How to use this starter edition

Begin with no assumed Japanese. Each section takes one small expression, teaches only the writing that expression needs, explains where the word came from, and ends with a short retrieval prompt. There is no kana chart to memorise first.

Japanese uses three writing systems at the same time, and an ordinary sentence can contain all three. *Hiragana* carries much of the grammar, *kanji* carry many content words, and *katakana* commonly marks words borrowed from outside. This edition introduces them in that order. Every load-bearing sign gets its own short lesson before a word asks you to decode it.

Two habits are worth forming immediately. First, count beats: every kana carries one mora, and vowel length matters. Second, expect a kanji to have several readings. This book therefore teaches one sign, one relevant reading, and one useful word at a time rather than pretending a character has one fixed sound.

Romanization stands beside the Japanese here and will fade in later editions. Where a lesson is teaching beat count it also spells a word out beat by beat, because the macron in *arigatō* hides exactly what is being taught.

A note on what this book does not claim. Japanese shares no ancestor with English, so there is no family of English cousin words to hang new vocabulary on — and none is invented here. What Japanese does have is a real borrowed layer from Chinese, shared with Mandarin and Korean, an internal etymology of its own, and a handful of genuine loans from Portuguese, Dutch, German, and English. Those are used. Nothing else is.

Chapter 1

Two Answers, Sign by Sign

Modes: **eyes** (2) **pen** (4) **Hands-free start:** none of the 6 lessons.

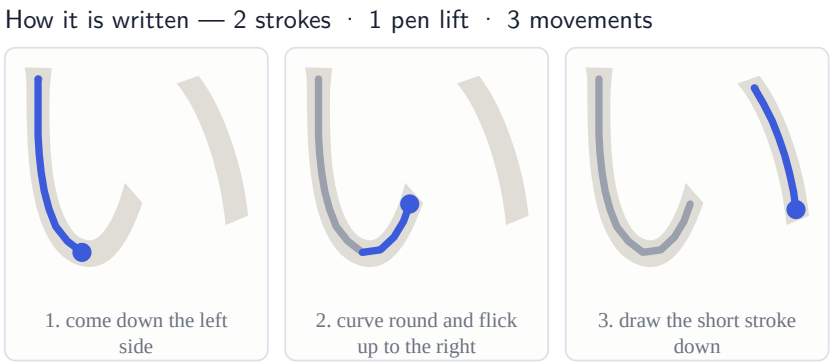

> ***By the end of this chapter:*** I can write the three hiragana signs in はい and いいえ, read both answers without romanization, and say each with even mora timing.
>
> *A yes-or-no choice using only three signs the learner has already traced, copied, recalled, and read.*

1.1 い — two strokes, one beat

You already know the rule that makes this writing system easy: **one sign, one beat.** Not one letter one sound, and not one sign one word — one sign, one **mora**, the even beat Japanese counts time in.

What you have not had yet is a single sign taught on its own. Here is the first.

Script — the shape

Stroke order after KanjiVG, kanji/03044.svg, hiragana 𛀁 (U+3044 HIRAGANA LETTER I), two stroke paths kvg:03044-s1 and s2 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How し *is written, stroke by stroke*

し

Two strokes, both falling, the left one long and the right one short:

1. the **left** stroke — start high, come down, and hook gently to the right at the bottom
2. the **right** stroke — a short downward tick, higher up and clear of the first

It is read **i**, the vowel of English *machine* — short, tight, never the *eye* of English *bite*.

Where the shape came from, and why it does not help you. Every hiragana sign began as a Chinese character written fast and cursively until it wore smooth. But those characters were chosen **for their sound**, not their meaning, so unlike a Chinese component there is nothing inside し to decode. The shape is a signature you learn, not a structure you read. This book will tell you when a shape carries information and when it does not, and this is the second kind.

Your turn

- *Trace it:* follow the visible し once — long stroke first, then the short tick

- *Say it:* **i**, one clean beat

Keep the model visible and stop after one traced sign. Copying without the model comes later; today your hand is only learning the direction of two strokes.

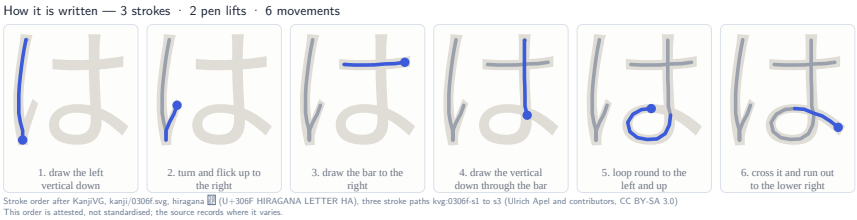

Before you move on

How many beats does one hiragana sign take? (**One.**)
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

1.2 は — three strokes

Write the two-stroke sign you met a moment ago. Long stroke, short tick.

Script — the shape

How は *is written, stroke by stroke*

は

Three strokes. Look at it as a tall left post with a loop tied on its right.

1. the **vertical**, down the left side, with the smallest flick up to the right at the foot
2. a **short horizontal** to the right of that vertical, near the top
3. the **loop** — from above that crossbar, down through it, round to the left at the foot, back up across its own downstroke, and out to the lower right

Read **ha**, breathed rather than hard: the *h* of English *hat*, then the open *a* of *father*.

It has a second reading, and you have already used it. Keep that in your pocket for now — this sign is doing two jobs in Japanese, and the second one is what makes the greeting look misspelled to a beginner. It gets its own lesson, after you have met the sign it *sounds* like.

Your turn

- *Copy:* keep は visible and write it once — vertical, crossbar, loop
- *Say it:* **ha**, one beat, breath not force

Look back at the model between strokes if you need to. This is one guided copy, not a memory test.

Your turn — review pulse

Say い and tap its one mora before adding another sign.

Before you move on

Which stroke of は is written first? (The **vertical** on the left.)
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

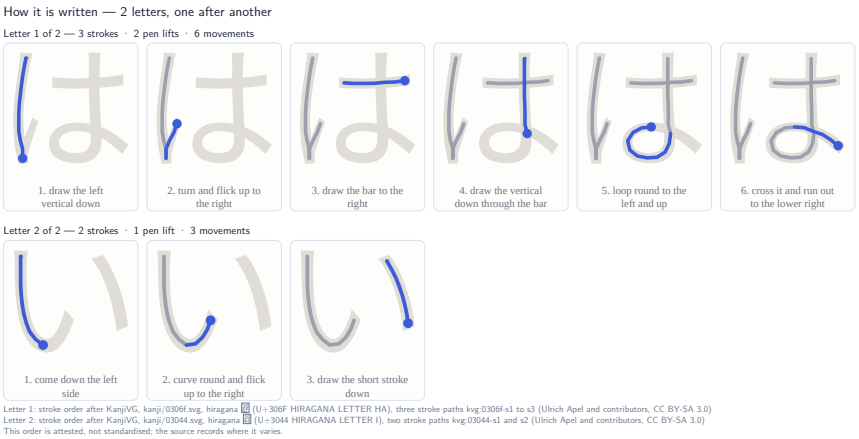

1.3 Two signs, side by side — and a word appears

Both signs are yours. Look at them for five seconds:

は い

Cover the model. Write the two signs in that order and say each beat as you finish it. Uncover the model, compare once, and repair at most one stroke. This short look-hide-write-check cycle is the whole delayed-copy step.

Script — no new sign at all

How はい *is written, letter by letter, stroke by stroke*

Now write them side by side, one sign and then the other:

は + い → はい

ha then **i**. Two beats, even, neither one stressed. You can now decode the sequence *hai*. The word lesson after the next sign attaches its useful meaning.

Nothing new was introduced in this lesson. No stroke, no sound, no word. What changed is where the word now lives: you are no longer recalling a shape you were shown, you are **reading** it — assembling it out of two pieces you can write from memory and sound out in order.

That is the whole method for this writing system, and it does not get harder. It gets longer. A word of five signs is five signs you already own, in a row.

Your turn

- *Read it:* はい — sound each sign in turn, do not recall the word whole
- *Write it:* はい — five strokes in total, three then two

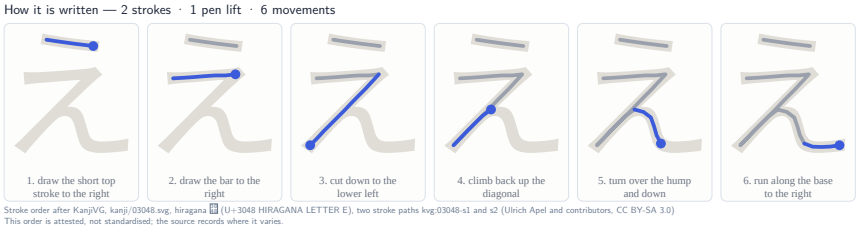

Before you move on

How many new strokes did you have to learn in this lesson? (**None.**)
Source: Unicode Hiragana chart.

1.4 え — two strokes, and a second word for free

Read the word for *yes* off the page, sign by sign, out loud.

Script — the shape

How え *is written, stroke by stroke*

え

Two strokes, and the second one does most of the work:

1. a **short tick** at the top, on its own, clear of everything below
2. the **body** — across to the right, back down and left in a flat zigzag, then out to the lower right in one continuous movement

Read **e**, the vowel of English *bed* — short, and never the *ay* of *day*.

What you've built

Three signs are now yours, and they spell more than one word. Put two of them together with the one you just learned:

い | い | え

i-i-e. Three beats — and note that the first sign is written **twice**, because Japanese counts two full beats there. The next lesson attaches

its meaning. For now, the whole task is decoding three known signs in order.

Your turn

- Cover the printed え. Have a partner or recording say **e** once. If you are working alone, read the romanized cue *e*, cover it, and continue.
- *Write from the heard or romanized cue:* え — tick first, then the body in one movement
- *Read it:* い | い | え — three beats, and do not shorten the doubled sign

Uncover the model only after your one transcription attempt. Compare, repair one stroke if needed, and stop.

Before you move on

Why is the first sign of that word written twice? (Because it is **two beats**, not one held longer.)
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

1.5 はい — yes, in two equal beats

Nothing is assumed yet. Begin with the shortest useful answer in the language, and with the first of its three writing systems.

Script — two signs, two beats

はい — は *ha* + い *i*

Japanese runs left to right. はい is written with two signs of **hiragana**, the everyday script. A hiragana sign is not a letter. It is one whole beat — a **mora** — and normally a consonant and a vowel already fused into one shape. There is no separate *h* to write, because は already is *ha*.

Five vowels, and they stay pure: *a* as in father, *i* as in machine, then *u*, *e*, *o*. So はい is *ha-i*, two beats of the same length, and not the single gliding sound of English “high.”

The word, taken apart

はい means **yes**, and also "here you are," "I am listening," and "present." Its origin is genuinely unsettled: some accounts tie it to an older word *hai*, "a bow"; others treat it as an old interjection. Neither is proven, so hold it as an open question rather than a fact. The rare kanji sometimes used in that proposal can wait until a later reading chapter.
Say plainly what is true here. Japanese shares no ancestor with English, so no cousin word is waiting in your vocabulary to hold はい in place. What this track offers instead is the writing itself, built up one sign at a time, and — later — the real family Japanese does have, through the characters it borrowed.

Your turn

- *Say it:* はい — *ha-i*, two even beats *Twice through.*
- *Read it:* は, then い, left to right
- *Answer:* your name is called → はい

Before you move on

How many beats does はい hold? (Two.) Which sign carries *ha*? (は.)
Source: Wiktionary: はい.

1.6 いいえ — no, and why the extra beat matters

Say はい once and count its two beats out loud. This lesson adds the opposite answer, and one fact about beats that Japanese will never let go of.

Script — one new sign, three beats

いいえ — い *i* + い *i* + え *e*

Only え *e* is new; い you already read in はい. Written out, the word is three signs, so it is three beats: *i-i-e*. The first two are the same sign twice,

which is exactly how Japanese writes a long vowel in hiragana — by writing the vowel again.

Beat count is not decoration. いえ (two beats) means **house**. いいえ (three beats) means **no**. Nothing else distinguishes them. Hold the first *i* for two beats and the word lands; clip it and you have said "house."

The word, taken apart

いいえ is the plain **no** — and, as often, a modest **"not at all"** used to wave away thanks or a compliment. That second use is the common one in daily speech, which is worth knowing before you meet it as an answer to **thank you** at the end of this chapter.
It is a native Japanese word, inherited rather than borrowed: JMdict lists it in one entry with *iya*, *ie* and *ina*, other ways of saying no, under a kanji meaning "no". How those forms are related is not settled.

Your turn

- *Say it:* いいえ — *i-i-e*, three even beats *Twice through.*
- *Contrast:* いえ house, いいえ no
- *Choose:* agree → はい; decline → いいえ

Your turn — review pulse

Say はい. *Write it:* い once from memory, before learning the contrasting answer

Before you move on

Which single sign is new here? (え.) What changes when the long *i* is cut short? (The word becomes いえ, house.)

Chapter 2

A Daytime Greeting, One Sign at a Time

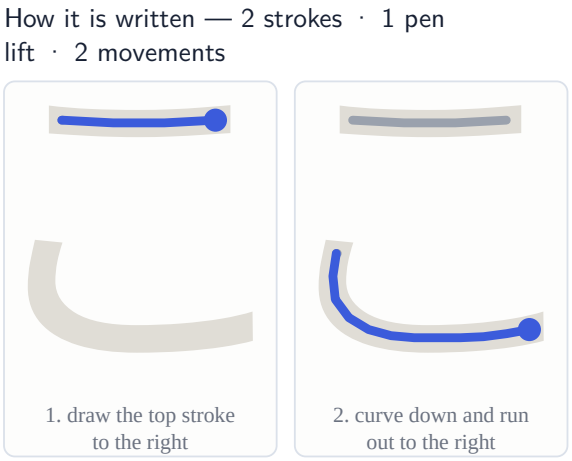

Modes: **voice** (1) **eyes** (1) **pen** (6) **Hands-free start:** none of the 8 lessons.

> ***By the end of this chapter:*** I can write the five distinct signs in こんにちは, read them in order, and remember why final は is pronounced wa.
>
> *A one-line daytime greeting whose five signs were each taught before the learner reads it.*

2.1 こ — two strokes, and the greeting begins

The two-stroke sign read *e* — tick, then body. Write it once.

Script — the shape

Stroke order after KanjiVG, kanji/03053.svg, hiragana こ (U+3053 HIRAGANA LETTER KO), two stroke paths kvg:03053-s1 and s2 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How こ is written, stroke by stroke

こ

The simplest sign you have met. Two short horizontal strokes, stacked, the lower one longer and slightly curved:

1. the **upper** stroke, short, curving down a little at its right end
2. the **lower** stroke, wider, sweeping right and lifting slightly

Read **ko**: a clean *k*, then the *o* of English *more* shortened.

Nothing joins them. The gap between the two strokes is part of the shape — close it and you have a different sign.

Your turn

- *Write it:* こ — upper stroke, then the longer lower one, and leave the gap
- *Say it:* **ko**, one beat

Your turn — review pulse

Say いいえ and tap all three morae before writing the new sign.

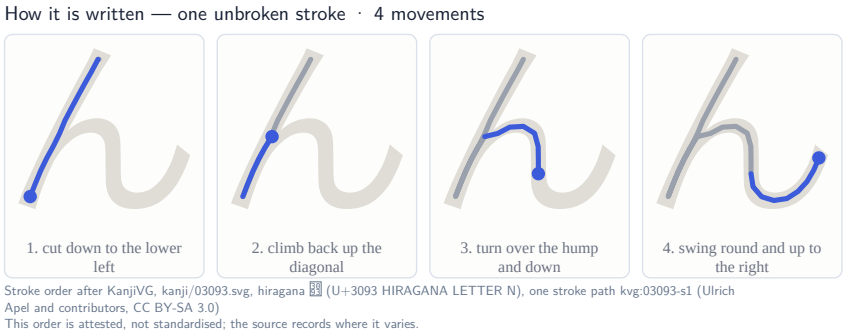

Before you move on

Which of the two strokes is longer? (The **lower** one.)
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

2.2 ん — one stroke, one beat, no vowel

Two stacked strokes with a gap. Write the sign read *ko*.

Script — the shape, and the exception

How ん is written, stroke by stroke

ん

One stroke. Start at the top and cut down to the lower left, climb back up the same line, turn over a small hump and down, then round to the right and up, all in a single unbroken movement, finishing with a rise.

Now the part that matters more than the shape. Every sign you have met so far is a consonant plus a vowel, or a vowel alone. **This one is a consonant with no vowel at all** — and it still takes a **full beat**, exactly as long as any other sign.

That is why Japanese counts morae rather than syllables, and it is the clearest evidence you will get. An English speaker hears the *n* at the end

of a word as a tail on the vowel before it. Japanese does not. It is its own beat, held its own length, and shortening it is one of the most audible foreign-accent tells there is.

Your turn

- *Write it:* ん — one continuous stroke, no lifts
- *Say it:* hold it for a full beat, as long as any other sign takes

Your turn — review pulse

Cover the model and write はい from its two known signs.

Before you move on

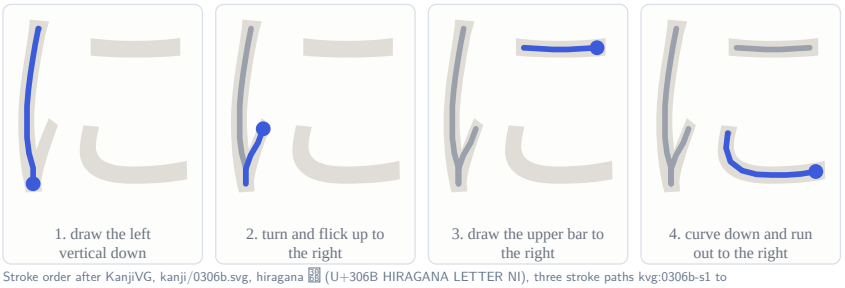

If this sign has no vowel, how long is it held? (**A full beat** — the same as every other sign.)
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

2.3 に — three strokes, and a shape you half know

Write the three-stroke sign read *ha*. Vertical, crossbar, loop.

Script — the shape

How it is written — 3 strokes · 2 pen lifts · 4 movements

Stroke order after KanjiVG, kanji/0306b.svg, hiragana に (U+306B HIRAGANA LETTER NI), three stroke paths kvg:0306b-s1 to s3 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How に is written, stroke by stroke

に

Three strokes, and **the first one you have already practised**:

1. the **vertical** down the left, with the same small flick up to the right at the foot as the sign read *ha*
2. a **short horizontal** to its right, upper area
3. a **longer horizontal** below it, sweeping right

Read **ni**: the *n* of *knee*, then the tight *i* you learned first.

This is the first time two signs share a visible part, and it is worth naming, because it is nearly the last. Hiragana is not built from recombining components the way Chinese characters are — these two happen to have worn down to similar left-hand posts, not because they mean or sound anything alike. Treat the resemblance as a **handwriting** convenience, not as a clue. Reading information into it is the mistake this book keeps warning you off.

Your turn

- *Write it:* に — vertical, short bar, long bar
- *Notice:* write it beside は and compare only the left post

Your turn — review pulse

Before the new sign, write ん once and then え once from memory.

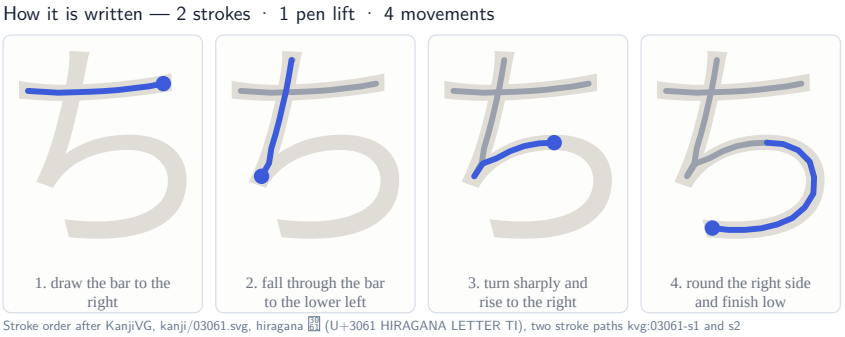

Before you move on

Which stroke of this sign comes first? (The **vertical**.)
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

2.4 ち — two strokes, four roman letters, one beat

Three strokes: vertical, short bar, long bar. Write the sign read *ni*.

Script — the shape

How ち is written, stroke by stroke

ち

Two strokes:

1. a **short horizontal** across the top
2. the **body** — down through that bar from above it, falling to the left, then a sharp turn up to the right and round into a full belly that finishes low on the left

Read **chi**: the *ch* of English *cheese*, then the tight *i*.

Count what just happened. One sign. One beat. **Four roman letters** to describe it. The romanization is a pronunciation aid written for people who do not read the script yet — it is not a smaller version of the writing system, and the number of letters in it tells you nothing about the number of beats in the word.

This is the moment the roman spelling starts costing you more than it pays, and it is why the signs are worth the effort.

Your turn

- *Write it:* ち — top bar, then the body in one movement
- *Say it:* **chi**, one beat — as long as any other sign, no longer

Before you move on

Does the number of roman letters tell you how long a sign is held? (**No.**)
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

2.5 わに (wani) — a crocodile

Before the new word: say the last thing you learned, once, out loud.

You'll want to know: わに

わに — *wani* — "a crocodile".

Say it: *wani*. *Look:* at its shape as you say it. The lessons that follow take pieces of it, わ, and write each one on its own.

The word, taken apart

わに (*wani*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. It is usually written in kana; its kanji, when used, is a kun'yomi attached later (JMdict, KANJIDIC2). In older Japanese the same word also named the shark (JMdict).

Your turn

Say these aloud:

- *wani*
- *wani*, and what it means

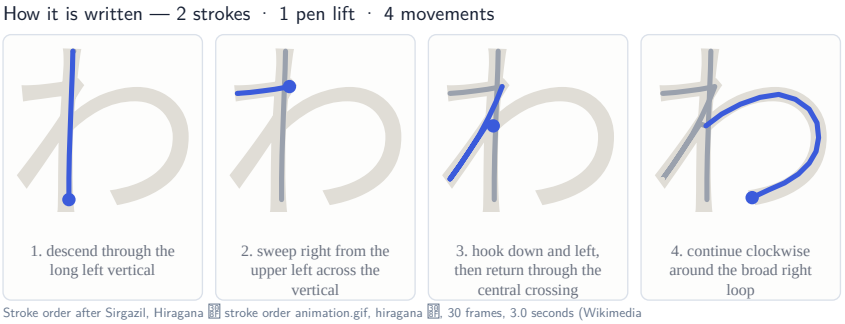

Before you move on

What is "a crocodile"? (わに, *wani*.)

2.6 わ — the sign for *wa*, and the trap beside it

Write the three-stroke sign read *ha*: vertical, crossbar, loop.

Script — the shape

How わ is written, stroke by stroke

わ

Two strokes:

1. the **vertical** on the left, with the small flick at the foot
2. the **body** — a short bar right from the top, then down, round to the left in a loop, and out to the lower right with a curl

Read **wa**: like English *wa* in *wander*, one beat.

What you've built — and the trap

Here is the thing this sign exists in this lesson to protect you from. The daytime greeting **sounds** like it ends in *wa*. **It is not written with this sign.** It ends with the sign read *ha* — the one you learned early and were told was holding a second job.
That second job is grammatical: は is also Japanese's topic marker, and **as a topic marker it is pronounced *wa***. The greeting is a frozen fragment of a longer sentence, and it kept the marker's spelling along with the marker's sound.
So the rule you need is not about sound at all:

- わ is the sign for the mora *wa* inside ordinary words.
- は read as *wa* means you are looking at the topic marker, or at something that used to contain one.

Getting this backwards is the single most common beginner spelling error in Japanese, and it is the reason this book taught you the sign for *wa* **after** you already knew the greeting — so the shape could arrive with its warning attached rather than be quietly assumed.

Your turn

- *Write it:* わ, then は beside it — two signs, one shared sound, different jobs
- *Decide:* hearing *wa* at the end of the daytime greeting, which sign do you write?

Your turn — review pulse

Say いいえ again, keeping the two opening morae distinct.

Before you move on

Which of the two is a fact about **grammar** rather than about sound? (The one where は is read *wa*.)
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

2.7 Five signs in a row — and the greeting is readable

Four signs, one after another, from memory. Say each beat as you finish writing it:

こ ん に ち

Script — the assembly

How こんにちは *is written, letter by letter, stroke by stroke*

Add the fifth — the one that is read *wa* because it is a topic marker — and the greeting is on the page:

こ + ん + に + ち + は → こんにちは

ko-n-ni-chi-wa. Five signs, **five beats**, all even. Say it against a steady tap and you will hear that the second beat, the one with no vowel, takes exactly as long as the four around it.

No new stroke appears here. You have decoded five pieces you can each write from memory, in order, including the one that sounds like something other than its name. The next lesson attaches the daytime-greeting meaning to the line.

What you've built

Eight signs, taught one at a time, and with them you can now decode three whole sequences off the page. Two already carry useful answers; the five-sign sequence gets its daytime-greeting job in the next lesson. Hiragana has forty-six basic signs. You hold **eight**. The rest arrive the

same way, one per lesson, and the words they unlock arrive free — because a word in this script is never more than the signs you already own, in a row.

Your turn

- *Read it:* こんにちは — sound each sign in turn; do not recall it whole
- *Write it:* the greeting, then say it once at speaking pace

Your turn — review pulse

Write わ once, then set it beside は and name which one closes the greeting.

Before you move on

How many of the greeting's five signs were new in this lesson? (**None.**)
Source: Unicode Hiragana chart.

2.8 こんにちは — hello, and a sign that lies about its sound

Retrieve はい and the sign は. You are about to meet は again in the daytime greeting — where it is not pronounced *ha*.

Script — five familiar signs

こんにちは — こ *ko* + ん *n* + に *ni* + ち *chi* + は

You have written every sign separately. こ, に, and ち each carry a consonant and vowel. ん is the exception: a bare consonant with a full beat of its own. Read five signs in five beats: *ko-n-ni-chi-wa*. Do not swallow ん.

Grammar Lens — the sign は, read *wa*

The last sign is は, which you learned as *ha*. Here it is read **wa**.
Here は is the **topic particle**, roughly "as for ____." It keeps an older spelling. Carry one small rule forward: は is *ha* inside a word and *wa* when it is the particle.

Why it's said this way

こんにちは is the daytime greeting. It began as an unfinished sentence: *konnichi wa…*, "as for today …" The rest fell away and the topic marker stayed.
The older phrase is often written with two kanji for "this day." You do not need to decode those yet. This chapter keeps the whole greeting in the hiragana signs you have already learned.

The word, taken apart

こんにちは (*konnichiwa*) is a sentence cut short. *Konnichi*, "today", is Sino-Japanese: *kon*, "now" (Middle Chinese *kim*), and *nichi*, "day" (*nyit*), on'yomi borrowed from Chinese; the native particle *wa*, "as for", stayed on the end (JMdict; Unihan; Middle Chinese in Baxter's transcription).

Your turn

- *Say it:* こんにちは — *ko-n-ni-chi-wa*, five beats *Twice through.*
- *Decide:* は in はい → *ha*; は ending the greeting → *wa*
- *Greet:* someone at midday → こんにちは

Your turn — review pulse

Write it: ん from memory, then give it one full mora

Before you move on

Which sign takes a beat without a vowel? (ん.) Why does the greeting end in a particle? (It is the opening of a sentence nobody finishes any more.)

Chapter 3

Plain Thanks, One Sign at a Time

Modes: **eyes** (1) **pen** (7) **Hands-free start:** none of the 8 lessons.

> ***By the end of this chapter:*** I can write and read ありがとう, build が with the dakuten, and say the five morae without swallowing the long final vowel.
>
> *A plain thank-you read only after every distinct hiragana sign and the dakuten have their own small step.*

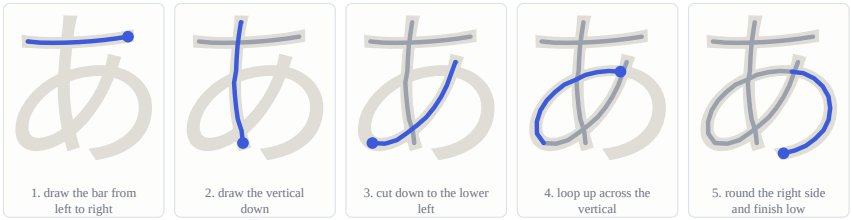

3.1 あ — three strokes, and the thank-you begins

Write こんにちは from memory. Five signs, all yours.

This chapter builds the five-sign plain thank-you from the page up. Its meaning arrives only after every sign is yours, so this first lesson asks for one shape: あ.

Script — the shape

How it is written — 3 strokes · 2 pen lifts · 5 movements

Stroke order after KanjiVG, kanji/03042.svg, hiragana あ (U+3042 HIRAGANA LETTER A), three stroke paths kvg:03042-s1 to s3 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How あ is written, stroke by stroke

あ

Three strokes, and the third is the one that gives beginners trouble:

1. a short **horizontal**, near the top
2. a **vertical** crossing it, leaning slightly left as it falls
3. a **loop** that starts at the upper right, sweeps down and left across the vertical, curls round at the bottom, and finishes pointing right

The loop is one continuous movement, not a circle drawn separately. Start it, cross what you have already written, and come back out.

Read **a**: the *a* of English *father*, kept short. One beat.

Your turn

- *Write it:* あ — horizontal, vertical, then the loop in one movement
- *Say it:* **a**, one beat, short

Your turn — review pulse

Give the daytime greeting, then write に from memory.

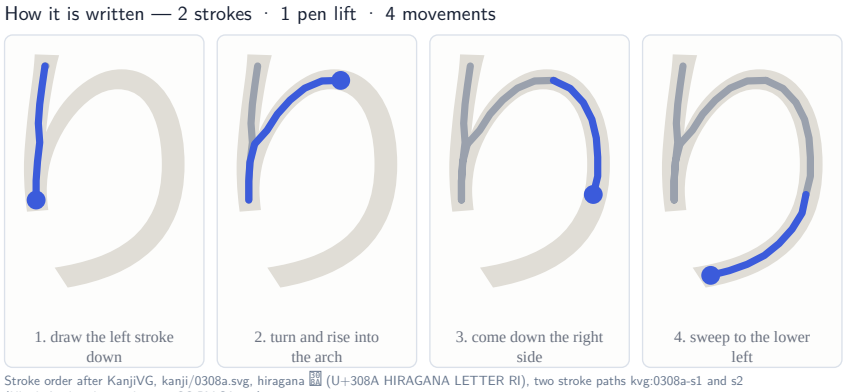

Before you move on

Is the loop drawn as a separate circle, or in one movement? (**One movement**, crossing what you have already written.)

3.2 り — two strokes, and a tap rather than an r

Write あ. Horizontal, vertical, loop.

Script — the shape

How り is written, stroke by stroke

り

Two strokes, drawn left to right, and they never touch:

1. a **short left stroke**, curving gently down and to the right
2. a **long right descender**, starting higher, falling much further, and hooking left at the very bottom

The gap between them is the shape. So is the difference in length — the right stroke should fall roughly twice as far as the left.

Now the sound, and it is worth a moment. **Japanese r is not the English r.** It is a single **tap** of the tongue against the ridge behind the teeth — very close to the *r* of Spanish *pero*, and not far from the *dd* in an American saying *ladder*. Your tongue touches once and releases.

If you say an English *r* here you will be understood and you will sound foreign in a way that one minute of practice fixes.

Your turn

- *Write it:* り — short left stroke, then the long right descender. Leave the gap.
- *Say it:* **ri** — one tap, not an English r
- *Say it:* **a**, then **ri** — the first two signs of the word

Your turn — review pulse

Write ち from memory before tracing り.

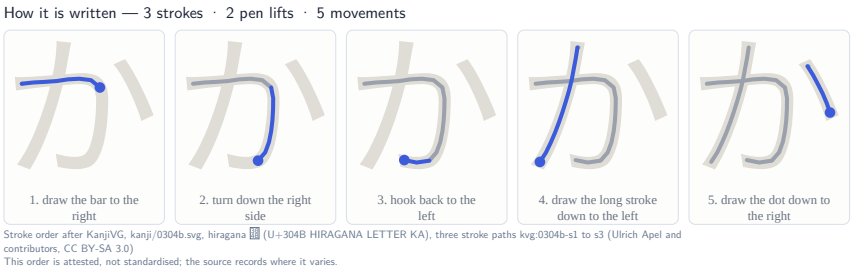

Before you move on

Which of り's two strokes falls further? (The **right** one, by about double.)
Source: Unicode Hiragana chart

3.3 か — three strokes, and a shape you will reuse

Write り. Short left, long right, gap between.

Script — the shape

How か is written, stroke by stroke

か

Three strokes:

1. a **hooked stroke** — across to the right, down the right side, and a small hook back to the left at the foot
2. a **long falling stroke**, crossing the first stroke left of its middle and falling away to the lower left
3. a **short dot**, up at the right, slanting down-right

Read **ka**: a clean *k*, then the short *a* of あ. One beat.

Remember this shape more carefully than the others. **You are about to get a second sign out of it for free** — か is the base of が, and the difference between them is two small marks rather than a new character to learn.

Your turn

- *Write it:* か — hooked stroke, falling stroke, then the dot at the right
- *Say it:* **ka**, one beat

Your turn — review pulse

Write わ, then write the different sign that closes こんにちは and explain its particle reading.

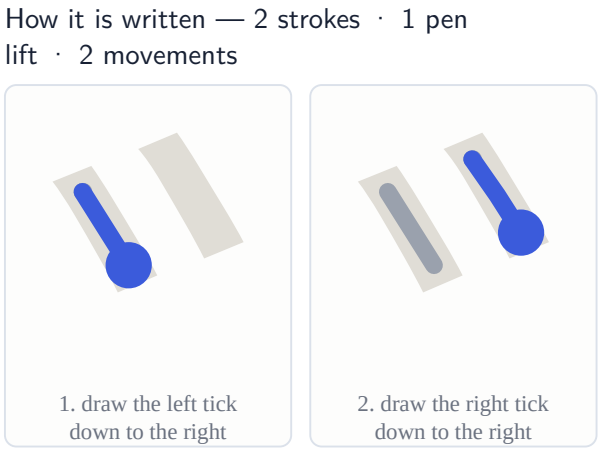

Before you move on

Which stroke is written last? (The **dot**, at the upper right.)

3.4 ゛ — two ticks, and every sign you know doubles

Write か. Then write こ, from Chapter 2.

Script — the mark

Stroke order after KanjiVG, kanji/0309b.svg, the spacing dakuten ゛ (U+309B), two stroke paths kvg:0309b-s1 and s2 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How ゛ is written, stroke by stroke

Here is the best bargain in the Japanese writing system.

Two short strokes, slanting down-right, written at the **upper right** of a sign:

゛

It is called the **dakuten**, and it does one job: it **voices** the consonant. Voicing is what separates English *k* from *g*, or *s* from *z* — the same mouth position, with the vocal cords switched on.

So:

か *ka* → が *ga*

こ *ko* → ご *go*

No new shape. The sign underneath is exactly the one you already write; the marks sit above and to the right of it, small, and clear of the strokes.

This is worth pausing on, because it changes the size of the job in front of you. Hiragana has forty-six signs. Learning the dakuten does not add

signs — it **doubles the ones you already have**, at the price of two ticks. Every *k* you know becomes a *g*, every *s* a *z*, every *t* a *d*, every *h* a *b*.

You have now met four signs that take it – は, こ, ち and か – and two of them are in the word this chapter is building.

Your turn

- *Write it:* か, then add the two ticks to make が. Say both.
- *Write it:* こ, then ご
- *Say it:* **ka / ga**, then **ko / go** — the same mouth, voice off and on

Your turn — review pulse

Write こんにちは from its five signs before adding any voice marks.

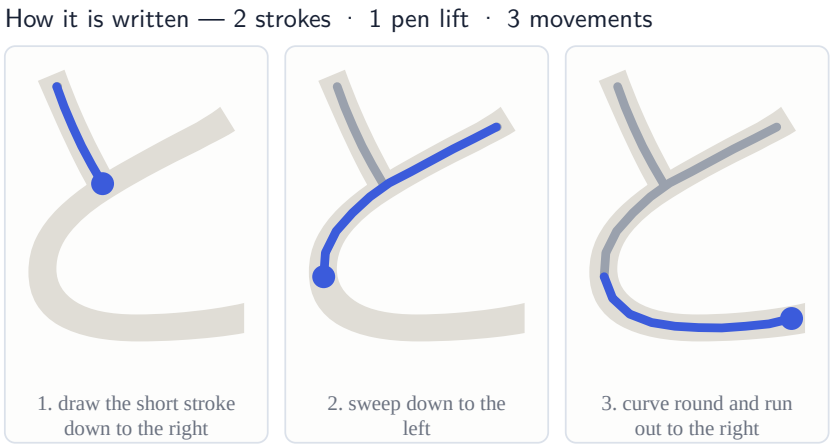

Before you move on

Does が need a new shape learned? (**No** — it is か plus two ticks.)
Source: Unicode Hiragana chart

3.5 と — two strokes, and the first ends on the second

Write が. Then say what the two ticks did to it.

Script — the shape

Stroke order after KanjiVG, kanji/03068.svg, hiragana 38 68 (U+3068 HIRAGANA LETTER TO), two stroke paths kvg:03068-s1 and s2 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How と is written, stroke by stroke

と

Two strokes, and unlike り they touch:

1. a **short stroke** at the upper left, little more than a tick leaning down-right
2. a **long sweeping stroke** starting above and to the right of it, falling down and left past the end of the short stroke, then curving out to the right at the bottom

The second stroke does the work. It should look like a single confident sweep, not a corner — the change of direction is a curve, not a bend.

Read **to**: a clean *t*, then the *o* of *more*, shortened. One beat.

