa*) for the same thing, the *p* being the older shape and Kannada's *h* the newer one. Tamil went its own way here and reaches for **வயிறு** (*vayiṟu*), a word from another root entirely — a reminder that the sisters agree often, not invariably.

Five body words, and three of them — **ಹಲ್ಲು**, **ಹೊಟ್ಟೆ**, and the fruit from the chapter before — carry the same *h* into the same first slot.

The word, taken apart — its roots and family

ಹೊಟ್ಟೆ (*hoṭṭe*) is the older Kannada *poṭṭe*, "belly", with the *p-* turned into *h-*. DEDR 4494 lists it with Telugu *poṭṭa*, and compares Prakrit *poṭṭa*, "belly".

What you've built

Five more body words: a leg, a tooth, hair, a finger, the belly.

Your turn

- *Say it: hoṭṭe*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then the three that begin with *h*
- *Recall:* say *heṇḍati*

Before you move on

What does **ಹೊಟ್ಟೆ** mean? ("the stomach, the belly".) Say it once more.

Chapter 48

Naming Who Someone Is

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what someone's role is in Kannada — teacher, student, doctor, farmer, guest — and name the root that two of those words share.
>
> *Complete KA-C48-guest and say all five words in order.*

48.1 ಶಿಕ್ಷಕ (śikṣaka) — a teacher

Before the new run: what did *hoṭṭe* mean, and what did *beraḷu* mean?

You'll want to know: ಶಿಕ್ಷಕ

ಶಿಕ್ಷಕ (*śikṣaka*) — "a teacher".

Sanskrit *śikṣaka*, 'one who teaches', on a root that covers learning and training alike; the same root gives **ಶಿಕ್ಷಣ** (*śikṣaṇa*), education.

The formal word is not what a Kannada child shouts across a classroom. That is **ಮೇಷ್ಟ್ರು** (*mēṣṭru*), which is the English *master* worn smooth by a century of Kannada mouths — a schoolroom loan that arrived with the schoolroom.

What you've built

The first of five ways to say who someone is.

Your turn

- *Say it: śikṣaka*
- *Say it:* it once more, slowly
- *Say it: śikṣaka*, then ask *nimma hesaru ēnu?* as though meeting one
- *Recall:* say *haṇṇu*

Before you move on

What does **ಶಿಕ್ಷಕ** mean? ("a teacher".) Say it once more.

48.2 ವಿದ್ಯಾರ್ಥಿ (vidyārthi) — a student

Before the new one: what did *śikṣaka* mean?

You'll want to know: ವಿದ್ಯಾರ್ಥಿ

ವಿದ್ಯಾರ್ಥಿ (*vidyārthi*) — "a student".

Two Sanskrit pieces: *vidyā*, knowledge, and *arthin*, one who seeks a thing. A student is a knowledge-seeker, said straight out.

vidyā rests on a root meaning 'to know', and that root is among the oldest things in this book. It is the *wit* of English, the *vidēre* of Latin, and the first syllable of *vision*. A word for a schoolchild in Bengaluru and a word for eyesight in Rome are one word with three thousand years between them.

The word, taken apart — its roots and family

ವಿದ್ಯಾರ್ಥಿ (*vidyārthi*) is Sanskrit *vidyārthin*, "one who seeks knowledge": *vidyā*, "knowledge" (CDIAL 11741), and *arthin*, "desiring, seeking" (CDIAL 640). Kannada drops the final *-n*.

What you've built

Two: a teacher and a student.

Your turn

- *Say it: vidyārthi*
- *Say it:* it once more, slowly

- *Say it: śikṣaka*, then *vidyārthi*, and say which of the two is doing the seeking
- *Read it:* ಬಟ್ಟೆ

Before you move on

What does ವಿದ್ಯಾರ್ಥಿ mean? ("a student".) Say it once more.

48.3 ವೈದ್ಯ (vaidya) — a doctor

Before the new one: what did *vidyārthi* mean?

You'll want to know: ವೈದ್ಯ

ವೈದ್ಯ (*vaidya*) — "a doctor".

Here is the seeker's root a second time. *vaidya* is built directly on *vidyā*: 'one versed in the knowledge'. Which knowledge is left unsaid, because for the people who coined the word there was only one worth naming that way — the knowledge of medicine.

So the student and the doctor are the same word twice over, once for the one still looking and once for the one who has found. ವೈದ್ಯ carries the older physician of the herb-books with it; the doctor at the clinic is more often ಡಾಕ್ಟರ್.

The word, taken apart — its roots and family

ವೈದ್ಯ (*vaidya*) is Sanskrit *vaidya*, "learned; physician", taken over whole as a learned loan, a tatsama (CDIAL 12140).

What you've built

Three, and two of the three are the same root wearing different clothes.

Your turn

- *Say it: vaidya*
- *Say it:* it once more, slowly
- *Say it: vidyārthi*, then *vaidya*, and hear *vid-* survive in both

- *Recall:* say *dīpa*

Before you move on

What does **ವೈದ್ಯ** mean? ("a doctor".) Say it once more.

48.4 ರೈತ (raita) — a farmer

Before the new one: what did *vaidya* mean?

You'll want to know: ರೈತ

ರೈತ (*raita*) — "a farmer".

ರೈತ came the long way round. Arabic *ra^{c}īyat*, 'the flock, the governed people', travelled through Persian into the administrative language of the Deccan and came out the other side as the word for the man who works the land and pays the revenue on it. English took the same word from the same offices and spelled it *ryot*.

Kannada has an older and homelier word beside it — **ಒಕ್ಕಲಿಗ** (*okkaliga*), from *okkalu*, a household that farms — but **ರೈತ** is what a newspaper prints.

What you've built

Four. A teacher, a student, a doctor, a farmer.

Your turn

- *Say it: raita*
- *Say it:* it once more, slowly
- *Say it:* all four, and say which one did not come from Sanskrit
- *Read it:* **ಉಪ್ಪು**

Before you move on

What does **ರೈತ** mean? ("a farmer".) Say it once more.

48.5 අමිති (atithi) — a guest

Before the new one: what did *raita* mean?

You'll want to know: අමිති

අමිති (*atithi*) — "a guest".

Sanskrit *atithi*, and the traditional reading of it is *a-tithi*: 'one without a date'. A guest, on that reading, is exactly the person who sent no word ahead — who arrives on no appointed day and must be fed regardless. The old formula *atithi devo bhava*, 'let the guest be as a god to you', is built on that idea and has outlived the grammar that produced it.

Five ways to say who someone is. Four came from Sanskrit, one from Arabic by way of Persian, and two of the four Sanskrit ones are the same root twice.

What you've built

Five roles: a teacher, a student, a doctor, a farmer, a guest.

Your turn

- *Say it: atithi*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then name the two that share a root
- *Recall:* say *pustaka*

Before you move on

What does **අමිති** mean? ("a guest".) Say it once more.

Chapter 49

Answering With More Than Yes

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can answer in Kannada with more than yes and no — true, enough, certainly, perhaps, just so — and see the three-vowel grid running under ಇದು, ಅದು and ಹೇಗೆ.
>
> *Complete KA-C49-just-so and say all five words in order.*

49.1 ನಿಜ (nija) — true

> Before the new run: what did *atithi* mean, and what did *raita* mean?

You'll want to know: ನಿಜ

ನಿಜ (*nija*) — "true".

Sanskrit *nija* began as 'one's own, innate, born in' — what belongs to a thing by nature rather than by accident.

Kannada and Telugu both took that and turned it toward truth, and you can watch the turn happen inside the word: what is true of a thing is what the thing is in itself, as against what is merely said about it. Said alone, ನಿಜ does the work of a whole sentence — 'true', 'that's right'.

CDIAL 7181 lists Sanskrit *nija*, "innate, one's own".

What you've built

The first of five replies that do more than agree or refuse.

Your turn

- *Say it: nija*
- *Say it:* it once more, slowly
- *Say it: nija*, then *haudu*, and hear how much more the first one claims
- *Recall:* say *kālu*

Before you move on

What does **ನಿಜ** mean? (“true”.) Say it once more.

49.2 ಸಾಕು (sāku) — enough

Before the new one: what did *nija* mean?

You’ll want to know: ಸಾಕು

ಸಾಕು (*sāku*) — “enough”.

ಸಾಕು is a complete sentence with one word in it. Held up over a plate while someone is ladling rice, it means ’that’s enough’ and stops the ladle.

No Sanskrit anywhere in it — **ಸಾಕು** is Kannada’s own, resting on an inherited verb for sufficing. It covers a whole English shelf on its own: enough, plenty, stop, that will do. Kannada is content to let the situation and the tone sort out which.

The word, taken apart — its roots and family

ಸಾಕು (*sāku*) is native Dravidian, from *sāl*, “to suffice”, and DEDR 2470 lists *sāku*, “it is enough”, itself; the entry also has Tamil *cāl*, Telugu *cālu* and Malayalam *cāla*.

What you’ve built

Two: true, and enough.

Your turn

- *Say it: sāku*

- *Say it:* it once more, slowly
- *Say it: sāku* over an imaginary plate, then *nija* to something just said
- *Read it:* ಹಲ್ಲು

Before you move on

What does ಸಾಕು mean? ("enough".) Say it once more.

49.3 ಖಂಡಿತ (khaṇḍita) — certainly

Before the new one: what did *sāku* mean?

You'll want to know: ಖಂಡಿತ

ಖಂಡಿತ (*khaṇḍita*) — "certainly".

Sanskrit *khaṇḍita* means 'broken, cut off' — a piece severed from the rest.

The road from there to 'certainly' is worth walking. A matter that has been cut is a matter that has been settled: nothing left hanging, no remainder to argue over. English does the very same thing with *decide*, which is Latin for cutting off, and with a *clear-cut* answer. Two languages, no contact between them, one metaphor.

CDIAL 3797 lists Sanskrit *khaṇḍita*, "broken".

What you've built

Three: true, enough, certainly.

Your turn

- *Say it: khaṇḍita*
- *Say it:* it once more, slowly
- *Say it: khaṇḍita* as an answer to an invitation, then *nija* as an answer to a claim
- *Recall:* say *kūdalu*

Before you move on

What does **ಖಂಡಿತ** mean? (“certainly”.) Say it once more.

49.4 ಬಹುಶಃ (bahuśaḥ) — perhaps

Before the new one: what did *khaṇḍita* mean?

You’ll want to know: ಬಹುಶಃ

ಬಹುಶಃ (*bahuśaḥ*) — “perhaps”.

Sanskrit *bahuśas*, ’in many ways, in many instances’, from *bahu*, ’much, many’. If a thing can fall out in many ways then no one of them is settled, and the word slid quietly from ’in many ways’ to ’probably, perhaps’. It is the exact opposite journey to the one **ಖಂಡಿತ** took.

Notice the last mark: ◌ಃ, the *visarga*, a light breath let out at the end of a word. It is uncommon in everyday Kannada, and this is one of the few ordinary words that carries it.

CDIAL 9187 lists Sanskrit *bahu*, “much, many”.

What you’ve built

Four, and the fourth one takes back what the third one promised.

Your turn

- *Say it: bahuśaḥ*
- *Say it:* it once more, slowly
- *Say it: khaṇḍita*, then *bahuśaḥ*, and hear the certainty drain out
- *Read it:* **ಬೆರಳು**

Before you move on

What does **ಬಹುಶಃ** mean? (“perhaps”.) Say it once more.

49.5 ಹಾಗೆ (hāge) — that way, just so

Before the new one: what did *bahuśaḥ* mean?

You'll want to know: ಹಾಗೆ

ಹಾಗೆ (*hāge*) — "that way, just so".

ಹಾಗೆ means 'that way, like that', and offered on its own it agrees: 'just so'. **ಹಾಗೇ ಆಗಲಿ** — let it be that way.

Now set it beside **ಹೇಗೆ**, the question word for 'how' that this book gave you early on. They differ in one vowel. Supply the third and the shape is complete:

ಹೀಗೆ — this way. **ಹಾಗೆ** — that way. **ಹೇಗೆ** — which way?

That is the same three-way grid as **ಇದು**, **ಅದು** and **ಎಲ್ಲಿ**: **ಇ-** for what is near, **ಅ-** for what is away, **ಎ-** for what is being asked about. Kannada builds a great many of its small words on those three vowels, and once you can hear them you stop learning such words one at a time.

The word, taken apart — its roots and family

ಹಾಗೆ (*hāge*) is native Dravidian, built on the far-pointing base *a-*, "that". DEDR 1 lists *hāge* itself, "in that manner, thus".

What you've built

Five replies: true, enough, certainly, perhaps, just so.

Your turn

- *Say it: hāge*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *hīge*, *hāge*, *hēge* as one run
- *Recall:* say *hoṭṭe*

Before you move on

What does **ಹಾಗೆ** mean? ("that way, just so".) Say it once more.

Chapter 50

Taking Your Leave

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can take my leave in Kannada and say when I will be back, and explain why the word for the farewell itself is built on the verb for giving.
>
> *Complete KA-C50-farewell and say all five words in order.*

50.1 ಈಗ (īga) — now

> Before the new run: what did *hāge* mean, and what did *bahuśaḥ* mean?

You'll want to know: ಈಗ

ಈಗ (*īga*) — "now".

ಈಗ is 'now', and it stands on the same ಇ- of nearness the chapter before ended on. ಆಗ (*āga*) is its partner: 'then, at that time', carrying the ಅ- of distance.

So Kannada names this moment and that moment by the same means it names this thing and that thing. Time is handled as one more place to point at.

The word, taken apart — its roots and family

ಈಗ (*īga*) is native Dravidian, built on the near-pointing base *i-*, "this": this time. DEDR 410 lists *īga* itself, "at this time, now".

What you've built

The first of five words for going.

Your turn

- *Say it:* *īga*
- *Say it:* it once more, slowly
- *Say it:* *īga*, then *āga*, and say which is near and which is far
- *Recall:* say *śikṣaka*

Before you move on

What does ಈಗ mean? ("now".) Say it once more.

50.2 ನಾಡಿದ್ದು (nāḍiddu) — the day after tomorrow

Before the new one: what did *īga* mean?

You'll want to know: ನಾಡಿದ್ದು

ನಾಡಿದ್ದು (*nāḍiddu*) — "the day after tomorrow".

English needs four words for this. Kannada needs one, and keeps a matching one running the other way: **ಮೊನ್ನೆ** (*monne*), the day before yesterday.

You can hear **ನಾಳೆ**, 'tomorrow', at the front of **ನಾಡಿದ್ದು** — the two belong together, one step out and two steps out. A language that sows and marries by the calendar finds it worth keeping single words this far from today.

The word, taken apart — its roots and family

ನಾಡಿದ್ದು (*nāḍiddu*) is native Dravidian, built on *nāḷ*, "day", and DEDR 3656 lists *nāḍiddu* itself, "the day after tomorrow"; the entry also has Tamil *nāḷ* and Malayalam *nāḷ*.

What you've built

Two: now, and the day after tomorrow.

Your turn

- *Say it: nāḍiddu*
- *Say it:* it once more, slowly
- *Say it: īga*, *nāḷe*, *nāḍiddu* — today's moment, then one day out, then two
- *Read it:* ವಿದ್ಯಾರ್ಥಿ

Before you move on

What does ನಾಡಿದ್ದು mean? ("the day after tomorrow".) Say it once more.

50.3 ಪ್ರಯಾಣ (prayāṇa) — a journey

Before the new one: what did *nāḍiddu* mean?

You'll want to know: ಪ್ರಯಾಣ

ಪ್ರಯಾಣ (*prayāṇa*) — "a journey".

Sanskrit *pra-yāṇa*: *pra*, 'forth, forward', laid on a root meaning to go. A going-forth.

That *pra-* is very old and very widely travelled. It is the *pro-* of Latin, the *pro-* of Greek and the *forth* of English, one prefix that four languages inherited rather than borrowed from one another. Wish someone ಶುಭ ಪ್ರಯಾಣ, a good journey, and half the phrase is a word this book taught you on a quite different errand.

CDIAL 8732 lists Sanskrit *prayāṇa*, "setting out, journey".

What you've built

Three: now, the day after tomorrow, a journey.

Your turn

- *Say it: prayāṇa*
- *Say it:* it once more, slowly
- *Say it: śubha prayāṇa* to someone leaving, then *prayāṇa* on its own

- *Recall:* say *vaidya*

Before you move on

What does ಪ್ರಯಾಣ mean? ("a journey".) Say it once more.

50.4 ಹೊರಡು (horaḍu) — to set out

Before the new one: what did *prayāṇa* mean?

You'll want to know: ಹೊರಡು

ಹೊರಡು (*horaḍu*) — "to set out".

ಹೊರಡು is to set out, to start off, to leave a place with somewhere else in mind — not merely to go, for which Kannada already handed you a word.

Its front half is **ಹೊರ** (*hora*), 'outside'. To set out is to go outward. And **ಹೊರ** is one more inherited word with an *h* where Tamil has a *p*: **புறம்** (*puṟam*) is the outside there. The law turns up again in the middle of an ordinary travelling verb.

The word, taken apart — its roots and family

ಹೊರಡು (*horaḍu*) is native Dravidian. DEDR 4333 lists it as *hoṟaḍu* and derives it from **poṟa-paṭu*, built on *poṟa*, "the outside", the same root as Tamil *puṟam*: to set out is to go outside.

What you've built

Four. Now, the day after tomorrow, a journey, and setting out on it.

Your turn

- *Say it: horaḍu*
- *Say it:* it once more, slowly
- *Say it: horaḍu*, then *hōgu*, and say which of the two has a destination in it
- *Read it:* ರೈತ

Before you move on

What does **ಹೊರಡು** mean? ("to set out".) Say it once more.

50.5 ಬೀಳ್ಕೊಡುಗೆ (bīḷkoḍuge) — a send-off, a farewell

Before the new one: what did *horaḍu* mean?

You'll want to know: ಬೀಳ್ಕೊಡುಗೆ

ಬೀಳ್ಕೊಡುಗೆ (*bīḷkoḍuge*) — "a send-off, a farewell".

Take it apart and something you already own falls out of it. **ಬೀಳ್ಕೊಡು** is 'to see someone off', and the **ಕೊಡು** sitting in the middle of it is the plain verb 'give' from the chapter of commands. The ending *-ge* turns the whole action into a thing: a send-off.

Notice whose act it is. Kannada makes the leave-taking belong to the one who stays: the host gives the departure away. The traveller only walks.

Five words for going: now, the day after tomorrow, a journey, to set out, and the send-off at the end of it.

The word, taken apart — its roots and family

ಬೀಳ್ಕೊಡುಗೆ (*bīḷkoḍuge*) is native Dravidian, "a giving of leave": *bīḷ-* is usually taken with *biḍu*, "to let go, quit" (DEDR 5393), and *koḍuge*, "a gift", is from *koḍu*, "to give" (DEDR 2053). DEDR 5393 notes that Sanskrit *avamocana*, "inn", is a calque of Tamil *viṭuti*, "lodging place", from this root.

What you've built

Five words for going, and a way to end a visit without repeating yourself.

Your turn

- *Say it: bīḷkoḍuge*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *bīḷkoḍuge* and the *koḍu* hiding inside it

- *Recall:* say *atithi*

Before you move on

What does **ಬೀಳ್ಕೊಡುಗೆ** mean? (“a send-off, a farewell”.) Say it once more.

Chapter 51

Courtesy Words

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can be polite in Kannada beyond thank you — gratitude, a good turn, respect, a blessing, a salutation — and name the piece that a blessing shares with the thanks I learned first.
>
> *Complete KA-C51-salutation and say all five words in order.*

51.1 ಕೃತಜ್ಞತೆ (kṛtajñate) — gratitude

> Before the new run: what did *bīḷkoḍuge* mean, and what did *horaḍu* mean?

You'll want to know: ಕೃತಜ್ಞತೆ

ಕೃತಜ್ಞತೆ (*kṛtajñate*) — "gratitude".

Two Sanskrit pieces once more: *kṛta*, 'done', and *jña*, 'knowing'. Gratitude is knowing-what-was-done — the condition of a person who has not forgotten the favour.

jña is a very old root, and English holds it too. The *know* of English, the *nōscere* of Latin, the *gnosis* of Greek and this *jña* all come down from one ancestor. Saying **ಕೃತಜ್ಞತೆ** is saying *know* with three thousand years of Indian weather on it.

The word, taken apart — its roots and family

ಕೃತಜ್ಞತೆ (*kṛtajñate*) is Sanskrit *kṛtajñatā*, "gratitude", with Kannada's *-e* for the Sanskrit *-ā*: *kṛta*, "what was done", and *jña*, "knowing", so the grateful person is the one who knows what was done for them.

What you've built

The first of five courtesies.

Your turn

- *Say it: kṛtajñate*
- *Say it:* it once more, slowly
- *Say it: kṛtajñate*, then *dhanyavāda*, and say which of the two you would write rather than speak
- *Recall:* say *nija*

Before you move on

What does **ಕೃತಜ್ಞತೆ** mean? ("gratitude".) Say it once more.

51.2 ಉಪಕಾರ (upakāra) — a good turn, a favour

Before the new one: what did *kṛtajñate* mean?

You'll want to know: ಉಪಕಾರ

ಉಪಕಾರ (*upakāra*) — "a good turn, a favour".

upa, 'near, toward', and *kāra*, 'a doing' — a doing-toward-someone. Its mirror image exists and is just as plain: **ಅಪಕಾರ** (*apakāra*), a harm done.

And the *kāra* here rests on *kṛ*, 'to do', which is the same *kṛ* inside the *kṛta* of the word before. Sanskrit builds like this constantly, from a small stock of roots and a small stock of prefixes, and the compounds explain themselves the moment the seams are visible.

The word, taken apart — its roots and family

ಉಪಕಾರ (*upakāra*) is Sanskrit *upakāra*, "help, use", taken over whole as a learned loan, a tatsama (CDIAL 2141).

What you've built

Two: gratitude, and a good turn.

Your turn

- *Say it: upakāra*
- *Say it:* it once more, slowly
- *Say it: upakāra*, then *kṛtajñate*, and name the piece they share
- *Read it:* ಸಾಕು

Before you move on

What does ಉಪಕಾರ mean? ("a good turn, a favour".) Say it once more.

51.3 ಗೌರವ (gaurava) — respect

Before the new one: what did *upakāra* mean?

You'll want to know: ಗೌರವ

ಗೌರವ (*gaurava*) — "respect".

Sanskrit *guru* means 'heavy'. Stretch its first vowel, which is a standard Sanskrit way of making an abstract noun, and you have *gaurava*: heaviness, and so weight, consequence, dignity, respect.

The teacher is called *guru* by the same logic — the weighty one. And *guru* is a true relative of Latin *gravis*, so the English *grave* and *gravity* are this word arriving by another road. Kannada had already given it to you once, sitting quietly in the name of a weekday.

CDIAL 4346 lists Sanskrit *gaurava*, "weight, venerableness", and CDIAL 4209 *guru*, "heavy".

What you've built

Three: gratitude, a good turn, respect.

Your turn

- *Say it: gaurava*
- *Say it:* it once more, slowly
- *Say it: gaurava*, then the weekday that carries *guru* in it
- *Recall:* say *khaṇḍita*

Before you move on

What does **ಗೌರವ** mean? ("respect".) Say it once more.

51.4 ಆಶೀರ್ವಾದ (āśīrvāda) — a blessing

Before the new one: what did *gaurava* mean?

You'll want to know: ಆಶೀರ್ವಾದ

ಆಶೀರ್ವಾದ (*āśīrvāda*) — "a blessing".

āśis, 'a wish, a prayer', and *vāda*, 'a speaking'. A blessing is the speaking-out of a wish.

Now look hard at the second half. **ವಾದ** is the same *-vāda* this book handed you on its very first page, inside **ಧನ್ಯವಾದ** — the speaking of 'worthy'. Thanks and a blessing come from one carpenter: take a good word, set 'speaking' behind it, and you have named the act of saying it aloud.

The word, taken apart — its roots and family

ಆಶೀರ್ವಾದ (*āśīrvāda*) is Sanskrit *āśīrvāda*, taken over whole: *āśīs*, "a wish, a blessing", and *vāda*, "a saying" (CDIAL 11507).

What you've built

Four, and the fourth one is built exactly like the first word of this book.

Your turn

- *Say it: āśīrvāda*
- *Say it:* it once more, slowly
- *Say it: āśīrvāda*, then *dhanyavāda*, and hear *-vāda* close both
- *Read it:* **ಬಹುಶಃ**

Before you move on

What does **ಆಶೀರ್ವಾದ** mean? ("a blessing".) Say it once more.

51.5 ವಂದನೆ (vandane) — a salutation

Before the new one: what did *āśīrvāda* mean?

You'll want to know: ವಂದನೆ

ವಂದನೆ (*vandane*) — "a salutation".

vand- is a Sanskrit root meaning to praise, to salute, to bow to. **ವಂದನೆ** is the act itself, and **ವಂದನೆಗಳು** — the plural — is how a speaker closes a speech from a platform.

Set it beside **ನಮಸ್ಕಾರ**, the first word this book taught. That one stands on *nam-*, which also means to bow. Sanskrit kept two separate roots for bending toward another person and Kannada kept them both: one became the everyday hello, the other stayed the formal thanks-and-farewell.

Five courtesies: gratitude, a good turn, respect, a blessing, a salutation.

CDIAL 11271 lists Sanskrit *vandana*, "praising".

What you've built

Five courtesies, and two words for one gesture.

Your turn

- *Say it: vandane*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *vandane* and *namaskāra*, the two bows
- *Recall:* say *hāge*

Before you move on

What does **ವಂದನೆ** mean? (“a salutation”.) Say it once more.

Chapter 52

Welcoming a Guest

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the five things a Kannada welcome puts between the street and the guest, from the pattern on the ground to the garland.
>
> *Complete KA-C52-garland and say all five words in order.*

52.1 ಬಾಗಿಲು (bāgilu) — a door

> Before the new run: what did *vandane* mean, and what did *āśīrvāda* mean?

You'll want to know: ಬಾಗಿಲು

ಬಾಗಿಲು (*bāgilu*) — "a door".

ಬಾಗಿಲು is the door and the doorway at once — the opening quite as much as the plank that shuts it.

Beside it sits Tamil **வாயில்** (*vāyil*), a gateway, and that word is transparently built on **வாய்**, 'mouth', which is **ಬಾಯಿ** here with the *b* standing in for the *v*. Whether **ಬಾಗಿಲು** is that same word with a consonant grown in its middle, or a separate formation on **ಬಾಗು**, 'to bend', is not settled. What is beyond doubt is that a Dravidian house has been known to name its opening after a face.

The word, taken apart — its roots and family

ಬಾಗಿಲು (*bāgilu*) is native Dravidian, one word with Tamil *vāyil* and Telugu *vākili* (DEDR 5354). DEDR gives Kannada *bāgil* and an inscription form *vākkil*: the old *v-* has become *b-*.

What you've built

The first of the five things a welcome puts in a guest's way.

Your turn

- *Say it:* *bāgilu*
- *Say it:* it once more, slowly
- *Say it:* *bāgilu*, then *bāyi*, and hear the *b* and the *v* trade places
- *Recall:* say *īga*

Before you move on

What does ಬಾಗಿಲು mean? ("a door".) Say it once more.

52.2 ಕುರ್ಚಿ (kurci) — a chair

Before the new one: what did *bāgilu* mean?

You'll want to know: ಕುರ್ಚಿ

ಕುರ್ಚಿ (*kurci*) — "a chair".

Arabic *kursī*, a seat or a throne, carried into India by Persian and handed on to half the languages of the subcontinent — Hindi कुर्सी, Marathi खुर्ची, and this.

The word was borrowed because the object was. A Kannada household ate, and to a fair degree still eats, sitting on the floor; the chair came in as furniture and brought its name along. You already know how to tell a guest to sit. Now there is something to sit on.

What you've built

Two: a door and a chair.

Your turn

- *Say it: kurci*
- *Say it:* it once more, slowly
- *Say it: kuḷitukō*, then *kurci* — the command, then the thing it needs
- *Read it:* ನಾಡಿದ್ದು

Before you move on

What does ಕುರ್ಚಿ mean? ("a chair".) Say it once more.

52.3 ರಂಗೋಲಿ (raṅgōli) — the pattern drawn at a doorway

Before the new one: what did *kurci* mean?

You'll want to know: ರಂಗೋಲಿ

ರಂಗೋಲಿ (*raṅgōli*) — "the pattern drawn at a doorway".

White rice-flour, drawn freehand on swept ground in front of the door, at first light, before anyone has arrived.

The name is *raṅga*, 'colour', and *āvalī*, 'a row': a row of colour. That *āvalī* is the same one behind the festival of lamps whose name came apart a few chapters back — a row of lamps there, a row of colour here. Kannada also calls the thing ರಂಗವಲ್ಲಿ (*raṅgavalli*), which is the same compound less worn down.

The word, taken apart — its roots and family

ರಂಗೋಲಿ (*raṅgōli*) is usually explained as a compound of two Sanskrit words, *raṅga*, "dye, colour" (CDIAL 10560), and *āvali*, "row, line" (CDIAL 1423): a row of colour. The explanation is the usual one rather than a recorded history.

What you've built

Three: a door, a chair, and the pattern on the ground before both.

Your turn

- *Say it: raṅgōli*
- *Say it:* it once more, slowly
- *Say it: raṅgōli*, then *dīpa*, and name the row inside each
- *Recall:* say *prayāṇa*

Before you move on

What does ರಂಗೋಲಿ mean? ("the pattern drawn at a doorway".)
Say it once more.

52.4 ಹೂವು (hūvu) — a flower

Before the new one: what did *raṅgōli* mean?

You'll want to know: ಹೂವು

ಹೂವು (*hūvu*) — "a flower".

Proto-Dravidian ***pū**, one syllable, and one syllable is what it stayed nearly everywhere: Tamil பூ, Malayalam പൂവ്, Telugu పువ్వు.

Kannada's ಹೂವು shows the law at its very clearest. There is almost nothing else in the word — no root to hide behind, no ending to distract you — only the one sound, *p* across the family and *h* here.

DEDR 4345 lists the older Kannada *pūvu* with Tamil *pū*. DEDR 4345 compares, with a query, Sanskrit *puṣpa*.

What you've built

Four. A door, a chair, the pattern, a flower.

Your turn

- *Say it: hūvu*
- *Say it:* it once more, slowly
- *Say it: hūvu*, then *haṇṇu* and *hallu*, three inherited words with one *h* each
- *Read it:* ಹೊರಡು

Before you move on

What does **ಹೂವು** mean? (“a flower”.) Say it once more.

52.5 ಹೂಮಾಲೆ (hūmāle) — a garland

Before the new one: what did *hūvu* mean?

You’ll want to know: ಹೂಮಾಲೆ

ಹೂಮಾಲೆ (*hūmāle*) — “a garland”.

ಹೂ, the flower from the lesson before, and **ಮಾಲೆ** (*māle*), from Sanskrit *mālā*, a garland or any row of strung things.

So the last word of the run carries both halves of Kannada in it: a Dravidian syllable some thousands of years old, and a Sanskrit one that arrived later and settled in. Nearly every page here has turned on one of those two layers. This word declines to choose.

Five things a Kannada welcome puts between the street and the guest: the door, the chair, the pattern on the ground, the flower, the garland.

DEDR 4345 lists the flower word; CDIAL 10092 lists Sanskrit *mālā*, “wreath, garland”. DEDR 4345 compares, with a query, Sanskrit *puṣpa*. CDIAL takes *mālā* itself from Dravidian (Tamil *mālai*), and DEDR 4827 counts *māle* among the tatsamas.

What you’ve built

Five, and the last of them is half inherited and half borrowed.

Your turn

- *Say it: hūmāle*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *hūvu* and *hūmāle* one after the other
- *Recall:* say *bīḷkoḍuge*

Before you move on

What does **ಹೂಮಾಲೆ** mean? (“a garland”.) Say it once more.

Chapter 53

The Sky

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five things overhead in Kannada, and say which of them Kannada borrowed and which it has always had.
>
> *Complete KA-C53-cloud and say all five words in order.*

53.1 ಆಕಾಶ (ākāśa) — the sky

> Before the new run: what did *hūvu* mean, and what did *hūmāle* mean?

You'll want to know: ಆಕಾಶ

ಆಕಾಶ (*ākāśa*) — "the sky".

Sanskrit *ākāśa*, built on a piece meaning "to shine, to be visible". The sky is named for being the open lit place where a thing can be seen at all, rather than for being a lid over the world.

Kannada holds an inherited word for the same overhead space, **ಬಾನು** (*bānu*), which owes Sanskrit nothing. The two divide the work: **ಆಕಾಶ** does the ordinary shift and turns up in weather talk, while **ಬಾನು** keeps to songs and poetry. A borrowed word taking the daily job and leaving the old one the ceremony is an arrangement you have watched before, at the **ಬಾಗಿಲು**.

ākāśa travelled as well. Traders carried it east, and Malay and Indonesian still say *angkasa* for the sky.

CDIAL 1008 lists Sanskrit *ākāśa*, "sky".

What you've built

The space the rest of this chapter hangs in.

Your turn

- *Say it:* *ākāśa*
- *Say it:* it once more, slowly
- *Say it:* *ākāśa*, then *namaskāra*, as you would greet somebody out of doors
- *Recall:* say *kṛtajñate*

Before you move on

What does **ಆಕಾಶ** mean? ("the sky".) Say it once more.

53.2 ಬಿಸಿಲು (bisilu) — sunshine, the sun's heat

Before the new one: what did *ākāśa* mean?

You'll want to know: ಬಿಸಿಲು

ಬಿಸಿಲು (*bisilu*) — "sunshine, the sun's heat".

Under it sits **ಬಿಸಿ** (*bisi*), "hot" — the word on a cup of **ಚಹಾ** that has just been poured. **ಬಿಸಿಲು** is the hot thing that falls out of the sky, and Kannada built it the plain way, from the heat rather than from the star.

That is worth pausing on. English talks about the weather by naming the sun; Kannada reaches first for what the sun does to you standing in it. A Bengaluru sentence about the afternoon is far more likely to be about **ಬಿಸಿಲು** than about any sun-word at all.

Kannada has two sun-words even so. **ನೇಸರು** (*nēsaru*) is its own, kept alive mostly in verse and in names; the borrowed one you have already had a piece of, inside the sunrise word the good-morning lesson took apart.

The word, taken apart — its roots and family

ಬಿಸಿಲು (*bisilu*) is native Dravidian, of the root *bē*, "to burn, be scorched", and DEDR 5517 lists *bisil* itself, "heat and glare of the sun, sunshine"; the entry also has Tamil *vē*.

What you've built

Two: the sky, and what comes down out of it by day.

Your turn

- *Say it: bisilu*
- *Say it:* it once more, slowly
- *Say it: bisi*, then *bisilu*, and hear the shorter word standing inside the longer one
- *Read it:* ಉಪಕಾರ

Before you move on

What does ಬಿಸಿಲು mean? ("sunshine, the sun's heat".) Say it once more.

53.3 ಚಂದ್ರ (candra) — the moon

Before the new one: what did *bisilu* mean?

You'll want to know: ಚಂದ್ರ

ಚಂದ್ರ (*candra*) — "the moon".

Sanskrit *candra* means "shining, bright". Kannada took it whole, the way it took ಆಕಾಶ, and it is the word a newsreader says.

Kannada's own moon-word is ತಿಂಗಳು (*tiṅgaḷu*), and that word also means a month. One shape for the moon and for the stretch of time it measures — the moon being the oldest calendar there is, and Kannada keeping that fact inside a single word. The twelve month-names you met are Sanskrit; ತಿಂಗಳು is what a Kannada speaker actually counts in.

candra went a long way west too. It shares an ancestor with the Latin piece behind English *candle* and *incandescent*: a very old root for burning white.

CDIAL 4661 lists Sanskrit *candra*, "shining; moon".

What you've built

Three, and two of them borrowed.

Your turn

- *Say it: candra*
- *Say it:* it once more, slowly
- *Say it: ākāśa*, then *candra*, and say which of the two is the container
- *Recall:* say *gaurava*

Before you move on

What does **ಚಂದ್ರ** mean? ("the moon".) Say it once more.

53.4 ಚುಕ್ಕಿ (cukki) — a star; a dot

Before the new one: what did *candra* mean?

You'll want to know: ಚುಕ್ಕಿ

ಚುಕ್ಕಿ (*cukki*) — "a star; a dot".

ಚುಕ್ಕಿ is inherited, and it carries the star and the dot on one shape. Anything small and round and separate can be a **ಚುಕ್ಕಿ**.

Which is why it belongs to the **ರಂಗೋಲಿ** as much as to the night. The pattern at the doorway is set out first as a grid of **ಚುಕ್ಕಿ**, points of rice flour placed at even spacing, and the lines are drawn around and between them afterwards. A woman saying she is putting down **ಚುಕ್ಕಿ** in the morning is talking about her doorstep.

The borrowed word for a star is **ನಕ್ಷತ್ರ** (*nakṣatra*), and that is the one an astrologer reaches for. **ಚುಕ್ಕಿ** is the one a child points with.

The word, taken apart — its roots and family

ಚುಕ್ಕಿ (*cukki*) is native Dravidian. DEDR 2646 lists Kannada *cukke*, "small mark, dot", and *cikki*, "spot, star", with Telugu *cukka*, "star, spot, dot". Tamil *cukkai*, "star", is a loan from Telugu, the entry says.

What you've built

Four, and this one reaches back down to the doorstep.

Your turn

- *Say it: cukki*
- *Say it:* it once more, slowly
- *Say it: cukki*, then *raṅgōli*, and say how the two meet on the ground
- *Read it:* ಆಶೀರ್ವಾದ

Before you move on

What does ಚುಕ್ಕಿ mean? ("a star; a dot".) Say it once more.

53.5 ಮೋಡ (mōḍa) — a cloud

Before the new one: what did *cukki* mean?

You'll want to know: ಮೋಡ

ಮೋಡ (*mōḍa*) — "a cloud".

ಮೋಡ is inherited and quite plain: the grey thing standing between you and the ಬಿಸಿಲು. ಮೋಡ ಇದೆ — there is cloud — is a whole weather report, and it is the one Kannada speakers give each other most of the year.

Weather words stretch, and this one has. ಮೋಡ also describes a face that has gone dull and closed, and a mood that will not lift. English went the same way with *clouded* and *overcast*, from the far side of the world and with no contact at all. When two unrelated languages reach for the same picture, the picture is doing the work rather than any borrowing.

With that, the sky is furnished.

The word, taken apart — its roots and family

ಮೋಡ (*mōḍa*) is native Dravidian, one word with Tamil *mūṭam* and Telugu *mōḍamu* (DEDR 5033).

What you've built

Five: **ಆಕಾಶ**, **ಬಿಸಿಲು**, **ಚಂದ್ರ**, **ಚುಕ್ಕಿ**, **ಮೋಡ**. You can say what is overhead.

Your turn

- *Say it:* *mōḍa*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say which two of them Kannada borrowed
- *Recall:* say *vandane*

Before you move on

What does **ಮೋಡ** mean? ("a cloud".) Say it once more.

Chapter 54

The Tree

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a tree and its parts in Kannada, from the seed it started as to the branch at the top.
>
> *Complete KA-C54-seed and say all five words in order.*

54.1 ಮರ (mara) — a tree

> Before the new run: what did *cukki* mean, and what did *mōḍa* mean?

You'll want to know: ಮರ

ಮರ (*mara*) — "a tree".

Two syllables, and one of the oldest words the family has. Tamil says *maram*, Malayalam *maram*, and Kannada let the closing *-m* fall away, as it has a habit of doing.

ಮರ is the standing tree and equally the wood it is cut into. A carpenter and a forester reach for the same word, and Kannada has felt no need to split them — the thing and the material are one item as far as the language is concerned.

It is also the first word of this chapter for a plain reason: everything else here is a part of it.

The word, taken apart — its roots and family

ಮರ (*mara*) is native Dravidian, one word with Tamil *maram* (DEDR 4711).

What you've built

The thing the next four words belong to.

Your turn

- *Say it: mara*
- *Say it:* it once more, slowly
- *Say it: doḍḍa mara* — "a big tree" — with the describing word in front, where Kannada keeps it
- *Recall:* say *bāgilu*

Before you move on

What does ಮರ mean? ("a tree".) Say it once more.

54.2 ಕೊಂಬೆ (kombe) — a branch

Before the new one: what did *mara* mean?

You'll want to know: ಕೊಂಬೆ

ಕೊಂಬೆ (*kombe*) — "a branch".

Beside it stands ಕೊಂಬು (*kombu*), a horn, and the two are the same word wearing different endings. A branch is what a ಮರ has on its head, and the language saw an animal's horn and a tree's limb as one shape: something hard that grows outward and forks.

That picture is not a Kannada peculiarity. Tamil keeps *kombu* doing both jobs as well, so the joining is old — older than any of the four sisters.

English does the reverse trick and puts the tree onto the animal, calling the branched horns of a stag its antlers and its crown. The picture travels in whichever direction a language happens to take it.

The word, taken apart — its roots and family

ಕೊಂಬೆ (*kombe*) is native Dravidian, one word with Tamil *kompu* and Telugu *komma* (DEDR 2115). DEDR lists Kannada *kombu* and *kombe*, "branch".

What you've built

Two: the tree, and what comes out of it sideways.

Your turn

- *Say it: kombe*
- *Say it:* it once more, slowly
- *Say it: mara*, then *kombe*, and say which one holds the other up
- *Read it:* ಕುರ್ಚಿ

Before you move on

What does ಕೊಂಬೆ mean? ("a branch".) Say it once more.

54.3 ಎಲೆ (ele) — a leaf

Before the new one: what did *kombe* mean?

You'll want to know: ಎಲೆ

ಎಲೆ (*ele*) — "a leaf".

Inherited, and close to its sisters: Tamil *ilai*, Malayalam *ila*. Telugu is the one that walked off, using *āku* instead.

The everyday weight of ಎಲೆ is heavier than "leaf" suggests. Say it on its own in a Kannada house and you are usually talking about the betel leaf — ಎಲೆ ಅಡಿಕೆ, leaf and areca nut, handed to a guest at the end of an *ūṭa* and at the end of a welcome. The ಬಾಗಿಲು, the ಕುರ್ಚಿ, the ರಂಗೋಲಿ and the ಹೂಮಾಲೆ each had their moment; the ಎಲೆ is what the visitor is holding on the way out.

The other big ಎಲೆ is the plantain leaf a meal is served on, which is a plate you do not wash.