Your turn

- *Write it:* と — the small tick, then the long sweep, passing the tick's end.
- *Say it:* **a, ri, ga, to** — four beats, and the word is nearly yours

Your turn — review pulse

Say the daytime greeting once without looking.

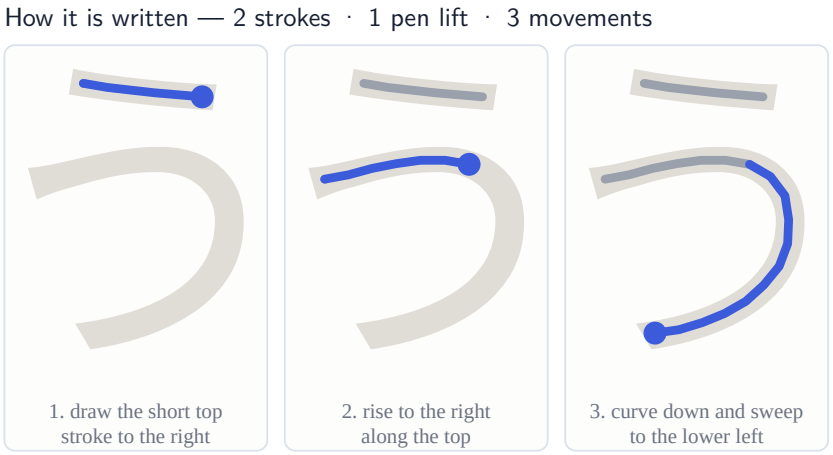

Before you move on

Which stroke is longer? (The **second**, the sweep.)
Source: Unicode Hiragana chart

3.6 う — two strokes, and a vowel that stretches

Write と. Tick, then sweep, no join.

Script — the shape

Stroke order after KanjiVG, kanji/03046.svg, hiragana う (U+3046 HIRAGANA LETTER U), two stroke paths kvg:03046-s1 and s2 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How う is written, stroke by stroke

う

Two strokes, the simplest pair in this chapter:

1. a **short tick** at the top, roughly horizontal

2. a **wide curve** beneath it, falling from the upper left, bellying right, and tapering away to the lower left

Read **u**: close to the *oo* of *food* but shorter, and with the lips much less rounded than an English speaker expects. Do not push them forward.

What you've built — and what this sign does after と

Something happens when う follows と, and it is the reason the written word and the spoken word look like they disagree.
The five-sign sequence you are building ends と + う — *to* then *u*, which reads as five beats. But the final two signs are heard as a long **o**:

written: a-ri-ga-to-u

spoken: a-ri-ga-**too**

う after an o-sound does not add a syllable. It holds the one before it for a second beat. The beat is still there — Japanese counts it, and dropping it makes the word sound clipped and wrong — but it is the same vowel continuing, not a new one.
Katakana will later receive a separate one-stroke length mark for the same job. Here the only written cue is the う you have just learned.

Your turn

- *Write it:* う — the tick, then the wide curve
- *Say it:* **to**, then **too** — one beat, then two, same vowel

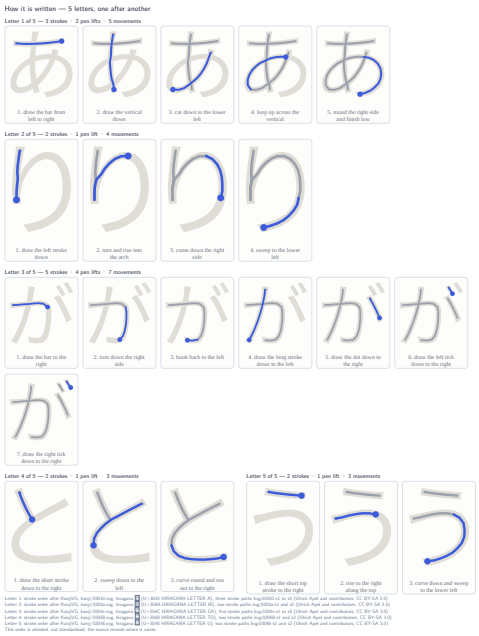

Before you move on

Is the extra beat optional? (**No** — Japanese counts it, and dropping it sounds clipped.)
Source: Unicode Hiragana chart

3.7 ありがとう — no new sign, and a whole word

Write あ, り and か in a row. Then add the two ticks to the last one.

Script — the assembly

How ありがとう *is written, letter by letter, stroke by stroke*

Here is the word you have been saying since Chapter 1:

ありがとう

Nothing in it is new. Take it sign by sign:

- あ — *a*, the three-stroke sign with the loop
- り — *ri*, short left, long right, tapped
- が — *ga*, which is か with the dakuten
- と — *to*, tick and sweep
- う — *u*, which here holds the *o* before it for a second beat

Five signs, five beats, and you can write every one.

That is the whole point of the last five lessons. In Chapter 1 this word was a sound you copied and a romanization you leaned on. It is now something you can read off a shop sign, and — more to the point — something

you could write on a note without being able to say a single sentence of Japanese.

Read it slowly, once per sign, then at speed: *a-ri-ga-to-o*.

Your turn

- *Read it:* ありがとう — name each sign before you say the word
- *Write it:* ありがとう — all five, in order, without looking above
- *Say it:* **arigatou** — five beats, the last two one long o

Before you move on

How many signs did you have to learn for this word? (**Five** — but one of them was free, because が is か with two ticks.)
Source: Unicode Hiragana chart

3.8 ありがとう — thanks, from "this hardly ever happens"

Back to hiragana. Five signs are coming, and one small mark that unlocks a whole second row of sounds.

And one word from before: say *wani* and what it means.

Script — five signs and two small strokes

ありがとう — あ *a* + り *ri* + が *ga* + と *to* + う

あ *a*, り *ri*, と *to* and う *u* are ordinary hiragana. が is the new idea: it is the sign か *ka* with two short strokes added at the top right. That mark is the **dakuten**, and it voices the consonant — the same two strokes turn *ka* into *ga*, *sa* into *za*, *ta* into *da*, *ha* into *ba*. One mark, learned once, doubles how much of the script you can read.

The final う does not sound like *u* here. After と it stretches the *o*, so the word ends *-tō* and holds five beats: *a-ri-ga-to-o*. Hiragana lengthens a vowel here by writing another vowel sign. Katakana will get its own tiny length lesson later.

The word, taken apart

The older form combines *aru*, "to exist," with *katashi*, "difficult." *Arigatashi* therefore meant literally **"hard to exist"** — that is, rare. Rare became precious, precious became grateful, and by the Edo period the word had settled into plain thanks. The *k* of *katashi* softened to *g* inside the compound, which is the same voicing the dakuten writes. Its historical kanji spelling can wait until those signs receive their own lessons.

So the memory hook is inside the word, not inside English: saying ありがとう is saying *this was not a thing that had to happen.* No English cousin exists, and inventing one would be worse than admitting that.

It is a native word, inherited rather than borrowed: JMdict notes that *arigatō* comes from *arigataku*, the adverb form of *arigatai*. It does not come from Portuguese *obrigado*, a popular story: *arigatashi* was in Japanese long before Portuguese ships arrived.

Your turn

- *Say it:* ありがとう — *a-ri-ga-to-o*, five beats *Twice through.*
- *Build:* か plus the dakuten → が
- *Connect: arigatashi* "hard to exist" → rare → precious → thanks

Your turn — review pulse

Write it: か once from memory, then add the two dakuten strokes

Before you move on

What did *arigatashi* mean literally? (Hard to exist.) What does the last う do? (It lengthens the *o*.)

Chapter 4

Polite Thanks, Three More Signs

Modes: **eyes** (2) **pen** (3) **Hands-free start:** none of the 5 lessons.

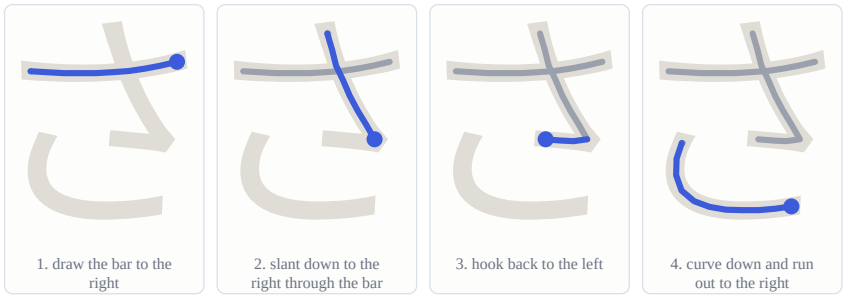

> ***By the end of this chapter:*** I can add ございます to a known thank-you, read every sign, and choose the polite form for someone outside my close circle.
>
> *A short casual-versus-polite choice with every sign taught and the register decision checked independently.*

4.1 さ — three strokes, and the ticks work here too

Write ありがとう. All five signs, no help.

Script — the shape

How it is written — 3 strokes · 2 pen lifts · 4 movements

Stroke order after KanjiVG, kanji/03055.svg, hiragana さ (U+3055 HIRAGANA LETTER SA), three stroke paths kvg:03055-s1 to s3 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How さ is written, stroke by stroke

さ

Three strokes:

1. a short **horizontal**, near the top
2. a **slanting stroke**, starting above the horizontal and falling down to the right through it, then hooking back to the left
3. a **separate curve** at the foot, coming down on the left and running out to the right — **not joined** to the stroke above it

Watch that gap. Most printed fonts join the second and third strokes into one continuous descender, so the さ you see on a screen looks like two strokes. By hand it is three, and the break is real. Keep the handwritten gap even when a printed font closes it.

Read **sa**: a clean *s*, then the short *a*. One beat.

And now the bargain again — さ takes the dakuten:

さ *sa* → ざ *za*

Same mouth, voice switched on, two ticks at the upper right. That is the third voiced sign you have got for free. It will return in the polite ending ahead.

Your turn

- *Write it:* さ — horizontal, the slanting stroke with its hook, then the detached foot curve
- *Write it:* ざ — the same, with two ticks
- *Say it:* **sa / za**

Your turn — review pulse

Say ありがとう, add the dakuten to か, and recall how “hard to exist” became thanks.

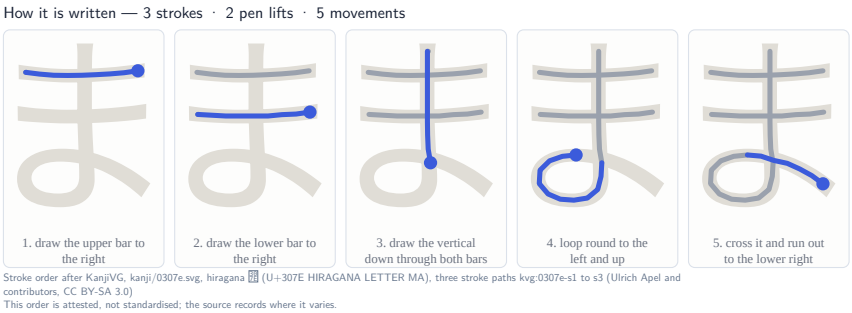

Before you move on

How many signs have the two ticks given you so far? (**Three** — が, ご and ざ.)
Source: Unicode Hiragana chart

4.2 ま — three strokes, and a loop you have drawn before

Write さ, then ざ.

Script — the shape

How ま *is written, stroke by stroke*

ま

Three strokes, and the order is top-down as always:

1. an **upper horizontal**, short
2. a **lower horizontal**, a little wider, below and parallel to it
3. a **looping vertical** that crosses both, falls, and curls left at the bottom

The third stroke is the same movement you learned on あ — down through what you have written, then a small loop at the foot. If あ's loop is comfortable, this one is already yours.

Read **ma**: as in English *mother*, shortened. One beat.

Your turn

- *Write it:* ま — two horizontals, then the looping vertical through them
- *Say it:* **ma**, one beat

Your turn — review pulse

Write と from memory before tracing ま.

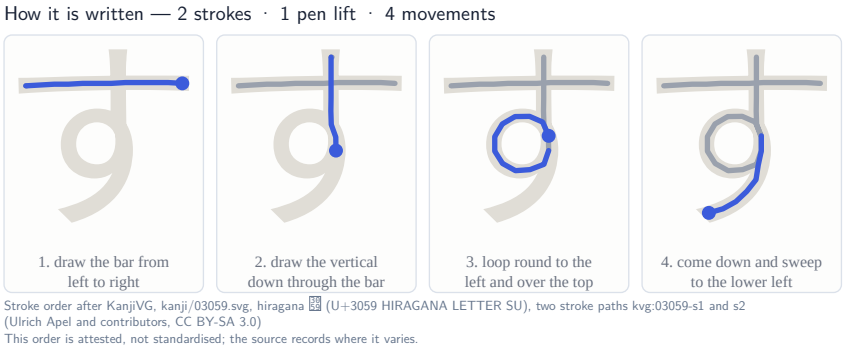

Before you move on

Which earlier sign uses the same looping last stroke? (あ.)
Source: Unicode Hiragana chart

4.3 す — two strokes, and a vowel you barely hear

Write ま. Two horizontals, then the loop.

Script — the shape

How す is written, stroke by stroke

す

Two strokes:

1. a short **horizontal**, near the top
2. a **vertical** crossing it, falling, and finishing in a loop that closes back on itself before tailing away

The loop in す is tighter than ま's — it comes back and crosses its own line.

Read **su**: an *s*, then the *u* you met in う.

Why it's said this way

At the end of a word, and especially in ございます, that final *u* is usually **devoiced** — the mouth makes the shape, the beat is counted, but the vocal cords never switch on. What a listener hears is closer to *-mass* than *-masu*.

This is not sloppiness or fast speech. It is what standard Tokyo Japanese does, and saying a full clear *u* there is one of the most recognisable marks of a learner reading off a page.

The sign is still written. The beat is still counted. Only the voice drops out.

Your turn

- *Write it:* す — horizontal, then the vertical with its closing loop
- *Say it:* **su**, then the same with the voice off — a whispered ending

Your turn — review pulse

Write う from memory before tracing す.

Before you move on

Is the beat dropped along with the voice? (**No** — the beat is still counted.)

4.4 ありがとうございます — politeness you cannot leave out

Say ありがとう once and rebuild が from か. This lesson adds the ending that makes it usable with a stranger, a shopkeeper, or a boss.

Script — five more signs, two of them dakuten

ございます — ご *go* + ざ *za* + い *i* + ま *ma* + す *su*

Two of the five are dakuten forms you can already build: ご is こ with the two strokes, and ざ is さ *sa* with them. い you have read since はい. Only ま *ma* and す *su* are genuinely new.

The whole phrase is ten beats — *a-ri-ga-to-o go-za-i-ma-su* — and the final す is normally said with the *u* barely voiced, close to a plain *s*.

Grammar Lens — politeness is grammar here, not word choice

ございます is a verb. It is the polite descendant of *aru*, "to be" — the same verb that sits inside ありがとう. The historical route runs *aru* to *gozaru* to ございます, where the ending -ます is the general politeness marker Japanese attaches to verbs.

That is the difference this chapter has to name. In many languages politeness is a choice between two words for "you." Japanese instead marks it on the **predicate**, and every sentence has one, so every sentence is marked. There is no neutral setting: ありがとう to a friend and ありがとうございます to a stranger are not two styles of the same form, they are two different grammatical levels, and choosing wrongly is heard immediately.

At the far end of the system, even the verb can be replaced: ordinary *iu*, "to say," has the respectful form *ossharu* and the humble form *mōsu*. Same act, three verbs, chosen by who is doing what to whom. That is **keigo**, and this lesson is only its front door. Their spellings belong in later, separately taught script lessons.

The word, taken apart

ありがとうございます (*arigatō gozaimasu*) joins two pieces. *Arigatō* comes from *arigataku*, "in a way hard to come by" (JMdict).

Gozaimasu, the polite "to be", comes from *gozaru*, built from the honorific *go* and *za*, "seat", both borrowed from Chinese, with native *aru*, "to be"; *-masu* is the polite ending (JMdict).

Your turn

- *Say it:* ありがとうございます — ten beats, final *su* light *Twice through.*
- *Choose:* a close friend → ありがとう; a shop assistant → ありがとうございます
- *Build:* こ → ご, さ → ざ

Before you move on

Which verb hides inside ございます? (*aru*, "to be.") Can a Japanese sentence avoid marking politeness? (No — the predicate always carries a level.)
Source: Wiktionary: ございます.

4.5 Practice — the whole thank-you, off the page

Write it: ありがとう — five signs, no help

Script — the second half

ございます

Five more signs, and **again nothing here is new**:

- ご — こ from Chapter 2, with the dakuten
- ざ — さ from this chapter, with the dakuten
- い — from Chapter 2
- ま — from this chapter
- す — from this chapter, its *u* devoiced

Two of the five are signs you already had, wearing two ticks.

Why it's said this way

ありがとう on its own is warm and ordinary — friends, family, a shopkeeper you know. ありがとうございます is the same thanks in polite form, and it is what you want for a stranger, a colleague, anyone serving you.
The difference is not strength. Adding ございます does not mean you are *more* grateful; it means you are being **more formal about it**. Getting that wrong in either direction is the commonest register mistake a beginner makes.
If you are unsure which to use, use the long one. Being slightly too polite in Japanese costs you nothing.

The exchange

Two voices, and every sign on the page is one you can write:

A: こんにちは

B: こんにちは

A: ありがとうございます

B: はい

What you've built this chapter

Eight new signs and one mark. The mark is the part worth remembering:

- **eight shapes** — あ り か と う さ ま す
- **one mark** — ゛ , which turned か into が, こ into ご, さ into ざ

Ten signs in ありがとうございます, and only eight of them cost you a shape. The dakuten is the first thing in this book that made the job *smaller* the further you went into it, and it keeps doing that: every *k*, *s*, *t* and *h* sign you ever learn arrives with a voiced twin already attached.

Your turn

- *Read it:* ありがとうございます — name each of the ten signs, then say it

- *Write it:* ございます — five signs, two of them with ticks
- *Say it:* **arigatou gozaimasu** — and let the final u go quiet

Your turn — review pulse

Give plain thanks, then polite thanks. Name the dakuten and the "hard to exist" memory hook.

Before you move on

Which form would you use with a stranger — the short one or the long one? (The **long** one; being slightly too polite costs nothing.)

Chapter 5

Nihongo, Built in Small Blocks

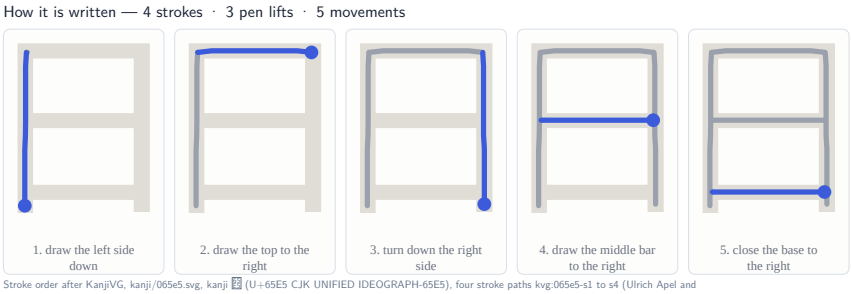

Modes: **eyes** (1) **pen** (6) **Hands-free start:** none of the 7 lessons.

> ***By the end of this chapter:*** I can write 日 and 本, assemble 語 from three practised components, and read 日本語 as nihongo.
>
> *Three kanji read as one known word after the simple signs and the complex sign's components were taught separately.*

5.1 日 — one sun, four strokes

Say *ni-chi*: two even beats. Today you attach those beats to one kanji, but you write only one new shape.

Script — build the sun

How 日 is written, stroke by stroke

日

Write four strokes:

1. the left side, down
2. the top and right side as one turning stroke
3. the short middle line, left to right
4. the bottom line, left to right

The middle line touches both sides. Keep the shape taller than it is wide.

Here it is read *nichi*. It carries the broad idea **sun/day**. Kanji can have more than one reading; this lesson asks for only the reading in the word ahead.

Your turn

- *Trace it:* 日 — side, corner, middle, bottom
- *Write it:* 日 once from memory
- *Say it:* **nichi**, two beats

Your turn — review pulse

Read ございます once and write its base sign さ without a model.

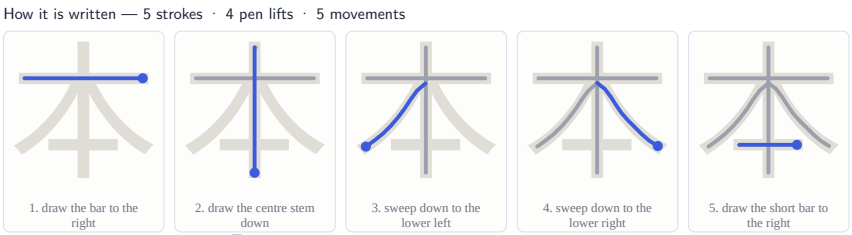

Before you move on

Which line sits inside the box? (The **middle horizontal** line.)
Source: KanjiVG stroke-order data.

5.2 本 — a tree with its root marked

Write 日 once. Read it *nichi* here.

Script — five strokes

How 本 *is written, stroke by stroke*

本

Write the large tree first, then mark its base:

1. top horizontal
2. centre vertical, down through it
3. left-falling branch
4. right-falling branch
5. short horizontal across the lower stem

That last stroke is the memory hook: it points to the **root**, so the sign came to mean **origin**. In the word ahead, read it *hon*, one beat ending in *n*.

Your turn

- *Trace it:* 本 — cross, two branches, root mark
- *Write it:* 本 once without looking
- *Say it:* **hon**, one beat

Your turn — review pulse

Write ま once from memory before beginning the new kanji.

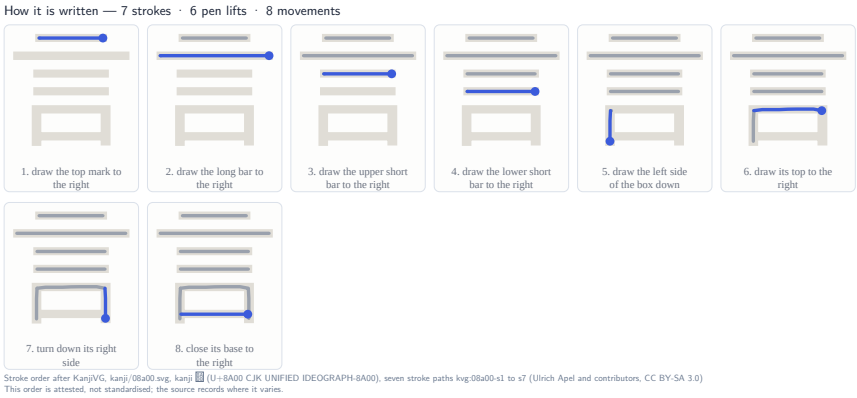

Before you move on

Which stroke comes last? (The short **root mark**.)
Source: KanjiVG stroke-order data.

5.3 言 — build the speech side first

Write 本 and point to its short root mark. Now set it aside.

Script — one component, not a whole word yet

How 言 is written, stroke by stroke

言

This is the **speech** component. Write it as a small top mark, three horizontal lines, then a three-stroke box. Keep the horizontals distinct and the box narrow.

Do not memorise a vocabulary word for it today. Its job is visual: when it sits on the left, it signals that the larger kanji has something to do with words or speech. The next two tiny lessons build the right side.

Your turn

- *Trace it:* 言 slowly, top to bottom
- *Cover and write:* 言 once
- *Point to:* the small box at the bottom

Your turn — review pulse

Write す once from memory before building the speech component.

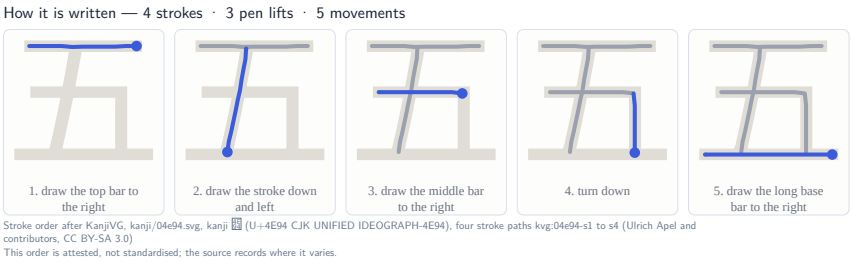

Before you move on

Where will this component sit in the larger sign? (On the **left**.)
Source: KanjiVG stroke-order data.

5.4 五 — four strokes for the sound side

Trace 言 once. Say “speech side.”

Script — the top-right piece

How 五 is written, stroke by stroke

五

Write four strokes: top horizontal; a stroke from it down to the bottom line, leaning left; a second horizontal that turns down at its right end; then the long bottom horizontal. Keep the shape wider than tall.

This sign means **five** on its own. Here, you only need its second job: it helps cue the sound *go* inside the larger kanji that is coming.

Your turn

- *Trace it:* 五 — top, down, middle and turn, bottom
- *Write it:* 五 once from memory
- *Say it:* **go**, one beat

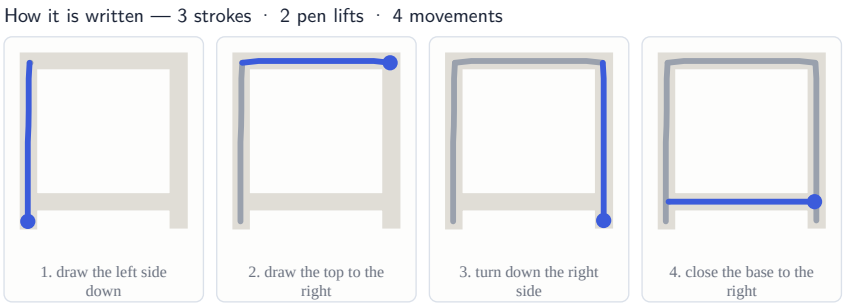

Before you move on

Which line is longest? (The **bottom** line.)
Source: KanjiVG stroke-order data.

5.5 口 — close a box in three strokes

Write 五 once. Leave a little space below it with your finger.

Script — the lower-right piece

How 口 is written, stroke by stroke

口

Write three strokes:

1. left side, down
2. top and right side as one turning stroke
3. bottom, left to right, closing the box

It is the picture-sign for a **mouth**. In the larger kanji ahead, it sits under 五. Today the whole job is one small square.

Your turn

- *Trace it:* 口 — side, corner, close
- *Write it:* 口 once from memory
- *Stack:* point below 五, where 口 will go

Your turn — review pulse

Read ございます from memory before drawing the new box component.

Before you move on

Which stroke closes the box? (The **bottom** stroke.)
Source: KanjiVG stroke-order data.

5.6 語 — assemble; do not memorise fourteen loose strokes

Point left and picture 言. Point upper-right and picture 五. Point lower-right and picture 口. Those are all the pieces.

Script — three known blocks become one sign

How 語 *is written, stroke by stroke*

語

Build it in blocks:

1. write 言, narrow, on the left
2. write 五 in the upper-right
3. write 口 directly under 五

Read the whole sign *go*, one beat. It means **language** here. There are fourteen strokes, but there are not fourteen new decisions: you already practised every block separately.

Your turn

- *Trace it:* 語 by naming the blocks — speech, five, mouth
- *Cover and build:* 言 + 五 + 口
- *Read it:* **go** — language

Before you move on

Which component fills the left side? (言, the speech component.)
Source: KanjiVG stroke-order data.

5.7 日本語 — three characters, and no single sound each

Say こんにちは (*konnichiwa*). *Write it:* 日, 本, and 語 once each
This lesson joins those three already-practised kanji to name the language.

Script — kanji, and the readings problem

日本語 — *ni* + *hon* + *go*

These are **kanji**: characters borrowed from Chinese, each carrying a meaning rather than a sound. 日 is sun or day. 本 is origin or root. 語 is language. So 日本 is "sun-origin" — the country the sun rises from — and 日本語 is its language.

Now the fact that makes kanji unlike any letter you have learned. A kanji does not have *a* sound. 日 is read *nichi*, *jitsu*, *hi*, *bi*, or *ka*, depending on the word it stands in — and in 日本 it is shortened again, to *ni*. There is no sensible way to teach "the sound of 日." What a lesson can teach is the **word**: you learn 日本語 as *nihongo*, and the reading of each character comes along with it.

Two families of readings explain the spread. The **on** reading is Japan's version of the Chinese pronunciation, imported with the character. The **kun** reading is a native Japanese word written with a borrowed character that already meant the same thing. 日本語 uses the imported reading family throughout. The older spelling behind the greeting is irregular even by those standards, so it remains postponed rather than becoming an unexplained decoding test.

The word, taken apart

Here the cousin web finally works — though not toward English. The on-readings *nichi*, *hon*, *go* are borrowings of Middle Chinese, so 日本語 has genuine relatives: Mandarin writes the same three characters and says *Rìběnyǔ*; Korean borrowed the same compound as *ilbon-eo*. Same

characters, related imported sounds, one meaning, three languages. That is a real, checkable connection, and it is the honest replacement for the Latin roots that anchor a European language. English has no share in it.

Your turn

- *Say it:* 日本語 — *ni-ho-n-go*, four beats *Twice through.*
- *Name:* 日 sun or day; 本 origin; 語 language
- *Connect:* Mandarin *Rìběnyǔ*, Korean *ilbon-eo*, same three characters

Your turn — review pulse

Build 語 once from 言, 五, and 口 before joining the full word.

Chapter 6

Coffee in Katakana, Three Shapes

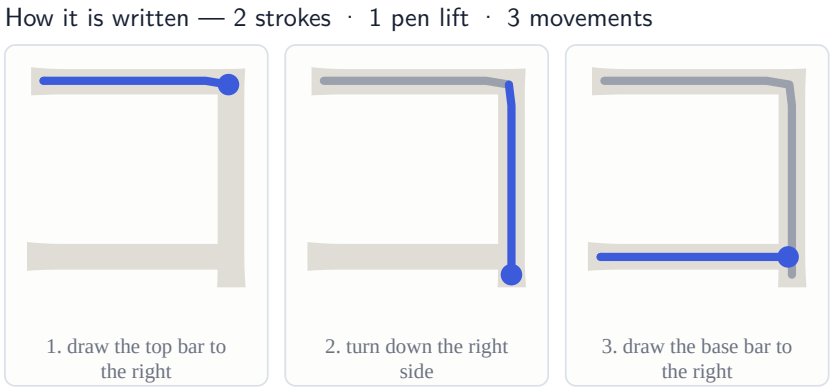

Modes: 👁 **eyes** (1) ✓ **pen** (3) 🚗 **Hands-free start:** none of the 4 lessons.

> ***By the end of this chapter:*** I can write コ, ー, and ヒ, read コーヒー as four morae, and explain that the long mark holds the preceding vowel.
>
> *A borrowed word made from only three distinct katakana shapes, each taught before the full word appears.*

6.1 コ — same sound, a new script

Read 日本語 once. Now switch jobs: the next word came from abroad, so Japanese normally writes it in katakana.

Script — two angular strokes

Stroke order after KanjiVG, kanji/030b3.svg, katakana コ (U+30B3 KATAKANA LETTER KO), two stroke paths kvg:030b3-s1 and s2 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How コ is written, stroke by stroke

コ

Write two strokes:

1. top horizontal, then turn down at the right
2. bottom horizontal, left to right

Read it *ko*, the same mora as hiragana こ. The sound is not new. Only the script is new: katakana is angular and commonly marks borrowed words.

Your turn

- *Trace it:* コ — top-and-side, then bottom
- *Write it:* コ once from memory
- *Contrast:* こ is hiragana; コ is katakana; both say *ko*

Your turn — review pulse

Trace 言 once. Then recall why Japanese kanji readings connect to Chinese without giving each sign one fixed sound.

Before you move on

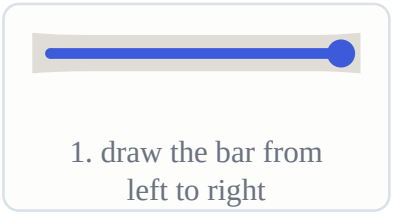

Does コ introduce a new sound? (**No** — only a new written shape.)
Source: Unicode Katakana chart.

6.2 ー — one line, one extra beat

Write コ and say *ko*. Hold its vowel once: *ko-o*.

Script — length lives on the page

How it is written — one unbroken stroke · 1 movement

Stroke order after KanjiVG, kanji/030fc.svg, the long-vowel mark 30FC (U+30FC), one stroke path kvg:030fc-s1 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How ー is written, stroke by stroke

コー

Write one horizontal stroke after the katakana sign. This mark is the **chōonpu**, the long-vowel mark. It does not have a sound by itself. It tells you to hold the vowel before it for one more mora.

So コ is *ko*, while コー is *kō*: two beats, *ko-o*. Keep the line centred and about as wide as the sign before it.

Your turn

- *Write it:* コ, then ー
- *Tap: ko* — one; hold *o* — two
- *Read it:* コー as **kō**, not *ko*

Your turn — review pulse

Write 五 once from memory, then return to the one-stroke length mark.

Before you move on

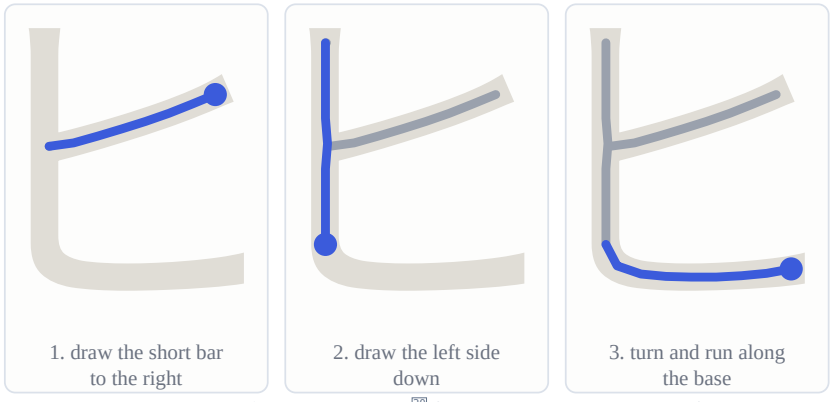

How many extra beats does ー add? (**One.**)
Source: Unicode Katakana chart.

6.3 ヒ — two strokes complete the inventory

Write コー and tap its two beats: *ko-o*.

Script — the last new shape

How it is written — 2 strokes · 1 pen lift · 3 movements

Stroke order after KanjiVG, kanji/030d2.svg, katakana ヒ (U+30D2 KATAKANA LETTER HI), two stroke paths kvg:030d2-s1 and s2 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How ヒ is written, stroke by stroke

ヒ

Write two strokes:

1. a short stroke from left to right, rising a little
2. a longer vertical stroke that turns and sweeps right at the bottom

Read it *hi*, one mora. Japanese *h* is light; keep the vowel clean, like the *ee* in *machine* but short.

Now every distinct sign in the word ahead is known: コ, ー, and ヒ.

Your turn

- *Trace it:* ヒ — short top, long bent body
- *Write it:* ヒ once from memory
- *Build:* コ + ー + ヒ + ー

Your turn — review pulse

Write 口 once from memory before switching back to katakana.

Before you move on

Which stroke bends to the right? (The **second**, longer stroke.)

6.4 コーヒー — the third system, and a word that really is a cousin

Recall how hiragana writes a long vowel: it writes the vowel twice, as in いいえ. Katakana does it differently, and this word shows how.

Script — katakana, the borrowed-word script

コーヒー — コ *ko* + ー + ヒ *hi* + ー

This is **katakana**, the third system, and it is a full twin of hiragana: the same beats, the same five vowels, different shapes. Its job is different too. Katakana marks a word as coming from outside — borrowed vocabulary, foreign names, sound effects, scientific terms.

The two scripts are siblings by origin as well as by sound. Hiragana came from whole Chinese characters written in flowing cursive; katakana came from *fragments* of characters, shorthand that monks scribbled beside a text to remember how to read it. こ and コ even trace back to the same character, which is why they still look alike.

ー is the *chōonpu*, the long-vowel bar. It holds the previous vowel for one more beat, and it belongs to katakana almost exclusively. So コーヒー is four beats: *ko-o-hi-i*.

The word, taken apart

コーヒー is **coffee**, and it entered Japanese from Dutch *koffie* through the Nagasaki trade. Dutch had it from Turkish *kahve*, and Turkish from Arabic *qahwa* — which is exactly where English *coffee* comes from as well.

So this word genuinely is a cousin of one you already own. Notice what kind of cousin: not an inherited relative, but the same borrowed object arriving from the same Arabic source by two different roads. That is the honest shape of most Japanese–English overlap. Other passengers on those roads include *pan*, "bread," from Portuguese *pão*, and *arubaito*, "a part-time job," from German *Arbeit*. Their katakana signs can wait for their own one-sign lessons.

Your turn

- *Say it:* コーヒー — *ko-o-hi-i*, four beats *Twice through.*
- *Trace it:* Arabic *qahwa* → Turkish *kahve* → Dutch *koffie* → コーヒー
- *Decide:* a borrowed word is written in katakana, not hiragana

Which script signals a borrowed word? (Katakana.) How many beats does コーヒー hold? (Four.)

Chapter 7

The Doorway Exchange

Modes: 🚗 **voice** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can greet, name the language, answer yes or no, and thank someone politely while listening, speaking, reading, and writing independently.
>
> *A six-line doorway exchange using only words and signs already taught in the preceding six chapters.*

7.1 Practice — one daytime exchange, three scripts

Before reading on, retrieve three answers: the daytime greeting, the short yes, and the short no. Nothing new is added here.

The exchange — every line already learned

A: こんにちは。 — *Konnichiwa.* B: こんにちは。 — *Konnichiwa.* A: 日本語? — *Nihongo?* B: はい。 — *Hai.* A: ありがとうございます。 — *Arigatō gozaimasu.* B: いいえ。 — *Iie.*

Three lines of hiragana, one of kanji, and no word that has not been taught. Japanese lets a bare noun with a rising tone stand as a question, so 日本語 with the voice lifted is a complete and natural way to ask "Japanese, then?" — and はい answers it. B's closing いいえ is the modest "not at all" that waves thanks away.

An ordinary Japanese page mixes systems: hiragana carries much of the grammar, kanji carries many content words, and katakana commonly carries borrowings. The six earlier chapters introduced those systems separately; this payoff is where they finally work together.

Your turn

1. **Listen:** hear one line with no text and identify greeting, language, answer, or thanks.
2. **Speak:** take B's part while the other lines are read aloud.
3. *Read it:* both voices from Japanese only, with the romanization covered
4. *Write it:* the three kanji of 日本語 — hear the word, wait ten seconds, and write with no visible model

Score the four actions separately. A fluent spoken line cannot cover a missing kanji in writing, and recognition cannot cover an unanswered spoken cue.

Your turn — review pulse

Write it: はい, いいえ, こんにちは, ありがとう, 日本語, and コーヒー from memory, then circle the dakuten

Say why the borrowed word uses katakana.

Before you move on

Run the exchange once from memory. If a line stalls, return to that one lesson rather than rereading the chapter.

Chapter 8

One Goodbye, Sign by Sign

Modes: 🚗 **voice** (2) ↙ **pen** (4) 🚗 **Hands-free start:** the first of 6 lessons.

> ***By the end of this chapter:*** I can hear and say sayōnara on five morae, write its three new hiragana signs, and read and write the complete farewell independently.
>
> *A context-dependent farewell whose sound and meaning arrive before three separately taught new signs and whose payoff scores all four skills.*

8.1 Hear *sayōnara* — one way to say goodbye

> *Write it:* katakana サ
>
> Give the daytime greeting, then run one doorway exchange aloud. *Cover:* the text
>
> Then the new expression begins.

What to know first

> *sa-yō-na-ra* — **goodbye**, at a parting

Hear five morae: *sa* / *yo* / *o* / *na* / *ra*. The held *ō* occupies two beats, just as the final long vowel did in *arigatō*. Listen twice. Count five even beats aloud, then say the expression once. Its writing waits for the next four tiny sessions.

This is **one** Japanese farewell, not a universal line for every departure. Relationship and situation can call for other expressions; those will receive their own lessons rather than being smuggled into this one.

The word, taken apart

Sayōnara began as a phrase: *sayō*, “so, like that”, and *nara*, “if”, from the old copula *nari*, so “if that is how it is” (JMdict). *Sa*, “so”, is native and *yō*, “manner”, was borrowed from Chinese.

Your turn

Choose the parting cue rather than the meeting cue. Say *sayōnara* on five beats, then stop before trying to spell it.

Before you move on

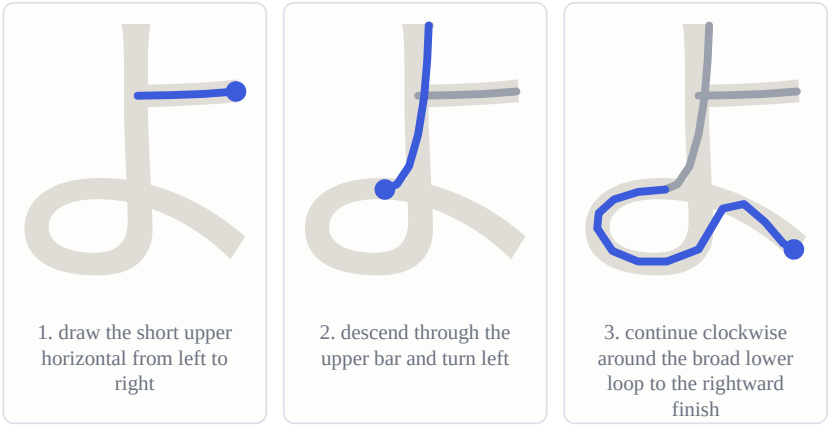

Say the five beats once with no writing visible.
Sources: Japan Foundation Marugoto A1 vocabulary and Japan Foundation Irodori Starter lesson 1.

8.2 よ — the second sound gets a shape

Read ありがとう, then point to ー in コーヒー and say what it does. Tap *sayōnara* on five beats. Today adds one shape only.

Script — one sign

How it is written — 2 strokes · 1 pen lift · 3 movements

1. draw the short upper horizontal from left to right

2. descend through the upper bar and turn left

3. continue clockwise around the broad lower loop to the rightward finish

Stroke order after Sirgazil, Hiragana 𛀀 stroke order animation.gif, hiragana 𛀀, 26 frames, 2.6 seconds (Wikimedia Commons, 1 October 2009; corrected first-stroke direction 4 January 2012)
This order is attested, not standardised; the source records where it varies.

How よ is written, stroke by stroke

よ — *yo*

Keep the printed sign visible. Notice the short upper mark, then the longer line that falls, turns, and loops at the lower right. Finger-trace the whole route slowly. Say *yo* only after the finger stops.

Your turn

- *Trace it:* よ, once with the model visible
- *Copy:* よ, once beside the model
- *Say it: yo*, one mora

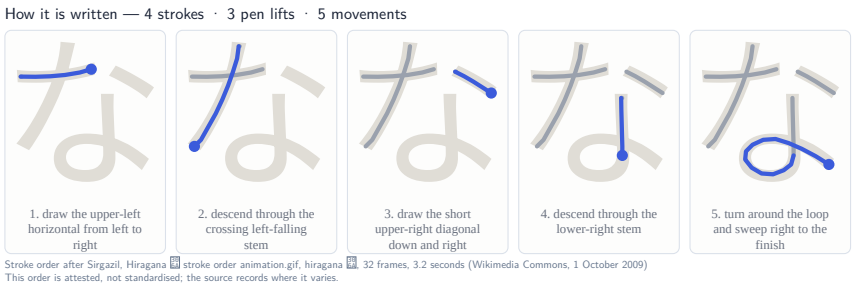

Before you move on

Cover the model, wait five seconds, and write よ once.
Source: Unicode Hiragana chart.

8.3 な — one sign for *na*

Write よ from memory. Say why *arigatō* once meant "hard to exist," then point to the dakuten in が. One new hiragana sign follows.

Script — one sign

How な is written, stroke by stroke

な — *na*

Keep な visible. Find its compact left side first, then the separate right side with the small crossing mark and low loop. Trace each part without rushing; the two sides must not collapse into one blob.

Your turn

- *Copy:* な, with the model visible
- *Check:* compact left side; open right side
- *Say it: na*, one mora

Before you move on

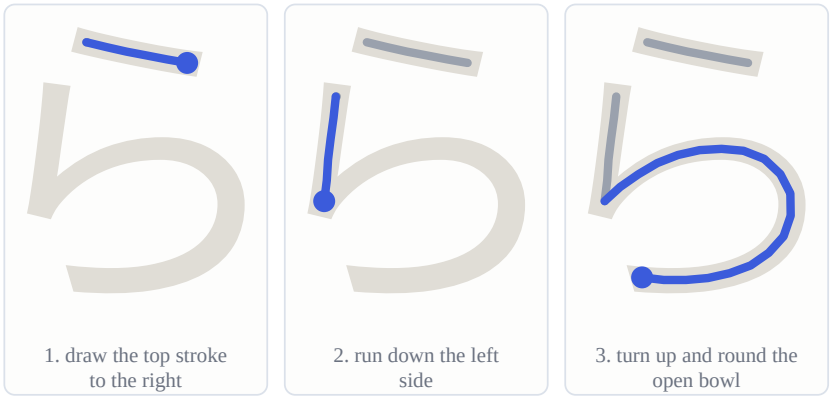

Look away, say *na*, and write な once.
Source: Unicode Hiragana chart.

8.4 ら — the last new shape

Write よ and な from memory, then write katakana ヒ and say why コーヒー uses katakana. Do not force the new hiragana into that borrowed-word script.

Script — one sign

How it is written — 2 strokes · 1 pen lift · 3 movements

Stroke order after KanjiVG, kanji/03089.svg, hiragana ら (U+3089 HIRAGANA LETTER RA), two stroke paths kvg:03089-s1 and s2 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How ら is written, stroke by stroke

ら — *ra*

Keep ら visible. It begins with a short top mark. The lower stroke starts separately, descends, bends right, and opens rather than closing into a circle. Japanese *r* is a light tongue tap; one careful tap is enough here.

Your turn

Look at ら for five seconds. Cover it, wait five seconds, and write it once. Uncover only to compare the open lower curve.

Before you move on

Read the sign once, then stop.
Source: Unicode Hiragana chart.

8.5 さようなら — assemble what the hand already knows

Run the doorway exchange once, write ま, then say the farewell on five beats. Write よ, な, and ら separately.

Script — join five known signs

How さようなら *is written, letter by letter, stroke by stroke*

さ | よ | う | な | ら

sa / yo / o / na / ra

The five signs are all known. さ and う return from the thank-you chapters; よ, な, and ら are the three new shapes. In this word, よう carries the held *yō*: the written う owns the extra beat.

Your turn

1. Point and read: さ | よ | う | な | ら.
2. Cover the romanization and read さようなら.
3. Cover everything, wait ten seconds, and write the five signs.

Before you move on

Circle う and tap the beat it contributes.
Source: Japan Foundation Marugoto A1 vocabulary.

8.6 Practice — meet, thank, then part

Write it: す

Then give the daytime greeting and plain thanks. Those two social jobs are already secure. The new third job is leaving.

What to know first

さようなら。

Use this line for the parting situation practised here. Japanese has other exit formulae for other relationships and settings; success means choosing and producing this taught farewell, not claiming that it fits every goodbye.

Your turn

1. **Listen:** hear *konnichiwa* or *sayōnara* and identify meeting or parting.
2. **Speak:** answer a parting cue with *sayōnara* on five morae.
3. *Cover:* the romanization, then read さようなら sign by sign
4. *Write it:* all five signs from dictation — hear the word, then wait ten seconds before you start

Score the four actions separately. A remembered sound cannot cover missing writing, and a copied form cannot cover a missing spoken response.

Before you move on

Stop after one accurate four-skill pass. Speed and alternate farewells come later.

Chapter 9

One More Time, Please

Modes: 🚗 **voice** (7) ↙ **pen** (5) 🚗 **Hands-free start:** the first of 12 lessons.

> ***By the end of this chapter:*** I can say that I do not understand, politely ask for one repetition, read and write the earned block もういちど, and write five new hiragana forms without a chart.
>
> *A spoken repair assembled from independently learned pieces, with decoding and dictation limited to the signs the learner has actually earned.*

9.1 すみません — open the repair gently

Hear the farewell in your mind, and say it. *Read it:* さようなら

Write it: さようなら once

Now imagine that the other person has spoken and you missed it. Do not guess; open a repair.

What to know first

すみません。 — *su-mi-ma-se-n* — excuse me; I am sorry

Five morae, each given room. This polite expression can apologise, attract attention, or soften the request that follows. Here it means: "Excuse me — I need help with what was just said."

Its shape is useful, not a literal translation burden. It is related to *sumu*, "to be settled or finished," in a polite negative form: the small social debt is not yet settled. Keep the practical job first.

The word, taken apart

すみません (*sumimasen*) is a native verb in its polite negative: *sumi*, from *sumu*, "to come to an end, be settled" (JMdict writes it with a character meaning "finish"), with *-masen*, "does not". It is inherited, not borrowed: "it is not settled", said of a debt of thanks or of trouble.

Your turn

- *Hear: sumimasen* → choose **repair**, not **farewell**
- *Say it: su / mi / ma / se / n Twice through.*
- *Choose:* you missed a word → すみません

The Japanese spelling is exposure for now. The next two lessons isolate its two new signs before either becomes load-bearing.

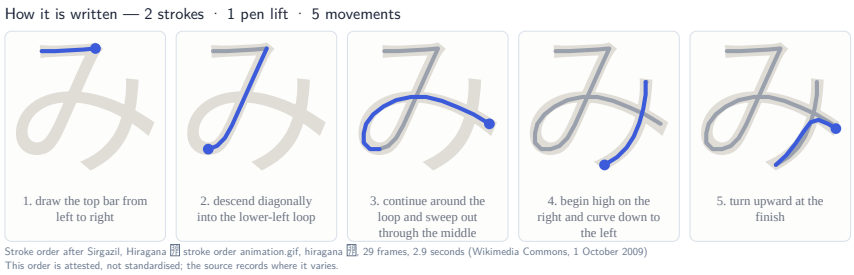

Before you move on

Say it once, then stop. The request itself comes later.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–3.

9.2 み — one looped bridge

Say *sumimasen* once, then write known ま and な. The new sign shares the *m* opening but carries a different vowel.

Script — the shape

How み is written, stroke by stroke

み — *mi*

Write it in two strokes. First make the bent left body, ending in a small turn. Then begin at the upper right, sweep down through the middle, and finish by lifting to the right. Say *mi* only when the second stroke ends.

Your turn

1. Trace み once with a finger.
2. Trace it once with a pencil.
3. Point to み inside すみません; do not decode the other signs yet.

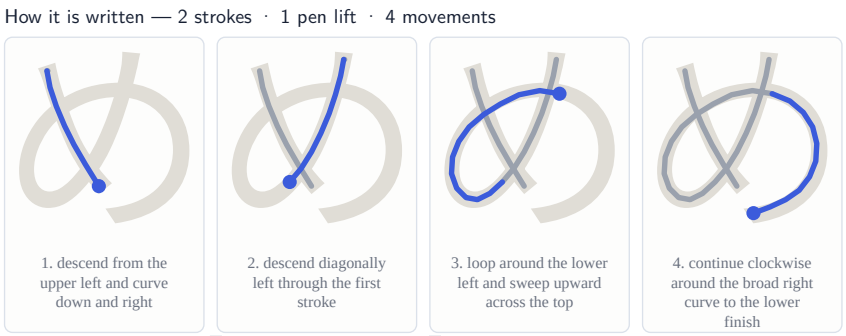

Before you move on

Cover the model and air-write the two strokes once.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

9.3 め — cross, loop, release

Find み in すみません, then say the five-mora repair opener.

Script — the shape

How め is written, stroke by stroke

め — *me*

Two strokes. The short first stroke leans down to the right. The longer second stroke crosses it, curves into an open loop, and releases at the lower right. Keep that final opening visible; do not close it into a circle.

Your turn

- *Copy:* め once with the model visible
- *Read it:* point to み, then め and say *mi, me*
- *Find:* circle め inside すみません

Before you move on

Write め once more while saying *me*.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

9.4 よく — how fully?

Say *sumimasen*. *Point to:* み and め inside it

What to know first

よく — *yo-ku* — well; fully

Two morae. *Yoku* is the adverbial partner of *yoi*, "good." In the coming line, it says that understanding did not happen **well** or **fully**. It does not itself mean "understand."

You already write よ. Treat く as visible support for now; its own tiny writing lesson follows.

The word, taken apart

よく (*yoku*) is the adverb form of native *yoi*, "good" (JMdict): the *-i* of the adjective becomes *-ku*. It is inherited rather than borrowed, and the older origin of *yoi* is not settled.

Your turn

- *Hear: yoku* → choose **well/fully**
- *Say it: yo / ku Twice through.*
- *Point to:* known よ, then supported く

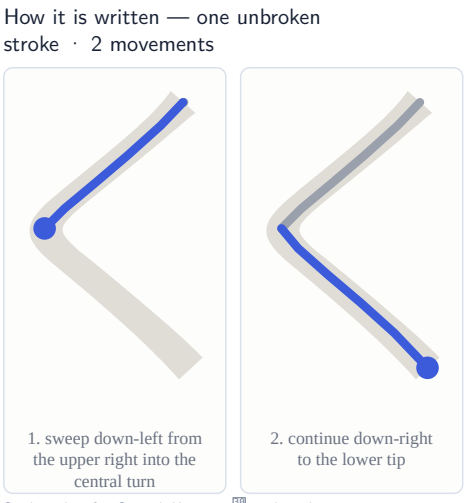

Before you move on

Say *yoku* once without adding the rest of the sentence.
Source: Japan Foundation Irodori Starter lesson 2, p. 1.

9.5 く — one angled stroke

Write known よ and say *yoku*.

Script — the shape

How く is written, stroke by stroke

く — *ku*

One stroke. Begin high on the right, sweep down-left to the point, then turn and sweep down-right. Keep it narrow and open. The turn is part of the same stroke.

Your turn

1. Look at く for five seconds.
2. Hide it and write the one angled stroke.
3. Reveal, check, then join known よ + く → よく.

Before you move on

Read よく once without romanization.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

9.6 わかりません — I do not understand

Read it: よく

Then open a repair with *sumimasen*.

What to know first

わかりません。 — *wa-ka-ri-ma-se-n* — I do not understand

Six morae. The *wakari-* part carries "understand"; polite **-masen** makes the predicate negative. Japanese often leaves out "I" when the situation already makes the experiencer obvious.

Combine the two known pieces only in sound for now:

yoku wakarimasen — I do not understand well / fully

The word, taken apart

わかりません (*wakarimasen*) is native *wakaru*, "to understand", with the polite negative *-masen*. JMdict writes *wakaru* with a character meaning "divide", as if to understand were to sort things apart; the verb is inherited, and its older origin is not settled.

Your turn

- *Hear: wakarimasen* → choose **does not understand**
- *Say it: wa / ka / ri / ma / se / n*
- *Repair: yoku wakarimasen*

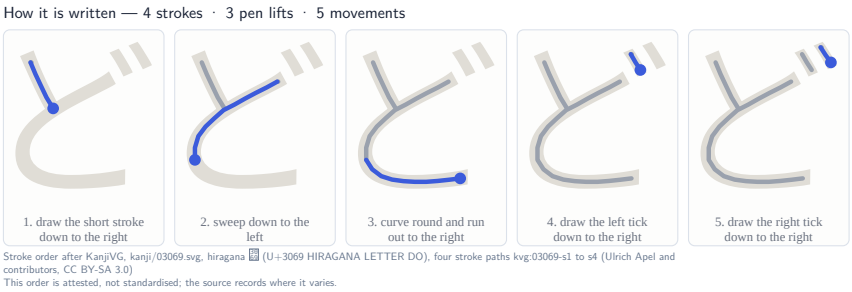

Before you move on

Do not add an invented pronoun. The short Japanese line is complete here.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–2.

9.7 ど — voice a sign you already own

Write と. Add the two-stroke dakuten beside it. Say *wakarimasen* once as the reason a repetition may be needed.

Script — carry the voicing mark

How ど is written, stroke by stroke

と *to* + ゛ → ど *do*

The base shape does not change. Write と first, then add the two short dakuten strokes at the upper right. The mark voices the opening consonant: *t* becomes *d* while the vowel stays *o*.

Your turn

1. Copy と → ど once.
2. Cover the model and write the voiced sign from the heard mora *do*.
3. Read と / ど as *to* / *do* without changing the vowel.

Before you move on

Write ど once more from memory.
Source: Unicode Hiragana chart; voicing pattern and stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

9.8 もう — one more time begins here

Say *sumimasen, yoku wakarimasen. Write it:* め and ど, once each

What to know first

もう — *mō* — again; one more

Two morae: *mo* / *o*. The macron in *mō* hides the second beat, but the Japanese spelling shows it with final う. In other settings this adverb can mean "already" or "more." A request for repetition selects "again."

The word, taken apart

もう (*mō*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. It has no kanji of its own and is written in kana (JMdict).

Your turn

- *Hear: mō* in a repair → choose **again**
- *Say it: mo* / *o*, then count its beats aloud — two
- *Point to:* も | う; う owns the held second beat

Before you move on

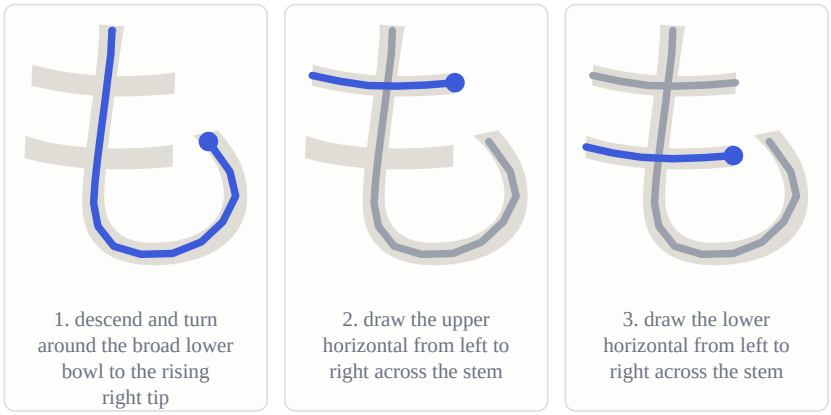

Say it once more, keeping both beats.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–3.

9.9 も — two bars, then the curve

Write known う and み, then say *mo* / *o*.

Script — the shape

How it is written — 3 strokes · 2 pen lifts · 3 movements

Stroke order after Sirgazil, Hiragana 𛀀 stroke order animation.gif, hiragana 𛀀, 28 frames, 2.8 seconds (Wikimedia Commons, 1 October 2009)
This order is attested, not standardised; the source records where it varies.

How も is written, stroke by stroke

も — *mo*

Three strokes. Draw the central curve first, from the upper left down and around. Then add the upper short horizontal and the lower short horizontal. Both bars cross the central stroke.

Your turn

1. Copy も once.

2. Hide it for ten seconds and write it again.
3. Add known う: もう. Read *mo* / *o*.

Before you move on

Cover the model and write もう once.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

9.10 いちど — one time, all known signs

Write it: い, ち, and と, then add the dakuten to と

Say the result: *do*. *Write it:* め once, as a review pulse

What to know first

いちど — *i-chi-do* — one time; once

The word is built transparently: *ichi* is "one," and *do* counts one occurrence. All four visible marks are already yours: い + ち + と + ゛.

Now join it to the previous word:

もういちど — *mō ichido* — one more time

The word, taken apart

いちど (*ichido*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *ichi*, "one" (Middle Chinese *'jit*) and *do*, "degree, a time" (*duH*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

1. Hear *i* / *chi* / *do* without looking.
2. *Write it:* いちど from the three morae
3. *Read it:* もういちど, keeping the two beats in もう

Before you move on

Say which mora carries the dakuten: the last one, *do*. It changes the final mora, not the first two.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–3.

9.11 おねがいします — please, as a polite request

Read it: いちど

Say *sumimasen, yoku wakarimasen. Write it:* く

What to know first

おねがいします。 — *o-ne-ga-i shi-ma-su* — please; I request it

The pieces make the social direction visible: respectful *o-*, *negai* "request or wish," and polite *shimasu* "do." Learn the whole as the courteous request ending. Do not translate each piece while speaking.

The common kanji spelling can wait. This chapter earns the sound and social use first, without switching writing systems mid-ramp.

The word, taken apart

おねがいします (*onegai shimasu*) is built from three native pieces: the polite prefix *o-*, *negai*, "a wish, a request", from the verb *negau*, "to wish", and *shimasu*, the polite form of *suru*, "to do". Word for word: "I do the request" (JMdict).

Your turn

- *Hear: onegaishimasu* → choose **a polite request**
- *Say it: onegaishimasu* once at an even pace
- *Join: mō ichido, onegaishimasu*

Before you move on

Keep the tone even and courteous; volume does not make the request more polite.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–3.

9.12 もういちど、おねがいします — ask for one more pass

Write it: み, め, く, ど, も

Say *sumimasen, yoku wakarimasen.* Then retrieve *mō*, *ichido*, and *onegaishimasu* separately.

What to know first

もういちど、おねがいします。

mō ichido, onegai shimasu — one more time, please

Nothing new is hidden inside the line. もう supplies "again," いちど supplies "one time," and おねがいします makes the request polite. The first two words are now readable; the final expression remains supported exposure until its own longer script runway is complete.

The word, taken apart

もういちど、おねがいします (*mō ichido, onegai shimasu*) puts three words you own side by side. *Mō*, "more", is native; *ichido*, "one time", is built from two characters borrowed from Chinese, *ichi*, "one", and *do*, "a time"; *onegai shimasu*, "I request it", is native again (JMdict).

Your turn

1. **Listen:** distinguish *sumimasen* from *mō ichido, onegaishimasu.*
2. **Speak:** say the opener, then the request, with a small pause.
3. *Read it:* もういちど independently; use the printed support for the rest
4. *Write it:* もういちど from dictation — only this independently earned block

Before you move on

Stop after one accurate repair. Chapter 10 will ask for slower speech instead.

Chapter 10

A Little More Slowly

Modes: 🚗 **voice** (7) ✓ **pen** (5) 🚗 **Hands-free start:** none of the 12 lessons.

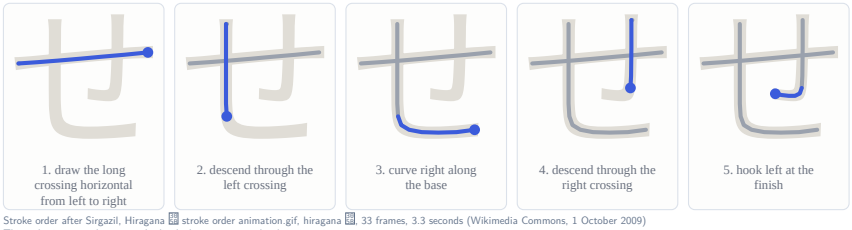

> ***By the end of this chapter:*** I can ask for slower speech, close the repair with wakarimashita, read and write the repair lines earned in the previous chapter, and write five new hiragana signs.
>
> *A second repair strategy assembled from seven tiny lexical steps while independent reading and writing stay inside the learner's earned script boundary.*

10.1 せ — close the opener

> Ask for one repetition. Then hear the farewell in your mind, say it, read さようなら, and write its final ら. Write known す, み, ま, ん separately. Only the fourth sign of *sumimasen* is still missing.

Script — the shape

How it is written — 3 strokes · 2 pen lifts · 5 movements

Stroke order after Sirgazil, Hiragana 𛀀 stroke order animation.gif, hiragana 𛀀, 33 frames, 3.3 seconds (Wikimedia Commons, 1 October 2009)
This order is attested, not standardised; the source records where it varies.

How せ is written, stroke by stroke

せ — *se*

Three strokes: a short horizontal, a longer crossing horizontal with a small hook, then a vertical curve through the right side. Keep the two horizontals separate.

Your turn

1. Copy せ once.
2. Hide it and write it after ten seconds.
3. Join the five known blocks: す | み | ま | せ | ん.

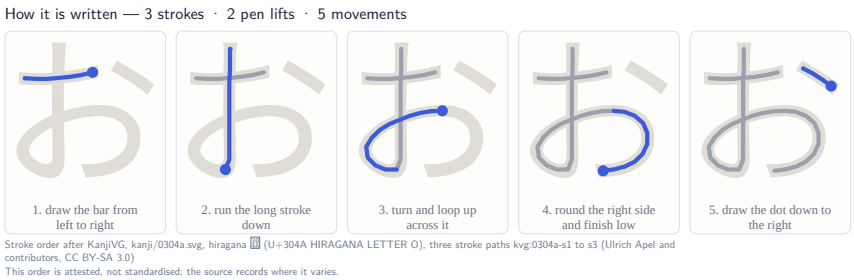

Before you move on

Read すみません once without romanization.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

10.2 お — the respectful opening sign

Say *onegaishimasu*, write せ, then retrieve *yoku* as "well."

Script — the shape

How お is written, stroke by stroke

お — *o*

Three strokes. Write the short top horizontal, then the long central stroke that curves left and loops right. Finish with the small separate mark at upper right.

Your turn

- *Trace it:* お once
- *Copy:* お once with the model visible
- *Find:* point to the first sign in おねがいします

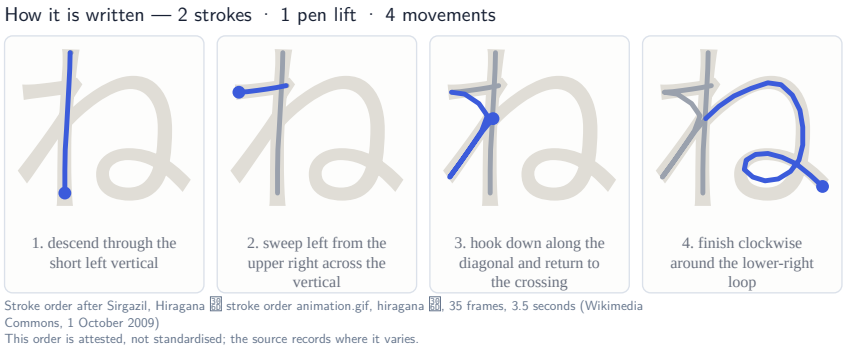

Before you move on

Cover the model and air-write all three strokes.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

10.3 ね — finish the polite request

Write お, then known が, い, し, ま, す. Say the whole request ending once. One written mora remains between お and が.

Script — the shape

How ね *is written, stroke by stroke*

ね — *ne*

Two strokes. First a short vertical. Second, cross it from the upper right, hook left, sweep down, and finish with a small loop at the lower right.

Your turn

1. Copy ね once.
2. Hide it and write it from *ne*.
3. Assemble お | ね | が | い | し | ま | す.

Before you move on

Read おねがいします without romanization, then stop.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

10.4 すこし — ask for a small change

Ask for one repetition. *Write it:* known す, こ, and ね

What to know first

すこし — *su-ko-shi* — a little

Three morae. This word makes a request smaller and gentler: not a completely different explanation, only **a little** adjustment. The last sign is exposure for one lesson; its own writing step comes next.

The word, taken apart

すこし (*sukoshi*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2).

Your turn

- *Hear: sukoshi* → choose **a little**
- *Say it: su / ko / shi Twice through.*
- *Point to:* known す, known こ, supported final sign

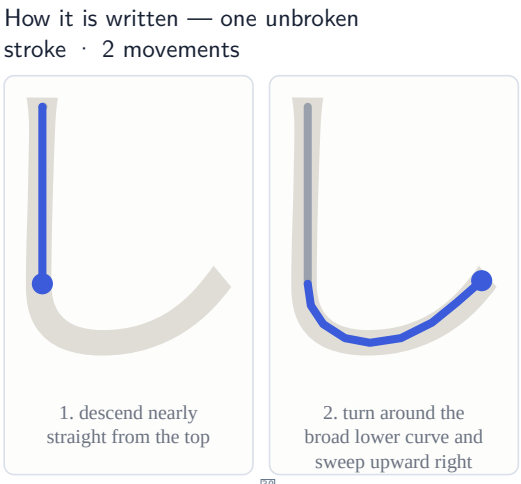

Before you move on

Keep it to three even beats.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–3.

10.5 し — one falling curve

Say *sukoshi*. Write す, こ, and review み.

Script — the shape

Stroke order after Sirgazil, Hiragana 𛀙 stroke order animation.gif, hiragana 𛀙, 23 frames, 2.3 seconds (Wikimedia Commons, 1 October 2009)
This order is attested, not standardised; the source records where it varies.

How し is written, stroke by stroke

し — *shi*

One stroke. Begin high, descend almost vertically, then curve gently up and to the right. Do not add a second stroke or close the curve.

Your turn

1. Trace し once.

2. Hide it and write the single curve.
3. Join す | こ | し and read the three morae.

Before you move on

Read すこし once without support.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

10.6 ゆっくり — slowly, with a held beat

Read it: すこし

Write it: known く, り, and し

What to know first

ゆっくり — *yu-k-ku-ri* — slowly

Do not squeeze the middle. The small っ holds one beat of closure before *ku*. The spelling is exposure today; this lesson earns the sound and practical job without pretending the two new shapes are already readable.

The word, taken apart

ゆっくり (*yukkuri*) is a native mimetic word, one of the Japanese words that picture a manner or a feeling in sound; JMdict marks it as mimetic, and it has no kanji. It is inherited, not borrowed, and its older origin is not settled.

Your turn

- *Hear: yukkuri* → choose **slowly**
- *Tap: yu / hold / ku / ri*
- *Say it: yukkuri* slowly, without adding a vowel in the held beat

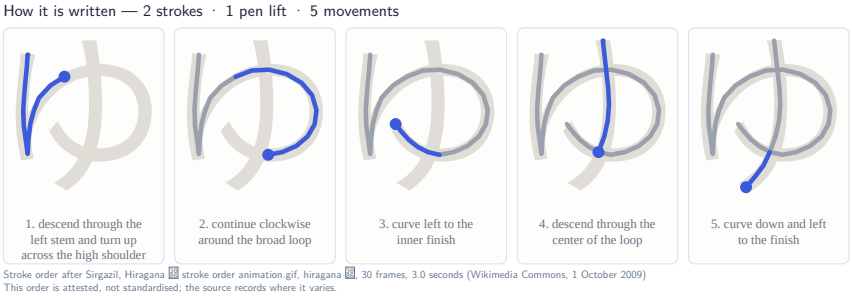

Before you move on

Meaning and timing are enough. The new opening sign comes next.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–3.

10.7 ゆ — open yukkuri

Tap *yu* / *hold* / *ku* / *ri*, then write known よ and も.

Script — the shape

How ゆ is written, stroke by stroke

ゆ — *yu*

Two strokes. First a short curved vertical on the left. Second, begin at the upper right, sweep left through the middle, loop around, and finish to the right.

Your turn

- *Trace it:* ゆ once
- *Copy:* ゆ once
- *Find:* point to ゆ at the start of ゆっくり

Before you move on

The small っ remains supported; do not decode past what you own.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

10.8 いってください — please say it

Say *yukkuri*. Retrieve *onegaishimasu*. *Write it:* い, く, さ

What to know first

いってください。 — *itte kudasai* — please say it

The first part is the request-linking form of *iu*, "to say." *Kudasai* makes the requested action polite. Learn the whole spoken frame now. Its small っ, て, and voiced だ receive separate writing steps later.

The word, taken apart

いってください (*itte kudasai*) is two native verbs, inherited rather than borrowed. *Itte* is the linking form of *iu*, "to say". *Kudasai* is the request form of *kudasaru*, "to give (to me)", written with a character meaning "down; give", for a favour that comes down to the speaker (JMdict, KANJIDIC2).

Your turn

- *Hear: itte kudasai* → choose **please say it**
- *Say it: it-te ku-da-sa-i*
- *Join: yukkuri itte kudasai* — please say it slowly

Before you move on

Do not write the supported signs from memory yet.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–3.

10.9 もうすこし — a little more

Say *itte kudasai*. *Write it:* ゆ, then もう and すこし separately, and read both back

What to know first

もうすこし — *mō sukoshi* — a little more

No new grammar is hiding here. もう points beyond the present amount; すこし keeps the requested change small. Every sign is already earned.

The word, taken apart

もうすこし (*mō sukoshi*) is two native words in a row: *mō*, "more", and *sukoshi*, "a little". Both are inherited rather than borrowed (JMdict).

Your turn

1. *Read it:* もう | すこし
2. Say *mō sukoshi*, keeping the extra beat in もう.
3. Hear the phrase and wait ten seconds. *Write it:* もうすこし from memory

Before you move on

Name the sign that carries the second beat of *mō*: う.
Source: Japan Foundation Irodori Starter lesson 2, pp. 1–3.

10.10 わかりました — the repair worked

Say "I do not understand." *Read it:* もうすこし

Write it: み and し

What to know first

わかりました。 — *wakarimashita* — I understand; understood

The familiar *wakari-* stem returns. Polite *-mashita* presents the change as achieved: the explanation landed. The final た is supported exposure until its own sign lesson.

The word, taken apart

わかりました (*wakarimashita*) is native *wakaru*, "to understand", in its polite past *-mashita*. JMdict writes the verb with a character meaning "divide"; it is inherited, and its older origin is not settled.

Your turn

- *Hear: wakarimasen* → not understood
- *Hear: wakarimashita* → understood now
- *Say it: wakarimashita* after a successful repetition

Before you move on

Keep *-masen* and *-mashita* distinct; one reports a problem, the other success.
Source: Japan Foundation Irodori Starter lesson 2, pp. 2–3.

10.11 ここ — here, with one known sign twice

Write it: こ

Say *wakarimashita*, then retrieve *sumimasen*.

What to know first

ここ — *ko-ko* — here; this place

One owned sign appears twice. The word belongs to a larger pointing family that will later contrast near me, near you, and over there. Today, keep only the speaker-near place: **here**.

The word, taken apart

ここ (*koko*) is native: the *ko-* that points near the speaker, as in *kore*, "this", with *-ko*, a place ending that KANJIDIC2 lists among the readings of a character meaning "place". It is inherited rather than

borrowed, and is usually written in kana (JMdict).

Your turn

1. Picture the spot beside you and say *koko*.
2. *Read it:* こ | こ
3. Hear *ko-ko* and wait ten seconds. *Write it:* both signs

Before you move on

No new shape was needed; the payoff is recombination.
Source: Japan Foundation Irodori Starter lesson 2, p. 2.

10.12 もうすこし、ゆっくりいってください — slower, please

Write it: せ, お, ね, し, ゆ

Say *sumimasen* and *onegaishimasu*. Retrieve the repetition request, then the three new spoken pieces *mō sukoshi*, *yukkuri*, and *itte kudasai*.

What to know first

もうすこし、ゆっくりいってください。

mō sukoshi, yukkuri itte kudasai — please say it a little more slowly

No new rule arrives here. The first block is independently readable and writable. The second and third remain sound-first exposure where their small っ, て, and だ have not yet received individual writing lessons.

The word, taken apart

もうすこし、ゆっくりいってください (*mō sukoshi, yukkuri itte kudasai*) is built only from native words you already own: *mō*, *sukoshi*, the mimetic *yukkuri*, *itte* from *iu*, "to say", and *kudasai* from *kudasaru*, "to give". None of them is borrowed (JMdict).

Your turn

1. **Listen:** choose repetition or slower speech from the request you hear.
2. **Speak:** *sumimasen* + the slower request.
3. *Read it:* only もうすこし, retrieving it independently
4. *Write it:* もうすこし
5. **Close:** after the repeated line, say *wakarimashita*.

Before you move on

Stop after one accurate repair and one *wakarimashita*.