The word, taken apart — its roots and family

ಎಲೆ (*ele*) is native Dravidian, one word with Tamil *ilai* (DEDR 497).

What you've built

Three, and this one is handed to people.

Your turn

- *Say it: ele*
- *Say it:* it once more, slowly
- *Say it: hasiru ele* — "a green leaf" — and *ele*, *kombe*, *mara* upward in order
- *Recall:* say *raṅgōli*

Before you move on

What does ಎಲೆ mean? ("a leaf".) Say it once more.

54.4 ಬೇರು (bēru) — a root

Before the new one: what did *ele* mean?

You'll want to know: ಬೇರು

ಬೇರು (*bēru*) — "a root".

Tamil says *vēr*, Malayalam says *vēr*, Telugu says *vēru* — and Kannada says ಬೇರು. That opening *b* against everybody else's *v* is the trade you have watched at the ಬಾಗಿಲು and again in ಬರೆ, and here it is once more with the letters lined up so plainly that you can hear the law rather than be told about it.

Two sound laws now separate Kannada from its sisters, and both of them are visible in a single chapter: the *p* that became *h* in ಹಣ್ಣು and ಹೂವು, and the *v* that became *b* in this word.

ಬೇರು also does the figurative work English gives *roots*: where a family comes from, what a word descends from. Both languages dug the same hole.

The word, taken apart — its roots and family

ಬೇರು (*bēru*) is native Dravidian, one word with Tamil *vēr* and Telugu *vēru* (DEDR 5535). DEDR gives Kannada *bēr(u)*: the old *v-* has become *b-*.

What you've built

Four, and the lowest one shows the law.

Your turn

- *Say it: bēru*
- *Say it:* it once more, slowly
- *Say it: bēru*, then *bāgilu*, and hear the same *b* opening both
- *Read it:* **ಹೂವು**

Before you move on

What does **ಬೇರು** mean? ("a root".) Say it once more.

54.5 ಬೀಜ (bīja) — a seed

Before the new one: what did *bēru* mean?

You'll want to know: ಬೀಜ

ಬೀಜ (*bīja*) — "a seed".

Four inherited words, and then this one, straight out of Sanskrit and unaltered. The chapter closes on a borrowing, which is a fair picture of the language: the tree is Dravidian from the **ಬೇರು** up, and the word for what starts it came from elsewhere.

Kannada kept its own word for the act, though. **ಬಿತ್ತು** (*bittu*) is to sow, and it is as native as **ಮರ**. So a **ರೈತ** sows with an inherited word and names what he is sowing with a borrowed one, in the same breath and without noticing.

ಬೀಜ also does the abstract job — the seed of a quarrel, the seed of an idea — in Kannada exactly as in English, and it was doing it in Sanskrit long before either.

CDIAL 9250 lists Sanskrit *bīja*, "seed".

What you've built

Five: ಮರ, ಕೊಂಬೆ, ಎಲೆ, ಬೇರು, ಬೀಜ. A tree from the ground up, and the thing it began as.

Your turn

- *Say it: bīja*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say which one of them Kannada borrowed
- *Recall:* say *hūmāle*

Before you move on

What does ಬೀಜ mean? ("a seed".) Say it once more.

Chapter 55

River and Road

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the water, the ground and the road around a Kannada village, and ask my way with them.
>
> *Complete KA-C55-path and say all five words in order.*

55.1 ನದಿ (nadi) — a river

> Before the new run: what did *bēru* mean, and what did *bīja* mean?

You'll want to know: ನದಿ

ನದಿ (*nadi*) — "a river".

Sanskrit *nadī*, and under it a root *nad-* meaning "to roar, to sound". A river is named for the noise it makes. That is a word coined by somebody who heard one before they ever saw one, in the dark, in the rain.

Kannada's own river-word is **ಹೊಳೆ** (*hoḷe*), and it opens with the *h* you have learned to read as an old *p*. **ಹೊಳೆ** is the water you can walk to — the stream behind the village. **ನದಿ** is the **ಕಾವೇರಿ**. The borrowed word took the big rivers and left the small ones to the inherited one, which is the opposite of what usually happens.

CDIAL 6943 lists Sanskrit *nadī*, "river".

What you've built

The first of five things you would have to name to ask your way.

Your turn

- *Say it: nadi*
- *Say it:* it once more, slowly
- *Say it: nadi elli?* — "where is the river?" — with the asking word at the end
- *Recall:* say *ākāśa*

Before you move on

What does ನದಿ mean? ("a river".) Say it once more.

55.2 ಕೆರೆ (kere) — a tank, a reservoir

Before the new one: what did *nadi* mean?

You'll want to know: ಕೆರೆ

ಕೆರೆ (*kere*) — "a tank, a reservoir".

English has no comfortable word for this, which is why the Indian English one is *tank*. A ಕೆರೆ is not a lake. It is built: an earth bund thrown across a shallow valley so the ಮಳೆಗಾಲ water stands instead of running away, and so a ರೈತ downstream still has ನೀರು in the dry months.

The Deccan is dry and the rain arrives all at once, so this is the thing the land needed most, and Karnataka has thousands of them, many of them eight or nine hundred years old and still in use. Bengaluru's own neighbourhoods are named after the ones it has built over.

ಕೆರೆ is inherited, and it is one of those words that tells you what its speakers were doing.

The word, taken apart — its roots and family

ಕೆರೆ (*kere*) is native Dravidian, of the root *kiṟ*, "to confine, block up, fence", and DEDR 1980 lists *keṟe*, "tank", under it: water penned in; the entry also has Tamil *ceṟi* and Telugu *ceṟa*.

What you've built

Two: water that runs, and water somebody stopped.

Your turn

- *Say it: kere*
- *Say it:* it once more, slowly
- *Say it: nadi*, then *kere*, and say which one of them people made
- *Read it:* ಬಿಸಿಲು

Before you move on

What does ಕೆರೆ mean? ("a tank, a reservoir".) Say it once more.

55.3 ಬೆಟ್ಟ (beṭṭa) — a hill

Before the new one: what did *kere* mean?

You'll want to know: ಬೆಟ್ಟ

ಬೆಟ್ಟ (*beṭṭa*) — "a hill".

Inherited, and it opens with the *b* the previous chapter set beside everybody else's *v*, so you can hear which layer of the language it belongs to before you know anything else about it.

Kannada distinguishes sizes here where English shrugs. ಗುಡ್ಡ (*guḍḍa*) is the small rise you would walk up without planning to; ಬೆಟ್ಟ is the one that has a temple on top and a name on the map. ನಂದಿ ಬೆಟ್ಟ north of Bengaluru and ಚಾಮುಂಡಿ ಬೆಟ್ಟ above Mysuru are both ಬೆಟ್ಟ, and nobody would call either a ಗುಡ್ಡ.

A hill with a name is a hill people climb for a reason, and in Karnataka the reason is usually at the summit.

The word, taken apart — its roots and family

ಬೆಟ್ಟ (*beṭṭa*) is native Dravidian, one word with Tamil *viṭam* (DEDR 5474). DEDR gives Kannada *beṭṭa*, *beṭṭu*, "big hill, mountain": the old *v-* has become *b-*.

What you've built

Three, and the first of them that stands up.

Your turn

- *Say it: beṭṭa*
- *Say it:* it once more, slowly
- *Say it: doḍḍa beṭṭa*, then *cikka guḍḍa*, and hear the size words doing the sorting
- *Recall:* say *candra*

Before you move on

What does **ಬೆಟ್ಟ** mean? ("a hill".) Say it once more.

55.4 ಹಳ್ಳಿ (haḷḷi) — a village

Before the new one: what did *beṭṭa* mean?

You'll want to know: ಹಳ್ಳಿ

ಹಳ್ಳಿ (*haḷḷi*) — "a village".

The *h* tells you what happened: an older *paḷḷi* stands behind it, worn down by the same law that turned the fruit-word and the flower-word into **ಹಣ್ಣು** and **ಹೂವು**.

What makes this one worth stopping for is that the older shape did not disappear — it is written on road signs across the state. Hundreds of Karnataka place names end in *-halli*, and hundreds more across the border end in *-palli* and *-pally*. Same word, one of them having passed through the Kannada law and the other not. A learner who can hear that ending can read a map as a record of a sound change.

Tamil kept *paḷḷi* too and steered it a different way, toward a place of rest and then toward a school.

DEDR 4018 lists Kannada *paḷḷi*, *haḷḷi* with Tamil *paḷḷi* and Telugu *palli*. DEDR 4018 compares Sanskrit *pallī*, "small village".

What you've built

Four, and this one is signposted the length of the state.

Your turn

- *Say it: haḷḷi*
- *Say it:* it once more, slowly
- *Say it: haṇṇu*, then *haḷḷi*, and hear the one law opening both
- *Read it:* ಚುಕ್ಕಿ

Before you move on

What does ಹಳ್ಳಿ mean? ("a village".) Say it once more.

55.5 ದಾರಿ (dāri) — a way, a path

Before the new one: what did *haḷḷi* mean?

You'll want to know: ದಾರಿ

ದಾರಿ (*dāri*) — "a way, a path".

This is the word that turns the other four into directions. ಕೆರೆಗೆ ದಾರಿ — the way to the tank — and you already have the little *-ge* that hangs on the end of the place you are heading for.

Kannada keeps a second word for the same thing, ಹಾದಿ (*hādi*), and speakers use the two close to interchangeably, though ಹಾದಿ leans a little toward the worn track and ದಾರಿ a little toward the route you choose.

Put ದಾರಿ with the polite word you already have and you have the sentence a stranger needs most: ದಯವಿಟ್ಟು ದಾರಿ ಹೇಳಿ — please tell me the way. Notice that nothing in it names you. Kannada lets the asking be the request.

The word, taken apart — its roots and family

ದಾರಿ (*dāri*) is native Dravidian, one word with Telugu *dāri* (DEDR 3170). DEDR notes that Tamil *tārai*, "path", is a loan from Telugu.

What you've built

Five: ನದಿ, ಕೆರೆ, ಬೆಟ್ಟ, ಹಳ್ಳಿ, ದಾರಿ. Four landmarks and the thread between them.

Your turn

- *Say it: dāri*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *dayaviṭṭu dāri hēḷi*
- *Recall:* say *mōḍa*

Before you move on

What does ದಾರಿ mean? (“a way, a path”.) Say it once more.

Chapter 56

In the House

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five ordinary things in a Kannada house, and say which two of them arrived with borrowed names.
>
> *Complete KA-C56-box and say all five words in order.*

56.1 ಚಾಪೆ (cāpe) — a mat

> Before the new run: what did *haḷḷi* mean, and what did *dāri* mean?

You'll want to know: ಚಾಪೆ

ಚಾಪೆ (*cāpe*) — "a mat".

The woven mat that gets unrolled on the floor: for sitting on, for eating on, for sleeping on, and for putting away against the wall in the morning.

The **ಕುರ್ಚಿ** arrived from outside with its Persian name, and it arrived late. The **ಚಾಪೆ** was already there. A Kannada house has for a very long time sat and eaten and slept at floor level, and the **ಚಾಪೆ** is the piece of furniture that arrangement needs — one object doing what a chair, a table and a bed do elsewhere, then rolling up to occupy nothing.

Offering a guest a **ಚಾಪೆ** is the older form of the courtesy the **ಕುರ್ಚಿ** now performs, and in a **ಹಳ್ಳಿ** it is still the usual one.

The word, taken apart — its roots and family

ಚಾಪೆ (*cāpe*) is native Dravidian, one word with Tamil *cāppai* (DEDR 2452).

What you've built

The first of five things a Kannada house keeps to hand.

Your turn

- *Say it: cāpe*
- *Say it:* it once more, slowly
- *Say it: kuḷitukō*, then *cāpe*, and say who is offered which
- *Recall:* say *mara*

Before you move on

What does ಚಾಪೆ mean? ("a mat".) Say it once more.

56.2 ಬುಟ್ಟಿ (buṭṭi) — a basket

Before the new one: what did *cāpe* mean?

You'll want to know: ಬುಟ್ಟಿ

ಬುಟ್ಟಿ (*buṭṭi*) — "a basket".

Woven, usually from bamboo, and carried on the hip or the head rather than in the hand. ಹಣ್ಣಿನ ಬುಟ್ಟಿ is a basket of fruit; a ಹೂವಿನ ಬುಟ್ಟಿ is what flowers come to the door in.

The little *-ina* in the middle of those is the joining piece Kannada slips between two names to say the second belongs to the first. Fruit-of basket. You can build the same shape with anything you already have.

ಬುಟ್ಟಿ shares its ending with the ಚಾಪೆ's world rather than the ಕುರ್ಚಿ's: another light, cheap, repairable thing made from what grows nearby, and one that a house replaces every few years without thinking about it.

The word, taken apart — its roots and family

ಬುಟ್ಟಿ (*buṭṭi*) is native Dravidian, one word with Tamil *puṭṭil* (DEDR 4263). DEDR lists Kannada *puṭṭi*, *buṭṭi*, "basket".

What you've built

Two: a thing to sit on, and a thing to carry with.

Your turn

- *Say it: buṭṭi*
- *Say it:* it once more, slowly
- *Say it: haṇṇina buṭṭi*, then *hūvina buṭṭi*, and hear the joining piece in the middle
- *Read it:* ಕೊಂಬೆ

Before you move on

What does ಬುಟ್ಟಿ mean? ("a basket".) Say it once more.

56.3 ಚಾಕು (cāku) — a knife

Before the new one: what did *buṭṭi* mean?

You'll want to know: ಚಾಕು

ಚಾಕು (*cāku*) — "a knife".

Persian *chāqū*, a small knife, carried down into the subcontinent along the same road that delivered the ಕುರ್ಚಿ, and handed on to Hindi, Marathi, Telugu and this. Two objects in two chapters, both borrowed, both arriving by the north.

The borrowing did not push anything out. Kannada's own blade is ಕತ್ತಿ (*katti*), and it is the big one — the household and field blade, the one a ರೈತ works with. ಚಾಕು is the small one: the pocket knife, the paring knife, the thing that cuts a ಹಣ್ಣು.

The pattern is the one the chair showed. When a language borrows a word for a thing it already has, the borrowed word usually takes a narrower job and the old word keeps the wider one.

What you've built

Three, and the second of them arrived by the northern road.

Your turn

- *Say it: cāku*
- *Say it:* it once more, slowly
- *Say it: kurci*, then *cāku*, and say what the two of them have in common
- *Recall:* say *ele*

Before you move on

What does **ಚಾಕು** mean? ("a knife".) Say it once more.

56.4 ಪಾತ್ರೆ (pātre) — a vessel, a cooking pot

Before the new one: what did *cāku* mean?

You'll want to know: ಪಾತ್ರೆ

ಪಾತ್ರೆ (*pātre*) — "a vessel, a cooking pot".

Sanskrit *pātra*, and it began by meaning a drinking or eating vessel. Then it did something quietly remarkable: it moved from the container to the person. A *pātra* is also one fit to receive — a worthy recipient of a gift, of teaching, of trust.

From there it took one more step, and the *pātra* of a play is a character, a part, a role. The same word holds the pot, the deserving person and the actor's part, because all three are shapes that something is poured into.

Kannada carries the whole set. **ಪಾತ್ರೆ** in the kitchen is the vessel; **ಪಾತ್ರ** on the stage is the role. One Sanskrit word, and the ending tells you which of its lives is being lived.

CDIAL 8055 lists Sanskrit *pātra*, "drinking vessel, dish".

What you've built

Four, and this one keeps three meanings in one shape.

Your turn

- *Say it: pātre*
- *Say it:* it once more, slowly
- *Say it: pātre*, then *nīru*, and say which one holds the other
- *Read it:* ಬೇರು

Before you move on

What does ಪಾತ್ರೆ mean? ("a vessel, a cooking pot".) Say it once more.

56.5 ಪೆಟ್ಟಿಗೆ (peṭṭige) — a box

Before the new one: what did *pātre* mean?

You'll want to know: ಪೆಟ್ಟಿಗೆ

ಪೆಟ್ಟಿಗೆ (*peṭṭige*) — "a box".

All four sisters have this word and it is nearly the same in each: Tamil *peṭṭi*, Malayalam *peṭṭi*, Telugu *peṭṭe*, and Kannada ಪೆಟ್ಟಿಗೆ. Only Kannada carries the extra closing syllable, which is a habit you have now seen a few times — Kannada tends to be the long one.

A ಪೆಟ್ಟಿಗೆ is the wooden or tin chest a household keeps its papers and its good ಬಟ್ಟೆ in, standing in a corner with a padlock on it. It is also the word that stretched to cover a suitcase, a jewellery box and the case a musical instrument travels in.

Notice how much of this chapter is containers. The ಬುಟ್ಟಿ carries, the ಪಾತ್ರೆ cooks, the ಪೆಟ್ಟಿಗೆ keeps. A house is largely a set of things for putting other things into.

The word, taken apart — its roots and family

ಪೆಟ್ಟಿಗೆ (*peṭṭige*) is native Dravidian, one word with Tamil *peṭṭi* and Telugu *peṭṭe* (DEDR 4388). DEDR lists Kannada *peṭṭi*, *peṭṭige*. DEDR 4388 compares Sanskrit *peṭaka*.

What you've built

Five: ಚಾಪೆ, ಬುಟ್ಟಿ, ಚಾಕು, ಪಾತ್ರೆ, ಪೆಟ್ಟಿಗೆ. You can furnish a room.

Your turn

- *Say it: peṭṭige*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say which three of them hold something
- *Recall:* say *bīja*

Before you move on

What does **ಪೆಟ್ಟಿಗೆ** mean? (“a box”.) Say it once more.

Chapter 57

More of the Body

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five more parts of a person in Kannada, and say where it hurts.
>
> *Complete KA-C57-bone and say all five words in order.*

57.1 ಕುತ್ತಿಗೆ (kuttige) — the neck

Before the new run: what did *pātre* mean, and what did *peṭṭige* mean?

You'll want to know: ಕುತ್ತಿಗೆ

ಕುತ್ತಿಗೆ (*kuttige*) — "the neck".

The everyday word, and the one a **ವೈದ್ಯ** uses. Kannada has a second, **ಕೊರಳು** (*koraḷu*), and the two divide by what is being done to the neck rather than by which part of it is meant: **ಕೊರಳು** is the neck a **ಹೂಮಾಲೆ** goes around and the neck a voice comes out of, while **ಕುತ್ತಿಗೆ** is the neck that aches.

So a singer's is a **ಕೊರಳು** and a patient's is a **ಕುತ್ತಿಗೆ**, and the same piece of a person is both, depending on why you brought it up.

This chapter picks up where the leg and the tooth left off, and the run gets less obvious as it goes.

The word, taken apart — its roots and family

ಕುತ್ತಿಗೆ (*kuttige*) is native Dravidian, one word with Telugu *kutika* (DEDR 1718).

What you've built

The first of five more pieces of a person.

Your turn

- *Say it: kuttige*
- *Say it:* it once more, slowly
- *Say it: nanna kuttige* — "my neck" — with the possessing word in front
- *Recall:* say *nadi*

Before you move on

What does **ಕುತ್ತಿಗೆ** mean? ("the neck".) Say it once more.

57.2 ಬೆನ್ನು (bennu) — the back

Before the new one: what did *kuttige* mean?

You'll want to know: ಬೆನ್ನು

ಬೆನ್ನು (*bennu*) — "the back".

Inherited, and it opens with the *b* that has now turned up in **ಬಾಗಿಲು**, **ಬೇರು** and **ಬೆಟ್ಟ**. Four words in four chapters, and by this point you should be reading that first letter as a small piece of history rather than as a sound.

ಬೆನ್ನು is the part of a person that faces away, so the language uses it for anything behind you. **ಬೆನ್ನ ಹಿಂದೆ**, behind the back, is where things are said about you that would not be said in front.

And **ಬೆನ್ನು ತಟ್ಟು**, to pat the back, means to praise or encourage — the same gesture English named the same way, with no contact between the two languages at any point. Some pictures are simply what bodies do.

The word, taken apart — its roots and family

ಬೆನ್ನು (*bennu*) is native Dravidian, one word with Tamil *veṉ* and Telugu *vennu* (DEDR 5488). DEDR gives Kannada *ben*, *bennu*: the old *v-* has become *b-*.

What you've built

Two, and this one has a hand on it.

Your turn

- *Say it: bennu*
- *Say it:* it once more, slowly
- *Say it: bennu*, then *bēru*, then *beṭṭa*, and hear the one letter they share
- *Read it:* ಕೆರೆ

Before you move on

What does ಬೆನ್ನು mean? ("the back".) Say it once more.

57.3 ತುಟಿ (tuṭi) — a lip

Before the new one: what did *bennu* mean?

You'll want to know: ತುಟಿ

ತುಟಿ (*tuṭi*) — "a lip".

Two syllables, inherited, and here the four sisters go four different ways. Tamil, Malayalam and Telugu each reach for something quite unlike ತುಟಿ and unlike each other. For a family this close that is unusual, and it usually means the part in question got renamed after the family split, several times over, by whichever picture each language happened to prefer.

ತುಟಿ sits directly on the ಬಾಯಿ you already have. The mouth is the opening; the ತುಟಿ is its edge.

And it is the piece of the face that Kannada uses for keeping quiet. To say nothing at all is to not move the ತುಟಿ — a phrase built out of a body part rather than out of a word for silence, which is how a great many everyday expressions in this language are put together.

The word, taken apart — its roots and family

ತುಟಿ (*tuṭi*) is native Dravidian, one word with Tamil *tuṭi* (DEDR 3296). DEDR points to related Indo-Aryan words in CDIAL 5853.

What you've built

Three, and this one edges a word you already had.

Your turn

- *Say it: tuṭi*
- *Say it:* it once more, slowly
- *Say it: bāyi*, then *tuṭi*, and say which one is the edge of the other
- *Recall:* say *beṭṭa*

Before you move on

What does **ತುಟಿ** mean? ("a lip".) Say it once more.

57.4 ಭುಜ (bhuja) — the shoulder

Before the new one: what did *tuṭi* mean?

You'll want to know: ಭುಜ

ಭುಜ (*bhuja*) — "the shoulder".

Sanskrit *bhuja*, and behind it *bhuj-*, "to bend". The shoulder is named for being the joint that folds — the limb described by what it does rather than by where it sits. Sanskrit built a good many body words that way.

Kannada's own word here is **ಹೆಗಲು** (*hegalu*), and the division between the two is worth having. **ಹೆಗಲು** is the shoulder you carry a load on, the flat top of it; **ಭುಜ** leans toward the joint and toward strength — the arm-and-shoulder of somebody who can lift things.

That opening **ಭ** is a letter Kannada mostly uses in borrowed words. Meeting one is a fair hint that the word came from Sanskrit before you know anything else about it.

CDIAL 9525 lists Sanskrit *bhuja*, "arm".

What you've built

Four, and this is the run's borrowed one.

Your turn

- *Say it: bhuja*
- *Say it:* it once more, slowly
- *Say it: bhuja*, then *kuttige*, and say which of the two the **ಹೂಮಾಲೆ** passes
- *Read it:* **ಹಳ್ಳಿ**

Before you move on

What does **ಭುಜ** mean? ("the shoulder".) Say it once more.

57.5 ಮೂಳೆ (mūḷe) — a bone

Before the new one: what did *bhuja* mean?

You'll want to know: ಮೂಳೆ

ಮೂಳೆ (*mūḷe*) — "a bone".

Here Kannada is the odd one out. Tamil says *elumbu*, Malayalam says *eluvu*, Telugu says *emuka* — three sisters plainly holding the same old word between them, and Kannada holding **ಮೂಳೆ**, which is not it.

That happens. A language drops an inherited word and promotes another one, and afterwards the family tree looks broken at exactly one branch. The ear-word and the nose-word each showed you a version of this earlier, with a different sister standing apart each time. Which one is the odd one out changes from word to word, and that is the whole point: these are four separate languages, not four accents.

ಮೂಳೆ closes the body run, and it is the piece of you that outlasts the rest.

The word, taken apart — its roots and family

ಮೂಳೆ (*mūḷe*) is native Dravidian (DEDR 5050). DEDR lists Kannada *mūḷe* with Kodagu *mu · ḷe* and Tulu *mūḷe*, "bone".

What you've built

Five: **ಕುತ್ತಿಗೆ**, **ಬೆನ್ನು**, **ತುಟಿ**, **ಭುಜ**, **ಮೂಳೆ**. Enough to say where it hurts.

Your turn

- *Say it: mūḷe*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then say which of them is the odd one in the family
- *Recall:* say *dāri*

Before you move on

What does **ಮೂಳೆ** mean? (“a bone”.) Say it once more.

Chapter 58

More Short Replies

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can answer an offer in Kannada five ways, from a little to no thank you.
>
> *Complete KA-C58-thats-all and say all five words in order.*

58.1 ಸ್ವಲ್ಪ (svalpa) — a little, a bit

> Before the new run: what did *bhuja* mean, and what did *mūḷe* mean?

You'll want to know: ಸ್ವಲ್ಪ

ಸ್ವಲ್ಪ (*svalpa*) — "a little, a bit".

Sanskrit, and it comes apart cleanly: *su-*, "well, nicely", on *alpa*, "small". Nicely small. The same *su-* that opens the good-morning word you already have.

But the useful thing about ಸ್ವಲ್ಪ is not its size. It is what it does to whatever follows it. Ask for something flat and you are instructing; put ಸ್ವಲ್ಪ in front and you are asking. ಸ್ವಲ್ಪ ನೀರು ಕೊಡಿ leaves the other person room to move in a way that ನೀರು ಕೊಡಿ does not.

The word measures a quantity in the dictionary and a manner in the mouth. English does the same thing with "just" and "a bit", and neither of those measures much any more either.

The word, taken apart — its roots and family

ಸ್ವಲ್ಪ (*svalpa*) is Sanskrit *svalpa*, "very little", taken over whole: *su-*, "well, very", and *alpa*, "small".

What you've built

A word that softens the next one.

Your turn

- *Say it: svalpa*
- *Say it:* it once more, slowly
- *Say it: nīru koḍi*, then *svalpa nīru koḍi*, and hear how much softer the second one is
- *Recall:* say *cāpe*

Before you move on

What does ಸ್ವಲ್ಪ mean? ("a little, a bit".) Say it once more.

58.2 ಹೆಚ್ಚು (heccu) — more, a lot

Before the new one: what did *svalpa* mean?

You'll want to know: ಹೆಚ್ಚು

ಹೆಚ್ಚು (*heccu*) — "more, a lot".

Inherited, and the opening *h* puts it in the same layer as ಹಣ್ಣು and ಹಳ್ಳಿ. The borrowed word softened your request; this one is Kannada's own, and it does the opposite job.

ಹೆಚ್ಚು is both "more" and "much". It answers a question about quantity all by itself, and it goes in front of whatever it is measuring: ಹೆಚ್ಚು ಹಣ್ಣು, more fruit. It is also the word for a comparison, so ಹೆಚ್ಚು is how a Kannada speaker says one thing outweighs another without needing a separate word for "than".

Held against ಸ್ವಲ್ಪ it gives you a scale you can answer with. ಸ್ವಲ್ಪ when a little will do; ಹೆಚ್ಚು when it will not.

The word, taken apart — its roots and family

ಹೆಚ್ಚು (*heccu*) is native Dravidian, of the root *per*, "great", and DEDR 4411 lists *peccu*, *heccu*, "to become great, increase", under it; the entry also has Tamil *peru* and Malayalam *peru*.

What you've built

Two, and they point in opposite directions.

Your turn

- *Say it: heccu*
- *Say it:* it once more, slowly
- *Say it: svalpa hālu*, then *heccu hālu*, and hear the amount change in front
- *Read it:* **ಬುಟ್ಟಿ**

Before you move on

What does **ಹೆಚ್ಚು** mean? ("more, a lot".) Say it once more.

58.3 ಕಡಿಮೆ (kaḍime) — less, fewer

Before the new one: what did *heccu* mean?

You'll want to know: ಕಡಿಮೆ

ಕಡಿಮೆ (*kaḍime*) — "less, fewer".

Underneath sits **ಕಡಿ** (*kaḍi*), to cut, to reduce. **ಕಡಿಮೆ** is the cut-down amount — a quantity named for the act that produced it, which is the same move Kannada made with the fruit-word, where the ripening gave the ripe thing its name.

ಹೆಚ್ಚು and **ಕಡಿಮೆ** travel together as a pair, and the pair has its own life. **ಹೆಚ್ಚು ಕಡಿಮೆ**, said as one phrase, means "more or less, roughly" — two opposites put side by side to make a hedge. English builds "more or less" out of exactly the same two pieces, and Kannada leaves out the "or".

That is three of the five now, and none of them names a thing. This chapter is about the words that adjust everything else.

The word, taken apart — its roots and family

ಕಡಿಮೆ (*kaḍime*) is native Dravidian, of the root *kaḍe*, "to pass over; end, last", and DEDR 1109 lists *kaḍime*, "deficiency", under it; the entry also has Tamil *kaṭa* and Telugu *kaḍacu*.

What you've built

Three, and two of them make a phrase together.

Your turn

- *Say it: kaḍime*
- *Say it:* it once more, slowly
- *Say it: heccu kaḍime*, and say what the pair means when it travels as one
- *Recall:* say *cāku*

Before you move on

What does **ಕಡಿಮೆ** mean? ("less, fewer".) Say it once more.

58.4 ಬೇಡ (bēḍa) — no thank you, I don't want it

Before the new one: what did *kaḍime* mean?

You'll want to know: ಬೇಡ

ಬೇಡ (*bēḍa*) — "no thank you, I don't want it".

This is the refusal a guest actually needs, and it is not the **ಇಲ್ಲ** you learned on the first page. **ಇಲ್ಲ** denies that something exists or is so. **ಬೇಡ** declines it.

It is the negative twin of **ಬೇಕು** (*bēku*), "wanted, needed" — the word that turns up in the sort of sentence Kannada builds with nothing doing at all. **ಬೇಕು** and **ಬೇಡ** answer the same question in opposite directions, and neither

of them bothers to name who is doing the wanting. The offer is made, and one word settles it.

At a Kannada table you will be offered more food several times after you are finished. ಬೇಡ, said once and pleasantly, is the whole of the reply. Adding ಸ್ವಲ್ಪ in front turns it into "just a little", which is the answer that gets you served anyway.

The word, taken apart — its roots and family

ಬೇಡ (*bēḍa*) is native Dravidian, the negative of *bēku*, "it is wanted", and DEDR 5528 lists *bēḍa*, "it is not wanted", itself; the entry also has Telugu *vēḍu* and Malayalam *vēṇam*.

What you've built

Four, and this one is the polite way out.

Your turn

- *Say it: bēḍa*
- *Say it:* it once more, slowly
- *Say it: bēḍa*, then *illa*, and say which one refuses and which one denies
- *Read it:* ಪಾತ್ರೆ

Before you move on

What does ಬೇಡ mean? ("no thank you, I don't want it".) Say it once more.

58.5 ಅಷ್ಟೇ (aṣṭē) — that's all, just that

Before the new one: what did *bēḍa* mean?

You'll want to know: ಅಷ್ಟೇ

ಅಷ್ಟೇ (*aṣṭē*) — "that's all, just that".

Two pieces. ಅಷ್ಟು (*aṣṭu*) is "that much", and it belongs to the pointing family you already have — the *a-* of ಅದು and ಅಲ್ಲಿ, the one that means away

from the speaker. Then the long -*ē* on the end, which Kannada hangs on a word to mean "and nothing besides".

So **ಅಷ್ಟೇ** is "that much, and no more". It closes a list, ends an order, and stops a question. Asked what else you would like: **ಅಷ್ಟೇ**.

That closing -*ē* is worth keeping. Put it on almost anything and you get "only that one": **ಇಲ್ಲಿಯೇ**, right here and nowhere else. One small sound doing the work English needs a whole separate word for.

The word, taken apart — its roots and family

ಅಷ್ಟೇ (*aṣṭē*) is native Dravidian: *aṣṭu*, "that much", which DEDR 1 lists on the far-pointing base *a*-, with -*ē*, "only".

What you've built

Five: **ಸ್ವಲ್ಪ**, **ಹೆಚ್ಚು**, **ಕಡಿಮೆ**, **ಬೇಡ**, **ಅಷ್ಟೇ**. You can answer an offer five ways.

Your turn

- *Say it: aṣṭē*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *aṣṭē*, as though closing a list
- *Recall:* say *peṭṭige*

Before you move on

What does **ಅಷ್ಟೇ** mean? ("that's all, just that".) Say it once more.

Chapter 59

Weather and Ground

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name the weather and the ground under it in Kannada, from the wind to the fire.
>
> *Complete KA-C59-fire and say all five words in order.*

59.1 ಗಾಳಿ (gāḷi) — wind, air

> Before the new run: what did *bēḍa* mean, and what did *aṣṭē* mean?

You'll want to know: ಗಾಳಿ

ಗಾಳಿ (*gāḷi*) — "wind, air".

Inherited, and it holds the moving wind and the still air on one shape. **ಗಾಳಿ ಬರುತ್ತಿದೆ** is a breeze coming up; **ಗಾಳಿ ಇಲ್ಲ** in a shut room is that there is no air in it.

Now put it beside the weather-word you already have. **ಹವಾಮಾನ** was built from a Persian piece meaning air and a Sanskrit piece meaning measure — a borrowed air-word for the forecast on the radio. **ಗಾಳಿ** is the air on your face. The formal report and the thing itself ended up in different layers of the language, and a Kannada speaker moves between them without noticing.

ಗಾಳಿ also carries rumour, the way English talks about something being in the air.

The word, taken apart — its roots and family

ಗಾಳಿ (*gāḷi*) is native Dravidian, one word with Telugu *gāli* (DEDR 1499).

What you've built

The first of five things the weather does to the ground.

Your turn

- *Say it:* *gāḷi*
- *Say it:* it once more, slowly
- *Say it:* *gāḷi*, then *havāmāna*, and say which of the two you can feel
- *Recall:* say *kuttige*

Before you move on

What does ಗಾಳಿ mean? ("wind, air".) Say it once more.

59.2 ಮಂಜು (mañju) — mist, fog, frost

Before the new one: what did *gāḷi* mean?

You'll want to know: ಮಂಜು

ಮಂಜು (*mañju*) — "mist, fog, frost".

One word for cold water in the air, however it arrives: the fog on a ಬೆಟ್ಟ before sunrise, the mist in a valley, the frost on a leaf at dawn. Kannada did not think the difference worth a second word, which tells you something about the climate it grew up in — the state has hill country and coast and dry plain, and none of it has much use for a snow vocabulary.

The Kodagu and Chikkamagaluru hills are where this word lives hardest. Coffee country sits high enough that ಮಂಜು is what the mornings are made of for months at a stretch.

Held up beside ಮೋಡ the pair is tidy: the ಮೋಡ is the water overhead, the ಮಂಜು is the same water come down to stand among the trees.

The word, taken apart — its roots and family

ಮಂಜು (*mañju*) is native Dravidian, one word with Tamil *mañcu* and Telugu *mancu* (DEDR 4641).

What you've built

Two, and the second is the first one's water at ground level.

Your turn

- *Say it: mañju*
- *Say it:* it once more, slowly
- *Say it: mōḍa*, then *mañju*, and say which of them you can walk into
- *Read it:* ಬೆನ್ನು

Before you move on

What does ಮಂಜು mean? ("mist, fog, frost".) Say it once more.

59.3 ಮರಳು (maraḷu) — sand

Before the new one: what did *mañju* mean?

You'll want to know: ಮರಳು

ಮರಳು (*maraḷu*) — "sand".

Say it slowly and you will hear ಮರ standing at the front of it. Do not trust that. The tree-word and the sand-word are separate items that happen to begin alike, and a learner who joins them has invented an etymology. Kannada has plenty of real ones; this is not one, and knowing when to stop is part of the skill.

What ಮರಳು genuinely does share is a shape with a doing-word. ಮರಳು also means to turn back, to return — so the same run of letters is both the sand on a river bed and the act of going home. In a chapter about taking your leave that is a happy accident and nothing more, but it is the kind of accident worth noticing, because the two are told apart by nothing except what sits around them.

The **ಮರಳು** you meet most is on the bank of a **ನದಿ**, where the river drops what it has been carrying.

The word, taken apart — its roots and family

ಮರಳು (*maraḷu*) is native Dravidian, close kin of *maṇṇu*, "earth": DEDR 4666 lists the sand words *maḷal* and *maral* beside it; the entry also has Tamil *maṇal*.

What you've built

Three, and one warning about reading too much into a spelling.

Your turn

- *Say it: maraḷu*
- *Say it:* it once more, slowly
- *Say it: mara*, then *maraḷu*, and say why they are not relatives
- *Recall:* say *tuṭi*

Before you move on

What does **ಮರಳು** mean? ("sand".) Say it once more.

59.4 ಕೆಸರು (kesaru) — mud

Before the new one: what did *maraḷu* mean?

You'll want to know: ಕೆಸರು

ಕೆಸರು (*kesaru*) — "mud".

Inherited, and unavoidable. From June onward the **ಮಳೆಗಾಲ** turns every **ದಾರಿ** that is not paved into **ಕೆಸರು**, and a **ಹಳ್ಳಿ** measures the season by how much of it there is between the house and the road.

It is also the mud a rice field wants. Paddy is planted into standing water and soft ground, so **ಕೆಸರು** is not a complaint in a farmer's mouth the way it is in a city one — the **ರೈತ** needs it, and a dry season without it is the bad outcome.

Then, as everywhere, it goes figurative. To throw ಕೆಸರು at somebody is to smear their name, and Kannada arrived at that picture on its own, from a place where mud is genuinely at hand for half the year.

The word, taken apart — its roots and family

ಕೆಸರು (*kesaru*) is native Dravidian, one word with Tamil *cēṟu* (DEDR 2020). DEDR gives Kannada *kesaṟ*, "wet soil, mud". DEDR 2020 compares Sanskrit *kedāra*.

What you've built

Four, and this one the season makes.

Your turn

- *Say it: kesaru*
- *Say it:* it once more, slowly
- *Say it: maraḷu*, then *kesaru*, and say which one the rain makes
- *Read it:* ಭುಜ

Before you move on

What does ಕೆಸರು mean? ("mud".) Say it once more.

59.5 ಬೆಂಕಿ (beṅki) — fire

Before the new one: what did *kesaru* mean?

You'll want to know: ಬೆಂಕಿ

ಬೆಂಕಿ (*beṅki*) — "fire".

Kannada's own, and once again it stands apart from its sisters: Tamil reaches for *neruppu*, Telugu for *maṇṭa*, and Kannada for ಬೆಂಕಿ. The bone-word did this to you a chapter ago. Being close relatives has never obliged four languages to agree.

The ದೀಪ from the asking-chapter needs this word before it is any use, and so does the ಬಿಸಿ under ಬಿಸಿಲು. Fire is the thing the ಗಾಳಿ feeds and the ಕೆಸರು puts out.

And with **ಬೆಂಕಿ** the run closes the way it opened, on something you can point at. **ಆಕಾಶ** was overhead and out of reach; this one is on the floor of the kitchen, close enough to warm your hands at.

The word, taken apart — its roots and family

ಬೆಂಕಿ (*beṅki*) is native Dravidian, of the root *bē*, "to burn", and DEDR 5517 lists *beṅki*, "heat, fire", itself; the entry also has Tamil *vē*.

What you've built

Five: **ಗಾಳಿ**, **ಮಂಜು**, **ಮರಳು**, **ಕೆಸರು**, **ಬೆಂಕಿ**. Air, water, ground and the thing that undoes all three.

Your turn

- *Say it:* *beṅki*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *dīpa* and *beṅki*, and say which one needs the other
- *Recall:* say *mūḷe*

Before you move on

What does **ಬೆಂಕಿ** mean? ("fire".) Say it once more.

Chapter 60

Animals of the House

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five animals a Kannada household lives with, from the cow to the bird.
>
> *Complete KA-C60-bird and say all five words in order.*

60.1 ಹಸು (hasu) — a cow

> Before the new run: what did *kesaru* mean, and what did *beṅki* mean?

You'll want to know: ಹಸು

ಹಸು (*hasu*) — "a cow".

ಹಸು is inherited, and it is the animal a Karnataka household is built around. The **ಹಾಲು** you met in the drinks chapter comes out of it, and most of what a Kannada kitchen makes begins with what comes out of it.

It belongs to the **ರೈತ** before it belongs to anybody, and in a **ಹಳ್ಳಿ** it is tied in the yard rather than kept in a shed, close enough to the **ಬಾಗಿಲು** that you step around it going in.

The word, taken apart — its roots and family

ಹಸು (*hasu*) comes from Sanskrit *paśu*, "domestic animal" (CDIAL 7984), through a Prakrit form *pasu*. It came in early enough to go through the same change as native words: the *p-* became *h-*. This is a tadbhava, a loan reshaped by Kannada sounds.

What you've built

The first of five animals.

Your turn

- *Say it: hasu*
- *Say it:* it once more, slowly
- *Say it: hasu*, then *hālu*, and say which one comes out of the other
- *Recall:* say *svalpa*

Before you move on

What does **ಹಸು** mean? ("a cow".) Say it once more.

60.2 ಮೇಕೆ (mēke) — a goat

Before the new one: what did *hasu* mean?

You'll want to know: ಮೇಕೆ

ಮೇಕೆ (*mēke*) — "a goat".

ಮೇಕೆ is shared right across the family — Telugu says it almost exactly the same way — and it names the animal that goes where the **ಹಸು** does not.

A **ಹಸು** is walked to flat ground. A **ಮೇಕೆ** is let up a **ಬೆಟ್ಟ**, and it will strip the **ಎಲೆ** off a low **ಕೊಂಬೆ** standing on its back legs to reach. That difference is the whole reason a household keeps both.

The word, taken apart — its roots and family

ಮೇಕೆ (*mēke*) is native Dravidian, one word with Telugu *mēka* (DEDR 5087). DEDR 5087 compares Sanskrit *meka*.

What you've built

Two.

Your turn

- *Say it: mēke*
- *Say it:* it once more, slowly
- *Say it: hasu*, then *mēke*, and say which one climbs
- *Read it:* ಹೆಚ್ಚು

Before you move on

What does ಮೇಕೆ mean? ("a goat".) Say it once more.

60.3 ಕೋಳಿ (kōḷi) — a hen

Before the new one: what did *mēke* mean?

You'll want to know: ಕೋಳಿ

ಕೋಳಿ (*kōḷi*) — "a hen".

ಕೋಳಿ is the domestic fowl, hen or cock alike; the word does not divide them, and where the difference matters a second word goes in front of it.

It is also the clock of the ಹಳ್ಳಿ. A ಕೋಳಿ wakes a house before ಬೆಳಗ್ಗೆ is properly under way, which is a large part of why nobody there needed a ಗಂಟೆ to do the same job.

The word, taken apart — its roots and family

ಕೋಳಿ (*kōḷi*) is native Dravidian, one word with Tamil *kōḻi* and Telugu *kōḍi* (DEDR 2248). DEDR gives the older Kannada *kōḻi*.

What you've built

Three.

Your turn

- *Say it: kōḷi*
- *Say it:* it once more, slowly
- *Say it: kōḷi*, then *beḷagge*, and say which one comes first

- *Recall:* say *kaḍime*

Before you move on

What does **ಕೋಳಿ** mean? (“a hen”.) Say it once more.

60.4 ಕಾಗೆ (kāge) — a crow

Before the new one: what did *kōḷi* mean?

You’ll want to know: ಕಾಗೆ

ಕಾಗೆ (*kāge*) — “a crow”.

ಕಾಗೆ is an imitation word: the bird is named for the noise it makes, and the same trick produced the crow-word in each of the sister languages. Once you hear one you have the etymology.

Of all the birds in this chapter it is the one a household actually deals with day to day. Cooked rice set out on a step at the back of the house is put there for the **ಕಾಗೆ**, and it arrives within the minute.

The word, taken apart — its roots and family

ಕಾಗೆ (*kāge*) is native Dravidian, one word with Tamil *kākkai* and Telugu *kāki* (DEDR 1425). The entry also lists *kā kā*, the cawing of crows. DEDR 1425 compares Sanskrit *kāka*. DEDR 1425 notes that some of the Dravidian forms may be borrowed back from Indo-Aryan.

What you’ve built

Four.

Your turn

- *Say it: kāge*
- *Say it:* it once more, slowly
- *Say it: kāge*, then *kōḷi*, and say which one is kept and which one turns up
- *Read it:* **ಬೇಡ**

Before you move on

What does **ಕಾಗೆ** mean? ("a crow".) Say it once more.

60.5 ಹಕ್ಕಿ (hakki) — a bird

Before the new one: what did *kāge* mean?

You'll want to know: ಹಕ್ಕಿ

ಹಕ್ಕಿ (*hakki*) — "a bird".

ಹಕ್ಕಿ is the general one: any bird at all, the **ಕೋಳಿ** and the **ಕಾಗೆ** both inside it. It is Kannada's own, and it sits beside a borrowed word that covers the same ground more formally — the arrangement you already saw when **ಸ್ನೇಹಿತ** turned out to have **ಗೆಳೆಯ** living quietly beside it.

One warning before you say it out loud. Written in our letters, *hakki* is *akki* with an *h* on the front, and **ಅಕ್ಕಿ** is the raw rice from the water-and-rice chapter. In Kannada letters they start differently and there is no danger; in a romanization there is. Say the *h*.

The word, taken apart — its roots and family

ಹಕ್ಕಿ (*hakki*) comes from Sanskrit *pakṣin*, "winged; bird", through Prakrit *pakkhi* (CDIAL 7636). It is a tadbhava, old enough that its *p-* went the way of native *p-*, to *h-*.

What you've built

Five: **ಹಸು**, **ಮೇಕೆ**, **ಕೋಳಿ**, **ಕಾಗೆ**, **ಹಕ್ಕಿ**. Enough to greet a house and name what lives in it.

Your turn

- *Say it: hakki*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *namaskāra* to whoever keeps them
- *Recall:* say *aṣṭē*

Before you move on

What does **ಹಕ್ಕಿ** mean? (“a bird”.) Say it once more.

Chapter 61

In the Kitchen

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five things in a Kannada kitchen, from the curd to the sugar.
>
> *Complete KA-C61-sugar and say all five words in order.*

61.1 ಮೊಸರು (mosaru) — curd

> Before the new run: what did *kāge* mean, and what did *hakki* mean?

You'll want to know: ಮೊಸರು

ಮೊಸರು (*mosaru*) — "curd".

ಮೊಸರು is what **ಹಾಲು** becomes when it is left overnight with a spoonful of yesterday's **ಮೊಸರು** in it. The **ಹಸು** from the last chapter is the front of that chain and this is the end of it.

It closes a meal rather than opening one. **ಮೊಸರು** over **ಅನ್ನ** is the last thing on the plate, and a Kannada speaker will tell you the meal is not finished without it.

The word, taken apart — its roots and family

ಮೊಸರು (*mosaru*) is native Dravidian, one word with Tamil *mucar* (DEDR 4902). DEDR gives Kannada *mosar(u)*. DEDR 4902 compares Sanskrit *moraṭa*.

What you've built

The first of five things in a Kannada kitchen.

Your turn

- *Say it: mosaru*
- *Say it:* it once more, slowly
- *Say it: hālu*, then *mosaru*, and say which one waits overnight
- *Recall:* say *gāḷi*

Before you move on

What does **ಮೊಸರು** mean? ("curd".) Say it once more.

61.2 ತುಪ್ಪ (tuppa) — ghee

Before the new one: what did *mosaru* mean?

You'll want to know: ತುಪ್ಪ

ತುಪ್ಪ (*tuppa*) — "ghee".

ತುಪ್ಪ is the other thing **ಹಾಲು** turns into, further along the same road: cream taken off, churned, then cooked until only the fat is left. Inherited, and shared with the sisters.

A spoonful goes on hot **ಅನ್ನ**, and a **ದೀಪ** will burn on it as readily as on any oil. It is the one item in this chapter that is food and light at once.

The word, taken apart — its roots and family

The origin of **ತುಪ್ಪ** (*tuppa*) is disputed. DEDR 3282 files it as native Dravidian, beside Tamil *tu*, "to eat", but Turner's CDIAL (5864) thinks it is rather a loan from Middle Indo-Aryan, related to a word for "grease".

What you've built

Two.

Your turn

- *Say it: tuppa*
- *Say it:* it once more, slowly
- *Say it: mosaru*, then *tuppa*, and say which one is poured
- *Read it:* ಮಂಜು

Before you move on

What does ತುಪ್ಪ mean? ("ghee".) Say it once more.

61.3 ಎಣ್ಣೆ (eṇṇe) — oil

Before the new one: what did *tuppa* mean?

You'll want to know: ಎಣ್ಣೆ

ಎಣ್ಣೆ (*eṇṇe*) — "oil".

ಎಣ್ಣೆ is Kannada's own oil-word, and it owes ತುಪ್ಪ nothing at all. ತುಪ್ಪ comes out of an animal; ಎಣ್ಣೆ is pressed out of a ಬೀಜ, and the two sit in different jars on the same shelf.

There is a small joke in this for you. The friend-word ಸ್ನೇಹಿತ was built on a Sanskrit word whose first sense was oil — smoothness, the thing that makes two surfaces run easily on each other. That is the borrowed, figurative oil. This is the one in the jar.

The word, taken apart — its roots and family

ಎಣ್ಣೆ (*eṇṇe*) is native Dravidian. DEDR 854 lists it under *eḷ*, "sesame", with Tamil *eṇ ṇey*, "sesame oil": the first oil was pressed from sesame.

What you've built

Three.

Your turn

- *Say it: eṇṇe*
- *Say it:* it once more, slowly

- *Say it:* *tuppa*, then *eṇṇe*, and say which one starts as a seed
- *Recall:* say *maraḷu*

Before you move on

What does ಎಣ್ಣೆ mean? ("oil".) Say it once more.

61.4 ಬೆಲ್ಲ (bella) — jaggery

Before the new one: what did *eṇṇe* mean?

You'll want to know: ಬೆಲ್ಲ

ಬೆಲ್ಲ (*bella*) — "jaggery".

ಬೆಲ್ಲ is cane juice boiled down and set in a lump, brown and sticky and sold by weight rather than by the spoon. Kannada's own word, and the older of the two sweet things in this chapter.

South Karnataka cooking puts a piece of it into food that is not a sweet at all — into the same dish as the *uppu* you already have, deliberately, so that neither taste wins. A cook who leaves it out is making somebody else's version of the dish.

The word, taken apart — its roots and family

ಬೆಲ್ಲ (*bella*) is native Dravidian, one word with Tamil *vellam* and Telugu *bellamu* (DEDR 5494).

What you've built

Four.

Your turn

- *Say it:* *bella*
- *Say it:* it once more, slowly
- *Say it:* *bella*, then *uppu*, and say which two go into the same pot
- *Read it:* ಕೆಸರು

Before you move on

What does **ಬೆಲ್ಲ** mean? ("jaggery".) Say it once more.

61.5 ಸಕ್ಕರೆ (sakkare) — sugar

Before the new one: what did *bella* mean?

You'll want to know: ಸಕ್ಕರೆ

ಸಕ್ಕರೆ (*sakkare*) — "sugar".

ಸಕ್ಕರೆ is the refined one, white and loose, and it is the traveller of this chapter. It goes back to a Sanskrit word meaning gravel or grit — a fair description of what sugar looks like beside a lump of **ಬೆಲ್ಲ**.

The coffee-word and the tea-word each reached Kannada after a long journey inward. This word went the other way. It left India, crossed Arabic and Latin, turned into the English *sugar*, and Kannada kept the original at home the whole time.

The word, taken apart — its roots and family

ಸಕ್ಕರೆ (*sakkare*) comes from Sanskrit *śarkarā*, "candied sugar", reshaped to Kannada sounds: a tadbhava (CDIAL 12338). Prakrit *sakkarā* shows the middle step.

What you've built

Five: **ಮೊಸರು**, **ತುಪ್ಪ**, **ಎಣ್ಣೆ**, **ಬೆಲ್ಲ**, **ಸಕ್ಕರೆ**. Enough to say what is in the food you are given.

Your turn

- *Say it: sakkare*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then give your name to the person cooking
- *Recall:* say *beṅki*

Before you move on

What does **ಸಕ್ಕರೆ** mean? (“sugar”.) Say it once more.

Chapter 62

Things People Make

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name five things a Kannada household keeps to hand, and ask politely for one.
>
> *Complete KA-C62-umbrella and say all five words in order.*

62.1 ನೂಲು (nūlu) — thread, yarn

Before the new run: what did *bella* mean, and what did *sakkare* mean?

You'll want to know: ನೂಲು

ನೂಲು (*nūlu*) — "thread, yarn".

ನೂಲು is inherited, and it is the stuff **ಬಟ್ಟೆ** is made of. Everything worn in the cloth chapter began here.

The same shape does double duty: **ನೂಲು** is the thread and it is equally the spinning of it, so one word covers the material and the making. Kannada does that often, and you will start to expect it.

The word, taken apart — its roots and family

ನೂಲು (*nūlu*) is native Dravidian, one word with Tamil *nūl* (DEDR 3726).

What you've built

The first of five things a household makes or keeps.

Your turn

- *Say it:* *nūlu*
- *Say it:* it once more, slowly
- *Say it:* *nūlu*, then *baṭṭe*, and say which one comes first
- *Recall:* say *hasu*

Before you move on

What does **ನೂಲು** mean? (“thread, yarn”.) Say it once more.

62.2 ಸೂಜಿ (sūji) — a needle

Before the new one: what did *nūlu* mean?

You’ll want to know: ಸೂಜಿ

ಸೂಜಿ (*sūji*) — “a needle”.

ಸೂಜಿ is what the **ನೂಲು** is put through. It is a borrowing from the north, and it arrived early enough that nothing about it feels foreign now.

It is also the hand of a clock. A **ಗಂಟೆ** has two **ಸೂಜಿ** on its face, and Kannada saw the resemblance before anybody thought to give the hands a separate name.

The word, taken apart — its roots and family

ಸೂಜಿ (*sūji*) comes from Sanskrit *sūcī*, “needle”, reshaped to Kannada sounds: a tadbhava (CDIAL 13551).

What you’ve built

Two.

Your turn

- *Say it:* *sūji*
- *Say it:* it once more, slowly
- *Say it:* *nūlu*, then *sūji*, and say which one goes through the other

- *Read it:* ಮೇಕೆ

Before you move on

What does ಸೂಜಿ mean? ("a needle".) Say it once more.

62.3 ಹಗ್ಗ (hagga) — a rope

Before the new one: what did *sūji* mean?

You'll want to know: ಹಗ್ಗ

ಹಗ್ಗ (*hagga*) — "a rope".

ಹಗ್ಗ is ನೂಲು grown up: strands laid together until the result will hold weight. Native, with nothing borrowed anywhere in it.

In a ಹಳ್ಳಿ yard it is the thing at the end of which the ಹಸು stands. Twist it thinner and it ties a ಬುಟ್ಟಿ shut; twist it thicker and it draws water out of a ಕೆರೆ.

The word, taken apart — its roots and family

ಹಗ್ಗ (*hagga*) is a loan from Indo-Aryan. DEDR files it in its appendix of such loans (DEDR App. 2) and links it to Sanskrit *pragraha*, "bridle, thong" (CDIAL 8478), with Kannada *agga* beside *hagga*.

What you've built

Three.

Your turn

- *Say it: hagga*
- *Say it:* it once more, slowly
- *Say it: nūlu*, then *hagga*, and say which one holds a cow
- *Recall:* say *kōḷi*

Before you move on

What does ಹಗ್ಗ mean? ("a rope".) Say it once more.

62.4 ಪೊರಕೆ (porake) — a broom

Before the new one: what did *hagga* mean?

You'll want to know: ಪೊರಕೆ

ಪೊರಕೆ (*porake*) — "a broom".

ಪೊರಕೆ is a bundle of stiff ribs tied at one end — no handle, so it is used bent over, in short strokes.

It is the first object of the day. The ground outside the **ಬಾಗಿಲು** is swept with a **ಪೊರಕೆ** before the **ರಂಗೋಲಿ** is set out on it, because the pattern needs clean ground to sit on. Sweeping, then drawing: that order is fixed.

The word, taken apart — its roots and family

ಪೊರಕೆ (*porake*) is native Dravidian, one word with Tamil *perukku* and Telugu *poraka* (DEDR 4415).

What you've built

Four.

Your turn

- *Say it: porake*
- *Say it:* it once more, slowly
- *Say it: porake*, then *raṅgōli*, and say which one comes first
- *Read it:* **ಕಾಗೆ**

Before you move on

What does **ಪೊರಕೆ** mean? ("a broom".) Say it once more.

62.5 ಕೊಡೆ (koḍe) — an umbrella

Before the new one: what did *porake* mean?

You'll want to know: ಕೊಡೆ

ಕೊಡೆ (*koḍe*) — "an umbrella".

ಕೊಡೆ works twice over in Karnataka: it keeps the **ಮಳೆಗಾಲ** off you, and it keeps the **ಬಿಸಿಲು** off you in the months on either side of it. In a Kannada street both uses are ordinary.

Say it carefully. **ಕೊಡೆ** and the **ಕೊಡು** you already know start with the same two letters, and they are separate items — one is a thing, the other is what you do with it, and joining them would be inventing a story. Kannada gives you plenty of real ones; this is not one.

Put **ದಯವಿಟ್ಟು** in front of any of this chapter's five and you have asked for it properly.

The word, taken apart — its roots and family

ಕೊಡೆ (*koḍe*) is native Dravidian, one word with Tamil *kuṭai* and Telugu *goḍugu* (DEDR 1663). DEDR 1663 compares Sanskrit *utkūṭa*.

What you've built

Five: **ನೂಲು**, **ಸೂಜಿ**, **ಹಗ್ಗ**, **ಪೊರಕೆ**, **ಕೊಡೆ**. Enough to ask a household politely for the thing you need.

Your turn

- *Say it: koḍe*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *dayaviṭṭu* in front of the one you want
- *Recall:* say *hakki*

Before you move on

What does **ಕೊಡೆ** mean? ("an umbrella".) Say it once more.

Chapter 63

Hunger, Sleep and Health

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say in Kannada how my body is, from hunger to health, and ask it back.
>
> *Complete KA-C63-health and say all five words in order.*

63.1 ಹಸಿವು (hasivu) — hunger

> Before the new run: what did *porake* mean, and what did *koḍe* mean?

You'll want to know: ಹಸಿವು

ಹಸಿವು (*hasivu*) — "hunger".

ಹಸಿವು is the naming-word made out of the everyday word for going hungry, and it takes a shape you have had since the knowing-sentence: **ನನಗೆ ಹಸಿವು**. The **ನನಗೆ** in front, the thing standing plain, and nothing joining them.

That is the whole design. Hunger happens to you in Kannada rather than being something you have, and the sentence is built to say so.

It begins like **ಹಸು** and has nothing to do with cows. Two words can share an opening and share no history at all.

The word, taken apart — its roots and family

ಹಸಿವು (*hasivu*) is native Dravidian, one word with Tamil *paci* (DEDR 3825). DEDR gives the older Kannada *pasi*, *pasivu*.

What you've built

The first of five words for how a body is.

Your turn

- *Say it: hasivu*
- *Say it:* it once more, slowly
- *Say it: hasivu*, then *nanage hasivu*, and say who is hungry
- *Recall:* say *mosaru*

Before you move on

What does **ಹಸಿವು** mean? ("hunger".) Say it once more.

63.2 ನಿದ್ದೆ (nidde) — sleep

Before the new one: what did *hasivu* mean?

You'll want to know: ನಿದ್ದೆ

ನಿದ್ದೆ (*nidde*) — "sleep".

ನಿದ್ದೆ is a Sanskrit word worn smooth by everyday use — the original had a hard cluster in the middle that Kannada softened into the doubled sound you hear now.

It takes the same frame **ಹಸಿವು** took: **ನನಗೆ ನಿದ್ದೆ**. Learn one of these sentences and you have the shape for the rest of the chapter, which is why they are grouped.

CDIAL 7200 lists Sanskrit *nidrā*, "sleep", and Prakrit *ṇiddā*.

What you've built

Two.

Your turn

- *Say it: nidde*
- *Say it:* it once more, slowly

- *Say it: hasivu*, then *nidde*, and say which one a night fixes
- *Read it:* ತುಪ್ಪ

Before you move on

What does ನಿದ್ದೆ mean? ("sleep".) Say it once more.

63.3 ಜ್ವರ (jvara) — a fever

Before the new one: what did *nidde* mean?

You'll want to know: ಜ್ವರ

ಜ್ವರ (*jvara*) — "a fever".

ಜ್ವರ came in from Sanskrit whole, cluster and all, and Kannada did not smooth this one — which tells you it arrived through books and doctors rather than through kitchens.

It is the word you hand a ವೈದ್ಯ first. ನನಗೆ ಜ್ವರ, with the same three pieces as the last two lessons, and you have said the most useful sentence in the chapter.

CDIAL 5303 lists Sanskrit *jvara*, "fever".

What you've built

Three.

Your turn

- *Say it: jvara*
- *Say it:* it once more, slowly
- *Say it: jvara*, then *vaidya*, and say which one you go to
- *Recall:* say *eṇṇe*

Before you move on

What does ಜ್ವರ mean? ("a fever".) Say it once more.

63.4 ನೋವು (nōvu) — pain

Before the new one: what did *jvara* mean?

You'll want to know: ನೋವು

ನೋವು (*nōvu*) — "pain".

ನೋವು is inherited, and it is the most useful word here because it attaches to everything you already have. **ತಲೆ ನೋವು**, **ಹೊಟ್ಟೆ ನೋವು**, **ಹಲ್ಲು ನೋವು**, **ಬೆನ್ನು ನೋವು** — the body part goes in front and the whole thing is one compound.

Every part of the body this book has taught you can be put in that slot. That is a sentence for every body part this book has given you, out of one new word, which is the best trade in the chapter.

The word, taken apart — its roots and family

ನೋವು (*nōvu*) is native Dravidian, one word with Tamil *nō* (DEDR 3793). DEDR lists *nōvu* itself, "affliction", under *nō*, "to suffer, ache".

What you've built

Four.

Your turn

- *Say it: nōvu*
- *Say it:* it once more, slowly
- *Say it: nōvu*, then *tale nōvu*, then *hoṭṭe nōvu*, and say where it hurts
- *Read it:* **ಬೆಲ್ಲ**

Before you move on

What does **ನೋವು** mean? ("pain".) Say it once more.

63.5 ಆರೋಗ್ಯ (ārōgya) — health

Before the new one: what did *nōvu* mean?

You'll want to know: ಆರೋಗ್ಯ

ಆರೋಗ್ಯ (*ārōgya*) — "health".

ಆರೋಗ್ಯ is Sanskrit, and it is built the negative way round: a piece meaning being unwell, with a *not* fixed on the front of it. Health is named by what is missing rather than by what is there.

It gives you a better answer than you had. **ನೀವು ಹೇಗಿದ್ದೀರಾ**? has been answered with **ಚೆನ್ನಾಗಿ** since the how-are-you chapter, which says you are doing well. **ಆರೋಗ್ಯ** says the body itself is sound, and it is the word a **ವೈದ್ಯ** wants.

CDIAL 1330 lists Sanskrit *ārogya*, "health".

What you've built

Five: **ಹಸಿವು**, **ನಿದ್ದೆ**, **ಜ್ವರ**, **ನೋವು**, **ಆರೋಗ್ಯ**. Enough to say how you are and to ask it back.

Your turn

- *Say it:* *ārōgya*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *nīvu hēgiddīrā* to whoever asked you first
- *Recall:* say *sakkare*

Before you move on

What does **ಆರೋಗ್ಯ** mean? ("health".) Say it once more.

Chapter 64

Joining Words

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can join one Kannada answer to the next five ways, from afterwards to in that case.
>
> *Complete KA-C64-in-that-case and say all five words in order.*

64.1 ಆಮೇಲೆ (āmēle) — afterwards, later

Before the new run: what did *nōvu* mean, and what did *ārōgya* mean?

You'll want to know: ಆಮೇಲೆ

ಆಮೇಲೆ (*āmēle*) — "afterwards, later".

ಆಮೇಲೆ opens with the same far-pointing **ಆ** that stands at the front of **ಅದು** and **ಅಲ್ಲಿ**. Not this one, not here — that one, over there, and here it is time rather than place: not now, later.

Put it in front of a farewell you already own and you have a new one. **ಆಮೇಲೆ ಸಿಗೋಣ** sits beside **ಮತ್ತೆ ಸಿಗೋಣ** and **ನಾಳೆ ಸಿಗೋಣ**, three ways of promising the same thing with different amounts of commitment.

The word, taken apart — its roots and family

ಆಮೇಲೆ (*āmēle*) is native Dravidian: *ā*, "that", the far-pointing base (DEDR 1), and *mēle*, "the top; above, after" (DEDR 5086, with Tamil *mēl*). It is "after that".

What you've built

The first of five words that join one thing to the next.

Your turn

- *Say it:* *āmēle*
- *Say it:* it once more, slowly
- *Say it:* *āmēle*, then *matte sigōṇa*, and say which one leaves the time open
- *Recall:* say *nūlu*

Before you move on

What does **ಆಮೇಲೆ** mean? ("afterwards, later".) Say it once more.

64.2 ಕೂಡ (kūḍa) — also, too

Before the new one: what did *āmēle* mean?

You'll want to know: ಕೂಡ

ಕೂಡ (*kūḍa*) — "also, too".

ಕೂಡ goes after the word it adds, not in front of it: **ನಾನು ಕೂಡ**, me as well. English puts *also* almost anywhere in a sentence; Kannada puts this one straight behind the thing it is including and leaves it there.

The same shape carries the idea of coming together, which is where the adding sense comes from — two things joined, and the second one mentioned.

Take care with the middle letter. **ಕೂಡ** and **ಕೂದಲು** from the body chapter open alike and then part company, and in a rough spelling they can look closer than they are.

The word, taken apart — its roots and family

ಕೂಡ (*kūḍa*) is native Dravidian, from *kūḍu*, "to join, come together", and DEDR 1882 lists *kūḍa*, "along with", itself; the entry also has Tamil *kūṭu*.

What you've built

Two.

Your turn

- *Say it: kūḍa*
- *Say it:* it once more, slowly
- *Say it: nānu*, then *nānu kūḍa*, and say which one adds somebody
- *Read it:* ಸೂಜಿ

Before you move on

What does ಕೂಡ mean? ("also, too".) Say it once more.

64.3 ಇನ್ನೂ (innū) — still, yet

Before the new one: what did *kūḍa* mean?

You'll want to know: ಇನ್ನೂ

ಇನ್ನೂ (*innū*) — "still, yet".

ಇನ್ನೂ is the word for a thing that has not stopped or has not started. With ಇಲ್ಲ behind it you get *not yet*, which is the single most useful thing in this chapter.

It stacks with the measuring words from the replies chapter. ಇನ್ನೂ ಸ್ವಲ್ಪ is a little more still; ಇನ್ನೂ ಹೆಚ್ಚು is more than that again. One word in front and your five replies have doubled.

The word, taken apart — its roots and family

ಇನ್ನೂ (*innū*) is native Dravidian: *innu*, "still, yet, more", which DEDR 410 lists on the near-pointing base *i-*, with the ending *-ū*, "even".

What you've built

Three.

Your turn

- *Say it: innū*
- *Say it:* it once more, slowly
- *Say it: svalpa*, then *innū svalpa*, and say which one asks for more
- *Recall:* say *hagga*

Before you move on

What does ಇನ್ನೂ mean? ("still, yet".) Say it once more.

64.4 ಬೇಗ (bēga) — soon, quickly

Before the new one: what did *innū* mean?

You'll want to know: ಬೇಗ

ಬೇಗ (*bēga*) — "soon, quickly".

ಬೇಗ is inherited, and it holds hurry and nearness-in-time on one shape. **ಬೇಗ ಬಾ** is *come quickly* and equally *come soon*, and which one is meant is settled by everything around it rather than by the word.

Set it against *īga*, the now-word from the leave-taking chapter. *Īga* is this moment. **ಬೇಗ** is a moment that has not arrived but will not keep you waiting. They rhyme and are unrelated, which by now should surprise you less than it did.

The word, taken apart — its roots and family

ಬೇಗ (*bēga*) comes from Sanskrit *vēga*, "violent agitation; speed", reshaped to Kannada sounds: a tadbhava (CDIAL 12089). The Sanskrit *v-* became Kannada *b-*, and the noun "speed" became "quickly, soon".

What you've built

Four.

Your turn

- *Say it: bēga*
- *Say it:* it once more, slowly
- *Say it: īga*, then *bēga*, and say which one has not happened yet
- *Read it:* ಪೊರಕೆ

Before you move on

What does ಬೇಗ mean? (“soon, quickly”.) Say it once more.

64.5 ಹಾಗಾದರೆ (hāgādare) — in that case, then

Before the new one: what did *bēga* mean?

You’ll want to know: ಹಾಗಾದರೆ

ಹಾಗಾದರೆ (*hāgādare*) — “in that case, then”.

ಹಾಗಾದರೆ is built out of ಹಾಗೆ, the *that way* word from the earlier replies chapter, with an *if it becomes* wrapped around it. If it is that way — in that case.

It is the word that lets you answer a fact with a decision. Somebody says the shop is shut; you say ಹಾಗಾದರೆ ಆಮೇಲೆ, and with two of this chapter’s five words you have made a plan without a single naming-word in it.

The word, taken apart — its roots and family

ಹಾಗಾದರೆ (*hāgādare*) is native Dravidian: *hāge*, “in that way” (DEDR 1), and *ādare*, “if it becomes”, from *āgu*, “to become” (DEDR 333). “If it is that way” means “in that case”. DEDR 333 compares Sanskrit *ām*.

What you’ve built

Five: ಆಮೇಲೆ, ಕೂಡ, ಇನ್ನೂ, ಬೇಗ, ಹಾಗಾದರೆ. Enough to keep a conversation moving without answering yes or no.

Your turn

- *Say it: hāgādare*

- *Say it:* it once more, slowly
- *Say it:* all five in order, then *hāge*, then *hāgādare*, and say which came from which
- *Recall:* say *koḍe*

Before you move on

What does **ಹಾಗಾದರೆ** mean? ("in that case, then".) Say it once more.

Chapter 65

More Good Manners

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name what Kannada courtesy is made of, from a request to good manners.
>
> *Complete KA-C65-manners and say all five words in order.*

65.1 ವಿನಂತಿ (vinanti) — a request

> Before the new run: what did *bēga* mean, and what did *hāgādare* mean?

You'll want to know: ವಿನಂತಿ

ವಿನಂತಿ (*vinanti*) — "a request".

ವಿನಂತಿ is the naming-word for the thing **ದಯವಿಟ್ಟು** has been doing for you since the please-chapter. **ದಯವಿಟ್ಟು** is how you make one; **ವಿನಂತಿ** is what you have made.

Sanskrit, and its shape says *a bending* — the asker lowers himself a little, and that is exactly the difference between a **ವಿನಂತಿ** and an instruction.

The word, taken apart — its roots and family

ವಿನಂತಿ (*vinanti*) is usually traced to Sanskrit *vijñapti*, "information, request to a superior", through a Middle Indo-Aryan form; CDIAL 11706 lists Prakrit *viṇṇatti* and the Asokan *vinati*. It is a tadbhava, a loan reshaped by speech.

What you've built

The first of five courtesy words.

Your turn

- *Say it: vinanti*
- *Say it:* it once more, slowly
- *Say it: dayaviṭṭu*, then *vinanti*, and say which one goes inside a sentence
- *Recall:* say *hasivu*

Before you move on

What does **ವಿನಂತಿ** mean? ("a request".) Say it once more.

65.2 ಅನುಮತಿ (anumati) — permission

Before the new one: what did *vinanti* mean?

You'll want to know: ಅನುಮತಿ

ಅನುಮತಿ (*anumati*) — "permission".

ಅನುಮತಿ is Sanskrit for a mind that goes along with you — agreement given rather than merely not refused.

It belongs with **ಹೊರಡು** from the leave-taking chapter. In a Kannada house you do not simply set out; you ask **ಅನುಮತಿ** of whoever is host, and only then do you say **ಹೋಗಿ ಬರುತ್ತೇನೆ**. The farewell you learned early has this word standing in front of it.

What you've built

Two.

Your turn

- *Say it: anumati*
- *Say it:* it once more, slowly

- *Say it: anumati*, then *horaḍu*, and say which one comes first
- *Read it:* ನಿದ್ದೆ

Before you move on

What does **ಅನುಮತಿ** mean? ("permission".) Say it once more.

65.3 ಸಂಕೋಚ (saṅkōca) — hesitancy, holding back

Before the new one: what did *anumati* mean?

You'll want to know: ಸಂಕೋಚ

ಸಂಕೋಚ (*saṅkōca*) — "hesitancy, holding back".

ಸಂಕೋಚ is Sanskrit for a drawing-in, a shrinking — and in Kannada it names the polite reluctance that stops you accepting what you actually want.

It is the one word in this chapter you will hear said to you rather than by you. A host feeding an *atithi* says **ಸಂಕೋಚ ಬೇಡ**, using the refusal-word from the replies chapter to refuse your refusal. Hearing it is the signal to eat.

What you've built

Three.

Your turn

- *Say it: saṅkōca*
- *Say it:* it once more, slowly
- *Say it: saṅkōca*, then *bēḍa*, and say what a host tells a guest
- *Recall:* say *jvara*

Before you move on

What does **ಸಂಕೋಚ** mean? ("hesitancy, holding back".) Say it once more.

65.4 ನಂಬಿಕೆ (nambike) — trust

Before the new one: what did *saṅkōca* mean?

You'll want to know: ನಂಬಿಕೆ

ನಂಬಿಕೆ (*nambike*) — "trust".

ನಂಬಿಕೆ is native, made out of the everyday word for believing, and it covers both trust in a person and belief in a thing being so.

Set it beside **ಗೌರವ** from the courtesy chapter. **ಗೌರವ** can be given to a stranger at once, because it is owed to a position. **ನಂಬಿಕೆ** has to be collected slowly, and no amount of the first turns into the second.

The word, taken apart — its roots and family

ನಂಬಿಕೆ (*nambike*) is native Dravidian, from *nambu*, "to trust, believe", and DEDR 3600 lists *nambike*, "confidence", itself; the entry also has Tamil *nampu*, Telugu *nammu* and Malayalam *nampuka*.

What you've built

Four.

Your turn

- *Say it: nambike*
- *Say it:* it once more, slowly
- *Say it: gaurava*, then *nambike*, and say which one is earned slowly
- *Read it:* **ನೋವು**

Before you move on

What does **ನಂಬಿಕೆ** mean? ("trust".) Say it once more.

65.5 ಸೌಜನ್ಯ (saujanya) — courtesy, good manners

Before the new one: what did *nambike* mean?

You'll want to know: ಸೌಜನ್ಯ

ಸೌಜನ್ಯ (*saujanya*) — "courtesy, good manners".

ಸೌಜನ್ಯ is Sanskrit, and underneath it is *a good person* — courtesy named as a quality of the one behaving rather than as a list of rules being followed. That is a real difference, and Kannada means it.

It is the word for everything this book has been quietly teaching alongside the vocabulary: **ಧನ್ಯವಾದ**, **ದಯವಿಟ್ಟು**, **ಕ್ಷಮಿಸಿ**, **ಗೌರವ**, **ವಂದನೆ**, and now the four words in front of this one. **ಸೌಜನ್ಯ** is the name of the whole habit.

What you've built

Five: **ವಿನಂತಿ**, **ಅನುಮತಿ**, **ಸಂಕೋಚ**, **ನಂಬಿಕೆ**, **ಸೌಜನ್ಯ**. Enough to name what you have been doing since the thank-you word.

Your turn

- *Say it: saujanya*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *dhanyavāda* to close
- *Recall:* say *ārōgya*

Before you move on

What does **ಸೌಜನ್ಯ** mean? ("courtesy, good manners".) Say it once more.

Chapter 66

The Field

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name a Kannada field and its crop, and take my leave of the village that grew it.
>
> *Complete KA-C66-harvest and say all five words in order.*

66.1 ಹೊಲ (hola) — a field

> Before the new run: what did *nambike* mean, and what did *saujanya* mean?

You'll want to know: ಹೊಲ

ಹೊಲ (*hola*) — "a field".

ಹೊಲ is inherited, and it is the dry field — ground that is ploughed and planted and waits on the **ಮಳೆಗಾಲ** for its water.

It lies past the edge of the **ಹಳ್ಳಿ**, along the **ದಾರಿ** you learned to ask for, and it is where the **ರೈತ** is when he is not at home.

The word, taken apart — its roots and family

ಹೊಲ (*hola*) is native Dravidian, one word with Tamil *pulam* and Telugu *polamu* (DEDR 4303). DEDR gives the older Kannada *pola*, "a plough-field": the *p-* has become *h-*.

What you've built

The first of five field words.

Your turn

- *Say it: hola*
- *Say it:* it once more, slowly
- *Say it: hola*, then *raita*, and say which one works the other
- *Recall:* say *āmēle*

Before you move on

What does **ಹೊಲ** mean? (“a field”.) Say it once more.

66.2 ಹುಲ್ಲು (hullu) — grass

Before the new one: what did *hola* mean?

You’ll want to know: ಹುಲ್ಲು

ಹುಲ್ಲು (*hullu*) — “grass”.

ಹುಲ್ಲು is what comes up on ground nobody planted, and it is why the **ಹಸು** and the **ಮೇಕೆ** from the animal chapter are walked out of the yard at all.

Say it carefully against **ಹಲ್ಲು**, the tooth-word. One vowel sign separates them and the rest of the two words is identical. It is the closest pair this book has handed you, and the good news is that the **ಹಸು** eats the one with your teeth.

The word, taken apart — its roots and family

ಹುಲ್ಲು (*hullu*) is native Dravidian, one word with Tamil *pul* (DEDR 4300). DEDR gives the older Kannada *pul*: the *p-* has become *h-*.

What you’ve built

Two.

Your turn

- *Say it: hullu*
- *Say it:* it once more, slowly

- *Say it: hallu*, then *hullu*, and say which one is in your mouth
- *Read it:* ಕೂಡ

Before you move on

What does ಹುಲ್ಲು mean? ("grass".) Say it once more.

66.3 ಭತ್ತ (bhatta) — paddy, rice in the husk

Before the new one: what did *hullu* mean?

You'll want to know: ಭತ್ತ

ಭತ್ತ (*bhatta*) — "paddy, rice in the husk".

ಭತ್ತ completes a set you have been assembling since the water-and-rice chapter. One plant, three names, and Kannada keeps them strictly apart: ಭತ್ತ standing in the ಹೊಲ, ಅಕ್ಕಿ once it is husked and in the sack, ಅನ್ನ once it is cooked and on the plate.

English makes do with *rice* for all three and adds a word when it must. Kannada gives each stage its own name, and a speaker who used the wrong one would be understood but marked as not from here.

The word, taken apart — its roots and family

ಭತ್ತ (*bhatta*) is a loan from Indo-Aryan. DEDR lists Kannada *batta*, *bhatta*, "paddy, rice in the husk", in its appendix of such loans (DEDR App. 56).

What you've built

Three.

Your turn

- *Say it: bhatta*
- *Say it:* it once more, slowly
- *Say it: bhatta*, then *akki*, then *anna*, in that order
- *Recall:* say *innū*

Before you move on

What does **ಭತ್ತ** mean? ("paddy, rice in the husk".) Say it once more.

66.4 ಬೆಳೆ (beḷe) — a crop

Before the new one: what did *bhatta* mean?

You'll want to know: ಬೆಳೆ

ಬೆಳೆ (*beḷe*) — "a crop".

ಬೆಳೆ is the general one: **ಭತ್ತ** is a **ಬೆಳೆ**, and so is everything else a **ಹೊಲ** is put to. Native, and made from the everyday word for growing — so the same shape names the growing and the grown thing, the way **ನೂಲು** named the thread and the spinning.

The chain runs the length of this book by now. A **ಬೀಜ** goes into the ground, the **ಮಳೆಗಾಲ** arrives, and a **ಬೆಳೆ** stands in the **ಹೊಲ**.

The word, taken apart — its roots and family

ಬೆಳೆ (*beḷe*) is native Dravidian, one word with Tamil *viḷai* (DEDR 5437). DEDR lists *beḷe*, "to grow; crop", itself: the old *v-* has become *b-*.

What you've built

Four.

Your turn

- *Say it: beḷe*
- *Say it:* it once more, slowly
- *Say it: bīja*, then *beḷe*, and say which one comes first
- *Read it:* **ಬೇಗ**

Before you move on

What does **ಬೆಳೆ** mean? ("a crop".) Say it once more.

66.5 ಸುಗ್ಗಿ (suggi) — the harvest

Before the new one: what did *beḷe* mean?

You'll want to know: ಸುಗ್ಗಿ

ಸುಗ್ಗಿ (*suggi*) — "the harvest".

ಸುಗ್ಗಿ is not only the cutting. It is the season, and it is the mood of the season — the stretch of weeks when the **ಬೆಳೆ** is in and there is enough, and Karnataka's harvest festival carries the word in its name.

So these five words end where a farming year does. It opened with **ಮಳೆಗಾಲ** in the seasons chapter, ran through the **ಬೀಜ** and the **ಬೆಳೆ**, and arrives at the **ಸುಗ್ಗಿ** with the **ಹೊಲ** empty and the house full.

Which makes this the right place to take your leave of the **ಹಳ್ಳಿ**. You can name what it grows now, and thank the people who grew it.

The word, taken apart — its roots and family

ಸುಗ್ಗಿ (*suggi*) is native Dravidian (DEDR 2647). DEDR lists Kannada *suggi*, "harvest season", and compares Marathi *sugī*, "season of plenty".

What you've built

Five: **ಹೊಲ**, **ಹುಲ್ಲು**, **ಭತ್ತ**, **ಬೆಳೆ**, **ಸುಗ್ಗಿ**. A field, what grows on it, and the season that takes it in.

Your turn

- *Say it: suggi*
- *Say it:* it once more, slowly
- *Say it:* all five in order, then *hōgi baruttēne*
- *Recall:* say *hāgādare*

Before you move on

What does **ಸುಗ್ಗಿ** mean? ("the harvest".) Say it once more.

Chapter 67

And, Or, But

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can join two Kannada ideas with and, or and but, and I can add myself to what somebody else said.
>
> *Complete KA-C67-and-too and join two things four different ways.*

67.1 ಮತ್ತು (mattu) — and

Before the new one: what did *beḷe* mean? And *suggi*?

You'll want to know: ಮತ್ತು

ಮತ್ತು (*mattu*) — "and".

It stands between the two things it joins, in the same place English puts *and*: **ಚಹಾ ಮತ್ತು ಕಾಫಿ** (*cahā mattu kāphi*) — "tea and coffee".

You have had a hundred and thirty nouns and no way to say two of them in one breath. Every list so far had to be a series of separate sentences. This is the word that ends that.

A note on how it is actually said. In unhurried speech Kannada will often join two nouns by simply naming them one after the other, with nothing between; **ಮತ್ತು** is what a careful sentence, a notice or a written list reaches for. Both are ordinary standard-colloquial Kannada, and **ಮತ್ತು** is the one that never sounds wrong.

The word, taken apart — its roots and family

ಮತ್ತು (*mattu*) is native Dravidian, of the root *maṟu*, "other, next", and DEDR 4766 lists *mattu*, "and, besides", itself; the entry also has Tamil *maṟu*, Telugu *maṟi* and Malayalam *maṟu*.

What you've built

The first join. Two things, one sentence.

Your turn

- *Say it: mattu*
- *Say it: cahā mattu kāphi*
- *Say it:* join two words you already know with *mattu*
- *Recall:* say *beḷe*, then say *suggi*
- *Recall:* from much earlier — say *kṛtajñate*, *bīḷkoḍuge*, *horaḍu*, *prayāṇa*, and say what each one means
- *Recall:* say *vinanti*
- *Read it:* ಅನುಮತಿ

Before you move on

What does ಮತ್ತು mean? ("and".) Name two things you own, joined with it.

67.2 ಮ — one character, met inside words you already say

Before the new one: ಞ — where would you nearly always meet it?

One character this time. Just one — and this is the one you have been reading longest without being told. It sits in more of the words in this book than any other character nobody has named.