Chapter 11

Seven Body Words, No New Guessing

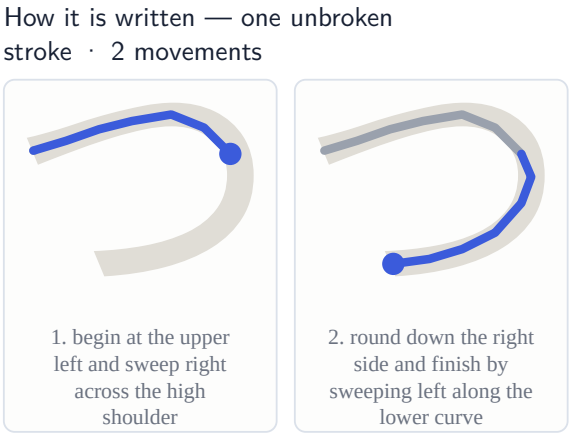

Modes: 🚗 **voice** (7) 👁 **eyes** (1) ✓ **pen** (4) 🚗 **Hands-free start:** none of the 12 lessons.

> ***By the end of this chapter:*** I can read, write, hear, and say seven basic body words, and I can decode the repair signs that were previously only sound-first exposure.
>
> *Seven concrete body labels built only from earned hiragana after four tiny lessons close every outstanding repair-script exposure.*

11.1 っ — one small held beat

Point here and say *koko*. Count one time with *ichido*. Ask for the line a little more slowly, then isolate *yukkuri* and *itte kudasai*. Hold the silence before each second consonant; do not add a vowel.

Script — the shape

Stroke order after Sirgazil, Hiragana 3064 stroke order animation.gif, hiragana 3064, 24 frames, 2.4 seconds (Wikimedia Commons, 1 October 2009); Unicode Standard 17.0 names U+3063 HIRAGANA LETTER SMALL TU, alias small tsu
This order is attested, not standardised; the source records where it varies.

How っ is written, stroke by stroke

っ — small *tsu* — one beat of consonant closure

It has the same family shape as full-sized つ, but it is smaller and sits lower. Copy only the small form today. In ゆっくり, it holds before *k*; in いって, it holds before *t*.

Your turn

1. Trace っ once and copy it once.
2. Hide it; write the small sign after ten seconds.
3. Read ゆっくり and いって with one silent beat at っ.

Before you move on

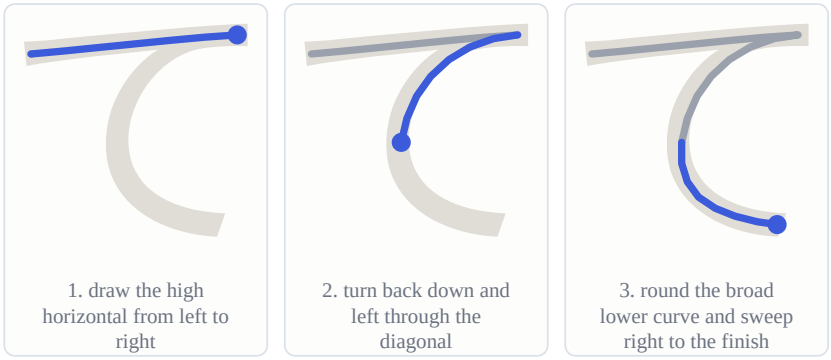

Stop after one accurate small form.
Source: Unicode Hiragana chart.

11.2 て — close *itte*

Write もうすこし, say *itte kudasai*, then write the small っ that holds before *t*.

Script — the shape

How it is written — one unbroken stroke · 3 movements

Stroke order after Sirgazil, Hiragana 30 66 stroke order animation.gif, hiragana 39 66, 28 frames, 2.8 seconds (Wikimedia Commons, 1 October 2009)
This order is attested, not standardised; the source records where it varies.

How て is written, stroke by stroke

て — *te*

One continuous stroke: begin across the top, turn back, then sweep down and right. Keep the lower curve open.

Your turn

1. Trace て once.
2. Copy it once, then retrieve it after ten seconds.
3. Join the earned ending: い | っ | て.

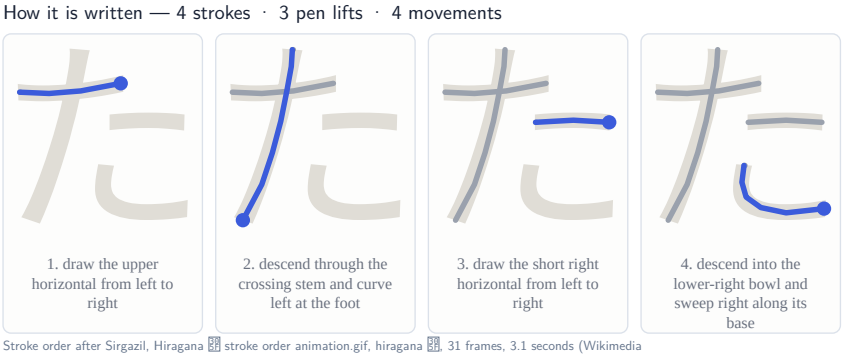

Before you move on

Read いって once without romanization.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

11.3 た — close *wakarimashita*

Say *wakarimashita*. Write と and notice that today's *ta* belongs to the same consonant row but has its own shape.

Script — the shape

Stroke order after Sirgazil, Hiragana 𛀀 stroke order animation.gif, hiragana 𛀀, 31 frames, 3.1 seconds (Wikimedia Commons, 1 October 2009)
This order is attested, not standardised; the source records where it varies.

How た is written, stroke by stroke

た — *ta*

Four strokes: a short top stroke, a crossing vertical curve, then two small right-side strokes. Keep the right pair separate.

Your turn

1. Trace た once and copy it once.
2. Hide it; write it after ten seconds.
3. Add it to the known final block し | た.

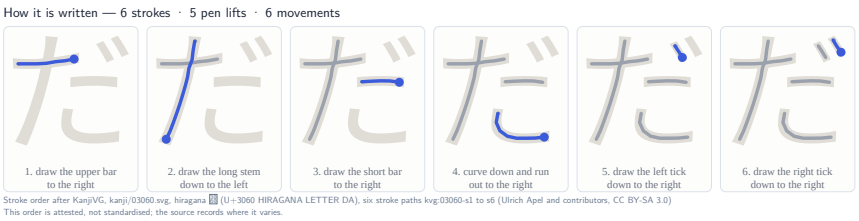

Before you move on

Read the ending した once.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

11.4 だ — voice the known base

Write た, then add the two-stroke dakuten without changing the base. Say the *da* in *kudasai*.

Script — the change

How だ is written, stroke by stroke

た + dakuten → だ — *ta* → *da*

The voicing mark does the same job it did before. This is transfer, not a new complex shape.

Your turn

1. Write た once.
2. Add dakuten to make だ.
3. Point to だ while saying the middle of *kudasai*.

Before you move on

Read ください once, attending to だ.
Source: Unicode Hiragana chart.

11.5 て — hand

Write it: て and だ

Picture the spot where you are and say *koko*, then ask for the line a little more slowly.

What to know first

て — *te* — hand

The one-sign word names the hand. Sound, meaning, reading, and writing can meet without adding another shape.

The word, taken apart

2. *Read it:* て, then say "hand."

2. *Read it:* 口, then its reading く | ち
3. *Write it:* 口, then the two signs in order, with the word hidden

11.9 はな — nose

Write it: は and な

Retrieve あし.

What to know first

はな — *hana* — nose

Inside this word, は is *ha*. Its *wa* reading was tied to the topic marker job, not to every appearance of the sign.

Chapter 13

Nine Family Words Through One New Kana

Modes: **voice** (15) **pen** (2) **Hands-free start:** none of the 17 lessons.

> ***By the end of this chapter:*** I can hear, say, read, and write nine immediate-family words, with listening, speaking, reading, and writing scored independently.
>
> *Nine official Irodori Starter family words built from earned hiragana plus one separately traced, copied, and recalled full-size* つ*.*

13.1 つ — one full-size curve

> Write ありがとう, name its older *arigatashi* family, and point to the dakuten. Then write small っ and retrieve one word from the body map.

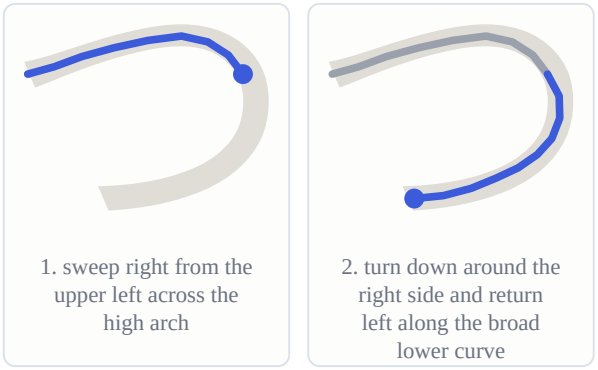

Script — notice and trace

つ — *tsu*

This is the full-size sign. Trace its one stroke: begin at the upper left, sweep right, turn downward, and finish toward the lower left.

Writing — copy, then recall

How it is written — one unbroken stroke · 2 movements

Stroke order after Sirgazil, Hiragana 3064 stroke order animation.gif, hiragana 3064, 24 frames, 2.4 seconds (Wikimedia Commons, 1 October 2009)
This order is attested, not standardised; the source records where it varies.

How つ is written, stroke by stroke

Copy つ once. Hide it for ten seconds, write it once, then place つ beside small っ and check that the full-size sign is clearly larger.

Before you move on

Read it once: *tsu*.
Source: Unicode Hiragana chart; stroke order per *Hitsujun Shido no Tebiki* (Japanese Ministry of Education, 1958).

13.2 Full つ, small っ

Write it: distant さ once from memory

Your turn — one contrast

Write it: distant さ, then つ・っ
Say *tsu* for the full-size sign; hold one silent beat for the small sign.

Before you move on

Stop after one accurate pair.

13.3 ちち — my father

Write it: known ち once

Then say it on one even mora.

You'll Want to Know — hear it before reading it

Hear *chi-chi*. Say "my father," then say the two even morae once.

The word, taken apart

ちち (*chichi*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2).

Your turn — read, copy, recall

Read it: ち | ち

Write it: one copy of ちち; then hide it and write it once from the meaning

Before you move on

Write it: distant 五 once
Hear *tsu-ma* and say two morae, with a full vowel after *ts*.

The word, taken apart

つま (*tsuma*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2). JMdict also lists an old use as a term of endearment, "my dear".

You'll Want to Know — hear and say

Write it: distant 口 once
Hear *ko-do-mo*, choose "child," then say the three even morae.

The word, taken apart

こども (*kodomo*) is native: *ko*, "child", with *-domo*, an old plural ending, so it was once a plural, "children" (JMdict writes both parts with kun'yomi). It is inherited rather than borrowed.

Your turn — read, copy, recall

Read it: こ | ど | も
Write it: one copy of こども; then hide it and write it once

Before you move on

Before you move on

Stop after one accurate pair.

13.13 Family retrieval B

Say いもうと once without looking back.

Write it: all three

Before you move on

Stop after one accurate set.

13.14 Family retrieval C

Say おっと once without looking back.

Stop after one accurate set.

13.15 Family retrieval D

Say つま once without looking back.

Your turn — size carries sound

Write it: コ, then add distant ー after it

State that the bar holds the vowel for one more beat. Then hear つま・おっと. *Read it:* つま・おっと

Write it: つま・おっと, with a clear size contrast

Before you move on

Stop after one accurate pair.

13.16 Nine family words — reception check

Retrieve こども once from the English cue "child."

Your turn — listening

Use sound only. Score listening before revealing any written word.

Your turn — reading

Read it: the family words without romanization

A failed section is repeated on its own.

Before you move on

Keep listening and reading scores separate; repair only the weaker channel.

13.17 Nine family words — production check

Start with two older forms. Write distant katakana ヒ. Then read コーヒー and recall why a loanword uses katakana.

Now hear, say, read, and write these four later body words: あたま・かみ・は・かた.

Finish with the remaining three: おなか・せなか・こし.

Your turn — speaking

Use no written answer while speaking. Check task completion and mora timing.

Writing

No section compensates for another. Repeat only the section below its own pass mark.

Before you move on

Keep speaking and writing scores separate; repair only the weaker channel.

Chapter 14

Five Numbers, No New Signs

Modes: 🚗 **voice** (6) 🚗 **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can say and write one to five in Japanese, and I can say which number has a native word standing beside its borrowed reading.
>
> *Run ichi to go in order, then name the two of the five that were already yours and say where you had met each.*

14.1 いち — one, taken out of a word you already say

Two recalls, at two distances.

- *Recall:* run the nine family words — **R1**, one lesson back
- *Recall:* the whole doorway exchange, start to finish — **R4**, eighty lessons back

You'll Want to Know — hear and say

いち — *ichi* — **one**

Say もういちど. You have asked for one more time since chapter nine, and that lesson told you what the first two morae were: *ichi* is **one**. Nothing about the word changes today. It stops being part of a phrase and starts being a number you can use on its own.

Both signs are yours: い + ち.

The word, taken apart

いち (*ichi*) is Sino-Japanese: the on'yomi of the character for "one", a reading borrowed from Chinese (Middle Chinese *'jit* in Baxter's transcription; Unihan).

Your turn — read, copy, recall

Read it: い | ち

Write it: one copy of いち; then hide it and write it from the meaning

Then say いちど and name the part of it that is the number.

Before you move on

How many new signs did this lesson need? (**None.**)
Source: Wiktionary: いち.

14.2 五 — five, and the sign that was holding it

Two recalls, then the second number.

- *Recall:* say *one* — **R1**, one lesson back
- *Recall:* say the farewell, and say it after hearing it — **R4**, eighty lessons back

You'll Want to Know — hear and say

五 (ご) — *go* — **five**

Write it: 五 once

Chapter five taught you those four strokes, gave you the sound *go*, said on the page that **the sign means five on its own**, and then asked you for nothing but the sound, because it was only there to cue the *go* inside 語.

That was the whole of the deferral. 五 is **five**, read *go*, and you have been able to write it for nine chapters.

Its reading in hiragana is こ with the dakuten: ご. Both marks are yours.

The word, taken apart

五 (*go*) is Sino-Japanese: *go* is the on'yomi of the character for "five", a reading borrowed from Chinese (Middle Chinese *nguX*). The native word for five is *itsu*, as in *itsutsu* (KANJIDIC2).

Your turn — read, copy, recall

Write it: 五 from memory — top, down, middle and turn, long bottom — then its reading ご

Say *go*. Say いち, then 五 — the two numbers you owned before this chapter opened.

Before you move on

How many new signs did this lesson need? (**None.**)
Sources: Wiktionary: 五; KanjiVG stroke-order data.

14.3 に — two, one mora long

Three recalls, then the third number.

- *Recall:* say *five* — **R1**, one lesson back
- *Recall:* run the fourteen body words — **R3**, twenty lessons back
- *Write it:* よ from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

に — *ni* — **two**

One mora, one sign, and you learned that sign in chapter two to build こんにちは. Say the three numbers you now have, in the order you met them: *ichi*, *go*, *ni*.

Do not let the shortness fool you into hurrying it. に is one full beat, exactly as long as either beat of いち.

The word, taken apart

に (*ni*) is Sino-Japanese: the on'yomi of the character for "two", borrowed from Chinese (Middle Chinese *nyijH*). The native word for two is *futa*, as in *futatsu* (KANJIDIC2).

Your turn — read, copy, recall

Read it: に

Write it: に; then hide it and write it again from the meaning

Then say *ichi* — *ni* and hold both at one beat each.

Before you move on

How many new signs has this chapter needed? (**None.**)
Source: Wiktionary: に.

14.4 さん — three, on two old signs

Four recalls, then the fourth number.

- *Recall:* say *two* — **R1**, one lesson back
- *Recall:* take the family reception once more — **R2**, five lessons back
- *Write it:* full-size つ from memory — **R3**, twenty lessons back
- *Write it:* な from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

さん — *san* — **three**

さ came in chapter four for ありがとうございます; ん came in chapter two, and its lesson said it is the one hiragana sign that is not a full syllable. It still is not. さん is **two beats**: *sa*, then a beat of the nasal on its own.

Say *ichi* — *ni* — *san*. Four numbers, four lessons, no new signs.

The word, taken apart

さん (*san*) is Sino-Japanese: the on'yomi of the character for "three", borrowed from Chinese (Middle Chinese *sam*); the final *m* of the Chinese became the moraic *n*. The native word for three is *mi* (KANJIDIC2).

Your turn — read, copy, recall

Read it: さ | ん as two beats
Write it: さん; then hide it and write it again
Then say *ichi, ni, san* three times without slowing at ん.

Before you move on

Which four numbers do you now have? (***Ichi, ni, san, go.***)
Source: Wiktionary: さん.

14.5 よん — four, and where the two systems meet

Four recalls, then the number with two names.

- *Recall:* say *three* — **R1**, one lesson back
- *Recall:* run the nine family words — **R2**, five lessons back
- *Recall:* say *my father* — **R3**, twenty lessons back
- *Write it:* ら from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

よん — *yon* — **four**

し — *shi* — **four**, the same number said the other way

Both signs of よん are yours, and so is し. Two beats each: *yo* plus the nasal beat, or *shi* alone.

Grammar Lens — a native word inside a borrowed count

Japanese has two ways of reading a sign: the reading it borrowed from Chinese along with the sign, and the reading it already had for the thing the sign means. Wiktionary's readings box for the kanji **four** lists them side by side:

reading	kind	which
し *shi*	on'yomi, borrowed with the sign	four
よん *yon*	kun'yomi, the native word	four

Ichi, *ni*, *san* and *go* are all borrowed readings, and none of them has a native word standing beside it in the everyday count. **Four is the first place in the run where the native word is used too** — and in ordinary speech よん is the one you will hear far more often. That split is coming back. It is the same seam the counters run along, and it opens here.

Your turn — read, copy, recall

Write it: よん and し

Say the run in order: *ichi, ni, san, yon, go.* Then say it once with し in place of よん and hear how much closer *shi* sits to *ichi*.

Before you move on

Which four is a native Japanese word? (よん.)
Sources: Wiktionary: the kanji read shi and yon; Wiktionary: よん.

14.6 One to five, in order at last

Three recalls before the run.

- *Recall:* say *four*, both ways — **R1**, one lesson back
- *Recall:* say *my father* — **R3**, twenty lessons back
- *Read it:* さようなら off the page — **R4**, eighty lessons back

Nothing new arrives here. This is the first time the five stand in numerical order, and that has been deliberate.

Your turn — the run, and the two you started with

- *Say it: ichi ni san yon go* — the run, without stopping
- *Say it:* it again with し at four
- *Write it:* 五, and say which of the five it is

What you've built this chapter, in one number

Five numbers, and zero new signs. Every mark in *ichi, ni, san, yon, go* was taught before this chapter opened, and two of the five words were already in your hands: *ichi* inside もういちど, and *go* as the kanji 五.
One thing did arrive that is not a word: at **four**, the native reading stands beside the borrowed one. Watch for it again.

Before you move on

How many new signs did this chapter cost? (**None**.) Which number in the run has a native word beside its borrowed reading? (**Four**.)

Chapter 15

The Two Signs the Rest of the Run Cost

Modes: **voice** (5) **eyes** (1) **pen** (2) **Hands-free start:** the first of 8 lessons.

> ***By the end of this chapter:*** I can say and write one to ten in Japanese, build any number up to ninety-nine out of those ten words, and say which of them carry a second reading and why.
>
> *Run ichi to juu in order, build thirteen and thirty out of the same two words, and say what the ten numbers cost in signs.*

15.1 なな — seven, and the pattern from four holding

Three recalls, then a number out of order, on purpose.

- *Recall:* say *four* both ways, and say which is the native one — **R1**, one lesson back
- *Recall:* say *my mother* — **R3**, twenty lessons back
- *Recall:* take the farewell in all four skills — **R4**, eighty lessons back

This chapter does not start at six. Six is one of only two numbers left that costs a new sign, and both of those wait until the end.

You'll Want to Know — hear and say

なな — *nana* — **seven**

しち — *shichi* — **seven**, the same number said the other way

All three signs are yours: な, し, ち.

The word, taken apart

なな (*nana*) is native: the kun'yomi of the character for "seven", a word inherited, not borrowed. The borrowed reading is *shichi*, from Chinese (Middle Chinese *tshit* in Baxter's transcription; KANJIDIC2).

What you've built — the same seam, a second time

Wiktionary's readings box for the kanji **seven** says exactly what the box for **four** said:

number	**borrowed reading**	**native word**
four	し *shi*	よん *yon*
seven	しち *shichi*	なな *nana*

Twice now, and both times at a number where the borrowed reading is easy to mishear — *shi* against *ichi*, *shichi* against *ichi*. The native word is the one that keeps the count clear, and it is the one you will hear. One instance was a fact about four. Two is a pattern, and this is where the book says so.

Your turn — read, copy, recall

Write it: なな

Say what you have: *ichi, ni, san, yon, go … nana.* Leave the hole where six is; you will hear it.

Before you move on

How many new signs did this lesson need? (**None.**)
Sources: Wiktionary: the kanji read shichi and nana; Wiktionary: なな.

15.2 はち — eight, with nothing standing beside it

Three recalls, then the plain case.

- *Recall:* say *seven*, both ways — **R1**, one lesson back
- *Recall:* say *my elder brother* — **R3**, twenty lessons back
- *Recall:* say *excuse me* — **R4**, eighty lessons back

You'll Want to Know — hear and say

はち — *hachi* — **eight**

Two beats, two old signs: は from chapter one and ち from chapter two.

And that is the whole lesson, which is the point of it. **Eight has no second name.** Four had one and seven had one; eight does not, and neither did one, two, three or five. The pattern you were shown twice is not everywhere — it sits at two numbers out of the seven you now hold.

A rule you cannot see the edge of is not a rule you can use. This is the edge.

The word, taken apart

はち (*hachi*) is Sino-Japanese: the on'yomi of the character for "eight", borrowed from Chinese (Middle Chinese *peat*). The native word, *ya*, lives on in *yattsu* (KANJIDIC2).

Your turn — read, copy, recall

Write はち. Say what you hold: *ichi, ni, san, yon, go … nana, hachi.* The hole at six is still there.

Before you move on

How many new signs did this lesson need? (**None.**)
Source: Wiktionary: はち.

15.3 く — nine, and the exception to the seam

Three recalls, then a number with two readings and no native one.

- *Recall:* say *eight* — **R1**, one lesson back
- *Recall:* say *my elder sister* — **R3**, twenty lessons back
- *Write it:* み from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

く — *ku* — **nine**

One mora, one sign, and you have had that sign since chapter nine, where it closed よく. Say *hachi, ku.*

Nine has a second everyday reading as well, *kyū*, and it is the commoner of the two. This book cannot spell it yet — it needs two signs you have not met — so it is written here in romanization only and will be spelled when those signs arrive.

The word, taken apart

く (*ku*) is Sino-Japanese, and so is *kyū*: both are on'yomi of the character for "nine", borrowed from Chinese at different times from one Chinese word (Middle Chinese *kjuwX*). The native word is *kokono* (KANJIDIC2).

What you've built — a second reading that is not a native word

Four and seven each had two names, and in both the second was the **native** word. Nine has two names too, and Wiktionary's readings box puts **both** of them on the borrowed side:

number	**readings the box calls borrowed**	**the native word**
four	し	よん — used
seven	しち	なな — used
nine	く, *kyū*	*kokono* — not used in the plain count

So the pattern is narrower than it looked two lessons ago: *some* numbers have two everyday names, and only *some of those* get their second name from the native side. Nine has two names for a different reason.

You met the plain case at eight. This is the other edge.

Your turn — read, copy, recall

Write it: く

Say what you hold: *ichi, ni, san, yon, go … nana, hachi, ku.* Two numbers are missing and you can hear both gaps.

Before you move on

Which two numbers are still missing? (**Six and ten** — the two that cost a sign.)
Source: Wiktionary: the kanji read kyuu and ku.

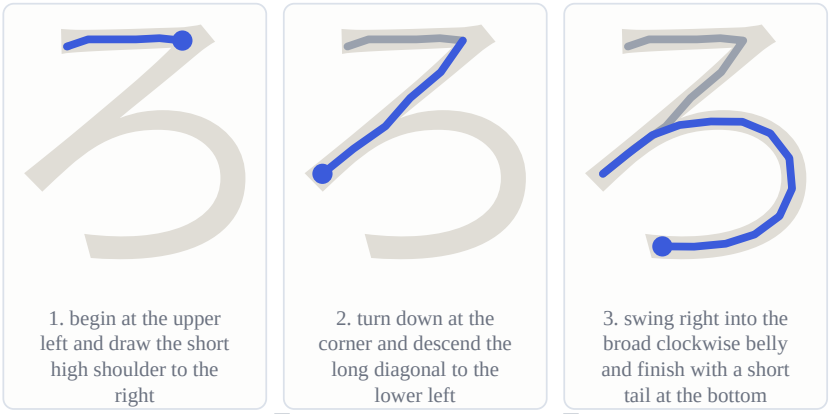

15.4 ろ — one turn, and the r you already make

Three recalls, then one sign.

- *Recall:* say *nine* — **R1**, one lesson back
- *Recall:* say *my younger brother* — **R3**, twenty lessons back
- *Recall:* write め — **R4**, eighty lessons back

Script — the shape

How it is written — one unbroken stroke · 3 movements

Stroke order after Sirgazil, Hiragana 30 stroke order animation.gif, hiragana 30, 26 frames, 2.6 seconds (Wikimedia Commons, 1 October 2009)
This order is attested, not standardised; the source records where it varies.

How ろ is written, stroke by stroke

ろ — *ro*

Write ら once. ろ starts the same way and ends differently: a short stroke across the top, then down and round to the left and back up, closing the loop instead of leaving a hook.

The sound is the one ら already taught you — a single tap of the tongue, neither the English *r* nor the English *l*.

This is the first new sign in two chapters, and it is here for one word.

Your turn

1. Trace ろ once and copy it once.
2. Hide it; write it after ten seconds.
3. Write ら and ろ side by side and say both, one tap each.

Before you move on

Stop after one accurate form.

15.5 ろく — six, and the hole closes

Three recalls, then the word the last lesson bought a sign for.

- *Write it:* ろ from memory — **R1**, one lesson back
- *Recall:* say *my younger sister* — **R3**, twenty lessons back
- *Recall:* say *well, fully* — **R4**, eighty lessons back

You'll Want to Know — hear and say

ろく — *roku* — **six**

ろ arrived last lesson; く you have had since chapter nine, where it also became the number **nine**. So the sign く does two jobs in this run: it is *nine* on its own and the second beat of *six*.

Six has one everyday reading. No native word stands beside it.

The word, taken apart

ろく (*roku*) is Sino-Japanese: the on'yomi of the character for "six", borrowed from Chinese (Middle Chinese *ljuwk*). The native word, *mu*, lives on in *muttsu* (KANJIDIC2).

What you've built — why six waited

You have been counting round a gap for three lessons. Here is what the gap was: of the ten numbers in this run, **exactly two need a sign this book had not taught**, and six is the first of them.
That is why the chapter did not start here. Everything that cost nothing came first, so that when a lesson finally spends a sign you can see exactly what it bought.
Say the run: *ichi, ni, san, yon, go, roku, nana, hachi, ku.* Nine of ten, and only one gap left.

Your turn — read, copy, recall

Read it: ろ | く

Write it: ろく; then hide it and write it again from the meaning
Then say *roku, nana, hachi, ku* four times, without stopping.

Before you move on

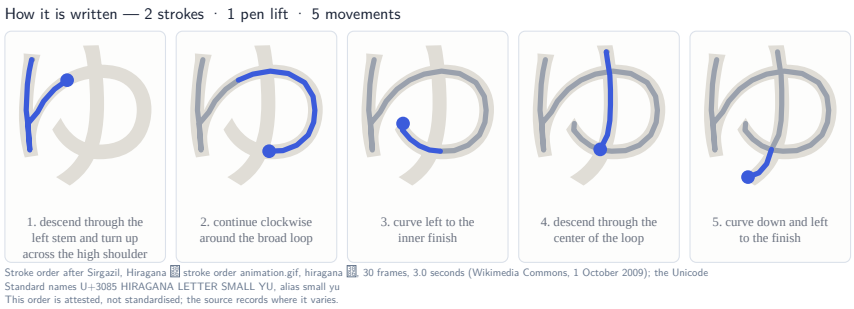

How many of the ten numbers cost a new sign? (**Two** — this one, and one more.)
Source: Wiktionary: ろく.

15.6 ゆ — a small sign that joins forward

Three recalls, then the last new sign of the run.

- *Recall:* write ゆ, full size — **R2**, five lessons back

Script — the shape

How ゅ is written, stroke by stroke

ゅ — small *yu*

Same shape as ゆ, written small and sitting low — the way っ is a small つ.

The two small signs do opposite jobs, and it is worth putting them side by side:

sign	what it does
っ	holds a silent beat *before* the next consonant
ゅ	joins to the sign *before* it, and the two become **one beat**

So し plus ゅ is not *shi-yu*. It is one beat, *shu*. Voice the し with the dakuten first and じ plus ゅ is one beat, *ju*.

That is the sign the last number needs.

Your turn

1. Write ゆ, then ゅ beneath it, half the height.
2. Write っ and ゅ side by side; say which one holds and which one joins.
3. Read じゅ as a single beat. Do not let a *yu* escape between the two.

Before you move on

Stop after one accurate small form.

15.7 じゅう — ten, and what ten does

Three recalls, then the last number.

- *Write it:* ゆ from memory, and say what it does to the sign before it — **R1**, one lesson back
- *Recall:* say *my wife* — **R3**, twenty lessons back
- *Recall:* say *I do not understand* — **R4**, eighty lessons back

You'll Want to Know — hear and say

じゅう — *jū* — **ten**

Three signs, two beats. し voiced with the dakuten is じ; じ with the small ゆ is one beat, *ju*; the う after it holds that beat long. Say it as two beats, not three: *ju–u*, not *ji-yu-u*.

Grammar Lens — ten words, ninety-nine numbers

じゅう is not just the tenth word in a list. It is the one that makes the list go further than itself, and it does so with no joining word at all:

what you say	what it is
じゅういち	ten, one → **eleven**
にじゅう	two, ten → **twenty**
にじゅういち	two, ten, one → **twenty-one**

A number **before** じゅう multiplies it. A number **after** じゅう is added to it. Nothing is inserted between them.
Ten words, and every number up to ninety-nine is one of their arrangements. That is what the last two chapters were for.

The word, taken apart

じゅう (*jū*) is Sino-Japanese: the on'yomi of the character for "ten", borrowed from Chinese (Middle Chinese *dzyip*). The native word is *tō* (KANJIDIC2).

Your turn — read, copy, recall

Write it: じゅう

Say the whole run, one to ten, without stopping. Then say *jūichi*, *nijū*, *sanjū*, and build one number of your own between twenty and ninety-nine.

Before you move on

15.8 One to ten, and what the run cost

Four recalls before the run.

- *Recall:* say *ten*, in two beats — **R1**, one lesson back
- *Recall:* say *seven*, both ways — **R2**, five lessons back
- *Recall:* say *child* — **R3**, twenty lessons back
- *Write it:* ど from memory — **R4**, eighty lessons back

Nothing new arrives here. This is the first time all ten stand in order.

Your turn — the run

- *Say it: ichi ni san yon go roku nana hachi ku jū* — without stopping
- *Say it:* it again with し at four and しち at seven
- *Write it:* 五

What you've built in two chapters, in three numbers

Ten numbers. Two new signs. Ninety-nine numbers you can now say.
Ichi and *go* were yours before chapter fourteen opened. Only ろ and ゆ had to be bought, one word each.
At **four** and **seven** the native word stands beside the borrowed reading; at **nine** both readings are borrowed, and **eight** has no second name at all.
五 is still the only one of the ten you can write as Japanese writes it.

The other nine kanji are the next thing this book owes you.

How many new signs did ten numbers cost? (**Two**.) Which two numbers have a native word standing beside a borrowed reading? (**Four and seven**.) What does a number *before* じゅう do to it? (**Multiplies it**.)

Chapter 16

The Other Way to Count

Modes: **voice** (5) **eyes** (1) **pen** (2) **Hands-free start:** none of the 8 lessons.

> ***By the end of this chapter:*** I can count things from one to five in the native Japanese series, write the two signs it cost, and say the one place where the same word stands in both of Japanese's counts.
>
> *Run hitotsu to itsutsu, say the borrowed five beside them, and name the one number where a single word appears in both counts.*

16.1 ひ — one stroke, and a second count begins

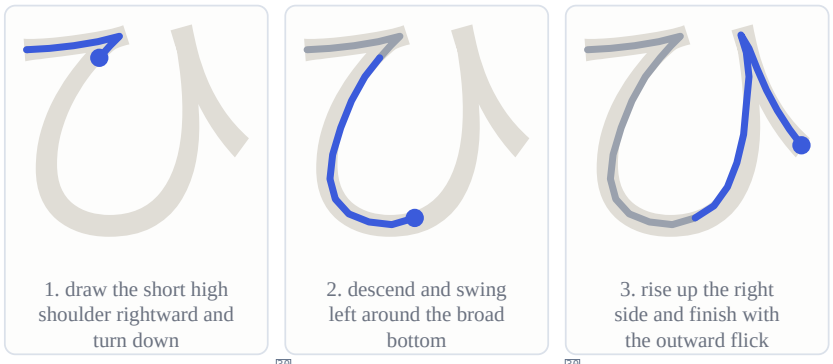

Three recalls, then one sign.

- *Recall:* write ろ — **R2**, five lessons back
- *Recall:* say *ten*, then build *thirteen* and *thirty* from it — **R2**, five lessons back
- *Recall:* say *more, again* — **R4**, eighty lessons back

Last chapter bought two signs for a count of ten. This chapter buys five, for a count of ten that Japanese runs **beside** the one you already have.

How ひ is written, stroke by stroke

ひ — *hi*

One stroke, and the KanjiVG stroke data for this sign holds exactly one path: start high on the left, run a short way to the right, then sweep down and far to the left in a long shallow curve and finish by turning up. The pen does not lift once.

Compare ろ, which you wrote five lessons ago: also one stroke, but ろ closes its loop and ひ never closes at all.

Your turn

1. Trace ひ once and copy it once, without lifting.
2. Hide it; write it after ten seconds.
3. Write ろ and ひ side by side: one closes, one does not.

16.2 ひとつ — one thing

Three recalls, then the first word of a second count.

- *Write it:* ひ from memory — **R1**, one lesson back
- *Recall:* say *six* — **R2**, five lessons back
- *Write it:* も from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

ひとつ — *hi-to-tsu* — **one thing**

Three beats, three signs: ひ from last lesson, と and つ long since yours.

You already have a word for *one*. It is いち, and it is borrowed. ひとつ is the word Japanese had before it borrowed anything, and the two are not interchangeable:

word	what it is for
いち	the number itself — *one*, counting aloud, a house number
ひとつ	**one thing** — a thing you are pointing at

Wiktionary's usage note for ひとつ is one sentence and it is the sentence this chapter turns on: it is used *when the items counted have no specific counter category*. Hold that. It will be the whole of the next chapter.

The word, taken apart

ひとつ (*hitotsu*) is native: *hito*, the inherited word for "one", with the native counter *-tsu*. *Hito* is the kun'yomi of the character for one; none of the word is borrowed (KANJIDIC2).

Your turn — read, copy, recall

Write it: ひとつ

Say *ichi*, then *hitotsu*, and hear that they share nothing — not a beat, not a sound.

Before you move on

Which of the two words is the borrowed one? (いち.)
Sources: Wiktionary: hitotsu.

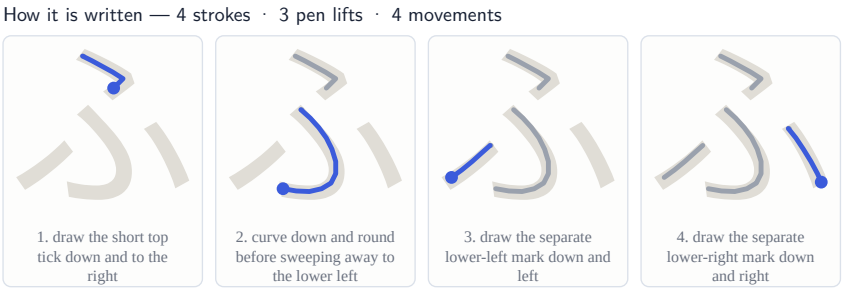

16.3 ふ — four strokes, and a counter you already own

Three recalls, then one sign.

- *Recall:* say *one thing* — **R1**, one lesson back
- *Recall:* write the small ゆ — **R2**, five lessons back
- *Recall:* say *one time* — **R4**, eighty lessons back

いちど is worth stopping on. Its own lesson said *do counts an occurrence* — which is to say **いちど is a number with a counter behind it**, and you have been saying it since chapter nine without anyone calling it that. Two chapters from now that sentence is the whole point.

Script — the shape

How ふ is written, stroke by stroke

ふ — *fu*

Four separate strokes, in this order, as KanjiVG records them: a short tick at the top; then the body, starting below it and curving down and to the left; then a small mark low on the left; then a small mark low on the right.

Everything this book has taught you so far has been one, two or three strokes. This is the first sign with four, and the last two are easy to run together by accident. They are separate.

Your turn

1. Trace ふ once, counting the four strokes aloud. That is three lifts, one before each stroke after the first.
2. Copy it once; hide it; write it again.
3. Check only one thing: are the bottom two marks separate?

Before you move on

16.4 ふたつ — two things

Four recalls, then the second thing.

- *Write it:* ふ from memory, all four strokes — **R1**, one lesson back
- *Recall:* say *ten*, then *twenty* — **R2**, five lessons back
- *Recall:* say *please* — **R4**, eighty lessons back

You'll Want to Know — hear and say

ふたつ — *fu-ta-tsu* — **two things**

Three signs, and the only new one arrived last lesson.