Script you'll notice: ಮ

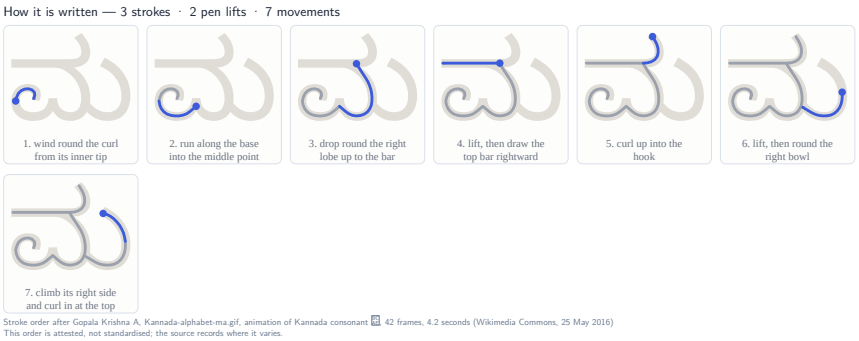

ಮ — *ma*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *m*, it is **ma**.

You already say these, and every one of them has **ಮ** somewhere inside it:

- **ಮತ್ತು** *mattu* — and, from the lesson before this one
- **ಮರ** *mara* — a tree
- **ಮೋಡ** *mōḍa* — a cloud
- **ನಮಸ್ಕಾರ** *namaskāra* — the greeting you opened this book with

Writing: ಮ

How **ಮ** *is written, stroke by stroke*

- **1.** start at the inner tip of the curl and wind up and round it to the left
- **2.** without lifting, run along the base and rise into the middle point
- **3.** without lifting, drop round the right lobe and climb the right side to the top bar
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook

- **6.** lift, then round the right bowl from its foot
- **7.** without lifting, climb its right side and curl in at the top

Pen lifts: 2. The body is one run, drawn as ಪ's is, from the inner tip of the curl up the right side; then comes the curled bar, and last the bowl on the right, from its foot, each after a lift.

Your turn

- *Look:* at these words, and find ಮ in the ones that have it

  ಮತ್ತು · ಮರ · ನಮಸ್ಕಾರ

- *Trace it:* ಮ three times, saying *ma* as you finish each one
- *Look:* back at any page of this chapter and find ಮ once more

Before you move on

Which character is this — ಮ? What sound does it carry? (***ma***.) Name one word you already say that contains it.

67.3 ಅಥವಾ (athavā) — or

> Before the new one: what did *mattu* do between two words? And which character did you meet inside it?

You'll want to know: ಅಥವಾ

ಅಥವಾ (*athavā*) — "or".

It goes where **ಮತ್ತು** went, between the two things — but now the two are alternatives instead of a pair: **ಚಹಾ ಅಥವಾ ಕಾಫಿ?** (*cahā athavā kāphi?*) — "tea or coffee?"

That one question is most of what a host says and most of what a shop asks, and until this word there was no way to put a choice to anybody.

ಅಥವಾ is a Sanskrit word taken over whole — *atha* ("then") plus *vā* ("or") — and it is at home in speech as well as on the page. Quick speech will also just name the two options with a rise between them, or slip **ಇಲ್ಲ** in the gap; **ಅಥವಾ** is the one that makes the choice unmistakable.

CDIAL 231 lists Sanskrit *athavā*, "or".

What you've built

A pair, and now a choice.

Your turn

- *Say it: athavā*
- *Say it: cahā athavā kāphi?*
- *Say it: cahā mattu kāphi*, then *cahā athavā kāphi* — and say which one is an offer of both
- *Recall:* say *mattu*, then name the character you traced last
- *Recall:* from much earlier — say *gaurava*, *upakāra*, *bahuśaḥ*, *khaṇḍita*, and say what each one means
- *Read it:* **ಸಂಕೋಚ**

Before you move on

What does **ಅಥವಾ** mean? ("or".) Offer somebody a choice between two drinks.

67.4 ಆದರೆ (ādare) — but

Before the new one: which of *mattu* and *athavā* offers a choice?

You'll want to know: ಆದರೆ

ಆದರೆ (*ādare*) — "but".

You have read it before without being told. The word for "in that case" — **ಹಾಗಾದರೆ** (*hāgādare*) — is **ಹಾಗೆ** (*hāge*, "that way") with **ಆದರೆ** welded on behind it. The piece you could not name was doing this job all along.

ಚಹಾ ಇದೆ, ಆದರೆ ಕಾಫಿ ಇಲ್ಲ (*cahā ide, ādare kāphi illa*) — "there is tea, but there is no coffee."

ಆದರೆ opens the second half of the sentence, not the first, exactly as English *but* does.

The word, taken apart — its roots and family

ಆದರೆ (*ādare*) is native Dravidian: the "if" form of *āgu*, "to become" (DEDR 333). "If it is so" turned into "but". DEDR 333 compares Sanskrit *ām*.

Grammar Lens: a verb doing a conjunction's job

ಆದರೆ is not a conjunction by birth. It is the verb **ಆಗು** (*āgu*, "to become") carrying the ending **-ದರೆ** (*-dare*), which is Kannada's "if". Read literally it says "if it becomes" — "granted that, all the same". That is why **ಹಾಗಾದರೆ** means "in that case": **ಹಾಗೆ** ("that way") **if it be**. One ending, two everyday words, and both of them turn out to be small sentences.

What you've built

Three joins now: and, or, but.

Your turn

- *Say it: ādare*
- *Say it: cahā ide, ādare kāphi illa*
- *Say it: hāgādare*, then take it apart into *hāge* and *ādare*
- *Recall:* say *athavā*, then offer a choice with it
- *Recall:* from much earlier — say *āśīrvāda*, *sāku*, *atithi*, *raita*, and say what each one means
- *Recall:* say *nambike*

Before you move on

What does **ಆದರೆ** mean? ("but".) Which everyday word already had it inside? (*hāgādare*.)

67.5 ನಾನೂ (nānū) — I too

Before the new one: what did *ādare* mean, and which verb is hiding inside it?

You'll want to know: ನಾನೂ

ನಾನೂ (*nānū*) — "I too, me as well".

Look at what changed. **ನಾನು** (*nānu*, "I") became **ನಾನೂ**: the last vowel got longer, and nothing else moved. That lengthening is a word in its own right — a suffix, **-ೂ** (*-ū*) — and it means "as well".

You already met **ಕೂಡ** (*kūḍa*) doing the same adding job as a separate word. **ನಾನು ಕೂಡ** and **ನಾನೂ** say the same thing; the second one welds it on.

The word, taken apart — its roots and family

ನಾನೂ (*nānū*) is native Dravidian: *nānu*, "I" (DEDR 5160), with the ending *-ū*, "too, even".

Grammar Lens: the same ending on two nouns means both

Put **-ೂ** on two nouns instead of one and you have said "both":
ಹಾಲೂ ನೀರೂ (*hālū nīrū*) — "both milk and water".
So Kannada has two ways to join two nouns, and this lesson and the **ಮತ್ತು** lesson have now given you each of them: a word that stands between, and an ending that rides on both. The second is the older Dravidian habit, and it is the one you will hear more often at a table.

What you've built

Four ways to put two ideas side by side: **ಮತ್ತು**, **ಅಥವಾ**, **ಆದರೆ**, and now the ending **-ೂ**.

Your turn

- *Say it: nānu*, then *nānū*, and say which one adds you to somebody else
- *Say it: hālū nīrū*
- *Say it:* all four joins in a row — *mattu*, *athavā*, *ādare*, and *-ū* on a noun

- *Recall:* say *kūḍa*, then say *nānū*, and say what the two have in common
- *Recall:* from much earlier — say *vandane*, *vaidya*, *vidyārthi*, *śikṣaka*, and say what each one means
- *Read it:* ಸೌಜನ್ಯ
- *Recall:* say *hola*

Before you move on

What does ನಾನೂ mean? ("I too".) Put the same ending on ಹಾಲು and on ನೀರು and say "both".

Chapter 68

Not That, and Neither

Modes: **voice** (4) **pen** (1) **Hands-free start:** none of the 5 lessons.

> ***By the end of this chapter:*** I can deny that something is what you called it, disagree politely, and say that I do not know either.
>
> *Complete KA-C68-me-neither and use both Kannada negatives correctly in one exchange.*

68.1 ಅ — one character, met inside words you already say

Before the new one: ಮ — what sound does it carry?

One character this time — and the first one in this book that arrives with instructions.

Script you'll notice: ಅ

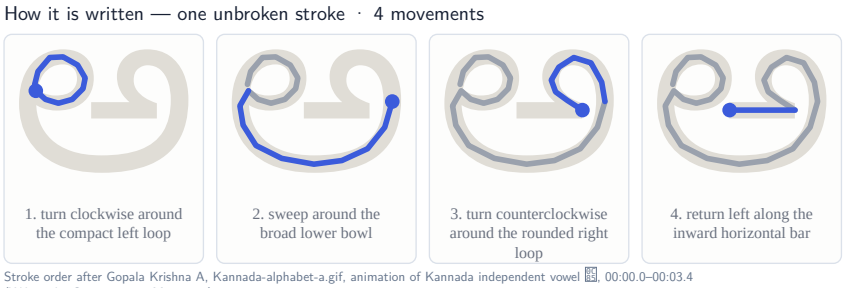

ಅ — *a*.

It is an **independent vowel** — the shape *a* takes when a word begins with it, rather than the sign it becomes inside one.

You already say these, and every one of them has ಅ somewhere inside it:

- ಅಥವಾ *athavā* — or, from two lessons ago
- ಅಲ್ಲಿ *alli* — there, where I am not
- ಅಜ್ಜ *ajja* — grandfather
- ಅತಿಥಿ *atithi* — a guest

Writing: ಅ

How ಅ is written, stroke by stroke

- **1.** turn clockwise around the compact left loop
- **2.** sweep around the broad lower bowl
- **3.** turn counterclockwise around the rounded right loop
- **4.** return left along the inward horizontal bar

Pen lifts: 0. The pen stays down from the first movement to the last.

This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-a.gif', 35 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Many characters before this one asked you only to copy what you could see, because nothing available to this book said where the pen starts. For ಅ somebody wrote it down and published it, so here it is. The characters still waiting on a source keep the older instruction, and will until one turns up.

Your turn

- *Look:* at these words, and find ಅ in the ones that have it

  ಅಥವಾ · ಅಲ್ಲಿ · ಅಜ್ಜ

- *Trace it:* ಅ three times, saying *a* as you finish each one
- *Look:* back at any page of this chapter and find ಅ once more

Before you move on

Which character is this — ಅ? What sound does it carry? (***a***.)
Name one word you already say that contains it.

68.2 ಅಲ್ಲ (alla) — is not

Before the new one: which character did you trace last, and what does *illa* deny?

You'll want to know: ಅಲ್ಲ

ಅಲ್ಲ (*alla*) — "is not (that)".

Since the very first chapter you have had ಇಲ್ಲ (*illa*). One letter apart, and a different job entirely.

ಪುಸ್ತಕ ಇಲ್ಲ (*pustaka illa*) — "there is no book." Nothing of that kind is here.

ಇದು ಪುಸ್ತಕ ಅಲ್ಲ (*idu pustaka alla*) — "this is not a book." The thing is here; the description is wrong.

The word, taken apart — its roots and family

ಅಲ್ಲ (*alla*) is native Dravidian, one word with Tamil *al-* and Malayalam *alla* (DEDR 234). DEDR lists *alla* itself, "to be not so-and-so".

Grammar Lens: two negatives, and which one to reach for

Kannada splits the negative in two, and neither half can do the other's work. ಇಲ್ಲ denies that something **is there**. ಅಲ್ಲ denies that something **is that**.
English hides the split behind one word — "there is no book", "this is not a book" — and a learner who reaches for ಇಲ್ಲ in the second sentence has said something a Kannada speaker cannot make sense of. The test is simple: if you could point at the thing, you need ಅಲ್ಲ.

Why it's said this way

This is also how you disagree. Kannada has no everyday sentence for "I disagree"; what a speaker says is that the description is wrong.
ಅದು ನಿಜ ಅಲ್ಲ (*adu nija alla*) — "that is not true."

Notice what it does not do: it contradicts the statement and leaves the person out of it. Said flatly it is firm; said with ಸ್ವಲ್ಪ or a softening ಇಲ್ಲ in front of it, it is gentle. Both are ordinary.

What you've built

A second negative, and the first way to disagree.

Your turn

- *Say it: alla*
- *Say it: pustaka illa*, then *idu pustaka alla*, and say which one denies a description
- *Say it: adu nija alla*
- *Recall:* say *athavā*, then say *nānū*
- *Recall:* say *mattu* once more
- *Recall:* say ಮು once more
- *Recall:* from much earlier — say *kurci*, *bāgilu*, *hoṭṭe*, *beraḷu*, and say what each one means
- *Recall:* say *hullu*

Before you move on

Which negative denies that a thing exists? (*illa.*) Which one denies that it is what you called it? (*alla.*) Disagree with something, out loud.

68.3 ಹಾಲೂ ಇಲ್ಲ, ನೀರೂ ಇಲ್ಲ (hālū illa, nīrū illa) — neither milk nor water

Before the new one: which negative would you use to say "this is not a book"?

You'll want to know: ಹಾಲೂ ಇಲ್ಲ, ನೀರೂ ಇಲ್ಲ

ಹಾಲೂ ಇಲ್ಲ, ನೀರೂ ಇಲ್ಲ (*hālū illa, nīrū illa*) — "there is neither milk nor water."

Nothing here is new. It is the "both" ending from the **ನಾನೂ** lesson — **-ೂ** on each of the two nouns — with **ಇಲ್ಲ** after each one instead of nothing.

Kannada builds "neither … nor" out of "both … and" plus a negative, and it says the negative twice. English says it once and marks the pair with *neither*; Kannada marks the pair with the ending and lets each half deny itself.

You can hear the shape in the shorter version a shopkeeper would actually use: **ಹಾಲೂ ನೀರೂ ಇಲ್ಲ** — the ending on both, the denial once at the end.

The word, taken apart — its roots and family

ಹಾಲೂ ಇಲ್ಲ, ನೀರೂ ಇಲ್ಲ (*hālū illa, nīrū illa*) is native Dravidian throughout: *hālu*, "milk" (DEDR 4096, older Kannada *pāl*), and *nīru*, "water" (DEDR 3690), each with *-ū*, "even", and *illa*, "is not" (DEDR 2559, with Tamil *illai*). DEDR 4096 compares, with a query, Sanskrit *pālana*. DEDR 3690 compares Sanskrit *nīra*.

What you've built

And, or, but, both — and now neither. The whole of the joining ending's range in two lessons.

Your turn

- *Say it: hālū nīrū* — both
- *Say it: hālū illa, nīrū illa* — neither
- *Say it:* pick two things in this room and deny both of them
- *Recall:* say *alla*, then say what it denies that *illa* does not
- *Recall:* say *athavā* once more
- *Recall:* from much earlier — say *raṅgōli*, *kūdalu*, *hallu*, *kālu*, and say what each one means
- *Read it:* **ಭತ್ತ**

Before you move on

Which ending marks the pair? (-ು.) How many times does ಇಲ್ಲ get said in the full form? (Twice.)

68.4 ಗೊತ್ತಿಲ್ಲ (gottilla) — I don't know

Before the new one: what does *gottu* mean on its own?

You'll want to know: ಗೊತ್ತಿಲ್ಲ

ಗೊತ್ತಿಲ್ಲ (*gottilla*) — "(it) is not known", and in practice "I don't know".

Both halves have been sitting in this book for chapters. ಗೊತ್ತು (*gottu*, "known") came with the core verbs; ಇಲ್ಲ came on page one. Push them together and the vowel between them drops out: ಗೊತ್ತು + ಇಲ್ಲ → ಗೊತ್ತಿಲ್ಲ.

The full sentence keeps the dative you learned for knowing: ನನಗೆ ಗೊತ್ತಿಲ್ಲ (*nanage gottilla*) — literally "to me it is not known". Knowing happens **to** you in Kannada, and so does not knowing.

On its own, ಗೊತ್ತಿಲ್ಲ is a complete and perfectly polite answer.

The word, taken apart — its roots and family

ಗೊತ್ತಿಲ್ಲ (*gottilla*) is native Dravidian: *gottu*, "known" (DEDR 1847, the same root as Tamil *kuṟi*, "a mark"), and *illa*, "is not" (DEDR 2559).

What you've built

The most useful three syllables an A1 speaker owns.

Your turn

- *Say it:* *gottu*, then *gottilla*
- *Say it:* *nanage gottilla*
- *Say it:* ask yourself something you do not know the answer to, and answer it
- *Recall:* say "neither milk nor water"
- *Recall:* say *ādare* once more

- *Recall:* from much earlier — say *uppu*, *dīpa*, *baṭṭe*, *haṇṇu*, and say what each one means
- *Recall:* say *beḷe*

Before you move on

What does **ಗೊತ್ತಿಲ್ಲ** mean? ("I don't know".) Which two words is it made of? (*gottu* and *illa*.)

68.5 ನನಗೂ ಗೊತ್ತಿಲ್ಲ (nanagū gottilla) — I don't know either

Before the new one: how do you say you don't know?

You'll want to know: ನನಗೂ ಗೊತ್ತಿಲ್ಲ

ನನಗೂ ಗೊತ್ತಿಲ್ಲ (*nanagū gottilla*) — "I don't know either", or plainly "me neither".

The ending you have been hanging on nouns goes on the dative just as happily: **ನನಗೆ** (*nanage*, "to me") becomes **ನನಗೂ** (*nanagū*, "to me as well"). Nothing else changes.

Say **ನಾನೂ** and you add yourself to something somebody is doing. Say **ನನಗೂ** and you add yourself to something happening **to** them — knowing, liking, not knowing. The dative sentences you already own take the second one.

This is the turn a short exchange needs most and almost never gets taught: one person shrugs, and you agree with the shrug.

The word, taken apart — its roots and family

ನನಗೂ ಗೊತ್ತಿಲ್ಲ (*nanagū gottilla*) is native Dravidian throughout: *nanagū*, "to me too", from *nānu*, "I" (DEDR 5160), *gottu*, "known" (DEDR 1847), and *illa*, "is not" (DEDR 2559).

What you've built

Five ways of joining, and the first that joins you to another person's answer.

Your turn

- *Say it:* *nanage gottilla*, then *nanagū gottilla*
- *Say it:* *nānū*, then *nanagū*, and say which one goes with knowing
- *Say it:* somebody says *nanage gottilla* — reply
- *Recall:* say *alla*, then disagree with something out loud
- *Recall:* from much earlier — say *hūmāle*, *heṇḍati*, *gaṇḍa*, *ajji*, and say what each one means
- *Read it:* ಸುಗ್ಗಿ
- *Recall:* say *mattu*

Before you move on

What does ನನಗೂ ಗೊತ್ತಿಲ್ಲ mean? ("I don't know either".) Which ending made it *either*? (-ೂ.)

Chapter 69

Asking, and Asking Why

Modes: 🚗 **voice** (3) ✓ **pen** (2) 🚗 **Hands-free start:** none of the 5 lessons.

> ***By the end of this chapter:*** I can turn any Kannada statement into a question, ask for agreement, and ask why.
>
> *Complete KA-C69-why and ask a yes-or-no question, a tag question and a why question in a row.*

69.1 ◌ೂ — one character, met inside words you already say

> Before the new one: ಅ — which way did the pen travel first?
>
> One character this time — a mark rather than a letter, and one that has quietly been changing the meaning of whole sentences.

Script you'll notice: ◌ೂ

◌ೂ — *ū*.

It is a **vowel sign**, not a letter: it never stands alone. Hang it on a consonant and the built-in *a* becomes a long **ū**. You have had the full letter ಊ for the start of a word; this is the same sound, worn inside one.

You already say these, and every one of them has ◌ೂ somewhere inside it:

- ನಾನೂ *nānū* — I too, from the joining lesson
- ಹೂವು *hūvu* — a flower

- ಮೂಗು *mūgu* — the nose
- ಕೂದಲು *kūdalu* — hair

Writing: ೂ

Put your pen on ೂ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ೂ in the ones that have it

  ನಾನೂ · ಹೂವು · ಮೂಗು

- *Trace it:* ೂ three times, saying *ū* as you finish each one
- *Look:* back at any page of this chapter and find ೂ once more

Before you move on

Which character is this — ೂ? What sound does it carry? (***ū***.) Name one word you already say that contains it.

69.2 ಗೊತ್ತಾ (gottā) — do you know?

> Before the new one: which sign did you trace last, and what does *gottilla* mean?

You'll want to know: ಗೊತ್ತಾ

ಗೊತ್ತಾ (*gottā*) — "do you know?"

It is ಗೊತ್ತು with its ending swapped for a long **-ಆ** (*-ā*), and that ending is the whole question. Nothing else moved: no word order changed, nothing was added in front.

The word, taken apart — its roots and family

ಗೊತ್ತಾ (*gottā*) is native Dravidian: *gottu*, "known" (DEDR 1847, the same root as Tamil *kuṟi*, "a mark"), with *-ā*, the ending that makes a question.

Grammar Lens: one ending turns any statement into a question

Put **-ಆ** on the end of a statement and the statement becomes a yes-or-no question. That is the entire machinery.
You have been saying it since the third chapter without being told, inside ನೀವು ಹೇಗಿದ್ದೀರಾ (*nīvu hēgiddīrā*) — the *-ā* on the end is this one. Every sentence you own can now be asked. ಚಹಾ ಇದೆ becomes ಚಹಾ ಇದೆಯಾ ("is there tea?"); ನಿಮಗೆ ಗೊತ್ತು becomes ನಿಮಗೆ ಗೊತ್ತಾ. And the answer is the echo you learned first: ಹೌದು, or ಗೊತ್ತಿಲ್ಲ.

What you've built

Every statement in this book, asked.

Your turn

- *Say it: gottu*, then *gottā*
- *Say it: nimage gottā?* — and answer it *haudu* or *gottilla*
- *Say it:* take a sentence you already know and put *-ā* on the end of it
- *Recall:* say *nānū*, then say *nanagū*
- *Recall:* say ಅ once more
- *Recall:* say *alla* once more
- *Recall:* from much earlier — say *bisilu*, *ākāśa*, *ajja*, *bare*, and say what each one means

Before you move on

What turns a Kannada statement into a yes-or-no question? (The ending **-ಆ**.) Ask somebody whether they know.

69.3 ಅಲ್ವಾ (alvā) — isn't it?

Before the new one: which ending makes a question, and what does *gottā* ask?

You'll want to know: ಅಲ್ವಾ

ಅಲ್ವಾ (*alvā*) — "isn't it?", "right?"

Two things you already have, pushed together. **ಅಲ್ಲ** ("is not") takes the question ending **-ಆ** and becomes **ಅಲ್ಲವಾ** (*allavā*) — "is it not?". In ordinary speech that flattens to **ಅಲ್ವಾ**, and it is the flattened one you will hear.

ಇದು ಒಳ್ಳೆಯ ಪುಸ್ತಕ, ಅಲ್ವಾ? (*idu oḷḷeya pustaka, alvā?*) — "this is a good book, isn't it?"

Register, plainly: **ಅಲ್ವಾ** is spoken Kannada. Written Kannada says **ಅಲ್ಲವೇ**. This book teaches the everyday spoken variety throughout, so **ಅಲ್ವಾ** is what you get here.

The word, taken apart — its roots and family

ಅಲ್ವಾ (*alvā*) is native Dravidian: *alla*, "is not" (DEDR 234), worn down to *al-*, with *-ā*, the ending that makes a question.

Grammar Lens: asking for agreement, not information

Somebody who says **ಅಲ್ವಾ** usually knows the answer already; they are inviting you to agree, and they expect **ಹೌದು**.

That makes it the cheapest politeness move in the language. A flat statement can land as a correction; the same statement with **ಅಲ್ವಾ** on the end hands the other person a share of it.

What you've built

A question you can ask about anything, and a tag that softens it.

Your turn

- *Say it: alla*, then *allavā*, then *alvā*
- *Say it: idu oḷḷeya pustaka, alvā?*
- *Say it:* say something true about this room and add *alvā*
- *Recall:* say *gottā*, then answer it

- *Recall:* say *hālū illa, nīrū illa* once more
- *Recall:* from much earlier — say *candra*, *kēḷu*, *nōḍu*, *koḍu*, and say what each one means
- *Read it:* ಅಥವಾ

Before you move on

What does ಅಲ್ಲಾ ask for? (Agreement.) Which two pieces is it made of? (*alla* and the question ending **-ಆ**.)

69.4 ಯಾಕೆ (yāke) — why?

Before the new one: what does *alvā* invite the other person to do?

You'll want to know: ಯಾಕೆ

ಯಾಕೆ (*yāke*) — "why?"

The question words came in a set: **ಯಾರು** (*yāru*, "who"), **ಎಲ್ಲಿ** (*elli*, "where"), **ಏನು** (*ēnu*, "what"). **ಯಾಕೆ** is the one the set was missing, and it is the one a short conversation runs out of first.

ಯಾಕೆ? on its own is a whole turn. Somebody says they are not coming; you say **ಯಾಕೆ**, and you have asked the only question that matters.

You will also meet **ಏಕೆ** (*ēke*) for the same word. It is the careful, written form; **ಯಾಕೆ** is what gets said. Keep the two side by side — the word for "because" is built on the written one, and it is not far off.

The word, taken apart — its roots and family

ಯಾಕೆ (*yāke*) is native Dravidian, built on the question base *yā-*. DEDR 5151 lists *yāke* itself, "why".

What you've built

Four question words now, and the one that opens a reason. Asking why is half of a conversation; the other half is the answer, and that is next.

Your turn

- *Say it:* *yāke*
- *Say it:* *yāru*, *elli*, *yāke* — three questions in a row
- *Say it:* somebody tells you *illa* — ask them why
- *Recall:* say *alvā*, then use it on the end of a sentence
- *Recall:* the whole chapter — ೂ, *gottā*, *alvā*, and this one
- *Recall:* say *gottilla* once more
- *Recall:* from much earlier — say *cukki*, *nillu*, *kuḷitukō*, *bā*, and say what each one means
- *Recall:* say *ādare*
- *Read it:* ನಾನೂ

Before you move on

What does ಯಾಕೆ ask? ("Why?") What is its careful written twin? (*ēke*.)

69.5 ಲ — one character, met inside words you already say

Before the new one: ೂ — what does it do to the consonant it sits on?

One character this time — and it is the one standing in the middle of both of Kannada's negatives.

Script you'll notice: ಲ

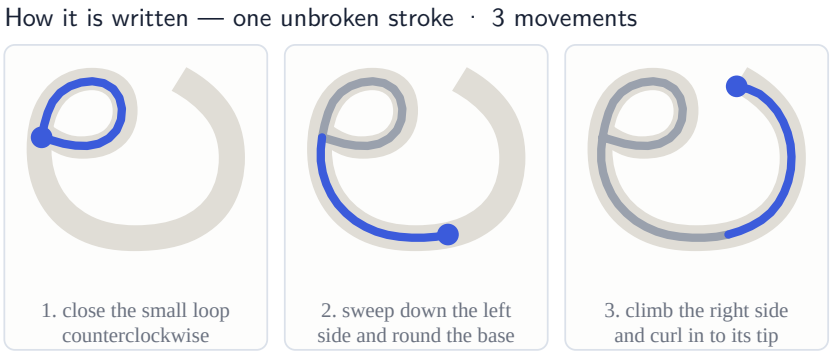

ಲ — *la*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *l*, it is **la**. Kannada has a second l as well — the thicker ಳ you already trace — and the two are different letters for different sounds, not a matter of handwriting.

You already say these, and every one of them has ಲ somewhere inside it:

- ಅಲ್ಲ *alla* — is not (that)
- ಇಲ್ಲ *illa* — there is not
- ಹಲ್ಲು *hallu* — a tooth
- ಕಾಲು *kālu* — a leg

Writing: ಲ

Stroke order after Gopala Krishna A, Kannada-alphabet-la.gif, animation of Kannada consonant ಲ, 30 frames, 3.0 seconds (Wikimedia Commons, 25 May 2016)
This order is attested, not standardised; the source records where it varies.

How ಲ *is written, stroke by stroke*

- **1.** start at the left of the small loop and close it counterclockwise
- **2.** without lifting, sweep down the outer left side and round the base
- **3.** without lifting, climb the right side and curl in to its tip

Pen lifts: 0. The whole letter is one run, from the small loop round the outside to the tip of the right side. ಲ has no curled bar on top, so there is nothing to lift for.

Chapter 70

Saying So, and Saying Why

Modes: **voice** (3) **eyes** (1) **pen** (1) **Hands-free start:** the first of 5 lessons.

> ***By the end of this chapter:*** I can report what was said, give a reason, and say what I think.
>
> *Complete KA-C70-i-think and give an opinion with the quotative and a reason for it.*

70.1 ಹೇಳು (hēḷu) — to say, to tell

> Before the new one: which character did you trace last, and what does *yāke* ask?

You'll want to know: ಹೇಳು

ಹೇಳು (*hēḷu*) — "to say, to tell".

You have had **ಮಾತಾಡು** (*mātāḍu*, "to speak") for a while. The two are not interchangeable: **ಮಾತಾಡು** is the activity of talking, and **ಹೇಳು** is saying a particular thing to a particular person. You speak Kannada; you tell somebody the way.

You have also read the polite command form of it already, in the sentence a stranger needs most: **ದಯವಿಟ್ಟು ದಾರಿ ಹೇಳಿ** (*dayaviṭṭu dāri hēḷi*) — "please tell me the way." The **-ಇ** on the end is the polite request ending, so **ಹೇಳಿ** is "please tell".

The reason this verb arrives here rather than with the other verbs is what comes next: it is the verb a reported sentence hangs on, and until the following lesson there was nothing to hang.

The word, taken apart — its roots and family

ಹೇಳು (*hēḷu*) is native Dravidian, one word with Tamil *pēcu* (DEDR 4430). DEDR gives the older Kannada *pēl*, "to say": the *p-* has become *h-* and the *l* has become *ḷ*.

What you've built

A verb with a hole in it, waiting for something to be said.

Your turn

- *Say it:* *hēḷu*
- *Say it:* *hēḷi* — the polite one
- *Say it:* *dayaviṭṭu dāri hēḷi*
- *Recall:* say *yāke*, then ask somebody why
- *Recall:* say *nanagū gottilla* once more
- *Recall:* say ಾ once more
- *Recall:* from much earlier — say *mara*, *mōḍa*, *haḷeya*, *hosa*, and say what each one means

Before you move on

What does ಹೇಳು mean? ("to say, to tell".) What is the polite form? (*hēḷi*.)

70.2 ಅಂತ (anta) — that

Before the new one: what does *hēḷu* mean, and what is its polite form?

You'll want to know: ಅಂತ

ಅಂತ (*anta*) — the word that closes off something said or thought.

English opens a report with *that* and lets it run: "he said **that** there is no coffee." Kannada does the opposite. It says the thing first, exactly as it was said, and then shuts it with ಅಂತ:

ಕಾಫಿ ಇಲ್ಲ ಅಂತ ಹೇಳಿ (*kāphi illa anta hēḷi*) — "please say that there is no coffee." Literally: "there is no coffee — thus — tell."

Nothing inside the quoted part changes. **ಕಾಫಿ ಇಲ್ಲ** is the same three syllables whether you are saying it or reporting it.

The word, taken apart — its roots and family

ಅಂತ (*anta*) is native Dravidian, usually explained as a form of the verb *an-*, *en-*, "to say", which DEDR 868 lists with Tamil *eṉ* and Telugu *anu*. A quotation in Kannada ends with "saying".

Grammar Lens: the quotation closes before the verb arrives

ಅಂತ comes after the clause it closes, and the verb of saying or thinking comes after that. So a Kannada report is built back to front from an English one:

what is said	closer	the verb
ಕಾಫಿ ಇಲ್ಲ	ಅಂತ	ಹೇಳಿ

That order is why this word had to wait for a verb like **ಹೇಳು**. Until there was something to put in the third column, the first two had nowhere to go.

The written twin of **ಅಂತ** is **ಎಂದು** (*endu*). Same job, older shape, and you will meet it in the very next lesson without being told — it is hiding inside a word you are about to learn.

What you've built

A whole sentence, used as the object of another one. That is the first piece of Kannada in this book that is bigger than a phrase.

Your turn

- *Say it: anta*
- *Say it: kāphi illa anta hēḷi*
- *Say it:* take any true sentence you know, add *anta*, then add *hēḷi*
- *Recall:* say *hēḷu*, then *hēḷi*
- *Recall:* say *gottā* once more

- *Recall:* from much earlier — say *kombe*, *cikka*, *alli*, *illi*, and say what each one means
- *Recall:* read ಅಲ್ಲ, then say *hālū illa, nīrū illa*

Before you move on

Where does ಅಂತ go — before or after the thing being reported? (After.) What is its written twin? (*endu.*)

70.3 ೇ — one character, met inside words you already say

Before the new one: ಲ — and which other letter in this script sounds close to it?

One character this time. It is a sign rather than a letter, and it has been inside the word for "how" since the third chapter.

Script you'll notice: ೇ

ೇ — *ē*.

It is a **vowel sign**. Hang it on a consonant and the built-in *a* becomes a long **ē**. The short one, ೆ, you have been reading for a long time; this is its long partner, and Kannada keeps the two apart in meaning as well as in length.

You already say these, and every one of them has ೇ somewhere inside it:

- ಹೇಳು *hēḷu* — to say, from the lesson before last
- ಹೇಗೆ *hēge* — how
- ಮೇಕೆ *mēke* — a goat
- ಬೇರು *bēru* — a root

Writing: ೇ

Put your pen on ೇ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ೇ in the ones that have it

  ಹೇಳು · ಹೇಗೆ · ಮೇಕೆ

- *Trace it:* ೇ three times, saying *ē* as you finish each one
- *Look:* back at any page of this chapter and find ೇ once more

Before you move on

Which character is this — ೇ? What sound does it carry? (*ē*.)
Name one word you already say that contains it.

70.4 ಏಕೆಂದರೆ (ēkendare) — because

Before the new one: which sign did you trace last, and what does *anta* close off?

You'll want to know: ಏಕೆಂದರೆ

ಏಕೆಂದರೆ (*ēkendare*) — "because".

Take it apart and there is nothing in it you have not already met.

ಏಕೆ (*ēke*) is the written twin of **ಯಾಕೆ** — "why". **ಎಂದರೆ** (*endare*) is the written quotative **ಎಂದು** with the same **-ದರೆ** ending that made **ಆದರೆ** out of a verb: "if one says". So the whole word means **"if one says why"** — that is, "as to why".

ಕಾಫಿ ಇಲ್ಲ, ಏಕೆಂದರೆ ಹಾಲು ಇಲ್ಲ (*kāphi illa, ēkendare hālu illa*) — "there is no coffee, because there is no milk."

A reason can now be asked for and given. Neither was possible in this book an hour ago.

The word, taken apart — its roots and family

ಏಕೆಂದರೆ (*ēkendare*) is native Dravidian: *ēke*, "why" (DEDR 5151), and *endare*, "if one says", from *en-*, "to say" (DEDR 868). "If you ask why" opens the reason.

Grammar Lens: the same ending, for the third time

ಏಕೆಂದರೆ opens the reason, exactly where English puts *because*, and the reason comes second. That is worth saying plainly because Kannada does not always work that way: most of its subordinate machinery comes BEFORE the main clause, and this borrowed-looking word is one of the few that comes after.
Notice the ending you have now seen three times. **ಆದರೆ**, **ಹಾಗಾದರೆ**, **ಏಕೆಂದರೆ** — all three are little conditional sentences that hardened into joining words, and **-ದರೆ** is the piece doing it in each.

What you've built

Ask why, and answer it. With **ಮತ್ತು**, **ಅಥವಾ**, **ಆದರೆ** and the joining ending already in hand, a Kannada sentence can now hold two ideas and a reason.

Your turn

- *Say it: ēkendare*
- *Say it: kāphi illa, ēkendare hālu illa*
- *Say it: yāke?* — then answer yourself with *ēkendare* and a reason
- *Recall:* say *ādare*, then say *hāgādare*, and name the ending both share
- *Recall:* say *alvā* once more
- *Recall:* from much earlier — say *bēru*, *ele*, *ūṭa*, *hṛdaya*, and say what each one means
- *Recall:* say *gottilla*
- *Read it:* **ನನಗೂ ಗೊತ್ತಿಲ್ಲ**

Before you move on

What does ಏಕೆಂದರೆ mean? ("because".) What are its two halves? (*ēke*, "why", and *endare*, "if one says".)

70.5 ಅದು ನಿಜ ಅಂತ ಯೋಚಿಸುತ್ತೇನೆ (adu nija anta yōcisuttēne) — I think that is true

Before the new one: how do you give a reason, and which ending do *ādare* and *ēkendare* share?

You'll want to know: ಅದು ನಿಜ ಅಂತ ಯೋಚಿಸುತ್ತೇನೆ

ಅದು ನಿಜ ಅಂತ ಯೋಚಿಸುತ್ತೇನೆ (*adu nija anta yōcisuttēne*) — "I think that is true."

ಯೋಚಿಸು (*yōcisu*, "to think") has been in this book since the chapter of mind verbs, and until the last lesson it could not do the one thing thinking is for. A thought is a whole sentence, and Kannada could not hand it one without **ಅಂತ**.

Read it in Kannada order: **ಅದು ನಿಜ** (the thought) — **ಅಂತ** (closed off) — **ಯೋಚಿಸುತ್ತೇನೆ** ("I think").

The word, taken apart — its roots and family

ಅದು ನಿಜ ಅಂತ ಯೋಚಿಸುತ್ತೇನೆ (*adu nija anta yōcisuttēne*) is built from *adu*, "that" (DEDR 1), *nija*, "true", from Sanskrit *nija* (CDIAL 7181), *anta*, "saying" (DEDR 868), and *yōcisu*, "to think", from Sanskrit *yojanā*.

Grammar Lens: one frame, and the slot you change

Only the first slot ever changes:
ಕಾಫಿ ಒಳ್ಳೆಯದು ಅಂತ ಯೋಚಿಸುತ್ತೇನೆ — I think coffee is good. **ಅದು ನಿಜ ಅಲ್ಲ ಅಂತ ಯೋಚಿಸುತ್ತೇನೆ** — I think that is not true.
An opinion delivered flat is a claim; the same one with **ಅಲ್ವಾ** after it is an invitation.

What you've built

Agree, disagree, give a reason, say what you think. That is a conversation.

Your turn

- *Say it: adu nija anta yōcisuttēne*
- *Say it:* the same thing about coffee — *kāphi oḷḷeyadu anta yōcisuttēne*
- *Say it:* disagree with something, then say what you think instead
- *Recall:* say *ēkendare*, then give a reason with it
- *Recall:* the whole chapter — *hēḷu*, *anta*, ◌ೆ, *ēkendare*, and this one
- *Recall:* say ಲ once more
- *Recall:* from much earlier — say *bīja*, *bāyi*, *mūgu*, *kivi*, and say what each one means

Before you move on

Which slot in the frame changes? (The first — the thought.) Which two never move? (*anta* and the verb.)

Chapter 71

Once More, and Which One

Modes: **voice** (4) **pen** (1) **Hands-free start:** the first 3 of 5 lessons.

> ***By the end of this chapter:*** I can ask for another one, ask somebody to repeat themselves, and ask when and which.
>
> *Complete KA-C71-which and say the whole ya- question family in order.*

71.1 ಇನ್ನೊಂದು (innondu) — another one

> Before the new one: say what you think about something, out loud.

You'll want to know: ಇನ್ನೊಂದು

ಇನ್ನೊಂದು (*innondu*) — "another one, one more".

Two pieces, both of them yours already: **ಇನ್ನೂ** (*innū*, "still, yet") and **ಒಂದು** (*ondu*, "one"). Push them together and the long vowel shortens: **ಇನ್ನೊಂದು**.

ಇನ್ನೊಂದು ಚಹಾ (*innondu cahā*) — "another tea." That is what you say when the cup is empty and the answer is yes.

The word, taken apart — its roots and family

ಇನ್ನೊಂದು (*innondu*) is native Dravidian: *innu*, "more, yet" (DEDR 410), and *ondu*, "one" (DEDR 990). It is "one more".

Grammar Lens: one, and one more

Pair it with plain **ಒಂದು** and you have the Kannada way of saying "one … the other":
ಒಂದು ಇಲ್ಲಿ, ಇನ್ನೊಂದು ಅಲ್ಲಿ (*ondu illi, innondu alli*) — "one here, the other there."
There is no separate word for *the other*. Kannada counts: this one, and the one-more. It is the same trick the language uses everywhere — build the second thing out of the first rather than name it fresh.

What you've built

A second helping, and a way to talk about two things one at a time.

Your turn

- *Say it: ondu*, then *innondu*
- *Say it: innondu cahā*
- *Say it: ondu illi, innondu alli*
- *Recall:* say *innū*, and say what it added to *ondu*
- *Recall:* say *mattu* once more
- *Recall:* say *hēḷu* once more
- *Recall:* from much earlier — say *nadi*, *kaṇṇu*, *magaḷu*, *maga*, and say what each one means
- *Recall:* say *gottā*

Before you move on

What does **ಇನ್ನೊಂದು** mean? ("another one".) Which two words is it built from? (*innū* and *ondu*.)

71.2 ಇನ್ನೊಂದು ಸಲ ಹೇಳಿ (innondu sala hēḷi) — please say it once more

Before the new one: how do you ask for another tea?

You'll want to know: ಇನ್ನೊಂದು ಸಲ ಹೇಳಿ

ಇನ್ನೊಂದು ಸಲ ಹೇಳಿ (*innondu sala hēḷi*) — "please say it once more."

ಸಲ (*sala*) is a time in the counting sense — one time, two times — so **ಇನ್ನೊಂದು ಸಲ** is "one more time". The verb is the polite **ಹೇಳಿ** you met with the sentence about the way.

This is the single most useful sentence a beginner owns, and until now this book had no way to build it. Everything else you can survive without; you cannot survive without asking somebody to repeat themselves.

Put **ದಯವಿಟ್ಟು** in front and it is as polite as it gets: **ದಯವಿಟ್ಟು ಇನ್ನೊಂದು ಸಲ ಹೇಳಿ**. Said with a slight rise it is warm rather than demanding, and nobody in Karnataka will mind hearing it — a stranger trying the language is worth the second go.

The word, taken apart — its roots and family

ಇನ್ನೊಂದು ಸಲ ಹೇಳಿ (*innondu sala hēḷi*) is *innondu*, "one more" (DEDR 410, 990), *sala*, "time, turn", native (DEDR 2781), and *hēḷi*, the polite form of *hēḷu*, "to say" (DEDR 4430).

What you've built

The repair sentence. With it, every other sentence in this book gets a second chance.

Your turn

- *Say it: innondu sala hēḷi*
- *Say it: dayaviṭṭu innondu sala hēḷi*
- *Say it:* somebody says something too fast — ask for it again
- *Recall:* say *innondu*, then *ondu illi, innondu alli*
- *Recall:* say **ಮ** once more
- *Recall:* say *anta* once more
- *Recall:* from much earlier — say *kere*, *magu*, *snēhita*, *kuṭumba*, and say what each one means

Before you move on

How do you ask for that once more? (*innondu sala hēḷi.*) What does ಸಲ count? (Times.)

71.3 ಯಾವಾಗ (yāvāga) — when?

Before the new one: ask somebody to say it once more.

You'll want to know: ಯಾವಾಗ

ಯಾವಾಗ (*yāvāga*) — "when?"

The question set is nearly complete: who, where, what, why, and now when. This is the last one an everyday exchange keeps reaching for.

ಯಾವಾಗ ಬರುತ್ತೀರಾ? (*yāvāga baruttīrā?*) — "when will you come?" Notice the question ending on the end of it, doing the same job it did on **ಗೊತ್ತಾ**.

The answers are already yours: **ಈಗ** (*īga*, "now"), **ನಾಳೆ**, **ನಾಡಿದ್ದು** (*nāḍiddu*, "the day after tomorrow"). Ask **ಯಾವಾಗ** and you can understand what comes back.

The word, taken apart — its roots and family

ಯಾವಾಗ (*yāvāga*) is native Dravidian: *yāva*, "which" (DEDR 5151), and *āga*, "time, then" (DEDR 1). It is "at which time".

What you've built

Five question words. Who, where, what, why, when — and a reason and an opinion to answer them with.

Your turn

- *Say it:* *yāvāga*
- *Say it:* *yāvāga baruttīrā?*
- *Say it:* answer it — *īga*, or *nāḍiddu*
- *Recall:* say *yāke*, then say *yāvāga*, and say which one asks for a reason
- *Recall:* say *athavā* once more

- *Recall:* say ೀ once more
- *Recall:* from much earlier — say *beṭṭa*, *sahāya māḍu*, *kēḷu*, *tegeduko*, and say what each one means
- *Read it:* ಅಲ್ವಾ
- *Recall:* say *yāke*

Before you move on

What does ಯಾವಾಗ ask? ("When?") Answer it with the word for "now". (*īga.*)

71.4 ವ — one character, met inside words you already say

Before the new one: ೀ — long or short?

One character this time — and it is standing in the middle of the word for "when" and the word for "or" alike.

Script you'll notice: ವ

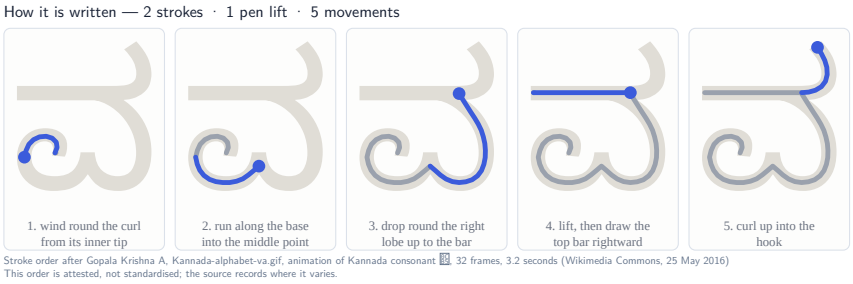

ವ — *va.*

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *v*, it is **va**. Kannada's *v* is the same sound that Tamil keeps at the front of many words where Kannada has turned it into *b*, which is why ಬಾ and ಬರೆ look nothing like their Tamil cousins.

You already say these, and every one of them has ವ somewhere inside it:

- ಯಾವಾಗ *yāvāga* — when, from the lesson before this one
- ಅಥವಾ *athavā* — or
- ಹೂವು *hūvu* — a flower
- ದಯವಿಟ್ಟು *dayaviṭṭu* — please

Writing: ವ

How ವ *is written, stroke by stroke*

- **1.** start at the inner tip of the curl and wind up and round it to the left
- **2.** without lifting, run along the base and rise into the middle point
- **3.** without lifting, drop round the right lobe and climb the right side to the top bar
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook

Pen lifts: 1. The body is one run, from the inner tip of the curl along the base, through the point and up the right side; the curled bar on top comes after the only lift. It is ಪ without the dot.

  ಯಾವಾಗ · ಅಥವಾ · ಹೂವು

- *Trace it:* ವ three times, saying *va* as you finish each one

Which character is this — ವ? What sound does it carry? (***va.***)
Name one word you already say that contains it.

71.5 ಯಾವ (yāva) — which?

Before the new one: which character did you trace last, and what does *yāvāga* ask?

You'll want to know: ಯಾವ

ಯಾವ (*yāva*) — "which?"

It goes in front of a noun, exactly where an adjective goes: **ಯಾವ ಪುಸ್ತಕ?** (*yāva pustaka?*) — "which book?"

Put it with the word for "or" and you can finally put a real choice to somebody: **ಚಹಾ ಅಥವಾ ಕಾಫಿ? ಯಾವ ಪುಸ್ತಕ?** — offer the two, then ask which. Until this word there was no way to ask anybody to pick.

The word, taken apart — its roots and family

ಯಾವ (*yāva*) is native Dravidian, built on the question base *yā-*.
DEDR 5151 lists *yāva* itself, "what, which".

Grammar Lens: the ya- family, and what each member asks

Look at what the last three lessons share. **ಯಾರು**, **ಯಾಕೆ**, **ಯಾವಾಗ**, **ಯಾವ** — a whole family beginning **ಯಾ-**, and each one asks about a different thing: a person, a reason, a time, a choice.
The pointing words came in a set of three beginnings, **ಇ-** for near, **ಅ-** for far, **ಎ-** for the question. **ಯಾ-** is the same idea in its other shape, and Kannada uses the two interchangeably at the front of a question word: **ಏಕೆ** and **ಯಾಕೆ** are one word with two faces.

What you've built

The question set, closed. Who, what, where, why, when, which — and an ending that turns any statement into a yes-or-no question besides.

Your turn

- *Say it: yāva*
- *Say it: yāva pustaka?*
- *Say it: yāru*, *yāke*, *yāvāga*, *yāva* — the whole family
- *Recall:* say *athavā*, then offer a choice and ask which
- *Recall:* the whole chapter — *innondu*, *innondu sala hēḷi*, *yāvāga*, ಮ, and this one
- *Recall:* say *ādare* once more
- *Recall:* say *nānū* once more
- *Recall:* say *ēkendare* once more
- *Recall:* say *adu nija anta yōcisuttēne* once more
- *Recall:* from much earlier — say *dāri*, *haḷḷi*, *bare*, *arthamāḍiko*, and say what each one means

Before you move on

What does ಯಾವ ask? (“Which?”) Where does it sit — before or after the noun? (Before.)

Chapter 72

When It Happens, and What You Want

Modes: **voice** (4) **pen** (1) **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can say when something happens, say what I want, and answer a choice with a preference.
>
> *Complete KA-C72-prefer and answer an offered choice with what you like and what you do not.*

72.1 ಬಂದಾಗ (bandāga) — when somebody comes

> Before the new one: which question word goes in front of a noun, and which one asks about a time?

You'll want to know: ಬಂದಾಗ

ಬಂದಾಗ (*bandāga*) — "when (somebody) comes", "on coming".

ಯಾವಾಗ asks about a time. This is how you answer with a whole event instead of a clock: **ನೀವು ಬಂದಾಗ** (*nīvu bandāga*) — "when you come".

It is **ಬಾ** / **ಬರು** ("come") in its past shape **ಬಂದ**-, with **-ಆಗ** (*-āga*) on the end — and that ending is the same **ಆಗ** that sits inside **ಯಾವಾಗ**. "When?" and "when it happens" are built from one piece.

The word, taken apart — its roots and family

ಬಂದಾಗ (*bandāga*) is native Dravidian: *banda*, "who has come", from *baru*, "to come" (DEDR 5270), and *āga*, "time, then" (DEDR 1). It is

"at the time of coming".

Grammar Lens: the when-clause comes first, and rides on the verb

Kannada's when-clause comes FIRST, and the main clause follows it. There is no word for *when* standing between them; the ending on the verb is the join.
ನೀವು ಬಂದಾಗ ಹೇಳಿ (*nīvu bandāga hēḷi*) — "tell me when you come." This is the same habit as the ಹೋಗಿ of the everyday goodbye: Kannada hangs the first event on the verb's own ending and saves the finished verb for last. You have had that machinery since the farewell chapter; ಆಗ is a second ending using the same slot, and the difference is only what it means — ಹೋಗಿ says *having done it*, ಬಂದಾಗ says *at the time of doing it*.

What you've built

Two events in one sentence, and one of them says when.

Your turn

- *Say it: bandāga*
- *Say it: nīvu bandāga hēḷi*
- *Say it: yāvāga?* — then answer with an event instead of a time
- *Recall:* say *hōgi baruttēne*, and say which part is the participle
- *Recall:* say ಅ once more
- *Recall:* say *innondu* once more
- *Recall:* from much earlier — say *cāpe*, *nōḍu*, *tinnu*, *iru*, and say what each one means
- *Recall:* say *hēḷu*
- *Read it:* ಅಂತ

Before you move on

Which ending makes a when-clause? (**-ಆಗ**.) Does the clause come before or after the main one? (Before.)

72.2 ನನಗೆ ಚಹಾ ಬೇಕು (nanage cahā bēku) — I want tea

Before the new one: which ending makes a when-clause, and where does that clause sit?

You'll want to know: ನನಗೆ ಚಹಾ ಬೇಕು

ನನಗೆ ಚಹಾ ಬೇಕು (*nanage cahā bēku*) — "I want tea."

Literally: "to me tea is wanted." Wanting happens **to** you in Kannada, exactly as knowing does, so this is the dative sentence you already build with **ಗೊತ್ತು**, with one word swapped.

This book gave you the refusal first. **ಬೇಡ** (*bēḍa*, "no thank you") has been your answer to an offer for a while, and it is the negative half of a pair whose positive half you did not have. The word doing the wanting here is that missing half.

On its own it answers an offer: somebody holds up the pot, you say the wanting word or you say **ಬೇಡ**, and that is the whole exchange.

The word, taken apart — its roots and family

ನನಗೆ ಚಹಾ ಬೇಕು (*nanage cahā bēku*) is *nanage*, "to me" (DEDR 5160), *cahā*, "tea", and *bēku*, "it is wanted" (DEDR 5528, with Tamil *vēṇṭu*). *Bēku* and *nanage* are native; *cahā* came through Hindustani *chā*, which goes back to Chinese *chá*.

Grammar Lens: the pair, and the missing half

ಬೇಕು and **ಬೇಡ** are a matched pair, and neither of them names who is doing the wanting unless you put the dative in front. That is why a single word is a complete answer.

They are also inherited Dravidian rather than borrowed, and they answer Tamil *vēṇṭum* and *vēṇṭām* — which is worth noticing because the frame **ಇಷ್ಟ** sits in was built for them first, and the Sanskrit word

simply moved into the house.

What you've built

Ask for something, and accept or refuse what is offered.

Your turn

- *Say it:* *bēku*, then *bēḍa*
- *Say it:* *nanage cahā bēku*
- *Say it:* somebody offers you something — accept it, then refuse it
- *Recall:* say *bandāga*, then put it in a sentence
- *Recall:* say *alla* once more
- *Recall:* say *innondu sala hēḷi* once more
- *Recall:* from much earlier — say *buṭṭi*, *havāmāna*, *caitra vaiśākha jyēṣṭha āṣāḍha śrāvaṇa bhādrapada āśvayuja kārtīka mārgaśira puṣya māgha phālguṇa*, *vasanta ṛtu bēsige maḷegāla caḷigāla*, and say what each one means

Before you move on

What does ಬೇಕು mean? ("wanted".) What is its negative twin? (*bēḍa.*)

72.3 ಜ — one character, met inside words you already say

Before the new one: ವ — what sound does it carry?

One character this time. It is in the words for a fever, a seed and a shoulder, and you have been reading past it for a long time.

Script you'll notice: ಜ

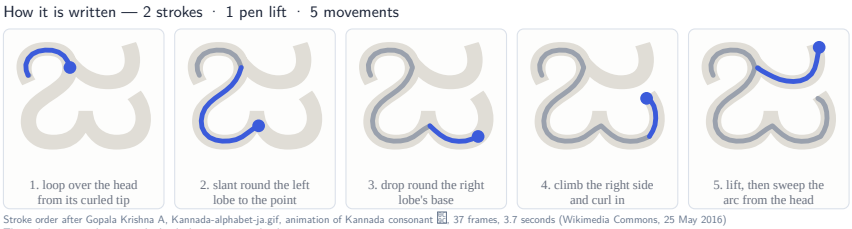

ಜ — *ja*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *j*, it is **ja**. Almost every Kannada word carrying it is a Sanskrit loan, which is a useful thing to notice: meeting **ಜ** is a small clue about where a word came from.

You already say these, and every one of them has **ಜ** somewhere inside it:

- **ಜ್ವರ** *jvara* — a fever
- **ಬೀಜ** *bīja* — a seed
- **ಭುಜ** *bhuja* — the shoulder
- **ಅಜ್ಜ** *ajja* — grandfather, and this one is native

Writing: ಜ

How **ಜ** *is written, stroke by stroke*

- **1.** start at the curled tip inside the head and loop up over it clockwise
- **2.** without lifting, slant down to the left and round the left lobe, rising into the middle point
- **3.** without lifting, drop from the point round the right lobe's base
- **4.** without lifting, climb the right side and curl in to its tip
- **5.** lift, then sweep the upper arc from the head out to its upturned tip

Pen lifts: 1. The body is one run, drawn as ಬ's is, from the curled tip inside the head to the inward curl of the right side; the arc across the top comes after the only lift, starting again at the head.

Your turn

- *Look:* at these words, and find ಜ in the ones that have it

  ಜ್ವರ · ಬೀಜ · ಅಜ್ಜ

- *Trace it:* ಜ three times, saying *ja* as you finish each one
- *Look:* back at any page of this chapter and find ಜ once more

Before you move on

Which character is this — ಜ? What sound does it carry? (***ja.***)
Name one word you already say that contains it.

72.4 ನಿಮಗೆ ಕಾಫಿ ಇಷ್ಟವಾ (nimage kāphi iṣṭavā) — do you like coffee?

> Before the new one: which character did you trace last, and how do you say you want something?

You'll want to know: ನಿಮಗೆ ಕಾಫಿ ಇಷ್ಟವಾ

ನಿಮಗೆ ಕಾಫಿ ಇಷ್ಟವಾ? (*nimage kāphi iṣṭavā?*) — "do you like coffee?"

Everything in it is already yours. ನನಗೆ ಕನ್ನಡ ಇಷ್ಟ was the sentence with no verb in it — the liker in the dative, the thing liked plain, and nothing joining them. Turn it around and two things change:

ನನಗೆ ("to me") becomes ನಿಮಗೆ ("to you") — the same **-ಗೆ** you have been putting on nouns, now on the polite ನೀವು. And ಇಷ್ಟ takes the question ending: ಇಷ್ಟ + -ಆ, with a ವ slipped in to keep the two vowels apart, gives ಇಷ್ಟವಾ.

That little ವ is not a rule to learn. Kannada dislikes two vowels meeting and puts a ವ or a ಯ between them; you have heard it all along without noticing.

The word, taken apart — its roots and family

ನಿಮಗೆ ಕಾಫಿ ಇಷ್ಟವಾ (*nimage kāphi iṣṭavā*) is *nimage*, "to you" (DEDR 3688), *kāphi*, "coffee", a loan from English *coffee*, and *iṣṭa*, "liked", from Sanskrit *iṣṭa*, "sought, beloved" (CDIAL 1597), with the question ending *-ā*.

What you've built

A question about somebody else, instead of a statement about yourself. That is the turn a conversation needs.

Your turn

- *Say it: nanage kāphi iṣṭa*
- *Say it: nimage kāphi iṣṭavā?*
- *Say it:* ask about something else you both know the word for
- *Recall:* say *bēku*, then *bēḍa*
- *Recall:* say *hālū illa, nīrū illa* once more
- *Recall:* say *gottilla* once more
- *Recall:* say *yāvāga* once more
- *Recall:* say ವ once more
- *Recall:* from much earlier — say *pātre*, *cāku*, *tale kai*, *kappu biḷi kempu nīli*, and say what each one means

Before you move on

Which word changed to move the sentence from you to them? (*nanage* to *nimage*.) Which ending made it a question? (**-ಆ**.)

72.5 ನನಗೆ ಚಹಾ ಇಷ್ಟ, ಕಾಫಿ ಅಲ್ಲ (nanage cahā iṣṭa, kāphi alla) — I prefer tea, not coffee

Before the new one: ask somebody whether they like coffee.

You'll want to know: ನನಗೆ ಚಹಾ ಇಷ್ಟ, ಕಾಫಿ ಅಲ್ಲ

ನನಗೆ ಚಹಾ ಇಷ್ಟ, ಕಾಫಿ ಅಲ್ಲ (*nanage cahā iṣṭa, kāphi alla*) — "I like tea, not coffee."

Somebody offers you the choice with **ಅಥವಾ**; this is the answer. Kannada has no single word for *prefer*. What it does is say what you like and then deny the alternative — the liking sentence you already own, with **ಅಲ್ಲ** on the end of the one you are turning down.

That is a real economy rather than a gap: **ಅಲ್ಲ** denies a description, and "coffee" is exactly a description here of what you like. The two halves of the sentence are doing the two things this chapter and the last one taught.

ಚಹಾ ಅಥವಾ ಕಾಫಿ? — **ನನಗೆ ಚಹಾ ಇಷ್ಟ, ಕಾಫಿ ಅಲ್ಲ.** Question and answer, both of them built out of pieces you were given one at a time.

The word, taken apart — its roots and family

ನನಗೆ ಚಹಾ ಇಷ್ಟ, ಕಾಫಿ ಅಲ್ಲ (*nanage cahā iṣṭa, kāphi alla*) sets two loans against each other: *cahā*, through Hindustani, and *kāphi*, from English *coffee*. *Iṣṭa*, "liked", is Sanskrit *iṣṭa*, "sought, beloved" (CDIAL 1597); *nanage*, "to me" (DEDR 5160), and *alla*, "is not" (DEDR 234), are native.

What you've built

A choice offered, a choice answered. That exchange needs a word for "or", a word for "like" and a word for "is not", and all three are now yours.

Your turn

- *Say it: cahā athavā kāphi?*
- *Say it: nanage cahā iṣṭa, kāphi alla*
- *Say it:* swap them round and answer the other way
- *Recall:* say *yāva*, then ask which of two things somebody wants

- *Recall:* the whole chapter — *bandāga*, *nanage cahā bēku*, ಜ, *nimage kāphi iṣṭavā*, and this one
- *Recall:* say *nanagū gottilla* once more
- *Recall:* say *yāva* once more
- *Recall:* from much earlier — say *peṭṭige*, *sōmavāra maṅgaḷavāra budhavāra guruvāra śukravāra śanivāra bhānuvāra*, *ombattu*, *ēḷu*, and say what each one means

Before you move on

How does Kannada say you prefer one thing to another? (Say what you like, then deny the other with *alla*.)

Chapter 73

In Order To, and Being Able

Modes: 🚗 **voice** (4) ✓ **pen** (1) 🚗 **Hands-free start:** the first 2 of 5 lessons.

> ***By the end of this chapter:*** I can say why I am doing something, say what I can do, and say a instead of the.
>
> *Complete KA-C73-a-flower and say all four dative-frame sentences in a row.*

73.1 ತುಂಬಾ (tumbā) — very

Before the new one: say which of two drinks you prefer.

You'll want to know: ತುಂಬಾ

ತುಂಬಾ (*tumbā*) — "very, a lot".

You have had **ಹೆಚ್ಚು** (*heccu*, "more") and **ಸ್ವಲ್ಪ** (*svalpa*, "a little") since the short-replies chapter, but only as answers to an offer — more rice, a little sugar. Neither of them can go in front of an adjective. **ತುಂಬಾ** can, and that is the job it is here for.

ತುಂಬಾ ದೊಡ್ಡ (*tumbā doḍḍa*) — "very big." It stands in front of the adjective, and the adjective still stands in front of the noun, unchanged, the way every Kannada adjective does.

It also works on its own as an answer, meaning "a lot", and it is the everyday way to say thank you warmly: **ತುಂಬಾ ಧನ್ಯವಾದ**.

The word, taken apart — its roots and family

ತುಂಬಾ (*tumbā*) is native Dravidian, usually explained as a form of *tumbu*, "to become full", which DEDR 3331 lists, along with Irula *thumba*, "much". "Fully" became "very". DEDR does not list *tumbā* itself.

What you've built

Every adjective in this book, turned up. Six adjectives times one intensifier is twelve things you can now say about a thing.

Your turn

- *Say it: tumbā*
- *Say it: tumbā doḍḍa*
- *Say it:* put *tumbā* in front of every adjective you remember
- *Recall:* say *svalpa*, then *heccu*, then *tumbā*, and say which one goes with an adjective
- *Recall:* say ು once more
- *Recall:* say *bandāga* once more
- *Recall:* from much earlier — say *kuttige*, *āru*, *aidu*, *nālku*, and say what each one means
- *Recall:* say *ēkendare*
- *Read it:* ಇನ್ನೊಂದು

Before you move on

What does ತುಂಬಾ mean? ("very".) Where does it go — before or after the adjective? (Before.)

73.2 ಓದಲು (ōdalu) — in order to read

Before the new one: what does *tumbā* do to an adjective?

You'll want to know: ಓದಲು

ಓದಲು (*ōdalu*) — "to read", in the sense of "in order to read".

It is **ಓದು** ("to read") with **-ಅಲು** (*-alu*) in place of its ending. That is the whole change, and it turns a verb into a purpose.

ಪುಸ್ತಕ ಓದಲು ಹೋಗುತ್ತೇನೆ (*pustaka ōdalu hōguttēne*) — "I am going to read a book", meaning I am going in order to read one.

The word, taken apart — its roots and family

ಓದಲು (*ōdalu*) is native Dravidian: *ōdu*, "to read, recite" (DEDR 1052, with Tamil *ōtu*), with *-alu*, the ending that means "to, in order to".

Grammar Lens: three endings, three ways to join two actions

The purpose comes before the verb it serves, like the when-clause did. Kannada builds a sentence by stacking what leads up to the action in front of it and putting the finished verb last, every time.

So you have now met three ways to hang one verb off another, and all three are endings rather than words: **-ಇ** for "having done it", **-ಆಗ** for "at the time of doing it", and **-ಅಲು** for "in order to do it". English needs *and*, *when* and *to* for those three; Kannada needs three shapes of one verb.

What you've built

A reason to do something, said as part of the same sentence.

Your turn

- *Say it:* *ōdu*, then *ōdalu*
- *Say it:* *pustaka ōdalu hōguttēne*
- *Say it:* take another verb you know and put *-alu* on it
- *Recall:* say *bandāga*, and say what its ending means
- *Recall:* say *gottā* once more
- *Recall:* say *nanage cahā bēku* once more
- *Recall:* from much earlier — say *bennu*, and say what each one means
- *Read it:* **ಯಾವಾಗ**

- *Recall:* say *yāva*
- *Read it:* ಬಂದಾಗ

Before you move on

Which ending means "in order to"? (**-ಅಲು**.) Does the purpose come before or after the main verb? (Before.)

73.3 ಟ — one character, met inside words you already say

Before the new one: ಜ — and what does meeting it usually tell you about where a word came from?

One character this time — the last new one in this book so far, and one you have read inside a dozen everyday words.

Script you'll notice: ಟ

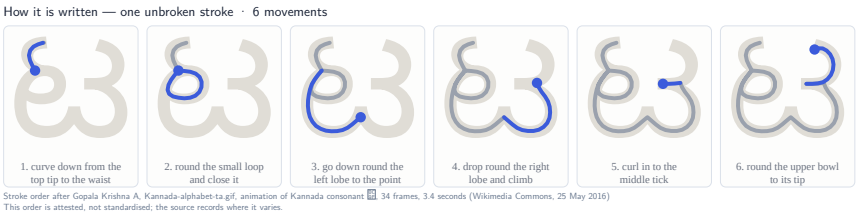

ಟ — *ṭa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *t*, it is **ṭa** — the one made with the tongue curled back, which is a different letter from the **ತ** you already trace and a different sound to a Kannada ear.

You already say these, and every one of them has **ಟ** somewhere inside it:

- ಬಟ್ಟೆ *baṭṭe* — cloth
- ಬೆಟ್ಟ *beṭṭa* — a hill
- ಹೊಟ್ಟೆ *hoṭṭe* — the stomach
- ಊಟ *ūṭa* — a meal

Writing: ಟ

How ಟ *is written, stroke by stroke*

- **1.** start at the tip of the top curl and curve round to the left and down into the waist
- **2.** without lifting, go round the small loop counterclockwise and close it at the waist
- **3.** without lifting, go down the left side and round the left lobe, rising into the middle point
- **4.** without lifting, drop round the right lobe and climb the right side
- **5.** without lifting, curl in to the short tick in the middle
- **6.** without lifting, come back and round the upper bowl to its tip

Pen lifts: 0. The whole letter is one run, from the curl at the top through the small loop and both lobes to the tip of the upper bowl. Like ಲ, ಟ has no curled bar on top.

Your turn

- *Look:* at these words, and find ಟ in the ones that have it

  ಬಟ್ಟೆ · ಬೆಟ್ಟ · ಊಟ

- *Trace it:* ಟ three times, saying *ṭa* as you finish each one
- *Look:* back at any page of this chapter and find ಟ once more

Before you move on

Which character is this — ಟ? What sound does it carry? (***ṭa.***)
Name one word you already say that contains it.

73.4 ನನಗೆ ಕನ್ನಡ ಬರುತ್ತದೆ (nanage kannaḍa baruttade) — I can speak Kannada

Before the new one: which character did you trace last, and what does *ōdalu* mean?

You'll want to know: ನನಗೆ ಕನ್ನಡ ಬರುತ್ತದೆ

ನನಗೆ ಕನ್ನಡ ಬರುತ್ತದೆ (*nanage kannaḍa baruttade*) — "I can speak Kannada."

The verb in it is **ಬರು**, "to come". Read literally the sentence says "to me, Kannada comes" — and that is exactly how Kannada says somebody can do something. A skill is not held; it arrives.

You already say **ನಾನು ಕನ್ನಡ ಮಾತನಾಡುತ್ತೇನೆ** ("I speak Kannada"). That reports what you do. This one reports what you can do, and it is the sentence a stranger asks you for.

The word, taken apart — its roots and family

ನನಗೆ ಕನ್ನಡ ಬರುತ್ತದೆ (*nanage kannaḍa baruttade*) is native Dravidian throughout: *nanage*, "to me" (DEDR 5160), *kannaḍa* (DEDR 1284), and *baruttade*, "it comes", from *baru*, "to come" (DEDR 5270). A language you can speak is one that "comes to you".

Grammar Lens: the fourth thing the dative frame carries

Notice which frame it uses. **ನನಗೆ … ಬರುತ್ತದೆ** is the dative sentence again, the third thing you have poured into it: **ನನಗೆ ಗೊತ್ತು** for knowing, **ನನಗೆ … ಇಷ್ಟ** for liking, **ನನಗೆ … ಬೇಕು** for wanting, and now **ನನಗೆ … ಬರುತ್ತದೆ** for being able.

Four of the sentences a beginner needs most are one shape with one word swapped, and none of them has a subject in the English sense. Kannada puts the person in the dative and lets the thing be the

subject, because knowing, liking, wanting and being able are all things that happen to you.

What you've built

Say what you can do — and notice you have been building it all along.

Your turn

- *Say it: nanage kannaḍa baruttade*
- *Say it: nanage kannaḍa gottu*, then *nanage kannaḍa baruttade*, and say how they differ
- *Say it:* all four dative sentences in a row
- *Recall:* say *ōdalu*, then use it in a sentence
- *Recall:* say *alvā* once more
- *Recall:* say *yāke* once more
- *Recall:* say ಜ once more
- *Recall:* say *nimage kāphi iṣṭavā* once more
- *Recall:* from much earlier — say *bhuja*, *tuṭi*, and say what each one means

Before you move on

Which verb does Kannada use for being able? (*baru*, "to come".) Say that you can speak Kannada.

73.5 ಒಂದು ಹೂವು (ondu hūvu) — a flower

Before the new one: say that you can speak Kannada, and name the frame it uses.

You'll want to know: ಒಂದು ಹೂವು

ಒಂದು ಹೂವು (*ondu hūvu*) — "a flower".

ಒಂದು has been the number one since the counting chapter. Put it in front of a noun when you are not counting anything and it stops being a number: it becomes the English *a*.

Kannada has no article at all, and a bare **ಹೂವು** is perfectly good on its own — it can mean "the flower", "a flower" or "flowers", and which one it is comes from the situation. What **ಒಂದು** adds is *one particular one, not any special one*: you put it in when you would say *a* in English and want the difference heard.

You have already used the same word for the opposite job in **ಇನ್ನೊಂದು**, "one more" — the counting sense still alive inside it.

The word, taken apart — its roots and family

ಒಂದು ಹೂವು (*ondu hūvu*) is native Dravidian: *ondu*, "one" (DEDR 990), and *hūvu*, "flower" (DEDR 4345). DEDR 4345 compares, with a query, Sanskrit *puṣpa*.

What you've built

The last piece: a way to say *a*. Between this and the pointing words you have had for a while, you can now say "this flower", "that flower" and "a flower", which is the whole of what an article does.

Your turn

- *Say it:* *ondu hūvu*
- *Say it:* *hūvu*, then *ondu hūvu*, then *innondu hūvu*
- *Say it:* put *ondu* in front of three nouns you know
- *Recall:* say *tumbā doḍḍa*, then *ōdalu*, then *nanage kannaḍa baruttade*
- *Recall:* the whole chapter — *tumbā*, *ōdalu*, **ಟ**, *nanage kannaḍa baruttade*, and this one
- *Recall:* say **ಲ** once more
- *Recall:* say *nanage cahā iṣṭa, kāphi alla* once more
- *Recall:* from much earlier — say *mūḷe*, and say what each one means

Before you move on

What does **ಒಂದು** do in front of a noun you are not counting? (It works like the English *a*.) Does Kannada have an article? (No.)

Chapter 74

Which One in the Line

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say first to fifth in Kannada, and make an ordinal from any number by dropping its final vowel and adding -aneya.
>
> *The five said in order, with only modalaneya learned as a word and the other four built by the ending.*

74.1 ಎರಡನೆಯ (eraḍaneya) — second, and why it comes before "first"

A new set of number words starts here, so the recalls come first, at the four growing distances this book measures.

- *Recall:* say *ondu hūvu*, and say what the *ondu* is doing there — **R1**, one lesson back, before it decays
- *Recall:* say *tumbā* — **R2**, the first real retrieval, five lessons back
- *Recall:* say *hēḷu* — **R3**, durable, twenty lessons back
- *Recall:* say *svalpa* — **R4**, recognition at distance, eighty lessons back

You'll want to know: ಎರಡನೆಯ

ಎರಡನೆಯ (*eraḍaneya*) — "**second**".

ಒಂದು, ಎರಡು, ಮೂರು answer **how many**. This word answers **which one in the line**, and Kannada keeps a second set of words for that job.

It goes straight in front of what it counts, and nothing on the noun changes: **ಎರಡನೆಯ ದಿನ** (*eraḍaneya dina*), the second day; **ಎರಡನೆಯ ಬಾಗಿಲು** (*eraḍaneya bāgilu*), the second door.

The word, taken apart — its roots and family

ಎರಡನೆಯ (*eraḍaneya*) is built from *eraḍu*, "two", native Dravidian (DEDR 474, with Tamil *iraṇṭu*), and the ordinal ending *-aneya*.

Grammar Lens: the ending, and why the chapter opens on two

Put the word beside the number it comes from:

cardinal	**ordinal**
ಎರಡು (*eraḍu*)	**ಎರಡನೆಯ** (*eraḍaneya*)

The final **-ು** goes, and **-ಅನೆಯ** (*-aneya*) goes on. That is the rule, and in Kannada it has no exceptions at all — every number you know already takes it.

So the chapter does not open on **one**. It opens on **two**, because *eraḍu* is the first number that shows the ending working, and because the one word that will surprise you is *first* — which is not built on **ಒಂದು** at all. An exception is only worth looking at once you can see what it is an exception to.

Your turn

Say these aloud:

- *eraḍu*, then *eraḍaneya*
- *eraḍaneya dina* — the second day
- *eraḍu* is how many, *eraḍaneya* is which one

Before you move on

What does **ಎರಡನೆಯ** mean? (**Second** — which one in the line.)
What did you do to **ಎರಡು** to get it? (Dropped the final **-ು**, added **-ಅನೆಯ**.)

74.2 ಮೂರನೆಯ (mūraneya) — third

- *Recall:* say *eraḍaneya*, and say what you did to *eraḍu* to build it — **R1**
- *Recall:* say *ōdalu*, and say what its ending means — **R2**
- *Recall:* say *anta*, and say what job it does in a sentence — **R3**
- *Recall:* say *heccu* — **R4**

You'll want to know: ಮೂರನೆಯ

ಮೂರನೆಯ (*mūraneya*) — "**third**".

You have already met the machine that made it. **ಮೂರು** loses its final **-ು** and takes **-ಅನೆಯ**:

cardinal	ordinal
ಎರಡು (*eraḍu*)	**ಎರಡನೆಯ** (*eraḍaneya*)
ಮೂರು (*mūru*)	**ಮೂರನೆಯ** (*mūraneya*)

ಮೂರನೆಯ ದಿನ (*mūraneya dina*), the third day. **ಮೂರನೆಯ ಮರ** (*mūraneya mara*), the third tree.

This is the second word and it needed nothing new. That is what an exceptionless ending buys you: from here on, a number you can say is a position you can say.

The word, taken apart — its roots and family

ಮೂರನೆಯ (*mūraneya*) is built from *mūru*, "three", native Dravidian (DEDR 5052, with Tamil *mūṉṟu*), and the ordinal ending *-aneya*.

Your turn

Say these aloud:

- *mūru*, then *mūraneya*
- *eraḍaneya dina, mūraneya dina*
- *mūraneya bāgilu* — the third door

Before you move on

Say "the third day". (ಮೂರನೆಯ ದಿನ.) How many new pieces did this word need? (**None** — the same ending, on a number you already had.)

74.3 ಮೊದಲನೆಯ (modalaneya) — first, and the one surprise in the set

- *Recall:* say *mūraneya* — **R1**
- *Read it:* ಟ, then say its sound — **R2**
- *Read it:* the sign ೇ, then say what it does to a letter — **R3**
- *Recall:* say *kaḍime* — **R4**

You'll want to know: ಮೊದಲನೆಯ

ಮೊದಲನೆಯ (*modalaneya*) — "**first**".

The ending is the one you already have. What is new is the word underneath it, because there is no **ಒಂದು** anywhere in *modalaneya* — and there was never going to be.

cardinal	ordinal
ಒಂದು (*ondu*)	ಮೊದಲನೆಯ (*modalaneya*)
ಎರಡು (*eraḍu*)	ಎರಡನೆಯ (*eraḍaneya*)
ಮೂರು (*mūru*)	ಮೂರನೆಯ (*mūraneya*)

ಮೊದಲನೆಯ ದಿನ (*modalaneya dina*), the first day. **ಮೊದಲನೆಯ ದಾರಿ** (*modalaneya dāri*), the first road.

The word, taken apart — its roots and family

ಮೊದಲನೆಯ (*modalaneya*) is built from *modalu*, "beginning, the first thing", native Dravidian (DEDR 4950), and the ordinal ending *-aneya*.

Across the family: ಮೊದಲು, "a beginning"

Under it sits **ಮೊದಲು** (*modalu*), "**a beginning**" — so the word means "of the beginning", not "one-th".

language	"one"	"first" is built on
Kannada	*ondu*	ಮೊದಲು *modalu*, a beginning
Tamil	*onṟu*	முதல் *mudal*, a beginning
Telugu	*okaṭi*	మొదలు *modalu*, a beginning

Three sisters, three different words for **one**, and the *same* word for the start of a line. Counting and ordering were never the same idea in this family, and *first* is where the seam shows.
Note what is and is not irregular here. The **ending** is perfectly regular — *modalu* drops its final **-ು** and takes **-ಅನೆಯ** exactly like *eraḍu* did. It is only the **stem** that is a surprise. Kannada asks you to learn one extra word, not one extra rule.

Your turn

Say these aloud:

- *modalu*, then *modalaneya*
- *modalaneya, eraḍaneya, mūraneya*
- *modalaneya dāri* — the first road

Before you move on

What word is **ಮೊದಲನೆಯ** built on? (**ಮೊದಲು**, a beginning — **not ಒಂದು**.) Is the ending irregular too? (**No** — only the stem is.)

74.4 ನಾಲ್ಕನೆಯ (nālkaneya) — fourth

- *Recall:* say *modalaneya*, and say what word it is built on — **R1**
- *Recall:* say *nanage kannaḍa baruttade* — **R2**
- *Recall:* say *ēkendare*, and say what it introduces — **R3**
- *Recall:* say *bēḍa* — **R4**

You'll want to know: ನಾಲ್ಕನೆಯ

ನಾಲ್ಕನೆಯ (*nālkaneya*) — "**fourth**".

ನಾಲ್ಕು was the first word in this book to carry a stacked consonant, the **ಲ್ಕ** riding under the line. The ending does not disturb it: the stack stays exactly where it was and **-ಅನೆಯ** is added after it.

cardinal	**ordinal**
ನಾಲ್ಕು (*nālku*)	**ನಾಲ್ಕನೆಯ** (*nālkaneya*)

ನಾಲ್ಕನೆಯ ಕುರ್ಚಿ (*nālkaneya kurci*), the fourth chair.

The word, taken apart — its roots and family

ನಾಲ್ಕನೆಯ (*nālkaneya*) is built from *nālku*, "four", native Dravidian (DEDR 3655, with Tamil *nālku*), and the ordinal ending *-aneya*.

Your turn

- *Say it: nālku*, then *nālkaneya*
- *Look:* at **ನಾಲ್ಕನೆಯ** and find the **ಲ್ಕ** stack still in place
- *Say it: modalaneya, eraḍaneya, mūraneya, nālkaneya*

Before you move on

Say "the fourth chair". (**ನಾಲ್ಕನೆಯ ಕುರ್ಚಿ**.) Did the stacked consonant change? (**No** — the ending goes on after it.)

74.5 ಐದನೆಯ (aidaneya) — fifth, and the five in a row

- *Recall:* say *nālkaneya* — **R1**
- *Recall:* say *ondu hūvu* — **R2**
- *Recall:* say *adu nija anta yōcisuttēne* — **R3**
- *Recall:* say *aṣṭē* — **R4**

You'll want to know: ಐದನೆಯ

ಐದನೆಯ (*aidaneya*) — "**fifth**". **ಐದು** drops its **-ು**, takes **-ಅನೆಯ**, and the set is complete.

ಐದನೆಯ ದಿನ (*aidaneya dina*), the fifth day.

The word, taken apart — its roots and family

ಐದನೆಯ (*aidaneya*) is built from *aidu*, "five", native Dravidian (DEDR 2826, with Tamil *aintu*), and the ordinal ending *-aneya*.

What you've built

	cardinal	ordinal
1	ಒಂದು *ondu*	ಮೊದಲನೆಯ *modalaneya*
2	ಎರಡು *eraḍu*	ಎರಡನೆಯ *eraḍaneya*
3	ಮೂರು *mūru*	ಮೂರನೆಯ *mūraneya*
4	ನಾಲ್ಕು *nālku*	ನಾಲ್ಕನೆಯ *nālkaneya*
5	ಐದು *aidu*	ಐದನೆಯ *aidaneya*

Count the work. Four of those five were **built**, from numbers you had learned when you learned to count and an ending you learned in one lesson. Exactly **one**, *modalaneya*, was a word to learn — and even it took the regular ending.

English asks you to learn *first, second, third* before the pattern starts; Latin asks for ten separate words. Kannada asks for one, and it is not a number word at all.

Your turn

Say these aloud:

- *modalaneya, eraḍaneya, mūraneya, nālkaneya, aidaneya*
- *aidaneya dina* — the fifth day
- the five cardinals, then the five ordinals, and hear where they differ

Before you move on

Say first to fifth. How many of the five were words you had to learn? (**One** — **ಮೊದಲನೆಯ**.) What made the other four? (The ending **-ಅನೆಯ** on numbers you already had.)

Chapter 75

All the Way Up, and On a Sign

Modes: 🚗 **voice** (8) 🚗 **Hands-free start:** all 8 lessons.

> ***By the end of this chapter:*** I can say sixth to eleventh in Kannada, use the everyday short ending, and read an ordinal written as a digit.
>
> *Read an ordinal written as a Kannada digit with only its ending spelled out, and say the whole word aloud.*

75.1 ಆರನೆಯ (āraneya) — sixth

The line goes on past five, so the chapter opens by retrieving where it stopped.

- *Recall:* say *aidaneya* — **R1**
- *Recall:* say *eraḍaneya*, and say what you did to *eraḍu* to build it — **R2**
- *Recall:* say *innondu*, and say what the *innu-* adds — **R3**
- *Recall:* say *gāḷi* — **R4**

You'll want to know: ಆರನೆಯ

ಆರನೆಯ (*āraneya*) — "**sixth**". **ಆರು** drops its **-ು** and takes **-ಅನೆಯ**, with nothing else to notice.

ಆರನೆಯ ದಿನ (*āraneya dina*), the sixth day.

That "nothing else to notice" is the point of the whole chapter. Six to ten were a separate lesson from one to five when you learned to count; for ordering they are not a separate anything.

The word, taken apart — its roots and family

ಆರನೆಯ (*āraneya*) is built from *āru*, "six", native Dravidian (DEDR 2485, with Tamil *āṟu*), and the ordinal ending *-aneya*.

Your turn

Say these aloud:

- *āru*, then *āraneya*
- *aidaneya, āraneya*
- *āraneya mara* — the sixth tree

Before you move on

Say "the sixth day". (**ಆರನೆಯ ದಿನ**.) Did the ending change above five? (**No**.)