Now hear the two words together: ひとつ, ふたつ. Both end in つ, and the part in front changes — *hito-*, *futa-*. That つ is not decoration. It is the piece doing the counting, and every word in this chapter but the last one carries it.

に is *two*. ふたつ is *two things*. Same relation as いち and ひとつ, and again the two words share nothing at all.

The word, taken apart

ふたつ (*futatsu*) is native: *futa*, the inherited word for "two", with the counter *-tsu*. *Futa* also opens *futari*, "two people" (KANJIDIC2).

Your turn — read, copy, recall

Write it: ふたつ

Say the pair: *hitotsu, futatsu*. Then say *ichi, ni* straight after, and hear two different counts running side by side.

Before you move on

What does the つ do? (**It counts.**)

16.5 みっつ — three things, for nothing

Three recalls, then a word that costs nothing.

- *Recall:* say *two things* — **R1**, one lesson back
- *Recall:* run the family reception — **R3**, twenty lessons back
- *Recall:* say *one more time, please* — **R4**, eighty lessons back

You'll Want to Know — hear and say

みっつ — *mi-t-tsu* — **three things**

Every sign is already yours: み, the small っ, and つ.

The small っ is the sign you met in ゆっくり: it holds the mouth shut for one beat. みっつ is three beats, and the middle one is silence.

さん is *three*. みっつ is *three things*.

The word, taken apart

みっつ (*mittsu*) is native: *mi*, the inherited word for "three", with the counter *-tsu*, the consonant held before it (KANJIDIC2).

Your turn — read, copy, recall

Write it: みっつ

Say the run so far, slowly: *hitotsu, futatsu, mittsu.* Stop on the silent beat in the third one.

Before you move on

How many signs did this word cost? (**None** — all three were yours.)
Sources: Wiktionary: mittsu.

16.6 よっつ — four things, and the seam opens

Three recalls, then the number that has been in both counts all along.

- *Recall:* say *three things* — **R1**, one lesson back
- *Recall:* run the nine family words — **R3**, twenty lessons back
- *Recall:* write せ — **R4**, eighty lessons back

You'll Want to Know — hear and say

よっつ — *yo-t-tsu* — **four things**

No new sign. よ, the small っ, つ.

Grammar Lens — the seam, from the other side

Chapter fourteen taught よん and said something that was left hanging: *that split is coming back; it is the same seam the counters run along.* Here it is.
よん is a native word standing inside the borrowed count. よっつ is that same native word in the count it belongs to. They begin with the same beat, and that is not an accident — it is one word appearing twice:

number	borrowed	native
one	いち	ひと-
two	に	ふた-
three	さん	み-
four	*shi*	よ-

Every other line of the borrowed column is genuinely borrowed. At four, the native word came across into the borrowed count and stayed — which is why the number you actually say for four is よん and not *shi*. That is what chapter fourteen was pointing at, and you can now see both halves of it at once.

The word, taken apart

よっつ (*yottsu*) is native: *yo*, the inherited word for "four", with the counter *-tsu*; *yon* is built on the same *yo* (KANJIDIC2).

Your turn — read, copy, recall

Write よっつ. Say *yon*, then *yottsu*, and hear the shared beat. Then say *shi* and hear that it has none.

Before you move on

16.7 いつつ — five things

Three recalls, then five.

- *Recall:* say *four things* — **R1**, one lesson back

- *Write it:* お from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

いつつ — *i-tsu-tsu* — **five things**

Three signs, and two of them are the same one. い, つ, つ.

A warning worth one sentence: いつつ opens on the same beat as いち, and the two have nothing to do with each other. ご is *five*; いつつ is *five things*; いち is *one*. The ear will try to pair the wrong two.

The word, taken apart

いつつ (*itsutsu*) is native: *itsu*, the inherited word for "five", with the counter *-tsu* (KANJIDIC2).

Your turn — read, copy, recall

Write it: いつつ

Say *ichi* and *itsutsu* back to back, then *go* and *itsutsu*, and fix which pair actually means the same number.

Before you move on

Which number does いつつ NOT mean? (**One** — however it starts.)
Sources: Wiktionary: itsutsu.

16.8 Five things, and five numbers

Three recalls, then the run.

- *Recall:* say *five things* — **R1**, one lesson back
- *Recall:* say *one thing* — **R2**, six lessons back
- *Recall:* say *I understood* — **R4**, eighty lessons back

Nothing new arrives here.

Your turn — the run

- *Say it: ichi, hitotsu; ni, futatsu; san, mittsu; yon, yottsu; go, itsutsu*
- *Write it:* ひ and ふ — the two signs this chapter bought

What you've built so far

Five words for **two signs**. ひ and ふ were bought in the lessons immediately before the words that needed them; みっつ, よっつ and

いつつ cost nothing, because every sign in them was already yours. Two counts of five now run side by side, and they share exactly one thing: at **four**, よん and よっつ begin with the same beat. Everywhere else the two words have nothing in common — *ichi* and *hitotsu*, *ni* and *futatsu*, and so on down.
Five more to go, and three more signs.

Before you move on

How many signs did these five words cost? (**Two.**) Where do the two counts touch? (**At four.**)

Chapter 17

The Other Five, and Where the Count Stops

Modes: **voice** (6) **pen** (3) **Hands-free start:** none of the 9 lessons.

By the end of this chapter: I can count things from one to ten in the native Japanese series, write the three further signs it cost, and say why the series stops at ten when the borrowed count does not.

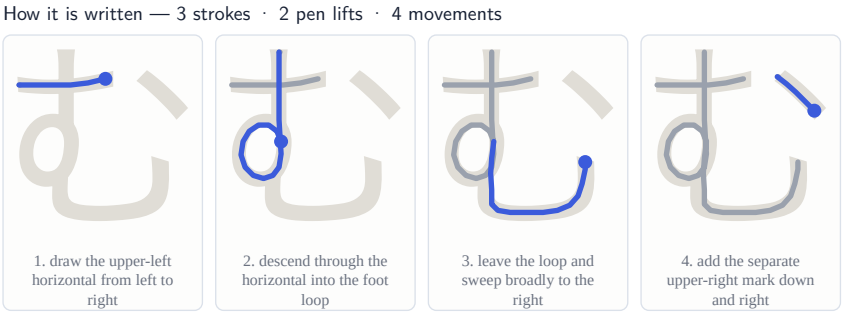

Run hitotsu to too in order, name the two numbers whose native word is used in both counts, and say what the two chapters cost in signs.

17.1 む — three strokes, one of them a dot

Three recalls, then one sign.

- *Recall:* say *five things* — **R1**, one lesson back
- *Recall:* say *five* — **R3**, twenty lessons back
- *Recall:* write ね — **R4**, eighty lessons back

Script — the shape

How む is written, stroke by stroke

む — *mu*

Three strokes, in this order, as KanjiVG records them: a horizontal across the upper left; then a long stroke from above it running down and looping at the foot; then a small separate mark up on the right.

That third mark is the one to watch. It is not attached to anything, and a む without it is not a む.

ね also ends in a loop at the foot. The difference is what comes before it and that separate mark on the right.

Your turn

1. Trace む once, counting three strokes: two lifts, one before each stroke after the first.
2. Copy it; hide it; write it again.
3. Check one thing: is the right-hand mark there, and separate?

17.2 むっつ — six things

Three recalls, then six.

- *Write it:* む from memory, all three strokes — **R1**, one lesson back

- *Recall:* say *a little* — **R4**, eighty lessons back

You'll Want to Know — hear and say

むっつ — *mu-t-tsu* — **six things**

む from last lesson, then the small っ and つ.

Last chapter said of ろく: *six has one everyday reading; no native word stands beside it.* That was true of the borrowed count and it is worth putting straight now. The native word for six exists — it is む, and you are holding it. What it does not do is stand inside the borrowed count the way よん does.

The word, taken apart

むっつ (*muttsu*) is native: *mu*, the inherited word for "six", with the counter *-tsu* (KANJIDIC2).

Your turn — read, copy, recall

Write it: むっつ

Say *roku* and *muttsu*: same number, two words, no shared sound. Then run the count so far: *hitotsu, futatsu, mittsu, yottsu, itsutsu, muttsu.*

Before you move on

Do ろく and むっつ share a sound? (**No.**)
Sources: Wiktionary: muttsu.

17.3 ななつ — seven things, and the seam again

Three recalls, then seven.

- *Recall:* say *six things* — **R1**, one lesson back

- *Recall:* say *three* — **R3**, twenty lessons back
- *Write it:* し from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

ななつ — *na-na-tsu* — **seven things**

No new sign, and no new word either — you have said なな since the last chapter.

Grammar Lens — the second place the seam shows

なな is the native word, and the borrowed count uses it — the same move you saw at four with よん. Set the two rows side by side and the pattern is exact:

the reading	four	seven
borrowed reading	*shi*	*shichi*
native word, used instead	よん	なな
native count	よっつ	ななつ

Two places in ten where the native word walked into the borrowed count and stayed, and both of them are places where the borrowed reading collides with another word. This is the seam, and you have now seen both ends of it.

The word, taken apart

ななつ (*nanatsu*) is native: *nana*, the inherited word for "seven", with the counter *-tsu* (KANJIDIC2).

Your turn — read, copy, recall

Write it: ななつ

Say *nana*, then *nanatsu*: the same word, once as a number and once as a count of things.

Before you move on

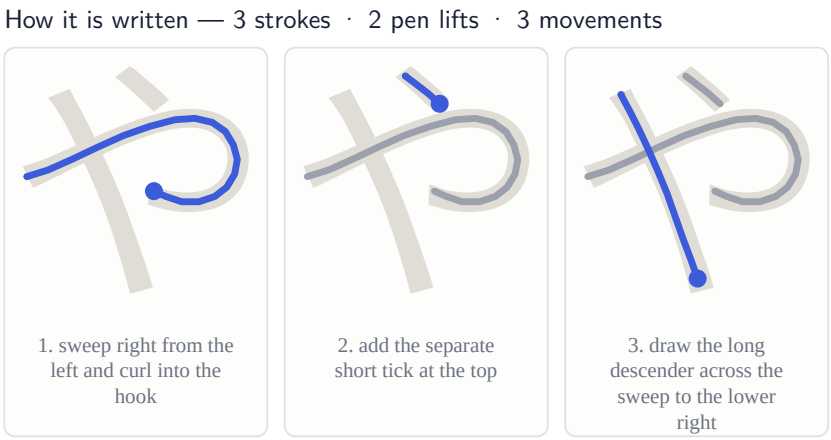

Which word did this lesson cost you? (**None** — you already had なな.)

How や is written, stroke by stroke

や — *ya*

Three strokes, and the order is the surprise. KanjiVG has them as: **first** the long sweep, starting low on the left and running up and away to the right; **then** a short tick at the top; **then** the long stroke that comes down through the middle and out to the bottom right.

Look at the finished shape and you would guess the descender was drawn first. It is not. Draw the sweep, then the tick, then the descender.

よ is already yours and shares the same first sound. It is built the other way round — the crossing stroke comes down first there.

Your turn

1. Trace や in the KanjiVG order, saying "sweep, tick, down".
2. Copy it; hide it; write it again.
3. Write よ beside it and say both.

Before you move on

Which stroke is first? (**The sweep.**)

- *Write it:* ゆ from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

やっつ — *ya-t-tsu* — **eight things**

や from last lesson, the small っ, and つ.

Eight is the plain case. はち is the borrowed word, やっつ is the native one, neither has walked into the other's count, and there is nothing to disentangle. The last chapter used はち for exactly the same job — to show what the ordinary case looks like once the odd ones have been seen.

Say the run: *hitotsu, futatsu, mittsu, yottsu, itsutsu, muttsu, nanatsu, yattsu.* Eight of ten, and two signs left to buy.

The word, taken apart

やっつ (*yattsu*) is native: *ya*, the inherited word for "eight", with the counter *-tsu* (KANJIDIC2).

How の is written, stroke by stroke

の — *no*

One stroke. KanjiVG's data holds a single path: start high and to the right of centre, run down and left, round the bottom, up the left side and across the top, finishing by crossing what you have just drawn.

ひ, from the start of this chapter, was also one stroke and never closed. の closes and then keeps going.

This is the fifth sign this chapter has bought, and the last. Everything after it is words.

Your turn

1. Trace の once without lifting.
2. Copy it; hide it; write it again.
3. Write ひ and の side by side: one stroke each, one open, one crossed.

17.7 ここのつ — nine things

Three recalls, then the longest word in the chapter.

- *Write it:* の from memory — **R1**, one lesson back

- *Recall:* say *here* — **R4**, eighty lessons back

You'll Want to Know — hear and say

ここのつ — *ko-ko-no-tsu* — **nine things**

Four beats, four signs, and only の is new — you bought it last lesson.

The first two signs of ここのつ spell ここ, the word for *here* you have had since chapter ten. *Read it:* the first two signs on their own

They are the same two signs, and it means nothing. *kokono-* is simply the native word for nine; it is not built on *here* and there is no story

joining them. Say so and move on — an accident that gets explained is worse than one that gets named.

What it does mean is that you can write this four-beat word straight away, which no other word in the chapter has managed.

The word, taken apart

ここのつ (*kokonotsu*) is native: *kokono*, the inherited word for "nine", with the counter *-tsu*. It is not built from *koko*, "here"; the likeness is chance (KANJIDIC2).

Your turn — read, copy, recall

Write it: ここのつ

Say *hachi*, *ku*, then *yattsu*, *kokonotsu* — both counts, two numbers each. Then say *ku* and *kokonotsu* again. Then say *koko* and *kokonotsu* and remind yourself that the second is not made of the first.

17.8 とお — ten things, and the end of the run

Three recalls, then the last word.

- *Recall:* say *nine things* — **R1**, one lesson back
- *Recall:* say *ten*, then *twenty-five* — **R3**, twenty lessons back
- *Recall:* say *a little more* — **R4**, eighty lessons back

You'll Want to Know — hear and say

とお — *tō* — ten things

Two signs, both old, and **no つ at all**.

Nine words in this count carry the つ that does the counting. The tenth drops it, and that is not a spelling quirk — it is the edge of the count. とお is where the native series ends. There is no *eleven things* in it.

Above ten, Japanese has only the borrowed count and a counter word, which is exactly the machinery the next chapter is for. じゅう goes on to ninety-nine; とお goes nowhere.

The word, taken apart

とお (*tō*) is native: the inherited word for "ten", the kun'yomi of the character for ten, with no *-tsu* on the end (KANJIDIC2). Its older origin is not settled.

Your turn — read, copy, recall

Write it: とお

Say *juu*, then *tō*: same number, and only one of them can be built on. Then say *kokonotsu, tō* and stop.

Before you move on

Can you say *eleven things* this way? (**No.**)
Sources: Wiktionary: too.

17.9 The other ten, in order at last

Three recalls, then the run.

- *Recall:* say *ten things* — **R1**, one lesson back
- *Recall:* say *one thing* — **R2**, thirteen lessons back
- *Recall:* say *I understood* — **R4**, eighty lessons back
- *Recall:* say *here* — **R4**, eighty lessons back

Nothing new arrives here.

Your turn — the run

- *Say it:* the borrowed ten, then the native ten, back to back
- *Say it: ku*, then *kokonotsu* — the two nines, one from each count
- *Write it:* ろ from last chapter, then ひ, ふ, む, や, の — the one sign the borrowed count bought late, and the five this chapter bought

What you've built this chapter

Ten words, and **five signs**: ひ, ふ, む, や, の. Five of the ten words cost nothing at all — みっつ, よっつ, いつつ, ななつ and とお were spelled entirely out of signs you already had.
Two things about the shape of what you now hold:

- The native count **stops at ten**. とお carries no つ and nothing is built on it. The borrowed count runs to ninety-nine on じゅう alone.
- At **four** and **seven** the native word is the one used in *both* counts. Nowhere else.

What the chapter has not yet said is what つ actually is. It is not a decoration and it is not part of the words: it is a **counter**, and the next chapter is about choosing one.

Before you move on

How many signs did the chapter cost? (**Five**.) Where does the native count stop? (**At とお**.) Which two numbers use the native word in both counts? (**Four and seven**.)

18.1 What the つ was doing

Three recalls, then the word for what you have been doing.

- *Recall:* say *eight things* — **R2**, five lessons back
- *Recall:* say *six* — **R3**, twenty lessons back
- *Recall:* ask for it more slowly, in full — **R4**, eighty lessons back

Grammar Lens — a number cannot stand alone

In Japanese a number does not simply sit in front of a thing. It takes a **counter** — a small word behind the number that says what kind of thing is being counted. Wikipedia's article calls counters *measure words used with numbers to count things, actions, and events*, and English has a few of the same shape: *two **sheets** of paper*, *three **head** of cattle*.
You have been using one since chapter nine and nobody said so.

いちど — *ichido* — **one time**

Its own lesson said: *ichi is one, and do counts an occurrence.* That ど is a counter. It counts occurrences, which is why いちど is *one time* and not *one*.
And the つ you spent all of last chapter on is a counter too — the **general** one. That is why nine of the ten native words carry it and とお does not.

You'll Want to Know — when to reach for it

Japanese has a great many counters. One rule gets you through:

> **When you do not know the counter, use the ~つ series.**
> Up to ten it will carry almost any ordinary object.

That is exactly what Wikipedia says of the traditional numerals — that the problem of choosing *can often be sidestepped* by using them. ひとつ to とお, and no further, because that is where the series stops.

コーヒー ふたつ — two coffees. Nobody will blink.

The rule has an edge, and it is the next lesson: **people and animals do not take ~つ.** They have counters of their own and there is no way round it.

The word, taken apart

...つ (*-tsu*) is a native counter, inherited rather than borrowed; its older origin is not settled (JMdict).

Your turn — read, copy, recall

Say コーヒー ふたつ. Then say いちど and name the counter inside it.

Before you move on

What do you use when you do not know the counter? (~つ, up to ten.)
Sources: Wikipedia: Japanese counter word; Wiktionary: hitotsu.

18.2 にん — counting people

Three recalls, then the counter the last rule cannot reach.

- *Recall:* say what to use when you do not know the counter — **R1**, one lesson back
- *Write it:* の from memory — **R2**, five lessons back
- *Write it:* the small ゅ from memory — **R3**, twenty lessons back
- *Write it:* the small っ from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

にん — *-nin* — the counter for **people**

Both signs are old. What is new is that it attaches to the **borrowed** numbers, not the native ones:

how many	how you say it
three people	さんにん
four people	よにん
five people	ごにん
ten people	じゅうにん

さん plus にん, ご plus にん. Nothing changes. Four is the one to watch: it is よ, not よん — the native word again, and shorter here.

You have nine family words and until now no way to say how many of anything you had. こども さんにん — three children.

Grammar Lens — where the tsu rule stops

Last lesson's rule had an edge, and this is it. **~つ never counts people.** There is no *hitotsu* of a person; you cannot sidestep にん, and the same is true of animals, which have counters of their own.

So the rule now reads with both ends showing: **use ~つ for ordinary things up to ten; use the proper counter for anything alive.** And にん itself has an exception, at exactly two numbers. That is the next lesson.

The word, taken apart

にん (*-nin*) is Sino-Japanese: an on'yomi of the character for "person", borrowed from Chinese (Middle Chinese *nyin*); *jin* is a second on'yomi of the same character (KANJIDIC2).

Your turn — read, copy, recall

Write it: にん

Say *sannin, yonin, gonin, juunin.* Then say こども さんにん.

Before you move on

Which number is odd in this list? (**Four** — よにん, not *yonnin.*)
Sources: Wikipedia: Japanese counter word.

18.3 ひとり・ふたり — one person, two people

Three recalls, then the two people the last lesson could not count.

- *Recall:* say *three people* — **R1**, one lesson back
- *Recall:* say *nine things* — **R2**, five lessons back
- *Recall:* say *ten*, then *twelve* — **R3**, twenty lessons back
- *Write it:* て from memory — **R4**, eighty lessons back

You'll Want to Know — hear and say

ひとり — *hitori* — **one person**

ふたり — *futari* — **two people**

Not *ichinin.* Not *ninin.* Every other number takes にん and these two do not.

Every sign is yours: ひ and ふ came two chapters ago, と, た and り long before.

Grammar Lens — the seam, one more time

Take the four words together and the exception stops looking like one:

number	native count	with the people counter
one	ひとつ	ひとり
two	ふたつ	ふたり
three	みっつ	さんにん

hito- and *futa-* are the same pieces you learned two chapters ago. At one and two, the **native** number walks into the borrowed counter and stays; from three on, the borrowed number takes over.
That is the third time you have seen this. At よん and なな the native word stood inside the borrowed count. Here the native word stands inside a borrowed counter. It is one seam, and it runs the whole length of Japanese numbers.
あね ひとり、あに ふたり — one elder sister, two elder brothers.

The word, taken apart

ひとり ふたり (*hitori futari*) are native: *hito*, "one", and *futa*, "two", with *-ri*, an old native counter for people that KANJIDIC2 lists as a reading of the character for "person". None of it is borrowed.

Your turn — read, copy, recall

Write it: ひとり and ふたり

Say *hitori, futari, sannin, yonin* — and hear the switch happen between the second and the third.

Before you move on

Where does the switch happen? (**Between two and three.**)

18.4 Counting your own face

Three recalls, then the first thing in this book you can count.

- *Recall:* say *one person* and *two people* — **R1**, one lesson back

- *Recall:* say *face* — **R3**, twenty lessons back
- *Write it:* た from memory — **R4**, eighty lessons back

Your turn — count what you have

Chapter twelve gave you a face. Until this chapter you could name every part of it and say how many of nothing.

め ふたつ — two eyes

みみ ふたつ — two ears

はな ひとつ — one nose

くち ひとつ — one mouth

Four nouns, none of them alive on its own, so the ~つ rule covers all four without your having to know a thing about which counter a nose takes.

- *Say it:* the four face lines without stopping, then ふたり

Before you move on

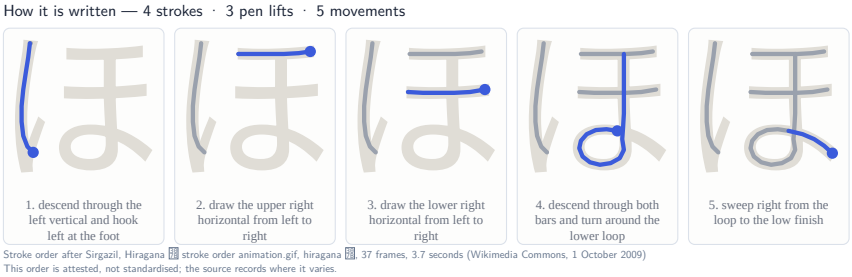

Which of the four needed you to know a special counter? (**None.**)
Which nearby word did? (**A person** — ふたり, not ふたつ.)

18.5 ほ — は with one more bar

Three recalls, then the last sign of the chapter.

- *Recall:* count the four parts of a face — **R1**, one lesson back
- *Recall:* write ひ — **R3**, twenty lessons back
- *Recall:* write だ — **R4**, eighty lessons back

Script — the shape

How ほ *is written, stroke by stroke*

ほ — *ho*

Write は first. You have had it since chapter one: a left vertical, one horizontal, then the right stroke that loops at the foot.

ほ is that figure with **one more horizontal**, and Sirgazil's animation puts it above the one は already has. Four strokes, in this order:

1. the left vertical, hooking at the foot
2. the **upper** horizontal on the right
3. the **lower** horizontal on the right
4. the right vertical, down through both bars and looping at the foot

So the only thing you are learning is a bar, and where it goes.

ほ also finishes a set. Japanese's **h-row** runs *ha, hi, fu, he, ho*, and you now hold four of its five: は from chapter one, ひ and ふ from two chapters ago, and ほ here. Only へ is missing.

Write ひ once beside them and hear the row.

Your turn

1. Write は, then ほ beneath it, and mark the stroke that differs.
2. Copy ほ; hide it; write it again.
3. Say both aloud: *ha*, *ho*. Then say ひとつ and hear the same ひ.

Before you move on

How many strokes? (**Four.**)
Source: Unicode Hiragana chart; stroke count and order per KanjiVG and Sirgazil's Commons animation.

18.6 ほん — counting long thin things

Three recalls, then a counter chosen by shape.

- *Write it:* ほ from memory — **R1**, one lesson back
- *Recall:* say *hand* — **R4**, eighty lessons back
- *Recall:* say what ~つ is for, and what it is not for — **R2**, five lessons back

You'll Want to Know — hear and say

ほん — *-hon* — the counter for **long, thin things**

Wikipedia's list for it is worth reading whole: *rivers, roads, train tracks, ties, pencils, bottles, guitars.* Nothing on that list is a book, though the sign it is written with is 本 — the very kanji you have been writing since chapter five, inside 日本語.

That is the shape rule in one word: ほん does not care what the thing *is*, only that it is longer than it is wide.

Two of your own words qualify. One of them you can already say:

あし にほん — two legs

The other is かみ, a hair — and the word for *one* hair has to wait two lessons, because at one the counter changes shape.

Grammar Lens — the counter bends the sound

にん attached to the numbers and nothing moved. ほん does not behave. Here are the four that leave it alone:

number	the form
two	にほん
four	よんほん
five	ごほん
seven	ななほん

At **three** the ほ takes the **dakuten** you have had since chapter three, and at **one, six, eight and ten** it goes further still — further than the dakuten can take it. Both of those need a mark on the sign, and the second mark is one this book has never taught. The next two lessons buy it and then spend it; until then, say the four plain ones.

The word, taken apart

ほん (*-hon*) is Sino-Japanese: the on'yomi of 本, a character for "root, origin", borrowed from Chinese (Middle Chinese *pwonX*; Unihan).

Your turn — read, copy, recall

Write it: ほん

Say *nihon, yonhon, gohon, nanahon* — the four that leave the counter alone. Then say あし にほん.

Before you move on

What does ほん count? (**Anything longer than it is wide.**)
Sources: Wikipedia: Japanese counter word.

18.7 ゜ — the other mark

Three recalls, then the mark the last lesson stopped short of.

- *Recall:* say *three long thin things* — **R1**, one lesson back
- *Recall:* write ふ, all four strokes — **R3**, twenty lessons back
- *Recall:* say *ear* — **R4**, eighty lessons back

Script — the shape

How it is written — one unbroken stroke · 1 movement

Stroke order after KanjiVG, kanji/0309c.svg, the spacing handakuten ゚ (U+309C), one stroke path kvg:0309c-s1 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How ゚ is written, stroke by stroke

゚ — the **handakuten**

A small circle, written at the top right of a kana, in the same place the **dakuten** goes.

Japanese has exactly two of these marks and you have had one of them since chapter three:

mark	what it does	example
゛ dakuten	voices the consonant	ほ → ぼ
゚ handakuten	turns the **h**-row into **p**	ほ → ぽ

The handakuten works on **one row only** — the row は and ほ belong to. Nowhere else in the syllabary does it appear, which makes it the rarest thing in the writing system and the easiest to place: if you see the little circle, the sign under it is an h-row kana and the sound is **p**.

That row is the one you have just been filling in. ふ takes both marks too, giving *bu* and *pu*, and so does は. The mark is rare; the row is not.

Write the circle small. It is a circle, not a dot, and it does not touch the sign it sits on.

Your turn

1. Write ほ, then ぼ, then ぽ, and say all three.
2. Say the same three sounds on は, without writing them.
3. Check one thing: is the circle open?

Before you move on

Which row does the handakuten work on? (**Only the h-row.**)
Source: Unicode Hiragana chart, U+309C.

18.8 いっぽん — and the four that bend

Three recalls, then the form the counter takes at one.

- *Recall:* write ぽ — **R1**, one lesson back
- *Recall:* say *mouth* — **R4**, eighty lessons back
- *Recall:* write the small っ — **R2**, six lessons back

You'll Want to Know — hear and say

いっぽん — *ippon* — **one long thin thing**

Not *ichihon*. The いち shortens to いっ, and the ほ takes the handakuten you learned last lesson.

Here is the whole counter, with the numbers this book can spell:

number	the form	what happens
one	いっぽん	**p**, and a held beat
two	にほん	plain
three	さんぼん	**b**
four	よんほん	plain
five	ごほん	plain
six	ろっぽん	**p**, and a held beat
seven	ななほん	plain
eight	はっぽん	**p**, and a held beat
ten	じゅっぽん	**p**, and a held beat

Nine is missing from that table on purpose. Its everyday form needs a sign this book has not taught, so it is left out rather than guessed at.

Read the shape of the rest: **one, six, eight and ten** all end in a held beat and take **p**. **Three** ends in the nasal **ん** and takes **b**. Everything else is plain. The counter is not being irregular — it is being pushed by the sound in front of it.

かみ いっぽん — one hair.

The word, taken apart

いっぽん (*ippon*) is Sino-Japanese: *ichi*, "one" (Middle Chinese *'jit*), and *hon* (Middle Chinese *pwonX*), both borrowed from Chinese; *ichi* loses its last beat and *h* becomes *p* where they meet.

Your turn — read, copy, recall

Write **いっぽん**. Say the run: *ippon, nihon, sanbon, yonhon, gohon, roppon.* Then say **かみ いっぽん**.

Before you move on

Why is nine missing from the table? (**Its form needs a sign this book has not taught.**)
Sources: Wikipedia: Japanese counter word.

18.9 Three counters, and how to choose

Three recalls, then the run.

- *Recall:* say *one long thin thing* — **R1**, one lesson back
- *Recall:* say *three things* and *four things* — **R3**, twenty lessons back
- *Recall:* say *nose* — **R4**, eighty lessons back
- *Recall:* say *leg* — **R4**, eighty lessons back
- *Recall:* say what to use when you do not know the counter — **R2**, nine lessons back

Nothing new arrives here.

Your turn — the run

- *Say it:* かみ いっぽん, あし にほん, ふたり, はな ひとつ
- *Write it:* ほ, then the same sign with the handakuten — ぽ

What you've built this chapter

A number in Japanese does not stand on its own. It takes a **counter**, and the counter is chosen by what kind of thing is being counted:

the thing	**the counter**
an ordinary object, up to ten	~つ
a person	にん
anything longer than it is wide	ほん
an occurrence	ど, which you had in chapter nine

Both edges of that are worth carrying. **Reach for ~つ when you do not know** — up to ten it will carry almost any ordinary object. **Do not reach for it for anything alive**, and do not expect it past ten. And the seam this book has been drawing since chapter fourteen runs through all of it. よん and なな: the native word inside the borrowed count. ひとり and ふたり: the native word inside a borrowed counter. Two counts, and the places where they touch are not random — they are the same handful of numbers, every time.

Before you move on

What do you use when you do not know the counter? (~つ, to ten.) Where does that rule fail? (**Anything alive.**) Say one person and one hair. (ひとり; かみ いっぽん.)

Chapter 19

Reading — Words, Greetings, and the Cues You Have Only Heard

Modes: **eyes** (3) **Hands-free start:** none of the 3 lessons.

> ***By the end of this chapter:*** I can read Japanese words, greetings and classroom cues off a page, without anyone saying them first.
>
> *The repair cues the book has only ever spoken, read in order, ending with the longest stretch of Japanese it has set on one page.*

19.1 (reading) — six words, nothing said first

You have written every sign in every one of these. Not one word is new.

What is new is that nobody says them before you read them.

Read this

て みみ くち はな かお め

Read down the list once. Do not sound out each sign — look at the whole word and let it arrive.
Again, and notice which came at once and which you had to build.
Both are fine. The difference is what practice removes.

What to know first

Two of these are one sign long. て and め are whole words, and you have written both as signs on their own.

That is worth noticing, because it is the thing hiragana does that an alphabet does not: a sign can be a letter and a word at the same time, and nothing on the page tells you which it is. Only knowing the word does.

Six is enough for one sitting.

Your turn

- *Say it:* the six words down the list, once, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
What was new? (**Nobody said them first.** You read them.)

19.2 (reading) — the doorway words, on the page

The last lesson gave you six words. These are the six the book opened with.

Every one of them reached your ear before it reached a page. Today that order is reversed.

Read this

はい いいえ こんにちは ありがとう さようなら
すみません

Read it: the six greetings down once, without stopping
Read it: the six greetings again, and notice that the two longest are the two you say most often
Length is not difficulty here; familiarity is.

What to know first

こんにちは ends in は, and you know that sign says *ha*. In this word it is read *wa*, because the greeting keeps a spelling from an older sentence that nobody finishes any more.

You do not need the history to read it. You need to know that this one word is spelled the way it is for a reason, and that reading a language means meeting a handful of such words rather than a rule you can apply.

Six lines, and one of them is a small piece of history.

Your turn

- *Say it:* the six lines, once, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
Which sign is read differently in one of them? (は, in こんにちは.)

19.3 (reading) — the cues you have only ever heard

Six words, then six greetings. These are the longest lines the book has set on one page.

Every one of them is a cue you already use. None is new.

Read this

ここ すこし わかりました わかりません
もういちど、おねがいします
もうすこし、ゆっくりいってください

Read it: the list down once, without stopping; it gets longer as it goes — let it
Read it: the list again, and notice that the last two are the only ones with a comma in them, and that the comma falls exactly where you pause when you say it

What to know first

わかりました and わかりません differ in three signs at the end and in nothing else. Understood, and not understood.

That is the pair worth being able to read rather than only hear. A cue you can only recognise when somebody says it to you is a cue you can only use when they do. Read once off a page, it becomes something you can reach for.

Six lines, and the last one is fourteen signs long — the longest stretch of Japanese this book has asked you to take in at once.

Your turn

- *Say it:* the six lines, once, in order, without stopping

Twice through:

Before you move on

How many of the six were new? (**None.**)
Which two differ only at the end? (わかりました and わかりません.)

Chapter 131

Tea, Please: Small Ya, Small Yo and Wo

Modes: **voice** (6) **pen** (3) **Hands-free start:** the first of 9 lessons.

> ***By the end of this chapter:*** I can write small ya, small yo and wo, read words that use them, and ask for tea politely.
>
> *Read ocha, isha, chotto and toshokan with their beats, write ocha o kudasai from memory with を for the particle, and write the three new signs once each.*

131.1 おちゃ (ocha) — tea

Before the new word, say *o*, then *chi*. *Write it:* お, then ち

- *Recall:* say *a sweetfish* — **R4**, eighty lessons back
- *Recall:* say *refreshing* — **R3**, twenty lessons back

You'll want to know: おちゃ

おちゃ — *ocha* — "tea".

Count the beats as you say it: *o–cha*. Two beats, not three. The last two signs are one beat between them, and the small sign at the end is the reason. The next lesson takes that small sign and writes it on its own.

The word, taken apart

おちゃ (*ocha*) is the native polite prefix *o-* with *cha*, "tea", the on'yomi of its character, borrowed from Chinese (Middle Chinese *drae*; JMdict, Unihan).

Your turn

- *Say it: ocha*
- *Say it: ocha*, then count its beats aloud — two
- *Recall:* name the sign in おちゃ you can already write, and the one you cannot

Before you move on

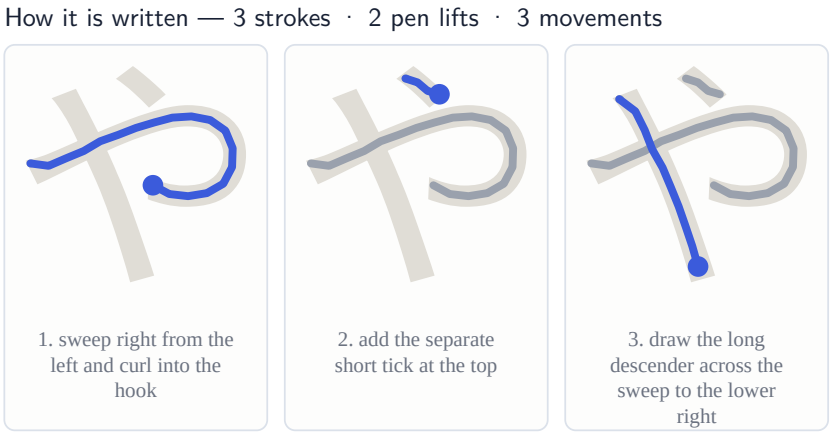

What is "tea"? (おちゃ, *ocha*.) How many beats? (**Two**.)

131.2 ゃ — や, written small

Five recalls, then the sign.

- *Recall:* say *tea*, and how many beats it has — **R1**, one lesson back
- *Recall:* write や, full size: sweep, tick, descender
- *Recall:* write ゆ, and say what it does to the sign before it
- *Recall:* say *a trout* — **R4**, eighty lessons back
- *Recall:* say *calm* — **R3**, twenty lessons back

How ゃ *is written, stroke by stroke*

ゃ — small *ya*

Same shape as や, in the same order, written small and sitting low: the sweep and its hook first, then the short tick, then the descender. Three strokes, two lifts.

It does the job ゅ does. It joins to the sign before it, and the two become **one beat**:

you write	you say	beats
ちや	*chi-ya*	two
ちゃ	*cha*	one

That is the whole difference between the two rows: the size of one sign. The tea word you met one lesson back is *o–cha*, two beats, because its ちゃ is one.

Your turn

1. Write や, then ゃ beneath it, half the height, in the same three strokes.

2. Write おちゃ from memory. Check that the last sign sits low and small.
3. Read ちや and ちゃ aloud, one after the other, and clap the beats.

Before you move on

Stop after one accurate small form.

131.3 いしゃ (isha) — a doctor

Write it: や — **R1**, one lesson back

Then say *ocha*.

- *Recall:* say *a crucian carp* — **R4**, eighty lessons back
- *Recall:* say *honest* — **R3**, twenty lessons back
- *Recall:* say *bright red* — **R2**, seven lessons back

You'll want to know: いしゃ

いしゃ — *isha* — "a doctor".

The small sign is spent at once. し with や after it is one beat, *sha*, so the word is two beats: *i–sha*.

The word, taken apart

いしゃ (*isha*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *i*, "heal, medical" (Middle Chinese *'i*) and *sha*, "person, he who" (*tsyaeX*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: isha*
- *Say it: isha*, then count its beats aloud — two
- *Write it:* いしゃ from memory, keeping the last sign small

Before you move on

What does いしゃ mean? (“A doctor”.) Say it once more.

131.4 ちょっと (chotto) — a little

Say *a doctor* — **R1**, one lesson back. *Write it:* the small sign in it

- *Recall:* say *a young yellowtail* — **R4**, eighty lessons back
- *Recall:* say *clever* — **R3**, twenty lessons back
- *Recall:* say *vague* — **R2**, seven lessons back

You’ll want to know: ちょっと

ちょっと — *chotto* — “a little”, and, said on its own with a small pause, “one moment”.

Three beats: *cho*, a held silence, *to*. The silence is the small っ you already write. The first beat is ち with a small sign after it that you do not write yet; it joins forward, the way や does, and the next lesson writes it.

The word, taken apart

ちょっと (*chotto*) is a native word, inherited rather than borrowed, usually written in kana; JMdict marks its kanji, “one” and an inch-like measure, as ateji. Its older origin is not settled.

Your turn

- *Say it: chotto*
- *Say it: chotto*, then count its beats aloud — three, and the middle one is a silent hold
- *Recall:* name the two small signs in ちょっと and say which one holds and which one joins

Before you move on

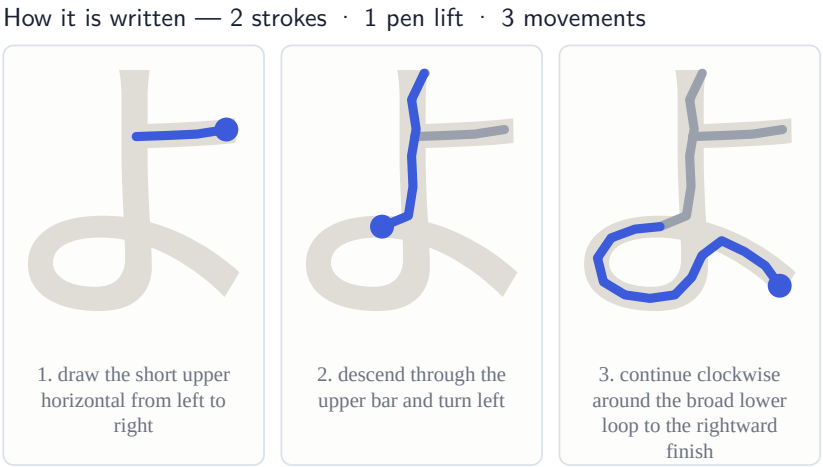

What is “a little”? (ちょっと, *chotto*.) How many beats? (**Three**.)

131.5 ょ — ょ, written small

Six recalls, then the sign.

- *Recall:* say *a little*, and clap its three beats — **R1**, one lesson back
- *Recall:* say *a doctor* — **R1**, two lessons back
- *Recall:* write ょ, full size: the bar, then the stem and its loop
- *Recall:* say *a Pacific saury* — **R4**, eighty lessons back
- *Recall:* say *foolish* — **R3**, twenty lessons back
- *Recall:* say *certain* — **R2**, seven lessons back

This order is attested, not standardised; the source records where it varies.

How ょ is written, stroke by stroke

ょ — small *yo*

Same shape as よ, in the same order, written small and sitting low: the short bar from left to right, then the stem down through it and round the loop. Two strokes, one lift.

You now have all three small signs that join forward. Each one turns the sign before it into a single beat:

you write	**you say, one beat each**
ちゃ, ちゅ, ちょ	*cha*, *chu*, *cho*
しゃ, しゅ, しょ	*sha*, *shu*, *sho*

So ちょ is one beat, *cho*, and ちょっと is the three beats you said in the last lesson: *cho*, a held silence, *to*.

Your turn

1. Write よ, then ょ beneath it, half the height.
2. Write ちょっと from memory: one small sign that joins, one that holds.
3. Write しゃ, しゅ, しょ in a row and read them as three single beats.

Before you move on

Stop after one accurate small form.

131.6 としょかん (toshokan) — a library

Write it: よ — **R1**, one lesson back

Then say *tea* — **R2**, five lessons back.

- *Recall:* say *a short-neck clam* — **R4**, eighty lessons back
- *Recall:* say *brave* — **R3**, twenty lessons back

You'll want to know: としょかん

としょかん — *toshokan* — "a library".

Five signs, four beats: *to–sho–ka–n*. し with ょ after it is one beat, *sho*, and ん is a beat on its own.

The word, taken apart

としょかん (*toshokan*) is Sino-Japanese (kango): three Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *to*, "chart, map" (Middle Chinese *du*), *sho*, "book" (*syo*) and *kan*, "public building" (*kwanH*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: toshokan*
- *Say it: toshokan*, then count its beats aloud — four
- *Write it:* としょかん from memory, keeping the second sign small

Before you move on

What does としょかん mean? ("A library".) How many beats? (**Four**.)

131.7 おちゃを ください (ocha o kudasai) — tea, please

Say *a library* — **R1**, one lesson back. Then say *please say it*.
Write it: や — **R2**, five lessons back

- *Recall:* say *a scallop* — **R4**, eighty lessons back
- *Recall:* say *fine, small and detailed* — **R3**, twenty lessons back

You'll want to know: おちゃを ください

おちゃを ください — *ocha o kudasai* — "tea, please".

You know both words already: *ocha*, tea, and *kudasai*, the polite request at the end of *itte kudasai*. What is new is the small word between them, said *o*.

It marks **the thing the request is about**: tea is what you are asking for. Put any thing you can name in front of it and the request works the same way.

That word is spelled with a sign you have not written yet. It is said *o*, the same as お, but it is a different sign, and the next lesson writes it.

The word, taken apart

おちゃを ください (*ocha o kudasai*) puts known pieces together: *ocha*, polite *o-* with *cha*, borrowed from Chinese; the native particle *o*, which marks the thing; and *kudasai*, the request form of native *kudasaru*, "to give (to me)" (JMdict).

Your turn

- *Say it: ocha o kudasai*
- *Say it: ocha o kudasai*, with a short pause after *o*
- *Recall:* say which of the three words names the thing, which one marks it, and which one asks

Before you move on

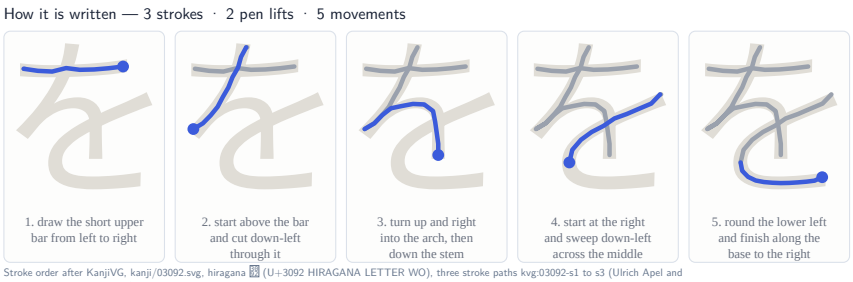

How do you ask for tea? (おちゃを ください, *ocha o kudasai.*)

131.8 を — said o, kept for one job

Five recalls, then the sign.

- *Recall:* ask for tea politely — **R1**, one lesson back
- *Recall:* say *a doctor* — **R2**, five lessons back
- *Recall:* write お, and say it
- *Recall:* say *a flea* — **R4**, eighty lessons back
- *Recall:* say *ugly* — **R3**, twenty lessons back

Script — the shape

How を is written, stroke by stroke

を — said *o*

Three strokes, two lifts:

1. the short **bar** at the top, left to right
2. starting above the bar, a long **diagonal** down and to the left through it; at its foot, without lifting, turn sharply back up and to the right into an **arch**, and come down its right side in a short stem
3. a separate **curve**: start at the right, sweep down and left across the middle, round the lower left, and finish along the base to the right

It is said exactly like お. The two are not interchangeable, and what separates them is not sound:

- お spells *o* inside words, as in おちゃ.
- を spells the particle that marks the thing asked for or acted on, and nothing else.

You have met this once already. は is read *wa* when it is the topic marker; を is read *o* when it is the object marker. Both are spellings kept for a grammatical word after the sound moved.

Your turn

1. Trace を saying “bar, diagonal and arch, curve”.
2. Write お and を side by side; say both, and hear that they are the same.
3. Write おちゃを ください from memory. Check which *o* is which.

Before you move on

Which sign spells the particle? (を.)
Source: Unicode Hiragana chart; stroke count and order per KanjiVG.

131.9 Tea, please — the three signs, written

Write it: を — **R1**, one lesson back

Then say *a little* — **R2**, five lessons back.

- *Recall:* say *a bat* — **R4**, eighty lessons back
- *Recall:* say *cute* — **R3**, twenty lessons back

Your turn — read the four words

Read it: each one below aloud, count its beats, then say what it means
Read these aloud:

- おちゃ — two beats
- いしゃ — two beats
- ちょっと — three beats
- としょかん — four beats

Every small sign that joins forward folds two signs into one beat. The small っ is the only small sign here that takes a beat of its own.

Your turn — write the request

1. *Write it:* おちゃを ください from memory, and circle the two signs said *o*
2. *Write it:* ゃ, ょ and を once each — small signs low and half height
3. Say *ocha o kudasai* to an imaginary waiter, then *chotto*, as if asking them to wait a moment.

Before you move on

Tea? (おちゃ, *ocha.*) A doctor? (いしゃ, *isha.*) A little? (ちょっと, *chotto.*) A library? (としょかん, *toshokan.*) Tea, please? (おちゃを ください, *ocha o kudasai.*)

Chapter 132

This and That: So, Re and Ru

Modes: **voice** (6) **pen** (3) **Hands-free start:** the first of 9 lessons.

> ***By the end of this chapter:*** I can write so, re and ru, read words that use them, and point to things and places near me and near the listener.
>
> *Read soko, soto, kore, sore and kuruma, point with kore and sore, write kuruma from memory with る in the middle, and write the three new signs once each.*

132.1 そこ (soko) — there, near you

Before the new word, say *koko*, here. *Write it:* こ; then よ — **R2**, five lessons back

- *Recall:* say *a Japanese serow* — **R4**, eighty lessons back
- *Recall:* say *persistent* — **R3**, twenty lessons back

You'll want to know: そこ

そこ — *soko* — "there", the place near the person you are talking to.

You know ここ, *koko*, here, the place near you. Change the first sign and the place moves across to the listener: *soko*, there, by them. The second sign is the こ you already write. The first one is new, and the next lesson writes it.

The word, taken apart

そこ (*soko*) is native: *so-*, the root that points near the listener, with *-ko*, "place", as in *koko* (JMdict). It is inherited rather than borrowed, and is usually written in kana.

Your turn

- *Say it: soko*
- *Say it: koko*, picturing the spot at your own feet, then *soko*, picturing the spot at the listener's
- *Recall:* name the sign in そこ you can already write, and the one you cannot

Before you move on

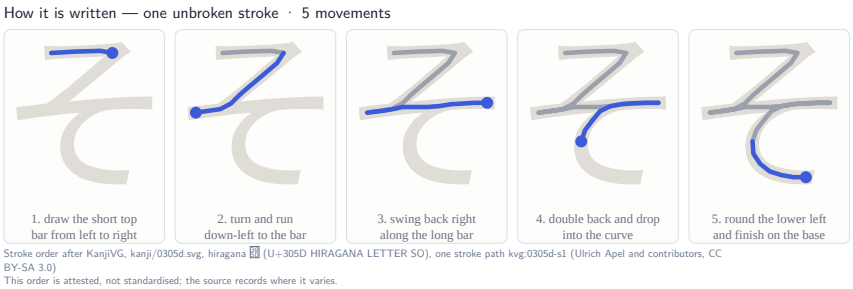

What is "there", near the listener? (そこ, *soko.*) And "here"? (ここ, *koko.*)

132.2 そ — one stroke, two zigzags

Four recalls, then the sign.

- *Recall:* say *there*, near the listener — **R1**, one lesson back
- *Recall:* say *a library* — **R2**, five lessons back
- *Recall:* say *a water flask* — **R4**, eighty lessons back
- *Recall:* say *noisy* — **R3**, twenty lessons back

Script — the shape

Stroke order after KanjiVG, kanji/0305d.svg, hiragana そ (U+305D HIRAGANA LETTER SO), one stroke path kvg:0305d-s1 (Ulrich Apel and contributors, CC BY-SA 3.0)
This order is attested, not standardised; the source records where it varies.

How そ is written, stroke by stroke

そ — *so*

One stroke, and the pen never lifts:

1. a short **bar** at the top, left to right
2. turn sharply and run **down and to the left** until you reach the long middle bar
3. turn back and run **right** along the whole of that bar
4. double back a little way, then drop into an **open curve** that rounds the lower left and finishes along the base to the right

The pen zigzags twice before it reaches the curve. Some typefaces print the top apart from the rest; written by hand here, it is one unbroken stroke.

With こ after it, you can now write the word from the last lesson: そこ, *soko*, there.

Your turn

1. Trace そ saying "bar, down, across, curve".
2. Write そこ from memory and say *soko*.
3. Write ここ and そこ side by side, and say which one is the place by the listener.

Before you move on

Stop after one accurate form.

132.3 そと (soto) — outside

Write it: そ — **R1**, one lesson back

Then ask for tea politely — **R2**, five lessons back.

- *Recall:* say *a rope of straw* — **R4**, eighty lessons back
- *Recall:* say *shameless* — **R3**, twenty lessons back

You'll want to know: そと

そと — *soto* — "outside".

The new sign is spent at once. そ with と after it: two beats, *so–to*, and both signs are ones you write. そこ is a spot by the listener; そと is anywhere beyond the walls, out of doors.

The word, taken apart

そと (*soto*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2).

Your turn

- *Say it: soto*
- *Say it: soto*, picturing a window or a door
- *Write it:* そと from memory, one stroke for the first sign and two for the second

Before you move on

What does そと mean? ("Outside".) Say it once more.

132.4 これ (kore) — this

Say *outside* — **R1**, one lesson back. *Write it:* を — **R2**, five lessons back

- *Recall:* say *a ladder* — **R4**, eighty lessons back
- *Recall:* say *reliable* — **R3**, twenty lessons back

You'll want to know: これ

これ — *kore* — "this", a thing near you as you speak.

ここ is a place near you; これ is a thing near you, the one in your hand or under your finger. It begins with the same こ. The second sign is one you do not write yet. It turns the pointing word into a thing, and the next lesson writes it.

The word, taken apart

これ (*kore*) is native: *ko-*, the root that points near the speaker, with *-re*, the ending of the thing words *kore*, *sore*, *are* (JMdict). It is inherited rather than borrowed.

Your turn

- *Say it: kore*
- *Say it: kore*, picturing a pen in your hand, then *koko*, picturing the spot where you stand
- *Recall:* name the sign in これ you can already write, and the one you cannot

Before you move on

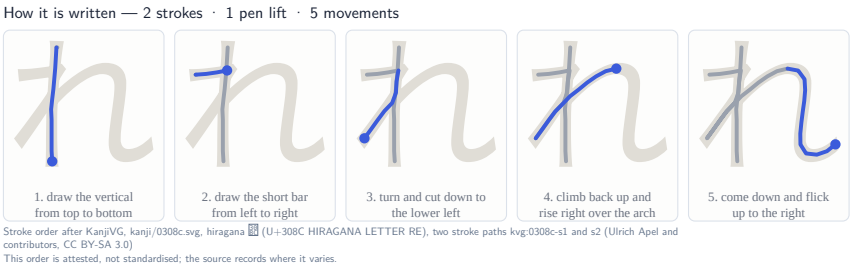

What is "this"? (これ, *kore.*) And "here"? (ここ, *koko.*)

132.5 れ — one first stroke, a third ending

Four recalls, then the sign.

- *Recall:* say *this*, a thing near you — **R1**, one lesson back
- *Recall:* write わ and ね, and say each one
- *Recall:* say *a chain* — **R4**, eighty lessons back
- *Recall:* say *pure white* — **R3**, twenty lessons back

Script — the shape

How れ is written, stroke by stroke

れ — *re*

Two strokes, one lift:

1. the long **vertical**, from top to bottom
2. a short **bar** from the left across the vertical; without lifting, turn sharply and cut **down and to the left** through the vertical, climb back up that line and rise to the right over an **arch**, come down its right side, round the foot and **flick** up to the right

The first stroke and the zigzag are the ones your hand already makes in わ and ね. Only the ending of the second stroke is new:

sign	how the second stroke ends
わ	a broad belly that curves back to the left
ね	a small loop at the lower right
れ	a drop and a flick out to the right

With こ in front of it, you can now write the word from the last lesson: これ, *kore*, this.

Your turn

1. Trace れ saying "down; bar, zigzag, arch, flick".
2. Write わ, ね and れ in a row, and look only at the three endings.
3. Write これ from memory and say *kore*.

Before you move on

Stop after one accurate form.
Source: Unicode Hiragana chart; stroke count and order per KanjiVG.

132.6 それ (sore) — that, near you

Write it: れ — **R1**, one lesson back

Then say *there*, near the listener — **R2**, five lessons back.

- *Recall:* say *cotton wool* — **R4**, eighty lessons back
- *Recall:* say *pitch black* — **R3**, twenty lessons back

You'll want to know: それ

それ — *sore* — "that", a thing near the person you are talking to.

You have met both halves. そ points at the listener, as in そこ; れ makes it a thing, as in これ. Put side by side, the four words line up:

near you	**near the listener**
ここ, here	そこ, there
これ, this	それ, that

The word, taken apart

それ (*sore*) is native: *so-*, the root that points near the listener, with *-re*, as in *kore* (JMdict). It is inherited rather than borrowed.

Your turn

- *Say it: sore*
- *Say it: kore*, picturing something in front of you, then *sore*, picturing something by the listener
- *Write it:* それ from memory; you write every sign in it now

Before you move on

What does それ mean? ("That", near the listener.) And これ? ("This".)

132.7 くるま (kuruma) — a car

Say *that*, a thing near the listener — **R1**, one lesson back. *Write it:* そ — **R2**, five lessons back

- *Recall:* say *a bookshop* — **R4**, eighty lessons back
- *Recall:* say *bright red* — **R3**, twenty lessons back

You'll want to know: くるま

くるま — *kuruma* — "a car".

Three beats: *ku–ru–ma*. The first and last signs are く and ま, and you write both. The middle one is new. It looks like ろ with a small loop tied at the bottom, and the next lesson writes it.

The word, taken apart

くるま (*kuruma*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2). JMdict still lists "wheel" among its senses, and the word named wheeled carts long before cars.

Your turn

- *Say it: kuruma*
- *Say it: kuruma*, then count its beats aloud — three
- *Recall:* name the sign in くるま you cannot write yet, and say which sign it looks like

Before you move on

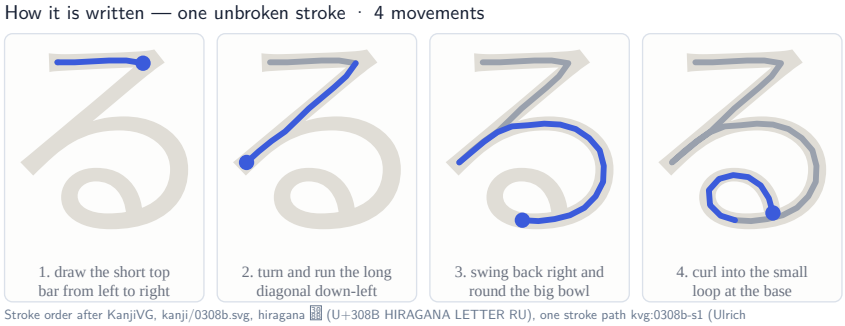

What is "a car"? (くるま, *kuruma*.) How many beats? (**Three**.)

132.8 る — ろ, with a loop

Five recalls, then the sign.

- *Recall:* say *a car*, and clap its beats — **R1**, one lesson back
- *Recall:* say *outside* — **R2**, five lessons back
- *Recall:* write ろ: the bar, the diagonal, the open belly
- *Recall:* say *a florist* — **R4**, eighty lessons back
- *Recall:* say *vague* — **R3**, twenty lessons back

Script — the shape

How る is written, stroke by stroke

る — *ru*

One stroke, and the pen never lifts:

1. a short **bar** at the top, left to right
2. turn sharply and run the long **diagonal** down to the lower left
3. swing back up to the right and round the big **bowl**
4. at the bottom, curl up into a small **loop** and finish where it meets the base

Up to the bowl, this is ろ. Only the ending differs:

you write	it ends with
ろ, *ro*	a short tail curving left
る, *ru*	a small closed loop

With く and ま around it, you can now write the word from the last lesson: くるま, *kuruma*, a car.

Your turn

1. Trace る saying “bar, diagonal, bowl, loop”.
2. Write ろ and る side by side; check that only the second one closes a loop.

3. Write くるま from memory and say *kuruma*.

Before you move on

Stop after one accurate form.

132.9 This and that — the three signs, written

Write it: る — **R1**, one lesson back

Then say *this* — **R2**, five lessons back.

- *Recall:* say *a fishmonger* — **R4**, eighty lessons back
- *Recall:* say *certain* — **R3**, twenty lessons back

Your turn — read the five words

Read it: each one below aloud, then say what it means

Read these aloud:

- そこ — there, near the listener
- そと — outside
- これ — this, near you
- それ — that, near the listener
- くるま — a car

Two signs do the pointing. こ points near you and そ points near the listener; the sign after them says whether you mean a place or a thing.

Your turn — point and write

1. *Write it:* これ and それ from memory, and circle the sign that changes
2. *Write it:* そ, れ and る once each
3. Picture something in front of you and say *kore*; picture something by the listener and say *sore*; picture a window and say *soto*. *Write it:* くるま

Before you move on

There? (そこ, *soko.*) Outside? (そと, *soto.*) This? (これ, *kore.*) That? (それ, *sore.*) A car? (くるま, *kuruma.*)

Chapter 133

The Last Four Hiragana: Ki, Ke, Nu and He

Modes: **voice** (8) **pen** (4) **Hands-free start:** the first of 12 lessons.

> ***By the end of this chapter:*** I can write ki, ke, nu and he, the last four basic hiragana, and read words that use them, such as eki, inu and heya.
>
> *Read eki, kinou, ike, kesa, inu, nuno and heya, write kinou and kesa from memory and say which is earlier, write heya with he at the front, and write the four new signs once each.*

133.1 えき (eki) — a station

The word, taken apart

えき (*eki*) is Sino-Japanese (kango): the on'yomi of a character meaning "relay station", a reading borrowed from Chinese (Middle Chinese *yek* in Baxter's transcription; Unihan, KANJIDIC2).

Your turn

- *Say it: eki*
- *Say it: eki*, then count its beats aloud — two
- *Recall:* name the sign in えき you can already write, and the one you cannot

Before you move on

133.2 き — さ, with a second bar

Four recalls, then the sign.

- *Recall:* say *a station* — **R1**, one lesson back

き — *ki*

Four strokes, three lifts:

1. the upper **bar**, left to right
2. the lower **bar**, left to right
3. the long **diagonal** from the top, down to the right through both bars; at its foot, turn sharply and **hook** back to the left
4. a separate **curve**: start at the left, drop down, and finish along the base to the right

The diagonal, the hook and the curve are the ones your hand already makes in さ. Only the top differs:

you write	**bars at the top**
さ, *sa*	one
き, *ki*	two

With え in front of it, you can now write the word from the last lesson: えき, *eki*, a station.

Your turn

You'll want to know: きのう

きのう — *kinō* — "yesterday".

The new sign is spent at once. き, then の and う: three beats, *ki–no–o*. The う at the end stretches the *o*, as it does in ありがとう. You write every sign in it now.

The word, taken apart

きのう (*kinō*) is a native word, inherited rather than borrowed. JMdict writes it with characters for "previous" and "day", read as a whole; read *sakujitsu*, the same characters are Sino-Japanese. Its older origin is not settled.

Your turn

- *Say it: kinō*
- *Say it: eki*, then *kinō*, and listen for the *ki* in both
- *Write it:* きのう from memory, four strokes for the first sign

Before you move on

け — *ke*

Three strokes, two lifts:

1. the left **vertical**, top to bottom; at the foot, turn and **flick** up to the right
2. the **bar**, left to right
3. the long **vertical** from the top, through the bar: run straight down, then **sweep** away to the lower left

The first two strokes are the ones your hand already makes in は. Only the last stroke differs:

you write	**the last stroke ends**
は, *ha*	in a small loop
け, *ke*	in a sweep to the lower left

With い in front of it, you can now write the word from the last lesson: いけ, *ike*, a pond.

The word, taken apart

けさ (*kesa*) is a native word, inherited rather than borrowed, usually explained as ending in a form of *asa*, “morning”. JMdict writes it with “now” and “morning”, read as a whole; read *konchō*, the same characters are Sino-Japanese.

Your turn

- *Say it: kesa*
- *Say it: kinō*, yesterday, then *kesa*, this morning

いぬ — *inu* — “a dog”.

Two beats: *i–nu*. The first sign is the い you already write. The second one is new. It looks like め with a small loop tied at the end, and the next lesson writes it.

The word, taken apart

いぬ (*inu*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun’yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2).

You’ll want to know: へや

へや — *heya* — “a room”.

Two beats: *he–ya*. The second sign is the や you already write. The first one is new: a single low peak, like a roof. When you wrote ほ, the row *ha, hi, fu, he, ho* had one sign missing. This is it, and the next lesson writes it.

The word, taken apart

へや (*heya*) is a native word, inherited rather than borrowed, ending in *ya*, “house”. JMdict writes it with characters for “section” and “house”, read as a whole. Where the first part comes from is not settled.

This order is attested, not standardised; the source records where it varies.

How へ is written, stroke by stroke

へ — *he*

One stroke, and the pen never lifts:

1. start low on the left and **rise** to a low peak
2. turn over the peak and run **down to the right**

The peak sits left of the middle, so the way down is longer than the way up. Keep the peak low and the whole sign wide.

On its own after a place word, へ is also a particle, and then it is read *e*, the way は is read *wa* as the topic marker. That use comes later.

With や after it, you can now write the word from the last lesson: へや, *heya*, a room.

Your turn

1. Trace へ saying "up, over, down".
2. Write the whole row は ひ ふ へ ほ, and say it.
3. Write へや from memory and say *heya*.

133.12 The last four — every basic sign, written

Write it: へ — **R1**, one lesson back

Then say *a dog* — **R2**, five lessons back.

- *Recall:* say *pink* — **R4**, eighty lessons back
- *Recall:* say *there*, near the listener — **R3**, twenty lessons back

Your turn — read the seven words

Read it: each one below aloud, then say what it means

Read these aloud:

- えき — a station
- きのう — yesterday
- いけ — a pond

- けさ — this morning
- いぬ — a dog
- ぬの — cloth
- へや — a room

Each of these words holds one of the four signs this chapter wrote. They were the last four basic hiragana the book had not yet written.

Your turn — write

1. *Write it:* き, け, ぬ and へ once each
2. *Write it:* きのう and けさ from memory, and say which one is earlier
3. Say *heya*. *Write it:* へや

Before you move on

A station? (えき, *eki.*) Yesterday? (きのう, *kinō.*) A pond? (いけ, *ike.*) This morning? (けさ, *kesa.*) A dog? (いぬ, *inu.*) Cloth? (ぬの, *nuno.*) A room? (へや, *heya.*)

Chapter 134

Phone and Train: De, Ba, Be and Bu

Modes: 🚗 **voice** (8) ✓ **pen** (4) 🚗 **Hands-free start:** the first of 12 lessons.

> ***By the end of this chapter:*** I can write de, ba, be and bu by adding the voicing mark to signs I already write, and read words that use them, such as denwa, densha and shinbun.
>
> *Read denwa, densha, kaban, basho, taberu, benkyou and shinbun, write the four new signs beside the signs they voice, write densha and basho from memory and say which one you can ride, and write shinbun.*

134.1 でんわ (denwa) — a telephone

Three recalls before the new word.

- *Write it:* ぬ from memory — **R2**, five lessons back
- *Write it:* そ from memory — **R3**, twenty lessons back
- *Recall:* say *grey* — **R4**, eighty lessons back

You'll want to know: でんわ

でんわ — *denwa* — "a telephone", on a desk or in your pocket.

Three beats: *de–n–wa*. The last two signs are ん and わ, which you already write. The first one is て with the two short strokes of the voicing mark at its upper right, so *te* becomes *de*. The next lesson writes it.

The word, taken apart

でんわ (*denwa*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *den*, "electricity, lightning" (Middle Chinese *denH*) and *wa*, "speech, talk" (*hwaejH*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: denwa*
- *Say it: denwa*, then count its beats aloud — three
- *Recall:* say which sign in でんわ carries the two-stroke mark, and name the sign under it

Before you move on

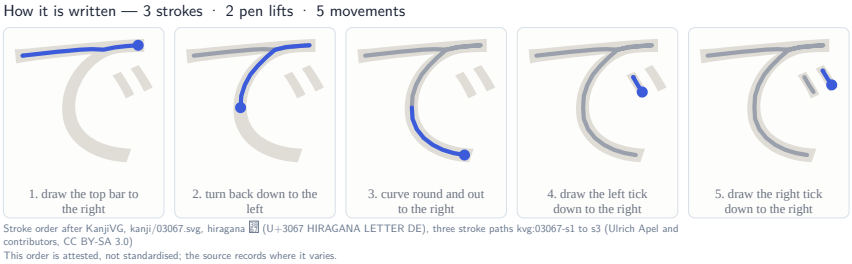

What is "a telephone"? (でんわ, *denwa*.) How many beats? (**Three**.)

134.2 で — て, voiced

Four recalls, then the sign.

- *Recall:* say *a telephone* — **R1**, one lesson back
- *Recall:* say *cloth* — **R2**, five lessons back
- *Recall:* say *outside* — **R3**, twenty lessons back
- *Recall:* say *thin*, of tea or of a colour — **R4**, eighty lessons back

Script — the change

How で is written, stroke by stroke

て *te* + ゛ → で *de*

Write て in full: one continuous stroke, across the top, back, then down and round to the right. Then add the two short strokes of the voicing mark at the upper right, the left one first. The base shape does not change.

The mark voices the opening consonant: *t* becomes *d*, and the vowel stays *e*. It is the change you already made on た for だ and on と for ど.

With ん and わ after it, you can now write the word from the last lesson: でんわ, *denwa*, a telephone.

Your turn

1. Write て, then で, and say *te*, *de*.
2. Write た だ, と ど and て で in pairs, and say each one.
3. Write でんわ from memory and say *denwa*.

- *Recall:* say *shallow* — **R4**, eighty lessons back

You'll want to know: でんしゃ

でんしゃ — *densha* — "a train", the kind that stops at a station.

The new sign is spent at once. で and ん, then し with a small ゃ: three beats, *de–n–sha*. The small ゃ joins し into one beat, as it joins ち in おちゃ. You write every sign in it now.

The word, taken apart

でんしゃ (*densha*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *den*, "electricity, lightning" (Middle Chinese *denH*) and *sha*, "cart, vehicle" (*tsyhae*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: densha*
- *Say it: denwa*, then *densha*, and listen for the *den* in both
- *Write it:* でんしゃ from memory, with the ゃ small and low

You'll want to know: かばん

かばん — *kaban* — "a bag" you carry: a school bag, a briefcase, a handbag.

Three beats: *ka–ba–n*. か and ん you already write. The middle sign is は with the voicing mark, and on an *h* sign the mark makes a *b*: *ha* becomes *ba*. The next lesson writes it.

The word, taken apart

かばん (*kaban*) has an origin that is not settled: it is sometimes said to be a loanword, but no account is proven, and JMdict names no source language. JMdict marks it as usually written in kana.

Your turn

- *Say it: kaban*
- *Say it: kaban*, then count its beats aloud — three
- *Recall:* say which sign in かばん carries the two-stroke mark, and name the sign under it

Before you move on

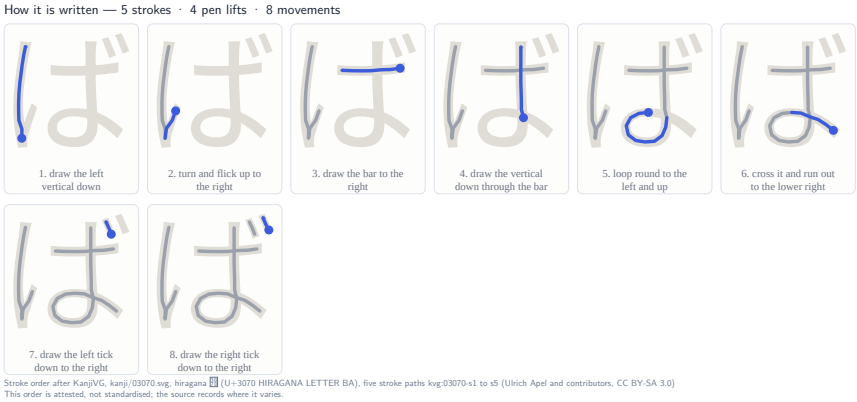

What is "a bag" you carry to school or to work? (かばん, *kaban*.) How many beats? (**Three**.)

134.5 ば — は, voiced to ba

Three recalls, then the sign.

- *Recall:* say *a bag*, the one you carry to work — **R1**, one lesson back
- *Recall:* say *that*, a thing near the listener — **R3**, twenty lessons back
- *Recall:* say *precious* — **R4**, eighty lessons back

Script — the change

How ば *is written, stroke by stroke*

は *ha* + ゛ → ば *ba*

Write は in full, in the order you learned it. Then add the two short strokes of the voicing mark at the upper right, the left one first.

Here the mark does something you have met only once: on an *h* sign it makes a *b*, so *ha* becomes *ba*. You saw it on ほ for ぼ, in さんぼん.

With か in front and ん after it, you can now write the word from the last lesson: かばん, *kaban*, a bag.

Your turn

1. Write は, then ば, and say *ha*, *ba*.

You'll want to know: ばしょ

ばしょ — *basho* — "a place, a spot": where something is, or where something happens.

The new sign is spent at once. ば, then し with a small よ: two beats, *ba–sho*. The small よ joins し into one beat, the way the small や did in でんしゃ. You write every sign in it now.

The word, taken apart

ばしょ (*basho*) mixes the two layers: native *ba*, "place", read as a kun'yomi, and *sho*, "place", the on'yomi of its second character, borrowed from Chinese (Middle Chinese *srjoX*; JMdict, KANJIDIC2).

Your turn

- *Say it: basho*

You'll want to know: たべる

たべる — *taberu* — "to eat". This is the dictionary form, the one a word list gives. Said politely, it is *tabemasu*.

The word, taken apart

たべる (*taberu*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2).

- *Say it: taberu*, then count its beats aloud — three

- *Recall:* say *to eat* — **R1**, one lesson back
- *Recall:* say *a train* — **R2**, five lessons back
- *Recall:* say *complicated* — **R4**, eighty lessons back

Script — the change

How べ is written, stroke by stroke

へ *he* + ゛ → べ *be*

Write へ in full: one stroke, up to the low peak and down to the right. Then add the two short strokes of the voicing mark at the upper right, above the long way down, the left one first.

As with は and ば, the *h* sign voices to *b*: *he* becomes *be*.

With た in front and る after it, you can now write the word from the last lesson: たべる, *taberu*, to eat.

Your turn

1. Write へ, then べ, and say *he*, *be*.

The word, taken apart

べんきょう (*benkyō*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *ben*, "endeavor, make effort" (Middle Chinese *mjenX*) and *kyō*, "strong" (*gjang*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

- *Recall:* say *happy* — **R4**, eighty lessons back

Your turn — read the seven words

Read it: each one below aloud, then say what it means

Read these aloud:

- びょういん — a hospital
- どようび — Saturday
- いりぐち — an entrance
- でぐち — an exit
- げつようび — Monday
- げんき — well, healthy
- ぎんこう — a bank

Each of these words holds one of the four signs this chapter wrote. With them, the book writes every sign of the *g* row, が ぎ ぐ げ ご, and of the *b* row, ば び ぶ べ ぼ.

Your turn — write

1. *Write it:* ひ び, く ぐ, け げ and き ぎ, in pairs
2. *Write it:* どようび and げつようび from memory, and say which day comes first in the week
3. Say *ginkō*. *Write it:* ぎんこう

Before you move on

A hospital? (びょういん, *byōin.*) Saturday? (どようび, *doyōbi.*) An entrance? (いりぐち, *iriguchi.*) An exit? (でぐち, *deguchi.*) Monday? (げつようび, *getsuyōbi.*) Well, healthy? (げんき, *genki.*) A bank? (ぎんこう, *ginkō.*)

Chapter 136

Family and Water: Zo, Zu and Ze

Modes: **voice** (5) **eyes** (1) **pen** (3) **Hands-free start:** the first of 9 lessons.

> ***By the end of this chapter:*** I can write zo, zu and ze by adding the voicing mark to signs I already write, and read words that use them, such as kazoku, mizu and kaze.
>
> *Read kazoku, kazoeru, mizu, suzushii and kaze, write the three new signs beside the signs they voice, write kazoku and kazoeru from memory and say which one is a verb, and write kaze.*

136.1 かぞく (kazoku) — a family; my family

Three recalls before the new word.

- *Write it:* げ from memory — **R2**, five lessons back
- *Write it:* ば from memory — **R3**, twenty lessons back
- *Recall:* say *drowsy* — **R4**, eighty lessons back

You'll want to know: かぞく

かぞく — *kazoku* — "a family", the people you live with or grew up with. Said of your own, it means *my family*.

Three beats: *ka–zo–ku*. か and く you already write. The middle sign is そ with the two short strokes of the voicing mark at its upper right, so *so* becomes *zo*. The next lesson writes it.