75.2 ಏಳನೆಯ (ēḷaneya) — seventh

- *Recall:* say *āraneya* — **R1**
- *Recall:* say *mūraneya* — **R2**
- *Recall:* say *innondu sala hēḷi* — **R3**
- *Recall:* say *mañju* — **R4**

You'll want to know: ಏಳನೆಯ

ಏಳನೆಯ (*ēḷaneya*) — "**seventh**".

ಏಳು has the retroflex **ಳ**, the letter Kannada shares with Tamil, Telugu and Malayalam and which northern languages lost. Adding the ending does not soften it: **ಏಳನೆಯ**, with the tongue still curled back for the **ḷ**.

ಏಳನೆಯ ದಿನ (*ēḷaneya dina*), the seventh day.

The word, taken apart — its roots and family

ಏಳನೆಯ (*ēḷaneya*) is built from *ēḷu*, "seven", native Dravidian (DEDR 910, with Tamil *ēḻu*), and the ordinal ending *-aneya*.

Your turn

- *Say it:* *ēḷu*, then *ēḷaneya* — keep the ḷ retroflex both times
- *Say it:* *āraneya, ēḷaneya*
- *Look:* at ಏಳನೆಯ and find the ಳ

Before you move on

Say "the seventh day". (ಏಳನೆಯ ದಿನ.) What happens to the ಳ when the ending goes on? (**Nothing**.)

75.3 ಎಂಟನೆಯ (eṇṭaneya) — eighth

- *Recall:* say *ēḷaneya* — **R1**
- *Recall:* say *modalaneya*, and say what word it is built on — **R2**
- *Recall:* say *yāvāga* — **R3**
- *Recall:* say *maraḷu* — **R4**

You'll want to know: ಎಂಟನೆಯ

ಎಂಟನೆಯ (*eṇṭaneya*) — "**eighth**".

ಎಂಟು carries the ಂ anusvara, the dot that takes its sound from whatever follows it — here a retroflex **ಣ**, because **ಟ** is retroflex. The ending is added at the far end of the word, so the dot keeps the same neighbour and the same sound.

ಎಂಟನೆಯ ದಿನ (*eṇṭaneya dina*), the eighth day.

The word, taken apart — its roots and family

ಎಂಟನೆಯ (*eṇṭaneya*) is built from *eṇṭu*, "eight", native Dravidian (DEDR 784, with Tamil *eṭṭu*), and the ordinal ending *-aneya*.

Your turn

- *Say it:* *eṇṭu*, then *eṇṭaneya*
- *Say it:* *ēḷaneya, eṇṭaneya*
- *Look:* at ಎಂಟನೆಯ and find the ಂ still sitting before ಟ

Before you move on

Say "the eighth day". (ಎಂಟನೆಯ ದಿನ.) Why does the ಂ still sound like ṇ? (Because ಟ is still the letter after it.)

75.4 ಒಂಬತ್ತನೆಯ (ombattaneya) — ninth

- *Recall:* say *eṇṭaneya* — **R1**
- *Recall:* say *nālkaneya* — **R2**
- *Read it:* ವ, then say its sound — **R3**
- *Recall:* say *kesaru* — **R4**

You'll want to know: ಒಂಬತ್ತನೆಯ

ಒಂಬತ್ತನೆಯ (*ombattaneya*) — "**ninth**".

ಒಂಬತ್ತು is the longest cardinal in the set: an anusvara, a doubled ತ್ತ, and four syllables. None of that matters to the ending, which does what it did to the two-syllable ಆರು — takes the final -ು off and goes on after everything else.

ಒಂಬತ್ತನೆಯ ದಿನ (*ombattaneya dina*), the ninth day.

The word, taken apart — its roots and family

ಒಂಬತ್ತನೆಯ (*ombattaneya*) is built from *ombattu*, "nine", native Dravidian (DEDR 1025, with Tamil *oṉpatu*), and the ordinal ending *-aneya*.

Your turn

- *Say it: ombattu*, then *ombattaneya*
- *Say it: eṇṭaneya, ombattaneya*
- *Look:* at ಒಂಬತ್ತನೆಯ and find the doubled ತ್ತ untouched

Before you move on

Say "the ninth day". (ಒಂಬತ್ತನೆಯ ದಿನ.) Did the length of the cardinal change what the ending does? (**No**.)

75.5 ಹತ್ತನೆಯ (hattaneya) — tenth

- *Recall:* say *ombattaneya* — **R1**
- *Recall:* say *aidaneya* — **R2**
- *Recall:* say *yāva*, and say how it differs from *yāru* — **R3**
- *Recall:* say *beṅki* — **R4**

You'll want to know: ಹತ್ತನೆಯ

ಹತ್ತನೆಯ (*hattaneya*) — "**tenth**".

ಹತ್ತು is the word that showed you the **p** → **h** law: Tamil kept *pattu*, Kannada softened the p to h. The ordinal keeps whatever the cardinal became — the ending has no opinion about the history of the word it lands on.

ಹತ್ತನೆಯ ದಿನ (*hattaneya dina*), the tenth day.

The word, taken apart — its roots and family

ಹತ್ತನೆಯ (*hattaneya*) is built from *hattu*, "ten", native Dravidian (DEDR 3918, with Tamil *pattu*), and the ordinal ending *-aneya*.

Your turn

Say these aloud:

- *hattu*, then *hattaneya*
- *ombattaneya, hattaneya*
- all ten in order, from *modalaneya*

Before you move on

Say "the tenth day". (**ಹತ್ತನೆಯ ದಿನ**.) Which sound law made *pattu* into *hattu*? (**p** → **h**.)

75.6 ಹನ್ನೊಂದನೆಯ (hannondaneya) — eleventh, and the edge that is not there

- *Recall:* say *hattaneya* — **R1**

- *Recall:* say *āraneya* — **R2**
- *Recall:* say *bandāga*, and say what its ending means — **R3**
- *Recall:* say *hasu* — **R4**

You'll want to know: ಹನ್ನೊಂದನೆಯ

ಹನ್ನೊಂದನೆಯ (*hannondaneya*) — "**eleventh**".

ಹನ್ನೊಂದು was itself a built word: the ten-echo *hann-* with *ondu* welded on. Now the ordinal ending goes on top of that, and the result is a word made of three parts, none of which had to be learned as a whole.

ಹನ್ನೊಂದನೆಯ ದಿನ (*hannondaneya dina*), the eleventh day.

The word, taken apart — its roots and family

ಹನ್ನೊಂದನೆಯ (*hannondaneya*) is built from *hannondu*, "eleven", and the ordinal ending *-aneya*. *Hannondu* is native: DEDR 3918 lists *pann-*, "ten", as the form used in eleven and twelve, and *ondu*, "one", is in DEDR 990.

Grammar Lens: the ending is a fact about numbers, not about ten

Most books stop an ordinal chapter at *tenth*, and a learner reasonably concludes that the ten words were the set. In Kannada there is no set. **-ಅನೆಯ** attaches to a number, and every number you learn from here on arrives with its ordinal already made: **ಇಪ್ಪತ್ತು** gives **ಇಪ್ಪತ್ತನೆಯ** (*ippattaneya*), twentieth, without a lesson.

That is why this book taught the ending in the second lesson of the previous chapter rather than after ten examples. The examples were never the content.

Your turn

Say these aloud:

- *hannondu*, then *hannondaneya*
- *hattaneya, hannondaneya*
- take *ippattu* and make its ordinal yourself

Before you move on

Say "the eleventh day". (**ಹನ್ನೊಂದನೆಯ ದಿನ**.) Do you need a lesson for *twentieth*? (**No** — the ending goes on any number.)

75.7 ಮೊದಲನೇ (modalanē) — the short form you will actually hear

- *Recall:* say *hannondaneya*, and say why *ippattaneya* needs no lesson — **R1**
- *Recall:* say *ēḷaneya* — **R2**
- *Recall:* say *nanage cahā bēku* — **R3**
- *Recall:* say *mēke* — **R4**

You'll want to know: ಮೊದಲನೇ

ಮೊದಲನೇ (*modalanē*) — "**first**", again.

In speech the ending **-ಅನೆಯ** is usually shortened to **-ಅನೇ**. The **ಯ** goes, the ೆ lengthens to ೇ, and that is all:

careful	**everyday**
ಮೊದಲನೆಯ *modalaneya*	**ಮೊದಲನೇ** *modalanē*
ಎರಡನೆಯ *eraḍaneya*	**ಎರಡನೇ** *eraḍanē*
ಮೂರನೆಯ *mūraneya*	**ಮೂರನೇ** *mūranē*

Both are worth having, and for different reasons: you need to recognise the long one on a printed page, and you need to produce the short one at a door.

The word, taken apart — its roots and family

ಮೊದಲನೇ (*modalanē*) is built from *modalu*, "beginning, the first thing", native Dravidian (DEDR 4950), with *-anē*, the everyday short form of the ordinal ending *-aneya*.

Your turn

Say these aloud:

- *modalaneya*, then *modalanē*

- *eraḍanē, mūranē*
- *modalanē dāri* — the first road

Before you move on

What is the everyday short form of **-ಅನೆಯ**? (**-ಅನೇ**.) Say "the third road" the way a neighbour would. (**ಮೂರನೇ ದಾರಿ**.)

75.8 ೧ನೇ — the ordinal on a street sign

- *Recall:* say *modalanē* — **R1**
- *Recall:* say *eṇṭaneya* — **R2**
- *Read it:* ಜ, then say its sound — **R3**
- *Recall:* say *kōḷi* — **R4**

Grammar Lens: the digit does the counting for you

Written Kannada rarely spells an ordinal out. It writes the **digit** and hangs only the ending on it:

written	read aloud	means
೧ನೇ	*modalanē*	1st
೩ನೇ	*mūranē*	3rd

You already read ೧ and ೩; those were script lessons back in chapters 9 and 11. What is new is only that **ನೇ** may follow a digit, and — this is the part that catches a reader out — that you say the **whole** word aloud even though only its tail is written. ೧ನೇ is not read "one-nē". It is read *modalanē*, a word with no **ಒಂದು** in it, off a sign that shows the digit for one.

What you've built

The Kannada digits were taught one at a time across chapters 9 to 18 and, until now, there was nothing in this book to read them in. This is what they were for: a street sign, a floor number, a bus route and a date are all written this way.

Your turn

- *Look:* at ೧ನೇ and say it aloud in full
- *Look:* at ೩ನೇ and say it aloud in full
- *Say it:* ೧ನೇ ದಾರಿ — the first road, as a sign would write it

Before you move on

Read it: ೧ನೇ aloud
It is *Modalanē* — not "one-nē". What is written on the sign, the whole word or its tail? (**Its tail**, after the digit.)

Chapter 76

Reading — Words, Lines, and a First Passage

Modes: **eyes** (3) **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can read a Kannada word cold, tell a naming sentence from a locating one, and hold a whole passage about one place without translating it word by word.
>
> *Thirty-one words standing in one spot and pointing, where* ಇಲ್ಲಿ *and* ಇಲ್ಲ *sit one letter apart and do opposite work.*

76.1 (reading) — six words, and a script shaped by a leaf

Every word below you have written. Not one is new.

What is new is that nobody says them first.

Read this

ಬಾಗಿಲು ಕುರ್ಚಿ ನದಿ ಮರ ಗಾಳಿ ಹೂವು

Read it: down the list once, without stopping
Read it: the list again, and notice how few straight lines there are

What to know first

Almost none. Kannada rounds nearly every letter, and the reason is the material: the script was cut into palm leaf for a thousand years, and a straight stroke splits a leaf along its grain.

So the curves are not decoration. They are what a scribe had to do to keep the page from tearing, kept long after the page became paper.

A reader gains from it too. Rounded shapes are easier to tell apart at a glance than straight ones, which is most of what reading a word cold is.

Your turn

- *Say it:* the six words down the list, once, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
Why is Kannada round? (**Palm leaf** — a straight cut splits it.)

76.2 (reading) — six lines, two verbs

The last lesson gave you words. These put them somewhere.

Nothing here is new.

Read this

ಇದು ಬಾಗಿಲು. ಇದು ಕುರ್ಚಿ. ಕುರ್ಚಿ ಇಲ್ಲಿ ಇದೆ. ಮರ ಅಲ್ಲಿ ಇದೆ. ನಿಜ. ಈಗ.

Read it: the six lines down once, without stopping
Read it: the six lines again, and count how many different verbs there are

What to know first

One, and two of the lines have none at all.

ಇದು ಬಾಗಿಲು puts two words side by side and is finished: *this door* means *this is a door*. Kannada does not say *is* when it is only naming something.

But **ಇದೆ** appears the moment you say where a thing is. Naming needs no verb; locating does. That is the distinction these six lines are for, and it is visible on the page before anyone names it.

Your turn

- *Say it:* the six lines, once, in order, without stopping

Twice through:

Before you move on

What joins ಇದು and ಬಾಗಿಲು? (**Nothing.**)
When does Kannada need ಇದೆ? (**When it says where.**)

76.3 (reading) — the first passage

Six words, then six lines. Now eleven of them together.

Thirty-one words, and not one of them is new.

Read this

ಇದು ಬಾಗಿಲು. ಇದು ಕುರ್ಚಿ. ಕುರ್ಚಿ ಇಲ್ಲಿ ಇದೆ. ಚಾಕು ಮತ್ತು ಪಾತ್ರೆ
ಇಲ್ಲಿ ಇದೆ. ಮರ ಅಲ್ಲಿ ಇದೆ. ಬೇರು ದೊಡ್ಡ. ನದಿ ಅಲ್ಲಿ ಇದೆ. ಹಸು
ಅಥವಾ ಮೇಕೆ. ಗಾಳಿ ಈಗ ಹೆಚ್ಚು. ಹೂವು ಇಲ್ಲಿ ಇಲ್ಲ. ಇದು ನಿಜ.

Read it: the passage once without stopping; do not translate as you go — let the sentences arrive
Read it: the passage again, and watch ಇಲ್ಲಿ and ಅಲ್ಲಿ take turns

What to know first

The passage stands in one spot and points. Everything near is ಇಲ್ಲಿ, everything far is ಅಲ್ಲಿ, and the last line before the ending is the only one that says a thing is *not* here.

ಇಲ್ಲಿ ಇಲ್ಲ — here, not. Two words one letter apart doing opposite work, which is the hardest pair on this page to read quickly and the one worth slowing down for.

Two joiners carry the whole thing: ಮತ್ತು adds, ಅಥವಾ offers. That is what a language can do before it has taught a third of either, and it is more than enough to describe a place.

This is the first whole passage the book has asked you to hold at once, and it works because everything in it was paid for.

Your turn

- *Say it:* the passage aloud, once, without stopping

Twice through:

Before you move on

Which two words are one letter apart and mean opposite things? (ಇಲ್ಲಿ and ಇಲ್ಲ.)
How many joiners does the passage use? (**Two.**)

Chapter 77

Marks on the Page, Your First Question, and Timed Writing

Modes: **eyes** (1) **pen** (5) **Hands-free start:** none of the 6 lessons.

> ***By the end of this chapter:*** I can name Kannada punctuation, compose a familiar question, and complete the A1 writing paper within 20 minutes.
>
> *Complete the chapter's final lesson: fill a six-field form and write a 20–30 word named-reader message within the A1 paper's 20-minute limit.*

77.1 . and , — two marks you have been reading all along

Before the new ones: ಆ — what sound does it carry?

Now look at the end of any Kannada line in the last chapter. Something is sitting there that no lesson has ever named.

Script you'll notice: the full stop and the comma

. — the full stop, which ends a sentence.

, — the comma, which separates items inside one.

Kannada borrowed both of these whole from the Latin alphabet, shape and job together, and uses them the way English does. They sit on the baseline, below the letters, rather than hanging from anything.

You have been reading them since the first page:

ಇದು ಬಾಗಿಲು. ಕುರ್ಚಿ ಇಲ್ಲಿ ಇದೆ.

Two sentences, two full stops, and until now nothing in this book had said what they were.

Older Kannada printing used an upright stroke to end a sentence instead. You are unlikely to write one, and you may meet one in an old book or on a sign that was set once and never reset. Knowing it is a sentence-ender is the whole of what it asks of you.

Writing: . and ,

Copy the two marks at the foot of a line of Kannada, once each. Put the full stop tight against the last letter, with the space after it rather than before.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at the two lines above and find the mark that ends each one

  ಇದು ಬಾಗಿಲು. · ಕುರ್ಚಿ ಇಲ್ಲಿ ಇದೆ.

- *Say it:* which of the two marks ends a sentence and which divides one
- *Look:* back at any page of this book and find a full stop on it

Before you move on

What does a full stop do? (Ends a sentence.) What does a comma do? (Separates items inside one.) Where did Kannada get both of them? (From the Latin alphabet, shape and job together.)

77.2 ? — one mark, at the end

> Before the new one: what does a full stop do, and where does it sit?
>
> Today's mark does the same job for a different kind of sentence.

Script you'll notice: the question mark

? — the question mark.

Like the full stop, Kannada takes it from the Latin alphabet whole. It ends a question the way a full stop ends a statement, and it goes in **one place only: the end**.

sentence	mark
a statement	.
a question	?

Nothing marks the opening of a question. Some languages put a second, upside-down mark at the front of one; Kannada does not, and neither does English. A reader meets the question mark at the end or not at all, which means the words themselves have to carry the question until then.

That is worth noticing, because it changes how you read aloud: the rise in your voice has to come from recognising a question word, not from a mark you have not reached yet.

Writing: ?

Copy the mark once at the end of a line, tight against the last letter. Then write a full stop beside it and look at the two.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

Say these aloud:

- which mark ends a question and which ends a statement
- how many marks a Kannada question carries (one)
- where in the sentence that one mark goes

Before you move on

Where does a Kannada question mark go? (At the end.) Is there a second one at the front? (No.) What has to tell you a question is coming before you reach it? (The words.)

77.3 : ( ) — the rest of the set, for reading

Before the new ones: where does a question mark go, and how many does a sentence get?

Four more marks, and this time the job is recognising them rather than reaching for them.

Script you'll notice: the colon, the brackets, the quotes and the dash

mark	what it tells a reader
:	a list or an explanation follows
( )	an aside you could lift out
” ”	somebody's exact words
—	a break in the sentence

Kannada borrows the whole Latin set, which is the useful fact: there is no second system to learn and no Kannada-shaped equivalent to look for. A mark you recognise from English does the job you expect it to do.

These are for reading. A form, a notice or a printed page will put them in front of you, and at this level the demand is knowing what each one signals rather than deciding where to place one yourself. Placing them is a writing habit that comes later, and it comes from reading a great many of them first.

Writing: : and ( )

Copy the colon and the pair of brackets once each. The brackets come in twos — one opens, one closes, and a line with only one of them is a line with something missing.

This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real

variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Say it:* which mark tells you a list is coming
- *Say it:* which pair you could lift out of a sentence without breaking it
- *Say it:* which mark means the words are somebody else's
- *Look:* at any printed page and find two of the four

Before you move on

Which of these four arrive in pairs? (The brackets, and the quotation marks.) Where did Kannada get the set? (From the Latin alphabet, whole.) Are you being asked to place them or to recognise them? (To recognise them.)

77.4 (marks) — which ones you write, and which ones you only read

Close the three lessons before this one. Name the mark that ends a Kannada statement, with nothing in front of you.

Script: the whole set, sorted by what it asks of you

you write these	you read these
. , ?	: ( ) ” ” —

Every one of them came from the Latin alphabet, so there was never a second system to learn — which is why this chapter is short and why nothing in it looked unfamiliar.

The split in that table is the part worth keeping. A reader at this level puts full stops, commas and question marks on the page themselves, and recognises the rest when a notice or a form puts them there.

Your turn

- *Say it:* the three marks you write yourself
- *Say it:* where a question mark goes, and how many a question gets
- *Say it:* what an older Kannada book might use at the end of a sentence
- *Look:* at the reading passage in the chapter before this one and name every mark in it

Before you move on

Which three marks do you write? (**. , ?**) Which mark opens a question? (None.) Where did the whole set come from? (The Latin alphabet.)

77.5 Your first Kannada question from meaning

Close the earlier lessons. Recall how Kannada marks the person who knows, the word meaning **known**, the ending that turns a statement into a yes-or-no question, and the mark that closes a question. Do not write yet.

Writing — assemble one familiar question

From meaning alone, write **Do you know?** There is no word bank, romanization, or copyable sentence. Choose the familiar pieces, put them in Kannada order, change the know-word into a yes-or-no question, and add the question mark. This first composition is untimed: finish before opening the answer key.

Your turn — repair one difference

Check the knower, know-word, long question ending, word boundary, and punctuation separately. Repair the first difference and write the whole question once more from meaning.

Before you move on

What made this composition rather than copying? (**You selected, changed, and ordered known pieces from meaning, with no visible Kannada answer.**)
One controlled line proves this rung, not the later timed A1 writing task.

77.6 A short Kannada A1 writing checkpoint

This is a short independent attempt, not a model. You will write the answers, and this page will not show you any copyable Kannada answer.

Put away romanization, dictionaries, translators, and spell-checkers. Set a **three-minute timer**. Write in Kannada script. Short, legible answers are enough.

Writing — timed assessment production

One practical form — three minutes

Complete **all six fields in Kannada script** for a neighbourhood language exchange. Write one short answer in every field. Start the timer when you begin the first field; leave any unfinished field as evidence when it rings.

1. Your name
2. A language you speak
3. One greeting you would use
4. One drink you would ask for
5. One short question asking where a new member lives
6. One polite closing you would use

When the three-minute timer rings, **stop**. Record the number of completed fields. An honest short attempt is more useful than a perfect untimed one.

Before you move on

Spend at most one minute looking at this first attempt. Note one field you completed clearly and one field to practise next; do not rewrite the timed answer. Keep the page as evidence.
This checkpoint is **not** the complete A1 writing paper. On another day, close this lesson and open the separate A1 writing-only learner paper for the authentic form and named-reader message under one 20-minute assessment clock. That paper and its later rubric review are a separate assessment session, not work inside this under-five-minute lesson. It is writing practice only; it does not establish full A1 exam readiness.

Chapter 78

The Vowels That Start a Word

Modes: **eyes** (1) **pen** (6) **Hands-free start:** none of the 7 lessons.

> ***By the end of this chapter:*** I can write the six independent vowels a Kannada word can begin with, name the words I already say that start on them, and say how many times my pen leaves the page for each.
>
> *From cold: name the six vowel letters, sort them by how many pen lifts each one takes, name the word you already say that opens on each, and say what this book does about a character whose stroke order nobody has published.*

78.1 ಆ — the same shape, held longer

> Before the new one: ಅ — what sound does it carry, and how many times does your pen leave the page for it?
>
> Today's character is that one with one more piece.

Script you'll notice: ಆ

ಆ — *ā*.

It is an **independent vowel** — the shape *ā* takes when a word begins with it, rather than the sign it becomes inside one.

Set it beside the one you already write:

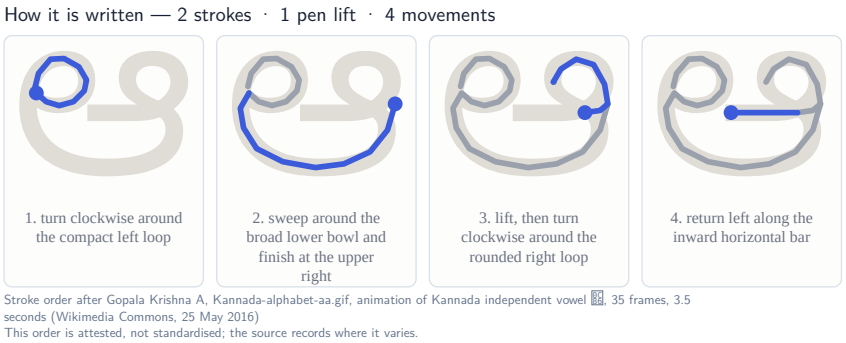

short	long
ಅ *a*	ಆ *ā*

The two are built from the same four parts — a compact left loop, a broad lower bowl, a rounded right loop, an inward horizontal bar — and the hand tells them apart by where it stops rather than by what it draws. More on that in the writing section.

You already say these:

- ಆರು *āru* — six
- ಆಕಾಶ *ākāśa* — sky
- ಆಮೇಲೆ *āmēle* — afterwards

Writing: ಆ

How ಆ *is written, stroke by stroke*

- **1.** turn clockwise around the compact left loop
- **2.** without lifting, sweep around the broad lower bowl and finish at the upper right
- **3.** lift, then turn clockwise around the rounded right loop
- **4.** without lifting, return left along the inward horizontal bar

Pen lifts: 1. The left loop flows through the broad lower bowl; after one lift, the right loop returns left along the inner bar.

ಅ runs all four movements without the pen leaving the page. ಆ stops once, at the upper right, before the last two. **Same four parts, one lift apart** — and that lift is the thing to feel for, because it is what your hand will remember when your eye is still deciding.

This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-aa.gif', 35 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Your turn

- *Look:* at these two words and say which opens on ಅ and which on ಆ

  ಅಥವಾ · ಆರು
- *Trace it:* ಆ three times, counting the one lift as you go
- *Say it: a* and *ā*, holding the second one twice as long

Before you move on

Which character is this — ಆ? What sound does it carry? (*ā*.) How many times does your pen leave the page? (**Once** — and for ಅ, not at all.) Which four parts do the two of them share?

78.2 ಎ — one run of the pen, four movements

Before the new one: ಆ — what sound, and how many lifts?

Count to ten. Two of those numbers open on today's character.

Script you'll notice: ಎ

ಎ — *e*.

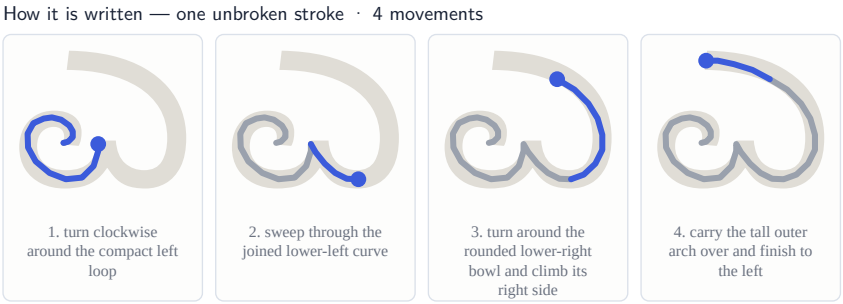

It is an **independent vowel** — the shape *e* takes when a word begins with it, rather than the sign it becomes inside one.

You already say these:

- ಎರಡು *eraḍu* — two
- ಎಂಟು *eṇṭu* — eight
- ಎಲ್ಲಿ *elli* — where
- ಎಲೆ *ele* — leaf

Two of the first ten numbers begin with it, which is why it is worth a page even though it looks like a shape you could pick up by copying. A character you meet while counting is one you will meet every day.

Writing: ಎ

How ಎ is written, stroke by stroke

- **1.** turn clockwise around the compact left loop
- **2.** without lifting, sweep through the joined lower-left curve
- **3.** without lifting, turn around the rounded lower-right bowl and climb its right side
- **4.** without lifting, carry the tall outer arch over and finish to the left

Pen lifts: 0. The compact left loop flows through both lower curves, climbs the right side, and finishes left along the tall outer arch — one continuous run from first movement to last.

Your turn

- *Look:* at these two numbers and find ಎ at the front of each

  ಎರಡು · ಎಂಟು

- *Trace it:* ಎ three times without letting the pen leave the page
- *Say it:* which of ಆ and ಎ needs a lift and which does not

Before you move on

Which character is this — ಎ? What sound does it carry? (***e***.) Which two numbers under ten open on it? (**ಎರಡು** and **ಎಂಟು**.) How many times does your pen leave the page? (**Not at all**.)

78.3 ಏ — the end of the first question you learned to ask

Before the new one: ಎ — what sound, and how many lifts?

Ask somebody their name in Kannada. The last word of that question opens on today's character.

Script you'll notice: ಏ

ಏ — *ē*.

It is an **independent vowel** — the shape *ē* takes when a word begins with it, rather than the sign it becomes inside one.

You already say these:

- **ಏನು** *ēnu* — what?
- **ಏಳು** *ēḷu* — seven
- **ಏಕೆಂದರೆ** *ēkendare* — because

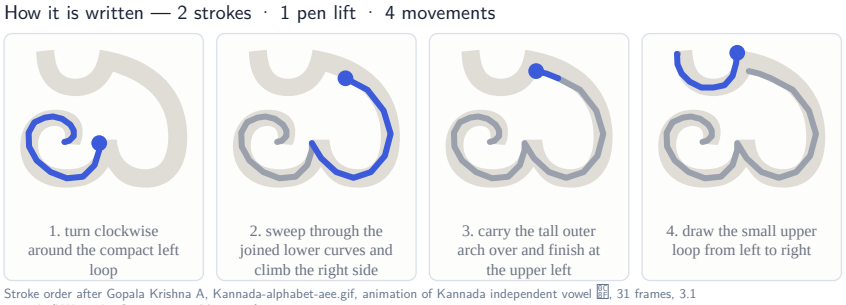

ಏನು closes the first question this book taught you — **ನಿಮ್ಮ ಹೆಸರು ಏನು**?, back in chapter two. Until now you could ask it out loud without being able to write its last piece.

Set it beside the one from the page before:

short	**long**
ಎ *e*	ಏ *ē*

The long one carries **a small loop above** the body the short one ends with. Your pen builds the same lower body, then adds that loop separately.

Writing: ಏ

How ಏ is written, stroke by stroke

- **1.** turn clockwise around the compact left loop
- **2.** without lifting, sweep through the joined lower curves and climb the right side
- **3.** without lifting, carry the tall outer arch over and finish at the upper left
- **4.** lift, then draw the small upper loop from left to right

Pen lifts: 1. Write the joined lower body and tall arch in one run, then lift once for the small upper loop.

> This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-aee.gif', 31 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Your turn

- *Look:* at these two and say which is the short vowel and which the long

  ಎರಡು · ಏಳು

- *Trace it:* ಏ three times, stopping after the arch before the upper loop
- *Say it:* the question ನಿಮ್ಮ ಹೆಸರು ಏನು? and point at ಏ as you say it

Before you move on

Which character is this — ಏ? What sound does it carry? (*ē*.) What does the lift come before? (**The small upper loop**.) Which number under ten opens on it? (ಏಳು.)

78.4 ಒ — the letter the counting starts on

Before the new one: ಏ — what sound, and what comes after the lift?

Now say the number one. Today's character is where it starts.

Script you'll notice: ಒ

ಒ — *o*.

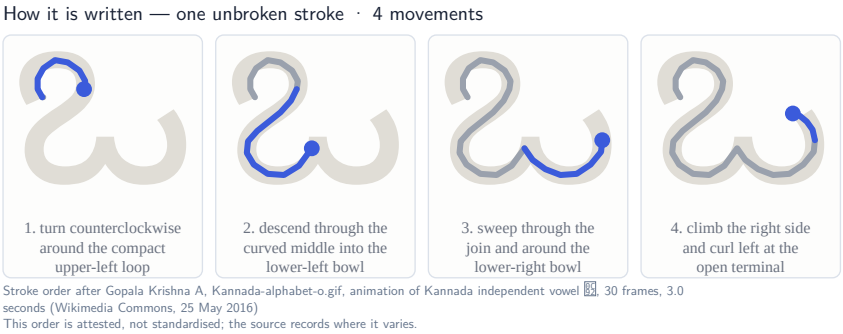

It is an **independent vowel** — the shape *o* takes when a word begins with it, rather than the sign it becomes inside one.

You already say these:

- ಒಂದು *ondu* — one
- ಒಂಬತ್ತು *ombattu* — nine
- ಒಳ್ಳೆಯ *o̤lleya* — good

The first number you ever counted in this language opens on it, and so does nine. A character that turns up twice inside one to ten is one you will meet every day.

Writing: ಒ

How ಒ is written, stroke by stroke

- **1.** turn counterclockwise around the compact upper-left loop
- **2.** without lifting, descend through the curved middle into the lower-left bowl
- **3.** without lifting, sweep through the join and around the lower-right bowl
- **4.** without lifting, climb the right side and curl left at the open terminal

Pen lifts: 0. The upper loop, the curved descent, both lower bowls and the open terminal come out of one uninterrupted run.

Notice the first movement goes counterclockwise. ಆ, ಎ and ಏ all opened with a clockwise turn around their left loop; this one turns the other way. It is the kind of difference the eye slides over and the hand does not.

> This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-o.gif', 30 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Your turn

- *Look:* at these two numbers and find ಒ at the front of each

ಒಂದು · ಒಂಬತ್ತು

- *Trace it:* ಒ three times, starting counterclockwise each time
- *Say it:* which way the pen turns first for ಒ, and which way for ಐ

Before you move on

Which character is this — ಒ? What sound does it carry? (***o***.) Which number opens on it? (ಒಂದು — and ಒಂಬತ್ತು.) Which direction does the first turn go? (**Counterclockwise**.)

78.5 ಐ — a vowel your mouth moves through

Before the new one: ಒ — what sound, and which way does the first turn go?

Say the number five, slowly. Listen to the opening.

Script you'll notice: ಐ

ಐ — *ai*.

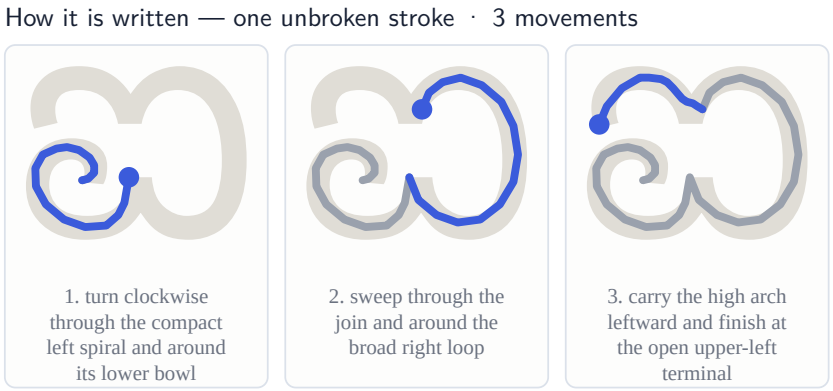

It is an **independent vowel** — the shape *ai* takes when a word begins with it, rather than the sign it becomes inside one.

You already say these:

- ಐದು *aidu* — five
- ಐದನೆಯ *aidaneya* — fifth

Say *aidu* and hold the first part. Your mouth does not stay still: it starts low and slides up toward *i*. **Two sounds in one movement**, which is what the romanization's two letters are trying to show — and Kannada spends a single character on the whole slide.

Writing: ಐ

Stroke order after Gopala Krishna A, Kannada-alphabet-ai.gif, animation of Kannada independent vowel ಐ, 28 frames, 2.8 seconds (Wikimedia Commons, 25 May 2016)
This order is attested, not standardised; the source records where it varies.

How ಐ is written, stroke by stroke

- **1.** turn clockwise through the compact left spiral and around its lower bowl
- **2.** without lifting, sweep through the join and around the broad right loop
- **3.** without lifting, carry the high arch leftward and finish at the open upper-left terminal

Pen lifts: 0. Three movements rather than the four the others took, and all of them in one run: the left spiral and bowl flow through the broad right loop before the high arch finishes at the open upper-left terminal.

> This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-ai.gif', 28 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Your turn

- *Look:* at these two words and find ಐ at the front of each

  ಐದು · ಐದನೆಯ

- *Trace it:* ಐ three times without letting the pen leave the page
- *Say it: ondu* and *aidu*, and say which opening moves and which holds still

Before you move on

Which character is this — ಐ? What sound does it carry? (***ai***.) Which number opens on it? (ಐದು.) Does your mouth hold one position for it or two? (**Two** — it slides.)

78.6 ಋ — the vowel that sounds like a consonant

Before the new one: ಐ — what sound, and how many movements?

Today's is the last of this chapter's six, and the one your pen works hardest for.

Script you'll notice: ಋ

ಋ — *ṛ*.

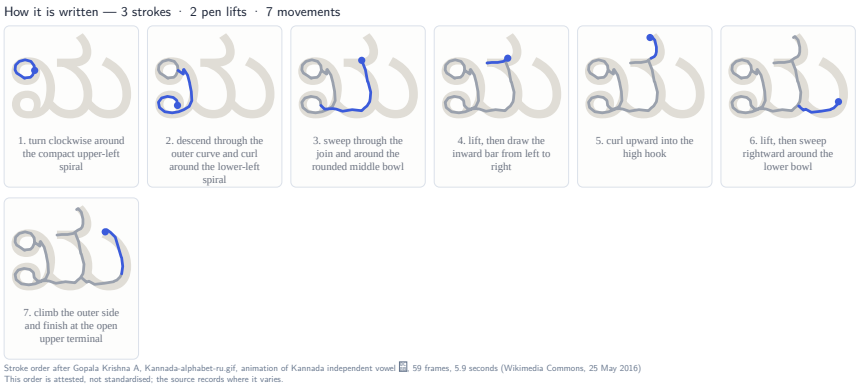

It is an **independent vowel** — the shape *ṛ* takes when a word begins with it, rather than the sign it becomes inside one.

- ಋತು *ṛtu* — season, from the seasons chapter

A vowel that sounds like an *r* is a strange thing to be told, and it is the honest description. This vowel came into Kannada with Sanskrit vocabulary, and it behaves like a vowel — it can hold a syllable on its own — while sounding close to the *r* you already make. Telugu writes ఋ for the same sound, in the same borrowed words; so does Hindi, with ऋ.

It is rare, and that is the reason it goes last rather than the reason to skip it: a rare shape inside a word you already know is exactly where a reader cannot tell whether the word or the printing is at fault.

Writing: ಋ

How ಋ *is written, stroke by stroke*

- **1.** turn clockwise around the compact upper-left spiral, descend through the outer curve, curl around the lower-left spiral, and sweep through the join around the rounded middle bowl
- **2.** lift, draw the inward bar from left to right, then curl upward into the high hook
- **3.** lift, sweep rightward around the lower bowl, climb its outer side, and finish at the open upper terminal

Pen lifts: 2 — more than any other character in this chapter. Three pen-down runs: the double-spiral left body continues through the rounded middle bowl, then the high inward hook and the open right bowl are added separately.

> This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-ru.gif', 59 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Your turn

- *Look:* at the word below and find ಋ at its front

ಋತು

- *Trace it:* ಋ three times, counting the two lifts as you go
- *Say it:* which of this chapter's characters took no lift at all

Before you move on

Which character is this — ಋ? Is it a vowel or a consonant? (**A vowel** — it holds a syllable on its own, however close it sounds to *r*.) How many times does your pen leave the page? (**Twice**.)

78.7 (ಆ ಎ ಏ ಒ ಐ ಋ) — six letters, sorted by the pen

Close the lessons before this one. Count from one to ten in Kannada, and name the two characters that open numbers in that list.

Script: the six, sorted by what the pen does

ಆ · ಎ · ಏ · ಒ · ಐ · ಋ

Sorting them by sound gives you a list to memorise. Sorting them by **what your hand does** gives you something to check yourself against:

pen lifts	characters	what that means
none	ಎ · ಒ · ಐ	one run, start to finish
one	ಆ · ಏ	a body, then one added piece
two	ಋ	three separate runs

Every one of these is attested rather than invented. Each lesson printed the animation it came from, frame count and all, because a stroke order nobody published is a stroke order this book will not teach. The characters still waiting on a source keep the older instruction — copy what you see — and will until one turns up.

Five of the six open a word you can already say:

ಆರು · ಎರಡು · ಏಳು · ಒಂದು · ಐದು

Your turn

- *Look:* at the five words above and name the vowel each one opens on
- *Say it:* which two of the six are a short and long pair
- *Say it:* which one starts with a counterclockwise turn
- *Trace it:* each of the six once, counting its lifts out loud

Before you move on

Which of the six needs two lifts? (ಋ.) Which three need none? (ಎ, ಒ, ಐ.) Which one is the long partner of ಎ? (ಏ.) And what does this book do about a character whose stroke order nobody has published? (**Teaches it by copying, and says so**.)

Chapter 79

Long, Moving and Curled

Modes: **eyes** (1) **pen** (6) **Hands-free start:** none of the 7 lessons.

> ***By the end of this chapter:*** I can read the three vowel signs this book had never named, and tell Kannada's two n letters and three s letters apart on the page.
>
> *From cold: name the three signs and say what each does to the consonant under it, then sort* ನ *against* ಣ *and* ಸ, ಶ, ಷ *by where the tongue sits.*

79.1 ◌ೀ — the long one, on the sign you already read

You say *nīnu* and *nīvu* every time you address somebody. The mark that makes that *i* long is the one you have never been shown.

Script you'll notice: ◌ೀ

◌ೀ — *ī*.

It is a **vowel sign** — it cannot stand alone, it rides on a consonant and changes the vowel that consonant carries.

Set it beside the short one you have read since chapter four:

short	long
◌ಿ — *i*	◌ೀ — *ī*

This is the most-used character in this book that nothing has taught. It is in the word for *you*, in the colour blue, and in the polite verb ending you use whenever you ask somebody how they are.

You already say these:

- **ನೀನು / ನೀವು** *nīnu / nīvu* — you, familiar and respectful
- **ನೀಲಿ** *nīli* — blue
- **ನೀವು ಹೇಗಿದ್ದೀರಾ?** *nīvu hēgiddīrā?* — how are you? — and the ending carries it twice

Writing: ◌ೀ

Put your pen on ◌ೀ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ◌ೀ in each

  ನೀನು · ನೀಲಿ

- *Trace it:* ◌ೀ three times, saying *ī* as you finish each one
- *Look:* back at any page of this book and find ◌ೀ once more

Before you move on

Which mark is this — ◌ೀ? What does it do to the consonant under it? (**Makes its vowel a long *ī***.) Which word for *you* carries it? (**Both of them**.)

79.2 ೈ — the sign for the vowel that moves

> A chapter ago you wrote ಐ, the letter for *ai*. Here is the same vowel when a consonant is carrying it.

Script you'll notice: ೈ

ೈ — *ai*.

It is a **vowel sign** — it cannot stand alone, it rides on a consonant and changes the vowel that consonant carries.

ಐ and ೈ are one vowel with two jobs. The letter opens a word; the sign sits on a consonant inside one. You met the pair idea with every other vowel in this script, and this is the last of them to arrive.