The word, taken apart

かぞく (*kazoku*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *ka*, "house, family" (Middle Chinese *kae*) and *zoku*, "family clan" (*dzuwk*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: kazoku*
- *Say it: kazoku*, then count its beats aloud — three
- *Recall:* say which sign in かぞく carries the two-stroke mark, and name the sign under it

Before you move on

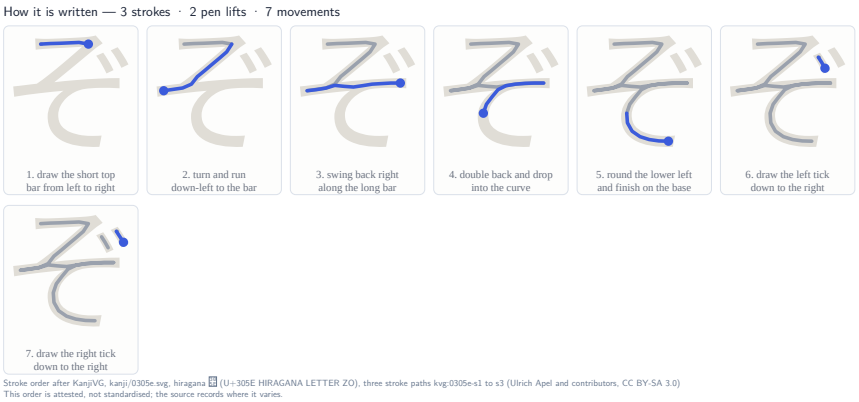

What is "a family"? (かぞく, *kazoku*.) How many beats? (**Three**.)

136.2 ぞ — そ, voiced to zo

Four recalls, then the sign.

- *Recall:* say *a family* — **R1**, one lesson back
- *Recall:* say *well*, as in healthy — **R2**, five lessons back
- *Recall:* say *a place* — **R3**, twenty lessons back
- *Recall:* say *relieved* — **R4**, eighty lessons back

Script — the change

How ぞ is written, stroke by stroke

そ *so* + ゛ → ぞ *zo*

Write そ in full: one stroke that zigzags twice before it drops into an open curve. Then add the two short strokes of the voicing mark at the upper right, the left one first. The base shape does not change.

The mark voices the opening consonant: *s* becomes *z*, and the vowel stays *o*. It is the change you made on さ for ざ, in ございます.

With か in front and く after it, you can now write the word from the last lesson: かぞく, *kazoku*, a family.

Your turn

1. Write そ, then ぞ, and say *so*, *zo*.
2. Write さ ざ and そ ぞ in pairs, and say each one.
3. Write かぞく from memory and say *kazoku*.

Before you move on

Stop after one accurate form.

136.3 かぞえる (kazoeru) — to count

Four recalls before the new word.

- *Write it:* ぞ from memory — **R1**, one lesson back
- *Recall:* say *a bank* — **R2**, five lessons back
- *Recall:* say *to eat* — **R3**, twenty lessons back
- *Recall:* say *ordinary* — **R4**, eighty lessons back

You'll want to know: かぞえる

かぞえる — *kazoeru* — "to count": one, two, three, out loud or on your fingers. This is the dictionary form, the one a word list gives. Said politely, it is *kazoemasu*.

The new sign is spent at once. か, ぞ, え and る: four beats, *ka–zo–e–ru*. It ends in る, like the verb たべる. You write every sign in it now.

The word, taken apart

かぞえる (*kazoeru*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2).

Your turn

- *Say it: kazoeru*
- *Say it: kazoku*, then *kazoeru*, and listen for the *kazo* in both
- *Write it:* かぞえる from memory, four signs for four beats

Before you move on

What does かぞえる mean? ("To count".) Say it once more.

136.4 みず (mizu) — water; cold water

Four recalls before the new word.

- *Recall:* say *to count* — **R1**, one lesson back

- *Write it:* ぎ from memory — **R2**, five lessons back
- *Write it:* べ from memory — **R3**, twenty lessons back
- *Recall:* say *tasty*, or *skilful* — **R4**, eighty lessons back

You'll want to know: みず

みず — *mizu* — "water". It means cold or cool water: the water you drink, or ask for in a restaurant. Hot water has a word of its own.

Two beats: *mi–zu*. **み** you already write. The second sign is **す** with the voicing mark, so *su* becomes *zu*. The next lesson writes it.

The word, taken apart

みず (*mizu*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2).

Your turn

- *Say it: mizu*
- *Say it: mizu*, then count its beats aloud — two
- *Recall:* say which sign in **みず** carries the two-stroke mark, and name the sign under it

Before you move on

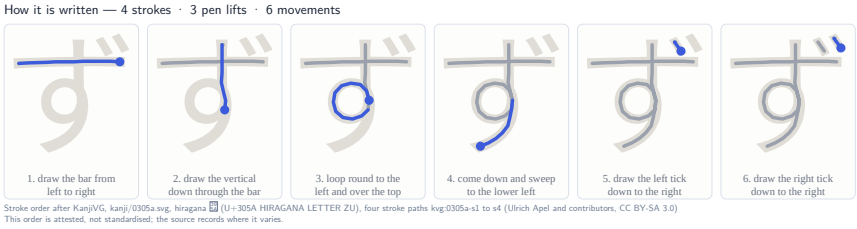

What is "water"? (**みず**, *mizu*.) How many beats? (**Two**.)

136.5 ず — す, voiced to zu

Three recalls, then the sign.

- *Recall:* say *water* — **R1**, one lesson back
- *Recall:* say *study* — **R3**, twenty lessons back
- *Recall:* say *many, a lot* — **R4**, eighty lessons back

Script — the change

How ず is written, stroke by stroke

す *su* + ゛ → ず *zu*

Write す in full: the horizontal, then the vertical with its loop. Then add the two short strokes of the voicing mark at the upper right, the left one first, clear of the horizontal.

As with さ and ざ, and そ and ぞ, the *s* sign voices to *z*: *su* becomes *zu*.

With み in front of it, you can now write the word from the last lesson: みず, *mizu*, water.

Your turn

1. Write す, then ず, and say *su*, *zu*.
2. Write さ ざ, し じ and す ず in pairs, and say each one.
3. Write みず from memory and say *mizu*.

Before you move on

Stop after one accurate form.

136.6 すずしい (suzushii) — cool, pleasantly cool

Four recalls before the new word.

- *Recall:* write ず — **R1**, one lesson back
- *Recall:* say *a family* — **R2**, five lessons back
- *Recall:* say *a newspaper* — **R3**, twenty lessons back
- *Recall:* say *few, little* — **R4**, eighty lessons back

You'll want to know: すずしい

すずしい — *suzushii* — "cool": the air on a summer evening, or a shady room on a hot day. It is a pleasant word; it is not *cold*.

The new sign is spent at once. す, ず, し and い: four beats, *su–zu–shi–i*. The plain す and the voiced ず stand side by side, so you can see the mark do its work. You write every sign in it now.

The word, taken apart

すずしい (*suzushii*) is a native Japanese word, inherited rather than borrowed from Chinese, and its older origin is not settled. Its kanji was attached to it later as a kun'yomi, a native reading given to a Chinese character (JMdict, KANJIDIC2).

Your turn

- *Say it: suzushii*
- *Say it: mizu*, then *suzushii*, and listen for the *zu* in both
- *Recall:* write すずしい, with す and then ず

Before you move on

What does すずしい mean? ("Cool", pleasantly so.) Say it once more.

136.7 かぜ (kaze) — a wind; a cold

Four recalls before the new word.

- *Recall:* say *cool*, of a summer evening — **R1**, one lesson back
- *Write it:* ぞ from memory — **R2**, five lessons back
- *Write it:* ぶ from memory — **R3**, twenty lessons back
- *Recall:* say *refreshing* — **R4**, eighty lessons back

You'll want to know: かぜ

かぜ — *kaze* — "a wind", the air that moves. The same two signs are also the word for "a cold", the illness you catch in winter. Kanji tell the two apart; in kana they look the same.

Two beats: *ka–ze*. か you already write. The second sign is せ with the voicing mark, so *se* becomes *ze*. The next lesson writes it.

The word, taken apart

かぜ (*kaze*) is a native word, "wind", inherited rather than borrowed. For the cold you catch JMdict writes "wind" and "evil", read as a whole: the illness shares the word for wind.

Your turn

- *Say it: kaze*
- *Say it: kaze*, then count its beats aloud — two
- *Recall:* say which sign in かぜ carries the two-stroke mark, and name the sign under it

Before you move on

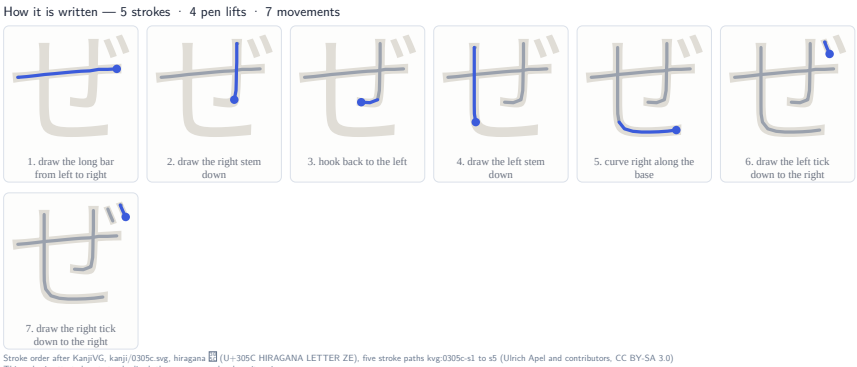

What is "a wind"? (かぜ, *kaze*.) And "a cold"? (The same: かぜ.)

136.8 ぜ — せ, voiced to ze

Three recalls, then the sign.

- *Recall:* say *a wind*, or *a cold* — **R1**, one lesson back
- *Recall:* say *to count* — **R2**, five lessons back
- *Recall:* say *calm* — **R4**, eighty lessons back

Script — the change

How ぜ *is written, stroke by stroke*

せ *se* + ゛ → ぜ *ze*

Write せ in full, in the order you learned it. Then add the two short strokes of the voicing mark at the upper right, the left one first, beside the top of the right-hand vertical.

The *s* sign voices to *z*: *se* becomes *ze*. With it you write every sign of the *z* row: ざ じ ず ぜ ぞ.

With か in front of it, you can now write the word from the last lesson: かぜ, *kaze*, a wind, or a cold.

Your turn

1. Write せ, then ぜ, and say *se*, *ze*.
2. Write ざ じ ず ぜ ぞ in order, and say each one.
3. Write かぜ from memory and say *kaze*.

Before you move on

Stop after one accurate form.

136.9 Family and water — the z row, complete

Four recalls, then the review.

- *Write it:* ぜ from memory — **R1**, one lesson back
- *Recall:* say *water* — **R2**, five lessons back
- *Recall:* say *a hospital* — **R3**, twenty lessons back
- *Recall:* say *honest*, *straightforward* — **R4**, eighty lessons back

Your turn — read the five words

Read it: each one below aloud, then say what it means

Read these aloud:

- かぞく — a family
- かぞえる — to count
- みず — water
- すずしい — cool
- かぜ — a wind; a cold

Each of these words holds one of the three signs this chapter wrote. With them, the book writes every sign of the *z* row, ざ じ ず ぜ ぞ.

Your turn — write

1. *Write it:* そ ぞ, す ず and せ ぜ, in pairs
2. *Write it:* かぞく and かぞえる from memory, and say which one is a verb
3. Say *kaze*. *Write it:* かぜ

Before you move on

A family? (かぞく, *kazoku.*) To count? (かぞえる, *kazoeru.*) Water? (みず, *mizu.*) Cool? (すずしい, *suzushii.*) A wind, or a cold? (かぜ, *kaze.*)

Chapter 137

Pencil and Ticket: Pa, Pi, Pu and Pe

Modes: **voice** (8) **pen** (4) **Hands-free start:** the first of 12 lessons.

> ***By the end of this chapter:*** I can write pa, pi, pu and pe by adding the small circle to signs I already write, and read words for things I want or need that use them, such as kippu, enpitsu and tenpura.
>
> *Read ippai, shinpai, enpitsu, ippiki, kippu, tenpura and perapera, write the four new signs beside the signs they come from, write enpitsu and kippu from memory and say which one you show on a train, and write perapera.*

137.1 いっぱい (ippai) — full; a lot

Three recalls before the new word.

- *Write it:* ず from memory — **R2**, five lessons back
- *Write it:* び from memory — **R3**, twenty lessons back
- *Recall:* say *clever* — **R4**, eighty lessons back

You'll want to know: いっぱい

いっぱい — *ippai* — "full", as a cup is full, or as you are after a big meal. It also means "a lot": a lot of people, a lot of work.

Four beats: *i–p–pa–i*. い, the small っ that holds a beat, and the last い you already write. The third sign is は with the small circle at its upper right, and that circle makes a *p*: *ha* becomes *pa*. The next lesson writes it.

The word, taken apart

いっぱい (*ippai*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *ichi*, "one" (Middle Chinese *'jit*) and *hai*, "cup" (*pwoj*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription). *Ichi* and *hai* join as *ippai*: one cupful.

Your turn

- *Say it: ippai*
- *Say it: ippai*, then count its beats aloud — four
- *Recall:* say which sign in いっぱい carries the small circle, and name the sign under it

Before you move on

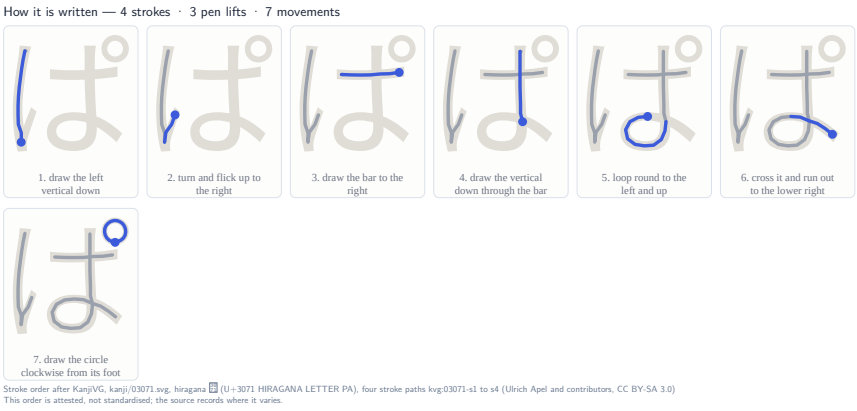

What is "full"? (いっぱい, *ippai*.) How many beats? (**Four**.)

137.2 ぱ — は, with the circle

Four recalls, then the sign.

- *Recall:* say *full*, or *a lot* — **R1**, one lesson back
- *Recall:* say *cool*, of a summer evening — **R2**, five lessons back
- *Recall:* say *Saturday* — **R3**, twenty lessons back
- *Recall:* say *foolish* — **R4**, eighty lessons back

Script — the change

How ぱ *is written, stroke by stroke*

は *ha* + ゜ → ぱ *pa*

Write は in full, in the order you learned it. Then add the small circle of the handakuten at the upper right, where the voicing mark would go. Keep it small and open, and do not let it touch the sign.

The circle works only on the *h* row, and it always makes a *p*: *ha* becomes *pa*. You saw it on ほ for ぽ, in いっぽん.

With いっ in front and い after it, you can now write the word from the last lesson: いっぱい, *ippai*, full.

Your turn

1. Write は, then ば, then ぱ, and say *ha*, *ba*, *pa*.
2. Write ほ ぼ ぽ and は ば ぱ in rows, and say each one.
3. Write いっぱい from memory and say *ippai*.

Before you move on

137.3 しんぱい (shinpai) — worry; worried

Four recalls before the new word.

- *Write it:* ぱ from memory — **R1**, one lesson back
- *Recall:* say *a wind*, or *a cold* — **R2**, five lessons back
- *Recall:* say *an entrance* — **R3**, twenty lessons back
- *Recall:* say *brave* — **R4**, eighty lessons back

You'll want to know: しんぱい

しんぱい — *shinpai* — "worry": the feeling, or being worried about someone. It is the word in *Don't worry.*

The new sign is spent at once. し and ん, then ぱ and い: four beats, *shi–n–pa–i.* After ん the *p* comes out clearly, the lips closed first. You write every sign in it now.

The word, taken apart

しんぱい (*shinpai*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *shin*, "heart, mind" (Middle Chinese *sim*) and *hai*, "distribute" (*phwojH*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: shinpai*
- *Say it: ippai*, then *shinpai*, and listen for the *pai* in both
- *Write it:* しんぱい from memory, with the circle small and open

Before you move on

What does しんぱい mean? ("Worry; worried".) Say it once more.

137.4 えんぴつ (enpitsu) — a pencil

Four recalls before the new word.

- *Recall:* say *worry* — **R1**, one lesson back
- *Write it:* ぜ from memory — **R2**, five lessons back
- *Write it:* ぐ from memory — **R3**, twenty lessons back
- *Recall:* say *fine*, small and detailed — **R4**, eighty lessons back

You'll want to know: えんぴつ

えんぴつ — *enpitsu* — "a pencil", the one you may be writing with now.

Four beats: *e–n–pi–tsu*. え, ん and つ you already write. The third sign is ひ with the small circle, so *hi* becomes *pi*. The next lesson writes it.

The word, taken apart

えんぴつ (*enpitsu*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *en*, "lead" (Middle Chinese *ywen*) and *hitsu*, "writing brush" (*pit*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: enpitsu*
- *Say it: enpitsu*, then count its beats aloud — four
- *Recall:* say which sign in えんぴつ carries the small circle, and name the sign under it

Before you move on

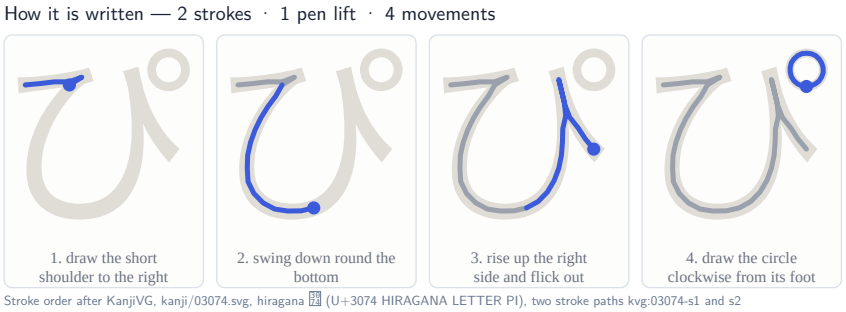

What is "a pencil"? (えんぴつ, *enpitsu*.) How many beats? (**Four**.)

137.5 ぴ — ひ, with the circle

Three recalls, then the sign.

- *Recall:* say *a pencil* — **R1**, one lesson back
- *Recall:* say *an exit* — **R3**, twenty lessons back
- *Recall:* say *ugly* — **R4**, eighty lessons back

Script — the change

How ぴ *is written, stroke by stroke*

ひ *hi* + ゜ → ぴ *pi*

Write ひ in full: one stroke, a short rise, the deep bowl, and up again. Then add the small circle at the upper right, beside the end of the stroke. Keep it small and open.

The circle makes a *p* again: *hi* becomes *pi*. The voicing mark on the same sign gives び, *bi*, so one base sign now has three readings.

With えん in front and つ after it, you can now write the word from the last lesson: えんぴつ, *enpitsu*, a pencil.

Your turn

1. Write ひ, then び, then ぴ, and say *hi*, *bi*, *pi*.
2. Write は ぱ and ひ ぴ in pairs, and say each one.
3. Write えんぴつ from memory and say *enpitsu*.

137.6 いっぴき (ippiki) — one small animal

Four recalls before the new word.

- *Write it:* ぴ from memory — **R1**, one lesson back
- *Recall:* say *full*, or *a lot* — **R2**, five lessons back
- *Recall:* say *Monday* — **R3**, twenty lessons back
- *Recall:* say *cute* — **R4**, eighty lessons back

You'll want to know: いっぴき

いっぴき — *ippiki* — "one small animal": one cat, one dog, one fish. Japanese counts animals with a word of their own, the way it counts long thin things with いっぽん.

The new sign is spent at once. い, a small っ, ぴ and き: four beats, *i–p–pi–ki*. The small っ holds a beat before the *p*, as it does in いっぱい. You write every sign in it now.

The word, taken apart

いっぴき (*ippiki*) mixes the two layers: *ichi*, "one", borrowed from Chinese (Middle Chinese *'jit*), and *hiki*, a counter for animals that KANJIDIC2 lists as a kun'yomi; they join as *ippiki* (JMdict, KANJIDIC2).

Your turn

- *Say it: ippiki*
- *Say it: ippai*, then *ippiki*, and listen for the held beat in both
- *Write it:* いっぴき from memory, with the っ small and low

Before you move on

What does いっぴき mean? ("One small animal".) Say it once more.

137.7 きっぷ (kippu) — a ticket

Four recalls before the new word.

- *Recall:* say *one small animal*, one cat — **R1**, one lesson back
- *Write it:* ぱ from memory — **R2**, five lessons back
- *Write it:* げ from memory — **R3**, twenty lessons back
- *Recall:* say *persistent* — **R4**, eighty lessons back

You'll want to know: きっぷ

きっぷ — *kippu* — "a ticket", above all the one you buy for a train.

Three beats: *ki–p–pu*. き and the small つ you already write. The last sign is ふ with the small circle, so *fu* becomes *pu*. The next lesson writes it.

The word, taken apart

きっぷ (*kippu*) mixes the two layers: native *kiri*, "cutting", from *kiru*, "to cut", and *fu*, "tally, token", the on'yomi of its second character, borrowed from Chinese (Middle Chinese *bju*); they join as *kippu* (JMdict, KANJIDIC2).

Your turn

- *Say it: kippu*
- *Say it: kippu*, then count its beats aloud — three
- *Recall:* say which sign in きっぷ carries the small circle, and name the sign under it

Before you move on

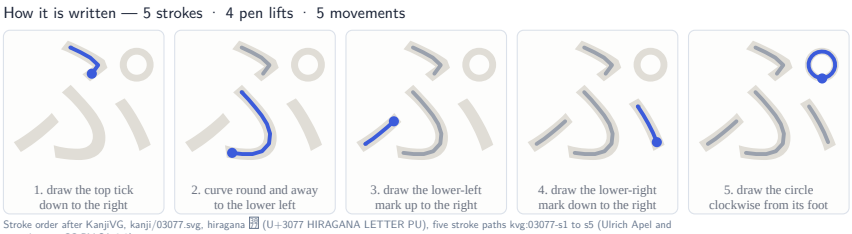

What is "a ticket"? (きっぷ, *kippu*.) How many beats? (**Three**.)

137.8 ぷ — ふ, with the circle

Four recalls, then the sign.

- *Recall:* say *a ticket* — **R1**, one lesson back
- *Recall:* say *worry* — **R2**, five lessons back
- *Recall:* say *well*, as in healthy — **R3**, twenty lessons back
- *Recall:* say *noisy* — **R4**, eighty lessons back

Script — the change

How ぷ is written, stroke by stroke

ふ *fu* + ゜ → ぷ *pu*

Write ふ in full, in the order you learned it. Then add the small circle at the upper right, above the dot on the right. Keep it small and open.

The sign is read *pu*. The *f* of *fu* goes, and the lips close for a *p*. With the voicing mark the same sign gives ぶ, *bu*.

With きっ in front of it, you can now write the word from the last lesson: きっぷ, *kippu*, a ticket.

Your turn

1. Write ふ, then ぶ, then ぷ, and say *fu*, *bu*, *pu*.
2. Write ぱ, ぴ, ぷ and ぽ, and say each one.
3. Write きっぷ from memory and say *kippu*.

Before you move on

137.9 てんぷら (tenpura) — tempura, food fried in a light batter

Four recalls before the new word.

- *Write it:* ぷ from memory — **R1**, one lesson back

- *Recall:* say *a pencil* — **R2**, five lessons back
- *Recall:* say *a bank* — **R3**, twenty lessons back
- *Recall:* say *shameless* — **R4**, eighty lessons back

You'll want to know: てんぷら

てんぷら — *tenpura* — "tempura": fish, prawns or vegetables, dipped in a light batter and fried. English borrowed the word from Japanese.

The new sign is spent at once. て and ん, then ぷ and ら: four beats, *te–n–pu–ra*. After ん the *p* comes out clearly, as in しんぱい. You write every sign in it now.

The word, taken apart

てんぷら (*tenpura*) is a loanword, usually traced to Portuguese. JMdict names two candidates, *tempero*, "seasoning", and *têmporas*, the Ember Days of fasting; which one is the source is not settled.

Your turn

- *Say it: tenpura*
- *Say it: kippu*, then *tenpura*, and listen for the *pu* in both
- *Write it:* てんぷら from memory, four signs for four beats

Before you move on

What does てんぷら mean? ("Tempura", fried in batter.) Say it once more.

137.10 ぺらぺら (perapera) — fluent, fluently

Four recalls before the new word.

- *Recall:* say *tempura* — **R1**, one lesson back
- *Write it:* ぴ from memory — **R2**, five lessons back
- *Write it:* ぎ from memory — **R3**, twenty lessons back
- *Recall:* say *reliable* — **R4**, eighty lessons back

You'll want to know: ぺらぺら

ぺらぺら — *perapera* — "fluent, fluently": it says that someone speaks a language with ease. It is one of the many doubled words Japanese uses for a sound or a manner: *pera*, and *pera* again.

Four beats: *pe–ra–pe–ra*. ら you already write. The other sign, twice, is へ with the small circle, so *he* becomes *pe*. The next lesson writes it.

The word, taken apart

ぺらぺら (*perapera*) is a native mimetic word, one that pictures a manner in sound; JMdict marks it as mimetic, and it has no kanji. It is inherited, not borrowed.

Your turn

- *Say it: perapera*
- *Say it: perapera*, then count its beats aloud — four
- *Recall:* say which sign in ぺらぺら carries the small circle, and name the sign under it

Before you move on

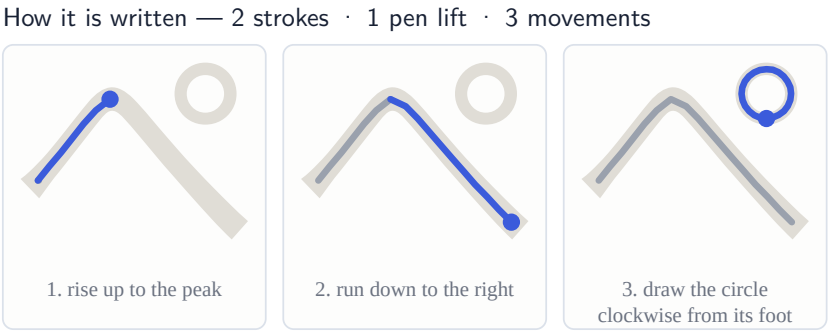

What is "fluent"? (ぺらぺら, *perapera*.) How many beats? (**Four**.)

137.11 ぺ — へ, with the circle

Three recalls, then the sign.

- *Recall:* say *fluent*, of someone who speaks with ease — **R1**, one lesson back
- *Recall:* say *one small animal*, one cat — **R2**, five lessons back
- *Recall:* say *pure white* — **R4**, eighty lessons back

Write へ in full: one stroke, up to the low peak and down to the right. Then add the small circle at the upper right, above the long way down. Keep it small and open.

The circle makes a *p*: *he* becomes *pe*. With it you write every sign of the *p* row: ぱ ぴ ぷ ぺ ぽ.

With ら after it, twice over, you can now write the word from the last lesson: ぺらぺら, *perapera*, fluent.

Your turn

1. Write へ, then べ, then ぺ, and say *he*, *be*, *pe*.
2. Write ぱ ぴ ぷ ぺ ぽ in order, and say each one.

137.12 Pencil and ticket — the p row, complete

Four recalls, then the review.

- *Write it:* ペ from memory — **R1**, one lesson back
- *Recall:* say *a ticket* — **R2**, five lessons back
- *Recall:* say *a family* — **R3**, twenty lessons back

- しんぱい — worry
- えんぴつ — a pencil
- いっぴき — one small animal
- きっぷ — a ticket
- てんぷら — tempura
- ぺらぺら — fluent

Each of these words holds one of the four signs this chapter wrote. With them, and ぽ from chapter 18, the book writes every sign of the *p* row, ぱ ぴ ぷ ぺ ぽ.

Your turn — write

1. *Write it:* は ぱ, ひ ぴ, ふ ぷ and へ ぺ, in pairs
2. *Write it:* えんぴつ and きっぷ from memory, and say which one you show on a train
3. Say *perapera*. *Write it:* ぺらぺら

Before you move on

Full? (いっぱい, *ippai.*) Worry? (しんぱい, *shinpai.*) A pencil? (えんぴつ, *enpitsu.*) One small animal? (いっぴき, *ippiki.*) A ticket? (きっぷ, *kippu.*) Tempura? (てんぷら, *tenpura.*) Fluent? (ぺらぺら, *perapera.*)

Chapter 138

My Day: Get Up, Work, Walk, Go Home, Sleep

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what I do every day with the polite -masu form, and find the stem of a verb: I get up, I work, I walk, I go home, I go to bed.
>
> *Say a whole day in order with five polite verbs, okimasu, hatarakimasu, arukimasu, kaerimasu and nemasu, and give the dictionary form beside each one.*

138.1 おきます (okimasu) — I get up; to get up (polite)

Three recalls before the new word.

- *Write it:* ぶ from memory — **R2**, five lessons back
- *Write it:* ぞ from memory — **R3**, twenty lessons back
- *Recall:* say *bright red* — **R4**, eighty lessons back

You'll want to know: おきます

おきます — *okimasu* — "I get up", or "she gets up", "we get up": Japanese leaves out who does it when that is clear. It says what someone does, as a habit or as a plan.

Every verb in this chapter ends in ます, *masu*. That ending makes the polite present, the form you use with anyone you do not know well. A word

list gives the dictionary form instead, here おきる, *okiru*. To make the polite form of a verb in *-iru* or *-eru* like this one, take off the last る and add ます: *oki-ru* becomes *oki-masu*.

> まいあさ おきます。 — *maiasa okimasu* — "I get up every morning."

The word, taken apart

おきます (*okimasu*) is native *okiru*, "to get up", with the polite ending *-masu*. The verb is inherited rather than borrowed; *-masu* is usually traced to an older humble verb, *mairasu*, "to offer", though that account is not settled.

Your turn

- *Say it: okimasu*
- *Say it: maiasa okimasu* — I get up every morning
- *Recall:* say the dictionary form, *okiru*, then the polite form, *okimasu*

Before you move on

How do you say "I get up", politely? (おきます, *okimasu*.) Say it once more.

138.2 はたらきます (hatarakimasu) — I work; to work (polite)

Four recalls before the new word.

- *Recall:* say *I get up*, politely — **R1**, one lesson back
- *Recall:* say *tempura* — **R2**, five lessons back
- *Recall:* say *to count* — **R3**, twenty lessons back
- *Recall:* say *vague* — **R4**, eighty lessons back

You'll want to know: はたらきます

はたらきます — *hatarakimasu* — "I work": to do a job, at a desk, in a shop or in a field. The noun for the job itself is しごと, which you already know.

Its dictionary form is はたらく, *hataraku*. Verbs that end in *-u* like this one change that last sound to *-i* before ます: *hatarak-u* becomes *hatarak-i-masu*. So く turns into き.

> ぎんこうで はたらきます。 — *ginkō de hatarakimasu* — "I work at a bank." The particle で marks the place where something is done.

The word, taken apart

はたらきます (*hatarakimasu*) is native *hataraku*, "to work", with the polite ending *-masu*. The verb is inherited rather than borrowed (JMdict); its kanji, "person" beside "move", was made in Japan (KANJIDIC2).

Your turn

- *Say it: hatarakimasu*
- *Say it: maiasa okimasu*, then *ginkō de hatarakimasu*
- *Recall:* change *hataraku* to its polite form, and say it

Before you move on

How do you say "I work", politely? (はたらきます, *hatarakimasu*.) Say it once more.

138.3 あるきます (arukimasu) — I walk; to walk (polite)

Four recalls before the new word.

- *Recall:* say *I work*, politely — **R1**, one lesson back
- *Recall:* say *fluent* — **R2**, five lessons back
- *Recall:* say *water* — **R3**, twenty lessons back
- *Recall:* say *certain, sure* — **R4**, eighty lessons back

You'll want to know: あるきます

あるきます — *arukimasu* — "I walk", "I go on foot".

The dictionary form is あるく, *aruku*, and it works like はたらく: the last く becomes き, and ます follows. *aruk-u* becomes *aruk-i-masu*.

> えきまで あるきます。 — *eki made arukimasu* — "I walk to the station." まで means "as far as".

The word, taken apart

あるきます (*arukimasu*) is native *aruku*, "to walk", with the polite ending *-masu*. The verb is inherited rather than borrowed; its kanji is a kun'yomi attached later (JMdict, KANJIDIC2).

Your turn

- *Say it: arukimasu*
- *Say it: eki made arukimasu* — I walk to the station
- *Recall:* say *I work*, then *I walk*, and listen for the *-kimasu* in both

Before you move on

How do you say "I walk", politely? (あるきます, *arukimasu*.) Say it once more.

138.4 かえります (kaerimasu) — I go home, I go back; to return (polite)

Three recalls before the new word.

- *Recall:* say *I walk*, politely — **R1**, one lesson back
- *Write it:* ぺ from memory — **R2**, five lessons back
- *Write it:* ず from memory — **R3**, twenty lessons back

You'll want to know: かえります

かえります — *kaerimasu* — "I go home", "I go back", to the place you belong to: your home, your town, your country.

Its dictionary form is かえる, *kaeru*. It ends in *-eru*, but it follows the *-u* pattern of あるく, not the pattern of おきる: the last る becomes り, and ます follows. So it is *kaer-i-masu*, never *kaemasu*. A few common verbs in *-eru* and *-iru* work this way, and a word list marks them.

> うちに かえります。 — *uchi ni kaerimasu* — "I go home." The particle に marks where you are going.

The word, taken apart

かえります (*kaerimasu*) is native *kaeru*, "to go back", with the polite ending *-masu*. The verb is inherited rather than borrowed; its kanji is a kun'yomi attached later (JMdict, KANJIDIC2).

Your turn

- *Say it: kaerimasu*
- *Say it: uchi ni kaerimasu* — I go home
- *Recall:* say *I walk*, then *I go home*

Before you move on

How do you say "I go home", politely? (かえります, *kaerimasu*.) Say it once more.

138.5 ねます (nemasu) — I go to bed, I sleep; to sleep (polite)

Two recalls before the new word.

- *Recall:* say *I go home*, politely — **R1**, one lesson back
- *Recall:* say *cool* — **R3**, twenty lessons back

You'll want to know: ねます

ねます — *nemasu* — "I go to bed", "I sleep".

Its dictionary form is ねる, *neru*, and it works like おきる: take off る and add ます. *ne-ru* becomes *ne-masu*.

いま ねます。 — *ima nemasu* — "I am going to bed now."

Now you have a whole day, and the two ways to find the stem:

dictionary form	polite present	how
おきる *okiru*	おきます *okimasu*	drop *-ru*
ねる *neru*	ねます *nemasu*	drop *-ru*
はたらく *hataraku*	はたらきます *hatarakimasu*	*-u* becomes *-i*
あるく *aruku*	あるきます *arukimasu*	*-u* becomes *-i*
かえる *kaeru*	かえります *kaerimasu*	*-u* becomes *-i*

The word, taken apart

ねます (*nemasu*) is native *neru*, "to sleep, to lie down", with the polite ending *-masu*. The verb is inherited rather than borrowed; its kanji is a kun'yomi attached later (JMdict, KANJIDIC2).

Your turn

- *Say it: nemasu*
- *Say it:* your day in order, politely: *okimasu*, *hatarakimasu*, *arukimasu*, *kaerimasu*, *nemasu*
- *Recall:* for each of the five, say the dictionary form, then the polite form

Before you move on

I get up? (おきます, *okimasu.*) I work? (はたらきます, *hatarakimasu.*) I walk? (あるきます, *arukimasu.*) I go home? (かえります, *kaerimasu.*) I go to bed? (ねます, *nemasu.*)

Chapter 139

Is It? No: Nothing, Nobody, Nowhere

Modes: **voice** (6) **Hands-free start:** all 6 lessons.

> ***By the end of this chapter:*** I can ask a yes-or-no question with ka, answer that something is not so, and say nothing, nobody and nowhere with a negative verb.
>
> *Ask a yes-or-no question with desu ka, answer no with chigaimasu, say what is not so with ja nai, and say nothing, nobody and nowhere, each with a verb in -masen.*

139.1 ですか (desu ka) — is it ...? (the polite yes-or-no question)

Four recalls before the new word.

- *Recall:* say *I go to bed*, politely — **R1**, one lesson back
- *Recall:* say *I get up*, politely — **R2**, five lessons back
- *Recall:* say *a wind*, or *a cold* — **R3**, twenty lessons back
- *Recall:* say *tea* — **R4**, eighty lessons back

You'll want to know: ですか

ですか — *desu ka* — "is it ...?". です, *desu*, says politely that something is so. Put か, *ka*, at the end, and the sentence becomes a question that can be answered yes or no. The order of the words does not change, and the voice rises a little on *ka*.

これは みずですか。 — *kore wa mizu desu ka* — "Is this water?"
はい、みずです。 — *hai, mizu desu* — "Yes, it is water."

A verb takes か the same way: ます becomes ますか.

あした はたらきますか。 — *ashita hatarakimasu ka* — "Are you working tomorrow?"

The word, taken apart

ですか (*desu ka*) is *desu*, the polite "is" (JMdict), with *ka*, the native question particle. Where *desu* comes from is disputed: shortenings of *de arimasu*, *de gozaimasu* and *de sōrō* are all proposed.

Your turn

- *Say it: desu ka*
- *Say it: kore wa mizu desu ka* — Is this water?
- *Recall:* turn *I go home* into a question: *kaerimasu ka*

Before you move on

How do you ask "is it ...?", politely? (ですか, *desu ka.*) Say it once more.