- ಕ plus ೈ gives ಕೈ — *kai*, a hand

You already say these:

- ತಲೆ ಕೈ *tale kai* — head and hand
- ವೈದ್ಯ *vaidya* — a doctor
- ರೈತ *raita* — a farmer

Writing: ೈ

Put your pen on ೈ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ೈ in each

  ಕೈ · ವೈದ್ಯ

- *Trace it:* ೈ three times, saying *ai* as you finish each one
- *Look:* back at any page of this book and find ೈ once more

Before you move on

Which mark is this — ೈ? Which letter is it the riding form of? (ಐ.) Which part of the body is spelled with it? (ಕೈ, the hand.)

79.3 ೌ — the mark in the third word you learned

Say yes in Kannada. That word has carried today's mark since chapter one.

Script you'll notice: ೌ

ೌ — *au*.

It is a **vowel sign** — it cannot stand alone, it rides on a consonant and changes the vowel that consonant carries.

- ಹ plus ೌ gives ಹೌ — the first syllable of *haudu*

Like *ai*, this vowel **moves while you say it**: it starts low and slides toward *u*. Two sounds in one mark, which is what the romanization's two letters are showing.

Every vowel in this script has two forms — a letter for the front of a word, a sign for inside one. This one's letter form is the single independent vowel whose stroke order this project has no source for, so the chapter that taught you to write the vowel letters stopped one short. **The sign is what a reader actually meets on these pages**, and it is the form this book can hand over honestly.

You already say these:

- ಹೌದು *haudu* — yes
- ಗೌರವ *gaurava* — respect
- ಸೌಜನ್ಯ *saujanya* — courtesy

Writing: ೌ

Put your pen on ೌ and follow its line. Copy the shape you can see — slowly, and larger than it is printed.

> This book does not yet tell you **where to start the character or which way to travel**. That is a real thing, taught with real variation from school to school, and it is not written down here until it can be written down with a source. Copying what is in front of you needs no such source, and it is how the shape gets into your hand in the meantime.

Your turn

- *Look:* at these words, and find ೌ in each

  ಹೌದು · ಗೌರವ

- *Trace it:* ೌ three times, saying *au* as you finish each one
- *Look:* back at any page of this book and find ೌ once more

Before you move on

Which mark is this — ೌ? What does it do? (**Makes the consonant's vowel *au*.**) Which one-word answer carries it? (ಹೌದು.)

79.4 ಣ — the n with the tongue curled back

> Say the word for an eye. There are two n-sounds in Kannada and that word has the one you have never been shown.

Script you'll notice: ಣ

ಣ — *ṇa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṇ*, it is **ṇa**.

Kannada keeps **two different n letters** apart on the page, and English marks neither.

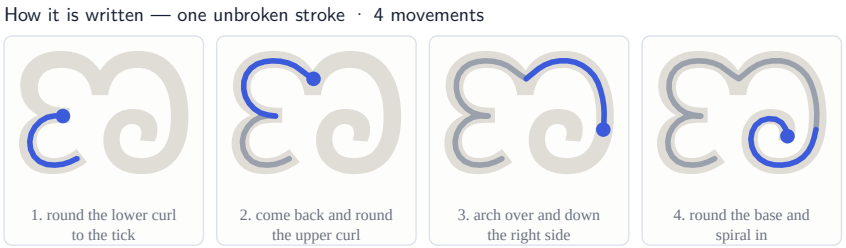

letter	romanized	where the tongue goes
ನ	*na*	tip behind the teeth
ಣ	*ṇa*	curled back along the roof

You have read ನ since the first chapter. ಣ is the same sound made further back, with the tongue curled — the position you already use for ಟ and ಡ.

You already say these:

- ಕಣ್ಣು *kaṇṇu* — an eye
- ಸಿಗೋಣ *sigōṇa* — let us meet, inside the farewell
- ಖಂಡಿತ *khaṇḍita* — certainly

Writing: ಣ

How ಣ is written, stroke by stroke

- **1.** start at the foot of the lower curl and round it up to the short tick at the waist
- **2.** without lifting, come back and round the upper curl into the middle point
- **3.** without lifting, arch over to the right and come down the right side
- **4.** without lifting, round the base and spiral in to the centre

Pen lifts: 0. The whole letter is one run, from the foot of the lower curl over the arch to the end of the spiral. There is no curled bar on top.

> This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-nna.gif', 45 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Your turn

- *Look:* at these words, and find **ಣ** in each

  ಕಣ್ಣು · **ಸಿಗೋಣ**

- *Trace it:* **ಣ** three times, saying *ṇa* as you finish each one
- *Look:* back at any page of this book and find **ಣ** once more

Before you move on

Which character is this — **ಣ**? What sound does it carry? (***ṇa***.) What is the difference between it and **ನ**? (**Where the tongue sits** — curled back rather than behind the teeth.)

79.5 ಶ — the letter every greeting starts with

> Say good morning, good evening and good night. All three begin on today's character.

Script you'll notice: ಶ

ಶ — *śa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ś*, it is **śa**.

Every time-of-day greeting in this book opens with **ಶುಭ** *śubha*, "auspicious" — and that word begins on **ಶ**.

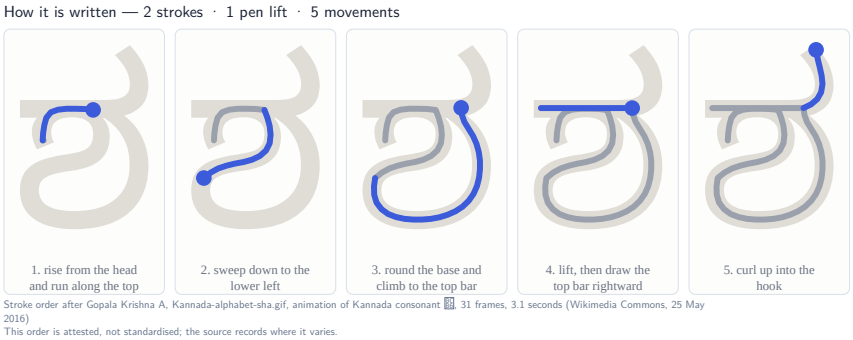

Kannada prints **three separate s letters**, and you have had only one of them. **ಸ** you met in chapter twelve; **ಶ** is here; **ಷ** is on the next page.

You already say these:

- **ಶುಭ ರಾತ್ರಿ** *śubha rātri* — good night

- **ಶುಭೋದಯ** *śubhōdaya* — good morning
- **ಶುಭ ಸಂಜೆ** *śubha sañje* — good evening

Writing: ಶ

How **ಶ** *is written, stroke by stroke*

- **1.** start at the head and rise to run right along the top
- **2.** without lifting, curve down and sweep across to the lower left
- **3.** without lifting, round the base and climb the right side to the top bar
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook

Pen lifts: 1. The body is one run, from the head along the top and round the base up to the bar; the curled bar comes after the only lift, as in **ದ**.

> This is one attested teaching order and not a national standard — Kannada handwriting is taught with school-to-school variation. Source: Gopala Krishna A, 'Kannada-alphabet-sha.gif', 31 frames, Wikimedia Commons, 25 May 2016, CC BY-SA 4.0.

Your turn

- *Look:* at these words, and find **ಶ** in each

  ಶುಭ ರಾತ್ರಿ · **ಶುಭೋದಯ**

- *Trace it:* **ಶ** three times, saying *śa* as you finish each one
- *Look:* back at any page of this book and find **ಶ** once more

Before you move on

Which character is this — **ಶ**? What sound does it carry? (***śa***.)
Which word do all three greetings share? (**ಶುಭ**.)

79.6 ಷ — the third s, and the last one

Before the new one: **ಶ**, and **ಸ** from chapter twelve. Today's is the third and final s-shape.

Script you'll notice: ಷ

ಷ — *ṣa*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṣ*, it is **ṣa**.

Now you have the whole set:

letter	romanized	where the tongue goes
ಸ	*sa*	tip behind the teeth
ಶ	*śa*	flat against the front of the roof
ಷ	*ṣa*	curled back along the roof

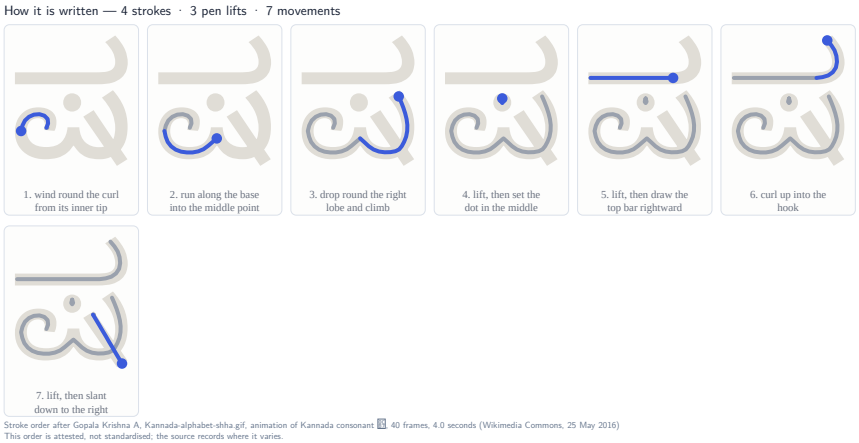

ಷ curls back in the same place as ಣ. That is the one position this script keeps naming and English never marks, and you have now met it on an n and on an s.

Look at **ಸಂತೋಷ**: it opens on **ಸ** and closes on **ಷ**. Until today you could read one end of that word and not the other.

You already say these:

- ಸಂತೋಷ *santōṣa* — joy; and how you say you are pleased to meet somebody
- ಇಷ್ಟ *iṣṭa* — liking
- ಕ್ಷಮಿಸಿ *kṣamisi* — sorry, excuse me

Writing: ಷ

How ಷ is written, stroke by stroke

- **1.** start at the inner tip of the curl and wind up and round it to the left
- **2.** without lifting, run along the base and rise into the middle point
- **3.** without lifting, drop round the right lobe and climb the right side to its tip
- **4.** lift, then set the dot in the middle
- **5.** lift, then draw the top bar from left to right
- **6.** without lifting, curl up into the hook
- **7.** lift, then draw the slanting stroke down to the right

Pen lifts: 3. The body is ಪ's run; then come the dot, the curled bar and last the slanting stroke, each after a lift.

Your turn

- *Look:* at these words, and find ಷ in each

  ಸಂತೋಷ · ಇಷ್ಟ

- *Trace it:* ಷ three times, saying *ṣa* as you finish each one
- *Look:* back at any page of this book and find ಷ once more

Before you move on

Which character is this — ಷ? What sound does it carry? (***ṣa***.)
Which other letter puts your tongue in the same curled place? (ಣ.)
How many s letters does Kannada print? (**Three**.)

79.7 (ೀ ೈ ೌ ಣ ಶ ಷ) — six characters, two ideas

Close the lessons before this one. Say *you* the respectful way, and say yes. Name the mark each of those words carries.

Script: six shapes, two ideas

One — a vowel can be long, or it can move. Three signs, and none of them can stand on its own:

sign	sound	met in
◌ೀ	*ī*	ನೀವು — you
◌ೈ	*ai*	ಕೈ — a hand
◌ೌ	*au*	ಹೌದು — yes

Two — the tongue can curl back, and Kannada writes that position where English marks nothing:

flat	curled
ನ *na*	ಣ *ṇa*
ಸ *sa*	ಷ *ṣa*

ಶ *śa* is the third s — flat against the front of the roof. One set of three where English has a single letter, and the word **ಸಂತೋಷ** uses two of them, one at each end.

Your turn

- *Look:* at these words and name every character in them

  ನೀವು · ಹೌದು · ಸಂತೋಷ · ಶುಭೋದಯ · ಕಣ್ಣು

  Say these aloud:

- which two of the six put your tongue in the curled-back position
- which of the three signs is a vowel that moves while you say it

Before you move on

Which sign makes an *i* long? (◌ೀ.) Which two characters are made with the tongue curled back? (**ಣ** and **ಷ**.) How many s letters does Kannada print? (**Three** — **ಸ**, **ಶ**, **ಷ**.)

Chapter 80

The Breath

Modes: 👁 **eyes** (1) ✓ **pen** (7) 🚗 **Hands-free start:** none of the 8 lessons.

> ***By the end of this chapter:*** I can recognise the seven Kannada consonants that carry the breath, and say which plain letter each one is built on.
>
> *From cold: pair each of the seven breathy consonants with the plain letter it is built on, and say why the romanization's ph is not the f of phone.*

80.1 ಧ — the breath that opens the thank-you word

> Say thank you in Kannada. It begins on today's character, and it has done since the first chapter.

Script you'll notice: ಧ

ಧ — *dha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *dh*, it is **dha**.

ಧ is **ದ** with a puff of air after it. Hold a hand in front of your mouth: say **ದ** and the air stays put; say **ಧ** and it comes out.

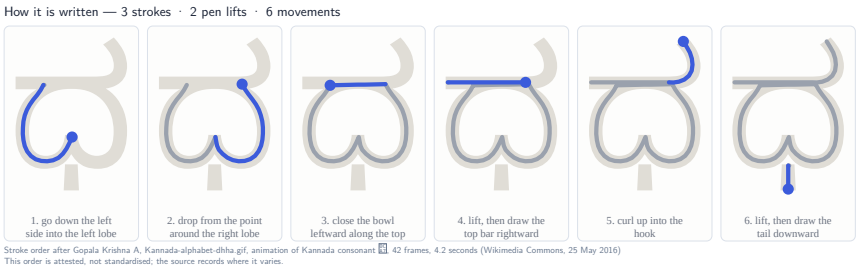

This is the last big idea left in this script, and it accounts for seven of the characters you have never been shown. Kannada gives the breathy partner of a consonant its own shape rather than leaving you to guess:

no breath	breath
ದ	ಧ

The six that follow are the same move on six other letters.
You already say these:

- ಧನ್ಯವಾದ *dhanyavāda* — thank you
- ಮಧ್ಯಾಹ್ನ *madhyāhna* — noon
- ಶುಭ ಮಧ್ಯಾಹ್ನ *śubha madhyāhna* — good afternoon

Writing: ಧ

How ಧ *is written, stroke by stroke*

- **1.** start at the upper left and go down the left side into the left lobe, rising into the middle point
- **2.** without lifting, drop from the point around the right lobe and climb the right side
- **3.** without lifting, close the bowl leftward along the top
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook
- **6.** lift, then draw the tail downward

Pen lifts: 2. This is ದ with a tail: the body, then the curled bar, then the tail below the point, each after a lift.

The animation is filed as 'dhha': that series spells ದ as 'dha'.

Your turn

- *Look:* at these words, and find ಧ in each

  ಧನ್ಯವಾದ · ಮಧ್ಯಾಹ್ನ

- *Trace it:* ಧ three times, saying *dha* as you finish each one
- *Look:* back at any page of this book and find ಧ once more

Before you move on

Which character is this — ಧ? What sound does it carry? (***dha***.) What does it add to ದ? (**The breath after it**.)

80.2 ಭ — the breath inside ಶುಭ

Before the new one: ಧ — what does it add to ದ? Today's character does the same thing to ಬ.

Script you'll notice: ಭ

ಭ — *bha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *bh*, it is **bha**.

no breath	breath
ಬ	ಭ

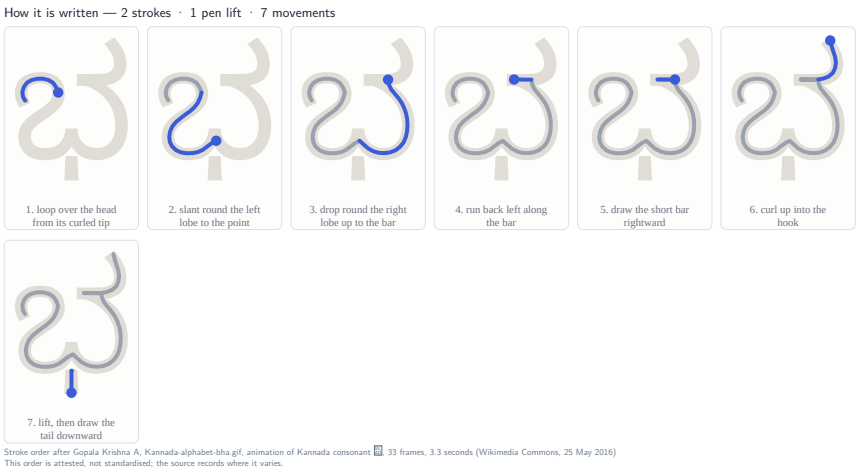

ಶುಭ *śubha* carries it, so every greeting in this book ends on it — and you learned ಶ for the front of that word one page ago. Today the back of it arrives.

You already say these:

- ಶುಭ ರಾತ್ರಿ *śubha rātri* — good night

- **ಶುಭೋದಯ** *śubhōdaya* — good morning
- **ಭುಜ** *bhuja* — the shoulder

Writing: ಭ

How **ಭ** *is written, stroke by stroke*

- **1.** start at the curled tip inside the head and loop up over it clockwise
- **2.** without lifting, slant down to the left and round the left lobe, rising into the middle point
- **3.** without lifting, drop round the right lobe and climb the right side to the bar
- **4.** without lifting, run back left along the bar
- **5.** without lifting, draw the bar from left to right
- **6.** without lifting, curl up into the hook
- **7.** lift, then draw the tail downward

Pen lifts: 1. The body is drawn as **ಬ**'s is; then the pen runs back along the short bar and draws it into the hook. It lifts once, for the tail. The animation also lifts before the bar; most people copying **ಭ** in the Omniglot study used two strokes.

Your turn

- *Look:* at these words, and find ಭ in each

  ಶುಭ ರಾತ್ರಿ · ಭುಜ

- *Trace it:* ಭ three times, saying *bha* as you finish each one
- *Look:* back at any page of this book and find ಭ once more

Before you move on

Which character is this — ಭ? What sound does it carry? (***bha***.) Which letter is it the breathy partner of? (ಬ.)

80.3 ಫ — and the two English letters that mislead

Before the new one: ಭ — which letter is it the breathy partner of? Today's does the same to ಪ.

Script you'll notice: ಫ

ಫ — *pha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ph*, it is **pha**.

no breath	breath
ಪ	ಫ

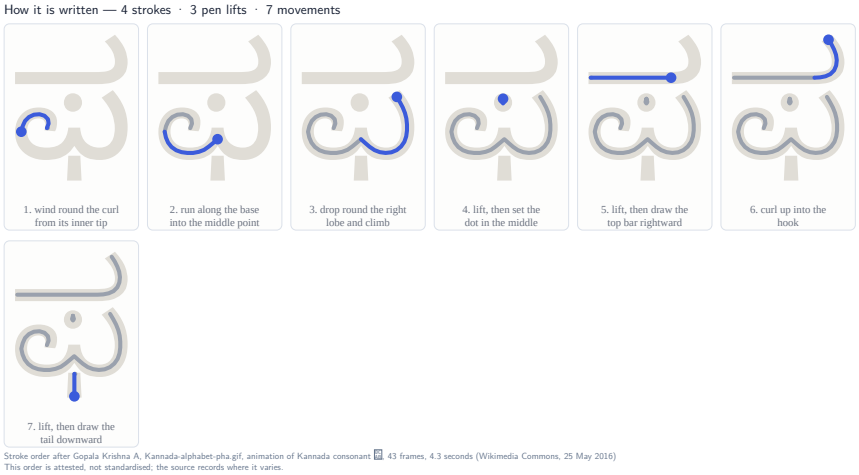

Read the romanization carefully here. *ph* is one sound with air behind it, not the *f* those two English letters make in *phone*. Two letters on the romanized line, one character on the Kannada line, one puff in the mouth.

The word below is the clearest case, because English lent it and Kannada spells it with this letter.

You already say these:

- **ಕಾಫಿ** *kāphi* — coffee
- **ನಿಮಗೆ ಕಾಫಿ ಇಷ್ಟವಾ** *nimage kāphi iṣṭavā* — do you like coffee?

Writing: ಫ

How **ಫ** *is written, stroke by stroke*

- **1.** start at the inner tip of the curl and wind up and round it to the left
- **2.** without lifting, run along the base and rise into the middle point
- **3.** without lifting, drop round the right lobe and climb the right side to its tip
- **4.** lift, then set the dot in the middle
- **5.** lift, then draw the top bar from left to right
- **6.** without lifting, curl up into the hook
- **7.** lift, then draw the tail downward

Pen lifts: 3. This is **ಪ** with a tail: the body, the dot, the curled bar, and last the tail, each after a lift.

- *Look:* at these words, and find ಫ in each

  ಕಾಫಿ

- *Trace it:* ಫ three times, saying *pha* as you finish each one
- *Look:* back at any page of this book and find ಫ once more

Before you move on

Which character is this — ಫ? What sound does it carry? (***pha***.) Is it the *f* of *phone*? (**No** — a *p* with breath after it.)

80.4 ಖ — the breath on the first letter you ever wrote

Before the new one: ಫ — which letter is it built on? Today's is built on ಕ, the consonant this book drew first.

Script you'll notice: ಖ

ಖ — *kha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *kh*, it is **kha**.

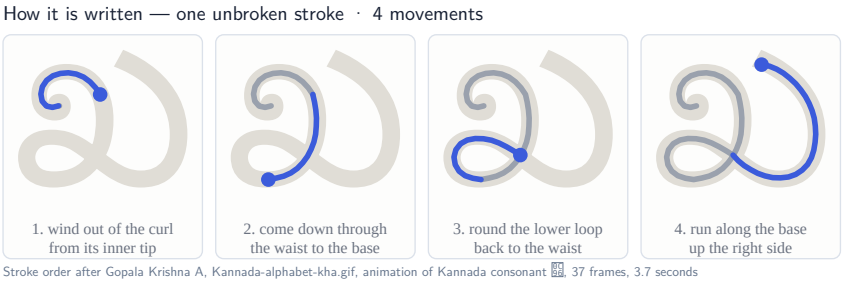

no breath	breath
ಕ	ಖ

This one is rarer than the three before it, and the word that needs it is one you already use to agree with somebody.

You already say these:

- ಖಂಡಿತ *khaṇḍita* — certainly

Writing: ಖ

How ಖ *is written, stroke by stroke*

- **1.** start at the inner tip of the curl and wind out of it, up and over to the right
- **2.** without lifting, come down through the waist to the base
- **3.** without lifting, round the lower loop and cross back through the waist
- **4.** without lifting, run along the base and climb the right side, curving over to its tip

Pen lifts: 0. The whole letter is one run, from the curl through the lower loop to the tip of the long right side. There is no curled bar on top.

  ಖಂಡಿತ

- *Trace it:* ಖ three times, saying *kha* as you finish each one
- *Look:* back at any page of this book and find ಖ once more

Before you move on

Which character is this — ಖ? What sound does it carry? (***kha***.)
Which word from the agreeing chapter opens on it? (ಖಂಡಿತ.)

80.5 ಘ — rare, and worth a page anyway

Before the new one: ಖ — which letter is it built on? Today's is built on ಗ.

Script you'll notice: ಘ

ಘ — *gha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *gh*, it is **gha**.

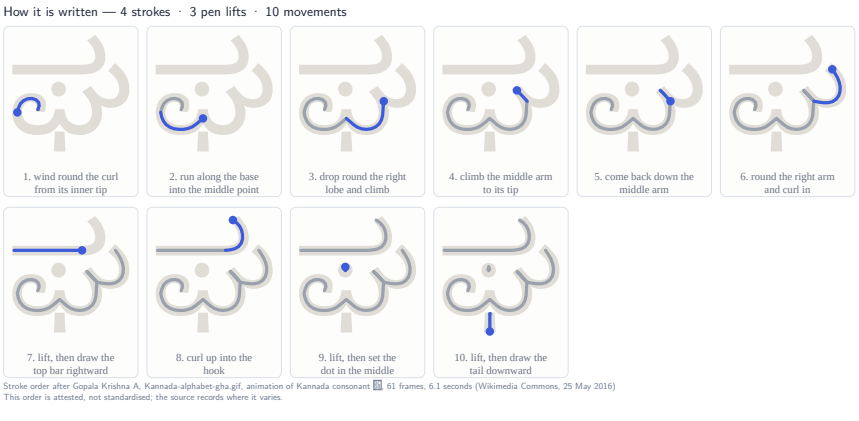

no breath	breath
ಗ	ಘ

This character appears in one word in this whole book, and that is the reason to teach it rather than a reason to skip it. The word is a month name, and a reader who meets an unfamiliar shape inside a list they already know by heart cannot tell whether the word or the printing is at fault.

You already say these:

- ಮಾಘ *māgha* — Magha, the eleventh traditional month

Writing: ಘ

How ಘ is written, stroke by stroke

- **1.** start at the inner tip of the curl and wind up and round it to the left
- **2.** without lifting, run along the base and rise into the middle point
- **3.** without lifting, drop round the right lobe and climb the right side
- **4.** without lifting, carry on up the middle arm to its tip
- **5.** without lifting, come back down the middle arm to its foot
- **6.** without lifting, round the right arm and curl in at its top
- **7.** lift, then draw the top bar from left to right
- **8.** without lifting, curl up into the hook
- **9.** lift, then set the dot in the middle
- **10.** lift, then draw the tail downward

Pen lifts: 3. After the middle arm the pen comes back down it and rounds the right arm; then the curled bar, the dot and the tail each come after a lift. The animation also lifts between the arms; most people copying ಘ in the Omniglot study used four strokes.

Before you move on

Which character is this — ಘ? What sound does it carry? (***gha***.)
Which month carries it? (ಮಾಘ.)

80.6 ಢ — the curled d, with the breath

Before the new one: ಘ — which letter is it built on? Today's is built on ಡ, the curled d.

Script you'll notice: ಢ

ಢ — *ḍha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ḍh*, it is **ḍha**.

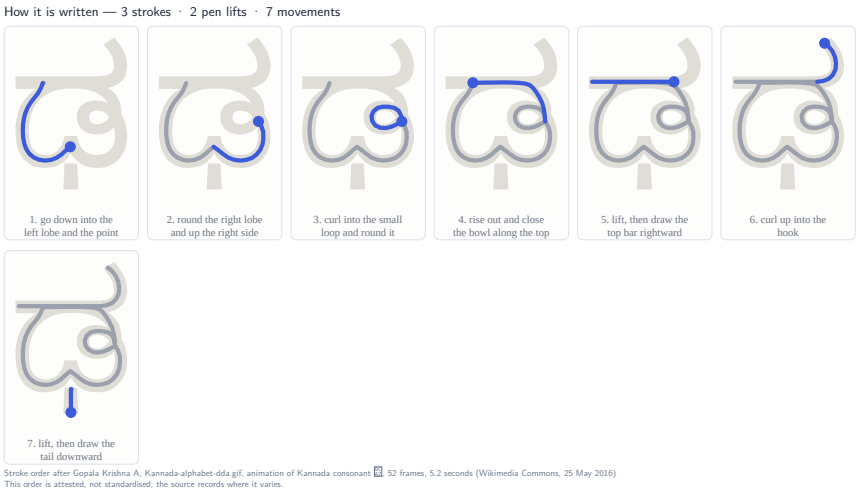

no breath	**breath**
ಡ	ಢ

Two things at once: the tongue is **curled back**, the way it is for ಣ and ಷ, and the breath comes **after**. Like ಘ, it is in one word in this book, and that word is a month.

You already say these:

- ಆಷಾಢ *āṣāḍha* — Ashadha, the fourth traditional month

Writing: ಢ

How ಢ is written, stroke by stroke

- **1.** start at the upper left and go down the left side into the left lobe, rising into the middle point
- **2.** without lifting, drop from the point around the right lobe and climb the right side
- **3.** without lifting, curl left into the small inner loop and go round it counterclockwise
- **4.** without lifting, rise out of the loop and close the bowl leftward along the top
- **5.** lift, then draw the top bar from left to right
- **6.** without lifting, curl up into the hook
- **7.** lift, then draw the tail downward

Pen lifts: 2. This is ಢ with a tail: the body, then the curled bar, then the tail below the point, each after a lift.

The animation is filed as 'dda': that series spells ಡ as 'da'.

Your turn

- *Look:* at these words, and find ಢ in each

  ಆಷಾಢ

- *Trace it:* ಢ three times, saying *ḍha* as you finish each one
- *Look:* back at any page of this book and find ಢ once more

Before you move on

Which character is this — ಢ? What sound does it carry? (***ḍha***.) Two things make it different from ಡ — name them. (**The tongue curls back, and the breath follows**.)

80.7 ಠ — the last one

Before the new one: ಢ — what two things make it what it is? Today's is the same pair of moves on ಟ.

Script you'll notice: ಠ

ಠ — *ṭha*.

It is a **consonant**, and in this script a consonant is never bare: it comes with an *a* already in it. So it is not *ṭh*, it is **ṭha**.

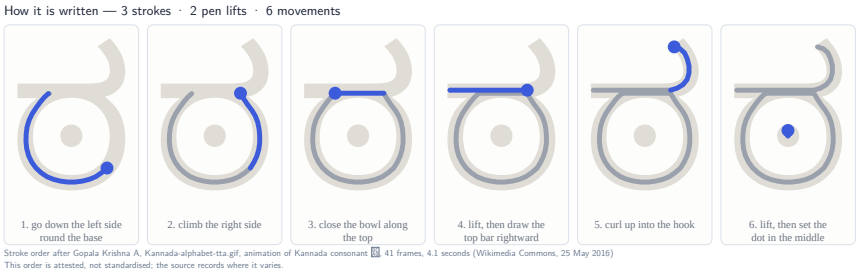

no breath	breath
ಟ	ಠ

This is the last character in this book that nothing had taught. It appears three times, all of them in the same month name. From here on, every Kannada character these pages print is one somebody has handed you.

You already say these:

- ಜ್ಯೇಷ್ಠ *jyēṣṭha* — Jyeshtha, the third traditional month

Writing: ಠ

How ಠ *is written, stroke by stroke*

- **1.** start at the upper left of the bowl and go down the left side and round the base
- **2.** without lifting, climb the right side
- **3.** without lifting, close the bowl leftward along the top
- **4.** lift, then draw the top bar from left to right
- **5.** without lifting, curl up into the hook
- **6.** lift, then set the dot in the middle

Pen lifts: 2. The round bowl is one run, closing back along the top as in ದ; then come the curled bar and last the dot, each after a lift.

  ಜ್ಯೇಷ್ಠ
- *Trace it:* ಠ three times, saying *ṭha* as you finish each one
- *Look:* back at any page of this book and find ಠ once more

Which character is this — ಠ? What sound does it carry? (***ṭha***.)
Which letter is it the breathy partner of? (ಟ.)

80.8 (ಖ ಘ ಠ ಢ ಧ ಫ ಭ) — seven characters, one move

Close the lessons before this one. Say thank you, and say good morning. Name the breathy character inside each.

Script: seven shapes, one move

Seven characters, and **they are one move done seven times**: take a consonant you already read and let the breath out after it. Hold a hand in front of your mouth and the difference is not subtle.

no breath	breath
ಕ *ka*	ಖ *kha*
ಗ *ga*	ಘ *gha*
ಟ *ṭa*	ಠ *ṭha*
ಡ *ḍa*	ಢ *ḍha*
ದ *da*	ಧ *dha*
ಪ *pa*	ಫ *pha*
ಬ *ba*	ಭ *bha*

Read the right-hand column against the left and the shapes stop being seven new things to memorise. **English does not write this difference at all**, which is why the romanization has to spell it with an added *h* — and why *ph* on that line is a *p* with breath, never the *f* of *phone*.

Two of the seven are in one word each, and both words are months: ಮಾಘ and ಆಷಾಢ. ಠ is in ಜ್ಯೇಷ್ಠ, three times in the whole book, and it was the last character these pages printed that nothing had taught.

Your turn

- *Look:* at these words and find the breathy character in each

  ಧನ್ಯವಾದ · ಶುಭೋದಯ · ಕಾಫಿ · ಜ್ಯೇಷ್ಠ

- *Say it:* ದ then ಧ, and ಬ then ಭ

- *Feel:* the breath on the second of each pair, with a hand in front of your mouth
- *Say it:* which of the seven you have seen most often on these pages

Before you move on

Which letter is ದ with the breath? (ಧ.) Which is ಬ with the breath? (ಭ.) Is ಫ the *f* of *phone*? (**No** — a *p* with breath after it.) Which of the seven was the last character in this book with nothing teaching it? (ಠ.)

Chapter 81

The Ones That Never Came Back

Modes: **eyes** (3) **Hands-free start:** the first 2 of 3 lessons.

> ***By the end of this chapter:*** I can recognise every Kannada character this book taught early and then never asked for again, sorted by what kind of thing it is.
>
> *From cold: name all ten consonants, place each in the row of the mouth that makes it, and identify the palatal nasal the book has not printed since the chapter that taught it.*

81.1 (◌ಾ ◌ಿ ◌ೀ ◌ೊ ◌ೋ ◌ೃ ◌ಂ ◌ಃ) — eight that cannot stand alone

> Two of these you met in the book's first handful of pages. Name the one that lengthens a vowel, and the one that makes it *i*.

Script: six signs and two marks

Six vowel signs, cold. Each attaches to a consonant and replaces the *a* built into it:

sign	sound
◌ಾ	$\bar{a}$
◌ಿ	i
◌ೀ	e
◌ೊ	o
◌ೋ	$\bar{o}$
◌ೃ	r

The last is the odd one. ್ಱ writes a vowel that behaves like a consonant in the mouth, inherited from Sanskrit and rare enough that a reader can go pages without meeting it — which is exactly why it is here.

Your turn

Two marks now, and they are not vowel signs at all.

Read these aloud:

- ಂ — say what it adds to the syllable it follows
- ಃ — say the same for this one
- ೊ and ೋ back to back, and say what separates them

ಂ and ಃ ride *after* a syllable rather than reshaping its vowel. That is the division worth keeping: a vowel sign changes the sound already there, a mark adds one behind it.

Before you move on

Which of the eight writes a vowel that acts like a consonant? (್ಱ.)
Which two follow a syllable instead of reshaping it? (ಂ and ಃ.)
And which one only makes the vowel longer? (ಾ.)

81.2 (ಇ ಈ ಉ ಊ ಓ) — five that need nothing to lean on

Two full-size letters, not signs. Name the one that says *i* and the one that says *u*.

Script: the same vowel, two shapes

standing letter	sound	when you use it
ಇ	*i*	the word opens on the vowel
ಈ	*ī*	the same, held long
ಉ	*u*	the word opens on the vowel
ಊ	*ū*	the same, held long
ಓ	*ō*	the word opens on the vowel

Every one of these has a partner among the signs. The difference is not the sound — it is **whether a consonant is there to carry it.** A vowel with nothing in front of it must be written full-size; the moment a consonant arrives, the same vowel shrinks to a sign hanging off it.

Two pairs make this visible: ಇ against ◌ಿ, and ಓ against ◌ೋ. Same vowel, twice, and the shape tells you where in the word you are.

Your turn

Read these aloud:

- ಈ and ಊ — say which is the long one in each pair
- ◌ಾ — and say why this one has no standing partner among the five

Before you move on

What decides whether a vowel is written full-size or as a sign? (**Whether a consonant is there to carry it.**) Name the standing letter that pairs with ◌ೋ. (ಓ.)

81.3 (ಕ ಗ ಚ ಝ ಞ ಥ ಪ ಯ ಸ ಹ) — ten, gathered at last

Two that differ by voice alone. Read ಕ, then ಗ, and say what your throat does on the second that it did not do on the first.

Script: ten, sorted by where they are made

These ten arrived one per chapter, scattered from the book's opening to well past its middle, and no page ever put them side by side. Sorted by the mouth rather than by the order you met them:

where	letters
throat	ಕ *ka* · ಗ *ga*
palate	ಚ *ca* · ಝ *jha* · ಞ *ña*
teeth	ಥ *tha*
lips	ಪ *pa*

Read down the middle row. ಚ, ಝ and ಞ are made in the same place, and they differ only in voice, breath and nasality — which is the organising idea the whole Kannada consonant grid is built on.

ಞ is the one to look at twice. It is the nasal of the palatal row and is rare on the page; a reader who has not seen it since the chapter that taught it will not place it at all.

Your turn

Three that belong to no stop row, and one more from above.

Read these aloud:

- ಯ — a glide, not a stop
- ಸ — the hiss
- ಹ — the breath, and the letter your first *yes* opens on
- ಥ — and say which row it belongs to

Before you move on

Which of the ten is the palatal nasal? (ಞ.) Which pair differs by voice alone? (ಕ and ಗ.) And which one opens the word for *yes*? (ಹ.)

Chapter 82

Not Feeling Well

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say I am tired, have a cold, a cough or a headache, and that I need rest.
>
> *Complete the last lesson of chapter 82: I can say I am tired, have a cold, a cough or a headache, and that I need rest.*

82.1 ಆಯಾಸ (āyāsa) — tiredness

> Before the new one: say the Kannada for fever, then the Kannada for pain.

You'll want to know: ಆಯಾಸ

ಆಯಾಸ (*āyāsa*) — "tiredness", the heavy feeling at the end of a long day.

ನನಗೆ ಆಯಾಸ ಆಗಿದೆ (*nanage āyāsa āgide*) — "I am tired", literally "to me tiredness has happened". The person sits in **ನನಗೆ**, "to me", the same way **ನನಗೆ ಹಸಿವು** says "I am hungry".

The word, taken apart — its roots and family

ಆಯಾಸ (*āyāsa*) is Sanskrit *āyāsa*, "exertion, fatigue", taken over whole as a learned loan, a tatsama.

What you've built

A first word for how the body feels at the end of the day.

Your turn

- *Say it:* *āyāsa*
- *Say it:* *āyāsa*, once more
- *Say it:* say *nanage āyāsa āgide*
- *Recall:* say the Kannada for fever, then the Kannada for pain, then say *āyāsa* again

Before you move on

What does **ಆಯಾಸ** mean? ("Tiredness".) Say it once more.

82.2 ಶೀತ (śīta) — a cold

Before the new one: say the Kannada for pain, then the Kannada for tiredness.

You'll want to know: ಶೀತ

ಶೀತ (*śīta*) — "a cold", the kind with a runny nose. The word also means "cold, chill".

ನನಗೆ ಶೀತ ಆಗಿದೆ (*nanage śīta āgide*) — "I have a cold".

The word, taken apart — its roots and family

ಶೀತ (*śīta*) is Sanskrit *śīta*, "cold", taken over whole as a learned loan, a tatsama (CDIAL 12485). In Kannada it also names the common cold.

What you've built

An illness, said the same way as tiredness.

Your turn

- *Say it:* *śīta*
- *Say it:* *śīta*, once more
- *Say it:* say *nanage śīta āgide*

- *Recall:* say the Kannada for pain, then the Kannada for tiredness, then say *śīta* again

Before you move on

What does **ಶೀತ** mean? ("A cold".) Say it once more.

82.3 ಕೆಮ್ಮು (kemmu) — a cough

Before the new one: say the Kannada for tiredness, then the Kannada for a cold.

You'll want to know: ಕೆಮ್ಮು

ಕೆಮ್ಮು (*kemmu*) — "a cough", and also the verb "to cough".

ಕೆಮ್ಮು ಇದೆ (*kemmu ide*) — "there is a cough", the plain way to tell a doctor.

The word, taken apart — its roots and family

ಕೆಮ್ಮು (*kemmu*) is native Dravidian, one word with Tamil *cerumu* (DEDR 1964).

What you've built

A second complaint for the doctor.

Your turn

- *Say it: kemmu*
- *Say it: kemmu*, once more
- *Say it:* say *kemmu ide*
- *Recall:* say the Kannada for tiredness, then the Kannada for a cold, then say *kemmu* again

Before you move on

What does **ಕೆಮ್ಮು** mean? ("A cough".) Say it once more.

82.4 ತಲೆನೋವು (talenōvu) — a headache

Before the new one: say the Kannada for a cold, then the Kannada for a cough.

You'll want to know: ತಲೆನೋವು

ತಲೆನೋವು (*talenōvu*) — "a headache". It is two words you already know, joined: **ತಲೆ** (*tale*), "head", and **ನೋವು** (*nōvu*), "pain".

ನನಗೆ ತಲೆನೋವು (*nanage talenōvu*) — "I have a headache".

The word, taken apart — its roots and family

ತಲೆನೋವು (*talenōvu*) is native Dravidian: *tale*, "head" (DEDR 3103, with Tamil *talai*), and *nōvu*, "pain" (DEDR 3793, with Tamil *nō*).

What you've built

Two known words make a new one: head + pain.

Your turn

- *Say it: talenōvu*
- *Say it: talenōvu*, once more
- *Say it:* say *nanage talenōvu*
- *Recall:* say the Kannada for a cold, then the Kannada for a cough, then say *talenōvu* again

Before you move on

What does **ತಲೆನೋವು** mean? ("A headache".) Say it once more.

82.5 ವಿಶ್ರಾಂತಿ (viśrānti) — rest

Before the new one: say the Kannada for a cough, then the Kannada for a headache.

You'll want to know: ವಿಶ್ರಾಂತಿ

ವಿಶ್ರಾಂತಿ (*viśrānti*) — "rest".

ವಿಶ್ರಾಂತಿ ತೆಗೆದುಕೊಳ್ಳಿ (*viśrānti tegedukoḷḷi*) — "please take rest", what you say to a friend who is unwell. The verb is **ತೆಗೆದುಕೊ**, "take", which you already know.

The word, taken apart — its roots and family

ವಿಶ್ರಾಂತಿ (*viśrānti*) is Sanskrit *viśrānti*, "rest, repose", taken over whole as a learned loan, a tatsama.

What you've built

The answer to tiredness, a cold and a headache.

Your turn

- *Say it: viśrānti*
- *Say it: viśrānti*, once more
- *Say it:* tell a friend *viśrānti tegedukoḷḷi*
- *Recall:* say the Kannada for a cough, then the Kannada for a headache, then say *viśrānti* again

Before you move on

What does **ವಿಶ್ರಾಂತಿ** mean? ("Rest".) Say it once more.

Chapter 83

How You Feel Inside

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name sadness, worry, fear, anger and laughter.
>
> *Complete the last lesson of chapter 83: I can name sadness, worry, fear, anger and laughter.*

83.1 ದುಃಖ (duḥkha) — sadness

> Before the new one: say the Kannada for a headache, then the Kannada for rest.

You'll want to know: ದುಃಖ

ದುಃಖ (*duḥkha*) — "sadness, sorrow". The two small circles ◌ಃ after **ದು** are the *visarga*: a breath at the end of the syllable, *duḥ-kha*.

It is the opposite of **ಸಂತೋಷ** (*santōṣa*), "happiness", which you met at the start.