139.2 ちがいます (chigaimasu) — no, that is not right; it is different (polite)

Four recalls before the new word.

- *Recall:* ask *is it …?*, politely — **R1**, one lesson back
- *Recall:* say *I work*, politely — **R2**, five lessons back
- *Write it:* ぜ from memory — **R3**, twenty lessons back
- *Write it:* small や from memory — **R4**, eighty lessons back

You'll want to know: ちがいます

ちがいます — *chigaimasu* — "it is different", and so, as an answer, "no, that is not right". It is the polite form of the verb ちがう, *chigau*, "to differ". When someone asks whether a thing is so and it is not, this is the everyday answer.

> これは おちゃですか。 — *kore wa ocha desu ka* — "Is this tea?"
> いいえ、ちがいます。みずです。 — *iie, chigaimasu. mizu desu* — "No, it isn't. It is water."

The word, taken apart

ちがいます (*chigaimasu*) is native *chigau*, "to differ", with the polite ending *-masu*. The verb is inherited rather than borrowed; JMdict lists *tagau*, "to differ", under the same kanji.

Your turn

- *Say it: chigaimasu*
- *Say it: iie, chigaimasu* — No, that is not right
- *Recall:* ask *Is this tea?*, then answer *No, it isn't*

Before you move on

How do you answer "no, that is not right"? (ちがいます, *chigaimasu*.) Say it once more.

139.3 じゃない (ja nai) — is not, is not so (plain)

Three recalls before the new word.

- *Recall:* answer *no, that is not right* — **R1**, one lesson back
- *Recall:* say *I walk*, politely — **R2**, five lessons back
- *Recall:* say *a doctor* — **R4**, eighty lessons back

You'll want to know: じゃない

じゃない — *ja nai* — "is not". It is the plain way, among friends, to say that something is not so. The polite way is じゃありません, *ja arimasen*.

みずじゃない。 — *mizu ja nai* — "It isn't water."

Verbs say *not* with their ending. In the polite form, ます becomes ません, *masen*:

はたらきます → はたらきません — *hatarakimasen* — "I don't work"

ねます → ねません — *nemasen* — "I don't go to bed"

The word, taken apart

じゃない (*ja nai*) is native: *ja*, which JMdict explains as coming from *de wa*, and *nai*, "not". It is inherited rather than borrowed.

Your turn

- *Say it: ja nai*
- *Say it: mizu ja nai* — It isn't water
- *Recall:* say *I get up*, then *I don't get up*: *okimasu*, *okimasen*

Before you move on

How do you say "is not", plainly? (じゃない, *ja nai*.) Say it once more.

139.4 なにも (nani mo) — nothing, not anything (with a negative verb)

Four recalls before the new word.

- *Recall:* say *is not*, plainly — **R1**, one lesson back
- *Recall:* say *I go home*, politely — **R2**, five lessons back
- *Recall:* say *full; a lot* — **R3**, twenty lessons back
- *Recall:* say *a little; a moment* — **R4**, eighty lessons back

You'll want to know: なにも

なにも — *nani mo* — "nothing", "not anything". It pairs with a negative verb: Japanese says "anything ... not", where English says "nothing".

> なにも のみません。 — *nani mo nomimasen* — "I don't drink anything."

のむ, *nomu*, "to drink", gives のみます *nomimasu* and then のみません *nomimasen*. With ます instead of ません the sentence does not work: なにも needs the *not*.

The word, taken apart

なにも (*nani mo*) is native: *nani*, "what", with *mo*, "even, also" (JMdict). It is inherited rather than borrowed.

Your turn

- *Say it: nani mo*
- *Say it: nani mo nomimasen* — I don't drink anything
- *Recall:* say *I don't eat anything*: *nani mo tabemasen*

Before you move on

How do you say "nothing", with a negative verb? (なにも, *nani mo*.) Say it once more.

139.5 だれも (dare mo) — nobody, not anyone (with a negative verb)

Four recalls before the new word.

- *Recall:* say *nothing*, with a negative verb — **R1**, one lesson back
- *Recall:* say *I go to bed*, politely — **R2**, five lessons back
- *Write it:* ぱ from memory — **R3**, twenty lessons back
- *Write it:* small ょ from memory — **R4**, eighty lessons back

You'll want to know: だれも

だれも — *dare mo* — "nobody", "not anyone". Like なにも, it needs a negative verb.

> ここには だれも いません。 — *koko ni wa dare mo imasen* — "There is nobody here."

いません, *imasen*, is the negative of います, *imasu*, "someone is there", the verb Japanese uses for people and animals.

The word, taken apart

だれも (*dare mo*) is native: *dare*, "who", with *mo*, "even, also" (JMdict). It is inherited rather than borrowed.

Your turn

- *Say it: dare mo*
- *Say it: koko ni wa dare mo imasen* — There is nobody here
- *Recall:* say *nothing*, then *nobody*, each with a negative verb

Before you move on

How do you say "nobody", with a negative verb? (だれも, *dare mo*.) Say it once more.

139.6 どこにも (doko ni mo) — nowhere, not anywhere (with a negative verb)

Four recalls before the new word.

- *Recall:* say *nobody*, with a negative verb — **R1**, one lesson back
- *Recall:* ask *is it …?*, politely — **R2**, five lessons back
- *Recall:* say *worry* — **R3**, twenty lessons back
- *Recall:* say *a library* — **R4**, eighty lessons back

You'll want to know: どこにも

どこにも — *doko ni mo* — "nowhere", "not anywhere". It is どこ, "where", with に for the place you go to and も, and like the other two it needs a negative verb.

> あしたは どこにも いきません。 — *ashita wa doko ni mo iki-masen* — "I'm not going anywhere tomorrow."

Now you can ask and answer:

> あした はたらきますか。 — "Are you working tomorrow?"
> いいえ、はたらきません。どこにも いきません。 — "No, I'm not. I'm not going anywhere."

The word, taken apart

どこにも (*doko ni mo*) is native: *doko*, "where", the particle *ni*, "at", and *mo*, "even, also" (JMdict). It is inherited rather than borrowed.

Your turn

- *Say it: doko ni mo*
- *Say it: ashita wa doko ni mo ikimasen* — I'm not going anywhere tomorrow
- *Recall:* ask *Is this water?* (*desu ka*), answer *No, that is not right* (*chigaimasu*), say *It isn't water* plainly (*ja nai*), then *nothing*, *nobody* and *nowhere*, each with a negative verb

Before you move on

Is it ...? (ですか, *desu ka.*) No, that is not right? (ちがいます, *chigaimasu.*) Is not, plainly? (じゃない, *ja nai.*) Nothing? (なにも, *nani mo.*) Nobody? (だれも, *dare mo.*) Nowhere? (どこにも, *doko ni mo.*)

Chapter 140

Last Week, Last Month, Last Year: the Past

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what I did and did not do, and when: last week, last month, last year, a moment ago.
>
> *Say what you did and did not do with -mashita and -masen deshita, placing each with senshuu, sengetsu, kyonen or sakki, and end with owarimashita.*

140.1 せんしゅう (senshū) — last week

Four recalls before the new word.

- *Recall:* say *nowhere*, with a negative verb — **R1**, one lesson back

- *Recall:* say *a pencil* — **R3**, twenty lessons back
- *Recall:* ask for *tea, please*, with the particle を — **R4**, eighty lessons back

You'll want to know: せんしゅう

せんしゅう — *senshū* — "last week". It sits beside こんしゅう, *konshū*, "this week", which you already know.

To say what happened, the polite verb changes ます to ました, *mashita*:

せんしゅう はたらきました。 — *senshū hatarakimashita* — "I worked last week."

はたらきます → はたらきました, ねます → ねました. Every polite verb makes its past this way.

The word, taken apart

せんしゅう (*senshū*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *sen*, "before, previous" (Middle Chinese *sen*) and *shū*, "week" (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: senshū*
- *Say it: senshū hatarakimashita* — I worked last week
- *Recall:* say *I go home*, then *I went home*: *kaerimasu*, *kaerimashita*

Before you move on

What is "last week"? (せんしゅう, *senshū*.) Say it once more.

140.2 せんげつ (sengetsu) — last month

Four recalls before the new word.

- *Recall:* say *last week* — **R1**, one lesson back
- *Recall:* say *is not*, plainly — **R2**, five lessons back
- *Write it:* ぴ from memory — **R3**, twenty lessons back
- *Write it:* を from memory — **R4**, eighty lessons back

You'll want to know: せんげつ

せんげつ — *sengetsu* — "last month". The せん at its start is the same as in せんしゅう: "the one before".

せんげつ うみに いきました。 — *sengetsu umi ni ikimashita* — "I went to the sea last month."

いく, *iku*, "to go", gives いきます and then いきました.

The word, taken apart

せんげつ (*sengetsu*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *sen*, "before, previous" (Middle Chinese *sen*) and *getsu*, "moon, month" (*ngjwot*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: sengetsu*
- *Say it: sengetsu umi ni ikimashita* — I went to the sea last month
- *Recall:* say *last week*, then *last month*

Before you move on

What is "last month"? (せんげつ, *sengetsu*.) Say it once more.

140.3 きょねん (kyonen) — last year

Three recalls before the new word.

- *Recall:* say *last month* — **R1**, one lesson back
- *Recall:* say *nothing*, with a negative verb — **R2**, five lessons back
- *Recall:* say *one small animal* — **R3**, twenty lessons back

You'll want to know: きょねん

きょねん — *kyonen* — "last year". It sits beside ことし, *kotoshi*, "this year".

To say what did NOT happen, the polite negative ません adds でした, *deshita*: ませんでした, *masen deshita*.

> きょねん どこにも いきませんでした。 — *kyonen doko ni mo ikimasen deshita* — "Last year I didn't go anywhere."

form	now, or as a plan	before now
affirmative	いきます	いきました
negative	いきません	いきませんでした

The word, taken apart

きょねん (*kyonen*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *kyo*, "go away, past" (Middle Chinese *khjoH*) and *nen*, "year" (*nen*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: kyonen*
- *Say it: kyonen doko ni mo ikimasen deshita* — Last year I didn't go anywhere
- *Recall:* say *I didn't work*: *hatarakimasen deshita*

Before you move on

140.4 さっき (sakki) — a moment ago, a little while ago

Four recalls before the new word.

- *Recall:* say *last year* — **R1**, one lesson back
- *Recall:* say *nobody*, with a negative verb — **R2**, five lessons back
- *Recall:* say *a ticket* — **R3**, twenty lessons back
- *Recall:* say *there*, near the listener — **R4**, eighty lessons back

You'll want to know: さっき

さっき — *sakki* — "a moment ago", "a little while ago": earlier today, not long before now. The small っ holds the beat before *ki*.

> さっき おきました。 — *sakki okimashita* — "I got up a little while ago."

The word, taken apart

さっき (*sakki*) is native, usually explained as *saki*, "earlier, ahead", with the *k* doubled; JMdict writes both with the same character. It is inherited rather than borrowed.

Your turn

- *Say it: sakki*
- *Say it: sakki okimashita* — I got up a little while ago
- *Recall:* say *last year*, then *a moment ago*, and say which is closer to now

Before you move on

What is "a moment ago"? (さっき, *sakki*.) Say it once more.

140.5 おわりました (owarimashita) — it finished, it is over (polite past)

Four recalls before the new word.

- *Recall:* say *a moment ago* — **R1**, one lesson back
- *Recall:* say *nowhere*, with a negative verb — **R2**, five lessons back
- *Write it:* ぶ from memory — **R3**, twenty lessons back
- *Write it:* そ from memory — **R4**, eighty lessons back

You'll want to know: おわりました

おわりました — *owarimashita* — "it finished", "it is over". It is the polite past of おわる, *owaru*, "to come to an end", which follows the *-u* pattern: る becomes り, then ました.

> しごとが おわりました。 — *shigoto ga owarimashita* — "Work is over; I have finished work."

Now you can say what you did, and when:

> せんしゅう はたらきました。 — "I worked last week."

> きょねん どこにも いきませんでした。 — "Last year I didn't go anywhere."

The word, taken apart

おわりました (*owarimashita*) is native *owaru*, "to end", with *-mashita*, the past of the polite ending *-masu*. The verb is inherited rather than borrowed (JMdict).

- *Recall:* say what you did: *senshū* (last week), *sengetsu* (last month), *kyonen* (last year) and *sakki* (a moment ago), each with a verb in *-mashita* or *-masen deshita*, and end with *owarimashita*

Before you move on

Last week? (せんしゅう, *senshū*.) Last month? (せんげつ, *sengetsu*.) Last year? (きょねん, *kyonen*.) A moment ago? (さっき, *sakki*.) It is over? (おわりました, *owarimashita*.)

Chapter 141

Next Week, Next Year: Plans and the Future

Modes: 🚗 **voice** (5) 🚗 **Hands-free start:** all 5 lessons.

> ***By the end of this chapter:*** I can say what I will do, what I plan to do and what will probably happen, and when: next week, next month, next year.
>
> *Say what you will do next week, next month and next year with a verb in -masu, give one plan with tsumori desu, and make one guess with deshou.*

141.1 らいしゅう (raishū) — next week

Four recalls before the new word.

- *Recall:* say *it is over*, politely — **R1**, one lesson back
- *Recall:* say *last week* — **R2**, five lessons back
- *Recall:* say *tempura* — **R3**, twenty lessons back
- *Recall:* say *outside* — **R4**, eighty lessons back

You'll want to know: らいしゅう

らいしゅう — *raishū* — "next week": せんしゅう, こんしゅう, らいしゅう, last week, this week, next week.

Japanese has no separate future tense. The polite present ます says what will happen too, and a time word places it:

らいしゅう はたらきます。 — *raishū hatarakimasu* — “I will work next week.”

The word, taken apart

らいしゅう (*raishū*) is Sino-Japanese (kango): two Chinese characters read with their on’yomi, readings borrowed from Chinese. They are *rai*, “come, coming” (Middle Chinese *loj*) and *shū*, “week” (Unihan, KANJIDIC2; Middle Chinese in Baxter’s transcription).

Your turn

- *Say it: raishū*
- *Say it: raishū hatarakimasu* — I will work next week
- *Recall:* say *last week*, *this week*, *next week*

Before you move on

What is “next week”? (らいしゅう, *raishū*.) Say it once more.

141.2 らいげつ (raigetsu) — next month

Four recalls before the new word.

- *Recall:* say *next week* — **R1**, one lesson back
- *Recall:* say *last month* — **R2**, five lessons back
- *Recall:* say *fluent* — **R3**, twenty lessons back
- *Recall:* say *this*, near the speaker — **R4**, eighty lessons back

You’ll want to know: らいげつ

らいげつ — *raigetsu* — “next month”. The らい at its start is the same as in らいしゅう: “the one coming”.

らいげつ うみに いきます。 — *raigetsu umi ni ikimasu* — “I will go to the sea next month.”

The word, taken apart

らいげつ (*raigetsu*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *rai*, "come, coming" (Middle Chinese *loj*) and *getsu*, "moon, month" (*ngjwot*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: raigetsu*
- *Say it: raigetsu umi ni ikimasu* — I will go to the sea next month
- *Recall:* say *last month*, then *next month*

Before you move on

What is "next month"? (らいげつ, *raigetsu*.) Say it once more.

141.3 らいねん (rainen) — next year

Four recalls before the new word.

- *Recall:* say *next month* — **R1**, one lesson back
- *Recall:* say *last year* — **R2**, five lessons back
- *Write it:* ペ from memory — **R3**, twenty lessons back
- *Write it:* れ from memory — **R4**, eighty lessons back

You'll want to know: らいねん

らいねん — *rainen* — "next year": きょねん, ことし, らいねん, last year, this year, next year.

> らいねん ともだちと やまに いきます。 — *rainen tomodachi to yama ni ikimasu* — "Next year I will go to the mountains with a friend." The particle と means "with".

The word, taken apart

らいねん (*rainen*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *rai*, "come, coming" (Middle Chinese *loj*) and *nen*, "year" (*nen*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: rainen*
- *Say it: rainen tomodachi to yama ni ikimasu* — Next year I will go to the mountains with a friend
- *Recall:* say *next week*, *next month*, *next year*

Before you move on

What is "next year"? (らいねん, *rainen*.) Say it once more.

141.4 つもり (tsumori) — an intention, a plan (I mean to ...)

Three recalls before the new word.

- *Recall:* say *next year* — **R1**, one lesson back
- *Recall:* say *a moment ago* — **R2**, five lessons back
- *Recall:* say *that*, near the listener — **R4**, eighty lessons back

You'll want to know: つもり

つもり — *tsumori* — "an intention", "a plan": what you mean to do. It follows a verb in its dictionary form, and です closes the sentence.

> らいねん　うみに　いく　つもりです。 — *rainen umi ni iku tsumori desu* — "I plan to go to the sea next year."

Here the dictionary form matters: *iku*, not *ikimasu*, comes before つもり. ます goes at the very end of a polite sentence, and です does that job here.

The word, taken apart

つもり (*tsumori*) is native: the noun made from *tsumoru*, "to pile up, to estimate", by its stem, and JMdict writes both with the same kanji. It is inherited rather than borrowed, and usually written in kana (JMdict, KANJIDIC2).

Your turn

- *Say it: tsumori*
- *Say it: rainen umi ni iku tsumori desu* — I plan to go to the sea next year
- *Recall:* say *I plan to work next week*: *raishū hataraku tsumori desu*

Before you move on

What is "a plan", what you mean to do? (つもり, *tsumori*.) Say it once more.

141.5 でしょう (deshō) — probably; it will ..., I expect

Four recalls before the new word.

- *Recall:* say *a plan*, what you mean to do — **R1**, one lesson back
- *Recall:* say *it is over*, politely — **R2**, five lessons back
- *Recall:* say *I get up*, politely — **R3**, twenty lessons back
- *Recall:* say *a car* — **R4**, eighty lessons back

You'll want to know: でしょう

でしょう — *deshō* — "probably", "it will ..., I expect". It closes a sentence about something you think will happen but cannot be sure of, the way a weather forecast does.

あしたは すずしいでしょう。 — *ashita wa suzushii deshō* — "It will probably be cool tomorrow."

Now you can talk about what comes next: what will happen (ます with a time word), what you mean to do (つもり), and what will probably happen (でしょう).

The word, taken apart

でしょう (*deshō*) is *desu*, the polite "is", in the form for what is likely (JMdict). Where *desu* comes from is disputed: shortenings of *de arimasu*, *de gozaimasu* and *de sōrō* are all proposed.

Your turn

- *Say it: deshō*
- *Say it: ashita wa suzushii deshō* — It will probably be cool tomorrow
- *Recall:* say what comes next: *raishū* (next week), *raigetsu* (next month) and *rainen* (next year), each with a verb in *-masu*, then one plan with *tsumori desu*, and one guess with *deshō*

Before you move on

Next week? (らいしゅう, *raishū.*) Next month? (らいげつ, *raigetsu.*) Next year? (らいねん, *rainen.*) A plan? (つもり, *tsumori.*) Probably? (でしょう, *deshō.*)

Chapter 142

Notices: Caution, No Smoking, Reception, Open

Modes: 🚗 **voice** (7) 🚗 **Hands-free start:** all 7 lessons.

> ***By the end of this chapter:*** I can read short notices and door signs, such as caution, no smoking, reception, open and not yet open, and act on what they ask of me.
>
> *Read caution, no smoking, reception, open and not yet open, then read a three-line notice on a clinic door and say what you do; say next week, next month, next year, a plan and probably.*

142.1 ちゅうい (chūi) — caution, take care (on a sign)

Four recalls before the new word.

- *Recall:* say *probably* — **R1**, one lesson back
- *Recall:* say *next week* — **R2**, five lessons back
- *Recall:* say *I work*, politely — **R3**, twenty lessons back
- *Write it:* る from memory — **R4**, eighty lessons back

You'll want to know: ちゅうい

ちゅうい — *chūi* — "caution", "take care". It heads warning signs and notices. The small ゅ joins ち into one beat, *chu*, and う holds it long: *chū*, then *i*. On a real sign this word is usually printed in kanji, which this book has not reached yet; the reading is the same.

くるまに ちゅうい — *kuruma ni chūi* — “Watch out for cars.”

Read a notice like this and act on it: stop, look, and cross with care.

The word, taken apart

ちゅうい (*chūi*) is Sino-Japanese (kango): two Chinese characters read with their on’yomi, readings borrowed from Chinese. They are *chū*, “pour; direct” (Middle Chinese *tsyuH*) and *i*, “thought, mind” (*’iH*) (Unihan, KANJIDIC2; Middle Chinese in Baxter’s transcription).

Your turn

- *Say it: chūi*
- *Read it:* くるまに ちゅうい — and say what it asks you to do
- *Recall:* say *a car*, then read *watch out for cars* aloud

Before you move on

What does ちゅうい on a sign mean? (“Caution”, take care.) Say it once more.

142.2 きんえん (kin’en) — no smoking (on a sign)

Three recalls before the new word.

- *Recall:* read *caution* on a sign — **R1**, one lesson back
- *Recall:* say *next month* — **R2**, five lessons back
- *Recall:* say *I walk*, politely — **R3**, twenty lessons back

You’ll want to know: きんえん

きんえん — *kin’en* — “no smoking”. The apostrophe in the romanization keeps *kin* and *en* apart: four beats, *ki–n–e–n*. On a real sign this word is usually printed in kanji, which this book has not reached yet; the reading is the same.

きんえん

ここで たばこを すわないで ください。 — *koko de tabako o suwanaide kudasai* — “Please do not smoke here.”

すう, *suu*, the verb you know for breathing in, also means to smoke. Its negative stem すわ with ないで ください asks you politely not to do it.

The word, taken apart

きんえん (*kin'en*) is Sino-Japanese (kango): two Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *kin*, “forbid” (Middle Chinese *kimH*) and *en*, “smoke” (*'en*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: kin'en*
- *Read it:* ここで たばこを すわないで ください — and say what it asks
- *Recall:* read *caution*, then *no smoking*, as they appear on signs

Before you move on

What does きんえん on a sign mean? (“No smoking”.) Say it once more.

142.3 うけつけ (uketsuke) — a reception desk, reception

Four recalls before the new word.

- *Recall:* read *no smoking* on a sign — **R1**, one lesson back
- *Recall:* say *next year* — **R2**, five lessons back
- *Recall:* say *I go home*, politely — **R3**, twenty lessons back
- *Recall:* say *a station* — **R4**, eighty lessons back

You'll want to know: うけつけ

うけつけ — *uketsuke* — "reception", "a reception desk": where you check in at a hospital, an office or a school. On a real sign this word is usually printed in kanji, which this book has not reached yet; the reading is the same.

> うけつけで なまえを かいて ください。 — *uketsuke de namae o kaite kudasai* — "Please write your name at reception."

かく, *kaku*, "to write", becomes かいて before ください. The notice tells you what to do: go to the desk, and write your name.

The word, taken apart

うけつけ (*uketsuke*) is a native compound, inherited rather than borrowed: *uke*, "receiving", from *ukeru*, and *tsuke*, "attaching, noting", from *tsukeru* (JMdict, KANJIDIC2).

Your turn

- *Say it: uketsuke*
- *Read it:* うけつけで なまえを かいて ください — and say what you do first
- *Recall:* say *a hospital*, then where you go first inside it

Before you move on

What is うけつけ? ("Reception", the desk where you check in.) Say it once more.

142.4 えいぎょうちゅう (eigyōchū) — open, open for business (on a shop door)

Four recalls before the new word.

- *Recall:* read *reception* on a sign — **R1**, one lesson back
- *Recall:* say *a plan*, what you mean to do — **R2**, five lessons back
- *Recall:* say *I go to bed*, politely — **R3**, twenty lessons back
- *Write it:* き from memory — **R4**, eighty lessons back

You'll want to know: えいぎょうちゅう

えいぎょうちゅう — *eigyōchū* — "open", "open for business", on a small sign hung on a shop or restaurant door. ちゅう at the end means "in the middle of": the shop is in the middle of doing business. Eight signs make six beats, *e–i–gyo–o–chu–u*: each small sign joins the one before it, and each う holds the sound before it long. On a real sign this word is usually printed in kanji, which this book has not reached yet; the reading is the same.

Read it: the door sign and act on it

The door says えいぎょうちゅう, so you can go in.

The word, taken apart

えいぎょうちゅう (*eigyōchū*) is Sino-Japanese (kango): three Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *ei*, "manage" (Middle Chinese *yweng*), *gyō*, "business, trade" (*ngjaep*) and *chū*, "middle, during" (*trjuwng*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: eigyōchū*
- *Read it:* えいぎょうちゅう on a door — and say whether you can go in
- *Recall:* read *reception*, then *open*

Before you move on

What does えいぎょうちゅう on a door mean? ("Open", for business.) Say it once more.

142.5 じゅんびちゅう (junbichū) — getting ready, not yet open (on a shop door)

Four recalls before the new word.

- *Recall:* read *open* on a shop door — **R1**, one lesson back
- *Recall:* say *probably* — **R2**, five lessons back

- *Recall:* ask *is it …?*, politely — **R3**, twenty lessons back
- *Recall:* say *yesterday* — **R4**, eighty lessons back

You'll want to know: じゅんびちゅう

じゅんびちゅう — *junbichū* — "getting ready", "not yet open": the other side of the same door sign. じゅんび is preparation, and ちゅう again means "in the middle of". On a real sign this word is usually printed in kanji, which this book has not reached yet; the reading is the same.

Read it: the door sign and act on it

The door says じゅんびちゅう, so the shop is not open yet. Wait, or come back later.

> いまは じゅんびちゅうです。 — *ima wa junbichū desu* — "We are getting ready now; not open yet."

The word, taken apart

じゅんびちゅう (*junbichū*) is Sino-Japanese (kango): three Chinese characters read with their on'yomi, readings borrowed from Chinese. They are *jun*, "standard" (Middle Chinese *tsywinX*), *bi*, "prepare" (*bijH*) and *chū*, "middle, during" (*trjuwng*) (Unihan, KANJIDIC2; Middle Chinese in Baxter's transcription).

Your turn

- *Say it: junbichū*
- *Read it:* じゅんびちゅう on a door — and say what you do
- *Recall:* read *open*, then *not yet open*, and say which one lets you in

Before you move on

What does じゅんびちゅう on a door mean? ("Getting ready", not yet open.) Say it once more.

142.6 My day, saying no, and the past — a first pass

Four recalls, then the review.

- *Recall:* read *getting ready, not yet open* on a shop door — **R1**, one lesson back
- *Recall:* read *caution* on a sign — **R2**, five lessons back
- *Recall:* answer *no, that is not right* — **R3**, twenty lessons back
- *Recall:* say *a pond* — **R4**, eighty lessons back

Your turn

Say each one in Japanese.

Say these aloud:

- I get up, I work, I walk, I go home, I go to bed — politely
- is it ...?, no, that is not right, is not (plainly)
- nothing, nobody, nowhere — each with a negative verb
- last week, last month, last year, a moment ago, it is over

Then say three sentences: what you did last week (ました), what you did not do last year (ませんでした), and a question about tomorrow (ますか).

Before you move on

I get up? (おきます, *okimasu.*) I work? (はたらきます, *hatarakimasu.*) I walk? (あるきます, *arukimasu.*) I go home? (かえります, *kaerimasu.*) I go to bed? (ねます, *nemasu.*) Is it ...? (ですか, *desu ka.*) No, that is not right? (ちがいます, *chigaimasu.*) Is not? (じゃない, *ja nai.*) Nothing? (なにも, *nani mo.*) Nobody? (だれも, *dare mo.*) Nowhere? (どこにも, *doko ni mo.*) Last week? (せんしゅう, *senshū.*) Last month? (せんげつ, *sengetsu.*) Last year? (きょねん, *kyonen.*) A moment ago? (さっき, *sakki.*) It is over? (おわりました, *owarimashita.*)

142.7 The future and notices — a second pass

Three recalls, then the review.

- *Recall:* read *no smoking* on a sign — **R2**, five lessons back
- *Recall:* say *is not*, plainly — **R3**, twenty lessons back
- *Write it:* け from memory — **R4**, eighty lessons back

Your turn

Say each one in Japanese.

- *Say it:* next week, next month, next year, a plan, probably
- *Read it:* ちゅうい, きんえん, うけつけ, えいぎょうちゅう, じゅんびちゅう — and say what each sign asks of you

Read it: this notice on a clinic door, then say what you do

じゅんびちゅう

うけつけで なまえを かいて ください。

きんえん

(It is not open yet; when it opens, write your name at reception; do not smoke.) Last, say one plan for next year with つもり.

Before you move on

Next week? (らいしゅう, *raishū.*) Next month? (らいげつ, *raigetsu.*) Next year? (らいねん, *rainen.*) A plan? (つもり, *tsumori.*) Probably? (でしょう, *deshō.*) Caution? (ちゅうい, *chūi.*) No smoking? (きんえん, *kin'en.*) Reception? (うけつけ, *uketsuke.*) Open? (えいぎょうちゅう, *eigyōchū.*) Not yet open? (じゅんびちゅう, *junbichū.*)

Chapter 143

Writing: My Own Line

Modes: ↙ **pen** (1) 🚗 **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can write one line of Japanese about my day from a closed supply of known words, with nothing to copy, and write every small sign small.
>
> *Complete JA-W143-my-own-line: a time word, a polite verb and a full stop, chosen rather than copied, with the small signs checked before anything else.*

143.1 My own line — the first Japanese with no model

> Everything you have written so far had something to reach for: a sign to trace, a word to copy, a word someone said.
>
> This does not. You choose the words, from a supply that is closed: only what this book has taught you.

Writing — controlled composition

Write **one line** about your own day, in hiragana. A time word first, then what you do, ending on a polite verb in ます and a small circle, 。, after it. You do not need to say who; you learned in chapter 138 that Japanese leaves that out when it is clear. If you mark a topic with *wa*, write it は.

Before you start, one thing to decide on purpose rather than by accident: **a small sign is a different sign, not a smaller copy.**

っ is not つ written lazily. It is one held beat, and it sits small and low in its square. Write きつぷ for きっぷ, a ticket, and you have written a word that does not exist. The same goes for ゅ in しゅみ: full size, it reads as two beats instead of one.

Two more checks belong to the hand, not the eye. Give every sign **the same size of square**, small signs included. And write each sign in the **stroke order** you learned: the order does not show on the finished line, but it is what keeps the shape right when you write fast, which the next lesson will ask you to do.

Write the line. Then read it back and check the **small signs** before you check anything else.

Before you move on

Is a small っ just つ, written smaller? (**No** — it is another sign, one held beat.)
If your line has a topic marked **wa**, which sign did you write for it? (は, as you learned in the first chapters.)
And what did you choose here that the earlier lessons chose for you? (**The words.**)

Chapter 144

Writing: With a Clock

Modes: ↙ **pen** (1) 🚗 **Hands-free start:** its only lesson.

> ***By the end of this chapter:*** I can fill in a five-field form inside a three-minute clock, I know the 30-40 sign message this book's A1 paper adds, and I know that the JLPT has no writing paper to rehearse.
>
> *Complete JA-W144-with-a-clock: five form fields against a three-minute timer, then at most one minute checking the small signs.*

144.1 The same writing, with a clock

You wrote your own line with as long as you liked.

A task you can only do untimed is not yet a task you can do.

Writing — timed production

What the real exam publishes, and what it does not. The JLPT, the receptive test this track anchors to, has **no writing paper** at any level. It tests vocabulary and grammar, reading and listening, and nothing a candidate writes is scored. So there is no official A1 writing clock to rehearse against, and this lesson does not pretend there is one.

The task comes instead from the JF Standard's A1 Can-dos, which follow the CEFR: complete a small form, and write a short personal message. This track's assessment contract sets that message at **30 to 40 signs**, for a reader you name, such as a ともだち. Japanese has no spaces to count words by, so length is counted in signs: every kana counts as one, small っ and ゆ

included. Under thirty and the message is not done; well past forty and you spent minutes the task did not ask for.

Today you rehearse the form only, against **this book's own clock**, not a published one. Set a **three-minute timer**, then fill five fields: なまえ, とし, しごと, しゅみ, かぞく. Fill every one. If a field needs a word this book has not given you, write a number or the nearest word you own; never look one up.

Speed is where stroke order shows. A sign written in the order you learned keeps its shape when you hurry; one written out of order is the one that falls apart. When the three-minute timer rings, **stop**, even mid-sign.

Before you move on

Spend at most one minute checking, and do not rewrite the timed answer. Did you write しゅみ with a small ゅ? Under a clock, that is the sign a hurried hand writes full size.
Now the rule worth carrying out of this lesson. JLPT N5 passes on **80 of 180** overall, and a candidate also needs **38 of 120** on vocabulary, grammar and reading together and **19 of 60** on listening. Below either, the candidate fails, whatever the total says. Writing appears nowhere in those numbers. A JLPT pass says nothing about what you just did, which is why this book scores writing as **its own paper**: 60 of 100, never averaged against the others.

Chapter 145

Writing: Four Lines, and the Joint You Do Not Write

Modes: ↙ **pen** (1) 🚗 **Hands-free start:** none (1 lesson).

> ***By the end of this chapter:*** I can write four connected lines of Japanese to a named friend, walking through my day with time words and naming who does it at most once.
>
> *Complete JA-W145-four-lines: a greeting and three lines of your day in order, each opening on a time word and closing on a polite verb, then count how many lines name who does it.*

145.1 Four lines, and the joint you do not write

> The last lesson asked for writing **finished on time**. This one asks for writing that **holds together**.
>
> Pick one ともだち who will read it.

What to know first

Connected writing is not **longer** writing. Four short lines can be connected; one long line can fail to be. What makes it connected is that a line stops standing on its own.

In many languages the joints are little words between the sentences. This book has not taught you those for Japanese, and you do not need them yet. Your four lines are held together by two things you already own.

The first is a time word at the front of each line. あさ, then ゆうがた: the reader follows your day because each line says where in it they are.

The second is the joint you do not write. Chapter 138 taught you that Japanese leaves out who does it when that is clear. Say who once, or not at all, and every line after it leans on the one before. Name yourself in every line and you have written a **list**, not a message.

Writing — connected composition

Write **four lines** to the ともだち you picked. The first greets them with こんにちは. The other three walk through your day in order, each opening on a time word and closing on a polite verb: おきます, はたらきます, かえります or ねます.

Use only words you already write. This lesson adds no vocabulary; the whole exercise is the joining.

End every line with 。, a small open circle, not a dot.

Before you move on

Read your third line alone. It names no one: who comes home, or goes to bed? Only the lines before it say. It leans on its neighbours, and that is what connected means.
Then count how many lines name who does it. If every line does, you wrote a list, which is where you were one lesson ago.

Pronunciation & Writing Reference

A **reference**, not a chapter. Look a sound up when a lesson names it; do not read this page first. Japanese script is taught inside words the learner can already use, one sign at a time.

Romanization on this track is Hepburn with macrons (*arigatō*, *kōhī*). It is temporary scaffolding. Where a lesson is teaching beat count, it also spells the word out mora by mora (*a-ri-ga-to-o*), because a macron hides exactly the thing being taught.

The writing system in four facts

1. **There are three systems, and they run together.** An ordinary sentence uses all three at once: **hiragana** for grammar, **kanji** for content words, **katakana** for borrowings. None of them is a stage the others replace.
2. **Hiragana and katakana are moraic twins.** One sign is one beat, normally a consonant plus a vowel already fused. The two sets cover the same beats with different shapes; katakana marks a word as coming from outside.
3. **Kanji carry meaning, not a fixed sound.** 日 is read *nichi*, *jitsu*, *hi*, *bi*, or *ka*. A lesson therefore teaches the reading a **word** uses, never "the sound of the character."
4. **Beats are counted, not stressed.** Every mora is the same length, and length is contrastive: いえ (2 beats) is a house, いいえ (3) is "no."

Japanese has no case, no grammatical gender, no articles, and no plural agreement — so several standing methods in this curriculum simply do not

apply here. It does have an obligatory politeness level on every predicate, which nothing else in the corpus has.

Sound ids used by the Chapter 1 lessons

- `mora` — give every written sign one equal beat; do not stress one over another. First anchor: はい *hai*.
- `pure-vowels` — five vowels, held steady, no English glide: *a, i, u, e, o*. First anchor: はい *hai*.
- `mora-length` — a long vowel is a second beat, and it changes meaning. First anchor: いいえ *iie* against いえ *ie*.
- `moraic-n` — ん is a consonant that owns a whole beat of its own. First anchor: こんにちは *konnichiwa*.
- `particle-wa` — the sign は is read *wa* when it is working as the topic particle. First anchor: こんにちは.
- `chouon` — the katakana bar ー adds one more beat of the vowel before it. First anchor: コーヒー *kōhī*.
- `dakuten` — two short strokes voice a kana: *ka*→*ga*, *sa*→*za*, *ta*→*da*, *ha*→*ba*. First anchor: ありがとう *arigatō*.
- `long-o` — in hiragana a long *o* is normally written with う, not a bar. First anchor: ありがとう *arigatō*.

Two things this page deliberately does not do

It does not print the kana chart. A learner who wants the full grid will find it anywhere; a learner who is told to memorise it before Lesson 1 usually stops there, which is the wall HL00 exists to remove.

It does not claim a stroke count as a prerequisite. Stroke order for kana and kanji is real and taught, and it lives in Japanese script reference beside each sign, to be consulted when a hand is free.

Sources for this starter edition

Word histories follow Wiktionary's Japanese entries for hai, konnichiwa, arigatou, and コーヒー. The farewell chapter follows the Japan Foundation's Marugoto A1 vocabulary entry and the context-sensitive Starter treatment in Irodori lesson 1. The companion Markdown lessons carry the per-lesson citations and are the canonical short-practice source for this edition; the chapter that follows is generated from them, so the two cannot drift apart.