The word, taken apart — its roots and family

ದುಃಖ (*duḥkha*) is Sanskrit *duḥkha*, "difficulty, pain", taken over whole as a learned loan, a tatsama (CDIAL 6375).

What you've built

The other side of santōṣa.

Your turn

- *Say it: duḥkha*
- *Say it: duḥkha*, once more
- *Say it:* say *duḥkha* and then *santōṣa*
- *Recall:* say the Kannada for a headache, then the Kannada for rest, then say *duḥkha* again

Before you move on

What does **ದುಃಖ** mean? ("Sadness".) Say it once more.

83.2 ಚಿಂತೆ (cinte) — worry

Before the new one: say the Kannada for rest, then the Kannada for sadness.

You'll want to know: ಚಿಂತೆ

ಚಿಂತೆ (*cinte*) — "worry".

ಚಿಂತೆ ಮಾಡಬೇಡಿ (*cinte māḍabēḍi*) — "don't worry". The ending **-ಬೇಡಿ** is **ಬೇಡ**, "don't want", said politely.

The word, taken apart — its roots and family

ಚಿಂತೆ (*cinte*) is Sanskrit *cintā*, "thought, care", taken over whole as a learned loan, a tatsama, with Kannada's *-e* for the Sanskrit *-ā* (CDIAL 4816). The Sanskrit word meant thought in general; Kannada narrowed it to anxious thought.

What you've built

A feeling, and a kind thing to say about it.

Your turn

- *Say it: cinte*
- *Say it: cinte*, once more

- *Say it:* say *cinte māḍabēḍi*
- *Recall:* say the Kannada for rest, then the Kannada for sadness, then say *cinte* again

ಸ್ವಲ್ಪ ಜೋರಾಗಿ (*svalpa jōrāgi*) — “a little louder”, with **ಸ್ವಲ್ಪ**, “a little”.

The word, taken apart — its roots and family

ಜೋರಾಗಿ (*jōrāgi*) is *jōr*, “force, loudness”, with the adverb ending *-āgi*, “in a … way”. *Jōr* is a loan from Persian *zōr*, “strength, force”, which came through Hindustani.

What you’ve built

A second way of saying how.

Your turn

- *Say it:* *jōrāgi*
- *Say it:* *jōrāgi*, once more
- *Say it:* say *svalpa jōrāgi*

- *Recall:* say the Kannada for slowly, then the Kannada for once more, then say *jōrāgi* again

Before you move on

What does **ಜೋರಾಗಿ** mean? ("Loudly".) Say it once more.

85.4 ಅರ್ಥ (artha) — meaning

Before the new one: say the Kannada for once more, then the Kannada for loudly.

You'll want to know: ಅರ್ಥ

ಅರ್ಥ (*artha*) — "meaning". You have seen it inside **ಅರ್ಥಮಾಡಿಕೊ**, "to understand", which is "to make the meaning one's own".

ಇದರ ಅರ್ಥ ಏನು? (*idara artha ēnu?*) — "what is the meaning of this?"

The word, taken apart — its roots and family

ಅರ್ಥ (*artha*) is Sanskrit *artha*, "aim, cause, thing", taken over whole as a learned loan, a tatsama (CDIAL 638). In Kannada the "aim" of a word is its meaning.

What you've built

The piece hidden inside the verb to understand.

Your turn

- *Say it: artha*
- *Say it: artha*, once more
- *Say it:* ask *idara artha ēnu?*
- *Recall:* say the Kannada for once more, then the Kannada for loudly, then say *artha* again

85.5 ಬರೆದು ಕೊಡಿ (baredu koḍi) — please write it down

Before the new one: say the Kannada for loudly, then the Kannada for meaning.

You'll want to know: ಬರೆದು ಕೊಡಿ

ಬರೆದು ಕೊಡಿ (*baredu koḍi*) — "please write it down (for me)", literally "having written, give". Both verbs are ones you know: **ಬರೆ**, "write", and **ಕೊಡು**, "give".

When a word will not stay in the ear, ask for it on paper.

The word, taken apart — its roots and family

ಬರೆದು ಕೊಡಿ (*baredu koḍi*) is native Dravidian: *baredu*, "having written", from *bare*, "to write" (DEDR 5263), and *koḍi*, the polite form of *koḍu*, "to give" (DEDR 2053). You ask someone to "write and give". DEDR 5263 compares, with a query, Prakrit *rajju*.

What you've built

Two known verbs make one request.

Your turn

- *Say it: baredu koḍi*
- *Say it: baredu koḍi*, once more
- *Say it:* say *baredu koḍi*
- *Recall:* say the Kannada for loudly, then the Kannada for meaning, then say *baredu koḍi* again

Before you move on

What does **ಬರೆದು ಕೊಡಿ** mean? ("Please write it down".) Say it once more.

Chapter 93

Hot, Cold and Hurt

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say I feel dizzy or hot, that I am at ease, and name a wound and vomiting.
>
> *Complete the last lesson of chapter 93: I can say I feel dizzy or hot, that I am at ease, and name a wound and vomiting.*

93.1 ತಲೆಸುತ್ತು (talesuttu) — dizziness

> Before the new one: say the Kannada for a job, then the Kannada for English.

You'll want to know: ತಲೆಸುತ್ತು

ತಲೆಸುತ್ತು (*talesuttu*) — "dizziness", literally "head-spinning": **ತಲೆ** (*tale*), "head", with **ಸುತ್ತು** (*suttu*), "to go round".

ನನಗೆ ತಲೆಸುತ್ತು (*nanage talesuttu*) — "I feel dizzy", built like **ನನಗೆ ತಲೆನೋವು**.

The word, taken apart — its roots and family

ತಲೆಸುತ್ತು (*talesuttu*) is native Dravidian: *tale*, "head" (DEDR 3103), and *suttu*, "going round, winding" (DEDR 2715). Dizziness is the head going round.

What you've built

Head, and a turn, make one more head word.

Your turn

- *Say it: talesuttu*
- *Say it: talesuttu*, once more
- *Say it:* say *nanage talesuttu*
- *Recall:* say the Kannada for a job, then the Kannada for English, then say *talesuttu* again

Before you move on

What does **ತಲೆಸುತ್ತು** mean? ("Dizziness".) Say it once more.

93.2 ಸೆಕೆ (seke) — sultry heat

Before the new one: say the Kannada for English, then the Kannada for dizziness.

You'll want to know: ಸೆಕೆ

ಸೆಕೆ (*seke*) — "sultry, sticky heat", the heat that makes you **ಬೆವರು**, "sweat".
ತುಂಬಾ ಸೆಕೆ (*tumbā seke*) — "it's very hot and sticky".

The word, taken apart — its roots and family

Where **ಸೆಕೆ** (*seke*) comes from is uncertain: DEDR does not record it. It looks like the northern verb for "to heat, foment", which CDIAL 13581 reconstructs as **sēkk*, "heat, foment", but no source records the Kannada word.

What you've built

Heat you can feel on the skin.

Your turn

- *Say it: seke*
- *Say it: seke*, once more
- *Say it:* say *tumbā seke*

- *Recall:* say the Kannada for English, then the Kannada for dizziness, then say *seke* again

Before you move on

What does **ಸೆಕೆ** mean? ("Sultry heat".) Say it once more.

93.3 ಆರಾಮ (ārāma) — ease, comfort

Before the new one: say the Kannada for dizziness, then the Kannada for sultry heat.

You'll want to know: ಆರಾಮ

ಆರಾಮ (*ārāma*) — "ease, comfort, rest".

ಆರಾಮಾಗಿದ್ದೀರಾ? (*ārāmāgiddīrā?*) — "are you well, are you at ease?", a warm way to ask how someone is.

The word, taken apart — its roots and family

ಆರಾಮ (*ārāma*) is Sanskrit *ārāma*, "delight; garden", taken over whole as a learned loan, a tatsama (CDIAL 1317). In Kannada the delight became ease and comfort.

What you've built

The feeling that comes after rest.

Your turn

- *Say it:* *ārāma*
- *Say it:* *ārāma*, once more
- *Say it:* ask *ārāmāgiddīrā?*
- *Recall:* say the Kannada for dizziness, then the Kannada for sultry heat, then say *ārāma* again

Before you move on

What does **ಆರಾಮ** mean? ("Ease, comfort".) Say it once more.

93.4 ಗಾಯ (gāya) — a wound, an injury

Before the new one: say the Kannada for sultry heat, then the Kannada for at ease.

You'll want to know: ಗಾಯ

ಗಾಯ (*gāya*) — "a wound, an injury".
ಗಾಯ ಆಗಿದೆ (*gāya āgide*) — "(I) got hurt".

The word, taken apart — its roots and family

ಗಾಯ (*gāya*) comes from Sanskrit *ghāta*, "killing; blow, bruise", reshaped to Kannada sounds: a tadbhava (CDIAL 4460). Prakrit *ghāya* shows the middle step.

What you've built

What the hospital treats.

Your turn

- *Say it:* *gāya*
- *Say it:* *gāya*, once more
- *Say it:* say *gāya āgide*
- *Recall:* say the Kannada for sultry heat, then the Kannada for at ease, then say *gāya* again

Before you move on

What does **ಗಾಯ** mean? ("A wound, an injury".) Say it once more.

93.5 ವಾಂತಿ (vānti) — vomiting

Before the new one: say the Kannada for at ease, then the Kannada for a wound.

You'll want to know: ವಾಂತಿ

ವಾಂತಿ (*vānti*) — "vomiting".

ವಾಂತಿ ಆಗುತ್ತಿದೆ (*vānti āguttide*) — "(I) feel like vomiting". It is a word to say to a doctor.

The word, taken apart — its roots and family

ವಾಂತಿ (*vānti*) is Sanskrit *vānti*, "vomiting", taken over whole as a learned loan, a tatsama (CDIAL 11518).

What you've built

One more word for the doctor.

Your turn

- *Say it: vānti*
- *Say it: vānti*, once more
- *Say it:* say *vānti*
- *Recall:* say the Kannada for at ease, then the Kannada for a wound, then say *vānti* again

Before you move on

What does **ವಾಂತಿ** mean? ("Vomiting".) Say it once more.

94.1 ತಿಂಡಿ (tiṇḍi) — a snack, a light meal

> Before the new one: say the Kannada for a wound, then the Kannada for vomiting.

You'll want to know: ತಿಂಡಿ

ತಿಂಡಿ (*tiṇḍi*) — "a snack, a light meal", also the word for breakfast. It comes from **ತಿನ್ನು** (*tinnu*), "to eat".

ತಿಂಡಿ ಆಯ್ತಾ? (*tiṇḍi āytā?*) — "have you had breakfast?"

The word, taken apart — its roots and family

ತಿಂಡಿ (*tiṇḍi*) is native Dravidian, from *tin*, "to eat", and DEDR 3263 lists *tiṇḍi*, "food", itself; the entry also has Tamil *tiṉ*.

What you've built

Something to eat, from the verb to eat.

Your turn

- *Say it:* *tiṇḍi*
- *Say it:* *tiṇḍi*, once more
- *Say it:* ask *tiṇḍi āytā?*

You'll want to know: ಲೋಟ

ಲೋಟ (*lōṭa*) — "a tumbler, a drinking glass".
ಒಂದು ಲೋಟ ನೀರು (*ondu lōṭa nīru*) — "a glass of water".

The word, taken apart — its roots and family

ಲೋಟ (*lōṭa*) came from Hindustani *lōṭā*, "a small round metal pot". Its deeper origin is not settled.

What you've built

What water comes in.

Your turn

- *Say it: lōṭa*
- *Say it: lōṭa*, once more
- *Say it:* say *ondu lōṭa nīru*
- *Recall:* say the Kannada for a snack, then the Kannada for a spoon, then say *lōṭa* again

Before you move on

What does **ಲೋಟ** mean? ("A tumbler, a drinking glass".) Say it once more.

94.4 ತಟ್ಟೆ (taṭṭe) — a plate

Before the new one: say the Kannada for a spoon, then the Kannada for a glass.

You'll want to know: ತಟ್ಟೆ

ತಟ್ಟೆ (*taṭṭe*) — "a plate". The doubled ಟ್ಟ is stacked, as you saw in ದಯವಿಟ್ಟು.

The word, taken apart — its roots and family

ತಟ್ಟೆ (*taṭṭe*) is native Dravidian, one word with Tamil *taṭṭu* (DEDR 3035). DEDR lists *taṭṭe* itself, "flatness; a flat basket", and notes Marathi *tāṭ*, "a dining plate".

What you've built

What food comes on.

Your turn

- *Say it: taṭṭe*
- *Say it: taṭṭe*, once more
- *Say it:* say *taṭṭe*

Before you move on

What does ತಟ್ಟೆ mean? ("A plate".) Say it once more.

94.5 ಬೆಲೆ (bele) — price

Before the new one: say the Kannada for a glass, then the Kannada for a plate.

You'll want to know: ಬೆಲೆ

ಬೆಲೆ (*bele*) — "price".

ಇದರ ಬೆಲೆ ಎಷ್ಟು? (*idara bele eṣṭu?*) — "what is the price of this?", with **ಎಷ್ಟು**, "how much".

The word, taken apart — its roots and family

ಬೆಲೆ (*bele*) is native Dravidian, one word with Tamil *vilai* and Telugu *vela* (DEDR 5421). DEDR lists *bele*, "price", under *bil*, "to sell": the old *v-* has become *b-*.

What you've built

The question before paying.

Your turn

- *Say it: bele*
- *Say it: bele*, once more
- *Say it:* ask *idara bele eṣṭu?*
- *Recall:* say the Kannada for a glass, then the Kannada for a plate, then say *bele* again

Before you move on

What does **ಬೆಲೆ** mean? ("Price".) Say it once more.

Chapter 98

Moods

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can name boredom, enthusiasm, shyness, alarm and peace of mind.
>
> *Complete the last lesson of chapter 98: I can name boredom, enthusiasm, shyness, alarm and peace of mind.*

98.1 ಬೇಸರ (bēsara) — boredom, weariness of spirit

Before the new one: say the Kannada for don't forget, then the Kannada for kindness.

You'll want to know: ಬೇಸರ

ಬೇಸರ (*bēsara*) — "boredom", and the low mood that comes with it.

ನನಗೆ ಬೇಸರ ಆಗಿದೆ (*nanage bēsara āgide*) — "I'm bored", with the person in **ನನಗೆ** once more.

The word, taken apart — its roots and family

ಬೇಸರ (*bēsara*) is native Dravidian, one word with Tamil *vēcāṭai* and Malayalam *vēcāṟu* (DEDR 5524). DEDR gives Kannada *bēsaṟ(u)*, "weariness, disgust", and adds that some Kannada forms may instead come from Hindi *bē-zār*, "weary", a Persian word.

What you've built

A mood, said like hunger and tiredness.

Your turn

- *Say it: bēsara*
- *Say it: bēsara*, once more
- *Say it:* say *nanage bēsara āgide*
- *Recall:* say the Kannada for don't forget, then the Kannada for kindness, then say *bēsara* again

Before you move on

What does **ಬೇಸರ** mean? ("Boredom, weariness of spirit".) Say it once more.

98.2 ಉತ್ಸಾಹ (utsāha) — enthusiasm, eagerness

Before the new one: say the Kannada for kindness, then the Kannada for boredom.

You'll want to know: ಉತ್ಸಾಹ

ಉತ್ಸಾಹ (*utsāha*) — "enthusiasm, eagerness", the opposite of **ಬೇಸರ**.

The word, taken apart — its roots and family

ಉತ್ಸಾಹ (*utsāha*) is Sanskrit *utsāha*, "power, firmness; joy", taken over whole as a learned loan, a tatsama (CDIAL 1882).

What you've built

The mood that gets things started.

Your turn

- *Say it: utsāha*
- *Say it: utsāha*, once more

- *Say it:* say *utsāha*
- *Recall:* say the Kannada for kindness, then the Kannada for boredom, then say *utsāha* again

>
> *Complete the last lesson of chapter 154: I can say what is not so, and ask yes-or-no questions.*

154.1 ಯಾರೂ (yārū) — nobody (with a negative verb)

Before the new one: say the Kannada for to pull, then the Kannada for to cry.

You'll want to know: ಯಾರೂ

ಯಾರೂ — *yārū* — "nobody (with a negative verb)". Kannada negates a verb by joining **ಇಲ್ಲ** (*illa*) onto it: **ಯಾರೂ ಬರಲಿಲ್ಲ** — *yārū baralilla* — "Nobody came." **ಇಲ್ಲ** also means "is not there"; to say something is not a thing, it uses **ಅಲ್ಲ** (*alla*): **ಇದು ನನ್ನ ಮನೆ ಅಲ್ಲ** — *idu nanna mane alla* — "This is not my house."

The word, taken apart — its roots and family

ಯಾರೂ (*yārū*) is native Dravidian: *yāru*, "who" (DEDR 5151), with *-ū*, "even": with a "not" verb, "not even anyone".

What you've built

One more word for this chapter.

Your turn

- *Say it:* *yārū*
- *Say it:* *yārū*, once more
- *Say it:* say *yārū*
- *Recall:* say the Kannada for to pull, then the Kannada for to cry, then say *yārū* again

- *Recall:* say the Kannada for nobody, then the Kannada for never, then say *elliyū* again

Before you move on

What does ಎಲ್ಲಿಯೂ mean? ("Nowhere, not anywhere (with a negative verb)".) Say it once more.

154.4 ಯಾರಾದರೂ (yārādarū) — anyone, someone

Before the new one: say the Kannada for never, then the Kannada for nowhere.

You'll want to know: ಯಾರಾದರೂ

ಯಾರಾದರೂ — *yārādarū* — "anyone, someone". A yes-or-no question changes the last vowel of the sentence's final word to **-ಆ** (*-ā*): **ಇದ್ದಾರೆ** becomes **ಯಾರಾದರೂ ಇದ್ದಾರಾ?** — *yārādarū iddārā?* — "Is anyone there?"

The word, taken apart — its roots and family

ಯಾರಾದರೂ (*yārādarū*) is native Dravidian: *yāru*, "who" (DEDR 5151), and *ādarū*, "even if it is", from *āgu*, "to become" (DEDR 333): "whoever it may be". DEDR 333 compares Sanskrit *ām*.

What you've built

Before the new one: say the Kannada for nowhere, then the Kannada for anyone.

You'll want to know: ಏನಾದರೂ

ಏನಾದರೂ — *ēnādarū* — "anything, something". **ನಿಮಗೆ ಏನಾದರೂ ಬೇಕಾ?** — *nimage ēnādarū bēkā?* — "Do you need anything?"

The word, taken apart — its roots and family

ಏನಾದರೂ (*ēnādarū*) is native Dravidian: *ēnu*, "what" (DEDR 5151), and *ādarū*, "even if it is", from *āgu*, "to become" (DEDR 333): "whatever it may be". DEDR 333 compares Sanskrit *ām*.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ēnādarū*
- *Say it:* *ēnādarū*, once more
- *Say it:* say *ēnādarū*
- *Recall:* say the Kannada for nowhere, then the Kannada for anyone, then say *ēnādarū* again

Before you move on

What does **ಏನಾದರೂ** mean? ("Anything, something".) Say it once more.

157.1 ವೇಳಾಪಟ್ಟಿ (vēḷāpaṭṭi) — a timetable

> Before the new one: say the Kannada for to decide, then the Kannada for to expect.

You'll want to know: ವೇಳಾಪಟ್ಟಿ

ವೇಳಾಪಟ್ಟಿ — *vēḷāpaṭṭi* — "a timetable".

Read it: the board

The board says **ಬಸ್: ಬೆಳಿಗ್ಗೆ ೮** — *bas: beḷigge eṇṭu* — "Bus: 8 a.m." The bus leaves at eight, so be there before eight.

The word, taken apart — its roots and family

ವೇಳಾಪಟ್ಟಿ (*vēḷāpaṭṭi*) is *vēḷā*, "time", from Sanskrit *velā*, "limit, time" (CDIAL 12115), and *paṭṭi*, "list", from Sanskrit *paṭṭikā*, "slab, tablet" (CDIAL 7699): a table of times. CDIAL thinks *velā* probably came into Sanskrit from Dravidian.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *vēḷāpaṭṭi*
- *Say it:* *vēḷāpaṭṭi*, once more
- *Say it:* say *vēḷāpaṭṭi*
- *Recall:* say the Kannada for to decide, then the Kannada for to expect, then say *vēḷāpaṭṭi* again

Before you move on

What does **ವೇಳಾಪಟ್ಟಿ** mean? ("A timetable".) Say it once more.

157.2 ಸೂಚನೆ (sūcane) — a notice, an instruction

Before the new one: say the Kannada for to expect, then the Kannada for a timetable.

You'll want to know: ಸೂಚನೆ

ಸೂಚನೆ — *sūcane* — "a notice, an instruction".

Read it: the notice

The notice says **ಇಂದು ಅಂಗಡಿ ಮುಚ್ಚಿದೆ** — *indu aṅgaḍi muccide* — "The shop is closed today." Come back on another day.

The word, taken apart — its roots and family

ಸೂಚನೆ (*sūcane*) is Sanskrit *sūcanā*, "a pointing out, an indication", with Kannada's *-e* for the Sanskrit *-ā*.

What you've built

One more word for this chapter.

Your turn

- *Say it: sūcane*
- *Say it: sūcane*, once more
- *Say it:* say *sūcane*
- *Recall:* say the Kannada for to expect, then the Kannada for a timetable, then say *sūcane* again

Before you move on

What does **ಸೂಚನೆ** mean? ("A notice, an instruction".) Say it once more.

157.3 ಬಾಡಿಗೆ (bāḍige) — rent; for hire

Before the new one: say the Kannada for a timetable, then the Kannada for a notice.

You'll want to know: ಬಾಡಿಗೆ

ಬಾಡಿಗೆ — *bāḍige* — "rent; for hire". The money for a house: **ಮನೆ ಬಾಡಿಗೆ** — *mane bāḍige* — "the rent for the house".

The word, taken apart — its roots and family

ಬಾಡಿಗೆ (*bāḍige*) is usually traced to Hindustani *bhāṛā*, "rent, fare, hire", with the Kannada ending *-ige*.

What you've built

One more word for this chapter.

Your turn

- *Say it: bāḍige*
- *Say it: bāḍige*, once more
- *Say it:* say *bāḍige*

- *Recall:* say the Kannada for a timetable, then the Kannada for a notice, then say *bāḍige* again

Before you move on

What does **ಬಾಡಿಗೆ** mean? ("Rent; for hire".) Say it once more.

157.4 ಜಾಹೀರಾತು (jāhīrātu) — an advertisement

Before the new one: say the Kannada for a notice, then the Kannada for rent.

You'll want to know: ಜಾಹೀರಾತು

ಜಾಹೀರಾತು — *jāhīrātu* — "an advertisement".

Read it: the advert

The advert says **ಮನೆ ಬಾಡಿಗೆಗೆ ಇದೆ** — *mane bāḍigege ide* — "House for rent."

The word, taken apart — its roots and family

ಜಾಹೀರಾತು (*jāhīrātu*) came through Hindustani *jāhirāt*, "public notices", from Arabic *ẓāhir*, "manifest, public": an advertisement makes a thing known.

What you've built

One more word for this chapter.

Your turn

- *Say it: jāhīrātu*
- *Say it: jāhīrātu*, once more
- *Say it:* say *jāhīrātu*
- *Recall:* say the Kannada for a notice, then the Kannada for rent, then say *jāhīrātu* again

Before you move on

What does **ಜಾಹೀರಾತು** mean? ("An advertisement".) Say it once more.

157.5 ರಸೀದಿ (rasīdi) — a receipt

Before the new one: say the Kannada for rent, then the Kannada for an advertisement.

You'll want to know: ರಸೀದಿ

ರಸೀದಿ — *rasīdi* — "a receipt". Ask for it when you pay: **ದಯವಿಟ್ಟು ರಸೀದಿ ಕೊಡಿ** — *dayaviṭṭu rasīdi koḍi* — "The receipt, please."

The word, taken apart — its roots and family

ರಸೀದಿ (*rasīdi*) is a loan from Persian *rasīd*, "arrived; a receipt", through Hindustani: a receipt says the money has arrived.

What you've built

One more word for this chapter.

Your turn

- *Say it: rasīdi*
- *Say it: rasīdi*, once more
- *Say it:* say *rasīdi*
- *Recall:* say the Kannada for rent, then the Kannada for an advertisement, then say *rasīdi* again

Before you move on

What does **ರಸೀದಿ** mean? ("A receipt".) Say it once more.

157.6 Saying no and looking back — a first pass

Say the words for an advertisement and a receipt.

Your turn

Say these aloud:

- nobody, never, nowhere, anyone, anything
- recently, already, last, once, to spend

Before you move on

Nobody? (ಯಾರೂ, *yārū.*) Never? (ಎಂದಿಗೂ, *endigū.*) Nowhere? (ಎಲ್ಲಿಯೂ, *elliyū.*) Anyone? (ಯಾರಾದರೂ, *yārādarū.*) Anything? (ಏನಾದರೂ, *ēnādarū.*) Recently? (ಇತ್ತೀಚೆಗೆ, *ittīcege.*) Already? (ಈಗಾಗಲೇ, *īgāgalē.*) Last? (ಕಳೆದ, *kaḷeda.*) Once? (ಒಮ್ಮೆ, *omme.*) To spend? (ಕಳೆ, *kaḷe.*)

157.7 Looking ahead and reading signs — a second pass

Say the words for next and from now on.

Your turn

Say these aloud:

- next, from now on, the future, to decide, to expect
- a timetable, a notice, rent, an advertisement, a receipt

Before you move on

Next? (ಮುಂದಿನ, *mundina.*) From now on? (ಇನ್ನು ಮುಂದೆ, *innu munde.*) The future? (ಭವಿಷ್ಯ, *bhaviṣya.*) To decide? (ನಿರ್ಧರಿಸು, *nirdharisu.*) To expect? (ನಿರೀಕ್ಷಿಸು, *nirīkṣisu.*) A timetable? (ವೇಳಾಪಟ್ಟಿ, *vēḷāpaṭṭi.*) A notice? (ಸೂಚನೆ, *sūcane.*) Rent? (ಬಾಡಿಗೆ, *bāḍige.*) An advertisement? (ಜಾಹೀರಾತು, *jāhīrātu.*) A receipt? (ರಸೀದಿ, *rasīdi.*)

Before the new one: say the Kannada for lentils, then the Kannada for tamarind.

You'll want to know: ಮಜ್ಜಿಗೆ

ಮಜ್ಜಿಗೆ — *majjige* — "buttermilk".

The word, taken apart — its roots and family

ಮಜ್ಜಿಗೆ (*majjige*) is shared with Tamil *maccikai* and Telugu *majjiga*, "buttermilk" (DEDR 4630). DEDR 4630 suggests, with a query, that it may be a loan from Indo-Aryan, comparing Prakrit *majjiā*, a curd dish.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *majjige*
- *Say it:* *majjige*, once more
- *Say it:* say *majjige*

Before the new one: say the Kannada for tamarind, then the Kannada for buttermilk.

You'll want to know: ಬೆಣ್ಣೆ

ಬೆಣ್ಣೆ — *beṇṇe* — "butter".

The word, taken apart — its roots and family

ಬೆಣ್ಣೆ (*beṇṇe*) is native Dravidian, one word with Tamil *veṇṇai*, "butter", which DEDR 5496 files under the root for "white, bright"; Telugu has *venna*.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *beṇṇe*
- *Say it:* *beṇṇe*, once more
- *Say it:* say *beṇṇe*
- *Recall:* say the Kannada for tamarind, then the Kannada for buttermilk, then say *beṇṇe* again

Before the new one: say the Kannada for a biscuit, then the Kannada for bread.

You'll want to know: ಗುಂಡಿ

ಗುಂಡಿ — *guṇḍi* — "a button".

The word, taken apart — its roots and family

Where ಗುಂಡಿ (*guṇḍi*) comes from is uncertain. It looks like the northern word for "button", Hindi *ghuṇḍī*, which CDIAL 4483 traces to a reconstructed **ghuṇṭa*, "knot, button", but no source records the Kannada word.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *guṇḍi*
- *Say it:* *guṇḍi*, once more
- *Say it:* say *guṇḍi*
- *Recall:* say the Kannada for a biscuit, then the Kannada for bread, then say *guṇḍi* again

You'll want to know: ಶಾಲು

ಶಾಲು — *śālu* — "a shawl".

The word, taken apart — its roots and family

ಶಾಲು (*śālu*) is Persian *shāl*, "shawl", which came into Kannada through Hindustani, with a final *-u* added.

What you've built

One more word for this chapter.

Your turn

- *Say it: śālu*
- *Say it: śālu*, once more
- *Say it:* say *śālu*
- *Recall:* say the Kannada for a button, then the Kannada for a sweater, then say *śālu* again

Before you move on

What does **ಶಾಲು** mean? ("A shawl".) Say it once more.

259.4 ಕರವಸ್ತ್ರ (karavastra) — a handkerchief

Before the new one: say the Kannada for a sweater, then the Kannada for a shawl.

You'll want to know: ಕರವಸ್ತ್ರ

ಕರವಸ್ತ್ರ — *karavastra* — "a handkerchief".

The word, taken apart — its roots and family

ಕರವಸ್ತ್ರ (*karavastra*) is built from Sanskrit *kara*, "hand" (CDIAL 2779), and *vastra*, "cloth, dress" (CDIAL 11450): "hand cloth".

What you've built

One more word for this chapter.

Your turn

- *Say it: karavastra*

265.1 ಡಬ್ಬಿ (ḍabbi) — a tin, a container

Before the new one: say the Kannada for an app, then the Kannada for a video.

You'll want to know: ಡಬ್ಬಿ

ಡಬ್ಬಿ — *ḍabbi* — "a tin, a container".

The word, taken apart — its roots and family

ಡಬ್ಬಿ (*ḍabbi*) is probably the northern word for "box", Hindi *ḍabbī*, *ḍabbā*, which CDIAL 5528 traces to a reconstructed **ḍabba*, "box", and calls non-Aryan in origin, citing a view that takes it from Dravidian. CDIAL does not list the Kannada word.

What you've built

One more word for this chapter.

Your turn

- *Say it:* *ḍabbi*
- *Say it:* *ḍabbi*, once more
- *Say it:* say *ḍabbi*
- *Recall:* say the Kannada for an app, then the Kannada for a video, then say *ḍabbi* again

Before you move on

You’ll want to know: ಜಾಡಿ

ಜಾಡಿ — *jāḍi* — “a jar”.

The word, taken apart — its roots and family

Where **ಜಾಡಿ** (*jāḍi*) comes from is uncertain: neither DEDR nor CDIAL records it, under its form or under “jar”.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: jāḍi*
- *Say it: jāḍi*, once more
- *Say it:* say *jāḍi*
- *Recall:* say the Kannada for a tin, then the Kannada for a water pitcher, then say *jāḍi* again

Before you move on

What does **ಜಾಡಿ** mean? (“A jar”.) Say it once more.

265.4 ಪೊಟ್ಟಣ (poṭṭaṇa) — a packet, a parcel

Before the new one: say the Kannada for a water pitcher, then the Kannada for a jar.

You'll want to know: ಪೊಟ್ಟಣ

ಪೊಟ್ಟಣ — *poṭṭaṇa* — "a packet, a parcel".

The word, taken apart — its roots and family

Where **ಪೊಟ್ಟಣ** (*poṭṭaṇa*) comes from is uncertain. It looks like Sanskrit *pōṭṭala*, "a bundle" (CDIAL 8396), whose northern forms include Hindi *poṭlī*, but no source records the Kannada word.

What you've built

One more word for this chapter.

Your turn

- *Say it: poṭṭaṇa*
- *Say it: poṭṭaṇa*, once more
- *Say it:* say *poṭṭaṇa*
- *Recall:* say the Kannada for a water pitcher, then the Kannada for a jar, then say *poṭṭaṇa* again

266.4 ಕರ್ಪೂರ (karpūra) — camphor

Before the new one: say the Kannada for a remote control, then the Kannada for an earthen pot.

You'll want to know: ಕರ್ಪೂರ

ಕರ್ಪೂರ — *karpūra* — "camphor".

The word, taken apart — its roots and family

ಕರ್ಪೂರ (*karpūra*) is Sanskrit *karpūra*, "camphor", taken over whole as a learned loan, a tatsama (CDIAL 2880). CDIAL 2880 says the Sanskrit word itself probably came from an Austroasiatic language.

What you've built

One more word for this chapter.

Your turn

- *Say it: karpūra*
- *Say it: karpūra*, once more
- *Say it:* say *karpūra*

Modes: **voice** (5) **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say glass, plastic, a brick, a list and a griddle.
>
> *Complete the last lesson of chapter 301: I can say glass, plastic, a brick, a list and a griddle.*

301.1 గాజు (gāju) — glass (the material)

Before the new one: say the Kannada for a TV serial, then the Kannada for a novel.

You'll want to know: గాజు

గాజు — *gāju* — "glass (the material)".

The word, taken apart — its roots and family

గాజు (*gāju*) is probably a tadbhava of Sanskrit *kāca*, "glass" (CDIAL 3007): *k* became *g* and *c* became *j*. CDIAL does not list the Kannada word.

What you've built

One more word for this chapter.

Your turn

- *Say it: gāju*
- *Say it: gāju*, once more
- *Say it:* say *gāju*
- *Recall:* say the Kannada for a TV serial, then the Kannada for a novel, then say *gāju* again

Before you move on

What does **ಗಾಜು** mean? ("Glass (the material)".) Say it once more.

301.2 ಪ್ಲಾಸ್ಟಿಕ್ (plāsṭik) — plastic

Before the new one: say the Kannada for plastic, then the Kannada for a brick.

You'll want to know: ಪಟ್ಟಿ

ಪಟ್ಟಿ — *paṭṭi* — "a list".

The word, taken apart — its roots and family

Where **ಪಟ್ಟಿ** (*paṭṭi*), "a list", comes from is not settled. DEDR 3877 lists Kannada *paṭṭe*, *paṭṭi*, "a stripe", as native, and Sanskrit has *paṭṭikā*, "a slab, a tablet" (CDIAL 7699); a list is a strip of writing, and either could have given the sense.

What you've built

One more word for this chapter.

Your turn

- *Say it: paṭṭi*
- *Say it: paṭṭi*, once more
- *Say it:* say *paṭṭi*
- *Recall:* say the Kannada for plastic, then the Kannada for a brick, then say *paṭṭi* again

Before you move on

What does **ಪಟ್ಟಿ** mean? ("A list".) Say it once more.

301.5 ಕಾವಲಿ (kāvali) — a griddle, a dosa pan

Before the new one: say the Kannada for a brick, then the Kannada for a list.

You'll want to know: ಕಾವಲಿ

ಕಾವಲಿ — *kāvali* — "a griddle, a dosa pan".

The word, taken apart — its roots and family

ಕಾವಲಿ (*kāvali*) is native Dravidian, one word with Tulu *kāvali* (DEDR 1488). DEDR lists *kāvali*, "a pan for frying or baking", and points to

Tamil *kāy*, “to grow hot” (DEDR 1458).

What you’ve built

One more word for this chapter.

Your turn

- *Say it: kāvali*
- *Say it: kāvali*, once more
- *Say it:* say *kāvali*
- *Recall:* say the Kannada for a brick, then the Kannada for a list, then say *kāvali* again

Before you move on

What does **ಕಾವಲಿ** mean? (“A griddle, a dosa pan”.) Say it once more.

302.2 ಕಟ್ಟಿಗೆ (kaṭṭige) — firewood, wood

Before the new one: say the Kannada for a griddle, then the Kannada for brass.

You’ll want to know: ಕಟ್ಟಿಗೆ

ಕಟ್ಟಿಗೆ — *kaṭṭige* — “firewood, wood”.

The word, taken apart — its roots and family

Where ಕಟ್ಟಿಗೆ (*kaṭṭige*) comes from is uncertain. It may be a tadbhava of Sanskrit *kāṣṭhikā*, “a piece of wood” (CDIAL 3120), through Prakrit *kaṭṭha*, but no source records the Kannada word.

What you’ve built

One more word for this chapter.

Your turn

- *Say it: kaṭṭige*
- *Say it: kaṭṭige*, once more
- *Say it:* say *kaṭṭige*

Chapter 307

Warehouse, Signboard, Ink, Chalk, Ruler

Modes: **voice** (7) **Hands-free start:** all 7 lessons.

By the end of this chapter: I can say a warehouse, a signboard, ink, chalk and a ruler.

Complete the last lesson of chapter 307: I can say a warehouse, a signboard, ink, chalk and a ruler.

307.1 ಗೋದಾಮು (gōdāmu) — a warehouse, a godown

Before the new one: say the Kannada for a plumber, then the Kannada for a gardener.

You'll want to know: ಗೋದಾಮು

ಗೋದಾಮು — *gōdāmu* — "a warehouse, a godown".

The word, taken apart — its roots and family

ಗೋದಾಮು (*gōdāmu*) is English *godown*, "a warehouse", in the shape Hindustani gives it, *godām*. English took the word from Malay *gudang*, "storehouse". That word may itself be South Indian: DEDR 1525 lists Kannada *gaḍaṅga*, *giḍḍaṅgi*, "storeroom", with Telugu *giḍḍaṅgi* and Tamil *kiṭaṅku*, and points to *godown*.

What you've built

One more word for this chapter.

Your turn

The Kannada script — a reference

A **reference**, not a chapter — a place to look things up. You are *not* meant to read this before the lessons: the lessons teach reading through real words, introducing each letter as a word needs it. This page just gathers the system in one spot.

How the Kannada script works (the three facts the lessons teach)

1. **Consonants carry a built-in "a".** ಕ = "ka," ಮ = "ma," ರ = "ra." You never write the short *a* — it's already there.
2. **A vowel sign changes that built-in vowel.** Attached to a consonant it gives ಕಾ = kā · ಕಿ = ki · ಕೀ = kī · ಕು = ku · ಕೂ = kū · ಕೆ = ke · ಕೇ = kē · ಕೊ = ko · ಕೋ = kō · ಕೌ = kau. The signs themselves are ಾ ā · ಿ i · ೀ ī · ು u · ೂ ū · ೆ e · ೇ ē · ೊ o · ೋ ō · ೌ au.
3. **A *virama* (್) strips the built-in vowel, and the bare consonant *stacks under* the next as a conjunct (*ottakṣara*).** ಸ್ + ಕ → ಸ್ಕ (ska), ನ್ + ಯ → ನ್ಯ (nya), ಲ್ + ಲ → ಲ್ಲ (lla). This vertical stacking is a signature of the Kannada–Telugu scripts.

Independent vowels (word-initial)

When a word *starts* with a vowel, a full vowel letter is used: ಅ a · ಆ ā · ಇ i · ಈ ī · ಉ u · ಊ ū · ಎ e · ಏ ē · ಐ ai · ಒ o · ಓ ō · ಔ au.

Worth flagging

- **Aspiration is written.** ಕ k / ಖ kh, ಗ g / ಘ gh, ದ d / ಧ dh — the "h" is a real puff. Unlike Tamil, Kannada keeps separate letters for the Sanskrit aspirates and voiced stops, because it borrowed so many Sanskrit words.
- **Round forms.** Kannada's looping letters were shaped for palm-leaf writing, where straight strokes would split the leaf. Telugu, its closest script-sister, shares the look — which is why the two scripts resemble each other far more than either resembles Tamil.

Kannada in the Dravidian family

Kannada is one of the four literary **Dravidian** languages, with Tamil, Telugu and Malayalam — a family entirely separate from the Indo-European one (English, Latin, Sanskrit). It shares grammar and much native vocabulary with its sisters — but, like Telugu and unlike Tamil, it borrowed **heavily** from Sanskrit. The lessons trace, word by word, which Kannada words are home-grown (*haudu*, *illa*, *sari*) and which came from Sanskrit (*namaskāra*, *dhanyavāda*).

Good Afternoon
chapter topic; Chapter 31, p. 193

“good afternoon” (śubha madhyāhna) — reuses ಮಧ್ಯಾಹ್ನ, KA-C17’s “noon” word, not the more precise ಅಪರಾಹ್ನ from KA-C28; one directly-fetched source describes it leaning formal/ workplace, though this wasn’t cross-corroborated the way ನಮಸ್ಕಾರ’s universal, any-time-of-day status was ಶುಭ ಮಧ್ಯಾಹ್ನ (śubha madhyāhna)
explicit focus: etymology, usage and culture; Chapter 31, p. 193
Good Evening
chapter topic; Chapter 30, p. 191
“good evening” (śubha sañje) — pairs with ಸಂಜೆ, already established (KA-C27) as Sanskrit-via-Prakrit, NOT native Dravidian, whatever an unverified claim you might encounter elsewhere says; leans formal, with ನಮಸ್ಕಾರ likely covering casual use, echoing (with real hedging) the formal-skew question already raised for ಸ್ಪ್ರಭಾತ and ಶುಭೋದಯ ಶುಭ ಸಂಜೆ (śubha sañje)
explicit focus: etymology, usage and culture; Chapter 30, p. 191
Good Morning
chapter topic; Chapter 29, p. 185
“good morning” (śubhōdaya) — śubha (“good”) + udaya (“rising, sunrise,” ← ud- “up” + i “to go”), a DIFFERENT root from ಬೆಳಗ್ಗೆ; sources conflict on its everyday spoken commonality, but the more careful ones describe it skewing formal/written, similar to Hindi’s ಸ್ಪ್ರಭಾತ, with ನಮಸ್ಕಾರ likely covering casual mornings ಶುಭೋದಯ (śubhōdaya)
explicit focus: etymology, usage and culture; Chapter 29, p. 185
Good Night
chapter topic; Chapter 25, p. 173
good night” — literally “auspicious night,” pairing rātri (already met) with shubha, a word that started life meaning ”to be beautiful ಶುಭ ರಾತ್ರಿ (śubha rātri)

Moreover, Suddenly, Except, Without, Anyway
chapter topic; Chapter 288, p. 1803
Morning
chapter topic; Chapter 26, p. 175
"morning" (beḷagge) — genuine native Dravidian, from beḷagu ("to shine, to dawn") + beḷaku ("light"); unlike Kannada's Sanskrit tatsama day/night/noon words (dina, ratri, madhyāhna), this one is Kannada's own ಬೆಳಗ್ಗೆ (beḷagge)
explicit focus: etymology, usage and culture; Chapter 26, p. 175
mouth — a word this book has already shown you twice, in two sound-law tables, without ever saying what it means ಬಾಯಿ (bāyi)
